# Proposed Typical Section

# Working Group Requests & Considerations for Commitments

- Relocate water treatment plant.
- Move alignment farther south and west to:
  - + Lessen loss of good habitat
  - + Distance it from scrub jay area
  - + Protect ability to manage land by prescribed burns
- Ensure access to the Florida National Scenic Trail through the corridor and Moss Park.
- Have reputable land trust or government agencies hold conservation property and restrict its future use through recorded conservation easements.
- Prevent third-party conservation offer from diminishing Tavistock's and Deseret Ranches' mitigation requirements.
- Provide matching acreage for the mitigation credits that were sold for gopher tortoise habitat.
- Ensure dedicated land is of high quality to replace SOFWEA land impacted by roadway.
- Incorporate the 102-acre pine area off Lake Mary Jane Road into the conservation picture.
- Ensure the floodplain compensation area does not affect quality lands and does not destroy habitat.
- Break down uplands and wetlands in both impact area and remainder for each alternative.
- Assure linkage of Split Oak, Moss Park, Isle of Pines Preserve and the newly dedicated lands to regional wildlife corridors.
- Provide adequate funding for restoration and management dedicated land to ensure that impacted portions are returned and maintained as high quality habitat.

### OSCEOLA PARKWAY EXTENSION

#### STAKEHOLDER MEETING SUMMARY:

**PROJECT NAME:** Osceola Parkway Extension PD&E Study Re-evaluation  
**PROJECT NUMBER:** 599-223A  
**DATE:** October 24, 2019  
**TIME:** 11 a.m. – 1 p.m.  
**LOCATION:** Central Florida Expressway Authority, 4974 ORL Tower Rd., Orlando

#### ATTENDEES:

Laura Kelley, CFX	Renzo Nastasi, Orange County	Dan Kristoff, RS&H
Michelle Maikisch, CFX	Beth Jackson, Orange County	Kelsey Lucas, RS&H
Glenn Pressimone CFX	Tawny Olore, Osceola County	Jonathan Williamson, Dewberry
Will Hawthorne, CFX	Bob Mindick, Osceola County	Nicole Gough, Dewberry
Brian Hutchings, CFX		Mary Brooks, Quest
Richard Brightman, Hopping, Green & Sam		

---

A meeting was held on October 24, 2019 at the Central Florida Expressway Authority with the above referenced attendees to discuss matters relating to the Osceola Parkway Extension Project Development and Environment (PD&E) Study Re-evaluation.

Following introductions, the consultant project manager, Dan Kristoff of RS&H, provided an overview of the PD&E Study corridor and alternatives. A PowerPoint presentation was shared that included background on the study corridor. It was noted this is not a new PD&E, but an extension or carrying on of a previous study approved by the former Osceola County Expressway Authority (OCX).

Mr. Kristoff reviewed the study methodology, including compliance with the FDOT PD&E Study Manual. The goal is to produce a Project Environmental Impact Report (PEIR) identifying a preferred alternative. It was noted that study activities have included refining some previously studied alternatives, as well as developing new ones.

There was discussion about public involvement activities having centered on extensive stakeholder meetings.

Mr. Kristoff went over the major constraints in the study area and reviewed the typical section and various alignment alternatives. He described in detail the location and attributes of the Boggy Creek and Lake Nona alternatives on the west end of the study area, and the Split Oak Avoidance and Split Oak Minimization alternatives on the east end.

Renzo Nastasi, Orange County Transportation Planning Manager, asked if CFX had determined a preferred alternative, and if so, was it the Lake Nona or Boggy Creek alternative. It was noted that would be discussed later in the presentation.

CFX Chief of Infrastructure Glenn Pressimone noted that should the project move forward to design, there is flexibility in where the interchange south of the ramps to Laureate Road could be located. The location would take into account the local road circulation network in the adjacent future development.

Mr. Kristoff noted that the study has coordinated with various developments along the corridor, including those that have not begun construction. Mr. Nastasi asked if that included Eagle Creek and Fells Landing? Mr. Kristoff noted yes, and that per discussions with Eagle Creek, the developer has refrained from putting vertical construction where we'd like to put the expressway. He added, however, there have been no formal commitments made in this regard, though it looks like they're trying to work with CFX.

Mr. Kristoff stated that regarding Fells Landing, we would maintain a buffer and have room to put in landscaping. If it was found during design that noise barriers were warranted, there would be room for them.

Mr. Kristoff noted there would be a single-point, urban interchange (SPUI) at Narcoossee Road, located between access to Fells Landing and the property to the east and the new access to the neighborhood. He noted this will result in three to four traffic signals close together.

Mr. Nastasi asked if we were providing access on Narcoossee Road. Mr. Kristoff responded yes, it would be a full interchange with access in all directions.

During discussion of the Split Oak Avoidance Alternative east of Narcoossee Road, Tawny Olore, Executive Director of Osceola County Transportation and Transit, asked how far that would be from the Lake Ajay Village community. It was noted the avoidance alternative would be approximately 600-800 feet from the property line (not necessarily the closest resident).

Mr. Kristoff noted they tried to stay as far away from Lake Ajay as possible, and also tried to accommodate the plans for the Southern Oaks development. He noted the control point is the southwest corner of the Split Oak Forest.

Mr. Kristoff noted that south of the forest, the avoidance alternative would split Cyrils Drive, with two westbound lanes closest to Split Oak, the two eastbound lanes farthest away and the expressway in between. Slip ramps would come on and off to provide access to the frontage roads.

There would be an overpass for access at Absher Road to the Del Webb development. That access continues north, ultimately by others to extend to Sunbridge Parkway.

Cyrils Drive would come back together again with all lanes adjacent on the east end. The end of the expressway would be set up to accommodate a future extension south to Nova Road.

Bob Mindick, Director of Osceola County Parks and Public Lands, asked if there would be public access to the Split Oak Forest. Mr. Kristoff noted the bridge will allow access to be maintained; it would connect into the existing clear area.

Mr. Mindick asked if there was an overpass or underpass for the Florida National Scenic Trail. Mr. Kristoff stated that could be accommodated.

Mr. Kristoff then described the Split Oak Minimization Alternative, focusing on the differences on the east end. Mr. Mindick stated the roadway needed to be elevated in the area of the wetlands. Mr. Kristoff noted that could be coordinated if needed.

Ms. Olore asked if the alternative changed the configuration of the Del Webb community. Mr. Kristoff stated the minimization alternative does not affect that development.

Mr. Mindick noted they would have to change how they managed the area south of the alternative within Split Oak; they would no longer be able to manage it as a natural area. He said that would most likely become a park. He asked about compensation for the road and the area below it within the forest. Mr. Pressimone stated that would be discussed later in the presentation.

Mr. Kristoff went over an overview slide with all of the alternatives considered including the OCX approved alignment. He noted the differences between the OCX alternative and the Boggy Creek Alternative, with the Boggy Creek Alternative considered to be a significant improvement over the former one. Mr. Kristoff stated the OCX alternative was not a viable alternative in the Split Oak Forest, and again referenced the two alternatives avoiding and minimizing the forest.

Ms. Kelsey Lucas of RS&H then went over the alternative evaluation matrix, starting with the west segment. She noted the alternatives on the west end had very similar impacts to utilities and contamination sites. Regarding cultural and historic effects, the Boggy Creek Alternative has higher impacts on historic property than the Lake Nona Alternative: 18 conflicts vs. six conflicts.

Regarding the natural environment, the two west alternatives have similar impacts to lakes, floodplains and wetlands. The Lake Nona Alternative has a higher impact on gopher tortoises (123 acres vs. 58 acres). The Boggy Creek Alternative impacts an eagle's nest. The species ratings for the two alternatives are both moderate. Neither alternative would impact conservation or mitigation properties.

Regarding potential social impacts, Ms. Lucas stated the Boggy Creek Alternative has higher impacts to right of way area, residential and non-residential properties. The Boggy Creek Alternative would have 25 displacements, while the Lake Nona Alternative would have six displacements. The socioeconomic impacts to special populations would be moderate for the Boggy Creek Alternative, and low for the Lake Nona Alternative, as most of that land is vacant.

The impacts between the two developments of regional impact (DRI's) are similar, though slightly higher for the Lake Nona Alternative. There is a difference of just under \$100 million more in right of way costs for the Lake Nona Alternative. She noted the Lake Nona Alternative was being recommended as the preferred alternative due to the lower impacts previously mentioned.

Ms. Lucas went over the evaluation matrix for the east segment alternatives. She noted there were similar utility and contamination site impacts between the Split Oak Avoidance and Minimization Alternatives. There were no historic impacts for either alternative.

She stated a significant distinction between the two alternatives is within impacts to the natural environment. Ms. Lucas noted the avoidance alternative has a higher impact to lakes, ponds and wetlands; the minimization alternative has a lesser impact to caracara, but a higher impact to gopher tortoises than the avoidance alternative.

She noted that both alternatives have similar impacts to floodplains. The minimization alternative has a high composite rating for potential species impacts; the avoidance alternative has a moderate impact.

Ms. Beth Jackson of the Orange County Environmental Protection Division noted the Eagles Roost property is impacted by the minimization alternative, not by the avoidance alternative. It was clarified that the minimization alternative only impacts the GCB property.

Ms. Lucas stated as far as social impacts, the avoidance alternative involves 16 potential displacements compared to one parcel for the minimization alternative. The minimization alternative would impact two parks and one trail, which we'll overpass. There would be a moderate impact to community cohesion for the avoidance alternative, and a low impact in that regard for the minimization alternative. The impacts to DRI's would be the same for either alternative (48 acres each). As far as impacts to residential planned developments, the avoidance alternative would impact 175 acres vs. 88 acres for the minimization alternative.

Ms. Lucas noted the cost of the avoidance alternative would be \$100 million higher. She noted for the east segment we are recommending the minimization alternative as the preferred alternative. Mr. Kristoff went over the recommended preferred alternative.

Mr. Nastasi asked what was the opening year for traffic used in the matrix. Ms. Lucas stated they used mostly 2045 traffic numbers. Mr. Pressimone noted the opening year would be dependent on growth; the 2045 number is based on Osceola County and as the Poitras property develops.

Mr. Nastasi noted the difference of more than 10,000 AADT in the traffic volumes between the two west segment alternatives and asked if the Lake Nona Alternative was higher because of the airport connection. Mr. Pressimone stated that was correct.

Ms. Olore asked what the recommendation for the Split Oak Minimization Alternative as the preferred alternative was primarily based on. Mr. Kristoff stated the minimization alternative avoids disruption to the residences right along Cyrils Drive; avoids potential impacts to the Southern Oaks development where construction is expected to begin soon; and gets the expressway farther away from the Lake Ajay Village community. In terms of displacements, the avoidance alternative was higher: 16 parcels compared to one parcel.

Mr. Kristoff added that trying to reduce the avoidance alternative's impacts to the Southern Oaks development led to curvature issues that would have been uncomfortable to the driver.

The avoidance alternative has major impacts south of Split Oak Forest, but provides an opportunity to reduce the number of impacts on the natural area. Major disadvantages to the avoidance alternative

were the impacts to the Del Webb development and the wetland system in this location. Mr. Kristoff noted they were trying to assess upland impacts vs. wetland impacts, noting sometimes “beauty is in the eye of the beholder” in terms of which one is more important. He concluded the minimization alternative provides the most for everybody that needs to have this facility to continue mobility in the area.

Mr. Nastasi noted the impacts to residential planned developments was zero for both of the west segment alternatives. It was noted while the map was shaded pink to show the two Tavistock properties planned, CFX has not received the information requested from the developer regarding their detailed plans. Mr. Pressimone added that the one they sold to Pulte Homes and the one to south are both arranged so they are not being impacted.

In response to other comments, Mr. Pressimone noted there are no planned development impacts for the Lake Nona Alternative that CFX is aware of; the six displacements include an enclave of the Curry family.

Mr. Kristoff stated a significant disadvantage of the Boggy Creek Alternative is there are worship centers there. Mr. Nastasi added, “And you don’t want to mess with a county road.” He requested an electronic copy of the presentation and handouts to brief their commissioners. Ms. Laura Kelley, CFX Executive Director, said CFX is working to schedule briefings for the county commissioners on this also.

In response to a question from Ms. Olore, Ms. Kelley stated the authority also is setting up a briefing with Osceola County Commissioner Brandon Arrington.

Mr. Richard Brightman, of Hopping, Green & Sam, stated that given that the preferred alternative – the minimization alternative – is affecting the Split Oak Forest, he’d been asked to discuss the process for seeking approval from the Florida Communities Trust (FCT):

1. Recommendation would have to go before and be approved by the CFX Governing Board.
2. There would have to be consent from Orange and Osceola counties to approach the FCT. That process would involve the staff of both counties. He stated his understanding is the two counties jointly would be the requestors or applicants requesting approval of a linear facility crossing Split Oak Forest.
3. Mr. Brightman noted the rule presented at today’s meeting set forth the information required in the application, which would include the materials from the PD&E Study.
4. Once the application is filed, the decision moves to Tallahassee to the FCT to approve – or not – the linear facility. This would require meetings with staff and ultimately the FCT Board.
5. He stated the process is bifurcated: They have to make a determination that there’s no reasonable alternative that avoids the Split Oak Forest, and that the land use has been designed to have minimal impact.
6. If FCT determines there’s a reasonable alternative, then that’s the end of the process.
7. If FCT concurs there’s no reasonable alternative, then that would go back to the joint grant holders for the next steps regarding the description of the facilities, the areas affected, how compatible the facility would be with the planned recreational uses of the project site, discussion of the proposed mitigation and modified drawings.
8. If FCT approves the facility, there would have to be a modification of the covenants and drawings that go with it.

Ms. Jackson noted the mitigation for this is money for this particular vehicle. They're going to want to be recompensated for the lands impacted by the linear facility, and that has to be of equal or greater value to what was disturbed.

Mr. Mindick stated Osceola County will want mitigation for what's lost in this process. Ms. Olore asked, "When you say there's no reasonable alternative, you have an avoidance alternative, so part of the application is to prove the avoidance is not reasonable? How are you going to do that? That's the challenge."

Mr. Mindick stated, "You show the \$100 million difference, but you're missing a bunch of pieces in the matrix. What is the mitigated part beyond just the footprint of the road? And that there's now increased maintenance required by the road being in there; how is that going to be compensated on an ongoing basis?"

Mr. Mindick referenced a previous suggestion that a percentage of the annual tolls go toward maintenance. "That's not in the matrix. It's unfair to show the two counties numbers when the maintenance is not included," he added.

Mr. Pressimone and Ms. Kelley noted it still needs to be determined what the costs are of covering maintenance of all of the dedicated land in perpetuity, and who would pay for it.

Ms. Nicole Gough of Dewberry noted this is a conversation beyond the PD&E Study. The recommended alternative first needs to be approved by the CFX Governing Board. She noted for the PD&E Study, the mitigation that is looked at is impacts to wetland and regulatory easements.

Ms. Gough noted the next phase is to look at how the roadway works within planned developments and existing conservation lands. She noted the existing conservation lands in this area are just under 4,000 acres. The severance in Split Oak is about 100 acres south of the expressway right of way, which is 60 acres. She noted there is development going in very fast on the south edge of that.

Mr. Pressimone noted CFX is proposing a bridge wherever it needs to be; right now the proposed alternative depicts an arbitrary length of approximately 100-150 feet. He noted there have been conversations about improving the southern access to Split Oak; what's there now is a culvert and fence for an area that maybe can accommodate two cars.

Mr. Mindick stated the concern is where the 160 acres impacted by the project in Split Oak would be compensated. Mr. Pressimone stated that would be compensated in the PD&E Study through traditional mitigation. He added the matrix shows \$9.5 million for mitigation, the majority of which is attributed to the 60 acres of direct right of way impacts and the 100 acres of severance in Split Oak.

Ms. Jackson asked if the \$9.5 million was to purchase mitigation somewhere else or purchasing other lands. Ms. Gough noted there's a hierarchy we have to go through so it may be kind of a hybrid. She added for direct impacts to wetlands we're required to go to a mitigation bank.

Mr. Pressimone presented information about the proposed dedication land from others, noting about 582 acres would be in Osceola County. He noted the proposed conservation lands have been discussed previously with staff at this meeting and with the Split Oak Forest Working Group. He noted the

property owners relocated a proposed water treatment facility further south in response to working group requests.

Mr. Pressimone noted that since the concept study, we've gone from a system-to-system interchange with expressway connections to the northeast and south to a smaller interchange configuration. After further consideration, the expressway now goes down to the south. That shrank the size of the interchange and increased the size of the proposed conservation land in Osceola County.

Mr. Pressimone noted the proposal reflects the working group's request for some of the most attractive uplands for development – that are also important for species movement and connectivity to Roberts Island Slough – to be included in the package. "That's part of the reason we didn't come back to everyone until we felt confident that this was included," he added.

There was brief conversation about what to call the proposed conservation land. Mr. Mindick stated considering it as an addition to the forest makes sense.

Mr. Pressimone went on to discuss the Orange County portion of the proposed dedicated land. The approximately 968 acres are adjacent to the Lake Mary Jane community; this area is predominately pasture and orange groves.

Ms. Gough noted these are essentially land donations. Mr. Pressimone noted the dedicated land adjoins the Isle of Pine Preserve. He noted the counties would have to determine the ownership of the land. In response to a question from Ms. Jackson, Mr. Pressimone noted the dedicated land would be part of the package that is presented to FCT.

There was discussion about whether the Florida Fish and Wildlife Conservation Commission (FFWCC) would be the most likely candidate for managing the dedicated lands. There was discussion about FFWCC having a somewhat different management philosophy from the counties.

Mr. Mindick stated that from Osceola County's perspective, the dedicated lands are "more than reasonable compensation" for the impacts to Split Oak. He also noted there are benefits from a regional context, making critical connections with other conservation properties.

Mr. Pressimone noted the question of who assumes ownership of the dedicated land will be answered by FCT and the application process. Mr. Mindick stated that it would make sense to continue the arrangement in place for Split Oak, with the two counties and FFWCC doing most of the on-the-ground work. He added the project changes the management of the 100-acre severance, so they have to look at that before making a decision.

Ms. Kelley asked who makes the decision on who manages the land. Ms. Jackson stated neither she nor Mr. Mindick were around when the Split Oak Forest was structured. "The driving force was probably that FFWCC had identified lands under the gopher tortoise mitigation program, which is now defunct," she said. "That was probably the reasoning they ultimately became the managers of the site and why they're named on some of the easements."

In response to a question about the suitable gopher tortoise habitat in the proposed mitigation area, Ms. Gough stated most of the uplands are more than favorable. There is a big matrix of uplands and

wetlands. She noted that was at a greater than 2:1 ratio. Ms. Jackson noted that would be the minimum criteria, 2:1.

Ms. Olore asked who determines what happens to the 100 acres of severance. Mr. Pressimone noted it's still part of Split Oak.

Ms. Jackson stated that Osceola County is the underlying fee simple owner. She stated FCT gave Orange County the money to purchase the land. "They may say they want the 160 acres taken out of the packet, or they may be happy with just the 60. If they decide the whole 160 (acres), I'd think it'd belong to Osceola County," she added.

Mr. Mindick stated FCT has to have buy-in from the counties. He noted a lot of the dedicated land they visited on the Orange County portion was not of high quality; that's where the money will be needed for restoration. "We need to make sure if we're saying this is 2:1, that we confirm that is good quality habitat. Not something if you spend \$2 million you would restore it to decent. They're not going to want to hear that."

Ms. Jackson stated it's about \$30,000 per acre to restore something to more native habitat.

There was discussion about procedural matters including revising the Split Oak management plan and developing a letter of determination by the counties.

There was brief discussion about the various acreage involved in the proposal. The acreage was noted as follows:

- Existing Split Oak Forest: 1,689
- Projected Impacts: 160
- SOFWEA remaining: 1,529

There was discussion that, at one time, there was a suggestion that the developer would get the remainder of the forest for development. It was made clear the severance area remains part of Split Oak in public ownership.

It was noted the resulting conservation area would change to 5,475 acres, including the 100 acres of severance. Mr. Mindick stated the 100 acres is no longer conservation area with the original intent. Ms. Jackson added that CFX may only be seeking to release the conservation easement over the 60 acres for the expressway, but the 100 acres will no longer have the same ecological function because of the inability to burn. She added over time it's going to change into a different type of habitat.

Ms. Kelley noted the next step would be to take the recommendation to the CFX Governing Board in December, if everything stays on schedule. She noted they hope to have the conservation land agreement completed and executed prior to going to board in December.

Mr. Pressimone added that sometime after the CFX Board meeting, the authority would share its findings and what the board adopted with each of the boards of county commissioners. CFX would let the commissioners know the authority would like to move forward and ask if there is support from each county to move into the FCT phase.

Mr. Nastasi noted the constituents and environmental groups in opposition will voice their opinion and are going to want some surety as to how this is going to move forward. “You’re going to ask the board [of county commissioners] to approve the preferred alignment?”

Ms. Kelley said yes, if the CFX board approved the recommendation and the conservation land agreement.

Mr. Pressimone stated CFX didn’t want to have an EAG meeting until we had the conservation land agreement for the dedicated 1,550 acres signed by CFX, Suburban Land Reserve and Tavistock. He added a second agreement sets the terms for a reduced purchase price of the right of way, mainly associated with the west side of the alignment. That accounts for about 80% of the right of way for this project.

Ms. Kelley noted that if the project doesn’t go forward, all the right of way goes away, adding that CFX is counting on the \$70 million from the state. Ms. Olore noted that the \$70 million from the state has to go through the Osceola County Board of County Commissioners.

It was noted an updated version of today’s presentation will be shared with the PD&E Study EAG and PAG.

Mr. Pressimone stated the parties will not close on the dedicated land until they know there is a project and we have been successful with FCT. Included in that process is finding out the appetite of the commissions.

Mr. Nastasi noted Orange County would have to figure out how to add this to their comprehensive plan.

Ms. Kelley stated, “That’s why we worked so hard to ensure this is an obligation to provide the conservation land. I want to make sure this is iron clad.”

It was reiterated that the agreements would be signed by all parties prior to EAG. Mr. Pressimone noted while 100 percent of the EAG may not support the recommendation, CFX has worked hard to accomplish the requests from these environmental group meetings.

Mr. Mindick stated that the alternative going through the forest and the dedicated lands presented here today seem to make the most sense. “At this point we would be supportive to move forward with that, understanding there are a lot of details to work out,” he added.

“The folks opposed to the alternative will continue to be opposed. We’re in a situation not to make everyone happy. The fact that 1,500 acres is part of the compensation means a heck of a lot. You’re looking at now over 5,000 acres of contiguous conservation”, Mr. Mindick said. “From the standpoint of a loss of 160 acres, you’ve added 1,500 acres to the bigger picture.”

Ms. Jackson stated, “Long term, it tries to protect a greater part of the value. But there are problems – the pieces in Orange County have been heavily impacted with uses.”

Ms. Kelly agreed there is a lot of restoration work needed. “I’ve talked to experts and they said Split Oak was in bad shape when it was acquired and it took a lot of time and money to get it up to current conditions,” she added.

There was discussion about how to best present the information to the various constituent groups. There also was discussion about engaging other FFWCC managers that had not been attending the working group meetings.

Mr. Mindick requested that we focus on the bigger connection looking into the future. “We need to make sure we look at regional maps and how this action fits in with everything else going on, not only with the counties, but with the state,” he added.

Mr. Pressimone noted the consultant that has been working on the dedicated property for years has reports that look at soils and other aspects that CFX would try to acquire to help with the discussion.

Mr. Mindick stated, “The first criteria for trust is, is it a reasonable alternative and is it the best? After being in a lot of meetings, I think this is a good process.”

The meeting concluded at approximately 1 p.m.

The logo for the Central Florida Expressway Authority is centered in the upper portion of the image. It consists of a white rectangular box with two horizontal orange bars, one above and one below the text. The text is arranged in four lines: 'CENTRAL' and 'FLORIDA' in black serif font, 'EXPRESSWAY' in orange sans-serif font, and 'AUTHORITY' in black serif font. The background of the entire slide is a photograph of a multi-level highway interchange with concrete overpasses and a grassy embankment under a clear blue sky.

## Title VI Compliance

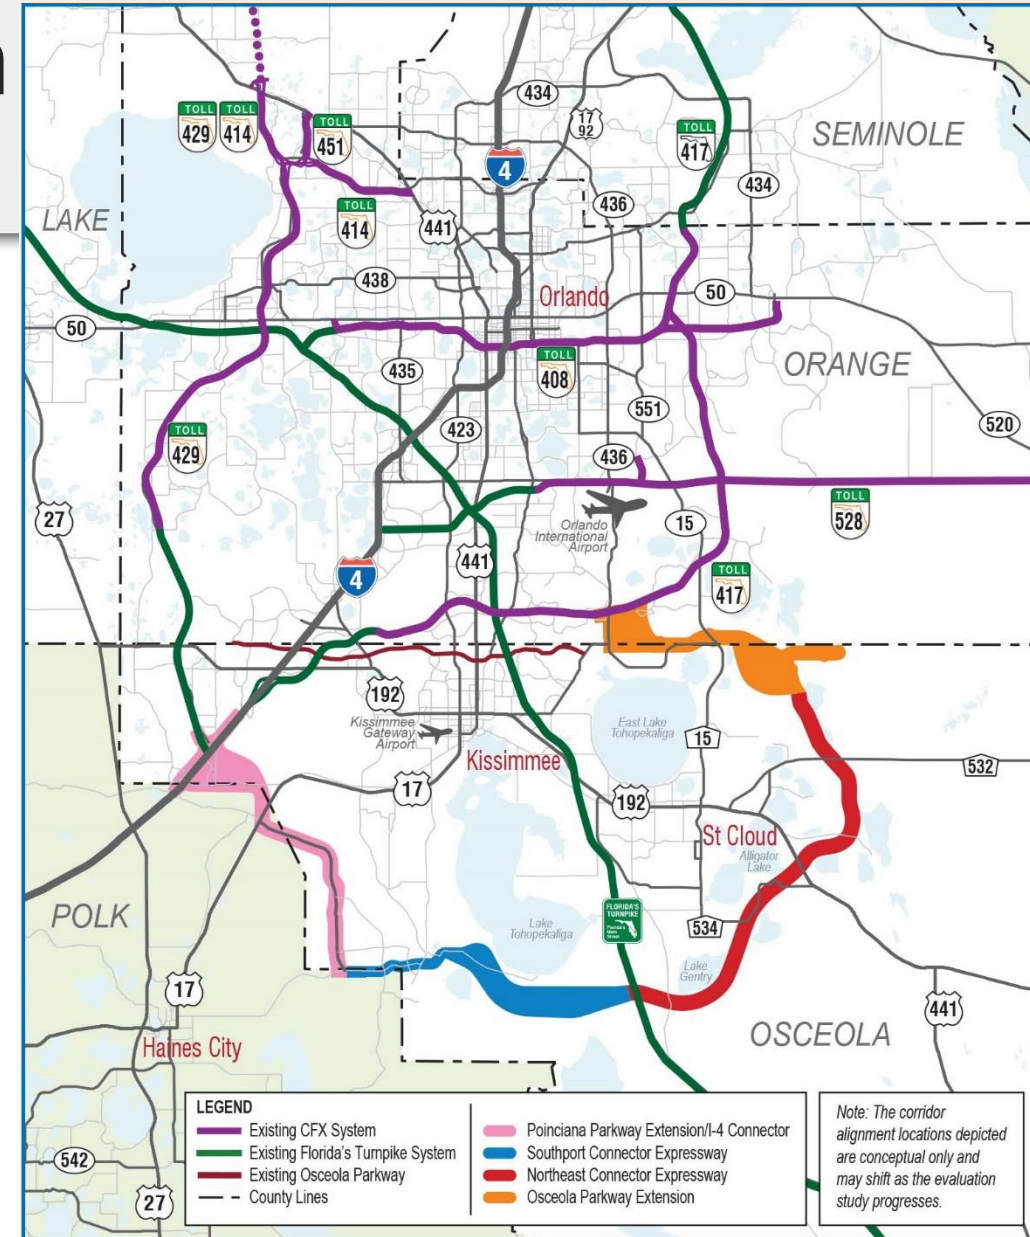

This meeting, project, or study is being conducted without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to compliance by the Central Florida Expressway Authority (CFX) with Title VI may do so by contacting:

Kathy Putnam  
Public Involvement Coordinator  
4974 ORL Tower Road  
Orlando, FL 32807  
407-802-3210  
[Projectstudies@CFXway.com](mailto:Projectstudies@CFXway.com)

All inquiries or complaints will be handled according to CFX procedure and in a prompt and courteous manner.

# Osceola Parkway Extension Background

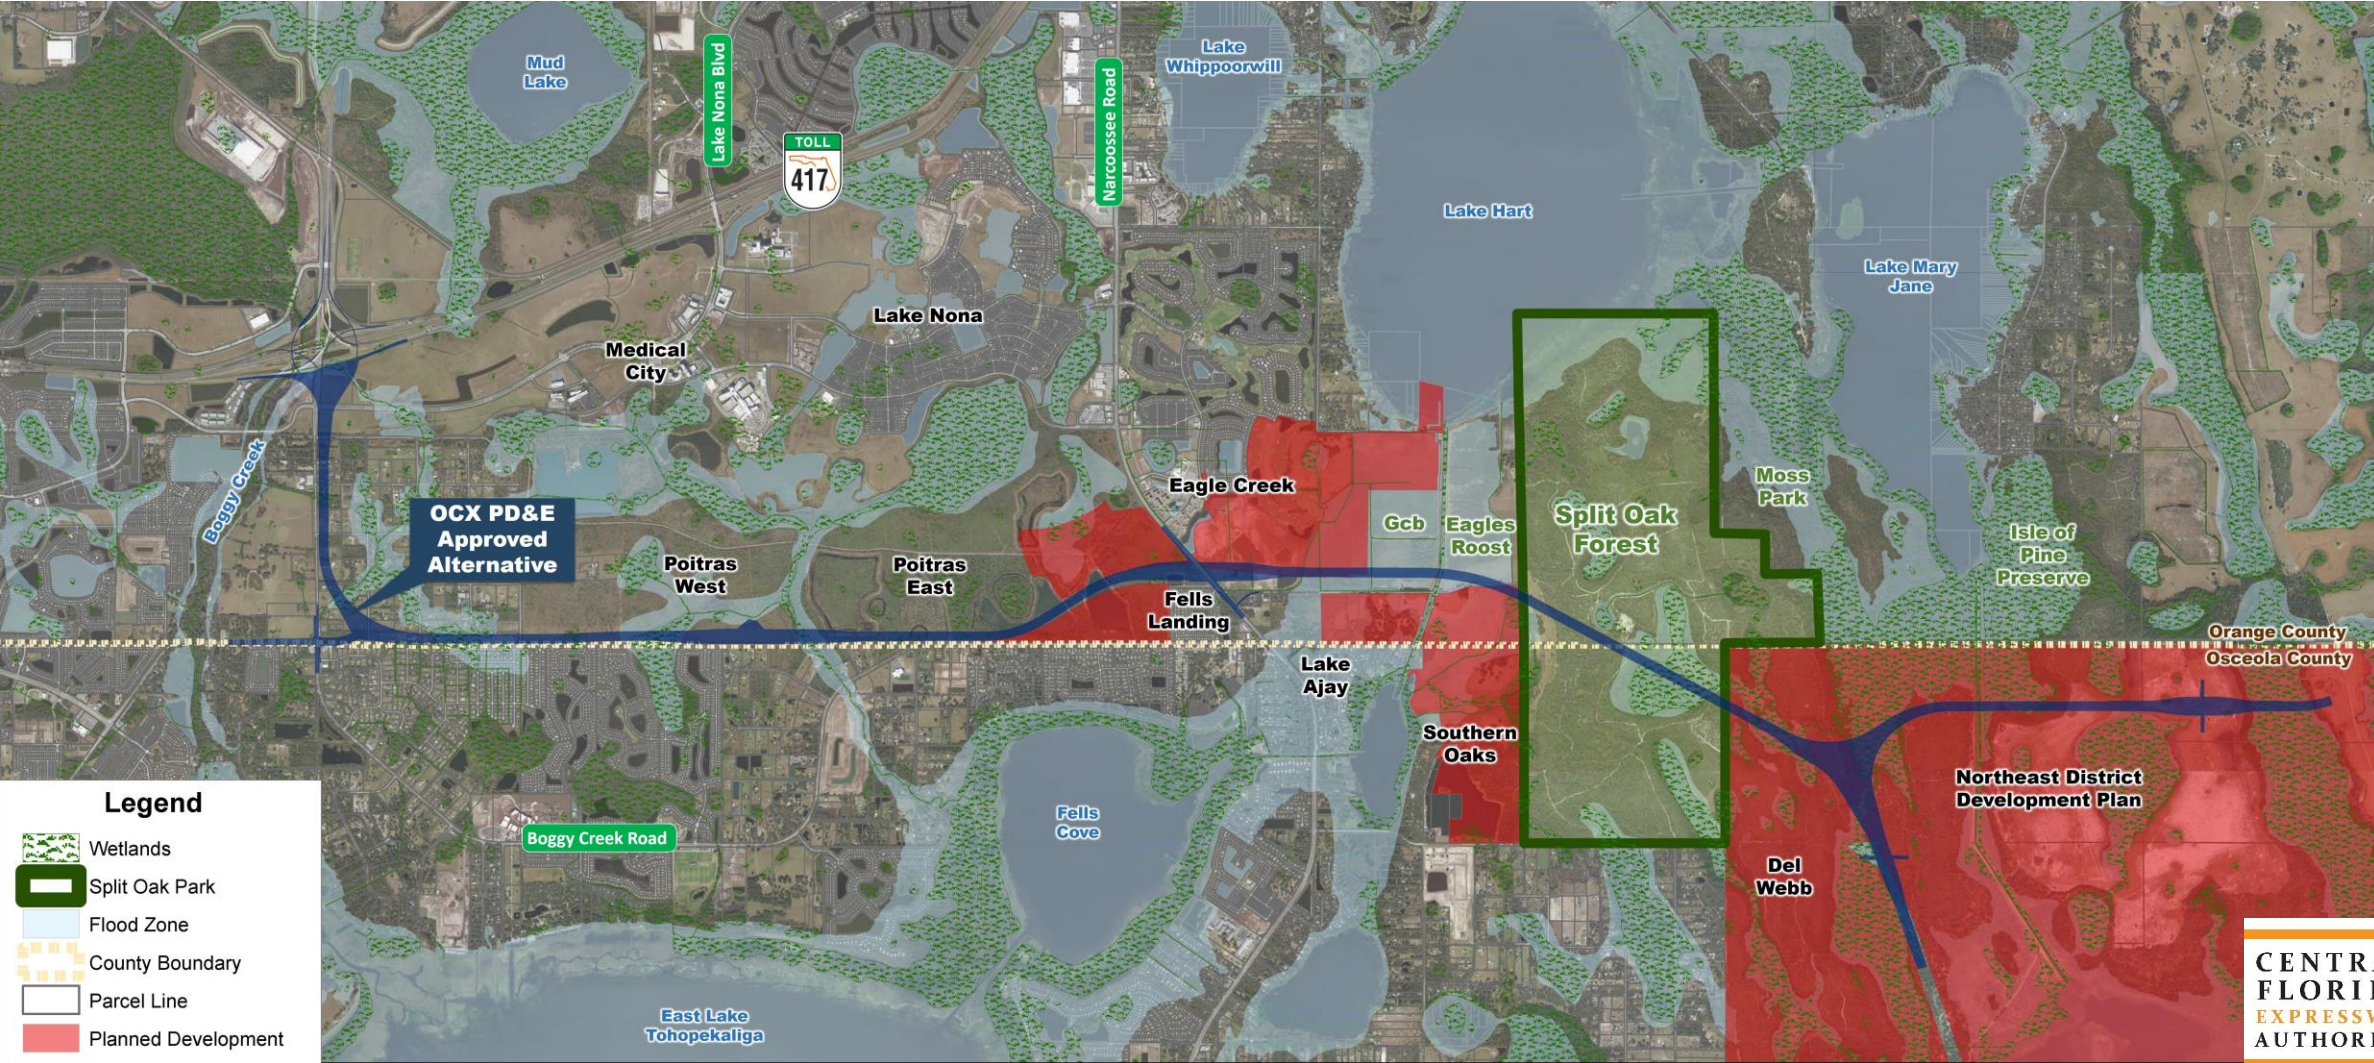

- 2005 – Osceola County Comprehensive Plan: New corridors around growth boundary
- 2012 – Osceola County Expressway Authority (OCX): 2040 Master Plan. ETDM Programming Screen Summary Report published (ETDM No. 13789).
- 2016 – CFX incorporated OCX master plan segments into CFX Master Plan.
- **2017 – OCX completed the Osceola Parkway Extension PD&E Study and approved a Project Environmental Impact Report (PEIR).**

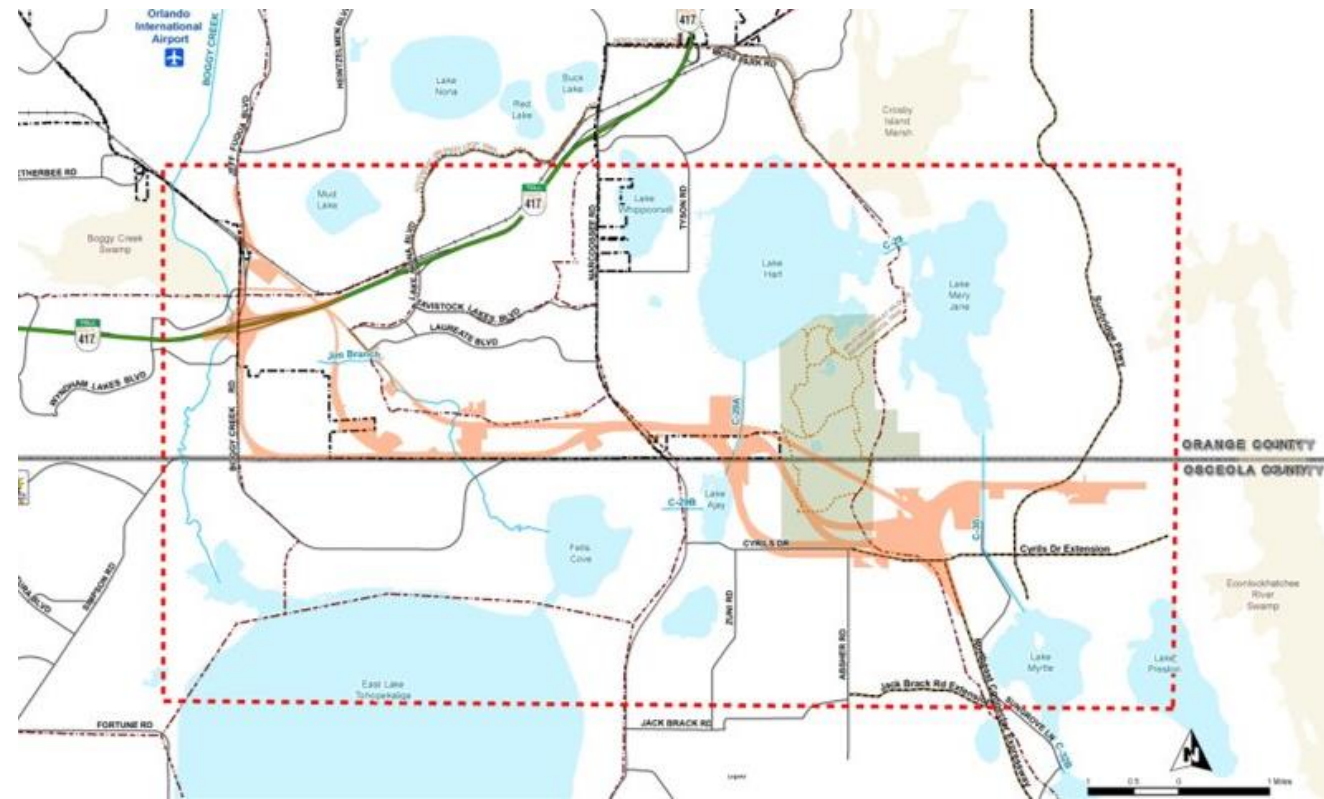

# Osceola Parkway Extension

## Background – OCX Approved Alternative

# Osceola Parkway Extension

## Background

- 2005 – Osceola County Comprehensive Plan: New corridors around growth boundary
- 2012 – Osceola County Expressway Authority (OCX): 2040 Master Plan. ETDM Programming Screen Summary Report published (ETDM No. 13789).
- 2016 – CFX incorporated OCX master plan segments into CFX Master Plan.
- 2017 – OCX completed the Osceola Parkway Extension PD&E Study and approved a Project Environmental Impact Report (PEIR).
- March 2018 – CFX completed a Concept Feasibility and Mobility Study for the Osceola Parkway Extension
- **July 2018 – CFX began PD&E Study Re-evaluation**

# Osceola Parkway Extension

## Study Methodology – PD&E Re-evaluation

- Compare the OCX approved alternative against others
- Analyze physical, natural, cultural and social impacts
- Conduct public outreach
- Produce a Project Environmental Impact Re-evaluation Report
  - Identify a preferred alternative
- Present the findings to the CFX Board

# Osceola Parkway Extension

## Key Study Activities

- Environmental Data Collection & Analysis
- Large Landholder & Other Key Stakeholder Meetings
- Refining Feasibility Study Alternatives
- Developing Additional Alternatives
- Updating environmental, engineering and social data
- Public Involvement

# Osceola Parkway Extension

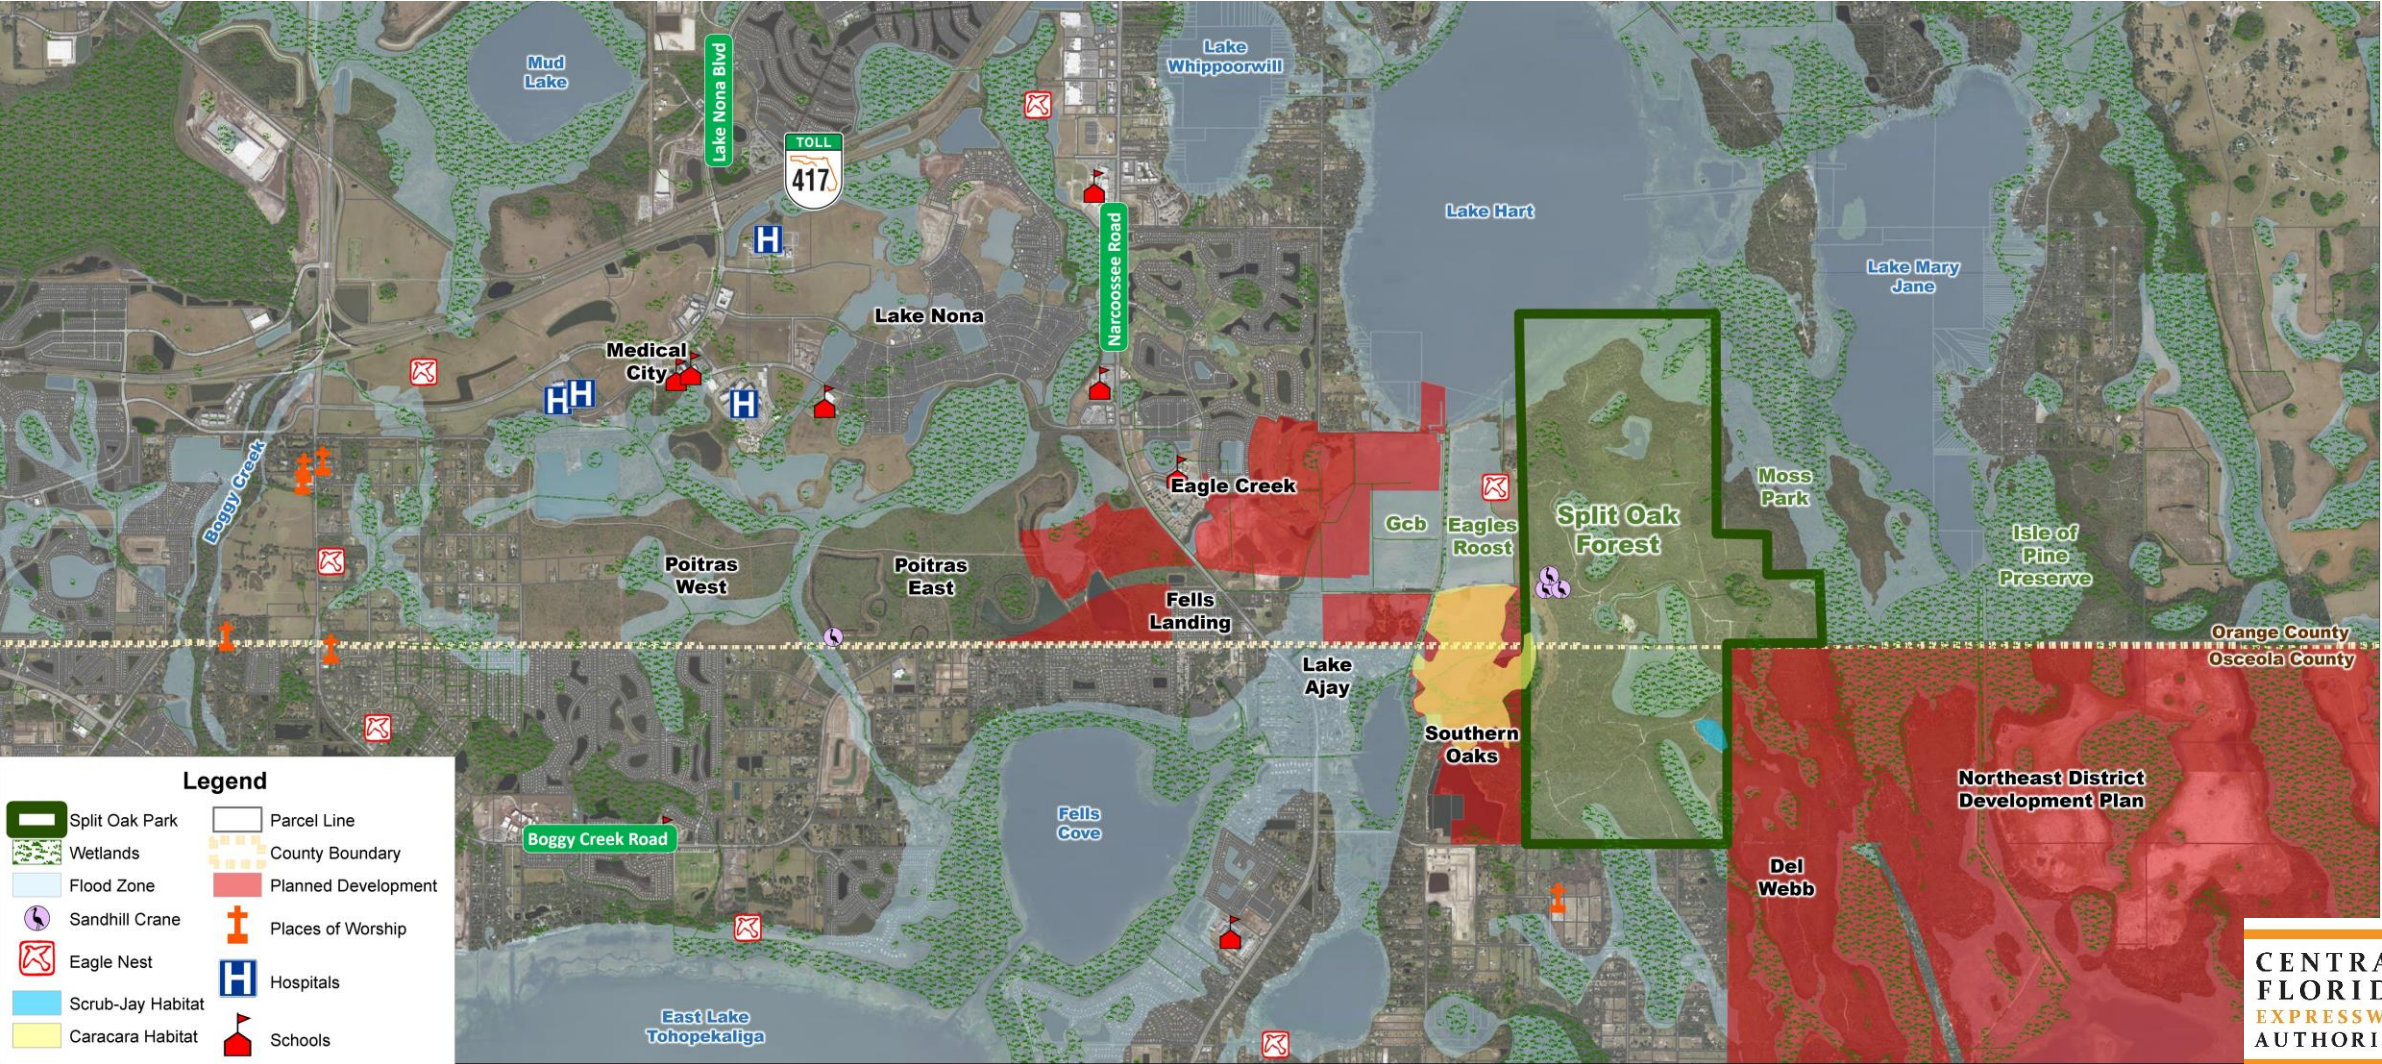

## Public Involvement

- Officials' Briefings & Stakeholder Meetings
- Osceola Co. Commissioner Transportation Update - Dec. 4, 2018
- Board Presentations
  - Osceola Co. Expressway Authority – Oct. 9, 2018
  - CFX Governing Board – Dec. 12, 2018
- Environmental & Project Advisory Groups – TBD
- Public Meeting – TBD
- CFX Study Webpage & Study Facebook Page

# Approach to Florida Communities Trust

## **62-818.015 Consideration of Recipient's Request for Linear Facilities.**

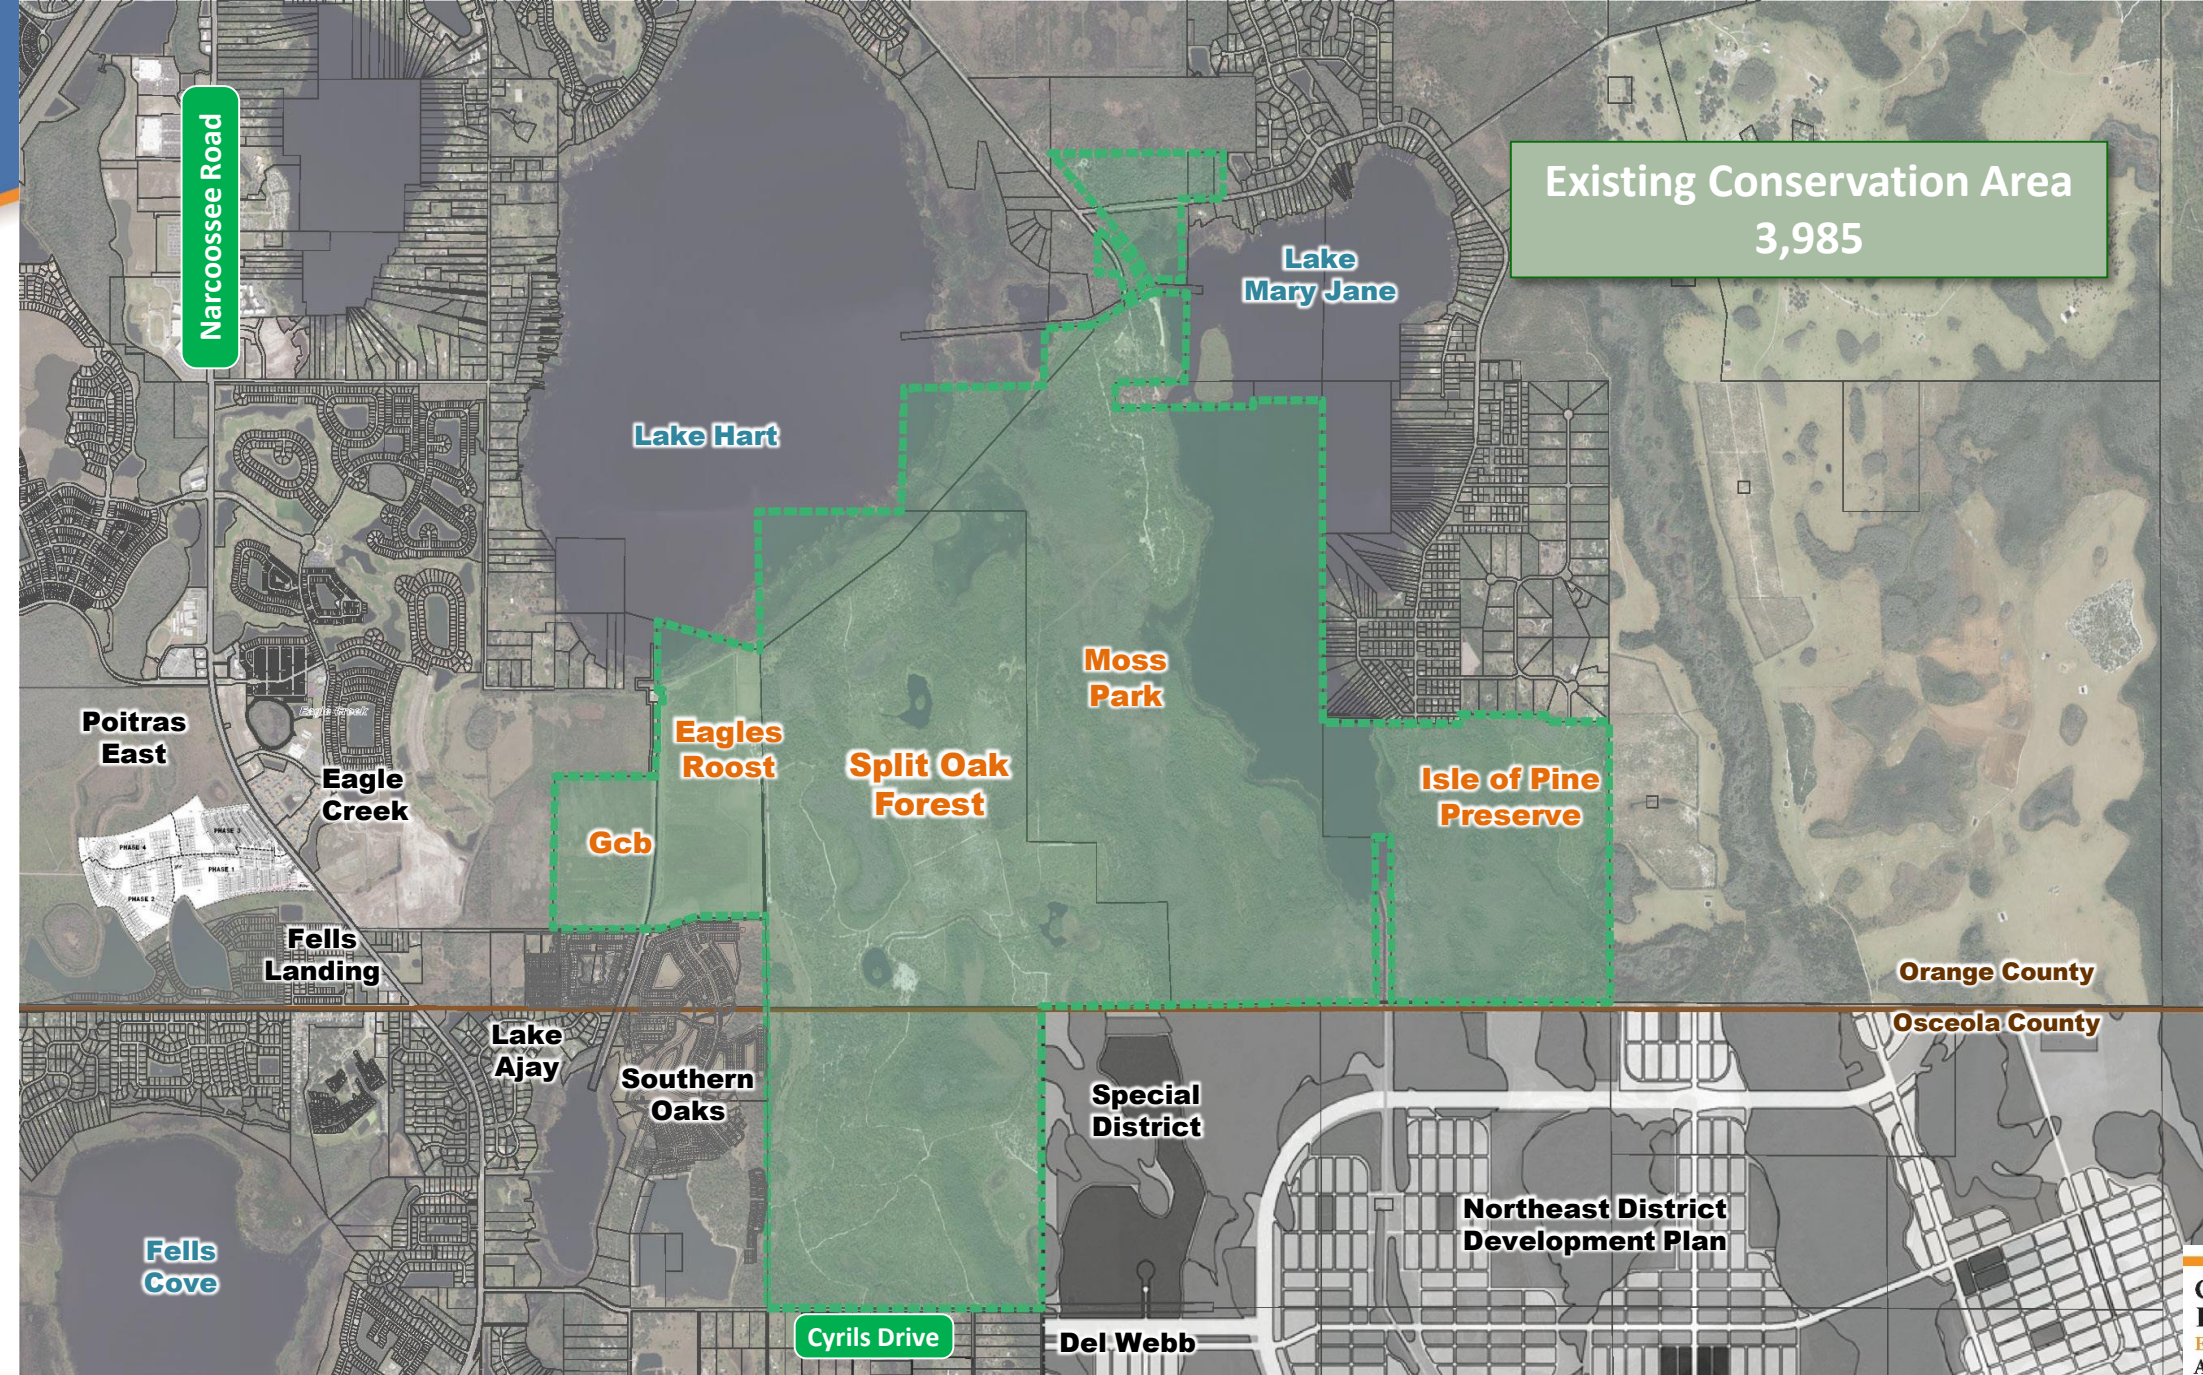

The Declaration of Restrictive Covenants for Trust Project Sites limits the use of the property to conservation, outdoor recreation, and other related activities. However, the Trust periodically receives requests for Management Plan modifications to allow linear facilities and related appurtenances on the Trust Project Site. When evaluating these requests, the following process must be followed.

- (1) First, there has to be a determination:
  - (a) That there is no reasonable alternative to the proposed modification land use on the Trust Project Site; and,
  - (b) That the land use is designed to have a minimal impact to the site; and,
  - (c) A copy of an alternative analysis assessment of other off-site alternatives or options considered by the Recipient.
- (2) If the Trust determines that no practical off-site alternatives exist, then the following information is required:
  - (a) A written statement that the Local Government has reviewed and approved the proposed use;
  - (b) A description and dimensions of the linear facility, and of the area that will be affected during construction;
  - (c) Information on the natural communities and cultural features found on, and immediately surrounding the site of the proposed facility;
  - (d) A statement explaining how the proposed facility will be compatible with planned recreational uses of the Trust Project Site, as committed to in the approved Management Plan;
  - (e) Discussion of the proposed mitigation for impacts to the Trust Project Site; and,
  - (f) A modified master site plan drawing identifying the locations of existing vegetation and all proposed structures, facilities and restoration areas that will be affected by the facility.

After receiving all of the above information, staff will evaluate and review the request for consistency according to the above listed requirements. If the proposal meets the above requirements and has minimum impact to the Project Site, staff may approve the request. If public objections are received, if it is a large project, or if the project could be viewed as controversial the proposal will be presented to the Trust Governing Board for consideration.

- (3) If the request is approved, the Recipient must:
  - (a) Provide an appraisal of the land use area or other valuation method as approved by Trust staff;
  - (b) Provide a legal description from a licensed surveyor;
  - (c) Sign an amendment to the Declaration of Restrictive Covenants that provides for the changed use of the Project Site; and,
  - (d) Record the amended Declaration of Restrictive Covenants in the Public Records of the County where the property is located.

The Recipient will be required to pay for the land use area. The payment shall be allocated to the Recipient and the Trust based on the percentage of the original grant (i.e., 50% Recipient participation and 50% Trust participation).

## **5.4 OTHER STAKEHOLDER MEETINGS DOCUMENTS**

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** June 5, 2018  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX & Tavistock

---

On Tuesday, June 5 a meeting was held at the CFX Main office building. The purpose of the meeting was to introduce the RS&H project team to the Tavistock Development Company and have an exchange of information between the respective groups.

The below notes have been arranged to reflect the flow of the discussions that ensued.

- Glenn introduced the RS&H team and offered the following opening comments;
  - Indicated that this study is a Re-Evaluation of the former Kimley-Horn (K-H) project and would be on the 29 June CFX Board meeting agenda for approval
  - Indicated that Laura had recently gone to Tallahassee to discuss with the Florida Community Trust the methodology for moving forward with a roadway through Split Oak. Laura has a meeting with Glenn later that day
  - Stated that this project would compare the previously approved K-H alignment with a new alignment, that it would indicate the benefits/impacts of a new alignment compared to the one previously approved, and recommend the most appropriate one
  - Indicated that cost is not the factor in the Florida Community Trust decision
- Dan explained the process by which the Osceola Parkway Extension Study would be developed and the anticipated schedule. Using an exhibit he presented the K-H recommended alignment and the alignment that surfaced as a result of the more recent CFX Corridor Feasibility study.
- Richard asked, what is the currency measure between homes and habitats?
  - Dan responded that one must not only look at individual residential impacts, but also examine overall community impacts

- Glenn stated that we must focus on benefits as well as discuss impacts and the methodology for mitigating impacts
- Richard discussed the issue in the FL statute on mitigation of land swap vs looking at this as a linear facility and indicated it would be dangerous to start off the bat with a land swap – that might be the outcome or part of mitigation – but not in conjunction with additional mitigation
- Glenn indicated that he would discuss this item with Laura
- Richard asked if the full interchange with the NE connector could be excluded and have a more narrow focus for the Re-evaluation since the interchange will not be built for 15-20 years.
  - Glenn responded that since the interchange was in the K-H PD&E, it needs to stay in the re-evaluation process.
  - Glenn also indicated that it is desirable to identify and obtain the right of way that will be required for the interchange, some of which could be used for stormwater retention.
- Richard discussed messaging and he believed that we had lost the messaging battle. The project has been characterized as a developer road when in fact it is a portion of a much larger system that will facilitate movement of people and goods throughout the region.
- Glenn concurred that this was a connectivity project and critical link in the outer beltway, but the reality is the revenue indicates that it is not needed for another 20 years due to the development that is planned in the future
- Richard asked what RS&H would be studying. Dan restated his prior description regarding the comparison of alternatives and determining the most viable alignment.
- Kelsey requested the most recent available information for the Del-Webb development, including any plans that have been developed. Richard indicated that it is an entitled and permitted project in Osceola County. Richard will provide information. Similar requests for information were made for any other property that Tavistock or Deseret may own within the Osceola Parkway Extension study area.
- Richard asked if the EAG and PAG would be continued. Glenn indicated that the EAG and PAG are important from the agency perspective and can assist in determining the best use of the mitigation dollars.
- The schedule for the study was discussed. Tavistock representatives indicated that eight months is too long a time period and expressed a need to complete prior to the gubernatorial change.

- Don expressed a desire to have an application to the Florida Community Trust (FCT) by August. The application may not define a specific alignment but provide sufficient information to answer the question whether the road can utilize the Split Oak property, providing that appropriate mitigation be a part of the approval for the required roadway right of way.
  - Glenn indicated there would be major hurdles to overcome and a super majority (75%) vote from both Osceola County and Orange County representatives would be required. Also, the action will need DEP approval prior to submittal to FCT.
  - Both Don and Clint indicated it will be extremely difficult to place such a proposal on the Orange County agenda before August. Tavistock and Deseret to pursue.
- Glenn indicated that an environmental shepherd in Tallahassee will likely be required to assist in navigating the project through the necessary procedures. Clint asked for a clarification of the steps needed to secure approval from FCT such that a timeline can be established for each step. Don reiterated the desire for securing a conditioned approval for the roadway to pass through Split Oak.
- Deseret Ranch plans to use multi-modal transportation systems but is not planning on using the Osceola Parkway Expressway right of way for these multi-modal opportunities. (Side bar conversation between Don & Glenn).
  - Light rail would be approximately 1-mile distant from OPE
  - Heavy rail currently exists
  - No plans for any other multi-modal at this time
  - Expressed concern for the CH2M proposed 325-foot typical section
- Joe presented the most recent alignment and interchange configurations in the SR 417/Lake Nona Road/Poitras west area. The plan did not include the direct extension of OPE north of SR 417 toward GOAA. Braided ramps along SR 417 between the OPE overpass of SR 417 and the Boggy Creek Interchange provided direct connections for all movements between SR 417 and OPE. The braided ramps allowed access to and from Boggy Creek Road.
  - Tavistock expressed concerns that there was no access from the OPE to Lane Nona Road. Suggestion was made to consider a potential half-diamond.
- Tavistock announced that it is not planning to purchase the western portion of the Poitras property. It will remain in GOAA ownership. GOAA remain a key stakeholder.

The meeting was adjourned at 10:45 a.m. (attendees & contact info on page 4)

### Meeting Highlights

DK provided a project overview stating that this effort will be a reevaluation of the approved PD&E Alternative and documents produced by Kimley Horn Associates and adopted by OCX in May 2017. The study will not be starting from scratch, but rather evaluating and documenting refinements to the adopted alignment. The information and documentation generated through the Concept Feasibility and Mobility (CFM) Study completed by CFX earlier this year will be incorporated into the reevaluation where appropriate. One of the primary purposes of this coordination meeting is to ensure the CFX team has the most up-to-date information regarding the GOAA Poitras property.

BF confirmed the sale of the eastern portion of Poitras (east of Jim Branch Creek) to Tavistock has been completed. This sale included the property and the conservation easements. GOAA retains ownership of the western portion of the property. An overall GOAA property / master plan map (which includes designated conservation areas) was referenced during the discussion. BF agreed to provide a digital file of the map to RS&H.

BF and CW confirmed that a NEPA document (Categorical Exclusion) was required and approved by FAA prior to the sale to Tavistock and that a similar document would be required for the western portion and / or for any right of way that would be needed for the OPE. It is assumed the impact evaluation and documentation prepared during the Reevaluation will be adequate and used in the FAA / NEPA documentation for the sale. It was noted that a categorical exclusion document would be reviewed by the FAA local office, however an EA or EIS would have to be reviewed at the FAA regional office. It was agreed that all correspondence with FAA during the Study would pass through GOAA staff.

The Poitras sale justification / documentation must clearly delineate the benefits provided to GOAA resulting from the sale of the property and conclude that there are no disadvantages. DK requested a copy of the Categorical Exclusion prepared for the Tavistock sale for RS&H to use as a reference. BF agreed to provide.

In addition to clarifying the benefits to GOAA, a fair market valuation of the property to be sold must be provided. CW indicated the appraisal only has a six-month shelf life so we should not obtain the appraisal until the NEPA documentation is ready to submit to FAA.

Prior to submitting the sale request and NEPA documentation to FAA, GOAA Board and Orlando City Council must approve the transaction. Once submitted to FAA, expect a 6 to 9 month return / decision.

DK reviewed the alternatives map (Figure 6-4 from the Concept, Feasibility and Mobility (CFM) Study). The alignment refinements developed during the CFM would generally serve as the starting point for this effort. One additional conceptual refinement that accommodates system to system movements (including access from OPE to Orlando International Airport through braided ramps) between SR 417 / OPE that does not extend north of SR 417 was discussed. GOAA staff is adamant that the OPE must provide direct connection to OIA. They did not oppose the concepts as long as OPE access directly to / from the airport is provided. Additionally, they are supportive of better access / local road interchange(s) on OPE to the western portion of the Poitras property.

The OIA long range plan includes a local N/S connection across SR 417 linking the properties. GOAA wants to ensure that connection will not be precluded. It may be a roadway for vehicles / transit / or an extension of the automated people mover (APM).

The sale to Tavistock also includes allowance for an east/west connection between J Lawson Boulevard and the Mud lake parcel (both are north of SR 417).

The Jim Branch Creek is subject to WMD and USACE permitting. GOAA secured a 100 foot wide crossing of the conservation easement as part of the NEPA document submitted for the Poitras sale. Coordination with these entities will be required during the Reevaluation.

JK asked about the OPE typical section, if it would continue to have the multi-modal corridor. DK responded the typical sections will be revisited during the reevaluation.

CW inquired about the Reevaluation schedule. DK responded we are targeting a 6 to 8 month schedule.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project** CFX Contract # 001250  
**Number:**  
**Meeting Date:** July 9, 2018  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX & Tavistock

---

On Monday, July 9, 2018 a meeting was held at the CFX Main office building. The purpose of the meeting was to discuss the timeline of the PD&E Schedule compared to the application to FCT. An 11x17 of the PD&E schedule was distributed to the group.

The below notes have been arranged to reflect the flow of the discussions that ensued.

- Glen opened the meeting explaining that the PD&E study will take approximately 8 months to complete and will result in an approved re-evaluation of the OCX PEIR.
- Laura asked where the FCT schedule items were on the PD&E schedule.
- Glenn answered that the application to FCT is not a part of the PD&E scope and therefore is not part of the PD&E schedule.
- Conversation shifted to the FCT application, requirements, and process.
  - Belief is that FCT would not approve the application without additional land compensation;
  - Discussion on land swap versus linear take for the FCT application. The land swap is more stringent criteria. A land swap would also require a super majority vote (75%) from Osceola and Orange Counties;
  - The Counties must be the applicant for the FCT application but CFX may be able to compile the application;
  - USFWS concerned about “mitigation land” and UMAM comparison particularly related to Gopher Tortoises;
  - The NE District Habitat Management Plan required for Osceola County may not meet state requirements;
  - Is there a potential to do non-continuous mitigation in NE District?
  - State will want better than 2:1 for land grant
    - Need to clarify this is a land grant and not land swap
  - Both Orange and Osceola County would need a resolution to apply to FCT
  - The PD&E evaluation matrix should focus on negatives and benefits of the proposed alignment

- Only the alignment through Split Oak would result in the land grant – thereby increasing the Split Oak conservation area. This should be quantified in the matrix
    - Application from FCT is approved by an FCT board. The application does not require approval from the governor or cabinet members
- Could Osceola Parkway Expressway use an easement from FCT instead of right-of-way?
  - Would need to check bond documents
  - All CFX roads are currently fee simple
- Del Webb is closing in November and site development would begin shortly after;
- Per letter from Beth Jackson with Orange County – an application to FCT and FWC at this time is premature due the fact that the CFX amended PD&E Study has not been initiated nor has the final alignment through Split Oak been approved. If the Orange County Board decides to move forward with the above outlined process. CFX will need to provide a substantial amount of information that will be generated by the PD&E Study that Orange and Osceola County will utilize in the application to FCT and FWC.
- A high level discussion of potential Split Oak Avoidance Alternatives was discussed to determine priority features.
- A second meeting will be held on July 23<sup>rd</sup> to review the FCT application requirements and how those correlate with the PD&E deliverables.

The meeting was adjourned at 11:00 a.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** July 23, 2018  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX & Tavistock

---

On Monday, July 23, 2018 a meeting was held at the CFX Main office building. The purpose of the meeting was to discuss the timeline of the PD&E Schedule compared to the application to FCT. However, due to the uncertainty of the necessity for the FCT application, the meeting focused on potential Avoidance Alternatives, and the general PD&E timeline.

The below notes have been arranged to reflect the flow of the discussions that ensued.

- What are the requirements for a re-evaluation? When does it change from a re-evaluation to a new PD&E Study?
  - The project termini and purpose and need have to be consistent.
  - Termini does not necessarily mean the project limits, the termini can be farther than the project limits but not reversed. Also, the project could be stage constructed, that wouldn't affect re-evaluation or project termini either.
- The movement south on the future Northeast Connector through the Nova Road corridor is a statewide corridor that needs to be preserved, is that correct?
  - No, the Northeast Connector corridor does not need to be preserved, but it should be able to be accommodated.
  - Need to show independent utility and be large enough in scope to identify regional impacts.
- For this to remain a re-evaluation study, does the project need to connect to the Sunbridge Parkway?
  - No, it does not need to connect to Sunbridge Parkway, but it would likely need to connect to Cyrils Drive instead.
- The PD&E included a super interchange with Boggy Creek, is that an issue?
  - No, this is not an issue since connections to Boggy Creek are provided.
  - It doesn't seem possible to provide a direct connect to the airport without rebuilding the entire interchange which is not cost feasible.
- Is the Boggy Creek viability better than the viability of the Lake Nona connection?

- No, the costs to build the PD&E alternative at Boggy Creek are extremely high compared to the returns in traffic. Also, the hospital has threatened to litigate if that property is needed.
- This study will examine a connection to Boggy Creek potentially through a Simpson Road extension.
- Obtaining the internal Poitras road network will be important as other interchanges are developed in the Poitras / GOAA property.
  - Heather and Ralph (Tavistock) are working on this section and should be able to provide that information.
  - Roads will not stop at the canal (on Poitras East), it is envisioned that the roads would continue through the GOAA property.
  - Should get GOAA, Heather Isaacs and Ralph Ireland together for a meeting (invite Clint and Richard and they will help facilitate).
- When would Tavistock need to send Avoidance Alternative ideas without delaying the Re-evaluation? They believe they are 30 to 60 days away from potential alignments.
  - The current schedule has Labor Day (September 3<sup>rd</sup>) as the end of concept development and the start of the environmental analysis for two viable alternatives.
- Tavistock is concerned that the avoidance alternative may impact the new utility track.
  - Dan asked for those files, so that we can avoid the utilities.
- Potentially shifting the systems interchange to the east and north is “not good” and will impact the future “downtown district” for Northeast Connector.
- What is the primary movement? East-west or North-South?
  - North / South gets to Nova Road which ties to I-95
  - East / West gets to SR 520 (doesn’t connect to I-95)
  - May need both connections
- Going through the Cyrils Road Community could result in Environmental Justice (EJ) issues. Hitting Del Webb (vacant property) is more favorable than impacting neighborhoods and relocating homes.
- Investigation into Refinement 1A impacts to Split Oak is currently underway (by sub to Tavistock?) and includes examining: gross acres, wetland mitigation, and gopher tortoise mitigation.
  - Knowing those impacts / numbers from a State standpoint is critical before going back to FCT.
  - Did moving the utility treatment plant improve the land grant significantly?
    - Yes, that is the best land in the land grant and with that property, the uplands exceeds the impacted uplands associated with Refinement 1A.

- Need to consistently message that the land grant is only for Refinement 1A. If an avoidance alternative is the recommended alternative, there is no land grant. Need to make that clear to the public and other stakeholders and we move forward.
- EAG / PAG meetings are in November, Public Meeting in December.
- The avoidance alternatives still have the challenge of Lake Ajay.
  - If we provide a reasonable buffer between Lake Ajay and the alternative, they should be okay.
- OUC has been calling CFX to inquire about possibility of a substation on the Springhead Lakes property that Tavistock owns.
  - Tavistock is not going to subdivide or parcel that property until the Re-evaluation is complete.
- Eagle Creek is willing to listen but not react.
- CFX cannot advance acquisition without an approved Re-evaluation.
- August 16<sup>th</sup> at 1pm, alignment discussion.

The meeting was adjourned at 11:50 a.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** August 13, 2018  
**Meeting Place:** Split Oak Trail Head, 12175 Clapp Simms Duda Road  
**Participants:** See Participant List  
**Subject:** Tour of Split Oak Forest

---

On Monday, August 13, 2018 the project team gathered at the main entrance to Split Oak Forest for the purpose of a guided tour of the portions of Split Oak potentially affected by the proposed roadway alternatives.

The following notes summarize the tour and highlight the primary points of the meeting. Select photos and a map are also provided.

The group commenced a walking tour of the southerly portion of Split Oak Forest beginning at the Clapp Simms Duda Road trailhead and ending at the secondary entrance gate on Cyrils Drive. The tour was guided by Beth Jackson.

The tour primarily focused on traversing the areas affected by the 2015 PD&E Study alignment as well as the Refinement 1A alignment. Below are the pertinent observations of the tour:

Split Oak has been under active management for approximately two decades. Charles Lee indicated that the original ranch land was considerably degraded but is now an example of "textbook" pine flatwoods in select areas, particularly along the north side of Cyrils Drive. Other areas include oak hammock and wetlands. A large gopher tortoise burrow was examined.

The land was considerably wet due to the recent summer rains. The group first traversed the trails in a southeasterly direction roughly following the 2015 PD&E alignment followed by returning to the point of origin and traversing southward until the trail became impassible due to the high water.

The group then drove to the access point on Cyrils Drive, where a brief walk-through occurred. Again, the high water prevented penetration deep into the forest. The group noted the proximity of the "Refinement 1A" alternative relative to Cyrils Drive. Charles Lee indicated that the isolated ponds were remnants of old borrow pits (for dirt) that were subsequently used as watering holes for cattle. Charles also noted that the Florida Trail traverses through the forest.

Beth noted that the western portion of Split Oak boundary has been managed to facilitate the foraging of sandhill cranes and therefore has less tree vegetation. Grubbing by feral hogs was also evident.

The following photos and trail map highlight the field trip.

**Example of Oak Hammock**

**Example of Pine Flatwoods**

**Example of Ponds / Borrow Pits**

**Foraging Sandhill Cranes**

**Cyrils Drive Trailhead Looking North**

**Transmission Lines Along Cyrils Drive**

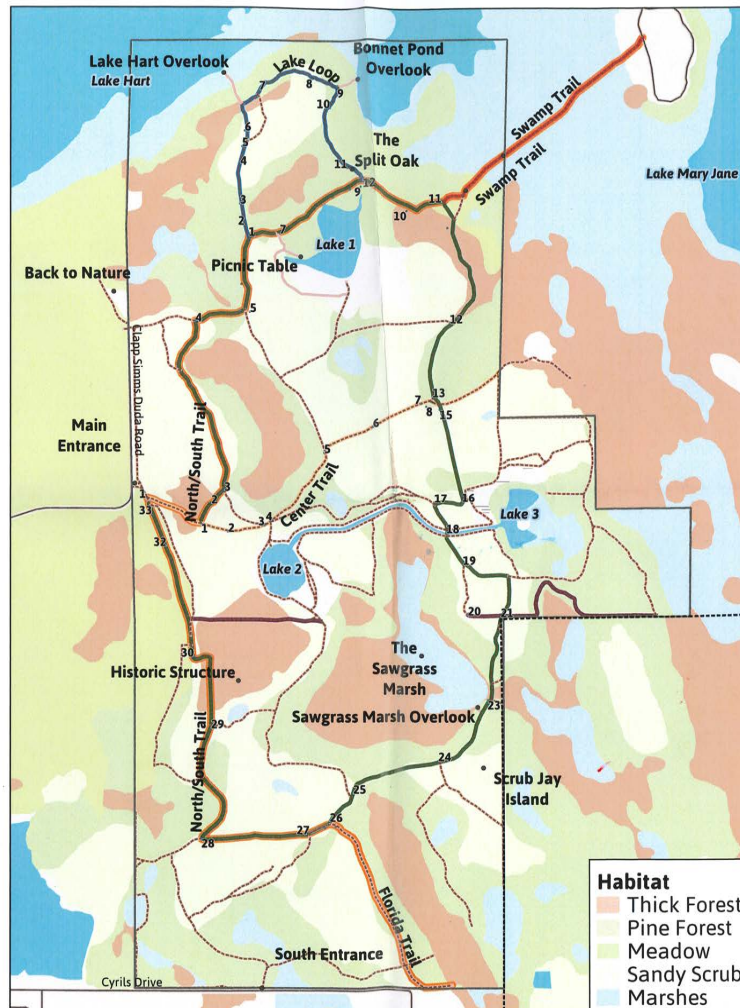

**Wet Conditions Along Trail**

**Entrance Sign**

**SPLIT OAK FOREST HIKING TRAILS MAP**

Hike with us! Free guided hikes. Connect @ [friendsofsplitoak.org/events](http://friendsofsplitoak.org/events)

The field trip was adjourned at 11:30 a.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** August 16, 2018  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX, Tavistock & Deseret

---

On Thursday, August 16, 2018 a meeting was held at the CFX Main office building. The purpose of the meeting was to discuss the Osceola Parkway Expressway alternatives.

The below notes have been arranged to reflect the flow of the discussions:

- Del Webb is closing in December
  - From Cyrils Road south about 270 acres
  - 3 phases to Del Webb that extends from Cyril's Road to Jack Brack Road
  - 1 contract for all 3 phases
- Deseret believes that the East / West Connection to SR 520 is important
- The Ultimate Sunbridge Parkway interchange is approximately 2 miles east of the systems interchange with the Northeast Connector
- Discussion related to the actual land arrangements associated with Refinement 1A
  - 400 acres from Osceola County?
  - 1,400 acres from Deseret?
- Deseret and Tavistock don't like Refinement 1A Shifted West due to proximity to Del Webb
- The Refinement 1A remainder in Split Oak was conceptually planned to include 20 acres of parking, a trail head and potential horse trail features
- Refinement 1A Shifted West – even if it included a systems interchange would not include the compensating land (1,400 acres)
  - Consensus is that going through Split Oak without the compensating land would be impossible to satisfy the Environmental community
- Richard mentioned that Tavistock had developed an interim connection to Cyrils Drive for Refinement 1A. He will send to the group for our input / review.
- The Split Oak Avoidance Alternatives were reviewed. The following is the discussion on each alternative:
  - 205 – impacts Lennar property and the cost for the remnant parcel will be very high and probably cost more than Refinement 1A

- Need to provide access for a future north / south road under the systems interchange connecting the land east of Split Oak (since this will be developed if Refinement 1A is not chosen)
- 207A – Does not provide east connection.
  - Charles Lee’s input on Governor’s task force wanted an east-west connection. Deseret thinks that systems interchange and connection to SR 520 is critical.
  - Spacing between Beachline and Nova Road is 10 miles – need an intermediate east-west road between those two.
- 207C – Richard preferred this alignment to all the other avoidance alternatives.
  - CFX would include terracing, heavy landscaping and other aesthetic features with the frontage road option.
  - Cyrils would go under OPE
- Tavistock wants to consider Refinement 1A without systems interchange – go south with local interchange instead.
  - “Delay” the east portion
- Del Webb master plan shows an interchange with NE connector at Jones Road or Jack Brack Road. Consensus was at Jack Brack Road.
  - Is this better than systems interchange?
    - For Tavistock – yes
    - Avoidance alternative with systems interchange has major impact on Del Webb
- What is priority?
  - Sunbridge or Jack Brack?
  - Systems or local interchange?
- The re-evaluation needs to compare alternatives equally.
  - If Refinement 1A has a systems interchange then avoidance alternative needs to include a systems interchange to compare equally
- On the west, Tavistock would like additional access.
  - Half interchange to / from South may be possible
    - ½ diamond with Laureate Boulevard and slip ramps only at Boggy Creek
  - Frontage road with ramps to Laureate Boulevard possible
    - CFX would not build frontage roads
- HG&S believes that after CFX approves the Re-evaluation it will take another 6 to 9 months to get approval from FCT.
  - FCT approval around December 2019 at the earliest
- Can design / right-of-way acquisition start before FCT approval?

- The design and right-of-way acquisition from SR 417 to Eagle Creek could be advanced. Would not do design / right-of-way acquisition on Split Oak portion of the project because work would be at-risk.
- Tavistock and Deseret have meeting on Thursday, August 23<sup>rd</sup> and will discuss the alternatives and decide on east-west or north-south as the priority for the OPE alignment.

The meeting was adjourned at 3:30 p.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** September 5, 2018; 2:00 p.m.  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX, Tavistock & Deseret

---

On Wednesday, September 5, 2018 a meeting was held at CFX headquarters. The purpose of the meeting was to discuss the Osceola Parkway Expressway alternatives.

The below notes have been arranged to reflect the flow of the discussions that ensued.

### West Segment Discussion

- Upon further review, Tavistock has strong objections to the conceptual OPE / SR 417 system type interchange. They are seeking an outside engineering consultant to provide a peer review and offer suggestions.
- The lack of local access and the “splitting” of the Lake Nona property are their biggest concerns. Mr. Leavy again committed to send RS&H the internal roadway network files for Lake Nona future phases. Tavistock is also concerned their future new roadway linking north and south properties over SR 417 could be impacted.
- Discussion ensued regarding a potential roadway extending from the recently developed CFX diamond interchange on the Poitras West property to Lake Nona Blvd, then continuing over SR 417 to the Tavistock property west of the railroad. Tavistock indicated that a re-assessment of development plans would need to occur to accommodate such a connector.
- An extensive discussion of the western segment of the PD&E adopted alignment occurred. Access to the airport was the main topic of this discussion. Both Tavistock and Deseret representatives agreed near term access to the airport could be provided via an upgraded Boggy Creek Road and therefore the direct OPE connection to the airport could be deferred to a later phase. Direct access between OPE and SR 417 via new ramps is critical. CFX confirmed the existing Boggy Creek interchange was designed to accommodate the SR 417 / OPE future direct connect ramps to / from the south, but not the direct north/south movement that by-passes the diamond ramp termini. CFX Dewberry can provide the files for the future interchange ramps.

- CFX directed the PD&E Reevaluation Team to develop alternative concepts / refinements for the K-H adopted western segment. OPE should be located within the Boggy Creek Road median; elevated where required to maintain east/west access across Boggy Creek Road and to fit within the existing Boggy Creek Road right of way as much as possible. If additional ROW is required, consider the east side of Boggy Creek Road and identify the potential property impacts.

#### East Segment Discussion

- Extensive discussion regarding the prominent movement / direction east of Split Oak occurred. Based on information developed through the Corridor I study, CFX suggested that only one east/west limited access facility was needed and it should extend to the southeast linking with Nova Road and eventually connecting with I-95; the other east/west facility could be a high capacity arterial. Mr. Whyte stated the Deseret consultant (Renaissance Planning) contends both east/west facilities need to be limited access. Elimination of the systems interchange east of Split Oak would reduce costs and impacts and accommodate a number of different local access concepts.
- To assist in developing refinements to the alternatives, RS&H requested CADD files of the land use and development layouts (streets and parcels) for the Del Webb and proposed downtown area adjacent to the system interchange. Once received, refinements to the alternatives could be completed within a two week period.
- At the completion of the discussion, all attendees agreed the movement to the southeast is the primary direction and the most reasonable regional facility. Mr. Whyte will discuss issues with Renaissance and confirm future capacity and facility needs. No actions for the Reevaluation team were identified for this segment.

The meeting was adjourned at 4:30 p.m.

## Project Development & Environment Study Re-evaluation

### OSCEOLA PARKWAY EXTENSION

OSCEOLA PARKWAY EXTENSION

#### STAKEHOLDER MEETING SUMMARY:

<b>PROJECT NAME:</b>	<b>Osceola Parkway Extension PD&amp;E Study Re-evaluation</b>
<b>PROJECT NUMBER:</b>	<b>599-221</b>
<b>DATE:</b>	<b>September 28, 2018</b>
<b>TIME:</b>	<b>1:30 p.m. – 2:40 p.m.</b>
<b>LOCATION:</b>	<b>Annamarie Riethmiller residence, 5900 Cyrils Drive</b>

---

Public Involvement Coordinator Mary Brooks with Quest Corporation of America met as requested with Annamarie Riethmiller at her 15-acre property, located at 5900 Cyrils Drive. Following is a brief synopsis, followed by additional comments from the stakeholder:

Ms. Riethmiller stated there is a narrow strip of the property with her mobile home, pig and mini horse pens, and much of the rest of it is wetlands on the east. She stated she has seen deer and panther using the wetlands.

Ms. Riethmiller stated she intends to build a wildlife sustainability and education center on part of her property but does not yet have design plans or permits. She stated she has worked with UCF and a sustainability facility in South Africa and wants to do something similar here.

She stated it would be hard to get the east-west corridor through this area without affecting the Split Oak Forest Wildlife Environmental Area (SOFWEA). She requested the following be part of the project:

- 1) A wildlife crossing between SOFWEA and the wetlands on the east side of her property;
- 2) If her property must be affected, she only wants a partial take – not full – so she can have enough left to build the center;
- 3) If the alternative is selected associated with the developer-offered, conservation land swap, she wants the SOFWEA remainder to be used for a wildlife education center;
- 4) Study field staff must contact her for property access as she has pigs and mini horses that kick;

5) The wetlands that extend east to Apsher and south to Jack Brack should be protected at all costs.

**ADDITIONAL COMMENTS:**

Ms. Riethmiller led a drive around the wetlands and offered the following comments. She said the swamp goes to Jack Brack; it's a big area that goes three to four miles. She said there's an island in the wetlands that has the potential for student research and an observation center.

She discussed the roads bordering the wetland/natural area that sort of form a barrier from development: Apsher, Jack Brack, McMichaels. "We're standing at a new phase of this whole area," she said. "Apsher should be left peaceful where people can look at nature and maintain the rural lifestyle."

Ms. Riethmiller said she'd like to partner with CFX to help develop a wildlife observation center on the wetlands. PIO noted that's outside the agency's scope, but it is something counties have been known to do (PIO gave the example of the Seminole County Environmental Center in Spring Hammock). She said she's spoken to Osceola County Board of County Commissioners Chairman Fred Hawkins about it and she said he was interested.

She said if there has to be bridging in her area, she would rather see a lower profile; she referenced an overpass by Lake Lucerne as an example. She reiterated the request for a wildlife crossing between the forest and wetlands on and beyond her property.

PIO noted she may see surveyors or geotechs out here for the study. She said they need to contact her beforehand; they can't just come on the property because the horse is a kicker. "It will chase you and it can run deceptively fast." PIO said field staff is supposed to contact property owners beforehand, but I'll note that with them as well.

She mentioned something about Tavistock is planning an access road between their three properties. "There are ways to accommodate the traffic and leave this natural."

She said she would be "delighted" with the land swap. She noted the land Tavistock wants out of the forest is not wetlands; she said it would be better to take the southern bit of the SOFWEA than the wetland.

She stated the big thing is animals can connect between the wetlands and the swap land. "The bird life here is stunning." She wants to get with schools to have students do birdwatching.

We drove to the lake on the west side of SOFWEA. PIO pulled up the feasibility study map and showed where those proposed alternatives would have gone. PIO noted we're refining these alternatives and developing new ones for this area.

PIO said I'd share the information from our meeting with the study team. She said we'd be able to see the wetlands clearly on our aerials. PIO noted if she calls or emails please give me a couple of days to respond as we are getting many communications from community members on this project. She asked

that I send her my contact information so she can reach me directly. PIO said I would with the meeting summary. She again thanked me for coming out and taking the time.

Field meeting concluded at approximately 2:40 p.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project** CFX Contract # 001250  
**Number:**  
**Meeting Date:** October 22, 2018; 1:00 p.m.  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX, Tavistock & Deseret

---

On Monday, October 22, 2018 a meeting was held at CFX headquarters. The purpose of the meeting was to discuss the Osceola Parkway Expressway alternatives.

The below notes have been arranged to reflect the flow of the discussions that ensued.

### West Segment

- Michael Falini with Jacobs presented the significant elements of the SR 417 west interchange alternative that was developed in cooperation with Tavistock.
- The alternative combines the Osceola Parkway Extension (OPE) and SR 417 systems interchange with a local access interchange at Lake Nona Blvd and Laureate Blvd.
- Joe Berenis explained that CFX does not allow local traffic and system interchange traffic to mix with one another. The reason that local and system are not permitted to mix is for safety and operational issues.
- Dan Kristoff asked if the traffic volumes were evaluated in conjunction with this design and if the weave conditions were examined. At this time, a traffic analysis has not been completed for this alternative and the potential weave issues have not been evaluated.
  - Based on his engineering judgement, Michael believes the only potential weave conflict would be for the eastbound to southbound movement.
- Dan also asked if profiles have been completed for the design. At this time, profiles have not been examined but standard distances were applied for the ramps and Michael has no concerns with the vertical geometry. Profiles will be completed by Michael and provided to RS&H to review.
- A conceptual signing plan or an evaluation of signage was also not considered for this alternative due to the time constraint. Applying appropriate signage when comingling the local and system traffic is critical. Signing will be considered as this alternative is developed further.
- CFX and RS&H will need the CADD files to further evaluate the alternative before providing more input on the interchange configuration.

- The next steps are to have CFX and RS&H review the alternative and coordinate with Michael at Jacobs on refining the alternative based on the concerns raised at this meeting.
- Tavistock will provide the traffic for the Lake Nona area to assist in evaluating the ramp geometry.
- Joe Passiatore asked if the right-of-way associated with this alternative would be free. Clint stated that we are getting closer to that.

### **Lake Ajay Alternatives**

- CFX and RS&H staff will be attending the Lake Ajay Home Owners Association (HOA) meeting on November 15<sup>th</sup> at 7:00 p.m. Lake Ajay requested that the project team present an update at the HOA meeting and CFX agreed.
- Two Lake Ajay alignment options (Option C and Option D) were shown to the group and compared to the original Refinement 1A.
  - The Refinement 1A limited access right-of-way line is approximately 2,400 feet to the east, and approximately 1,400 to the north of the Lake Ajay northern most corner boundary corner.
  - Option C is for the Split Oak Avoidance Alternative. The OPE limited access right-of-way line is approximately 900 feet to the east, and approximately 760 feet to the north of the Lake Ajay northern most boundary corner.
  - Option D is for the revised Refinement 1A alignment that impacts Split Oak. The OPE limited access right-of-way line is approximately 2,400 feet to the east and approximately 1,400 to the north of the Lake Ajay northern most boundary corner.
- Options C and D and a project overview board will be shown at the Lake Ajay HOA meeting.

### **East Segment**

- Don Whyte believes that we are 7 to 10 days away from a decision on using the local interchange instead of the systems interchange.
- At this time, we can assume a local interchange is moving forward. Don will send a confirmation once this is official. Hence, only the local access interchanges were examined via roll plots of Alternatives 107, 107B, 107C, 107B-1, 107C-1, 107D, 207C, 207D, 210, 211, and 212.
- Due to the placement of the water / sewer treatment plant, all alternatives will impact Rummell Road. The footprint allotted for OPE is only 270 feet. However, the OPE typical section requires 330 feet. Therefore, approximately 60 feet of right-of-way will be required from Rummell Road and Neighborhoods C and E.
- First, the Split Oak impact alternatives were reviewed:

- Based on a conversation with Don on 10/3, multiple versions of Alternative 107 were examined to improve the stacking distance the ramps provide.
  - Alternatives 107B and 107C braid only the eastbound exit ramp.
  - Alternative 107B-1, 107C-1, and 107D braid both the eastbound exit ramp and westbound entrance to form only one intersection with a local arterial.
    - 107B-1 has a less than desirable crossing angle at the ramp intersection.
    - 107C-1 improves the crossing angle and should allow additional capacity over time due to smoother operational characteristics..
    - 107D provides a 90° angle intersection by re-aligning the arterial road to better align with the access road inside of Del Webb. However, this alternative requires more right-of-way than the original Refinement 1A.
  - Alternative 107C-1 was determined to be the best Split Oak alternative by Tavistock and Deseret.
    - This alternative minimizes impacts to the environmental area; and
    - Provides additional development opportunities for Tavistock.
- Next, the Split Oak Avoidance Alternatives were reviewed:
  - Alternative 207C does not provide the arterial movement north of the sunbridge development and was recommended to be dropped.
  - Alternative 207D provides frontage roads with Cyrils Drive, includes an interchange at Absher Road as well as additional ramps to and from the south at Del Webb.
  - Alternative 210 keeps Cyrils Drive to the north and has an interchange with the new arterial and the Del Webb access road.
  - Alternative 211 re-aligns Cyrils Drive to the south of OPE and has an interchange with the new arterial and the Del Webb access road.
  - Alternative 212 keeps Cyrils Drive to the north and has an interchange with the new arterial and the Del Webb access road (via a loop ramp).
- Alternative 207D was determined to be the best of the avoidance alternatives. However, Tavistock and Deseret mentioned that any avoidance alternative would be incredibly impactful to the Del Webb and Sunbridge developments.
- The Del Webb closing is scheduled for December 17<sup>th</sup>.
- As Alternative 107C-1 and Alternative 207D move forward, additional coordination with the Counties and other stakeholders will occur to properly address the future number of parcels impacted (as opposed to only acres of land).

**FCT Discussion**

- FCT does not consult the governor or cabinet on decisions.
- Citizens on the FCT board have staggered terms that do not coincide with the election.

- DEP’s representative could be changed with the new administration.
- There is currently a vacant seat, which is anticipated to remain vacant until the new governor.
- Likely to have 2 new FCT members after the fall election.

The meeting was adjourned at 2:45 p.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project Number:** CFX Contract # 001250  
**Meeting Date:** November 5, 2018; 1:00 p.m.  
**Meeting Place:** CFX Home Office  
**Participants:** See Participant List  
**Subject:** Meeting with CFX, Tavistock & Deseret

---

On Monday, November 5, 2018 a meeting was held at CFX headquarters. The purpose of the meeting was to discuss the Osceola Parkway Expressway alternatives, with the key items being the OPE/SR 417 Interchange and the OPE interchange adjacent to Split Oak Forest. The below notes have been arranged to reflect the flow of the discussions that ensued.

### West Segment

- Dan Kristoff began with a review of the Tavistock version of the Osceola Parkway Expressway (OPE) and SR 417 interchange. The major comments regarding the Tavistock proposed interchange include:
  - At this location the proposed OPE northbound movements to the west (left) must exit to the east (right), while the movements to the east (right) are required to stay to the west (left) prior to heading east (right). This is opposite to what motorists are accustomed.
  - The OPE northbound two-lane mainline movement to west is reduced by one lane. It is replaced by a local access ramp connection. The mainline capacity of the system interchange is compromised in favor of a local access connection. Lane balance through the system interchange movement is not retained.
  - In the eastbound to southbound direction the OPE system to system connection is compromised by the introduction of a local access exit ramp. The additional exit ramp will likely induce traffic that would not be using the system interchange, thus introducing more complicated messaging and additional lane changing at an exit that occurs at a less than desirable location.
  - The loop ramp providing access to Lake Nona Boulevard does not meet minimum radius criteria. The signal controlled intersection at Lake Nona Blvd. has the potential to create a significant que on the ramp, creating a potentially unsafe condition due to the combination of horizontal and vertical geometry and the required stopping distance.

- CFX policy is to not include local access interchange movements within the body of a system interchange as fluid system interchange higher speed direct movements are compromised by normally slower moving local access traffic.
- After a discussion of potential modifications that were presented, it was determined that the alternative should no longer be considered.
- Discussion ensued regarding the potential for a full interchange at Laureate Boulevard. It was decided that a full interchange could be accommodated near New Hope Road. However, providing this full access interchange would eliminate the interchange connecting to Boggy Creek Road. According to preliminary traffic models, the Boggy Creek Road interchange is a big traffic generator. It was decided to not move forward with this alternative due to the elimination of the Boggy Creek interchange.
- Both the Boggy Creek Road OPE Alternative and the Lake Nona OPE Alternative will be evaluated during the re-evaluation study. The revised Boggy Creek Road Alternative will not include direct ramps to the airport. This alternative also co-locates the OPE limited access right-of-way with the Orange County four-lane Boggy Creek Road right-of-way.
- The Boggy Creek Road Alternative impacts the parcel in the Southwest quadrant of the existing SR 417 / Boggy Creek interchange. This parcel is currently being developed with a Publix, a hotel and other out parcels. Heather will send a PDF and CADD files (if available) of the proposed development parcels. The impact analysis will include these parcels.
- Tavistock believes that a full local access interchange to Lake Nona and the Medical City Drive flyover are critical elements to facilitate a partnership agreement. At this time, Tavistock feels that a partnership agreement will not be viable, given the west alternatives.
- Additional discussion ensued regarding the possibility of incorporating a Medical City Drive flyover of SR 417 and creating a local access interchange just north of SR 417. The group believes it may be possible to extend Medical City Drive over SR 417 and connect braided ramps to/from SR 417 to provide the local movements that cannot be provided at the Laureate Boulevard half interchange. In addition, a connection to Boggy Creek Road, at the J Lawson Boulevard overpass would provide direct airport access to Lake Nona. On behalf of Tavistock, Jacobs Engineering will investigate potential alternatives that accommodate the movements just identified. A follow-up meeting will be scheduled in approximately 3 weeks to discuss this alternative.
- As the west alternatives move forward, RS&H subconsultant Balmoral will coordinate with Tavistock's engineer regarding the master stormwater plans for the Poitras properties. The potential for joint use ponds will be explored.

## East Segment

- Don Whyte stated that local access interchanges are acceptable to the Deseret Ranch, if OPE commits to extending an expressway connection to Nova Road.
- Glenn stated that OPE will extend the connection to Nova Road. It was decided to move forward with the local access interchanges.
  - A minor modification was made to local access Alternative 207D by shifting the northbound exit ramp out of a wetland system. This new alternative is referred to as 207D-1.
- Local access interchange Alternative 107C-1 will move forward with Split Oak Forest alternative alignment 1A. Local access interchange Alternative 207D-1 will move forward with the Split Oak Avoidance alternative alignment. These alternatives will be the two that are in the re-evaluation process. The environmental analysis will begin for these two alternatives.
- The purpose of the re-evaluation study is to choose a recommended alternative. The selection of a recommended alternative will be decided through the evaluation matrix. Per the Florida Communities Trust (FCT) direction, the Recommended Alternative cannot be based solely on cost. If the Split Oak Alternative is chosen, the alternatives matrix would need to support this decision as the best without factoring in the discounted right-of-way that may occur through a partnership agreement.
- If the Recommended Alternative is the Split Oak Avoidance Alternative, thus negating a partnership agreement; and, the project is not considered “viable” from a CFX financial standpoint, it remains possible that the CFX Board can approve the project to move to the next phase.

The meeting was adjourned at 3:30 p.m. The participant list follows on the next page.

## Project Development & Environment Study Re-evaluation

### OSCEOLA PARKWAY EXTENSION

#### STAKEHOLDER MEETING SUMMARY

##### Lake Ajay Annual Homeowners Association (HOA) Meeting

**Date/Time:** Thursday, November 15, 2018, 7 p.m.

**Location:** Eagle Creek Clubhouse; 10350 Emerson Lake Blvd, Orlando, FL 32832

Attendees:

- Approximately 50 Lake Ajay HOA members
- Fred Hawkins, Osceola County Commissioner & CFX Chairman
- Glenn Pressimone, CFX Director of Engineering
- Kelsey Lucas, RS&H
- Paul Heeg, RS&H
- Kathy Putnam, Quest

##### I. Purpose of the Meeting

The Lake Ajay HOA requested an update on the Osceola Parkway Extension Project Development and Environment (PD&E) Study Re-evaluation.

##### II. Presentation

Commissioner Hawkins said he was there representing Osceola County and was glad CFX was there to give an update on the Osceola Parkway Extension Study. Public Involvement Coordinator Kathy Putnam, of Quest Corporation of America, opened the presentation and introduced the study team. She thanked the attendees for their interest in and input on the Osceola Parkway Extension during the concept, feasibility and mobility phase. She said CFX continued to turn to stakeholders for their input during this, the re-evaluation of a previous PD&E study.

She pointed out the comment forms at their seats and invited attendees to fill them out and hand them to her before the team left or they could email their comments. (One comment form was

collected.) Kathy said she would email PDF's of the display boards to Lake Ajay HOA board member Dieter Heilmann who would distribute them to HOA members.

Kathy then turned it over to Kelsey Lucas of RS&H, who explained the three boards displaying the overview of the corridor's alternative alignments, the Split Oak Forest Wildlife Environmental Area (SOFWEA) minimization alignment, and the Split Oak avoidance alignment. Kelsey pointed out that the minimization alignment brought the roadway right of way to approximately 1,400 feet away from the Lake Ajay property. The SOFWEA avoidance alignment brought it to within 800 feet of the Lake Ajay property. Kelsey explained next steps regarding the compilation of the evaluation matrix, which would help determine the preferred alignment that would be presented to the CFX Governing Board.

A discussion period with the audience ensued. Questions and comments included:

- What's the reason that there was a SOFWEA avoidance alternative that appeared to be completely new? Where did it come from? Why hadn't this been shown during the previous study phase? The team explained that work on alternatives continued as stakeholder input and public comment was collected.

- How could environmental concerns regarding SOFWEA weigh more heavily than impacts to Lake

Ajay residents?

- Why are there two SOFWEA alternatives? Why not use the original, more northerly SOFWEA alignment? Commissioner Hawkins explained multiple times that Orange County was highly unlikely to approve the route that went through the Orange County portion of Split Oak. CFX needed to develop an alternative that could still go through, but minimize the impacts to the forest.

- Discussion regarding Florida Communities Trust (FCT) and the agreement made between Orange and Osceola counties for that conservation land. Commissioner Hawkins explained how both commissions would have to have super majority votes to even submit an application for the Florida Communities Trust to consider an alignment through SOFWEA.

- Glenn Pressimone explained the process that the CFX Board uses to determine projects. He said a possibility for projects is that the Board may decide not to pursue design and construction.

- There was a good bit of discussion about the growth coming to the area and the reality of that impact on the need for transportation infrastructure.

- Discussion continued regarding the Florida Communities Trust, the Florida Fish and Wildlife Conservation Commission's role as the advisor to FCT, and the weight of the Florida Fish and Wildlife Conservation Commission's recommendations to the FCT.

There being no further discussion, there was a short recess in the meeting so the study team could remove the displays and leave.

### **END OF MEETING SUMMARY**

This meeting summary was prepared by Kathy Putnam, Public Involvement Coordinator with Quest Corporation of America. It is not meant to be verbatim but is a summary of the meeting activities and overall discussion. If you feel something should be added or revised, please contact Kathy Putnam by email at [kathy.putnam@qcausa.com](mailto:kathy.putnam@qcausa.com) or by telephone 407-690-7220 within (5) days of receipt of this summary.

# **MEETING NOTES**

## **SFWMD Pre-Application Meeting**

### **Osceola Parkway Extension (599-223) & Poinciana Parkway Extension (599-224A) Project Development & Environmental (PD&E) Study Osceola and Orange Counties**

Location: SFWMD Orlando Service Center; Date: Tuesday, November 27, 2018; Time: 8:30 am

#### **1. INTRODUCTION – See Attached Sign In sheet**

#### **2. PROJECTS OVERVIEW and STATUS**

- a. Osceola Parkway Extension - Construct new limited access facility from SR 417 to Sunbridge Parkway; Permit for 8-lane typical section (Osceola and Orange County)
- b. Poinciana Parkway Extension – Construct new limited access facility from Poinciana Parkway to CR 532; (Osceola and Polk County)

#### **3. STORMWATER CRITERIA**

- a. Water Quantity
  - i. Mr. Daron confirmed that SFWMD will follow the attenuation criteria set forth by Counties (Orange and Osceola) as this is considered the historic discharge rates for these areas:
    1. Osceola County: 10-year/72-hour storm event (using SFWMD72 distribution) (8.0 inches)
    2. Orange County: 25-year/24-hour with Orange distribution (8.6 inches) (*Osceola Parkway Extension only*)
- b. Water Quality
  - i. Standard Wet detention criteria: Greater of the first one (1) inch of runoff from the total developed project or runoff from two and one-half (2.5) inches over the net new impervious area
  - ii. Additional treatment and/or nutrient loading requirements are required if the proposed improvements are within an impaired WBID:
    1. Mr. Daron confirmed that Phosphorous Loading calculations are not required if the only basis is because the project is within the Lake Okeechobee BMAP
    2. *Poinciana Parkway Extension*- Mr. Ady recommended that CFX follow the criteria set forth in the previous Poinciana Parkway permit as a template for this project
  - iii. In the area of the Reedy Creek Mitigation Bank, alternative treatment systems may be considered such as providing linear treatment swales which discharge via sheet flow to the adjacent wetlands, but are not sized for attenuation in order to avoid wetland impacts.
- c. Floodplain compensation options -
  - i. Cup for Cup between the 100-year elevation and estimated average wet season water table
  - ii. Can be provided within the proposed stormwater ponds
  - iii. Mr. Daron confirmed that stormwater modeling is not allowed to demonstrate compensation, only cup for cup
- d. Other-
  - i. As part of the permit application, a list of impacted permitted facilities should be provided for the District's use in tracking future compliance

- ii. Mr. Daron confirmed that the District will allow flexibility in the dimensional criteria for wet detention ponds for linear transportation projects
- iii. Any impacts to District lands (i.e. conservation, Canal R/W, etc.) will require further coordination outside of the Regulatory department.
- iv. Existing borrow pits
  - 1. If they were previously permitted to provide floodplain compensation, then any impacts to this volume would need to be mitigated. If the borrow pits were not permitted for floodplain compensation, then floodplain impacts would not need to be considered.
  - 2. Existing borrow pits can be evaluated to be converted into stormwater ponds
  - 3. Permitted Pre-development discharge can provide proof of discharge, but may need to be evaluated for reasonableness prior to use in comparison against the post-development discharge
  - 4. Pre-post volume may be required where there was no permitted pre-development discharge

#### 4. ENVIRONMENTAL

- a. Osceola Parkway Extension
  - i. Advanced Notification Package originally submitted by Florida's Turnpike in April 2012
  - ii. PEIR completed in May 2017. Recommended alternative included 144 acres of wetland impacts
  - iii. PEIR Reevaluation initiated in July 2017 to evaluate additional alternatives
    - 1. Ms. Gough outlined that the goal of this reevaluation was to develop an avoidance alternative for impacts to Split Oak Forest and to work with some of the adjacent landowners.
    - 2. Ms. Gough noted that there has been ongoing discussion with Florida Communities Trust regarding potential impacts to Split Oak Forest.
  - iv. Mr. Dailey outlined the alternatives which are currently under consideration.
    - 1. Boggy Creek Alternative (west of Narcoossee Road)
    - 2. Lake Nona Alternative (west of Narcoossee Road)
    - 3. Alternative 107C-1 (east of Narcoossee Road)
    - 4. Alternative 207D-1 (Split Oak Forest avoidance alternative)
  - v. Natural Resource Evaluation update being prepared to evaluate wetland and potential species habitat effects.
    - 1. Mr. Dailey noted that there are several bald eagle nests located within the project corridor and the project is also within the consultation area for the caracara and scrub-jay.
    - 2. Mr. Ady noted that either of the alignments will impact District-owned lands.
    - 3. Mr. Ady noted that it will be important to demonstrate avoidance and minimization of wetland impacts.
  - vi. Mitigation Opportunities – there are multiple mitigation bank options in this area.
  - vii. Permit discussion: Mr. Daron noted that if the project impacts an existing permitted facility, the permittee will be responsible for making sure that they are still in compliance.
- b. Poinciana Parkway Extension
  - i. Advanced Notification Package submitted in September 2018.
  - ii. Environmental Advisory Group Meeting held August 15, 2018. SFWMD in attendance.
  - iii. Alternatives 1, 4 and 5 carried forward from previous Feasibility Study.
  - iv. Alternatives 4 and 5 extend into Reedy Creek Mitigation Bank and Upper Lakes Basin Watershed. Alternative 1 minimizes impacts to Reedy Creek Mitigation Bank, and avoids Upper Lakes Basin. But Alternative 1 has greater impacts to existing and proposed

- developments, listed species and business/residential impacts.
- v. Natural Resource Evaluation being prepared to evaluate wetland and species habitat effects.
  - vi. Evaluating avoidance, minimization and mitigation.
  - vii. Open discussion regarding effects

Mr. Ady suggested the existing Poinciana Parkway permit is a good template for evaluating the impacts, direct and secondary, the wetland assessments etc.

Ms. Gough asked about the lead agency for future permitting because the alternative alignments fall within both SFWMD and Southwest Florida Water Management District jurisdiction. Hydrologically the drainage basins discharge /drain to Reedy Creek. There could be a Memorandum of Agreement (MOA) between the SFWMD and SWFWMD, but Mr. Ady suggested that we meet with SWFWMD to discuss as they would need to agree.

Need to look at avoidance and minimization strategies and the previous permit provides a good template for this consideration as well.

Mitigation may be within the Reedy Creek bank, but sufficient credits may not be available. Additional mitigation options may be evaluated. Additionally, an evaluation of the effects on the bank needs to be evaluated and again the District indicated the previous permit may be a good template. The team has begun coordination with the bank owners/consultants.

Because there are impacts to the SFWMD Upper Lakes Basin, coordination with SFWMD Real Estate division will be needed during design and permitting.

Mr. Ady stressed the point that impacts need to be minimized.

Modica and Associates with Kimley-Horn has conducted field evaluations of the wetlands and listed species surveys will begin in January. All of this will be summarized in the PD&E documentation.

## **5. ACTION ITEMS**

## Project Development & Environment Study Re-evaluation

### OSCEOLA PARKWAY EXTENSION

**MEETING SUMMARY:** Kim Buchheit

**PROJECT NAME:** Osceola Parkway Extension PD&E Study Re-evaluation

**PROJECT NUMBER:** 599-223a

**MEETING DATE:** February 7, 2019

**MEETING TIME:** 4 p.m. – 5:15 p.m.

**MEETING LOCATION:** CFX Headquarters, 4974 ORL Tower Rd., Orlando

---

On February 7, 2019 at 4 p.m. Glenn Pressimone, Central Florida Expressway Authority (CFX) Director of Engineering, and consultant Public Involvement Coordinator Mary Brooks met with Kim Buchheit to address her questions and comments regarding the Osceola Parkway Extension Project Development and Environment (PD&E) Study Re-evaluation. Ms. Buchheit stated she is interested as a citizen and is not representing any particular organization.

Ms. Buchheit stated she attended the Orange County Board of County Commissioners meeting where there was a resolution introduced to protect the Split Oak Forest Wildlife Environmental Area (SOFWEA). She said she didn't expect a discussion of technical matters and roadway design, and that many of the people who spoke were spreading bad information. She said she felt it was her duty to get CFX involved to understand that members of the public were presenting misinformation to the commissioners.

Mr. Pressimone stated it is not unusual for the media or the public to change the narrative or revisit an old narrative. He said he would provide her with the current status and study overview.

Ms. Buchheit stated her main concerns were from Narcoossee Road east to the SOFWEA.

Mr. Pressimone stated that west of Narcoossee Road we're down to two main concepts. He noted the PD&E re-evaluation study has a different set of parameters than a new PD&E study. He referenced the document prepared by the Osceola County Expressway Authority (OCX) consultant Kimley-Horn and noted we show the blue OCX PD&E Study alignment on the current exhibit. He noted we need to compare the attributes of the alternatives to each other and show they are superior to the original OCX PD&E Study alignment.

Mr. Pressimone stated that in this west portion of the study area, we're carrying forward alternatives that are similar to what was in the original OCX PD&E Study. He noted the exception that we would not do direct connects; we would have a connection to Boggy Creek Road to get to Orlando International Airport.

Mr. Pressimone pointed out the alternatives, noted the multiple property owners (GOAA, Tavistock and Lake Nona), agreements and the different impacts from the proposed alternatives. He noted either alternative worked well. Ms. Buchheit stated she did not have any questions on the west end.

Mr. Pressimone stated that on west side, the alternative along the south part of the Poitras property is basically the same as the OCX PD&E Study. He noted crossing Narcoosee Road to Canal C29A, there are significant differences. Going back to the Concept and Feasibility Study, the study Environmental Advisory Group (EAG) from the beginning had a lot of concerns about the PD&E alignment, particularly that any alignment through the forest would leave a remainder to the south that would be rendered no longer pristine and would be more difficult to manage. The remainder would suffer the loss of fire management. EAG members stated mechanical means, which would be more expensive and not as effective, would have to be used to maintain that remainder of the park. It was noted there was no support for the OCX preferred alignment among the EAG members.

Mr. Pressimone stated we subsequently endeavored to minimize or avoid those impacts. He briefly recapped the many discussions about multiple options during advisory group and Split Oak Working Group meetings. He recalled he and CFX Executive Director Laura Kelley also met with the League of Women Voters to discuss their concerns. The object has been to shrink or avoid impacts to SOFWEA.

He noted in conversations about shrinking impacts, there seems to be some support. He said there has been discussion about private entities committing additional lands in relation to the alternatives that would minimize, but not avoid, impacts to SOFWEA. He informed Ms. Buchheit there would be another EAG meeting coming up, but the date has not been set.

Ms. Buchheit said, "What's floating out there is that there is an exchange deal already made. The Osceola chairman is sending letters that the deal is made." Mr. Pressimone noted that regarding the letter from Tavistock to Osceola County, that is Osceola County business. He added he did attend the Osceola County Commission meeting where Charles Lee of the Audubon Society made a presentation and he has seen the letter.

He continued that in the SOFWEA working group, they settled on the green alternative as the best balance if there had to be an impact to the forest. This alternative would leave about 160 acres to the south. For that impact, private entities (Deseret Ranches and Suburban Land Reserve) would commit other property to conservation. He emphasized that there had been nothing formal received on that to date, so the current PD&E Study cannot rely on that. Those conversations are ongoing.

He noted regarding the remainder, there were also conversations including Osceola County's concerns about the current south trail head and access to the park, that it is less than desirable. There is basically a gate and spots for two cars, which is far less desirable compared to the north end trailhead. One concept discussed was to create a nice trailhead on the south end. There would be no development, just a passive 20-acre park. CFX committed to bridge that area, allowing access to the park from the south.

With that concept and commitment, Mr. Pressimone estimated about 85% of the people in the room seemed to support the minimized impact to the forest. The concept being the additional conservation acres and a passive area for community and relocating the uplands. Also, out of those discussions, after being told the environmental quality of the land at their initial site was good, Tavistock moved their water treatment plant.

Ms. Buchheit stated the property to the east is all wetland and would be difficult to manage. She said the biggest issue is the gopher tortoise habitat: the gopher tortoises won't use wetland. Mr. Pressimone noted the environmental agencies and groups that had been involved in the discussions, and that they told CFX none of that is a fatal flaw. He noted the agency and other attendees were not just looking at SOFWEA, but the area as a whole.

Mr. Pressimone said the study team now needs something formalized from the private entities to understand what the proposed commitment is so they can consider that in their evaluation and documents. Mr. Pressimone noted once we have and understand the formal commitment, we'll meet with the EAG for consideration and further discussion.

Noting previous conversations about wildlife migrations and the fact that there are development rights west, south and east of the SOFWEA, Mr. Pressimone noted there were concerns from some of the EAG members that the forest is in danger of becoming a peninsula. It was noted that when the EAG discusses the formal conservation land commitment, the question will be do we think this benefits the big picture of the environment.

Mr. Pressimone noted the Florida Communities Trust (FCT) document talks about what happens if there's a government acquisition. The document doesn't say acquisition by a government is a fatal flaw; it states what Orange and Osceola counties are responsible for doing if there's an impact. He also noted the two counties both will have to decide to submit an application to the FCT.

Mr. Pressimone noted CFX had met with the FCT and they said there is a path, a process for consideration of such a thing.

Ms. Buchheit said it's been discussed that there wasn't an avoidance alternative. Ms. Brooks noted we had a couple of avoidance alternatives in the concept study, and an avoidance alternative is also being considered for the PD&E Study.

Ms. Buchheit asked when there would be a new map update. Mr. Pressimone stated the next new map will be for EAG / PAG meetings. Ms. Brooks noted the timing for those meetings was tentatively set for March – April, with a public meeting anticipated in April-May.

Ms. Buchheit stated her understanding of the current PD&E alternatives: the OCX PD&E alternative (“...is old and not going to happen,” she added), the green alternative minimizing impact to the SOFWEA with the land swap package and the orange avoidance alternative. Mr. Pressimone confirmed that was correct.

Ms. Buchheit said the southern connections for the alternatives looked very similar. She asked if all of the alternatives would connect to the Northeast Connector Expressway. Mr. Pressimone stated that was correct.

Ms. Buchheit asked about the progress on evaluating the environmental impacts such as threatened species and soils. Mr. Pressimone stated since this is a re-evaluation, the study relies heavily on the original PD&E documents. They would then go back out and do more field work for permitting during design. He noted, for example, the original OCX PD&E documents stated there were gopher tortoises out there. He noted with the re-evaluation, the scope relies heavily on the original documents and you're only talking about things that are different. Mr. Pressimone noted there were no draft reports at this time.

Ms. Buchheit asked about data collected in the field, such as a gopher tortoise inventory. Mr. Pressimone stated he didn't believe that was part of the PD&E re-evaluation process, it would likely be done in a later stage. He added it's known that there is gopher tortoise habitat in this area.

Mr. Pressimone stated regarding knowledge of the site, the study team has what they need to proceed with their draft reports.

Ms. Buchheit stated re: the orange route geometry, the Lake Ajay residents were indicating the alternative was going through their community. Mr. Pressimone noted the exhibit in today's meeting was from the Lake Ajay Nov. 15 HOA annual meeting. He noted we also posted other exhibits from the Lake Ajay meeting on the website. He stated the orange alternative is about 800 feet from that community; there are no direct impacts to their community.

Ms. Buchheit noted the Lake Ajay residents are meeting with Orange County commissioners and telling them the project directly affects them. Mr. Pressimone noted we're briefing each of the commissioners and they also have been provided these exhibits.

Ms. Buchheit asked about whether the alternative geometry and curves would work. Mr. Pressimone stated the alignment has a 70-mph curve and there is no question that it will work. He noted that the OCX PD&E Study said reverse curves were less desirable than a tangent, so they went with the tangent.

Ms. Buchheit asked if there was anything popping up that would make the orange geometry problematic. Mr. Pressimone noted the alternative impacts eight-10 residential properties along the south end of the SOFWEA. It comes down to social impacts vs. environmental impacts. The study team will compile a comparative evaluation matrix for the alternatives – including costs – and come to a conclusion.

Mr. Pressimone referenced development activity in the area involving Del Webb, Tavistock and Pulte Homes that is ongoing and the *Growth Spotter* media story today noting construction to begin next month.

He noted that Tavistock has committed to improve Cyrils Drive to Narcoossee Road in their agreements with the Deseret Ranch for the development rights in the Northeast District. He noted while this does not involve CFX, it is part of the conversation that this development is coming to the area of SOFWEA.

Ms. Buchheit stated Tawny Olore, Osceola County Executive Director for Transportation and Transit, said the county doesn't have anything going on with Cyrils. Mr. Pressimone stated he assumed the county would have oversight, but it would not be their project. He added as an example that Tavistock actually built most of Narcoossee Road in that area.

Mr. Pressimone pointed out on the exhibit the frontage road system, which would become Cyrils Drive. He noted we have not received Tavistock's plans for Cyrils Drive, though they've been saying all of their widening would go to the south. Mr. Pressimone noted that is not a CFX concept.

Mr. Pressimone pointed out the orange avoidance alternative would have an option for a local road connection to the planned Sunbridge Parkway. The idea would be to provide local access into the Del Webb community, so we're not disrupting it. He noted the main entrance to the community and that Osceola County should have the plans from Del Webb.

Ms. Buchheit asked if considerations had been made for a train coming through the corridor. Mr. Pressimone stated the 70-mph geometry could support a low speed train, like a SunRail. The corridor has a multi modal accommodation in the typical section.

Ms. Buchheit asked if we're impacting the SOFWEA, how the agency planned to account for all the mitigation that's already been mitigated?

Mr. Pressimone stated that our conversations with the agencies owning the property indicated that was not a fatal flaw. There is a path to accomplish that; it's fairly complicated. We would have to weigh the cost and comparison of doing that to doing the avoidance alternative. That's what the evaluation matrix looks at.

Ms. Buchheit stated regarding the FCT deed restrictions and the anticipated approach for modifying them, that two particular requests can be made: a linear facility and a property exchange. She said her understanding of the grant award agreements, was that the grant recipients Orange County and Osceola County would have to request from FCT an application to modify the agreements. She asked if there was any indication of which approach the counties were considering.

Mr. Pressimone stated that would be up to the counties and could depend heavily on what sort of formal commitment is received from the property owner.

Mr. Pressimone stated both the minimization and avoidance alternatives are viable. The EAG's input weighs heavily in these considerations. While there isn't 100 percent agreement on the EAG, maybe half or more of them were intrigued by the notion of roughly 1,200 acres coming into conservation, in addition to the possibility of a 20-acre passive park with no development in the remainder. The group said there would have to be caveats regarding the vehicle by which it comes. He added most people in the room saw some or enough benefit to say that was not a fatal flaw.

Mr. Pressimone stated we need to go to the EAG with a formal commitment, which we have not yet received. He noted the EAG would need to support the green alignment for it to move forward. The FCT leans on the Florida Department of Environmental Protection (FDEP) as an advisor in the process, and FDEP has been at all of these SOFWEA working group meetings. Mr. Pressimone noted while the process involving the counties could be onerous, it is not impossible. There is a process in place for this.

Mr. Pressimone stated FCT has made it clear that a higher cost cannot be the only reason not to avoid the forest. We have to tell them the green alternative has a superior impact on the community as a whole, and the only ones who can say that are the environmental agencies and the environmental community.

Ms. Buchheit relayed a question about whether there was a no-build under consideration. Mr. Pressimone stated no, since OCX PD&E had a preferred alignment; their conclusion was to build was superior to a no-build. As part of the PD&E re-evaluation, CFX is trying to refine that alignment to make it more attractive. He noted the community has stated the OCX PD&E alignment is considered a fatal flaw. Our approach was to find something better than that; both of these alternatives are better than that one.

Ms. Buchheit said, "My concern is that rationale will be to split the baby." Mr. Pressimone responded the environmental community will weigh in on that decision.

Ms. Buchheit stated she cares about the protections placed on the SOFWEA. “The precedence being set that you can go through these protected lands is very dangerous. Green looks like a compromise, but it’s going against a lot of work that was done to protect this place,” she said.

Mr. Pressimone noted that the same agencies we worked with on the Wekiva Parkway to reach an environmentally sensitive approach are the ones we’re relying on for this as well. They’re the ones who are going to opine on whether the green alignment is a fatal flaw.

Ms. Buchheit reiterated several times her concerns about this potentially setting a precedent that puts every conservation land at risk. Ms. Buchheit took the study map. She asked to speak to Nicole Gough, with Dewberry, who has been conducting research on the various SOFWEA property agreements. Mr. Pressimone requested that she send any questions to him and he would get her the information.

Ms. Buchheit said she would send a list of what’s requested.

There being no further discussion, the meeting concluded at approximately 5:15 p.m.

## MEETING MINUTES:

---

**Project Name:** Osceola Parkway Extension Re-evaluation  
**Project** CFX Contract # 001250  
**Number:**  
**Meeting Date:** March 8, 2019; 9:00 a.m.  
**Meeting Place:** CFX Headquarters 3rd Floor Sandpiper Room  
**Participants:** See Participant List  
**Subject:** Pond Meeting with CFX, Tavistock & Balmoral

---

On Friday, March 8, 2019 a meeting was held at CFX headquarters. The purpose of the meeting was to discuss the proposed pond sites. The below notes have been arranged to reflect the flow of the discussions that ensued.

### **East Segment (Split Oak Minimization Alternative)**

- The pond sites shown on the roll plots are preliminary estimates and have not been modeled or finalized. The ponds are based on right-of-way to right-of-way calculations. An assumption is that CFX wants to keep the ditches dry within the right-of-way.
- The East segment will need to replace the existing Narcoossee Road pond that is adjacent to Fells Landing. This replacement pond will be separate from the Osceola Parkway Extension (OPE) ponds. Narcoossee Road is a high point.
- Basin 1 on the east side will require a combination of ponds. The combinations can be as follows:
  - 1A + 1B & 1C; or
  - 1A + 1D.
- Tavistock owns the two parcels south of Clapp Simms Duda Road and east of Canal C-29A.
  - Suggest moving Pond 1D east of Canal C-29A onto the Tavistock property. (Follow up – the floodplain east of the canal has a different elevation and most likely cannot be relocated. Also note that the floodplain impacts were updated for this section.)
- The preferred pond combination for Basin 1 is 1A+1D.
- South Florida Water Management will require a “cup for cup” analysis based on the effective FEMA Maps.
- The roadway profile is proposed to be three feet above the existing ground and the ditches 1 foot above the seasonal high water table. The profile will accommodate five feet above

floodplains and a minimum of 16.5 feet of clearance above existing roadways. Therefore, a large portion of the OPE is elevated, compared to the existing ground.

- RS&H will send plan and profile files to Tavistock.
- Floodplain Compensation (FPC) ponds are not required to be wet – these areas may consist of graded areas that could be planted.
- Recommend FPC 2B since it stays out of Split Oak.
- Ponds 3A and 4A are within the interchange footprint and are considered good pond locations by Tavistock. Pond 4A is very close to a pond location already proposed by Tavistock for their development.
- Previous discussions regarding the Split Oak remainder included a potential linear park (~20 acres) with a trail head and a pervious parking area. Mitigation credits are likely present in the area of the park location and would have to be mitigated to build the park. That mitigation could become part of the CFX mitigation plan. At this time, unknown whether a park will be pursued in the remainder by Osceola County or Tavistock.
- The four-lane Cyrils Drive alternative includes a shared use path on the south side of the road, near the residential housing. A five-foot sidewalk is proposed on the Split Oak side of the road.
- Tavistock is responsible for the Cyrils Drive widening from Narcoossee Road to Absher, including the acquisition of property.
- If Pond1D is moving forward as a preferred pond location – it would be beneficial to move Pond 2A onto the same parcel, to leave the maximum developable property available.
- Pond 2A is preferred over 2B because it is located on Tavistock property.
- Ponds within the proposed roadway right-of-way do not have multiple pond options. Only ponds that require additional right-of-way have two pond options.
- Ponds associated with local roadways will ultimately be transferred to the appropriate local authority (ie. Cyrils Drive pond – transferred to Osceola County).

### **East Segment (Split Oak Avoidance Alternative)**

- The pond associated with the Split Oak Avoidance Alternative as similar to the Split Oak Minimization Alternative. Basin 1 alternatives are identical.
- Question was asked if Pond 2A could be moved to the west side of OPE. Greg will evaluate whether this is possible.
- Del Webb is developing from north to south – ground has been broken.
- Basin three requires a combination of ponds as follows:
  - 3A + FPC

- 3A + 3B
- 3A + 3C
- The preferred pond for this basin would likely be 3A + FPC
- Although Pond 3A appears to be narrow it is about 120 feet wide (berm to berm). The Water Management District has shown flexibility on transportation projects and may allow ponds that are less than 100 feet wide.
- Pond 3B is expected to have significant value and will be moved south of Cyrils Drive. In its current location, it does not allow for a sales center and walking path into Split Oak.
- The expired Planned Development (PD) for the Lennar property includes a spine road connecting Cyrils Drive to Clapp Simms Duda Road.
- Part of the development plans require that Clapp Simms Duda Road be widened, including the bridge over the Canal C-29A.

### **West Segment (Lake Nona Alternative)**

- The two large borrow pits just west of Fells Landing are planned to be permitted as ponds for the Poitras developments. The plan is to connect the two borrow pits into one large pond. OPE alternative will be revised to show one large bridge over this pond, as opposed to two sets of bridges. CFX runoff will be treated and attenuated in the area between the ponds, possibly as a joint use as part of the larger facility.
- If the local / system interchange at SR 417 is possible – is the Boggy Creek interchange needed and is it in a good location? Tavistock will review and determine if this interchange is needed and if it is in the most appropriate location.
- The Poitras development is currently in the process of remapping the floodplains for the Poitras property. However, the current floodplain maps will be utilized for the development of ponds.
- Greg suggested an agreement with Tavistock for the ponds related to OPE since they are the most familiar with their development plans and the best location for pond sites. CFX could provide the requirements to the Tavistock's engineers for incorporation into their permitting.
- Osceola County is requiring Tavistock to widen Boggy Creek Road to a four-lane urban typical section from Narcoossee Road to Simpson Road. This will mostly be done within the existing right-of-way. Tavistock indicated that the widening will not affect the current alignment for the OPE expressway. That widening will require additional ponds and Tavistock is planning on locating them on the Poitras property.

- Tavistock is unsure if there is enough capacity for the Poitras ponds, Boggy Creek Road widening ponds, and the OPE ponds on the Poitras property.
- Basin 3 requires ponds 3A and 3B which are included in the interchange as well as either pond 3C or 3D. Pond 3D should be moved onto the Poitras property to reduce the number of parcel impacts.
- Pond 4B is located on the parcel where one of the interior Poitras roads will connect to Boggy Creek Road. Pond 4B has excess capacity and can be reduced in size so that the road can also be accommodated on this parcel.
- A CDD has been set up for Poitras East and is anticipated to be set up for Poitras West once Tavistock acquires this property.
- The property that Pulte just acquired from Poitras East has a main access from the road north of the property which has a signal at Narcoossee Road. The direct access to Narcoossee Road from the Pulte property driveway closest to the OPE ramps is anticipated to be right-in, right-out.
- Pond 1A and 1B will be moved south onto remnant parcels to reduce the number of parcel impacts.
- Ponds 5A and 6A need to be moved so they occur between the borrow pits.
- The required pond acreage tables will be sent to Tavistock once pond sites are updated per today's meeting. The volume estimates will also be included.

### **West Segment (Boggy Creek Alternative)**

- Clint asked Rene to check if Tavistock controls the property under the Boggy Creek at SR 417 Eastbound to Southbound ramp.
- Same pond changes as with the Lake Nona alternative

### **Summary of Decisions / Action Items**

1. **ACTION:** RS&H will send the plan and profile files to Tavistock [Complete].
2. **ACTION:** Tavistock will provide thoughts on the Lake Nona Alternative with respect to the Boggy Creek interchange location.
3. **ACTION:** Balmoral to update pond sites based on discussion from today's meeting and send updated pond acreage tables.

## **5.5 PUBLIC INVOLVEMENT MEETINGS DOCUMENTS**

**OSCEOLA PARKWAY EXTENSION STUDY RE-EVALUATION PUBLIC WORKSHOP  
LAKE NONA MIDDLE SCHOOL CAFETERIA  
TUESDAY, NOVEMBER 19, 2019**

The public workshop for the Central Florida Expressway Authority's (CFX) Osceola Parkway Extension Project Development & Environment (PD&E) Study Re-evaluation was held on Tuesday, November 19, 2019, from 5:30 p.m. to 7:30 p.m., at the Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832. This workshop was the opportunity scheduled to take place to allow the community to view the latest alignment alternatives and other draft report materials.

**Study Background**

The Osceola Parkway Extension (OPE) has been identified as a need in several local, long-range plans and master plans. The former Osceola County Expressway Authority (OCX) completed PD&E Study in May 2017 for the OPE and presented a recommended alternative.

The CFX enabling legislation (Senate Bill 230, Ch. 2014-171) incorporated the parkway extension and other portions of the OCX 2040 Master Plan into the CFX 2040 Master Plan. In

2018, CFX completed a Concept, Feasibility, and Mobility Study for the OPE after evaluating a number of alternatives and concluded the project is viable under CFX criteria.

**Study Methodology**

CFX has been re-evaluating the OCX PD&E Study recommended alternative as well as considering other alternatives. The input provided through public outreach, including stakeholder meetings, site tours and advisory committee meetings held during CFX's Concept, Feasibility, and Mobility Study, has been a major component of CFX's PD&E Study Re-evaluation. In addition, the study team has continued to conduct stakeholder meetings to gather additional feedback in preparation for a recommended Preferred Alternative. CFX conducted an extensive analysis of the social, environmental, cultural, and physical impacts of potential alternatives. Of the four evaluated alternatives, two on the west side and two on the east side of the corridor, the recommended preferred alternative results in the least impacts.

OSCEOLA PARKWAY EXTENSION

**Public Notification**

Public meeting invitation letters were sent on Tuesday, October 29, 2019, by email to 38 elected officials and their aides, as well as 97 appointed officials, regional agency contacts, and federal and state agency contacts. An additional 3,607 meeting invitation letters were mailed to property owners and tenants within the corridor on Wednesday, October 30, 2019. (See Appendix for invitation letters and mail lists.)

**Media Notification**

The public meetings were advertised in advance with display ads in the Orlando Sentinel on Sunday, November 3, 2019, Sunday November 10, 2019 and Sunday, November 17, 2019; in the *Osceola News Gazette* on Thursday, November 7, 2019 and Thursday, November 14, 2019; in *El Sentinel* on Saturday, November 9, 2019 and Saturday, November 16, 2019; and El Osceola Star on Friday, November 8, 2019 and Friday, November 15, 2019. An ad was printed in the *Florida Administrative Register* (FAR) on Thursday, October 31, 2019 and began running on Friday, November 1, 2019. (See Appendix for advertisements.)

**Public Meeting Agenda**

The meeting was an informal open house and participants were welcome to come at any time between 5:30 p.m. and 7:30 p.m. Display maps illustrating the alternatives, typical section, evaluation matrix and other information were available for public review and comment. A looping audiovisual presentation was available throughout the meeting that provided an overview of the study process, history and details. Project representatives were available to discuss the study, receive input and answer questions. The use of three large smart screens allowed project personnel to

provide a more detailed look at the potential impacts of the various alternatives to a meeting attendee's property or business.

Parking was available to accommodate all attendees, including those who were differently abled. Signs were placed along the roadway and on the middle school property directing attendees to the meeting room.

OSCEOLA PARKWAY EXTENSION

The following display boards were available for public review and comment:

- Title VI Board
- East Segment Social Impacts
- East Segment Environmental Impacts
- East Segment Preferred Alternative
- West Segment Social Impacts
- West Segment Environmental Impacts
- West Segment Preferred Alternative
- Typical Section
- Evaluation Matrix

(See Appendix for exhibits.)

**Meeting Attendance**

There were 433 attendees who signed in at the Public Workshop. This included 396 members of the public and 37 staffers. Officials attending included representatives of the offices of U.S. Senator Marco Rubio, State Representative Mike LaRosa and Orange County Commissioner Emily Bonilla; Tawny Olore and Joshua DeVries of Osceola County; Beth Jackson of Orange County; and Rax Jung of Florida’s Turnpike Enterprise.

**Meeting Handouts**

The Study Fact Sheet (FALL 2019 edition) and comment forms were distributed to the attendees. There were also opportunities to provide electronic comments through electronic tablets. Participants were encouraged to discuss their thoughts and concerns regarding the study re-evaluation with project team members, and to submit written comments.

**Public Comments**

CFX received 288 written comments - 178 at the meeting and 110 emailed within 10 days of the public workshop. Of these, 180 comments were in support of the Recommended Preferred Alternative and 92 were against. The information below reflects the general nature of the comments received. Many comment forms touched on multiple topics, so referenced numbers may exceed the total number of comments. The individual comment forms have been attached as part of the study record. (See Appendix for comments.)

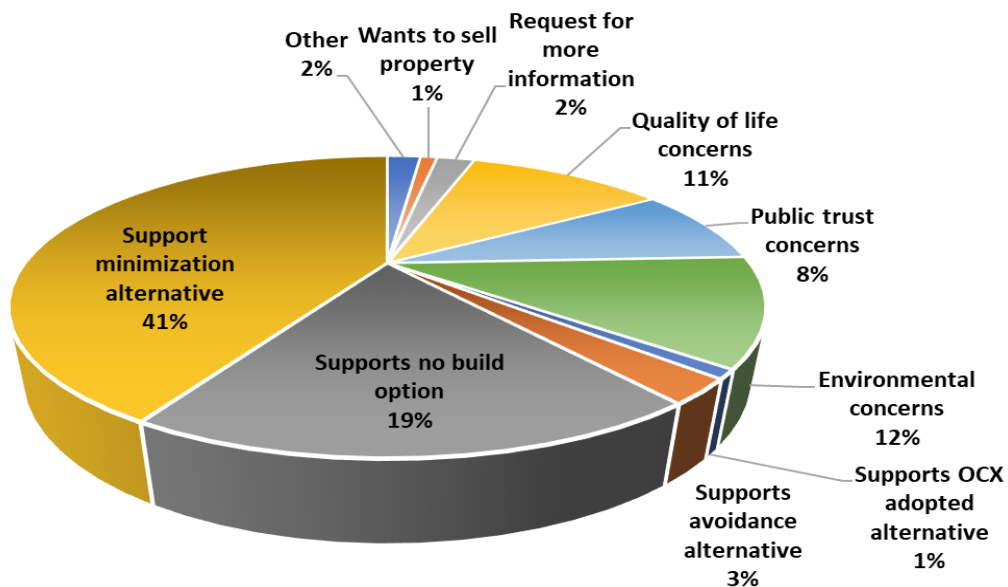

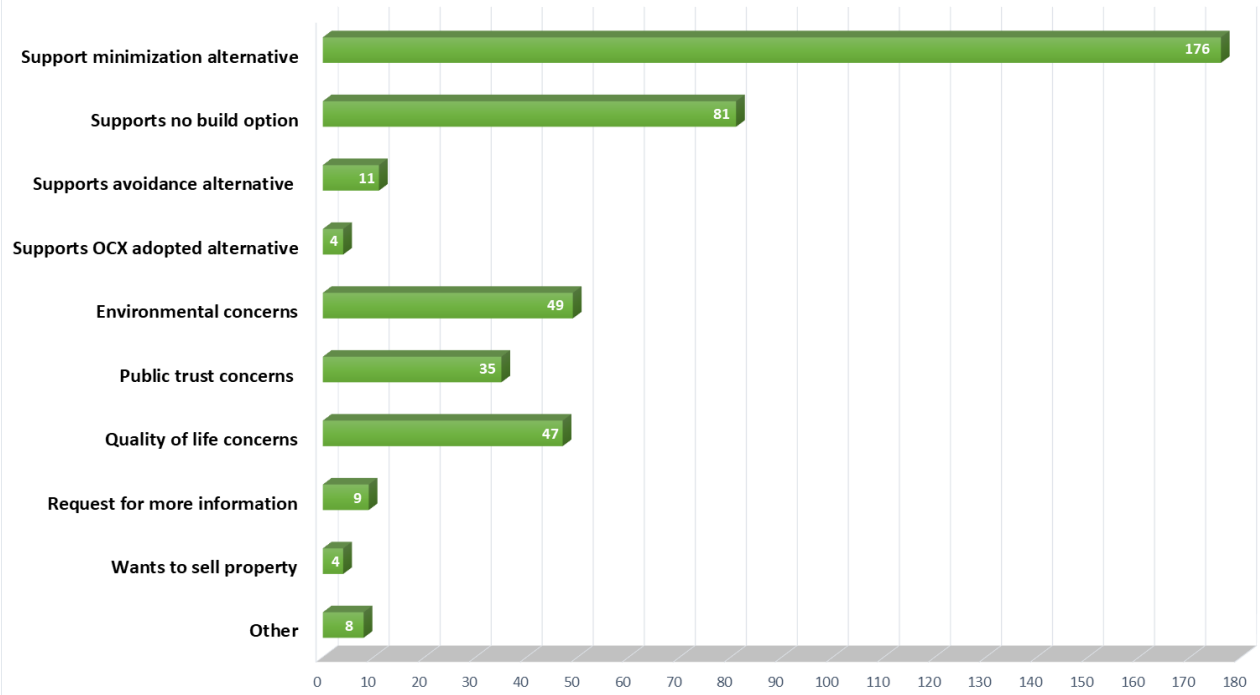

Comment Categories and Related Statements (numbers in parentheses indicate how many times a comment or statement was made):

- Support minimization alternative with full restoration to match quality of Split Oak, ongoing maintenance, and connectivity to both uplands and wetlands to nearby preserves (176)
- Supports no build option (81)
- Support avoidance alternative (11)
- Supports OCX adopted alternative (4)
- Environmental concerns (49)
- Public trust concerns (35)
- Quality of life concerns (47)
- Request for more information to include larger or regional maps, overview of master plans and comments/concerns of EAG/PAG members (9)
- Wants to sell property (4)
- Other to include proposing new designs to CFX, get the project done ASAP and miscellaneous comments (8)

## OSCEOLA PARKWAY EXTENSION

**Project Development and Environment (PD&E) Study Re-evaluation  
Comments Received by November 30, 2019**

#### END OF MEETING SUMMARY

This meeting summary was prepared by Kathy Putnam, Public Involvement Coordinator at Quest Corporation of America on behalf of the Central Florida Expressway Authority. It is not verbatim but is a summary of the meeting activities and comments received. If you feel something should be added or revised, please contact Kathy Putnam by email at [Kathy.Putnam@QCAusa.com](mailto:Kathy.Putnam@QCAusa.com) or by telephone 407-690-7220 within five (5) days of receipt of this summary.

# CENTRAL FLORIDA EXPRESSWAY AUTHORITY

October 31, 2019

Subject: **Public Workshop – November 19**  
CFX Project Development and Environment Study Re-evaluation  
Osceola Parkway Extension (SR 417 near Boggy Creek Road to proposed Sunbridge Parkway)  
CFX Project Number: 599-223

Dear Elected Official:

The [Central Florida Expressway Authority](#) (CFX) is conducting a Project Development and Environment (PD&E) Study Re-evaluation for the proposed Osceola Parkway Extension, as identified in our [2040 Master Plan](#). The purpose of the study re-evaluation is to determine if a new expressway connection between [State Road 417](#) near Boggy Creek Road in Orange County and the proposed Sunbridge Parkway in Osceola County is viable and fundable in accordance with CFX policies and procedures.

The overall goals of the Osceola Parkway Extension are to provide improved connections between area roads; accommodate anticipated transportation demand; provide consistency with local and regional plans; support economic viability and job creation; support intermodal opportunities; and enhance evacuation and emergency services.

The public workshop is scheduled for **Tuesday, November 19, from 5:30 p.m. to 7:30 p.m. in the cafeteria at Lake Nona Middle School** located at 13700 Narcoossee Road, Orlando, FL 32832.

During the workshop, the CFX study team's recommendation for the preferred alternative will be presented for public input. Based on the input we receive, the alternatives may be further refined. The exhibits on display will include the study alternatives and an evaluation matrix of their potential impacts to the physical, natural, social and cultural environment. Public involvement and interagency coordination have been an integral part of the assessment process, and opportunities for participation will continue throughout the duration of the study process.

When the PD&E Study Re-evaluation concludes, it will result in a recommendation to the CFX Governing Board of the preferred alternative. If the project is approved by the CFX Governing Board, it would move forward for further project development.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons with disabilities who require special accommodations under the Americans with Disabilities Act or persons who require translation services, free of charge, should contact: Mary Brooks, Public Involvement Coordinator, by phone at 407-802-3210 or email at [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) at least seven (7) days prior to the hearing.

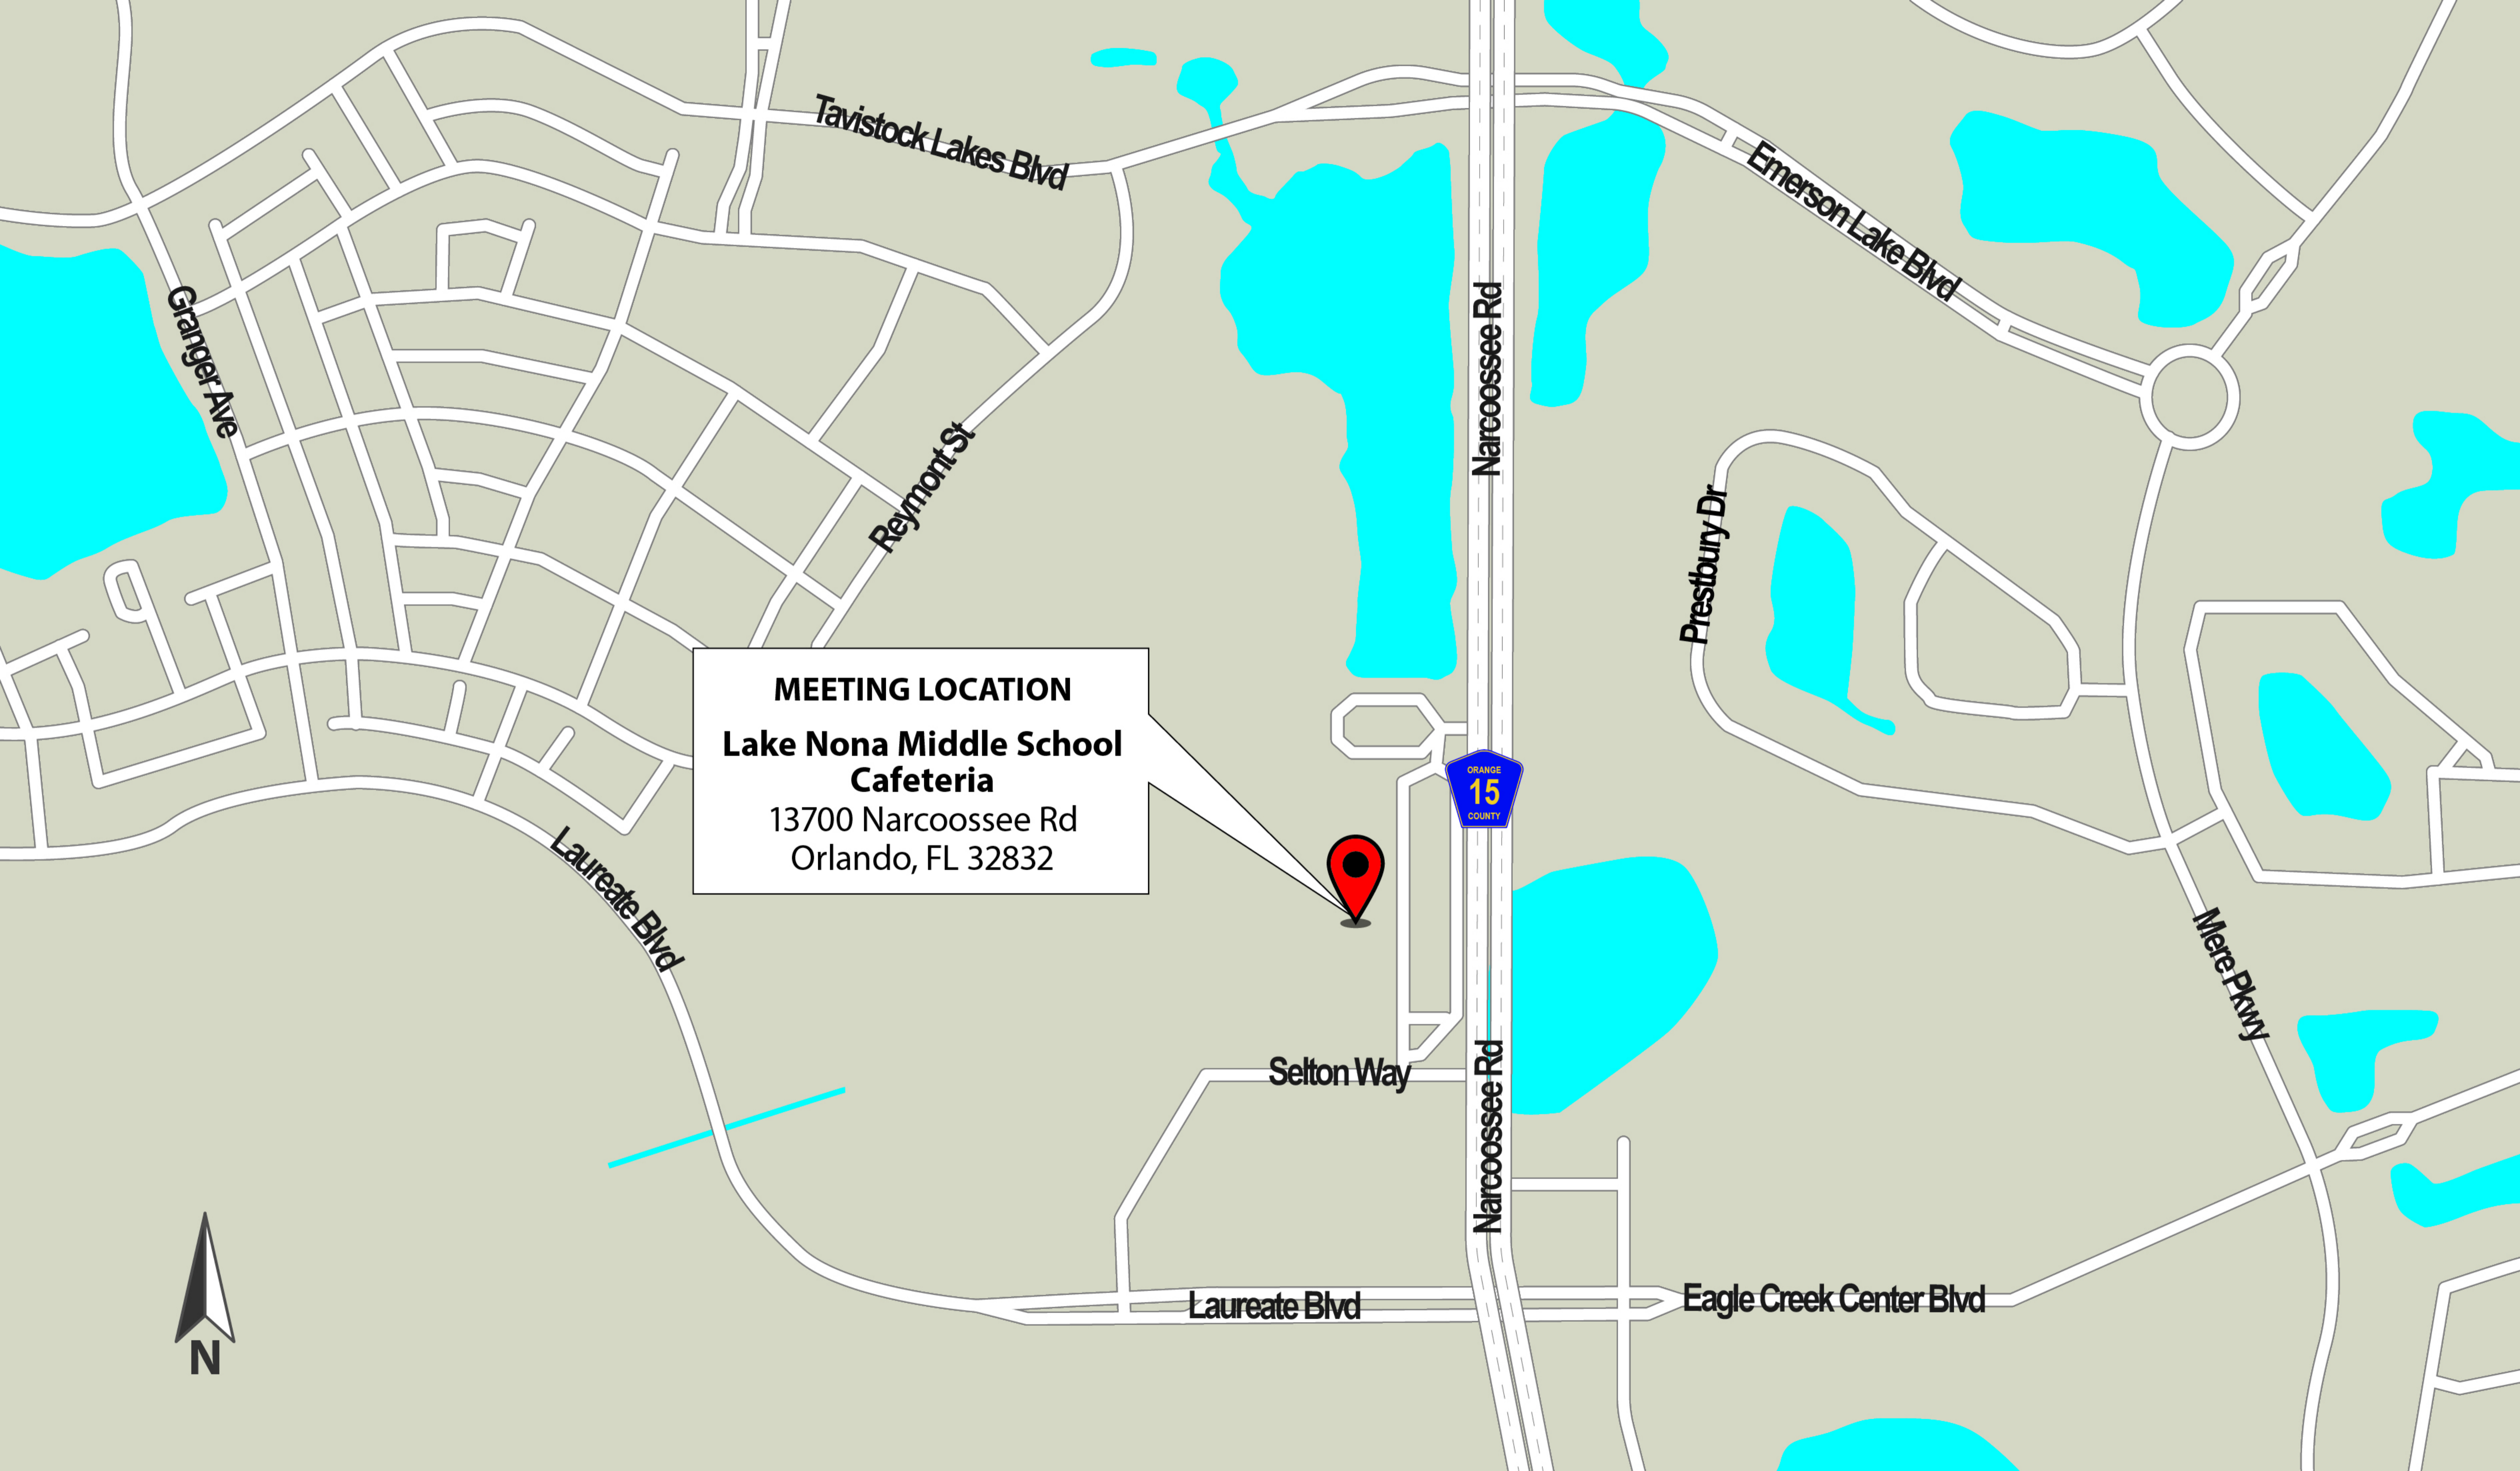

For additional information, please contact Mary Brooks, Public Involvement Coordinator, or visit the study webpage at <http://bit.ly/OscPkwyExtRe>. You may also follow the study on Facebook at [@OsceolaPkwyExtPDE](#).

Sincerely,

Laura Kelley  
Executive Director  
Central Florida Expressway Authority

# CENTRAL FLORIDA EXPRESSWAY AUTHORITY

October 31, 2019

Subject: **Public Workshop – November 19**  
CFX Project Development and Environment Study Re-evaluation  
Osceola Parkway Extension (SR 417 near Boggy Creek Road to proposed Sunbridge Parkway)  
CFX Project Number: 599-223

Dear Government Partner:

The [Central Florida Expressway Authority](#) (CFX) is conducting a Project Development and Environment (PD&E) Study Re-evaluation for the proposed Osceola Parkway Extension, as identified in our [2040 Master Plan](#). The purpose of the study re-evaluation is to determine if a new expressway connection between [State Road 417](#) near Boggy Creek Road in Orange County and the proposed Sunbridge Parkway in Osceola County is viable and fundable in accordance with CFX policies and procedures.

The overall goals of the Osceola Parkway Extension are to provide improved connections between area roads; accommodate anticipated transportation demand; provide consistency with local and regional plans; support economic viability and job creation; support intermodal opportunities; and enhance evacuation and emergency services.

The public workshop is scheduled for **Tuesday, November 19, from 5:30 p.m. to 7:30 p.m. in the cafeteria at Lake Nona Middle School** located at 13700 Narcoossee Road, Orlando, FL 32832.

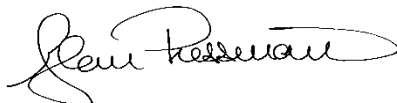

During the workshop, the CFX study team's recommendation for the preferred alternative will be presented for public input. Based on the input we receive, the alternatives may be further refined. The exhibits on display will include the study alternatives and an evaluation matrix of their potential impacts to the physical, natural, social and cultural environment. Public involvement and interagency coordination have been an integral part of the assessment process, and opportunities for participation will continue throughout the duration of the study process.

When the PD&E Study Re-evaluation concludes, it will result in a recommendation to the CFX Governing Board of the preferred alternative. If the project is approved by the CFX Governing Board, it would move forward for further project development.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons with disabilities who require special accommodations under the Americans with Disabilities Act or persons who require translation services, free of charge, should contact: Mary Brooks, Public Involvement Coordinator, by phone at 407-802-3210 or email at [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) at least seven (7) days prior to the hearing.

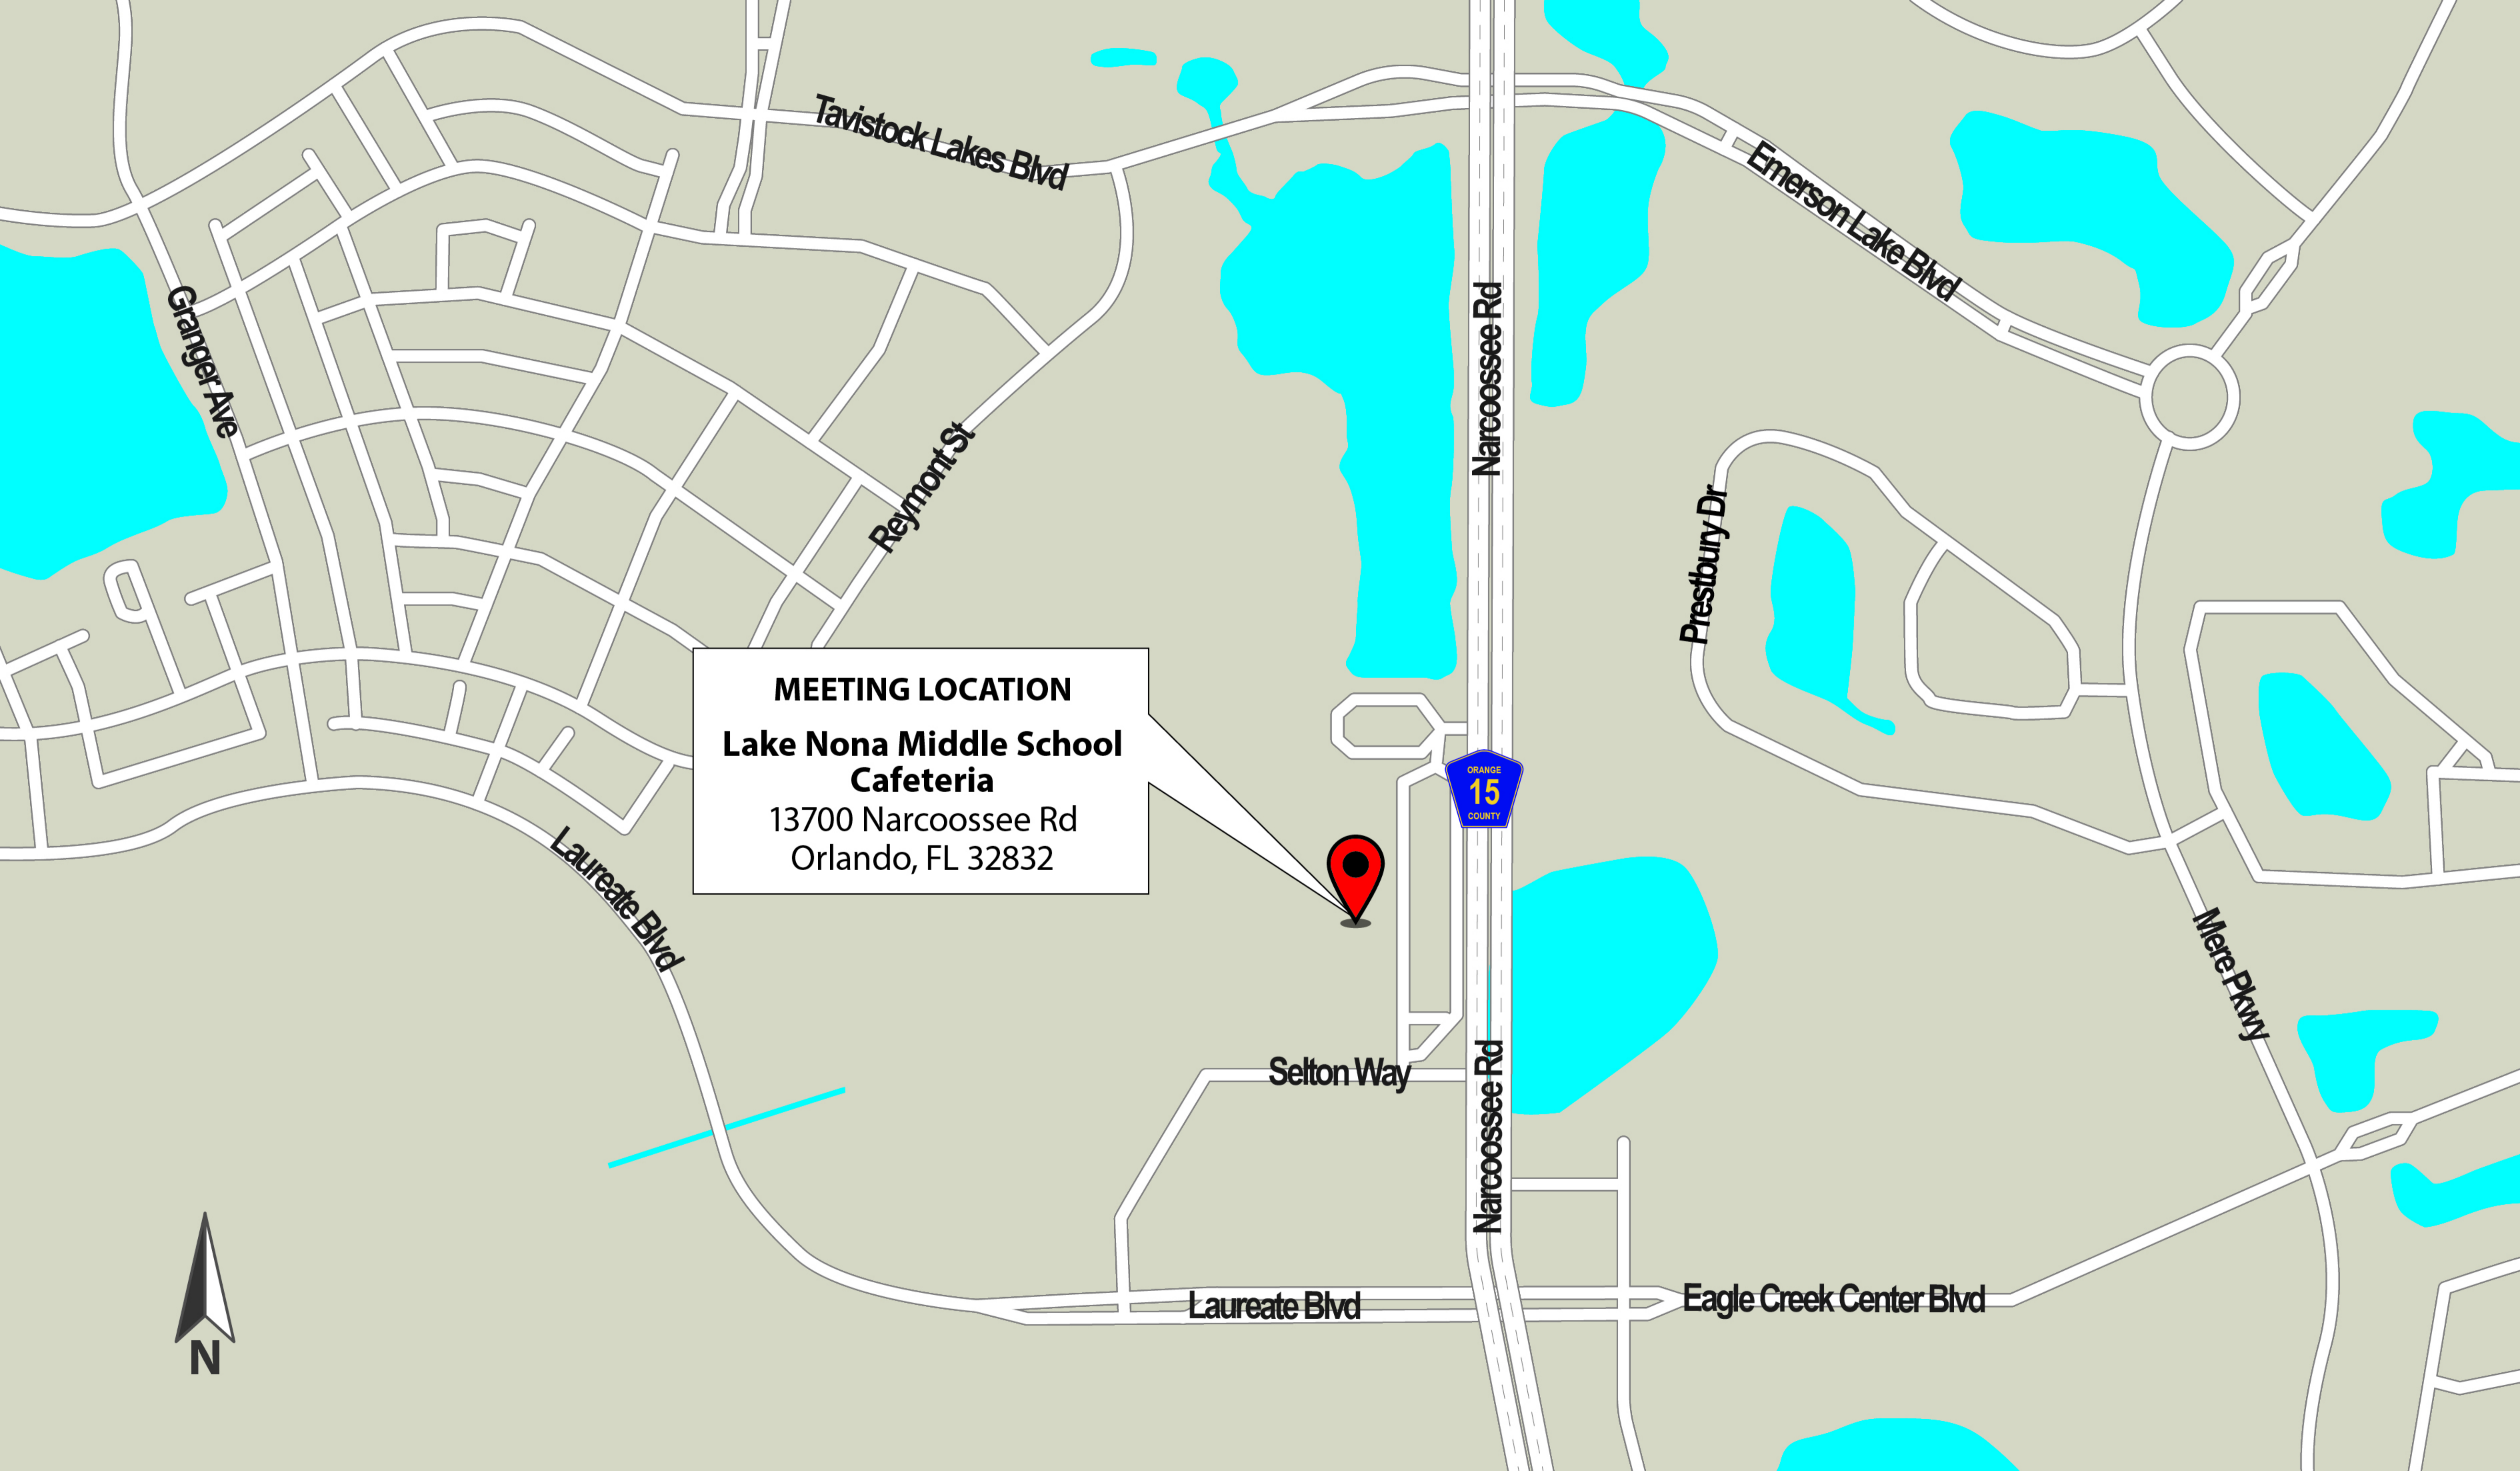

For additional information, please contact Mary Brooks, Public Involvement Coordinator, or visit the study webpage at <http://bit.ly/OscPkwyExtRe>. You may also follow the study on Facebook at [@OsceolaPkwyExtPDE](#).

Sincerely,

Glenn Pressimone, PE  
Chief of Infrastructure  
Central Florida Expressway Authority

# CENTRAL FLORIDA EXPRESSWAY AUTHORITY

October 31, 2019

Subject: **Public Workshop – November 19**  
CFX Project Development and Environment Study Re-evaluation  
Osceola Parkway Extension (SR 417 near Boggy Creek Road to proposed Sunbridge Parkway)  
CFX Project Number: 599-223

Dear Property Owner/Stakeholder:

The [Central Florida Expressway Authority](#) (CFX) is conducting a Project Development and Environment (PD&E) Study Re-evaluation for the proposed Osceola Parkway Extension, as identified in our [2040 Master Plan](#). The purpose of the study re-evaluation is to determine if a new expressway connection between [State Road 417](#) near Boggy Creek Road in Orange County and the proposed Sunbridge Parkway in Osceola County is viable and fundable in accordance with CFX policies and procedures.

The overall goals of the Osceola Parkway Extension are to provide improved connections between area roads; accommodate anticipated transportation demand; provide consistency with local and regional plans; support economic viability and job creation; support intermodal opportunities; and enhance evacuation and emergency services.

The public workshop is scheduled for **Tuesday, November 19, from 5:30 p.m. to 7:30 p.m. in the cafeteria at Lake Nona Middle School** located at 13700 Narcoossee Road, Orlando, FL 32832.

During the workshop, the CFX study team's recommendation for the preferred alternative will be presented for public input. Based on the input we receive, the alternatives may be further refined. The exhibits on display will include the study alternatives and an evaluation matrix of their potential impacts to the physical, natural, social and cultural environment. Public involvement and interagency coordination have been an integral part of the assessment process, and opportunities for participation will continue throughout the duration of the study process.

When the PD&E Study Re-evaluation concludes, it will result in a recommendation to the CFX Governing Board of the preferred alternative. If the project is approved by the CFX Governing Board, it would move forward for further project development.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons with disabilities who require special accommodations under the Americans with Disabilities Act or persons who require translation services, free of charge, should contact: Mary Brooks, Public Involvement Coordinator, by phone at 407-802-3210 or email at [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) at least seven (7) days prior to the hearing.

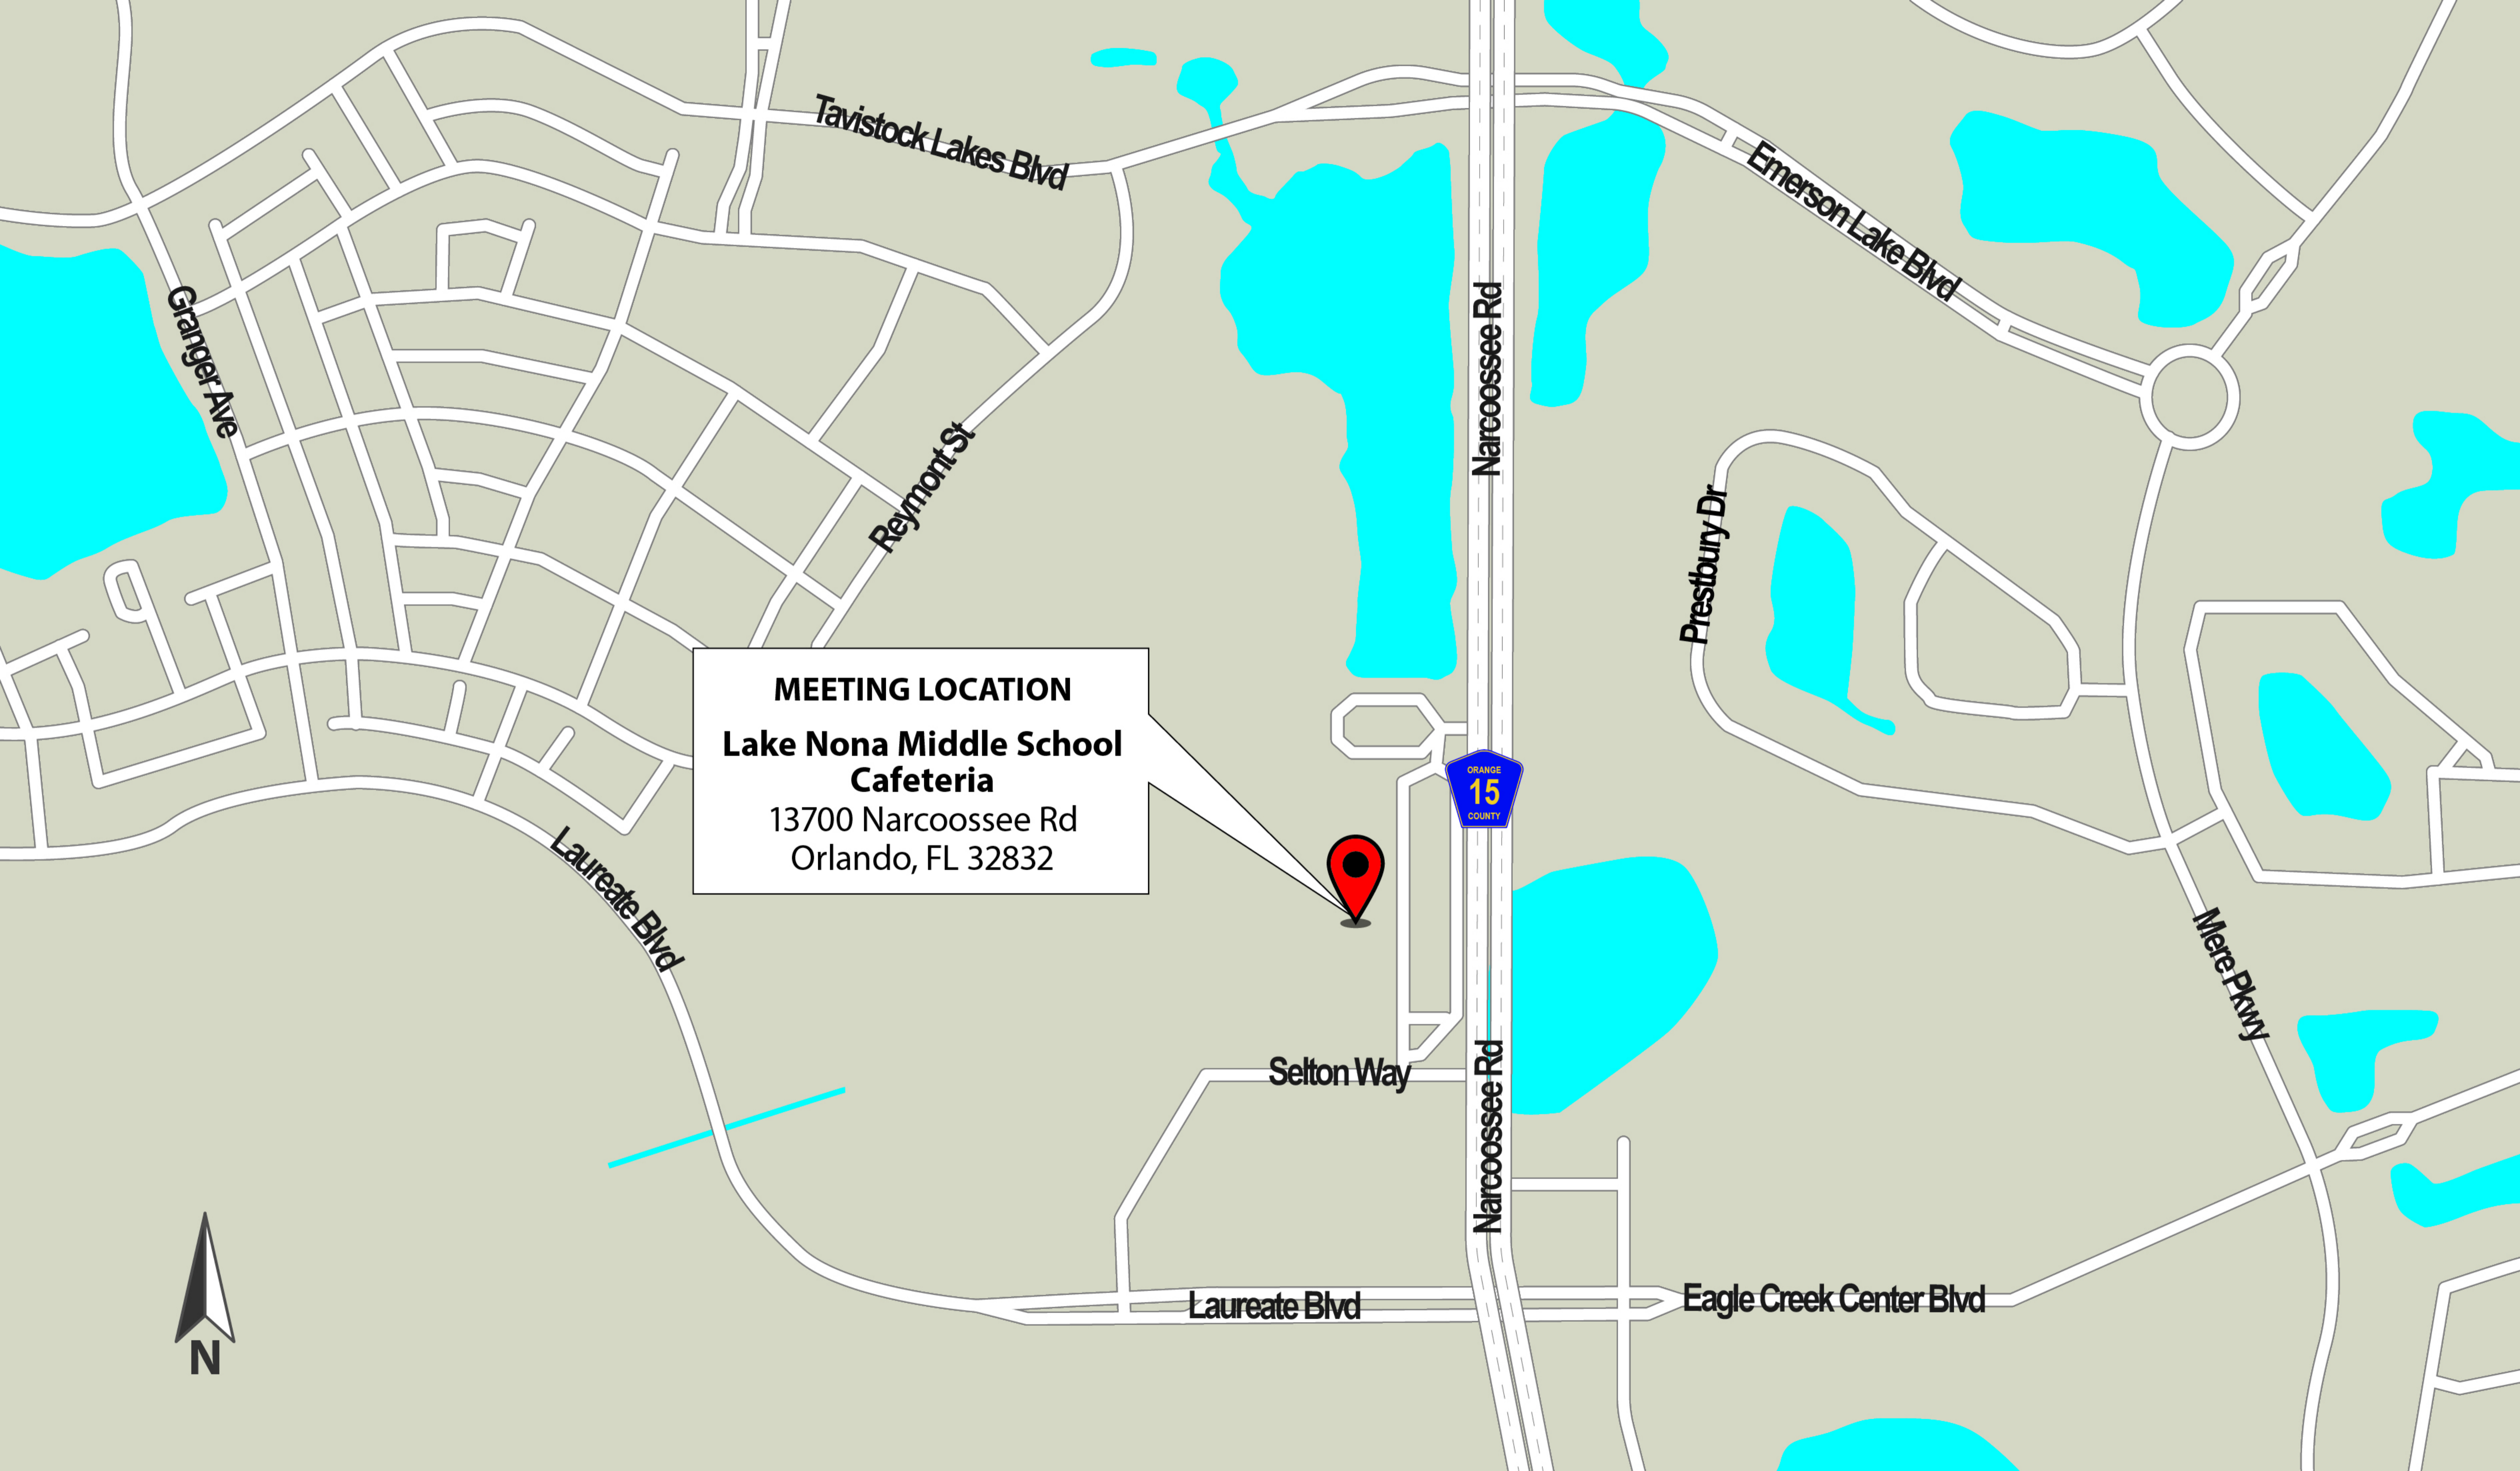

For additional information, please contact Mary Brooks, Public Involvement Coordinator, or visit the study webpage at <http://bit.ly/OscPkwyExtRe>. You may also follow the study on Facebook at [@OsceolaPkwyExtPDE](#).

Sincerely,

Glenn Pressimone, PE  
Chief of Infrastructure  
Central Florida Expressway Authority

## PUBLIC NOTICES

### Aviso de Taller Público

#### Estudio de Desarrollo y Medio Ambiente de Proyectos (PD&E) de CFX

#### Extensión Osceola Parkway (Carretera Estatal 417 cerca de la Carretera Boggy Creek Road a la propuesta Sunbridge Parkway) Número de Proyecto CFX: 599-223

La Autoridad de Autopista de Florida Central (CFX) está llevando a cabo una Reevaluación del Estudio de Proyectos de Desarrollo y Medio Ambiente (PD&E) para la extensión propuesta de Osceola Parkway. El estudio determinará si una nueva conexión de autopista entre la Carretera Estatal (State Road) 417 cerca de Boggy Creek Road y la Sunbridge Parkway propuesta es viable y financiable de acuerdo con las políticas y procedimientos de CFX.

En general, los objetivos de la extensión propuesta de Osceola Parkway son proporcionar mejores conexiones entre las carreteras del área para acomodar la demanda de transporte anticipada; proporcionar coherencia con los planes locales y regionales; apoyar la viabilidad económica y la creación de empleo; apoyar oportunidades intermodales; y mejorar los servicios de evacuación y emergencia.

La reunión se llevará a cabo en formato de taller o casa abierta el martes 19 de noviembre a partir de las 5:30 p.m. hasta las 7:30 p.m. en la cafetería de la Escuela Intermedia Lake Nona, 13700 Narcoosee Road, Orlando, Florida 32832. Los asistentes podrán venir en cualquier momento durante la reunión para ver las exposiciones del estudio, hacer preguntas y comentarios. Una presentación

audiovisual estará disponible para su visualización durante toda la reunión.

Durante el taller, la recomendación del equipo de estudio de CFX para la alternativa preferida se presentará para la opinión pública. Según la información que recibimos, las alternativas pueden refinarse aún más. Las exhibiciones incluirán las alternativas de estudio y una matriz de evaluación de sus posibles impactos en el entorno físico, natural, social y cultural. La participación pública y la coordinación interinstitucional son una parte integral del proceso de evaluación, y se brindan oportunidades de participación.

Cuando la reevaluación del estudio PD&E concluya, dará como resultado una recomendación a la Junta de Gobierno de CFX de la alternativa preferida. Si el proyecto es aprobado por la Junta de Gobierno de CFX, el proyecto avanzaría para un mayor desarrollo.

Para información adicional, por favor comuníquese con Mary Brooks, Coordinadora de Participación Pública, por teléfono al 407-802-3210, o por correo electrónico a [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) o visite la página web del estudio en <http://bit.ly/OscPkwyExtRe>. También puede seguir el estudio en Facebook en [@OsceolaPkwyExtPDE](https://www.facebook.com/OsceolaPkwyExtPDE).

La participación pública se solicita sin importar la raza, el color, el origen nacional, la edad, el sexo, la religión, la discapacidad o la condición familiar. Las personas con discapacidades que requieren adaptaciones especiales bajo la Ley de Estadounidenses con Discapacidades o personas que requieren servicios de traducción, de forma gratuita, deben comunicarse: Mary Brooks, Coordinadora de Participación Pública, por teléfono al 407-802-3210 o correo electrónico al [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) al menos siete (7) días antes de la audiencia.

## EMPLOYMENT / OFERTA DE EMPLEOS

**Auto Parts Delivery Driver (Full-Time) Kissimmee, FL** - AutoZone, High School Diploma or equivalent. Valid driver's license and ability to meet AutoZone's driving requirements. Customer Service to all AZ Commercial accounts. Info: Indeed.com

**House Cleaner Celebration, FL** - Master Vacation Homes, buscamos personas con ánimo de mejorar día tras día, comprometidas con lograr las metas propuestas, detallistas, etc. Info: Indeed.com

**NOTICE OF PUBLIC MEETING:**

The Central Florida Expressway Authority (CFX) announces a Public Workshop that is open to the public.

**DATE and TIME:** Tuesday, November 19, 2019

5:30 p.m. to 7:30 p.m.

This meeting will be an open house format where attendees may view a video presentation and study exhibits, ask questions and submit their written comments.

**PLACE:** Lake Nona Middle School Cafeteria  
13700 Narcoossee Road  
Orlando, FL 32832

**GENERAL SUBJECT MATTER TO BE CONSIDERED:**

CFX Project No.: 599-223

Project Description: CFX Osceola Parkway Extension Project Development and Environment (PD&E)  
Study Re-evaluation

The Central Florida Expressway Authority (CFX) is conducting a Project Development and Environment (PD&E) Study Re-evaluation for the proposed Osceola Parkway Extension. The study will determine if a new expressway connection between State Road 417 near Boggy Creek Road and the proposed Sunbridge Parkway is viable and fundable in accordance with CFX policies and procedures.

The overall goals of the proposed Osceola Parkway Extension are to provide improved connections between area roads; accommodate anticipated transportation demand; provide consistency with local and regional plans; support economic viability and job creation; support intermodal opportunities; and enhance evacuation and emergency services.

The meeting will be held in an open house format on Tuesday, November 19 from 5:30 p.m. until 7:30 p.m. at the Lake Nona Middle School cafeteria, 13700 Narcoossee Road, Orlando, Florida 32832. Attendees will be able to come at any point during the meeting to view the study exhibits, ask questions and provide comments. A looping audiovisual presentation will be available for viewing throughout the meeting.

During the workshop, the CFX study team's recommendation for the preferred alternative will be presented for public input. Based on the input we receive, the alternatives may be further refined. The exhibits on display will include the study alternatives and an evaluation matrix of their potential impacts to the physical, natural, social and cultural environment. Public involvement and interagency coordination are an integral part of the assessment process, and opportunities for participation are being provided.

When the PD&E Study Re-evaluation concludes, it will result in a recommendation to the CFX Governing Board of the preferred alternative. If the project is approved by the CFX Governing Board, it would move forward for further project development.

If you have any questions or would like more information about the study, please contact Mary Brooks, Public Involvement Coordinator, by phone at 407-802-3210, or by email at [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com) or visit the study webpage at <http://bit.ly/OscPkwyExtRe>. You may also follow the study on Facebook at @OsceolaPkwyExtPDE.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require accommodations under the Americans with Disabilities Act or persons who require translation services, free of charge, should contact Ms. Brooks as noted above at least seven (7) days prior to the meeting.

## **OSCEOLA PARKWAY EXTENSION PD&E STUDY RE-EVALUATION** **PUBLIC WORKSHOP SCHEDULED**

**(ORLANDO, FL)** – The [Central Florida Expressway Authority](#) (CFX) is holding a public workshop for the Osceola Parkway Extension Project Development and Environment (PD&E) Study Re-evaluation. CFX is conducting the study to determine if a new expressway connection between [State Road 417](#) near Boggy Creek Road in Orange County and the proposed Sunbridge Parkway in Osceola County is viable and fundable in accordance with CFX policies and procedures.

The Osceola Parkway Extension has been identified as a need in several local, long-range plans and master plans. The former Osceola County Expressway Authority (OCX) completed a Project Development and Environment (PD&E) Study in May 2017 for the Osceola Parkway Extension and presented a recommended alternative.

The overall goals of the nine-mile Osceola Parkway Extension are: to provide improved connections between area roads; accommodate anticipated transportation demand; provide consistency with local and regional plans; support economic viability and job creation; support intermodal opportunities; and enhance evacuation and emergency services.

The public workshop will be held on:

- **Tuesday, November 19**  
**5:30 p.m. to 7:30 p.m.**  
**Lake Nona Middle School Cafeteria**  
**13700 Narcoossee Road**  
**Orlando, FL 32832**

During the workshop, attendees will be able to view a looped video presentation as well as exhibits including the study alternatives, the evaluation matrix and a diagram of roadway typical section. Attendees also will have the opportunity to ask questions and provide their comments.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require accommodations under the Americans with Disabilities Act or persons who require translation services, free of charge, should contact: Mary Brooks, Public Involvement Coordinator, by phone at 407-802-3210 or email at [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com).

### **About the Osceola Parkway PD&E Study Re-evaluation**

CFX's enabling legislation (Senate Bill 230, Ch. 2014-171) incorporated the parkway extension and other portions of the OCX 2040 Master Plan into the CFX 2040 Master Plan. In 2018, CFX completed a Concept, Feasibility and Mobility Study for the Osceola Parkway Extension and concluded the project is viable under

CFX criteria. In July 2018, CFX officially began a re-evaluation of the OCX PD&E Study that included a recommended alternative. The input provided through the public outreach, including stakeholder meetings, site tours and advisory committee meetings, held during CFX's Concept, Feasibility and Mobility Study have been a major component of CFX's PD&E Study Re-evaluation. In addition, the study team has continued to conduct stakeholder meetings to gather further feedback and clarification in preparation for an alignment recommendation.

### **About the Central Florida Expressway Authority**

*The Central Florida Expressway Authority (CFX) is an independent agency of the State of Florida that operates and maintains a regional network of expressways for 3 million residents of Brevard, Lake, Orange, Osceola and Seminole counties and more than 75 million annual visitors to Central Florida. CFX's 118-mile, user-funded system includes 815 center lane miles, 69 interchanges, 14 mainline toll plazas, 74 ramp toll plazas and 335 bridges and seven named expressways. On average, more than 1 million toll transactions are recorded daily, 85 percent of them electronically. CFX operates E-PASS, the first electronic toll collection system in Florida, with nearly 500,000 E-PASS accounts.*

## Central Florida News 13

Nov. 19, 2019 – Jerry Hume

<https://www.mynews13.com/fl/orlando/environment/2019/11/19/plan-calls-for-toll-road-through-forest-near-lake-nona>

<http://mms.tveyes.com/MediaCenterPlayer.aspx?u=aHR0cDovL21lZGlhY2VudGVyLnR2ZXllcy5jb20vZG93bmVvYWRnYXRld2F5LmFzcHg%2FVXNlcklEPTQyNDI1MiZNRlEPTeYNTA1Njc1Jk1EU2VIZD01NTc0JIR5cGU9TWVkaWE%3D>

**ORANGE COUNTY, Fla.** — A final workshop is scheduled for Tuesday to go over a plan to extend the Osceola Parkway through a forest that protects endangered species near the Orange-Osceola county line.

- **Expressway Authority says road needed to handle growing traffic**
- **1,700-acre forest is home to some endangered species**
- **Expressway Authority disputes claim that land is protected**

The [Central Florida Expressway Authority](#) says the toll road is needed to accommodate huge growth expected in that area.

But plans call for the road to cut through a portion of [Split Oak Forest](#), close to Lake Nona.

"There are no major highways near Split Oak right now," said Valerie Anderson, president of the Friends of Split Oak Forest group. "It's very quiet out here. It's very peaceful to hike, and having a major highway through here would not only disrupt wildlife but would disrupt public enjoyment of the property."

The 1,700-acre forest is home to some endangered species such as the gopher tortoise, which relies on the dry, sandy uplands, opponents say.

The Central Florida Expressway Authority is eyeing the land for its 9-mile tollway to help connect State Road 417 to new and planned developments that could add half a million people in the next 50 years.

Kathy Putnam, a spokeswoman for the Expressway Authority, says 60 acres would be impacted, with 100 acres having some kind of secondary impact.

"Helping out the economic drivers in our community, making sure we have regional mobility, that's really critical, especially as this aggressive growth is coming to this area," Putnam said.

She said the Expressway Authority has changed the original plans for the parkway extension to reduce the amount of impacts to Split Oak. Alternative routes would have had the extension go through some neighborhoods, so the agency thinks this is the best option, she added.

Anderson is concerned that the highway would limit prescribed burning in the forest, which is necessary to keep the habitat thriving. She also said legally, the lands are protected, a claim the Expressway Authority disputes.

The public workshop is set for 5:30 p.m. Tuesday at Lake Nona Middle School.

The extension proposal could get the green light for approval at the Expressway Authority's December meeting.

## Orange Co. proposal would lock down Split Oak Forest preserve

Proposal would ban development in Split Oak even if road goes through

By [Scott Powers](#) on November 5, 2019

<https://floridapolitics.com/archives/310426-orange-co-proposal-would-lock-down-split-oak-forest-preserve>

A proposed amendment to the Orange County Charter would prohibit any future development of the **Split Oak Forest Wildlife and Environmental Area** that straddles the county line of Orange and Osceola counties even if a controversial proposed road extension carves a path through it.

James Auffant, an Orlando lawyer who serves as vice chair of the Orange County Charter Review Commission, has drafted a proposed charter amendment for the 2020 county ballot that would prohibit the Orange County Commission from ever approving development plans that would include part of the official Split Oak preserve. And that prohibition could include the roughly 1,500 acres that may be added to **the 2,000-acre preserve and park** in a deal that has been proposed in exchange for the controversial road.

The state of Florida, Orange and Osceola counties acquired the original preserve in the 1990s, initially as wetlands mitigation bank land, then turned it into a preserve and park.

**But its location, remote in the 1990s, now is at a crossroads** between major development in north-central Osceola County and in southeast Orange County, and even bigger developments planned for east of there. Consequently, the Central Florida Expressway Authority is planning to push a major highway, Osceola Parkway, through the area to create new east-west transportation. And the most viable route may be through a corner of Split Oak. That proposal has drawn highly-contentious public hearings.

Auffant said the highway now probably is inevitable. His proposal, he said, is to prevent any further encroachment into Split Oak, as it exists now, and as it likely would be if the additional acreage is added through a deal offered by developer **Tavistock Development Co.** and embraced by the **Audubon Florida's** Central Florida Policy Office.

“This is not about the road. This is about the consequence of the road. This is about people saying, ‘There’s a road. let’s develop it,’” Auffant said. “That’s a park that I like to walk. It’s a beautiful park. It’s the old Florida of 45 years ago, which is disappearing little by little.”

His proposal will get its first airing Wednesday evening when the Orange County Charter Review Commission holds a public hearing at 6 p.m., at the Meadow Woods Recreation Center, not far from Split Oak. Auffant said he’s already expecting dozens of public speakers, and has heard from no one who intends to come to oppose the charter amendment proposal.

Auffant said there is a “backdoor” in the Split Oak trust documents that Florida and the two counties signed, which would allow development of Split Oak land if a proposal were to get super-majority approval from the two counties’ boards of commissioners. He wants to close that door. Specifically, the proposal’s current draft reads:

“The residents of Orange County, in order to protect Split Oak Forest Wildlife and Environmental Area from any future destruction, and in order to maintain the quality of their air and water, hereby bar the

Orange County Board of County Commissioners from approving or applying for any construction permits, development permits, release or modification of conservation easements, or modification of the Florida Communities Trust Grant Award Agreement.”

If the proposal in fact draws dozens of speakers [and previous hearings on Split Oak by the expressway authority and county commissions have drawn hundreds,] then Auffant’s proposal will have succeeded in doing something that several other proposed charter amendments have not: attract public attention.

Through the summer and early fall the commission has proposed charter amendments that would have tied **housing growth to schools**, create **new protections for Orange County rivers**, limit the roles lobbyists can play in county government, **change the makeup of the Orange County Commission**, deal with unlicensed contractors, and make it easier for citizens to get initiatives on the ballot. Public attendance has been light to non-existent for many of the meetings.

FLORIDA POLITICS

### **Osceola Parkway preferred route to cut through southern end of Split Oak Forest**

<https://floridapolitics.com/archives/311474-osceola-parkway-preferred-route-to-cut-through-southern-end-of-split-oak-forest>

By: Scott Powers, reporter

Posted: November 18, 2019

The new preferred route for an eastward extension of the Osceola Parkway would push it through the southern end of the Split Oak Forest preserve, an alternative that has greatly reduced the impact to the park from a previous proposal yet is still expected to bring strong opposition from many supporters of that preserve.

The new proposed Osceola Parkway extension route, which also includes a connector road from Osceola Parkway through the Lake Nona medical city development further to the west, was unveiled as the preferred alternative Monday morning when the contractor RS&H submitted its Osceola Parkway Extension Project Development and Environmental Study Re-evaluation to the Central Florida Expressway Authority's Project Advisory Group.

A public workshop unveiling the study and its recommendations is set for 5:30 p.m. Tuesday at Lake Nona Middle School.

The extension, in various planning phases for 15 years, is the first step in plans to connect the Osceola Parkway to the rapidly developing region of northeast Osceola County and southeast Orange County, where tens of thousands of acres now are under development, and far more is envisioned in coming decades. From there, the highway is projected to connect to a planned new loop road around Kissimmee and St. Cloud, and to push all the way through to Brevard County, connecting the Orlando-Kissimmee area with the Space Coast.

But to get there, Osceola Parkway must first get through a tight corridor where development already is underway, and where some of the region's most beloved nature preserves are located.

The originally approved alignment was dropped, leaving the eastern route alternatives of the one called the "Split Oak Minimization," running through the southern end, and the Split Oak Avoidance," running even further south.

"Based on the analysis of the social, cultural, physical, environmental, and economic considerations, the currently preferred alternative is a combination of the Lake Nona alternative for the west and the Split Oak Minimization alternative to the east," Dan Kristoff of RS&H said Monday.

The immediate extension proposal, through the southern end of Split Oak, is an alternative to the originally approved plan that would have pushed the highway right through the middle of the park. It is also being preferred over the other option, which would have avoided the park entirely but would have to go through some existing neighborhoods to the south, costing another \$100 million to develop.

After a period of review and public comment the proposed route would go to the CFX board for approval. Because it would traverse the Split Oak Forest Wildlife and Environmental Area, a

conservation preserve, the project also would require both the Orange and Osceola County Commissions to apply to the Florida Communities Trust to approve the encroachment of the 1,689-acre conservation area, protected by covenants that would allow a road only if both counties request it. The proposal would displace about 60 acres and also cut off about 100 acres from the rest of the park.

In exchange for approval of that route, one of the nearby developers, Tavistock Development Co., has offered to donate another 1,550 acres of conservation land as buffer and wildlife corridor to a complex of nature preserves and parks there that include Split Oak Forest and others, notably Eagle Roost, Moss Park, and Isle of Pine.

GROWTHSPOTTER

## **Tavistock, Deseret Ranch sign \$93M right-of-way agreement for Osceola Parkway Extension**

<http://www.growthspotter.com/news/growthspotter-cfx-ope-row-20191029-jeqfy6chi5cspoyon6gbkwqedu-story.html>

By: Laura Kinsler, Editor

Posted: October 29, 2019

Tavistock Development Company and the owners of Deseret Ranch have agreed to terms with Central Florida Expressway Authority to sell the bulk of the right-of-way needed for the Osceola Parkway Extension at steep discount.

The agreement is contingent on CFX approving the developer's preferred alternative route, which clips the southwest corner of Split Oak Forest nature preserve.

"We're close to bringing this in for a landing," CFX Executive Director Laura Kelley said.

Tavistock and Suburban Land Reserve (Deseret) control about 80 percent of the land needed for the 9-mile toll road extension, which links the developer's master-planned communities: Lake Nona and Sunbridge. Kelley told GrowthSpotter the landowners signed an agreement Monday to sell the right-of-way for \$93 million, which is less than half of the estimated value of the property.

"So they're really giving it to us at a discounted cost, which helps with the financial viability of the road, as well," Chief of Staff Michelle Maikisch added.

In addition, Tavistock and SLR would transfer 1,550 acres of land in Orange and Osceola County to conservation areas, expanding the total contiguous acreage of nature preserves around Split Oak to 5,375 acres.

"Transferring this land to conservation eliminates nearly one million square feet of commercial entitlements from development and includes the relocation of the utility plant," Tavistock Vice President Clint Beaty said. "After months of conversations among stakeholders, we believe that this plan offers a once in a lifetime opportunity to designate significant land for preservation and provides a reasonable option for the parkway extension."

The "Split Oak Minimization" route is one of two eastern roadway alignments under consideration. The other route would run parallel to Cyrils Drive. It's called the "Split Oak Avoidance" alignment. "And that's exactly what it sounds like," Kelley said.

"That particular alignment has a lot of social impacts with the development that's there, so it's extremely difficult. But it's one we wanted to evaluate."

Numerous homeowners in the rural enclave along Cyrils would be impacted, but the bigger cost would come from developers who have projects in the pipeline already. Those include Lennar Homes, which is currently seeking to expand its residential entitlements from 777 to 882 lots on property it owns along Lake Ajay.

The Split Oak Avoidance alignment also would bisect the first phase of Del Webb at Sunbridge, which is already underway. Both would cut through the Tavistock-owned portion of Southern Oaks, but at different locations.

Kelley said the CFX staff and its consultants are “leaning” toward one of the alternatives but won’t make a recommendation to the governing board until both alignments have been presented to the Citizens Advisory Group and Environmental Advisory Group – both are scheduled to meet on Nov. 18.

CFX will host a public meeting at Lake Nona Middle School on Nov. 19, and a recommendation could go to the board at its December meeting.

“It was a lot of work to get to this point, but if the Split Oak Minimization alternative is the one that rises to the top, it is very important that the environmental community benefits and the long run from that impact,” Kelley said.

Tavistock also has a high interest in the western segment of the road. Again, the right-of-way agreement would be contingent on the CFX board selecting what’s known as the “Lake Nona Alignment” rather than the option that runs parallel to Boggy Creek Road. The developer’s preferred option would shift the toll road further east on S.R. 417, the Central Florida Greenway, so it would traverse the Poitras property south of Orlando International Airport.

“This whole area is in transition, and Osceola County has a lot of transportation needs,” Kelley said. “It’s really important that we do this right, so 30 years from now, I want people to look at this project and know that we thought through everything, and that it resulted in the greater good, and that we got it right.”

Tavistock already secured the support of the Osceola Board of Commissioners in 2018 when the developer agreed to relocate the Sunbridge utility plant - a concession that cost millions and delayed construction of the community in Osceola County for over a year.”

Kelley said that if the CFX board ultimately selects the Split Oak Minimization route as its preferred alternative, the project would still have to get clearance from the Florida Communities Trust before any design work could begin.

“There’s a long list of approvals for a project like this,” she said.

###

GROWTHSPOTTER

**CFX consultant to recommend developer-backed route for Osceola Parkway Extension**

<https://www.growthspotter.com/news/growthspotter-com/news/growthspotter-com/news/gs-news-ope-costs-20191118-by4wzzcj7fhldcmk3nvskdnote-story.html>

By: Laura Kinsler, reporter

Posted: November 18, 2019

The Central Florida Expressway Authority staff and consultants will recommend the Osceola Parkway Extension route favored by Tavistock Development Company because it costs \$103 million less than the route that avoids Split Oak Forest and because it wouldn't require the relocation of over a dozen existing homes, they told members of the Project Advisory Group on Monday.

The consultants from RS&H also met Monday afternoon with the Environmental Advisory Group for the new toll road. At both meetings they unveiled the evaluation matrix that compares construction and right-of-way costs, social impacts and financial feasibility, among other categories, for the OPE. The estimated cost for the preferred alignments, which cuts through Tavistock's Poitras property on the west and nips the southwest corner of Split Oak, would cost \$903 million.

That price does not factor in the projected right-of-way cost savings the agency would realize if it accepts the terms negotiated with Tavistock and Suburban Land Reserve, who control 80 percent of the right-of-way needed for the preferred alignment. Those companies have already signed a contract offering to sell the right-of-way for \$93 million, which is less than half of the estimated value of the property. The actual cost, because of the agreement, would be closer to \$800 million.

The Split Oak Avoidance Alignment, which would involve building an elevated toll road in the median of Cyrils Drive would impact 19 existing homes, forcing relocation of 16 of those owners.

"The Avoidance alternative is very disruptive to the neighborhood to the south of Split Oak," Kristoff said. "That neighborhood is an old, established neighborhood, and the relocation of those residents would be extremely difficult."

In addition, the number of approved homesites in future developments, namely Lennar's Southern Oaks community and Del Webb at Sunbridge, that would be impacted more than doubles from 88 to 175, according to the matrix.

"Based on the analysis of the social, cultural, physical, natural, environmental and economic considerations the current preferred alternative is a combination of the Lake Nona alternative for the West and the Split Oak minimization alternative for the east," RS&H's Dan Kristoff said.

The consultants will present their recommendation at a public meeting at 5:30 p.m. Tuesday at Lake Nona Middle School and to the CFX governing board on December meeting.

The deal with Tavistock would also hinge on the selection of the Lake Nona Alternative, magenta, for the western segment.

The Tavistock-preferred Lake Nona alternative for the western segment would cost \$638 million – roughly \$178 million than the alignment that runs parallel to Boggy Creek Road, but it has several advantages, according to outreach specialist Kathy Putnam. For one, the Lake Nona alignment provides direct access from OPE to S.R. 417 and Orlando International Airport. The Boggy Creek alternative lacks the airport access.

Also, the Lake Nona alignment projects 47,300 average daily trips, compared to 35,867 for the Boggy Creek route. That represents a 32-percent increase, and it makes the project more viable financially, Putnam said.

The Split Oak Minimization alignment would impact 160 acres of the nature preserve, which includes 60 acres for the road and 100 acres south of the road that would be disconnected from the rest of the forest. Tavistock and SLR have offered to dedicate 1,550 acres for conservation as an additional enticement for the board to select the preferred alternative. The gift would expand the total contiguous acreage of nature preserves in and around Split Oak to 5,375 acres.

Tavistock Spokeswoman Jessi Blakley said the agreement was based on months of meeting and discussions with environmental groups. She said CFX pushed hard for the land to be unencumbered, so the future owner would have mitigation credits to use as needed.

If the CFX board accepts the impacts to Split Oak Forest, Tavistock and Suburban Land Reserve will designate the 1,550 acres outlined in yellow for perpetual conservation.

“It’s a unique moment in time for this, because part of what we’ve been talking with environmental groups – because they’ve been a huge player at the table – is that this is part of a bigger region of conservation. It’s not just Split Oak, right. It’s this larger region, and we happen to be partnered up with the other landowner, and we have the ability to gift 1,550 acres of unencumbered land,” she said.

A portion of the 582 acres in Osceola County is currently entitled for 1 million square feet of industrial distribution space. Blakley and Tavistock Vice President Clint Beaty noted that Osceola County had actually approved 2 million square feet at that location in the northeast corner of Sunbridge, and Tavistock reduced the entitlements in half. The entitlements are still in the county’s approved Concept Plan for Sunbridge.

“We have 24,000 acres developed (in Sunbridge), and we have 17 square miles in Lake Nona, over here,” Blakley said. “We have plenty of land to develop. This was all about coming to an arrangement with the stakeholders to develop a plan and to develop a route that we felt minimized impacts on things that no one wanted impacts on – whether it was homes or forest – and also gave back a buffer in a conservation area.”

### **Split Oak controversy over expressway route re-emerges with tough choices**

<https://www.orlandosentinel.com/news/transportation/os-ne-split-oak-road-controversy-reawakens-20191031-5vq47stbf5fdtflbghmq6lyyja-story.html>

By: Kevin Spear, Contact Reporter

Posted: October 31, 2019

One of Central Florida's most defining environmental controversies – whether to build an expressway through or near Split Oak preserve – is re-emerging into the public spotlight with more sharply defined and potentially agonizing choices.

The Central Florida Expressway Authority will hold meetings next month to unveil details and prime the public's awareness of alternatives for where to route an extension of the Osceola Parkway expressway toll road from the heart of Osceola County to south and east of Orlando International Airport.

Blocking the way is Split Oak Forest Wildlife and Environmental Area, a 1,800-acre preservation tract assembled with local and state initiatives more than 20 years ago, intensively rehabilitated as natural landscape since then, and now robustly defended by a coalition of environmentalists and area residents.

"We really listened to the environmental advisory group and tried to deliver what they asked for," said Laura Kelley, expressway authority executive director.

East Orange and north Osceola counties have witnessed a tidal wave of development pressure, planning and projects.

That momentum has been backed primarily by Tavistock Development Co. and Suburban Land Reserve, or SLR, which is part of the Church of Jesus Christ of Latter-day Saints corporate family that includes the massive Deseret Ranches in Central Florida.

The extension of Osceola Parkway would extend to an expressway network within and connecting to a rising urban landscape of Tavistock and SLR.

The options about to face public scrutiny have been debated previously in broad terms.

What's new, according to the expressway authority, is that Tavistock and SLR -- powerhouses in Central Florida real-estate development -- are more formally committing to setting aside more than 1,500 acres as a conservation buffer south and east of Split Oak.

That would create an island of 5,375 acres of protected lands, spanning Split Oak, other park lands, wetlands, critical uplands and former agricultural tracts.

That offer is contingent on routing the parkway through the southwest corner of Split Oak, paving 60 acres and severing a 100-acre wedge that will be significantly degraded as forest habitat.

The other choice, what the authority is calling the "Split Oak Avoidance Alternative," wraps closely around the southwest corner of Split Oak.

That path already has met with vociferous backlash from residents, and there is little to suggest that the opposition has lessened during the past year when the Osceola Parkway extension proposal was back on drawing boards.

Because of impacts to private property, the avoidance alternative would be more expensive for a project estimated at an early stage to cost between \$750 million and \$1 billion.

While many regulatory and political decisions lie ahead for the Osceola Parkway extension proposal, a public hearing set for Nov. 19 has the makings of an epic confrontation between road builders, residents, developers, forest visitors and factions of environmentalists.

“We believe that this plan offers a once-in-a-lifetime opportunity to designate significant land for preservation and provides a reasonable option for the parkway extension,” said Clint Beaty, vice president for Tavistock Development Co. in a statement.

The alignment through Split Oak “allows more than 1,550 acres to be placed into perpetual conservation – significantly increasing the expanding conservation lands in the region,” Beaty said. “Transferring this land to conservation eliminates nearly one million square feet of commercial entitlements from development.”

The prospect of sacrificing a wedge of Split Oak for the larger gain of protecting more than 5,000 acres of contiguous landscape has gained traction from some quarters of the environmental community.

“The most important issue is the long-term ecological integrity of Split Oak, Moss Park and Isle of Pines Preserve,” said Charles Lee, advocacy director for Audubon Florida.

“Right now about 4 miles of the boundary of these conservation tracts is already approved for 1 million square feet of industrial, 1.7 million square feet of office park, 80,000 square feet of commercial development, and much more,” Lee said. “In the long run, the CFX proposal to impact 160 acres and add 1,500 acres of new preservation areas is the best result for these conservation lands.”

But many other opponents of crossing Split Oak have rallied to fears that if the preserve cannot be protected from an expressway, then little in Central Florida’s environment is safe from encroaching development.

Valerie Anderson, a founder and the public face of Friends of Split Oak, has remained an uncompromising opponent to dissecting the preserve with an expressway, including on Wednesday when told of the proposal’s resurfacing for public review.

“We need to stand up for what we have, not bow down to a deal engineered by the developer that has the most to gain from the construction of the Osceola Parkway extension,” Anderson said.

“If the State of Florida, Osceola County, Orange County and CFX are willing to undermine the existing legal framework for protecting conservation land from development, how can these entities be trusted in the future to protect our parks, public land and green spaces from development pressure?” Anderson said.

Also up for consideration is the west end of the parkway extension, where two alternatives are being considered: intersecting the parkway with State Road 417 near Boggy Creek Road or extending the parkway to S.R. 417 along Tavistock land nearer to the Lake Nona community and Medical City.

Nothing like leaving a bag of blazing dog mess on someone's porch and ringing the doorbell.

Which is kind of what the Osceola Expressway Authority did before it met a welcome death, folded into the region's larger Central Florida Expressway Authority last year.

That mess on the porch was a plan to extend a toll road — the Osceola Parkway — smack through the middle of Split Oak Forest, a beloved conservation area that bisects Orange and Osceola counties east of Lake Nona and the airport.

Nothing says progress in Florida like building a highway through a protected forest, especially when a key goal of the road is to help open up tens of thousands of acres to development east of St. Cloud.

The Central Florida Expressway Authority has come up with a new plan that, while imperfect, is a vast improvement over the Osceola authority's scorched-forest approach.

Rather than take the highway smack through the middle of Split Oak, as Osceola traffic planners had suggested, the new plan reroutes it through the southern end of the forest.

The compromise accomplishes several worthwhile things:

It ensures the road won't cause the loss of any existing homes, which would have been the consequence of yet another proposed route that kept the highway farther south and out of the forest altogether. It also keeps the road some distance away from other subdivisions and homeowners who never counted on having a major highway in their backyards.

It also means the 1,700-acre forest will stay largely intact. That'll allow forest managers to conduct controlled burns, which helps keep the longleaf pine and oak scrub habitats environmentally healthy. Controlled burns are a tricky business that depend on a variety of factors, including wind. Putting a highway through the forest's midsection would have made burning all but impossible.

Finally, to sweeten the deal, landowners Tavistock and Suburban Land Reserve — who stand to make piles of money thanks in large part to the highway's construction — are offering to donate for preservation 1,550 acres directly east of Split Oak and other existing conservation lands.

The compromise falls short as well, but in ways that might be resolved.

For example, the southernmost portion of Split Oak, about 100 acres below the highway, can't be managed through burning, which clears out overgrown brush so plants and wildlife can thrive. Plus, some of the property to be donated is degraded, partly through clearing and partly because of invasive plant species.

To make this deal work, some kind of solution is needed to fix those issues. Perhaps the current landowners — Tavistock and Suburban Land — can also be persuaded to set up a permanent fund to do just that, rather than putting taxpayers on the hook.

Environmental groups are divided on the newest plan to run the highway through the forest's southern end. We get the opposition's arguments, but don't see a better way to go about building the highway. It might be a cliché, but perfect can be the enemy of good.

Orange and Osceola counties should back this compromise, because the prospects of finding a better solution are dim, and the highway extension is all but inevitable because of the development that's been approved in the region.

Unfortunately, this road project represents a broader failure — particularly on Osceola County's part — to take the environment into account when it's doing deals with big landowners like Deseret Ranches, the massive agricultural operation that, along with Suburban Land Reserve, is under the corporate umbrella of the Church of Jesus Christ of Latter-Day Saints.

The highway is central to the ambitious development plans of the church and its business affiliates, as well as Tavistock. But Split Oak was treated at the start like an afterthought, an impediment to progress.

But that's how we roll here in Florida. Local governments are for the most part really bad negotiators when they're dealing with developers. We used to have an effective, state-level check on mega-developments, but Rick Scott and the Legislature took care of that inconvenience back in 2011 with a bill that sucked the life out of growth management in Florida.

So here we are in 2019: Sprawling developments are approved, big highways are planned to take care of the resulting traffic, and a forest that was supposed to be preserved for future generations is diminished.

The forest was dealt a bad hand, but the expressway authority's current plan for Split Oak looks like it's the best outcome we're going to get.

11/19/19

We are about ~~to~~ to throw away a pearl of great price, in a misguided attempt to affect short-term gain<sup>e</sup> in lopping off a corner of a triple-protected, scrupulously maintained, beloved nature preserve to accommodate development which will degrade the beauty and quiet of this area. Where will this stop? Will we pave over all of Florida?

The disingenuously-named "Minimization Alignment" is a devil's bargain. The so-called "Conservation Lands" being offered as a carrot, or withheld as a stick, are subject to no protection if the protections of Split Oak can so easily be sacrificed. If the developers and CFX wish to show that they are being conscientious, and environmentally

We welcome your comments. You may mail your comments to Mary Brooks, Public Involvement Coordinator, Central Florida Expressway Authority, 4974 ORL Tower Road, Orlando, FL 32807, or email them to [ProjectStudies@CFXway.com](mailto:ProjectStudies@CFXway.com).

Thank you!

responsible, and respectful of the communities they purport to serve with all of this road-building and development, it would be a much more credible show of good faith to donate the lands and ~~to~~ refrain entirely from building the road. Otherwise, it's obvious that ~~the~~ the purpose of this road is to enrich its builders, and the community and the ecology be damned.

Further:

- I am opposed to the Split Oak Minimization alternative.
- I am generally OPPOSED to any new toll roads through conservation lands that were purchased with public funds.
- I am SPECIFICALLY OPPOSED to ANY roads through Split Oak Forest.
- I am not in favor of any new toll roads east of Narcoossee Road.
- I strongly contend that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore I am opposed to building this road.
- With a range of costs from \$55 Million to \$148.4 Million/mile for the 4 segments identified, this roadway project is simply too costly. A thorough economic analysis must be redone, including more realistic estimates of unknown factors not yet considered.
- With a proposed cost of \$75.1 Million/mile, I FAVOR the S.O. Avoidance Alternative over the S.O. Minimization Alternative, for the East segment. This segment of the roadway is a better value in cost per mile than either of the West Segments at a cost ~~per mile~~ of \$86.8 Million/mile (Boggy Creek) and \$148.4 Million/mile (Lake Nona).
- I am SPECIFICALLY OPPOSED to the S.O. Minimization because I am an avid user of S.O. Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to S.O. Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-Way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 of the ROW Committee Agenda for the meeting to be held on Nov. 20, 2019. Please remove the item from the agenda immediately.

DATE: Nov 19, 2019

I am a resident of Lake Ajay Village that was established in 1978 and is currently well removed from any limited access roadway. I am also a Florida Master Gardener and a Florida Master Naturalist. I would like to register with the CFX Board that I am strongly in support of the Split Oak Minimization alignment for the Osceola Parkway Expressway.

I would note for the record that this position is also strongly supported by the Florida Audubon Society and the Florida Fish and Wildlife Authority. This alternative has very positive net value to the environment in general and to the Split Oak Forest, which would be expanded by over 1500 acres. (OVER →)

Thank you!

In addition, the minimization route would be better for Lake Ajo residents as the nearest approach would be about 1300 feet. The avoidance route would bring the expressway as close as 700 feet.

It is important to note that several studies have shown that people living within 1500 feet of a major roadway have significantly higher incidents of several serious medical conditions.

Finally, it should be reflected in the CFX decision that the avoidance option is about \$110M more expensive than the minimization alternative.

However, as recommended by the Audubon and Florida Fish and Wildlife groups, it is critically important that the CFX decision include funding and management provisions for preservation land restoration and continual maintenance.

I Feel the best choice at this time is the  
Split Oak minimization route only if it  
includes the following:

- (1) Full Restoration of the compensation lands  
described to match the quality of Split Oak.
- (2) ONGOING maintenance of these lands.
- (3) PLUS connectivity of both uplands and  
wetlands to nearby preserves such as Hal  
Scott, Tim Econ mitigation Bank, LAKE  
LIZZIE PRESERVE, LAKE PRESTON + LAKE  
CONLIN.

(4) GOPHER TORTOISES RELOCATION BE DONE

COMMENT FORM

Page 2 of 2

In addition to my remarks on Page 1 of 2 of this "Comment Form", I

Nicolas Reinoso

(Printed Name)

hereby submit all of the following Comments that I have listed below:

- I am OPPOSED to the Split Oak Minimization Alternative.
- I am generally OPPOSED to any new toll roads through Conservation Lands that were purchased with Public Funds.
- I am SPECIFICALLY OPPOSED to any new toll roads through Split Oak Forest WEA.
- I am not in favor of any new toll roads East of Narcoossee Road at this time.
- I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
- With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.
- With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
- I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

I strongly oppose any type of construction  
in or through the Split Oak forest. My family  
and I recently moved to the area and the Split  
Oak forest is the best thing about this

Bald eagles are protected under multiple federal laws & regulations. Eagles, their feathers, as well as nests and roost sites are all protected.

There is a nest close to my property,  
couple

where the road is proposed to go through  
I oppose the road!
