In addition to my remarks on Page 1 of 2 of this "Comment Form", I

DAVID HAZWOOD
(Printed Name)

hereby submit all of the following Comments that I have listed below:

- I am **OPPOSED** to the Split Oak Minimization Alternative.
- I am generally **OPPOSED** to any new toll roads through Conservation Lands that were purchased with Public Funds.
- I am **SPECIFICALLY OPPOSED** to any new toll roads through Split Oak Forest WEA.
- I am not in favor of any new toll roads East of Narcoossee Road at this time.
- I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
- With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.
- With a proposed cost of \$75.1 Million per mile, I **FAVOR** the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
- I am **SPECIFICALLY OPPOSED** to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am **OPPOSED** to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

DAVID HAZWOOD

PUBLIC MEETING

CFX Project No.: 599-223

Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832
Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE: 11/19/19

As a biologist working in Split Oak I would strongly be against any construction activity inside the current park boundaries. The Southern part of the park is the most biodiverse part of the park and I have personally documented several endangered and threatened species inside the proposed tollway route. The land being offered in exchange for the land inside Split Oak is sub-par in species richness and is not quality sandhill habitat. I oppose all development activity inside this Mitigation Park.

Split Oak needs to be preserved in perpetuity, as
intended by the measures taken in the 90s.

Buckling to development pressure should not happen.
We don't need more toll roads.

In addition to my remarks on Page 1 of 2 of this "Comment Form", I

Shannon Normand

(Printed Name)

hereby submit all of the following Comments that I have listed below:

- I am OPPOSED to the Split Oak Minimization Alternative.
- I am generally OPPOSED to any new toll roads through Conservation Lands that were purchased with Public Funds.
- I am SPECIFICALLY OPPOSED to any new toll roads through Split Oak Forest WEA.
- I am not in favor of any new toll roads East of Narcoossee Road at this time.
- I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
- With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.
- With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
- I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

CFX Project No.: 599-223

Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE: 11/19/19

See back of page.

Avoid split oak and any other conservation areas.
Putting/developing any sort of highways, houses, apartments, etc.
on conservation land is immoral and only harms everyone
but developers. Consider the little amount of planet we have
left and preserve it.

PUBLIC MEETING

CFX Project No.: 599-223

Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE: Nov. 19, 2019

We purchased our property due to the peace and quiet, and the quality of life. Since that time, unchecked growth has already impacted us in several ways. Traffic is horrible, schools are crowded, crime is rising and the noise level has increased greatly.

Putting a highway through our backyards will make our property less valuable and impossible to enjoy for the reasons we purchased. Stop the Madness!

See back for additional comments.

 Gwen Kelemen

DATE: 11/19/2019

I do not believe that starting any project of this size is a good idea now. There are too many developments in progress without proper planning already. The roads have become too crowded and just putting in another STOP Light is not the answer. Greedy developers and poor planners are to blame for this, do not take away what conservation land is left over for the rest of us!
— I agree with the other comments on the back side of this page.
(Seems to be way more development than planning)

Please see reverse side ☺

Please avoid Split Oak Forest
at ALL costs!! We have
enough negative impact to our
wildlife + greenspaces as it is!
We need a place for peace + comfort
not another toll road that will
destroy what little tranquility we
have left in Florida.

This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
- I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

I agree with all of the above!

Melissa Campbell

PUBLIC MEETING

CFX Project No.: 599-223

Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE: 19 Nov 2019

I AM OPPOSED TO ANY ROAD BISECTING SPLIT OAK. IF A ROAD
NEEDS TO BE BUILT, THEN THE SPLIT OAK MINIMIZATION ROUTE
IS A VIABLE ALTERNATIVE IF AND ONLY IF THE ROAD IS ELEVATED
TO ALLOW NATURAL MIGRATION AND NO ADDITIONAL INTERCHANGES
ARE TO BE BUILT. THIS IS ALSO TO INCLUDE ADDITIONAL CONSERVATION
LANDS AND CONNECTIVITY TO NEARBY PRESERVATION LANDS.

COMMENT FORM

Page 2 of 2

In addition to my remarks on Page 1 of 2 of this "Comment Form", I _____
(Printed Name)

hereby submit all of the following Comments that I have listed below:

- I am OPPOSED to the Split Oak Minimization Alternative.
- I am generally OPPOSED to any new toll roads through Conservation Lands that were purchased with Public Funds.
- I am SPECIFICALLY OPPOSED to any new toll roads through Split Oak Forest WEA.
- I am not in favor of any new toll roads East of Narcoossee Road at this time.
- I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
- ~~With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.~~
- ~~With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).~~
- I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

10-19-19

In addition to my remarks on Page 1 of 2 of this "Comment Form", I hereby submit all of the following Comments that I have listed below:

Luis R. Sanchez

The only viable alternative is to utilize the Split Oak Avoidance Alternative or to use the 4/7/528/Sumbridge or not to build the road at all.

I [^]PREFERED
PREFER THE ALTERNATIVE RECOMMENDATION FOR THE ROADWAY WHERE
SPLIT OAK IS. OUR WILDLIFE REFUGE - BACK TO NATURE, IS A WILDLIFE
REHAB & PUBLIC EDUCATION FACILITY. WE ARE LIKELY TO BE AFFECTED REGARDLESS
OF ALIGNMENT. HOWEVER WE WOULD LOVE TO NOT SEE THE ROAD IN SPLIT
OAK - BUT ALSO DO NOT WANT TO SEE PEOPLE LOSE THEIR HOMES EITHER.
I WOULD LIKE TO REQUEST THE FOLLOWING: (AS I HAVE EXPRESSED BEFORE AT MEETINGS)

- * BRIDGE SPLIT OAK IN ENTIRETY # - CRITICAL
- * PROVIDES NUMEROUS WILDLIFE PASSAGES / ^{especially} CROSS UNDER ROADWAY / CORRIDORS # (FROM S.O. THROUGH EAGLES ROOST)
- * WILDLIFE CROSSING SIGNS ON Clapp Simms Duda Rd - especially by S.O. & EAGLES ROOST
- * NOISE WALLS / SOLID BARRIERS TO MINIMIZE NOISE TO EAGLES ROOST

THERE IS NO EASY ANSWER TO THIS - PLEASE JUST MINIMIZE IMPACT TO S.O.
THANK YOU FOR TAKING OUR COMMENTS SERIOUSLY AND TRY TO WORK WITH FEEDBACK & INTEGRATE

(Please continue comments on the back of this page if more space is needed.)

I am in favor of the Split Oak Minimization route with a full compensation package. I believe it's so important to keep area for our wildlife and wetlands. We have to be very careful not to go too far in destroying the green spaces. We need to keep some connectivity between the ~~the~~ conservation areas to keep a corridor for the wildlife.

PUBLIC WORKSHOP

CFX Project No.: 599-223
Lake Nona Middle School
13700 Narcoossee Rd., Orlando, FL 32832
Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: Nov. 19, 2019

You can't stop time and progress. But sensible progress should be undertaken. Wetlands & wildlife habitations and corridors are vital to a healthy environment. With that the following are preferred.

1) The Split Oak Minimization Route, only, if the following occurs:

a) Full Restoration of the lands to match quality of Split Oaks

b) Ongoing Maintenance & stewardship of those lands

c) adding the full 1500+ acres of surrounding land for conservation & wildlife corridors.

d) Full connectivity of both upland and wetlands to nearby preserves such as Hul Scott, TM-Econ Mitigation Bank, & several lakes, even if it means having a significant amount of elevated highway in areas where wildlife and migration is prevalent.

I Like And prefer the split OAK Minimization route if it includes:

- 1 Full restoration of these lands to match the quality of split oak
- 2 Maintenance of these lands
- 3 Uplands and wetlands can connect to nearby preserves, Scott, Lake Lizzie, Precision etc.

This choice has been very thought out. By far the best option.

I would like to request the Split Oak Minimization Route with full compensation including: full restoration of these lands to match the quality of Split Oak. With continuance of maintenance. Also - connectivity of both uplands and wetlands to other nearby preserves such as Hal Scott, Lake Lizzie, & Lake Preston. Please protect these green areas for everyone - including all wildlife. There will always be changes but I would trust that you would take all this in consideration. This has been such a wonderful place and hope to enjoy it for many more years with greenery! Protect it.

As a resident of this area for over 10 years this kind of events have been going on since we've been here. Respectfully, I would be thrilled if we didn't have to get another road to go through untouched land. However, I am a supporter of the "Split oak minimization route with a full compensation package" that way we can keep the land in its most natural state as possible. I only agree with the "Split Oak Minimization" if it includes "Full restoration of these lands to match the quality of Split Oak", "Ongoing Maintenance of these lands", and Connectivity of both uplands and wetlands to other nearby preserves such as Hal Scott, TM-Econ Mitigation Bank, Lake Lizzie Preserve, Lake Preston, & Lake Contin." If you would follow these stipulations that is the consensus of the nearby community's then you would have the support of me and the community in your endeavors. Here's to our coalition.

My husband + I moved to Lake Ajay Village in 2015. We immediately fell in love with the neighborhood due to the age of the community + character. We have since become practically family with our amazing neighbors. We would be devastated to lose any of our neighbors or to have their homes (that have been around since the 70's + 80's - longer than Split Oak Forest) affected. We beg of you to vote for the Split Oak Minimization Route. We do not want this highway close to our neighborhood producing noise, pollution + an overall lower quality of life for our neighborhood. Thank you!

Lake Nona Middle School
13700 Narcoossee Rd., Orlando, FL 32832
Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: 11/19/19

I vote for the "Split Oak Minimization Route" with Full Compensation including:

- a Full restoration of these lands to match the quality of Split Oak
- b Ongoing maintenance of these lands
- c Connectivity of both uplands & wetlands to other nearby preserves, ie Hal Scott, Lake Luzzo & Preston.

Please, please, please preserve our natural areas + conservation lands - DONT PAVED OVER PARADISE - we can never get it back if you do...

My husband John & I are residents of Isle of Pines.

We request the Split Oak Minimization Route -

We request the plan to include the following:

1) Full restoration of these lands to match the quality of Split Oak.

2) Ongoing maintenance of the lands.

3) Connectivity of both uplands & wetlands to other nearby preserves such as Hal Scott, TM-Ecology Mitigation Bank, Lake Lizzie Preserve, Lake Preston & Lake Contin,

Please adopt the Figure 2 option with the "Split Oak Minimization" route. We request restoration of all lands disturbed in the development to match the current quality of Split Oak with on-going maintenance of these lands. We cherish the ~~rural~~ quality of our Moss Park - Lake Mary Jane community and ask that development in the southeast corner of Orange County respect and preserve its natural beauty and rich wild life habitats. Please ensure the continuation of these few zones of "natural Florida" by connecting the existing uplands and wetlands in our area to nearby preserves like Lake Lizzie, Lake Preston, and Hal Scott. Thank you for protecting our beautiful, tranquil neighborhood.

Thank you for considering the neighborhood of Lake Ajay.
I appreciate the careful evaluation to avoid our neighborhood.
I am in favor of the Split Oak Minimization Alternative.
Our neighborhood is unique and friendly - both to visitor and
to wildlife. Please visit us anytime as I'd be happy
to welcome you.

I (and my family) support the Split Oak
Minimization route with a FULL Compensation
package. Full Restoration of those lands
to match the quality of Split Oak, including
ongoing restoration of those lands, and
Connectivity of both uplands and wetlands
to other nearby preserves (Hal Scotty, T.M.-Econ
mitigation bank, Lk Lizzie, Proctor and
Conlin. We moved to this beautiful and pristine
area in 1994 and have seen growers destroy
the forests, wetlands and displace wildlife. If
this Road must be extended through our area, then
please minimize the destruction to our Area.

As a 35-year resident of Lake Ajay, my appreciation of and respect for the beautiful nature, serenity and history of this community of Lake Ajay is enormous. Our shared love, support for its preservation has prevailed throughout the years. Of course, our preference would be for no road and less development. However, we acknowledge and respect the need of transportation for the larger Lake Nona, St. Cloud area. I highly urge you to decide on the Split Dale minimization choice.

I have reviewed the proposed maps and
found the "split oak minimization route" with full
compensation including: full restoration of these lands
to match the quality of split oak, ongoing
maintenance of these lands, and connectivity of
both uplands & wetlands to other nearby
preserves such as the Scott, Lake Lizzie,
Lake Preston...

... And if you give more attention to Redstart Flycatcher
Canes, Florida will put you on the nice
list "ü"

I do not support the Split Oak avoidance route. I do
support the Split Oak minimization route that will impact
160 acres in Split Oak but adds 1,550 acres of surrounding
land. I only support the minimization route only if it
includes full restoration of these lands to match the
quality of Split Oak, ongoing maintenance of these
lands plus connectivity of both uplands + wetlands
to other nearby preserves such as Hal Scott, TM-Econ
Mitigation Bank, Lake Lizzie Preserve, Lake Preston +
Lake Conlin

Our family is glad you are taking our perspective into consideration. Thank you for listening!

We are ~~as~~ voting for the Split Oak MINIMIZATION ROUTE - including ① full restoration of these lands to match the quality of Split Oak ② ongoing maintenance of these lands & ③ connectivity of the Uplands & wetlands to nearby preserves.

This is important not only for nature - habitats, ecosystem, but also for the mental health of our family to have nature that is minimally disturbed. This is valuable for us & a significant reason we make our

Happy to see your preferred (mitigation) plan for Osceola Parkway Extension avoid harm to the animal breeding ground and wetland on 5900 Cymil's Dr.

VERY NB:

- ① Ensure critter crossing link up to breeding ground/wetland for animals
- ② Ensure lights and Noise barrier for people and animals through ^{extreme} Split Oak Section
- ③ Use part of Split Oak on ^{western} ~~eastern~~ Cymil's Dr Side for education purposes i.e. schools, ^{university nature experiences/education}

(Please continue comments on the back of this page if more space is needed.)

I would prefer Split Oak Minimization route with a full compensation pkg. If CFX chooses to go through Split Oak, then this route makes more sense bc it is wrong to put roads through conservation lands! We have plenty of wildlife and green space and I'm so tired of seeing our green space taken away by road, businesses, apartments, & houses.

Make proper use of our land. Give us parks, houses with 1.5 acres - 1 acre lots and quit taking away our green space!

I live in Lake Nona for 30 years, have spent over \$150,000 dollars in Property taxes, to live in Osceola County. I want the split oak minimization Route or my number one choice is the CFX preferred.

The cost of the road turning and winding will cost twice as much as a straight road. All the noise and congestion will make it another I-4.

Also split oak is not a scrub Jay Habitat as the split oak people say.

The split oak minimization route seems to have less impact on conservation lands, though neither route is optimal!

Notes:

- the conservation lands should be restored to match the quality of Split Oak

- the conservation lands should be continuously maintained

- all of the wetlands should be connected (TM Ecan Mitigation Bank, Lake Lizzie Preserve)

I am a resident of Lake Ajay Village and advocate for the Split Oak Minimization route with its associated 10:1 land swap from Tavistock & Desert Ranch. We in Lake Ajay Village want the Expressway to be built as far from our homes as feasible, due to the associated light, air, & noise pollution. The Split Oak Avoidance route is within 1000ft of some of our homes and would bridge over a canal very near us, allowing noise & light pollution to travel even further leasier down the canal to our homes. Our neighborhood has been around since 1979 and enjoyed a quiet, peaceful existence for decades. We mourn its loss.

Project Development & Environment (PD&E) Study Re-evaluation

PUBLIC WORKSHOP

CFX Project No.: 599-223

Lake Nona Middle School

13700 Narcoossee Rd., Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE:

11/19/2019

I request "Split Oak Mimicization Route" with Full Compensation including:

① Full restoration of these lands to match the quality of Split Oak.

② Ongoing Maintenance of these lands.

③ Demand Connectivity of both uplands and wetlands to other nearby preserves such as Hal Scott, Lake Lizzie & Lake Preston.

(Please continue comments on the back of this page if more space is needed.)

I am a resident of Isle of Pines Community at the end of Lake Mary Jane Rd. I am putting my comments in favor of the "Split Oak Minimization Route" only if it includes the following:

a) Full Restoration of these lands to match the quality of Split Oak.

b) Ongoing Maintenance of these lands

c) Plus Connectivity of both uplands and wet lands to other nearby preserves such as Hal Scott, TM-Econ Mitigation Bank, Lake Lizzie Preserve, Lake Preston, & Lake Conlin

(Please continue comments on the back of this page if more space is needed.)

After talking to Mary at the (middle school) meeting it appears that the split oak minimization option route with full compensation package is a good compromise option to maintain a large area of wildlife area, add 1500 acres and not displace any existing residential citizens. This should include operating maintenance of lands and connect both uplands and wetlands to other nearby preserves such as Hal Scott, Lake Lizzie & Lake Proctor.

PUBLIC WORKSHOP

CFX Project No.: 599-223

Lake Nona Middle School

13700 Narcoossee Rd., Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: 11/19/19

We have lived in our house for 25 years and
we knew there was going to be growth.
However, the growth that has happened isn't
well thought out. When you make a left
onto Narcoossee off Moss Park it takes 15 to 30
minutes to get to 417 (1/6 of a mile) The country
life and wildlife is going disappear.

If I have no choice but to pick a path,
I choose Figure 1. I wish it would be further
away from Isle of Pines.

★ Split Oak Minimization route with a full
compensation package

I live in the ISLE OF PINES AND AM VERY
concerned on this development. I would love to
see full restoration, minimization of the split OAK
ROUTE. I AM ALSO concerned about the wildlife
that is being pushed into this part of the country.
The traffic is absolutely terrible due to lack
of growth planning. I would like to see connectivity
of the Uplands and wet lands around Hal Scott, Lake
Lizzie and Lake Preston.

DATE: Nov. 19

I approve the Split Oak Minimization Route with a full compensation package. I believe it to be the best option. Include full restoration to match quality of Split Oak, land maintenance, and connectivity of uplands, ~~wet~~ wetlands and nearby preserves.
I'm hoping you are in complete agreement.

I am a resident of Lake Ajay Village. When Orange County decided to preserve the land now known as Split Oak Forest, our neighborhood was already built. That decision should not have been made without a plan for future growth. It is not right that our neighborhood should be negatively impacted because of this poor planning. I urge the committee to select the Split Oak Minimization Alternative, to reduce the impact on our neighborhood. Please do NOT consider the Split Oak Avoidance.

I AM IN FAVOR OF THE SPLIT OAK MINIMIZATION ROUTE THAT IMPACTS 160 ACRES ON THE S.W. CORNER OF SPLIT OAK. THE ADDITION OF THE 1530 ACRES OF CONSERVATION LAND GIVES SPLIT OAK, MOSSDAK & 1/2 OF PINES PRESERVE A BUFFER AND THE EAST CONSERVATION LAND THAT PROTECTS THE ROBERTS ISLAND SLOUGH WHERE HUNDREDS OF BIRD ISLAND NESTING WOOD STORKS + IBIS FEED EVERY DAY AT THE SLOUGH. THE RESTORATION AND MAINTENANCE OF THE CONSERVATION LANDS IS ALSO VERY IMPORTANT. THE Gopher TORTOISE RELOCATION PROGRAM IS ALSO VERY IMPORTANT TO US AS THEY ARE DISAPPEARING.

RE: Osceola Parkway Extension impacts on Split Oak Forest Wildlife and Environmental Area

Dear Ms. Reeves:

On April 16th I presented the attached PowerPoint presentation to the Osceola County Commission. This presentation was made to the CFX board earlier in March. This letter is to update and confirm the points in that presentation, and to provide some additional detail regarding that presentation.

Audubon Florida strongly advocates against impacts to conservation lands. Fortunately, in most cases, intrusions into, or incompatible uses of conservation land acquired by the State of Florida under such programs as Preservation 2000 and Florida Forever are foreclosed by the transfer of title or easement rights to the state or allied agencies, such as Osceola County. In those cases, agencies holding title or easements protecting conservation lands can “just say no”.

However, in the case of “linear facilities”, Florida law and the policies of the Trustees of the Internal Improvement Trust Fund (Division of State Lands, Florida Department of Environmental Protection) allow the consideration of linear facility crossings of conservation lands, including public transportation corridors under certain circumstances. These policies in state law can be found, for example, in Section 704.06 (11) Florida Statutes, and in Section 62-818.015 Florida Administrative Code. Our practice is to attempt to achieve avoidance and/or minimization of impacts from such linear facilities, and then to advocate “net positive benefit” compensation and mitigation for the impacts of such facilities when avoidance is not practical.

The exact route for the Osceola Parkway Extension will be determined by the Central Florida Expressway Authority (CFX) through its new PDE study which is now ongoing. The costs of the necessary compensation land acquisition, restoration and management to offset impacts to Split Oak will need to be weighed in the PDE study against the additional right of way acquisition costs and other costs associated with routes studied that go around Split Oak. In order for the PDE comparison between alternative alignments to be fair, it is important

to advance at this stage the full scope of necessary land acquisition, restoration, mitigation, and other compensating costs associated with a Split Oak crossing so that the costs of a route outside Split Oak can be compared on an equal footing.

Should CFX determine that it is necessary to cross the Split Oak Forest Wildlife and Environmental Area (Split Oak), i.e. "no reasonable alternative" pursuant to 62-818.015 (1) (a), the 1A alignment would present a "least impact" scenario compared to previous routes under consideration that would cross Split Oak. The 1A alignment across the southwest corner of Split Oak would impact approximately 160+- acres, or somewhat less than 10% of the Split Oak conservation tract. The previous alignment chosen by the Osceola County Expressway Authority on April 11, 2017 (E-5A2B) would have impacted over 50% of Split Oak, in both Osceola and Orange Counties, and would have precluded the practice of prescribed fire management on more than a square mile of conservation lands.

As was emphasized in the attached PowerPoint presentation, ***"Crossing part of Split Oak, even on the 1A alignment, should only be considered if CFX is willing to commit to a compelling package of compensation lands, and securely funded restoration & management which will result in net positive benefit to conservation lands."***

In my view, the minimum requirements for an acceptable compensation/mitigation package to offset the 160+- acres of impact on Split Oak for the 1A alignment would be:

(a) Acquisition of 1,500+- acres of buffering conservation lands to be added to the Split Oak, Moss Park, Isle of Pines Preserve conservation lands in Osceola and Orange Counties. This acreage includes all the lands shown on the map in the PowerPoint. Now that Tavistock and Osceola County have agreed to relocate the Regional Water/Sewer Plant, the 60+- acres of scrub in the former regional water/sewer facility site will also be included in these compensation lands. As I understand the compensation land proposal at this juncture, Tavistock will be conveying approximately 538+- acres of land in Osceola County to become part of Split Oak Preserve, including the 60+- acre scrub that is part of the former utility plant site. I understand that the suggestion of "switching sites" for the utility plant within the compensation land area contained in the attached PowerPoint has now been superseded by a new plan to move the utility plant entirely out of the compensation lands. This nets an additional 60+- acres for the compensation lands. CFX will need to acquire by purchase 33+- acres in Osceola County and 945+- acres in Orange County. The compensation lands should be viewed as providing two types of benefits to offset losses in Split Oak; (1) immediate benefits assignable to those portions of the compensation lands that have significant, existing, intact ecological communities and wildlife habitat and (2) long term benefits as disturbed areas within the compensation lands are restored and converted back to longleaf pine forests.

(b) Out of the 160+- acres impacted by the 1A alignment in Split Oak, approximately 125+- acres consist of very high quality upland longleaf pine

habitat. (Note, that while the Osceola Parkway footprint would impact 66+- acres directly, we consider the 94+- acres of Split Oak to the south and west of the 1A alignment which would be severed from the main tract to be negatively impacted.) It is clear from evaluations of the proposed 1,500+- acres of compensation lands that a substantial portion of the uplands are previously disturbed by agriculture. Some of the highest value and least disturbed uplands in the entire compensation land package are the scrub acreage within the former 60+- acre regional water/sewer plant site. Other moderately high value longleaf pine uplands exist just east of the wetlands along the SFWMD canal transecting the compensation land, with approximately 100+- acres of moderately high quality upland at that location. Those uplands will need continuing prescribed fire management, as will the 60+- acre former water/sewer plant site.

(c) The remainder of the compensation land uplands (particularly those in the eastern portion of the Osceola compensation lands and all of the Orange County compensation lands) will require significant restoration and management funding to transform them, over time, into habitat that approaches the quality of that impacted within Split Oak. This restoration will entail fire management and thinning and perhaps longleaf pine seeding on the 109+- acres adjacent to Lake Mary Jane Drive, reforestation with longleaf pine and suitable understory species of the open pasture land and reforestation after clearing and restoring surface contours on the old orange grove areas east of Isle of Pine Preserve. Aggressive removal and management of exotics including cogongrass and Lygodium will be required on the Orange County portions of the compensation lands.

(d) The final determinations on how much restoration/management funding is needed, and the exact metrics of the restoration and exotic plant control measures will be made by FWC and the Florida Communities Trust (FCT), and the Acquisition and Restoration Council (ARC). My initial "guesstimates" based on similar sized restoration efforts are that there would be at minimum \$2,000,000 to 3,000,000 in initial restoration cost, followed by an ongoing \$100,000 - \$300,000 annual management cost need for a period of at least 20 years. CFX, as the roadbuilding agency, would be expected to bear these restoration and management costs, with any resulting mitigation credit value being used to offset anticipated CFX mitigation needs associated with the construction of the Osceola Parkway Extension Project. It may also be possible for Tavistock's contribution of land and possible funding of these restoration efforts to result in some mitigation value to offset mitigation requirements for the Sunbridge project; Determinations about the applicability and appropriate nature of mitigation will be made by permitting agencies (DEP, SFWMD, and USACE). It should be noted that because the Florida Fish and Wildlife Commission (FWC) contributed gopher tortoise mitigation funds to the acquisition of Split Oak, and holds conservation easements, and because the Florida Communities Trust and Osceola County executed restrictive covenants at the time of the purchase of Split Oak, FCT, FWC and ARC will exercise the final determination of the adequacy of compensation lands and restoration funding in both instances, and additional funding will be required to assure proper steps to relocate protected gopher tortoises from lands impacted by the Osceola Parkway extension on the 1A

alignment through Split Oak. If additional compensation lands beyond those outlined above are deemed necessary by FWC/FCT or ARC we recommend that the acquisition of conservation easements over the Krichman Foundation (Conlin Lake X, ranked # 4 on the 2017 Florida Forever Less-than-fee list) be given priority consideration.

(e) In addition to actual habitat value (either immediately provided or restored over time) the 1,500+- acres of compensation lands will provide important buffering protection to the existing conservation lands within Split Oak, Moss Park, and Isle of Pines Preserve. At present, the approved Northeast District Element, adopted by the Osceola County Board of County Commissioners August 16, 2010, provides for 1,700,000 square feet of Office Park, 1,000,000 square feet of Industrial, 80,000 square feet of commercial, and 120,000 square feet of Civic development in the "Northwest Special District" area designated in the Element. A majority of the Northwest Special District is located within the proposed compensation land tract just east and south of the Split Oak Preserve boundary. In addition, portions of the UN-4 and EN-1 neighborhoods including both single and multi-family residential development, along with one Neighborhood Center are located within the proposed compensation land tract up to the boundary of Isle of Pines Preserve. In Orange County, most of the uplands located within the compensation lands are designated as Rural in the comprehensive plan and applicable zoning. This would generally allow low density residential at 1 unit per 10 acres. Even without comprehensive plan or zoning changes to increase densities in Orange County (which could occur at any time in the future), current land use and zoning would appear to allow approximately 40 estate type residential units to be built, many directly abutting the eastern boundary of Isle of Pines Preserve. Development at this scale along the boundaries of Split Oak, Moss Park and Isle of Pines, (particularly at the intensities allowed in the Northeast District Element in Osceola county) would have profound long term impacts on the adjacent conservation lands, including increased difficulty in conducting prescribed fire management which is essential to maintain longleaf pine and scrub, and other upland vegetative communities and associated bird and wild animal habitat. A distinct advantage of a plan which would exchange acceptance of a 160 acre impact within Split Oak to facilitate the 1A alignment for the proposed 1,500 acres of compensation land would be to extinguish these development threats along approximately 4 miles of the boundaries of Split Oak, Moss Park and Isle of Pines Preserve.

(f) With regard to the 94+- acres of Split Oak Preserve which would be severed from the main tract and located south and west of the 1A alignment, those lands should remain in the ownership of Osceola County for conservation land/public park purposes. The severed lands will have residual conservation land value, even though their ecological value will be diminished due to the lack of a practical ability to manage by prescribed fire. The design of the transportation corridor located within the 66+- acres constituting the 1A alignment should include wildlife crossings and a suitable short bridge section spanning the Florida Trail. Other trail and passive recreation uses of the severed land, deemed compatible by Osceola County, FWC, FCT and ARC may be possible.

(g) If CFX determines through the PDE process to recommend to crossing Split Oak on the 1A alignment, and the compensation land package discussed above is implemented, the result will be an increase in the size of the complex of conservation lands consisting of Split Oak, Moss Park, and Isle of Pines Preserve from the current 4,016+- acres to a new total of 5,450+- acres, even considering the loss of 66+- acres to road corridor on the 1A alignment. Regarding Split Oak standing alone, 66+- acres will be lost to road corridor, and 94+- acres will be severed and relegated to significantly reduced management potential for longleaf pine uplands; however, presuming that all of the Osceola County compensation lands are added to Split Oak, this tract will increase by approximately 505+- acres, and the acreage of scrub that can be protected and managed on Split Oak will more than double in size. Approximately 4 miles of the boundaries of Split Oak, Moss Park, and Isle of Pines Preserve will also be protected from future development impacts.

(h) As we move forward in discussions with the working group at CFX, consideration should be given to finding ways to secure wildlife corridor linkages associated with Split Oak, Moss Park and Isle of Pines preserve relating to the Northeast District in Osceola County and ultimately the North Ranch Sector Plan.

In conclusion, it is extraordinarily difficult to consider a road corridor through any part of Split Oak. Yet, when the previous April 2017 PDE study by the Osceola County Expressway Authority analyzed a route that would have essentially gone around the southern end of the tract, the cost analysis of that route determined that it would exceed the cost of a route through Split Oak by more than \$200,000,000.00. Those costs were primarily due to right of way expenses necessitated by taking land within several fully entitled subdivisions. While it is not certain exactly what the final costs of the alternative routes in the ongoing CFX PDE study will be, it is easy to anticipate that an alternative route that totally avoids Split Oak will cost out in the same range. For this reason, it seems likely that there will be a "no reasonable alternative" determination pursuant to 62-818.015 (1) (a). It is hoped that FTC, FWC and ARC will demand assurance that the impact of the 1A alignment on Split Oak is compensated by actions that result in a compelling net-positive benefit to Split Oak and adjacent conservation lands. I hope that you will require compensation that is at least as robust as that outlined above and in the attached PowerPoint.

Sincerely,

Charles Lee
Director of Advocacy

13700 Narcoossee Rd., Orlando, FL 32832
Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: 11/19/19

In favor for the ~~split~~ Split Oak Avoidance rather than
the Split Oak Minimization plan.

If the minimization plan has to go through build the road
on stilts so there is less impact on the land and the
animals.

I Am opposed to the taking, for any reason
of established conservation land for roads.

If this is to happen, the so minimization
Alt., the land trade off should be 10 acres
given to 11 one taken. That is one way
people might accept this intrusion.

Split Oak Forest is a jewel in a hellhole
of development. Expand it, don't diminish it.

I DISAGREE WITH SPLIT OAK ALTERNATIVE, WE DONT NEED ANY MORE TOLL ROADS.
WE NEED TO STOP TAKEING ARE CONSERVATION LANDS FOR OTHER USE, WE NEED TO FIX
THE ROADS WE HAVE, WE NEED CONSERVATION LAND TO BUFFER GROWTH AND QUER
POPULATION. CFX SHOULD NOT BE ALLOWED TO TAKE CONSERVATION LANDS
FOR THERE PROFIT, ANY LAND DESTROYED DURING CONSTRUCTION NEED TO BE PUT
BACK TO THE WAY WAS WHEN FINISHED.

I live in a home built by my husband and myself.
Our property is immediately adjacent to the Orange/Osc. Coline
so the proposed road will be just a few feet from our house. This
is a huge negative change in our life style & neighborhood in
a house we've lived in for 30 yrs. I need to talk to someone
about a noise barrier = wall 20' high.

We would be amenable to talking with someone
about selling our property to CFX for a parcel
adjacent to roadway. Our property abuts Jim Branch Crk.
there is a parcel shown on N side of new expressway. It
could be flipped to south side if you buy us out.

while I understand the need for more roads, it saddens me to watch some of the last natural areas in the region go to waste for this road. My kids have grown up with deer in the backyard and bald eagles flying around the prairie. Our backyard overlooks the orange/osceola line, and if the developers get their way we'll be looking at a highway. Wake up developers! You've taken everything natural from this area!

with that said, if you go through with the road, please provide the residents along the county line a wall at the max size. It's the least you can do for ruining our quiet enjoyment!

My house and property is immediately adjacent to proposed road. I want ~~to~~ a noise barrier installed along my property line because my house is only 15-20 ft from Orange Co. The road should be elevated to go over the Tim Branch creek. Engineers confirmed that the elevated road would reduce noise impact to our home. Elevated road includes 3' concrete barrier at ground level. Buffer needs to be installed - Aberron w/ noise proof vegetation and concrete wall. The creek needs to be protected with retention ponds. My property is on S side of proposed road. I might be interested in options to use property for roadway/pond. We originally purchased property 800' off paved road to eliminate noise & traffic impacts. Adding expressway next to house is

Deer height fencing needed for road as it traverses Split Oak Park. Many deer live here as well as other wild life. The area is a preserve and there will be serious wild life destruction if their access to the road is not prevented. It will also be dangerous to the driving public as deer venture out to feed at dawn and dusk - times of limited visibility for drivers. Deer are known to jump and run when startled - not always in a "safe" direction. A under-road crossing for wild life is good, but not sufficient in

Split Oak has a large number of deer, my concern is that if there are high barriers in place there will be accidents.

The increased noise levels will have an adverse effect on all wildlife in the area without sound barriers. In split oak park there are 3 ponds, I am also concerned with water contamination from water runoff from ~~the~~ highway.

CFX Project No.: 599-223

Lake Nona Middle School

13700 Narcoossee Rd., Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: 11-19-19

Hi:

I would like to request a sound barrier be placed on the south side near the Fells Cove area. Obviously the new construction closest to the proposed route has the best argument for constructing the barrier given that their neighborhood immediately borders the route. But, having lived next to freeways for many years in other cities without such barriers for sound, I can attest that the noise carries well over one mile away. To me it would seem prudent to have sound barrier walls on everything west of Narcoossee.

Each Summer when the seed pods on the magnolias ripen I have a family of large $1\frac{1}{2}$ ft high red headed woodpeckers that fly out of the split oak pane to eat the seeds so if the road goes through any part of the park need to be high enough to allow the birds to fly under the roadway or bring to the south out of the park, and over my home so I can get out of the Rat Race

We need to consider our future generations when roads are built in order to benefit developers. Taking my grandchildren to the Split Oak Forest is one of the most rewarding experiences that they have in recent times. For them to be in close contact with nature i.e. animals, vegetation, beneficial insects (bees) is creating conscience in their place to conserve the environment.

* Split Oak Avoidance Alternative is the most appropriate if we care about our environment. We should not just cater to developers

I SUPPORT THE "SPLIT OAK MINIMIZATION ROUTE IF & ONLY IF IT INCLUDES THE FOLLOWING

- FULL RESTORATION OF THESE LANDS TO MATCH THE QUALITY OF SPLIT OAK.
- ON GOING MAINTENANCE OF THESE LANDS
- Connectivity of both uplands & wetlands to other nearby preserves such as HAL SCOTT, TM-ECON MITIGATION BANK, LAKE LIZZIE PRESERVE, LAKE PRESTON + LAKE CONLIN.

I amⁱⁿ favor of the CFX Board selecting the "Split Oak Minimization Route" with Full Compensation to include

- A - Full restoration of these lands to match the quality of Split Oak.
- B - Ongoing maintenance of these lands, and
- C - That these lands have connectivity of both uplands and wetlands to other nearby preserves such as Hal Scott, Lake Lizzie & Lake Preston.

I am in favor of the Lake Nona Alternative to the West end of the project.

I prefer the split oak "Minimization Route"
-The community and the state of Florida will
be way better served with the additional
1500 acres that will be donated if this plan
is approved. The split oak avoidance route
is beneficial to a very small special interest
group that does not benefit the larger
community and natural environment.

My Family built our custom "forever" home in the Lake Ajay Village about five years ago. We could not be more pleased at the beautiful sense of community along with the serene atmosphere in this neighborhood. This Community is a dying breed in this area as new construction continues developing cookie cutter neighborhoods while destroying all the natural environment during the development. We should be saving the older neighborhoods like ours who embrace our trees and wildlife and not destroying it. "Save our beautiful Lake Ajay Village!"

Hard development of residential and commercial use is ~~chasing~~ choking the natural habitat that has made Florida so appealing to humans as well as our wildlife, which is being choked and squeezed to near existence. Undoubtedly, progress must be made, BUT not to the peril of making our neighborhoods nothing more than concrete. We note for the Split Oak minimization route, the alternative doesn't make sense to preserve what is left in these areas.

I support the Split Oak Minimization route of the 2 options now on the table. Even with Minimization the road will come very close to some of our residents. We have enjoyed a quiet, street light free neighborhood for over 40 years. The road will still change this quiet and peaceful area. We realize change will happen, so we are supporting this option. Also Lake Aya Village existed long before Split Oak.

I am a resident of Lake Nona Village, a development established in 1978 - many years before the creation of Split Oak Conservation Land.

We understand that our neighborhood will be impacted by both of the two remaining candidates. However, the Split Oak Avoidance Route will have extreme detrimental impact on our quality of life & health, ~~and~~ due to associated noise, air, and light pollution.

I strongly urge the CFX to vote for the Split Oak Minimization Route which will have a less detrimental impact on L&V while SIGNIFICANTLY enlarging and

improving the Split Oak Conservation Area. This is as close to a win-win as possible in such a massive program

I support the Lake Nona Alternative as it moves the road where the majority of development is/will continue occurring. I am apposed to any impact on public lands/conservation lands purchased with public funds to be preserved in perpetuity. Violation of public trust and proof that money/big developers have usurped the ideal of democracy in this country. Since you will do it anyway, the Split Oak minimization Alternative is the "lesser of the evils" only if the entire roadway is elevated by bridge (not berm) to minimize impact to the wildlife + ecology of the area. 2 attachments (2 MB) Download all

Patricia Catello lives in Rustic Acres, a neighborhood heavily impacted by Tavistock developments. Across Boggy Creek Road from their house, behind a tall fence, "Tavistock Neighborhood N7 is being cleared. The tree with the working eagle nest disappeared overnight. Peering over the fence the Catellos watched the dredge and fill of pond and wetlands. They took a look because wildlife in increasing numbers have been fleeing into or over their yard, turkeys and deer and hawks. They began trapping or saving what they could: 17 armadillos, 5 raccoons, 4 possums, two owls, a gopher tortoise. What they could trap, they took to the only place left where these animals could live: Split Oak Forest. The Catellos want to see the road avoid Split Oak Forest. They are thinking of moving.

Subject: Project Development & Environment (PD&E) Study Re-evaluation: CFX Project No. 599-233 -
Osceola Parkway Extension Route

Dear Ms. Brooks and Governor DeSantis,

We thank the staff of the Central Florida Expressway Authority (CFX) for holding numerous public meetings and responding to the input of local residents and stakeholders.

The undersigned organizations are providing our comments and recommendations regarding the alternative routes presented at the November 18, 2019 EAG and November 19, 2019 Public Hearing.

Let us be clear – we advocate for the preservation of Florida’s natural lands because of the vast public benefits that they provide. We do not support the “mitigation” of mitigation lands purchased and preserved with tax-payer dollars, nor do we support the continued destruction of Florida’s natural lands, rural landscapes and rural way of life.

Florida is losing 10 acres of rural and natural lands per hour to development, as indicated by the *Florida 2070* report (1000friendsofflorida.org/florida2070).

We are concerned about the total costs to the citizens of Florida of the proposed highway. Those costs include the loss of homes, public healthcare, quality of life, investments in the acquisition and management of Split Oak Forest, and the ecosystem services it provides. Ecosystem services include the benefits that people derive from natural lands (our water supply, clean water, healthful recreation, food and habitat for pollinators and wildlife, flood control, carbon sequestration, aquifer recharge, climate moderation and seed banks that harbor the genetic diversity needed to sustain plant populations and natural communities).

Covering what remains of rural Florida with the high-density development that will soon follow the building of major highways will not provide long-term benefits to our citizens. Instead, a few large private landowners will benefit as the public continues to bear the full costs.

For these reasons, we advocate for a “no build option” and here we recommend an alternative. We recommend that the CFX partner with Orange County Government to expand the proposed footprint of

the proposed Sunbridge Parkway to include space for public transit, as has been proposed in the Osceola Parkway Extension Route, CFX Project No. 599-233. We believe that the expanded "footprint" of the Sunbridge Parkway could be developed in such a way as to avoid the impact to homes and publicly-protected natural lands that you have identified in the Alternative Recommendation for the Osceola Parkway Extension Route.

Respectfully,
Becky Ayech
President
Environmental Confederation of Southwest Florida

Comments:

Full restoration to match the quality of Split Oak. Ongoing maintenance of these lands. PLUS Connectivity of both uplands and wet lands to other nearby preserves such as Hal Scott, TM-Econ Mitigation Bank, Lake Lizzie Preserve, Lake Preston and Lake Split Oak Minimization Route with full compensation including a) full restoration of these lands to match the quality of Split Oak b) Ongoing maintenance of these lands c) demand connectivity of both uplands and wetlands to other nearby preserves

I would like to request the Split Oak Minimization Route with full Compensation including: a) Full restoration of these lands to match the quality of Split Oak b) Ongoing maintenance of these lands c) Connectivity of both uplands and wetlands to other nearby preserves
I am in favor of the Split Oak minimization route.

I want the split oak minimization route.

Just need to get something done-as normal our government has the cart before the horse

I support the split oak minimization route to protect 1500 acres of conservation land.

Remember, when president Eisenhower passed the interstate act back in the 50s, the emerging road system tore through many forests and people's "backyards" as long as developers continue to build homes and central Florida continues to grow, we

Figure 1 split oak minimization plan with full restoration of these lands to match Ongoing maintenance of these lands Plus connectivity of both upland and wetlands to nearby preserves

Prefer split oak minimization option with a full compensation package including full restoration of these lands to match quality of split oak; ongoing maintenance of these lands; plus connectivity of both uplands and wetlands to other nearby preserves

I support the Split Oak Minimization route only if it includes the following: A- full restoration of these lands to match the quality of split oak B- ongoing maintenance of these lands C-plus connectivity of both uplands and wetlands to other nearby preserves

I support Th Split Oak Minimization Route only if I included the following: A- Full Restoration of these lands to match the quality of Split Oak B- Ongoing Maintenance of these lands C- Plus Connectivity of both uplands and wetlands to other nearby preserves
