**OSCEOLA PARKWAY EXTENSION** 

Fall 2019

#### STUDY HISTORY

The Osceola Parkway Extension has been identified as a need in several local, long-range plans and master plans. The former Osceola County Expressway Authority (OCX) completed a Project Development and Environment (PD&E) Study in May 2017 for the Osceola Parkway Extension and presented a recommended alternative. (*Figure 1 on back*)

The Central Florida Expressway Authority's (CFX) enabling legislation (Senate Bill 230, Ch. 2014-171) incorporated the parkway extension and other portions of the OCX 2040 Master Plan into the CFX 2040 Master Plan. In 2018, CFX completed a Concept, Feasibility, and Mobility Study for the Osceola Parkway Extension after evaluating a number of alternatives and concluded the project is viable under CFX criteria.

#### STUDY UPDATE

CFX has been re-evaluating the OCX PD&E Study recommended alternative as well as considering other alternatives. The input provided through public outreach, including stakeholder meetings, site tours and advisory committee meetings held during CFX's Concept, Feasibility, and Mobility Study, has been a major component of CFX's PD&E Study Re-evaluation. In addition, the study team has continued to conduct stakeholder meetings to gather further feedback in preparation for a recommended Preferred Alternative.

CFX conducted an extensive analysis of the social, environmental, cultural, and physical impacts of potential alternatives. Of the four evaluated alternatives, two on the west side and two on the east side of the corridor, the recommended preferred alternative (*Figure 2 on back*) results in the least social impacts.

#### **PROJECT GOALS**

The goals of the proposed 9-mile, limited-access facility include:

- providing for additional east-west routes within the project area,
- enhancing mobility of the area's growing population and economy,
- relieving congestion on local roads,
- providing for the incorporation of transit options and;
- promoting regional connectivity.

Project Development and Environment Study
Osceola Parkway Extension Re-Evaluation
November 2019

# Proposed Typical Section

# Working Group Requests &

# Considerations for Commitments

Relocate water treatment plant.

Move alignment farther south and west to:

- + Lessen loss of good habitat
- + Distance it from scrub jay area
- + Protect ability to manage land by prescribed burns

Ensure access to the Florida National Scenic Trail through the corridor and Moss Park.

Have reputable land trust or government agencies hold conservation property and restrict its future use through recorded conservation easements.

Prevent third-party conservation offer from diminishing Tavistock's and Deseret Ranches' mitigation requirements.

Provide matching acreage for the mitigation credits that were sold for gopher tortoise habitat.

Ensure dedicated land is of high quality to replace SOFWEA land impacted by roadway.

Incorporate the 102-acre pine area off Lake Mary Jane Road into the conservation picture.

Ensure the floodplain compensation area does not affect quality lands and does not destroy habitat.

Break down uplands and wetlands in both impact area and remainder for each alternative.

Assure linkage of Split Oak, Moss Park, Isle of Pines Preserve and the newly dedicated lands to regional wildlife corridors.

Provide adequate funding for restoration and management dedicated land to ensure that impacted portions are returned and maintained as high quality habitat.

RE: Greenways and Trail Underpasses and/or Land Bridges on CFX Projects in Lake/Orange/Osceola

Dear Ms. Putnam:

On behalf of the Florida Greenways & Trails Foundation (<a href="www.FGTF.org">www.FGTF.org</a>), I am writing to request that the Central Florida Expressway Authority include underpasses and/or land bridges on all future expressway projects in the central Florida area.

As you are probably already aware, the Office of Greenways and Trails in the Department of Environmental Protection has prepared and maintained an <u>Ecological Greenways Map</u> for Florida that attempts to determine the critical landscape linkages necessary for the future of wildlife mobility and migration. These maps were developed to provide local government officials and planners information on corridors of greatest significance in order to minimize the detrimental impacts on native wildlife caused by major public projects such as roads and expressways.

Research has clearly demonstrated that careful placement of land bridges over roads and/or elevated passes under roads dramatically improves the ability of wildlife to move in search of food and habitat. Land bridges and elevated underpasses also dramatically improves highway safety by minimizing vehicle and wildlife collisions. Two such land bridges exist on major Florida interstates: I-75 near Ocala/Marion County (connects the Cross Florida Greenway) and I-95 in Flagler County (connects the Florida Agricultural Museum to historic Princess Place Preserve).

These greenway corridors for wildlife also provide excellent opportunities for public trails, both unpaved hiking and paved bicycling trails. (Both wildlife and people have the safe issue: the need to cross roads and highways safely, and without loss of life.) Multiuse greenways for wildlife and trails for people are very compatible, and should be incorporated in regional transportation projects.

Although more research is needed to accurate determine both the "best locations" for wildlife crossings as well as the frequency and size of both elevated underpasses and/or bridges, experience has shown that these facilities are much less expensive and more effective if planned and built simultaneously with the expressways.

The Florida Greenways & Trails Foundation encourages CFX to budget funds and conduct this research as part of the planning process, as well as incorporate elevated underpasses and/or land bridges as needed to prevent the fragmentation of the largely rural landscapes to be affected by the proposed expressways.

Sincerely yours

W. Dale Allen, President

Florida Greenways & Trails Foundation

#### FWC Statement to the Osceola Parkway Extension Environmental Advisory Group November 18, 2019

Perpetual conservation easements are an important tool for conservation, and release of a perpetual easement requires a thorough evaluation of the mitigation package being proposed in exchange.

Any alternative alignment that does not completely avoid Split Oak Forest Wildlife and Environmental Area requires FWC to consider modifying the conservation easement we hold over Split Oak, and we will need to consider the extent of state resources that have been spent managing Split Oak to date.

While the Split Oak Avoidance Alternative remains our preferred alternative for conservation, we recognize the significant implications this represents for the communities affected by this alignment.

The Split Oak Minimization Alternative offers an exchange of a 160-acre loss of Split Oak for an approximately 1,550-acre addition to regional conservation lands. A small portion of the addition is of similar habitat type to Split Oak; while much of the rest consists of wetlands.

The proposed easement exchange provides nearly a 10:1 mitigation ratio for release of the portion of the conservation easement impacted by the extension project. The ratio of uplands gained to uplands released from the easement is approximately 4:1; however the upland acres within the proposed addition are in need of restoration and management.

Modifying perpetual conservation easements to reduce the encumbered acreage is not a good precedent to set for conservation and mitigation programs; however, with the substantial offset ratio being proposed, we agree it is beneficial to continue discussing the mitigation, permitting, restoration, and management options associated with the Split Oak Minimization Alternative.

November 18, 2019

Osceola Parkway Extension Environmental Advisory Group

Subject: Split Oak Forest Wildlife and Environmental Area (Split Oak)

On behalf of the League of Women Voters of Orange and Seminole Counties, we continue to support routing the proposed Osceola Parkway Extension around Split Oak to protect Florida Forever conservation lands. The current proposal for a road through Split Oak violates the clear language of our Constitution and ignores the mandate of our citizens who voted to amend our Constitution to protect our Florida Forever conservation lands.

This letter reiterates our continued opposition to proposals that include appropriating Split Oak conservation lands and summarizes our reasons which are explained in a February 15, 2018 letter to the Central Florida Expressway Authority and a second letter dated July 9, 2018 to the Boards of Commissioners of Orange and Osceola Counties, the Florida Communities Trust, Rita Ventry and the Central Florida Expressway Authority. Those letters are attached.

Our constitution explicitly protects conservation lands in Article X, Section 18. The voters overwhelming approved this provision in 1998. This constitutional provision prohibits getting rid of Florida conservation lands unless they no longer have conservation value – that is the only basis for changing the use of land that has been acquired for conservation purposes in Florida. This provision was approved by the voters because everyone at the time recognized that pressures for development threatened our unique Florida Forever lands, because short-term, often economic, objectives overlook long term impacts. Protection of our Florida Forever lands requires a long-term perspective.

This current attempt to circumvent the will of the voters and violate our Constitution is not the first attack on conservation lands. The State tried to sell off many of these lands in 2013 by declaring them "surplus." These lands are also a target for infrastructure development because they are already owned by governmental entities, and therefore are seen by some as a less expensive way to build something now in spite of the fact that the governmental entities involved promised to protect this land when they asked for public funds to create conservation lands. The League has consistently opposed these efforts and opposes any proposal through Split Oak for the same reasons.

Split Oak was created in 1992 with the intent and understanding that it would be used for conservation purposes indefinitely, with both Orange and Osceola counties declaring that designating this land was consistent with their growth management plans. All of Split Oak is currently being used for conservation. The Fish and Wildlife Conservation Commission has

confirmed this in its most recent 5-year study. In addition, much of Split Oak is being used as mitigation credits for environmental impacts created elsewhere.

Proposals for exchanges of land – giving away some current conservation land in exchange for other land to be designated for conservation – are not permitted by our Constitution. Our Constitution says the only way to dispose of conservation land is when it no longer has conservation value. While some people may think there should be some exceptions to the prohibition against getting rid of some conservation land, that is not what is currently the law of Florida. In fact, the constitutional amendment was specifically proposed *because* of the pressure to change the use of these lands – to protect past achievements from unraveling and to assure the public that these lands will not be sacrificed in the future. Exchanges only create uncertainty for all conservation lands. It is important for protection of sensitive ecosystems and threatened and endangered species to have them remain the same place.

The current proposals for the Osceola Parkway Extension include appropriation of part of Split Oak for a major highway in exchange for some other land which will designated as conservation land. The conservation value provided by Split Oak cannot be measured by acres. Conservation includes stability. Orange and Osceola Counties promised to preserve Split Oak, and the Constitution of Florida requires them to honor that promise.

Sincerely yours,

Dr. Gloria D. Pickar and Sandi Vidal, Co-Presidents, League of Women Voters of Orange County Sharon Lynn, President, League of Women Voters of Seminole County

#### LEAGUE OF WOMEN VOTERS® OF FLORIDA

PRESIDENT

February 21, 2018

Pamela Goodman

Central Florida Expressway Authority

The Honorable Fred Hawkins, Jr., Chairman, Osceola County Representative

First VICE PRESIDENT Patricia Brigham

Dear Mr. Hawkins,

SECOND VICE PRESIDENT Cecile M. Scoon

On behalf of the League of Women Voters of Orange County, Seminole County, and the State of Florida, we urge you to stand up for protecting our natural lands by routing the proposed Osceola Parkway Eastern Extension around the Split Oak Forest Wildlife and Environmental Area (SOFWEA).

**TREASURER** Theresa Francis-Thomas

The League of Women Voters is a nonpartisan organization. We study natural resources, as well as other socioeconomic, social welfare, and political issues, and take positions and actions after careful deliberation.

SECRETARY Patricia Drago

After lengthy study and consideration of this issue, we adopted the position that we oppose any road through Split Oak Forest Wildlife and Environmental Area.

BOARD OF DIRECTORS Shawn Bartelt Lisa Hall Julie Kessel, M.D. Maggie Lawrence Michele Levy The Hon. Mark Pafford Marty Sullivan

The Central Florida Expressway Authority (CFX) has incorporated the views of citizens through public input forums. CFX has paid particular attention to the views of the environmental community. We commend your openness in this regard.

**EXECUTIVE DIRECTOR** Penny Walker Bos 2507 Callaway Road Suite 102A Tallahassee, FL Orange and Osceola Counties purchased Split Oak more than 20 years ago as a mitigation bank to offset wetland and gopher tortoise impacts. Since then, the Florida Fish and Wildlife Conservation Commission has managed the area by conducting prescribed burns, chemically removing invasive species and bringing in dozens of relocated gopher tortoises.

32303 (850)224-2545

Ros Schultz, first Osceola County Land Manager, reports that SOFWEA began in the early 1990s during a lunch under the actual Split Oak when he, Maury Carter the land owner, and others looked around them and agreed the land should be saved. Rod teamed with Orange County and won a \$5.5 million Preservation 2000 (Florida Forever predecessor) grant to buy SOFWEA. To protect the land from encroachment, by 1994 they had tied the land up in multiple layers of easements with multiple participants, including Florida Communities Trust, Florida Fish and Wildlife Commission, and both counties. Subsequent use of SOFWEA for mitigation added many more participants.

SOFWEA is land owned by the Florida public under the constitutionally based Florida Forever program to acquire land for conservation. It also includes land used as mitigation for other development projects. Currently under consideration is a roadway land swap for a portion of SOFWEA in exchange for some of developers' land elsewhere. CFX is convening discussions about this potential swap between developers and representative of environmental advocates. Legality of such a swap has been questioned because of the deed covenants and Florida constitutional restrictions on disposal of public conservation lands.

The League of Women Voters of Orange County, Seminole County, and League of Women Voters of Florida oppose any road through Split Oak Forest Wildlife and Environmental Area

Sincerely,

Pamela Goodman President, League of Women Voters of Florida

July 9, 2018

PRESIDENT Patricia Brigham

Re: Split Oak Forest Wildlife and Environmental Area and proposed Osceola Parkway Extension

First VICE PRESIDENT Cecile M. Scoon, Esq.

Dear Ladies and Gentlemen:

SECOND VICE PRESIDENT
Shawn Bartelt

On behalf of the League of Women Voters of Orange County, Seminole County, and the State of Florida, we are reaffirming our opposition to the proposed Osceola Parkway Extension through Split Oak Forest Wildlife and Environmental Area (SOFWEA).

TREASURER Theresa Francis-Thomas The League of Women Voters is a nonpartisan organization. We study issues regarding natural resources and other socioeconomic, social welfare, and political issues and take positions and actions after careful deliberation. We submit this letter as part of our commitment to protecting our State's signature Florida Forever conservation program.

Board of Directors
Joanne Aye
Lisa Hall
Maggie Lawrence
Michele Levy
Charlotte Nycklemoe
The Hon. Mark Pafford
Marty Sullivan

Orange and Osceola Counties conceived SOFWEA in 1991 as an innovative joint venture to preserve critical wildlife habitats and wetlands in the increasingly urban environment of the two Counties. The proposal was based on placing a significant area of contiguous uplands and wetlands in a rural area in a designated conservation area and mitigation bank, as protected habitat for wildlife. The counties received Preservation 2000 funds based on their commitment to this conservation project. In the application for the funds from the Florida Communities Trust (FCT), the Counties explained that the creation of this protection area was consistent with their current and future development plans. The counties also explained that this area was adjacent to existing and planned conservation lands.

On February 21, 2018, we sent a letter to Mr. Hawkins in his capacity as the Chairman of the Central Florida Expressway Authority expressing our opposition to a right-of-way through SOFWEA for the Osceola Parkway Extension. A copy of this previous letter is attached.

Since that time, the League obtained a copy of a May 2, 2018 letter written by Mr. Hawkins, in his capacity as Chair of the Osceola Board of County Commissioners, to Mr. Jim Zboril, President of Tavistock Development Company. This letter responded to Mr. Zboril's April 13, 2018 letter setting forth certain conditions that include having Osceola County and its Board of Commissioners "[l]ead a public process (both local and state) to get the associated land in the Split Oak Forest released for right-of-way [for the Parkway extension]." Mr. Hawkins stated that "[i]t is the consensus of the Osceola County Commission that we support and will act on the conditions outlined in your letter." Mr. Hawkins also stated in his letter that he had scheduled a meeting with the FCT on May 15, 2018 to discuss this issue. These letters are also attached.

The League contends that this proposal should not be pursued because it violates the Florida Constitution's protection for conservation lands. Article X, Section 18 states that conservation lands cannot be transferred unless there is a determination that the land no longer serves a conservation purpose:

The fee interest in real property held by an entity of the state and designated for natural resources conservation purposes as provided by general law *shall be* managed for the benefit of the citizens of this state and may be disposed of *only if* the members of the governing board of the entity holding title determine the property is no longer needed for conservation purposes and only upon a vote of two-thirds of the governing board. (emphasis added)

Disposal of land includes transfer of control and therefore this provision applies to the proposed grant of a right-of-way for the Parkway extension to CFX.

In 1998, Florida voters overwhelmingly approved this amendment to the Florida Constitution to provide long-term protection for conservation lands like SOFWEA. Both gubernatorial candidates at the time, Jeb Bush and Buddy MacKay, and over 100 industry leaders, in addition to conservationists, supported the proposed constitutional amendment. This amendment was proposed to make it difficult to sell off conservation lands in order to "protect past achievements from unraveling." 1

Because SOFWEA retains conservation value, it is not possible to make the determination required by the constitution for the transfer of conservation lands. When Orange and Osceola Counties jointly applied for state conservation funds to acquire SOFWEA, they described the SOFWEA as a "long-term, permanent protection of entire ecosystems" and "an innovative mechanism for natural resources protection." The program's objective was to provide a better alternative for "continued long-term protection of wetlands and wildlife" by designating a large tract of land in a rural area for conservation purposes rather than create "small islands of habitat" that end up being incapable of supporting certain wildlife populations. SOFWEA was designed to "maximize the habitat value of the site for the benefit of species such as the gopher tortoise, Florida mouse, gopher frog, Sherman's fox squirrel, and the red-cockaded woodpecker" and to have all management activities "evaluated in terms of the anticipated impact of the proposed action on listed wildlife within the park."

A major highway through SOFWEA clearly destroys the important function that this forest and wildlife and environmental area was designed to, and does, provide. The conservation manager of the SOFWEA, the Fish and Wildlife Conservation Commission (FWC), performed an extensive review of the SOFWEA in 2016 and concluded:

The evaluation of SOFWEA by FWC has determined that *all portions of the area* are being managed and operated for the original purposes of acquisition, and remain integral to the continued conservation of important fish and wildlife resources, and continue to provide quality

<sup>&</sup>lt;sup>1</sup> Wm. Clay Henderson and Deborah Ben-David, Protecting Natural Resources, 72 Florida Bar Journal 21, 24 (Oct. 1998).

<sup>&</sup>lt;sup>2</sup> Florida Communities Trust, Preservation 2000 Program, Application Form submitted by Orange and Osceola Counties on December 31, 1991.

fish and wildlife resource based public outdoor recreational opportunities. Therefore, *no portion* of the SOFWEA is recommended for potential surplus review.<sup>3</sup> (emphasis added)

The letters between Mr. Hawkins and Tavistock mentioned above describe efforts to arrange for a deal to allow the proposed Parkway extension to be built in the Osceola portion of SOFWEA in exchange for some concessions from Tavistock, including the designation of other property for conservation. The trade-offs being discussed are not permitted by the explicit language of the 1998 Constitutional provision. Article X, section 18 clearly states that the only time conservation lands may be disposed of is when they no longer serve a conservation purpose. The underlying bases for this Constitutional provision — to prevent conservation achievements from unraveling and to preserve conservation lands from the anticipated pressures of development — explains the reasons for not allowing exchanges.

Considering the relevant provisions of our Constitution and these facts, the League of Women Voters of Orange County, Seminole County, and the state of Florida urge you to cease pursuing alternatives for the proposed Osceola Parkway Extension that damage SOFWEA and instead recognize it for the innovative and valuable role it plays in the Florida Forever program. There are alternatives that do not destroy constitutionally protected land and habitats and the League encourages you to pursue one of these options instead.

Sincerely,

Patricia Brigham

#### **Habitat Loss**

Habitat destruction is the issue most often cited for the problems now facing Florida wildlife. Wildlife habitat has declined and even disappeared during the past 100 years as natural lands were converted to agriculture, range lands, and expanding urban areas. During the mid-20<sup>th</sup> century,

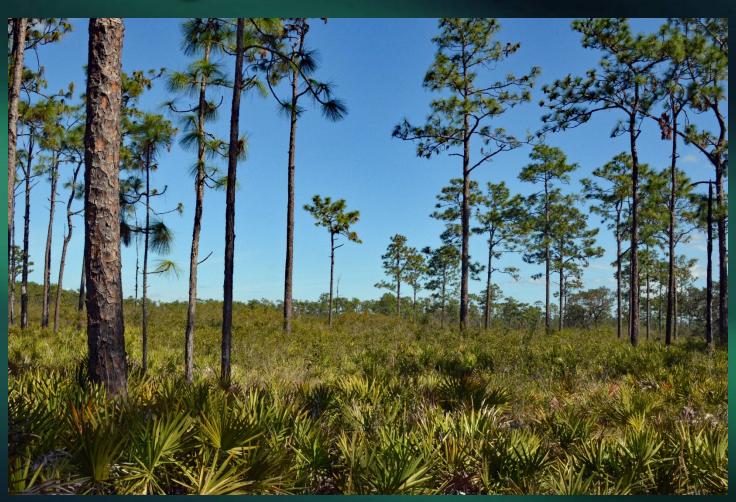

© FloridaStock

Florida lost more than seven million acres of forest and herbaceous wetlands to development. In recent decades, Florida's massive population growth and booming tourism industry have disturbed and fragmented many natural areas across the state. Estimates based on current growth rates suggest Florida could lose an additional seven million acres of rural and natural lands to urban uses within the next 50 years.

For more information about the potential effects of habitat loss in Florida, visit the Florida Fish and Wildlife Conservation Commission Wildlife 2060 website.

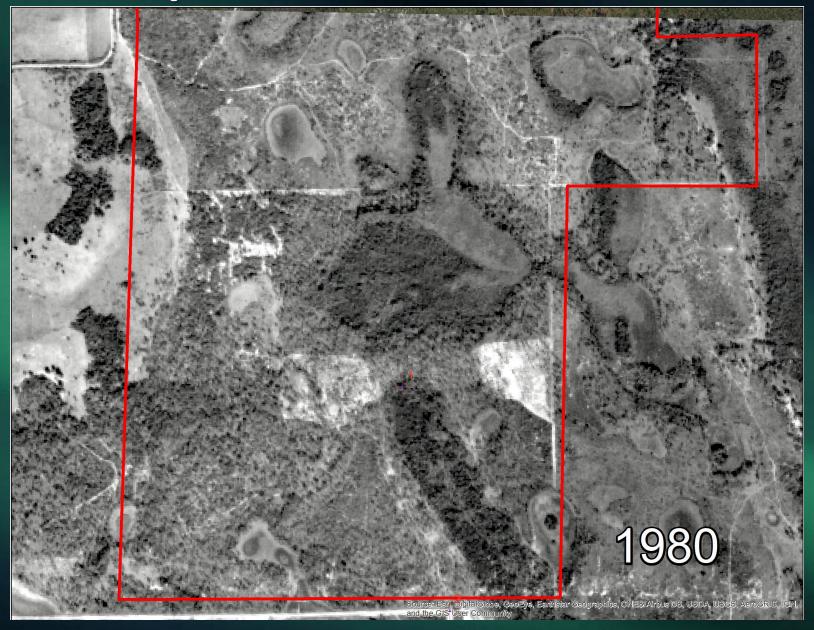

To learn about the history of habitat loss in Florida, check out the Florida Fish and Wildlife Conservation Commission Report, Florida Vegetation 2003

As to the neighborhoods impacted, I am aware that these are privileged neighborhoods that we the project seeks to Spare. Older, established, but less provileged neighborhoods have received no such consideration, to my knowledger Understand that privileged neighborhoods are still private interests, and that human inhabitants can see relocate to other localities that still provide an appropriate human hebitat. The plant and animal species that depend upon the specific habitet of Split Dak Forest are not able to do 50. They have already had a considerable part of their habitat destroyed, and your are proposity to destroy more. The proposed and swap does not provide the actual mitigation for this additional habitat destruction, as it is not of the some quelify or character as he Split Oak forest Mitogation

Finally, if the entities involved are willing to donate 1,500 acres to expand the conservation area as a carrot, and withhold it as a stick that smacks rather too much of duress. Lather them extooting compliance by daughing conservation lands in front of the environ newsel community, Towistock should show good faith by simply donating those lands anyway,

Also: I prescribed burns are a requirement in SOF then development that can be therefored by those burns can't be approved not the water way around, by stongerout on takes precedence by law.

Mary Brooks, Public Information Coordinator Central Florida Expressway Authority 4974 ORL Tower Road Orlando, Florida 32807 ProjectStudies@CFXway.com

Governor DeSantis The Florida Capitol 400 South Monroe Street Tallahassee, FL 32399-0001

**Subject:** Project Development & Environment (PD&E) Study Re-evaluation: CFX Project No. 599-233 - Osceola Parkway Extension Route

Dear Ms. Brooks and Governor DeSantis,

We thank the staff of the Central Florida Expressway Authority (CFX) for holding numerous public meetings and responding to the input of local residents and stakeholders.

The undersigned organizations are providing our comments and recommendations regarding the alternative routes presented at the November 18, 2019 EAG and November 19, 2019 Public Hearing.

Let us be clear – we advocate for the preservation of Florida's natural lands because of the vast public benefits that they provide. We do not support the "mitigation" of mitigation lands purchased and preserved with tax-payer dollars, nor do we support the continued destruction of Florida's natural lands, rural landscapes and rural way of life.

Florida is losing 10 acres of rural and natural lands per hour to development, as indicated by the *Florida* 2070 report (1000friendsofflorida.org/florida2070).

We are concerned about the total costs to the citizens of Florida of the proposed highway. Those costs include the loss of homes, public healthcare, quality of life, investments in the acquisition and management of Split Oak Forest, and the ecosystem services it provides. Ecosystem services include the benefits that people derive from natural lands (our water supply, clean water, healthful recreation, food and habitat for pollinators and wildlife, flood control, carbon sequestration, aquifer recharge, climate moderation and seed banks that harbor the genetic diversity needed to sustain plant populations and natural communities).

Covering what remains of rural Florida with the high-density development that will soon follow the building of major highways will not provide long-term benefits to our citizens. Instead, a few large private landowners will benefit as the public continues to bear the full costs.

For these reasons, we advocate for a "no build option" and here we recommend an alternative. We recommend that the CFX partner with Orange County Government to expand the proposed footprint of

the proposed Sunbridge Parkway to include space for public transit, as has been proposed in the Osceola Parkway Extension Route, CFX Project No. 599-233. We believe that the expanded "footprint" of the Sunbridge Parkway could be developed in such a way as to avoid the impact to homes and publicly-protected natural lands that you have identified in the Alternative Recommendation for the Osceola Parkway Extension Route.

Respectfully,
Becky Ayech
President
Environmental Confederation of Southwest Florida

Patricia Catello lives in Rustic Acres, a neighborhood heavily impacted by Tavistock developments. Across Boggy Creek Road from their house, behind a tall fence, "Tavistock Neighborhood N7 is being cleared. The tree with the working eagle nest disappeared overnight. Peering over the fence the Catellos watched the dredge and fill of pond and wetlands. They took a look because wildlife in increasing numbers have been fleeing into or over their yard, turkeys and deer and hawks. They began trapping or saving what they could: 17 armadillos, 5 raccoons, 4 possums, two owls, a gopher tortoise. What they could trap, they took to the only place left where these animals could live: Split Oak Forest. The Catellos want to see the road avoid Split Oak Forest. They are thinking of moving.

#### Comments:

Full restoration to match the quality of Split Oak. Ongoing maintenance of these lands. PLUS Connectivity of both uplands and wet lands to other nearby preserves such as Hal Scott, TM-Econ Mitigation Bank, Lake Lizzie Preserve, Lake Preston and Lake Split Oak Minimization Route with full compensation including a) full restoration of these lands to match the quality of Split Oak b) Ongoing maintenance of these lands c) demand connectivity of both uplands and wetlands to other nearby preserves so I would like to request the Split Oak Minimization Route with full Compensation including: a) Full restoration of these lands to match the quality of Split Oak b) Ongoing maintenance of these lands c) Connectivity of both uplands and wetlands to other lamb in favor of the Split Oak minimization route.

I want the split oak minimization route.

Just need to get something done-as normal our government has the cart before the horse

I support the split oak minimization route to protect 1500 acres of conservation land.

Remember, when president Eisenhower passed the interstate act back in the 50s, the emerging road system tore through many forests and people's "backyards" as long as developers continue to build homes and central Florida continues to grow, we Figure 1 split oak minimization plan with full restoration of these lands to match. Ongoing maintenance of these lands Plus connectivity of both upland and wetlands to nearby preserves

Prefer split oak minimization option with a full compensation package including full restoration of these lands to match quality of split oak; ongoing maintenance of these lands; plus connectivity of both uplands and wetlands to other nearby preserves.

I support the Split Oak Minimization route only if I includes the following: A- full restoration of these lands to match the quality of split Oak B- Ongoing Maintenance of these lands. C- plus Connectivity of both uplands and wetlands to other nearby preserves.

I support Th Split Oak Minimization Route only if I included the following: A- Full Restoration of these lands to match the quality of Split Oak. B- Ongoing Maintenance of these lands. C- Plus Connectivity of both uplands and wetlands to other nearby preserves.

responsible, and respectful of the communities they purport to serve with all of this read-puilding and development, it would be a much more credible show of good faith to donate the lands and To refrain entirely from building the road. Otherwise, it's obvious that the the purpose of this road is to enrich its builders, and the community and the ecology be damned. Further: · I am opposed to the Split Oak Minimization alternative. · I am generally OffosED to any new toll roads through Conservation lands that were purchased with public funds. · I am SPECIFICALLY OPPOSED to ANY roads through Spit dak Forest. "I am not in favor of any new toll roads east of Narwossee Road. · I strongly contend that CFX has no business or authority to negotiate away Public Lands purchased by the people of Drange and Osceola Counties. · With an average cost of over \$ 99 Million per mile, all alternatives for this to il road excate an undue burden or he traveling public in Central Florida. Therefore I am apposed to building this road -· With a range of asts from BSM: (10 on to \$148.4 Million/mile for the 4 segments identified) this roadway project is simply too costly. If thorough economic analysis must be redone, including more realistic estimates of unknown factors not yet considered. · With a proposed cost of & 75.1 Million/mile, I FAVOR the S.O. Avoidance Alternative over the S.O. Minimization Aldernafish, for the East segment. This segment of the roadway is a better rather in cost per mile than either of the West Segments at a cost production silver of \$86.8 million/mile (Bosgy Creek) and \$148.4 M. Mion/mile (Lake None). I am SPECIFICALLY OPPOSED to the S.O. Minimination because I am an aviduser of S.O. Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to S.O. Forest do not appear to be of any use to me for my recreational proposes, I am OPPOSED to any consideration of the Kight-of-Way Against on Agreement and Agreement to Convey Conservation I am OPPOSED to any consideration of the Kight-of-Way Against to Agreement and Agreement to Convey Conservation Lands which is I ten 4 of the ROW Committee Agenda for the meeting to be held on Nov. 20, 2019. In addition, the minimization route would be better for Lake ajon residents as the nearest approon would be about 1300 feet. The availance route would bring the expression as close as nor feet. It is important to note that several studies have shown that people living within 1500 feet of a major roadway have sign fically higher incidents of several serious medical and times. Finally, it should be reflected in the CFX decision that the availance option is about 110 m more expansive than the minimization alternative. However, as recommended by the audubon and Florida Fish and Wildlife groups, it is critically important that the CFX decision include dunding and mon agencent provisions for preservation land Mstration and continued maintenance.

PUBLIC WORKSHOP

CFX Project No.: 599-223 Lake Nona Middle School

13700 Narcoossee Rd., Orlando, FL 32832

Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE:	9/2019
Out	of the two options being offered for
the osca	eda parkway, I would agree most
with 0	ption 2 (The Split Oak minimization route)
8	
voting	: Split Dak Minimization Route with a
	full compensation package
1	Full restoration of these lands to
f <del></del>	match the quality of Split oak
	· ongoing maintenance of these lands
i <del></del>	· Plus Connectivity of both uplands and
-	wetlands to other nearby preserves
	such as Hal Scott, TM Econ Mitigation Bank
	(Please continue comments on the back of this page if more space is needed.)

CFX Project No.: 599-223 Lake Nona Middle School

13700 Narcoossee Rd., Orlando, FL 32832 Tuesday, November 19, 2019, 5:30 p.m. – 7:30 p.m.

DATE: 11/19/19
I Feel the best choice at this time is the
Splitoak mimimization route only if it
Includes the following:
(1) Full Restoration of the compensation lands
described to match the quality of Splitoak.
(2) ONGOING maintenance of these lands.
(3) PLUS connectivity of both uplands and
wetlands to nearby prescrues such as Hal
Scott, T-M ECON mitigation Bank, LAKE
LIZZIE PATESERVE, LAKE PRESTON & LAKE
CONLIN.
4) GOPHER TORTOISES RELOCATION BE DONE
(Please continue comments on the back of this page if more space is needed.)

Phone:	186 623 825

We welcome your comments. You may mail your comments to Mary Brooks, Public Information Coordinator, Central Florida Expressway Authority, 4974 ORL Tower Rd, Orlando, FL 32807. You can also email your comments to <a href="mailto:ProjectStudies@CFXway.com">ProjectStudies@CFXway.com</a> or call 407-802-3210.

Thank you!

In addition to my remarks on Page 1 of 2 of this "Comment Form", I $\_$	Nicolas Penasa	
	(Printed Name)	

hereby submit all of the following Comments that I have listed below:

- I am OPPOSED to the Split Oak Minimization Alternative.
- I am generally OPPOSED to any new toll roads through Conservation Lands that were purchased with Public Funds.
- I am SPECIFICALLY OPPOSED to any new toll roads through Split Oak Forest WEA.
- I am not in favor of any new toll roads East of Narcoossee Road at this time.
- I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
- With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
- With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.
- With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
- I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
- I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

I strongly oppose any type of construction
in or through the Split Oak forest. My family
and I recently moved to the area and the Split
Oak forest is the best thing about this

### **PUBLIC MEETING**

CFX Project No.: 599-223

Lake Nona Middle School Cafeteria, 13700 Narcoossee Road, Orlando, FL 32832
Tuesday, November 19, 2019, 5:30 p.m. - 7:30 p.m.

DATE: 17/(1/(1)
As a biologist working in Split Oak I would
Strongly be against any Construction activity isside
the current park boundaries. The Southern part of
the park is the most biodiverse part of the park
and I have personally documented several endangered
and threatened species inside the proposed tollway
route. The land being offered in exchange for
the band inside Split Oak is sub-par in species
richness and is not quality sandhill habitat.
I oppose all development activity inside this Mitigation Park
(Please continue comments on the back of this page if more space is needed.)  Name: Deek Dunlop
Address: 5860 SW 76th ct.

We welcome your comments. You may mail your comments to Mary Brooks, Public Information Coordinator, Central Florida Expressway Authority, 4974 ORL Tower Rd, Orlando, FL 32807. You can also email your comments to <a href="mailto:ProjectStudies@CFXway.com">ProjectStudies@CFXway.com</a> or call 407-802-3210.

Thank you!

le addition to	my remarks on Page 1 of 2 of this "Comment Form" I Desek Dunlop				
in addition to	my remarks on Page 1 of 2 of this "Comment Form", I(Printed Name)				
hereby submit	t all of the following Comments that I have listed below:				
$\odot$	I am OPPOSED to the Split Oak Minimization Alternative.				
•	I am generally OPPOSED to any new toll roads through Conservation Lands that were purchased with Public Funds.				
$\odot$	I am SPECIFICALLY OPPOSED to any new toll roads through Split Oak Forest WEA.				
$\bullet$	I am not in favor of any new toll roads East of Narcoossee Road at this time.				
$\odot$	I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.				
$\odot$	With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.				
	With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.				
$\bigcirc$	With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).				
Ō	I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.				
	I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.				
	DO NOT BUILD ON				
	SPLIT OAK

	I am not in favor of any new toll roads East of Narcoossee Road at this time.
•	I strongly believe that CFX has no business or authority to negotiate away Public Lands purchased by the people of Orange and Osceola Counties.
-	With an average cost of over \$99 Million per mile, all of the alternatives for this toll road create an undue burden on the traveling public in Central Florida. Therefore, I am opposed to building this road.
	With a range of costs from \$55.2 Million to \$148.4 Million per mile for the 4 Segments identified, this proposed toll roadway project is simply too costly. A thorough economic analysis needs to be redone, including better estimates for all of the unknown items that have not been realistically considered.
	With a proposed cost of \$75.1 Million per mile, I FAVOR the Split Oak Avoidance Alternative over the Split Oak Minimization Alternative for the East Segment option. This Segment of the roadway is a better value in cost per mile than either of the West Segments at a cost of \$86.8 Million per mile (Boggy Creek) and \$148.4 Million per mile (Lake Nona).
•	I am SPECIFICALLY OPPOSED to the Split Oak Minimization Alternative because I am an avid user of Split Oak Forest WEA. The buffer lands that are proposed to offer an exchange for the impacts to Split Oak Forest do not appear to be of any use to me for my recreational purposes.
=	I am OPPOSED to any consideration of the Right-of-way Acquisition Agreement and Agreement to Convey Conservation Lands which is Item 4 on the Right-of-way Committee Agenda for the meeting to be held on November 20, 2019. Please remove the Item from the Agenda immediately.

I would like to see the "Split OAK MINIMINATION ROUTE
get selected. In addition it is important to have
full restoration of therelands to match the quality
of Split Oak. (with a Haintenance plan as well)
I would like to see connectivity of both plands and
welland sto other nearly preserves such as Hal
toth Lahe Lingie a Lake Preston. Please do your
_ best to preserve the natural beauty that
exist South of Jake Mary Jame a Lake Hast
Thank you.

You can't stop time and progress. But sinsitle progress should be
Under taken. Wetlands & wildlife habitations and corridors are vital to a
healthy environment. With that the following are preferred.
1) The Spl. + Oak Minimization Route, only if the following occurs:
a) Full Restoration of the lands to match quality of Split Oaks
5) Ougaing Maintenance & stewardship of Those lands
() adding the fall 1500+ acres of sorrounding land for consevation &
wildlife corridors.
d) Full connectivity of both upland and wetlands to nearby preserves
such as Hal Scott, TM- Econ M. trigation Bank & special Lakes, over if
it means having a significant amount of elevated highway in
ares where wildlife and migration is prevelent.

As a resident of this area for over 10 years this kind of events have been
going on since we've been here, Respectfully, I would be thrilled if we didn't have to
get another road to gothnaugh untouched land. However, I am a supporter of the
Split oak minimization route with a full compensation package" that way we can
blep the land in its most natural state as possibly. I only agree with the "Split Oak
Minimization if it includes. Full restoration of these lands to match the quality
of Split Oak", "Ongoing Mainterance of these lands", and Comertury of both uplands
and metlands to other nearby preserves such as Hal Scott, TM-Econ Mitigation Bank
Lake Lizzie Preserve, Lake Preston, & Lake Conlin," It you would follow
these stipulations that is the consensus of the nearby community's then you
would have the support at me and the community in your enderors.
Here's to our coallition

Please	adopt the Figure 2 option with the Split Oak Minimization route.
We reque	est restoration of all lands disturbed in the development to match the
Current	quality of Split Oak with on-going maintenance of these lands
We cher	75h the nurd quality of our Moss Park - Lake Mary Same
Commun	rity and ask that devolpment in the southeast corner of
Orange	Country respect and preserve its natural beauty and rich
weld lis	le habitato. Please ensure the continuation of these lew
Zones of	"natural Florida " by connecting the existing uplands and
wettend	o in our area to near by preserves like take Lizzie, Lake Preston
and Ha	I Scatte Thank you for protecting our beautiful, trango: 1
neighbor	-hood.

As a 35-year resident of Lake Ajay,
My appreciation of and respect for the
beautiful nature, sevenity and history of this
Community of Lake Ajay is enormous. Our
Shared love, support for its preservation
has prevailed throughout the years. Of course
our preference would be for no road and
less development. However, we acknowledge
and respect the need of transportation for
the larger Lake Nona, St. Cloud area. I
nighty urge you to decide on the Split Dals

I do not support the Split Oak avoidance route. I do
Support the Split Oak minimization route that Will impace
160 acres in Split Ock last adds 1,550 acres of surrounding
land. I only support the minimization route only if it
includes full restoration of these lands to match the
quality of Split Oak, onging maintenance of these
lands plus connectivity of both uplands & wetlands
to other nearby preserves such as Hal Scott, TM-EC
to other nearby preserves such as Hal Scott, TM-Ec Mitigation Bank, Lake Lizzie Preserve, Lake Preston +
Lake Conlin

Our family is glad you are taking our
perspective into consideration. Thank you for
listening!
We are as voting for the SplitOak MINIMIZATION
ROUTE - including () full pestonation of these lands to
match the quality of Split Dak @ ongoing main-
tenance of these Lands & 3 connectivity of the
Uplands & wetlands to nearby preserves.
This is important Not only for Nature - habitats,
ecosystem, but also for the mental health of our
family to have Nature that is minimally disturbed.
This is valvable for us & a significant reason we make our

I am a resident of Lake Ajay Village and advocate
for the Split Oak Minimization route with its associated
10:1 land swap from Tavistack & Doseret Ranch. We
in Lake Ajay Village want the Expressivay to be built of
for from our homes as feasible due to the associated
light, air, & noise pollution. The Split Oak Avoidance
rate is within 1000ftof some of our homes and ward
bridge over a canal very near us, allowing noise & light
pollution to travel our further leasier dawn the conal
to our homes. Our neighborhood has been around since 1979
and enjoyed a quiet, peaceful evitence for decades. We
mourn its loss.
