

## Initial Alternatives Public Meeting Summary

### Appendix A

#### Public Workshop Invitations and Fall 2005 Project Newsletter

October 18, 2005

The Honorable Jeb Bush  
Governor of Florida  
The Capitol  
Tallahassee, FL 32399

Subject: **Wekiva Parkway Project Development and Environment (PD&E) Study**  
**Public Information Workshops on the Initial Alignment Alternatives**  
Orange, Lake and Seminole Counties, Florida

Dear Governor Bush:

The Orlando-Orange County Expressway Authority (OOCEA) and District Five of the Florida Department of Transportation (FDOT) invite you to attend a public information workshop on the initial alignment alternatives developed in the Wekiva Parkway PD&E Study. Three public information workshops will be held between November 9, 2005 and November 14, 2005. The workshops will be at different locations near the study corridor to accommodate residents and business owners in Orange, Lake, and Seminole Counties. The same information will be provided at all three workshops. The times and locations of these meetings are highlighted in the table below (please see the enclosure for maps to the workshop locations).

As you may know, the Wekiva Parkway PD&E Study is a step toward fulfilling the recommendations set forth by the Wekiva River Basin Coordinating Committee and the requirements of the Wekiva Parkway and Protection Act signed by Governor Jeb Bush on June 29, 2004. The Wekiva Parkway will provide a critical regional transportation facility serving Central Florida while protecting the Wekiva springshed through acquisition of environmental lands, control of land uses, and conservation of water resources.

The public workshops are being conducted to afford persons the opportunity to express their views concerning the conceptual design, as well as the social, economic and environmental effects of the proposed improvements. Initial alignment alternatives for the Wekiva Parkway, a study overview presentation, display boards, and other pertinent project information will be available at the workshops for public review. Representatives of the study team will be available to assist the public. The format of the meeting will be informal. You are invited to attend any time during the workshop to review the project information, ask questions, and discuss your ideas or concerns with members of the PD&E Study team.

Ms. Mary Brooks, Public Involvement Coordinator, may be contacted by anyone needing project or workshop information or requests for special accommodations under the Americans With Disabilities Act of 1990. Ms. Brooks can be reached at (Cell) 407.702.8375, (Fax) 407.381.9038, (E-mail) MBrooksSR414@cfl.rr.com or write to 10151 University Blvd., Suite 222, Orlando, FL 32817. Special accommodation requests under the Americans With Disabilities Act should be made at least seven (7) days prior to the information workshop.

Your attendance at these workshops is encouraged and any comments made will be appreciated.

Sincerely,

**Orlando-Orange County Expressway Authority**

A handwritten signature in dark ink, reading "Joseph A. Berenis". The signature is fluid and cursive, with the first name "Joseph" and last name "Berenis" clearly legible.

Joseph A. Berenis, P.E.  
Deputy Executive Director

October 21, 2005

**Subject: Wekiva Parkway Project Development and Environment (PD&E) Study  
Public Information Workshops on Initial Alignment Alternatives  
Orange, Lake and Seminole Counties, Florida**

Dear Property Owner or Tenant:

The Orlando-Orange County Expressway Authority (OOCEA) and District Five of the Florida Department of Transportation (FDOT) invite you to attend a public information workshop on the initial alignment alternatives developed in the Wekiva Parkway PD&E Study. The goal of this PD&E Study is to evaluate and select a preferred concept for the Wekiva Parkway. The project is proposed to extend within a 25-mile corridor from US 441 in Orange County to US 441 in Lake County and to I-4 in Seminole County. Additional information is available online at [www.expresswayauthority.com](http://www.expresswayauthority.com).

Three public information workshops will be held between November 9, 2005 and November 14, 2005 to accommodate residents and business owners in Orange, Lake and Seminole Counties. The same information will be provided at all three workshops. The times and locations of these meetings are highlighted in the table below (please see the enclosure for maps to the workshop locations).

| <b>Orange County Workshop<br/>Sponsored by OOCEA</b>        | <b>Lake County Workshop<br/>Sponsored by FDOT</b>            | <b>Seminole County Workshop<br/>Sponsored by FDOT</b>              |

| November 9, 2005<br>5:00 PM to 8:00 PM                      | November 10, 2005<br>5:00 PM to 8:00 PM                      | November 14, 2005<br>5:00 PM to 8:00 PM                            |

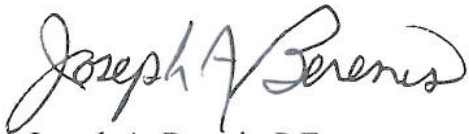

Initial conceptual alternatives for the Wekiva Parkway, a study overview presentation, display boards, and other pertinent project information will be available at the workshops for public review. Representatives of the study team will be available to assist you. The format of the meeting will be informal. You are invited to attend any time during the workshop to review the project information, ask questions, and discuss your ideas or concerns with members of the study team. Follow-up workshops are scheduled for mid-2006 to further discuss and refine the viable alternatives. Public hearings will take place near the conclusion of the PD&E Study, which is currently scheduled for late 2006/early 2007.

Ms. Mary Brooks, Public Involvement Coordinator, may be contacted by anyone needing project or workshop information or requests for special accommodations under the Americans With Disabilities Act of 1990. Ms. Brooks can be reached at (Cell) 407.702.8375, (Fax) 407.381.9038, (E-mail) MBrooksSR414@cfl.rr.com or write to 10151 University Blvd., Suite 222, Orlando, FL 32817. Special accommodation requests under the Americans With Disabilities Act should be made at least seven (7) days prior to the information workshop.

Your attendance at these workshops is encouraged and any comments made will be appreciated.

Sincerely,

**Orlando-Orange County Expressway Authority**

A handwritten signature in black ink, reading "Joseph A. Berenis". The signature is fluid and cursive, with the first name "Joseph" and last name "Berenis" clearly legible.

Joseph A. Berenis, P.E.  
Deputy Executive Director

Due to the volume of the property owner mailing database (over 9000 entries), the mailing list was not included as a part of this document. The property owner mailing database can be found in the project file.

# UPDATE

## Wekiva Parkway & SR 46 Bypass

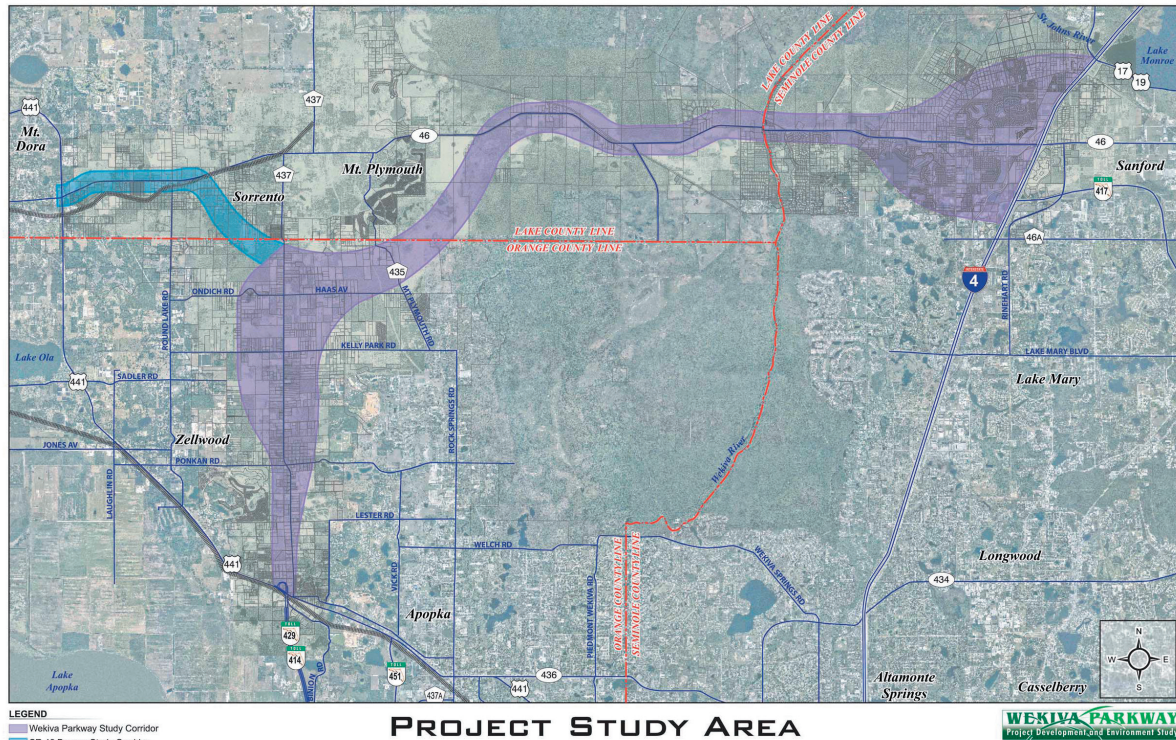

### Project Study Kicks Off

The Project Development and Environment (PD&E) Study for the Wekiva Parkway has begun. The Orlando-Orange County Expressway Authority and the Florida Department of Transportation – District 5, kicked off the study in January 2005 for this much needed transportation improvement in response to state legislation and the recommendations of Governor-appointed committees.

The Wekiva Parkway is critical in completing the beltway on the west side of Metro Orlando. It will connect SR 429 and the planned SR 414 (Maitland Boulevard Extension) at US Highway 441 near CR 437 (Plymouth Sorrento Road) in Apopka to SR 46 in Lake County, and to Interstate 4 near Sanford.

Preliminary project components include:

- ▶ SR 429 Wekiva Parkway - 20.6 miles
- ▶ SR 46 Bypass - 4.2 miles
- ▶ CR 46A Realignment - 2.7 miles

- ▶ Wekiva Parkway Access Improvements (required in Lake County between the realignment of CR 46A and the Wekiva River to allow access to private property along SR 46)

The Wekiva Parkway is expected to alleviate traffic congestion on existing roads, while also providing additional capacity and connectivity to accommodate anticipated growth in the region. By the year 2025, a complete beltway system around Metro Orlando would divert 46,000 daily trips from Interstate 4, with the Wekiva Parkway carrying up to an estimated 27,000 daily trips, according to the FDOT.

In addition to accommodating increased travel demands, the Wekiva Parkway will address safety concerns that currently exist on roadways in the project area. From 1997 to 2003, there were at least 14 traffic fatalities and 39 bear kills on SR 46. As many as 24,000 vehicles a day travel SR 46 west of Interstate 4, according to FDOT 2003 statistics. That is just under the road's 24,900 daily vehicle capacity. With historical traffic volumes growing by more than seven percent per year, SR 46 would have to support more than 33,000 vehicles per day by 2025.

# Project Study Kicks Off (Cont'd)

The PD&E Study, which is expected to be complete in early 2007, will address recommendations outlined in the Wekiva Parkway and Protection Act as set forth by the Wekiva River Basin Coordinating Committee. The 2004 Protection Act authorizes the building of the Wekiva Parkway and provides protection to the Wekiva River System through land conservation measures, habitat preservation, and the protection of spring and groundwater recharge areas.

As Governor Jeb Bush stated when signing the protection act on June 29, 2004, “The parkway strikes a delicate balance between environmental protection and economic growth, providing relief for motorists and protection for Florida’s land and waters.”

The Expressway Authority, as an agent for the Florida Department of Environmental Protection’s Division of State Lands and the St. Johns River Water Management District, has begun discussions in an attempt to acquire properties identified for conservation by the Wekiva Parkway and Protection Act and the Wekiva River Basin Coordinating Committee. These acquisitions could ultimately provide extensive conservation and buffer areas along the Wekiva Parkway corridor, and are expected to be funded by a variety of sources.

The tasks included in the Wekiva Parkway PD&E Study are:

- 1) Developing and evaluating alternative alignments and concepts;
- 2) Soliciting, receiving and analyzing public input;
- 3) Further analysis and refinement of viable alternatives;

4) Selecting the most appropriate alignment to serve the community’s needs while minimizing potential impacts to the environment, surrounding homes and businesses.

Some portions of the Wekiva Parkway will be tolled, while other portions would remain free to provide access to local homes and businesses. The PD&E study will evaluate which portions of the highway are economically feasible as a toll facility and will address the Coordinating Committee’s recommendations to implement a SR 46 Bypass Corridor.

The SR 46 Bypass Corridor could begin at the SR 46-US 441 interchange in Lake County extending just east of Round Lake Road and then turning southeast on a new alignment entering Orange County with an interchange at the Wekiva Parkway.

## Lead Agencies and Project Funding

The Expressway Authority and the FDOT are the lead agencies for the Wekiva Parkway PD&E Study. The Expressway Authority’s involvement is limited to any tolled portions of the project, as per Florida Statutes and the Agency’s bond covenants. The Expressway Authority is the lead agency in studying the Wekiva Parkway segment in Orange County from US 441 north to the SR 46 Bypass. The FDOT is the lead agency for the Lake County and Seminole County portions of the study.

The PD&E Study for the Wekiva Parkway is funded jointly by the Expressway Authority and the FDOT. A number of funding options are under evaluation for the remaining phases of the project.

The Expressway Authority and FDOT are closely coordinating all activities of the

PD&E Study with the Wekiva River Basin Commission, which was appointed by Governor Bush.

## Cost to Build the Wekiva Parkway

The preliminary project cost estimate, including the PD&E Study, final design phase, right-of-way acquisition and construction of the Parkway, is \$970 million (in 2004 dollars). These costs will be refined and updated as the project proceeds through development. The preliminary estimate does not include money to buy land for conservation or wetland mitigation.

## How You Can Get Involved

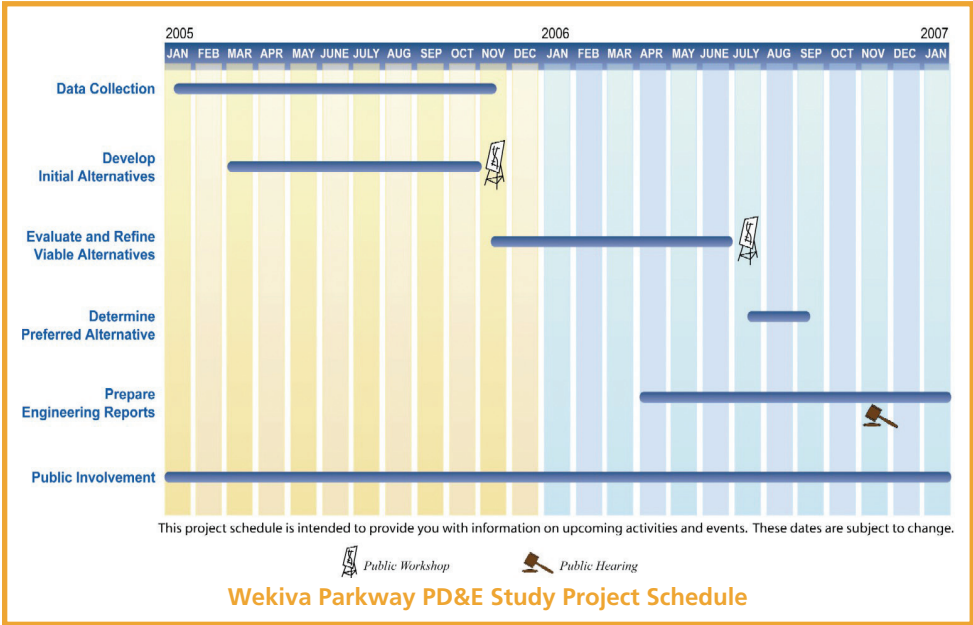

The Expressway Authority, FDOT and other participating agencies recognize that the success of any transportation improvement is dependent upon a substantial and proactive public outreach effort. The participating

agencies are committed to conducting a public involvement program to inform citizens about the project while using public input to identify community needs and develop alternative solutions.

The public will receive information about the Wekiva Parkway PD&E Study via project newsletters, the Expressway Authority Web site and small group meetings. To maximize access to project information, public workshops will be held in Lake, Orange and Seminole counties.

The FDOT and Expressway Authority anticipate having the first public meetings to review initial alignment alternatives in late fall of 2005. The second round of public meetings on the viable project alternatives are scheduled for summer 2006, with public hearings on the recommended alternatives expected in late 2006.

## The Wekiva Parkway Development Process

- **Final Design Phase** – This project phase would typically begin following approval of the PD&E Study documents by the required local, state, and federal authorities. The design process could last two to three years.
- **Right-of-Way Acquisition** – While the Expressway Authority and FDOT

will be cooperating with landowners and various state and local officials to identify significant right-of-way parcels that might be suitable for advanced acquisition, typically the majority of right-of-way parcels would be acquired closer to the completion of final design. The acquisition process could take two to three years to complete.

- **Construction** – Normally construction would begin after right-of-way acquisition. However, construction of the Wekiva Parkway project may be accomplished in segments; the length and number of construction segments has yet to be determined. Construction is not likely to start before 2009.

## For More Information

Maps, study-related documents and a project history are available for public review at the Expressway Authority’s Web site. Check in regularly at **ExpresswayAuthority.com** for Wekiva Parkway project updates and announcements, or for information on other Expressway Authority projects and operations.

Activities of the Wekiva River Basin Commission are being posted on the East Central Florida Regional Planning Council Web site at **www.ecfrpc.org/wekivacommission**.

# INITIAL ALTERNATIVES PUBLIC WORKSHOPS

## WEKIVA PARKWAY

### PROJECT DEVELOPMENT AND ENVIRONMENT STUDY

The Orlando-Orange County Expressway Authority (OOCEA) and District Five of the Florida Department of Transportation (FDOT) will conduct public workshops on the initial alignment alternatives developed in the Wekiva Parkway Project Development and Environment (PD&E) Study. The goal of this PD&E Study is to evaluate and select a preferred concept for the Wekiva Parkway. The project is proposed to extend within a 25-mile corridor from US 441 in Orange County to US 441 in Lake County and to I-4 in Seminole County.

Three public information workshops will be held between November 9, 2005 and November 14, 2005 to accommodate residents and business owners in Orange, Lake and Seminole Counties. The same information will be provided at all three workshops. The times and locations of these meetings are as follows:

#### 1. Orange County Workshop

Sponsored by OOCEA  
Apopka High School  
555 W. Martin St.  
Apopka, FL 32712  
  
November 9, 2005  
5:00 PM to 8:00 PM

#### 2. Lake County Workshop

Sponsored by FDOT  
Lake Receptions  
4425 N. Highway 19-A  
Mt. Dora, FL 32757  
  
November 10, 2005  
5:00 PM to 8:00 PM

#### 3. Seminole County Workshop

Sponsored by FDOT  
Sanford Civic Center  
401 E. Seminole Blvd.  
Sanford, FL 32771  
  
November 14, 2005  
5:00 PM to 8:00 PM

These workshops are being held in order to inform the general public of the project's progress and to solicit feedback in regards to the study. Initial conceptual alternatives for the Wekiva Parkway, a study overview presentation, display boards, and other pertinent project information will be available at the workshops for public review. Representatives of the study team will be available to provide assistance. The format of the meeting will be informal. The public is invited to attend any time during the workshop to review the project information, ask questions, and discuss any ideas or concerns with members of the PD&E Study team.

Your attendance at this workshop is encouraged and any comments made will be appreciated.

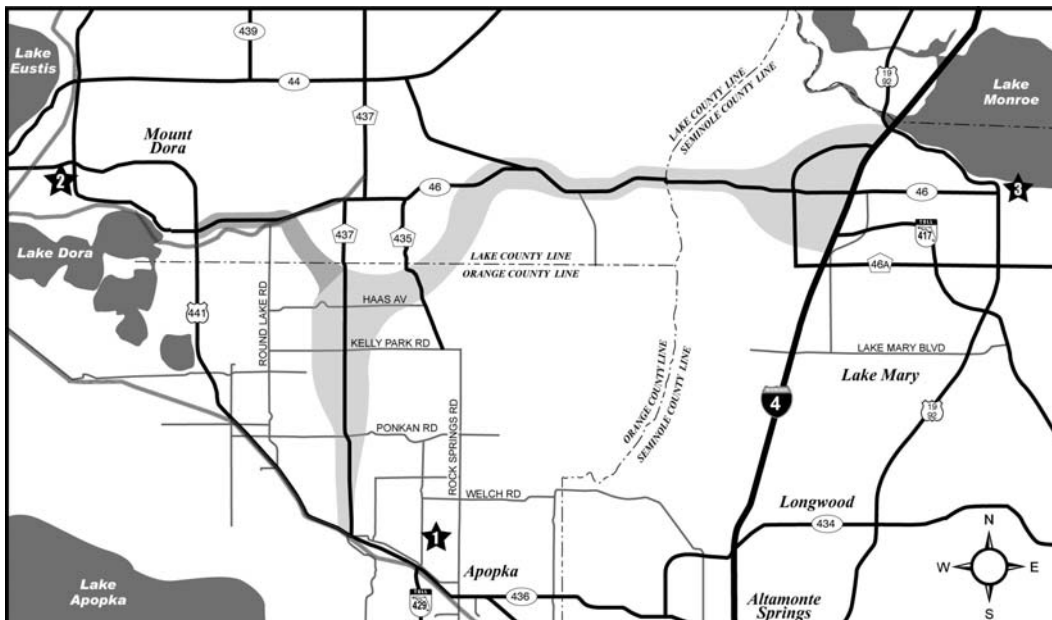

Written comments may be submitted at the workshop, or mailed to:

Ms. Mary Brooks  
Public Information Officer  
10151 University Blvd., Suite 222  
Orlando, Florida 32817

Written comments may also be sent to Ms. Brooks by e-mail ([mbrookssr414@cfl.rr.com](mailto:mbrookssr414@cfl.rr.com)) or by fax (407.381.9038). Anyone with questions or needing special accommodations under the Americans With Disabilities Act of 1990 should contact Ms. Brooks by telephone at 407.702.8375 or by writing to the above address. Special accommodation requests under the Americans With Disabilities Act should be made at least seven (7) days prior to the workshop.

PROJECT LOCATION MAP

Public participation is solicited without regard to race, color, religion, gender, age, national origin, disability, or family status.

# Alternativas Iniciales en Talleres Públicos

## Wekiva Parkway

### Project Development and Environment Study

El Orlando-Orange County Expressway Authority (OOCEA) y el Distrito Cinco del Departamento de Transportación de Florida (FDOT) conducirá talleres públicos sobre alternativas a desarrollar en la alineación inicial del Proyecto Wekiva Parkway Project Development and Environment (PD&E). El propósito de éste estudio PD&E es evaluar y seleccionar la mejor alineación para Wekiva Parkway. Se ha propuesto que éste proyecto se extenderá 25 millas por corredor desde US 441 en el Condado Orange hasta US 441 en el Condado Lake y a I-4 en el Condado Seminole.

Tres talleres de información pública serán entre Noviembre 9, 2005 y Noviembre 14, 2005 para acomodar residentes y dueños de negocios en los Condados Orange, Lake y Seminole. Será la misma información en los tres talleres. Las horas y lugares de estas reuniones serán como sigue:

#### 1. Taller en Condado Orange

Patrocinado por OOCEA  
Apopka High School  
555 W. Martin St.  
Apopka, FL 32712

Noviembre 9, 2005  
5:00 PM a 8:00 PM

#### 2. Taller en Condado Lake

Patrocinado por FDOT  
Lake Receptions  
4425 N. Highway 19-A  
Mt. Dora, FL 32757

November 10, 2005  
5:00 PM to 8:00 PM

#### 3. Taller en Condado Seminole

Patrocinado por FDOT  
Sanford Civic Center  
401 E. Seminole Blvd.  
Sanford, FL 32771

Noviembre 14, 2005  
5:00 PM a 8:00 PM

Estos talleres se llevan a cabo para informar al público en general el progreso del proyecto y saber su reacción con relación al estudio. Alternativas al concepto inicial de Wekiva Parkway, presentación de estudio, tableros de demostración y otros proyectos de información, estarán disponibles en los talleres para que el público revise. Representantes del equipo de estudio estarán disponibles para proveer asistencia. Estas reuniones serán informales. El público está invitado a asistir a cualquier hora durante el taller para revisar la información sobre el proyecto, hacer preguntas, y discutir cualquier idea o asunto con los miembros del equipo de estudio de PD&E.

Su asistencia a éste taller es recomendada y su comentarios serán apreciados.

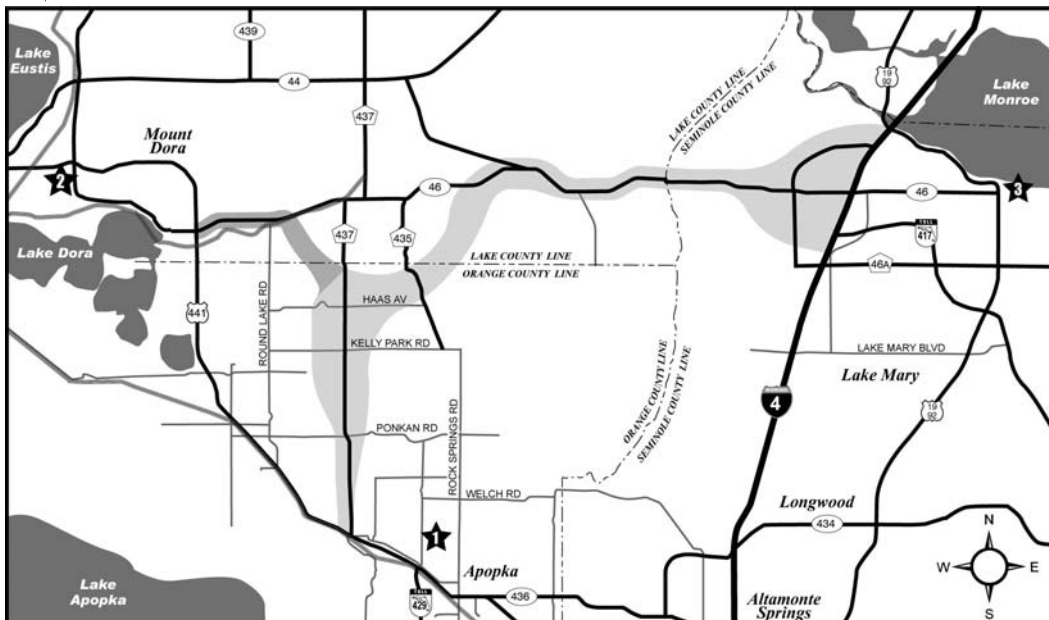

Comentarios por escrito se pueden entregar en el taller o enviar por correo a:

Sra. Mary Brooks  
Public Information Officer  
10151 University Blvd., Suite 222  
Orlando, Florida 32817

También puede enviar comentarios por e-mail ([mbrookssr414@cfl.rr.com](mailto:mbrookssr414@cfl.rr.com)) o por fax (407.381.9038). Cualquier persona con preguntas o necesitando asistencia especial bajo el Acto de 1990 para Americanos Incapacitados, debe contactar a Sra. Brooks por teléfono al 407-702-8375 o escribiendo a la dirección antes mencionada. Para solicitar acomodo bajo el Acto de Americanos Incapacitados, debe hacerlo por lo menos siete (7) días antes del taller.

## INITIAL ALTERNATIVES PUBLIC WEKIVA PARKWAY PROJECT DEVELOPMENT AND ENV

The Orlando-Orange County Expressway Authority (OOCEA) and the Florida Department of Transportation (FDOT) will conduct public workshops on the initial alternatives for the Wekiva Parkway Project Development and Environment (PD&E). The purpose of the workshops is to evaluate and select a preferred concept for the Wekiva Parkway within a 25-mile corridor from US 441 in Orange County to US 441 in Lake County.

Three public information workshops will be held between November 9 and 10, 2005, to accommodate residents and business owners in Orange, Lake and Seminole counties. Information will be provided at all three workshops. The times and locations are as follows:

### 1. Orange County Workshop

Sponsored by OOCEA

Apopka High School

555 W. Martin St.

Apopka, FL 32712

November 9, 2005

5:00 PM to 8:00 PM

### 2. Lake County Workshop

Sponsored by FDOT

Lake Receptions

4425 N. Highway 19-A

Mt. Dora, FL 32757

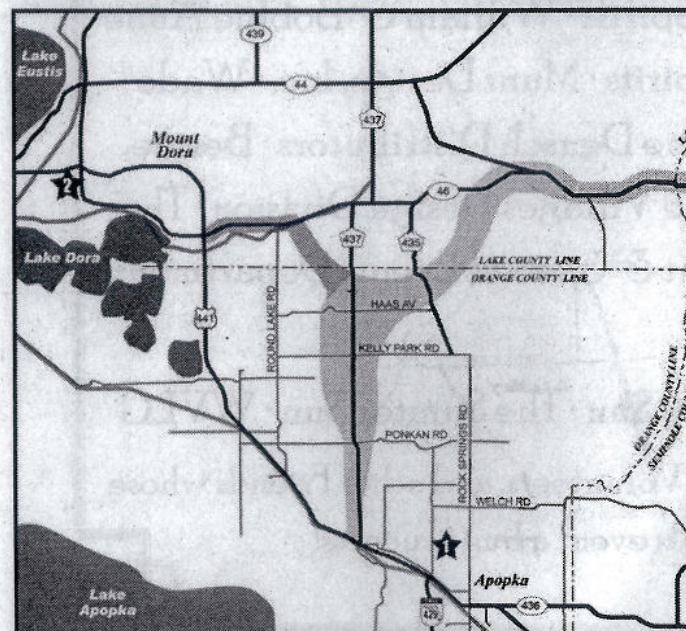

November 10, 2005

5:00 PM to 8:00 PM

These workshops are being held in order to inform the general public of the project's progress and to solicit feedback in regards to the study. Initial conceptual alternatives for the Wekiva Parkway, a study overview presentation, display boards, and other pertinent project information will be available at the workshops for public review. Representatives of the study team will be available to provide assistance. The format of the meeting will be informal. The public is invited to attend any time during the workshop to review the project information, ask questions, and discuss any ideas or concerns with members of the PD&E Study team.

Your attendance at this workshop is encouraged and any comments made will be appreciated.

**WEKIVA PARKWAY**  
Project Development and Environment Study

Public participation is solicited without regard to race, color, religion, gender, age, or disability.

Written comments can be submitted at the workshop, or by e-mail to:

Ms. Mary Br...  
Public Inform...  
10151 Unive...  
Orlando, Flo...

Written comments can also be submitted by e-mail to: (407) 381.9033. For special accommodations, please call the Florida Department of Transportation, Division of Accessibility, at (800) 955-4771. Written comments can also be submitted by telephone to the address above under the name of the project. Written comments can also be made at the workshop.

### **La Prensa Advertisement**

The Spanish language advertisement for the Wekiva Parkway public meetings was placed in the October 27, 2005 edition of the La Prensa newspaper. The La Prensa has failed to respond to several requests for an affidavit of publication.

**DEADLY ROADS: A SPECIAL REPORT**

## S.R. 46 takes a grisly toll

In 2004, 20 people died on the highway in Lake and Seminole counties, making it Central Florida's deadliest road.

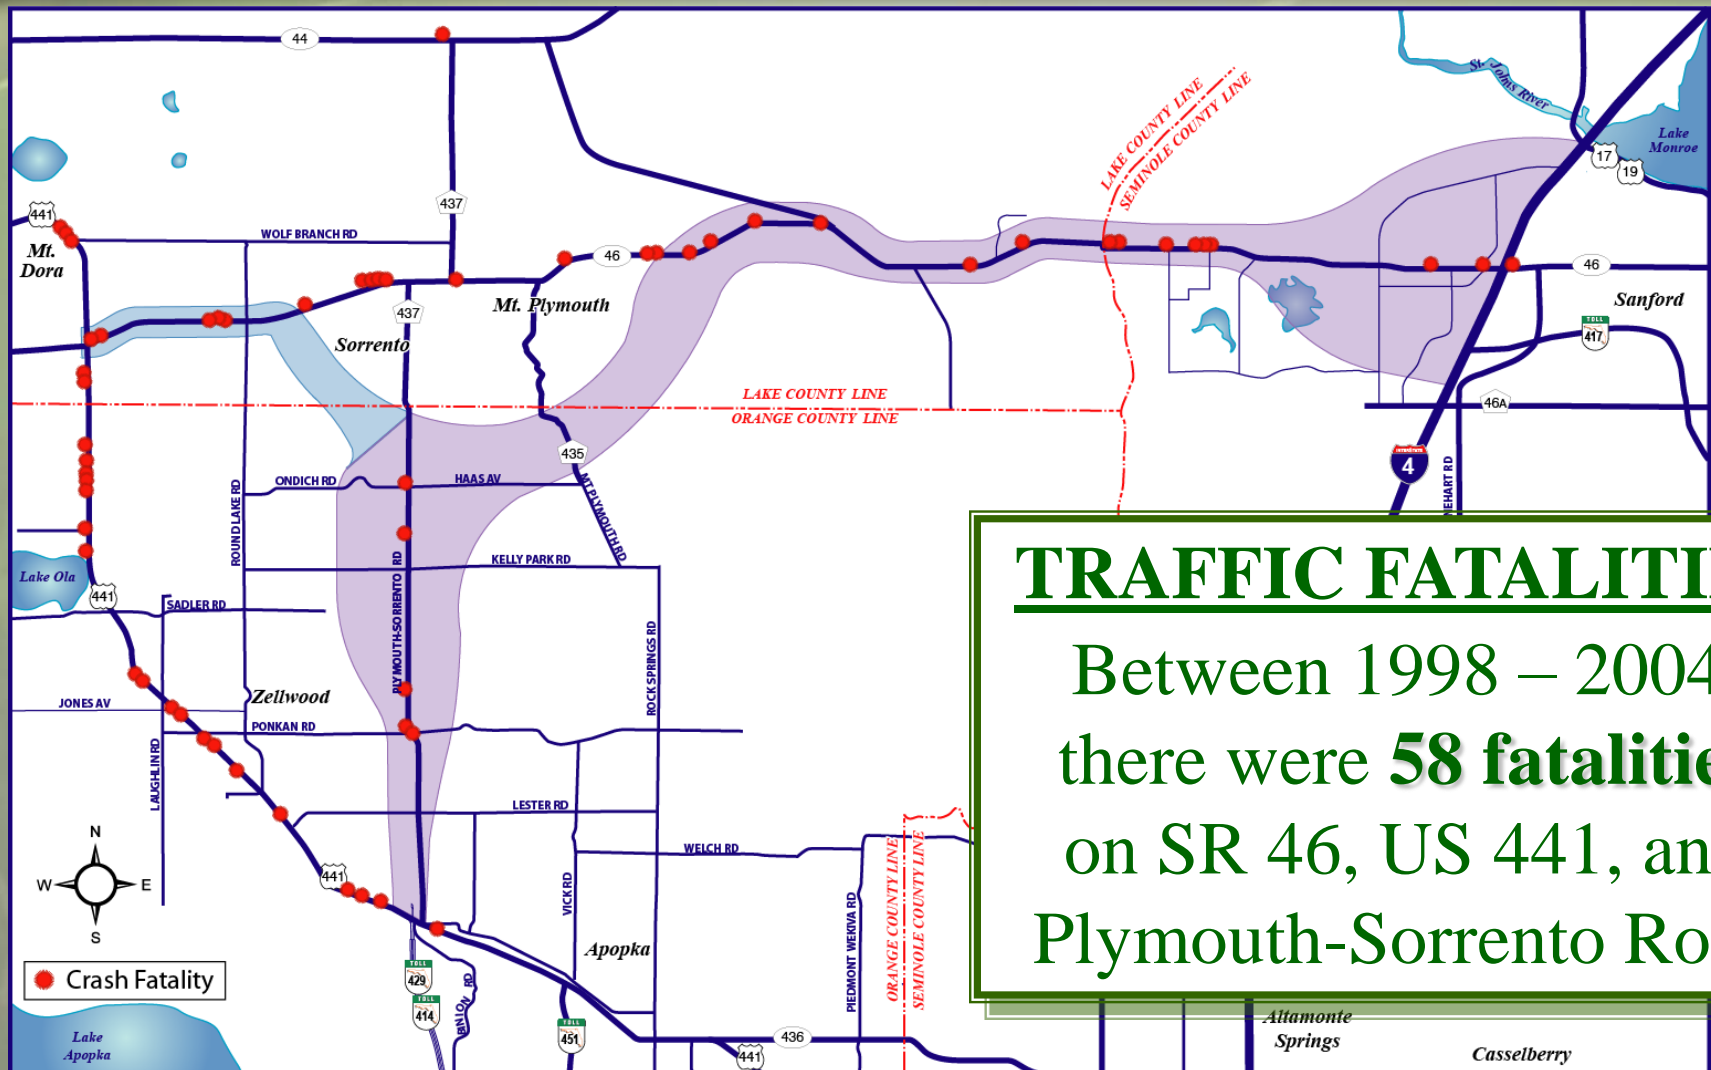

39-mile stretch tops S.R. 50 as area's riskiest

| Location                                    | Victim          | Date |
|---|-----------------|------|
| 1. Kenneth Carty, 70, Michigan              | Killed March 18 |      |

## PROJECT INFORMATION

### **Background**

The Wekiva Parkway is one component of a comprehensive plan developed at the direction of Governor Jeb Bush. Through a 2003 Executive Order, and the subsequent 2004 State Statute entitled the "Wekiva Parkway and Protection Act", the Wekiva River Basin Commission was created and tasked with certain priorities for growth management and a sustainable environment, including master stormwater management, water supply protection, land use strategies, and land acquisition for conservation. The legislation recognizes the importance of the Wekiva Parkway since it would complete the missing link in the Western Beltway around metropolitan Orlando; the Eastern and Western Beltways provide alternative facilities to congested I-4.

### **Description**

The purpose of the Wekiva Parkway Project Development & Environment (PD&E) Study is to select the most appropriate alternative for the roadway to serve the community's needs while minimizing potential impacts to the environment, surrounding homes and businesses. The Wekiva Parkway PD&E Study is jointly managed by the Orlando-Orange County Expressway Authority and District Five of the Florida Department of Transportation. The project is composed of the following:

- ***The Wekiva Parkway***, a 4 lane divided (expandable to 6 lane divided) limited access facility, which would begin in Orange County at US 441 just west of CR 437 and extend to the north/northeast into Lake County, turning east and crossing the Wekiva River into Seminole County and terminating at I-4. The approximate length of the Wekiva Parkway is 20.54 miles, with 8.42 miles in Orange County, 7.23 miles in Lake County and 4.89 miles in Seminole County. Only the portion in Orange County is expected to be tolled.
- ***SR 46 Reconstruction and Realignment*** which would begin at the SR 46/US 441 interchange in Lake County and extend east to the vicinity of Round Lake Road, then turning southeast on a new alignment entering Orange County with an interchange connection at the Wekiva Parkway. It is expected that the SR 46 improvements would provide 4 lane divided (expandable to 6 lane divided) controlled access along the existing alignment from US 441 to the vicinity of Round Lake Road, while the remaining alignment to the southeast is expected to be limited access. The approximate length of the SR 46 Reconstruction and Realignment is 4.23 miles, with 3.54 miles in Lake County and 0.69 mile in Orange County.
- ***CR 46A Realignment***, a 2 lane rural (expandable to 4 lane rural) roadway, which would begin on CR 46A in Lake County near the Heathrow Gatwick development area and extend to the south-southeast on a new alignment and tie into existing SR 46 with an access connection to the Wekiva Parkway. The approximate length of the CR 46A realignment is 2.72 miles.
- ***Wekiva Parkway Access Improvements*** would be required in Lake County between the realignment of CR 46A and the Wekiva River to allow access to the private property along existing SR 46. It is proposed that the Wekiva Parkway would carry all traffic crossing between Seminole and Lake Counties, and provisions for access would be required for several properties in this area of Lake County and Seminole County.

### **Schedule**

The PD&E Study is scheduled to be complete in March, 2007. After a Public Hearing in each county, the study will culminate in the recommendation of a preferred alternative. Final design, right-of-way acquisition, and construction are not fully funded at this time, so the start and completion dates for those activities are currently undetermined.

*Public Workshops (November, 2005)*

November 7, 2005

**Subject: Wekiva Parkway Project Development and Environment (PD&E) Study  
Public Information Workshops on Initial Alignment Alternatives  
Orange, Lake and Seminole Counties, Florida**

The Orlando-Orange County Expressway Authority (OOCEA) and District Five of the Florida Department of Transportation (FDOT) are sponsoring public information workshops on the initial alignment alternatives developed in the Wekiva Parkway PD&E Study. The goal of this PD&E Study is to evaluate and select a preferred concept for the Wekiva Parkway. The project is proposed to extend within a 25-mile corridor from US 441 in Orange County to US 441 in Lake County and to I-4 in Seminole County. Additional information is available online at [www.expresswayauthority.com](http://www.expresswayauthority.com).

Three public information workshops will be held between November 9, 2005 and November 14, 2005 to accommodate residents and business owners in Orange, Lake and Seminole Counties. The same information will be provided at all three workshops. The times and locations of these meetings are highlighted in the table below.

Initial conceptual alternatives for the Wekiva Parkway, a study overview presentation, display boards, and other pertinent project information will be available at the workshops for public review. Representatives of the study team will be available to assist the public. The format of the meeting will be informal. Follow-up workshops are scheduled for mid-2006 to further discuss and refine the viable alternatives. Public hearings will take place near the conclusion of the PD&E Study, which is currently scheduled for late 2006/early 2007.

Ms. Mary Brooks, Public Involvement Coordinator, may be contacted by anyone needing project or workshop information. Ms. Brooks can be reached at (Cell) 407.702.8375, (Fax) 407.381.9038, (E-mail) [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com) or write to 10151 University Blvd., Suite 222, Orlando, FL 32817.

### Comment Form Summary

Wekiva Parkway PD&E Study  
Public Workshop Comment Form Responses  
November 9, 10, & 14, 2005

Produced by:  
Quest Corporation of America  
Mary Brooks, Public Information Officer  
Candace Patterson, Data Analysis and Graphic Layout

As part of the Wekiva Parkway Project Development and Environment (PD&E) Study, public workshops were held on November 9, 10, & 14, 2005 (respectively, at the Apopka High School in Orange County, Lake Receptions in Lake County, and the Sanford Civic Center in Seminole County). The workshops provided an opportunity for the public (local residents, business owners, local government officials, property owners, media and other interested parties) to review and comment on 24 exhibit boards including the initial alignment alternatives, interchange and typical section concepts, traffic forecasts and other project info. Representatives from the Expressway Authority, Florida Department of Transportation – District 5, PBS&J, CH2M Hill, QCA and others affiliated with the project were available to answer questions and respond to the public's comments and/or concerns. Comment forms were available and positioned throughout each of the meeting spaces. A court reporter also was present at each meeting for those wishing to give verbal comment.

**Dates:** Wednesday, November 9, Thursday, November 10, & Monday November 14, 2005

**Time:** 5:00 p.m. – 8:00 p.m.

**Locations:** Orange County: Apopka High School, 555 West Martin Street (11/9); Lake County: Lake Receptions 4425 North Highway 19-A (11/10); Seminole County: Sanford Civic Center, 401 East Seminole Boulevard (11/14)

**Project Team Attendees:**

Orlando Orange County Expressway Authority, (Owner Orange County)-  
Michael Snyder, Joe Berenis

Florida Department of Transportation, (Owner Lake and Seminole Counties, attended only the Lake and Seminole County Meetings)-  
Tom Percival, Anne Brewer, Steve Homan (Seminole meeting),  
FDOT Right of Way Acquisition representatives

PBS&J-

Gary Skaff, Deborah Keeter, Glenn Pressimone, Bill Terwilleger

## MEETING ATTENDANCE & COMMENTS RECEIVED:

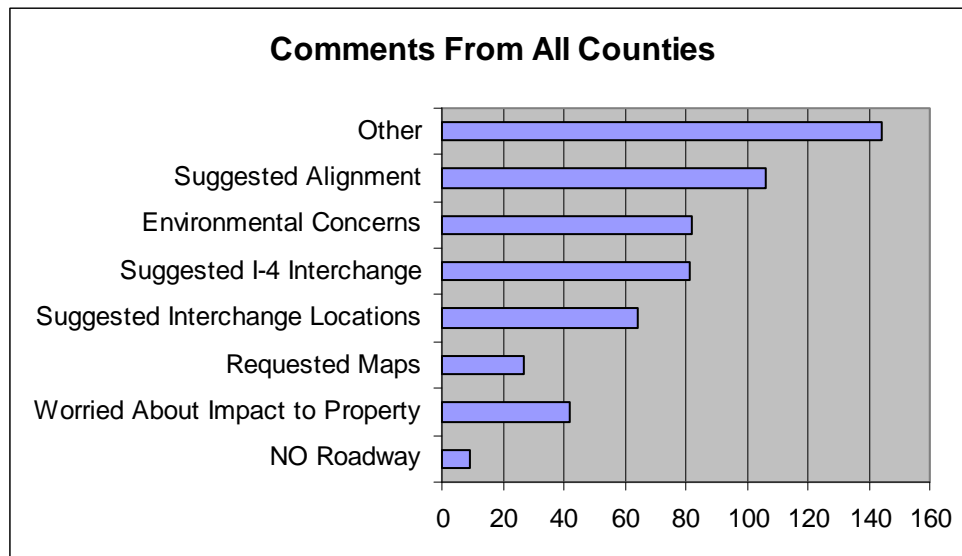

A total of **1,147 people** signed in at the public workshops. There were 408 attendees in Orange County, 259 in Lake County, and 480 in Seminole County. A wide range of comments were received from the public. A total of **285 comment forms were submitted** either at the meetings, or later faxed, emailed or mailed to Public Information Officer Mary Brooks. Additionally, at the meetings **17 people gave their comments verbally** to the court reporter, for a **grand total of 302 comments** received as a result of the public workshops.

There were 89 comment forms submitted for Orange County, 69 for Lake County and 128 for Seminole County. The court reporter took comments from four (4) people at the Orange County workshop, nine (9) people at the Lake County workshop, and from two (2) people at the Seminole County workshop.

The comments received at and after the workshops were detailed and typically specific to the needs of each person. **Over all, most of the responses suggest that the public has accepted the need for the project**, with many stating their preference for various alignment alternatives. Nine responses stated that they did not want the proposed road to be constructed.

Graph 1 and Table 1 show a general overview of the comments or topics by category. For the sake of simplicity the category of "Other" has been implemented to represent individual forms that covered a combination of topics. A detailed list of the topics or categories is described in Table 2. Please note that the number of comments will not match the total number of forms submitted as most forms covered multiple topics or concerns about the new roadway.

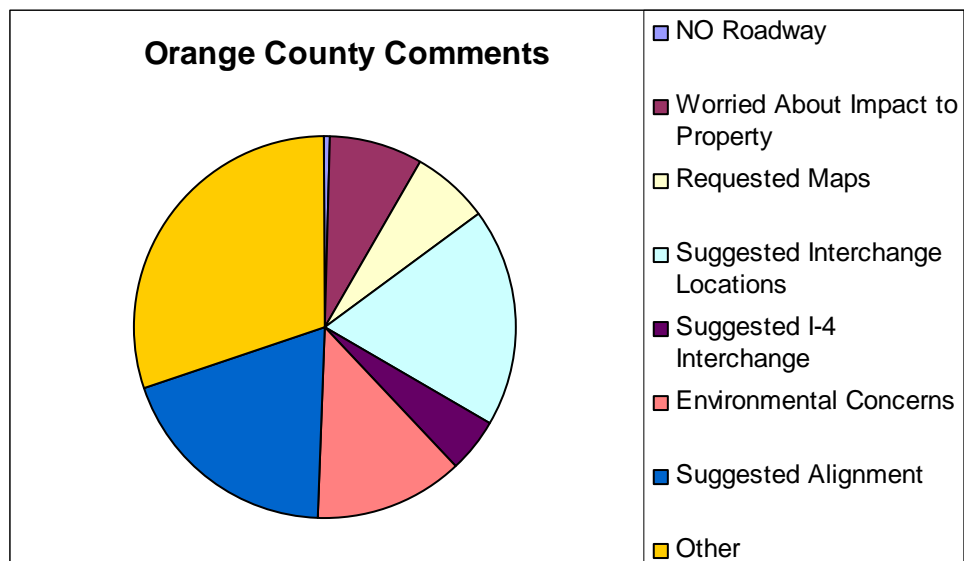

**Graph 1: Comments from All Counties**

**Table 1: Major Topics Covered in Workshop Comments Forms (By County)**

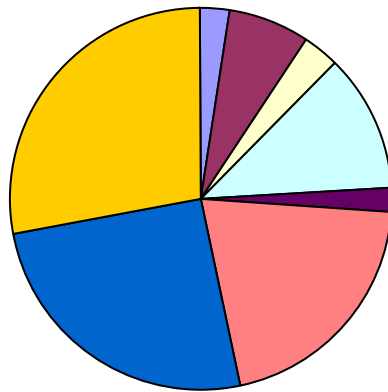

|                                  | Orange County | Lake County | Seminole County | Total |
|----------------------------------|---------------|-------------|-----------------|-------|
| NO Roadway                       | 1             | 4           | 4               | 9     |
| Worried About Impact to Property | 13            | 11          | 18              | 42    |
| Requested Maps                   | 11            | 5           | 11              | 27    |
| Suggested Interchange Locations  | 31            | 19          | 14              | 64    |
| Suggested I-4 Interchange        | 8             | 3           | 70              | 81    |
| Environmental Concerns           | 21            | 33          | 28              | 82    |
| Suggested Alignment              | 32            | 41          | 33              | 106   |
| Other                            | 51            | 45          | 48              | 144   |
| Total                            | 168           | 161         | 226             | 555   |

Graphs 2 – 4 show comments made in each county. One Orange County citizen commented they did not want the proposed Wekiva Parkway to be built. There were four similar comments against the project in both Lake and Seminole Counties. All counties have a large percentage of suggested alignments. There were also numerous comments stating that conservation properties should be purchased as described in the Wekiva Parkway and Protection Act.

**Graph 2, 3, & 4: Comments Divided by County**

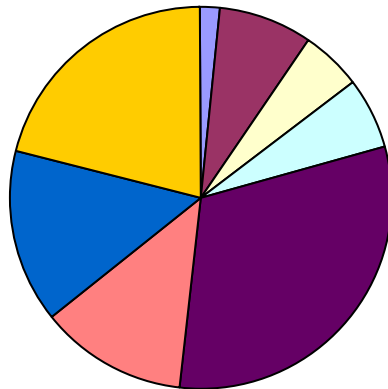

### Lake County Comments

- NO Roadway
- Worried About Impact to Property
- Requested Maps
- Suggested Interchange Locations
- Suggested I-4 Interchange
- Environmental Concerns
- Suggested Alignment
- Other

### Seminole County Comments

- NO Roadway
- Worried About Impact to Property
- Requested Maps
- Suggested Interchange Locations
- Suggested I-4 Interchange
- Environmental Concerns
- Suggested Alignment
- Other

The comments in Table 2 show all issues, concerns or other topics mentioned on comment forms submitted at the workshops. Please note that the number of comments will not match the total number of forms submitted due to many forms covering multiple topics.

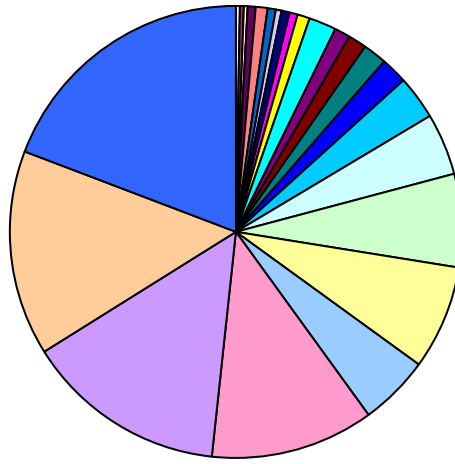

**Table 2: All Issues Covered in Comments Forms**

|   | Orange County | Lake County | Seminole County | Total |
|---|---------------|-------------|-----------------|-------|

| Gave suggested alignment                                 | 32  | 41  | 33  | 106 |
| Total  | 168 | 161 | 226 | 555 |

### All Comments From All Counties

- ☐ How much physical space will be required for the roadway
- ☐ Wants no tolls on the system
- ☐ Wants to know the reason behind proposed alignments
- ☐ Compliment to Staff of Meeting
- ☐ Wants PowerPoint / handouts / maps on the web
- ☐ Concerned about safety
- ☐ Charge Toll on entire system
- ☐ Dispute name of property on Concept Maps
- ☐ Comment not about this project
- ☐ Wants to know about the landscaping to be put in
- ☐ Penang Nursery Concerns (in Apopka)
- ☐ Wants to know when property will be acquired and / or at a fair price
- ☐ Thanks for the presentation
- ☐ Light Pollution
- ☐ Does not want roadway
- ☐ Go for the Road - Should have already been built
- ☐ Worried about traffic on existing roadways
- ☐ Concerned about Noise Pollution
- ☐ Would like specific property acquired
- ☐ Worried about property being taken or impact to property
- ☐ Requested Maps
- ☐ Gave suggested interchange location(s)
- ☐ Gave suggested I-4 tie in
- ☐ Environmental concerns
- ☐ Gave suggested alignment

## Comment Form

Public Workshop  
November 9, 2005

Name Krist Westlake  
Address 316 Lake Doe Blvd  
City Apopka State FL Zip Code 32703

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: I am employed by Penang Nursery, Inc,  
4720 Plymouth Sorrento Road, Apopka, FL 32712.

I'm concerned about where the Wekiva Parkway  
will be in relationship to Penang. If it doesn't  
go right through the property, it could be very  
good for our company. It would make it easier  
for trucks coming in to pick up our product.

I'm worried, though, that the road would go  
right through Penang. If it did, the owners  
wouldn't rebuild. I'd be looking for a job. It  
wouldn't be just me, but the other 59 employees  
that work here, too. And it wouldn't be just us  
at Penang, <sup>who would be</sup> but all the other nurseries whose plants  
we buy in every week. Besides the nurseries (over)

Please use the back of this form if more space is needed to express your opinions.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: We believe that it is more appropriate to  
4-lane Plymouth Sorrento Rd & 6-lane 441 before  
resorting to yet another toll road. This would  
be more socially and environmentally responsible.  
Assuming that your organization rejects that  
minimally invasive solution to getting Lake  
County's commuters to south Orange County,  
we propose that you look at a more  
western route through areas currently in  
pasture, but for sale to developers. We propose  
a route west of Effie and closer to the dump  
on Golden Gem. This would mean that  
only a few would be disrupted, and  
That developers would be most affected.

Please mail or fax to:

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: My preference is for a route that  
would ultimately do the least amount of harm  
to the area.  
- It appears that the S.R. 46 interchange  
would be better located west of Rock Springs  
Run S.R. and Seminole State Forest  
- I would rather not see the route go through  
Rock Springs Run S.R. at any point

Thank you for your consideration of my  
comments

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: I WOULD LIKE TO SEE THE BLUE OR SOUTHERN MOST ALIGNMENT UTILIZED FOR THE S.R. 46-46-A SEGMENT OF THE PARKWAY.

THESE ARE MY REASONS

- ① THE BLUE OR SOUTHERN MOST ROUTE IS A MORE DIRECT, SHORTER & THUS LESS EXPENSIVE ROAD <sup>TO BOIL</sup>
- ② BY UTILIZING THE BLUE, THE ENTRANCE RAMP JUST SOUTH OF THE SAWMILL CAN BE MOVED FURTHER WEST TO AVOID IMPACTING ANY CONCERN IN THE AREA TO RESIDE
- ③ LET'S KEEP THE PARKWAY SOUTH OF 46, THE WAY IT HAS BEEN SPOKEN ABOUT FOR YEARS.
- ④ THIS ROUTE MAKES FOR A BETTER ENGINEERED ROAD AND IN THE LONG RUN IMPACTS LESS PEOPLE FOR MANY YEARS TO COME.

Please use the back of this form if more space is needed to express your opinions.

Comments: I attended the public workshop on Nov. 9 and have had sufficient time to summarize my comments as follows. First and foremost, I strongly object to the proposed alignment that runs northeast from Kelly Park Road crossing Hags Road. Not only does that route slice through my valuable Valencia orange citrus grove - it also diagonally crosses ~~across~~ across a very broad area of picturesque rural lands that are essential to the recharge capability of the western edge of the Wekiva River Basin.

Second, as of November 15, my properties (approximately 100 Acres) and that of my immediate neighbors totaling 210 acres have adopted as Orange County's newest and best rural settlement district known as Rainbow Ridge. This proposed alignment would negatively impact the rural character we are striving to preserve and enhance with two-acre homesites. I see no reason to bifurcate northwest orange county by crossing Plymouth-Sorrento Road twice ~~between~~ between Kelly Park Road and the county line. over -

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

- WEKIVA PARKWAY: THE INTERCHANGE IN LAKE COUNTY AT SR46 SHOULD BE FURTHER TO THE WEST CENTERED ON THE NEIGHBORHOOD LAKES PARCEL. THE SHOWN POSITION IS VERY DETRIMENTAL TO THE WILDLIFE CORRIDOR AND IS REDUNDANT WITH SR46.
- CR46A REALIGNMENT: SHOULD BE ROUTED FURTHER WEST ALONG SIDE HOJIN RD & CURVE INTO PARKWAY INTERCHANGE IN NEIGHBORHOOD LAKES PARCEL
- SR46 RECONSTRUCTION: THE POSSIBILITY OF ROAD BEING EXPANDED TO 6 LANE VERY DISTURBING. IMAGES ON SR436 & RESULTING SPRAWL NOT APPROPRIATE FOR AREA.

COMMENT FORM

TO: WEKIVA PARKWAY PD&E STUDY  
(Orange, Lake, and Seminole Counties)

FROM: Chia Ton and Mary Lo, Penang Nursery Inc.  
4720 Plymouth Sorrento Road  
Apopka, Florida 32712  
(Mail P O Box 1658, Apopka, Fl 32704)  
407-886-2322 (office)

We own 25 acres in your study area and operate our wholesale foliage nursery on the property. We purchased the land in 2002 and have invested over \$1 million in buildings and assets for our business. There would be significant impact to our business, our employees, and other nurseries in the Apopka area should our location be taken away for the Wekiva Parkway construction.

This property serves as corporate headquarters, greenhouse production area, and distribution warehouse for our products. We hire approximately 50 employees year round at this site and 8-10 other employees at our 2 satellite greenhouses in Apopka (Rock Springs Road and Kelly Park Road.) We have been in business since 1981 and have gross sales in excess of \$6 million. Our employees would be displaced if our business had to close. Many have been with our company over 5 years and enjoy the benefits of our corporate Profit Sharing Plan as they plan for retirement.

In addition to the negative impact to our employees, other foliage nurseries in the Apopka area would be affected if our business closed. We are brokers and therefore purchase over \$100,000.00 of foliage material from local nurseries and growers each month during our busy season (January-May). We often establish contract-growing arrangements with certain nurseries to supply us with a particular crop during the year. Several nurseries sell to Penang Nursery Inc. exclusively or rely on our company for a large percentage of their sales volume.

Finally, the Orange County Fire Department required us to put in a Fire Well on our property and make it available to them for fire protection of residents and property owners near us. This well, which we are prohibited from using for our greenhouse operation, cost over \$20,000.00. We had to construct this well, give the fire department 24-hour access to our property as needed, and incur the expense of doing so without direct benefit to our day-to-day operations or profitability.

We ask that you consider the economic impact of taking our property for the Wekiva Parkway. It would negatively impact our employees and other nurseries in the area. Penang Nursery Inc. has grown tremendously since the early 1980s. The investments of time and financial resources over the past 25 years, as well as the business relationships we've established with local nurseries and customers in the United States and Canada, need to be considered as alternative routes for the Wekiva Parkway are examined.

Wekiva Parkway PD&E Study, Orange County  
ATTN: Ms. Mary Brooks  
10151 University Blvd.  
Orlando, Fl.

Dear Ms. Brooks:

Our neighborhood lies in Northwest Orange County between Kelly Park Rd. and Ondich Rd and Plymouth Sorrento Rd and Effie St.

This area consists of rolling hills, pristine pastures, woodlands, acreage home sites and the highest elevation in Orange County. There are five spring-fed ponds in this small area and we are in very close proximity to Rock Springs (Kelly Park) and Wekiva Springs. This would indicate that this area is a valuable part of the watershed that supplies our aquifer.

There are at least five federally and state protected species of wildlife that inhabit this area and a large variety of other species.

Paulette St., which lies in the middle of the area described above, has been a platted subdivision for at least 28 years.

We, as the owners of this entire community, would like to know where the environmental impact studies are and who did them? We would like to see them.

We, as the owners of the land on Paulette St., do not understand why it would be necessary to build through a long established subdivision when open land lies to the east and west?

We will all await a reply.

Sincerely,

Ina Boyd

December 15, 2005

RE: 2404 Plymouth Sorrento Road

Currently the location of the proposed Beltway extension will be going over three (3) homes in our Plymouth Harbor Subdivision (parcel id# 30-20-28-0484-00-040 and 25-20-27-0000-00-021 see attached). We would like to propose an alternative to this preliminary location. According to the web site location, the south-west corner of our development will be impacted. Please see our attached site plan showing the location of three (3) homes in the area where the Beltway will be located. Since this is such a slight impact we would like to suggest that the alignment be moved west approximately one hundred feet. This parcel (id# 25-20-27-0000-00-007) to the west is vacant, the belt way will already impact the majority of this parcel and this site would allow for the entire Beltway usage. We would like to suggest that this area be considered for an alternative moving it slightly straighter and to the west therefore, this would eliminate the impact on our site. As you can see this would also eliminate the Expressway Authorities need to purchase over 1 million dollars of homes that will built on those sites.

We believe this would be a very minor adjustment form the proposed alignment, but would be in the best interest of the Expressway Authority and our subdivision. Classic Homes understands this is a daunting task to review and locate the new extension, therefore impacting the least amount of home sites would be in the best interest of the Expressway Authority and also for the public.

Should you have any questions about this comment form please contact Randy Lazarus at 407-875-3100 ext. 3# or Shelly Dean at ext. 0#. We appreciate your consideration for alternatives for this area.

Sincerely,

A handwritten signature in black ink, appearing to read 'Shelly Dean', written over a horizontal line.

Shelly Dean

Comments: Penang Nursery has a big part in my business  
from day to day. I depend on his sell to help me  
operate my business. If Penang Nursery close  
this operation this would really reduce my  
sell's and my income down to very little. not  
only me but a lot of business in this area.  
As a small business I have a lot of  
concern about the closing of Penang Nursery.  
and I know that a lot of hard work has  
been done to get Penang Nursery going, the way  
it going now. SO Stop the Wekiva Parkway  
from Penang Nursery.

#### notes

My property has been deliberately left uncleared except around the house and outbuilding for firebreak.  
Dead pine trees are full of bird homes, brush contains wild rabbits and brown thrasher birds  
Extensive pine forest to west of my property provides homes for pine preferring wildlife  
Extensive ranchland (pasture) directly south of my property provides the open spaces and borrowing places.  
Mostly uncleared, non-pesticide or herbicide but some open areas on my property includes:

Comments: I have land on Ply-Sorrento Rd.

I've lived there for 18 years. I don't  
want to change my life style. I  
love my land and neighbors.

The yellow alignment seems to  
have the least density, and  
the best route that I can see.  
I will "fight" to keep my land and  
my lifestyle. Please don't destroy  
my security and my happiness.

J. Cherney

Comments: IF my property is impacted, how do I  
ensure that I will be paid a fair price?

Obviously we don't want to have to have to  
move. We have lived on this property for 12 years  
and just built a log home on our 5 acres three  
years ago. The anxiety produced by the length  
of uncertainty is overwhelming.

Please let us know as soon as possible  
the likelihood that we will be affected.

Thank you.

Comments: All along I knew something was  
coming as each subdivision was added to  
437 + Shapke Rd - I resent the fact  
that we are strung along and left to  
wonder what to do - Should we stay or  
should we go - We worry about the  
Emminent Domain law and can we ever live  
again as we used to. Will we be paid  
enough to replace what we have and  
where will we go.

Comments: I own a wholesale Foliage Nursery in Oviedo. I have grown plants for  
Penang Nursery, Inc. for over 20 years. Approximately 90% of the  
plants I grow are sold through Penang Nursery, Inc. The relationship  
Ton Lo and I have developed through the years is one that is mutually  
profitable for each of us.

Penang Nursery, Inc. has already relocated once due to the population  
growth in the Apopka area. The location Penang Nursery, Inc. is  
currently at is one that is less populated and easier to access than  
before. I am concerned that if the expressway forces Penang Nursery,  
Inc. to relocate again, Mr. Lo will not be as willing to go through the  
time consuming and costly process. If he decides not to relocate and  
in turn closes his business, it would be detrimental to my business. As  
I have stated, Penang Nursery, Inc. brokers 90% of my plants.

I am a small Nursery and do not broker my plants. The relationship I  
have developed with Penang Nursery, Inc. and Mr. Ton Lo through the  
years is in dire jeopardy if the expressway chooses this route. I urge  
you to reconsider and explore other routes which may be less  
disruptive for the people involved with this business.

Thank you for your time.

Comments: (1) To ensure the least possible environmental impacts, the proposed interchange in Lake Co. at SR 46 should be moved West to avoid taking existing public lands (Seminole State Forest & Rock Springs Run State Reserve). Then the alignment of the WP should track SR 46 - why take more land when there is already a road there? This would eliminate some <sup>of the</sup> costly bridging for wildlife that will <sup>otherwise</sup> be necessary on both roads. (2) Neighborhood Lakes property should be purchased for this road & conservation purposes - and the proposed alignment should be shifted west and through this property rather than through already existing public lands and wildlife corridors. (3) It makes sense to use the Portman Road interchange as opposed to the one proposed for Kelly Park Road since KPR does not access SR 441 directly. (4) The logical connection to I-4 is a multifunctional interchange with I-4 and 417 - if this isn't done now, in a few years it will be

Comments: The S.R. 46 interchange with new  
beltway should be located west of  
Rock Springs State Reserve and Seminole State  
Forest.

The westernmost routes shown on Expressway  
Authority maps should be followed & remove  
any easternmost routes through the corner  
of Rock Springs Run State Reserve.

Purchase all the property proposed in the  
Wekiva Parkway and Protection Act.  
Bridge the Parkway through the Wildlife  
Corridor.

Comments: The "spur" alignment through  
Wolf Branch Sink would not be consistent  
with a) Task Force recommendations which  
always called for ingress east of  
Reed Lake Road. It would also  
impact more environmentally sensitive  
land and existing resources - a  
lose, lose situation.

Comments: Referencing sheet #4: The intersection  
placement EAST of Neighborhood Lakes  
is inconsistent with the WP&P Act  
incorporation of the Task Force recommen-  
dations (R7D). Placement on Neighborhood  
Lakes would align with the 46A realign-  
ment, reduce widening of 46 as a feeder  
to the intersection, and only requires a short,  
local connector to the newly isolated  
properties on SR 46 south of the closed  
CR 46A. This would also impact local  
animal crossing areas.

Comments: THE ENVIRONMENTAL COMMUNITY WAS OF THE  
UNDERSTANDING THAT THE ROADWAY WOULD BE BRIDGED  
TO THE GREATEST EXTENT POSSIBLE<sup>THROUGH PUBLIC LANDS</sup>. WE CONTINUE TO  
BELIEVE THIS IS NECESSARY. (NOT ELEVATED)

- THE ALIGNMENT SHOULD NOT EXTEND THROUGH THE PUBLIC  
LANDS - ROCK SPRINGS, BUT SHOULD BE LOCATED ON AN EXPANDED  
~~RED~~ EXISTING ROW TO THE GREATEST EXTENT POSSIBLE.
- THERE SHOULD NOT BE AN INTERCHANGE IN THE MIDDLE  
OF THE ENVIRONMENTAL LANDS, BUT RATHER<sup>TO THE</sup> WEST.
- THERE SHOULD BE ONLY ONE ROADWAY THROUGH THE  
PUBLIC LANDS.
- NEED TO PURCHASE 4 PARCELS LISTED IN PARKWAY  
ACT.

Please use the back of this form if more space is needed to express your opinions.

Comments: AT THE EXCHANGE FOR THE MAITLAND  
BLVD EXT. @ 441 / PLYMOUTH SERRANO RD /  
HIGHLAND ROAD (SEE ROUGH MAP) (ON BACK)  
IT IS AN IMPOSSIBLE INTERCHANGE NOW  
DURING RUSH HRS & VERY QUESTIONABLE  
AT ALL OTHER TIMES. OUR SUGGESTED  
SOLUTION WOULD BE TO CUL-DE-SAC  
HIGHLAND / OLD DIXIE HIGHWAY TO AVOID  
TRAFFIC GOING STRAIGHT ONTO P/S. ROAD  
& REALIGN & REDUNDING BOY SCOTT &  
ONTO 441 - ALSO NORTH OF BOY SCOTT  
THE ROAD COULD BE REALIGNED TO  
CARRY MUCH OF THE NEW DEVELOPMENT  
NORTH & NNW OF ERROL ESTATES

Comments: I BELIEVE THE FOLLOWING 4 ACTIONS SHOULD BE TAKEN:

- ① DOCEA + FDOT SHOULD ELIMINATE THE MOST EASTERLY ALIGNMENTS THROUGH THE NEIGHBORHOOD LAKES TRACT + INTO ROCK SPRINGS RUN STATE RESERVE.
- ② DOCEA + FDOT SHOULD LOCATE THE LAKE COUNTY INTERCHANGE IN THE NORTHERN PASTURE WEST OF ROCK SPRINGS RUN STATE RESERVE.
- ③ DOCEA + FDOT SHOULD SEE THAT ALL THROUGH-TRAFFIC SHOULD BE CARRIED ON THE WEKIVA PARKWAY AND SHOULD BE BRIDGED WHEREVER IT CROSSES PUBLIC CONSERVATION LAND
- ④ DOCEA + THE STATE SHOULD ACQUIRE ALL OF THE PROPERTIES IDENTIFIED IN THE WEKIVA PARKWAY AND PROTECTION ACT, OTHERWISE THE ROAD SHOULD NOT BE BUILT.

THANK YOU,

James M. Bramlett

Comments: ① WE RECOMMEND THAT FDOT AND DOCEA ELIMINATE THE MOST EASTERLY ALIGNMENTS THROUGH NEIGHBORHOOD LAKES TRACT AND INTO ROCK SPRINGS RUN STATE RESERVE TO PROTECT THESE SENSITIVE AND SPECIAL ECOSYSTEMS.

② THE LAKE COUNTY INTERCHANGE SHOULD BE LOCATED IN THE NORTHERN PASTURE WEST OF ROCK SPRINGS RUN STATE RESERVE TO MINIMIZE IMPACTS ON PUBLIC CONSERVATION LANDS AND IMPORTANT WILDLIFE CORRIDORS. ALL THROUGH TRAFFIC SHOULD BE CARRIED ON THE WEKIVA PKWY, WHICH SHOULD BE BRIDGED WHEREVER CROSSING PUBLIC CONSERVATION LANDS. → OVER → OVER

Comments: THE ORIGINAL POLICY SET UP BY THE "WEKIVA PARKWAY  
AND PROTECTION ACT" PROVIDES THE "NEIGHBORHOOD LAKES"  
TO BE PURCHASED AND PARTIALLY USED FOR THE NEW ROAD.  
THIS WOULD BE THE BEST LOCATION FOR THE INTERCHANGE.  
THIS WOULD ALLOW THE MOST WESTERN CHOICES  
AND KEEP ROCK SPRINGS RUN STATE RESERVE AND  
SEMINOLE STATE FOREST TO HAVE MINIMAL DISTURBANCE.

THE AUTHORITY HAS A WONDERFUL OPPORTUNITY  
TO MAKE THE BEST CHOICES FOR THE FUTURE  
CITIZENS OF THE AREA - NOT JUST THE TEMPORARY  
BUILDERS AND DEVELOPERS.

THANK YOU FOR THE OPPORTUNITY TO EXPRESS MYSELF.

Comments: I have been told in one breath, that  
Dim is the right of way of the 429 - next  
breath in - not. For over 5 yrs this  
has been going on. Enough!! Why not  
put the 429 - the Sorrento by pass -  
west of Effie east of Round Lake Rd.  
There is nothing there - Let's face  
it, enough I-95 screens - why  
disrupt people when there is plenty  
of open land available - At one time  
it was going just west of Effie  
what happens -? I've even heard that  
this has been called the "Wekiva Ocala Project"  
how about that!!

Comments: I AM CONCERNED THAT THE  
PARKWAY / 46 INTERCHANGE WILL IMPACT  
PUBLIC CONSERVATION LANDS. THE INTER-  
CHANGE SHOULD BE FURTHER TO THE  
WEST. IN ADDITION, THE ROADWAY NEEDS  
TO STAY WELL AWAY FROM ROCK SPRINGS  
PRESERVE. THE CHOSEN ALIGNMENT  
SHOULD BE AS FAR NORTH AND WEST  
AS POSSIBLE. IF THIS MEANS A SLOWER  
DESIGN SPEED BECAUSE OF TIGHTER CURVES,  
THAT IS OK. THE DISTANCES ARE SHORT  
ENOUGH THAT 5 OR 10 MPH CANNOT  
MAKE A GREAT DIFFERENCE IN TRAVEL TIME.  
IT IS UNCONGESTED TRAFFIC THAT WILL SAVE

Comments: The Wekiva Parkway and Protection Act passed by the  
Florida Legislature specifies that in Building this Wekiva Parkway  
(prior to) land for the interchange is purchased in the Neighborhood  
Lakes. Some land is also to be conservation land. The OCEA  
needs to get to work acquiring that property before prices  
go up even more. Under no circumstances should an  
interchange within state conservation lands be sited. These  
lands were purchased over a 20+ year period based on  
the quality of ecological habitat at great expense - millions of  
dollars - paid by the citizens of Florida to leave a legacy for  
our children.  
OCEA should quickly buy the <sup>Neighborhood Lakes</sup> property and choose the farthest west and north  
route for the Parkway to avoid the preserved lands. A slip ramp without facilities  
will allow entry to the Parkway by residents along SR 46. I support the idea of

Comments: I am opposed to the Alignments shown  
on plans SA & 5d - showing an elevated  
Road into the 46 ROW w/ Flyovers @ Orange Blvd  
We ~~are~~ are developing a site at  
the SWC which would be negatively impacted  
by a Flyover at the intersection.  
We strongly favor 5b or one of the  
Alternatives that do not involve an elevated Road  
Along SR 46. A Flyover @ Orange Blvd  
will be a deathblow to our planned Retail center.  
We ~~will~~ should commence construction within  
the year.

I favor an interchange @ Kelly Park over the  
Ponkan Rd interchange.

Please use the back of this form if more space is needed to express your opinions.

Please mail or fax to: Ponkan Rd interchange.

Comments: Prefer Pink route over orange route  
makes more sense for interchange to  
be at Kelly Park reasoning gives 4 miles  
from 441 to ~~Interchange~~ for a limited  
Access Road, if building road for future  
K. Park would be area for access for  
Pontkan has immediate access already to  
441

Comments: \_\_\_\_\_

The intersection at 441 + Plymouth Sorento Rd. is very dangerous. One reason is that Highland Ave. is a part of this intersection next to the Kangaroo Express convenience store. We feel that perhaps something could be done to block off that small section of Highland Ave at the above noted intersection. Thank you for your consideration of our request.

Comments: Very simply, the fewer interchanges the better.  
Given the history of both Orange County and the City  
of Apopka an interchange will spur development. I  
support (3) three interchanges: 1) at Hwy 441 in Apopka  
2) at the intersection of SR 46 and 3) at I-4. Similar  
comments will be sent to State and local representatives.

As someone who has traveled 441 between Eustis and  
Apopka since the days when there was only (one) traffic  
light on 441 in that entire stretch, I think it is important to  
maintain traffic flow. The flyover concept for  
the 441 - 46 interchange is definitely superior  
to the other option

Comments: FIRST, THIS FORM IS RIDICULOUS. PEOPLE  
SHOULD BE ALLOWED TO VOICE THEIR CONCERNS AND  
LET THEIR NEIGHBORS HEAR ALL SIDES. WHY WOULD  
ANYONE CONSIDER PLACING THE INTERCHANGE IN THE  
MIDDLE OF THE PROTECTED AREAS WHERE THERE  
AREN'T EVEN ANY FEEDER ROADS? THE  
INTERCHANGE SHOULD BE AS FAR WEST AS  
POSSIBLE. THE ONLY REASON I COULD SEE  
WHY IT MIGHT NOT BE BUILT THERE IS BECAUSE  
OF DEVELOPMENT INTERESTS ALONG THE WESTERN  
BELOWAY. PLEASE CONSIDER HOW FRAGILE AND  
PRECIOUS THIS AREA IS AND WHAT A GIFT IT  
IS TO THE PEOPLE OF FLORIDA.

Comments: \_\_\_\_\_

My concern about the proposed (w) metes near Ondich Rd + Plymouth Sorrento Rd is that it is too near Plymouth Sorrento Rd. I feel that road will need to be 4 laned eventually anyways + the development that follows it will not be conducive to the expressway running so parallel to it. A route much farther west near Effie Rd would take it to a more rural area + allow for any development to take places made naturally.

Comments: I do not think Hwy 46 should become  
a toll road. Too many people in the  
Plymouth area use 46 to access I-4 and  
there are too few "non-toll roads" available  
for local residents.

Also, if the 429 extension is built &  
the 46 extension is not, with PSR paralleling  
a toll road, the traffic would still be  
bad on PSR and only commercial traffic  
would use the 429 toll rd. Comments,  
please.

Please continue to keep me on the  
mailings because my property abuts the  
proposed corridor.

Comments: I would like to urge the expressway authority  
to remove the easternmost routes through the corner of  
Rock Springs Run St. Reservoir from further consideration. Only the westernmost  
routes shown in the Expressway Authority maps should receive further consideration  
ANY SR 46 interchange should be located West of Seminole State Road  
and Rock Springs Run State Reservoir

The Expressway Authority should follow the policy set by  
the "Wekiva Parkway school protection act" which provides  
that the entire "Neighborhood Lakes" property should be  
purchased, a portion of which should be used for the  
new road and the remainder of land used for preservation  
of this valuable wildlife corridor

Comments: \_\_\_\_\_

① Please choose path for the parkway through Neighbourhood  
lakes, not close to Rock Springs Run!

② Please purchase = 10,000 acres of conservation land  
spelled out in state legislation unanimously passed  
last year!!

③ Please elevate parts of the parkway that are  
above conservation lands!

Thank You.

Please use the back of this form if more space is needed to express your opinions.

Comments: The latest plan shows me of the proposed  
road on our property. We moved to this location  
as it was nice and quiet on the lake and  
a lovely house. I don't want this road  
near our house.

I am in favor of a road but not to disturb  
our lives by noise increased traffic etc  
Why not move the road west toward  
441? As previously planned!

Please mail or fax to:

Comments: I REALIZE THAT THIS PART OF  
THE BY-PASS HAS BE GOING ON FOR  
~~SOME~~ Quite a while and HAVING LIVED  
IN THE AREA 25+ YEARS. IT SEEMS  
THAT THE FURTHER WEST THIS GOES  
THE BETTER. ACCESS TO US-991 & THEN  
NORTH TO THE LAKE CO. VILLIAGES  
and BEYOND. I KNOW MY COMMENTS  
WILL PROBABLY FALL ON DEFT EARS.  
BUT SO BE IT

Comments: I hope you reconsider eliminating  
a portion of T.R. 429 running North to Apopka.  
Your design will reduce travel on T.R. 429  
and the Maitland Blvd.

I prefer the yellow alignment  
closer to Apopka with interchanges  
at Pankas Road and Kelly Park Road.

I would like the Wekiva Parkway  
to be elevated over all wetlands.

Sheet # 5C I think the hook up with 417 in Sanford  
is crucial to make complete Loop.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

AN INTERCHANGE ON KELLY PARK  
ROAD IS MUCH BETTER THAN  
ONE ON PONKAN ROAD.

KELLY PARK ROAD HAS MUCH MORE  
COMMERCIAL TRAFFIC. IT IS A  
MUCH STRAIGHTER ROAD AND MORE  
SUITABLE FOR HIGHER TRAFFIC  
DENSITY.

KELLY PARK ROAD SHOULD BE  
EXTENDED TO THE WEST ALL THE  
WAY THROUGH TO HWY 441.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

The maps and power point were very  
informative.

If a choice is to be made between an  
interchange on Ponkan Rd or Kelly Park Rd,  
I feel we would be better served by placing  
the interchange on Kelly Park Rd. Ponkan Rd.  
is very curvy and has a lot more traffic locally  
due to existing development and the 2 new  
schools being built. It does not need the  
additional burden an interchange would bring.

Kelly Park Rd is a more centrally located  
and direct route. It also allows the possibility  
of a direct route to Hwy 441 as well.

Please use the back of this form if more space is needed to express your opinions.

Comments: the Parkway should follow, east/west, as close to Hwy 46 as possible to minimize the impact on wildlife & existing homes. The new Hwy 46-A should be further east, concluding at EAST of Camp Challenge to move away from wildlife & bear crossings. Heavy tree & foliage s/b planted asap to provide sound barrier for wildlife & residents, and property s/b restricted from THIS MOMENT FORWARD from land clearing & tree cutting. that means, no permits from now on. I live 1/2 mile south of Hwy 46 in the Wekiva River Basin. Since the bridge was rebuilt and with new neighbors, legally AND ILLEGALLY cutting

Comments: Would like to see the following

- 1.) Move interchange off of the  
Wekiva Mitigation Bank (New Garden Coal)  
and place on Neighborhood Lakes Property.
- 2.) Alignment through Neighborhood Lakes  
should be located north to south through  
the middle, bisecting the property Not to one  
side (especially East) or the other. Western alignment best
- 3.) Kelly Park Road should be the only  
interchange on 437 (Plymouth Sorrento Road)
- 4.) System interchange only. No local access  
permitted at that point. (as per legislation)
- 5.) Provide slip ramp access to residents  
along Wekiva Parkway and remove 46. SR 46 →

Please use the back of this form if more space is needed to express your opinions.

Comments: ON Review of the Routes provided  
My preference would be the "pink" line closest  
to SR 46 and East of Camp Challenge less impact to bird life

I would like to highly recommend  
Sound Barriers along the corridor closest  
to the Wekiva River Bridge that connects  
Seminole & Lake County - Noise levels are  
increasing daily -

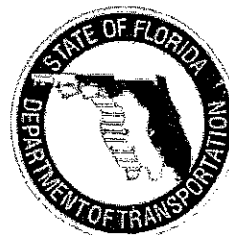

I would like to recommend at this  
time to put a traffic light in at Wekiva River  
Road - getting more difficult to turn.

Please advise who is doing the wild life study  
of the corridor and the results -  
(over)

Comments: I URGE THE AUTHORITY TO SELECT AN ALIGNMENT  
ON PRESENT  
THAT HAS THE LEAST POSSIBLE IMPACT OF CONSERVATION  
LANDS, SUCH AS ONE THAT WOULD ENCRoACH ON ROCK SPRINGS  
PRESERVE. I'M PARTICULARLY CONCERNED THAT INTERFERENCE  
PLACED IN THE MIDDLE OF 46 WOULD HAVE A DEVASTATING  
EFFECT ON WILDLIFE IN THIS SENSITIVE AREA AND BE  
CONTRARY  
DIRECTLY TO THE INTENT PROVISIONS OF THE PARKWAY  
& PROTECTION ACT. SUCH A DECISION WOULD MAKE A  
TRAVESTY OF THE TITENENDOUS EFFORT THAT HAS GONE  
INTO THE ACT AND ITS IMPLEMENTATION TO DATE.

Please use the back of this form if more space is needed to express your opinions.

Comments: SOMEDAY THIS PARKWAY WILL BE A GREAT ACHIEVEMENT  
OF BALANCE BETWEEN GROWTH AND PROTECTION. GROWTH IS  
INEVITABLE SO WHY NOT FOCUS ON THE BEST DESIGN FEATURES  
WORKED OUT OVER THE PAST THREE YEARS. THOUSANDS OF US  
HAVE WORKED HARD FOR THIS.

① TAKE THE WESTMOST ROUTE

② PUT THE EXCHANGE IN THE NEIGHBORHOOD LAKES + PROTECT IT  
AS PROVIDED BY THE LAW

③ ELEVATE THE ROAD IN THE PROTECTED AREAS.

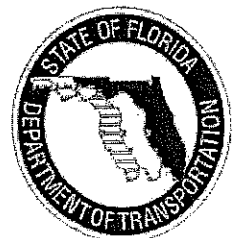

④ BUY SEMINOLE WOODS or PROTECTION OF IT.

IN OTHER WORDS, ENACT THE LAW. THINK OF THE  
EFFECT OF BETRAYING THE PUBLIC TRUST IF WE  
CAREFULLY MAKE A LAW AND THEN BREAK IT!

Please use the back of this form if more space is needed to express your opinions.

WEKIVA PARKWAY PD&E STUDY  
COMMENT FORM PUBLIC WORKSHOP NOVEMBER 10, 2005

It is my understanding that the current plan for the Parkway calls for elimination of the bridge which crosses the Wekiva River at the Lake/Seminole county line. I live on Wekiva River Rd, and I believe this would be a huge mistake.

Currently, this is the only access I have to travel the 1/2 mile to Seminole County. 98% of my trips are in that direction, West to East. More than once, this year alone, I have been unable to return to my home because of an accident or other problem along SR 46. Traffic has been backed up for miles (and hours) because there is simply no other way to get from one side of the Wekiva River to the other.

A second bridge (the Parkway bridge) would allow for an alternate route in case of emergencies. If there were a problem on the Parkway, traffic could be directed to SR 46 and across the river where motorists could then return to the Parkway, thus bypassing the affected area.

The same would be true for motorists on SR 46. In the event of a problem on that road, they could cross the river using the Parkway bridge. This would save motorists much time, and save an enormous amount of gas.

I was also led to believe that to get to the new bridge, once the one on SR 46 is closed, I would have to travel West on SR 46 for some distance, get on the Parkway to cross the river, and then return to SR 46. This would add several miles to virtually every trip I make. An enormous waste of time and gas.

I know that there are environmental concerns to be addressed with this portion of the Parkway, but I feel the benefits of a second bridge far out way those concerns. I certainly hope you will give more thought to this area before a final decision is made.

Sincerely:

Frank J. Ambrogio

Comments: \_\_\_\_\_

— We recommend that the eastern most routes through the corner of Rock Springs Run State Reserve be removed from further consideration. The western most routes shown on Expressway Authority maps are the only ones that should receive further consideration if we have to have it at all.

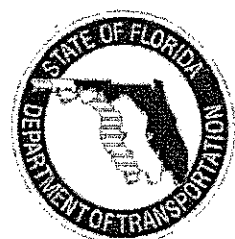

— Locate the State Road 46 Interchange with the new beltway WEST of both Rock Springs Run State Preserve and Seminole State Forest. Although inconvenient to us personally, it is the right thing to do.

— Place the interchange on the "Neighborhood Lakes" property. Follow the policy set in the "Wekiva Parkway and Protection Act" which provides that the entire "Neighborhood Lakes" property should be purchase – both of the new road (if we have to have it) and the balance for preservation.

Comments: The Access of Local Traffic is  
Mandatory for the Neighborhoods. Closing  
Both 46A + 46 is a MAJOR Restriction  
on the Community in that Area. It would  
Better Serve if Closed AT Wekiva River  
+ Allowed to Serve Local Traffic needs  
Back to MT Dora - W - Interchanges to  
Wekiva Parkway to serve along local needs.  
The Wekiva Parkway would Better Suit the  
Majorities needs if kept slightly South  
of the 46 Roadway & behind Existing  
Housing to limit impact to Private Dwelling  
Access

Comments: TO OOCEA & FDOT: Contiguous wildlife  
corridors are essential. To this end:  
1) <sup>Eliminate</sup> the most easterly alignments thru the Neighborhood  
Lakes tract & Rock Springs Run Preserve.  
2) The Lake City interchange s/b located in the N.  
pasture that's west of Rock Springs Run Preserve,  
to have the least impact on wildlife habitat & corridors.  
3) All thru traffic s/b carried on the Wekiva Pkwy,  
NOT on 46 & 46A. This Pkwy s/b bridged whenever  
it crosses public conservation land.  
4) Fulfill your mandate to acquire ALL properties  
identified in the Wekiva Pkwy & Protection Act.  
Do not build this road unless these lands are  
saved. ~~then~~ We have just one chance to do

Please mail or fax to: this right.

RE: SR 46 RECONSTRUCTION

I BELIEVE THAT MORE PEOPLE WOULD BE BETTER SERVED  
IF THEY COULD ACCESS THE WIDER SR 46 AT THE INTERSECTION  
OF ROUND LK. RD.

People in the area who most travel north or south on  
Round Lake Rd and want to get to the Parkway should not  
have to travel back to the West on SR 46 so they can  
go South on the Parkway.

Please use the back of this form if more space is needed to express your opinions.

Comments: Most of The descriptives on The Parkway  
emphasis "limited access". How can you  
promise that. I have seen The promise of  
"limited access" before and it doesn't work.  
Protecting The environment always seems to  
be the least priority.  
The push for this comes from Orange Co. mainly  
and at this point, it feels ~~like~~ like Lake Co  
is simply being gobbled up at an amazing  
rate. How can Lake Co Keep a rural  
Community alive when it is being squeezed  
from the South (look whats happened in Clermont  
& the Green Swamp) and now we'll be squeezed  
from The North with The opening of more  
roadways

Comments: The maps on display do not seem to conform to the spirit and intent of the Wekiva legislation. In particular there appears to be a proposal/tendency to put the road in existing conservation lands, specifically Rock Spring Preserve; a better alignment would be a more westerly course utilizing the legislatively targeted land called "Neighborhood Lakes"

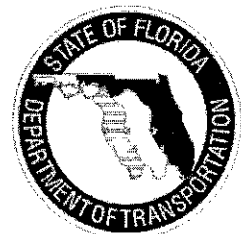

Also, I expected to see a more westerly position for the SR 46 interchange. For optimal traffic flow (for existing residents & not for future developer profit) the interchange should be as close to 491 as possible - and definitely not in the Rock Springs Run State Preserve.

Insofar as the purpose of this road is to relieve SR 46 and consolidate traffic through a sensitive area, it will be necessary to elevate the road where it crosses conservation

Please use the back of this form if more space is needed to express your opinions.

Comments: Recent move from Broward County  
See many options and strongly suggest  
that the Lake County interchange  
should be located in the northern land  
west of Rock Spring Run State Reservoir  
with the least impact to conservation  
and environmental lands  
The original interchange show that the  
most eastern Alignment should be eliminated  
Remember this is for the people who live  
here and what the tax base is made  
of. The people will come wherever the road  
is put listen to the people who care, live  
live here now and pay the taxes.

Comments: I feel that this project  
is going to be great for the progress  
of Lake County. However I feel that  
the proposed Rds. LCW-8, LCW 10, LCW 6  
will have an big impact on the  
community, disrupting the residents who had  
make a living in this area. Also it will have  
a big impact in the environment at Coronado  
Somerset Drive. A beautiful quite street a  
home to human as well as a mile long  
of tunnels which house gopher turtles

Comments: I am not in favor of eliminating 46-A  
and making a new road from Heathrow down to 46  
WILD life issues should be top priority  
I would rather my property be taken completely  
rather than live where I look at an expressway out  
my front door! I moved to country to be in the country  
this wild life area is unique to all of Florida and should  
have top consideration

Comments: The interchange at 46 needs / must  
be kept out of the public lands,  
(Rock Springs Run). It makes no  
sense running the road through  
environmentally vital wildlife corridors  
when there is open land / pasture  
available. Also, the lands that were  
marked for acquisition (all 5) need to  
be acquired!!!

Please mail or fax to:

Comments: \_\_\_\_\_

As a resident of Florida for past 56 years  
I am passionately interested in keeping Florida  
the beautiful natural environ that God made.  
☒ Please do not involve Rock Springs Run in the  
routing.  
☐ Please keep SR46 Interchange with new beltway  
west of Rock Springs Run State Reserve & Seminole  
State Forest

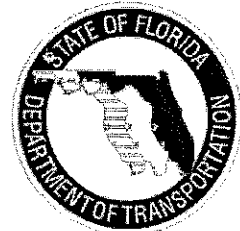

Please follow POLICY set in Wekiva Parkway &  
Protection Act which delineates Neighborhood  
Lakes property <sup>purchased</sup> between for proposed interchange,  
remaining portion used for preservation

Please use the back of this form if more space is needed to express your opinions.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

- Comments: 1. The most easterly alignments through the Neighborhood Lakes tract and into Rock Spgs Run State Reserve should be eliminated
2. UK County interchange should be in the Northern pasture west of Rock Spgs Run State Reserve (least negative impact on conserved land & wildlife)
3. All through traffic should be moved on the Wekiva Pkwy - should be wherever this would cross public conservation land
4. Essential lands must be saved! Acquire all the properties identified in the Wekiva Pkwy + Protection Act.

Please use the back of this form if more space is needed to express your opinions.

Comments: IT IS ESSENTIAL THAT PARKWAY CONSTRUCTION REFLECT THE  
LETTER AND INTENT OF THE WEKIVA RIVER PARKWAY AND PROTECTION  
ACT BY RESPECTING THE INTEGRITY OF THE ROCK SPRINGS RUN  
STATE RESERVE AS WELL AS EXISTING WILDLIFE MIGRATION  
CORRIDORS. THE PARKWAY MUST BE ELEVATED IMMEDIATELY EAST  
OF ~~THE RIVER~~ <sup>MC FLYMOUTH</sup> TO AT LEAST THE RIVER AND INTERCHANGES  
FOR 46 AND 46-A MUST BE LOCATED AS FAR WEST AS  
POSSIBLE AND IN NO CASE IMPINGE ON ROCK SPRINGS RESERVE  
OR SEMINOLE FOREST. THE SURVIVING LENGTH OF 46 <sup>IMMEDIATELY</sup> WEST  
OF THE RIVER MUST BE NO MORE THAN SUFFICIENT TO  
SERVE CURRENT LOCAL RESIDENTS AND IN NO CASE  
SHOULD IT CONNECT TO THE PARKWAY, FOR ANY PURPOSE  
EXCEPT LOCAL RESIDENT ACCESS.

Please use the back of this form if more space is needed to express your opinions.

Comments: you must maintain the initial  
plan proposed by the "Wekiva River Parkway  
& Protection Act"

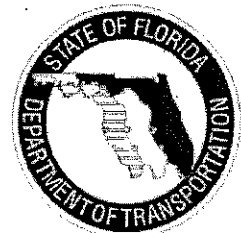

The parkway must be elevated directly  
EAST of Mt. Plymouth through the  
Wekiva River - The interchange of 46  
& 46 A - MUST BE located as far  
West in order to protect the  
Rock Springs Reserve -

Growth is important, but it can not  
jeopardize the Wekiva River, the environment  
or the existing wildlife - (Remain wildlife friendly)  
Think!

Comments: Remove connections through easternmost  
sections of Rock Springs Run.  
Locate SR 46 interchange West of RS Run  
Reserve in Seminole State Forest.  
Keep Traffic out of our conservation  
lands.  
Put interchange thru Neighborhood Lakes after  
purchase as per Wekiva Parkway Protection  
Act. Don't designate ten years of hard work  
for the preservation of the Wekiva Basin;  
don't destroy the <sup>natural</sup> essence of the river  
and its environs.  
Urban sprawl has no place in Lake Co's  
last bastion of natural Florida.

#1 - Remove easternmost possible routes  
from consideration.

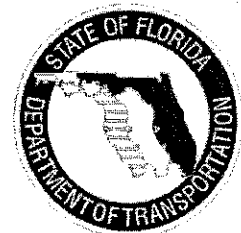

#2 - Locate the SR 46 interchange  
west of Seminole State Forest &  
Rock Springs Run State Reserve. Consider  
siting SR 46 interchange on Neighborhood Lakes land.

#3 - Urge purchase of Neighborhood Lakes  
conservation lands.

Comments: The 7 goals laid out by the coalition must be met.  
Primary among those is the purchase of the sensitive lands  
specified in the legislation. The "neighborhood lakes" property and  
others must be acquired without further delay. Without the  
acquisition there can be no support for the project.

The alignment of the road in the Int. Plymouth  
area must be on the western edge of the "neighborhood lakes"  
property, not as shown on the existing map. The Public Conservation  
lands must be avoided (ie Rock Springs Reserve). The major  
interchange should be moved to Int. Plymouth. The traffic should  
be carried on a single bridged roadway across corridor.

Please use the back of this form if more space is needed to express your opinions.

Comments: IF this is going in, I would  
prefer the LCW-8 West Lake path.

How will it effect the Elem. School  
Round Lake And how many lives will  
be in danger during construction and after  
completing the Road will it be better!

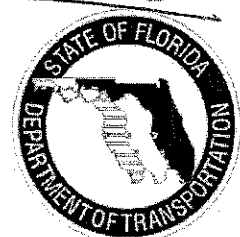

Will a Noise barrier be put up?  
because we can hear 46 now pretty  
loudly and you put another road even  
closer and we won't be able to stand the  
Noise we moved here for the peace and  
quiet I Need a Copy of the West Lake Map

We are concerned that Trail Connectivity  
be a priority for this study

An east-west Trail connecting to the  
Seminole Trail System & also connecting to  
the West Orange Trail in the Rock Springs  
area.

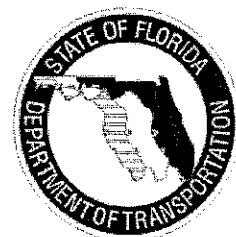

Westernly it should connect to a trail in the  
429 Corridor which can connect to the Lake  
Apopka Loop Trail.

Eventually, the CSX RR will abandon  
through Mt Dora & Tavares & the Trail  
can connect to that system

Please use the back of this form if more space is needed to express your opinions.

Comments:

I could not find the bond for east Lake County design concept. I was wondering if the Lake County side of the River would be the same as the Seminole county side where local traffic would have to U turn or access ramp to new road to cross the River - This seems confusing for drivers local and not to find residences?? 46 bridge over Wekiva could not be left for local traffic.

safety issues for elderly drivers etc

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

Move main interchange of Parkway L 46  
as far west as possible to get it out of the  
State forest and closer to population center of Mt  
Plymouth. Put it in Neighborhood Lakes parcel.  
Choose alignment that avoid Wekiva / Rock Spring Preserve  
to the greatest extent possible.

Please mail or fax to:

Comments: We live off Plymouth Sarrento road  
(Plymouth Landing) across from the Plymouth  
Post office - will it alleviate all the tractor  
trailer traffic we have now - if the Expressway  
is ~~on~~ 46 is built - will there be an incentive  
for the commercial traffic to use the toll  
road instead of Plymouth Sarrento road?

Meeting very informative - your people were  
very cordial. Thank you.

Comments: \_\_\_\_\_

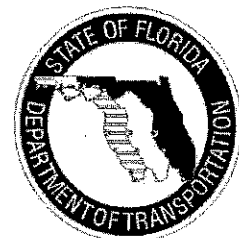

Build it and they will come. New roads bring new homes. Can the wekiva continue to support our water needs? Can we adequately protect the wekiva from the runoff the additional roads + homes bring?

Lake County Already told the xpressway Authority it was not interested in the road so why are you here? This road is not needed. Four lane 46 to seminole county and this will help with the fatalities.

Comments: Since the thrust of doing the Wekiva Parkway was  
to provide better and safer transportation AND protect the watershed  
of the Wekiva River and its natural flow and environment, there  
are two essential points.

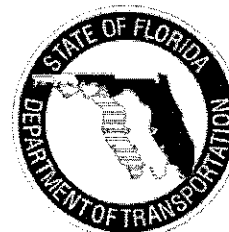

1) The most north~~west~~ path of the parkway in the Mt. Plymouth area  
would protect the scrub-jay habitat that must be purchased as  
part of the total project.

2) The proposed interchange at the Wekiva Mitigation bank should  
be moved further west to the new intersection of 46 and  
46A as proposed. This would avoid any ground level roadwork  
and the elevation of the parkway over wildlife corridor  
#1 could begin there as one more reasonable project  
to be engineered there.

Please use the back of this form if more space is needed to express your opinions.

1.) What/how are you planning on containing the traffic noise from these new roads?

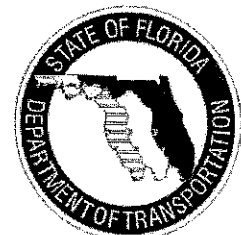

2.) How do you plan on containing light pollution from the new roadways?

We currently live in a fairly quiet/dark nighttime environment. How will you keep it that way?

Comments: I have a suggestion as to the bridge where  
the Parkway will cross the Wekiva River. We all know that  
the basin and riverbottom are a very sensitive ecosystem  
that all parties wish to keep as pure and natural as possible.  
Can the walls along side the elevated bridge be raised to  
help contain traffic noise from permeating the riverbottom. There  
are many studies about animals avoiding areas of heavy traffic  
and noise, and with the bridge elevated animals may be able to  
use the riverbanks as travel corridors. I'm sure that every foot  
you raise the side walls would help reduce the noise pollution that  
much more. Any little bit can make a difference.

Comments:

The objective is not clear.  
It is either 1) to relieve growth / hwy  
46 congestion or 2) a western Beltway  
is needed. Depending upon the objective  
then that is the answer. The objective  
is/b a western Beltway. Therefore  
the hwy 417 S/B connected to the  
south. Don't block access to the  
businesses serving residents by  
using hwy 46. The northern route  
doesn't make any sense.

Note: The NO BUILD Alternative

Comments: OF the (2) proposed interchanges  
to I-4, I would recommend the  
Southern interchange as this is a  
shorter and less expensive route.  
Also, it does not impact the  
Wetlands along the St. John's River

Comments: I understand that you cannot make everyone  
happy when developing a major interstate through populated  
areas. I would however hope that you consider  
the most effective route rather than the cheapest route.  
I am particularly concerned with the North I-4 junction.  
I recently purchased property on a dirt road to escape  
everyday "traffic". What I do not understand is  
how an interstate can run through "declared wetlands"  
behind my property, yet I cannot even trim a tree  
on my property as it is ~~mostly~~ mostly "declared wetlands".  
Most of the people I have spoken with tonight at this  
meeting think it makes the most sense to connect  
429 to 417 at I-4. Connecting to I-4 at any other  
location will create a "bottleneck" on I-4 between the two  
junctions.

Please use the back of this form if more space is needed to express your opinions.

Comments: IT APPEARS TO ME THAT THIS SHOULD  
BE A BY-PASS TO SUNT NORTH TO SOUTH WEST  
TRAFFIC AROUND I-4 AND RESIDENTIAL AREAS.  
A PATH STARTING IN VALDOLIA COUNTY WITH A  
NEW ST. Johns Bridge - west of I-4 Bridge  
TRAVELING FAR ENOUGH NORTH OF SR-46 TO  
MISS HOMES AND THE ROADWAY, TO ALL THE WAY  
TO 441. One feeder road to 417 AT I-4

Comments: We live in The Preserve at Astor Farms -  
If it comes down Orange Blv - Bumping up  
Against Astor Farms Sub. & Lake Forest Sub. That  
would depreciate all the home values & create  
satley factors for the Astor Farms neighborhood. If  
home values depreciate that reduces tax revenue  
and create hardships for those who live in the subdivision  
because they wouldn't be able to <sup>Resell</sup> ~~resale~~ their  
property at its current value  
We would recommend bringing it up 46 - which  
would impact less neighborhoods, create better traffic  
flow plus the corridor is already there -

Please mail a copy of the propose plan  
Sheet #1 Thank you

Comments: - The 17-92 Connector (1) is the longest and  
(2) destroys many properties, the part of  
Sanford, (3) it does NOT connect to the  
beltway (417); it needs a 1,600 feet long bridge  
(orange color)  
- The 417 connector is the shortest  
less traumatic route to do the job  
- Where is the 100 year flood plane? Underneath the 17-92 connector!  
- Tolls should be considered also in Seminole  
County to ↓ the traffic of vehicles  
and trucks on the Parkway (it helps  
with funding)  
- Please send me a copy of Sheet No. 5c  
Thank you

Please mail or fax to:

Comments: As a resident in Sylvan Lake  
Reserve and a Realtor in this area,  
my concerns are regarding the  
elevation of S.R. 46 at Glade View.  
This intersection is critical to the  
residents of this neighborhood and  
we would request it not be elevated  
at this point. The homes are currently  
ranging from \$530,000 to \$1,600,000 in  
Sylvan Lake Reserve and the homeowners  
did not choose this location with the  
expressway at their front door. We ask  
you to consider keeping the road at  
ground level in this area.

Please use the back of this form if more space is needed to express your opinions.

Comments:

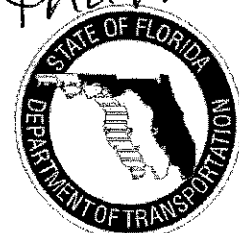

No Road is my 1st choice!  
However, The route from the south  
makes the most logical sense -  
The 417 is already there to  
make the connection and it  
appears there is less residential  
impact than the other routes.

The far north route makes no  
sense - it also appears to be  
the most costly and the least  
effective. Too far out of the way the  
make a connection - it seems that it would  
cause more traffic than alleviate it.  
The 46 route also appears to  
have more negative impact than  
worth monetarily.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

Lake County interchange needs  
to be west of Rock Springs Preserve.  
Road needs to be elevated through  
wild life corridor.

Road should be only corridor continuous  
through Lake County.

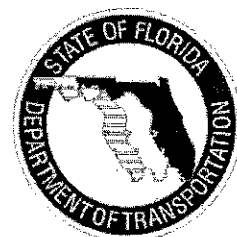

Southern connection to I-4 & 417 is  
most advantageous - figure it out.

Respect the commission & the will of  
the people and preserve the wild life  
corridor & the peoples' land.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

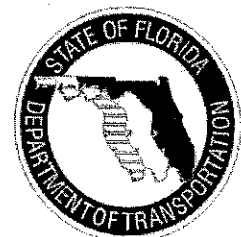

We prefer the Parkway be built  
North of S.R. 46.

It appears that there would be  
less impact on homeowners using  
this alternative. According to the  
engineer we spoke with, the interchange  
with I-4 would be less complex to  
build.

Please use the back of this form if more space is needed to express your opinions.

① A LIVE PRESENTATION WOULD HAVE  
HELPED A LOT. W/ Q&A SESSION  
AFTERWARDS

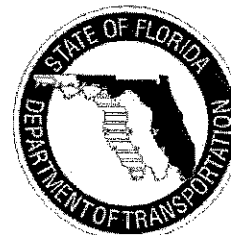

② An overall view of the entire  
project showing how this current study  
ties in with existing plans to  
create a beltway around Orlando  
would also help to put this  
project into perspective.

③ We are concerned with increase in traffic  
along 46 especially in connection with growth in  
commercial businesses plus new flow directed toward 46.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: We think the "southern" route to 417  
would take away much traffic, keeping  
the eastern end of 417 more open  
to business and the entrance to Sanford.  
Besides, wasn't the exit of 417 constructed  
with the idea of connecting to the new  
toll road? It appears to us it would  
make a more efficient (and safer?) connection.

Please use the back of this form if more space is needed to express your opinions.

Comments: The northern route would alleviate  
the most traffic off of I-4 and would  
also alleviate the congestion at SR 46 + I-4.  
Drivers would still have the option of  
exiting at SR 46 or the 417 at 46A.  
Adding more to the 101 exits is ridiculous.  
Take the road North.

Comments: I grew up at 135 S. Centur Rd between  
Wayside & 46. There has been so much  
development and traffic increase on 46 that  
I find it dangerous to get on it. I think  
the Northern route would be better even if  
it is longer- its disruptive to fewer people's  
lives, homes & travel! I think it is a terrible  
idea to go down Wayside or 46!!  
I am moving back here with my son and  
it is dangerous enough as there without  
another damn road or overpass!!

Please use the back of this form if more space is needed to express your opinions.

Comments: I have lived at this address for 45 years.  
It is home. The southern route for the belt-  
way would affect me and my lifestyle. I  
think the northern loop would be the best  
way for you to go. OR go down where  
the old railroad track was, it's now a bike  
trail. That's where they planned to go at  
one time. State road 46 is so heavily  
traveled I think it's foolish to use that  
route as a beltway.

Please use the northern route!!

Please use the back of this form if more space is needed to express your opinions.

Comments: Although we presently live in Lake Mary, we  
are in the process of building in the Wekiva Pines  
Country Estates - just over the Seminole-Lake line in  
Lake County. We would like to express our support  
for the current alignment of the Parkway thru that  
area, and especially support a "local access" interchange  
for the 3 existing developments/housing in that  
area. We are concerned that other opinions may  
jeopardize this local access interchange, which  
would cause us to travel a distance west in  
order to access the Parkway to reach Seminole County.  
We are also concerned about the projected increase  
in traffic and the corresponding noise. However, if  
traffic is expected to increase (which no doubt it will)

Please use the back of this form if more space is needed to express your opinions.

Comments: The alternative that brings the extension  
down SR 46 to link to I4 is an unacceptable  
alternative because the current rate of traffic  
related fatalities is high with the current  
traffic rate, this situation can't get anything  
but worse. And as the additional traffic will be  
coming off a highway, it is only reasonable  
to expect that these additional vehicles will be  
traveling in excess of the posted speed limit.  
We already have a well documented problem with  
excessive speed on this stretch of SR 46.

Please use the back of this form if more space is needed to express your opinions.

## TWELVE OAKS RV RESORT

---

Ms. Mary Brooks, Public Involvement Coordinator  
State of Florida, Department of Transportation  
10151 University Boulevard, suite 222  
Orlando, Florida 32817

November 18, 2005

Dear Ms. Brooks,

I am the owner of Twelve Oaks RV Resort, State Road 46, approximately ¾ mile west of Orange Blvd. Both of the Sanford Expressway proposals affect Twelve Oaks radically. They are devastating to the park. This park is filled with 250 residences and about 400 elderly low-income tenants. If this park is disturbed in any way it will be a major catastrophe to these tenants. I think these alignments were made without regard to the properties and the people they affect. To run a road right thru the middle of a park and displace all these old people is totally unnecessary when a slight change in alignment would preclude a lot of grief and expense.

I have made two proposals to slightly change the alignment of each of the connecting expressways from I-4. These proposals are drawn on the enclosed aerials. They are far more logical, safer, and more cost effective and will not displace any of the Twelve Oaks residents. Further, they go thru more rural sparsely populated properties.

Notwithstanding all of the above, if the Seminole County officials have their way and State Road 46 is the choice, please consider this:

- 1.) If additional right-of-way is needed for State Road 46, take it on the side where there is nothing but plants and trees and not a highly developed property with underground sewer, water, electric, telephone and gas lines.
- 2.) There is nothing wrong with a slightly meandering right-of-way line provided it is within design criteria.

Let me explain that I was the owner of a 400-unit trailer park in Homestead, FL, which was my life's work. It was totally destroyed by Hurricane Andrew and I lost everything. I had barely enough to put a down payment on Twelve Oaks. I had to pay 12% interest for 5 years until I was able to refinance it. I have put every nickel I have into improving Twelve Oaks to make it a wonderful place to live. Many of my tenants are living on Social Security and will have no place to go if they are displaced. I will do everything I can to preserve and protect Twelve Oaks. Please seriously consider my recommendations and advise me what you think of them. Call me at (305) 951-3665 if you have any questions.

Very truly yours,

  
Thomas A. Vellanti  
Owner

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

COMMENTS: The following addresses one goal for the Wekiva Parkway Project, namely, the tie-in of CR-46 with I-4, and the (3) alternative approaches to that end. To a large extent, the intersection of CR-46/I-4 is surrounded by large-area lots (car dealerships, gas stations, restaurants & parking lots), with, by far, the lowest current and potential home-density of the (3) intersection-alternatives under consideration. Both the Easterly & Westerly alternative intersections with I-4 represent orders-of-magnitude longer, and higher current- and potential-home-density routes than does the CR-46/I-4 intersection, and, they threaten the disruption (by the effects of close proximity), if not elimination of at least one Elementary school and several houses of worship, in addition to many homes.

The advantage offered by the Westerly alternative, as claimed tonight by a PUBLIC WORKSHOP representative, is its more direct tie-in to SR-417. The CR-46/I-4 intersection provides reasonable proximity to SR-417 via I-4. Given the significant societal, and, probably, cost and environmental advantages of the CR-46/I-4 intersection over the alternatives, then, should the deciding agencies (Express Authority, FDOT, etc.,) not select it, they must present to the public supporting quantitative (data & analysis) and qualitative (human impact) evidence, relative to the alternative intersections, to convince the hundreds, if not thousands of people whose lives would be disrupted by their selection.

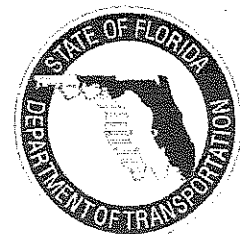

It should go without saying that said agencies will make their selection based on facts, to the extent possible, and not on influence.

Thank you

Comments: THE SOUTHERN CONNECTOR MAKES MORE SENSE -  
A 46 CONNECTOR FROM I-4 WITH STREET LIGHTS  
WOULD CAUSE SEVERE TRAFFIC DELAYS AND CONGESTION  
AT PRESENT COUNTS - AT LEAST 90% OR MORE OF  
TRAFFIC LEAVING THE LAKE FOREST AREA TURN EAST,  
ALONG WITH PUBLIX SHOPPING CENTER AND PLANNED  
HATTAWAY PROJECT - IF THE PRESENT TRAFFIC HAD TO  
TURN WEST - GO UNDER OVERPASS AND THEN EAST TO  
I-4 AND INT'L DRIVE THERE WOULD BE AN AWFUL  
TRAFFIC JAM AND PENALTY TO PEOPLE OF OUR AREA -  
WITH THE NORTH ST JOHN BRIDGE CONNECTION - SOUTH  
BOUND TRAFFIC WOULD BE OK BUT THE TRAFFIC FROM  
THE PRESENT 417 DUMPED ON TO 46 WOULD BE A  
DEGRADATION TO PRESENT 46 TRAFFIC PROBLEMS -

Comments: To me the ~~only~~ only option that makes  
common sense is the southern option that connects  
to 417. The 46 or center option would be a nightmare  
of cars on 46. The north option to 17/92 does not make  
sense to relieve traffic on I 4.

The southern option should be the only  
one considered by Seminole County

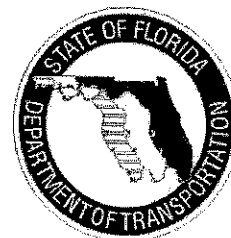

Please keep me informed

Thank you,  
John Wilzig

Comments: \_\_\_\_\_

1. I urge the removal of the easternmost routes through Rock Spring State Reserve consideration. Public natural lands should not be used for Roads.
2. I urge the SR 46 Interchange be WEST of Rock Springs Rm and Seminole State Forest
3. I urge the SR 46 in Seminole County follow SR 46 to I 4, This route would have the least people impact.

Keep on track to protect the environment and discourage urban sprawl.

connector to I 4:

minimize impact to peoples homes (Tall Trees <sup>sub-</sup>division)

Comments: Please be sure to bridge the roadway  
through the ecological corridor between Plymouth  
Sorrento + the Wekiva River. It is important  
to remove the easternmost routes shown through  
Neighborhood Lakes that impacts the Rock Springs  
Run state preserve. Be sure to locate the  
SR 46 Interchange with new beltway west  
of both Rock Springs Run State Reserve +  
Seminole State Forest + have 46 as a  
frontage road for existing residents not to  
go through:  
Purchase the entire neighborhood lakes  
property for the proposed interchange  
neighborhood sprawl.

Discourage new

Comments: MY IMMEDIATE RECOMM. WOULD BE TO TAKE THE  
SOUTHERN ROUTE TO I4 FROM 46. THIS LOOKS LIKE THE BEST.  
MAYBE NOT THE SHORTEST - 46 TO I4 IS THE SHORTEST BUT IT ALREADY  
CAN BE A NIGHTMARE. TAKING THE SOUTHERN ROUTE WOULD MAKE  
THE INTERSECTION AT I4 WITH 417. TRAFFIC GOING SOUTH CAN  
CHOOSE EITHER PATH AT THE SAME TIME. IT LOOKS TO ME LIKE THERE  
ARE WATER PROBLEMS FOR PEOPLE LIVING IN THE LINE THEY WOULD  
TAKE AND MAY BE HAPPY TO MOVE OUT.

Comments: It would have been very helpful to  
have handouts showing the conceptual  
alternatives that we could take with  
us to study, or to have them  
available ~~to~~ via the web. ①

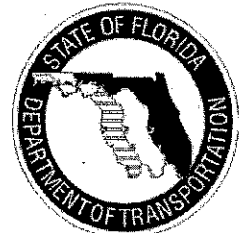

"You" might want to have a  
professional technical writer edit your  
project information sheet.

① Having the same direct mail piece ~~to~~ that  
I already have didn't make any sense -  
it was a waste of money, since most  
of the attendees already have it.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

Concerning the most south proposal from I-4/417:

Although my home is not directly in the path it is too close for comfort. My concerns include noise, light, tree buffers, etc. I am 2/10ths of mi from Orange Blvd where it would cross @ Wayside. Currently there are 2 lg estate properties between us & the proposal. Will the current landscaping (tree buffers, etc) be affected. Would more be included in project.

I feel like all mentioned above would destroy the quality of my community.

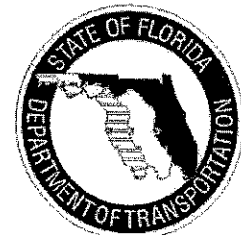

I am also concerned with how close the rd seems to be with Wilson Elem.

I am more in favor of the middle alternative or the Northern alternative

Please use the back of this form if more space is needed to express your opinions.

Comments: As the Parkway along 46 is built,  
it should be built on the north side  
so that it does not take land from  
the Ross Lake Shores development. Also the  
houses nearest the Parkway at this point should  
have a wall built for noise protection and  
pollution protection. There are too many  
interchanges in Lake County - Totally  
unnecessary - The traffic along 46 is  
presently too difficult in peak hours. How  
will construction be handled so that  
the problem is not added to?? I  
have a hard time just getting on 46 from  
my development when I go to work now -

Please use the back of this form if more space is needed to express your opinions.

Comments: I want to comment on the south connection with  
I4. I believe that this connection is NOT the best option.  
As you can guess I live in this Area. Even though I will not be  
completely affected, I believe that having this south connection  
will hurt Heathrow/Markham woods Area.

I feel the north connection will be a much better  
benefit to all. Bringing this interchange will force 417 to  
run closer to downtown Sanford, bringing additional life to the  
city. I believe the are that the south connection area has potential  
for future growth for Markham woods Heathrow area. Also, by the  
time a decision is made the property value of this land will cause  
this connection to be a more costly project especially with the  
cost of this already expensive potential interchange.

Please use the back of this form if more space is needed to express your opinions.

Comments: Our area is Flooding Due  
to poor Engineering Standards used  
by Seminole County - The County doesn't  
care about the Flooding they have caused  
in the Wilson School Area - 429 will  
Add to our problems with water and  
we'll be told to just Drink-up -

I'm against this Parkway.

Comments: 1) It is essential that Bicycles and useful multipurpose trails be accommodated in the plan for transportation and recreational use. Currently 46 is heavily used by bicyclists. This should continue and be increased by the Parkway.

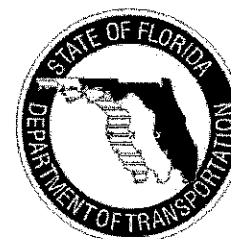

(2) Light pollution should be avoided in the Wekiva area.

Thank you

Comments: Either the northern or southern route  
should be one of the 2 alternatives chosen.  
Coming down 46 to I4 should not be  
considered because of the commercial  
& residential impact. The southern  
route connecting directly with 467  
seems to be the most direct &  
logistically logical route to take.

Comments: \_\_\_\_\_

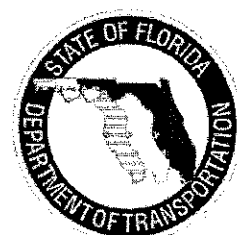

We would like to see the Northern  
Route (yellow) to connect to I-4 near  
the St John's River Bridge. This would give  
Motorists coming from Deltona Etc  
A more direct access to the Western  
Expressway & eliminate additional  
traffic at I-4G and I-417.

If Southern Route is used (Orange)  
Suggest the road be a road grade at  
Wilson Rd. Have Wilson near exit from  
East & West at the Bypass.

Please use the back of this form if more space is needed to express your opinions.

**Orlando-Orange County Expressway Authority**

**Subject: Wekiva Parkway**

In finalizing plans in the Rock Springs Run State Reserve and Seminole State Forest areas I urge you:

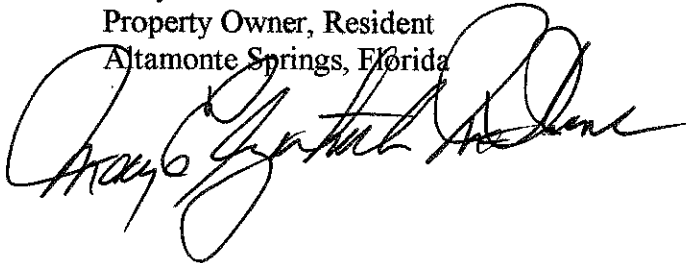

**The easternmost routes through the corner of Rock Springs Run State Reserve are removed from further consideration. The westernmost routes shown on Expressway Authority maps are the only ones that should receive further consideration.**

**The State Road 46 Interchange with the new beltway is located WEST of both Rock Springs Run State Reserve and Seminole State Forest.**

**The proposed interchange is placed on the "Neighborhood Lakes" property.**

**You adhere to the policy set in the "Wekiva Parkway and Protection Act" which provides that the entire "Neighborhood Lakes" property should be purchased-- a portion for the new road and the balance for preservation.**

Comments: I am really concerned about the noise  
which would be generated by the new  
Parkway. My house is adjacent to SR46.  
The ~~noise~~ present noise and its creating  
allot of discomfort due to noise as it I could  
only imagine the <sup>increased</sup> level of noise, when the  
parkway is completed. How about the  
noise barriers? Can we keep the elevation  
of the highway west of the county line.  
There is plenty of vacant land on the  
northside of SR46 (between Orange Blvd and  
County line). Why can't we consider shifting  
the parkway towards north of current  
SR46 path.

Comments: \_\_\_\_\_

Obviously, I prefer the two most northernly routes,  
with the drop from the expressway to the  
existing 46 as far to the west as possible. 46 is such  
a mess and if all the plans include a re-make of 46,  
why not just continue down 46 to <sup>the</sup> I-4 interchange. Also,  
this will route away from Wilson Elementary (by concern) &  
minimize the impacts to homes/concerns concern.

Please use the back of this form if more space is needed to express your opinions.

Comments: • Good process / communication.  
• Continuing 417 from the I-4 exchange certainly seems like the best end state for a Beltway notwithstanding property impact.  
• The proposal to expand 46 to a 6-lane hwy. near I-4 would be devastating to Lake Forest in terms of traffic noise and entry / exit to / from the neighborhood. I expect the uncertainty of this project has already depressed property values and will continue to do so until a decision is made.  
• I live in Lake Forest today. I love the neighborhood. It's unique in the area. I would not want to live there anymore if 46 becomes a 6-lane hwy. And I'm sure many would think twice about buying in Lake Forest knowing this

Comments: We have the following concerns regarding  
the southernmost option for connecting I-4 to  
SR-46 east of the Wekiva River:

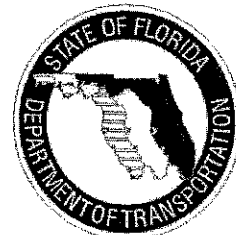

- Roadway as proposed is too close to  
Wilson Elementary School ~~and~~ Road noise  
will distract students and road/overpass  
will pose safety issues

- Elevated roadway too close to many homes  
will create noise and pollution issues. If  
road is lighted, light will spill over into  
neighborhoods.

Please use the back of this form if more space is needed to express your opinions.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments: MY PRIMARY OPINIONS ABOUT THE ALIGNMENT AND THE DESIGN  
OF THE WEKIVA PARKWAY IS TO PROTECT THE UNDERLYING WATER AQUIFER AND  
TO MINIMIZE THE OPENING OF NEW AREAS TO DEVELOPMENT WITHIN THE WEKIVA  
WATERSHED AND THE WEKIVA RIVER PROTECTION AREA.

THERE ARE 3 COMMENTS SPECIFIC TO THE WEKIVA PARKWAY GIVEN  
MY PRIMARY FOCUS:

1) THE PARKWAY SHOULD BE ELEVATED THROUGH THE EXISTING STATE  
LANDS AND BETWEEN THE WEKIVA RIVER CROSSING AND AT LEAST  
SUFFERNO TO THE WEST;

2) INTERCHANGES SHOULD BE LIMITED ON THE WEKIVA PARKWAY  
SEGMENT AND AN INTERCHANGE IN LAKE COUNTY SHOULD BE  
WEST OF THE CURRENT INTERSECTION OF 46 AND 46A TO 14TH  
DEVELOPMENT AROUND THE INTERCHANGE OUTSIDE THE WEKIVA  
WATERSHED AS MUCH AS POSSIBLE;

3) THE STATE OR OTHER CONSERVATION ORGANIZATIONS SHOULD BE  
ENCOURAGED TO PURCHASE ALL LAND  
RECOMMENDED FOR  
PROTECTION.

Please mail or fax to:

Comments: I understand, we can't stand in the way of progress. But it looks like I am going to loose the home I love and wanted to live in the rest of my life. I have animals 3 dogs and 7 cats. I never went and got one of them, they have been brought in by family members and friends that have died. I love and care for them. It is also a lovely home for them with a yard all fenced in. By looking at your maps, I don't think there is much hope that we can keep the home we love so very much. For sure we are going to have lots and lots of inter states and super duper Highways, no matter what.

Comments: My family lives on Sylvan Ave which intersects with Wilson Rd. I'm very against the "orange" beltway plan. This plan would bring the beltway very near the elementary school and all the brand new shopping facility (Colonial Town Park) Tall Trees Subdivision & the cross country trail.

I much prefer the S.R 46 corridor plan. I believe it impacts less people & would lower ~~the~~ the traffic fatalities in ~~the~~ Seminole County by the use of the frontage roads. Currently vehicles pull onto SR 46 from many little side roads leading to deadly accidents

Please use the back of this form if more space is needed to express your opinions.

Comments: We moved to Seminole County for the beauty.  
Building our home near a forest was a dream come  
true. Our home would be definitely impacted by this Expressway  
and we would prefer to be bought out than to lose the  
value of our home. We have invested a lot of money  
into our home and this would most definitely lower our  
current value. Please do not make 46 a six or  
twelve lane highway in our backyard. I am sure  
you would not want this in your back yard. We  
would prefer an elevated version to leave 46 as  
an old country road. Thank you and we look  
forward to hearing the outcome of the project.

Please use the back of this form if more space is needed to express your opinions.

Comments: \_\_\_\_\_

- Regarding the proposed Beltway Connection To I-4 / 417
- The southernmost option that extends the existing 417 appears to make the "most" sense. Ease of connection to I-4, the continuation of the 417, the proposed route appears to have minimal impact on residential in the area. (orange option) -
- Highly oppose bringing it down 46 & connecting to I-4 - Does not make sense for the flow to the existing 417 - 46 is already a mess, this would make it worse.
- The northern connection to I-4 would be my second choice, main issue is how the 417 traffic

Please mail or fax to: would connect.

Comments:

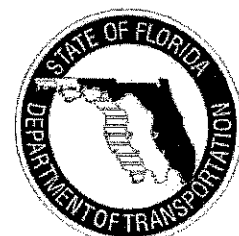

I BELIEVE THE ONLY VIABLE ROUTE  
FOR THE I-4 TIE-IN WITH THE  
WEKIVA PARKWAY IS AT SR 46.

THE SOUTHERN ROUTE WILL BE TOO  
DISRUPTIVE TO EXISTING, HIGH VALUED  
PROPERTIES AND NEIGHBORHOODS

Comments: I support the Expressway Alignments  
as demonstrated on #5A, #5B, with greatest  
support given to #5D, as it passes through  
Seminole County. The alignment indicated  
by the "Orange" or Southern route presents  
serious access and property value issues  
to the homeowners of the Capri Cove  
subdivision. This alignment brings the roadway  
within 150 ft of my property line.

Comments:

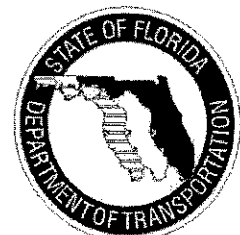

THE SHORTEST DISTANCE BETWEEN TWO  
POINTS IS A STRAIGHT LINE. THE ORANGE  
ROUTE FROM THE 417 INTERCHANGE WORKS  
BEST. THE YELLOW RT TO 17-192 DOES  
NOT WORK. I-4 WILL BE CONGESTED WITH  
CARS GOING WEST ON THE NEW ROAD ADDING  
TO THE HIGH N-S TRAFFIC ON I-4.  
THE YELLOW RT GOES THRU WETLANDS AND  
VERY CLOSE OR THROUGH EXISTING NEIGHBORHOODS.  
THE RT 46 BLUE RT IS DIFFICULT BUT  
WORKABLE.

THANKS FOR THE INFORMATION

Comments: \_\_\_\_\_

The 46 widening has the most possibilities. However, the road will need more exit ramps other than just Orange Ave & 46 exchange. It looks like it makes the most sense & has minimal homeowner impact.

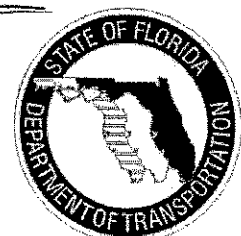

I do not like the Orange route, there is no access to it for local traffic they must backtrack to I-4 to connect with it even tho its in their backyard.

I like yellow route for minimal traffic impact.

Comments: I live in the tall trees subdivision  
and I am against the orange route or south  
of 46 route - The reason being that it will  
bring noise and excess lights - I will have  
no access to the road from my house - The  
46 route seems to be more direct and less  
take over of houses. ~~There is~~ 46 is  
an already existing road and all that has  
to be done is additional road on each side.  
This will/should have little impact on  
homeowners in the area.

Comments: ROUTE OPTIONS: MOST PREFERRED OPTION IS CONVERTING  
TO I-4 AT 417. SEEMS MOST LOGICAL IF THE GOAL IS TO  
CREATE A CONTINUOUS LOOP AROUND THE CITY. THE LEAST  
FAVORED ROUTE WOULD BE CONVERTING AT I-4 AND 416.  
COMBINING LOCAL TRAFFIC WITH BELTWAY TRAFFIC FOR THE  
STRETCH BETWEEN I-4 AND DIBBLE WOULD BE A NIGHTMARE.  
FRONTAGE ROADS: I LIKE THE IDEA OF USING LIMITED ACCESS  
FRONTAGE ROADS FOR LOCAL USE BETWEEN THE WEKIVA RIVER  
AND ORANGE AVE. HOWEVER, I AM CONCERNED WITH BELTWAY SOUND.  
WOULD LIKE TO SEE THE HIGHWAY ELEVATED THROUGH THAT  
STRETCH OR INCORPORATE SOUND BARRIERS.

Comments: I HAVE TWO CONCERNS. FIRST, WHILE THE ALIGNMENTS  
HAVE LITTLE IMPACT ON MY RESIDENCE, THE EFFECTIVENESS OF  
NOISE ABATEMENT WILL. I WOULD LIKE TO KNOW MORE ABOUT  
THIS ISSUE.

SECONDLY, AS A CITIZEN OF SEMINOLE COUNTY, MY ONLY  
MECHANISM FOR POLITICAL INFLUENCE ON THE OCEA IS THROUGH  
THE GOVERNOR'S OFFICE AS ALL OTHER MEMBERS OF THE OCEA  
BOARD ARE REQUIRED TO HAVE ONLY ORANGE COUNTY CONNECTIONS.  
THEREFORE, I WOULD LIKE TO SEE MORE EXPLICIT COMMITMENTS  
THAT FDOT WILL HAVE SOLE RESPONSIBILITY FOR THE  
SEMINOLE COUNTY PORTION OF THE PROJECT.

Comments: This workshop has been most informative and appreciated.  
In reviewing the three selected routes from I-4, I would  
think that the orange route or the route that would extend the  
current 417 exchange, would be the best route.  
The transition from the present eastern loop would have no  
disruption and would be more of a true beltway.

Thank You,  
CR Lee

Comments: I think we should use the traffic roads  
that already exist with the SR 46 200' right of  
way. I strongly disagree with the need to  
have 2 lanes on either side of the expressway for  
local frontage access. I believe the option of  
putting the expressway over the existing SR 46 road  
that already exists is the best option to not  
disturb the neighborhoods that have already been  
built off of SR 46. Taking frontage roads and  
the expressway all the way to I-4 makes the most  
sense and is the cheapest since no additional land  
would need to be purchased.

Please use the back of this form if more space is needed to express your opinions.

Comments: I am appalled at any plan that would  
put major interchanges in the Rock Springs  
Run wildlife corridor. This concept violates  
the will of the people and the intent of the  
Wekiva Task Force. The road way through  
the Rock Springs Run corridor should be kept  
as originally intended and the major junction  
of 46, 46 A and the Wekiva Parkway should  
be placed in the Neighborhood Lakes area as  
originally intended and as a State Rd 46  
should not run parallel to the new  
expressway through this area. Please use  
your head and do this right

Comments: \_\_\_\_\_

I am very concerned about certain proposals that put an exchange for the parkway cutting thru Rock Springs Reserve. It is a ridiculous idea to put any roadway in a preservation area! I strongly disagree with this. I also urge you to obtain 100% of the land proposed for conservation. The only land that has definitely been secured is only a small portion of what should be. There has been talk that the area known as "Neighborhood Lakes" will not be included in the conservation. This is not acceptable. Please live up to your environmental obligations.

Comments: Please consider a 4<sup>th</sup> route that  
seems to make more sense to me. Come road  
on high way 46 and curve toward the  
south some where near International Parkway.  
Then proceed to curve towards 417. You  
could use a fly over to cross I-4 and  
connect into 417.

Second choice would be <sup>map</sup> 5A or 5d. pass  
down Hwy 46 to I-4. Include noise walls.

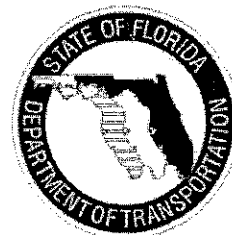

- In any case Noise is a major concern.  
Please include noise abatement in all plans.

Thank you.

I PREFER ~~THE~~ THE ALIGNMENT THAT DIRECTLY TIES  
INTO THE EXISTING 417/I-4 INTERCHANGE. IT  
SEEMS TO MAKE THE MOST SENSE FROM A  
TRAFFIC STANDPOINT IN THAT YOU HAVE DIRECT  
ACCESS TO BOTH I-4 & THE 417. THERE IS  
ALSO LESS IMPACT TO RESIDENTIAL SINCE THERE  
AREN'T AS MANY HOMES ON THE SOUTH SIDE  
OF 417. A LOT OF THAT PROPERTY IS COMMERCIAL  
OR UNDEVELOPED.

Please use the back of this form if more space is needed to express your opinions.

Comments: Seminole County - East End near 417...

On the Wekiva Parkway interchange at 417 I-4 vicinity  
I believe that the Yellow line linking SR 46 to ~~SR 17-92~~ would be  
creating additional traffic flow congestion due to routing  
traffic to I-4 to get to the 417 Expressway. Same logic applies to SR 46 to I-4  
The preferred routing would be to directly connect the  
two expressways (Orange line), eliminating additional traffic  
from an already congested I-4.

Please use the back of this form if more space is needed to express your opinions.

Comments: - The use of human fatalities in your presentation was in poor taste and should be taken out of your proposals. If this was the "only" reason this project existed that may be different but using other's deaths to justify growth is unwarranted.  
- All public conservation lands should be protected. This was difficult to acquire and should remain intact or improved from this project - not degraded.  
- The <sup>alignment</sup> ~~tract~~ aligned into Rock Springs Run State preserve should ~~move~~ moved/eliminated. The western alignment through the "Neighborhood Lakes" tract would ~~improve~~ provide a buffer for the preserve.

Comments: Why can't they do this on land  
that does not have businesses and  
people's houses. It looks like all of  
Sorrento will be wiped off the map just  
for a road to go through. We have a road.  
If you build this all our hard work is in vain.  
My cousin and I built the pool cottage and  
helped with the carports. We also have done work  
on the storm shelter. According to one map  
we won't even be able to get out to go buy  
groceries or pay bills. On another map we are  
wiped right out. Where are we supposed to get  
the money or where are we to go to? We have  
handicap living at our place. We started out

Comments: 1.) Please show all future developments on your route maps. For instance there are several projects in the works between Orange Blvd and I4 along SR96. Traffic will be heavy on this section of road without the additional expressway traffic.

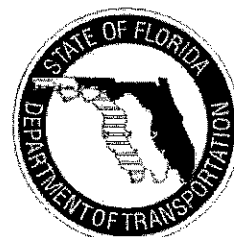

2.) Reinvestigate feasibility of bypassing Seminole County entirely by routing the road North in Lake County and crossing the St. Johns River in Volusia County.

3.) Of the three routes shown between Orange Blvd and I4 the connection

### Comments:

The yellow/North route has the following positive features. 1) Traffic heading south/west on I-4 will exit sooner when exiting on 429. 2) properties affected are more rural (larger lots) giving owners more buffer. 3) minimal local impact.

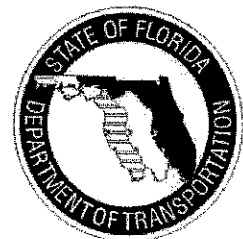

The Strait route (SP4C) would be an excellent choice. I would suggest considering 2-way frontage roads though.

The Orange/South route impacts too many properties negatively with no access to the new Hwy to offset the inconvenience.

Comments: There is a tremendous opportunity to complete the Wekiva Parkway in such a way to improve environmental attributes of the existing ~~alignment~~ alignment of SR 46. The information provided by the Wekiva Coalition to the first task force appointed by the governor, and, ultimately, the Wekiva Parkway and Protection Act laid the framework for a roadway that could be sensitive to the environment, and prevent further degradation from future growth. For this project, stay focused on the objectives outlined in the Act: 1) Purchase the identified lands for conservation, and assure the protection of the resources on them, 2) Create a design that minimizes the environmental (OVER)

Comments: I am concerned about the route going through Hwy 431 (Orange Blvd.) because the Academy of Learning is just down the street from us. The property that I live on is already taking in a lot of water and if a highway is put in my husband and I could not live there. I am sure that it would only make the flooding worse.

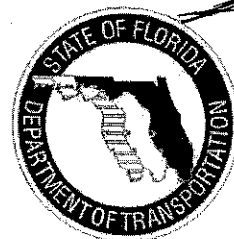

Commissioner Brenda Carey already knows about our situation. As far as I know she said we may get some relief when the Co. widens the road to put a shoulder on but I don't see how that can help.

This same area has 3 churches, just ~~one~~ two built and there is a new section of the school too.

13 has a greater impact to the wetlands and the  
14 environment. It is the worst alternative of the  
15 three, in my opinion.  
16 The 46 route, blue in color, is an okay  
17 alternative. It is the shortest distance, so there  
18 would be less construction costs. It impacts fewer  
19 homeowners, and a fairly small number of businesses.  
20 But trying to connect it to I-4 would be complex and  
21 challenging and it does not make sense that you would  
22 have to be on a part of I-4 in order to get between  
23 the two pieces of 417.

Comments: MY FAMILY AND I HAVE LIVED IN SANFORD FOR 18 YEARS AND HAVE OWNED THE PROPERTY FOR EVEN LONGER. WE UNDERSTAND THE NEED FOR NEW ROADS, FOR WE HAVE SEEN 1<sup>ST</sup> HAND THE GROWTH THAT HAS COME TO SANFORD. ON THE OTHER HAND, THE PEOPLE IN THIS AREA WHO LIVE ON LARGE TRACTS OF LAND ENJOY THEIR WAY OF LIFE ALONG WITH THE WILD LIFE THAT ALSO INHABIT THIS AREA. THE ANIMALS HAVE BEEN PUSHED OUT BY DEVELOPERS, BULLDOZED OVER, & RUN OVER BY CARS. THE NATURAL HABITAT HAS SUFFERED GREAT LOSSES. YOUR NORTH PARKWAY ROUTE WILL FURTHER DESTROY NATURAL HABITATS BETWEEN ORANGE BLVD & THE ST. JOHN'S RIVER WHERE BEAR, EAGLES, WOOD PECKERS, FOX, TURKEY, TURTLES, ETC. NOW LIVE WITHIN

GARY MELLER

5375 OHIO AVE

SHALFORD

FLORIDA

32771

When I received the news that our property was in the path of one the expressway options I was very upset, because I knew what was coming in the future. I lived through the experience of the 46A widening project, from the rumor phase, through the property acquisition, demolition, and road construction, and it was grueling. In the end, what I received in the deal was much greater road noise (the frontage houses were removed), lessened property value and decreased privacy.

In this instance, if the plan remains as stated, and if I don't love my property, I will again experience the agony of years of construction, loss of property value, and in the end, again, live next to a busy highway, which I sought to escape 5 years ago. Even now, we have to tolerate our potentially quiet street being used as a construction entrance for a large development (Astor Farms), with heavy equipment moving through daily, and hoards of cars, vans, and trucks that travel through our small neighborhood. With the Astor Farms construction ending soon, anticipating another assault is almost intolerable.

We have a rather unique environment here. Most of the properties here are heavily wooded, and adjoin the protected lands that border the St Johns and Wekiva rivers. We have hundreds of trees on our property alone and they provide refuge for large rare birds and other wildlife that migrate through our area. We have several large woodpeckers, owls, and numerous squirrels that would be in peril with vehicles traveling 70+ miles per hour across their migratory paths. It makes no sense to choose this northern route that condemns many more homes, disrupts natural lands, and overburdens I-4 to make the link between the 417 and the new Wekiva Expressway.

The southern route seems most logical to me. Vacant lands exist now to provide most of right of way for that path. Removing a larger number of people from their homes to find another environment such as this is cruel and nearly impossible. Sure, someone will have to live with the road noise and disruption, but to change the very nature of this rural-like community, the destruction of a large number of homes, disruption of wildlife habitat, and in the end, creating a problematic traffic path that negates the gains made by the St Johns River bridge widening project, seems ridiculous at best.

Gary Meller

Comments: We are not pleased with the Parkway study. This route would take more property and wildlife area, also our home. We were the first home built in the Seminole Farms acreage, 1983. We have lived here 23 yrs. and now have all the conveniences around us. My husband is retired, with social security and his nursery job, right up the road, our home is almost paid for. We were not planning another mortgage at his age. We recently remodeled some of our home, to keep up the value. Our home has become a large investment, due to the growing area around us. Our daughter is a college student (25 yrs) old, lives at home and goes to college, has a job in the area. We are happy to have a Mall, 5 min. away now. We are close to Hospitals, Doctors offices, Banks etc. When we first built our home, none of these were here!

Comments: 12/17/05

In my opinion, the population in northwestern Seminole county located south of S.R. 46 will be unable to benefit from the Wekiva Parkway as some of the alternatives are currently presented because there is no access entering the proposed Parkway going westbound in the northwestern Seminole county area. Currently, the access under many of the alternatives is for them to go westbound starting at Longwood-Markham Road at the Longwood-Markham Road intersection, or they can access the Parkway where it connects at Interstate 4. Some access needs to be provided for this population going eastbound and returning westbound somewhere between Interstate 4 and the Wekiva River. Likely this eastbound entrance ramp/westbound exit ramp should be somewhere between Longwood-Markham Road and Orange Boulevard along the existing S.R. 46 right-of-way

Comments: We live off of Orange Blvd. and farmed  
the land where the Preserves of Astor farms are located  
for 25 years. I have lived in Sanford all of my  
life (60 years). Also my mother was born here, and  
my parents and grandparents lived on First Street.  
When we decided to build here, it was a  
dream come true. We not only built, but ~~also~~  
our 3 children also own land around  
us. We do not want this parkway to be  
built on or near Orange Blvd. If there  
is anything we can do to prevent it -  
We Will Do It!!

Please don't destroy the closeness of  
our family!!

Comments: The Southern Route is By FAR The Best  
Route To Use. NOT ONLY IS IT SHORTER IT PROVIDES  
A DIRECT ROUTE TO THE GOAL OF CONNECTING TO 417  
IT ALSO AVOIDS CONGESTION OF I4 IN AN AREA THAT IS  
ALREADY OVER LOADED MOST OF THE TIME - TRAFFIC COMING  
FROM WEST 46 WILL NOT HAVE TO GET ON I4 TO  
REACH 417.

The Northern Route is The WORST OPTION. NOT ONLY IT  
GOES THROUGH WETLANDS, WILDLIFE HABITAT THE INTERSECTION  
WITH I4 WILL REQUIRE GOING OVER A RAILROAD IN  
ENVIRONMENTALLY SENSITIVE CLAYLAND AREA - (ST. JOHN'S RIVER) IT WILL  
CAUSE MASSIVE TRAFFIC PROBLEMS AT THE ST. JOHN'S RIVER  
BRIDGE AND I4 UNTILL IT JOINS 417. THIS WILL  
CAUSE I4 TO BE BE ~~W~~ EXPANDED AT INCREASED

RE: Wekiva Parkway Alignment

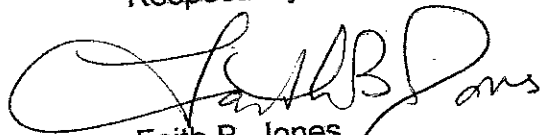

Public conservation lands were not set aside for future transportation needs. Based on this, I urge the Expressway Authority to:

- In Lake County, remove the eastern most potential route that goes through Rock Springs State Reserve.
- Place the major interchange with SR 46 west of the Wekiva Basin public conservation lands.
- Through traffic coming from west of the public conservation lands in Lake County through the Wekiva Protection Area in Seminole County should be traveling on road that is elevated as much as possible, and has only minor ramps for local access. There should be no interchanges or arterial connector roads in the Wekiva Protection Area

Outside of the Wekiva Protection Area in Seminole County, I believe an interchange with I-4 either at SR46 or 417 would best meet the needs of those who will use the Wekiva Parkway.

The proposed southbound route from an interchange with I-4 at 17&92 to SR 46 seems totally unnecessary, and a waste of funds that would be better spent elevated additional portions of the road or purchasing more land.

Respectfully submitted,

Faith B. Jones

Comments: We found the Parkway PD&E representatives at the 11/14 meeting in Sanford vague and lacking honest responses about impacts of the project. One device we use to help people understand and rank the desirability of projects is to list objectives, rank order the alternatives from best to worst and total the scores as follows:

| <u>Objectives</u>                        | <u>Yellow Route</u> | <u>Orange</u> | <u>Blue</u> |
|--|---------------------|---------------|-------------|
| Minimize cost                            | 2                   | 3             | 1           |
| Minimize environmental impact            | 2                   | 3             | 1           |
| Minimize social impact                   | 2                   | 3             | 1           |
| Maximize traffic safety                  | 2                   | 2             | 2           |
| Enable E ↔ W movement                    | 3                   | 1             | 2           |
| Don't encourage/promote sprawl           | 3                   | 2             | 1           |
| Quick build + completion                 | 2                   | 3             | 1           |
| <u>Total (lowest = best alternative)</u> | <u>16</u>           | <u>17</u>     | <u>(9)</u>  |

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can leave your completed Comment Form with a member of the study team today or mail it to the address shown below.

Comments:

1. - LIMIT EXTENSION OF PRESENT SR46 EASEMENT TO THE  
NORTH SIDE OF SR46

2. - WHY NOT LEAVE SR46 AS IS, AND USE IT AS SOUTH SIDE  
ACCESS ROAD?

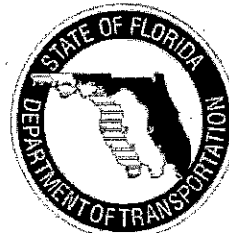

3. - ERECT NOISE ABATEMENT WALLS BETWEEN ROAD  
AND PRESENT SUBDIVISIONS -

HOSTLY  
THE ABOVE APPLIES TO SR46 EAST OF WEKIVA RIVER  
UP TO ORANGE BLVD.

Please use the back of this form if more space is needed to express your opinions.

Comments: WE LIVE IN SYLVIA GLADE. OUR BACK YARD IS  
BACKED UP TO 46. WE HOPED THE PARKWAY WOULD BE  
AWAY FROM 46 ON THE OPPOSITE SIDE. OUR CONCERN IS  
THE NOISE OF TRAFFIC. NOW ON 46 THE CARS ARE NOT  
A PROBLEM BUT THE TRUCKS, LARGE CONSTRUCTION TRUCKS  
ARE AS NUMEROUS AS HALF THE CARS. WE HOPED THAT  
46 WOULD BE CUT OFF AT THE BRIDGE & USED AS  
A ROAD TO ACCESS ALL HOMES ALONG THE ROUTE. IF  
A SECONDARY ROAD IS PUT BETWEEN US & THE HIGHWAY  
THEN PLEASE PUT A CONCRETE <sup>HIGH</sup> WALL (LIKE THE WALLS  
CONSTRUCTED ON I 4). WE DON'T WANT TO MOVE AS WE  
LOVE OUR HOME & PROPERTY. HOWEVER THE OUTCOME  
OF HOW YOU PROTECT OUR PROPERTY WILL DETERMINE  
OUR DECISION. TAKING ALL TRUCKS OFF OF 46 WOULD

Comments: THANK YOU FOR THE INFORMATIVE  
MEETING AT THE SANFORD CIVIC CENTER.

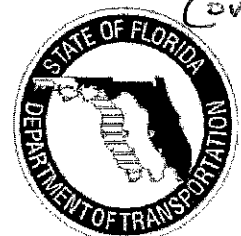

IT APPEARS I WILL BE SAFE TO DEVELOP  
MY PROPERTIES ALONG THE WEKIVA.

I HAVE ONE CONCERN REMAINING.  
I CURRENTLY LIVE AT TWELVE OAKS RV  
PARK ON SR 46, WHICH IS AT THE APEX  
OF THE THREE PROPOSED ALTERNATE ROUTES  
TO CONNECT THE PARKWAY TO I4. IF THE  
PATH OF THE PARKWAY REMAINS AS PROPOSED,  
250 +/- RESIDENTS (MANY ELDERLY AND OF  
LOW ECONOMIC MEANS) WOULD BE FORCED  
OUT. AVOIDING THE PARK, BY SHIFTING  
100' TO THE SOUTH OR 200' FEET TO THE

Comments: Rock Springs Run State Preserve is a critical  
wildlife corridor + should remain a protected area  
in accordance with the Wekiva Parkway + Protection  
Act. The most easterly route of the Wekiva Parkway  
shown through the corner of Rock Springs Run should  
be eliminated. Consideration should only be  
given to the westernmost route as shown on  
Expressway Authority maps. The interchange of  
St. Rd 46 + the new beltway should be moved west  
of the Wekiva Basin public Conservation lands.  
This Lake County interchange should be located  
in the northern pasture west of Rock Springs Run  
+ Seminole State Forest. This interchange should  
be placed on the Neighborhood Lakes property. Land

Comments:

As a taxpayer and resident of the impacted area, I strongly oppose any version of the parkway that cuts thru Rock Springs Reserve or any other environmentally sensitive land. I will not support any version of this road that does not protect & conserve 100% of the proposed conservation areas. The environmental impact on this area due to frenzied and seemingly uncontrolled growth has already taken a huge toll. This roadway must not add to these problems

Comments: Area of concern Wekiva River to I-4.

I feel a true compassion for all the people who may lose their homes due to the progress of this road. However, this expressway has been in the making (in theory) for the past 15 years. Those who purchased homes in the last 8-10 years should have know (or should have checked) on the <sup>possible</sup> ~~progress~~ placement of this expressway in the RT 46 area. With that said, I believe the state should connect directly into the interchange that now exists for RT 417. If you're going to build an expressway — make it a true expressway. The plan to make RT 46 half expressway from the river to Markham Road and then a 4-lane Highway (with front lanes) that will have lights to I-4 is a bad idea. Even with speed controls, this plan is a → ove

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear A.T.,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and interest. Your comments will be reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

Sincerely,

Mary Brooks

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Anita,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and interest. Your comments will be reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

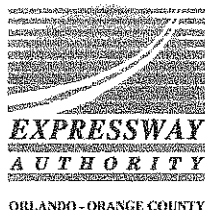

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Maureen,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and interest. Your comments will be evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

Regarding your query about the historical marker on your property on the project exhibits, there apparently was an error in the preliminary historical information that we got from the state files. The dot should have been on the property at 3135 Kelly Park Road, which contains a residence of potentially historic – but as yet unevaluated – significance.

In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input, and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are slated for late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

All of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Doug & Laura,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting public comment forms. We appreciate your time and interest. Your comments will be reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Mark & Monica,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting public comment forms. We appreciate your time and interest. Your comments will be reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

RE: Receipt of Public Meeting Comments for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Carlton,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting public comments via the court reporter. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. For example, the Seminole County Expressway Authority voted Dec. 20 to remove from consideration the yellow or northernmost alternative (which would have connected to Interstate 4 at US 17-92).

There are many questions that cannot be answered and details that are not yet available this early in the process. Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Frank,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and interest. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

Obviously, there are many questions that cannot be answered this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Rick,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

Obviously, there are many questions that cannot be answered and details that are not yet available this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

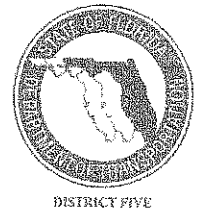

I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

Sincerely,

Mary Brooks

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Trina,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

There are many questions that cannot be answered and details that are not yet available this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Tom,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

As you are aware, the Seminole County Expressway Authority voted Dec. 20 to remove from consideration the yellow or northernmost alternative (which would have connected to U.S. Highway 17-92 at Interstate 4). The SCEA must approve any alignment through Seminole County.

There are many questions that cannot be answered and details that are not yet available this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. Dear Dan & Lori,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

There are many questions that cannot be answered and details that are not yet available this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

Sincerely,

Mary Brooks

RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear Loc,

Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study, and for submitting a public comment form. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments.

There are many questions that cannot be answered and details that are not yet available this early in the process. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

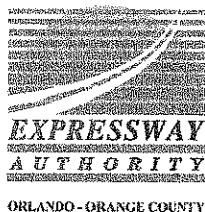

Also, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.

Sincerely,

Mary Brooks

RE: Receipt of Public Meeting Comment for Wekiva Parkway PD&E Study Initial Alignment Alternatives

Dear William,

Thank you for submitting public comment via the court reporter at one of the public workshops for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. For example, the Seminole County Expressway Authority voted Dec. 20 to remove from consideration the yellow or northernmost alternative (which would have connected to Interstate 4 at US 17-92).

There are many questions that cannot be answered and details that are not yet available this early in the process. Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006.

Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007.

Also, all of the public workshop exhibits and other information are available and should be updated in March on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files.

I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817.
