PIO pulled up latest alternatives map and called Cindy Cioci to get her location. She said she's west of Ponkan and Plymouth Sorrento Road. She said the ramp from the Ponkan IC and the red line cut right through her property. She said it took 45 minutes to pull up the map from the website because they can't get DSL in her area. She said she can't understand how her neighbor Dr. Diaz could say his property won't be affected; he's on the right of her and looks like alignment also hits her. She asked why the IC was at Ponkan right on top of her? PIO noted looking at IC locations at both Ponkan and Kelly Park Road. She said map doesn't show IC at Kelly Park. PIO noted you have to zoom in quite a bit, and it's a different IC concept than Ponkan, but those thin yellow lines are the IC ramps. She said she saw that now. PIO noted data so far showed Kelly Park would work better as an IC; Ponkan so close to 441 IC that people might skip it and go down there. She said her neighbors and everyone with 20 acres or more to the north of her have been trying to band together and sell to a developer. But she doesn't want any part of that. I don't want to move. I want to stay. I don't care if it's in my backyard. I just want to know what's going to happen; we've been in limbo for so long now. She asked so if the Ponkan IC went away would she be in the clear? PIO cautioned from drawing too much from that; noted this is just a concept of a possible IC there. The IC hasn't been designed and could take different configuration. Also noted the alignment still could shift, so warned her against expecting any definitive conclusions at this point. She asked were there going to be any more meetings? PIO noted planned next public workshops for mid-August, though haven't set dates yet. She said she heard it was going to be in June? PIO noted weren't ever looking at June; originally were looking at July, but took longer than expected to meet with all the government officials, working with their schedules, etc. PIO noted we're working on the next newsletter which will have the meeting info and that will hopefully come out in June. She said thanks for getting back to me. She just wants to know what's going to happen. PIO noted I understood and feel free to call anytime.--159 p.m.

5/16/2006 1:25 PM

PIO researched Cindy Cioci's location (3150 Phil's Lane) and compared to latest alignments OCPA site was down and couldn't pull her map location after multiple tries.

5/16/2006 10:38 AM

Cindy Cioci from Phil's Lane called and left MSG in the proposed path, or of the proposed paths, of the 429 extension or the Wekiva Parkway. Call me at home. I'd like to ask a question. My neighbor Dr. Diaz said his attorney received word from EA that his property

is not in the proposed path, and also his neighbor to the west of him as well. If you would call me I would appreciate it. Thank you. 407-889-0305

8/28/2006	6:45 PM		

PIO arrived at Capri Cove HOA meeting at 204. Mark got there just a few minutes later, followed by Tom and Brian. Pat and Jean Ciullo hosted the meeting at their home, about 20 people attended. Team members introduced themselves. Residents went around and introduced themselves, noting how long they'd lived in Capri and how many kids they had. Residents had lived there dating back to 2000. Mark went over background; genesis of Wekiva Parkway was Western Beltway part B, back in 87-88. Since then the state purchased a lot of lands, and there were concerns about another river crossing. The EA was asked by LC to look at the growing population and development. There were concerns re: land use, Wekiva area impacts, water quality and wildlife in the Wekiva area. With the controversies Gov. Bush issued executive orders establishing a task force and later the WRBCC. The coordinating committee issued a final report in March 2004 which led to the WPPA legislation signed by governor in June 2004. Mark went over scope of legislation, habitat, wildlife corridor, etc. That led to the joint study involving DOT and the EA. He noted their jurisdictions. Mark went over issues in each county, the direction provided in OC by EA, also City of Apopka, and OC. And in LC, the county and Mount Dora. He noted we're seeking concurrence with the local agencies. In SC he noted the legislation identifies the SCEA (7 members, 5 county commissioners and one for Sanford and Lake Mary) will make the final decision on the alignment. He noted they are key in the decision making process. Some residents interjected that the county said it's up to DOT, etc? Mark noted there are different interpretations of the law, but at the end of the day we want to have consensus between the DOT and SCEA. It was noted SC Commissioner Brenda Carey was invited but didn't attend. Mark noted she's is truly busy but very much involved in the process and in communication with study team, and knowledgeable about transportation issues. Residents asked if they could break Mark's background presentation and begin asking questions. Q: will any of it be a toll road? Mark noted the OC portion will be tolled. Right now, we're not looking at a toll for the east-west portion. He said the main intent of the study is to replace 46 ... the bridges in key habitat areas. It would be limited access, with a couple of components that would be controlled access. Mark noted the typical section in SC would be an expressway along 46 with frontage roads to provide access to neighborhoods. .... If it goes to I-4 the frontages roads would go to I-4 also. If it goes to 417, the frontage roads would drop off in the area of Orange Boulevard. Q: who has funding for our section, that affects our neighborhood? Mark said we will seek funding from FHWA. Those federal dollars would go to the Central office in Tally, which doles out the money based on MPO priorities. For Orlando the MPO is MetroPlan, and also input from local officials. Q: how much will it cost? Mark said \$1.6 billion at last estimate. Q: does the law say you have to fund it? Mark said there is nothing in the law about any such

requirement.Q: who has the decision making power that we can focus on? Mark said FDOT and SCEA ... when the decision is made, an important part is finding the money. Mark said there is some money earmarked for this, about \$40-50 million for OC portion for design and some ROW acquisition. FDOT has some money identified in LC. Tom said \$45 million is programmed in 2010-11 for ROW, but that won't purchase all of it. Mark said perhaps that could be moved around and used.Q: does funding have to be in place before construction can begin? Mark noted project doesn't have to be completely funding before can move forward or first segments can begin.Tom said getting the study approved qualifies us for federal funding, then we have to get the money for future phases. He said the biggest cost is construction. Those costs have gone up significantly, the same with ROW. We're also having difficulty with bids from contractors coming in extremely high. Tom said the main difference between the EA and FDOT, is DOT has to have the money or will have it in foreseeable future. The EA can bond it out, build and use tolls to pay for it.Discussion of phasing sequence.Tom said we have to have the money or it's going to be there in the near future. Mark noted we don't have to have the \$2 billion in one year. The cost will be spread over several years. With the study approval in 2007, design 3-4 years ... probably 2013-2014 to start turning dir. That's the best case scenario is everything works out. Tom emphasized 2013 is the earliest for construction if someone handed us all the money.Discussion of yellow line Blaine Henry placed near their entrance showing edge of ROW, Blaine asked if we should all go out and take and look, really understand their concerns. Tom said we know where it is.Alan Baker/resident said the part that takes place is the short term that will affect us the most. Our urgency is immediate. We're asking for assistance to save our lifestyle.Mark went over slides, noted we're still holding that alternative that goes along SR 46. He pointed out Wayside and Orange. Mark said ROW through is area 200' wide, (constrained from 300') until we get past Orange Avenue, then widens out. ROW at bridge fairly tight .... We would avoid purchasing land at the corner. Mark said the tape outside is pretty close in showing the ROW. Q: can we relocate the pond to the other side of the highway to keep our sound barrier (treed buffer)? Mark said we move retention ponds all the time. Depends on constraints on other side, hydrology, etc. Blaine mad ea comment about the drainage pattern in the area, and some existing drainage issues.Mark went over next slide which shows 417 alternative shifting away from Capri Cove, but it will hit the church and 6 more residences. He said we tried to keep it off Tall Trees. We can't swing it any more or it goes right through the middle of Tall Trees Blaine said he's spoken to some of the additional homeowners that would be affected. He said by "threading the needle" as some stated at the workshop, you've put the cost on us, affected the value of our homes.Mark went over alternative B which would straddle Wayside, still moves farther away, but would still hit the church. Tom said we will still have to run costs on each of these alignments. Mark said this impacts an additional 5 homes instead of 6. He said he met with SC Public Works, and we realize we have to do something with the local roads, maybe cul de sac Orange Avenue ...Mark noted these are very early concepts, haven't been fleshed out. Someone asked about how they would access the roadway? Mark said we're not proposing ramps here. There would be slip ramps at 46 and Orange Boulevard and ramps at International parkway.Q: what about sound barriers? Mark said we will do a noise study.Q: where the pond was are two at segmented parcels. Would you acquire all of it? Mark said generally can only buy land for transportation purposes, but property owner could negotiate full take to avoid remnants, it's been done on a case by case basis. Q: of who owns the current buffer property? Discussion that it might belong to the Catholic Diocese. Discussion that owner could also clear that property and something else, a convenience store, could go in there. Resident noted we would fight that also; it's not just you we're up against. Recapped additional impacts of latest alternatives: A - 6 additional houses and the church (Lakeside Fellowship UMC) and B - 5 additional homes. Mark noted those aren't the only property impacts, just the additional homes.Q: how long before you work through the ROW costs? Mark said a couple of months to do impact and cost analysis. We also need to look at wetlands, etc Pat Ciullo said we're trying to be realistic. It's a no-brainer that you get on the 417 and should be able to continue on the 417. He again argued for protecting their lifestyle and values, said they're willing to work with us.Q: what are the chances you can move the retention pond? Mark said they move all the time. Tom said we have to show it at this stage so there are no surprises later on.Q: what is the cost to build the overpass? Mark

said around \$4 million generally ... discussion of access for neighborhood with alternative A. Mark noted with alternatives A the road would be about 550' from the corner; alternative B it would be about 150'; and the original alignment it would be 50-60'. Jean noted with the alternative A, the kids wouldn't have to go under an overpass to get to school. That's a big concern of ours. Mark noted they're not building overpasses like they used to, but understood their concern. Jean and Blaine thanked team for being there, each said they felt better having met with us and seen the latest alternatives. Blaine said we understand there need to be improvements on the roadway. We have seen the traffic on 46. You can hear it at 4 a.m. but people are bears too. If we can come up with a compromise, we want to work with you on a compromise that benefits not just us but other neighborhoods too. He said they don't want to be the ones shouldering all of the cost, in terms of loss of lifestyle and effect on their property values. He noted several times that he had spoken to a number of the residents he believes would be affected if alignment alternative was shifted, and thinks they wouldn't mind selling. Tom said if we can come up with a good compromise that works, and doesn't impact a lot of others who aren't affected right now, we're willing to do that. Mark said we need to work with the county, and we have to quantify the impacts. Blaine said he talks to people while walking his dogs and the subject of the Wekiva Parkway comes up a lot. ... He said a lot of people tell him they would rather be bought out. Mark noted we hear differently. Tom said ideally we would like to miss every neighborhood and not have to buy a single home, but that's not reality. Q: is 46 alternative still a viable alternative? Tom said of the cars at the bridge on the Wekiva River, about 30-37% want to go to the 417. Vehicles trying to weave on that little stretch of I-4. I would be less than honest if I said that 417 doesn't make more sense. Mark said connection to 417 should provide more transportation benefit than trying to lay a systems IC on top of a local IC at SR 46. Q: has anyone been contacted east of here about ROW? Mark said no active ROW solicitation at this point. But people have contacted us about selling their property. Q: what about the International Parkway study? Tom said Comm. Carey wants us to move forward right away. There should be a public hearing in a couple of months. We were going to wait until this study was done. That would have one ramp on and off, but you won't be able to get on the Interstate. Some homeowners liked the idea. Now they have to get off at Rinehart and go up to 46. Tom said for an interim project it's doable; 2011 funding. Q: we were told at the meeting that we wouldn't qualify for noise walls? Tom said we don't know that yet. The farther away you are, the less likely qualifying would be. He said with bridges we can do 8' wall that have some benefits. Mark said we should tie that down in the next 2-3 months. Mark went over schedule, noted we're in flux due to a number of issues. He said hope in January-February to identify a draft preferred alternative, and then go through government board review to go to public hearings. Discussion that next SCEA meeting could be in November. Mark noted in a case like this we could still make a few changes at the public hearings. Q: who can we lean on? Mark noted Comm. Carey and other commissioners have a key role in this. Tom and Mark made comments regarding it's good that the community is involved and made their concerns known. Tom noted we look at these things from a transportation perspective, so if we don't get concerns raised we probably would have moved forward with the 417 alternative as it stood. He and Mark noted the DOT learned their lessons from the past, where they would just tell people what was going to happen at public hearings and there was no community support. Tom noted we really do value the community input; we're looking at this from a different angle, but you all have the information on the ground. Jean said she feels like a dialogue has been opened, went over character of their neighborhood and why they're adamant about not losing it, no through traffic, kids can play in street, neighbors all know each other, celebrate holidays together, baby sit, etc. Jean and PIO discussed staying in touch and letting her know when we had some additional info to show them.--820 p.m.

8/25/2006 5:16 PM

"Aug. 25, 2006 Jean Ciullo 204 Capri Cove Place Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Jean Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns, and look forward on Monday, Aug. 28, to the first of what will likely be several meetings with your homeowners association board to try to address your issues. Your comments will be

reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/25/2006	11:51 AM	Mark accepted Capri Cove HOA meeting request.
8/25/2006	11:31 AM	PIO responded to Jean/Capri Cove HOA: "Thanks Jean. I've forwarded the calendar item and directions to the team members attending. We will see you there."
8/25/2006	11:25 AM	PIO emailed calendar item with directions re: Capri Cove HOA meeting to Tom, Brian, Mark, and Mike.
8/25/2006	10:21 AM	Jean/Capri Cove HOA responded to PIO email: "Mary, We appreciate everyone's time and input and will look forward to seeing you all on Monday evening at 7pm at my house. My address is: 204 Capri Cove Sanford, FL Home Phone: 407-688-9163 --- From Orlando: Take I-4 East to 46A Exit (exit #101A) Turn Left onto 46A and take it to where it dead ends into Orange Blvd. Turn Right onto Orange Blvd. Go exactly 1 mile to flashing light at Wayside Dr. Turn Left onto Wayside Drive Turn Left onto S. Orange Ave And Take quick left into Capri Cove Gate Entrance 204 Capri Cove Pl. is the 2nd house on your right Our gate code is *2049 (you have to hit the star key first, then the number --- from Sanford: Take SR46 to Orange Blvd Turn left onto Orange Blvd (Mobile and Video store on corner) Take first right onto Wayside Drive Take first left onto S. Orange Avenue And quick left into Capri Cove Gate Entrance 204 Capri Cove Pl. is the 2nd house on your right Our gate code is *2049 (you have to hit the star key first, then the number) Jean Brady Ciullo Manager, Network Engineering Managed Data Services Office: 407.741.0525 PCS: 407-687-8159
8/25/2006	9:39 AM	PIO returned Jean/Capri Cove HOA call, she said she's got 200+ emails, went off line at noon yesterday. She just found it. PIO noted attendees for Monday's meeting; where would we be meeting? She said at her house 204 Capri Cove Place. she's going to reply to my email with directions and location. She noted she has Tom Percival's email and asked if she needed to send info to others? PIO said no, just let me know and I'll send actual calendar items to them for their planners. She said okay and would send info now.
8/25/2006	9:24 AM	Jean Ciullo/Capri Cove HOA left MSG I'm following up on our meeting next week. I got a call yesterday as well from Tom Percival and he told me he was going to be attending the meeting as well which I'm very pleased to hear since he was directly involved. e Just getting back to my email from yesterday so not sure if you've sent a confirmation I'm at my neighborhood now. Give me a call when you get a chance. 407-687-8159 thanks Mary. Bye.
8/24/2006	2:43 PM	Mark asked if I was notifying Jerry McCollum and the county commissioners of these HOA meetings? PIO noted I was instructed to notify Jerry and Gary Johnson, and they wanted

to pass on to commissioners, that's what we've been doing. He said that's fine, he just wanted to confirm that was happening. PIO noted as soon as I firm up the Capri Cove HOA meeting I'll do likewise. Mark said we probably should be doing the same thing for Lake and Orange counties also. He noted he has a meeting tomorrow with Jerry McCollum to go over how some of the adjustments for Tall Trees and Capri Cove might affect local roads. He noted we could move it 50' away from Tall Trees without impacting Capri Cove, but if it went much farther away from Tall Trees it would go into the other subdivision. PIO asked about option Tall Trees resident mentioned about the International Parkway ramp, pulling that in over or to the other side of the pond? Mark said that's one the things they have to talk with Jerry about tomorrow. PIO noted I'd only heard back from him and Tom on the Capri Cove meeting. He said that's fine, let's go with that.

8/24/2006	1:11 PM	Mark/CH2m Hill responded to Capri Cove HOA meeting email: "28th for me."
8/24/2006	6:44 AM	Tom Percival/FDOT responded to Capri Cove HOA meeting email: I can do either day.
8/23/2006	3:43 PM	PIO emailed team re: Capri Cove HOA meeting dates: "Good afternoon, Spoke this afternoon with Jean Ciullo of Capri Cove HOA and she's open to us meeting with their board either Monday or Tuesday, Aug. 28 or 29 at 7 p.m. She asked for the reason for the meeting, since they feel they've already made their concerns clear. I told her given the constraints in the corridor, if the 417 alternative is selected, we need to know what they would be open to. She said they look forward to hearing what options we can suggest. Please let me know, at your earliest convenience, which of these dates works best so that I can get back to her to firm up. If neither date works, please suggest an alternate date. Thanks. Mary Brooks
8/23/2006	3:35 PM	PIO called back Jean Ciullo/Capri Cove, scheduling board meeting, typically Mon. evening, she asked if anything had changed since the workshops? PIO noted we want to see what other alts can come up with, but any shifting for Tall Trees for example would affect Capri Cove. PIO noted we want to get with them to see what they could be open to, given the fairly limited area if the 417 is selected. She said they normally meet once a quarter but can do it more often if something is going on, she said could do it either next Monday or Tuesday Aug. 28 or 29. they meet at 7 p.m. PIO to run those dates by team and see which works best. She asked who would be attending besides PIO? PIO noted someone from FDOT, either Brian Stanger or Noranne Downs, and Mark Callahan from Ch2M Hill, which is actually doing the study. she emphasized they've made their comments clear, so what is purpose of the meeting. PIO noted we want to hear what they might be open to, how we could possibly address their concerns given the various constraints. If we come back with options, what's going to be acceptable. Noted we wanted that input before trying to revise the alternatives. We agreed it needs to be sooner rather than later.
8/23/2006	3:22 PM	Jean Ciullo/Capri Cove 407-687-8159, sorry I missed your call earlier. I was on a conference call and couldn't bail on it.
8/23/2006	3:13 PM	PIO called Jean Ciullo/Capri Cove HOA 407-687-8159 re: scheduling meeting w/ HOA, left MSG that we want to set up meeting to see what can be done to address their concerns. Noted we've been meeting with other HOA's, community stakeholders including Tall Trees last night. Asked her to call me back or just respond to my 8-17 644 a.m. email to indicate next board meeting or other appropriate time for the team members to meet with them.
8/17/2006	6:44 AM	PIO emailed Jean Ciullo/Capri Cove HOA: "Hello Jean, I'd like to discuss scheduling a Brian Hutchings meeting with you and your HOA board to discuss your concerns regarding the SR 429-Wekiwa Parkway alternatives under consideration. Please let me know what dates and times would work for you so that I can coordinate with the study team. I look forward to hearing from you. Mary Brooks
8/1/2006	2:33 PM	attended public workshop on 7/25/06
7/31/2006	10:23 AM	Attended meeting on 7/25/06. Submitted comment form as attached.
7/24/2006	4:52 PM	PIO returned call to Jean Brady Ciullo president for Capri Cove HOA C 407-687-8159. know there's meeting tomorrow evening, assuming it's just more of meeting similar to in

the past when they put the boards up. She said there's still unanswered questions re: noise abatement. She said it seems like only one option at this point. Capri Cove is off Wayside. ... So if we want to get info so we can understand all the alternatives and breakdown of costs and what options were considered. Think the 417 was more expensive ? PIO noted it is costly, but just came from meeting and they presented some preliminary costs on the 46 IC and that also is costly and cumbersome and doesn't work well from a traffic efficiency standpoint. It's hard to get in and very complicated. So each alternative has its plusses and minuses. She said they're looking for costs associated with alternatives, guess we want to understand some of the considerations that came along with each of those. The one that goes by... how will we get in and out? will it be safe for our kids to go to school? If it's only half mile away, will we see it? What about noise abatement? What houses will be taken? Is that veterinarian clinic ...? Will we be able to get copies of the cost and other info? PIO said we'll have some copies at the workshops of cost and impacts but probably not enough for everyone. If we run out of something, you can fill out a comment form to request we send the info. She said some people submitted comment forms last time and got responses while others didn't. PIO said I got hundreds of forms and sent out hundreds of responses to the ones I received. PIO said please apologize to those who didn't get a response for some reason and tell them don't let that stop them from submitting further comments. PIO noted some HOA's have sent bulk comment forms, so it's easier to tabulate community opinion vs. ones coming in piecemeal, so that's an option for them also. She said that's an idea and she'd mention it to the homeowners at the meeting tonight. She asked when they'd have the vote? PIO noted with formal public hearings in Feb.-March, agencies would approve or disapprove preferred alternative by say April or May. She said we've got a lot of questions. We just need to organize ourselves and organize our questions. Our neighborhood is small. I'm new; I moved in year ago. There are 18 homes on a lovely gated street. I'm HOA president as of first of the year. PIO also offered as have done with other HOA's to do presentation after workshops to answer remaining questions. She said she will mention it tonight at the meeting. Jean Ciullo, 204 Capri Cove Place, Sanford 32771, h 407-688-9163 jean.m.brady@sprint.com I'm network manager for sprint. She said we certainly understand the need for progress. There's clearly a need for something to be done there. PIO said we want to get you the best info we can at this stage, with understanding that during the study things are still flexible and subject to change.

7/24/2006	4:12 PM	Jean Brady Ciullo HOA president for Capri Cove, one of the neighborhood that will be impacted by one of the options for Wekiva Parkway and SR 46 bypass. Wanted to make Inquiry about tomorrow's meeting and future meetings. If you could call me back C 407-687-8159 thank you.
Contact		Timothy R. Clair

Date	Time	Regarding
9/22/2006	11:43 AM	"September 22, 2006 Timothy Clair 24024 Terragona Drive Sorrento, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Timothy, Thank you for submitting public comment forms for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. The County Road 46A realignment was mandated as part of the Wekiva Parkway & Protection Act to eliminate conflicts between the road traffic and the historic wildlife corridor. The realignment also would provide an opportunity to create a safer intersection connection to State Road 46 (a +-plus intersection versus the current skewed one). Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the

Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/7/2006	10:35 AM	Attended public workshop on 8/1/06. Submitted comment: "Why close part of an already existing road (46A)? It's already there through the wildlife area. If this was part of the deal to get the expressway project I don't remember having any public hearings on that! Taxpayers will be stuck paying for a new road to be built through privately owned land when there is already a road serving the same purpose! If someone from SR 44 wants to get to 46 and the interchange, they could take CR 437 or 46A to 46, then onto the expressway."

8/18/2006	8:25 AM	Attended public workshop on 7/25/06 and submitted comment: I think that will be better/best for the Wekiva Parkway interchange to be placed @ Kelly Rd. and not @ Ponkan Rd. because of the schools in the area and the children who would access this road it will be dangerous for our children. This would be more convenient for parents like me, to commute to and from work and our other daily activities. Additional Comment:" Please place the exchange at Kelly Park Road. It would be more convenient and better for our children."

8/24/2006	1:35 PM	<p>"Aug. 24, 2006Angelo Coduto6085 Feather LaneSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear Angelo,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks</p>

7/14/2006	11:45 AM	PIO responded to emails from Robert J Colebank [fairfaxloan@cfl.rr.com], attached viable concept: "Hello Robert,Attached please find the viable alignment alternatives map for the Wekiva Parkway Project Development and Environment (PD&E) Study. As we just discussed, the maps at the public workshops will include the latest changes based on continuing local government and state agency input. Look forward to seeing you at one of the workshops!Mary Brooks
7/14/2006	11:40 AM	PIO got call from 407-474-6944 Bob Colebank, who said they're doing something with a property by the river and looking for a map. PIO noted I was responding to his email when he called. He said they're specifically interested in what's happening at the river, heard there was some kind of controversy from what I read. PIO noted not sure what that would be, we're crossing river in exact same location. He said disregard, just really trying to get a map. PIO said he should receive the email in a few minutes. PIO noted he's getting the last map that was done, but we've had additional input from governments, etc. so maps at the public meetings will be the latest and greatest. He said he appreciates that, thanks.
7/14/2006	11:34 AM	PIO returned call to Bob Korvak? 407-474-6944 phone rang and rang and then got busy signal. PIO tried again, this time got voicemail, left MSG to call me back, gave number again, also noted map was on website and gave address.
7/14/2006	11:32 AM	PIO returned call to Bob Colebank 407-474-6944 phone rang and rang and then got busy signal. PIO tried again, this time got voicemail, left MSG to call me back, gave number again, also noted map was on website and gave address.

Contact Notes		Casey Collins                      Gaylord Merlin
Date	Time	Regarding
9/15/2006	2:42 PM	PIO returned call to Casey Collins/Gaylord Merlin, asked if she'd gotten my email response to her voice mail this morning? She said no, she's changed to her married name but it should have still come through. PIO reiterated info in email, schedule still same, draft preferred by Dec-Jan., government review and public hearings in March 2007. PIO asked if she'd heard something different? She said no, but someone had asked and it had been a couple of weeks since she'd spoken to me and wanted to make sure nothing had changed.
9/15/2006	1:53 PM	Casey Collins/Gaylord Merlin called but didn't leave MSG.
9/15/2006	9:52 AM	PIO emailed Casey Collins/Gaylord Merlin ccollins@gaylordmerlin.com: "Hello Casey, I received your voicemail message Wed. afternoon. We are still hoping to draft a preferred alignment alternative by Dec.-Jan., which would then have to undergo local government and state agency review. We are shooting for public hearings on the resulting preferred alignment alternative in March 2007 at this point. I hope this helps. Please feel free to call or email with other questions or concerns. Mary Brooks
9/13/2006	4:43 PM	Casey Collins/Gaylord Merlin in Tampa called and left MSG I know we spoke not too long ago about the Wekiva Parkway extension. I have a quick question for you re: the schedule. The last time you and I spoke it looked like the next thing that would happen would be anticipated formal public hearing at that time the preferred alignment maybe presented. The timeframe based on our conversation was February-March of next year. Only thing I know of that could be occurring prior to that would be draft of preferred alternative, could occur at end of this year. If any further info that you might be able to provide with respect to that schedule, if anything has occurred that would change that schedule, if you could get in touch with me please I'd really appreciate it. 813-221-9000
8/3/2006	4:08 PM	Casey Collins/Gaylord Merlin in Tampa called and left MSG I wanted to follow up with you, please re: the Wekiva Parkway. Think there was a meeting last Tuesday night, a public meeting. I did want to follow up with you please regarding that meeting to see if you could provide any updates regarding the project. ... Any info you might be able to provide regarding a schedule at this point. If you could give me a call back I'd appreciate it. 813-221-9000 thank you
8/3/2006	9:20 AM	Casey Collins 813-221-9000 called back with more questions. Said she saw the 6 interchange options from when you walked me through the website yesterday. But what are these other two interchanges at Kelly Park and Ponkan, are they just extensions of the

other one. PIO went over a couple of times that we have to choose one access IC either at Kelly Park or Ponkan for folks to get on and off via IC at one of those side streets. The systems IC is to connect the 46 bypass to the rest of the Wekiva Parkway. She said she thought she understood now and thanks.

8/2/2006	2:31 PM	PIO returned call to Casey Collins/Gaylord Merlin in Tampa 813-221-9000 I wasn't able to get o that meetings, was there anything that has changed. Is there a site I can go to? PIO What's schedule of events? Know after workshops what's happens, I know you have to review the comments? PIO noted we have to tally the comments, further engineering analysis, by November-December hope to draft a preferred alternative, make some recommendations on some of these choices. Noted that has to go through government review, with formal public hearings in February-March. Then agency approvals, maybe finish study with approved alternative April-May.She asked whether construction was funded? No, not for either agency. What's funded so far? PIO relayed funding status.She asked when would OC portion be built? PIO noted not funded yet, if can get funding have heard 2012, but that's highly speculative until the dollars are there. She said she knows DOT's FY is July 1, any idea when more funding would be available? PIO noted OOCEA does not have construction programmed in the 5 year plan at this time, so unless something becomes available....She said okay, she thanks that's what she needed. Thanks.

10/12/2006	1:22 PM	Steve Homan/FDOT responded to PIO email, copied Christa Deason, Tom Percival and Gary Johnson: "Mary,This is apparently a Turnpike Enterprise project. By copy of this response, I am forwarding your email to Christa Deason in the Orlando area Turnpike Enterprise Office. I don't believe there are right of way implications associated with the planned widening project.Steve HomanPublic Information Officer386-943-5479 or 1-800-780-7102email: steve.homan@dot.state.fl.us
10/12/2006	11:51 AM	PIO forwarded 417 meeting query to Tom Percival, copied Steve Homan, copied Gary Johnson/SCEA: Greetings, I received a call late yesterday afternoon from 522 p.m. PIO called back Joan Colton, (C 407-461-3790 or home in Clearwater 727-517-1707) who said she got a letter about a meeting tonight on the 417 from Aloma to Rinehart, but she's stuck in Clearwater and can't make the meeting. She owns Greystone Stables, 4401 South Sanford Avenue. Parcel ID No. 17-2031-5AZ-0000-009A, which she said is near the 417 Lake Jessup toll plaza. Since she can't make the meeting, she wants to know if the project is going to affect her property. She is concerned about her barn, which apparently sits at the back of the property closest to the plaza.She said she tried calling the contact on the letter, Katherine Bradley 407-532-3999 x 3802, but has not heard back from her.Can you have someone from that project contact her? Let me know - thanks. . PIO
10/11/2006	5:22 PM	PIO called back Joan Colton, who said she was stuck in Clearwater and there's a meeting.. I own Greystone Stables, 4401 South Sanford Avenue. Parcel id. 17-2031-5AZ-0000-009A PIO described that project as separate from Wekiva Parkway. She said letter didn't say

they were taking property or how close they were coming, just there was a meeting. My main thing is are they going to take my property? I can see cars through woods between Letter said they were going from Aloma to Rinehart. The contact Katherine Bradley 407-532-3999 x 3802 and I've called her couple times and not getting any response back. So when I knew today I couldn't make the meeting, I was trying to get a hold of someone else. If they come too far back, they will hit my barn. PIO said that's a different project than what I was aware of. PIO said I'd have to look into it and get back to her, will be tomorrow before I can get back to her. She said that's fine, she just didn't want to drop the ball on that.--529 p.m.

10/11/2006	11:10 AM	Joan Coulton/Greystone Stables called and left MSG I got letter saying meeting tomorrow night about extension of 417. I was wondering ho might impact my property. It's close to the lake Mary exit and also near the toll exchange. It's just the corner of the property. I have not been informed that any of my property will be taken however I would like t o speak to you about it since I'm not going to make that meeting. I'm out of town. C 407-461-3790 or home in Clearwater 727-517-1707 I would like to have a heads up about what's going to happen at the meeting tomorrow night that I'm going to miss. Thank you.
------------	----------	---

Contact Notes Date	Time	<div style="display: flex; justify-content: space-between;"> <span>Martin Comas</span> <span>Orlando Sentinel</span> </div> <p>Regarding</p>
7/25/2006	10:43 AM	Martin Comas/Lake Sentinel called and said he was cleaning out his emails and just saw the one from me following up his story. He said he'd gotten the info about connecting to existing 429 from an old Scott Powers story, but he sees now that it hits 441 further north. He noted Jay did a story Sunday and did have it correct there. PIO said that's correct, and his story was fine, just wanted to make sure he was aware of that since he'd be writing about this more in the future most likely. He asked about nature of public workshops? PIO noted we'll have boards, different IC concepts, as well as comparative info on the various alignments, impacts to homes, etc. he said he will attend the Lake Receptions meeting.
7/20/2006	11:25 AM	PIO emailed Martin/Orlando Sentinel: "Hey Martin,Thanks for the good job on today's story. One matter for clarification for when you write about the project in the future. We are not connecting to existing 429, which ends at 441 in the area of Vick Road and near Errol Estates. We will be connecting to the new 429, which in that area will run jointly with the SR 414-Maitland Boulevard Extension, which will cross 441 near Plymouth Sorrento Road, like a mile or so northwest of the current 429/441 interchange. Just FYI. It was good catching up with you this week. You've probably got a lot more seniority than a lot of the folks at the paper these days! I hardly recognize many of the bylines. If you bump into Lauren Ritchie, give her a shout for me, will you? Thanks and talk to you soon.Mary Brooks
7/19/2006	5:12 PM	PIO returned call to Martin Comas/Orlando Sentinel, went over his questions regarding the IC, noted important thing about alternative 1 that mount Dora commissioners mentioned was the grade separation, similar to what is there now. They felt that would, with the flyover, help keep inadvertent traffic out of their downtown. He also had questions about the traffic counts and impact of Wekiva Parkway. PIO confirmed the AADTs were total traffic (he thought the numbers were just SB or NB). He read a couple sentences of his story, which appeared to be accurate, though he was increasing traffic north of 441 to 75k when we have 73,3k. He said he could change that.
7/19/2006	12:38 PM	Martin/Sentinel 352-742-5927 I was calling , planning to write story for Thursday Lake section re: presentation made at Mt Dora city council, interested in few questions about he IC at 441 and SR 46. If you could give me a call back I'd appreciate it.
7/18/2006	1:22 PM	PIO called Martin Comas 352 742-5927 let him know PowerPoint too big to email, so not sure can get it to him before tonight. He said that's fine. PIO said are there any questions I can answer that might help him? He said Mount Dora's concern is ... this splits off into a Y, and then there's one part that goes Wekiva Parkway toward the east and then the part that goes toward the west follows SR 46. Mount Dora's concern is that they want that traffic to go north on 441. PIO noted that's correct. We were directed by the city to draft a concept that would limit inadvertent traffic into their downtown and clogging their city

streets. PIO noted there are 4 or 5 concepts and that is one of them that will be discussed tonight. He said the other issue was a loop interchange... PIO noted there was an IC concept with a loop ramp in the area of a mobile home park in the SW corner of the IC. Martin said yes, the city just annexed that in recently. Some people not too happy about that. PIO noted we'll likely spend most of the time tonight on these issues, and commission may direct us to remove an alternative or two from consideration; that's happened at other government meetings. He asked what other ones we'd been to? PIO noted have met number times with City of Apopka, SCEA, OC and others. Think this is the last one before public workshops. PIO also pointed out to him the green alternative that wasn't on the last viables map that had been added at the hump of 46 near Seminole state forest. PIO emailed him the map and he saw the area in question. He asked about the parkway following 46 for the most part? PIO said correct, except in area of Mt. Plymouth and Sorrento, those communities were very vocal several years ago when committees working on this were active, they didn't want 46 or a parkway developed through their communities, so that's why it dips. He said right, they want to build a downtown center. He asked how many lanes it would be? PIO noted it would be different for different locations, would have to confirm that segment and get back to him. Noted it'll be either 4 or 6 lanes. He said he's just trying to get some background. PIO reiterated most of the discussion tonight will likely be on the IC concepts, and may give direction to remove one or more from consideration before the public meeting. --144 p.m.

7/18/2006 1:18 PM Kristy said Martin Comas had left MSG with Vickie in their office, not even sure how he got her number. PIO noted working with CH2M Hill to get PowerPoint but there may be an issue, is Bryan back? She said he's out sick, went to the doctor's this morning. PIO said if he happens to call in please have him call me, need to run something by him; I've left MSG for him on cell. She said she will.

7/18/2006 12:06 PM Kristy/OCEA called and left MSG are you speaking at city of Mount Dora council meeting today? I got a call from someone asking for the PowerPoint. I have no idea who from EA is presenting to them. Calling to see if it would be you possibly? 407-316-3834 Give me a call back that would be great.

7/18/2006 12:05 PM Martin Comas/Orlando Sentinel called and said I understand reps from your agency and DOT are going to be giving a PowerPoint presentation tonight in mount Dora. Do you have a copy of the PowerPoint? PIO said no but can check. I know a meeting I was in recently said it wasn't finished. He said he asked the city for a copy but they can take a while, thought it might be faster to get from you. PIO said if that's the case, I'll get with CH2M Hill about a copy. PIO noted it might be too large to email, in which case I'd have to drop a copy off on disk. He said the City has new assistant city manager, actually executive secretary and so some things take a while. PIO said I'd check and get back to him, probably after lunch before I can get someone. PIO asked if he was attending the meeting tonight? He said he's not sure; he has a 2 year old. . 352 742-5927

2/27/2006 12:01 PM PIO emailed Martin Comas/Orlando Sentinel: "Hey Martin! Saw your story yesterday on the Wekiva Parkway. Not sure who you talked to, but there IS a S.R. 46 Bypass as part of this project. The project study area was specifically set to go below and around the Mt. Plymouth and Sorrento communities at their request to address the concerns expressed in your story. Not sure why that wasn't indicated, but please give me a call and check out the project website ([www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com)) if you plan to do further stories on the project in the future. Thanks and let me know if I can help in any other way."

Contact Notes	David Cooksey	
11/27/2006	10:38 AM	PIO returned call to David Cooksey 352-406-0668 live in the Sorrento area, you were supposed to show this week a tentative plan and it got delayed? PIO noted no, we're shooting for January to come with recommendation. He said he must have been looking an old schedule. PIO noted some issues taking a while to work out. He said when He said I live in area that is affected by western leg, the Sorrento bypass area; we're just mind boggled because of dropping the road and curves on 46. I guess what ... I know this has been pointed out, why the road isn't carried further out to 441 to draw ... drop the road

east of Round Lake and then carry 46 to 441. Understand 46 will be 4-6 lanes with traffic lights. ... that routing connection... is I know city of Mount Dora has dictated where it should go ... I don't see why that road doesn't carry further west on 46 or south of industrial area. We feel like mount Dora is carrying the shots, they said don't touch the wolf branch sink area.... Then they approved an industrial site right next to it. PIO noted there will be, in a couple of the alternatives a flyover to get 441 SB traffic onto SR 46. he wanted to know why we weren't doing an elevated parkway instead of the 46 bypass, complained that Mount Dora had all the control and residents in his area did not have representation. PIO noted re; Wolf Branch Sink and alternatives formerly affecting that, it was the LCWA that expressed concerns and ask that be removed. He said he's written his comments in before, and you answered my questions re; the updated schedule. He thanked me for calling back.--1051 a.m.

10/2/2006	6:00 PM	<p>"October 2, 2006David Cooksey23434 Oak LaneSorrento, FL 32776RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear David Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1 200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks</p>

Contact Notes	Amalia Corrigan
---------------	-----------------

Date	Time	Regarding
7/17/2006	1:22 PM	Drafted concept letters and sent to: Gladys Williams, Bob Mills, Sue Hamilton, Mr. & Mrs. Warren Ackley, Amalia Corrigan, Bill & Eileen Walker, William Strickland, Ed Meixell
7/13/2006	4:21 PM	PIO returned call to Amalia Corrigan 407-444-2800 I just wanted a bigger map to see what's happening. PIO said I could send an 11x17. She said send to 28214 CR 46A, Sorrento, FL 32776. PIO also told her map was on website. She said oh it is. Oh yes I see the website here. PIO noted she has to go down through the text to see the maps, there's a lot of info there and some folks not going down far enough. She said okay and thanks so much.
7/13/2006	10:19 AM	Amalia Corrigan called and left MSG. I live on 46A in Sorrento; I received some paperwork telling us of the meetings in SC, OC and LC. We moved here last year and never received any info. I would like a map of what's going to take place or what might take place. Fax to me if poss. F 407-444-2810 I'm at work; Work phone 407-444-2800 it would be nice to hear from you. Or if not, if you could just fax a map of the area and where they're proposing to put this bypass I would appreciate that. Thank you very much.

Date	Time	Regarding
9/12/2006	11:45 AM	PIO responded to Thom Coury re: Turnpike 429: "Hello Thom, I am just getting back from vacation and saw your email. The portion of SR 429 from Siedel Road south to 192 which was completed in recent months was done by the Turnpike, not the Expressway Authority. So is the new section to connect to I-4, which the last I heard was to be done by December. By copy of this email, I am forwarding your signal complaint and completion schedule question to Christa Deason, the public information officer for the Turnpike in this area. Mary Brooks

9/3/2006	1:26 PM	-----Original Message-----From: Thom Coury [ <a href="mailto:t.coury@gte.net">mailto:t.coury@gte.net</a> ]Sent: Sunday, September 03, 2006 1:26 PMTo: <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> Subject: StoplightMs Brooks The left turn lane traffic light on State Road 192 east, which leads to State Road 429
----------	---------	--

northbound, is on a 3 1/2 minute cycle. While this may be appropriate during the afternoon, when westbound traffic on State Road 192 from Disney is at its peak, it is ridiculously long at other times of the day. I seek your assistance in correcting this problem or identifying it to the appropriate authority. On another subject, can you tell me if the State Road 429 extension between State Road 192 and I-4 is on schedule for completion by 7 December? Thank you. Thomas Courty. courty@gte.net

Contact	Erin Cox	Orlando Sentinel - Lake County Bureau
Notes		
8/1/2006	3:30 PM	PIO arrived Lake Receptions and helped team set up for meeting. More early arrivals at 4 p.m. Did extended media interviews with Erin/Orlando Sentinel and Nicole King/Leesburg Commercial.... Neither had studied the project or covered it before, so PIO went over details and timeframes at length.

Contact	Jim Cozad	
Notes		
Date	Time	Regarding
11/20/2006	3:00 PM	PIO returned call to Jim Cozad 407-897-3807, 321-278-4106, (properties lot 11 and 12, Yankee Lake, property ID no. 26-19-29-502-0000-0110, 26-19-29-502-0000-0120) relayed that depends on whether we decide to widen to the north or south. If we widen to the north, he'd be looking at approximately 150' off south end of his properties. If we widen to the south, far less if any impact. He asked if I knew which way they were leaning? PIO noted still waiting for final ROW costs, but would appear to higher cost on south side due to all the homes along there. PIO noted decision still has to be made, so can't tell him definitively. He said he appreciates the info. PIO gave him my number in case some times passes and he has any questions.

11/14/2006	1:31 PM	Jim Cozad 407-897-3807, 321-278-4106 called and said I live a long way from where you're at. I got a letter from lawyers for piece of land DOT wants to take. Is there a way I can give you some info and you can look into it? PIO said of course. Jim said he owns lot 11 and 12, Yankee Lake, property ID no. 26-19-29-502-0000-0110, other parcel number is the same but last two digits -20. I was hoping you'd call me because I'm really excited about this. I've been sitting on this property for 25 years and the taxes are just eating me up. Scars the tar out of me to keep it. On north side of 46, across from lake Markham woods road, it's about 300' width. I don't know anything except the thing that came to a friend of mine. PIO noted all the maps from the summer workshops are on the website, offered to walk him through it if he's near a computer. Mailing address: 3233 Raeford road, Orlando, FL 32806 PIO noted it'd be a month or so before the next one comes out, but he'd be sure to get it. He said I'm retired from OUC and can't pay my taxes this year, they're killing me, went from \$12,000 last year to \$15,000. He got on internet, PIO spent extensive amount of time helping him to find project pages and navigate through maps. He stated he is an older gentleman, not very computer savvy and does not hear very well. PIO noticed a number of maps were no longer on the FTP site. PIO suggested he read the project page info and maneuver around the maps and if he has questions he can get back to me. He was very appreciative of the assistance and thanked me for my patience.--153 p m.

Regarding Mailed Response RE Comment Form

Contact Notes Deborah Crane

Date 3/22/2006 Time 4:11 PM  
Regarding  
PIO returned call to Deborah Crane, who said there's a parcel on the Lake-OC line she's looking for. PIO asked if she could pull the maps up at all, or couldn't find the right map? PIO asked for main cross streets or address to determine which map she needed. She said it's not on a main road; it's on like Lilly Road? She said it's actually her friend's property. They don't have a computer and went to the library and couldn't pull up the map so she was trying to help them out. PIO went over county map links, again asked if she was in right location or looking at right map? She didn't seem aware there were county specific maps. She said so this will come up eventually if I click on it? PIO noted the files are large and if your computer or acrobat is older it will take a while. PIO noted if for some reason she couldn't pull up the maps that I had 11x17" hard copies that I could send. She said that wouldn't help because wouldn't show parcel lines. PIO noted both the hard copies and the maps online showed the parcel lines. PIO asked to whom I should send the map? She said she's going to have her friend call me directly so she won't have to be the go between. She thanked me for the call back.

3/22/2006 4:11 PM

Contact Notes Charles Crim Wilson Place HOA  
Date 10/10/2006 Time 5:57 PM  
Regarding  
PIO emailed team: "We had a bit of a mix up on the times for the Oct. 17 Wilson Place HOA meeting, but it has worked out. The HOA somehow thought we wanted to meet at 7 p.m., despite the fact I'd told them I was trying to make it less of a late night for the team members. In the meantime, Dave got with Pastor Lashbrook of Lakeside Fellowship about piggybacking the HOA meeting. So we will meet with Pastor Lashbrook and any other church folk at Lakeside at 6 p.m. and the Wilson Place HOA there also at 7 p.m. Please confirm that you received the clarification. Thanks. Mary Brooks

10/10/2006	5:30 PM	PIO called Brenda/Lakeside Fellowship UMC 407-330-6560 x101 (Lashbrook x102) to see if we could still meet with them at 6 p.m. to get the church discussion out of the way before the HOA. She said if that would be helpful for us, she was sure that would be fine with the pastor.
10/10/2006	4:55 PM	PIO called Charlie Crim/Wilson Place HOA to relay meeting will also include Church issues and folks. He said "invite them in - that's fine." PIO noted just wanted to let him know we will also be covering church issues. He said that's fine.
10/10/2006	2:08 PM	PIO emailed Jerry McCollum/SC Engineer and Gary Johnson/SCEA Executive Director: "Good afternoon, Gentlemen, The SR 429-Wekiva Parkway Study Team has been asked to give a presentation and update during meetings with the following in Seminole County:Oct 11 530 p.m. Tom Vellanti, owner of the Twelve Oaks RV Resort at the resort office on SR 46Oct. 17 6 p.m. Wilson Place HOA, Lakeside Fellowship UMC, 305 S. Orange Blvd. Please feel free to call or email with any questions or concerns. Please let me know if you or someone else from the county plans to attend any of the meetings. Mary Brooks
10/10/2006	1:55 PM	PIO sent Wilson Place HOA calendar item to Mark and Brian, copied Dave/ch2m, Tom/FDOT and Mike/OOCEA.
10/10/2006	1:42 PM	Mark/Ch2m responded to PIO email re: Wilson Place HOA meeting: "good to go"
10/10/2006	1:35 PM	PIO emailed Mark/Ch2m re: Wilson Place HOA meeting, copied Brian, Tom/FDOT and Dave/CH2m: "Mark,Brian and I are good for the Oct. 17 6 p.m. Wilson Place HOA meeting, which would be at Lakeside Fellowship United Methodist Church on Orange Boulevard. Can you make that one? Let me know so I can firm up with the HOA - thanks!Mary Brooks
10/9/2006	10:55 AM	Charlie Crim/Wilson Place HOA called and said church for Oct. 17 meeting is Lakeside Fellowship UMC at 305 Orange Avenue. PIO thanked him and said I'd send out a calendar item.
10/6/2006	11:27 AM	PIO returned call to Charlie Crim/Wilson Place HOA to confirm, requested name of church so could put it on team members' calendars. He said resident is member of church and arranged for us to use it, not sure of name but will dig it up. PIO said need name so can get address and team members can mapquest for directions, coming from different locations. He asked how many people coming? PIO said probably 4-5 of us.
10/5/2006	3:55 PM	Charlie Crim/Wilson Place HOA president called and left MSG I would like to schedule that meeting for Oct. 17 at 7 p.m. at the church at Wayside and orange Avenue jus twest of our subdivision. Call me back to confirm 407-830-3414. I would appreciate it.
10/3/2006	2:49 PM	PIO emailed team that Wilson Place HOA requesting Oct. 17 at 6 p.m.; "Good afternoon,I finally heard back from the Wilson Place HOA folks in Seminole County south of SR 46. They're requesting the Oct. 17 date at 6 p.m. Please let me know if this works for you so that we can firm up with these folks.To recap the various meetings in the works CONFIRMED:Estates of Wekiva Park HOA, Oct. 10, 7 p.m., Panera near Seminole Towne CenterZellwood Station HOA, Nov. 2, 630 p.m., Clubhouse/restaurant community roomTENTATIVE:Wilson Place HOA, Oct. 17, 6 p.m., location TBDSunset Pond HOA, Nov. 8, 630 p.m., 251 Pond Road (Tom & Brian have said they can make this) PENDING/IN THE WORKS:Tom Vellanti, 12 Oaks RV ResortBerington Club HOALakeside Fellowship UMCPlease call or email with any questions. Thanks!Mary Brooks
10/3/2006	2:37 PM	PIO called Charlie Crim/Wilson Place HOA 407-830-3414 said Oct. 11 doesn't work but your other MSG said Oct. 17, how about at 6 p.m.? PIO said I'd get the word out to the team. He said he will get the word out on his end, and also will see if they can't get a church or something bigger to hold the meeting. Normally they just hold it at someone's house. He said he'd get back to me in a day or so on a location for sure.
10/2/2006	4:49 PM	PIO called Charlie Crim/Wilson Place HOA 407-830-3414 and left MSG asking if Oct. 17 or 18 worked for their HOA to meet with project team? PIO noted tried to reach him last week, don't know if eh got the MSG at work. Also tried his home number but no answer or machine. PIO noted dates are booking up so please call me back, left number couple of times.
9/26/2006	5:25 PM	PIO returned call to Charles Crim/Wilson Place HOA 407-830-3414, left MSG that I was awaiting to hear from the team members on a date and would get back to him.

9/26/2006	2:40 PM	Charles Crim/Wilson Place HOA president called and left MSG we've tried to set a thing for a meeting yesterday unsuccessfully. I was hoping to hear back from you on a date that was good for you so I can get it scheduled and get the word out to my community. If you could call me back please at 407-830-3414 I would appreciate it.
9/25/2006	10:25 AM	Charlie Crim called back, asked if Oct. 10 works. Trying to stay off Wed. because several people in the community attend church on wed. If not we'll have to press into the next week. Call me back.
9/25/2006	9:04 AM	PIO called back Charlie Crim, left MSG that senior project manager can't make the 12th. Can he get back to me with another date that works?
9/25/2006	8:23 AM	Charlie Crim/Wilson Place HOA president returned PIO call 407-830-3414 re: scheduling meeting. He said they would do a full meeting with homeowners at his house. He asked if we were available Oct. 12 at 7 p.m.? PIO to check with team members and get back to him. Asked if he had email? He said no, just use the home number. They hold the meetings at his house, 311 Wilson Place. He said they have 50 homes but usually only get 15 people to the meetings.831 a.m. PIO emailed team members with potential meeting date: "Good morning All,I hope you had a nice weekend! The president of the Wilson Place HOA got back to me and suggested Thursday, Oct. 12 at 7 p.m. for us to get together with their board and homeowners to go over the latest alternatives and impacts. The meeting would be held at the president's home, 311 Wilson Place, as there are only 50 homes in the subdivision. Please let me know if this date and time work, and which of you could attend so that I can get back to them. Thanks.Mary Brooks
9/22/2006	10:07 AM	PIO called Charlie Crim to schedule meeting. Left MSG to call or email me to get update on project.
Contact Notes		Nicole Crim Ballantrae
7/11/2006	2:14 PM	PIO returned call to Nicole 407-688-1230 (Tina receptionist). Nicole said we're needing some more info. I got some info off the internet, but I was wondering about any meetings PIO asked if she was on OOCEA website because we have posted the meeting info? PIO walked her through the web links and she saw the county-by-county meeting info. She said thank you so much, that's what I needed. PIO asked if she wanted to be added to the project mailing list to get advance notification of other meetings etc. She said she would love that, please send info to: Ballantrae, Nicole Crim, 1950 Pebble Ridge Lane, Sanford 32771. ncrim13@yahoo.com
7/11/2006	11:33 AM	Nicole Crim called and left MSG I work for developer in Sanford area. We were curious about the 417 extension. I know there's been lot of talk about that around here. I was curious if there was meeting being held, if I could send a representative , if there was a public forum or what was going on with that. Please give me a call back at 407-688-1230 thank you so much, Mary. Have a great day.

9/22/2006	11:53 AM	<p>"September 22, 2006 Robert Curry 35848 Tanglewood Drive Eustis, FL 32736 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment Alternatives Dear Robert, Thank you for submitting public comment forms for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That includes evaluating additional SR 46 alternatives that would only have one lane of frontage road in each direction in the area of the Lower Wekiva Preserve. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks</p>	
8/9/2006	8:35 AM	Attended public workshop on 7/26/06.	
8/7/2006	11:01 AM	<p>Attended public workshop on 8/1/06. Submitted comment: "(1) The choice of route for relocating CR 46A looks like a best choice. Half of my driving passes 46A, so this will affect me strongly. (2) The 'typical sections' showing road lane layouts for Seminole County show too many lanes for frontage roads, especially near the Wekiva River. With the slip-lanes and limited parallel of SR 46 with a SR 417 hook-up, there cannot be enough</p>	

traffic to justify four lanes of frontage in the area toward the river. You can save buying 24' of right-of-way!!"

Contact Notes	Thom Curry	
1/19/2006	2:55 PM	Brian copied PIO on response to Thom Curry: "Dear Mr. Coury - My colleague Mary Brooks forwarded me your email regarding SR 429. Drivers can now access northbound SR 429 from SR 192. In December of this year, drivers on SR 192 should be able to travel southbound on SR429 to connect to I-4. However, weather or unexpected circumstances may delay that scheduled opening. You can access a map of the newly opened section of SR 429 online by visiting the Expressway Authority's website at <a href="http://www.expresswayauthority.com">www.expresswayauthority.com</a> . Please let me know if you have any additional questions or if you would like additional information on this project. Thank you, Brian Hutchings Public Information Officer 407-383-5817 408work@OOCEA.com"
1/19/2006	1:21 PM	PIO responded to Thom Curry re: 429 at 192: "Thom, I apologize for the delay in getting back to you, but have been having some email trouble that just got fixed and your email finally came through. I'm not on that section of the 429, but Brian Hutchings is. You can reach him at 408work@oocea.com or by calling 407-383-5817. By copy of this email, I'm alerting him to your query also."
1/16/2006	9:55 PM	__From: Thom Coury [mailto:t.coury@gte.net] Sent: Monday, January 16, 2006 9:55 PM To: MBrooksSR414@cfl.rr.com Subject: State road 429 access Can one access the State Road 429 toll road northbound from State Road 192 yet? Thank you. T. Coury t.coury@gte.net

Contact Notes	Bob Dallari	SC Expressway Authority - BCC
5/9/2006	5:09 PM	SCEA meeting Wekiva Parkway update - Mark Callahan introduced Mike Snyder, Tom Percival and Dave Lewis, noted joint effort between FDOT and OOCEA. Mark noted they have over last several months been refining conceptual alternatives, traffic projections, coordination with stakeholders, environmental groups, citizens, Input from SCEA in December, prelim traffic projections Last December you asked us to: eliminated northern alignment, consider two way frontage roads and international parkway Two way frontage roads; - looked at several concepts, to get slip ramps in will require more ROW. Operational constraints as opposed to one way, increased conflict and safety concerns.

Recommending move forward with one way frontage roads. International parkway alignment alternative - issue with impacts along parkway in areas where development both proposed and moving forward. Access impacts. Tying into I-4 geometric constraints to getting a full IC. Doesn't appear we could get the access in and still meet design criteria could put more traffic on 46. Recommend the consideration be dropped. Traffic projections (concept) 2032 from river for every 100 vehicles crossing river either direction a day, about 37% or 37/100 are coming from 417. Significant interaction between 417 and Wekiva Parkway. Next highest number coming to and from north on I4 and using Wekiva Parkway, 29%, and then from there traffic off International parkway, 17%. Balance 46 east of I-4 and local trips along 46 corridor. I-4 from south additional 7%. That's diff from what we were thinking historically. Tells us ...importance of providing access between 417 and Wekiva Parkway. Wekiva Parkway appears to need 6 lanes by 2032, approaching 100k VPD with connection to 417. Numbers little diff if run along 46, but again showing 6 lanes need. Wekiva Parkway typical section shown here as 4 lanes, one lane frontage roads, incorporated landscaping in median. When goes to 6 lanes median stuff disappears. Typical section from river to the east ... dipping down west of orange or along 46 to i4 dropping down to 6 lanes. Typical section for rest of Wekiva Parkway 300' ROW, 4 lanes. We're proposing 4 alts to be carried forward for august timeframe to get public input. From river with frontage road along 46 and just west of orange blvd. dip to SE and frontage roads tie into improved 46 (6 lanes to i4), Wekiva Parkway tie into rebuilt IC at i42) Wekiva Parkway and frontage roads all way to i-4 and incorporate systems connection between Wekiva Parkway and i4 and service connection between i4 and local 46 traffic. 3) Wekiva Parkway and frontage roads to east of orange and drop Wekiva Parkway to 8-6 lanes along 46 and use existing IC. 4) Take Wekiva Parkway near bridge and just tie in to SR 46 with either 6 or 8 lanes, whatever needed. These have issues given traffic distributions we've seen but less impact to neighborhoods south of 46. Concept for potential IC at 417. Can get quite bit in on exiting ROW but will need some ROW on west and east sides. Provide connection to and from 417 to international parkway, complemented with ramps. Appears will handle traffic projections in the out years. Will require rebuilding significant portions of I4 and will be expensive. Struggled with how to do connection with alignments along 46 and tie in, fairly well developed 4 quadrants. Have not come up with solution that is perfect. Still looking for options but doesn't seem will find something that will meet all the traffic needs. Lot of traffic ... will be some impacts if this chosen in and around 46, taken flyover to use existing pond area to the north but that has issues as well. Important issue: typical section with Wekiva Parkway and frontage roads, 260' row required, have 200'. Will need additional row. Have 26" gas line on north side in an easement. Looking at two alignments on 46, hold gas line and improve to south ; or improve to north and relocate. Relocating gas line fairly expensive. If it goes to south we impact more residential impacts. Less of that to the north but more acreage required although ROW a little cheaper. Estimating today \$14-20 million to relocate the pipeline. Will carry that issue to the public. Overall concept slide ... have attempted to address environmental concerns. Next steps: stormwater ponds, refine alternatives, update Wekiva commission, environmental groups, and prepare viable documents. End of year formulate recommendations and go to public hearing Feb -mark 2007. Brenda: on estimate alternative refinement for north vs. south widening, widen to the north \$16 m, even if you add pipeline relocation, it's less than \$40 to go to the south, even though huge undertaking, still costs less. Randy: are you looking for our opinion on one way frontage? Mark said yes. Dallari said there's consensus to focus on one way. Randy; I love the trees, you finally put trees in. ...if you look at numbers you have on traffic projections, those are extraordinary numbers, hard to believe. You're planning on what numbers are showing so trying to come up to 4-6 lane plan, scared about 8 lane plan. Mark said 8 lanes would be on 46 , could be 6 lanes with right turn lanes. Randy said dynamics of 46 IC and property takings and constraints, is so huge, isn't DOT going to have to do something to that IC anyway because of incredible amount of traffic and commerce center, it's got to be improved anyway? Mark said dept has those under design, believe some ROW programmed, not sure if construction in 5 years. With ultimate there'd be further improvements to I-4 mainline that would assist with 46 IC. Believe addition of the loop will be significant help for traffic flow on 46, people WB having to make left turn will be free flowing into loop. Randy: reality ... and connection to 417 on

east side., it's so highly unlikely there's any practical solution to any 46 connection. Local roads that have been built can't accommodate this type of merger of two major IC's. Is there any purpose to looking at southern connections or is this a process you must go through? Something's going to happen to 46, regardless if parkway never built. Mark said these alternatives proffered by various folks in SC and we have to look at, have to take to level of detail to ensure first thoughts are consistent with studies we'd ... in more detail. Understanding this board has special powers to this expressway, we're willing to take consideration .Randy asked Mike Snyder: issue is obvious, clearest logical way to go is connection from eastern beltway to parkway, 46 probably can't get done or will be bizarre Rorschach type thing. Mike said it'd be very unusual and probably won't work. Randy: would there be point in saving time and grace to look south, or is purpose served in running analysis to further ultimate 46. Mike said matter of timing, depending on funding on Wekiva Parkway which may be many years out. 46 will continue to get worse. As Wekiva Parkway comes in and takes lot of traffic off running into 417 and getting off at Rhinehart, that would provide some relief, but growth of staff looking at numbers you're going to need both, 417 direct connect to west and significant improvements of i4 and 46. Randy would it be prudent to move to direction of connection to the south. Mike said your decision to make, but when you look at the numbers... direct connect from 417 and to the west absolutely needs to be the direct connect point. Still see numbers along 46, improvements along 46 are going to have to occur. Not sure I'd separate them at this point... think ultimately the 417 direct connection are way they have to go. Randy raised Volusia change on what we lovingly call the ocean parkway. That has impact also on i4. This is the 44 connector. Mike said look today at BeachLine and i4 and 44 and the fires. Hopefully these don't happen to often; folks coming out of new Smyrna beach have no alternative. ... You need more alternatives coming from 95.Gary Johnson: project being developed consistent with NEPA perspective to develop federal funding and might be more appropriate to Jerry noted initially two studies going, Wekiva Parkway and 46, would like to think southern alignment was picked, would still like to have PD&E approval on remaining 46 that would not be part of Wekiva Parkway. It's going to have to be improved one day, question of whether PD&E report also address ... doing something on SR 46. Tom Percival said started to address that, want to include that project in same document as Wekiva Parkway, if Wekiva Parkway didn't go would continue on with public hearing as a separate project.Tom said agree with mike on 417. If bring the two alignments to the public, people along the alignment, think you show the pros and cons of each one, probably good idea to show both. Could have preference after that. Brenda: once alignment is set, say in next 6 mos., will you be able to start any ROW reservation or acquisition at that time? Tom said can't do ROW reservation, tried in late 80s. There is some money in lake county \$45 million in year 2010-2011, it would be prudent to try to advance ROW if we could. Brenda said there is a lot of infill in that particular area. If southern ends up being ultimate one chosen we need something right now to take us from 417 to international parkway. Could that segment be built ... if you knew that was going to be the future alignment and build that segment? Tom said have HDR doing study... they have some alignments they've been looking at, taking it across lake ??... Really need to tie the two together as one document. Don't believe could get NEPA approval to go across lake ??... If tied two together and that could be built first ...Brenda said hate to see us make a connection now and have to tear it up in few years.Randy: said very impressed with process, you guys jumped right on that... it bifurcates property ... makes lot more sense to go other north. We really appreciate you all being flexible. --539 p.m.

John D'Aloise

Brossier Company

Regarding

PIO returned call to John Deloise 407-963-8911 re: IC query. PIO noted traffic models show stronger support for Kelly park road, as well as people who've written in stronger support for Kelly Park. PIO noted we're having next workshops in August, and likely after that as CH2M Hill develops preferred one or two alternatives, will make a recommendation on the IC. PIO noted is possible that if two alternatives one each could have a different IC, just don't know at this point. PIO asked if he was on mailing list? He said he thought so

but haven't gotten anything in some time. PIO noted nothing has gone out since last meetings in November. PIO confirmed his address. 507 N. New York Ave., Ste. 303, Winter Park 32789. He was thankful for the info.

5/30/2006 9:59 AM John Deloie called and left MSG I'm inquiring about the property, the western Wekiva beltway. Do you know where IC might be? Will it be at Ponkan near Plymouth Sorrento, or is it going to be at Kelly Park? Have you heard anything further on that and when will an announcement be made?407-963-8911 Thank you.

10/1/2006 5:56 PM "October 1, 2006Keith Daniels23406 Oak Cluster Dr.Sorrento, FL 32776RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Keith,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 7/31/2006	11:59 AM	Attended public workshop on 7/25/06. Submitted comment: "I personally believe a 6 laned 46 would be very good and stop the growth in strategic places on the road. Less expensive and it would move the traffic."
Contact Notes		Sandy & James Davis
Date	Time	Regarding
8/8/2006	10:45 AM	Attended public workshop on 7/26/06.
8/2/2006	1:54 PM	PIO returned call to Sandy Davis 407-736-3462, left detailed MSG that her property is two parcels away from where we're looking to widen Kelly park road at this time. PIO noted however that this is just the conceptual stage, and things could change when we enter final design and details are nailed down. PIO reiterated at this point there will be two parcels between her and the end of widening Kelly park road. PIO noted she should be certain to put the fence on her property and not the city, county or state ROW, and she shouldn't have any problems. If it does become an issue, and it's on her property, we would have to deal with that when we get to ROW acquisition.
8/2/2006	1:38 PM	PIO researched Sandy Davis' location, 3612 W Kelly Park Road. Property on south side of Kelly Park Road west of proposed IC, one large parcel and two smaller parcels between her property and IC. Kelly Park Road concept shows widening on Kelly Park would only affect front of the large parcel, two parcels away from 3612.
8/2/2006	9:28 AM	Sandy Davis called and left MSG I was away from desk yesterday so I missed your calls, but today I'll be here all day. My question was about Kelly Park exchange entrance to proposed toll road in west OC. As opposed to the Ponkan entrance.407-736-3462 thank you.
8/1/2006	1:33 PM	PIO returned Sandy Davis' call x63462, left MSG to call back and leave her specific query and I'd get back to her with some info.
8/1/2006	1:30 PM	Sandy Davis called back and left MSG we're on Kelly Park Road, proposed on ramp 7/10 of mile ... From center of road to how far out how many feet typically required by the county to make a four lane with the easement or whatever they call the extra part on the side, the grass, not sure of the terminology. I've heard it's 300' from centerline over, 600 all together. I'm thinking that's extreme, maybe person meant 300 all the way across. I'm trying to put up a fence and don't want to put it into that area. Rash of home break-ins in that area. Would like to know if ... from last meeting seems that Kelly Park is more promising to being the onramp, wondering if it has to do with school and home development down on Ponkan.
8/1/2006	12:16 PM	Sandy Davis 407-736-3462 returned my call.
8/1/2006	11:51 AM	PIO returned call to Sandy Davis 407-736-3462, left MSG for her to call me back and left my number. Noted not sure I can give her precise measurements since we're only in the study phase, but will try to answer her questions.
8/1/2006	9:51 AM	Sandy Davis called and left MSG 407-736-3462 I'm calling in regard to the extension of the toll road. I'm on Kelly Park Road. I'd like to know distance from center of the road on both sides if the on ramp was to go there. I'm trying to put a gate fence up I'm 100' back but I've heard rumors you have to be at least 300' for that to be expanded to two lanes and then the easement or whatever. Would like to know how far back before I put the fence up and I don't know how far back to go. I would like to know the chances of Kelly Park vs. Ponkan and the scores, some of the reasons for considering Kelly Park again. My number again is 407-736-3462 Thank you.

10/3/2006	3:48 PM	"October 3, 2006Vickie Davis3434 W. Kelly Park RoadApopka, FL 32712RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Vickie,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1 200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks
8/2/2006	1:49 PM	Attended public workshop on 7/26/06. Submitted comment: "The exit ramp needs to be on Ponkan to stay on the side of my property. There is a junyard right next to me. Plus on Ponkan it will fix the dangerous curve there on Plymouth Sorrento Road. All the farms around there have closed to developers and the 40+ houses will have to find new homes."

Notes			
Date	Time	Regarding	
9/20/2006	3:18 PM	Bill gave me his card for database. Business address: 6877 Old Hwy. 441 South, Mount Dora, FL 32757. mountdoravethosp@aol.com. He and his son Beau own the practice.	
9/20/2006	11:15 AM	Arrived Lake Reflections and set up, met with Bill Delaporte/member and past president, met some other members, answered questions before meeting started. PIO provided newsletters, comment forms and business cards at each table. Approximately 30 people in attendance. PIO went over project corridor, interchange and decisions to be made, recent public workshops, noted working with local governments and state agencies, PD&E and overall timeframe, some local access issues, funding challenges, noted alternatives being refined based on feedback and meetings with local communities, etc. Questions included: what will happen to SR 46? When will construction start? How will you keep the road from	

attracting commercial and other development? Clarification of CR 46A realignment? What is the makeup of OCEA? Questions about where Wekiva Parkway will pick up with regard to existing 429? Is MBX funded and moving forward? How will people get on and off? Why doesn't parkway go through Sorrento on 46? When will decisions be made on I-4 connection? Will this affect the Fairways at Mt. Plymouth subdivision? Which portions will be raised vs. at-grade? Where will tolls be? Most people seemed positive about the project and had heard about it previously. Some had attended the public workshops. Several made comments that it would make it quicker to get to the Seminole Towne Center and I-4. Two members note they live in Seminole but work in Lake, so this would help. Several people came up afterwards to thank me for the information and coming to their meeting. PIO got several business cards for folks who want to be added to the mailing list --108 p.m.

9/19/2006	8:20 AM	PIO called Bill Delaporte to confirm lunch presentation today to Mount Dora Rotary. He said we're still on, confirmed location and thanked me for calling, asked if I needed anything. PIO noted no, would bring boards, easels and couple handouts.
8/8/2006	4:34 PM	Bill Dellaporte/Mt. Dora Rotary Club emailed: "Hi Mary, The meeting scheduled for September 19th at 11:45 will be at the Lake Receptions, Hwy 19, 2 blocks south of 441. There will be a banner in the hallway to let you know which room the Rotary meets. If you need anything else let me know. Looking forward to your program.ThanksBill
8/3/2006	8:31 AM	PIO responded to Bill Dellaporte/Mt. Dora Rotary Club: Okay Bill. Please provide the location and address. Thanks. Mary Brooks
8/2/2006	5:45 PM	From: RUTHBILLD@aol.com [mailto:RUTHBILLD@aol.com] Sent: Wednesday, August 02, 2006 5:45 PMTo: MBrooksSR414@cfl.rr.comSubject: Rotary Meeting at Mt DoraSeptember 19th sounds fine. We usually have around 50 people.Thank you very muchBill Delaporte
8/2/2006	2:06 PM	PIO reviewed Mount Dora Rotary presentation request and responded to Bill Delaporte email: "Hello Bill,I can make the Tuesday, Sept. 19 meeting at 1145 a.m. I will bring the boards and some handouts. How many people do you usually get for these?
8/1/2006	3:07 PM	Bill Delaporte/Mount Dora Rotary emailed: "Mary this is in regards to our telephone conversation on 8/01/2006 regarding the program at Mt. Dora Rotary Club in September. It involves 15 to 20 minute talk and includes a great lunch. We meet at 11:45, have lunch have program and adjourn at 1:00. The available are September 5, 12, or 19. Looking forward to hearing from you.Bill Delaporte (cell phone # 407-765-6798)
8/1/2006	3:05 PM	Dr. Delaporte/Mt. Dora Rotary called and said they want the PIO to speak in September. They meet every Tuesday at noon. PIO noted I'm in the car heading to tonight's meeting; could he email me the particulars so I could follow up? PIO gave email address and he said would do so.

10/31/2006	9:29 AM	John Deloise 407-539-2714 called and noted we'd spoken before. He asked if anything had been decided on the Ponkan vs. Kelly Park Road IC. PIO noted no, we're looking to make a recommendation in maybe January regarding interchanges and other questions. He asked if there were any public meetings coming up? PIO noted not in the near future, though we are doing presentations to community groups and local governments, noted we're meeting with Zellwood Station HOA this week and SCEA Nov. 7. He said so nothing is really going on? PIO said quite the contrary; as we're meeting with local governments and community associations, the lines on the maps that he saw at the summer workshops are being adjusted to try to address their concerns. And every time there's an adjustment, we have to do another detailed impact assessment and evaluation. PIO noted the next maps he sees will be different from what he saw this summer. He said who has the latest	

maps? PIO noted there are no maps currently for public view because they're changing with each of these meetings. PIO noted next maps will be available probably in January when we draft a recommendation. Then we will have to get input and revisions from local governments and state agencies before going to public hearings in maybe March. He asked if they'd get some notice before the hearings. PIO noted yes, we'll put the newsletter out a month or so before hand with the latest info and public hearing schedule, and also put what maps we can on the website. He said thanks and he will look for something in the mail from us.

Contact Notes	Steven Devine	Lake Forest HOA
Date	Time	Regarding
10/5/2006	9:54 AM	PIO called back Steve Devine 407-330-9598 and confirmed that public hearings as it stands now would be in March 2007. He asked when would the SCEA vote on it? PIO noted we have to draft a preferred alignment alternative first, probably December-January and provide that to the various local governments and agencies for review and revision. Then that would be brought to the formal public hearings. PIO noted don't know when after that SCEA would schedule a vote. He said he thought they might do it at their next meeting. PIO noted we're not there yet. He said okay, thanks for calling back.
10/4/2006	3:20 PM	Steve Devine called and left MSG saying he's in Lake Forest in Sanford. I was calling to get an update on the Wekiva Parkway. I got a brochure in the mail from the EA, an EPASS update on the EA It said there would be more public hearings in Feb.-March 2007. And study scheduled to conclude in 2007 with approved plans. I just wanted to confirm that is the case, that there will be more public hearings. 407-330-9598. Name is Steve Devine? If I'm not there just leave a MSG. appreciate it. Thanks.
6/26/2006	12:45 PM	PIO responded to Steve Devine: "You're welcome. Please be advised that, although the public is welcome to attend the PAG meeting, this is a work session for that group, so there will not be public comments or questions taken. You'll have a great opportunity for participation during the upcoming public workshops. Information on those will be in the project newsletters we're working on now. Just FYI.Mary Brooks
6/26/2006	11:48 AM	__From: sdevine@bellsouth.net [mailto:sdevine@bellsouth.net] Sent: Monday, June 26, 2006 11:48 AMTo: Mary BrooksSubject: Re: Wekiva ParkwayThanks for the quick response Mary. Steve Devine
6/26/2006	8:49 AM	PIO responded to Steve Devine: "Good morning, Steve,We're in the process of updating the website, but thanks for letting me know about the link issues. Will get with the webmaster on that.The Project Advisory Group meeting is Friday, July 7 from 130-330 p.m in the OOCEA Boardroom, 525 S. Magnolia Avenue in Orlando. The EAC meeting will be that morning from 10 a.m. - 12 p.m.Let me know if you have any other questions. I hope that helps.Mary Brooks"
6/24/2006	4:09 PM	Steve Devine sdevine@bellsouth.net emailed: "Mary, can you tell me when and where the next meetings are for the Wekiva Parkway Project Advisory Groups?Also on the Expressway Authority webpage for the Wekiva Parkway titled "Evaluation of Alignment Alternatives -----", if you click on the weblink titled "East Central Florida Regional Planning Council's Web site" it does not take you to a useable link to their site. It takes you to a dead ended page showing only one of the routes - not only that what is shown is a route that CH2M Hill has said in the last Seminole County Expressway Authority meeting has design and operational problems. Thank you,Steve Devinesdevine@bellsouth.net407-330-9598

6/13/2006	10:49 AM	PIO emailed overall concept to Timothy Dick <a href="mailto:tdick@ligonier.org">tdick@ligonier.org</a> / Ligonier Ministries/ Sproul Bible College: "Good morning, Timothy, Mary Brooks here, the public information officer for the State Road 429-Wekiva Parkway Project Development and Environment (PD&E) Study. I spoke yesterday with Sue Brown who lives on Paseo Place, and she mentioned that Ligonier Ministries had purchased some property in her area and that you might have questions about the project and how it might affect your property. I've attached the overall alignment alternatives concept, which shows the two remaining potential routes in Seminole County, including the alternative that would connect to SR 417 and would affect the area of Paseo Place. We are also in the process of setting up the next public workshops on this project for late July. Please feel free to call or email if you have questions or concerns about the project, and/or send your mailing address if you'd like to be added to the project database in order to receive the newsletter and other info. I look forward to hearing from you. Mary Brooks
6/12/2006	3:10 PM	Sue Brown called back and said she wanted to give me the correct name for that development. It's under Sproul Bible College and it's 32 acres on the s. side of Wayside Dr.
6/12/2006	2:53 PM	Sue Brown of Paseo Place, south of Wayside Dr., said now Ligonier Ministries has bought property for school/college for the ministry, they're going to turn the Campisi house into the school and build 10 houses to the east of us and also 10 houses across the street. We were at meetings as to how they're going to work that. She said Timothy Dick is the contact <a href="mailto:tdick@ligonier.org">tdick@ligonier.org</a> she said they were interested in what's going on with the project. PIO said I'd email contact to see if he needed any info. PIO told her to put the meeting dates on her calendar, and if she can't make it we always put all the meeting exhibits on the website. She said she'd gone on the website before to see where it was going. PIO said after the meetings if she doesn't hear anything for a while nor has questions she's welcome to touch base for an update. She said she appreciated that.

8/24/2006 1:22 PM "Aug. 24, 2006Joe Disonzo213 Meadow Beauty Terr.Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Joe,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns.Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

Date Time Regarding  
10/2/2006 9:47 AM Standard comment form sent by Danielle/QCA for PIO.  
8/18/2006 1:55 PM Attended public workshop on 7/25/06. Submitted comment: "I would like to express my concerns in reference to the development of two new highway to be placed at Kelly Park Road instead of Ponkan Road. The interchange would put my drive to visit relatives 20 minutes out of the way. As well as, their drive to visit me. Surely the Department of Transportation can be a little more innovative and reasonable."

Notes

Date Time Regarding  
7/20/2006 4:37 PM PIO forwarded CR 46A concepts to Joe DoBosh/Heathrow Country Estates as requested.  
7/18/2006 3:26 PM Joe DoBosh /Heathrow Realty/???HOA 407-3331400 (I was in the car, didn't have a great connection and couldn't make out some of what he was saying) called and asked to be added to the mailing list. PIO said I'm in the car, can he email his contact info, and does he have my address? He repeated PIO email. PIO asked if there was anything else I could do for him? He said there were people upset about the CR 46A alternatives, this wasn't what the association approved last time. Commissioner Hanson is having a meeting about it tonight. PIO noted was he looking at the viables map? He said yes, he'd seen it. PIO noted that's a representative concept; there are 2-3 others that he'll see at the public workshops. He asked if I could email those? PIO said no, they're in production mode now, have about 100 exhibits to create for next week's meetings. PIO asked when he emailed

his info to also include the community issues. PIO noted I was heading to a meeting this evening and I would pass on his comments to the study team. He asked was that the Catherine Hanson meeting? PIO said no, the Mount Dora Commission. He said Catherine Hanson was having a meeting tonight, folks are so upset.

Date	Time	Regarding
12/14/2006	6:48 AM	Joe DoBosh/Heathrow Country Estates responded to PIO email: Thank you very muchJoe DoBosh
12/13/2006	10:10 PM	<p>___From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Wednesday, December 13, 2006 10:10 PMTo: Joe DoBoshSubject: RE: Wekiva Parkway concept.Joe,CH2m Hill is wrapping up their impact assessments of all of the alignment alternatives (were waiting for some Lake County right of way estimates as of last week's progress meeting) and plan to provide draft recommendations for an alignment (including interchange locations) in January. At that point we can schedule another meeting with your HOA. The draft recommendation will have to be reviewed and likely revised by the various local governments and state agencies, and then be finalized for formal public hearings in April. That's the schedule from here on out. So we will likely be getting back with you after the New Year.Mary BrooksPublic Information Officer</p>
12/13/2006	7:16 AM	<p>___From: Joe DoBosh [mailto:jdobosh@heathrowland.com] Sent: Wednesday, December 13, 2006 7:16 AMTo: Mary BrooksSubject: RE: Wekiva Parkway concept.Mary: Are there some new layouts that you could e-mail me. Especially the 46A extension? The one that affects Heathrow Country EstatesJoe DoBosh</p>
9/27/2006	9:56 AM	Dave responded to PIO email: "We are closing in on completion of the comparative impact analysis for the 417 connection alternatives. I'll let you know when Mark thinks it's ready to release. With regard to Heathrow Country Estates, we have been working on ROW for the 3 counties and updating the impact assessment so we haven't had time to prep the impact comparison for the various CR 46A alternatives. We hope to start on that this week. However, my recollection of the approach Mark indicated in the progress meetings was: complete the CR 46A alternatives impact assessment; meet with Joe Bishop of Seminole State Forest; meet with Scott Taylor, the landowner; then meet with Heathrow Country Estates."
8/18/2006	9:15 AM	Brian Stanger/FDOT emailed accepting Tall Trees HOA meeting.
8/18/2006	7:03 AM	<p>Joe DoBosh/Heathrow responded to PIO email: "Thank you so very much for being there. All of you were excellent in your presentations. We look forward in hearing your feed back with all of the concerns that were talked about.The rest of the Board were Paul Rucker Executive Vice President  Brad Millsap General Manager  Phil LaBrecque General Manger Golf Courses</p>
8/17/2006	6:40 AM	<p>PIO responded to Joe DoBosh/Heathrow Land realty: "Hello Joe,It was good meeting with you all last night. We look forward to getting back to you with some more information. Can you forward the full name for Paul and any other board members who were there to add to the project database? Thanks and see you soon.Mary Brooks</p> <p>Noranne Downs, Director of Production, Brian Stanger, Environmental Management Office, and Tom Percival/FDOT, Mike Snyder/OCEA, Mark Callahan and PIO met with Heathrow Country Estates at the Red Tail Country Club. Met Paul Rucker, Executive Vice President, and Joe DoBosh with Heathrow land Realty, was also introduced to a Chris, who lived in a neighboring community but also interested in project impact. (Also attending on HOA board were Brad Millsap General Manager and Phil LaBrecque General Manger Golf Courses.)Paul started meeting by providing those in audience with copy of Wekiva Parkway update and added contacts for OCEA, Governor, DOT, elected officials, etc. he said they're leading a letter writing campaign against the roadway.Mike Snyder described</p>

where we are in the process, about 1.25 years into the PD&E study, a federal process the EA is doing with FDOT. Legislation designated EA as lead agency. Mike went over workshop comments, noted there are lots of issues to work out, nothing is set in stone. Mike said we're 4-5 months from finalizing any alignment. We're happy to get feedback from the community, and then come back to show you what we can do maybe to make amends. Mark Callahan recapped the 20+-year history of looking at a western beltway connection. He noted there hadn't been the money to build the project but interest and a study done 20 years ago. The EA did a NW 429 study for part of the corridor about 5 years ago. It became evident something more comprehensive needed to occur. The governor appointed committees, looking at everything including land management, water quality and recharge. There are 20-30 springs within the 20 miles of this area. There was a concern regarding development impacts leading to lack of springs recharge areas. They also looked at septic and other issues. The committees culminated in 2004 with the Wekiva Parkway & Protection Act signed by the governor; it addresses a lot of things outside transportation. Mark went over the project corridor and parameters: act dictated one local access IC in OC, environmental constraints of the Wekiva area. He said the basic objective for the Wekiva Parkway was that any SC traffic has to use the Wekiva Parkway. They don't want traffic on 46, and they want it elevated or bridged through the wildlife areas. He pointed out on aerial that the river and wildlife corridors, existing wildlife crossings would be bridges. He said they wanted to chop up 46 and 46A so people have to get on Wekiva Parkway to get in and out. He noted we have to realign CR 46A and 46 in this vicinity (pointed to aerial) blocked or cul de sac'd to be compatible with state legislation requirements. Mark went over 46A concepts... noted connection to 46, Mt. Plymouth and Sorrento recognizing potentially increased traffic and widened corridor decided they didn't want that through their communities. They also wanted to get trucks off 46 through those communities and onto the Wekiva Parkway, hence the bypass. 46A concept - limitation of Seminole State Forest and KARST (former sinkhole) areas.?: How many lanes are those (area) roads? Mark noted two lanes today; 46A would be two lanes expandable to four lanes (we would purchase ROW initially for the expansion). He noted in the design year we would need four lanes, about 18,000-19,000 VPD in design year.?: Will it be raised? Mark said 46A would be above the existing ground but not very high, just high enough to capture runoff. Discussion of Scott Taylor property.?: What if he doesn't want to sell? Mark noted we attempt to negotiate first, but if not successful we would enter the eminent domain process.?: Why doesn't the highway turn away from Bear lake? Wildlife going back and forth on that corridor, bear, deer, coyote going to the water, if you're worried about the wildlife ...?: Why not run it NE of 46A Mark said that's a documented animal activity in that area, what we've learned is where there's more woods there are more animals (pointed out wooded area in question).?: Why not follow 46A to closer to 46 then drop down? Mark noted intention of WPPA to maximize wildlife corridor.?: How much tolerance to shift? Mark said it's something we can look at. We have to define impacts and costs. There's anticipation this would become a county road. From the DOT perspective, Lake County will have a big say in where we go with this. We have to work with all the stakeholders, Lake County, the state forest, you folks, etc. Discussion of realignment being very close to the new south entrance, and very close to the existing north entrance. Joe DoBosh noted the road will be 700' from the clubhouse area, but up by the estates area it will be right along the Ridge line. There was concern about noise from the road even 700' away. Someone noted you can hear trucks very clearly on 46A.?: Why can't you fly over existing 46A like they're doing in other areas? Mark said we would have to tie in and would be in the forest. That also flies in the face of the original legislation. Chris/resident of nearby neighborhood said the consensus is to shift it to the east. Why not propose shift it closer to Mr. Taylor but not hit his home, maybe with some buffers? Mark said intention is to look at alternatives that move it east. There are issues with the old lakes and sinkholes, and objections from the Seminole State Forest land managers. Noranne said we'll come up with some alternatives and we don't mind looking at that, ... but when it goes to court his engineers will say why not put it down the side and we'll have to defend that. Paul/Heathrow said when Heathrow is done, there'll be 323 homes. What assurances are there that the new 46A won't be prime commercial corner, with noise, kids hanging out, etc.? Mark said that wouldn't be compatible with the Wekiva Parkway rules, and that decision would be Lake County's. He said as we get additional

alternatives and information we will continue coordination with LC. DOT has the final say, but will do everything we can to align with the county's wishes. Question discussed re; location of Taylor home and property line. Mark reiterated issue and desire to get CR 46A out of swamp and forest.?: Doesn't the parkway go through park and wetlands already? Mark said basic concept is for wildlife protection, use 46 to not have a second road in this area. Mark noted this is the direction we were given in the legislation.?: Most people would say don't build it. The second objective is to move it east; is that really going anywhere? Mark said we will look at different alternatives, get with the county and come back to HOA with some other alternatives. There are parameters we have to work within that are not set by us.?: Why wouldn't you want to go across the already state owned land? Mark noted federal process we have to follow, there are additional protections for certain types of lands, state owned conservation lands. There are special provisions we at must follow. We need to avoid or minimize impacts. Mark noted if we can't work out an agreement with the state land managers they could stop the project.?: Can you realign 46A to tie into 437? Mark noted 437 already needs to be widened, can't really dump all that traffic on that road, not really the intention of the legislation.?: Why not widen 46A to four lanes now? Mark said I don't think you could get a permit to widen through the forest Mark recapped the alternatives suggested. Noranne noted what it took to get to this point, requirements for environment, water quality, etc. we can take a look at KARST area, 2-3 options ...A gentleman who'd asked questions previously stated we moved here because it's stunningly beautiful. It's very unique. Noted community was awarded for architectural excellence... scenically stunning. To take that roadway, with 18,000 cars, four lanes, a road that big right up against a signature property, I would object to that. He recognized concern about moving road moving closer to sinkholes. They want it away from our entrance; there's too much congestion. Please keep in mind the quality of this property that is here. This community can have a positive impact for the county, set a standard for what other new communities could be.?: If it goes through, how long before it happens? Mike said it's a question of funding. We're looking at a \$1.5 billion price tag today and neither EA nor FDOT have that. We don't have the money today to start OC portion; only have about \$50 million but no construction dollars. That's not to say things won't change. There's a very strong push to finish the beltway around Orlando. Construction is still a very long ways off, maybe 5-10 years. It's not around the corner. But things can change either way.?: Can you use berming or unusually large trees? Mark said yes, we have had discussions with FHWA, and as we progress we would discuss that more with local officials?: Why build 46A two lanes instead of four? Mark noted depends on the timeframe. If it's a few years down the road it might start as four lanes.?: How certain is it that something definitely will be built? Mike noted there's no alignment. ... ultimately the project would need approval from LC, SCEA, OC, city of Apopka, Mount Dora as we move through the process before the alignment comes back before the EA board in Dec.-Jan., but that depends on reach a consensus... things are moving very well and positive. With a project of this size and scope there are going to be some issues to work out. Paul noted if LC government has an impact, I encourage you to contact them, this is an election year and Comm. Hanson is up for election, encourage you to write to them, send a check for \$25. ... He said they were starting to serve dinner so meeting was officially over, thanked us for attending. Project team members remained until almost 7 p.m. to answer individual questions and go over arials. Mark left one of the arials for the HOA. Mark requested PIO bring newsletters to next such meeting to hand out to people. PIO collected sign in sheet, filled in by 29 people. --702 p.m.

8/8/2006	11:17 AM	Brian Stanger accepted Heathrow meeting invite.
8/8/2006	9:12 AM	Gary/PBS&J tentatively accepted meeting request.
8/8/2006	8:16 AM	Joe DoBosh responded to PIO email: "Thanks Mary; It is at Redtail Country Club inside the Heathrow Country Estates Development off of 46A We will make sure that the Guards know that they are coming Again that is on Aug. 5:30 at the Redtail Country Club Joe DoBosh

Box 1375Sorrento, FL 32776-1375RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Curtis,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1 200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

8/10/2006 11:47 AM Attended public workshop on 8/1/06. Curtis submitted comment: "(1) I am in favor of the Ponkan Road alternative. (2) I favor SR 46, Alt #2. (3) I favor 441/46 Interchange, Alt #3. (4) I favor Neighborhood Lakes, Alt. #2. (5) I favor 46A, Alt. #2. (6) I favor local access north, Alternative #5. (7) I favor Seminole County 46/I-4 Interchange. Minimize all impacts on the Wekiva and Rock Springs. Utilize/maximize elevated roadways, please!!"

Contact Notes		Darrell and Joan Ealey
7/31/2006	12:27 PM	Attended public workshop on 7/25/06. Submitted comment: "The proposed southern 417 route appears to be the route. I do have reservations due to being located within approx. 100 ft of proposed right of way - understanding that I am not (my property) directly impacted. We expected to be impacted due to water drainage from property and roadway behind us - Within the past few hurricane seasons left my lot draining and soggy for many months - the addition of the 417 extension behind our home will only add to our issues!"

5/18/2006	3:10 PM	PIO called Megan to make sure she got the email. She said the first one did finally come through, their system must just be slow. She said in the meantime they reviewed the map and it looks like it's coming right over their property. She said she she's why because she would do the same thing to get it down from SR 46 to 417, go through the least populated area. PIO noted she has the option, as mentioned in the email, of completing the public comment form with any information about why we should or shouldn't follow that route. PIO also noted there are people who said on the forms if their property has to be hit, they wan to be bought outright and not have to look at it.She asked when would we start buying property and how is that price decided? Is it fair market value? PIO noted I don't handle the ROW, but know appraisals are done and negotiations go from there, and obviously it's different if it's a business vs. residence, and negotiations can discuss lost business revenue, etc. PIO noted overall timeline and funding challenges, noted this is not something that is going to happen in the next year or two by any means. Could be much longer depending on funding, though must advise you there's always the chance some federal money or something could become available that would accelerate that schedule. She said so they could go ahead and build their business and operate for 5-6 years before anything happens? PIO said that's entirely possible, though again, if funding becomes available...She asked how are we able to build this road in the Wekiva protection area when they had to jump through all these hoops to get permit for the property? PIO noted tremendous amount of work and history has been done to get us to this point, can send her the WRBCC final report, noted the state legislation and design criteria, have to purchase conservation lands, etc., in order for this project to be allowed to proceed. She said now that I mention it she was aware of some of that. PIO noted we'll be shooting for next public workshops in mid-August, so invite her to attend and stay in tune, and she's welcome to call or email me if she hasn't heard anything in a while and wants an update. She said thanks so much; you've been a wealth of information.

She said thanks so much; you've been a wealth of information.

5/18/2006 2:55 PM PIO emailed Megan/Pool by Bradley with map snapshot of property location: "Megan, It would appear that the southernmost alternative for the Wekiva Parkway, which would connect to SR 417 at Interstate 4, would, if selected, hit the property in question at 310 S. Orange Boulevard. On the website is a public comment form which you can complete and email or fax back to me, lodging any concerns, support or opposition to any of the alternatives and evidence to support your stance. At this stage in the process, we are refining the remaining more viable alignment alternatives and traffic projections, and beginning to create pond siting and other preliminary information. All of this information will be provided, and the public will have the opportunity to comment on the material at the next public workshops, which we plan to schedule for mid-August. From that public feedback, input from local government and state agency officials and further engineering analysis we will develop the one or two preferred alternative(s). Public hearings for the preferred alternatives will likely be held in February 2007, with the PD&E study finishing in spring 2007 with an approved alternative. Please be advised that we are very early in the project development process, and this project is not fully funded. Following the study, the subsequent project phases are final design, right of way acquisition, permitting and construction. Unless funding becomes available sooner, we could be looking at 2012-2015 to begin construction on this project. Property acquisition usually begins 3 years or so before construction. Again, the entire schedule is entirely speculative due to the funding challenges. I hope you find this information helpful, and I invite you to stay tuned and involved in the development of this major transportation improvement. Please feel free to call or email with other questions or concerns. Mary Brooks"

5/18/2006 2:55 PM PIO emailed Megan/Pool by Bradley with map snapshot of property location: "Megan, It would appear that the southernmost alternative for the Wekiva Parkway, which would connect to SR 417 at Interstate 4, would, if selected, hit the property in question at 310 S. 5/18/2006 2:46 PM Megan Eaves emailed: "Mary, We cannot seem to determine if there is a strong chance of the expressway going through our property based on the maps. As stated on the phone we are located at 310 S. Orange Blvd., Sanford. Also, we are wondering if the expressway

does go through the property how is the price paid for the property negotiated?Thank you in advance for your assistance.Megan Eaves"

5/18/2006	1:57 PM	Megan/Pools by Bradley called back, gave property address as 310 S. Orange Boulevard, parcel ID# 25-19-29-300-01100000. PIO asked if she'd received email from me? She checked and said no. PIO noted my end shows went out 138 p.m., though I had trouble responding to her email several times. She said it could also be on their end. She said she was on the website and had trouble find the map. While we were talking her co-worker found the map but it was too small to read. PIO noted it has the ability to be enlarged as she so desires. She said they'd work on it. PIO noted I'd check the parcel on my end and get back to her.
5/18/2006	12:50 PM	PIO returned call to Megan, left detailed MSG requesting she give me address to property in question so I can research impact if any. Also noted map is on EA website and gave address and text links. Left my number again if she wants to call back or said she can send follow up email. PIO tried to respond multiple times to Megan Eaves email, but response file kept getting corrupted. Maybe had something to do with formatting, colored background or original email. PIO had to shut down and reboot, and use a new email instead of replying to original: "Hello Megan,Please provide the address of the property you plan to build on so that I can research any potential impacts from the Wekiva Parkway alternatives. I left you a voicemail message to this effect as well.Also, the viable alignment alternatives map is available on the Expressway Authority website at www ExpresswayAuthority.com . On the entry page, click on the "corporate site" button. That will take you to the home page, where, under "construction updates," you should click on the "Western Connectors" text link. That will take you to the Wekiva Parkway page. Scroll down a few paragraphs and you will see the text links for the various maps and other items.Please feel free to call or email to discuss this matter further. Mary Brooks"--130 p m.
5/18/2006	11:25 AM	Megan Eves emailed: "Mary,We own property at the corner of Wayside Dr. and Orange Blvd. in Sanford. We are ready to proceed with building as we have a permit, etc. Word has it that the connection will go through our property. Please contact me at your earliest convenience. Thank you,Megan EavesPools By Bradley1450 Kastner Place, Ste. 112Sanford, FL 32771Phone (407) 323-7675 ext. 112Fax (407) 330-6599
5/18/2006	10:20 AM	Megan Eaves with Pools by Bradley called and left MSG my husband and I own property at Orange Boulevard and Wayside Drive in Sanford. I understand from contact that directly diagonally from us it was proposed that the parkway was going through that property. That now the parkway is supposed to go through our property, is what rumor has it. And I know there are a lot of rumors going on. We're getting ready to proceed in building our business. I need to know what's going on and need to know it fast. If you'll please call me. I look forward to hearing from youGive me any information you can at the time, that'd be awesome.407-323-7946 x112 thank you
Contact Notes		Robert Echebaria
Date	Time	Regarding
8/4/2006	5:50 PM	PIO called back Robert E., left MSG that if I have correct property, it's 3 parcels to the north and no direct impact. Only properties in this area with impact are those right on SR 46 where we have to widen corridor to accommodate Parkway. PIO asked for confirmation that property in question was 3 parcels north of SR 46.
8/4/2006	4:35 PM	PIO researched property for Robert E 386-479-3639, 321-214-2068 Wekiva Highland subdivision. Front exposure to the north, on the river, vacant 110 nova drive. Property is about 6 parcels east of the river, and 3 parcels north of SR 46. PIO checked concepts.No direct impact at this time.
8/4/2006	4:00 PM	PIO called back Robert E 386-479-3639, 321-214-2068 and asked for exact location of property in question? He grabbed listing realtor gave him. He said it was at the corner of Nova Drive and Wekiva Park. He thought the property ID number was something like 21 18 29 5 ... He said it's in the Wekiva Highland subdivision ... PIO asked for owner name?

He said it has front exposure to the north. It's on the river and vacant. It's 110 Nova Drive  
Last name Echebarria? But everyone calls me Robert E. PIO said I'd research that for him  
and get back to him, it may be Monday. He said that's fine.

8/4/2006	12:48 PM	Robert 321-214-2068 called and left MSG I appreciate you giving me a call about my property. I'm kind of concerned. I just heard a rumor so don't know 100% and that's why I wanted to get in touch with you about construction going on off of I-4. I want to make sure when I buy my land that the exchange or something ... doesn't end up putting me into an eminent domain issue. I'd hate to build my house and have it taken away from me Intersection is off 46 and Wekiva Park, and Nova Drive. Wondering if you might have an answer for me? Please give me a call back C 386-479-3639. Thank you.
8/4/2006	12:21 PM	PIO returned call to Robert 386-479-3639, left MSG with name and contact info.
8/4/2006	11:47 AM	Amy Scales/FDOT Interstate Program 386-943-5729 said got a call from a guy looking to buy property off 46 at Nova and Wekiva Park. He's asking because neighbors been telling him that area is at risk. Please call Robert at 386-479-3639. PIO told her I would follow up.

9/20/2006	6:50 PM	"September 20, 2006Ellen Edmonds21600 Covered Bridge LaneSorrento, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Ellen,Thank you for submitting public comment forms for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns, and will continue to work with your HOA to address your issues.Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

8/7/2006	10:03 AM	Attended public workshop on 8/1/06. Submitted comment: "In regard to the bypass connecting 46 to 46A - there must be another alternative that does not run along Heathrow Country Estates. This community has been carefully planned to prserve the beauty, wildlife and nature of Lake County. Thsi road would destroy this and disrupt the charm of the community. Please find more viable alternative to this ill-placed road!!"

8/7/2006 9:15 AM Attended public workshop on 8/1/06. Submitted comment: "Obtaining and addition 30' of right of way for travel use would be appreciated and probably show some people that your care about their well-being. Lake County has a long-term trail program which follows rail r/w along SR 46. If you purchase this land without this consideration, connecting Mt. Dora with Seminole County will almost be impossible."

Contact Notes		Jeannie & Willard Eldridge
Date	Time	Regarding
12/19/2006	4:27 PM	PIO called back Willard & Jeannie Eldridge 931-766-5909 and relayed potential significant impact to their property. PIO said I could send them a sketch of project through their area public comment form and ROW brochure. PIO noted FDOT developing the Lake and Seminole portions. They said they'd appreciate it and send any info to them at P.O. Box 543, Lawrenceburg, TN 38464. PIO reiterated status of study, public hearing schedule. Willard asked when would the project start? PIO noted that's up in the air because it's not fully funded. PIO noted first section will likely be OC by OCEA, and that's not expected to start construction until 2012 or so. PIO noted schedule heavily dependent on funding due to \$1.4 billion cost, so it's nothing that's happening next year or maybe not even 5 years from now. They appreciated the call back.
12/19/2006	4:14 PM	PIO checked alignment alternative. As per summer workshop version, the property would be covered by Wilson Road bridge and 417 alignment and ramps. Even with minor shifting discussed away from Tall Trees property would appear to be a total take.
12/19/2006	3:49 PM	PIO researched Jeannie Eldridge 931-766-5909 property query 5425 Wilson Road in Sanford, corner Metz and Wilson. It's not far from Orange Boulevard, between orange and international parkway, about halfway between. No email. Our property is on the east side of Wilson elementary. PIO checked SCPA website for property location. It is diagonally across Wilson Road from the SW corner of Tall Trees, right in the area of the 417 alignment.
12/18/2006	8:59 AM	PIO called Jeannie Eldridge 931-766-5909 and asked what nearest cross street was to their property at 5425 Wilson Road in Sanford, corner Metz and Wilson. It's not far from Orange Boulevard, between orange and international parkway, about halfway between. No email. Our property is on the east side of Wilson elementary. He said we were down last month, and some neighbors said thought meeting was in january. They got the newsletter and said meeting was in February. We wanted to be at the next meeting. They said our neighbors went to the meeting and said it was going right through our property. PIO said then will definitely research that, that's why I was asking where it was on Wilson Road. They said they're east of the school, right behind the school. PIO noted we are going right behind the school and I will definitely get back to them with details, will depend on which alignment we're doing with. Gave them update on PD&E study and public hearing timeframe. They were thankful for the call back.
12/12/2006	12:59 PM	Jeannie Eldridge 931-766-5909 MSG my husband Willard called earlier and I'm returning the call. We own 5425 Wilson Road in Sanford. Wondering if the bypass is going near our property? Wonder when is next public hearing and will we be notified? We live in Tennessee and want to attend the meeting. appreciate that so much. Thank you.

9/18/2006	1:29 PM	PIO returned call to David Emmel 407-461-0550, 407-884-4145 he said he talked to Mark and he answered his question, but he appreciates me calling back. PIO apologized for the delay.
9/13/2006	11:45 AM	David Emmel 407-461-0550, 407-884-4145 I've talked to you previously several times. Give me a call if you would please. re: 429 I've got a question for you. Thank you.
8/2/2006	1:45 PM	Attended public workshop on 7/26/06. Jean submitted comment: "We prefer the route alt 2 as per your workshop drawings. We are concerned what your plans are as to the increased traffic on Ondich Road. CR 251 in front of our house." David submitted comment: "Prefer the east routes toward Plymouth Sorrento Road (alt 2). Please give consideration to limiting Ondich Road traffic. CR 251 keeps popping up on the maps for both Hass and Ondich. Ondich currently has a 30 mph speed limit and is designed for neither shortcut, spillover nor traffic generated by all the new development currently in progress."
5/3/2006	2:33 PM	PIO returned call to David Emmel first time, got spring privacy ID request, gave name and company(project), waited for answer...waited for answering service... got cut off. Tried again and reached David directly, PIO noted we're still going through government meeting including SCEA update on May 9. Which is public if he wanted to attend she said that would focus on SC; we care about LC. We're right where the bypass comes by. PIO noted once we get through these government review meetings, we hope to have updated maps and posted on website end of May. Then public workshops in mid-August. He said will that be the final? PIO noted no, it will be the more viable alternatives and then we'll get public comment and government feedback on those, and then we'll work to develop the one or two preferred alternatives for public hearings in January 2007. He said hurry up and get the lead out. We've been dealing with this for years and we need to know what to do. PIO noted I understand your frustrations but these PD&E studies take two years and we're about halfway through. He said okay and thanks for getting back to me.
5/3/2006	12:08 PM	Candace/QCA emailed: "Mary, David Emmel (? Last name) called today at 11:59 a.m. He said that he could not get in touch with you and had my contact information (not sure how). He wanted to know when the Wekiva Parkway Maps would be updated. I told him I thought late May because the project team had more meetings with local governmental agencies and needed their input. I told him that you would call him back tomorrow. When I told him you were in training he said that you did not need any training, you already knew everything. David Emmel 407-884-4145 ...
5/3/2006	10:55 AM	David Emmel called and left MSG 407-884-4145 I talked to you several times and to your secretary and in late April they were supposed to have an update on the Wekiva map. I know you have a meeting planned for May. Can you tell me when that new map update is going to be available? Thank you.
3/6/2006	11:10 AM	PIO returned call to David Emmel (has call block), Jean was also on the phone. PIO noted website being revamped, and all of the changes and things we've posted over the last 2-4 months have to be reposted. PIO noted we're also updating the maps and hope by late March to mid April to have those ready. Maybe webmaster will have caught up by then and the new maps can go up. Jean Emmel asked if it's affecting our house, we live at 3536 Ondich. PIO said I'd have to research whether the initial alternatives affected their property, but noted the alignments are being shifted as we move toward viables and won't be able to tell whether one of the updated routes affects them until late March or April. She said one of the initials did hit their property. PIO noted the alignments have been

Contact		Eric Erickson
Notes		
Date	Time	Regarding
6/21/2006	9:05 AM	<p>PIO responded to Eric Erickson: "Good morning Eric and thanks for your comments. I will share them with the PD&amp;E Study team at this afternoon's progress meeting. I also hope you'll attend the next public workshop to view even more updated info and to submit a public comment form with your thoughts.We don't have any tentative dates for securing funding as there are a host of variables potentially at play in that regard. We do plan to finish the PD&amp;E Study with an approved alternative by spring 2007. Typically, if the project was fully funded, final design would begin shortly after the PD&amp;E Study and would take 2-3 years. Once plans were 30% or so complete, advance Right of Way acquisition would begin, and that would also take 2-3 years. Construction would subsequently follow. That would put us, hypothetically if it were fully funded, at 2013 or thereabouts for construction to begin.We do have some money to begin final design and a little for property acquisition, but none of the phases following the study are fully funded. As you can imagine, we are investigating a number of funding sources for this project. We will provide more on this issue as information becomes available." --923 a.m.</p>
6/21/2006	8:54 AM	<p>Eric Erickson emailed: "Mary, I live at 31243 SR 46, Sorrento and 1 mile west of the Wekiva River. The May 30, 2006 PDF files showing the proposed interchange serving local traffic only is exactly what we were hoping for. The layout, location and configuration with the slip ramps couldn't be better for our community. Please congratulation Mark Callahan at CH2M-Hill for the great work on this interchange layout.I'm sure Charles Lee isn't happy that Rock Springs Run State property is being used for the interchange (and our homes aren't being bulldozed). It's good to see that common sense, sound engineering, and fiscal responsibility has taken precedent over the emotionally driven and manipulative interests of certain groups pretending to "protect the environment" at the expense of local residents and taxpayers. Now for the question that you've probably been asked quite a bit lately; Do you have any tentative dates for securing funding, property acquisition, and construction</p>

that you can send me?Thanks, Eric B. Erickson, 407-665-5666"

4/5/2006 9:54 AM PIO returned call to Eric Erickson, let him know we were shooting to have updated maps by mid- to late May. PIO noted originally was going to be Feb.-March, but challenges scheduling all the meetings with local government and agency officials. He said we had the IC general layouts at the November meetings but not for just west of the Wekiva. I'm a mile west of the river. We only have three subdivisions that the slip ramps would serve. PIO noted had discussed in meetings some concepts on SC slip ramps, a county commissioner had asked us to look at two-way frontage roads and how they would operate. PIO noted that doesn't appear to work. He said he doesn't care about SC. PIO noted I understood, was just giving example of some things that were being looked at. PIO noted nothing has been decided on the slip ramp locations, but we should have more detail on that when we have the more viable alternatives workshop. Noted that was going to be in July but now looking like August. He asked if Mark Callahan was still leading the study? PIO said that's correct; CH2M Hill is doing the study. He said Mark said at the meetings that he should have something in a month. PIO reiterated that the schedule has been pushed back due to coordinating meetings, noted with each meeting some changes taking place, maps changes some times daily or weekly. He said he thinks he'll just call Mark to see what he has. PIO said that's his prerogative, though if I had maps available would have no problem sharing them with him.

4/5/2006 8:09 AM Eric Erickson called and left MSG I got an alignment emailed from you back in October of 05 for the Wekiva Parkway. Located in LC just a mile west of the Wekiva River. Was wondering if you guys got any more updates on that; it's been a few months. 407-665-5666 if you could give me a call I'd appreciate it.

Notes		
Date	Time	Regarding
8/11/2006	5:21 PM	PIO called back Sheri Ewell 352-551-0049 to relay info, left detailed MSG that no direct impact from any of the alternatives, closest one if chosen would still be 2-3 parcels away. PIO reiterated offer to help her find maps on website when she's at a computer.
8/11/2006	4:52 PM	PIO researched Sheri Ewell 352-551-0049 property 30837 Swan Road in Sorrento. Parcel backs up to the east end of Coronado Somerset Dr., and is 9 parcels south of SR 46. PIO checked concepts. Her parcel is shown as 1821OC-LC systems alt 1 - no impact, easternmost alt 2-3 parcels west of 1821 Alt 2 - no impact, easternmost alt 2-3 parcels west of 1821 Alt 3 - no impact, easternmost alt 2-3 parcels west of 1821 Alt 4 - no impact, easternmost alt 2-3 parcels west of 1821 Alt 5 - no impact, easternmost alt 2-3 parcels west of 1821 Alt 6 - no impact, easternmost alt 2-3 parcels west of 1821
8/11/2006	10:38 AM	PIO returned call to Sherry Ewell 352-551-0049 she complained about map in the update. PIO noted we have all the workshop maps on the website. She said she tried to go on the website and it kept sending her back to the same thing and she couldn't find what she needed. I need to know in my area, live on Swan Road, one block off 46, in area where they show bypass going smack dab through our front yard, need to know if this is for sure PIO requested address 30837 Swan Road in Sorrento, property is in Stanley & Sherida Ewell. PIO said will look at the location and get back to her. She said they're also looking to invest in the area and need to know where it's going. PIO also noted next time she's at a computer give me a call and I'll be happy to walk her through finding the maps. She said that'd be great, she's not very computer literate and she's the first to admit it. PIO said no problem, will get back to her.
8/10/2006	5:22 PM	Sherry Ewell called and left MSG I live out in LC in the area of the 46 bypass where all that is going to be going on. I'm very interested in some kind of update on how it's going to affect our area. We did receive the flier, the little Wekiva update flier but the map on the front is so minute we can't read anything on it. I was hoping you could send me an update picture of the whole plan, something that would be legible, some kind of map, some information as to exactly north side, west what side of 46 it's going on. Or if you can do it in person call me back. 352-551-0049. I would appreciate a call back.

Contact	Aya Fagan	The Shopping Center Group
---------	-----------	---------------------------

Date	Time	Regarding
------	------	-----------

5/17/2006 3:34 PM Aya Fagan/The Shopping Center Group responded to PIO concept email: "Thank you, Mary.Aya FaganThe Shopping Center Group2170 W. State Road 434Suite 180Longwood, FL 32779Phone: 407.788.8818 x. 111Fax: 407.788.0971ayaf@theshoppingcentergroup.comtheshoppingcentergroup.com

5/17/2006 3:26 PM PIO emailed Wekiva Parkway concept to Aya / The Shopping Center Group as requested.

5/17/2006 3:20 PM Aya Fagan/The Shopping Center Group 407-788-0543 called and said they have been downloading stuff from the website and have been trying to print out the Wekiva Parkway and MBX maps. Is it possible to get the PDF's of these; can't print them out as large as would like from the website. PIO noted could send her 11x17 of each but that probably still won't have the detail and clarity they want. She said they can print out map size in their office but something about the file on website. PIO said have tried to email MBX to some folks before and file too big to go through. PIO said would try to send files separately to her via email and see if it works. She said please send to Email address ayaf@theshoppingcentergroup.com.

4/26/2006 10:40 AM PIO returned call to Aya Fagan/The Shopping Center Group, who said she was reading some info on the website and it looks like Wekiva Parkway is a couple of years away? PIO said we're just in the PD&E stage, won't have approved alignment until spring 2007. She said so all there is right now is the overview map? PIO aid we're working on updating those maps and narrowing down the alternatives, hope to have updates by late May. She said and that's not fully funded? PIO noted correct, we're a number of years out on that one. (NB: Initial contact was regarding MBX)

3/8/2006 3:50 PM Mildred Fernandez OC Board of County Commissioners  
Regarding  
Carolys Acosta/Comm. Mildred Fernandez executive secretary 407-836-5309 called to say they received packet of comment forms Monday with cover letter from James. R. Palmer/ Palmer Reifler & Associates. She asked what the comment forms were for? PIO noted the forms were distributed at public workshops and also on website so people can submit their opinions about the project. PIO noted that we enter the comments into the project database for the record, and that I also respond to each one. PIO noted we'd gotten about 450 so far and they were still coming in. PIO confirmed we had received the same cover letter and packet of forms. PIO noted they just copied the commissioner's office on the forms. PIO noted she can tell the commissioner that we will be responding to the forms and entering them into the record. PIO noted if the commissioner has any questions she's welcome to call me, or if they hear from any of the folks who wrote in, tell them I will respond or give them my number so they can reach me directly. She said she would and thank you very much.

Date Time Regarding  
3/17/2006 9:20 AM PIO responded to Matthew Fisher email: "Hello Matt, It's hard to tell since your map doesn't show parcel lines, but it would appear that you are just south of the project study area. There was an initial alignment alternative that would have gone south of your location, but the Lake County Water Authority requested that be eliminated from consideration due to potential impact on the Wolf Branch Sink Preserve. For now your location does not appear to have a direct impact, but do stay tuned as this evolves!"

3/17/2006 8:55 AM \_From: Matthew Fisher [mailto:  
matthewericfisher@yahoo.com] Sent: Friday, March 17, 2006 8:55 AM To: Mary  
Brooks Subject: RE: SR 429-Wekiva Parkway PD&E Study - property owner query  
Mary Thanks for the detailed note. I am not sure about who sent the note. If I see my  
neighbor, I will ask and try to get a copy. Hopefully, you can see the map that I have  
pasted it. We are just a bit south 46 on Round Lake Rd. Our property is 4 parcels south  
of the railroad track. I will look for new maps as they are published on the website.  
Thanks. Matt (he attached mapquest map)

3/16/2006 1:56 PM PIO responded to Matthew Fisher's email: "Hello Matt, Your query was forwarded to me by  
my assistant Candace. I'm having trouble locating your property since the Lake County  
property appraiser's website seems to be having some issues. Please provide the nearest  
major cross streets to your property so that I may determine whether there is any impact  
from one of the initial alignment alternatives. I would be curious to know who sent the  
letter to your neighbor as we have not selected an alignment and do not know exactly  
which properties would be needed at this time. The only letters that we have sent out,  
besides newsletters and meeting notices, have been to alert property owners that  
surveyors, geotechnical and other project personnel would be working in your area to  
gather data for the PD&E Study, which is still underway. There are, however, as we  
understand it, some attorneys who are sending folks letters stating some rather disturbing  
things because they're trying to drum up business. We are working on the next project  
newsletter, which should be going out in late May or June. Since the public workshops in  
November, we have been analyzing the initial alignment alternatives based on public and  
government input, as well as on engineering evaluations, to create a set of more viable  
alternatives. During this process, some alternatives are being revised or shifted, some  
removed from consideration, while new alternatives also are being added. We hope to  
have the updated maps available and posted on the Expressway Authority website by late  
April. The resulting viable alternatives will be presented at the next public workshops in  
the summer of 2006. You will receive notice of those meetings. Subsequently, based on  
continuing public and government input and analysis, a preferred alternative will be  
selected. Public hearings are expected to be held in early 2007. The PD&E study is  
expected to finish with an approved alternative in spring 2007. Once the PD&E Study is  
done, we will still have to get into final design before we know exactly which properties  
will be affected by the roadway, ponds, etc. We are still very early in the process, but  
appreciate and welcome your continued interest in this major transportation improvement  
I know we don't have all the answers yet that people want, but I hope this helps. Please  
don't hesitate to call or email with other questions or concerns."

3/16/2006 1:29 PM PIO researched Matthew Fisher's property 30703 Round Lake Rd, Mount Dora, FL 32757  
on Lake County property appraiser website. It's in Sunset Hills subdivision. When tried to  
pull up property on the map, got following error MSG: STRUCTURE/ADDRESS We are

sorry, the parcel you have selected or are looking for is currently not available. Work is in progress to complete all parcels in Lake County as soon as possible. Please check back often and thank you for your patience."

3/16/2006	1:27 PM	Subject: Re: Wekiva ParkwayCandace,You may contact me at Matthew Fisher30703 Round Lake RdMount Dora, FL 32757Have there been any recent updates? My neighbor across the street said she received a letter indicating her property would be taken for the new road. I have not received any correspondence. The latest map I have seen put my property on the edge, but outside, of the study area.thanksMatt

2/28/2006	1:36 PM	Mailed Response RE: Comment Form
Contact Notes		Margaret Fitzwater
Date	Time	Regarding
7/31/2006	11:36 AM	PIO called back Margaret Fitzwater 407-322-9866 to relay info, noting she's 5-6 parcels north of 46 and we aren't doing anything in that area. She said that's quite a relief. She asked if we were going to raise the road over 46? PIO said concepts include an elevated parkway replacing 46, and potentially dropping down to at-grade at some point like 46 is now.She said she has friends in 12 Oaks RV Resort who are elderly also and were worried about what's going to happen to them? PIO noted the RV Resort does abut 46 and some we would be looking at some potential impact but not sure what at this point. PIO noted we'd been in touch with resort owner and were planning a meeting with him. She said thanks so much for calling back; you don't know what that means to me. We have two disabled people, my daughter and her son. It's an environmental illness; we can't be where people spray their yards or anything like that. The horses are hard enough to deal with. I know you're very busy and I sure appreciate it.
7/31/2006	11:20 AM	PIO researched Margaret Fitzwater query for 5748 Michelle Lane, off 46, Seminole Estates. Her property is NW of Michelle Lane and Orange Avenue, which is several parcels north of SR 46 not far from the river.
7/26/2006	1:15 PM	Margaret Fitzwater 407-322-9866 I wanted to check with you to see what you thought about Wekiva Parkway coming through or close to our land, can I give my address and you check? 5748 Michelle Lane, off SR 46, Seminole Estates, Sanford 32771. PIO said could research that but heading out to meetings rest of day, our workshop is tonight at Apopka h.s. but I recall she couldn't attend. PIO said I'd get back to her tomorrow or Friday. She said that's fine, and she'll call Friday to follow up.
5/3/2006	5:06 PM	PIO returned call to 407-322-9866, Margaret Fitzwater said thanks for calling back, noting she didn't leave a MSG. She said she lives close to the Wekiva, 5748 Michelle Lane off 46 in Seminole Estates. I got a letter from you stating about the Wekiva Parkway corridor. When will I be able to find out how close it's coming to me? I have two disabled people living here, her daughter and grandson, that I take care of. It would take me a long time to build another place like this. This was especially built for their needs. She's so sick, she is on social security. ... The Wekiva animal preserve is right behind us, ... the treatment

plant. PIO asked if she'd seen the initial alternatives maps at the November meetings? She said she couldn't go because she has to take care of her daughter and her son. She aid they have 5 acres. They can't tolerate being around plants, insecticides, any chemicals ... they have to have a teacher come and teach the boy. She said if they're going to be affected she's going to have to find a new place now because the property is going out of sight. The lot across the street sold for \$800,000. PIO gave update on viables and overall schedule. PIO noted project not totally funded so that could taka a while. Noted costs going up every few months. She said she can see why. PIO said we will try to remember to check her location when I get the updated map, but I have a lot of people calling, so if she doesn't hear from me by the first week of June to give me a call back. She said she sure will, anything will be a help.--513 p.m.

5/3/2006 5:06 PM PIO returned call to 407-322-9866, Margaret Fitzwater said thanks for calling back, noting she didn't leave a MSG. She said she lives close to the Wekiva, 5748 Michelle Lane off 46 in Seminole Estates. I got a letter from you stating about the Wekiva Parkway corridor. When will I be able to find out how close it's coming to me? I have two disabled people living here, her daughter and grandson, that I take care of. It would take me a long time to build another place like this. This was especially built for their needs. She's so sick, she is on social security. ... The Wekiva animal preserve is right behind us, ... the treatment plant. PIO asked if she'd seen the initial alternatives maps at the November meetings? She said she couldn't go because she has to take care of her daughter and her son. She aid they have 5 acres. They can't tolerate being around plants, insecticides, any chemicals ... they have to have a teacher come and teach the boy. She said if they're going to be affected she's going to have to find a new place now because the property is going out of sight. The lot across the street sold for \$800,000. PIO gave update on viables and overall schedule. PIO noted project not totally funded so that could taka a while. Noted costs going up every few months. She said she can see why. PIO said we will try to remember to check her location when I get the updated map, but I have a lot of people calling, so if she doesn't hear from me by the first week of June to give me a call back. She said she sure will, anything will be a help.--513 p.m.

5/3/2006 3:07 PM PIO got call from 407-322-9866 but no MSG.

Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment  
AlternativesDear Denise,Thank you for submitting a public comment form for the Wekiva

Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

9/26/2006 3:30 PM

PIO received formatted comment form (Cindy Poirier campaign) dated 9-19-06: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children and the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."

Date	Time	Regarding
2/16/2006	4:46 PM	PIO emailed Wekiva Parkway overall conceptual to Jason Frasier: "As discussed the Wekiva Parkway map. This map is being updated, and some of these alternatives have already been removed from consideration. We hope to have updated maps to publish by late March."

2/16/2006	4:39 PM	Emailed concepts to Jason Frazier: "Jason, As discussed, here is the updated map for the S.R. 414-Maitland Blvd. Extension Project. Will send the Wekiva Parkway map separately due to file size."
-----------	---------	--

2/16/2006	4:05 PM	PIO returned call to Jason Frasier/CT Shue Group ("searching your website for specific maps of future and proposed IC's in Orange and Lake County") he's looking for regional interchange information. PIO walked him through the website to get the OOCEA system map. We noted it doesn't show updated projects or the Wekiva Parkway. PIO noted we'll be updating that. PIO noted two projects I'm working on and IC locations. He asked if there were maps for those. PIO noted maps are available on the website; in fact, just got
-----------	---------	---

the updated one for the MBX. He asked that I email that to him. PIO noted Wekiva Parkway still in study phase so don't have approved alignment, though we know generally where IC's will go. He asked if there was a map of that? PIO noted yes on the website, but will email that to him also. J.frazier@CTHsu.com he also asked if I knew anything about a Turnpike IC planned for Howey in the Hills? PIO noted that's separate agency he would need to contact them. He said he thought he'd seen a map on that one. PIO noted he should probably check the FDOT website.

2/15/2006 3:11 PM Jason Frasier/CT Shue Group left MSG been searching your website for specific maps of future and proposed IC's in orange and lake county. If you can give me a call please 407-423-0140 and give me a little assistance if you can to direct me exactly where I need to go because I haven't found exactly what I needed.

8/7/2006 9:07 AM Attended public workshop on 7/26/06. Submitted comment: "Better roads, sooner! Yeah! Much of the proposed route crosses or involves areas labeled "flood plain." As this will be a major road and likely excavation route, please look at elevating and keeping the road dry at least 50-year flood plain levels. Currently we are very dry. What is dry today won't always be. When New Orleans went under water, they were left with interstate "islands." Seminole County/FDOT has more budget issues, but both these interchanges would be beneficial connecting the eastern and western beltways would be ideal. Especially if it could be done without getting on and off I-4. It impacts a lot of property owners with money, but it makes long-term sense. I-4 currently has some long on/off ramps, side roads in the 46/417 area. Something like that to connect the beltways to I-4? Orange County has fewer budget constraints, I'd say build interchanges at both Ponkan Road and Kelly Park Road. It might upset people now, but with the growth in that area to the west

of Plymouth-Sorrento Road already started, we will need them both and land is not getting cheaper. How the Vick Road option got overbuilt to be viable should be a lesson - Buy and build it while we can."

Contact	Kim Friedman	Keller Williams Realty
Notes		
Date	Time	Regarding
2/7/2006	4:40 PM	PIO drafted concept letter for Kim Friedman/Keller Williams Realty as requested and sent with SC design concepts 5A-D.
2/7/2006	1:10 PM	PIO called Kim Friedman/Keller Williams on cell, left detailed MSG that I had one copy each of the maps she wanted that I'd be happy to send her. PIO noted if she needs more copies, she can download the maps from the website and get as many copies printed as she liked. PIO noted if she has trouble downloading the files for some reason to let me know and I'll email them to her. PIO noted we are not making any more copies of these maps because they're from the November public workshops, and engineers in the process of updating them, should have new maps in March. PIO noted we will be posting the updated maps on the website also. PIO said not sure if I have her address and to call me to confirm, or with other questions.
2/7/2006	1:03 PM	Returned call to Kim Friedman/Keller Williams office, receptionist said she just left office, gave me her c 407-221-7989. PIO checked supply of maps as per request; only one copy left of 5a-d.
2/7/2006	10:14 AM	Kim Friedman/Keller Williams in Lake Mary called and left MSG that "We just had another meeting re: the 417 extension. I was hoping you could send us two copies of maps 5A-D. If you have any questions c 407-221-7989, o 407-936-1358.
1/31/2006	11:10 AM	Woman from Keller Williams Realty (didn't give name) 407-936-1359 called asking how to get the maps from S.R. 417 to Wachovia? PIO asked if she was looking for maps for Wekiva Parkway? She said yes, she was on the website. PIO guided her through the text links until she saw the map location. She said thanks for the assistance.

Contact	Dean Fritchen	Coldwell Banker Commercial
Notes		
Date	Time	Regarding
9/26/2006	12:48 PM	Dean Fritchen/Coldwell Banker responded to PIO email: "Mary, Thank you so much for your prompt and most welcome follow up. My modest magnifier on an old plan concept made me suspect that the property might have some relationship to the north-south bound highways, and I try to stay thorough. Mary I most appreciate your conscientiousness and attitude in a job that has to keep you busy, but it means a lot to us. Best, Dean F"
9/25/2006	6:52 PM	PIO emailed Dean Fritchen relaying info: "Hello Dean, Just wanted to get back to you on the location we discussed Friday afternoon. The intersection of Junction Road and Ponkan Road, as you mentioned is near Round Lake Road. This is west of Zellwood Station and well west of the project corridor in this area (we about the eastern edge of Zellwood Station in this area). The Expressway Authority project has no impact on this intersection. If you have questions about that intersection, you would need to check with either the City of Apopka or Orange County. I'm not sure if that's actually in the city or not, I'm afraid. Take care, Mary Brooks
9/25/2006	6:45 PM	PIO researched Dean Fritchen query re: Junction and Ponkan roads. The intersection is well west of Zellwood Station, almost to Round Lake, OBT is just a little farther west. No impact from Wekiva Parkway.
9/22/2006	4:41 PM	Dean Fritchen called back and said what he was referring to was the intersection of Ponkan and Junction Road. It's in OC. Are there any plans to put highways close to that? Tax ID no. was just for guidance. Main thing is the junction of Junction Road and Ponkan

and Round Lake, what's going on in that area?. Got out my spy glass on one of your earlier plans and it looked like a road was going near there? I have a property there. About 1/2 mile east of 441 on Ponkan. This is east of Plymouth Sorrento road. PIO said project is west of Plymouth Sorrento road. Junction is east of Round Lake and west Plymouth Sorrento road. PIO said I'd research the location and get back to him.

9/22/2006	3:44 PM	PIO returned call to Dean Fritchen 407-571-5525, left MSG asking for whether parcel ID no. he left me was for Ponkan Road in OC or Junction Road in LC. Also asked for clarification on which (both?) of those he wanted large aerial of since we'd already sent him a number of maps. PIO noted out of the office this afternoon and it will be Monday before I can get back to him, but do get back to me with that info so I can look up the parcel for him.
9/22/2006	2:17 PM	Dean Fritchen/Coldwell Banker called back and left MSG parcel ID 262027000000015. 407-571-5525, 901 North Lake Destiny Drive, Ste. 110, Maitland 32751, ... I am looking for a large aerial in that area as large as I can get and will be happy to pick that up. Would like more info on what the plans for that area are. Just on the edge of Zellwood off 441. Would mean a lot to meThanks a lot. Much appreciate all your cooperation. It's really been wonderful. I don't know how you keep up with all the stuff you have to do.
9/22/2006	2:13 PM	Dean Fritchen/Coldwell Banker called and left MSG I'm the senior commercial associate; you and I have talked a number of times. Very interested in getting ASAP info on what is happening at Ponkan road and Junction road in conjunction with your plans. I have a large aerial and looks like ... just want to get up to speed on Ponkan and junction, east of round lake road. if you could I'd appreciate that. could give you parcel ID no. ... not sure you work by that. ... I'll have to call you back.
8/27/2006	5:44 PM	"Aug. 27, 2006Dean FritchenColdwell Banker Commercial901 Lake Destiny Dr.Maitland, FL 32751 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Dean,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. The large map has been sent to you separately by CH2M Hill, which is conducting the study.Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> , or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks
7/31/2006	10:44 AM	Attended public workshop on 7/25/06. Submitted comment card: "This is to request a large aerial of the proposed configuration and plan for those at this presentation showing Round Lake Road and Hwy 46 with alternate 1 and 2. Please have someone telephone me at 407-571-5525, and I will be pleased to personall pick it up. This request is made per the instructions of one of the managers with whom I spoke. Thank you. Let me add

Mary Brooks has been most helpful on my telephoning with questions."

7/21/2006	12:22 PM	Dean Fritchen called and said he was on the ECFRPC website but couldn't find the Wekiva Parkway map. PIO noted he needed to go to the EA website, walked him through address and text links. He was thankful for the info.
5/16/2006	3:41 PM	Dean Fritchen /Coldwell banker 407-975-3476 called and said he talked to me some time ago about the 46 bypass but he's sure things have changed quite a bit since then. PIO noted we have a new alternatives map and gave him web address and text links. He said what about the intersection of 46 and Round Lake Road, there's a traffic light there? Is that going to stay? PIO noted intent is to have as much of the Wekiva Parkway elevated as possible, but in some locations it may be at grade. PIO noted we're narrowing down the alternatives and still have to get to the detailed design of elevations.He said but 46 will be widened through there? PIO noted intent was to replace 46 throughout much of the corridor, except where it goes around the Mt. Plymouth-Sorrento area. PIO noted Wekiva Parkway would be at least 4 lanes and 6 in some areas depending on traffic volumes, such as in Seminole County.He asked who was making those decisions? PIO noted public input and feedback from government officials taken into consideration for the PD&E study, which is ongoing. PIO noted he'll want to watch for the next public workshops, which should take place in mid-August. PIO noted we're working on the next newsletter which will include those details. He said how do I get on that list? PIO noted if we've spoken previously he should already be on the list. PIO checked database and confirmed address we had for him. He said it's actually 901, not 900 Lake Destiny Drive. PIO made correction He said he was thankful for the info. PIO said he's welcome to call any time.--354 p.m.

Time

Regarding

7/31/2006

11:50 AM

PIO called back Ingeborg Fritz 763-535-2400, she asked me to wait until her son, Ted, could come in from outside, noted they're having a heat wave up there. Ted got on the other phone and PIO relayed that their property is 3 parcels south of 46, and even if we widen to the south along 46, we probably wouldn't go that far south. She said that's wonderful and thanks for calling back so promptly. I just had to check because you never know. PIO noted I understood and advised her to stay involved in the process because things can change and evolve; we're only in the study phase so it's still early in the process. She said they'd keep checking on it. PIO noted we hope to get the maps from the workshops on the EA website within a week or so. She said okay and thanks again.

7/31/2006

11:43 AM

PIO researched query from Ingeborg & Raymond Fritz re: 244 Lake Markham Road second house from 46) 763-535-2400. The property appraiser shows parcel to be about 3 properties south of 46 on Lake Markham Road. Indirect impact would appear to be proximity to the parkway, which would vary depending on whether they widen to the north or south.

7/28/2006

12:00 PM

Inceborg Fritz called from Minneapolis and said she & Raymond Fritz, and their son, Tet, own property jointly on Lake Markham Road. How will it affect it? It's the second house in from 46, 244 Lake Markham Road. 763-535-2400. PIO said my internet was knocked out by yesterday's storms and technician supposed to be working on that this afternoon, so will be Monday before I can research it and get back to her. She said Monday morning I'm not available but you can leave the information on the telephone. My Question is there a major impact on the area? PIO said there'll be varying impacts along the 46 corridor depending on the alternative we wind up going with. Again, until I can see where her property is, I can't give her details but can do so on Monday. She said okay and look forward to hearing from you.

Notes		
Date	Time	Regarding
2/17/2006	4:40 PM	PIO returned call to Don Gallagher 407-619-1463 confirmed he's on the mailing list with the Weichert Realty address, but can change to the 40 Minnehaha address if he likes. He said he'd prefer that. PIO noted the next meetings will be mid-summer this year. PIO noted we're working to refine alternatives to develop more viable alternatives based on public comment and local government feedback. Noted some alternatives been removed from consideration, new ones added and some tweaked or shifted. Noted we hope t have update maps by end of March and will post on website. He said he's hearing all kinds of things about what's been decided, and he's got folks coming up from Miami wanting to look at Tall Trees but concerned about the road. PIO noted from ROW standpoint, the alternative that would connect directly to 417, if selected, would hit SW corner of subdivision, minimal take, not cutting through subdivision the way he'd heard. He said people would still have to look at the roadway, which some folks not happy about. PIO noted that's true, but there are also people who are looking forward to easy access to the roadway. He went into a story about a previous client who complained he didn't want a property because he couldn't see the traffic; that's what he was used to. PIO asked if he'd seen the maps? He said only what was in the update, didn't make it to the meetings but wants to be more involved. PIO noted all the maps are on the website, including county maps showing area he's asking about that he should take a look at if people are asking about the project. He said he thinks he has access at the office. PIO asked if he had email I could send him the Seminole county map. He said no, just whatever we send in the mail is find and he thanked me for the time and getting back to him.--452 p.m.
2/17/2006	9:15 AM	Don Gallagher 407-619-1463 MSG sorry I missed you returning my call yesterday. It was nice u called me back. If you could try my cell phone if you have a chance 407-619-1463. Thank you.
2/16/2006	4:00 PM	PIO returned call to Don Gallagher C 407-619-1463 rang twice then cut off. Tried again and could hear talking in background but no direct response. Don finally acknowledged call and got me number to call back.
2/15/2006	1:38 PM	Don Gallagher left MSG I may be on your list to receive some of your updates for the Wekiva Parkway and S.R. 46 bypass. The last update I received was for fall 2005. I know they had some public hearings scheduled in November. Knew they were planning more hearings or public input some time in the spring. I didn't know when that was coming up. Also would like to know if I'm on your list? Don with Weichert Realty, used to have my own company don Gallagher real estate insurance and Prudential Gallagher over the last 50 years. I'm still at it every day. My address at the office though I really prefer to get it at home 40 Minnehaha Cir., Maitland 32751. Then it won't get lost in the other papers that

come in the mail. C 407-619-1463. Have some family coming up from Miami; they want to locate lake Mary/Sanford. Every time we show property they said oh, we'll be in path of new western beltway! I know it's too early to predict the exact road situation they get nervous about all the subdivisions along 46 esp. north and south of that road there esp. knowing this beltway will go in middle of 46, or how far will expand out once it gets to I-4, tie in to 417 or some other roadway over there. We have subdivision like tall trees out there right near International parkway area and guess it's supposed to fan out to tie in to the next roadway after that. Give me a call if you have a moment because I'm working with these people and they haven't moved here yet. They're due in early April. Everything we look at has a question mark on it since not knowing for sure where this road is going to go. Appreciate your calling back. 407-619-1463

Regarding  
"Sept. 19, 2006 Steven Gallis 25645 Lido Avenue Mount Plymouth, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Steven, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. The project sections in Lake and Seminole counties currently are not intended to be tolled. However, this project is not fully funded and various funding options are being explored. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

8/7/2006 11:35 AM

Attended public workshop on 8/1/06. My concern regards the possibility of having to pay a toll charge to travel from my Mt. Plymouth home to my job located in Deltona, FL. This is my only viable way to go to work every day, shopping at Seminole Town Center and even using I-4 access nearest my home. If the current SR 46 is eliminated, those of us in this area are road located into paying a toll to leave our area! This should be given some serious consideration. Why can't those of us in this area be given "free pass" to use this section (Mt. Plymouth to I-4 Seminole County). Also there are individuals that travel from Debary and Deltona to Mt. Dora as well. Also, thanks to Mary Brooks for her info and answering our questions and concerns."

7/31/2006      1:26 PM      Attended public workshop on 7/25/06. Submitted comment: "In discussions with Mike Snyder, it is clear that the only viable option for Wekiva to connect to I-4 is directly to the 417 Interchange. The elimination or minimizing the bottleneck at I-4 and SR 46 by using the existing infrastructure of the 417 to connect to the Wekiva Parkway will open up the I-4 corridor. The addition of access to International Parkway is also a major relief to already congested areas of 46A, Reinhardt and surrounding streets. The alternate use of SR 46 to I-4 will only add further congestion and confusion for those traveling between 417 and Wekiva Pkwy, not to mention the added traffic to I-4 at that location. Clearly, this is not a 'true' viable alternative, with the amount of daily traffic supporting local businesses and the mall, the impact would be catastrophic to connect at SR 46/I-4."

Date Time  
8/9/2006 9:02 AM Regarding  
Attended public workshop on 7/26/06.

7/27/2006 11:23 AM PIO emailed attendance numbers to reporters who have been covering the project/meetings Jay Hamburg, Robert Perez, Martin Comas/Sentinel, Dave McDaniel/WESH TV, Apopka Chief, Rock Springs News.

7/27/2006 11:10 AM PIO returned call to Chris Gauthier/Apopka Chief, relayed attendance from Orange and Seminole meetings and comment form numbers. She asked if a lot of folks were upset last night? PIO said wouldn't say upset, but concerned about possible impacts to their homes or properties. PIO noted I heard comments from both sides of the spectrum: either if you hit my property take the whole thing because I don't want to look at it, or , we've been there 30 yrs and don't want to move, can you just take what you need so I can stay there, don't mind looking at it, etc. PIO noted also some impatience since this area has been studied in the past for another project, so folks want to know what the outcome is going to be. She said okay thanks.

7/27/2006 8:47 AM Chris Gauthier/Apopka Chief called and left MSG wanted attendance from last night. 407-8862777

7/18/2006 1:07 PM PIO returned call to Chris Gauthier/Apopka chief 407-886-2777 she said want comments about upcoming meeting having about Wekiva Parkway. All the alignments, how many are there? She said it shows two interchanges, but there's only supposed to be one, right? PIO said correct according to statute. Either or. She asked if info on how many people will be impacted by alignments? PIO noted they're working on that now and will have for public workshops. She said on July 26 meeting, people will still be able to fill out there feedback? PIO said yes, that's why we're bringing forward this latest info. We have narrowed down some of the alternatives; we've got some additional info like preliminary retention pond sites, the latest and greatest if you will. So we want people's comments on that. She said and the final alignment will be decided based on those public comments? PIO noted on public comments, continuing engineering analysis - it has to work - and continuing feedback from local governments and state agencies. All three of those things have to be taken into consideration. When will you have the preferred alignment? PIO said schedule

shows drafting one or two preferred alternatives in November or December. Will have to be reviewed by local governments and state agencies, then public hearings in February or March, so around that timeframe to have an approved alternative. When will construction start? PIO noted we have to get through final design and row acquisition and neither of those fully funded, nor is construction. We have a little money to start those two phases but ... PIO noted have heard 2010-2015 for construction to begin, and that's highly subject to change based on funding availability. She said okay that does it and thanks.

7/18/2006 11:37 AM Chris Gauthier/Apopka chief 407-886-2777 called and left MSG I would like a few comments from you on upcoming meeting in Apopka. Please give me a call.

8/1/2006 10:22 AM Attended public workshop on 7/25/06.

Contact Notes Patrick Gee

Date Time Regarding  
7/28/2006 2:56 PM PIO returned call Patrick Gee, relayed date, time and location for remaining meeting. He said that's not good for me, any others? PIO said no, just this last one, already had two this week. He said I'm on other side of the table. I'm looking to buy property to build for myself, and I want it strategically located so I can get to the project exit. PIO asked if he was sure he was going to buy somewhere in that area, did he want to be on the project mailing list? He said he would like to be on the list. Patrick Gee, 1010 Winderley Place, Apt 115, Maitland 32751 email pmg3@yahoo.com PIO said if he couldn't make it to the Aug. 1 meeting, we plan to convert the maps to PDF's and place them on the EA website, might take a couple of weeks to do that. He said he's going to try to make the meeting and thanks for the help.

7/28/2006 10:38 AM Patrick called and left MSG I'm wanting to come to some of the meetings and see some of the proposals for the 429 extension that's planned. 407-741-0633 I'm interested in finding out when and where. Thank you.

2/8/2006 4:25 PM PIO called back Frank, noted no one on project team was aware of any meeting relating to the project, and didn't see anything on the WRBC site. PIO noted that doesn't mean some other agency out there isn't having a meeting, or environmental group, etc. PIO asked about the source of his info, is it someone he can go back to for more detail? Eh said he doesn't remember where he heard it, he talks to so many people. Though he thought they said it was about the parkway not just the Wekiva River. PIO asked that he let me know if he's able to get any more info because we like to attend public meetings even if we don't put them on so we can answer any questions folks might have about the project. He said he'd check around and let me know if he found out anything.

2/8/2006	4:12 PM	Frank Gephardt 386-532-6514 called, "I was just checking again. I'll get with you later. Thank you.
2/8/2006	9:10 AM	Frank Gephardt 386-532-6514 called and said he heard there was a meeting tomorrow night on the Wekiva Parkway and wanted to confirm? PIO noted project team not doing anything, but there are a number of entities involved in this that could be having something I haven't heard of, WRBC, DEP, WMD, etc. PIO said I'd check and get back to him. He said he'd be in and out and doesn't have answering machine, so if doesn't hear from me will call me back.--915 a.m.

Thank you for suggesting adding an equestrian trail between Haas-Ondich and Round Lake Roads. We have received much interest in trails, and continue to discuss this with local governments. Please be advised, however, that this 25-mile project is not fully funded, and faces significant funding challenges just to get the much-needed roadway built. We are preparing exhibits and other information for the next public workshops, and hope that you will attend. The same information will be available at each of the workshops." Seminole County: July 25 5 p.m. - 8 p.m. Sanford Civic Center, 401 E. Seminole Blvd. (Sponsored by FDOT)" Orange County: July 26 5 p.m. - 8 p.m. Apopka High School, 555 W. Martin St. (Sponsored by the Expressway Authority)" Lake County: Aug. 1 5 p.m. - 8 p.m. Lake Receptions, 4425 N. Hwy 19-A Mount Dora (Sponsored by FDOT)Based on subsequent public and government input and the viable alternatives analysis, a preferred alternative or alternatives will be selected. Public hearings are expected to be held in February-March

2007. The PD&E study is expected to finish with an approved alternative in spring 2007. After the workshops, all of the latest project exhibits will be posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. I encourage you to check the website periodically for updates, or to contact me with questions at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or write to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

7/13/2006	8:12 AM	Jim Gonka faxed comment form: "7-13-20064602 Meadowland Dr., Mt. Dora, FL 32757I have been very interested in the conceptual design in the area of Round Lake Road and 46. The choices for alignment have narrowed significantly. I don't have a preference as long as the upland habitat, springs and wetlands in this area are respected. This area will remain rural well beyond the completion of this expressway. I would like to request the addition of an equestrian trail from Ondich/Hass Rd. to Round Lake Road. This would enhance the rural nature of this area for decades. It would provide a legacy to horse owners for generations. This trail could extend all along the Ondich/Hass Rd. corridor."

We appreciate your time and concerns, and will continue to discuss with Lake County officials their trail requests. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> , or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. Date	Time	Regarding
8/7/2006	10:22 AM	Attended public workshop on 8/1/06. Sam submitted comment form: "Alternatives 1 and 2 for west lake. These options are most preferred. They 'seem' to use the southern limit of 46 as the furthest point south, which is good for our neighborhood. I would like to know how the two ponds at the base of the 'hill' on 46 will be handled. How much notice will be given prior to the lane expansion in our area? Will we be contacted directly?" Rachel submitted comment form: "I am anxious for this project to get up and going! I look forward to the growth and changes. I would like 46 to be safer and easier for all to travel on. My concerns are basic: make it beautiful, don't cheap out on landscaping, be mindful of the natural habitat, try not to 'steal' land from established homeowners, don't be lazy with your responsibility to both the current and future residents of Mount Dora!!! Thank you very much."

8/24/2006	12:48 PM	PIO called James Grady 407-928-5432, who said he has property on Ondich Road, whichever map he needs for that. PIO said that helps and we can figure it out from there, it's taking a while to get through all these. He asked any idea where it's going to go yet? PIO said no, still going through all the forms, have more than 450, and have to continue engineering analysis. Shooting for end of year to have a draft preferred alignment alternative. He said okay thanks.
8/2/2006	1:40 PM	Attended public workshop on 7/26/06. Submitted comment: "I own property on Ondich Road. I can accept the proposed location." Additional comment: "I would like a full size map drawing of Alternative #1. Thank you. If there is a charge, call me at 407-928-5432 and I will provide a cc."
7/14/2006	12:22 PM	PIO emailed map concept to James Grady as requested: "Hello James, Nice speaking with you yesterday. Please find attached a viable alignment alternatives map for the Wekiva Parkway PD&E Study. Please be advised we are continuing to get input from local governments and state agencies, so the maps at the public workshops will be the latest and greatest. I hope you can attend one of the meetings. This map is also available on the OCEA website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button on the left side of the page. On the home page under "Construction Updates" click on the highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the maps and other files. After the public workshops, we will place all of the exhibits on the website as well. Please call or email with other questions or concerns. Mary Brooks"
7/13/2006	4:26 PM	PIO returned call to James Grady 407-928-5432 I went to website and couldn't find way to find a map that I could download. PIO asked if he was at a computer I could walk him through the links? He said no, he's out on his cell. He asked is there anyway you can send me the way to do that? PIO said I can email him the map if he liked? He said that'd be great, send to. <a href="mailto:Jgrady@jagcinc.com">Jgrady@jagcinc.com</a> PIO noted I was out of the office now but would send to him when I get back. He said thanks so much for calling back.
7/13/2006	10:32 AM	James Grady called and left MSG. I live in northwest OC very close to where this road is going. I'd like to have a better map of the proposed map than I've got and I don't have that. If I could find a way to have that downloaded or sent to me, I would appreciate it. 407-928-5432 thank you.

Notes

Date Time  
1/30/2006 1:58 PM

Regarding  
PIO drafted comment response for Charles & Patricia Green: "Dear Charles & Patricia  
Thank you for submitting a public comment form for the Wekiva Parkway Project  
Development and Environment (PD&E) Study. We appreciate your time and concerns.  
Your comments are being reviewed and evaluated along with the hundreds of other public  
comment forms received, as well as input from local governments. The initial alignment  
alternative segment OC-9, if chosen, would affect the east side of your property at 5851  
Effie Dr. in Apopka. Please be advised, however, the study is still underway and changes  
are still being considered. Currently, the initial alignment alternatives are being analyzed  
based on public input, as well as on engineering evaluations, to create a set of more viable  
alternatives. During this process, some alternatives are being revised or shifted, some  
removed from consideration, while new alternatives also are being added. The resulting  
viable alternatives will be presented at the next public workshops in the summer of 2006.  
Based on public and government input and the viable alternatives analysis, a preferred  
alternative will be selected. Public hearings are expected to be held in late 2006 or early  
2007. The PD&E study is expected to finish with an approved alternative in spring 2007.  
All of the public workshop exhibits and other information are available and will be updated  
in March on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the  
home page click on the text link for the "Western Connectors." That will take you to the  
Wekiva Parkway page, where you can scroll down to see the text link for the public  
workshop files. I encourage you to check the website periodically for updates, or to contact  
me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email  
MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222,  
Orlando, FL 32817. We appreciate your interest and continued involvement in the  
development of this major transportation improvement."

1/30/2006 1:42 PM PIO checked location of Charlie & Patty Green/5851 Effie Dr., parcel 2513 is hit on east  
end by OC9, north of Paulette.

1/27/2006 12:27 PM Comment Form: Charlie and Patty Green 5851 Effie Drive Apopka, FL 32712 I believe the  
Parkway has been very vague in their attempt to inform the public as to who is impacted.  
There are routes that are more viable that cause less stress to environment and families  
and the area. The rural setting will be lost and there are areas that will be affected: Wildlife,  
foliage, and pollution. You are ruining a way of life that people have worked hard to  
achieve.

Regarding  
PIO worked on response to Michael Gregory comment form. "March 14, 2006 Michael

Gregory791 Wetstone PlaceSanford, FL 32771RE: Receipt of Public Comment for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear Michael,Thank you for submitting public comment for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comments received, as well as input from local governments. For example, the Seminole County Expressway Authority (SCEA) voted Dec. 20, 2005, to have the yellow or northernmost alternative, which would have connected to Interstate 4 at U.S. Highway 17-92, removed from further consideration. The SCEA, which must approve any alignment in Seminole County, also requested an alternative coming off SR 46 and heading down International Parkway to SR 417 be evaluated. Also, the Lake County Water Authority (LCWA) in February requested that an alignment alternative that would have affected the Wolf Branch Sink Preserve be removed from consideration.At this time in the study process, there are many questions that cannot be answered, and decisions that have not been made - including the location of the Wekiva Parkway connection to Interstate 4 in Seminole County. The initial alignment alternatives continue to be analyzed based on public input and engineering evaluations to create a set of more viable alternatives. The resulting alternatives will be presented at the next public workshops in the summer of 2006. Based on subsequent public and government input and analysis, a preferred alternative(s) will be selected. Public hearings are expected to be held in early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the project exhibits are available, and will be updated in late March or April, on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the public workshop files.I encourage you to check the website for updates, or contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038 via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement."

Contact	Tom Grow	
Notes		
Date	Time	Regarding
8/11/2006	4:40 PM	PIO emailed Tom Grow as requested. "Hello Tom,It was good speaking with you earlier regarding any potential impact from the State Road 429-Wekiva Parkway Project Development and Environmental (PD&E) Study to your property at 220 Juniper Ridge Court. As we discussed, this property off Wayside Drive and east of Orange Boulevard is two parcels south of SR 46. This area is not expected to see a direct impact from either alignment alternatives being considered for SR 46 or connecting to SR 417 at Interstate 4. With regard to your question about property values, all of our information and studies indicate that a transportation improvement of this nature that makes it easier to get from point A to point B actually improves property values. People want access to good roads so that they can get where they need to go, and not have to sit in bumper-to-bumper traffic as is the case now at times on SR 46).The next step in the PD&E Study for this project is to take the public comments and government feedback on the viable alignment alternatives presented at recent public workshops, analyze that info and continue our engineering analysis to draft a preferred alternative. That will have to be reviewed by

various government entities, and we will bring the resulting preferred alternative to formal public hearings in February-March 2007. The PD&E Study is scheduled to conclude with an approved alternative in spring 2007. Also, the maps from the public workshops are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "corporate site" button. On the home page toward the left side of the screen you will see the "Construction Update" headline. Under that is text that includes the highlighted link for the "Western Connectors." Click on that colored, highlighted link and that will take you to the Wekiva Parkway page. At the top of that page is the link for all of the latest maps for the project. I hope this is helpful. Please feel free to call or email with other questions or concerns. Mary Brooks

8/11/2006	4:22 PM	PIO called Tom Grow 407-257-1172, 407-916-3674 to relay info, he said thank you so much for researching that. Is there a way I can get what you just told me in writing to show to the homebuyer? PIO asked for his email address to relay info. He said please send to tomgrow@gmail.com. He asked about effect of highway being nearby on his property values? PIO noted there is a lot of concern about that, but our studies show a transportation improvement of this nature that makes it easier to get from point A to point B increases property values and spurs redevelopment. People want access to get where they want to go; they don't want to be sitting in bumper-to-bumper traffic like what occurs now on SR 46 at times. He said okay. So will it be a raised expressway? PIO noted different configurations for 417 alt and 46 alts, noted those decisions still have to be made. He said okay thanks for researching that.
8/11/2006	4:05 PM	PIO researched Tom Grow property on SC property appraiser site, property is on Wayside east of Orange Boulevard, two parcels south of SR 46, at the northern edge of Wayside Estates. No direct impact from 46 or 417 connection, nor 46 widening to the south.
8/11/2006	10:10 AM	PIO returned call to Tom Grow 407-257-1172, live on juniper ridge off wayside in Sanford. Trying to sell the house and wanted to find out about road construction in area. . I understand they're talking about extending 417 to International Parkway, and then also doing the Wekiva Parkway? He has a buyer for there house who wants to know the impact. PIO noted Wekiva Parkway would connect to I-4 at either 46 or 417, has to be decided. He asked for impact on his property. PIO requested address. He said 220 Juniper Ridge Court, owner listed as tom grow. He said call him back at 407-916-3674 because his cell is dying. PIO said I'd look into it and get back to him.
8/10/2006	3:29 PM	Tom Grow called and left MSG 407-257-1172 if you could please call me back I would really appreciate it. Thank you very much.

9/12/2006	4:12 PM	PIO responded to Sheri Hague email: "Hello Sheri,I just got back from vacation and saw your email. We are only in the Project Development and Environment (PD&E) Study stage of the Wekiva Parkway. We hope to finish the study with an approved alignment alternative in spring 2007. Typically from there a project would go to final design, right of way acquisition and then construction, with each of those phases taking 2-4 years, depending. However, this project is not funded, and the availability of funding will greatly affect the schedule. The earliest estimates for construction starting that I've heard, if funding were to become available, is 2012-2015. A project so large (25 miles) would have to be done in segments - each again starting based on available funding -- so it's not possible at this time to determine when construction would be completed.Mary Brooks

10/18/2006	10:14 PM	C'Sandra Hall responded to PIO email: "Thank you Mary for your quick answer. I have passed it along to Joyce Cravey and Jane Harper. Why would our lawyer tell us this? C'Sandra Hall"
10/18/2006	5:10 PM	PIO responded to C'Sandra Hall/3715 Hideaway Rd in Apopka: "Hello C'Sandra,I show your property at 3715 Hideaway Rd. in Apopka as being near the west end of Lent Road which ends at Plymouth Sorrento Road) and north of Ponkan Road. That property is on Wekiva Parkway corridor, not the Maitland Boulevard Extension, or former Apopka Bypass We currently have bids out for a contractor to begin building the first section of the Maitland Boulevard Extension in Dec.-January. The Maitland Boulevard Extension has been broken into two phases due to rising construction costs and land values. The first phase is funded for construction and will take Maitland Boulevard from where it ends now at US 441 to CR 437A (Ocoee Apopka Road). The rest of the Maitland job, from CR 437A to the west and north to US 441 near Plymouth Sorrento Road, will be built when funds become available (that section is currently not in the 5-year work program). As shown during the public workshops on the Orange County alignment alternative for the Wekiva Parkway (if interchange selected at Ponkan Road), this alignment would take an eastern strip of your property. As you can see here, the proposed alignment would affect the eastern strip of your property, (shown here as parcel 1786 on the concept). We are continuing to evaluate all of the feedback from the summer workshops and other government input, and are working on the impact and preliminary cost assessments. The goal is to draft a preferred alignment alternative, including recommendations for interchange locations, in January. That would have to go through local government and state agency review and revision before we could bring that forward for formal public hearings in March-April. Please be advised that throughout this process the alignments are being shifted, or new ones added.We anticipate concluding the Wekiva Parkway project development and

environment study (PD&E) in late spring-summer 2007 with an approved alignment. As you know, the project is not fully funded, so it cannot be determined at this time when Right of Way acquisition or construction would begin. This funding situation has been the case all along, so I'm sorry if you got information that made it appear that something has changed. Everyone involved with this project also is aware of this situation. The best case scenario, which is highly subject to change based on funding availability, would be for construction to start on the first section perhaps some time between 2012-2015. Again that's best case-scenario, if the funding becomes available soon. I hope that addresses your questions. Mary Brooks

10/17/2006 11:23 AM C'sandra Hall emailed: "Good morning Mary, like a bad penny here I turn up again. We received a letter from our lawyer that states Maitland Bypass is being put on the 5 year plan. Joyce Cravey emailed our lawyer and he stated " That notice also includes 429 bypass and he had a meeting with the higher ups and they said the supervisors and field supervisors have not been notified as of yet and it will be a trickle down effect before they do find out that this is being put on the 5 year plan. What a way to do business, by word of mouth maybe that's what's wrong with the information we receive. We have had a survey crew on our property 3715 Hideaway Rd, Apopka 32712 about 2 months ago looking for artifacts, turtles etc they drilled totally across our 10 acres. The retention pond people was to the Jack Craveys property and drilled a few feet from their house. Yesterday a drill crew was sent to our house to drill just a 50 ft from our back door, the companies name is Nodarse. Oh yes they also drilled Dr Diaz property by his house. Were all so tired of being jerked around and all these rumors. The map shows another move more to the west so rather being in front of our house now it's in the back and may impact Tom & Jane Harper. Please help us understand what's going we feel like were the mouse and expressway authority is the cat. C'Sandra Hall 407-884-7729

 LynnDean <ldean@broadandcassel.com>Sent: Tue Nov 28 13:44:21 2006Subject: Option  
 Agreement for Sale and PurchaseSandra:I am forwarding you a proposed revised revision  
 to the Option Agreementcovering the proposed changes we have discussed. To expedite  
 the reviewand comment to this Agreement, I am forwarding this to you at the sametime I  
 have sent it to the Authority for review, so it is subject toreview, comment and approval  
 by the Authority. Based on our conversations, I have provided that there will be  
 threededs from the Barn, one each each to the District, the Trustees and theAuthority for  
 the Parkway corridor, with a provision for the legaldescription for the ultimate right of way  
 to be determined at a laterdate, instead of a single conveyance with ultimate carve outs of  
 theDistrict and Trustee remainders as we had originally proposed. I haveasked the  
 Authority's engineers, PBS&J, to work on developing legaldescriptions for these three  
 deeds as soon as possible. I haveattached for your review proposed forms of the  
 Warranty Deed into theAuthority and the subsequent Special Warranty Deed from the  
 Authority tothe Trustees as to the Remainder Property after the final Right of WayProperty  
 legal description is determined.Also, per Bill's request, I have applied the Authority general  
 releaselanguage to the Trustees and the District as well. I had not changedyou concept  
 of pro rata allocation of closing costs, although Iunderstand the District thinks DSL is  
 paying the costs. Per my earlierconversations with Eva, I have provided for our firm to  
 handle closingon behalf of the Authority. I understand Nancy had previously provideda  
 title certificate from First American Title Company and we arecurrently comparing the  
 proposed permitted exceptions she submittedagainst our own First American Title  
 Company search of the property.After you have had chance to review the attached, please  
 contact me withyour comments as soon as possible. Perhaps we can set a conference  
 callamong the Buyer parties to discuss and tweak before forwarding to theSeller for review

Regarding  
 "Aug. 28, 2006Ellis Hall3715 Hideaway RoadApopka, FL 32703RE: Response to Public  
 Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Ellis  
 Thank you for submitting a public comment form for the Wekiva Parkway Project  
 Development and Environment (PD&E) Study. We appreciate your time and concerns.  
 Your comments will be reviewed and evaluated along with the nearly 500 other public  
 comment forms received, as well as input from local governments and state agencies.  
 More than 1,200 people attended the recent public workshops. Currently we are  
 evaluating the public comments - many of which represent competing interests - as well  
 as local government and state agency feedback, and continuing the engineering analysis  
 with regard to the viable alignment alternatives. That information will be used to draft a  
 preferred alternative by the end of this year. That draft preferred alternative also must  
 undergo government review and revision before being presented at formal public hearings  
 in February or March 2007.Following the hearings the preferred alternative must be

approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/2/2006	2:04 PM	Attended public workshop on 7/26/06. Submitted comment: "I feel this meeting means nothing. Just dragging us down the river when they already know what's going to happen."
6/19/2006	10:31 AM	PIO responded to her email. "Hello C'Sandra, You are on the project mailing list and will receive the next project newsletter, which is currently in production. I understand there may be some confusion about the current State Road 429-Wekiva Parkway Project Development and Environment (PD&E) Study, which began in January 2005, and the study that was done previously for the now-defunct SR 429 western extension (a separate smaller project). Admittedly, there is some overlap between portions of the corridors for the old and new proposed projects. However, any information discussed "two years ago" would have been regarding the former project, not the current Wekiva Parkway. I can understand your frustrations with regard to timelines, but there are very clear and detailed steps and evaluations that must be done in developing a 25-mile project through a largely environmentally sensitive area. We are currently preparing for the next public workshops, to be held in late July and early August. I encourage you to attend to see the latest information and potential impacts from where we are in the project study. This two-year PD&E study is scheduled to conclude in spring 2007 with an approved alternative. With regard to your property at 3715 Hideaway Rd, it does appear at this time that the red or westernmost alignment alternative (out of the two in this area) would have an impact on the property in question. Again, more information and details will be available at the public workshop. With regard to potential buyers, it would be prudent to inform them that a project study is underway including the area of the property, and that one of the alignment alternatives could, if approved, affect your property. However, there is no approved alignment at this time, and the current alignment alternatives could be shifted or otherwise revised further as part of the continuing study. Also please be advised that we still have to begin preliminary siting for retention ponds. Early information on that will likely also be available at the workshops, which I encourage anyone interested in this project or this area to attend. We also will again be taking public comments via available forms at the workshops. I hope this helps and look forward to providing further information about this project as it becomes available. Please don't hesitate to call or email with other questions or concerns. Mary Brooks
6/17/2006	11:49 AM	Csandra who@wmconnect.com emailed re: "western 429 beltway": "Mrs. Brooks, I would like you be put on the project mailing list if I'm not already there. Mr. & Mrs. Ellis Hall P O Box 165 Plymouth FL 32768 I live at 3715 Hideaway Rd and I'm so tired of this 4 year study keeping us in limbo. 2 weeks ago the Archeologist surveyors was on our property looking for Indian Mounds, Artifacts, Gopher turtles etc, HIRED BY THE EXPRESSWAY AUTH.. A number of us saw their map. I was told 2 years ago that we would be a retention pond by surveyors that was working for Sharon Graham at Select Nurseries. I would like to know if there will be any problems when we put our property up for sale in the next few weeks. Thank you C'Sandra hall 407-884-7729

Date	Time	Regarding
8/8/2006	10:52 AM	Attended public workshop on 7/26/06.

Contact Notes		Jay Hamburg	Orlando Sentinel
Date	Time	Regarding	
7/27/2006	12:42 PM	Jay/Orlando Sentinel responded to PIO workshop recap email: "Thanks, Mary."	
7/27/2006	11:23 AM	PIO emailed attendance numbers to reporters who have been covering the project/meetings Jay Hamburg, Robert Perez, Martin Comas/Sentinel, Dave McDaniel/WESH TV, Apopka Chief, Rock Springs News.	

7/24/2006	8:05 AM	PIO pulled 7-23-06 Orlando Sentinel A-1 article on project by Jay Hamburg. Story largely accurate, balanced and positive, though he refers to pending workshops as "hearings" on page 1 despite PIO's best attempts to distinguish the two. He goes back to referring to them as workshops on the jump. He also didn't emphasize that the project is not fully funded, saying only construction was to start in 2012. he did note completion of the construction will depend on funding.
-----------	---------	--

7/22/2006	3:41 PM	PIO returned call to Jay Hamburg/Orlando Sentinel, who thanked me for calling back on Saturday. I'm sure you had other things to do. PIO confirmed project length and latest cost figure. We went over question about process and public comment. PIO noted public will be able to comment at both the public workshops and public hearings. He said but typically there wouldn't be much change at that point? PIO said local governments, state agencies and environmentalists will weigh in on the alternatives before they get to the public hearings, so should be fairly well weighted compromise by that point. PIO said never say never in terms of something changing even at public hearing. He asked when would the agencies then approve the alternatives, in March or April? PIO said tough to say just a matter of scheduling it to come before the board, etc. He thanked me again for being accessible.--347 p.m.
-----------	---------	---

7/22/2006	3:24 PM	Jay Hamburg/Orlando Sentinel called and left MSG, said sorry to bother you. Just had few things he wanted to double check. 407-420-5673 or c 407-242-8696 and I just wanted to double check the way I phrased something about the public can still present comments to the road groups, and road groups still continuing to work with local governments, but when final alternatives are announced this spring there's typically little room for any change at that point. Just wanted to make sure that summarizes the situation. I know it's a complex process but just wanted to summarize where we are today. Also I know you said at one point the amount had changed to \$1.7 billion? And also just wanted to make sure 25-mile road was the correct figure to use. Let me know. I appreciate. Sorry to bother you on Saturday. Thanks a lot.
-----------	---------	--

7/21/2006	4:00 PM	Jay/Orlando Sentinel called with questions about the maps they were creating and to confirm way they set up graphics for the story, which is supposed to run Sunday (though subject to change). PIO went over detail needed. Jay asked about 414/429 designations, what happens to old piece of 429, which PIO explained. He said story and graphics are going through final edit, so there might be some more questions. Would I be accessible? PIO said yes.
-----------	---------	--

7/21/2006	10:47 AM	Jay Hamburg/Orlando Sentinel called with follow up question, asked about the meeting format. Would there be opportunities for public comment? PIO provided info. He said he heard from folks on Boch road and were there impact issues? PIO went over example of the Wrights and the Neslers, who have larger parcels, potential impacts based on the different alternatives. PIO noted we understand their concerns and we have to balance that against the need to minimize overall impacts. We try to go through the least dense area like this instead of 10 acres with 500 homes. PIO gave example of 417 alternative, even in that heavily developing area I think we're only hitting 14 homes. The guys really did a good job of trying to minimize impacts. He asked again about portions that will be
-----------	----------	--

tolled? And at grade? PIO went over that with him. He asked hasn't this project been in the works for 10 years or so? PIO note EA had looked at 429 NEW extension that would have picked up from where 429 ends now near Vick Road. But new development was going in north of there and City of Apopka had platted a lot of new stuff to come online; there was no support and no funding for that so it went away. But everyone in area realized need was still there, and there was growing concern about all that growth and impact to environmentally sensitive area. He asked wasn't Governor Bush instrumental in getting that looked at? PIO said correct, he appointed fir the Wekiva Basin task force, which did some initial work. But there were complaints task force didn't have broad enough representation, think that was in like 2000. So around 2002 governor appointed WRBCC which had broader representation, picked up where task force left off. It's the coordinating committee's recommendations that were codified in the Wekiva river parkway and protection act. PIO noted it was broad reaching, not just about parkway. PIO noted the final reports from the task force and coordinating committee area on DCA and I think ECFRPC website, he should check those out. He said he hadn't seen them. PIO said I was out o the office otherwise I'd email to him.

7/19/2006	9:43 PM	Jay/Orlando Sentinel called and left MSG I know you've got a meeting at 2 and I was thinking maybe you'd be getting out of that. when you get a chance give me a call, wanted to go over couple things, get a better sense of the general way I-4 connectors could be an and make sure I understood what we know of the timeline. , I know that's kind of ... not terribly far out in the future. I was up there to day and have better understanding of what some of the possibilities are. 407-420-5673
7/18/2006	5:12 PM	PIO returned call to Jay Hamburg/Orlando Sentinel. He said he was trying to get an idea of number of alternatives remaining? PIO noted that's tough because of different combinations possible with various segments, pointed out for example where some alternatives split in Neighborhood Lakes area and number of tie in possibilities, also systems IC's not all shown. There are a number of concepts there with different tie-in possibilities to different alternative segments. He asked to be walked again through the IC's, which I did. Noted the three from the river to the west are local access, so won't be major like 441/46 or I-4. Recapped some issues with each IC. He said thanks, that helps. He may call tomorrow for more info and to find out what happened tonight in Mount Dora --526 p.m.
7/18/2006	4:54 PM	Jay/Orlando Sentinel called and left MSG I was wondering if you had few minutes to look at the two maps simultaneously with me. I still might take you up on offer to sit down with you, for kind of prelim look through if you have a few minutes. The two maps you sent me and then kind of make sure I understood all that was going on on those things. I'm here fairly late if you still have time today. My number is 407-420-5673 I'm here until 7 or later.
7/17/2006	5:42 PM	Jay/Orlando Sentinel called back, asked if viables were on website? We went over map issues and PIO walked him through change to viable that was needed. PIO noted he can use the slide, but it doesn't appear as clear to me, it's up to him. He said he understood the change needed and was compiling a note for the graphics folks. He asked last estimate for cost of work was 1.2 billion? PIO noted \$1.4 billion was latest number I heard. He asked was that jointly funded? PIO noted project being developed jointly, EA and DOT will pay for their respective jurisdictions, EA for OC and DOT for Lake and Seminole. He asked for project length? PIO noted 25 miles mainline, once get ramps and frontage roads, that'll affect length. He said so those are centerline miles. PIO said that's correct. He asked for construction start? PIO noted funding challenges, if were fully funded with final design and row acquisition would be 2009-2010. But since we're not fully funded, I've heard anything from 2010-2015 for construction to start, will depend heavily on funding when this starts. PIO noted now if some federal or other funding becomes available, they could try to fast track that, do some things concurrently. How many years it would it take to finish? PIO said hard to say, will be likely done in phases which again will depend on funding. PIO noted if there's enough money at the start, they could conceivably start the different phases within months of each other, in which case you might be looking at 3-5 years

depending to finish. If there isn't enough money, you might see years between phases, so no telling when it would be done. Between final approval of study and ROW, what was that phase you mentioned? PIO noted final design would follow the study, that's nailing down where things are going. You have to get into final design before can do ROW, need to know which properties are needed. PIO noted they some times will start advance ROW after they're at 30-50% complete design on large parcels that we can't miss no matter what. PIO said if he needs me to sit down with him and go over maps or anything else to help with his story, don't hesitate to ask. He said he appreciated that, and it might especially be helpful if the graphics folks have a question that I can't answer. He said he'd be in touch.--558 p.m.

7/17/2006 5:34 PM

PIO called Jay Hamburg/Orlando Sentinel 407-420-5673 to make sure he got files and understood what needed to be done, reiterated info from email, told him to call me if that's not clear or he needs something else.

7/17/2006 1:45 PM

PIO returned call to Jay Hamburg/Orlando Sentinel, who requested I go over top 3 or 4 issues that still have to be decided for project and out of upcoming meetings. PIO noted IC's are the biggest ones: whether it will be Kelly Park or Ponkan Road in OC. Noted traffic numbers slightly better for Kelly Park. OC and city Apopka have to weigh in on that. In LC it's configuration for 441-46 IC, different looks with flyovers and at-grade. Noted Mount Dora asked us to look at concept to limit inadvertent traffic that would clog up their downtown streets. PIO noted local access, how folks from different side streets going to access parkway is issue throughout the corridor in each county. Also noted two issues in SC: 1) where to connect to I-4, SR 46 or 417. PIO noted SC government has issues with disturbing major commercial enterprises at 46 and I-4. IC note designed for such a parkway connection. Traffic models show tying in a Parkway there would not operate well, in addition to the ROW impacts. Secondly, if we go with 46 IC, how will we tie in? Will elevated parkway go all the way to i-4 or will we drop down from parkway to at grade somewhere between Longwood Markham road and Orange Boulevard? 2) Connection at 417 makes most sense from completion of beltway perspective, and traffic figures show lot of folks from lake and west Seminole trying to get to 417. Drawback is that IC was not built for a tie-in to the west, so will be major reconfiguration and expensive, have heard \$200 million just to build that IC. PIO noted apparently some years back the concept for that IC did include a full IC and 417 continuing west, SC government had done some land use to accommodate that. But something fell through, SC pulled their decision and the IC wound up being what you see today. PIO noted wasn't involved back then so don't know all the details. PIO noted there are environmental considerations that some of the property owners and environmentalists have had concerns about. The challenge we face is addressing these environmental concerns will still creating a transportation facility that meets the growing need in this area, and tries to minimizes impacts to actual homes and businesses. Jay asked what will happen out of these meetings? PIO noted we'll get folks comments; we've started receiving public feedback already, but at the meetings we'll have more detail for people to take in and give feedback on. He said he had a schedule that showed preferred alternative in November, is that when the public hearings will be? PIO said no, that's when the preferred alternatives would be drafted, and then they have to go through the review process with local governments, state agencies, likely some revisions. Then the preferred one or two alternatives will be brought for public hearings in February or March. Jay asked if the map he had was the latest. PIO said can check with CH2M Hill, know they're in a crunch to create exhibits for meetings, think we have like 100 boards to produce. He said even if it's something they can create on their end and you can just describe what they need to include. PIO said I'd check and get back to him. He said he'll probably have some more questions before this weekend. Are you going to be around? PIO said absolutely, whatever he needs.

7/17/2006 11:43 AM

Jay Hamburg/Orlando Sentinel called and left MSG I'm going to put together story this week just as a scene setter and general intro and review of the Wekiva Parkway situation in anticipation of upcoming public hearings. I wanted to make sure I had latest map. One I got was June 28, is that the latest map everyone is working off of it? I wanted to talk about issues left to resolve and some of the issues they hope to shake out resolve during

the public hearings. Who you think would be good folks to talk to about where they stand what they've accomplished so far.407-420-5673

6/28/2006	11:12 AM	PIO emailed Jay/Orlando Sentinel, copied Bryan: "Hello Jay,It was good speaking with you earlier at the Expressway Authority office. As discussed, please find attached the latest alignment alternatives for the Project Development and Environment (PD&E) Study for the Wekiva Parkway.Please let me know if you have questions, or require additional information. Thanks.Mary Brooks
6/28/2006	10:15 AM	After OOCEA Board meeting met with Bryan and Jay Hamburg/Orlando Sentinel. PIO ran down Wekiva Parkway meeting dates and locations. Jay said it's more for their planning purposes now, not sure who would attend the meetings, maybe Kevin Spear. PIO asked about Joe Newman but Jay said he's left paper to pursue family mortgage brokering and poker! Bryan gave Jay copy of approved newsletter proof for Wekiva Parkway. PIO noted that's to be mailed out July 5 or 7. Bryan asked size of mailing? PIO noted run of 30k, but mailing 23,000. Bryan noted that's to property owners and other interested parties, those who've asked for info, etc. PIO said would email Jay the latest Wekiva Parkway concept....
1/27/2006	1:15 PM	Jay Hamburg/Orlando Sentinel 407-540-5000 called, noted he's also taking over Road Dog will be named something else but have similar issues. He said he's doing something on the confusing names and numbers of area roads. He said he'd also spoken to Bryan Douglas about this, and Bryan suggested he contact PIO on project specific info.He asked about road designations for my projects. PIO note MBX is 414, with part of it being both 414/429, and Wekiva Parkway will be 429. He asked if I got any feedback about confusion on the part o the public about what to call my roads? PIO noted not an issue that's been raised, Wekiva Parkway pretty widely used or 429 extension. He asked with all the different designations for the beltway, if it'd been discussed to rename the whole thing once done? PIO noted you've got only 417 on the east side and 429 on the west side, and haven't heard any discussions about renaming the beltway. He asked about the laws designating the roads. PIO noted Wekiva Parkway legislation was unusual, and dealt not only with authorizing the parkway but growth management, water quality and other issues PIO asked if he'd reviewed the information on the website about the project, was he aware of all the task forces and committees that led to this project? He said he has not looked at it. PIO strongly suggested he check that out so he has the background for future stories on the project. We discussed that PIO would be involved in part of the meetings at the EA on Tuesday. He was glad to hear it, wasn't sure who was going to be there. He asked where things were with the Wekiva Parkway? PIO noted taking all the public comments from meetings and government input and whittling down the initial alignment alternatives, eliminating some, tweaking others and adding some new ones for consideration. PIO noted hope to have maps updated in March, with next public meeting in July or thereabouts. He said they'll definitely be interested in the new maps, and keep him posted of other developments.
1/4/2006	5:05 PM	PIO returned call to Jay Hamburg/Orlando Sentinel, left MSG for him to call me back to discuss project or to set up a meeting. PIO noted info on website, maps will be updated probably in February based on the hundreds of comment forms and continuing government input. Left him my number.
1/4/2006	3:03 PM	Jay Hamburg/Orlando Sentinel left MSG it was nice to meet you again down at the EA a couple weeks ago. Scott and I are making our transition this week and we're of course very interested in all of the Wekiva Parkway updates info. Not to say MBX not also on our radar but just reading my bosses I know they're very interested in staying on top of Wekiva Parkway, and whatever's new there. You probably can't overwhelm me with info there. Just wanted to check in with you on what's getting ready to happen. Keep me on your email list or whoever is sending that stuff out. jhamburg@orlandosentinel.com 407-420-5673 just let me know what's going on, and what things I should be looking for. You probably know more than I do all the reasons for my bosses' interest. I'll get up to speed hopefully soon. Talk to you later.

Notes		
Date	Time	Regarding
12/13/2006	4:37 PM	PIO returned call to Paul Hampton 407-383-7828, who said everybody is talking about the deal is done and governor on the 19th going to sign off and you're going to start buying land. PIO said we are still in the PD&E phase, don't have approved alignment so can't start buying land. PIO noted they're probably talking about the neighborhood lakes purchase. As part of WPPA, said we have to buy four conservation parcels to be able to develop this road in the environmentally sensitive area. PIO noted we bought one last year and are just finishing purchase of a second and governor and cabinet supposed to vote on that on the 19th. PIO reiterated that's conservation land, vacant large parcels, not anybody's homes. He said I'm on outside looking in, and I hear all this stuff, and then I hear what you're telling me. PIO noted I'm sure there's a lot of misinformation floating around out there, and thanked him for calling me to get accurate information. He said the tree huggers need to get a life, to force you all to do this.... My understanding was the 19th and shortly thereafter you all were going to start giving out some money. I have control of land at 3002 Yothers road, tax records don't show I own it because I sold it to heritage homes, but in ??April it reverts back to me. I'm trying to see if you have a tentative date for purchasing. PIO noted there is development planned all up and down the corridor, so that presents a challenge. --445 p.m.

12/13/2006	12:27 PM	Paul Hampton MSG I heard something that on the Wekiva Parkway EA north of 441 that you guys are now beginning to purchase land, if true give me call back, or even if it's not true. Can you call me 407-383-7828 trying to see if you have a tentative date for purchasing
------------	----------	---

8/16/2006	8:57 PM	PIO responded to Paul Hampton blbfoliage@msn.com email: "Hello Paul,It was nice speaking with you this evening. As noted, the earliest we would begin acquiring property is probably 2008-2009 since this project is not fully funded. That is subject to change, of
-----------	---------	--

course, based on funding availability. Please stay in touch and involved with the development of this project, and you're welcome to call or email me with questions or concerns or for updates.Mary Brooks

8/16/2006	5:07 PM	PIO returned call to Paul Hampton 407-383-7828 who said I'm in the road area, the guys that bought some of my land said definitely they're going to be taking your house from you. Didn't get a chance to go to the last meeting. 3002 Yothers Road, maybe under my name or Eric Swanson and Todd something with heritage homes. He asked when we would be buying property? He said he saw map on website and it's definitely hitting his house. PIO noted the old map viables from May, we have latest maps from workshops at top of that page now and there are some changes. He said he'd take a look at that. PIO noted we're only in study, don't' have approved alignment. Should have approved alternative spring 2007, have to start final design, maybe at 30% they usually start looking at acquisition. PIO noted project not fully funded, so probably 2-3 years, maybe 2008-9 the earliest that we're ready to do acquisition, but that's subject to change. Eh said that gives him an idea to try to plan his life. He said you say 3 years, but that can pass like yesterday. He said thanks for calling him back.
8/16/2006	11:45 AM	Paul Hampton called and left MSG if you would return my call 407-383-7828 I'm wondering when you might start land acquisition north of 441 for the Wekiva Parkway. Thank you.
3/1/2006	9:38 AM	PIO returned call to Paul Hampton, who noted we'd spoken before about his property at Yothers and Plymouth Sorrento Road being affected by one of the alternatives. He said he has developers who want to buy his property. I can't understand why right behind me Koreans are building greenhouses. PIO noted we don't have an alignment yet, so nothing to stop people from developing their properties. PIO noted the alignments are being tweaked or narrowed down so the next map could be different from what he last saw. Noted we should have updated maps by late March or April.He said there was only one alignment in his area and you can't change in my area. You only have between Plymouth Sorrento Road and Zellwood station to build, so ... he asked if I build a greenhouse or sell to these developers, do you pay for what's built? PIO noted improved property would be more expensive than vacant land. PIO noted overall timeline and funding challenges. He said so it could be 5-8 years before you start buying properties? PIO said correct, it could be that long before necessary funding is available. He said don't get him wrong; he knows the project is needed. He said he believes it should have been done years ago. He complained there are too many studies being done, no need, waste of money, just people trying to get rich off the taxpayers. PIO noted any sort of improvement of this nature has required stages that it must go through including and starting with PD&E study. He complained there have been too many committees involved; they're just a bunch of politicians trying to line their pockets. PIO noted citizens, environmentalists, large landholders and developers also were on the committees. PIO noted committees were needed because of all the competing interests in such an environmentally sensitive area, and we needed to reach a consensus of how the project should be developed.He asked if they buy his property, will they pay him for the lost revenue for 2-3 years? PIO noted he'd need to talk to ROW folks about any sort of compensation; I don't deal with that aspect of it but can give him the contact info for that? He declined, said he got what he needed and thanks.
2/28/2006	4:37 PM	Paul Hampton 407-886-8552 left MSG re: 429 north to 441, the Wekiva Parkway I guess. Please call me.

Thomas & Jane Harper  
Regarding  
Attended public workshop on 7/26/06. Address: P.O. Box 162, Plymouth, FL.

6/15/2006 2:40 PM  
Jane Harper responded to PIO email: "Mary,I appreciate the quick reply. Actually I had already viewed the map that you attached. I also had gone to the correct place on the website but had not allowed it enough time to download the information provided under the May 30, 2006 heading.I have now read all that is available and nothing is any newer than what we saw when the "soil samplers" visited near us several weeks ago.I am on the project mailing list.Thanks,Jane"

6/15/2006 1:55 PM  
PIO responded to Jane Harper: "Hello Jane,It appears you received some misinformation. We posted the State Road 429-Wekiva Parkway viable alignment alternatives, not the "final alignment," on the Expressway Authority website in mid-May. I've attached a copy of that file here. The file, along with other project info, has been available on the OOCEA website at [www.expresswayauthority.com](http://www.expresswayauthority.com) or [www.oocae.com](http://www.oocae.com). On the entry page click the button on the left for "Corporate Site." On the home page, under the heading "Construction Updates" click the highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the project files and other information.If you still have trouble accessing the information on the site, call me and I'll be happy to walk you through it.We're also working on the project newsletter, which should go out first week of July and will have info on the upcoming public workshops. If you're not on the project mailing list, please forward your address so we can make sure you get the info.Please feel free to call or email with other questions or concerns.Mary Brooks"

"Aug. 28, 2006Marvin HarrellP.O. Box 607774Orlando, FL 32839RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Marvin Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis

with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/16/2006	11:45 AM	<p>PIO drafted comment form response and sent: "Aug. 16, 2006 Marvin Harrell P.O. Date	Time	Regarding	
11/6/2006	8:36 AM	<p>PIO called Kathy Harris/Remax regional headquarters 407-829-7303 x119 he was going to send me a package, received a letter from attorney saying land may be impacted. Just purchased property next to the aforementioned land couple months ago. We were wondering what the effect was going to be from the 46-I-4 ICMailing: 605 Crescent Executive Court, Ste. 332, Lake Mary FL 32746, land still under old address, we moved a couple months ago. kathyharris@remax.netProperty in question, four lots, 20-19-30-5FL-0C00-0090, 20-19-30-5FL. 00C00-0100, others start the same with last 4 digits 0110 and 0120. One of them has an address, 680 Hickman Circle.She said Jim said there were 3 proposals We want to make sure we're on the mailing list. We weren't aware there were meetings being held. We just bought the lots next door in the last 3 months. Have owned the four lots for probably 3 years. PIO noted we probably didn't have the detailed IC concepts with ramps that would affect them until spring or early summer, probably weren't sure we would hit them beforehand, that's why perhaps they weren't on the mailing list.PIO gave her my cell and email address, said I'd see what the latest was on those IC's and get some info to her when available. PIO noted the maps from the workshop are on the EA website, but those are obviously being updated as we meet with community stakeholders and tweak the alternatives to try to address their concerns. She said she did go on the website but didn't see anything affecting their property.</p>	

11/1/2006	10:49 AM	<p>Jim Clark/FDOT ROW 386-943-5099 called and said he spoke to a citizen who has property on north side of SR 46 east of I-4 and the two 46 IC alternatives would affect them. Looks like would be hit by ramps to get EB on I-4 with the new stuff, alternative loop for the access road? He said Kathy Harris with Remax 407-829-7303 said they never received anything about the project or meetings. He said it looks like the westernmost part of their property would be hit. PIO noted they probably weren't being affected by earlier concepts, that's why they weren't on the mailing list (especially since they're east of I-4 and the study area initially only went to the west side of I-4. PIO said I would contact them and make sure they're provided the information needed.</p>

Subject: Wekiva Parkway

Ms. Brooks,  
I am trying to get an idea of the current status of the Wekiva Parkway project. From a review of the website, I noted:  
"Information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007."  
I realize that the current schedule anticipates the PD&E study with an approved alternative in late spring of 2007.  
However, at this stage of the project, there is usually a favored alignment of all the alternatives. Would you please let me know what the talk is as to this favored alignment?  
I thank you in advance for your assistance.  
Susie Harris

Cliff Harrison ENHYDRO

Date Time  
9/18/2006 1:52 PM

Regarding  
PIO returned call to Cliff Harrison 813-293-0740 trying to get info about timing, my uncle is 79 and has lived in Apopka for 30 years or more. We looked at map and it looks like the Ponkan IC is right on top of his house. We're trying to find out for family planning issues, what kind of timeframe are we talking about him having to maybe relocate? PIO noted we still have to pick IC location, went over timeframe for recommendations for preferred alternative and public hearings. PIO noted project not fully funded, so best-case scenario if funding were available would be 2012-2015 for construction to start, with ROW acquisition shortly before that. He said that's helpful. He asked if it is possible to get on mailing list to be notified of meetings? He said his uncle's spry but he's not going to be able to go to meetings and such. Cliff said he's an environmental consultant, familiar with the process and worked on hydrology portion of PD&E for Suncoast Parkway. PIO said yes and got his info, send mail to his company ENHYDRO, 334 East Lake Road, #173, Palm Harbor FL 34685, enhydro@knology.net He said their property in question is 3207 W. Ponkan Road, it's the lot of just east of the lot with the nursery sheds that you can clearly see on the aerial overlay you have on the website. He was thankful for the info and call back.--203 p.m.

Regarding  
PIO responded to George Harrison: "Good morning, George, More than 1,200 people attended the recent Wekiva Parkway public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. This means some alternatives are being shifted or refined, while new ones also are being added for evaluation. Preliminary right of way and impact assessments and analyses also are underway. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring

2007. As this project is not fully funded, the remaining schedule for the project is tentative at best. Best-case scenario, if funding were to fall into place soon, would be to start construction on the first section 2012-2015. Again, that schedule is highly subject to change based on the availability of funding. I hope that helps. Please feel free to call or email with other questions or concerns. Mary Brooks

9/25/2006 1:33 AM George Harrison emailed: "Mary Brooks Could you please send me information regarding the projected schedule for the Wekiva extension? Thank you George

8/18/2006 9:14 AM  
Attended public workshop on 7/26/06 and sbmitted comment: " Last year my property was on the direct path of the expressway - now it moved east catching the side and back of my property. Unfortunately not east enough - My house is only a few yards from that side of my property line. I know you have alot of requests and they all want to be satisfied My problem is my house is 83 years old, been in my family for 35 of those years. All I ask is for the expressway to go east further so as not to take the house or damage it with construction being so close. Your consideration is greatly appreciated. Best Regatds, Mary Harvey."

8/12/2006	9:29 AM	Mary Harvey called and left MSG I'm trying to send this comment form in and you don't have the zip code finished on the parkway study form. It says "328" and that's if you could call me I'd appreciate it. 407-889-3430. Thank you.
8/9/2006	9:25 AM	Attended public workshop on 7/26/06.
8/1/2006	11:45 AM	PIO returned call to Mary Harvey 407-889-3430, left MSG repeating zip code 32817 several times and apologized that there was a printing glitch on the forms and wasn't caught before copied for the meeting.

Notes

Date	Time	Regarding
------	------	-----------

2/22/2006	6:15 PM	PIO went to Lake Sylvan Cove HOA meeting at SC Soccer Complex and set up. About 20 residents and board members in attendance. PIO went over project particulars, joint study status of viables and maps being updated, schedule for next public workshops and hearing, conservation parcels sought, latest SC alternatives requested, overall schedule, S R. 46 concepts if decide to tie in to I-4. Questions from residents included: When will it start? When will the study be complete? What happens after that? Is it still proposed or a done deal? What's the impact to Lake Sylvan Cove? (They are outside the study area so only impact is how they would access parkway). What about noise, don't you have to do sound walls? PIO noted noise study was part of the PD&E study. What about the bear crossings? PIO noted road to be mostly elevated to address wildlife crossings, so no more direct conflicts with bears and traffic. Camp asked if schedule was on website? PIO noted PD&E schedule is, but not overall since that's highly speculative, particularly given the funding challenges. What happens after the study? PIO went over subsequent project development phases, reiterated funding challenge will affect schedule. How wide will it be? How many lanes? PIO noted it's being looked at now for four and six lanes, hasn't been decided yet. PIO distributed business cards with web address and noted all maps on the website and should be updated by late March or April. Board members thanked PIO for presentation and said would like an update presentation in a few months. PIO said no problem, just let me know when.--815 p.m.
-----------	---------	--

2/17/2006	3:40 PM	PIO responded to Camp/Lake Sylvan Cove HOA: "Hello Camp, As discussed on the phone, I can make the meeting and look forward to it. See you Wed. at 7 p.m.
-----------	---------	---

2/17/2006	11:57 AM	PIO returned call to Camp, said I could do presentation Wed. evening. He asked if I knew where the place was? I noted yes, did presentation last night for Glades of Sylvan Lake Reserve. He noted their subdivision is just north of the park. PIO asked if he wanted info on both projects? He said Just Wekiva parkway, what's happening with 46. Also lot of people may not be familiar with the website... PIO noted I'd bring cards with web address. He said it's kind of hard to find the project info. PIO said would give text links. PIO confirmed this best number to reach him if something comes up? He said yes, he's retired and that's his home number and he has voicemail. PIO checked web pages for incorrect email address but couldn't find it (he said he cut and paste from website and address left out rr). PIO asked if he finds that page again to let me know so we can get it corrected. He said he would, and just sent email to correct address so I should have his email
-----------	----------	--

address also.--1205 p.m.

2/17/2006 11:42 AM Camp Hawkins of Lake Sylvan Cove HOA left MSG that he sent an email Tuesday inviting you to our annual HOA to be held Feb. 22 to speak to homeowners as to progress of 414 and Wekiva Parkway. Got email back said it was undeliverable and wanted to send it again to invite you to our meeting. Will be held at Lake sylvan recreational park on Lake Markham road, wed. 22 at 7 p.m. if you can attend let me know ASAP. Trying to get agenda done.H 407-323-4037 Again, that's Camp Hawkins of the Lake Sylvan Cove HOA.

2/17/2006 10:57 AM Camp Hawkins emailed: "Ms. Brooks,I attempted to sent this to you earlier this week, and just now received a failure notice that the e-mail was not delivered, due to a host problem I am attempting this again, as I noticed the e-mail address that is shown for you on the Expressway website does not include all of the syntax address (missing the ".rr" after @CFL). Hopefully this one will make it.Please let me know if you will be able to attend Thank you,Camp-- On Mon 02/13, Camp Hawkins <\_hawkinscl@excite.com > wroteFrom Camp Hawkins [mailto:\_hawkinscl@excite.com]To: MBrooksSR414@CFL.comCc: drobinson@sentrymgt.com, SPEEDYCFG@aol.com, zgrif@cfl.rr.com, jmlloisel@earthlink.net, lmpropst@cfl.rr.comDate: Mon, 13 Feb 2006 22:40:54 -0500Subject: Wekiva Project PresentationMs. Brooks,As president, and on behalf of the Lake Sylvan Cove Home Owners Association, I would like to invite you to attend our annual Home Owners meeting to provide an update presentation on the Wekiva beltway project, as it pertains to the eastern section, nearing I-4. Our community is located approximately 2 miles west of I-4 and approximately 1 mile south on Lake Markham road, right next to the Lake Sylvan Recreational Center and Park. The meeting is to be held on Wednesday, February 22, at 7 00 p.m., at the Lake Sylvan recreational center. Our Board of Directors have been receiving questions and conflicting information as to the location of the beltway, and the interchange location, and we feel that having you at our annual meeting will clear up any misconceptions and/or confusion. In advance, we appreciate you taking the time to speak to our residents. Please let us know if you will be able to attend and how much time you will need for your presentation, and we will add it to our agenda.I can be reached by the e-mail shown above, or if you prefer, you can contact me at 407-323-4037.Thank you again,Campion Hawkins,President, Lake Sylvan CoveHome Owners Associatione/m:\_hawkinscl@excite.comphone: 407-323-4037

8/25/2006	9:45 AM	Annemarie/Rep. Hayes' Office called and said they received a letter from Thomas Montaldo, 32532 Hawks Lake Lane. She said they sent a letter to LC Comm. Catherine Hanson and copied us, "...asking you to fight to prevent the building of any 46A bypass." They moved there 7 months ago, said they didn't know about it. They said the Bypass threatens what they fell in love with, and that kind of thing. She asked if I was aware of this issue? PIO said yes, we've been in touch frequently with Heathrow Land Co. officials, who are building the new subdivision, and also met with them and about 50 residents there a week ago Tuesday. PIO noted we plan to go back and meet with them again after looking at what sort of adjustments could be made to 46a. she asked if this was a done deal? PIO noted CR 46A realignment part of WPPA legislation, so it's mandated to happen

to try to protect that wildlife corridor, but exactly where that will fall has yet to be determined. She said she'll let them know they can contact PIO if they have any questions  
PIO asked if I needed to email her any info? She said no, since the letter wasn't to them but was just a copy.--953 a.m.

7/25/2006

10:35 AM

Continued working Briggs response and sent, copied Anne Marie and Rep. Hays: "Good morning, James, Your query to State Rep. Hays was forwarded to the team actually conducting the State Road 429 - Wekiva Parkway Project Development and Environment PD&E Study. The purpose of this study is to arrive at an alignment alternative that meets the transportation needs of this fast-growing area, while trying to reach a reasonable compromise between competing interests and minimizing impacts to residences, businesses, the environment and the rest of the community. We appreciate your concerns, and would like to address some of your questions and issues. There is no finalized route yet for this project. There are two locations remaining with respect to connecting the Wekiva Parkway to Interstate 4: an alignment alternative along SR 46 and an alternative that would connect at SR 417. We will have concepts and other information regarding both of these alternatives at the public workshop tonight at the Sanford Civic Center. While both are still under consideration, there are significant issues with trying to connect an elevated expressway to I-4 in the area of SR 46. The interchange would have to be quite complex, would have significant commercial impacts and traffic models show the traffic flow efficiency would be questionable at best. Seminole County Commissioners also have said they will not support an elevated parkway connection to I-4 at SR 46 due to the impacts. In addition to connecting a full parkway to I-4 at 46, there is also an alternative that would drop the parkway down at some point along SR 46 to a widened, at-grade arterial that would then connect to I-4 similar to the way SR 46 ties in now. Future traffic models show significant gridlock and safety issues with that alternative. Following the public workshops, and based on the continuing input from the public as well as local governments, state agencies and environmentalists, the PD&E Study team will work to draft a preferred alignment alternative. That will again go through the government and agency review process for revisions, and a refined preferred alternative will be brought forward for public hearings in February or March 2007. From there, the Expressway Authority, FDOT and relevant agencies will have to vote on or authorize the preferred alignment alternative. As we do not have an approved alignment, no one has been contacted about purchasing their individual property. Right of way acquisition would not begin until after we have begun the next project development phase, which will be final design. Once we begin to nail down specifics during final design, advance right of way acquisition could begin if funding is available. As you're probably aware, this project is not yet fully funded, so that will affect the schedule of subsequent phases. With regard to direct impacts, as noted in the map thumbnail shown here, the Wekiva Parkway alternative in question would hit only the parcel on the northeast corner of the subdivision. The Expressway Authority and FDOT are well aware that access to affected communities must be maintained, and have, at this point in the study, begun to look at ways to accomplish that. Maintaining local access is an issue that we are very familiar with and are trying to address throughout this 25-mile corridor. Any eventual impacts to property specifics, such as gates and walls, would be addressed during the right of way acquisition process. Likewise, any affected property owner would be contacted during the right of way acquisition phase about impacts and procedures. Regarding drainage concerns, the development of any road requires accompanying drainage systems capable of capturing runoff from major storms. We have begun preliminary retention pond siting relating to the remaining alternatives. That information will be available for review at the public workshops beginning tonight. Regarding access to the nearby school, again, part of the intent of this study is to devise ways to maintain local access. With few exceptions, most side streets will be bridged as part of this project. We look forward to your attendance at tonight's meeting. Please do introduce yourself to me and I'll be happy to discuss these issues further. I have also spoken recently to your HOA president Jean Ciullo about potentially doing a follow up presentation at one of your community meetings following the workshops to answer remaining questions. Please also take advantage of the public comment forms that will be available at tonight's meetings to record your comments once you've been able to review the latest information. Thank you, and please keep my contact

information handy so that you can contact me directly with questions and concerns in the future. Mary Brooks--1113 a.m.

7/25/2006	10:04 AM	<p>PIO received forwarded email by Anne Marie Norman/Rep. Hays office from JC Briggs: "thank youAM-----Original Message-----From: Norman, Anne-Marie On Behalf Of Hays, AlanSent: Tuesday, July 25, 2006 10:03 AMTo: Norman, Anne-MarieSubject: FW: From 'Write Your Representative' Website-----Original Message-----From: jcrbriggs@yahoo.com [mailto:jcrbriggs@yahoo.com]Sent: Tuesday, July 25, 2006 7:18 AMTo: Hays, AlanCc: jcrbriggs@yahoo.comSubject: From 'Write Your Representative' WebsiteJames Briggs213 Capri Cove PlSanford,FL 32771-8394(407)688-988307/25/06 7:18 AMTo the Honorable D. Alan Hays;The Honorable D. Alan Hays,Our neighborhood is being destroyed by the seemingly finalized route of the Wekiva Parkway.We have not been contacted in any way about being bought out, so we are being left to live in the destroyed neighborhood by this plan.Can you help?This is how the planned route is destroying our neighborhood.. Our neighborhood will be without any path of access. There willbe no way in or out of our neighborhood.. Our front wall and gate will be destroyed.. One homeowner's yard is partially taken.. Water drainage from the new highway has no where to go but intoour yards. The plan is to elevate the highway beginning right behind our neighborhood with no buffer for water retention.. Our children will be without any walking path, safe orotherwise, to the local elementary school that is less than a mile away.There is an alternative that was dismissed out of hand.The planned route goes tens of miles down SR 46 and with only a mile to go to get to I4, it turns deliberately towards our neighborhood rather than continue the remaining mile down an already existing commercial zoned highway.This alternative would destroy no one's neighborhood and would benefit from an already existing highway with already existing interchanges to I4.Our neighborhood needs your help. We would like the route of the highway to follow the alternative path to I4 Please email back or call me at 407-688-9883. I look forward to hearing from you.James Briggs</p>
7/25/2006	10:03 AM	<p>PIO researched parcel query. 213 is 4th parcel from entrance on east side of Capri cove Place. No direct impact to 213 or entrance. Only property with potential direct impact is first house on east side of entrance. Need to check further if potential pond locations in this area.</p>
7/25/2006	9:58 AM	<p>PIO responded to Anne Marie/Rep. Hayes' office: "Yes, Anne Marie. Please forward me their email and I'll copy you on the response info. Thanks.Mary Brooks</p>
7/25/2006	9:41 AM	<p>__From: Norman, Anne-Marie [mailto:Anne-Marie.Norman@myfloridahouse.gov] Sent: Tuesday, July 25, 2006 9:41 AMTo: Mary BrooksSubject: Good morningwe have had another e-mail regarding a family living in Sanford at 213 Capri Cove Pl./ Sanfordthe complaint is about the Wekiva Pkwy. going through their yardthe name is James Briggs.Can you shed any light as to where they live in relation to the proposed route. I will be happy to forward you their e-mail... it came to Representative Hays directly--thank youAMAnne-Marie K. NormanRepresentative D. Alan HaysDistrict 25352-742-6441fax 352-742-6443</p>

7/17/2006	1:30 PM	<p>PIO returned call to Ann Marie/Rep. Hayes office 352-742-6441, Jennifer said Anne Marie's on the phone. Congressman Feeney told them since it's not a federal matter, he gave it back to the state. PIO asked her to fax a copy. Just spoke with Mrs. Nesler and she said they're in She said they said they're planning to contact an attorney, and she suggested they contact Constantine and Rep. Brummer. She said the Nesler's are not in our area; we do not have Apopka. I don't know how from what they sent me, don't know how credible it is. PIO noted we are very aware of the Neslers, and yes they have some environmental features on their property, though some of their contentions give us pause. PIO noted we are looking at some viable alternatives that would affect their property, and some that</p>

wouldn't and we haven't decided that yet. She said she just heard about this in May. PIO noted from database we have contacts with them dating back to November 2004, so they've been aware of this project for quite some time. PIO noted the latest map with the remaining alignment alternatives were posted in may, and that's probably what they're reacting to. PIO noted we have supplied them with extensive info, everything they have asked for and then some, and in fact they attended the PAG meeting on July 7. PIO said I'd be happy to forward her the database info on this couple if that would help? She said she would appreciate it and she's going to fax the Feeney letter. Anne-marie norman@myfloridahouse.gov

7/17/2006 12:59 PM Ann Marie / Rep. Hayes 352-742-6441 we had a letter forwarded to us by Congressman Feeney's office, letter from Mr. and Mrs. John J. Nesler regarding bypass corridor in OC on SR 46, parcel 06202800000024049. This concerns p-s road in Apopka, 66 acres plus, regarding extension of expressway to go through there. They're evidently very upset because they haven't heard about this before. They thought they were I a preservation zone. Please give me a call I would appreciate it.

8/20/2006 3:17 PM PIO responded to comment form: "Aug. 20, 2006Roberta Hemphill7231 Lake Dr.Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Roberta,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007 Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the

Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

7/31/2006	10:32 AM	Attended public workshop on 7/25/2006. Submitted comment form: "We would prefer the widening of Hwy 46 to the north. If you widen to the south there are too many homeowners that would be affected. (Retention Pond A) to the north.

7/31/2006	1:18 PM	<p>Attended public workshop on 7/25/06. Katherine submitted comment: "I am a resident of Capri Cove. This route (to 417 off of 46) will cause significant damage to our neighborhood in terms of the following: 1) Noise - the route comes right up to our properties, yet DOT informed us that because we are only a neighborhood of 18 houses, we are not going to have a noise abatement wall. @) Safety - 26 children live in this neighborhood and walk to Wilson School. No provision has been made for a safe route, nor are there any provisions to reduce vulnerability from homeless/etc. 3) Drainage - This land is already prone to rising water table, yet this new plan includes felling of trees and creation of a retention pond immediately adjacent to neighborhood houses. When we have a hurricane and usual heavy rains it is likely if not certain the entire neighborhood will flood. 4) Access - no provision is made for access out of our neighborhood - there is one way in and out. 5) Light disturbance. This roadway will be lit - causing 24 hr noise &amp; light problems. This proposal will blight the entire neighborhood. With noise, pollution, safety issues and flooding - yet The Expressway Authority has moved the route just so far as to protect businesses and new development parcels with no monetary or other compensation for homeowners who will be impacted. We would rather you condemn the entire neighborhood than subject us to this "preferred route"."</p>
7/7/2006	3:40 PM	<p>PIO returned call to Blaine and said I'd been in meetings all day but I was heading back to office and could email the file when I got there. He said no problem, since he called he has been able to download the file, thanks anyway. PIO asked if there were any other questions? He said he'd seen a map with an alternative going down or parallel to International Parkway, what happened with that? PIO noted SC had asked us to review that alternative, which we did but there were issues involving turning radii, ROW, etc. PIO noted study team recommended against alternative at the May SCEA meeting due to issues and board agreed not to move that alternative forward. He said on whose authority was that eliminated? PIO noted the SCEA, which is made up of most of the county commissioners, voted to accept the recommendation and they have to approve any</p>

alignment in SC. He asked where he could get the minutes from that meeting? PIO noted SC usually posted those things on the county website. He said so you're just going to do what you want to do and not listen to anyone else? PIO reiterated there were issues with the alternative, which should be reflected in the minutes. PIO asked if he'd gotten the newsletter wit the info on upcoming public workshops? He said they planned to go to watch us do our dog and pony show. You're just going to do whatever you want and not listen to anyone else. No matter what. So thanks (he hung up.)

7/7/2006	2:51 PM	Blaine Henry called and left MSG that he had been trying to download document on website re: Wekiva Parkway presentation may 30 and can't seem to do that. if you can you email to him at henrybf@aol.com. If you can do that I'd really appreciate it. My phone number is 407-928-7767.

9/28/2006	6:06 PM	Tyler Herbert/Colliers Arnold responded to PIO email: "Mary, Thank you so much for the information, and going to such lengths to help explain the process to me. I really appreciate all you have done. I may contact you with more inquiries in the future. Thanks again!Tyler Herbert Retail & Land Associate
9/28/2006	5:51 PM	PIO responded to Tyler Herbert: "Tyler,I wanted to get back to you regarding your query about potential impacts from the Wekiva Parkway to Summer Lakes Grace Groves. I see these parcels are two parcels east of Round Lake Road, southeast of Coronado Somerset Drive and the southern border of properties sits on the Lake-Orange county line.As you will note on the public workshop files posted on the OOCEA website (www.ooccea.com or www.expresswayauthority.com), on the Orange County-Lake County Systems Interchange Alternative 1, the Lake County West Alternative 1 and adjoining ponds cut diagonally through the heart of these properties. The Lake County West Alternative 2 and ponds cut diagonally only through the northeast corner of the overall land mass (see below). The potential impacts are similar (with Lake County West Alternative 2 having much less

impact) for the Systems Interchange Alternatives 2-4. Please be advised that based on the more than 540 public comment forms and government feedback we've received, these alternatives are being adjusted and refined, and even some new ones added. We expect to have the next maps ready of the draft preferred alignment alternative (including recommendations on interchange locations) in December or January. As we discussed on the phone, that draft preferred alternative will have to undergo local government and state agency review and revisions before being brought forward for formal public hearings in March 2007. This PD&E study is scheduled to finish with an approved alignment in late spring 2007. As far as the overall timeframe, given that this project is not fully funded, the best-case scenario for construction to start on the first section would be 2012-2015. That would put right of way acquisition 2-3 years before that. As we discussed, the last project cost estimate was \$1.6 billion and that is expected to go up. The schedule for this project will depend heavily on the availability of funding, and is highly subject to change. Please let me know if you continued to have trouble opening the project maps from the website. Please call or email with other questions or concerns. Mary Brooks

9/26/2006	7:28 PM	Tyler Herbert/Colliers Arnold emailed: "Mary- Please see attached PDF files. One shows the tax roles for all the parcels that comprise the property we represent, and the other is an aerial showing the property. Thank you so much for all your help, Mary, I really appreciate it. (on the close up aerial, the property consists of BOTH of the parcels outlined in Red, combined) Tyler Herbert Retail & Land Associate 622 East Washington Street Suite 300 Orlando, FL 32801 (p) 407-843-1723 (f) 407-362-6170 www.colliers.com theherbert@colliersarnold.com
9/26/2006	4:40 PM	Tyler Herbert called back, said he represents a piece of land for sale. The owners are trying to find out what's going on with Wekiva Parkway as it may run through property. He asked about the timeline when it would take place, current maps of projections of where it's going to lay and funding? PIO walked him through getting files on website. In response to his questions, PIO went over PD&E & overall timeframe (best case construction start first section 2012-2015, row acquisition 2-3 years before that), also noted funding challenges, last project cost estimate \$1.6 billion and that is expected to go up. He asked how do they fund the projects? PIO OOCEA does bond issue that is repaid with tolls. FDOT has funding programmed from Tally and federal gas tax. PIO noted EA developing OC portion and DOT doing Lake and Seminole. He asked how much of that do we have already? PIO noted about \$100 million between the two agencies, enough for EA to start final design and DOT has some ROW money, probably will be moved around. PIO reiterated couple times that those timeframes are best case, and if funding not forthcoming it could take longer to get first sections started. He asked how long is the bond issued for? PIO noted not sure, don't usually get asked that. he said he was just curious, not important. He said he was having trouble opening the maps. PIO said I can research the property location and impact for him and send him the appropriate map. He said the property is south of 46 and round lake road. PIO asked for address? he said it doesn't have an address. PIO requested property ID? He said there are actually several parcels. He has a PDF showing them all that he will send. PIO noted he seemed to be on a deadline and I have other property queries to do, what's his timeframe? He said tomorrow would be great but could work if he got the info Thursday. PIO noted that should work, even with the meetings I have over next couple of days. He got my email address and said would send the numbers, thanks for the info.--456 p.m.
9/26/2006	4:29 PM	PIO returned call to Tyler Herbert/Colliers Arnold 407-843-1723, left MSG returning his call noted I was going into meeting when he called just before 2, think he called again but didn't get a MSG. noted I'm back in the office and hopefully we can connect. Left my number.
9/26/2006	1:51 PM	Tyler Herbert/Colliers Arnold called and left MSG I had some questions for you on the Wekiva Parkway extension. Please call me back as soon as you get a chance at the office 407-843-1723. thank you.
9/20/2006	2:06 PM	PIO returned call to Tyler Herbert/Colliers Arnold commercial real estate 407-843-1723, was told he's on another line. PIO left MSG to call or email, left my number and email address.

9/20/2006 11:12 AM Tyler Herbert/Colliers Arnold commercial real estate in Orlando called and left MSG I have a few questions for you on Wekiva Parkway. If you could call me back when you get a chance I'd appreciate it. 407-843-1723 thanks.

Contact Notes

Attended public workshop on 7/25/06 Comment submitted: " 1) I am concerned with adding a maor on/off ramp at international parkway and the new hwy. The sound and congestion problems and the aesthetics presents issues with tall trees . Why can't you eliminate this interchange. 2) Sound walls @ W/P and border to tall trees will be required. 3) Wilson Road at the end of the bridge would need to be improved to allow for better pedestrian traffic to and from Wilson Elementary School. 4) International Parkway can not handle the traffic that the new on/off ramps would cause. The neccessary intersections have traffic lights, congestion is already a problem at 46A and 46, there have been several accidents at International Parkway. 5) WE need you to look at an alternative to the work plan International Parkway Interchange . This would be a negative impact to the tall trees neighborhood as well as Billantre Condos and Wilson Place."

7/31/2006 11:47 AM Attended public workshop on 7/25/06. Submitted comment: "As a Tall Tree subdivision resident - I have many concerns about the 417 beltway and its on-ramps as printed. The on/off ramp is very close to the back of the subdivision - noisy acceleration of cars/trucks. How is it going to look - my house will be facing the highway - there should be some trees and natural landscape put around the areas with noise barriers - also the interchange at International Drive is not capable of handling the traffic! Having children going to Wilson Elementary and walking to school down Wilson Road - having a higway above or around will not be safe anymore! I know growth is not going to stop but our great neighborhood will suffer from this road not just the noise, but the value will also be affected."

Regarding  
Attended public workshop on 7/25/06 Comment submitted: " 1) I am concerned with adding a maor on/off ramp at international parkway and the new hwy. The sound and congestion problems and the aesthetics presents issues with tall trees . Why can't you eliminate this interchange. 2) Sound walls @ W/P and border to tall trees will be required. 3) Wilson Road at the end of the bridge would need to be improved to allow for better pedestrian traffic to and from Wilson Elementary School. 4) International Parkway can not handle the traffic that the new on/off ramps would cause. The neccessary intersections have traffic lights, congestion is already a problem at 46A and 46, there have been several accidents at International Parkway. 5) WE need you to look at an alternative to the work plan International Parkway Interchange . This would be a negative impact to the tall trees neighborhood as well as Billantre Condos and Wilson Place."

8/21/2006 10:20 AM "Aug. 21, 2006Paul Hertko408 Still Forest TerraceSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Paul,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns, and plan to meet with your HOA board Tuesday, Aug. 22 to further discuss these issues. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is

expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

9/13/2006	2:00 PM	PIO asked about Joel Himmel/Tall Trees HOA emailed letter to Congressman Mica and other elected officials, etc., and request for approach on response. Mark said Mike Snyder also was copied and he got with Mica's office. Ch2M Hill is preparing info for congressman to include in a response.
8/31/2006	2:07 PM	PIO left MSG for Mark/CH2m following up this morning's email about Tall Trees resident who wrote to Congressman Mica, asking for direction on how to respond. Noted I'd alerted Bryan Douglas to it since he likes to know about those types of things. PIO noted I was going to a meeting with Bryan and was hoping to have something for him to follow up on that.
8/31/2006	8:30 AM	PIO forwarded Joel Himmel/Tall Trees resident email and letter to Congressman Mica to Mark, Dave, Melaina and Gary: "FYI,Note the letter sent from a Tall Trees resident to Congressman Mica. Should we respond and copy the congressman? Perhaps we want to schedule another meeting showing the latest alternatives to Tall Trees sooner rather than later? Your thoughts and direction, please.Mary Brooks"

Joel Himmel/Tall Trees HOA copied PIO, county commissioners and the media on email to Congressman Mica: "Dear Congressman Mica, Thank you for your letter updating me on the Central FL projects that you are involved in and for asking about my opinion on pending projects. In the attached letter are my comments about the Wekiva Parkway Project for your review. I am mailing a version in hard copy to your office, Senator Bill Nelson, Senator Mel Martinez, and the Seminole County Commissioners. Joel Himmel372 Still Forest TerraceSanford, FL 32771(407) 862-2322 Day(407) 324-1519 Evening"Joel HimmelAugust 31, 2006Congress of the United StatesHouse of RepresentativesWashington DC 20515-0907Dear Congresssman Mica,Thank you for your letter updating me on the Central Florida projects that you are involved in and for asking about my opinion on pending projects. There is a pending project that my neighbors and I are very passionate about that will impact our lives greatly. Because I feel so strongly about this, I am going to copy other parties with this letter in hope that we can make a difference.The issue is the Viable Alternatives for the Wekiva Parkway, in particular the ones for Seminole County. I attended the public workshops in Sanford, 7/25/2006, and Mt.Dora, 8/1/2006. At both workshops, the engineers showed 2 proposed interchanges to link the parkway to 417. One is to connect at I-4 & 46 and the other is to veer off of 46 and go through residential areas and connect with 417. In a Project Information handout it states, "The purpose of the Wekiva Parkway Project Development & Environment (PD&E) Study is to select the most appropriate alternative for the roadway to serve the community's needs while minimizing potential impacts to the environment, surrounding homes and businesses." After attending the workshops, I believe that statement is nothing but meaningless rhetoric. The engineers were selling the "preferred route" which was the 417 interchange and were dismissing the I-4 interchange. It was supposed to be an opportunity to give our views on the alternatives. But instead of listening, they were selling their "preferred route"

I came away with the impression that it was a done deal. That it was being crammed down our throats and the residents were just collateral damage. I am not alone in that view. Robert Perez of the Orlando Sentinel (rperez@orlandosentinel.com) wrote an article about the Sanford workshop titled "PARKWAY ALIGNMENT IS DONE DEAL, CROWD FEARS" that echoes my concern. In the article he quotes a resident Blaine Henry as saying "Public involvement for them has been a one-way road. They've just said, 'This is what you're going to get, like it or not.'" I am not against progress and development as long as it is responsible and takes the environment, surrounding homes and businesses into consideration. I am in favor connecting the Wekiva Parkway 46 Bypass at I-4 and not at the 417 interchange. The reasons are:1. There will be a definite deterioration of both, we the residents of Tall Trees and surrounding neighborhoods, (Wilson Place, Capri Cove, Berington Club, Sylvan Lake Preserve, and various custom estate homes), quality of life during construction. According to the plans, 2 of my Tall Trees neighbors will lose their prized homes that stand in the way. The constant noise and pounding in our backyards will not only be stressful to people and pets, but also can produce damage to foundations

including swimming pools, glass, mirrors, and expensive electric appliances such as big screen TVs and computers.<sup>2</sup> After construction, there will be an elevated highway in our backyards and through a corner of our neighborhood. Not only will it be unsightly compared to the beautiful trees, it will be a noisy invasion of privacy. It will be loud and motorists will be looking down over privacy fences into our homes and yards. <sup>3</sup>. Home values will suffer. Our homes are the largest investment in our lives. We work hard to have our piece of the American Dream. When a resident of Berington Club asked a FDOT representative to address his concern, the reply was, "Someone from New York would gladly pay a lot for your home." This was right after the same FDOT person told him a few sentences earlier that the parkway was to prevent development of the area and to preserve the environment. Who is this road for? <sup>4</sup>. The 417 interchange route will have to cross over Orange Blvd. and butt up against Wilson Elementary School. I asked one of the engineers about the safety hazard of a gasoline truck or something similar having an accident around school children. He dismissed it by saying it hardly ever happens. What about the one time it does?<sup>5</sup>. The businesses on 46 will suffer if the interchange is at the 417 instead of I-4. The beltway traffic will bypass the I-4 & 46 interchange ½ mile to west and connect to 46 west of Orange Blvd. All traffic approaching I-4 from west of Orange Blvd. will get on the beltway as a shortcut to I-4 westbound toward Orlando, which is the morning commute. The same would apply in reverse for the ride home. I consulted with Sergio Santos, General Manager of Courtesy Ford (Auto Nation for his view on the 2 interchange proposals. He said that his company was in favor of the interchange at I-4 because it would boost drive-by traffic and increase exposure on 46. He felt that the proposed 417 interchange would negatively impact Courtesy Ford's and Bill Heard Chevrolet's sales. Both dealerships have substantial multi-million dollar investments in the area.<sup>6</sup>. Another advantage of the proposed I-4 interchange would be its proximity to the Light Rail project that you worked on. In the Orlando Sentinel, 8/2/06, front page article it shows the Sanford station on SR 46. The I-4 interchange would make the Light Rail more easily accessible and more utilized.<sup>7</sup>. Does it really make sense to add another interchange in such a short distance? Right now there are 3 interchanges very close to one another on I-4; 17&92, 46, and 417. In fact, the lane that merges onto westbound I-4 traffic from 46 is the exit lane for 417 and it is a dangerous merge. However, the exit ramp on eastbound I-4 for 46 and 417 is smoothly and safely achieved with frontage roads without any real sacrifice in speed. It would make sense to keep heavy traffic in the areas where there is heavy traffic. Not to disrupt the residents and nature with a short stretch of highway within ½ mile of another. <sup>8</sup>. The 417 interchange would cut our neighborhood off from the Seminole Trail and the I-4 interchange would not. Seminole County just put the trail in for the residents to enjoy and FDOT wants to take it away. <sup>9</sup>. The proposed I-4 interchange will be on top of an existing interchange and will have a minimal impact on wild life and the environment. The wild life will be negatively impacted by the 417 interchange. We have black bears, gopher tortoises, sand hill cranes, red tail hawks, blue herons, wild turkeys, peacocks, and bald eagles living in the woods off of Wilson Rd. which will be impacted. The bears, I have on digital video that is time stamped. The Seminole Sheriff's department responded to the bears being in a neighbor's tree and should have a record. The parkway is supposed to help protect the bears, not destroy their habitat.<sup>10</sup>. The infrastructure of filling stations, restaurants, and lodging is at I-4 & 46. Much of the Wekiva Parkway will be elevated to protect the delicate Wekiva River Basin, wetlands, and Black Bear habitats, and to discourage development and urban sprawl, which would limit the number of interchanges. If the interchange is placed at 417 there is no place to put filling stations to fuel the motorists that will use the parkway. There will be a long distance between fill ups. <sup>11</sup>. With \$3.00 plus per gallon gasoline and slowing home sales, it is questionable if this parkway is even needed. With the high price of gasoline, people are driving less and have less money to spend when they do go out. The recent real estate boom was fueled by investor speculation much like the stock market was with tech and internet trading. Everybody knew someone who was getting rich "flipping properties." There is now more of a trend toward local villages and people living near their work and not having the long commute.<sup>12</sup>. The only reason that the FDOT engineers for their preferred 417 interchange was, "It flows better and provides a better level of service." Also, they said that the I-4 interchange was more difficult to design. When I asked that since an

interstate was involved, if our U.S. Congressmen and Senators had any influence in the decision making, they said no. So thank you once again for your letter about your involvement in Central Florida projects. In the polls, 2/3 of the respondents think the country is on the wrong track. It is easy to think that when you see such a disregard for the people by our officials. It is time to get back on the right track and get our priorities in order. We hear politicians talk about family values. What is more important to the family that the home? Why do we have to fight our government to protect our homes? What happened to "Government for the people, by the people"? We need someone that will stand up and fight for us and our way of life. Sincerely, Joel M. Himmel

8/7/2006	10:45 AM	Attended public workshop on 8/1/06. Submitted comment: "I am in favor of the SR 46/I-4 Interchange and oppose the 417 Interchange. The SR 46/I-4 Interchange will not have the negative impact on the residents and will increase the drive by traffic on 46 for the merchants. The 417 Interchange would provide a lot of noise pollution and damage to the re-sale of homes. The businesses on 46 would benefit also from the increased drive by traffic."

8/7/2006	11:31 AM	<p>Attended public workshop on 8/1/06. Submitted comment card: "My main concern is for bicycle traffic along the Lake County corridor of the Wekiva Parkway section. A rail-trail may or may not eventually be built in this area, and SR 46 is currently the only way to cross the Wekiva River without going all the way north to Deland or south to Apopka. It hink it's imperative that some provision for bicycle traffic be included in the Wekiva Parkway design itself. This could be caccomplished by leaving the current SR 46 intact, but closing the sections to motor vehicle traffic that are planned to be removed with the current designs I have seen. Take out one land of these sections and put up posts as barriers to keep motor vehicle traffic off them. This would create the same effect as ripping out these sections, but leave them open to cyclist, joggers, etc., and thus have no detrimental impact on wildlife. Thanks."</p>

Contact Notes		David Hohler	
Date	Time	Regarding	
2/7/2006	5:02 PM	David Hohler 407-889-2658 called, said we spoke yesterday and he got the map. He asked exactly which one is the road? PIO noted those are all the different alternatives that are being considered. He said so the purple and orange ones are the right ones? PIO said that's correct. He said he just wanted to make sure.	
2/6/2006	4:35 PM	PIO emailed OC conceptual map to David Hohler bettyhohler@earthlink.net: "David, It was a pleasure speaking with you. As discussed, please find attached the Orange County conceptual map for the Wekiva Parkway Project Development & Environment (PD&E) Study. As noted, this map of initial alignment alternatives is from the public workshops in November 2005. The project team is in the process of updating these maps, with some alternatives being removed, shifted, etc. We hope to have more up to date maps in March. All of the project maps also are available on the Expressway Authority website at www.ocea.com or www.ExpresswayAuthority.com. On the home page click on the text link under "Construction News" for the Western Connectors, which will take you to the Wekiva Parkway page. Once there, scroll down to the colored text links for the public workshop maps and other materials. Please feel free to call or email with other questions or concerns."	
2/6/2006	4:17 PM	David Hohler 407-889-2658 called to say he was looking at buying house on Ondich, not 5 houses down from Plymouth Sorrento, but heard the 429 was going through there. Can you tell me where it's going? PIO noted I can email or mail him a conceptual showing the various alignment alternatives in that area, but noted the maps are from public workshops in November, and engineers currently in process of updating these maps, hope to have new ones in March. PIO asked when was he looking to make the purchase? He said he's just looking at it right now. PIO noted just letting you know these lines will likely change, some will be taken off, shifted, etc. he asked that I email the map to him mom's address bettyhohler@earthlink.net PIO said will email to him and if he has any questions or can't find the property for some reason to call or email me back and I'd try to help him further. He said he appreciates it.--425 p.m.

8/22/2006	11:17 AM	<p>"Aug. 22, 2006Dan &amp; Barbara Holverson729 Ashgrove Terr.Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear Dan &amp; Barbara,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities</p> <p>The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." Date	Time	Regarding	
8/1/2006	10:01 AM	Attended public workshop on 7/25/06.	
7/19/2006	10:12 AM	PIO compiled and emailed the Nesler's contact history to Annemarie Norman/Rep. Hayes' office and Steve Homan as promised.	
7/18/2006	10:45 AM	PIO returned call to Steve Homan, who read the extensive note from Rep. Hayes' aid Anne Marie Norman. PIO let him know that we've provided info extensively and dealt with the	

couple numerous times over the last couple of years. PIO note they are not in the Wekiva protection area, though they have some environmental features on their property. PIO noted any claims they didn't know about project before May were unfounded; PIO noted viables map came out in May and showed alternatives affecting their property and that's what they've been responding to. PIO noted some alternatives affect them more than others, one not at all; all still being looked at. PIO offered to send the notes from database on the couple, and that I'd told Anne Marie I'd also send to her. Steve asked if the preferred would be decided on at the meetings? PIO said no, getting input on the viables. Preferred one or two to be drafted November December, public hearings in February or March. He noted Dave McDaniel/WESH TV 2 had asked if we were deciding on anything in these meetings. PIO said getting more input on latest and greatest info available. He said thanks.

7/18/2006	9:23 AM	Steve Homan called and left MSG I got a note from assistant at Rep. Allen Hayes telling me I should touch base with you and get up to speed on Mr. & Mrs. John Nesler of Sorrento. They own over 60 acres in the SR 46 corridor. According to her note they were under impression their land was in the Wekiva protection zone. Apparently Anne Marie Norman with rep. Hayes has spoken with you about this. She just thought it would be useful for me to know what the issue is. Give me a shout at you convenience I'd appreciate it. C 386-810-4017

Date	Time	Regarding
1/9/2006	5:04 PM	PIO returned Bill Hood's call, relayed that Dec. 20 SCEA voted to eliminate yellow or northernmost alternative from consideration. He said that's what I wanted to hear, you've made me very happy. So that's a final decision then? PIO noted SCEA would have to approve any alignment in SC, and said they wouldn't consider that one. PIO noted they also asked that we look at going along 46 and dropping down International Parkway to 417. He asked what was reason they dropped the yellow alternative? PIO noted it's longest route, higher residential, wetland and wildlife impacts, and could've only been a partial IC at 17-92 and I-4 due to river constraints. Wouldn't have served the purpose really sought. He said thank you very much, that's what he needed to know and thanks for calling back.--510 p.m.

1/9/2006	4:58 PM	Bill Hood 407-323-1295 left MSG trying to get info on the 417 beltway connector that is going to run through Sanford and connect with beltway on other side of I-4. Curious as to the 3 proposed routes; heard one of them had been dropped. That's what I'm trying to verify. If you can give me any info on that or direct me to the right place, I'd appreciate it. Thank you.

8/7/2006	1:01 PM	Attended public workshop on 8/1/06. Submitted comment form: "First and foremost, many thanks to your staff for taking the time with your presentation, however, this all seems to be moot. I believe that with your connections with government agencies, your ability to declare eminent domain, condemnation rights, that your authority is the 800 lb gorilla in the room. I feel that, because you are a captial venture company, you have only one focus herein: build roads for developers. I can see watching Commissioner Hanson walking about gloating. You have no ponderence for the quality of life, only quantity. Shame should be the name of this process. You should be developing a plan of mass

transit and use it before 2032. I only can think that this wild ride was neatly drawn up in the late 80s and it was shelved then. Don't you think that you need a bit more demographic information? Don't you realize that you surely need more hydrologic information? All I see is, if you build a road, people come."

9/27/2006	10:37 AM	
9/26/2006	5:51 PM	PIO emailed Dave, copied Mark/ch2m on Adelpha Howell query: "Hey Dave,Property owner Adelpha Howell is asking the width of the ROW in her location, 2626 Boch Road. Her property is on south side of Boch Road, three parcels east of Plymouth Sorrento. OC Alternative 1 on the systems IC slices through the property. I would guess the typical 200-300 feet (unless a pond is proposed there?), but wanted to give her something more firm. Please let me know so I can get back to her - thanks!Mary Brooks
9/26/2006	5:48 PM	PIO responded to Adelpha Howell email: "Hello Adelpha,1. I'm getting with the engineers on the estimated Right of Way width in your area for the various alternatives. I will get back to you when I hear something. Please be advised that this early in the project development process any such dimensions are highly subject to change until the next phase, final design, is complete. 2. The agencies only purchase as much of a property that is needed for the project. However, some property owners request that their entire property be purchased, they don't want the roadway in their backyard, etc. Those requests are reviewed on a case by case basis. Mary Brooks
9/26/2006	11:06 AM	PIO researched Howell property location and contact history. South side of Boch Road, 3 parcels east of Plymouth Sorrento. Systems IC alternative 1 cuts across her property ...
9/26/2006	10:39 AM	Adelpha Howell emailed: "Since you were unable to answer the following questions about the roadway that will connect the 429 to Sanford, are you able to tell me anyone that can? 1. How wide in footage is the roadway right of way? 2. If the roadway does come into contact with your property, how much is bought, just the right of way or the entire amount? It would be of value to know the answers to these as we do not wish to move. Our address is 2626 Boch Road, Apopka, 32712. I only wish to know the answer to the above, not if the roadway is going to take part or all of our property? Thank you, Adelpha Howell
8/19/2006	7:19 PM	Adelpha Howell responded to PIO email: "Thank you very much for your reply. Our address is 2626 Boch Road, Apopka, 32712. This property lies north of Haas and about 1/4 mile east of Plymouth Sorrento."
8/19/2006	4:31 PM	PIO responded to Adelpha Howell Adelpha 422 @ AOL.com: "Hello Adelpha,The alignment alternatives are on the west side of Plymouth Sorrento Road until we get up to Haas-Ondich Road. Please provide your address so that I can research the parcel in question and get back to you.Mary Brooks
8/19/2006	10:36 AM	__From: Adelpha422@aol.com [mailto:Adelpha422@aol.com] Sent: Saturday, August 19, 2006 10:36 AMTo: MBrooksSR414@cfl.rr.comSubject: (no subject)Our property lies east of Plymouth Sorrento Road and could be in the line of the south roadway. Are you able to tell me how many feet wide this part of the road will be? Is only the land needed for the road bought? If the road comes this path it will take natural water from several pieces of property. Any information will be appreciated. Thank you. Adelpha Howell Adelpha 422 @ AOL.com

Notes		
Date	Time	Regarding
8/7/2006	12:41 PM	Attended public workshop on 8/1/06. Submitted comment form: "(1) I never heard a resounding 'Get on with it' except from the development community. The folks who live here don't want the development that has made this 'necessary.' (2) Without REAL transportation solutions, our roads will NEVER be adequate. Look at your posters. The roads coded red stay red - We need truly viable transportation solutions. The biology definition of viable involves generations. (3) 46 and 46A should be made 'local traffic only' and kept open. Rural residents should not have to get on an expressway to go to the feed store. (4) There should never be a toll on the portions residents have no choice but to take. (5) Natural areas should be bridged. (6) Most people I've spoken to believe the

decisions have been made re: exact locations and they (OOCEA/DOT) are going through the motions to fulfill their public hearing obligations. (7) I do not count a video and a roomful of posters a workshop or a meeting although this was billed as a meeting. Meetings are where the public can ask questions of officials in front of other members of the public. The officials answer the questions in front of all the people. That makes the people think of more questions to ask. The OOCEA and DOT (among many others) learned long ago not to have this sort of meeting."

Contact	Tamaya Huff	OC Public Works - Transportation Planning
Notes		
Date	Time	Regarding
4/3/2006	3:00 PM	Tamaya Huff/OC Public Works asked if we also had the files for the Wekiva Parkway? PIO noted we don't have an alignment yet but are still working on the update maps for viable alternatives. She said she already has that. PIO noted they haven't been released yet; the guys are still working on narrowing down the alternatives. She said okay, she'll look forward to that also.

Renzo Nastasi/OC called meeting to order, noted been a while since we got together, lot of things going on in county. Hope to get back on schedule. Do have a quorum. Asked for motion to approve minutes. Approved. Gary noted project in some form been going on about 18 years. Back in November series of public meetings present project and receive feedback, presented conceptual alignments to get their input. Met in each of the counties, about 1150 attended, 400 at OC meeting. By and large people accepted project out there and positive, primary interest is where it's going to go. Some issues that came out of meeting, biggest concern in OC was local IC location. Looking at Kelly Park and Ponkan. Other concern was timing from the project. Right now EA has money in 5 year work plan for design and adv ROW acquisition. Those won't go forward until we get through PD&E. LC east side access was big issue, as well as access to IC with 441. In SC surprisingly alternative that veered off 46 and tied in with 417 has received lot of support, from traffic standpoint it obviously is the best, people in area and commission realizes that. We're looking at that further. Also concept tie in with 46, stop short of 46, yellow alternative has been eliminated from further consideration based on public comments and county. Gary noted we're now refining or eliminating down to viable alternative to present in future public meeting. OC board - pointed out south IC with 441 and MBX. Basically one alt to north to Ponkan where it splits into two alts when we had public meeting. Since then have refined alts and they kind of merged along lines of pink, really have two alts pretty close. One issue will be where IC located, Ponkan or Kelly Park, other issue mainline toll plaza. Under WPPA, OC section can be tolled. Gary pointed out possible mainline toll location. Re IC traffic study ongoing looking at location of IC, will submit report to OC and ask your opinion on where it should go. EA has felt it's a local issue for OC and Apopka. Traffic wise there are some differences, and impact-wise differences as well. Other issues re: OC alignments, OC purchased preservation land on north and east side Plymouth Sorrento

road, about 80 acre parcel. Also historic house about 100 years old we're trying to avoid, also some environmental features, a seeping side slope. We met with Beth Jackson who recommended we try to avoid that as well. Narrowed down in NE area to two alignments, on other side of historic house but north of environmental feature. Pointed out tie-in location. Also systems IC tied into NW along the curve, would tie into 46 bypass, go up to 46 and west to US 441. For your info WP considered limited access, whereas bypass considered controlled access with intersections and signals as appropriate. Looking at two E-W alignments in this area... still looking at east and west alignment here, hope to narrow down by next public meeting. Environmental issues to south, several developments permitted by city, need to know how those affect our project as well. Pointed out typical section, 300' ROW, 4 lanes expandable to 6 lanes, similar to what MBX will look like, though MBX will be 6 lanes initially. Anybody who drives the road knows how hazardous it is, did fatality surveys along 46, and counted 58 in last 6 years on 46, Plymouth Sorrento and 441. Traffic boards - existing, green C and above, yellow D. areas of congestion on 46 across the river, I-4 and 441. Most of NW OC with exception of Rock Springs Road. 2025 4 lanes, even with that a lot of red, volumes in 40s and 50s on 46, 60s along 441, a lot of red and congested operation. Wekiva Parkway board - beltway would have acceptable levels of service, as well as most of NW OC. Roads that were red would be green or yellow Plymouth Sorrento still shows up as red, will change depending on IC location. If you push that up to Kelly Park would make that operate a little better. Wekiva Parkway will probably take about 15k off 441; won't ultimately affect need, will delay improvements required on 441. Schedule - November meetings, evaluating and refining into viable alts, hope to have that completed May or June with public meetings to follow. From there determined and work on preferred alt, public hearing in January '07. Gary said believe DOT has some money in their program for some ROW acquisition for the e-w portion of project in Lake and Seminole. Question: in portion east of Zellwood Station, are you doing pond siting with PD&E? Gary said will have prelim sitings by time we do the viables. Man said two pieces of property OC owns. They're old borrow pits... Gary said we've got point we have to meet with MBX, and trying to get away from Plymouth Sorrento road, so don't have a lot of alts. OC said want to declare those parcels as excess property, you don't want us to get rid of them / Gary said no, talk to us first. Also north of Zellwood on golden gem road we have a maintenance facility and a clay pit, ...20 acres on NE corner of Zellwood corn festival site. Gary to get back to them on how that would be affected. Guy said they just rebuilt it so want to keep it. Question: where is school on Ponkan road? Next to Jason dwelling road where city has recreational facility. Jim martin said they have 80 acres east of there if you want to swap? (joke) school is well east of project. Gary asked about Ponkan improvements? Renzo said have concern with Ponkan condition as it is today, but most we could consider was fixing or widening the shoulders. Nothing else in near term. Renzo asked what's the EA's intent on Ponkan? If the IC is there, or if it isn't you'll have to cross Ponkan no matter what, are you contemplating any improvements? Gary said if IC here would do some improvements through intersection. Same if we did something at Kelly Park, don't know if we'd take it all the way to Plymouth Sorrento, would widen and improve road to 4 lanes through the IC area to tie into any future improvements you might do. Renzo said depending on where IC is will have impact on traffic traveling Ponkan or Kelly Park to get to and from IC. Gary said the long-term implications are where do you want to see the traffic? Down here you don't get as much benefit so close to 441, but up here you start drawing from north orange and Lake County. Renzo asked at last group meeting, you all were going to get with OC environmental, have you met with them? Gary said met with Beth Jackson as I mentioned, Beth recommended environmental importance of area for us to avoid, and she pointed out the historic house, so we modified alignments. ... Taken this alignment and straightened it out so we can avoid this environmental feature. Do have letter on file from her as well expressing her concerns. Next time you see this map, will look little diff. Question: is section next to Zellwood station, is it going to be elevated? Gary said haven't gotten into profiles, obviously we'd be above Ponkan, don't think it's going to be totally at grade. Question of buffers to Zellwood station, any sound barriers? Gary said haven't gotten that far, sound barriers would be determined farther in the process, at this point that's all open. OC said blue alignment goes right through pits; it's depressed, probably about 40 feet deep, right next to Zellwood station. Gary said we'd have some elevation there, might rethink this in

terms of going over or under.OC said at Zellwood station you have 2000 units, that's probably going to be a concern of theirs, north of Yothers. You may have an opportunity to depress it and solve their problem, because they're going to be asking for a sound barrier. Renzo asked if we'd identified structures yet other than IC, where else if any bridges? Gary said Kelly Park, Ponkan, and probably Yothers, other than that haven't gotten detail on smaller roads. Will do like last time, send you list of grade separated roads and how e plan to treat them, like we did on Maitland. Renzo said county is growing Gary said we'd offer that list to county. Gary noted we're seeing higher volumes on Wekiva Parkway than we have in past due to updated land use info, particularly from Lake County. Road will definitely be getting some use. Also big component of e-w travel. 70k plus Gary went over Maitland Blvd. oriented 441, 436 and Maitland boulevard existing, Plymouth Sorrento road, realigned 429. Currently under design, nearing 60% plans, construction end of this year if all goes well construction prices have gone up dramatically, effect on EA program, as result 201 section out of 5 year plan. What's going to be constructed will be from 429 to 441. Will still have a through route, then MBX as 6 lanes over to 441. Prior to any activity on Wekiva Parkway, this section 201 will probably come in 7th or 8th year of the work program. Question of how were' getting over RR? Gary noted bridging. Gary noted we'll have an EAC meeting prior to public meetings so will have a lot of updated boards. Jim martin/Global 5 - I4/408 presentation ... --meeting adjourned 1020 a.m.

2/15/2006	11:29 AM	PIO responded to Melissa Rountree/OC Transportation Planning: "Hello Melissa,I'm meeting with the project team this afternoon and will raise this request. Should be able to get something to you on Thursday, I would think. Stay tuned."
2/15/2006	9:33 AM	<p>From: Melissa.Rountree@ocfl.net [mailto:<a href="mailto:Melissa.Rountree@ocfl.net">Melissa.Rountree@ocfl.net</a>] Sent: Wednesday, February 15, 2006 9:33 AM  To: MBrooksSR414@cfl.rr.com  Subject: TPG presentation</p> <p>Hi Mary,I'm coordinating the setup of the TPG presentations - Susan McCune asked me to give you a call. Can you email me your presentation for Friday so that I can load it on the laptop before hand? If it's too large - perhaps you have an FTP site you can save it to? If not, you may bring a CD Friday morning - I only ask that if I don't have a copy of it prior to the meeting, that you arrive a good 15-20 minutes early to allow time to copy it onto the laptop. Let me know which way you'd like to proceed.Thanks so much,Melissa</p> <p>Melissa Rountree  Multimedia Specialist/Special Projects Coordinator  Orange County Public Works  Department of Transportation Planning Division  4200 S. Date Time Regarding  
10/11/2006 8:57 AM PIO responded to Phil/Estates of Wekiva Park HOA: "Thanks Phil. I will definitely pass that on to the study team.Mary Brooks"

10/11/2006 8:15 AM Phil Hursh/Estates of Wekiva Park HOA emailed: "Good Morning Mary:We greatly appreciate your efforts last evening in bringing CH2MHill and the Department staff to our HOA meeting last evening. The information brought forth has benefited everyone.I was going to present another alternative pond site at last evenings' meeting but I didn't believe Mark Callahan was prepared to discuss another option in detail since he didn't have a lot of reference materials with him nor did I want to get the homeowners bored. Rather than impacting our HOA property and single family homes to the south or the DNR's property to the north how about considering Parcel 28-19-29-300-005F-0000. This parcel was recently dedicated to the Seminole County Board of County Commissioners as part of the Developer's Agreement when our subdivision was approved for development. The parcel is a portion of the newly named Wilson's Landing Park, which fronts the Wekiva River to the west and extends about 1,500-feet east where it borders our subdivision. The parcel has been and is currently a clear area that is not in the Wekiva River floodplain. Although the parcel does not border the SR 46 R/W, I have been in involved numerous pond designs, particularly in urbanized corridors, where right-of-way acquisition costs prohibit ponds immediately adjacent to the R/W. I measured about a 1,800-foot distance from the SR 46 R/W to this parcel which can be easily accessed with piping for treatment and attenuation. The parcel is far enough away from the Wekiva River that the RHPZ would not be violated; therefore, this site wouldn't trip any permitting thresholds. The most important aspect of this parcel location is that it is currently owned by the County. I'm sure this would be a much easier sell than to fight homeowners in the commission chambers or to have to fight the DNR for their property to the north of the SR 46 R/W.I would hope that the Department would consider this parcel as an alternate pond site Thank you again for time and efforts,Philip J. Hursh, P.E.Director of TransportationConsul-Tech Transportation, Inc.2828 Edgewater DriveOrlando, FL. 32804Ph. (407) 649-8334Fax. We appreciate your time  and concerns. I understand you also have received a response from CH2M Hill, which is  conducting the study.Your comments will be reviewed and evaluated along with the nearly  500 other public comment forms received, as well as input from local governments and  state agencies. More than 1,200 people attended the recent public workshops. Currently  we are evaluating the public comments - many of which represent competing interests -  as well as local government and state agency feedback, and continuing the engineering  analysis with regard to the viable alignment alternatives. That information will be used to  draft a preferred alternative by the end of this year. That draft preferred alternative also  must undergo government review and revision before being presented at formal public  hearings in February or March 2007.Following the hearings the preferred alternative must  be approved by the Expressway Authority, Florida Department of Transportation, Seminole  County Expressway Authority and other state and federal entities.The PD&amp;E study is  expected to finish with an approved alternative in spring 2007. All of the latest public  workshop exhibits are posted on the Expressway Authority website at www  ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the  home page under "Construction Updates" click on the text link for the "Western  Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text  link for the "Viable alternatives workshops" maps.I encourage you to check the website  periodically for updates, or to contact me with questions or concerns at © 407-702-8375,  F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151  University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued  involvement in the development of this major transportation improvement. Sincerely,Mary Brooks</p>

8/16/2006	4:43 PM	<p>Dave/CH2m Hill copied PIO on response to Peter Ingrassia:  "FYI____From: Lewis, David/ORL Sent:  Tuesday, August 15, 2006 3:41 PMTo: 'PINGRASSIA@cfl.rr.com'Cc: 'Lockhart, Amy';  Callahan, Mark/ORL; Tom.Percival@dot.state.fl.us; Connor, Brian/ORL;  'JMcCollum@seminolecountyfl.gov'Subject: Wekiva Pkwy - Your Comment Form at  7/25/06 WorkshopMr. Ingrassia:Attached are the items you requested concerning</p>	

alternative alignments previously analyzed along and east of International Pkwy. This alignment alternative was discussed during a presentation at the Seminole County Expressway Authority meeting on May 9, 2006. Your concept for a realignment east of Orange Blvd. (CR 431) appears to impact many more existing residences, however, we will review it along with the other requests/comments we received at and after the workshop. Thank you for your interest and involvement in the Wekiva Parkway PD&E Study.Dave LewisCH2MHILL

7/31/2006	2:24 PM	Attended public workshop on 7/25/06. Submitted [somewhat unintelligible] comment via fax: "A) Project Mgr., Mr. D. Lewis suggested the following: 1) Attach the.....for an alternative route from SR 46 to the I-4/SR 417 intersection to this comment form. 2) Include my e-mail address PIngrassia@cfl.rr.com, to which Mr. Lewis will send the details of objections to a similar route to my suggested alternative. If necessary, he will see to the mailing to my address above of same. 3) It is requested that my suggested alternative route and accompanying rationale be viewed as a model for still another route, one that satisfies departure point from CR 46 and falls west of International Parkway; said starting point should be east of CR 431 so as to approach the advantages stated in support of my alternative route. This new alternative would not relate directly with International Pkwy as was the.....configuration. Please call me at 407-302-706 should these hurried comments need clarification."
7/24/2006	4:36 PM	PIO returned call to Peter Ingrassia 407-302-7067, who said I'm trying to prepare for tomorrow's meeting. Been looking at the map on the EA website, it turns out that at our local board meeting other night two people mentioned there was alternative routes. The one I'm interested in is closest to I-4 off 46, at Designing Women's Nursery, behind the elementary school. That's the one closest to where I live. PIO confirmed he's talking about 417 alternative? He said yes. PIO said yes, 417 alternative is still under consideration. PIO noted overall map on website does not show all of the alternatives for example IC concepts for 441 and 46. He asked if all of the yellow lines there near 417 were different alternatives? PIO said no, those are the various ramps for the IC.He asked if we use the 417 alternative would it all be elevated? PIO said that's correct. PIO noted there is a concept for the 46 - I-4 alternative that could drop down at some point to at grade. He said I'd answered his questions and he'd see me tomorrow.
7/24/2006	3:14 PM	<p>The alternative depicted on page 2 of 2 provides identical interconnections between CR 46 and both I-4 and SR 417 as presented in referenced layout conceptual design. I believe it does so while providing the following advantages:</p> <ol style="list-style-type: none"><li>1) Shorter more direct route from 46 to I4 and 417</li><li>2) Reduction of impact to environment and finances</li><li>3) Runs over more undeveloped land</li><li>4) Represents a model for similar alternative which starts on 46 east of Int. Parkway. This route is shorter and impacts fewer homes.</li></ol> <p>Thank you for the opportunity to submit alternatives and for your considered opinion of them.</p>
7/24/2006	11:43 AM	Peter Ingrassia (sp?) 407-302-7067called and left MSG I'm looking at ht EA website map that shows extensions in the vicinity of 46/417 and I-4. I have several questions I wanted to ask in preparation fro tomorrow's meeting in Sanford. If you could give me a call today I'd appreciate it.

9/26/2006	3:30 PM	PIO received 2 formatted comment forms (Cindy Poirier campaign) dated 9-18-06 and 9-24-06: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children ad the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."

8/10/2006	4:11 PM	Submitted comment via fax on 8/4/06: "We own propoerty, a home and a nursery on map parcel #2867 and 2861 in NW Orange County on Plymouth-Sorrento Road approximately 1 mile fromt he Lake Co. line. We do not want the roadways going through our property. We will lose our income fromthe nursery being closed down. We only have this 1 location, so we can not move the plants. We would have to sell what we have and stop growing until we find, buy land, and rebuild the greenhouses. Then wait another year before they're ready to sell. We grow [illegible] from seed and they take over a year to grow. It will be very costly for us to move. The Alt #1 route (south of Boch Road) would be the better route for all of us int his area. Also, the land behind ours is the Nesler property map parcel #2859). It should be protected for its environmental resources, not destroyed."

Notes		
Date	Time	Regarding
3/17/2006	9:29 AM	Jennifer Jaeb 407-330-9242 called, said she lives in Preserve at Astor Farms and said her neighbors said one of the routes was going right in front of their entrance. PIO confirmed her location off Orange Boulevard north of S.R. 46. PIO noted former alternative in that area removed from consideration at request of SCEA. Also noted it was longest route, large residential impact so had number of drawbacks. PIO recapped remaining Seminole alternatives. PIO noted maps were from the public workshops, did she attend any of those? She said no. PIO asked her if she was getting newsletters and meeting notices. She said no. PIO got info to add her to project database: Jennifer Jaeb, 4795 Cains Wren Trail, Sanford 32771, email <a href="mailto:Jennifer-jaeb@cfl.rr.com">Jennifer-jaeb@cfl.rr.com</a> she reiterated all of the I didn't know how you'd come through there because Orange is so small. PIO noted when we affect cross

streets we usually have to rebuild a section of it for the project, but in this case we're not looking to go through that area any more.

Project Development and Environment (PD&E) Study. As noted, we are in the process of  
updating all of the project maps and hope to have the latest versions available by  
mid-April. Currently, the initial alignment alternatives are being analyzed based on public  
input, as well as on engineering evaluations, to create a set of more viable alternatives.  
During this process, some alternatives are being revised or shifted, some removed from  
consideration, while new alternatives also are being added. The resulting viable  
alternatives will be presented at the next public workshops in the summer of 2006. Based  
on public and government input and the viable alternatives analysis, a preferred  
alternative will be selected. Public hearings are expected to be held in early 2007. The  
PD&E study is expected to finish with an approved alternative in spring 2007. All of the  
public workshop exhibits and other information are available and will be updated by  
mid-April on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the  
home page under "Construction Updates" click on the text link for the "Western  
Connectors." That will take you to the Wekiva Parkway page, where you can scroll down  
to see the text links for the public workshop files. I encourage you to check the website  
periodically for updates, or to contact me with questions or concerns at © 407-702-8375,  
F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151  
University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued  
involvement in the development of this major transportation improvement.

3/15/2006 10:29 AM PIO emailed Jankech mailing address to Candace/QCA for database.

3/15/2006 10:15 AM Keith Jankech 407-324-5554 called and said he just got the database update email. It's  
funny because I was recently talking about this planned Wekiva Parkway. Recall when 417  
was connected from 17-92 to I-4, there was a trailer that you could go look at where the  
road was going to go, do you have an office or anything like that? PIO noted no, not really  
especially since we're so far out or early in the process. PIO noted all of the project maps  
are on the website, had he checked that out? He said he did but couldn't see it very well.  
PIO noted I can send him 11x17 copies of the overall map as well as any county in  
particular. He said he'd like one for each county and the overall. PIO got his mailing  
address: 131 Queen's Court, Sanford 32771 Asked about connection to I-4, understand it's  
basically going to be in the area of 46? PIO went through initial alignment alternative  
connections to i-4 and noted yellow elimination and addition of International Parkway. PIO  
went over concept for tie-in if at 46; noted seemed to be some confusion about that one,  
would not be elevated expressway tie in but would drop down to an at-grade arterial  
similar to what's there now. He said he understood. PIO noted I'd send him these maps  
but that we were in the process of updating them, hope to have the latest ones posted by  
mid-April and to keep an eye on the website. He said he would and thanks for the help  
--1024 a.m.

Date	Time	Regarding
11/8/2006	4:59 PM	PIO responded to Patty Jefferson: "Patty, We don't have an alignment approved yet for this project; we have to do that before we can begin buying Right of Way. Typically Right of Way acquisition doesn't begin until we're well into final design (the next project phase after PD&E Study). However, if there are large parcels that we cannot avoid no matter what, they will some times do advanced ROW acquisition shortly after the PD&E Study finishes. And yes, along SR 46, FDOT has jurisdiction over the project in Lake and Seminole counties. Mary Brooks
11/8/2006	4:45 PM	Patty Jefferson responded to PIO email; "Mary...thank you for your response....would the DOT be the one to buy up property?...I also had an attorney tell me that land is already being purchased along sr46 for the parkway...I wonder if he is lying...thanks Patty Jefferson
11/3/2006	1:27 PM	Brian Blanchard/FDOT responded to PIO email re: Jefferson query: "Thank you Mary for the quick response. Brian A. Blanchard, P.E. Florida Department of Transportation Director, Office of Construction (850) 414-4140 email: brian.blanchard@dot.state.fl.us
11/1/2006	6:18 PM	PIO emailed Patty Jefferson tparker567@cfcl.rr.com, copied Frank O'Dea/FDOT DCE and Brian Blanchard: "Hello Patty, Your query was forwarded to me from the Florida Department of Transportation, with whom the Orlando-Orange County Expressway Authority is conducting the Project Development and Environment (PD&E) Study for the Wekiva Parkway & SR 46 Bypass. As noted, we are still in the study phase, and there is no schedule yet for subsequent project phases including construction. That is largely due to the fact that this project, last estimated at \$1.4 billion, is largely unfunded. The scheduling of final design, right of way acquisition and construction will depend largely on the availability of funding. As this project is 25 miles long, it would likely have to be broken up into sections for the purposes of design and construction. The best-case scenario, in which funding would become available in the very near future, would put construction starting on the first section of the Parkway some time between 2012-2015. Again, that is highly speculative and subject to change at this point. Since the public workshops last summer, we have been evaluating the public comments and feedback from local governments and state agencies -- as well as meeting with HOA's, churches and schools -- and subsequently the alignment alternatives have been shifting in light of various concerns. We will continue to adjust the alternatives and assess impacts as we continue our evaluations and meetings with community stakeholders. By January, we hope to be ready to recommend a draft alignment alternative -- including interchange recommendations -- to be reviewed and revised by local governments and state agencies. We will provide the next versions of the alternatives' maps to the public at that time (right now they're changing too quickly to disseminate). We then plan to bring the recommended alternatives forward for formal public hearings in March or April 2007. The PD&E study is expected to finish in early summer with an approved alignment alternative. I hope that update helps. Please feel free

to call or email me with other questions or concerns.Mary Brooks

11/1/2006	5:51 PM	PIO responded to Frank O'Dea/FDOT DCE: Thanks Frank. I will follow up with Patty Jefferson...."
11/1/2006	4:32 PM	Frank O'Dea/FDOT DCE copied PIO on email to Patty Jefferson tparker567@cfl.rr.com : "Dear Ms. Jefferson:In response to your e-mail to Brian Blanchard about the Wekiva Parkway, the project is currently being studied by the Orange County Expressway Authority, in conjunction with the FDOT.There are no set construction dates for this project. Contact		Jeff Jenkins
Notes		
Date	Time	Regarding
11/20/2006	5:26 PM	PIO returned call to Jeff Jenkins 352-357-6191 , I'm at 7120 W. SR 46, Sanford 32771. I have a parcel number ... right where the big power lines cross. Every alignment I've seen looks like it's intersecting down there. They ran a gas line, eminent domain, 36" high pressure main 30' fro my back door. So that got me motivated to build a house in Lake County. If I take my homestead off the SR 46 property, then my property taxes going to skyrocket. House in lake county doesn't have a CO yet, not legal to live in yet. If you're going to take it, need yes or no answer, or are you just going to scrape it, put a retention pond in the front yard. I got one that I went to at Sanford chamber of commerce... every other day I get a letter from an attorney wanting to represent me. Where the Seminole sports complex, I'm a little east and across the street from that. Been there since I was 19 it was 172' on 46 and 150' deep. I remember seeing this SR 46 ROW line; Chelsea Title said then if they widen 46 they might take some property and reimburse you. With the gas main they took a third of it. They've already taken 50' off 150'; I've had to move my fence back. Property line right now is about 2' from living room window. I figure they'd make a retention pond. I'm right on easement for power line. There's not whole lot left that they can't take. When they ran that gas line, they paid me \$4,000, they dug up entire yard, knocked down entire fence and I had to put the fence back up. I picked an attorney out of the yellow pages, and I guarantee you he made more than I did. I moved 20 miles and built house out of ground, and have \$5,000 tax bill and can't live in it yet. One attorney told me not to take the homestead off. When are they going to start taking property? PIO noted schedule and funding challenge will affect schedule. He asked if it was really likely to be done? PIO noted has legislation behind it, safety issues on SR 46; something will have to be done even if it's not this particular project. PIO referred him to Jim Clark/FDOT ROW 1-800-780-7102, noted DOT handling project in Lake and Seminole counties, and Jim is familiar with some of the questions. PIO noted we hope to make draft recommendations in January.He asked that I add him back to the list; he said he hasn't gotten anything on the project in about a year. PIO said would do so.--543 p.m.
11/20/2006	10:21 AM	Jeff Jenkins 352-357-6191 MSG re; Wekiva Parkway. I own property on 46, trying to find out some info. Give me a call.

Contact		Kelly Jenkins

Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives

Dear Kelly, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

8/2/2006	12:17 PM	Attended public workshop on 7/26/06. Submitted comment: "Great plans. Wish it could be started sooner! Alignment looks good and I feel it would be very helpful in our daily commutes."

Notes

Date	Time	Regarding
9/18/2006	1:27 PM	Mark copied PIO and Tom/FDOT on email Dave/CH2m Hill sent following up this morning's Wilson Elem. Meeting, SR 46 north and south widening PDF's: "FYI _____ From: Lewis, David/ORL Sent: Monday, September 18, 2006 12:49 PM To: <a href="mailto:scott_stegall@scps.k12.fl.us">scott_stegall@scps.k12.fl.us</a> Cc: Callahan, Mark/ORL Subject: Wekiva Pkwy Attached are the 2 PDF's of the north and south widening options along the SR 46 corridor you requested in your meeting today with Mark Callahan of CH2MHILL.

9/18/2006	9:00 AM	Tom Percival, Mark Callahan, and PIO met with George Kosmac, SCPS Deputy Superintendent and Director of Operations, John Leroy, Project Manager Facilities Planning Scott Stegall, Director Capital Outlay, Building Official, Facilities Planning Department, and Principal Barry Liebovitz at Wilson Elementary in principal's office. Mark brought roll plots and went over the alignments from the workshops and latest adjustments. He noted we're avoiding the treatment facility on school property. Q: is it taking the vet's property to the north? Mark said yes. It was noted there's another vet's office also in the area Q: will there be a problem with the retention planned next to their ASR? Mark said don't think so. Mark noted we'd be elevated over Orange, and then come down somewhat and then go up over Wilson. Mark noted we're working with Capri Cove and Tall Trees HOA's, Lakeside church, and have come up with some adjustments. Q: aren't there student walkers from the back of Tall Trees? Barry said they come along Wilson Road. There are some partitions along the fence they can get through. Mark said we will bridge Wilson and provide sidewalk and it would be lit under the bridge. Q: will it be an obstacle for them to continue walking? Mark said no, don't think there's sidewalk there now ... part of the sidewalk went in with new Wilson Place development. Re: 417 alternative from the workshop ... adjustment to move it away from Capri Cove and will end up a little farther from the school. But there is an issue with the church. It's also a little farther from Tall Trees... Alternative B is a tad closer to the school. Q: will all the alignments, will there be any taking from the school?
-----------	---------	--

Mark said no, very careful to avoid that.Q: what about noise abatement? Mark said we will look at it. We recognize that schools have special criteria. It would be a noise wall if anything. Discussion that distance from school property to road edge would be 100-150'.Q what grade at the school? Mark said the road might be 10' high or so.Q: will there be fencing beneath the roadway? Mark said ROW is fenced unless there is a vertical wall there. Also any ponds would be fenced.Q: Barry asked about egress off International Parkway? Mark said yes, that's the proposal. Mark noted only access to 417, not I-4 front International Parkway.Mark noted we're looking at refinements throughout the project. We hope at the beginning of the year to have recommendation for DOT, EA, SCEA, Lake County Board of County Commissioners, etc. and then public hearings in March-April. Then we would seek federal approvals. Mark noted we don't have funding to move forward. Looking at \$1.5 billion and growing. He noted the school system's involvement in planning will be very helpful. Mark noted 417 has more community impacts but a lot of traffic wants to get to Lake County. The SR 46 IC we would have to provide local 46 access, systems connection to the Wekiva Parkway and something for people on 417 wanting to get to the facility. He noted we're finishing the impact evaluations. There are more homes on 417 than 46. We're trying to weave our way through.Q: how many years before you start construction? Mark said 2012-2015 is the absolute best case depending on funding. We need to get things documented regarding the school. Barry expressed concern about egress from school to the parkway.George was concerned about noise potential and not inhibiting kids walking to school. Mark asked if school system dictated how kids should walk to school? Barry said it's up to families how kids walk to school. A lot of our students are driven to school. Some walk on Orange, Wayside and Wilson. Schools officials said they have requested sidewalk on Wilson, but the county said since the speed limit is 25 mph it's not warranted.Mark reiterated there would be sidewalk under the bridge, especially this close to the school. Scott said the main thing is you keep the Wilson Road connection. He said the ponds don't really concern us. It's primarily the co-location to the well. Mark going to get back with Glenn Forest on that. Scott noted there were setback requirements on that.PIO asked if we need to do presentation to school board or leave it at staff level? George said staff for now, especially until you get those issues squared away. George said there is one school board member interested. He might speak with her. Mark said we can do one-on-one meetings also.Discussion of impact to Lakeside Fellowship UMC. Mark gave Barry the roll plots and said would send an additional set.PIO mentioned Yankee Lake Elementary school site. Scott said they heard initially the ROW acquisition would occur to the north. Mark noted we're looking at the north and south though the south has three times the impacts.Scott asked how much additional ROW would be needed? Mark said 46 ROW is 200', so 65'. Then another 50' for the gas line easement that needs to move north.Q: why can't gas line stay in ROW? Mark noted gas company wants separate easement.Scott said right now we've lost 50' for the easement, then we'd lose 80' (?). Mark said he's going to send them the north and south alternatives on SR 46.Scott said if it's half it's 80', or 120', the easement is already conveyed.Mark said some uses of easement allowed but will be restrictions such as buildings.Scott said Yankee Lake Elementary not planning to go forward at this time because of location, and issue of attendance boundaries due to proximity of Wilson Elementary. There are also Department of Justice issues. They confirmed the school district owns the parcel.George said the real question is how much of it is it going to take? We would be concerned if we'd lose a useable site for an elementary if the project takes too much.Mark reiterated he would get them additional plots, PDF's. PIO offered to coordinate follow up meetings, just let me know.--932 a.m..

9/15/2006	3:07 PM	PIO called Tom Percival/FDOT cell number 386-801-2826, left MSG that Monday school meeting was on and get there a few minutes early because of tight 30 minute window.
9/15/2006	3:05 PM	PIO called Mark to relay school meeting was on for Monday, left MSG.
9/15/2006	3:01 PM	PIO called Dave/CH2M to relay meeting was on but I didn't have his cell number after all. Dave said mark does have his laptop since he just emailed me something. He said his cell is 407-493-1034.
9/15/2006	2:55 PM	John Leroy/SCPS called back and said he just confirmed the meeting with all parties on his end about 10minutes ago. He said they have really tight window of 30 minutes, so don't need to do full presentation. PIO said would just go over nuts and bolts with regard to any

school property impacts and get their questions and concerns. PIO noted can do a full presentation for the school board if they want. He said that sounds fine and see you Monday.

9/15/2006 2:45 PM PIO again called John Leroy/SCPS, pounded out of voicemail and spoke briefly to assistant Glenda who confirmed he was in the office and she was trying to find him. PIO got cut off twice while trying to hold.

9/15/2006 1:28 PM PIO left MSG for John Leroy/SCPS asking for meeting confirmation, noting I need to let our folks know for Monday morning. Also noted one of the guys would be coming from out of town. PIO asked him to call or email me ASAP.

9/15/2006 8:50 AM PIO emailed John Leroy/SCPA et al: Thanks John. We look forward to confirming this as soon as possible so I can send a calendar item to our folks for Monday morning.Mary Brooks

9/14/2006 4:38 PM -----Original Message-----From: John\_Leroy@SCPS.K12.FL.US [mailto:John\_Leroy@SCPS.K12.FL.US]Sent: Thursday, September 14, 2006 4:38 PMTo: George\_Kosmac@SCPS.K12.FL.US; Barry\_Liebovitz@SCPS.K12.FL.US; mbrookssr414@cfl.rr.com; Scott\_Stegall@SCPS.K12.FL.USSubject: SR 429 Wekivia ParkwayWhen: Monday, September 18, 2006 9:00 AM-9:30 AM (GMT-05:00) Eastern Time (US & Canada).Where: Wilson Elem  
\*\*\*\*\* Mary Brooks Public Information Officer, SR 414- Maitland Blvd  
Extension, request this meeting to bring us up to date on the study as it pertains to Wilson Elementary, and to hear any questions or concerns from school officials. Please response to this request as soon as possible.

9/14/2006 10:07 AM PIO called John Leroy/SCPS Facilities Planning 407-320-0068, left MSG that Monday 9-10 works for DOT project manager and consultant project manager, so call me back to confirm and I will send a calendar item.

9/13/2006 12:35 PM PIO emailed team: "Due to various conflicts with Tom and Mark on the 14th and 19th, here are the latest dates and times suggested by the SCPS folks for meeting at Wilson Elem. As you will note, they are during the day:Mon., Sept. 18 9-10 a.m. Thurs., Sept. 21 from 10 a.m. -11 a.m. Tues. Sept. 26th 3-4 p.m. Thurs., Sept. 28th 3-4 p.m.This would be with John LeRoy, facilities planning department, George Kozmak, deputy superintendent and principal Barry Liebovitz.Please check your schedules and let me know how these work for you. Thanks and see you this afternoon.Mary Brooks"

9/13/2006 11:20 AM John Leroy/SCPS Facilities Planning 407-320-0068 called to see if dates worked? PIO noted 14th worked for one, but SR. project mgr couldn't make either date. John Leroy said Mon. 9-10 a.m. at the school was possible, also Thurs. 21 from 10 a.m. -11 a.m. Tues. 26th 3-4 p.m. Thurs. 28th 3-4 p.m. John said in my email I'd also mentioned something about a presentation to the school board of superintendent? PIO noted we've done presentations for the city and county councils and can do one for their board if desired. He said be sure to ask George that when we meet as he's the deputy superintendent.PIO asked if he'd spoken to Barry Liebovitz to let him know we weren't meeting tonight since email apparently didn't go through? He said he would call him right now and let him know. PIO said I'd run the dates by the team, we were meeting this afternoon and I'd get back to him.

9/13/2006 8:36 AM Tom Percival responded to PIO email re; Wilson Elem. Meeting: "No. Mark needs to be there. Have it without me and with Mark and Brian Stanger if need be.Tom Percival

9/13/2006 8:32 AM "Mary Brooks"<mbrookssr417@cfl.rr.com> emailed Tom Percival tom.percival@dot.state.fl.us> 09/13/2006 08:42 cc AM Subject RE: SR 429-Wekiva Parkway PD&E Study - Wilson Elem. meeting RESCHEDULING  
Tom,Mark said the 14th doesn't work for him (neither does the 19th, for that matter). I assume you'd want him there, or should I schedule it with just you and I (and Brian?) and the school folks? Let me know.Mary Brooks

9/13/2006 6:40 AM -----Original Message-----From: tom.percival@dot.state.fl.us [mailto:tom.percival@dot.state.fl.us]Sent: Wednesday, September 13, 2006 6:40 AMTo: Mary BrooksCc: 'Joe Berenis - OOECA'; Brian.Stanger@dot.state.fl.us; David.Lewis2@ch2m.com; 'Skaff, Gary J.' meeting RESCHEDULINGThe 14th will work for me. I have a public mtg. on the 19th.Tom Perciva

9/12/2006	4:41 PM	John Leroy said email didn't come through so he's glad I called. He's checking calendar for the 14th. H said tentatively looks like 530-6 p.m. could work Thursday night, but asked if could do it at 5 because he has a meeting at 7 p.m. PIO noted that could be pushing it but would check. PIO asked for another date in case that doesn't work. He said Tuesday the 19th also is open for 5 or 530 p.m. PIO said I'd check on both of those and get back to him. PIO asked if would be better for them to meet during the day? John said no, George's schedule is so backed up. They're done with work usually at 430 and 5 gives them time to get to the school. --449 p.m.
9/12/2006	4:35 PM	PIO called John LeRoy/SCPS Facilities Planning Department 407-320-0068 to make sure he saw Wilson elem. Meeting was off for tomorrow, left MSG asking for confirmation he got the email and looking for other dates to reschedule.
9/12/2006	7:59 AM	PIO emailed John LeRoy/SCPS and Barry Liebovitz/Wilson Elem. Principal: "Good morning John, I'm back from vacation and have heard from FDOT that our tentative date for tomorrow, Sept. 13, at 530 p.m. at Wilson Elementary will NOT work for a meeting to discuss the latest with regard to the Wekiva Parkway's impacts on the school. How does Thursday the 14th work for your folks? Or is there another date we can consider? Let me know so that I may run it by the FDOT and PD&E study team. Thanks! Mary Brooks
9/12/2006	7:55 AM	PIO responded to Tom Percival/FDOT, copied team et al: "Hello Tom,I'm back from vacation and will get with the school folks on another date, perhaps the 14th, and get back to everyone. Thanks.Mary Brooks"
9/5/2006	7:16 AM	-----Original Message-----From: tom.percival@dot.state.fl.us [mailto:tom.percival@dot.state.fl.us] Sent: Tuesday, September 05, 2006 7:16 AMTo: Mary BrooksCc: Joe Berenis - OOCEA; Brian.Stanger@dot.state.fl.us; 'Skaff, Gary J.'; Mark.Callahan@CH2M.com; Melaina.Petit@CH2M.com; Noranne.Downs@dot.state.fl.us; 'Mike Snyder'Subject: Re: SR 429-Wekiva Parkway PD&E Study - Wilson Elem. meetingMary:I will not be able to make this on the 13th. The 12th or 14th would work for me.Tom Percival
8/31/2006	2:54 PM	PIO emailed Tom, Brian, Noranne, Mike, Mark, and copied Joe, Dave, Gary, Melaina "Good afternoon, Pursuant to our discussions in the progress meeting yesterday regarding setting up something to update the Wilson Elem. Administration and school board officials, we have a tentative date for your consideration to bring the school officials up to date and to hear their concerns with regard to the project. The date at this time would be Wed., Sept. 13 at 530 p.m. I believe that's a progress meeting afternoon. Attending would be Principal Barry Liebovitz, John LeRoy of the Facilities Planning Department, and George Kozmak sp?), Deputy Superintendent for Operations.I've also advised them that we would be happy to do a presentation for the School Board at some point. Please advise if this date and time will work. If not, please provide other dates and/or times for me to run by the school folks. Thanks. Mary Brooks
8/31/2006	2:37 PM	PIO called back John Leroy to discuss timeframe for meeting, noted we usually do them after 5. He asked how long they usually take? He noted for them, probably 30-60 minutes noted meetings with homeowners have been much longer. We discussed dates. Noted we have a progress meeting 9-13 from 2-4, so earliest we could get there would be 530, 6 p m. would give us a little more breathing room with traffic. He checked George's calendar and said that time was open. PIO noted Principal Liebovitz also wanted to attend. He said that would be no problem. PIO said I'd check with team members and get back to him ASAP. He said he appreciated the call.
8/31/2006	1:22 PM	John Leroy with SC School Board, received your email this morning about trying to set up a meeting. If you could give me a couple of dates so I can get some other people from the board, George Kozmak is the deputy superintendent for operations. He has shown an interest in attending this meeting. Let me know a couple of dates and I will check his calendar. 407-320-0068 or email me the address you have.
8/31/2006	10:20 AM	PIO emailed John LeRoy/SCPS Facilities Planning Department, copied Principal Liebovitz:

"Good morning John,As the public information officer for the SR 429-Wekiva Parkway Project Development and Environment (PD&E) Study, I was directed to you in the Facilities Planning Department by Principal Barry Liebovitz about setting up a site visit with the project study team and school officials. We would like to bring you up to date on the study as it pertains to Wilson Elementary, and to hear any questions or concerns from school officials. As you may be aware this PD&E study is being done jointly between the Orlando-Orange County Expressway Authority and the FDOT, with the FDOT having jurisdiction over development of the project in Lake and Seminole Counties.We have been, and continue to meet with communities surrounding the school. We would likely be looking at mid to late September at the earliest to set up such a meeting at the school. Please let me know a few dates and times that would work for you and any other school officials you feel should attend. We also plan to schedule presentations with School Superintendent Paul Vogel and the School Board.FYI, I'm here the rest of this week but will be on vacation next week, Sept. 4-10, should you try to reach me. I look forward to hearing from you with regard to your level of interest in such a meeting, as well as some potential dates and times. Mary Brooks

8/31/2006	9:49 AM	-----Original Message-----From: Barry_Liebovitz@scps.k12.fl.us [mailto:Barry_Liebovitz@scps.k12.fl.us] Sent: Thursday, August 31, 2006 9:46 AMTo: mbrookssr417@cfl.rr.comSubject: RE: SR 429-Wekiva Parkway PD&E StudyYes.BL

8/31/2006	8:47 AM	Barry/Wilson Elem. Responded to PIO email: Yes, please do.Thank you.Barry L.
8/31/2006	8:38 AM	PIO responded to Barry/Wilson elementary: "Very well, Barry. Thanks for the lead. Should I copy you on information about any meeting I set up with John LeRoy?Mary Brooks
8/31/2006	6:04 AM	Barry Liebovitz/Wilson Elem. responded to PIO email: "I would be interested, however, a meeting with district level representation might be a better way to facilitate this meeting. We have district level representatives who guide local building projects, making principals aware of any potential impacts on their programs. I would suggest contacting John LeRoy with our Facilities Planning Department (407-320-0068), to coordinate a meeting of this nature. Sincerely,Barry Liebovitz, PrincipalWilson Elementary
8/30/2006	5:37 PM	PIO emailed Wilson Elem. School principal Barry Liebovitz: "Good afternoon Barry,As the public information officer for the SR 429-Wekiva Parkway Project Development and Environment Study (PD&E), I would like to coordinate a meeting with project team members, you, and any other appropriate school officials, to discuss potential impacts from this project and any concerns or questions that you might have. In addition to the large-scale public workshops, we have been meeting with various communities in your area, and will be continuing these dialogues as we work toward a preferred alignment alternative some time early next year.As you know the Florida Department of Transportation has jurisdiction over your area of the study corridor. We would be looking at scheduling something for mid to latest September at the earliest. This would not be a public meeting, just a meeting for you as the administrator and your key staff. We also plan to schedule presentations with School Superintendent Paul Vogel and the School Board.FYI, I'm here the rest of this week but will be on vacation next week, Sept. 4-10, should you try to reach me. I look forward to hearing from you with regard to your level of interest in such a meeting, as well as some potential dates and times. Mary Brooks

7/26/2006	2:50 PM	Jennifer/Paradise Development 407-648-0719 called and asked re: the hearing tonight, I had heard the decision was going to be at Kelly Park? PIO said no decision yet, still getting input, workshops this week. Public hearings and agency approvals February-March 2007. She said that's wonderful; she was about to get upset. PIO said will have comment forms

and absolutely tally who is in favor of what, and that gets weighed along with engineering analysis and government and agency input. She was thankful for the info.

10/18/2006	9:45 AM	Sheralyn/Seminole County/SCEA 407-665-2000 called and said working on minutes from last SCEA meeting and needed to know who someone was. She said first name was Lynn, not sure of the last name. PIO noted didn't sound like anyone from our group, went over our group attendees. She said then maybe it was someone from the public. She noted meeting is Nov. 7 at 4 p.m. or whenever the board meeting finishes. PIO said I would see her then.
10/10/2006	2:08 PM	PIO emailed Jerry McCollum/SC Engineer and Gary Johnson/SCEA Executive Director: "Good afternoon, Gentlemen, The SR 429-Wekiva Parkway Study Team has been asked to give a presentation and update during meetings with the following in Seminole County:Oct 11 530 p.m. Tom Vellanti, owner of the Twelve Oaks RV Resort at the resort office on SR 46Oct. 17 6 p.m. Wilson Place HOA, Lakeside Fellowship UMC, 305 S. Orange Blvd. Please feel free to call or email with any questions or concerns. Please let me know if you or someone else from the county plans to attend any of the meetings. Mary Brooks
9/28/2006	3:40 PM	PIO emailed Jerry McCollum/Seminole County Engineer and Gary Johnson/SC Public Works Director: "Good afternoon Jerry and Gary,As requested, I wanted to let you know that the Estates of Wekiva Park HOA wants to meet with Wekiva Parkway team members on Oct. 10 at 7 p.m. at the Panera near Target and Seminole Towne Center. We also are talking with the Wilson Place HOA about trying to schedule a presentation for their homeowners, just FYI. Will let you know when that's firmed up.Please call or email with any questions, etc.Mary Brooks
9/21/2006	11:00 AM	Sheralyn J. Brinson, Administrative Assistant/Seminole County Public Works Department/SCEA emailed: "Based upon the Board of County Commissioners' action changing their November meeting date from November 14 to November 7, the biannual SCEA meeting that was scheduled for November 14 is also rescheduled to November 7 at 4:00 P.M. at the County Services Building; 1101 East First Street; Sanford. The agenda for this meeting is forthcoming.
8/20/2006	1:54 PM	PIO emailed Jerry McCollum/County Engineer and Gary Johnson/SC Public Works Director: "Greetings Gentlemen,As previously requested, I'm writing to let you know that the Tall

Trees HOA has requested we attend their board meeting this Tuesday, Aug. 22 at 7 p.m. at their clubhouse. The Wekiva Parkway PD&E Study team will be represented by Noranne Downs and Brian Stanger of FDOT, Mark Callahan of CH2M Hill and myself. We understand the board meeting is open to homeowners so there may be a crowd there. Please let me know if one or both of you, or a county commissioner, would also like to attend so that I can update the HOA president Julian Steinbridge. Thank you. Mary Brooks"

3/17/2006	11:40 AM	PIO emailed Sheralyn Brinson/SCEA, copied Gary Johnson/SCEA Executive Director & SC Public Works Director: "Greetings,I wanted to let you know that I received the packet you sent with the formatted comment forms submitted by James R. Palmer. Mr. Palmer also sent them to us directly, as well as also sent the same info to other officials and agencies. We are responding to these comment forms, as we do to all of them. If you hear from any of those who submitted the forms, please don't hesitate to give them my contact information so that I can address their questions and concerns directly.Thank you for forwarding the information. Please don't hesitate to contact me with questions or concerns Have a great weekend."--1147 a.m.
3/17/2006	11:15 AM	PIO received mail from Sheralyn Brinson/SCEA administrative assistant with transmittal dated March 9, 2006. "Documents transmitted: 69 comment forms forwarded to Gary Johnson by Attorney James R. Palmer. A 2-page (undated) Letter from Attorney James R. Palmer. Enclosures" packet includes same form letter/comment forms re: preferring Kelly Park over the Ponkan Road IC in Orange County.
2/17/2006	5:52 PM	PIO emailed Jerry and Gary/SC Public Works, Anne and Tom/FDOT and copied CH2M Hill that Lake Sylvan Cove HOA in Sanford requested Wekiva Parkway project update Wed., Feb. 22 at 7 p.m. at the SC Sports Complex at Lake Sylvan Park.
1/11/2006	6:20 PM	PIO emailed Jerry McCollum and Gary Johnson as requested: "Happy New Year, Gentlemen!Hope your holidays were warm and wonderful - mine certainly were!Just to give you a heads up, the Glades of Sylvan Lake Reserve HOA has requested a Wekiva Parkway update at 7 p.m. on Feb. 16 at the Seminole County Sports Complex (Gary, the same place and folks we ran into each other last year). We should have updated concepts I hope) by then showing the removal of the yellow or northernmost alternative as per the SCEA.FYI. Let me know if you have any questions or need further information."

8/7/2006 9:30 AM Attended public workshop on 8/1/06. Submitted comment: "#1 - Sorry to see this has to happen at all. #2 - Would like to see the road that goes east of Mt. Plymouth (by Camp Challenge) be moved further east. #3 - Think Lake County East - Alternative 1 (split diamond interchange) best option except #4 - the 46 A'T' is going to create a traffic mess! Move it farther to the east and have it flow into the other road interchange. #5 - Mary Brooks was quite helpful."

Date Time Regarding  
8/2/2006 9:04 AM Submitted the following via e-mail to the attention of Gary Johnson, SCEA, on Fri, 7/28/06  
Dear Mr. Johnson: Seminole Audubon Society (SAS) would like to express its appreciation to the SCEA for addressing many of our concerns thus far about the Wekiva Parkway project in Seminole County. Our continued support for the Wekiva Parkway project has relied on SCEA's ongoing commitment to a transportation solution that is environmentally responsible and satisfies objectives set forth in statute. SAS reviewed the recent alignments released by OOCEA during the July 7th EAC meeting. We have serious concerns regarding the proposed addition of four lanes of frontage road along SR 46 adjacent to the Wekiva Parkway and the accompanying stormwater facility within Seminole County. According to the illustration entitled 'typical cross-sections for the Wekiva Parkway' provided by CH2MHill, the Wekiva Parkway within Seminole County west of Orange Boulevard would be straddled by frontage roads consisting of two west-bound travel lanes north of the Parkway and two additional east-bound lanes south of the Parkway. It is not clear to us why the equivalent of an additional four-lane road is needed along the Wekiva Parkway. The Seminole County Comprehensive Plan allows for only two-lane roads within the Wekiva River Protection Area, and more than one single-lane road along the Parkway would not be consistent with the Wekiva protection provisions. SAS suggests that two, single-lane frontage roads (or a single two-lane frontage road) should be adequate along the Parkway west of Orange Boulevard. Further, we propose that a reduced number of frontage lanes (with modified buffers and sidewalk dimensions) makes it possible to reduce the total right-of-way footprint, thereby avoiding the need to relocate the natural gas pipeline north into Lower Wekiva River Preserve and substantially reduce proposed impacts to public lands. In addition to these above-mentioned impacts to public lands in Seminole County recently proposed by OOCEA, SAS has also been advised that additional public land will be impacted for the Parkway's proposed stormwater retention facilities. We question the appropriateness of constructing a stormwater retention pond inside Lower Wekiva River Preserve when nearby vacant land appears to be available north and south of SR 46. SAS objects to this proposed impact to the Lower Wekiva River Preserve and strongly encourages the purchase of private, undeveloped property for the purpose of stormwater infrastructure siting. We respectfully request that our comments receive your highest degree of attention as design components of the Wekiva Parkway are further refined, and again we thank you for your commitment to keeping Seminole County 'Florida's Natural Choice.'"

2/14/2006	8:48 AM	__From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, February 14, 2006 8:48 AMTo: Pamela F. JonesSubject: RE: SR 46 FDOT #2402001Pam, I was out of town and just got this email. This is all part of the Wekiva Parkway PD&E Study, which I'm pretty sure you and I have corresponded about in the past. The conceptualls are available on the OOCEA website at www.oocaea.com or www.expresswayauthority.com . On the home page, click on the "Western Connectors" text link under "construction news". That will take you to the Wekiva Parkway page. Scroll down until you see the text links for the public workshop maps and other materials.We expect to update the maps sometime in late March.Mary Brooks
2/10/2006	10:03 AM	Pam Jones/Gaylord Merlin emailed: "Mary:Shelley Fox at FDOT said that the Expressway Authority was doing the Study on the SR 46 from Lake County Line to I-4 in Seminole County. I was wondering if you could give me an update and check and see if conceptualls of the proposed roadway are available so I could do a request to the Expressway Authority.Thanks,Pam JonesAssistant Project ManagerGaylord Merlin5001 W Cypress StreetTampa, Florida 33607813-221-9000813-221-9030 - Fax
1/30/2006	10:15 AM	Pam Jones responded to PIO email: "Hi Mary:Thanks for the update. I knew I better check with you to get the update. Thanks for your help and information.Pam"
1/30/2006	10:05 AM	PIO responded to Pam Jones: "Hello Pam,I'm not sure where you got that schedule, but it's quite a bit off. Based on the public comments and local government input from the November workshops and other meetings, we've been analyzing, revising and eliminating some of the initial alignment alternatives. Some new alternatives also have been added for consideration, based on local government requests, etc.Some time in March we hope to have revised maps of the more viable alignment alternatives, with the next public workshops scheduled for this summer, possibly in July. Based on public comment, continued local government input and further engineering analysis, a preferred alignment alternative will be developed and presented at public hearings either in late 2006 or early 2007.The PD&E study is scheduled to conclude with an approved alternative by March 2007.From there the project would enter final design, which usually takes 2-3 years. However, currently we do not have full funding for final design, nor right of Way acquisition or construction. At this point, given the funding challenges, it could be 2012-15

before construction could begin. Obviously, this far out that schedule is highly subject to change.FYI, the PD&E study schedule as well as all of the public workshop materials are available on the OOCEA website at [www.oocea.com](http://www.oocea.com). Click on the "Western Connectors" text link to get to the Wekiva Parkway page, and scroll down a few graphs for the map links.Again, we hope to have those maps updated in March. That's the latest. Stay tuned."

8/24/2006	4:12 PM	<p>"Aug. 24, 2006  Deborah Jorem  205 Capri Cove Place  Sanford, FL 32771  RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study  Viable Alignment Alternatives  Dear Deborah,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. We are in the process of setting up the first of what will likely be several meetings with your homeowners association to try to address your issues. Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks"</p>

7/31/2006	1:37 PM	<p>Attended public workshop on 7/25/06. Submitted comment: "I feel betrayed by the political leaders of Seminole county. My family moved to Seminole County from South Orange County. We were so happy to find such a beautiful, tranquil place to live. Sirens and traffic noise were replaced by bird songs. Our backyard view includes towering oaks and a huge magnolia tree. We are the third family to enjoy this view. This view once belonged to Katie and Luy Fox Wilson. Katie and Lucy sold this property to the Lee family. Their relatives live around the corner. The expressway will destroy both of their homes. These families have lived here since 1945. My heart goes out to them. I feel horrible about this. How can our elected officials look each other in the eye when they destroy what we hold so dear?"</p>

	<p>PIO emailed comment form response to Dae(cq) S. Kang jkang@ufl.edu: "Dear Dae S. Kang, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated by the Expressway Authority and the Florida Department of Transportation, along with hundreds of other public comment forms received, as well as input from local governments and state agencies. You requested copies of the various public workshop maps. Those maps and other project information are available on the OOCEA website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "corporate site" button. On the home page toward the left side of the screen you will see the "Construction Update" headline. Under that is text that includes the highlighted link for the "Western Connectors." Click on that colored, highlighted link and that will take you to the Wekiva Parkway page. At the top of that page is the link for all of the latest maps for the project. I'm in the process of also getting the traffic exhibits in electronic form and posted on the site. Once you've had a chance to review the maps, please feel free to call or email with other questions or concerns. If you have any trouble downloading the maps, please let me know. We expect that the public comment review and engineering analysis will result in a draft preferred alignment alternative for the project in November-December 2006. That draft preferred alternative must undergo official review and revisions. We expect to hold formal public hearings on the preferred alignment alternative in February or March 2007, with the study concluding with an approved alternative later that spring. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 4/12/2006	12:12 PM	PIO returned call to Sean Karnitz 407-376-1639 looking to buy house on Plymouth Sorrento Road north of 441, right off Lester between Vicks and Plymouth Sorrento. I was looking at the website; is the road going to be on the east or west side of Plymouth Sorrento? PIO noted has to be west of Plymouth Sorrento Road due to all the development permitted by city of Apopka. He asked how far from Plymouth Sorrento road, ¼ mile, ½ mile? PIO noted we were working on updating the alternatives as per local government feedback, hope to have updated maps with that type of info by late may. He said so this is like 5-6 years off? PIO noted correct, study scheduled to conclude spring 2007 with approved alignment. Then have to get funding for design, row acquisition and construction. Could be 2012-2015 before construction starts. He said oh, I thought they were further along. I'm not going to worry about it then. PIO asked if he wanted to be on

the mailing list? He said absolutely and provided his info. Sean.karnitz@cingular.com 2473  
Worthington Road, Maitland 32751

4/11/2006 2:39 PM Sean Karnitz called and left MSG 407-376-1639 I've got a question about 429 extension near Sorrento road and highway 437, thinking about buying a home near there and wanted to get some info from you to see if you could help me make my decision.

5/17/2006	3:38 PM	PIO worked on response to Mandy Keng/Brigham Moore: "Hello Mandy, Re: the Maitland Boulevard Extension Project, there was a shift in the alignment in the area of Keene Road and Stanford Road. This is reflected on the alignment concept on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . The alignment has basically shifted north on Stanford Road. Let me know if you have trouble finding or downloading that concept. The design team for this area (Section 210) is still working on revising the 90% complete plans including the details of the realignment, so there is nothing else available at this time. In our meeting yesterday, the firm said they're shooting to have the next set of plans ready on or around June 30, if you want to check back then. For the Wekiva Parkway, we are still refining the more viable alternatives (seen on the new map recently posted on the website), and are just beginning work on pond siting and other preliminary details. We should have more of this type of information at the next public workshops, to be scheduled for some time in mid-August. ROW maps typically aren't generated until we have an approved alignment and have begun final design. We are still in the PD&E Study phase, FYI. Mary Brooks"--347 p.m.
5/17/2006	11:08 AM	Mandy Keng/Brigham Moore emailed: "Ms. Brooks, I hope this email finds you doing well. I was looking for an update on the Maitland Blvd. Extension project. We have heard that there is going to be a realignment near the Keene Rd. section of the project. We represent owners of parcel numbers 283, 277 and 298. Could you give me an update as to how the route and preferred pond sites may be realigned? Are there any documents available to support the new alignment (i.e. pond siting report, ROW plans, etc.)? For the Wekiva Pkwy. project, are there any documents available as of yet? I have seen on the website that the routes have been narrowed down. Are there any pond siting reports or ROW maps that are available? Thank you for your help. Take care and have a wonderful day! Mandy Keng Project Manager 2963 Dupont Ave., Ste. 3 Jacksonville, Florida 32217-1724 Telephone: (904) 730-9001 Facsimile: (904) 733-7633 <a href="mailto:mkeng@eminentdomain.com">mkeng@eminentdomain.com</a> <a href="http://www.eminentdomain.com">www.eminentdomain.com</a>

3/30/2006 5:20 PM PIO returned call to Mandy Keng, relayed that due to scheduling challenges with local officials, schedule being pushed back. Was in meeting yesterday and looks like it could be mid- to late-May before we get through these meetings, get their input on what should go or be added and be able to post the updated maps. She asked are you still having a public workshop this summer? PIO noted we'd planned on July but with the scheduling challenges it will likely be more like august. She said she appreciated the info and thanks for calling her back.

3/30/2006 2:05 PM Mandy Keng/Brigham Moore in Jax left MSG calling concerning the Wekiva Parkway project. I was wondering if there had been any update to the route selections?I noticed on the website it said in Feb. or March you'd narrow down or add a couple of alternatives. If you could give me a call I'd appreciate it.904-730-9001 (904-730-9783) Thank you.

PIO returned call to 386-427-4460 (call at 826 a.m. but no MSG), Kevin said he called earlier, had question about something he saw on Wekiva Parkway bulletin, there's map on first page, if you look very closely it appears to depict one alignment that carries 417 west and arc NW to 46. should that be construed as the selected alternative? PIO said no, we have two alternatives, SR 417 connection to I-4 and SR 46 connection to I-4. he said there is a public meetings tonight? PIO said yes at the Sanford Civic center. PIO asked if he had a home or business on one of the alternatives? He said yes, I have a home that could be off the 417 alignment, used to be Cobblestone Crossing. It's a condo conversion inside an apartment complex. It's about halfway between 46 and 46A. he said you've answered my question, I assume there'll be information about these alignments tonight? PIO said yes, we have almost 100 boards worth of info, different configuration concepts for the connections to I-4, etc. he said okay, then I'll see you there tonight.

8/20/2006	4:07 PM	<p>PIO responded to comment form: "Aug. 20, 2006Jean King5402 Fawn Lake Crt.Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear Jean,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007 Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cf1.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 8/7/2006 12:18 PM Attended public workshop on 8/1/06. Submitted comment card: "Main concern is drainage from new expressway. Please contact me for diagrams and details. Currently Wekiva Pines Country Establishment is flooded by rain due to re-route of intended flow away from Black Water Creek by residents between subdivision and creek. Currently subdivision not draining as it was designed to do - causing back-up and flooding of multiple lots. Mine is 3274 on your map. Concerned that add'l flow at existing pipe under 46 will exacerbate problem."

Regarding  
PIO worked on comment form responses: Robert Kohl, Randy Robinson, Beth Emmons researched property - form gives address as 5312, but property appraiser lists address and records at 5322 Effie Dr.; it's parcel 2247 on OC concept, SW of Effie & Paulette, approx. 1500' west of OC-4), Pasert Khamphanh (4th parcel east of Effie north side Paulette, possibly parcel 2465, but concept lot line doesn't match OC property appraiser map), Mike & Pamela King (NE end of Paulette St., parcel 2463 at minimum would abut east side of OC4; form lists residence address as 3412 Paulette; OC property appraiser lists mailing address as 3612 Paulette)Copied response letters for file and CH2M Hill and sent.--416 p m.

1/27/2006 12:24 PM

Comment Form:Mike and Pamela King3412 Paulette StreetApopka, FL 327123403 Paulette StreetApopka, FL 32712Given the date of this response, we obviously taken time to carefully examine the two alternative routes proposed by the Expressway Authority / PD&E Study. After conducting a general study of our own in conjunction with other effected home owners, we have reached the conclusion that we oppose any portion of the alternative routes falling between Kelly Park Road north to the Lake County / Orange County Line and from Plymouth Sorrento Road west to the area west of Effie Drive, including all spring water sources and protective land along the alternative routes proposed by the Expressway Authority because of the following reasons / facts:1.) This area within the listed boundaries contains the most open spring water sources compared to the land east and / or west of the listed boundaries. These spring water sources and surrounding land are more critical to the water shed due to the land elevation These springs are a critical part of an ecosystem which supports the life sod at least 6-12 federally and state protected animals. The clean water is a must for their reproduction including feeding habitat. These springs are used for family recreation as well.2.) The alternative routes take the most damaging paths, which would destroy the longest living and largest species of live oak trees and pine trees to include other rare and sensitive species of trees and foliage. These trees act as a noise pollution and air pollution buffer from the existing roadways surrounding this area. This is what provides the fresh, clean air we breathe and obviously need to raise our families in a healthy environment.3.) The property and home owners affected by these routes have lived here a substantial part of their lives and some have already raised their children here, who are now raising their children here. The position of the proposed routes clearly takes the property / homes most centrally located within the listed boundaries. It is the most intrusive proposals due to the fact it would render the remaining homes useless, as they would fall within the narrow east/west boundaries. The routes would be to close for residents to t remain in their homes. The way noise trends in the county would make it unbearable by day or night. The last remaining rural / country / frontier of Orange County would be laid to ruin, as a concrete jungle with commercial and cluster development would ensure all at the hands of financial and political gain of the government entities and persons involved in this project. Money and lack of quality control by the local government has turned the county into an over developed melting pot which will be the cause of our down fall in the future. Emery Smith Subdivision consisting of Paulette Street would be completely destroyed by these routes. Why wipe out the only subdivision (40+ years old) in the entire area with two near

homes recently built. Ten families occupy the ten homes that would be taken or rendered useless by these routes. This is unacceptable for a subdivision of this size and population to be destroyed for financial gain of the Expressway Authority. It's also more than a coincidence that these two routes directly take the property / homes of the two most vocal land and home preservation activists residing within these boundaries. The residents within these boundaries live in harmony with the environment and are good stewards of the land. This area consists of five retired elderly widows that would be directly or indirectly impacted by these routes.4.) The proposed routes obviously have underlying goals of influencing and directing residential and for commercial development through coordinated efforts with the City of Apopka, Orange County future growth planning and private development / land investment companies. The residents of the area have been relatively quiet until these recent and last minute attacks against their property and homes. As the saying goes "the sleeping giant has been awakened". No one in the area is planning to lay down and simply let the taking occur. Those responsible for these acts will be exposed for the questionable and unethical tactics being used in the road project. If any type of study has been done in the listed boundaries and adjacent land parcels a blind man could see this not the path of least environmental or residential impact

There are home / property owners from the intersection of the Plymouth Sorrento Road and Haas Road that want the road to their properties. The county has already purchased land in this area which could be combined with voluntary sellers east on Hass Road. This area is more open, less settled and will provide direct access to the 46 by-pass. It will not look good for the Expressway Authority to over look land acquisition from voluntary sellers that could just as easily accomplish their road project. The homes for sale on Onditch Road are posted out of fear of the road coming and the majority of home owners on this road oppose the proposals by the PD&E Study. Further more this road project should be shared by the east side of Plymouth Sorrento Road starting from the outside of the listed boundaries. There is two large tracts of land for sell on the east side of Plymouth Sorrento Road and on the west side at Kelly Park Road intersection. Other viable alternatives exist to the west of Effie Drive that are of less environmental and residential impact. Large tracts of land with no or vacant houses deterioration. Also, frontage houses along Plymouth Sorrento Road (west side) from Kelly Park are outdated and run down rental properties or vacant up to Onditch Road. It would make more sense to straddle or Parallel Plymouth Sorrento Road being it is already there and space is available. If proper studies have been done along the perimeter of the listed boundary then the Expressway Authority would be aware of the inactive foliage nurseries that occupy large tracts of land, more appropriate for the needed routes. Many of these nurseries are barely operational or completely dead, which render them for less expense for acquisition than taking newer family occupied homes. Many of the operational nurseries in the area illegally employ non-U.S. citizens and should not be given consideration as lawfully operated businesses

The residents within the listed boundaries have also noticed that the unincorporated areas of Orange County are the most targeted by the Expressway Authority. This is obvious because of the favoritism being shown towards land that is annexed into city limits of Apopka. The annexed properties are not being impacted near as much as the unincorporated residents are. Again, politics is being given over the environment and citizen impact.

1/13/2006	1:59 PM	PIO returned call to Mike King (407) 353-1786 / (407) 886-8928, left MSG that I'd seen his call earlier but when I tried to return it got no voicemail. PIO acknowledged he'd spoken to associate Candace and noted I was in meeting where discussed the alternatives that did and did not have public support, adjustments being made based on that and governmental input. PIO noted he can call me back to discuss further or to get maps, which we hope to update based on input by March.
1/13/2006	12:02 PM	Candace/QCA emailed: "Mary,I had a call from Mike King (407) 353-1786 / (407) 886-8928 regarding the Wekiva Parkway. He started the conversation wanting the zip code for the mailing address for the PO Box to send the comment form because the zip was cut off. Which I gave him, but over our 45 min conversation he talked about his concern about the proposed alignments in Orange County going over several spring heads and feels that the Engineers are not taking the environment serious and will in turn

contaminate the water system that the residents use from their wells and kill the bald eagles and other protected species. He feels there should be an alignment east of Plymouth Sorrento Road. He also has a problem with the governors appointed board. He feels they do not have the public's best interests at heart and are only looking to develop the area for money in their pocket. He also stated there was a meeting at a Hotel in Altamonte Springs during the holidays that had key officials there to listen to the public opinion but feels the meeting was set at such a time that the public could not attend and feels this was intentional. I explained from the beginning of the conversation that I was not the PIO for this job and felt that he should contact you. He obviously needed to vent, so I let him. I explained that the alignment was not set at this point and the engineers were working with various environmental personal throughout the region. And he said he got my number from the Expressway Authority (just FYI). Please contact Mr. King as soon as you get a chance. He has lots of questions. Candace Patterson"

Nicole King The (Leesburg) Daily Commercial

Date Time Regarding  
8/1/2006 3:30 PM PIO arrived Lake Receptions and helped team set up fro meeting. More early arrivals at 4 p.m. Did extended media interviews with Erin/Orlando Sentinel and Nicole King/Leesburg Commercial.... Neither had done any background on the project, so PIO had to go over details and timeframes at length.

Contact Notes  
Shannon King

Date Time Regarding  
6/5/2006 10:44 AM Shannon King 407-312-6809 called and said her parents have a house on Plymouth Sorrento Road and she's trying to help them figure out what's going on with the project. She said it looks like from the map that either way you go with this you're going to take their house. We're just trying to figure out the timeframe for all of this. PIO noted study schedule (spring 2007), followed by final design and ROW acquisition. PIO noted future phases not fully funded so that will affect schedule. noted have heard 2012-2015 before we might get to construction but again heavily dependent on funding, noted some money to kickoff design and a little for ROW, but not enough now to cover full phases. PIO noted public meetings now looking like late July instead of August, and her parents will get the newsletter, which we're working on, and the meeting notices. PIO asked where they lived? She said her Parents live 6104 Plymouth Sorrento Road. PIO said I'd have to look that up to know for sure. She said it's pretty clear from what she can see on the map, can see Haas and Ondich. PIO noted it's possible the remaining alignments could shift based on public comment and/or feedback from government agencies, but this is what we're leaning toward at this point. PIO said in addition to the alignment info the guys have started working on preliminary siting for retention ponds, and that should be available at the public workshops. PIO said look for info either late June or first week of July. She said okay and thanks for the info.

Contact Notes  
Justin Kirkland

Date Time Regarding  
3/16/2006 1:17 PM PIO called back Justin Kirkland and relayed Deason's number. He was grateful for the info.

3/16/2006 11:40 AM Justin Kirkland 407-842-7022 called looking for info on 429. PIO asked if he was referring to section known as Wekiva Parkway north of 441? He said no, south end from 192 to I-4. PIO noted another PIO works that section and think that may be the Turnpike section. He said he looked at the map online and it was the turnpike. PIO noted Christa Deason was

the contact for that agency though don't have her number handy. PIO said I could look for it and get back to him. He said that would be fine. Call 407-427-0172.

Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment  
AlternativesDear Joann,Thank you for submitting a public comment form for the Wekiva  
Parkway Project Development and Environment (PD&E) Study. We appreciate your time  
and concerns. Your comments are being reviewed and evaluated along with the more than  
540 other forms received, as well as input from local governments and state agencies.  
More than 1,200 people attended the recent public workshops. Currently we are  
evaluating the public comments - many of which represent competing interests - as well  
as government feedback, and continuing the engineering analysis with regard to the viable  
alignment alternatives. That information will be used to draft a preferred alternative by  
December or January. That draft preferred alternative also must undergo local  
government and state agency review and revision before being presented at formal public  
hearings in March 2007.Following the hearings the preferred alternative must be approved  
by the Expressway Authority, Florida Department of Transportation, Seminole County  
Expressway Authority, Orange and Lake County officials and other local, state and federal

entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

Date Time Regarding  
2/6/2006 2:28 PM PIO worked on comment form responses: Robert Kohl, Randy Robinson, Beth Emmons researched property - form gives address as 5312, but property appraiser lists address and records at 5322 Effie Dr.; it's parcel 2247 on OC concept, SW of Effie & Paulette, approx. 1500' west of OC-4), Pasert Khamphanh (4th parcel east of Effie north side Paulette, possibly parcel 2465, but concept lot line doesn't match OC property appraiser map), Mike & Pamela King (NE end of Paulette St., parcel 2463 at minimum would abut east side of OC4; form lists residence address as 3412 Paulette; OC property appraiser lists mailing address as 3612 Paulette) Copied response letters for file and CH2M Hill and sent.--416 p m.

1/30/2006 1:35 PM PIO drafted response for Jean Kohl: " Dear Jean, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. There are many questions that cannot be answered this early in the study process. Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being revised or shifted, some removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits and other information are available and will be updated in March on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. "--147 p.m.

1/30/2006 1:17 PM Researched location for Jean (& Robert) Kohl/3603 Kelly Park road. Parcel 2037 is NE of Effie & Kelly Park Road, 200-300' west of OC4/OC2, just outside interchange oval.

1/27/2006 12:43 PM Comment Form: Robert Kohl 3603 West Kelly Park Road Apopka, FL 32712 I agree a new road is needed. However, the area protected is not the best available. There is much open land that would have a lesser impact on endangered animals. Most important is the aqueduct water supply. That could have a disaster for our drinking water supply.

1/27/2006 12:26 PM Comment Form: Jean Kohl 3603 West Kelly Park Road Apopka, FL 32712 Changing our way of life. Pollution - We have wonderful water; with new roads we'll lose our wonderful wildlife. We will lose our rural settings. We have run out of places to live in a quite and peaceful area.

8/2/2006                8:50 AM                Attended public workshop on 7/25/06.

Contact                    George Kosmac                    Seminole County Public Schools  
Notes  
9/18/2006                9:00 AM

Tom Percival, Mark Callahan, and PIO met with George Kosmac, SCPS Deputy Superintendent and Director of Operations, John Leroy, Project Manager Facilities Planning Scott Stegall, Director Capital Outlay, Building Official, Facilities Planning Department, and Principal Barry Liebovitz at Wilson Elementary in principal's office. Mark brought roll plots and went over the alignments from the workshops and latest adjustments. He noted we're avoiding the treatment facility on school property. Q: is it taking the vet's property to the north? Mark said yes. It was noted there's another vet's office also in the area Q: will there be a problem with the retention planned next to their ASR? Mark said don't think so. Mark noted we'd be elevated over Orange, and then come down somewhat and then go up over Wilson. Mark noted we're working with Capri Cove and Tall Trees HOA's, Lakeside church, and have come up with some adjustments. Q: aren't there student walkers from the back of Tall Trees? Barry said they come along Wilson Road. There are some partitions along the fence they can get through. Mark said we will bridge Wilson and provide sidewalk and it would be lit under the bridge. Q: will it be an obstacle for them to continue walking? Mark said no, don't think there's sidewalk there now ... part of the sidewalk went in with new Wilson Place development. Re: 417 alternative from the workshop ... adjustment to move it away from Capri Cove and will end up a little farther from the school. But there is an issue with the church. It's also a little farther from Tall Trees... Alternative B is a tad closer to the school. Q: will all the alignments, will there be any taking from the school? Mark said no, very careful to avoid that. Q: what about noise abatement? Mark said we will look at it. We recognize that schools have special criteria. It would be a noise wall if anything. Discussion that distance from school property to road edge would be 100-150'. Q: what grade at the school? Mark said the road might be 10' high or so. Q: will there be fencing beneath the roadway? Mark said ROW is fenced unless there is a vertical wall there. Also any ponds would be fenced. Q: Barry asked about egress off International Parkway? Mark said yes, that's the proposal. Mark noted only access to 417, not I-4 front International Parkway. Mark noted we're looking at refinements throughout the project. We hope at the beginning of the year to have recommendation for DOT, EA, SCEA, Lake County Board of County Commissioners, etc. and then public hearings in March-April. Then we would seek federal approvals. Mark noted we don't have funding to move forward. Looking at \$1.5 billion and growing. He noted the school system's involvement in planning will be very helpful. Mark noted 417 has more community impacts but a lot of traffic wants to get to Lake County. The SR 46 IC we would have to provide local 46 access, systems connection to the Wekiva Parkway and something for people on 417 wanting to get to the facility. He noted we're finishing the impact evaluations. There are more homes on 417 than 46. We're trying to weave our way through. Q: how many years before you start construction? Mark said 2012-2015 is the absolute best case depending on funding. We need to get things documented regarding the school. Barry expressed concern about egress from school to the parkway. George was concerned about noise potential and not inhibiting kids walking to school. Mark asked if school system dictated how kids should walk to school? Barry said it's up to families how kids walk to school. A lot of our students are driven to school. Some walk on Orange, Wayside and Wilson. Schools officials said they have requested sidewalk on Wilson, but the county said since the speed limit is 25 mph it's not warranted. Mark reiterated there would be sidewalk under the bridge, especially this close to the school. Scott said the main thing is you keep the Wilson Road connection. He said the ponds don't really concern us. It's primarily the co-location to the well. Mark going to get back with Glenn Forest on that. Scott noted there were setback requirements on that. PIO asked if we need to do presentation to school board or leave it at staff level? George said staff for now, especially until you get those issues squared away. George said there is one school board member interested. He might speak with her.

Mark said we can do one-on-one meetings also. Discussion of impact to Lakeside Fellowship UMC. Mark gave Barry the roll plots and said would send an additional set. PIO mentioned Yankee Lake Elementary school site. Scott said they heard initially the ROW acquisition would occur to the north. Mark noted we're looking at the north and south though the south has three times the impacts. Scott asked how much additional ROW would be needed? Mark said 46 ROW is 200', so 65'. Then another 50' for the gas line easement that needs to move north. Q: why can't gas line stay in ROW? Mark noted gas company wants separate easement. Scott said right now we've lost 50' for the easement, then we'd lose 80' (?). Mark said he's going to send them the north and south alternatives on SR 46. Scott said if it's half it's 80', or 120', the easement is already conveyed. Mark said some uses of easement allowed but will be restrictions such as buildings. Scott said Yankee Lake Elementary not planning to go forward at this time because of location, and issue of attendance boundaries due to proximity of Wilson Elementary. There are also Department of Justice issues. They confirmed the school district owns the parcel. George said the real question is how much of it is it going to take? We would be concerned if we'd lose a useable site for an elementary if the project takes too much. Mark reiterated he would get them additional plots, PDF's. PIO offered to coordinate follow up meetings, just let me know.--932 a.m.

Date	Time	Regarding
11/1/2006	5:44 PM	PIO responded to Karen Largmann llargmann@yahoo.com email: "Hello Karen,No decision has been made yet on any alignment or interchange alternative.You can view all of the maps from the summer public workshops on the Expressway Authority website at www ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text

link for the "Viable alternatives workshops" maps. Please be aware that we have been evaluating the public comments and feedback from local governments and state agencies -- as well as meeting with HOA's, churches and schools -- since the workshops, and the alignment alternatives have been shifting in light of various concerns. We will continue to adjust the alternatives and assess impacts as we continue these meetings with community stakeholders. By January, we hope to be ready to recommend a draft alignment alternative -- including interchange recommendations -- to be reviewed and revised by local governments and state agencies. We will provide the next versions of the alternatives' maps to the public at that time (right now they're changing too quickly to disseminate). We then plan to bring the recommended alternatives forward for formal public hearings in March or April 2007. The PD&E study is expected to finish in early summer with an approved alignment alternative. The impact to properties on SR 46 will depend on whether we decide to widen to the north or to the south, and of course which I-4 interchange location we go with. Again, all of that is still to be decided. I hope this update helps. Please feel free to call or email with other questions or concerns.

11/1/2006	10:02 AM	Karen Largmann [llargmann@yahoo.com] emailed: "MaryI live in Lake Forest off of SR 46 in Sanford. I am concerned about where the proposed Wekiva Parkway (SR429) will be placed. I understand the southern route is being looked at. I would love to see a good map I could actually read that will show where this road is proposed to go. Will it affect Sylvan Lake Reserve, St. Andrew's church, etc. I need to know. Also, is it fairly certain that it will NOT go on 46 in front of Lake Forest? Your help would be appreciated. Karen Largmanngrtr@blissnet.com

Contact Notes	Kari & Richard Larsen
Date	Time
1/27/2006	11:11 AM
	Regarding Kari Larsen 407-323-5131 said they're looking to buy a house on the river, there are 28 homes on south side of 46 at river, she thought it was Wekiva Run, but it was Wekiva River Oaks. Very concerned about whether the property would be acquired for the project. She said property in question is 144 Wekiva Run Circle. She said she was looking at map on website, but it didn't answer her question. PIO said if she was on website now? She said yes. PIO walked her through finding map text links (she had been looking at the map in the fall update-newsletter). PIO directed her to Seminole alternatives map. She said it's too small to read the writing. PIO instructed her to zoom in until she could see the parcel in question. PIO noted several times that because we have to cross the river n the current bridge location, just make it wider, that only the properties right along 46 would likely be affected. After some discussion she and her husband determined their parcel in question was on the south side of the subdivision, parcel 2953. She said the purple line goes right over the property. PIO noted the dashed purple line is the study area limits; the actual alignment alternative in this area only runs along S.R. 46 and is represented by the wide blue line. She asked several times if we could possibly buy the property in question. PIO noted we only buy the properties actually on the anticipated road corridor, which would be those along S.R. 46. PIO noted we would not need to buy the ones on the south end of this subdivision. PIO noted, however, I cannot guarantee whether they would not be able to see or hear the expressway from their property, which is an issue for some folks. She said so this really damages this subdivision. PIO noted the plan at this point is to have elevated expressway in this area with frontage roads for local access. PIO noted some people are glad for the proposed improvement because they say it's difficult now to get out onto S.R. 46 because of congestion and dangerous because of speeding traffic and accidents. She said that's true, I guess you could look at it both ways. PIO acknowledged people have conflicting interests and opinions with regard to the project. They're not on mailing list, or if they are they weren't paying attention to info until they started looking at this property. Please send project info to Richard & Kari Larsen, 4774 Cains Wren Trail,

Sanford 32771. She asked when would the project be done? PIO noted study scheduled to conclude March 2007 with a selected alternative. PIO noted these maps will be updated in March base on public comment and local government input, maps being revised now, some alternatives coming off, new ones going on, others being tweaked. PIO reiterated in this location, however, only one way we can go, along 46. PIO noted can't tell her how far away road will be because don't know if we'll center on 46, or be a little to the north or south of it. She said you've been very helpful, given me more info than anything. Thanks. PIO said check the website in mid-march for updated maps, or welcome to call or email me, gave her my email address.--1135 a.m.

Notes		
Date	Time	Regarding
5/15/2006	11:50 AM	Dr. Ben Larson 407-333-3940 called and said I used to keep in close contact with you about the 417 extension. I was wondering if they'd made a decision on that yet? PIO noted no, still have two possible connections to I-4: 417 - which has a lot of support and makes the most engineering sense, though it has issues - and SR 46, whether it's a full parkway connection or it drops down to an at-grade arterial. PIO noted there is a new map on the website that shows those. He confirmed it's on www.oocaa.com? I said correct; it's just the overall alignment alternatives, but you can zoom in on whatever area you're interested in. PIO noted we'll be sending the project newsletter out in June hopefully, and plan to have next public workshops in mid-August though haven't set dates. He said he'd keep an eye out for that.

Date	Time	Regarding
11/2/2006	2:12 PM	Cameron Lashbrook/Lakeside Fellowship UMC responded to PIO email: "Mary, Thank you so much for your help. Your staff is in my prayers as you all have difficult public relations jobs!! Peace, Rev. Cameron J. Lashbrook Pastor Lakeside Fellowship UMC
10/30/2006	9:52 PM	PIO responded to Cameron Lashbrook/Lakeside Fellowship UMC: "Hello Cameron, I've been away on vacation for the last week or so and am just catching up on my emails. Of course I remember you. I also got your voicemail. The decision on the alternatives for the Wekiva Parkway involves approvals required from various agencies. Obviously the FDOT is primarily responsible for developing this project in Seminole and Lake Counties (likewise the OOCEA in Orange County). Our understanding of the legislation that created the Seminole County Expressway Authority is that they also have the right to approve or deny any alignment in their jurisdiction. There seems to be some differing interpretations, however, on the meaning of that legislation. The members of the SCEA Board are: Bob Dallari, Chairman - County Commissioner Art Woodruff, Vice Chairman - Sanford City Commissioner Carlton Henley - County Commissioner Brenda Carey - County Commissioner Randall C. Morris - County Commissioner Dick Van Der Weide - County Commissioner Gary L. Brender - Lake Mary City Commissioner We also have to get approvals from state agencies including DEP, the St. Johns River Water Management District and others, as well as ultimately from the Federal Highway Administration in hopes of securing federal funding. We are scheduled to go before the SCEA on Nov. 7 to provide an update on the Wekiva Parkway PD&E Study. Perhaps you might find it worthwhile to attend that meeting? Date: 11/07/2006 Time: 4:00 PM (or as soon thereafter as possible) Location: County Services Building BCC Chambers - Room 1028 1101 East First Street Sanford, FL 32771 I hope that helps. Please feel free to call or email with other questions or concerns. Mary Brooks 956 p.m. PIO emailed additional info to Cameron/Lakeside UMC: "Cameron, Some additional info re: the SCEA from their website at <a href="http://www.seminolecountyfl.gov/bcc/scea/">http://www.seminolecountyfl.gov/bcc/scea/</a> : SEMINOLE COUNTY EXPRESSWAY AUTHORITY SCEA has several important roles in the transportation and planning areas: tracking the planning process for future toll roads located in Seminole County; influencing the decision making processes of all entities dealing with toll road facilities in the county, and protecting the interests of the citizens of Seminole County in these areas. The SCEA will play a vital part in the location and possible implementation of the extension of the

Western Beltway (Wekiva Parkway) to SR417/Greenway.Florida Turnpike Enterprise assumed responsibility for the operation and maintenance of the Expressway and for toll collection activities. Thus, the Turnpike Enterprise retains all rights, title, revenues, liabilities and responsibilities that may be associated with the Expressway segments that are within Seminole County's boundaries.Just FYI.Mary Brooks

10/24/2006	3:38 PM	<p>__From: Cameron Lashbrook [mailto:clashbrook@lakesidefellowship.org] Sent: Tuesday, October 24, 2006 3:34 PMTo: mbrookss414@cfl.rr.comSubject: Lakeside UMC and Wekiva Parkway QuestionGreetings Mary,My name is Cameron Lashbrook, and I am the pastor of Lakeside Fellowship United Methodist Church. I am trying to find out who is on the decision-making board whose task it is to choose the final route for the Wekiva Parkway near I-4 and SR 46. I thought you might know. Please drop me a line here or call me 407-416-7644 (cell) or 407-330-6560. Thank you for your assistance!Joy on the journey,Rev. Cameron J. LashbrookPastorLakeSide Fellowship UMC</p>
10/24/2006	3:30 PM	<p>Cameron Lashbrook/Lakeside Fellowship UMC pastor called and left MSG: we saw you all at the meeting last week. Thanks for being here. Trying to get name of city council representative who is on the decision making body about the Wekiva Parkway route. Want to contact that person to make them aware of our position. If you know or can you point me in the right direction, I'd appreciate it. C 407-416-7644, o 407-330-6560.</p>
10/10/2006	5:30 PM	<p>PIO called Brenda/Lakeside Fellowship UMC 407-330-6560 x101 (Lashbrook x102) to see if we could still meet with them at 6 p.m. to get the church discussion out of the way before the HOA. She said if that would be helpful for us, she was sure that would be fine with the pastor.</p>
10/10/2006	4:55 PM	<p>PIO called Charlie Crim/Wilson Place HOA to relay meeting will also include Church issues and folks. He said "invite them in - that's fine." PIO noted just wanted to let him know we will also be covering church issues. He said that's fine.</p>
10/10/2006	4:42 PM	<p>Dave/Ch2m emailed team re: Lakeside Fellowship UMC meeting: "I called Pastor Lashbrook of LFUMC and he said having a combined meeting would be a good idea. So the meeting on Oct. 17th would be for the Wilson Place HOA and for LFUMC."</p>
10/10/2006	4:03 PM	<p>PIO responded to Dave/ch2m re: Wilson Place / Lakeside meeting: "I think that's a fine idea and had toyed with it myself, though I neglected to get with you on it. Since the church is hosting the meeting, the HOA would be hard-pressed to have an issue with it. Go ahead.Mary Brooks</p>
8/23/2006	3:05 PM	<p>PIO responded to Dave, copied all re: Lakeside Fellowship UMC: "Dave, Got it. Will add to the database and community meeting requests chart noting your coordination on scheduling.Mary Brooks</p>
8/23/2006	1:22 PM	<p>From: David.Lewis2@CH2M.com [mailto:David.Lewis2@CH2M.com] Sent: Wednesday, August 23, 2006 1:22 PMTo: mark.callahan@CH2M.comCc: Brian.Stanger@dot.state.fl.us; Tom.Percival@dot.state.fl.us; mbrookssr417@cfl.rr.comSubject: Wekiva Pkwy - Lakeside Fellowship United Methodist Church, SanfordI spoke with Pastor Lashbrook after he left a message requesting a meeting on the potential impact of the project on the church property (located in the SE quadrant of the Orange Blvd./Wayside Dr. intersection). I told him we are looking a some alignment modification alternatives at the request of the Capri Cove HOA, the Tall Trees HOA, and others in the area. He said he would prefer to delay the meeting until after those concepts are developed. I told him I would contact him to arrange that future meeting.</p>
8/21/2006	9:58 AM	<p>"Aug. 21, 2006Rev. Cameron LashbrookLakeside Fellowship United Methodist Church305 S Orange BoulevardSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear Rev. Lashbrook,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Please contact me so we can set up a meeting to discuss these issues further. In the meantime, your comments will be reviewed and evaluated along with the more than 400 other public comment forms</p>

received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

7/31/2006	11:40 AM	Attended public workshop on 7/25/06. Submitted comment: "My concern is for the future use of Lakeside's current property to achieve its mission and master plan. The likely route connect 417 from the I-4 interchange to SR 46 will mean taking a good portion of our property, possibly affecting our current worship facility and likely affecting our ability to execute a family life center and a new worship space (sanctuary). Additionally, I am concerned about holding off our future plans for 4-6 years until construction begins. We would like to consider the possibility of an early purchase of the property is necessary, so that we can move forward in achieving our goals. Thanks for your work for the State of Florida."

Notes		
Date	Time	Regarding
1/27/2006	5:09 PM	PIO called other number for Scott Lawlor, left detailed MSG that SCEA voted unanimously on Dec. 20 to remove yellow or northernmost alignment alternative from consideration. Noted the SCEA has to approve any alignment in SC and didn't want that one considered further. PIO noted I posted info on this project on the website, for his future reference. PIO also noted we're not leaning toward 417 alternative per se, though it is still in consideration. PIO noted we have S.R. 46, S.R. 417 and SCEA asked us to look at alternative going down 46 to International Parkway to 417, so there are three left being considered. PIO also noted if he seeks further confirmation, he can check the SCEA website or get their meeting minutes re: the vote on the project..

1/24/2006	3:32 PM	Scott Lawlor 407-321-5247 left MSG from Sanford I spoke to you once, maybe month and half ago in reference to the northern connector. If you could give me a call back at 407-509-2054 I'd appreciate it. I Just want to confirm what I saw on the website that they have done away with the northern route and are leaning toward the southern route which connects it to the 417, ... the one that goes down S.R. 46. If you would confirm that for

9/26/2006 3:30 PM PIO received formatted comment form (Cindy Poirier campaign) dated 9-24-06: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children and the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."

3/24/2006	1:44 PM	<p>-----Original Message-----From: Richard Lee [<a href="mailto:korusorchid@hotmail.com">mailto:korusorchid@hotmail.com</a>]Sent: Friday March 24, 2006 1:44 PMTo: <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>Subject: Thanks for Map of Wekiva ParkwayDear Ms. Mary Brooks.Thanks again for the Wekiva Parkway Map and your kindly letter.I am a president of Korus Orchid Corporation at 1750 and 1760 Plymouth-Sorrento Road, Apopka.Since my property at 1760 Plymouth Sorrento Road have been affected for 429 Express way extension.The map was so clear and helpful to me to expending my additional greenhouse project.Please put my name on your list if you have and send me upgrade information and map.Thank you.Sincerely yours,Richard Lee.</p>

3/20/2006	11:04 AM	Nereyda/Korus Orchid Corp. called back, said she went online and printed the map but need more info. PIO noted I was just looking up their location in the database. Saw parcel off Plymouth Sorrento Road but not directly on. She said it's 1760 and 1750, and one is directly on the road. PIO researched the other address and saw it was on the road. PIO relayed that initial alternative does hit back half of west property, though noted with maps being updated will have to wait until April to see the latest impact. She said the property in the back was the one they were most concerned with. PIO reiterated would drop the map in the mail today. She said this information was helpful, thanks.
3/20/2006	10:36 AM	PIO returned Richard Lee's call. Nereyda said he was out, but asked if I was calling about the 429? PIO said that's correct. She said he needs an appointment with you. We're on Plymouth Sorrento Road. We have 5 acres plus 10 acres on back of us. He wants to build but wants to know what's happening with the road. PIO noted maps were on the website, do they have internet access? She said yes. PIO gave her web address and text links to get to maps. PIO also noted I had 11x17" copies that I could send her one of. She said he wanted to come by today. PIO noted could drop it in the mail to him today and that would be easier. She said they would appreciate it very much. Send info to Richard Lee, Korus Orchid Corp., P.O. Box 303, Plymouth 32768 Nereyda said we're located between 441 and Ponkan. PIO noted I'd send them the map for OC; PIO also noted sending initial alternatives maps, but that we are in the process of updating those and should have new maps by end of April. She said I understand. She thanked me for calling him back.
3/20/2006	9:14 AM	Richard Lee called and left MSG 407-880-0222 I'm very interested to receive map of 429 extension at Plymouth Sorrento road area. Please give me a call and let me know some information. I like to extend my greenhouse but want to know what you're planning first.

9/18/2006 9:00 AM

Tom Percival, Mark Callahan, and PIO met with George Kosmac, SCPS Deputy Superintendent and Director of Operations, John Leroy, Project Manager Facilities Planning Scott Stegall, Director Capital Outlay, Building Official, Facilities Planning Department, and Principal Barry Liebovitz at Wilson Elementary in principal's office. Mark brought roll plots and went over the alignments from the workshops and latest adjustments. He noted we're avoiding the treatment facility on school property. Q: is it taking the vet's property to the north? Mark said yes. It was noted there's another vet's office also in the areaQ: will there be a problem with the retention planned next to their ASR? Mark said don't think so. Mark noted we'd be elevated over Orange, and then come down somewhat and then go up over Wilson.Mark noted we're working with Capri Cove and Tall Trees HOA's, Lakeside church, and have come up with some adjustments.Q: aren't there student walkers from the back of Tall Trees? Barry said they come along Wilson Road. There are some partitions along the fence they can get through. Mark said we will bridge Wilson and provide sidewalk and it would be lit under the bridge.Q: will it be an obstacle for them to continue walking? Mark said no, don't think there's sidewalk there now ... part of the sidewalk went in with new Wilson Place development.Re: 417 alternative from the workshop ... adjustment to move it away from Capri Cove and will end up a little farther from the school. But there is an issue with the church. It's also a little farther from Tall Trees... Alternative B is a tad closer to the school.Q: will all the alignments, will there be any taking from the school? Mark said no, very careful to avoid that.Q: what about noise abatement? Mark said we will look at it. We recognize that schools have special criteria. It would be a noise wall if anything. Discussion that distance from school property to road edge would be 100-150'.Q what grade at the school? Mark said the road might be 10' high or so.Q: will there be fencing beneath the roadway? Mark said ROW is fenced unless there is a vertical wall there. Also any ponds would be fenced.Q: Barry asked about egress off International Parkway? Mark said yes, that's the proposal. Mark noted only access to 417, not I-4 front International Parkway.Mark noted we're looking at refinements throughout the project. We hope at the beginning of the year to have recommendation for DOT, EA, SCEA, Lake County Board of County Commissioners, etc. and then public hearings in March-April. Then we would seek federal approvals. Mark noted we don't have funding to move forward. Looking at \$1.5 billion and growing. He noted the school system's involvement in planning will be very helpful. Mark noted 417 has more community impacts but a lot of traffic wants to get to Lake County. The SR 46 IC we would have to provide local 46 access, systems connection to the Wekiva Parkway and something for people on 417 wanting to get to the facility. He noted we're finishing the impact evaluations. There are more homes on 417 than 46. We're trying to weave our way through.Q: how many years before you start construction? Mark said 2012-2015 is the absolute best case depending on funding. We need to get things documented regarding the school. Barry expressed concern about egress from school to the parkway.George was concerned about noise potential and not inhibiting kids walking to school. Mark asked if school system dictated how kids should walk to school? Barry said it's up to families how kids walk to school. A lot of our students are driven to school. Some walk on Orange, Wayside and Wilson. Schools officials said they have requested sidewalk on Wilson, but the county said since the speed limit is 25 mph it's not warranted.Mark reiterated there would be sidewalk under the bridge, especially this close to the school. Scott said the main thing is you keep the Wilson Road connection. He said the ponds don't really concern us. It's primarily the co-location to the

well. Mark going to get back with Glenn Forest on that. Scott noted there were setback requirements on that. PIO asked if we need to do presentation to school board or leave it at staff level? George said staff for now, especially until you get those issues squared away. George said there is one school board member interested. He might speak with her. Mark said we can do one-on-one meetings also. Discussion of impact to Lakeside Fellowship UMC. Mark gave Barry the roll plots and said would send an additional set. PIO mentioned Yankee Lake Elementary school site. Scott said they heard initially the ROW acquisition would occur to the north. Mark noted we're looking at the north and south though the south has three times the impacts. Scott asked how much additional ROW would be needed? Mark said 46 ROW is 200', so 65'. Then another 50' for the gas line easement that needs to move north. Q: why can't gas line stay in ROW? Mark noted gas company wants separate easement. Scott said right now we've lost 50' for the easement, then we'd lose 80' (?). Mark said he's going to send them the north and south alternatives on SR 46. Scott said if it's half it's 80', or 120', the easement is already conveyed. Mark said some uses of easement allowed but will be restrictions such as buildings. Scott said Yankee Lake Elementary not planning to go forward at this time because of location, and issue of attendance boundaries due to proximity of Wilson Elementary. There are also Department of Justice issues. They confirmed the school district owns the parcel. George said the real question is how much of it is it going to take? We would be concerned if we'd lose a useable site for an elementary if the project takes too much. Mark reiterated he would get them additional plots, PDF's. PIO offered to coordinate follow up meetings, just let me know.--932 a.m.

8/8/2006	1:59 PM	Attended public workshop on 7/26/06.

Contact Donna Lewis

Notes

Date	Time	Regarding
6/7/2006	3:31 PM	PIO researched Donna Lewis property query for 5058 Knotty Pine Crt. On SCPA website. Property is on the NE quadrant of the first cul de sac south of the Wayside Dr. entrance to Tall Trees. Parcel is considerably north of the alternative connecting to 417, and is south of the SR 46 alignment.

6/6/2006	3:54 PM	PIO emailed info to Donna Lewis, along with overall alignment concept: "Hello Donna, It was nice speaking with you earlier. I checked the property at 5058 Knotty Pine Crt. in the Tall Trees subdivision. If I'm looking at the correct parcel, this property is on the northeast side of the first cul de sac south of the Wayside Drive entrance to Tall Trees. If that's correct, this parcel is considerably north of the project alignment alternative that would connect to State Road 417, and is also south of the alternative being considered in this area for SR 46. I've attached the overall viable alignment alternatives concept map for your review. We are refining the viable alternatives and will present the latest information at the next public workshops beginning in late July. Please provide a mailing address so that I can add you to the project database to receive the newsletter and meeting notices. We are scheduled to conclude the PD&E Study with an approved alternative in spring 2007 Please let me know if you have other questions or concerns. I hope this helps. Mary Brooks"
----------	---------	---

6/6/2006	3:23 PM	PIO called Donna Lewis' cell 407-766-4957 looking for home at International Parkway and wayside 5058 Knotty Pine Crt., Tall Trees subdivision. PIO noted we were hitting back corner of that subdivision at one point, would have to check the latest. Dlewis025@yahoo com She said she got the MSG I left on her other line. She said she pulled up maps from SC on that area, was trying to find the future planning for the roads and highways and nothing. Was looking for 417, didn't know it was called the Wekiva Parkway. PIO offered to walk her through getting to the web files now, but she said she was on the computer all morning and now her son is on and don't want to kick him off. PIO said I'd research the property for her and try to send the map with the info, though some people say it's too big for her server. PIO noted if it won't go through I'll call her back. She said she'd

appreciate that and thanks.

6/6/2006 3:18 PM PIO returned call to Donna Lewis 407-855-4523, c 407-766-4957, left MSG to call me and noting viables map is on OOCEA website, gave address and links to get to overall concept.

Contact Kirk Lewis

Notes

Date Time Regarding

7/24/2006 10:06 AM PIO called back Kirk Lewis to get his contact info since I was in the car when we spoke on Friday. He said send info to 26201 Sackamaxon Dr., Mt. Plymouth, FL 32776 and his email is firemedic81@comcast.net. He said he appreciated the call back. When would we be starting construction on that? PIO noted current funding, and that overall schedule will be dependent on funding availability. PIO noted I have heard everything from 2010-2015 for construction start. He asked when would it finish then? PIO said that's tough to determine. Typcially with a project this size it'd be broken up into segments, each taking 2-3 years. It will depend on funding whether they can start multiple segments at once, or have to wait until they have the money and just do segments sequentially. He said okay and thanks agian.

7/21/2006 10:38 AM Kurt or Kirk 321-231-3184 called and said he saw the update someone else got and he was wondering where he could see the map? PIO walked him trough the web address and text links. H said he lives on the Mt. Plymouth golf course. He didn't think he was affected but some folks eh thought were affected did get the update (he didn't). PIO said I'm in the car but I can add him to the database if he'd email his contact info. PIO gave him my email address. He said he'd send the info and thanks.

5/7/2006 12:57 PM Attended public workshop on 8/1/06. Submitted comment form: "My comment would be make your maps more legible for us to see on the handouts you mail us. Keep us more

informed. As a homeowner, I feel I'm very close to the interchange in one of the options and if that's the case we are definitely talking about the future of my family. My other question was is there anything more going to help our problem with the traffic situation. I feel that it is already a nightmare on Plymouth-Sorrento Road. Is this going to add to the problem. Already it looks like we are going to close our eyes and take a chance every day to get out on this busy road. Thank you for your help."

8/2/2006	11:55 AM	Attended public workshop on 7/26/06. Kurt submitted comment: "Would rather have Wekiva Parkway Systems Interchanges Alternatives 4,5,6." Debbie submitted comment: "Wekiva Parkway Alternates 1, 2, 3, 4, 5, and 6 System Interchange Orange-Lake Co. I want to see Alternates 4, 5 or 6 used as opposed to 1, 2 or 3. The reason is the farther west the road is moved away from Plymouth-Sorrento Road, the more land is between the two. Plymouth-Sorrento will nee to be four-laned at some poinot. Putting it too close to the Plymouth-Sorrento route will not leave much land for any other useful purpose, commercial or otherwise."

9/26/2006	3:30 PM	PIO received formatted comment form (Cindy Poirier campaign) dated 9-24-06: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children ad the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."

5/17/2006	10:32 AM	PIO responded to Ken Lindsay/ Central Florida Realty & Investment Group: "Good morning Ken, My search shows the property 3561 Hideaway to be the vertical rectangular property paralleling Plymouth Sorrento Road near the top center of this graphic. It's between two horizontally stacked properties on the right, and the blue alignment alternative on the left. The blue and red lines here represent the remaining two alignment alternatives in this area. It would appear the property in question is just outside the blue alternative. However, please be advised that we are very early in the process, and details such as the parkway width, elevation, location of retention ponds, etc., have not yet been determined for any particular location. Also, these alignment alternatives will continue to shift, be eliminated or new ones added as we continue through the Project Development and Environment (PD&E) Study. Currently in the study, we're preparing for the next public workshops, probably to take place in mid-August, to review these more viable alignment

alternatives. From there we will take the public input and feedback from various government agencies and narrow it down to one or two preferred alternatives. Public hearings on the remaining alternatives will likely take place in February 2007, with the study finishing with an approved alignment in spring 2007. This project is not fully funded, and the availability of funding will greatly affect the development schedule. Typically, once we would finish the PD&E Study, we'd go into final design, which typically takes 2-3 years. At some point during final design, the Expressway Authority and FDOT would begin advance property acquisition (typically large parcels that couldn't avoid being hit even if the alignment shifted slightly). Right of way acquisition would begin in earnest typically once design is at 60% complete or more. Acquisition can take 2-3 years, and then we would move into construction. So you could be looking at 2012-2015 before construction began, depending on funding available. Please be advised that timeframe could be shorter or longer, depending. With the increasing costs of construction materials and land, funding will continue to be a challenge. The project would likely be done in sections, with the Orange County portion being spearheaded by the Expressway Authority most likely going first. Other than that, the completion timeframe for construction at this point would be highly speculative. I know those aren't the answers you were hoping for, but it is not possible to give anything more definitive this early in the process. I invite you and the property owners and buyers to stay tuned to the development process for this major transportation improvement. Please feel free to call or email with other questions or concerns. Mary Brooks"

5/17/2006	9:30 AM	Ken Lindsay/ Central Florida Realty & Investment Group: "Good Morning Ms. Brooks: I have a listing at 3561 Hideaway Rd. in Apopka which is right of Plymouth Sorrento Rd. between Ponkan and Kelly Park. It is approximately 5 Acres of land with a nice 4/2 house. I am running into a lot of concern with potential buyers with regard to the tract of the new Wekiva Parkway. I have reviewed the public meeting presentation of 5/9/06. In those documents I see where the study area highlighted in blue does include my listing, but there is also a red thin line (on the overall alignment concept page of the presentation). Does that represent the current track of the Parkway? Is it known when the final tract will be determined and then how long before the land acquisitions would start taking place up and down Plymouth Sorrento Rd? What is the projected time frame before construction would begin up through the Plymouth Sorrento Road area? It is my understanding that the entire project connecting the Parkway to I-4 would not be completed until 2032. Is that correct? Ms. Brooks, thank you very much for your time with these questions, I sincerely appreciate it. Sincerely, Ken Lindsay Realtor Central Florida Realty & Investment Group 126 Semoran Commerce Place Suite C Apopka, FL 32703 Phone: 407-625-3438 Facsimile: 407-889-0931 www.centralfloridaproperties.us E-Mail: Kenlindsay@cfl.rr.com"

Date	Time	Regarding
7/31/2006	1:41 PM	PIO called back Joanne Lischke 262-789-7123 to relay info. She said so it shouldn't affect us then? PIO noted we're still in study stage so things can still change, but since we're trying to minimize impacts in that area, I'd be surprised if it moved any closer to them. PIO noted the corridor we're trying to shoot with that alternative is pretty tight. She said okay thanks. That's good to know. PIO noted I emailed the map to her also. She said she'd look for that then and thanks for calling back so quickly.
7/31/2006	1:22 PM	PIO researched Lischke property at 5211 Linwood Circle Drive in Wilson Place. Property appraiser lists as 30-19-30-5UA-0600-0020, LISCHKE MARY J & JOHN G REV TR. Property is approximately 3 parcels south of Wayside Drive in Wilson Place, subdivision next to entrance area of Tall Trees. 417 alternative probably half mile or more away.
7/31/2006	1:13 PM	PIO emailed map to Joanne Lischke as discussed.
7/31/2006	1:10 PM	PIO returned call to Joanne Lischke from Wisconsin 262-789-7123. She said we are property owners in Sanford, in the Wilson Place development. We have property in Sanford, 5211 Linwood Circle Drive, Sanford. PIO said I'd research the property and get back to her. In the meantime if she has email I could send her a copy of the map. PIO noted don't believe we're hitting the Wilson subdivision but will check for sure and get back to her. She said her email is jlischke@wi.rr.com.
7/31/2006	9:24 AM	Joanne Lischke left MSG I'm calling from Wisconsin 262-789-7123 we are property owners in Sanford, in Wilson Place development. I received the summer 2006 paper and I cannot make out anything on the map. I can't read anything on the map. I do have a concern about whether you are choosing that area for the Wekiva Parkway. I wish I could get more info on it. Thank you.

10/2/2006	4:23 PM	PIO mailed 2 11x17 hard copies of the SR 417 IC & Ponkan Road IC alternatives to Cal Livingston. "October 2, 2006Cal Livingston201 N. First StreetSanford, FL 32771RE: Request for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Cal,Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, please find enclosed two (2) copies of the Seminole County - State Road 417 Interchange and the Orange County - Ponkan Road Interchange Alternatives More than 1,200 people attended the recent public workshops. Currently we are evaluating the more than 540 public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the

top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

10/2/2006	4:18 PM	Cal Livingston/Palucci International responded to PIO email: "Mary, Thank you very much for your response. Cal Livingston"
10/2/2006	4:03 PM	<p>PIO prepared response for Cal Livingston: "Cal, I've checked the locations of all of the 26 parcels on your list. Please note the following with regard to any potential impacts from the Wekiva Parkway: Ball Property (±28.9 acres on International Parkway)-Parcel ID Nos: 30-19-30-300-0430-0000 and 29-19-30-300-0280-0000. I show no direct impact as these properties are on the southeast skewed quadrant of International Parkway and Grant Line Road, which is north of the State Road 417 interchange alternative at Interstate 4. If the SR 417 alternative connection to I-4 is selected the following potential impacts would exist to the following properties: Denmark Property (±27 acres on International Parkway). -Parcel ID Nos: 31-19-30-300-0070-0000 (impact from ramps and retention pond) and 31-19-30-300-003B-0000 (impact on SW portion from ramp and retention pond). Lake Sten Property (±17.3 acres on International Parkway)-Parcel ID No: 31-19-30-300-0030-0000 (impact on SW portion of property from alignment and ramps) There are no anticipated direct impacts to the Gauss Property (±8.5 acres on International Parkway) as these parcels are near CR 46A and well south of the SR 417 Interchange Alternative area.-Parcel ID Nos: 31-19-30-300-019D-0000, 31-19-30-300-019E-0000, 31-19-30-300-019F-0000, and 31-19-30-300-019G-0000 Regarding the Apopka Property there is no direct impact as these parcels are well east of Plymouth Sorrento Road, which is east of the Wekiva Parkway alternatives in the area of Ponkan Road. Apopka Property (±600 acres located along West Ponkan Road and Vick Road)-Parcel ID Nos: 20-20-28-0000-00-003, 20-20-28-0000-00-004, 20-20-28-0000-00-005, 20-20-28-0000-00-006, 20-20-28-0000-00-008, 20-20-28-0000-00-014, 28-20-28-0000-00-008, 28-20-28-0000-00-009, 28-20-28-0000-00-012, 30-20-28-0000-00-018, 29-20-28-0000-00-001, 29-20-28-0000-00-002, 29-20-28-0000-00-019, 29-20-28-0000-00-020, 28-20-28-0000-00-089, 28-20-28-0000-00-090 However, the OC Property Appraiser did not show any records for parcel "30-20-28-5592-01-010." Perhaps there's a digit off here somewhere? In any case, if it is in the same general area as the parcels above, the same would apply. I'm dropping two 11x17" copies of the Ponkan Road Interchange and the SR 417 Interchange alternatives in the mail to you. Of course, you're also aware you can get these from the Expressway Authority website at www.ocea.com. Once there, click on the "Corporate Site", then on "Western Connectors including Wekiva Parkway", then on "click here to view exhibits from the Viable Alternatives Workshops". Please be advised that the alternatives are being adjusted and refined based on the more than 540 public comment forms received, as well as local government and state agency feedback. Potential impacts, therefore, are subject to change as the study progresses. We're evaluating all of the information and hope to draft a preferred alignment alternative - including recommendations for interchange locations - in December or January. That draft preferred alternative must undergo government review and revisions before being brought forward for formal public hearings in March. We anticipated concluding the PD&amp;E study with an approved alignment alternative in late spring 2007. I hope this helps. Please call or email with other questions or concerns. Mary Brooks"</p>
10/2/2006	11:45 AM	Cal/Palucci International responded to PIO email: "Mary, Thank you. Cal"
10/2/2006	10:55 AM	PIO responded to Cal Livingston: "My apologies, Cal. I thought when we discussed that the maps were available on the website, and that you needed them sooner than I could probably get them to you, that you planned to pull them from the site. Sorry for the misunderstanding. I'm still responding to these requests (believe it or not), but will try to get some hard copies out to you today. Mary Brooks"

8/1/2006	3:53 PM	attended public meeting 7/25/06
8/1/2006	2:10 PM	PIO returned call to Cal Livingston/ Puch?? International 407-321-7004, family has several properties on the Eastern terminus; they're probably going to get impacted. Another property on 46a and International Parkway that I don't think will be hit. Then 600 acres in Apopka on the west Ponkan and Vick. PIO asked if he had seen map on website? He said had trouble downloading that. PIO noted we have another meeting tonight that he could maybe get some questions answered. He said he needed to get these out to folks quickly. He's going to send the property id numbers and some info showing where they are. He asked how long it would take? PIO gave him my fax and email address. PIO noted we're getting lot of requests for maps, and I'm heading now to the last workshop, so it's going to be a few days, will also depend on how many maps he's looking for. He asked about cost? PIO said let me see what he needs and will get back to him.
8/1/2006	1:41 PM	Cal Livingston/ Puch? International called and left MSG I appreciate you getting back to me yesterday. I have several parcels I need maps on. According to your MSGs you just need property id no's. Is there email or fax number so I can accelerate the process on this? If you could call me. 407-321-7004 I'd appreciate it.
7/31/2006	12:57 PM	PIO returned call to Cal Livingston general counsel 407-321-7004, receptionist said he was out to lunch. PIO left MSG with her to have him call back and if he gets my voicemail to lave the address and/or property ID numbers of the properties in question so I can research those for him and get back to him. She said she would, thanks.
7/31/2006	9:10 AM	Cal Livingston general counsel with Puch? Puchin? International in Sanford Fla. Want copies of portions of the map for Wekiva Parkway. The Puch? Family owns land at proposed terminus at I-4 and near city of Apopka near Ponkan and Vick roads. Wanted to know if we could get copies of those portions of the proposed parkway that will impact those properties perhaps in those areas. If you could call me please at 407-321-7004

Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives

Dear Larry

Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

Contact Notes Don Lowe

Date	Time	Regarding
3/20/2006	10:33 AM	PIO received email response from Don Lowe: "My mailing address is: 5405 Griffin View Drive Lady Lake, FL 32159-4123 Thanks for your assistance. You have been most helpful Don Lowe
3/20/2006	10:32 AM	PIO responded to Don Lowe: "You're welcome Don. Please forward your mailing address so we can add you to the database to receive project newsletters, meeting notices, etc. Thanks.
3/18/2006	5:08 PM	Don Lowe responded to PIO email: "THANKS MARY! I appreciate the answers you prepared for my questions. It is understandable that you may not have all the answers at this time, but I do appreciate your reply, none the less. I have visited the website and found a few more answers. Please keep me 'in the loop' on future updates as I am interested in Lake County's growth management and the roads that will serve it. Thank you for your help, Mary. Don Lowe"
3/16/2006	11:38 AM	Worked on response to Don Lowe and sent with east and west Lake alternatives: "Hello Don, As discussed: > 1. What is its proposed route? The Wekiva Parkway alignment has not been determined. I've attached the initial alignment conceptals for Lake County. As noted these maps are being updated and we hope to have them available to post on the OOCEA website by mid- to late-April. > 2. Will it be an elevated highway through marshlands or on fill? The profile and typical sections have not yet been determined, as to exact locations of bridges, fill or at-grade sections. The consensus is that most of the road will be elevated in some fashion. > 3. What impact will it have on the marshlands? We will adhere to state and other guidelines with regard to protection of wetlands, wetlands mitigation and other requirements in order to be able to build this much-needed transportation improvement in such an environmentally sensitive area. Specific impacts will be determined once a route is

selected and the project moves into final design. > 4. When will the project be available for the public to voice their opinions?Public involvement has been a component of the Wekiva Parkway PD&E Study since day one, including the three public workshops that we had in November which were attended by 1,150 people. We've also had more than 400 people submit public comment forms, which are available on the OCEA website to be downloaded, completed and returned to me. All of the project maps are also available on the website; again, we'll be updating those in the coming weeks. The next public workshops are tentatively scheduled for July 2006, followed by public hearings in January 2007.> 5. When will the project begin in Lake County?The overall timeframe for the project is to first finish the PD&E study with an approved alignment by spring 2007. From there we have to go into final design, permitting, right of way acquisition and then construction. However, these subsequent development phases are not completely funded. The availability of funding will affect the construction schedule. It could be 2012-2015 before construction could begin on any segment of this project.> 6. Where will the first construction start in Lake County?Details to be determined.> 7. Will there be much disruption of traffic during its construction?Construction of major roadways typically involves lane closures (usually at night), shifting travel lanes, temporary elimination of turn lanes, etc. Maintenance of Traffic details will be determined during final design. 8. Will segments of the road be opened as they are completed or will you wait until it is totally completed before opening?Typically with a project like this significant sections of the roadway would be opened once completed. Again, however, those sorts of details still have to be worked out, again based largely on funding.> 9. Will this be a toll road?The section in Orange County is being developed by the OCEA and would be a toll road. At this time the sections in Lake and Seminole County, which are being developed by FDOT, would not be tolled. However, due to the funding issue, it's possible the Florida's Turnpike Enterprise could become involved in those two counties. In which case, there would be some tolls involved. Again, all details that have to be worked out.> 10. How high above the water will the span across Lake Griffin be?Profiles and elevations still to be determined > 11. Will this be designated a State Scenic Route?Unknown at this time.> 12. During Hurricane Evacuations, will this be an included route for fast escape from the east coast or other disaster?To be determined.> 13. How will the cost of this project be paid for by taxpayers and road users?The Orange County section developed by the OCEA typically would be paid for by a bond issue and other funding sources. Funding for the FDOT sections is still to be determined. > 14. Will homeowners on Treasure Island in Lake Griffin be forced out of their homes and land by eminent domain proceedings?Would need to have specific addresses to determine which properties might be affected. Also, again, will depend on the ultimate alignment selected.> 15. What is the expected traffic count for this road when the road is opened?Traffic data is also being developed as part of this PD&E study. Traffic counts will depend on location of alignment, interchanges and other details yet to be decided.By the time we have an approved alignment and have completed the study (spring 2007), we should have some more answers to these questions. I invite you to stay involved with the study process.Also, please provide your mailing address so we can send you project newsletters, meeting notices, etc. Thanks for your interest  
 "--1210 p.m.

3/15/2006	9:18 PM	Don Lowe responded to PIO email: "Thanks Mary. I appreciate your reply. I will be looking forward to your answers to the questions you have knowledge of.Don"
3/15/2006	12:58 PM	PIO responded to Don Lowe: "Hello Don,Apologies for the delay in getting back to you, but your queries were just forwarded to me by the webmaster. I have to run out to meetings now, but should have the time tomorrow morning to answer your query.In the meantime, much of the information you seek is on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the "corporate site" under "Construction Updates" click on the text link for the "Western connectors." That will take you to the Wekiva Parkway page. Scroll down through the text and you'll see the links for the various maps for this project. Please be advised we're in the process of updating these maps, and hope to have new ones by mid-April.Unfortunately at this early stage, many of the details you seek are not yet available. Again, I'll address your questions specifically probably tomorrow morning."

3/15/2006 12:48 PM PIO responded to Kristy/OOCEA email: "Will do."

3/15/2006 12:41 PM Kristy/OOCEA emailed PIO : "Mary, Could you please respond to this person? Thanks! Kristy Rothbauer Orlando-Orange County Expressway Authority 525 South Magnolia Avenue Orlando, FL 32801 407.316.3834 (p) 407.316.3801 (f) rothbauerk@oocea.com >>> "DON" <dolowe55@earthlink.net> 3/14/2006 3:46:40 pm >>>----- Original Message -----From: DON To: info@oocea.com Sent: Monday, March 13, 2006 10:26 AM Subject: Fw: Wekiva Parkway 2nd request.----- Original Message -----From: DON To: info@oocea.com Sent: Thursday, March 09, 2006 9:04 AM Subject: Wekiva Parkway Good Morning! I am interested in getting more info regarding the Wekiva Parkway extension into Lake County. Can you help me? 1. What is its proposed route? 2. Will it be an elevated highway through marshlands or on fill? 3. What impact will it have on the marshlands? 4. When will the project be available for the public to voice their opinions? 5. When will the project begin in Lake County? 6. Where will the first construction start in Lake County? 7. Will there be much disruption of traffic during its construction? 8. Will segments of the road be opened as they are completed or will you wait until it is totally completed before opening? 9. Will this be a toll road? 10. How high above the water will the span across Lake Griffin be? 11. Will this be designated a State Scenic Route? 12. During Hurricane Evacuations, will this be an included route for fast escape from the east coast or other disaster? 13. How will the cost of this project be paid for by taxpayers and road users? 14. Will homeowners on Treasure Island in Lake Griffin be forced out of their homes and land by eminent domain proceedings? 15. What is the expected traffic count for this road when the road is opened? Thank you for answering these questions, as the area is of vital concern to environmentalists and to land developers. There needs to be a compromise among all involved that all will benefit from. I just wanted to know some of the facts as I live north of the proposed parkway and see its path as an easier way to get to Orlando for me. Thanks again for your time and information. Don Lowe

Regarding  
PIO responded to Dave Lutz comment form: "Dear Dave Lutz, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment

PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated by the Expressway Authority and the Florida Department of Transportation, along with hundreds of other public comment forms received, as well as input from local governments and state agencies. You requested copies of the various public workshop maps. Those maps and other project information are available on the OCEA website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "corporate site" button. On the home page toward the left side of the screen you will see the "Construction Update" headline. Under that is text that includes the highlighted link for the "Western Connectors." Click on that colored, highlighted link and that will take you to the Wekiva Parkway page. At the top of that page is the link for all of the latest maps for the project I'm in the process of also getting the traffic exhibits in electronic form and posted on the site. Once you've had a chance to review the maps, please feel free to call or email with other questions or concerns. If you have any trouble downloading the maps, please let me know. We expect that the public comment review and engineering analysis will result in a draft preferred alignment alternative for the project in November-December 2006. That draft preferred alternative must undergo official review and revisions. We expect to hold formal public hearings on the preferred alignment alternative in February or March 2007, with the study concluding with an approved alternative later that spring. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement Mary Brooks"

Contact Notes		Lynn Luzadder                      Fixel, Maguire & Willis
Date	Time	Regarding
4/24/2006	9:54 AM	PIO returned call to Lynn Luzadder (cq), let her know meeting dates not yet set. PIO noted we were looking at July for the workshops but looking now more like mid-August. PIO asked if she was on the project mailing list? She said she was. PIO noted we're working on the newsletters now, probably come out late May or June, and also public meeting notice once we get closer to the dates. She said she'd look for the info and thanks for calling back.
4/24/2006	9:26 AM	Lynn Luzadder 407 228 9522, 407-898-8755 called and left MSG asking if any public workshops had been scheduled for this summer 2006 for the western beltway SR 429 Wekiva Parkway. I was told earlier in the year there's possibility that they'd be scheduled and was wondering if any of those dates had been set.
Contact Notes		Doris Lyons
Date	Time	Regarding
7/31/2006	12:05 PM	PIO responded to Doris Lyons email: "Hello Doris, I checked on the 333 Kimberly Court property, and there is, at this time, a full parcel width and part of another parcel between this property and the alignment alternative that would connect to SR 417. Obviously, we're very early in the process and things can still evolve, including where retention ponds might be located, so please stay involved in the process. We hope to be getting the maps from the workshops up on the Expressway Authority website in about a week, just FYI. I hope that addresses your question. Please feel free to call or email with other questions or concerns. Mary Brooks"
7/31/2006	11:59 AM	PIO researched Doris Lyons query 333 Kimberly Court in Shadow Lake Woods subdivision in Sanford. Property is SE of wayside and orange Boulevard, and just NW of Tall Trees. There is a full parcel width and portion of another between the property in question and the 417 alternative.

Date Time  
9/14/2006 9:36 AM Patty Mahany  
Regarding  
PIO returned call to Patty Mahany 407-321-7013, went to Brenda Carey's office and they saw the map and think they're fine. PIO asked if she noticed the date on the map? She said no; saw it was by CH2m Hill. PIO noted reason I ask is because based on public comments we're making some adjustments to the alignments. PIO asked where her property was located? She said we own property on Wayside Drive. There are three lots total. Mother owns one and we own two. Ours don't have address. Mother's is at 5100 Linwood Circle. The concern was ...we've lived in SC all our lives. We've had the property for a long time. We've been waiting for my husband to retire from the Navy. This house, if we build it, is going to be our last home. Hired an architect then someone said how close is the greenway section going to go, the rumors are flying. One woman said they're taking part of tall trees. That's right next door to us. Kind of need to know projected plans are before we spend any more money on this architect. She said Comm. Brenda Carey said it could be 20 years before this road is built, is that right? PIO noted funding issues affecting schedule. Noted earliest, if funding available, construction might start 2012-2015, but that's highly tentative. PIO noted phases that must take place beforehand and typical timeframe if we were funded, which we aren't. Think my mother on list for project but she's 80s. We read about the meeting after the fact in the newspaper. Would like to be on the list because not sure if mother is passing on info. What I saw was no problem for us. There were two options down 46 and the other to 417, which was going quite a ways behind our neighborhood and Tall Trees. The commissioner said they're trying to use as

much undeveloped land as they can so they won't have to take houses. We're in no huge hurry to build. I'm pretty convinced because it's south of Wilson Place. We're right off of Wayside and East Lane. At the corner. I really don't think it's going to be a problem for us. PIO noted the adjustments we were making were a 100-200 feet here or there, trying to miss Tall Trees, Capri Cove, etc. PIO noted there wouldn't be major shifts at this point. She said if I had to sell and move somewhere else I wouldn't be upset because when the hurricanes came through, those are some of the lowest density neighborhoods and are the last ones to get power back when hit with hurricane people in Wilson place took 3 weeks to get power back, whereas where we live now we had power back in 17 hours. Would like to be on mailing Mahany, 112 Kaywood Dr., Sanford, 32771. PIO apologized for delay in getting back to her but taking some time to catch up from calls over vacation. She said no problem and thanks for calling back.

9/5/2006	12:29 PM	Summer/QCA contacted Patty to let her know that we received her message and that you were going to be back from vacation on Monday and could help her to find the information that she needs.
9/5/2006	12:10 PM	Patty Mahany, Sanford, FL Phone: (407)321-7013 left MSG to call me. I would like to talk to you, sit down with a map and someone in an office. My husband and I own property very very close to one of the proposed routes for the Greenway Extension in west Seminole County. We were building a house the first part of next year on that property. But now we're having second thoughts. We're having trouble understanding this whole thing. We need info to see if we need to stay where we are for a while. What the facts are. Unfortunately we hear a lot of rumors. We weren't able to attend the meeting you had so we just need to find some things out.

Contact Notes		Angela Mallory
Date	Time	Regarding
3/29/2006	4:02 PM	PIO returned call to Angela/realtor, receptionist said she was out but should be back soon and put me through to voice mail. PIO left MSG that we don't have an approved alignment just conceptual alternatives. PIO note one of the initial alternatives hit the corner of the Tall Trees subdivision. PIO noted maps with the alternatives are available on the website, gave address and text links. PIO told her to call me either before or after reviewing that material, that I have a lot of info to pass on to her.
3/29/2006	1:43 PM	Angela Mallory/Borzik ?? Realty called and left MSG Could you give me any info about the future of the 417 expressway beyond I-4 and perhaps where it's going to be coming through? I'm a realtor here in Sanford. I have a property in Tall Trees that's under contract. Just wondering exactly where that extension is planned, or what the future is before they go any further. They're quite nervous. We've heard stories about it coming right through the subdivision and that kind of thing. We're wondering if it's going to follow I-4 or 46. Please call me at your earliest convenience. If you don't get me just leave a MSG or fax me. Thanks you very much. 407-322-8678, fax 407-322-8679

Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives

Dear Bob, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks.

7/31/2006	11:54 AM	Attended public workshop on 7/25/06. Submitted comment: "Suggest 'southern' route - with direct connection to 417 - only logical. Using SR 46 for a connection to I-4 would only make a bad situation worse. Traffic on 46 is already too heavy. Having to job onto I-4 to get 417 would be a nightmare!"
7/17/2006	4:01 PM	<p>_From: Melaina.Petit@CH2M.com [mailto:<a href="mailto:Melaina.Petit@CH2M.com">Melaina.Petit@CH2M.com</a>]</p> <p>Sent: Monday, July 17, 2006 4:01 PM</p> <p>To: <a href="mailto:mbrookssr417@cfl.rr.com">mbrookssr417@cfl.rr.com</a></p> <p>Subject: SR 429-Wekiva Parkway PD&amp;E Study - Prop Owner call from Bob Manuel</p> <p>Hello Mary, Mr. Manuel called me this morning at 9:10 a.m. He lives in Lake Forest in Seminole County and he was wondering if there was any change regarding the two alternatives (SR 46 and southern alignment) that were shown at the previous Seminole County meeting to get from Wekiva Parkway to I-4. He indicated that he was told that the SR 46 alternative was not viable but that it would be carried forward through the study anyway. I told him I would check into his question and get back with him. He also asked if we were still taking input from the public at these meetings regarding the alternatives and I told him most definitely and that is the reason for holding these meetings. I took his phone number 407-322-2318 and told him I would check into his question and get back with him. I returned Mr. Manuel's call today at 3:20 p.m. and left a voice message. I told him that as I understand it there are three (3) different I-4 connection alternatives being shown at the meetings which two are at SR 46 but have different interchanges and the other option is at SR 417. I told him for the most accurate information he should attend the upcoming meeting. I also told him if he had any further questions he could call me back or he could also contact Mary Brooks at 407-702-8375. I told him to feel free to call me with any further questions and left my phone number. Let me know if you have any questions</p> <p>Melaina Petit Public Involvement Coordinator CH2M HILL 225 E. Robinson Street, Suite 505 Orlando, FL 32801-4321 Phone: 407-423-0030 Direct: 407-423-0001 (ext. 279) Fax: 407-839-5901 <a href="mailto:mpetit@ch2m.com">mpetit@ch2m.com</a></p>
7/17/2006	9:33 AM	PIO returned Bob Manuel's call. He said it's about the upcoming public workshops; Sanford is Monday. I attended the SCEA meeting in May where they ... there seemed to be an agreement from all parties that southern route looked like the best alternative but they were going to carry 46 forward for discussion. Has there been any change since then? PIO noted that still appears to be the case, and the traffic models show pretty much anything

we try to do to 46 breaks down. Traffic model also shows lot of people actually trying to make east-west movement to 417, so there is heavy evidence in favor of that alternative He said two alts would be presented at workshop, are you all still taking public comment? PIO said absolutely, we will have comment forms at the meetings. PIO noted we've been getting feedback leading up to meetings, and will continue that afterwards. Noted analysis leading up to one or two preferred alternatives is even more detailed, has to be to bring something forward for public hearings. He said those will be end of this year? PIO said no, in February or March 2007. He said I know Randy Morris and Mike Snyder expressed that 417 was most logical route at that meeting. PIO noted true, but there are some significant cost issues with that alternative as well, much more involved. He said he was aware of that, and that nothing had been decided at this point.

7/17/2006	9:17 AM	Bob Manuel/Lake Forest HOA 407-322-2318 called and left MSG I'm up in the Sanford area, calling re: public meetings scheduled to begin this coming week concerning the Wekiva Parkway and how it connects to i-4. If you could give me call today I'd appreciate it. I should be at home at this number all day. Just a couple minutes to ask a couple of questions. Thank you.
2/15/2006	7:05 PM	Continued comment form responses: Steven & Michele Smelski, Pamela Klug, Jim & Susan Green, Barbara Murphy, Helen & Jack Dow, Frances & Bob Manuel.Signed, copied and stuffed responses.--730 p.m.
Contact Notes		Joe Manzione
Date	Time	Regarding
11/6/2006	7:05 AM	Joe Manzione responded to PIO email: "Hi Mary, THANK YOU very, very much for this info - you have stopped me & my family from making a very big mistake. Believe me, I really do appreciate your help.....it was very nice of you.THANKS AGAIN Mary & Take CareJoe Manzione
11/5/2006	1:15 PM	PIO emailed Joe Manzione re: homebuyer query for Tall Trees property: "Joe,Apologies for the delay in getting back to you, but things are a little hectic right now. I did hear back from Ch2m Hill, the firm doing the PD&E study for the Wekiva Parkway, and they said the property at 459 Still Forest Terrace would be approximately 400 feet from the edge of the roadway. I hope this helps, and again I apologize for the delay. Please feel free to call or email with other questions or concerns.Mary Brooks"
11/1/2006	7:09 PM	PIO returned call to Joe Manzionne 407-330-0378 house in tall trees 459 still forest terrace Someone said one of the proposals was Someone named Tony sent me an email with on and off ramp approximately 300 feet from the property. He suggested I call you. PIO asked what sort of schedule they were on for closing or making a decision on the property? He said they wanted to close pretty soon; they're moving to Brevard county, think they already have property there. PIO said I'd forward the property location to the study team and get an estimate of how far the alignment alternative is from that property now. Is there an email address for him? He said he doesn't use the internet at home, but can send to his work email: jmanzione@bankofny.com he said another guy, mike, told me thought it was going to be behind the property. They were very helpful. I told them I was on a short timeframe; all of the people there were very nice. PIO apologized for delay in getting back to him from his call while I was on vacation. He said he didn't realize; he had called me twice.
10/27/2006	3:58 PM	Joe Manzionne called and left MSG I'm going to be buying a house in Tall Tress and was told the Wekiva Parkway is going to be running a proposal right near there. If you could please call me. 407-330-0378 if you could please call me today I'm meeting with the man on Sunday to sign the papers. I'd appreciate it. Thank you.

Date Time Regarding  
3/15/2006 11:01 AM PIO emailed Alfredo Marasigan: "Hello Alfredo, Thank you for making us aware of this matter. Your email has been forwarded to our toll operations folks for review. Again, thanks for taking the time to forward this info, and for your continued patronage."

"  
3/15/2006 9:26 AM \_\_From: Alfredo Marasigan [mailto:amarasig@hotmail.com] Sent: Wednesday, March 15, 2006 9:26 AM To: MBrooksSR414@cfl.rr.com Subject: Toll booth on exit 26 Hello. I need help with the following: I wanted to report an issue with Toll system at State Road 429. On 3/14, 5 30pm, driving on the State Road 429 North exit 26, you could see on top of the booth building the two green light indicator as turned on. (right lane is epass, left lane is exact change). I put in the .50 cents toll. I waited for 30 seconds, but the green light in the front didn't turn on. I put another .50 cents, but still didn't turn green. Only then I realized that the LED screen above the basket for toll, it said Lane Closed. So then I said should I reverse the car all the way and get back on 429? That is really dangerous with cars and trucks exiting on 26 going maybe 40 mph at least. For my safety, I went forward I called up the Orlando-Orange County Expressway Authority on 407-316-3800 to report a complaint. To my dismay, they say there's nothing they can do about this. I was told that the first time offender will not get a summon. Second time, you will get a ticket. It sounded like if the toll is not in working order, I would either get a ticket or reverse my car and hopefully not get into an accident. I believe that if the toll lane is broken, the motorists should be able to see right before they go to any Exits. Certainly, I would like to pay a toll but not get summons or worst to an accident. To many law abiding motorists, this would be concern. I think Expressway Authority should also look at this. I believe that if the toll lane is broken, the motorists should be able to see right before they exit 26. Thanks  
Alfredo Marasigan

Date Time Regarding  
1/30/2006 4:32 PM George Marek/DOT D5 permits engineer, 386-734-1312 deals with drainage, said he got my name and number off the website. He was approached by LCWA recently where you have a connector is going over to 441 and round lake road. PIO noted that's the Wekiva Parkway, one of the alternatives hit the Wolf Branch Sink. He said yes, LCWA has an environmentally sensitive area they're concerned about and approached me to bring the parties together, want to talk to the EA about their issues. PIO noted we'd met with LCWA previously, and believed we were planning another meeting with them, who did he speak to over there? He said he spoke with Ben Juliati or Guillioti, not sure of spelling. George asked for a contact for the study. PIO gave him Mark Callahan's name and number noted he's senior project manager for PD&E study. George said he didn't know if this Ben Guillioti was new; he seemed to be under the impression there hadn't been any meetings. PIO noted we've had public meetings as well as meetings with different local agencies, and believed we were going to set up another one with LCWA. He said he'd give Mark a call about it. PIO asked if there was anything else could do for him? He said no, you've pointed me in the right direction. He noted they're involved with Lake County regarding drainage for S.R. 46.--438 p.m.

8/1/2006 2:30 PM attended public workshop on 7/25/06  
7/28/2006 8:50 AM Tony Matthews/SC Planning 407 665-1130 called to ask if we had copy of the map showing 417 at International parkway on a website somewhere. PIO noted we have the overall alignment concept on the EA website and that shows that connection. He said he was talking about the different alternatives of where to connect to 417 in the area of International Parkway that he saw during a presentation in 2005. PIO noted we planned to have most or a representative sample of the meeting exhibits on the website after we finish the public workshops next Tuesday. PIO asked if he was in a time crunch? He said no, he'd check after Tuesday and thanks.

Contact Notes Larry Mattingly Mid-Continent Energy Company, Inc.

Date Time Regarding  
7/20/2006 5:20 PM Larry Mattingly responded to PIO email: "Thanks Mary that helps. Larry D MattinglyMid-Continent Energy Company, Inc.1510 Kastner PlaceSuite 2Sanford, FL 32771407-321-2500407-330-1712 (Fax)"

7/20/2006 5:10 PM PIO emailed map to Larry Mattingly as requested.

7/20/2006 5:03 PM Larry Mattingly 407-321-2500 called and said I received the Wekiva Parkway update and can't hardly see the map. From i-4, can you give me some idea where it's going? PIO noted we're still considering connections to I-4 at 46 and 417. He asked how would you get from 417 to 46. PIO asked if he had an email address I could send the map to him? He said yes, that would be better, send to him at Email address LDMCE@aol.com . PIO noted if he doesn't get it in 10-15 minutes let me know. It's a big file and some servers won't let it go through. He said okay thanks.

We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

Date	Time	Regarding
8/15/2006	1:04 PM	PIO returned call to Greg May 850-222-3886 who said he was looking at the 5 year work plan. I'm trying to figure out which segments are beginning now and where you're at with each one? I see the project is going from 441 east to 441 west. PIO went over each section limits and schedule. He also asked about status of ROW maps, how do I get those? PIO said he needs to submit public records request, gave him Bob Mallett's mailing and email info. He asked if they were done, the ROW maps? PIO noted there were for 210 which is at 100% plans, but 211 only at 90% and don't think those are done yet. He said thanks for the help. PIO reminded him he said he wanted to be on the mailing list, got his info.Greg May email gregmay78@hotmail.com and send mail to 411 N. Calhoun St., Tally FL 32301--113 p.m.
8/15/2006	11:30 AM	Greg May at Robert Anderson? called and left MSG I called you yesterday and was asking couple questions about MBX and Wekiva Parkway project, been looking at MBX five year work plan. I just had a few questions about the diff segments. Please give me a call back 850-222-3886
8/14/2006	4:53 PM	A man (no name given) 850-222-3886 called asking if he'd gotten the hotline? PIO asked if he was calling about the MBX or Wekiva Parkway, he certainly had. He said he was expecting a recorded MSG. I said I'd be happy to try to help him, which project was he calling about. He said he was working on something regarding the Wekiva, were there any maps for that? PIO walked him through the website to the workshop maps. After reviewing them if he has any questions, give me a call or shoot me an email.He asked if we had the same thing for the MBX? PIO said no, they're at different stages. Wekiva Parkway just in study phase; MBX is wrapping up design and we'll be starting construction in January. PIO noted we have an aerial concept for MBX, and plan sets for the different sections. PIO asked if he was on the mailing list? He said no, but would like to be. PIO noted I was in transit, but if he could email me his contact info I'd add him to the list, and he can send any questions as well. He said he saw my email address there on the website and would do so, thanks.

4/12/2006	3:12 PM	Sandy McClelland responded to PIO email: "Thank you Mary I thought I had missed something because at the meeting I attended in Sanford, we told there would be a decision to the route in March. I am not sure I am on the mailing list, so I do appreciate you adding my email address. Again thank you for your time in giving me this update Sandy"
4/11/2006	7:55 PM	PIO responded to Sandy McClelland, copied Gary Johnson/SC Public Works et al: "Hello Sandy,Your request for an update on the Project Development and Environment (PD&E) Study for the Wekiva Parkway was forwarded to me. Thank you for writing and for your interest. We are still a year away from selecting an alignment for this roadway.Since the public workshops in November 2005, the project team has been analyzing the initial alignment alternatives along with the hundreds of comment forms from members of the public and input from local government and state agency officials. The alignments that the Florida Department of Transportation and the Orlando-Orange County Expressway Authority presented at those meetings have been evaluated and narrowed down to try to create a set of more viable alignment alternatives. This includes eliminating some alignment alternatives, shifting or otherwise revising others, and adding some new alternatives for consideration.We originally thought we might have the set of more viable alternatives ready in March, but the process of revising the alternatives and getting feedback from government officials continues. We now hope to conclude this round of government input and be ready to bring forward the more viable alternatives by posting them on the Expressway Authority website (www.ocea.com) by late May. The next public workshops to review the latest set of alternatives and other new project information are tentatively set for late July or August. If you are on the mailing list, you will receive the next project newsletter (which should go out in June) and the public workshop notices. If you're not on the project mailing list, I'll add your information to our project database so you can receive that information.Following the next public workshops, the viable alternatives will be narrowed down and refined to develop a preferred alternative(s). Public hearings on the preferred alternative(s) are tentatively set for January 2007. The PD&E Study is scheduled to conclude with an approved alternative by spring 2007.I hope that addresses your query. Please feel free to call or email me directly with other questions or concerns. You're also welcome to check the Expressway Authority website for updates on the project. From the homepage, click on the text link for the "Western Connectors" which will take you to the Wekiva Parkway page."--812 p.m.

10/10/2006	2:08 PM	PIO emailed Jerry McCollum/SC Engineer and Gary Johnson/SCEA Executive Director: "Good afternoon, Gentlemen, The SR 429-Wekiva Parkway Study Team has been asked to give a presentation and update during meetings with the following in Seminole County:Oct 11 530 p.m. Tom Vellanti, owner of the Twelve Oaks RV Resort at the resort office on SR 46Oct. 17 6 p.m. Wilson Place HOA, Lakeside Fellowship UMC, 305 S. Orange Blvd. Please feel free to call or email with any questions or concerns. Please let me know if you or someone else from the county plans to attend any of the meetings. Mary Brooks
9/28/2006	3:40 PM	PIO emailed Jerry McCollum/Seminole County Engineer and Gary Johnson/SC Public Works Director: "Good afternoon Jerry and Gary,As requested, I wanted to let you know that the Estates of Wekiva Park HOA wants to meet with Wekiva Parkway team members on Oct. 10 at 7 p.m. at the Panera near Target and Seminole Towne Center. We also are talking with the Wilson Place HOA about trying to schedule a presentation for their homeowners, just FYI. Will let you know when that's firmed up.Please call or email with any questions, etc.Mary Brooks
8/21/2006	8:32 AM	Deb Rogers emailed: I apologize; Jerry will not be attending this meeting. He just wanted you to be aware of the meeting taking place.Sorry for any confusion. Deb
8/21/2006	8:27 AM	Debbie Rogers/Jerry McCollum/SC Engineer's aide copied PIO on email to Comm. Brenda Carey and her aide Amy Lockhart, copied PIO: "We wanted you to be aware, if you are not already, of the meeting with the Tall Trees HOA (outlined below). Jerry will be in attendance. Deb (she forwarded PIO email re: HOA meeting)
8/20/2006	1:54 PM	PIO emailed Jerry McCollum/County Engineer and Gary Johnson/SC Public Works Director: "Greetings Gentlemen,As previously requested, I'm writing to let you know that the Tall Trees HOA has requested we attend their board meeting this Tuesday, Aug. 22 at 7 p.m. at their clubhouse. The Wekiva Parkway PD&E Study team will be represented by Noranne Downs and Brian Stanger of FDOT, Mark Callahan of CH2M Hill and myself. We understand the board meeting is open to homeowners so there may be a crowd there. Please let me know if one or both of you, or a county commissioner, would also like to attend so that I can update the HOA president Julian Steinbridge. Thank you. Mary Brooks"
2/17/2006	5:52 PM	PIO emailed Jerry and Gary/SC Public Works, Anne and Tom/FDOT and copied CH2M Hill that Lake Sylvan Cove HOA in Sanford requested Wekiva Parkway project update Wed., Feb. 22 at 7 p.m. at the SC Sports Complex at Lake Sylvan Park.
1/11/2006	6:20 PM	PIO emailed Jerry McCollum and Gary Johnson as requested: "Happy New Year, Gentlemen!Hope your holidays were warm and wonderful - mine certainly were!Just to give you a heads up, the Glades of Sylvan Lake Reserve HOA has requested a Wekiva Parkway update at 7 p.m. on Feb. 16 at the Seminole County Sports Complex (Gary, the same place and folks we ran into each other last year). We should have updated concepts I hope) by then showing the removal of the yellow or northernmost alternative as per the SCEA.FYI. Let me know if you have any questions or need further information."

Contact		Dave McDaniel	WESH TV Ch. 2
Notes			
Date	Time	Regarding	
7/26/2006	1:30 PM	PIO went to meet Dave McDaniel at Kelly Park and Plymouth Sorrento, headed west to general area of the alignment/IC. PIO went over IC options. Noted higher ROW impacts for Ponkan due to loop ramp to avoid Zellwood Station. He asked a lot about were we taking homes? No matter what some people not going to be happy? PIO noted idea of study is to minimize impacts, for example in SC guys did a good job of threading the needle. But there's no way you can build a major transportation improvement like this in a heavily populated area without some impacts.Re: questions about property values, studies show improvements such as this increase property values, help people get where they want to go.PIO went over SC alternatives, noted politically some middle alternative may be chosen, but if so won't solve the long-term problem. Re: Seminole residents' concerns, PIO noted traffic predominately wants to get to 417, noted issues with full parkway connecting at 46 and I-4.He talked about how this would change rural, horse country in Orange County? PIO acknowledged it would be a change for folks, but local roads already	

seeing congestion, and permits continue for more growth in the area, so it's going to change regardless. PIO noted number of new subdivisions on Plymouth Sorrento Road, Vick and Ponkan Roads. He said he's doing a live shot at the meeting at 5 p.m. discussed he would stay outside so as not to disrupt the meeting.

7/26/2006 11:13 AM PIO returned call to Dave McDaniel/WESH Ch. 2, let him know I was n the OOCEA board meeting when he called earlier. He wants to meet this afternoon out where , know there's some vague areas where Wekiva Parkway going to join either Kelly Park road or Ponkan, talk about proposals where it might joint up, and where you think most likely areas might be. How you're going to take... there were some frustrations at last night's meeting where people didn't think they were listened to, want to give you opportunity to offer balance. PIO noted yes, two neighborhoods in particular upset, even though guys did a pretty good job of threading the needle in a heavily populated area to minimize impacts. You can't build a major transportation improvement like this without some type of impact. We understand their visibility noise and other concerns. Most people understand the need for this; they however were not looking at the big picture. He said he understood that.PIO arranged with Dave McDaniel to do site interview at 2 p.m. at Kelly park and Plymouth Sorrento road, would head west to potential IC location.

7/26/2006 11:03 AM Dave McDaniel called and asked me to get back to him ASAP.

7/26/2006 10:17 AM Dave McDaniel WESH Ch. 2 407-766-2246 called and left MSG to call him.

Contact Notes Megan McGetchin Linway Wholesale

Date Time Regarding  
12/11/2006 1:03 PM PIO returned call to Megan McGetchin 407-884-5929, she was very happy to get a call back, said she didn't expect anyone who worked for the city or county to get back to her so quickly. PIO asked where the property was she was looking at? She said the property is on lent road on the east side of Plymouth Sorrento road. PIO noted our alignment alternatives are on the west side of Plymouth Sorrento. she said so it doesn't cross Plymouth Sorrento at all? PIO noted it does up near Boch and Haas Ondich roads, with one leg heading east toward 46 and the other heading west to 46. she noted Lent is just north of Ponkan road. PIO noted then we would still be on the west side of Plymouth Sorrento road in that are. She said with all the news going on I really wanted to know what was going on before we went to buy this property. She said the turn in the roadway where it crosses Plymouth Sorrento does affect me because my business laneway wholesale co. , 6919 Plymouth Sorrento road, 32712. PIO asked if she wanted to be on the mailing list for the project? She said absolutely, can send to her at the business. PIO noted workshop maps on the website, had she seen those? She said she did a lot of searching on the web, but couldn't find anything that showed whether it was east or west of Plymouth Sorrento road. PIO gave her website address. She was thankful for the info.

12/11/2006 11:28 AM Megan McGetchin/ Linway Wholesale Co. on Plymouth Sorrento Road 407-884-5929, 407-886-5265 left MSG I'm considering property on Plymouth Sorrento road and I want info on where the 429 NW extension is going to be. Will it be the east or west side of the road? I want to go into this educated when I got buy this property. Please call me.

Contact Notes Rachel McGhee

Date Time Regarding  
1/19/2006 3:44 PM Rachel McGhee 352-383-5390 called back with questions about the map, her property is parcel 1275 in the NE corner of Wolf Branch Sink and is hit in the SW corner of her property by LCW3. She asked what did this mean? PIO noted we're in process of updating

maps based on public comment and government input, some alternatives being removed, some new ones being added based on comment. PIO noted LCWA expressed concerns about that alternative. PIO noted not sure of status of that alternative, but we should have a new map by late March. She asked could she still send a comment form? PIO noted she could and they are posted on the website, but noted changes already being made based on feedback from meetings and continue to meet and get feedback from local governments. PIO noted next round of public workshops this summer, and she might want to wait to submit her comments until after the updated maps have been posted to see if the alternative still exists. She asked if new ones are added will they all be in the study area, or will they be outside like this one? PIO noted they're trying to avoid ones that go far outside the study area, but that is still a possibility. She said I'd been helpful and thanks. She said she'll check back in a month or so on the maps.

1/19/2006	11:03 AM	PIO again tried Rachel (& Kevin) McGhee 352-383-5390, left another MSG for her to call me back, noted meetings soon and at 2 p.m. but hopefully we'll connect soon.
1/19/2006	10:33 AM	PIO returned call to Rachel (& Kevin) McGhee 352-383-5390, left MSG for her to call me back.
1/18/2006	2:56 PM	Rachel McGhee 352-383-5390 left MSG you emailed me yesterday map of Wekiva Parkway SR 46 connections for west lake county. Just had couple questions about that if you could give me a call back. Thank you very much.
1/17/2006	4:15 PM	PIO emailed Lake County west concept to Rachel McGhee as requested. --430 p.m.
1/17/2006	3:30 PM	Rachel McGhee 352-383-5390 called asking what was happening with the 46 bypass at round lake road and 46, neighbor said you had meeting a while back about 46 bypass. She said she didn't get any information and was wondering what was decided. PIO noted status of PD&E study, analyzing and revising alternatives based on public comment and government input. PIO noted all the meeting maps are on the website, gave her address and text links. PIO asked if she was near a computer, if so I could walk her through finding the files? She said she doesn't have a dedicated phone line for the internet so would have to do it later. She said she went on site but only saw the same map she'd seen at previous meetings, maybe she didn't go far enough. PIO asked if she wanted to be added to the project mailing list? She said yes, please: 21736 Third Ave., Mount Dora 32757, morningsR@aol.com she asked that I email the map also because some times her computer takes so long to download files, or it just freezes up. Maybe she could access the file more easily if I emailed it to her. PIO said I would. She asked when I get the map can I still comment on it? PIO noted we're already revising the alternatives based on the majority of comments already received, but if she sent a comment form it would be part of the project record. PIO noted comment forms can be downloaded from the website. She said thanks.

Mike McIlveeney

Regarding  
"Aug. 21, 2006Mike McIlveeney321 Green Ash LaneSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Mike,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. As requested, please find enclosed the viable alternatives Wekiva Parkway to SR 417/I-4. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at @ 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

Jack McIntosh

Regarding  
Dave/Ch2m copied PIO on response to Jack McIntosh: "Dr. McIntosh:Our property ownership data is based upon information from the Seminole County Property Appraiser, which lists the owner of the parcel at 110 Wekiva Park Dr. as Jackie R. McIntosh at mailing address P.O. Box 1841, Key Largo, FL 33037. That is the address to which we have sent project information, updates, and public meeting notices. The Expressway Authority's website was updated in August, 2006 to provide pdfs of all the displays presented at the Viable Alternatives Public Workshops in July/August, 2006. After you go to www.ocea.com, click on the "Corporate Site", then on "Western Connectors including Wekiva Parkway", then on "click here to view exhibits from the Viable Alternatives Workshops". Look for the pdfs entitled "Seminole Co WP wFrontage Rds North Widening" and "Seminole Co WP wFrontage Rds South Widening". The property at 110 Wekiva Park Dr. is Parcel No. 3629 located east of the Wekiva River, west of Wekiva Park Dr., and north of SR 46. Your parcel may indeed be impacted, more so by the north widening option. In addition to widening for the Wekiva Parkway, there is a 26 inch natural gas pipeline in a 50 foot easement that would have to be relocated to the north. Nothing has been finalized to date with regard to alignment alternatives. We hope this information is helpful to you.Dave LewisCH2MHILL --Original Message-----From: Callahan, Mark/ORLSent: Monday, October 02, 2006 11:20 AMTo: Lewis, David/ORL; Wilson, Melaina/ORLCC: Mary BrooksSubject: FW: Wekiva Parkway Request Dave,Please look this over.msc-----Original Message-----From: tom.percival@dot.state.fl.us [mailto:tom.percival@dot.state.fl.us]Sent: Monday, October 02, 2006 7:13 AMTo: Callahan, Mark/ORLSubject: Wekiva Parkway RequestMark:Please respond to the attached request.  09/27/2006 01:05cc PM Subject Please respond to <jack@dolphinhumantherapy.com>  
 Hello. My name is Jack McIntosh. I own the property located at 110 Wekiva Park Dr. in Sanford. I have been informed that my property will most likely be affected by the Wekiva Parkway. However, in trying to obtain additional information, I have had very little luck. I understand that there were public meetings regarding the alignment. However, the Orange county expressway authority website has not been updated in months. Consequently there is no available information from that resource. I would appreciate any information you could give me regarding this project and specifically, if and when my property will be affected. Thank you very much for your assistance in this matter.  
 Dr. Jack McIntosh

5/15/2006	7:22 AM	Tom Percival/FDOT copied PIO on response to Brian's McIntosh email: "Brian: Contact Ed Barfield at 386-943-5068 or 407-317-7007 xt 1107. Tom Percival"
5/12/2006	11:32 AM	PIO emailed Brian/CH2M Hill thanking him for email and noting I'd added Jack McIntosh to the project database.
5/12/2006	11:13 AM	Brian M./CH2m Hill copied PIO on email to Tom Percival/FDOT: "Tom, I contacted Jack McIntosh (110 Wekiva Park Dr., 407.474.4762) as you had requested. His property is just east of the river and sits on the northern ROW line. His property would be impacted if the northern alignment is selected. He was looking at potentially selling the property. I provided him information about the PD&E study timeline and he also asked about ROW acquisition. He would like to follow-up with someone from FDOT ROW to ask procedural questions. Can you please provide a contact name and number to me and I'll forward to Jack. Regards, Brian Brian J. Manwaring CH2M HILL 407.423.0030 x287

Contact Notes	Mary McKeever	Keller Williams Realty
Date	Time	Regarding
12/28/2006	4:11 PM	PIO emailed Mary McKeever relaying info: "Mary, I checked with the engineers and your property at 5590 Wayside Drive is parcel # 2627 on the project maps. Even with the adjusted SR 417 alignment alternatives that we have been considering in the area of Wayside Drive, the closest to your property would be 650 feet to the west, so there would be no direct impact. Have a happy New Year! Mary Brooks"
12/28/2006	2:30 PM	PIO returned call to Mary Mc Keever off Wayside Drive 321-231-4248, said she heard on WESH Ch. 2 that we picked the southern extension to 417. PIO noted no decisions have been made; noted only movement recently in project with the purchase of the Neighborhood Lakes property. She asked location of that? PIO noted west side of Rock Springs Run, crosses the Lake and Orange county borders. She said last she heard the southern extension was most likely. PIO said that may be the case, but nothing has been decided. PIO noted in January we will come forward with a draft recommendation for alignment and IC locations, but that will have to undergo local government and state agency review and likely revisions. From there will come forward with preferred alignment for April public hearings. PIO emphasized what comes out in January by no means final. She said say if the southern route is the one recommended from the study, and from going to the meetings, ... that route can vary how many feet north or south? PIO noted it's tight in there, but to address concerns from various residents like Tall Trees and Capri Cove, we have looked at slight adjustments, such as 50-100' in south end of Tall Trees or up to almost 200' in area of Capri Cove. PIO noted any time we shift away from someone we shift on top of someone else; it's very tight in there. She said her property is at 5590 wayside drive, near Campisi estates, she's about 1000' east of wayside and Orange Boulevard, with pond in back yard. Pond is only thing between her and 46. I have 4 acres, have horses here and farm; I don't care if you build it on top of me because I'm not going

anywhere. Last thing I saw proposed route was going in Jim Campisi's backyard. Sprile Bible College ... hasn't taken possession of that yet. Or it was taking out my client on Wilson Road very back corner of her 5 acres, concern for myself as well as my client. Have that property listed, and each time I show that property have to tell them project could come in, she said any maps or anything you can send me I'd really appreciate it  
realtor@marymckeever.com

12/28/2006	11:38 AM	Mary McKeever left MSG live off Wayside Drive. I heard on the news the other night that they had decided on the southern extension for the Wekiva Parkway coming off I-4. I just wanted to confirm that. If you could call me back I'd like to chit chat with you. 321-231-4248 I really appreciate it. Thank you so much.
8/1/2006	10:24 AM	Attended public workshop on 7/25/06.
4/28/2006	11:13 AM	PIO returned Mary's call, she said she'd be fishing in the keys with her mom and wouldn't be able to attend the May 9 meeting, what was that about? PIO noted we'll be giving an update to the SCEA. She said so I know the northern alternative was removed, right? PIO noted that's correct. So what's left? PIO noted the connection to 417, we examined the SR 46/Internatla Parkway alternative ... she said the county would never allow that because of the zoning, they don't want that area taken up by a road. PIO noted that is part of their corporate/technology corridor so would expect that to be an issue. PIO also noted there were engineering issues with trying to tie into the 417 interchange. She said so that leaves the 417? PIO noted that is the one we've gotten most support for, some neighborhoods have launched campaigns sending hundreds of comment forms supporting that, seems to have the most consensus. She said and by what act of god can I stop that from happening? PIO noted we still have the SR 46 alternatives also, though county won't allow expressway to tie in at I-4 so will have to drop down to at grade arterial somewhere beforehand. She noted issues with surrounding properties and that the county wouldn't go for that. She said so great, so I'm going to have a beltway in my front yard and it's going to hit my clients' houses. PIO noted there have been so many changes to the alternatives; it's possible it will have shifted in her area from what she saw in the initials. She said where can I see that map? PIO noted maps not done yet because we're still getting input/feedback from local government and state agency officials, almost every meeting something changes, they want something different. PIO noted we have like 9 more meetings to go through before we can update the maps and provide the viables, hopefully by end of May. She said so that's the only public meeting left? PIO said no, we'll have public workshops on the viables in mid-August. She said that's what she needed to know, thanks for getting back to her.
4/28/2006	10:28 AM	Mary McKeaver/realtor called and left MSG that "I spoke to you before re: the Wekiva extension. I live off Wayside Drive. I know there's a meeting on May 9. I would like a heads up on the meeting. I can't make it because I'll be out of town. My client showed me a notice from a Mr. Bender of Lake Mary. 321-231-4248. I'll be off the phone from 1230-230, and then back on the rest of the afternoon and will be on until 1230. If you can call me I'd appreciate it."
1/19/2006	10:50 AM	PIO called Mary McKeaver/Keller Williams 407-688-9283 was on website yesterday, read blurb for Wekiva Parkway, you and I talked a month ago. I live on Wayside Drive and I represent some clients on Wilson road that have concerns about the orange route affecting their properties. She recapped some of our previous conversation. She asked for confirmation that yellow route had been taken off the table? PIO said yes, that's correct. She asked if orange route still being considered. PIO said yes. She asked several times and several different ways if that was still being considered. PIO reiterated that the orange alternative connecting to 417 is still being considered. She asked if 46 was still being considered; PIO said yes it is. PIO also noted that at Commissioner Brenda Carey's request we're looking at an alternative that would somehow use International Parkway. She said that's what she told me we should do a month ago. "You gotta love Commissioner Carey." She said "I called Brenda Carey and told her I wanted that route." She asked is there going to be any more public involvement? PIO said yes; we hope to get the latest maps updated in March to be followed by next public workshops probably in July. She said great

that's very helpful. Mary said her colleague Jim Apicella had also called me and left a MSG (?not received), but he's here now if PIO could speak to him. PIO said that's fine. Jim Apicella requested Maps 5a-5d be sent to Jim Keller Williams 100 Waymont Crt., Ste 110 lake Mary 32746 attn. jim apicella. He asked if there was somewhere he could go to get more copies. PIO said they can download the files and take them to Kinko's to make additional copies; noted that's what I do. He said that's fine, just send those then.--1102 a m.

1/19/2006 10:47 AM Kristy/OCEA said Mary/Keller Williams 407-688-9283 complaining about maps, Kristy said spent time walking her through where things were and how they were set up now. Said she was very abrupt, wanted to know if any of the alternatives had been taken off the table because she'd read that somewhere. Kristy said told her would have to talk to PIO about that. She told Kristy she'd already spoken to me once and hung up.

1/19/2006 10:36 AM PIO returned call to Mary McKeaver live on wayside dr. 321-231-4248 c, h 407-688-9283  
1/19/2006 9:56 AM Mary McKeaver left MSG live on wayside dr. call me back re: Wekiva Parkway extension I would really appreciate it. 321-231-4248 c, h 407-688-9283 thank you very much.

1/5/2006	10:02 AM	-----Original Message-----From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]Sent: Thursday, January 05, 2006 10:02 AMTo: Skaff, Gary J.; Mark.Callahan@CH2M.com; David.Lewis2@CH2M.com; Brian.Manwaring@CH2M.comSubject: RE: Let's Build the Wekiva Parkway Instead of the Western Beltway Part BEveryone who submitted a comment form is getting a generic response similar to the attached. Some will vary based on whether they also requested maps, or asked specific questions about their property This confirms that the PD&E Study team has received their comments, that they're being evaluated along with all the others and lets them know the process from here on out. Response to all comments is expected as per FDOT's public involvement course curriculum available online for the last couple of years), and it's just good PR, besides.
----------	----------	--

1/4/2006	4:44 PM	-Subject Let's Build the Wekiva Parkway Instead of the Western Beltway Part Dear Mr. Chairman and Wekiva Commission Members Attached please find my comment letter regarding OOCEA's current plans for the Wekiva Parkway. I am disturbed at how far off track they've gotten from the Wekiva Parkway Plan to which we all agreed. I hope that your Commission will be able to redirect them into implementing the Wekiva Parkway plan, and I hope that Senator Constantine will stand by his statement that the road will not be built unless all the land identified in the legislation is bought. Thank you for your time and consideration.Sincerely,Jennifer McMurtray8175 Imber STOrlando FL 32825jenmcm@bellsouth.net407-249-0495(See attached file: Wekiva Parkway Feedback 12_05 2.doc

9/28/2006	6:03 PM	"September 28, 2006Curtis McNeil22546 Coronado Somerset Dr.Sorrento, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Curtis,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than

540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. By copy of this email, I am forwarding your comments to Mark Callahan with the consulting firm CH2M Hill. Mark is the project manager for the firm performing the project study for the DOT. Your comments will be fully considered in the evaluation of project alternatives. Thank you for taking the time to share your ideas with us.Tom PercivalSteve Homan/D5/FDOTTo 07/24/2006 08:30 Tom Percival/D5/FDOT@FDOTAMcc Subject Fw: Wekiva ParkwayFYI...Steve HomanPublic Information Officer386-943-5479 or 1-800-780-7102email: steve homan@dot.state.fl.us----- Forwarded by Steve Homan/D5/FDOT on 07/24/2006 08:30 AM ----- "Tom McRee" &lt;tmcree@cfl.rr.com&gt;To &lt;steve.homan@dot.state.fl.us&gt;07/23/2006 01:48cc PM Subject Wekiva ParkwayPlease respond to "Tom McRee" &lt;tmcree@cfl.rr.com&gt;I will not be able to attend the public workshop re: the proposals for the Wekiva Parkway. I understood that there is a way to submit my feedback anyway, but I was unable to find a specific link on this website. Please forward this email as my feedback or let me know of the appropriate communication channel.As a long-term resident of Central Florida, I would like to express the following concerns:1. The parkway is a needed part of our regional transportation system.2. The natural treasure of the protected lands in the Wekiva area should be preserved in the finest way possible.3. The section of the parkway along SR 46 from Plymouth to Interstate 4should be raised to mitigate the environmental impact.4. Interchanges and zoning around those interchanges should be strictly controlled to also limit environmental impact.5. For the best West-to-East flow of traffic, the parkway should meet SR 417 at I-4. One should be able to use the parkway to travel from Apopka to Oviedo without having to enter and exit I-4 in the busy Sanford area.Thank you for your assistance.Tom McRee101 E Wyndham Ct.Longwood FL 32779</p>

8/2/2006 11:56 AM Attended public workshop on 7/26/06. Submitted comment: "I would like to see the of ramp on Ponkan for these reasons - the new schools that Apopka has built, the rec center and with new expansions to come, the main Apopka power company work center, the road goes there from Rock Springs to US 441, The new subdivisions that are there now and the ones to be built in the near future, Kelly Park does not go through to the west. It stops at Round Lake Rd. Tot he east it will go to Rock Springs Road only for major traffic."

8/18/2006 8:31 AM Attended public workshop on 7/25/06 and submitted comment:"I enjoy entertainment and park facilities in this area and want to express my opinion on the location of the interchange on the wekiva expressway expansion completion. Kelly Park Rd. would be the safest, fastest and easiest route for me as I spend my dollars in this region."

Contact Notes Frank Mercadante

Date Time Regarding  
7/20/2006 11:44 AM PIO called back Frank and told him our project on west side of p-s road and his subdivision on the east, which he confirmed. PIO asked if he wanted to be on the mailing list for the project in that area? He said no, as long as it's far enough away it's okay with me. I appreciate it.

7/20/2006 11:33 AM PIO returned call to Frank Mercadante? 407-312-4846 closing on it next week, but had some doubt about the area. Somebody mentioned they were going to extend the highway over. Didn't know how far they were going to goIt's off Lester Road, corner of Sunoco and 441, maybe mile from there. PIO asked for property address. He said it's in Arbor Ridge, 2711 Spice Bush Loop. It's across from (??) parkway.PIO said I'd research the parcel and give him a call back. He said hanks very much.

7/20/2006 10:19 AM Frank Mercadante? called and left MSG I had a question about toll road 429 if they're going extend it past 441 and how far they're going to go? Are they going through Rock Springs? My number is 407-312-4846 I was thinking about purchasing a home out there. That's the only reason I'd like to know. Thanks.

Notes		
Date	Time	Regarding
8/15/2006	6:18 PM	PIO called back Michael 352-217-6994 to relay info, noted there would likely be some impact depending on whether widened to north or south. He asked if the project was definitely going to happen? PIO noted it's authorized by state legislation and that is the plan, to do something there, though some questions still be answered as to what it will look like, where it will connect. PIO noted the project is not fully funded, and that it could be several years before we had funding for construction. He said this is the only property he was interested in and he wanted to build a house there. PIO reiterated he'd be looking at some impact as yet to be determined, and scheduling will hinge on funding. He asked if there was anything else he should know? PIO noted even if part of property was left, it will be facing the roadway, which in that area would be an elevated parkway, so he would see it. He said okay, he guesses he'll look somewhere else. PIO asked if he wanted to be added to the project mailing list, in case he's looking elsewhere along 46 in Lake or Seminole counties? He said not at this time, thanks.--625 p.m.
8/15/2006	6:13 PM	PIO researched property query for Michael 352-217-6994 parcel id 27-19-29-300-003B-0000 owner Tom Taylor, property located on 46 just west of Longwood Markham Road and appears to be outparcel in front of a subdivision. Extent of impact will depend on whether FDOT decides to widen to the north or to the south.
8/15/2006	1:00 PM	PIO returned call to unidentified caller 352-217-6994 Michael said he is trying to purchase land, he heard the Wekiva expressway was going along 46. I need to know if this property will be affected?PIO asked for address. He said it doesn't have address because it's vacant but parcel ID is 27-19-29-300-003B-0000 and the owner is Tom Taylor. He said it's located on 46. It's in front of a subdivision but don't have subdivision name. PIO said I'll have to research it and get back to him.
8/15/2006	12:37 PM	??? (no name given) called and left MSG I'm trying to get some info about the Wekiva Parkway. I'm interested in buying piece of land that's in the planning I guess and I want to know for sure if that piece of property is going to be affected or not. If you give me a call I'd appreciate it at your convenience. 352-217-6994 thank you very much. Appreciate it.

10/30/2006	3:43 PM	Mike/BSA called and asked about GIS maps for the Wekiva Parkway? PIO referred him to Dave Lewis at CH2m Hill, but noted they haven't been able to accommodate that request	

in the past. PIO also noted the alternatives are shifting as we meet with various neighborhoods, churches, schools, etc. he said he only needs the one going to the south to I4 and 417? PIO noted Dave would be the one to ask; he's the deputy project manager and supplies me the maps I need.

7/17/2006	1:22 PM	Drafted concept letters and sent to:Gladys Williams, Bob Mills, Sue Hamilton, Mr. & Mrs. Warren Ackley, Amalia Corrigan, Bill & Eileen Walker, William Strickland, Ed Meixell	
7/12/2006	5:46 PM	PIO tried again to call Bob Mills 407-321-2156 live in the area of 46, and Orange Avenue, I was curious to know what the expressway is doing in that area. PIO asked if he had internet access? He said no but his daughter does. PIO noted map on website, he can zoom in to area of interest, or I can send him an 11x17" copy, would that be helpful? He	

said yes, it sure would, send to 727 Mallard Dr., Sanford, 32771. PIO noted we're getting high volume of requests for maps, but will try to get it out to him in next day or so. He said that would be fine.

7/12/2006 10:14 AM PIO returned call to Bob Mills 407-321-2156 line busy twice.

7/11/2006 4:46 PM Bob Mills 407-321-2156 called and left MSG please call , I want info on the Wekiva Parkway extension in the Sanford area. Thank you.

"September 20, 2006Brad Milsap21600 Covered Bridge LaneSorrento, FL 32776 RE:  
Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment  
AlternativesDear Brad,Thank you for submitting a public comment form for the Wekiva  
Parkway Project Development and Environment (PD&E) Study. We appreciate your time  
and concerns, and will continue to work with your HOA to address your issues. Your  
comments are being reviewed and evaluated along with the more than 540 other forms  
received, as well as input from local governments and state agencies. More than 1,200  
people attended the recent public workshops. Currently we are evaluating the public  
comments - many of which represent competing interests - as well as government  
feedback, and continuing the engineering analysis with regard to the viable alignment  
alternatives. That information will be used to draft a preferred alternative by December or  
January. That draft preferred alternative also must undergo local government and state  
agency review and revision before being presented at formal public hearings in March  
2007.Following the hearings the preferred alternative must be approved by the  
Expressway Authority, Florida Department of Transportation, Seminole County Expressway  
Authority, Orange and Lake County officials and other local, state and federal entities. The  
PD&E study is expected to finish with an approved alternative in late spring 2007. All of  
the latest public workshop exhibits are posted on the Expressway Authority website at  
www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button.  
On the home page under "Construction Updates" click on the text link for the "Western  
Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text  
link for the "Viable alternatives workshops" maps.I encourage you to check the website  
periodically for updates, or to contact me with questions or concerns at © 407-702-8375,

F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks"

Date	Time	Regarding
8/22/2006	10:15 AM	PIO called back Lisa Mitchell to relay info 407-260-7038 phone rang and rang; no answer and no machine. She called right back, said saw PIO was trying to reach her. PIO relayed info, noted couple subdivisions between 417 alternative where it crosses Orange Boulevard and Buckingham Estates. She asked when would the decisions be made on the alternatives? PIO noted plan to draft preferred alternative based on 450 public comment forms and government feedback by end of this year. that will have to undergo government review, then public hearings February-March on preferred alternative, with approvals to follow some time after that.She asked what would the noise be like from the 417? PIO noted 2 subdivisions between them and that alternative to the north, and 417 alternative would be well east of Orange Boulevard as it heads south. PIO noted they're likely to hear more noise from Orange Boulevard than the 417 in that location. She said well thanks for getting back to me so quickly. PIO asked if she wanted to be on mailing list to be able to track the project? She said that would be wonderful, send info to 1404 Cardinal St., Longwood 32750 email lisa32714@yahoo.com PIO also noted all of the public workshop maps for the project are on the EA website, gave address, in case she wants to review. She said thanks.
8/22/2006	9:35 AM	Lisa Mitchell called and said that we're looking to buy real estate in area of the 417 bypass I wanted to find out what subdivisions, if any, were going to be affected? PIO asked where they were looking? She said they're Looking at Buckingham Estates. PIO asked for property address? She said not sure of house number but it's on Everingham. PIO said don't think we're hitting Buckingham Estates but will research location and get back to you She said thanks. 407-260-7038

8/7/2006	9:41 AM	Attended public workshop on 8/1/06. Submitted comment: "46A reroute: I don't like the idea at all! Understanding the concerns for wildlife - relocate 'em! Seriously my preference would be to expand current 46A to 4 lanes. (2) Move the proposed 46A reroute to the east as far as possible (2 lanes only) Proposed reroute has road going through wetlands. The bypass of traffic on 46A (proposed re-route) needs to be accompanied by a solid parkway strategy (alternative 6) to reroute the traffic leaving 46A for local access."

Date	Time	Regarding
8/25/2006	9:45 AM	Annemarie/Rep. Hayes' Office called and said they received a letter from Thomas Montaldo, 32532 Hawks Lake Lane. She said they sent a letter to LC Comm. Catherine Hanson and copied us, "...asking you to fight to prevent the building of any 46A bypass." They moved there 7 months ago, said they didn't know about it. They said the Bypass threatens what they fell in love with, and that kind of thing. She asked if I was aware of this issue? PIO said yes, we've been in touch frequently with Heathrow Land Co. officials, who are building the new subdivision, and also met with them and about 50 residents there a week ago Tuesday. PIO noted we plan to go back and meet with them again after looking at what sort of adjustments could be made to 46a. she asked if this was a done deal? PIO noted CR 46A realignment part of WPPA legislation, so it's mandated to happen to try to protect that wildlife corridor, but exactly where that will fall has yet to be determined. She said she'll let them know they can contact PIO if they have any questions PIO asked if I needed to email her any info? She said no, since the letter wasn't to them but was just a copy.--953 a.m.

8/1/2006 3:06 PM attended public workshop 7/25/06

7/31/2006 1:40 PM Attended public workshop on 7/25/06. Submitted comment: "i think it makes a lot of sense for the Seminole interchange with I-4 to occur at the 417. Traffic flow would be better. The proposed SR 46 interchange at I-4 I think would cause access problems to area residential complexes and business and mall traffic. Traffic flow would be slowed. The 417 interchange would be the best alternative."

Date	Time	Regarding
10/5/2006	11:52 AM	Ken Morris emailed: "The county stated to you that they do not want the GreenPlace property fragmented, so an easy, feasible and, I'm sure, satisfactory solution would be to lay the Parkway along the county line. Lake County requested and was granted a demand that it not be in Lake County, but having it lay along the county line might well be the optimum solution for every party involved. That area is much less developed than the Boch Road/ Haas Road area. It appears to me that the only thing worse for Orange County than having the Fazio property fragmented would be to have access to it from Orange County blocked by an elevated multi-lane highway south of the property. If the Parkway is located at the north edge of that property, the southern access problem goes away. Also, if the Parkway goes south of the GreenPlace property then the pine forests east of my property, which Orange County and the state of Florida have discussed purchasing, will be greatly fragmented."
10/5/2006	11:40 AM	Ken Morris emailed: "At the end of my previous reply I meant to say the southern access problem goes away."
10/5/2006	11:30 AM	Ken Morris responded to PIO email: "The county stated to you that they do not want the GreenPlace property fragmented, so an easy, feasible and, I'm sure, satisfactory solution would be to lay the Parkway along the county line. Lake County requested and was granted a demand that it not be in Lake County, but having it lay along the county line might well be the optimum solution for every party involved. That area is much less developed than the Boch Road/ Haas Road area. It appears to me that the only thing worse for Orange County than having the Fazio property fragmented would be to have access to it from Orange County blocked by an elevated multi-lane highway south of the property. If the Parkway is located at the north edge of that property, the southern access goes away."
10/4/2006	5:40 PM	PIO scanned Ken Morris comments and graphics and emailed to project team "Greetings Ken Morris called today to make sure I received his recent comments and map graphics, which I have attached here. He was adamant about me passing this on to the study team. Just FYI. I emailed him just a few minutes ago with info that Dave provided from the recent meeting with OC on the GreenPlace property. Have a good evening! Mary Brooks

10/4/2006	5:25 PM	PIO emailed Ken Morris/Boch Road: "Ken,I received some updated info this afternoon regarding the Sept. 28 meeting between Wekiva Parkway PD&E Study Team members and officials from the Orange County Environmental Protection Division regarding the OC GreenPlace properties.Given the concerns from Boch and Haas Road residents including yourself, the county agreed in the meeting only to let us analyze the potential impacts if we were to place alignment alternatives for the Orange County-Lake County Systems Interchange on the GreenPlace property (former Fazio parcel). The county agreed to let us look at the impact of potentially taking half of the needed right-of-way from your property one of the meeting attendees said this was your idea) and half from the GreenPlace former Fazio) property. The county also agreed to let us analyze the impacts of taking 100% of the needed right-of-way from the GreenPlace property. However, the county emphasized that they do not want the conservation property fragmented. It was agreed that CH2MHILL would lay out the alignment alternatives and evaluate comparative impacts and report back the findings. This will not be a quick exercise, as it involves reconfiguring the systems interchange, relocating stormwater ponds, calculating impacts, as well as estimating construction and right-of-way acquisition costs. Please note the Orange County Environmental Protection Division did NOT agree to have the Wekiva Parkway alignment alternatives on the conservation parcels; they only agreed to allow an analysis to be done. I hope this helps. Please feel free to call or email with other questions or concerns.Mary Brooks
10/4/2006	4:44 PM	PIO reviewed OC GreenPlace property meeting notes to prepare info for Maxwell Wright and Ken Morris.
10/4/2006	12:17 PM	Dave/Ch2m responded to PIO Wright email and Morris voicemail and copied Mark: "See attachment for info re: response to Maxwell Wright and your voice mail message re: Ken Morris inquiry. The property owner who proposed the 50/50 approach is Ken Morris, according to Rep. Brummer. Use the attachment for information to pass on to Wright and Morris, but please do not send them the meeting summary as it is a draft that has not yet been sent to the meeting attendees. We are laying out the alignments on the Orange County conservation parcels (former Fazio property) now, but it will be a while before we have the systems interchange reconfigured, stormwater ponds located, the impacts calculated, the construction cost estimates, and the ROW cost estimates. Please note Orange County Environmental Protection Division did not agree to have the WP alignment on the conservation parcels, they just did not object to the analysis being done (especially with a soon to be OC commissioner in the room). Let me know if there are any questions."
10/4/2006	11:22 AM	PIO returned call to Ken Morris and let him know that I got his MSG and just picked up his comments in the mail, had not had a chance to review. He said it's not a typical comment form. PIO noted I had opened it and briefly scanned the first page and I saw that to be the case. He said the good info is not on the first page. PIO said I have a call in to the senior project manager to see what the latest is on the alternatives in that area. PIO noted I know they've been making refinements and continuing to meet with OC officials and others. He said he wanted me to get that info to everyone involved in making the decision PIO noted I'd scan the info and get it to the project team. He asked who would make the decision? PIO noted for overall project it would be FDOT, OCEA, SCEA, OC and LC officials, and others. He asked specifically in his case? PIO noted OCEA Board with input from FDOT and OC largely. He asked who was on the board? PIO noted Mayor Crotty, Chairman Keen, FDOT representative and 3 members appointed by the governor. He said he considered it a conflict of interest if OC Mayor Crotty would argue amongst commissioners that the parkway shouldn't be on their conservation land and that he gets a vote on the OCEA board also. He repeated this several times and noted it's a sore point with him. PIO reiterated I would review the info, get it to the project team members and get back to him once I learned the latest from the senior project manager. He asked several times that I call him with the info, which I again said I would do.--1135 a.m.
10/4/2006	11:10 AM	PIO picked up mail, received lengthy Ken Morris personalized comment form and map graphics.
10/4/2006	9:07 AM	Ken Morris/2121 Haas Road in Apopka called and left MSG. I've talked to you before about

the fact that I lay in the path of both of your latest proposed paths of the Wekiva Parkway  
 I sent you a comment sheet and wanted to be sure you've got it. Wanted to see what  
 kind of response you'd gotten to it. If you could bring me up to date on where we stand  
 on these proposed paths. If you would give me a call. H 407-889-7569, c 407-467-????  
 Thank you very much

8/9/2006	8:51 AM	Attended public workshop on 7/26/06.
6/8/2006	5:11 AM	Dave/CH2M Hill emailed correspondence re: Ken Morris as discussed in yesterday's meeting: "Forwarding for public contact record From: Manwaring, Brian/ORL Sent: Friday, June 02, 2006 12:07 PMTo: Callahan, Mark/ORL; Lewis, David/ORLSubject: Ken MorrisAccording to Ken, the Green Place lands are part of a program that will in time eliminate between 1/2 and 2/3 of the country's population. The concentration camps are already being developed. In fact, he's seen one of the mass murder facilities somewhere in Apopka. And, he's going to move an Indian burial ground on to his property to stop the WP.Brian J. ManwaringCH2M HILL407.423.0030 x287
6/1/2006	4:54 PM	Brian/CH2M Hill and PIO discussed that he's going to send Ken Morris some maps and schedule a time for he and PIO to meet with Mr. Morris in the field. PIO said would be happy to attend and just let me know when.
6/1/2006	9:53 AM	PIO emailed Rep. Brummer, copied Mark, Brian and Dave/CH2M Hill: "Good morning, Rep. Brummer, Please note below the history of contacts I've had, or been made aware of, with Mr. Ken Morris (including yesterday's emails). My first contact with Mr. Morris was May 12, 2006. Please feel free to call or email with any questions or requests for follow up. Thanks Contact History ..."
5/31/2006	4:19 PM	Mark/CH2M Hill forwarded email string involving Rep. Brummerd to PIO: "FYI__From: Fred Brummer [mailto: fredbrummer@earthlink.net] Sent: Wednesday, May 31, 2006 3:37 PMTo: Callahan, Mark/ORLSubject: Re: Wekiva ParkwayMr. Callahan: Mr. Morris now acknowledges that someone contacted him. Please keep me aware of any follow up conversations with Mr. Morris. Ask Mr. Manwaring to be sure Mr. Morris knows your firm name and that you are engaged by the Expressway Authority when he again speaks with him.Thanks.----- Original Message ----- From: Mark.Callahan@CH2M.com To: fredbrummer@earthlink.net Sent: Wednesday, May 31, 2006 3:23 PMSubject: RE: Wekiva ParkwayRep. Brummer Brian Manwaring from our office spoke with Mr. Morris the week of May 22. I will forward the gist of the conversation when Brian gets back in the office. As I recall he wants someone from our team to meet him at his property and we have not set up a date/time at this point. We will follow-up again.Thanks,Mark Callaha__From: Fred Brummer [mailto: fredbrummer@earthlink.net] Sent: Wednesday, May 31, 2006 3:16 PMTo: Callahan, Mark/ORLSubject: Wekiva ParkwayMr. Callahan: When we last spoke you were going to have someone call Mr. Ken Morris, property owner on Haas Rd, about the parkway rout thru his property.I spoke with Mr. Morris today. He tells me he has not been contacted by a CH2M representative. His number is 407-467-2799Thank youFred Brummer
5/31/2006	4:12 PM	Mark Callahan forwarded email string to PIO: From: Manwaring, Brian/ORL Sent: Wednesday, May 31, 2006 3:52 PMTo: Callahan, Mark/ORLCc: Lewis, David/ORLSubject: Ken MorrisMark,Here's the notes from the Ken Morris phone conversation and the map of his properties.BrianBrian J. ManwaringCH2M HILL407.423.0030 x287TELEPHONE CONVERSATION RECORDKen Morris Phone No.: 407.467.2799 Date: May 22, 2006Call From: Brian Manwaring/CH2M HILL Subject: Wekiva Parkway - Morris properties in Orange CountyI spoke with Ken Morris, a resident in Orange County, who was referred to us by Representative Brummer. Mr. Morris noted that he owns the following properties in Orange County:2121 Haas Rd.2095 Haas Rd.2416 Boch Rd.2416 Boch Rd.2420 Boch Rd.2424 Boch Rd. I told Mr. Morris that I would need to check the forementioned properties on a map to assess the overall impacts. I did note that one of

the properties (2121 Haas Rd.) was directly impacted by the two East-West options in Orange County. Mr. Morris asked why the two remaining alternatives impacted his properties. I explained some of the issues in the area (i.e. Orange County Green Place Parcels, karst/wetland impacts, request to stay west of Plymouth/Sorrento Rd) that led to the placement of the current alignment options. Mr. Morris noted that he felt discriminated against and that the County was "out to get him". He noted several family issues and the difficulty that relocation would be to him and his family. He also explained that the Orange County Green Place program was fraudulent, and directed me to [www.wildlandsprojectrevealed.org](http://www.wildlandsprojectrevealed.org) for more information. I explained to him that since he was dissatisfied with the available options, his best course of action was to lobby local politicians from Orange County and the City of Apopka in his defense. I also noted that it was in his best interest to speak to an OCEA ROW representative, who could provide an overview of the land acquisition process. Mr. Morris noted that he would not leave his property "without a fight". He asked that someone meet with him in person to explain why the two remaining alternatives impacted his property. I noted that I would be in touch with him in the future. Mr. Morris spoke with Mary Brooks (Public Information Officer) on at least one previous occasion in the preceding weeks.

5/22/2006	11:23 AM	Ken Morris emailed: "Look at the plan for Florida <a href="http://www.discerningtoday.org/members/Digest/1999Digest/July/Sustainable%20Florida.htm">http://www.discerningtoday.org/members/Digest/1999Digest/July/Sustainable%20Florida.htm</a>
5/22/2006	8:38 AM	PIO responded to Ken Morris: "Thanks for passing along that info Ken. Did you get the historical site marker follow up that I sent you?"
5/21/2006	8:58 PM	Ken Morris KWRentals@aol.com emailed: Here is what all the land the state and county buys is going to be part of: <a href="http://www.wildlandsprojectrevealed.org">www.wildlandsprojectrevealed.org</a>
5/19/2006	9:29 AM	PIO relayed historical site research results via email to Ken Morris as requested: "Good morning, Ken, I wanted to get back to you to let you know that the dot on your property for that historic site is misplaced. It should actually be further west at 2526 Haas Rd., which is the site of the Frank Haas bungalow (circa 1920). I hope that helps. Please feel free to call or email with other questions or concerns.
5/18/2006	2:08 PM	Dave/CH2M Hill responded to Ken Morris email, copied Brian: "The dot for that historic site is misplaced. It should actually be further west at 2526 Haas Rd., which is the site of the Frank Haas bungalow (circa 1920). There is an Orange County owned dry bottom retention pond across Haas Rd. from Mr. Morris' access road.
5/17/2006	3:09 PM	PIO emailed Dave and Brian/CH2M Hill: "Good afternoon, Got the latest in a series of calls today from a rather upset gentleman, Ken Morris, who owns the property at 2121 Haas Road, parcel ID 06-20-28-000000028, as shown here (the vertical meat cleaver-shaped parcel with the site designation at the end of the driveway on Haas Road). Mr. Morris, who is very upset about both remaining alignments cutting across his property, would like to know the source of the historical site designation. Please provide any info you can so I can pass this on to him. Thanks."--309 p.m.
5/17/2006	3:00 PM	Researched Ken Morris' property location. He has meat cleaver shaped parcel on north side of Haas Road, about 4k' east of Plymouth Sorrento Road. There is a historical site dot at end of his driveway.
5/17/2006	12:05 PM	PIO returned call to 407-889-7569. Ken Morris said I spoke to you the other day. He asked what the colored dots meant on the website map? PIO noted the legend at the bottom of the page indicates the dots are historical, archeological sites or community facilities. He said one is at the end of his driveway on Haas, what is that? PIO said I would have to research it and get back to him on that. He said what is the cross hatching? There's pink cross hatching on the land with the pond on Plymouth Sorrento Road. PIO noted map legend indicates cross hatching is either public lanes or potential public lands. He said so that's the county property - why don't you go through there? Why are both alternatives going through my property and nobody else's? Before when you all were going to do this

2-3 years ago, it looked like you were going through more vacant land; now you're going through people's homes. PIO noted there has certainly been significant development in that area in the last several years. PIO noted through evaluation of public and government feedback (including 500 public comment forms) and engineering analysis, these are the routes deemed to be most viable at this point. He continued to argue his property shouldn't be the "only" one hit by both alternatives? Why don't you go over the county property? PIO noted those are all fair comments that I encourage him to submit those on a form. PIO reiterated request for him to be part of the process and submit a form. PIO reiterated how we got to this point, noted tabulation of votes of and against various alternatives. PIO asked had he submitted a form previously? He said no because he didn't think it would do any good. You all are a bunch of bureaucrats making high paid salaries and you don't pay attention to anybody else. PIO reiterated we have reviewed and tabulated input from each form, the more specific the comments the better re: why an alternative should or shouldn't be used. PIO noted this is the process and again encouraged him to get involved. He said the way it's shown here I wouldn't have any access to my property. You all are building this for people to get to Disney. Nobody around here will be able to it. PIO noted traffic modes. Show most people in this area trying to get to I-4 and 417, not Disney primarily. PIO noted we absolutely want local folks to benefit from this; there's not many tourists in this area. He argued we only care about the environmentalists and the wildlife. PIO noted most of the parkway is intended to be elevated to allow continued wildlife crossings, but access is a key issue to get people on and off. PIO noted if part of this is going to be a toll road, why wouldn't we want people to use it? He said then how are you going to give me access? PIO reiterated local access is absolutely a consideration, but specific access to a particular property would have to be designed. First we have to figure out a corridor then we will start hammering out some details for access, ramps, ponds, etc. PIO noted purpose of study is to find a corridor that meets the most needs and goals. He said so cost isn't a factor? That's what one of your people told me at the meeting at Apopka high school. PIO noted don't know who said that or why, but cost is absolutely a consideration. PIO noted even though, for example, the 417 connection at I-4 makes the most engineering sense and have a lot of support, the costs are significant and that is absolutely a consideration. PIO noted these things take a lot of money and there's no bottomless pit of money lying around. Mr. Morris repeatedly argued about why his property was chosen and how doing the comment form won't do any good. PIO noted it's his option whether or not he wants to be involved in the process. He said he thinks a better use of his time would be to make this property more expensive, get a development permit and put a bunch of homes on there. PIO noted it's his property; he absolutely has the right to do whatever he chooses. PIO noted we're running into the same scenario in multiple locations on this project. He repeated disparaging remarks about the bureaucrats, etc. PIO noted I'm sorry if that's been his experience in the past, but he's welcome to be part of this process or not. PIO noted I would track down the historical marker and get back to him. He said he'd send a form but I don't think it's going to do any good.--1228 p.m.

5/15/2006

3:15 PM

PIO tried Ken Morris at other number to get his contact info for database. He said it's Ken Morris, 2121 Haas Road, Apopka 32712 kwrentals@aol.com I'm retirement age, have five mobile homes out there, have handicapped sister out there and if you take land she'll have to go to state facility where you'd have to pay the bills, would destroy my wife business, destroy habitat for giant redheaded woodpecker, gopher tortoise, hog nosed snakes which are rare, eagles .... I've nurtured the place for 28 years, increased the habitat of the animals, I'm getting income from 5 mobile homes, \$40k a year, if I lose that, and I'll be retired without any income. PIO noted that if in fact his property were to be impacted, he would be compensated for the land. He said you're not going to compensate me for the income? PIO noted business compensation would have to be negotiated by him and his attorney if his property were ultimately affected. He said by the time you get around to doing this thing, you won't be paying by the acre you'll be paying by the lot because we'll have a development permit. PIO noted that is a common challenge that we run into, particularly with intense growth in the area. PIO noted that's nothing new. He said I can't believe you're going to destroy all of this wildlife habitat we have up here. PIO noted there are specific and strict design criteria we must follow that was part of the state legislation

in order to be able to do a project like this in such an environmentally sensitive area. He said he heard we were not only buying ROW but another 1,000 feet on both sides to put in landscaped buffers. PIO noted that's a little far fetched, though we are required to purchase about 10,000 acres of land for conservation as part of being able to do this project. If you put it in you're going to cut me off from any public road. I won't have any access? PIO noted if there is an access impact, we would have to provide access; we're looking at issues like that already. He said how would you do that? PIO noted if his property is affected access would have to be included in the design. He said the land in front of me the county going to be a park, but there is no access to it. People have to get to it from Lake County side. How can you say it's going to be a park in that case? PIO noted that is an Orange County government endeavor, not being done by OCEA or FDOT

PIO noted there are different entities at work here. He said it's all part of the wild lands project, said I should check out the Wildlandsprojectrevealed.com website. PIO said I'd take a look at it and thanks for sharing info. PIO asked if he'd tried to pull the public comment form off the website yet? He said no, he's been out of town. PIO noted he's welcome to take as many pages as he needs to get all of his points in. PIO noted if he has trouble downloading it to let me know and I'd send him one if necessary.--333 p.m.

5/15/2006	10:34 AM	PIO called back man from Friday afternoon to get his name and address. 407-889-7569, 407-467-2799 answering machine said it's Ken Morris. PIO left MSG for him to call me back with his address, if he gets my voicemail please just leave the info so we can be sure he gets the newsletter, which we hope to get out in June, and the meeting notices. Shooting for mid-August meeting but haven't set dates yet. Noted he and I spoke Friday afternoon.
5/12/2006	4:36 PM	PIO called Kristy/OCEA and left MSG to make sure the public comment form is on the site. PIO noted don't know if it got moved around or taken off, but just got a call from a disgruntled property owner so we need to make sure it's on there.
5/12/2006	4:13 PM	PIO returned call to man who still did not give his name but was very upset. I see two of the remaining routes go over my property in Lake County. It will never happen. The only way you'll get my land is if I'm in a pine box. He asked why the routes went over his property. PIO noted these are the routes being considered based on feedback so far. He said my whole life is in this property. I built everything around here. If you take my land you'll destroy my life. PIO noted those are the type of comments he should submit on a public comment form which is available on the website. PIO noted I understand he's upset. PIO noted we're just in the very early stages of developing this project and it's not fully funded. PIO noted this is not something that will happen tomorrow, and I wanted to make sure he was aware of that. He asked what is the timeframe? PIO noted study to finish spring 2007 with an approved alignment, then 2-3 years for final design, another 2-3 years for ROW acquisition, then construction. Could be 2012-2015 or more depending on funding availability. He said by that time he will have had time to hire all sorts of lawyers. He said why don't you just go north of me, the county owns that land? PIO noted that's excellent info to put on a public comment form, and we've gotten other suggestions of that nature. He said that's public land and heard we wouldn't go over public land. PIO asked if he was on the project mailing list? He said no. PIO noted I'm about to get on a plane, but asked that he call back please with his name and address so I can make sure he gets the meeting notices and project newsletters, etc. he said he heard you just had a meeting? PIO noted on Tuesday we presented a study update to the SCEA at their regular meeting. PIO noted we're planning public meetings on this project for mid August, though we haven't set a date yet. PIO again asked if he would leave his info in a MSG for me? He said he would. PIO noted if he had any trouble downloading the comment form to leave that in the MSG also and I'd send him one.--433 p.m.
5/12/2006	3:07 PM	MSG but no name, 407-889-7569 man asked me to call him at 407-467-2799.

Date Time Regarding  
8/2/2006 8:56 AM Attended public workshop on 7/25/06.

Contact Notes Susan Morrison

Date Time Regarding  
6/7/2006 11:15 AM PIO returned call to Susan Morrison 407-328-4722, 1, x 3366#, 407-708-2045 (works in SCC financial aid). She said we were looking at the (web)site. The frontage roads, have they decided on that yet? PIO noted SC commission asked us to look at various concepts, some have been removed from consideration based on analysis, noted we should have some frontage concepts at the public meeting. PIO noted we haven't sent out anything since last meetings; thought we were going to have newsletter and meetings earlier, but has taken time to get through all of the local government and state agency review and make changes based on those meetings. PIO noted we're working on newsletter now and should come out end of month. PIO noted if they've received info previously they'll also get the meeting notices. PIO noted shooting for late July for meetings but still have to get those scheduled with the sites. She said I'm concerned about Markham woods area s and Seminole estates, she asked when we would start acquiring property? PIO noted we won't finish study until spring 2007, so at that time they'll know if they're on or close to an alignment. PIO noted have some money for design and ROW acquisition, but not full funding. So schedule will be affected by availability of funding, noted last estimated cost and that land and materials going up still. PIO noted last construction start estimate 2012-2015, but that schedule fluid depending on funding. She asked if the next meetings would decide where it goes? PIO noted no, but input from the meetings and governments will determine which concepts and alignments move forward for final consideration. She was thankful for the call back and said they'd keep an eye out for the newsletters, etc.

6/7/2006 10:36 AM Susan Morrison called and left MSG I would like some info on the next meeting on Wekiva Parkway extension. And some info sent to us, we were getting listings since we're in the corridor but we're not getting any info sent to us anymore. 407-328-4722 x 3366 thank you.

Contact Notes Wade Morse

Date Time Regarding  
8/1/2006 10:04 AM Attended public workshop on 7/25/06.

Contact Notes Aneeta & Bob Morton

Date Time Regarding  
9/20/2006 6:04 PM PIO emailed Wayne Rich, Bob Mallett/Broad & Cassel and Deborah/PBS&J ROW: "Wayne As we discussed after the last board meeting, I have attached several Wekiva Parkway public workshop comment forms that specifically address ROW acquisition questions and issues for your response. Can you please copy me on the responses so I can enter into the project database? Thanks. I think there were a few more that I will forward once I find them again. Mary Brooks

8/7/2006 10:11 AM Attended public workshop on 8/1/06. Submitted comment: "I am one of three property owners of #2905. The only access to this property is along the west side of #183 Lake County. Either buy all of property or provide access. Will consider early acquisition at the right price. You may write or call me at 321-777-7436 res or 321-960-5342 cell."

7/24/2006 4:42 PM PIO returned call to Anita Morton 321-777-7436. my brother and sister and I own property a little west of Plymouth Sorrento Road, guess all three of us got notification in mail about workshops you're having. One on Aug. 1 is one I'm going to attend. Will we be able to ask questions? Yes,. She said our property in OC but just on edge of Lake County, will we still be able to get as much benefit from that meeting as if we went to orange county? PIO

noted same info will be at all three meetings, she can go to whichever one is convenient for her. She asked if Lake Receptions was something on a building or what? PIO said yes, it's an event hall, would recommend she do mapquest, don't trust myself to give her directions. She said that's fine. She asked when will they make a decision? PIO gave her study schedule, after public hearings in Feb.-March have to get approval from EA, DOT and federal agencies. Study supposed to conclude spring 2007 with approved alternative. She said okay thank you very much.

7/24/2006 12:08 PM Anita Morton 321-777-7436 called and left MSG I live in Satellite Beach. I am quite interested in this project for the Wekiva Parkway and SR 46 bypass. My brother and sister and I own almost 44 acres in one of the proposed areas. I'd like to talk with you about the workshop. if we're able to ask questions there and how do I get to the Lake Reflections in Mount Dora?. I'm planning to attend the Aug. 1 workshop at lake receptions. ... If you could call me at home I'd appreciate it.

Notes			
Date	Time	Regarding	
3/6/2006	4:02 PM	<p>PIO responded to latest Mike Mullenix email: "Mike,I can tell you that some of the routes that have been removed from consideration were the yellow or northernmost route in Seminole County that would have connected to I-4 at US 17-92. Seminole County also requested that we look at an additional alternative going down S.R. 46 to International Parkway and then connecting with S.R. 417 at I-4.The Lake County Water Authority has requested that we remove from consideration a route that would have gone through the Wolf Branch Sink Reserve. We also have shifted the alternatives that were encroaching on Rock Springs Run Reserve to minimize that impact. Other than that, all of the other alternatives are still in play in some form or another. The more viable alternatives maps in late March or April will further address these questions.Future phases for this project are not funded beyond the PD&amp;E study and some of the final design at this time. Funding challenges will obviously affect the overall project schedule. We do not expect to begin construction, barring the appearance of some major funding, before 2012 or thereabouts. No telling when construction would end. Project will likely be done in segments and scheduling of those, again, will depend on funding.Everything at this stage is highly tentative. But the project does have the weight of state law and is expected to move forward in some fashion. Stay tuned for the more viable alternatives!"</p>	
3/6/2006	3:36 PM	<p>__From: Mike Mullenix [mailto:mmullenix@boyddev.com] Sent: Monday, March 06, 2006 3:36 PMTo: Mary BrooksSubject RE: Wekiva PkwyMary, thanks for the quick reply. I will check the Exp. Auth. website for the current map, and will check back later this month to see if the updated maps are ready. Of the alternate routes, are there 2 or 3 that look like the ones that will go forward? If you can let me know which of the alternate routes are the most likely to become reality, I can focus on those routes when I look at the map on the Exp. Auth. website. I'm assuming that there must be a number of routes that were initially proposed I know that some of the large, environmentally sensitive tracts have been, or are being, acquired but is the funding in place for the balance of the r-o-w acquisition once the final alignment is chosen, or is there only funding up through the PD&amp;E phase? Final question, is there an approximate estimate when construction of the final leg will begin and end? Thanks for your help.Mike</p>	
3/6/2006	3:20 PM	<p>PIO responded to Mike Mullenix email: "Hello Mike,You've reached the correct person. Since the public workshops, we've been revising and eliminating some of the initial alignment alternatives. We had the Wekiva Parkway initial alignment alternatives maps posted on the Expressway Authority website (www.ocea.com) but that site is being worked on. Hopefully it will be back up soon. Meanwhile, we're in the process of updating those maps with the more viable alignment alternatives. We hope to have those ready by late March or in April.Then we'll have the next public workshops this summer, perhaps in July. From there the alternatives will be whittled down again to just a couple of preferred alternatives. We expect to have public hearings on the preferred alternatives in January 2007, with the PD&amp;E study concluding in spring 2007 with an approved alignment. I'm adding you to the project database, so you'll get newsletters, meeting notices, etc. Please</p>	

feel free to forward any specific questions and I'll be happy to provide whatever information I can at this time. "

Renzo Nastasi

OC Public Works

Regarding

Renzo Nastasi/OC called OC Transportation Planning Group meeting to order, noted been a while since we got to together, lot of things going on in county. Hope to get back on schedule. Do have a quorum. Asked for motion to approve minutes. Approved. Gary noted project in some form been going on about 18 years. Back in November series of public meetings present project and receive feedback, presented conceptual alignments to get their input. Met in each of the counties, about 1150 attended, 400 at OC meeting. By and large people accepted project out there and positive, primary interest is where it's going to go. Some issues that came out of meeting, biggest concern in OC was local IC location. Looking at Kelly Park and Ponkan. Other concern was timing from the project. Right now EA has money in 5 year work plan for design and adv ROW acquisition. Those won't go forward until we get through PD&E. LC east side access was big issue, as well as access to IC with 441. In SC surprisingly alternative that veered off 46 and tied in with 417 has received lot of support, from traffic standpoint it obviously is the best, people in area and commission realizes that. We're looking at that further. Also concept tie in with 46, stop short of 46, yellow alternative has been eliminated from further consideration based on public comments and county. Gary noted we're now refining or eliminating down to viable alternative to present in future public meeting. OC board - pointed out south IC with 441 and MBX. Basically one alt to north to Ponkan where it splits into two alts when we had public meeting. Since then have refined alts and they kind of merged along lines of pink, really have two alts pretty close. One issue will be where IC located, Ponkan or Kelly Park, other issue mainline toll plaza. Under WPPA, OC section can be tolled. Gary pointed out possible mainline toll location. Re: IC traffic study ongoing looking at location of IC, will submit report to OC and ask your opinion on where it should go. EA has felt it's a local issue for OC and Apopka. Traffic wise there are some differences, and impact-wise differences as well. Other issues re: OC alignments, OC purchased preservation land on north and east side Plymouth Sorrento road, about 80 acre parcel. Also historic house about 100 years old we're trying to avoid, also some environmental features, a seeping side slope. We met with Beth Jackson who recommended we try to avoid that as well. Narrowed down in NE area to two alignments, on other side of historic house but north of environmental feature. Pointed out tie-in location. Also systems IC tied into NW along the curve, would tie into 46 bypass, go up to 46 and west to US 441. For your info WP considered limited access, whereas bypass considered controlled access with intersections and signals as appropriate. Looking at two E-W alignments in this area... still looking at east and west alignment here, hope to narrow down by next public meeting. Environmental issues to south, several developments permitted by city, need to know how those affect our project as well. Pointed out typical section, 300' ROW, 4 lanes expandable to 6 lanes, similar to what MBX will look like, though MBX will be 6 lanes initially. Anybody who drives the road knows how hazardous it is, did fatality surveys along 46, and counted 58 in last 6 years on 46, Plymouth Sorrento and 441. Traffic boards - existing, green C and above, yellow D. areas of congestion on 46 across the river, I-4 and 441. Most of NW OC with exception of Rock Springs Road. 2025 4 lanes, even with that a lot of red, volumes in 40s and 50s on 46, 60s along 441, a lot of red and congested operation. Wekiva Parkway board - beltway would have acceptable levels of service, as well as most of NW OC. Roads that were red would be green or yellow Plymouth Sorrento still shows up as red, will change depending on IC location. If you push that up to Kelly Park would make that operate a little better. Wekiva Parkway will probably take about 15k off 441; won't ultimately affect need, will delay improvements required on 441. Schedule - November meetings, evaluating and refining into viable alts, hope to have that completed May or June with public meetings to follow. From there determined and work on preferred alt, public hearing in January '07. Gary said believe DOT has some money in their program for some ROW acquisition for the e-w portion of project in Lake and Seminole. Question: in portion east of Zellwood Station, are you doing pond siting with PD&E? Gary said will have prelim sitings by time we do the viables. Man said two pieces of property OC owns. They're old borrow pits... Gary said we've got point we have to meet with MBX, and trying to get away from Plymouth Sorrento road, so don't have a lot of alts. OC said want to

declare those parcels as excess property, you don't want us to get rid of them / Gary said no, talk to us first. Also north of Zellwood on golden gem road we have a maintenance facility and a clay pit, ...20 acres on NE corner of Zellwood corn festival site. Gary to get back to them on how that would be affected. Guy said they just rebuilt it so want to keep it. Question: where is school on Ponkan road? Next to Jason dwelling road where city has recreational facility. Jim martin said they have 80 acres east of there if you want to swap? (joke) school is well east of project. Gary asked about Ponkan improvements? Renzo said have concern with Ponkan condition as it is today, but most we could consider was fixing or widening the shoulders. Nothing else in near term. Renzo asked what's the EA's intent on Ponkan? If the IC is there, or if it isn't you'll have to cross Ponkan no matter what, are you contemplating any improvements? Gary said if IC here would do some improvements through intersection. Same if we did something at Kelly Park, don't know if we'd take it all the way to Plymouth Sorrento, would widen and improve road to 4 lanes through the IC area to tie into any future improvements you might do. Renzo said depending on where IC is will have impact on traffic traveling Ponkan or Kelly Park to get to and from IC. Gary said the long-term implications are where do you want to see the traffic? Down here you don't get as much benefit so close to 441, but up here you start drawing from north orange and Lake County. Renzo asked at last group meeting, you all were going to get with OC environmental, have you met with them? Gary said met with Beth Jackson as I mentioned, Beth recommended environmental importance of area for us to avoid, and she pointed out the historic house, so we modified alignments. ... Taken this alignment and straightened it out so we can avoid this environmental feature. Do have letter on file from her as well expressing her concerns. Next time you see this map, will look little different. Question: is section next to Zellwood station, is it going to be elevated? Gary said haven't gotten into profiles, obviously we'd be above Ponkan, don't think it's going to be totally at grade. Question of buffers to Zellwood station, any sound barriers? Gary said haven't gotten that far, sound barriers would be determined farther in the process, at this point that's all open. OC said blue alignment goes right through pits; it's depressed, probably about 40 feet deep, right next to Zellwood station. Gary said we'd have some elevation there, might rethink this in terms of going over or under. OC said at Zellwood station you have 2000 units, that's probably going to be a concern of theirs, north of Yothers. You may have an opportunity to depress it and solve their problem, because they're going to be asking for a sound barrier. Renzo asked if we'd identified structures yet other than IC, where else if any bridges? Gary said Kelly Park, Ponkan, and probably Yothers, other than that haven't gotten detail on smaller roads. Will do like last time, send you list of grade separated roads and how we plan to treat them, like we did on Maitland. Renzo said county is growing. Gary said we'd offer that list to county. Gary noted we're seeing higher volumes on Wekiva Parkway than we have in past due to updated land use info, particularly from Lake County. Road will definitely be getting some use. Also big component of e-w travel. 70k plus Gary went over Maitland Blvd. oriented 441, 436 and Maitland boulevard existing, Plymouth Sorrento road, realigned 429. Currently under design, nearing 60% plans, construction end of this year if all goes well construction prices have gone up dramatically, effect on EA program, as result 201 section out of 5 year plan. What's going to be constructed will be from 429 to 441. Will still have a through route, then MBX as 6 lanes over to 441. Prior to any activity on Wekiva Parkway, this section 201 will probably come in 7th or 8th year of the work program. Question of how were' getting over RR? Gary noted bridging. Gary noted we'll have an EAC meeting prior to public meetings so will have a lot of updated boards. Jim martin/Global 5 - I4/408 presentation .. --meeting adjourned 1020 a.m.

2/17/2006

8:15 AM

PIO delivered boards and easels to OC public admin. Building and helped Gary/PBS&J set up for transportation planning group presentation. Heather Brownlie/OC was present, Allyson/Turnpike, Wayne Rich, John Dreij/DOT. Mark Robinson of FDOT Interstate program was supposed to speak on I-4/408 IC, but he was injured skiing, so Ian ??/FDOT and Jim Martin/Global 5 were there in his place. (Wekiva and I-4 only things on agenda.)

Contact		Mark Natirboff	Brigham Moore
Notes			
Date	Time	Regarding	
3/2/2006	12:23 PM	<p>PIO returned Mark Natirboff's call. He put me on speaker because he said I have the project manager here with me. We have some very general questions. We represent bunch of people in the paths of the alternatives for the Wekiva Parkway. Mandy Keng is in the room with me, she is a project manager for our firm. She has been following the project. Also in the room is a paralegal, Kathy Gray; we were involved in some other cases right before you called. Want to ask ... we know there's going to be some public meetings and haven't decided the alternatives, but is there anything we can tell to our clients about timelines, where things are at this point? PIO recapped public meetings from November and noted status of alternatives analysis, and that we plan to update maps with more viable alternatives by late March or April. PIO noted some alternatives being tweaked or shifted, while some being eliminated altogether and some local governments have asked us to add new ones for consideration. He said map he has shows two alternatives concerning their client, one is a pink route and one is a white route. He asked if there were still two alternatives in that area? PIO noted there are still two alternatives in OC, and they may have been shifted slightly when the next maps come out, based on government and other input. He said Mr. Emmel lives right on a springfed lake. He hopes the alignments don't come on them, but he knows it has to go somewhere. He's just hoping it doesn't hit his lake. He asked if possible to see how the alignments have been shifted? PIO noted not at this time because still holding meetings with Apopka, OC, state agencies, etc., and changes ongoing. Map today could be different from next week. PIO reiterated we'll have the viable alternatives at a place where folks can start reviewing them in late March or April. Do you know when there's likelihood that ... the final alignment will be chosen? PIO noted schedule for viables public workshop, then develop preferred alternative for public hearings in January 07, and study to conclude with an approved alignment by spring 2007. When do you think you will start acquiring property from these folks? PIO noted that's some ways off. Noted funding challenges will affect overall project development schedule. Noted normally for a fully funded project PD&amp;E study would be 2 years, followed by 2-3 years of design, and somewhere midway in design might start advance ROW acquisition of very large parcels that you can't help hitting, then as design details become available proceed with other ROW. PIO noted funding will affect schedule, we're not looking to go to construction until maybe 2012, so ROW would be couple years before that. HE said You've been extremely helpful. I know it's not easy to be on speaker phone with a lot of questions being thrown at you, but you've passed with flying colors. PIO noted that all of the maps are on the EA website, and once the viables are available those also will be posted late March-April. PIO noted site is being worked on now, but should be back up by mid-next week. PIO said by late March or April he can view the viables at his convenience. He was appreciative of the assistance. PIO noted that's why I'm here and don't hesitate to call with other questions. --1245 p.m.</p>	

3/2/2006	12:01 PM	<p>Mark Natirboff/Brigham Moore left MSG I represent some people on the Wekiva Parkway. We're just trying to get some info as to what is going to happen and when it might happen. We know that decisions have to be made on route alternatives and so forth, but I heard you were very helpful and also very nice to deal with. So I wanted to introduce myself to you and talk to you and see if maybe you could help us with some information on the project. 904-730-9001, 904-733-3811 Thank you and look forward to talking to you.</p>

We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks</p>

8/7/2006	11:56 AM	<p>Attended public workshop on 8/1/06. Submitted comment card: "I prefer SR 46 connector Alternative #2 [illegible] with report to Alternative 1 if selected consider moving L/ARW south from Parcel 1590 to Parcel 1198. Since Parcel 1590 is habited and Parcel is 1198 is forrested."</p>

9/12/2006	2:14 PM	<p>PIO responded to Jen Negron/Harris Harris Bauerle &amp; Sharma: "Hello Jennifer,I just got back from vacation and got your email. We do currently only have one alternative for the SR 417-Interstate 4 connection and two possible alternatives for the SR 46-I-4 connection. Both are still being considered, and as we continue our analysis of the viable alternatives based on public comments and government feedback, those interchange configurations are highly subject to change. We are shooting to have drafted preferred alternatives which would include a recommendation for the I-4 connection) by say December or January. The remaining alternatives would again have to undergo state agency and local government review before being brought to public hearings, most likely now in March.I hope that helps. Please feel free to call or email with other questions or concerns.Mary Brooks</p>	

9/5/2006	1:42 PM	<p>____From: Jen Negron [mailto:<a href="mailto:jen@HHBSLAW.com">jen@HHBSLAW.com</a>] Sent: Tuesday, September 05, 2006 1:42 PMTo: Mary BrooksSubject: Wekiva Parkway - Seminole CountyHi Mary,I have been reviewing the maps from the OOCEA website. There are a few alternatives for the phase of the parkway in Seminole County. I am trying to determine the following: Is there only one viable alternative for the interchange at SR 417 / I-4? If so, is the OOCEA trying to determine if they will use the interchange at SR 417/I-4 or will they go with an interchange at SR 46/I-4 (there being two alternatives currently for this scenario).Thanks for your help!JenJennifer Negron, ParalegalHarris, Harris, Bauerle &amp; Sharma1201 East Robinson StreetOrlando, Florida 32801(407) 472-1560 - Direct(407) 843-0404 - Office(407) 843-0444 - FaxEmail: <a href="mailto:jen@hhbslaw.com">jen@hhbslaw.com</a></p>
7/31/2006	11:15 AM	<p>PIO responded to Jen Negron email: "Hello Jennifer, The black lines on your concept represent the northwest 441 interchange (near Plymouth Sorrento Road) for the SR 414/429 Maitland Boulevard Extension. The Wekiva Parkway would be connecting to this interchange. I hope that addresses your question. Please feel free to call or email with other questions or concerns. Mary Brooks"</p>
7/31/2006	10:00 AM	<p>Jennifer Negron/HHBS emailed: "Mary,I have attached a snapshot of the overall conceptual map for the Wekiva Parkway section in Orange County. Can you tell me what the black lines represent?"</p>
7/11/2006	2:05 PM	<p>PIO responded to Jennifer/HHBS Law email, copied Evelyn Wright: "Hello Jennifer,We just had on Friday the Project Advisory Group and Environmental Advisory Committee meetings, which were noticed on the website. Those were working group meetings that were open to the public to observe, if desired.The next public workshops are July 25-Aug. 1. The map on the website is dated as of May. We will have updated maps at the workshops as there have been comments received from various officials and stakeholders since the last map was posted. The maps are being refined as we speak.I hope that addresses your questions. Please feel free to call or email with other questions or concerns Mary Brooks"</p>
7/11/2006	1:09 PM	<p>Jennifer/HHBS law emailed, copied Evelyn Wright: "Hi Mary, Last two questions. The most recent and up to date maps are on the OOCEA website, correct? Also, are the only public meetings in the near future are the ones at the end of July? Thanks again, Jen</p>
7/5/2006	2:46 PM	<p>PIO responded to Jennifer Negron/Harris Harris Bauerle &amp; Sharma: "Hello Jennifer, We will be presenting the viable alignment alternatives at the upcoming public workshops. From there we'll determine the preferred alignment alternative(s) which would be brought forward at public hearings in February 2007.I hope that helps. Please call or email with other questions or concerns.Mary Brooks</p>

8/10/2006	12:42 PM	<p>Attended public workshop on 8/1/06. Submitted comment "Several questions have arisen after your last public workshop. A triangular retention pond (#1521) on your map is planned just east of Pond Road on the South side of SR 46. Will this retention pond effect the water quality or level of our sub-division pond water? Though no final plans have been</p>	

made (according to the Engineer we spoke with) a possibility exists that one consideration concerning egress and ingress for our sub-division is taht we can't turn left (west) as we leave Pond Road, nor turn left (if we are coming West from Sorrento) into our sub-division This concept would create an un-necessary inconvenience for the Residents. Please advise if there is any authenticity to this consideration."

Bob & Judith Nelson

Sunset Pond HOA

Regarding

Tom, Brian, Mark and PIO attended meeting of Sunset Pond HOA at the home of Bob Nelson, 251 Pond Drive. About 18-20 people in attendance. PIO distributed summer newsletters noting new ones being worked on now, and my contact info included inside. PIO did introductions. Mark did overview, noting goal is completing western beltway and relieving traffic issues in LC, OC and SC. He noted will pick up from 414, first section of which is to start early next year. He went over corridor components... trying to get truck traffic out of Mount Plymouth and Sorrento, communities only want a two lane road on 46. He noted more than 18,000 VPD at the river. Back in '86 it was less than 10,000; have seen a lot of growth in this area.We're also trying to keep the Wekiva habitat corridor open and reduce conflicts with wildlife; that's reason for CR 46A realignment.He noted there were three alternatives for US 441/SR 46 - existing IC ... need to reconstruct it in some way because of sight distance and other safety issues. Also provide flyover for 6-lane SR 46.The issue for your neighborhood is we will require ROW from the front of your community. About 70-80 feet into the neighborhood. Flyover would be in the air at your entrance.Q: how will we get on 46? Mark said you'd still have access to 46 from Pond Road.Q: to the right and left? Mark said we want to get you full access. At the very least you'd be able to turn left in, and turn right out and have to make a U-turn to go west. But we're still trying to get final traffic together, should have that in the next month.(Went over concept) In SB 441 and left on 46, same as to get in now ... as opposed to those folks wanting to go to SC you would take the flyover.Mark noted alternative with at-grade intersection with flyover, we're trying to work on Mt. Dora's concerns. Basic signal at US 441 & 46. Wekiva Parkway will pull a lot of through traffic off US 441.The final is a variation of the at-grade. The difference is the flyover extends from the middle of the roadway. That one comes another 20 feet into the neighborhood. We're working closely with Mt. Dora and LC. This is the least costly alternative ...Discussion of concerns with traffic growth and the signalized intersection.Q: Any of these alternatives impact more or less of our property? Mark noted the one that hits the first lot (no home), and the back side of the first lot with a home. The first parcel is where the sign is, and then it's Jack's last name?) property.John Askew, who lives south of the lot with the home that's directly impacted, said his property would be within 86' of the flyover. My interest is compensatory standpoint. The third alternative would bring it to within 66'. I'm not really crazy about this not is anyone else. Discussion that compensation only for actual property taken, direct impacts.Discussion of partial vs. whole takes. Mark noted FDOT would have to decideQ: don't you put up noise abatement? Mark said we're looking at that. It has to be reasonable and meet federal criteria. Tom stated the way things work with noise abatement. John Askew took offense, "...there needs to be some degree of sensitivity to this neighborhood "Q: why don't you go the other direction towards the apartments? Why not get rid of that curve, that's where all the accidents are? Mark noted there are a lot of things that were looked at. Noted remaining alternatives would work from engineering perspective and minimizing costs and impacts.Q: if you move it 100 feet, you wouldn't touch their buildings...? Mark noted we're buying 50-60' of ROW from the apartments.Q: why not buy another 50' from them and not touch us? Mark noted they have a pond there ...Q: impact on our pond and property and driveway from your pond? Mark said we would take the roadway stormwater. We're required to do so via permit. It will probably be a wet pond; the water will be treated before outfalling to your pond.Q: with pond going in, will you treat water and then send into our pond? It was noted the water today goes into the pond that runs along ... Brian discussed water treatment and attenuation of the pond. Mark said we would have a berm maintained and outfall structures. We would have to maintain the existing flow patterns.Q: how far away is dredging of the pond? Mark noted the project is

not funded, nothing programmed for construction..went over timetable, PD&E study schedule (done early summer). If there's money can do early ROW then. But DOT has \$40 million for ROW now; if it stays in the program, could use it for advance ROW purchases, probably 3-4 years from now. Even if we had all the money in the world, you're still looking at 6-7 years for construction. Since we don't have the money you're probably looking at 10 years. Askew said, "so legislatively we have time to fight any appropriations?" Q: in effect you're going to hold us hostage longer? Q: isn't there possibility of early acquisition? Mark noted yes but we have to finish the study first. Q: so we can look at early acquisition after the study is finished? Q: so you won't start for 5 years? Tom said absolutely. Q: won't buy property for 5 years? Q: where are the first priorities for purchases? Mark said EA looking at Apopka because there are homes planned on the corridor. Bob said so for entrance and exit to go east, just turn right. Mark said that's right. We have to look at access management. We hope to allow left turns in and out like you do today. It would be a more defined left turn than you have today. We would have to work with FDOT Traffic Ops on that. Mark said worst case: to go left you would have to turn right and U turn. So would the apartment folks. They would have to go through this mess (intersection of 441/46). I'm not sure that makes anything safer. Q: what's going to happen to 46? Mark went over overall map showing where 46 will remain, noting only one crossing over the river (removing conflicts with animals). Mark noted we will be about ¼ mile west of Plymouth Sorrento Road in OC. Q: is there going to be distance different? Askew Q: will it be high speed or one of those crappy 65s (mph)? Mark noted portion in Mt. Dora will be urban section, then rest will have design speed 70 mph. Mark summarized the community's issues: direct impacts, noise and visual affects, ingress, pond and traffic. Mark noted the project would cut down on traffic at their entrance (and difficulty getting out) because of flyover. They also would have a better left turn lane into subdivision. Askew complained about amount of time the widening of 441 has taken, "it's unconscionable...". Tom noted we're not over that project but there are so many access issues there to complicate things. Askew: there's nobody working. It's just unbelievable. Q: are they on schedule? If not do you fine them? Brian noted yes, they get hit with LD's... and there is a labor shortage. We used to get 4-5 bids for every job; now we get 1-2. Mark noted we're working on additional refinement in SC and LC. We hope and expect at the beginning of the year to prepare recommendations .... Work with agencies and refine alternatives. Once we tie down the access issues on pond road, we will communicate with you all. He noted public hearings late spring, early summer. Then FHWA approval. Brian noted we have to do this process if we want to qualify for federal funds. Mark said best time to get your input as part of the study. Talk to Send. Baker, Allen Hays, Commissioner Linda Stewart. You're not incorporated but you might want to talk to Mt. Dora. Mobilize now and get those folks going. Q: what's the height of the flyover closest to our property lines and what's the db level? Mark said flyover needs 16' clearance above your entrance road. Top of the bridge probably another 9-10 feet so tops out at about 25 feet. Q: how far down does the flyover go? Mark said after your entrance we bring it down and it ties in before Summerbrook subdivision or whatever they're calling that now. Formal meeting broke up but people remained asking questions of team members re: impacts to individual properties, concerns about pond and wetlands, concerns about access and ROW process. PIO provided FDOT ROW pamphlets to residents in first house near entrance that would like experience direct property impact. John Askew reiterated to Tom after meeting that he wants compensation for impacts from visibility and noise. Tom apologized if he thought he was being glib earlier, but said he is straightforward in letting people know how things work.--755 p.m.

11/8/2006 9:05 AM

PIO returned call to Bob Nelson/Sunset Pond HOA 352-988-4785 to confirm we were attending tonight's HOA meeting. He asked who was coming? PIO noted me and Mark Callahan of CH2m hill for sure; hadn't heard back from FDOT folks who previously said they would attend when I sent the reminder email. He said he recalled Mark meeting with them previously. He said come all the way back down their driveway because it's long and come in the back patio; they're expecting good turnout.

11/8/2006 8:40 AM

Bob Nelson 352-383-3482 left MSG calling to find out whether the meeting for our home tonight at 630 is still scheduled. If it's not going to happen I've got a lot of phone calls to

make, so please respond to me whether someone is going to be out here at 630. Thank you.

11/6/2006	10:30 AM	Bob Nelson/Sunset Pond HOA emailed; "Please confirm meeting plan still on! Thanks Bob Nelson"
11/6/2006	9:52 AM	Bob Nelson/Sunset pond HOA 352-988-4785 left MSG seeking confirmation for Wed. meeting Nov. 8 at 630 p.m. at our home. I assume it's going fine and someone will show up from your group. If you can Email me it's fine. I won't be in today or tomorrow but I will be in early wed. Thank you.
10/18/2006	2:05 PM	PIO also received note from Bob Nelson/Sunset Pond HOA: Mary, attached is the information that each member of our HOA will receive concerning our November 8, 2006 meeting. Just sending this along for your information. Please let me know the name or names of your representatives who will be there. An email will be fine (bjd3lb@atlantic.net). Thanks for your assistance, Bob Nelson.He attached a distribution list noting the residents and announcement: Meeting concerning Wekiva Parkway PD&E Study. Please see attached page or meeting discussion items. Representatives from the project will be here to hear our input and bring us up to date. Time: Wed., Nov. 8 at 630 p.m.Place: 251 Pond Road (Nelson's) Mount Dora, 32757 (352-383-3482)He attached his original comment form noting the questions about their pond and ingress/egress.
10/12/2006	9:10 AM	PIO responded to Bob Nelson/Sunset Pond HOA: "Got your voicemail while in a meetings yesterday, Bob. We're all set. We will see you there. Let me know if anything changes. Thanks!Mary Brooks
10/11/2006	3:56 PM	Bob Nelson/Sunset Pond HOA called and left MSG I did send you an email confirming Nov. 8 Wed. evening 630 p.m. at our home 251 Pond Road. My email is deleting. There's some bug in it or something, wanted to make sure you got my reply by email, so I'm double checking. No need to call me if all is cool. Thank you. Bye.
10/11/2006	2:59 PM	-----Original Message-----From: bjd3lb@atlantic.net [mailto:bjd3lb@atlantic.net]Sent: Wednesday, October 11, 2006 2:59 PMTo: Mary BrooksSubject: RE: SR 429-Wekiva Parkway PD&E Study - Sunset Pond HOA meetingOK Acknowledging Nov. 8th @ 6:30 PM (Wednesday) at 251 Pond Road. Thanks Bob NelsonQuoting Mary Brooks <mbrookssr417@cfl.rr.com>:> Bob,
10/10/2006	2:30 PM	PIO forwarded Sunset Pond HOA calendar item to Bob Nelson of the HOA.
10/10/2006	2:21 PM	PIO sent calendar item for Sunset Pond HOA meeting to Mike, Tom, Brian, Mark.
10/7/2006	7:17 PM	PIO emailed Bob Nelson/Sunset Pond HOA: "Bob,Got your message yesterday afternoon but I was at a conference. When I tried to call you back about 415 p.m. the line was busy I heard back yesterday from the remaining team member. So we are set for the Wekiva Parkway study team to meet with your HOA representatives on Nov. 8 at 630 p.m. at your home at 251 Pond Road.Please call or respond to this email to confirm, and I will send out a calendar item to all.Mary Brooks
10/6/2006	4:17 PM	PIO returned call to Bob Nelson to confirm meeting but line was busy after several tries.
10/6/2006	3:42 PM	Bob Nelson called and left MSG 352-383-3482 returning your call concerning meeting date which we hope we can work out some time first or second week of November.
10/6/2006	11:42 AM	PIO called Bob Nelson to confirm Nov. 8 for sunset Pond 352-383-3482, 352-242-7390 woman (think maybe his mother or mother in law) who answered said Bob has company and they're going over some stuff and she doesn't want to disturb him. PIO said please leave a MSG that I called about the meeting he wanted to schedule. She said she would do that.
10/5/2006	10:08 AM	PIO emailed Bob Nelson/Sunset Pond HOA: "Bob, I got your voicemail yesterday. I didn't call you. I'm still waiting on one more team member to get back tome about Nov. 8 and then I will get back to you, hopefully to firm up. Thanks."
10/4/2006	3:15 PM	Bob Nelson called and left MSG I suspect from my cell phone some unidentified or missed calls that probably might have been you. If you call me back call 352-383-3482 and then if I'm not in leave a MSG because I will have an answering service on that number. Thank you very much.

10/3/2006	1:19 PM	Tom/FDOT responded re: Sunset HOA meeting: "Works for me.Tom Percival
10/3/2006	11:47 AM	Brian responded to Sunset Pond HOA email: "good with meBrian M. Stanger, P.E.
10/3/2006	11:31 AM	PIO emailed team re: Sunset Pond HOA meeting request: "The Sunset Pond HOA folks in Lake County are now asking if we can meet with them on Wed., Nov. 8 at 630 p.m.? Apparently a number of people are out of town, having surgery, etc. in October.Please let me know if this works for each of you. This is a small subdivision, 16 families, and the only two real issues are ingress/egress and concerns about their retention pond. If this works, I will follow up with a calendar item. Thanks.Mary Brooks
10/3/2006	11:28 AM	PIO returned Bob Nelson's call, Bob said 8th would be excellent at 630 p.m. PIO to check with team members and get back to him. He noted the president would be back in town by then.
10/3/2006	11:15 AM	Bob Nelson 720-587-9978(pre paid calling system) called back and left MSG said date of Oct. 11 at 630 for meeting with HOA doesn't work. We've got one prominent player on the committee is having bypass surgery this week; president won't be here until the last week; secretary and her husband will be out of town. Best time for us will be in first part of Nov., how is the 1st or 8th? Let me know so I can try to get some people here. If we try to do it now won't be enough attendance to make it worth while. So if you can do something in first part of November I would appreciate hearing from you.
10/3/2006	11:00 AM	PIO returned Bob Nelson's call, discussed that Oct. 11 at 630 p.m. worked for him but he was going to check with the other residents to make sure some folks could make it. PIO raised previous concern he'd mentioned about some people attending church on Wed.'s, but he said he didn't think that would be an issue on that date. He said meeting could be held at his house, 251 Pond Road, his driveway is the one 10-15 feet after the one with two stone monuments or markers. He said his house is about 100 feet off the roadway behind some trees. PIO asked how many folks might attend? He said there are 16 families in the subdivision.He said their main issue is the ingress and egress; will they only be able to turn right out, etc.? PIO noted I'd also heard concerns about the proposed retention pond and effect on their pond. He said he understood that was snot an issue but we could explain that to the others if we wanted. He's going to make some calls to make sure they can get enough people out on that date to hold a meeting. PIO said let me know ASAP so we can schedule another group if they don't' have enough interest.--1112 a.m.
10/3/2006	10:41 AM	Bob Nelson/Sunset Pond HOA returned call and left MSG 352-383-3482. I have an answering machine if we're not home leave a MSG. should be here most o f the morning. Give me a call when you can.
10/2/2006	4:52 PM	PIO called Bob Nelson/Sunset Pond HOA 352-383-3482, left MSG with Judith, who said she would have Bob call me. She said Bob was not the HOA president. PIO said wasn't aware of that, he has been the one contacting me and coordinating on setting up an HOA meeting. she said she'd have him call me to discuss.
9/26/2006	5:36 PM	PIO emailed Bob Nelson/Sunset Pond: "Bob,I realized after I replied to your email yesterday that the Oct. 11 or 18 would be Wed.'s, which some of your members have conflicts with due to church. Perhaps if we did the meeting early, at say 530 p.m., the folks could still make it to the evening service? The calendar is filling up fast with all of these community meetings. Let me know what kind of timeframe we have to work with. Thanks.Mary Brooks
9/25/2006	6:28 PM	PIO responded to Bob Nelson/Sunset Pond HOA re: scheduling meeting: "Bob, Thanks for getting back to me. I got your voicemail as well. How would Oct. 11, 17 or 18th work? I will have to check with the study team on those dates also so let me know if one is better. I'm pretty sure they wouldn't have a problem with Oct. 11 because we were going to meet with another HOA that date but they asked to switch to the 10th. Look forward to hearing from you.Mary Brooks
9/25/2006	10:32 AM	Bob Nelson/Sunset Pond HOA responded to PIO email re: scheduling meeting: "Thank you for your response. If possible a Saturday morning meeting would be great. If not feasible for you, any evening in October or 1st 3 weeks in Nov. would be fine. A few of our members still work so late afternoon time frame would work best if you can arrange it. My

home phone is 352 383 3482.Lv message on ans. machine if we are unavailable.Regards,  
Bob Nelson

9/25/2006	9:58 AM	Bob Nelson/Sunset Pond HOA called and left MSG re: letter on Sept. 18 and email from earlier date that I just haven't had time to answer. We're interested in having someone come out as a follow up meeting for our group, which is small, only 16 homes back in here Will send you an email and it will be fine if you let me know when there are some dates available. Basically Saturday is good. I don't know if you meet on Sat. otherwise would be in evening because we do have few out here that still work and couldn't attend daytime meeting. Just let me know something about what's convenient for you. Would appreciate hearing from you.
9/18/2006	6:42 PM	"Sept. 18, 2006Robert & Judith NelsonSunset Pond HOA251 Pond RoadMount Dora, FL 32757 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Robert & Judith,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns, and I recently emailed you regarding scheduling a meeting with your HOA and the study team. Please contact me when you receive this to schedule a follow up meeting to address your concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> , or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks
8/30/2006	5:15 PM	PIO emailed Bob Nelson/Sunset Pond HOA Bjd3lb@atlantic.net: "Hello Bob,I know we spoke some time ago about doing a meeting presentation for the Sunset Pond HOA board, and I just wanted to follow up to look at some dates for that. When does your board normally meet? We'd be looking at mid- to late September at the earliest. Just FYI, I'm on vacation next week, Sept. 4-10, in case you were to try to get a hold of me. But I'm here the rest of this week. Look forward to hearing from you. Mary Brooks"
8/10/2006	12:42 PM	Attended public workshop on 8/1/06. Submitted comment "Several questions have arisen after your last public workshop. A triangular retention pond (#1521) on your map is planned just east of Pond Road on the South side of SR 46. Will this retention pond effect the water quality or level of our sub-division pond water? Though no final plans have been made (according to the Engineer we spoke with) a possibility exists that one consideration concerning egress and ingress for our sub-division is taht we can't turn left (west) as we leave Pond Road, nor turn left (if we are coming West from Sorrento) into our sub-division This concept would create an un-necessary inconvenience for the Residents. Please advise if there is any authenticity to this consideration."
8/2/2006	4:20 PM	PIO returned call to Bob Nelson 352-383-3482, he said he found zip code on newsletter.

He asked if husband and wife needed to fill out? PIO suggested only if they had different comments, otherwise could put both names on the same form. He said the triangular retention pond #152, east of Pond Drive on south side of SR 46, right east of actual pond road as you're going toward Sorrento. That pond according to people, will cut off the water flow to the subdivision pond we have, which will make the pond dry up. If that happens all the people that built docks around the pond that means those being rendered useless and certainly recreational fishing would be killed. Two other things, some engineer told some of the people that this isn't final concerning egress and ingress from SR 46 to our subdivision. What they're saying is when we come out of subdivision we couldn't turn left to go to Mount Dora, would have to turn right and go down and make a u-turn. And coming from Sorrento we couldn't turn left into our subdivision, doesn't make any sense since there's apt. complex built in last year and they can come out and turn right to go into Mt Dora or turn left. Don't know why we would be blocked, been here 20 something years. Live in Sunset Pond subdivision. PIO asked if they had an active HOA? He said yes, they meet twice a year. He's the vice president. Two men came out and can't remember their names, one of them was there last night, Mark somebody, and another man. But these things didn't come up. Some people were told they really don't have a final plan and we need to question how we're going to get in and out ... that just doesn't seem to make a lot of sense. PIO said sounds like we need to find out how the access would work, and then maybe schedule a meeting with the board or their membership. He said that sounds like a good idea. PIO noted we're getting hundreds of these types of questions and requests, so if he hasn't heard from me in about 3 weeks, to call or email me to remind me. He confirmed my email address was in the newsletter. Bjd3lb@atlantic.net

8/2/2006	1:06 PM	Bob Nelson 352-383-3482 called and left MSG I need to know your zip code. It didn't come out on the form so I can mail you some comments and need to question you in detail about the flyover over SR 46 concerning a triangular retention pond and also ingress and egress from that road into and out of our subdivision. Would appreciate a call when you can.
----------	---------	---

6/1/2006	2:21 PM	PIO sent calendar item for Sunset Pond HOA meeting to Mike, Tom, Brian, Mark.
----------	---------	---

Contact Notes	Bryan and Debbie Nelson
------------------	-------------------------

Date	Time	Regarding
8/9/2006	8:50 AM	Attended public workshop on 7/26/06.

Contact Notes	Maria Nelson	Fowler, White, Boggs & Banker, P.A.
------------------	--------------	-------------------------------------

Date	Time	Regarding
8/9/2006	2:31 PM	PIO returned call to Maria Nelson/Fowler White let her know pond siting reports ongoing, will be part of final report for study. She noted we still have several alternatives. When do we expect to have an actual proposed route? PIO noted we're analyzing all the feedback we've received from the public and local governments, state agencies, and working toward drafting a preferred alignment alternative probably by November or December. PIO noted that will have to go through review process, and we hope to have revised preferred to bring to formal public hearings in Feb.-March. She said okay, and will that info also be online? PIO noted yes, we will continue to provide project info on the website. She said okay and thank you for calling back.

8/8/2006	1:33 PM	Maria Nelson called and left MSG I got your MSG and thank you. Do you have any pond siting reports for the Wekiva Parkway? I know there are some plans online, and they have some of the alternatives but I'm looking for any pond siting reports if they are available at this time. Please call me at 813-769-7634.
----------	---------	---

8/2/2006	4:16 PM	PIO returned call to Maria Nelson 813-769-7634, left detailed MSG that she can access workshop map files, gave web address and text links. Said she can call me back if has any questions.
----------	---------	--

8/2/2006	10:33 AM	Maria Nelson called and left MSG, how are you? I spoke to you before on the Wekiva Parkway. I know there was a meeting held a few days ago. I just wanted to talk to you. I
----------	----------	---

haven't really seen anything online. I wanted to see if I could get ... they were working on different alternatives for the different counties and wanted to see if I could get copies or something from you on what they had presented at the meeting. If you please give me a call 813-769-7634 thank you.

3/29/2006	11:05 AM	<p>Maria Nelson/Fowler White 813 228-7411 called and said she hadn't talked to me in a while and was wondering if they had anything new besides all of these alternatives? PIO noted we were working on the viable alternatives and hope to have those posted on the website by late April. She said so they will be narrowed down then? PIO said correct; some alternatives have been eliminated, others revised etc. she asked so when will you have the preferred alternative? PIO noted we'd have public workshops on the viables in July, then go into the viables analysis in late summer and fall, and work toward preferred alternative. PIO noted public hearing on preferred not scheduled until January 2007. She said so design wouldn't start until 2007? PIO said at the earliest, since the subsequent phases for this project are not fully funded. She said so there's no money for design? PIO noted we have the study funded, which we're in middle of, and some money for design, but rest is not fully funded. PIO suggested she check the website in late April to see if we'd posted the updated maps. She said so these other ones would be removed then? PIO said that's correct. PIO said if she doesn't see the maps then she's welcome to call or email me for an update. She said she'd do so and thanks.--1112 a.m.</p>
-----------	----------	---

Contact	John & Marcia Nesler
Notes	

Date	Time	Regarding
11/6/2006	10:07 AM	<p>407-464-0722 woman called (didn't give name but number and voice match that of Marcia Nesler) asking when the environmental meeting was for the Wekiva Parkway? PIO noted I wasn't aware of any such meeting, when was it supposed to be? She said she didn't know, didn't have it on her calendar. PIO noted only meeting I'm aware of this week is we're doing a presentation before the SCEA on the Wekiva Parkway on Nov. 7. It's scheduled for 4 p.m. at the county services building in the commission chambers, but basically it starts whenever the county commission meeting finishes beforehand. She asked when did the BCC meeting start? PIO said not sure, can check their website, think it used to be 130 p.m. but they change that some times. PIO gave her address for county services building.</p>

8/8/2006	3:50 PM	<p>PIO checked to see which comparative analysis version she had. Was dated 7-25. PIO emailed Dave and Melaina, copied mark: "Good afternoon,I need to send a member of the public the comparative analysis for the viable alternatives (as per Gary), and wanted to make sure I had the latest version. What I have is attached here. Please advise. Thanks Mary Brooks</p>
----------	---------	--

8/8/2006	10:58 AM	<p>Attended public workshop on 7/26/06, representing address: 6501 Plymouth-Sorrento Road, Apopka, FL 32712.</p>
----------	----------	--

8/1/2006	11:20 AM	<p>The Neslers copied PIO on July 22 letter to OC Commissioner Homer Hartage, with note to PIO on post it "Dear Mary there's no Florida scrub jays on our property; so I had to remove those paragraphs from our letters. Also I made a few other changes. For your information enclosed is a copy of your July 22 letter, just mailed out to OC Board of Commissioners. Fondest Regards, John Nesler. The overall letter repeats other comments complaining about the north alignment alternative in the area of Boch Road.</p>
----------	----------	--

7/17/2006	10:01 AM	<p>PIO picked up "Dear Neighbor" letter dated July 11, 2006 from the Nesler to unknown parties. The letter describes their understanding of the alignment alternatives in their area and impacts to the neighboring properties, notes the EA is soliciting input on the alternatives and gives the public workshop dates and locations. They are in favor of the south alignment alternative in their area. Attached to the letter are copies of a public comment form, a map of their property with respect to the alternatives, a July 8, 2006 letter to Mike Snyder against the northern alternative in their area, etc. Among other things, the letter claims that prior to locating the alternatives in</p>
-----------	----------	--

their area, no one visited their property to determine its characteristics. (Ch2M Hill has stated the property was visited.)

7/13/2006	11:00 AM	<p>Received Nesler packet with letter dated July 8, 2006. Letter begins "The SR 46 Bypass Corridor Interchange Alternate Route north of Boch Road runs Interchange Roads through the Nesler property which voids the goals of Governor Bush's Springs Initiative, the Wekiva River Basin Commission, and the Florida Wekiva-Ocala Greenway project, and other environmental protection goals....Attached to the letter are: Dec. 3, 2003 letter from Deborah Shelley of the Wekiva Basin Working Group and Bob Burns of the Nature Conservancy (excerpt: "...In order to protect the important water recharge areas for Wekiva Basin springs, preserve wildlife habitat and provide open space and recreational areas, we propose to expand the boundary of the Wekiva-Ocala Greenway in Northwest Orange and adjacent East Lake Counties. This boundary expansion also furthers the desire of many residents to retain the area's rural character and their rural lifestyle. We have identified your properties numbers: 282006000000024, 0049 &amp; 0053 as some of the highly beneficial parcels for protection of resources in this area... "There is also attached another Dec. 3, 2003 letter from Deborah Shelley to the Nesler's following up a phone conversation about the program, and indicating an enclosed form not included in this packet) and response requested from the Neslers. They also included a map of their property, and a map of their property with respect to proposed alignment alternatives. There is also a picture of a spring on their property.</p>
7/5/2006	12:54 PM	<p>Dave/CH2M Hill emailed: "Another Nesler Letter - For your PI records." "P.O. Box 1447 Sorrento FL 32776-1447 Phone/FAX 407-464-0722 June 30, 2006 Mr. Dave Lewis Deputy Project Manager CH2M Hill 225 East Robinson St., Suite 505 Orlando, FL 32801-4321 Phone 407-423-0030 Dear Mr. Lewis: In your subject letter you stated it is unclear whether or not our free flowing springs and streams are connected to the aquifer. These streams come from the aquifer and back into the aquifer at the termination pool of the stream. This was explained to us by the Department of Environmental protection and by Mr. Bill Osburn of the St. Johns River Water Management District. Your CH2M Hill Scientists, Steven E. Eakin and Tony Davanzo charted these free flowing streams located on the south and north side of our 66 acre property. Their phone # is 352-335-7991 and their office is in Gainesville, FL. Their Chart dated 5-24-06, showing these streams is enclosed, and they visited our property on 5-23-06. (Water from the stream of 053 flows to a pool in 049.) Your CH2M Hill Archaeological Consultants, Inc. identified the presence of the huge old oak trees in Parcel 024 and estimated their age between 500 a and 1000 years old. These consultants were Nigel Rudolph and Bill Werner. They also performed only 2 shovel tests that you mentioned in your letter (as they had to go to a meeting). Enclosed are copies of two letters to us dated 12-3-03, from the Wekiva BASIN WORKING GROUP (Florida FOREVER Program) and THE NATURE CONSERVANCY. These letters identify our Parcels 024, 049, and 053 (66 acres total) as "highly beneficial parcels for the protection of resources in this area." Today Mr. Lou Ley, FL Dept of Environmental Protection, phone 407-894-7555, and Mr. Keith Schue, Ocala-Wekiva Conservation Project Coordinator visited our subject property. They verified the existence of free flowing streams in each of our parcels 042, 049, &amp; 053. They stated that this land is an outstanding wildlife habitat and water recharge area and its land beauty should be preserved and protected. Kindest regards, John J. Nesler and Marcia Nesler, Owners (with signatures) Enclosures Copies: Lou Ley, Phone 407-894-7555 Keith Schue, Phone 407-682-3664, X142 Mary Brooks, EXPRESSWAY INFO OFFICER, Phone 407-702-8375</p>
6/20/2006	3:40 PM	<p>Dave/CH2M Hill forwarded copy of letter response from him to Marcia &amp; John Nesler to PIO, Mark &amp; Rosanne Prager/CH2M Hill and Lori.Cunniff@ocfl.net: "June 20, 2006 Mr. and Mrs. John J. Nesler P.O. Box 1447 Sorrento, FL 32776 Subject: Your letter dated June 15, 2006 (Re: Wekiva Parkway/SR 46 Bypass PD&amp;E Study) Dear Mr. and Mrs. Nesler: Thank you for your subject letter regarding alignment and interchange alternatives being evaluated in the Wekiva Parkway/SR 46 Bypass PD&amp;E Study. As you and I have discussed several times during telephone conversations over the past month, there are still a number of alternatives being evaluated and a preferred alternative will not be determined until later this year or early next year. In your letter you requested that we evaluate and render</p>

an opinion on the environmental concerns that you expressed. It is difficult for us to comment on the purported findings of "environmental scientists and specialists" that you did not identify. If you have reports or findings from professionals in the fields you mentioned, we would very much appreciate receiving copies for our analytical data base. As you know, our senior environmental technicians did visit your property on May 24, 2006 and documented the presence of springs and streams. Whether those springs are connected to the aquifer is unclear, but it is possible. Our archaeological subconsultant also visited your property in May of 2006 and performed shovel tests, but did not find anything significant. Concerning your previous indication to me about a history of EDB contamination on your property, our geotechnical contamination subconsultant is evaluating that now. With regard to the Florida Forever/Wekiva-Ocala Greenway, the attachment showing the approximate location of your property indicates all three parcels are outside of the project boundary and have not been identified for acquisition. The attachment is from the Florida Department of Environmental Protection website. We appreciate and encourage your involvement in the PD&E Study. As I have mentioned to you before, we have a Public Workshop in Orange County scheduled for July 26, 2006 at Apopka High School from 5:00 p.m. to 8:00 p.m. We hope you will be able to attend, express your concerns and ideas, and complete a Public Comment form. I look forward to seeing you there and having further discussions with you, as I understand how important your property is to you. Sincerely, CH2M Hill Dave Lewis Deputy Project Manager Attachment xc: Lori Cunniff, OCEPD Mary Brooks, PIO

6/7/2006	4:43 PM	PIO returned call to John Nesler, who asked my title, said he'd seen PIO and public involvement coordinator on different letters? PIO noted I use mostly PIO but either will suffice. He asked for confirmation of my mailing address. PIO noted I'm consultant for OCEA and gave mailing address, though noted I would also get mail if they sent it to the OCEA. He and Marcia asked for the exact titles of various reports, PER, PD&E, EIS and asked when these would be available? PIO noted they would be done with the study in spring 2007. They repeatedly asked when environmental impacts would be complete; PIO repeated will be done as component of study next spring. PIO noted we'll have some environmental and other impact info available at the public workshops. She asked when those were? PIO noted I was just in a meeting discussing that, and dates would be included in the newsletter which will go out end of June. She asked who was over the EIS? PIO noted Mark Callahan is senior project manager for PD&E study, but various people working on different components of the study. She asked so he makes the final decision on all of this? PIO noted no, CH2M Hill is compiling the study info, which has to be evaluated and approved by various local governments and state agencies, including DEP and SJRWMD. PIO noted we've been holding meetings with these folks for months and their input, along with public comment, has gotten us to this point. She asked who at DEP was in charge of this? PIO reiterated from conversation the other day that Vivian Garfein is the DEP contact for this project. She asked if there was any federal involvement, is the corps of engineers involved? PIO noted would have to check but certainly haven't heard any major discussions about the corps, esp. since DEP and SJRWMD have jurisdiction. PIO noted if we wind up using federal funding there could be some oversight involved from whatever federal agency we got money from. Marcia asked if they sent a letter would it be part the public comments? PIO noted all the comment forms and letters go into the PD&E study, noted I just dropped additional forms off for CH2M Hill that I received for that very reason. She said does that happen automatically or do they need to request that it be made part of the public comments? PIO said they're welcome to put that in if they like but I provide copies of everything to the lead consultant for inclusion in the study. She said if there were springs on their property and not on the southern alternative, would that mean we'd pick that one? PIO noted there are those types of environmental considerations throughout that area, and that they have to be weighed along with residential and commercial impacts, wetlands and floodplain, soils and host of other criteria. --458 p.m.
6/7/2006	3:38 PM	John Nesler called and left MSG please call john or Marcia at 407-464-0722. I need to talk with you as soon as possible.
6/6/2006	1:56 PM	Worked on Nesler's request letter and sent. "June 6, 2006 Marcia Nesler P.O. Box

1447Sorrento, FL 32776RE: Additional Request for Background Information on the SR 429-Wekiva Parkway PD&E StudyDear Marcia,As requested, please find enclosed a copy of the latest concept showing the viable alignment alternatives for the State Road 429-Wekiva Parkway Project Development and Environment (PD&E) Study, as well as the member roster for the Wekiva River Basin Commission. Additionally, I have included a brief chronology indicating the various steps that have led us to this point in the Wekiva PD&E Study.I also have enclosed a copy of Executive Order 2002-259, as requested, which established the Wekiva Basin Area Task Force, as well as Recommendations 15 & 16 from the Task Force's Final Report.For your information, the full report can be downloaded from the Florida Department of Community Affairs website, as noted on the enclosed printout of that web page. You can also contact the DCA Public Affairs Coordinator Adam Sohn at 850-922-1600 for additional information.This information is to follow up the copy of the Governor's Executive Order creating the Wekiva River Basin Coordinating Committee, and excerpts from the Wekiva Committee's Final Report, which I sent to you in Nov. 9, 2004. I hope this addresses your questions. Please contact me with further questions or concerns at c 407-702-8375, email MbrooksSR414@cfl.rr.com, check the OOCEA website at www.expresswayauthority.com, or send mail to me c/o 10151 University Blvd., Ste. 222, Orlando, FL 32817. Sincerely,Mary BrooksPublic Information OfficerS.R. 414-Maitland Blvd. Extension& Wekiva Parkway ProjectsEnclosure

6/6/2006	12:49 PM	PIO called Andrea Fant/ECFRPC 407-623-1075 re: request for task force report. She said executive directors have changed and the previous one might have had it; she said she went through his files and didn't find anything. She said she's only worked with the WRB Commission and helping the executive director setting up meetings. PIO noted reason for request, that property owner upset with project wants background on how all of this came about. She wasn't familiar with the task force; PIO noted it was the first committee dating back to 2002, pre-dated the coordinating committee and the current commission. She said she'd ask a couple of people who'd been around a while and get back to me. She noted she did get my email and has my contact info. PIO thanked her for her efforts.
6/2/2006	2:10 PM	PIO emailed Andrea Fant/ECFRPC: "Hello Andrea,Mary Brooks here, public information officer for the Wekiva Parkway project. I've had a request from a member of the public for the final report of the Wekiva River Task Force. I thought that had been posted on the ECFRPC website (along with the Coordinating Committee's report, which I have), but I no longer see it. Can you email me a copy of that, please? As well as a copy of Executive Order 2002-259 which created the task force? Let me know if I need to try another route. Thanks in advance for your assistance.Mary"
6/1/2006	3:33 PM	Marcia Nesler 407-464-0722 called and said she was looking for copies of documents and could I help her? PIO said I'd try, depends on what she needs. She said she's reading the executive order 03-112 directing the protection of the Wekiva Basin and it mentions other documents that she doesn't have. She wants a copy of executive order 2002-259 that established the task force. She also asked for the contact info for the chairman of the coordinating committee. PIO noted the task force and coordinating committee reports are on the website. She said she doesn't have internet service. PIO also noted the coordinating committee is no longer active; PIO noted the Wekiva River Basin Commission is now charged with making sure the coordinating committee's recommendations in the state legislation are adhered to. She asked for the chairman of the commission? PIO gave her Sen. Lee Constantine's contact info.PIO asked if she'd seen the latest map of alternatives? She said yes, someone gave her a copy, the one updated as of May 1. She said it looks like they've narrowed down to two on and off ramps.She said we have free flowing artesian spring water on our property, would that preclude them from taking our land? PIO said would have to look into that. She said she's spoken to David Lewis and he was very helpful. PIO noted David is an excellent source of information. She asked who was in charge of the project that she could send a letter to? PIO noted Mark Callahan is the senior project manager for the study, and he works hand in hand with Dave. She said she wants to make sure her information gets to all of the important people. PIO noted any information that I get is shared with the entire project team during our progress meetings every two weeks, noted next one is next wed. PIO said she's welcome to send info t

anyone she likes, but I always make sure to copy the entire team on whatever I receive. She read off some information that mentioned a Wekiva study on the watershed, was she in the water shed? She said they live at 6501 Plymouth Sorrento Road and have 3 parcels totaling 60 acres. One parcel has the house on it; other two haven't been touched and have the free flowing artesian springs. She said there were two biologists out here last week and they confirmed the springs. PIO asked which agency they were with? She said she didn't know. She also requested task force recommendation 15 re: aquifer protection and some criteria, and no. 16. PIO said I'd be happy to send info, but let her know the task force was superseded by the coordinating committee and those are the recommendations that were codified in the state legislation. PIO noted that was probably either DEP or WMD doing that, noted different agencies tasked with different objections under the Wekiva Parkway & Protection Act, it wasn't just for the road. She asked who were the heads of those agencies? PIO gave her contact info for Vivian Garfein of DEP, Kirby Green of WMD. PIO said I'd also send her the list of the WRB commission members. She said they have P.O. Box; don't think mail is getting forwarded anymore if you send it to the house. P.O. Box 1447 Sorrento 32776. PIO said would take a little time to pull info together, but she should get it by end of next week. She was thankful for the assistance. PIO began pulling requested documentation for Marcia Nesler (noted info previously sent her in database.) 11/9/2004 9:45 AM Copied governor's exec order and Wekiva committee report excerpts (24 pages) for Marcia Nesler, and drafted cover letter.

1/12/2006	10:19 AM	<p>From: Brian.Manwaring@CH2M.com  [mailto:Brian.Manwaring@CH2M.com] Sent: Thursday, January 12, 2006 10:19 AM  To: mbrookssr417@cfl.rr.com  Cc: Mark.Callahan@CH2M.com; David.Lewis2@CH2M.com  Subject: Contact Update Mary - I just wanted to update you on the meeting with Eric Swanson and another property owner contact. Dave, Gary and I met with Eric yesterday to discuss the property that he is developing. The alignment had been shifted slightly to the east, which impacted him more than he had originally anticipated. Although disappointed, he understands the reasoning for the shift. Gary mentioned to him that we should have a more definite idea of the alignment around June. Eric is concerned about the timing of land acquisition. We will stay in contact with him in the coming months. Theresa Newcomer called FDOT, who referred her to Mark, for general information about the WP. I directed her to the website and went over the conceptual alignments with her. No follow up is needed with her at this time. Please add her to the mailing list: 1674 Cherry Blossom Terr., Heathrow, FL 32746. 407.804.8249. Regards, Brian Brian J. Manwaring  CH2M HILL 407.423.0030 x287</p>

We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks
8/2/2006	2:19 PM	PIO called back Linda Noe 407-884-4502 recording said number out of service. PIO checked number called previously 407-230-9710 and tried that. PIO reached her and relayed that her Florence Streets properties are well east of the project corridor. She said she wanted to know about all OOCEA projects because they have properties around the area. We have other property that hasn't been changed into our name, downtown Orlando we have Seminole property in Altamonte off 436, also have property at the St. Johns

River. PIO noted I'm on the Wekiva Parkway and MBX projects, but if she can give me some locations I can point her in the direction of who would be on EA projects in that area. She asked where can she go to find out about all the projects? PIO noted the EA website but she said she doesn't have internet access. PIO noted EA does not have projects in Altamonte near 436 or at the St. Johns River. She said they have property on 46A, 4190 lake Harney road off 46A. PIO noted that sounds like far east end of 46A and not on project corridor, but I'll check and confirm. PIO said I'd send her an OC alternative map for her records. She said she doesn't know addresses of other properties. We're trying to liquidate some property now. I was meeting with attorney, when I came out and was trying to turn my phone back up and you were saying hello. PIO said if she has other questions give me a call. She said okay thanks.--228 p.m.

8/2/2006	2:08 PM	PIO researched Linda Noe property locations. 4710 Florence St. is about 6 parcels south of Kelly Park and three blocks west of Rock Springs Road, well east of the project corridor. Her property at 4718 is next door to the north, also no impact. PIO checked on SC properties. Nothing showed up for Linda Noe. Only Noe was a Steven Noe & Jennifer Hancock.
8/1/2006	4:05 PM	Linda Noe called and left MSG I did get your MSG and thank you for returning it. I don't need just a website. I need pretty much all of OC and some of SC because we also own property that would run in alignment with what you're trying to do. I do not have access to the internet therefore I'm hoping you have a map that is a larger version of where you're going through at. That way I can see if we're affected. We're getting several pieces from you just at different addresses, that my sister and I have. So if you could mail me a copy to 4710 Florence St., Apopka 32712 I would appreciate it. Thank you.
8/1/2006	2:04 PM	PIO called back Linda Noe 407-230-9710, PIO left detailed meeting that final meeting is tonight and gave address and location. PIO noted these are open house formats so no meeting minutes, folks coming to see about 100 maps and other exhibits and ask questions, find out how they may or may not be affected. PIO noted we hope within a week to get the maps on the EA website for folks who couldn't make the meetings, but noted again we have the last meeting tonight so maybe her or some of her neighbors can make it and get some good info.
8/1/2006	1:52 PM	Linda Noe called and left MSG we've been playing tag with the phone. You held meetings in Seminole, Lake and Orange. I would like for you to send me the info in the mail. 4710 Florence St., Apopka, 32712 regarding the meeting that you had this month and any other minutes you may have that could be of advantage to not only myself or other people in the neighborhood that were unable to make the meeting. Please give me a call if you need at 407-230-9710.
7/12/2006	5:44 PM	PIO again called Linda Noe 407-884-5402 , spoke to Lela, who said Linda was out and maybe back in half hour. PIO asked her to pass MSG. that I tried to return Linda's call, left my number again.
7/12/2006	9:58 AM	PIO tried other number that showed up on phone yesterday, possibly Linda Noe 407-884-5402, woman answering said that was correct number but Linda wasn't in. PIO left MSG that I was returning her call from yesterday re: project.
7/12/2006	9:46 AM	PIO returned call to Linda Noe 407-230-9790 (number in database) but man answering said it was not correct number, no Noe there. PIO tried directory assistance by her name and address, no listing for Linda Noe, and only a Rodgers listed at address and number non-published.

Date Time Regarding  
8/1/2006 10:02 AM Attended public workshop on 7/25/06.

7/12/2006 5:51 PM PIO called Carol Nolan 407-321-7356 to let her know the same boards and info will be available at each of the meetings so she can go to which ever one is convenient to her. She said it's not that far for me to go to Lake Mary or Sanford, but it's easier to go to Mount Dora. She said she appreciated the call back.

7/12/2006 11:37 AM Carol Nolan called and left MSG. 407-321-7356 I was looking at info about Wekiva Parkway that was sent to us. My husband and his partner have property on 46. We don't believe it affects where our land is. But what I need to know is if ... I go to the SC one will it show the entire route or will it just show SC because the property is in LC. If I can just go to the SC one you don't need to call me back. If I need to go to LC to see where the next map is, let me know and call me back thank you.

Date Time Regarding  
7/31/2006 2:02 PM Attended public workshop on 7/25/06. Submitted comment: "The Wekiva Protection area needs roads for local traffic. This road was to be only 2 lanes, a lane for each direction, not multiple lanes for each direction. The larger footprint by the multiple lane road is detrimental to the Wekiva Protection area needs. It is named Wekiva Protection Area because it needs protection from the development you are advocating with the more expensive road system. Regarding this forum - My observation is that your forum is primarily geared to avert a vocal public participation forum. You should be gathering concerned citizens to speak out and most importantly you should be prepared to listen to what they say. Instead you have graphics replications with a milling crowd. This is neither suited to obtaining or providing information. I came to listen and learn - this is not suitable. A workshop this is not. I listened briefly to the slide show and talk. I voted a deliberate orientation to alleviating dangerous traffic patterns, congestion, and improving traffic flow. On increased development and accompanying population growth with exponential demands for public services (schools, roads, trash pick-up, etc.) appears to underlie much of this Wekiva Parkway proposal. I firmly believe that a more-incisive and future-oriented plan would be looking toward public transportation systems to improve traffic flow and lessen dangerous roads."

Date	Time	Regarding	
8/16/2006	5:30 PM	Attended FDOT/EA presentation to HOA at Red Tail Country Club, signed sheet.	
7/20/2006	4:52 PM	PIO forwarded CR 46A concept to Tom O'Brien/Heathrow Country Estates as requested.	
7/12/2006	5:14 PM	Tom O'Brien responded to PIO email: "I will definitely attend one of the meetings, and thanks again. Tom O'Brien"	
7/12/2006	5:11 PM	PIO responded to Tom O'Brien: "Tom, I just came from a very long meeting discussing all of these maps and the many alternatives, and changes are still being made as we speak based on various government input. In fact, we have another meeting July 18 at 7 p.m. at the Mount Dora City Commission to present the latest info and get their feedback, which will also have to be incorporated into the maps. Given the changes still being made, we will not have the maps ready until the public workshops. There will be some info on the various alternatives being considered for CR 46A at those workshops. The one on the overall viable alignment map is just a representative example of what's being considered. I hope you can attend one of the meetings (the same information will be available at all three, just FYI). Mary"	
7/12/2006	4:55 PM	PIO responded to Tom O'Brien email: "Hello Tom, We are not doing anything as part of the Wekiva Parkway PD&E Study with Route 44. Our project includes only realigning the southern end of County Road 46A with regard to its connection to SR 46. I hope that helps address your question. Mary Brooks"	
7/12/2006	4:51 PM	<p>From: O'Brien, Thomas [<a href="mailto:TOBrien@sjm.com">mailto:TOBrien@sjm.com</a>] Sent: Wednesday, July 12, 2006 4:51 PM To: Mary Brooks Subject: RE: SR 429-Wekiva Parkway PD&amp;E Study - Update Query</p> <p>Mary, thanks again. But could you please direct me to some source of information on this specific change to which you refer- 46A and where and how it connects to 46). It would appear from the map that 46A will be substantially moved westward. If that is the case, it will cut directly through a very rural area (farms, ranches, a new golf course, and a new development- Heathrow Country Estates). That is precisely where I live and obviously is what concerns me the most. Thanks, again. Tom O'Brien</p>	
7/12/2006	11:56 AM	<p>From: O'Brien, Thomas [<a href="mailto:TOBrien@sjm.com">mailto:TOBrien@sjm.com</a>] Sent: Wednesday, July 12, 2006 11:56 AM To: Mary Brooks Subject: RE: SR 429-Wekiva Parkway PD&amp;E Study - Update Query</p> <p>Mary, Thank you for your quick response. In the brochure, I see no reference to the proposed road that appears (on the map in red) to connect Rt. 46 at Mt. Plymouth, then heading north toward Rt. 44. This is the area of my concern, as I live very near that proposed route. Since information about this "spur" doesn't seem to appear in the brochure, (at least I couldn't find any</p>	

information) can you direct me to any additional site or location that may be available giving information on this proposed road? Thank you.Tom O'Brien

7/12/2006 11:15 AM PIO emailed Tom O'Brien as requested and attached viables concept: "Good morning Tom I received your message. The viable alignment alternatives map included in the latest Wekiva Parkway update is already posted on the OCEEA website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button on the left side of the page. On the home page under "Construction Updates" click on the highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can find information and scroll down to see the text links for the map and other files. I've also attached the map here for your review. Please feel free to call or email with other questions or concerns.Mary Brooks

7/12/2006 9:40 AM Tom O'Brien called and left MSG up in Sorrento area. I obviously have interest in 429 extension as well as 46 bypass and connection to route 44.Looking on website and notice you haven't yet posted the new summer 2006 update that was just recently received as a mailing. Wondering when you expect to have new update on the web page so the map that appears on the first page is more easily read. You can contact me by phone or email [Tobrien@sjm.com](mailto:Tobrien@sjm.com) or call me by phone c 847-636-9700 thank you ma'am.

8/21/2006 9:52 AM "Aug. 21, 2006R.D. O'Bryant4861 Brick RoadSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear R.D. Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. As requested, please find enclosed the viable alternatives for the Wekiva Parkway to SR 46/I-4 and to SR 417/I-4.Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks"

8/10/2006 2:11 PM PIO returned call to R.D. O'Brien 407-322-4696, let him know I'd get maps out to folks as soon as I can but have several hundred requests. PIO noted the maps are available on the website, I can walk him through finding them if he likes. He said he went on the website but they wanted \$19 to send him something (?). PIO said not sure what he means, but if he's at a computer I can walk him through it now. He said he just turned off the internet. He asked would it be a week before getting the maps? PIO said hard to tell could possibly be a week or more, we have hundreds of requests, had 1200 people attend the three meetings. He said oh my goodness, alright thank you. PIO reiterated maps on the website if he decides he wants me to walk through finding them, call me, if he needs them sooner.

He said guess you need to hire more help. PIO noted it would be nice but it's just me I'm afraid, will get them out as soon as I can.

8/10/2006 10:23 AM R.D. O'Brien 407-322-4696 called and left MSG I went to the SC involvement on this bypass and made out an order for two maps and I haven't received them. That was almost two weeks ago. Can you give me a call back or just send the maps on. Thank you

6/12/2006	7:26 PM	Edyta Olejnik responded to PIO email: "My address is: Edyta OlejnikWatson Realty Corp. 7015 CR 46 A Lake Mary, FL 32746 Thank you"	
6/12/2006	6:45 PM	PIO responded to Edyta Olejnik email: "Edyta,It was good speaking with you earlier. As we discussed, the Project Development and Environment (PD&E) Study for the SR 429 Wekiva Parkway is scheduled to finish with an approved alternative in spring 2007. As noted, we're working toward the next public workshops for late July and early August. Let me know if you have questions about the project map I walked you through getting this afternoon on the OOCEA website.Also I need a mailing address for you so we can send you the project newsletter with the meeting info. Let me know if you have any other questions."	
6/12/2006	4:06 PM	PIO returned call to woman, whose name was Edyta/Watson Realty. She said regarding the 417 extension from Sanford to 46, there's a property I'm trying to sell, and need to know when final decision is coming? PIO noted study finishing with approved alignment spring 2007. PIO noted we have meetings coming up end of July; think will be July 25 for SC. PIO asked if she'd seen the latest map on the website? She said was on the site but couldn't find it. PIO walked her through web pages and text links to overall layout and concept file. PIO noted she can zoom in on that file to find property she wants. PIO asked if she was on mailing list? She said no. PIO asked for her last name Edyta and address. She said she has my email address and would send to me. PIO said that'd be perfect.	
6/12/2006	3:29 PM	Edyta/ Watson Realty emailed: "Mrs. Brooks,I wanted to find out when the proposed plans for the SR 417 extension through the West side Sanford might be finalized and if you have any deadlines for that decision. Please e-mail back or give me a call at 407-474-0213 Edyta OlejnikWatson Realty Corp.407-474-0213	
6/12/2006	3:14 PM	Woman who left no name left MSG I'm calling re; 417 extension, wanted to see any dates to finalizing those plans? Or if you can give me more info in regards to that, the 417 going to Sanford? Please call ASAP. 407-474-0213 thank you

8/7/2006	12:55 PM	<p>Attended public workshop on 8/1/06. Submitted comment form: "I believe more access needs to be given to make travel from 44 east to et to the new road. The people of Eustis need better access to the new road without leaving to get on 441 south through Mt. Dora. I strongly believe that the 46A route be shifted east. It's now heading into 46 (red light) traffic jakes. More consideration should be given to future growth and the access of residents in Eustis, and those north and east of Eustis, that will be using the road."</p>

7/31/2006	1:06 PM	Richard Ornstein - 1813 Crowley Circle, Longwood, FL 32729. Attended public workshop on 7/25/06. Submitted comment: "1) We were surprised to see the 3rd northerly alternative route through Lake County that was not on your Web site. Please remove it from consideration to reduce the impact on landowners on SR 46 between 435 and Wekiva River. 2) Please re-located the potential pond next to the 12-acre site of interest to us at 28320 SR 46."
5/31/2006	11:15 AM	PIO called Richard Ornstein since he's in a seminar to let him know I'd sent the info via email and recapping some of the info forwarded to him.
5/31/2006	11:10 AM	PIO finished researching Richard Ornstein query and prepared response: "Hello Richard Just wanted to get back to you about your query about the properties 28320 SR 46 231928000300000600) and 28130 SR 46 (231928000300000500). If I'm looking at the correct parcels, these two lots are between (actually out parcels to) the NW corner of the Wekiva Mitigation Bank (formerly the New Garden Coal) at SR 46 and a portion of the Seminole State Forest that is south of 46. As lead agent, the Expressway Authority, working with the FDOT, FDEP and SJRWMD has secured a conservation easement on that roughly 1600-acre property as mandated by the Wekiva Parkway and Protection Act of 2004. That is one of four large properties that we are required to try to acquire for conservation (with only a very small portion being used for the roadway) according to the state law. The properties you are interested in were under different ownership and not a part of that conservation acquisition. You are correct in that it appears at this time that the blue alternative encroaches 25-33% north into the larger parcel on the west, and a little less so on the smaller eastern parcel. The red alternative appears to run along the southern border of the properties; it is difficult at this stage to tell how much encroachment there might be, as noted on the map segment here. The engineers are beginning to hammer out the preliminary plans for addressing local access issues to various private properties as well as the state parks. We are also starting to work on retention pond locations, of which there will be many. We anticipate having this type of preliminary information at the August public workshops, if not a little sooner. I anticipate getting an updated PowerPoint presentation shortly that I will post on the OOCEA website when available, so I recommend that you check the site regularly in the near future. Please keep in mind that these alignment alternatives, access accommodations and other project details are still highly subject to change. The PD&E study is still on track to conclude with an approved alignment alternative in spring 2007. I hope that helps. Please feel free to call or email with other questions or concerns."
5/30/2006	4:00 PM	Researched Ornstein's property query on two parcels side by side 28320 SR 46 231928000300000600) and 28130 SR 46 (231928000300000500). Properties are between actually out parcels) the NW corner of Wekiva Mitigation Bank (new garden coal) at 46 and portion of Seminole State Forest that is south of 46. Blue alternative encroaches 25-33% north into the larger parcel on the west and a little less on the smaller eastern parcel. Red alternative appears to run along southern border of the properties; difficult to tell how much encroachment.

5/30/2006	10:43 AM	<p>PIO returned call to Richard Ornstein 407-461-6619 c, question was with regard to latest map on the website. It has a certain section that has the red path and blue path. PIO noted with regard to potential acquisitions, we're required to try to buy 10k acres for conservation as part of being able to develop this project in the Wekiva River Basin. He said how were those properties determined? PIO noted over the last number of years and by several committees, based on wetlands, sustainable wildlife and other input from environmental groups, helped to target properties that most needed to be conserved from development. When is the next public meeting? PIO noted in August, though we haven't nailed down the dates, have to coordinate with the sites. PIO noted we're working on the next newsletters to come out in late June or July, and we would have the info by then to get out to them. He asked if he was on the list? PIO said that's correct. In lake county, two parcels side by side 28320 SR 46, &amp; undeveloped parcel of 5.8 acres next door, that is part of a larger 40 acres that is 231928000300000500, looks like couple of lines, especially the blue path comes right through it, red is kind of parallel. Other property is 00600, that is the 12 acre site with an address. PIO to research lot locations and potential impacts and get back to him. We have been told 46 won't exist, will be parts of it here and there. Is that true? PIO noted we are looking to largely replace 46 in many locations with the parkway, that it might remain in some locations as a county road or frontage road. He asked what about where it says local property access? Are you going to be able to get to properties like the ones we're looking at? PIO noted we are aware of the local property access issues and that are expected to be addressed in more detail in the coming months. He said the realtor who's selling the 5.8 acres told me it (property access) would be around the 435 which comes in at Mt. Plymouth area. PIO noted will try to get back to him today on the properties, otherwise it will be tomorrow; would that be okay? He said yes, he'll be in a seminar tomorrow but can leave a MSG on his cell phone.</p>
5/26/2006	9:13 AM	<p>Richard Ornstein called and left MSG I had spoken to you few weeks back about SR 46 and some property along there. I've taken a closer look at concept study map dated May 1, 2006 the most up to date as possible. Have couple questions on impact of particular Parcel of lands we're looking at making an offer on and where the expressway is in relation to that. What the difference in that lot which does not have diagonal lines on it, meaning potential acquisition property, and the several lots next door that would have the same diagonal lines, Even though the expressway pathway seems to encroach on the very back end of property similar or worse than the other property. It's Friday morning at 915. I'm at 407-461-6619 c I'd appreciate a call back if you could do so thank you.</p>
5/4/2006	11:47 AM	<p>Richard Ornstein responded to PIO email: "Mary: Thanks for your detailed response. Now the realtors can be "educated" as to real status for property owners. Richard M. Ornstein, C P.A. Glickstein Laval Carris, P.A. Certified Public Accountants 850 Concourse Pkwy S., Ste. 150 Maitland, FL 32751 Phone: (407) 645-4775 Fax: (407) 629-1606 Email: ROrnstein@glccpa.com Web: www.glccpa.com-----"</p>
5/4/2006	10:57 AM	<p>PIO responded to Richard Ornstein email: "Hello Richard, Sorry for the technical glitch but thanks for resending your query. 1) We are trying to wrap up the government review meetings with various agencies on the latest alignment alternatives. Once that's done, hopefully by end of May, we'll be able to finalize the more viable alternatives map and post it on the website. The updated map will feature fewer alternatives: some have been removed, shifted, etc. We'll likely schedule public workshops for mid-August to go over the maps and other preliminary project information. I will add you to the project database so you will receive meeting notices and newsletters. 2) The Wekiva Parkway is not completely funded, so schedule for construction is tentative at best. A typical schedule would have us finish the PD&amp;E Study with an approved alignment in spring 2007, take another 2-3 years for final design, 2-3 years for ROW acquisition, and then move into construction. So we'd be typically looking at 2012 to begin construction. However, due to the funding issue, it could take much longer to get through this project development process, even 2015-2020 before construction might start. Highly subject to change at this point. 3) Again, schedule for completion of construction is highly speculative at this point due to funding issues. Once funding is available, the project</p>

would likely be done in sections, with each section taking 2-3 years depending on the size. Completion of construction will depend on the phasing, etc. These are all good, valid questions, but ones which we're too early in the process to answer definitively at this time. Once we get the viable alternatives maps, I'll be happy to discuss any questions about a particular property you have in mind. I hope that helps. If you don't see the new maps posted by late May or first week of June, feel free to call or email for an update.

5/3/2006	5:25 PM	Richard Ornstein 407-645-4775 returned my call, said he had question on SR 46, things I didn't see on the website. He said I sent you an email at 358 p.m. PIO noted didn't get it on the blackberry, would you mind resending? And I'd be happy to take a look at it. Is he still in the office? He said he was and would resend. I just had three questions.
5/3/2006	5:15 PM	PIO returned call to 407-645-4775 Glickstein, Laval, Carris, Marty Glickstein said he didn't call but would email staff to let them know I returned the call.

5/3/2006	3:58 PM	Rick Ornstein emailed: "Mary:As a potential purchaser of property on SR 46 in Lake County near the Wekiva River, I would like to know the following as things currently stand 1) Proposed path (or alternate paths) of the by-pass as it crosses SR 46;2) Time frame of when the road is expected to begin construction;3) Time frame of when construction is expected to be completeYour web site does not address these questions and realtors showing property in that area have provided various differing answers to my questions. If answers are not yet available, can we at least know when they will be? I look forward to your prompt response.Richard M. Ornstein, C.P.A.Glickstein Laval Carris, P.A.Certified Public Accountants850 Concourse Pkwy S., Ste. 150Maitland, FL 32751Phone: (407) 645-4775Fax: (407) 629-1606Email: ROrnstein@glccpa.comWeb: www.glccpa.com

11/10/2006	10:17 AM	Added Chamber to database and emailed asking if they wanted a presentation or update on project. Executive Director is Pat Hicks, Chairman Elect Lisa Porzig Finnerty of Porzig Realty (Osborne is with Venture One Properties).

11/10/2006	10:15 AM	PIO emailed Sanford Chamber of Commerce asking if they wanted an update on the project."TO: Paul Osborne, Chairman Lisa Porzig Finnerty, Chairman Elect Pat Hicks Executive DirectorRE: Offer to present update to Sanford Chamber of Commerce on Wekiva Parkway ProjectGreetings,As the public information officer for the State Road 429-Wekiva Parkway Project Development and Environment Study, I would like to extend an offer to present an update on this major transportation improvement at one of the Chamber's next membership meetings. The PD&E Study Team, led by the Florida Department of Transportation and the Orlando-Orange County Expressway Authority, has been meeting with various community stakeholders since our public workshops last summer. The intention of these on-site community meetings is to bring you up to speed on where the project study stands, and to get your feedback. Currently we are evaluating and revising the remaining alignment alternatives based on engineering analysis, and feedback from local governments, state agencies and the public. We anticipate drafting a preferred or recommended alignment - including interchange locations - in January. That draft recommendation will subsequently undergo local government and state agency review and revision before being brought forward at formal public hearings in March or April.Please let me know if you would like to be added to the calendar for a project presentation and what date or dates you have available. Presentations typically are made in the evenings, but on occasion can be accommodated during the work day depending on existing schedules.I look forward to hearing from someone with your organization. Thank

We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1 200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

8/7/2006	12:04 PM	Attended public workshop on 8/1/06. Shirley submitted comment card: "I was told the section of the road that will go around Sorrento/Mt. Plymouth will not have tolls. This is the route people could take so that they do not drive through Sorrento/Mt. Plymouth on the existing Route 46. Please keep it toll free to travel from Mt. Dora to Sanford on the new proposed road." Bob submitted comment card: "Please keep the Wekiva Parkway from Mt. Plymouth to I-4 free. The old 46 depends on this for its survival or at least the survival of its travelers. I like the 46/I-4 interchange that splits the two roads to the west of I-4."

Contact	J.D. & Rebecca Owens	
Notes		
Date	Time	Regarding
1/30/2006	1:13 PM	Drafted comment response: "J.D. & Rebecca Owens5858 Effie Dr.Apopka, FL 32712RE: Receipt of Public Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear J.D. & Rebecca,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. None of the initial alignment alternatives directly affected your property at 5858 Effie Dr. in Apopka. The closest was segment OC-9, which would have been about 1 500 feet east of your property. Please be advised, however, the study is still underway and changes are still being made.Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being revised or shifted, some removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in

late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits and other information are available and will be updated in March on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. "--115 p.M.

1/30/2006	1:05 PM	PIO located property for JD & Rebecca Owens, whose parcel on map is 2533 on west side of Effie Drive north of Paulette, about 1,500' west of OC-9.
1/27/2006	12:23 PM	Comment Form:J.D. and Rebecca Owens5858 Effie DriveApopka, FL 32712We're writing these comments in regard to the extension of route 429 through Apopka. We are new Florida residents from the Washington D.C. area and we moved here to get away from noise of the highways. The noise from the proposed road will easily be heard even inside our new home. Besides the noise pollution, we're also concerned about the safety of our children and pets. There is a risk of being hit at high speed by a car or truck. Also our water system will no doubt be contaminated by pollution. Do we now have to pay for an upgrade in our plumbing so we don't get sick? Do we now have to pay for city water? Lastly, we have many kinds of wildlife, including some endangered species. It is important for these animals to have a safe place to live, they don't have many places to go due to heavy development in the area.For these reasons we oppose the extension of 429 through our community. Let's please keep our area safe and beautiful for everyone. Surely there is an alternative route that will have less impact on our environment.Thank you, J.D. Owens

Date	Time	Regarding	
9/22/2006	3:33 PM	PIO returned Jim Palmer call, wondered if there was ... what the latest was since community workshop, any final conclusions on the IC for Wekiva Parkway? PIO went remaining schedule: draft preferred Dec.-Jan., subsequent review and revisions, public hearings March, subsequent agency approvals (FDOT, OCEA, SCEA, etc), finish study April-May with approved alternative including IC selections. He said it was supposed to be	

January-February hearings? PIO noted schedule pushed back as we try to schedule all of these review meetings with various officials. He said so they won't approve it at the March hearings? PIO said no, that's when public gets to make comments on preferred alternative Then goes for agency approvals. He said he was just trying to get an update, wondering when he can sell his property. He said he couldn't think of any other questions right now. PIO said he knows where to find me if he does.--340 p.m.

9/22/2006	2:57 PM	Jim Palmer/Rochelle Holdings 321-228-6657, 888-572-5637 called and left MSG noted we'd spoken at the public meeting. He said he had couple more questions on the project for me.
8/9/2006	11:10 AM	Attended public workshop on 7/26/06.
3/13/2006	10:30 AM	Continued working James Palmer/Palmer Reifler & Associates comment letter response "James PalmerPalmer, Reifler & Associates1900 Summit Tower Boulevard, Ste. 820Orlando, FL 32810RE: Receipt of Public Comment for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear James,Thank you for submitting public comment for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comments received, as well as input from local governments. For example, the Seminole County Expressway Authority (SCEA) voted Dec. 20, 2005, to have the yellow or northernmost alternative, which would have connected to Interstate 4 at U.S Highway 17-92, removed from further consideration. The SCEA, which must approve any alignment in Seminole County, also requested an alternative in the area of International Parkway be evaluated. Also, the Lake County Water Authority (LCWA) in February requested that an alignment alternative that would have affected the Wolf Branch Sink Preserve be removed from consideration.At this time in the study process, there are many questions that cannot be answered and decisions that have not been made - including the location of the interchange in Orange County. The initial alignment alternatives continue to be analyzed based on public input and engineering evaluations to create a set of more viable alternatives. The resulting alternatives will be presented at the next public workshops in the summer of 2006. Based on subsequent public and government input and analysis, a preferred alternative(s) will be selected. Public hearings are expected to be held in early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the project exhibits are available, and will be updated in late March or April, on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the public workshop files.I encourage you to check the website for updates, or contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.
3/8/2006	3:50 PM	Carolys Acosta/Comm. Mildred Fernandez executive secretary 407-836-5309 called to say they received packet of comment forms Monday with cover letter from James. R. Palmer/ Palmer Reifler & Associates. She asked what the comment forms were for? PIO noted the forms were distributed at public workshops and also on website so people can submit their opinions about the project. PIO noted that we enter the comments into the project database for the record, and that I also respond to each one. PIO noted we'd gotten about 450 so far and they were still coming in. PIO confirmed we had received the same cover letter and packet of forms. PIO noted they just copied the commissioner's office on the forms. PIO noted she can tell the commissioner that we will be responding to the forms and entering them into the record. PIO noted if the commissioner has any questions she's welcome to call me, or if they hear from any of the folks who wrote in, tell them I will respond or give them my number so they can reach me directly. She said she would and thank you very much.

Tall Trees HOA  
Regarding  
PIO responded to 8-18 comment email from Janet Pearson/Tall Trees: "Dear Janet, Thank you for submitting public comment for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the 500 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That includes looking at alternatives for the SR 417 connection to Interstate 4, for example, that would shift the alignment up to 100 feet away from the Tall Trees subdivision. As additional alternatives for your area are refined, we intend to once again meet with your HOA board to discuss That information will be used to draft a preferred alternative by December or January.

That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). 8/19/2006	4:38 PM	PIO responded to Janet Pearson/Tall Trees HOA: "Hello Janet, There initially were two alternatives that did go north of 46 toward the area of US 17-92 near the river. These two were removed from consideration some months ago due to high residential, wildlife habitat, public land and wetlands impacts. The SC Expressway Authority, which must approve any alignment in Seminole County, requested those two alternatives be removed from consideration after seeing the potential impacts. The Wekiva Parkway study team will be meeting with your HOA board this Tuesday, Aug. 22 at 7 p.m. to discuss your concerns and look at alternatives for that area, and I understand residents typically attend these board meetings also. Perhaps I will see you there. Mary Brooks
8/18/2006	9:17 AM	Janet Pearson/Tall Trees HOA emailed: "Dear Ms. Brooks, I'm a Tall Trees resident and I'm concerned about the Wekiva Parkway connecting so close to our neighbor. I think it would better serve everyone if it was connected at I-4 and the 1792 exit.

Regarding  
Given the desire to allow the porum to comment and the desire of the homeowner of Heathrow County not to have the rerouted 46 so close to the developments as alternative would be to eliminate the section of 56A which is slated for closing. Say 10 - 15 our the current surface and let the road connect underneath.  
8/7/2006 12:36 PM Submitted additional comment: "Rerouting of 46A - Given the desire to allow the forest to connect once the desire of the homeowners of Heathrow Country Estates NOT to leave the rerouted 46A so close to the developments and alternative would be to elevate the section of 46A which is slated for closing. Say 10' - 15' over the current surface and let

the forest connect underneath."

8/7/2006 12:30 PM Attended public workshop on 8/1/06. Submitted comment form: "Proposed rerouting of 46-a in East Lake. I find proposed location is much too close to Heathrow Country Estates  
A great deal of value will be destroyed in existing real estate. Given the raw underdeveloped land available to the east (west of the forest, I suggest this rerouting should be moved further east."

Notes

Date Time Regarding  
11/8/2006 11:09 AM PIO returned call to Gonzalo Peschiera 786-547-3579 cell, what's the status right now, is it moving forward? PIO noted we are shooting to finish PD&E study with approved alignment in late spring-early summer 2007.He said he went on the website yesterday. Would the authority consider this to be 3P? PIO noted don't suppose can rule that out, but right now being developed by EA and DOT, noted jurisdictions. He asked were there other project the EA might consider doing 3P? PIO noted he might want to check the website 5-year work program and future projects.He asked if this was the biggest or project likely to be developed the soonest? PIO noted the Wekiva Parkway was not fully funded; last estimate was \$1.4 billion, so it's like 6-8 years away or so depending on funding. PIO noted there are other projects in the planning stages, such as the Innovation Way IC. With funding an issue overall, can't say which would be developed sooner. He said he's heading back to the office and will check out the work program on the website.He said our interest is to introduce our company to the authority, and figure out can we collaborate on some of these projects. He said he made an appointment to see Mrs. Lennon next week there at the Ea. We pursue 3P projects.PIO said if he has other questions, he's welcome to email or call me and I will get back to him as soon as I can. He said thanks and you've been very helpful. He confirmed my email address. PIO noted I received both his email and phone MSG.

11/7/2006 10:49 AM Gonzalo Peschiera emailed: "Dear Mary, Left you a phone message this morning and wanted to know if you might be available to meet me next week in Orlando either Tuesday 14th at any time or Thursday 16 at your convenience. We would like to get a brief status of the Wekiva Parkway project, the future plans, is the OOCEA considering a PPP? Time frame for bidding process and as much as you can provide me with. Thanking you in advance for your time, Regards, Gonzalo PeschieraBusiness Development786-547-3579 cell.www.ohl.es

11/7/2006 10:24 AM 305-255-7528 Gonzalo MSG 786-547-3579 call me re: Wekiva Parkway project, have specific questions if you can call me back. We are company that does highway construction and also PPP (private public partnerships) want to know if EA is considering this project to be a 3P project or some kind of private financing. I'm going to be in Orlando next week to get some background and would love to meet with you to see what is the outcome for this project. Company is OHL. Thank you much.

Notes

Date Time Regarding  
8/22/2006 1:06 PM PIO returned call to Debbie Peters 407-324-0078, let her know only time for meeting I'd heard was 7 p.m., and that's what time we'd be there. PIO suggested maybe HOA wanted

8/22/2006	12:51 PM	to get some other business done early, hence 6 p.m. timeframe. She was thankful for the call back and info. Debbie Peters/Tall Trees left MSG I plan to attend meeting tonight you're hosting, but we have a dilemma and so do several of our neighbors. The paper we received said meeting is at 7 p.m. in our clubhouse, but HOA has sign out front that meeting is at 6 p.m. We're confused about the time and concerned that lot of working people can't make it at 6 but can make 7 o'clock meeting. I don't know if you can clear that up? My cell is 407-416-5088. I've tried to reach 2-3 people on our board and cannot so I was just hoping to reach you. ... Thanks a lot and hope you can help me.

Notes

Date Time  
7/5/2006 3:49 PM

Regarding

A.J. Phillips 407-322-9113 said we spoke a little while ago regarding the 417 extension and you mentioned there was a project that might supersede that? PIO noted we have the Wekiva Parkway, which includes an alignment alternative that drops down from SR 46 to 417, and then there is a separate study being done at the request of Seminole County by FDOT to look at just connecting 417 to International Parkway, which is the county's corporate business district. PIO noted the discussions in meetings has been that if Wekiva Parkway moves forward, which there is every indication that it will, that it would supersede this smaller project since we're talking about the same location. He asked if that smaller project was part of a larger overall 417 project, like just the first phase? PIO noted not to my knowledge; smaller project was generated at request of Seminole County to connect to their corporate corridor. PIO noted if anything, the Wekiva Parkway is the larger version, if you will. He asked what are the prospects for starting this thing? PIO noted overall timeframe, study ends 2007, if 2-3 years for final design and RW acquisition, that would put us at 2010-13 if we were fully funded. PIO noted we're not fully funded, have some money to start final design and some to start ROW acquisition, so schedule could be pushed out to 2015, just depends on funding availability and if we run into any other hurdles. He was surprised by possible timeframe. PIO noted even with funding that's how long the phases take, though they can accelerate the schedule some times and have portions of phases running concurrently. He also asked about the connection from 417 to I-95, think that's the 415? PIO said I'm not on that project but could try to find out something for him. He said that's fine he'd look into it. PIO let him know we have public workshops coming up; think Seminole County's is July 25 at the Sanford Civic Center. PIO noted newsletters will be received shortly with that info. He said thanks for the info.--357 p.m.

6/13/2006 10:16 AM PIO again tried Mr. Phillips, who said he was trying to get info on the progress of the 417, but went on internet yesterday and got what I needed. He said there appears to be a study underway to consider expanding 417 from I-4 to International Parkway, and said think they were looking at 2011, so think I have what I need. PIO noted while there is a small study on that segment, that area is also part of the Wekiva Parkway corridor and our project, if realized, would supersede the smaller study. PIO began to explain the remaining alternatives, but he asked if I had something he could look at instead? PIO walked him through the website and text links to get to the overall concept map. PIO said if he had questions once he reviewed that he could call me back, gave him my number and name again. His first name is Alden but goes by A.J. Phillips. He thanked me for the info.--1026 a.m.

6/13/2006 9:20 AM As relayed by Bryan and Christa Deason/Turnpike, PIO called Mr. Phillips at 407-322-9113, phone rang and rang but no answer and no machine picked up.

6/12/2006 6:32 PM PIO responded to Bryan's email: "Hey Bryan, Sorry, I seemed to have overlooked this email earlier today. Will get with Mr. Phillips and address his questions - thanks!"

6/12/2006 9:54 AM <christa.deason@dot.state.fl.us> 6/12/2006 9:47 am >>>Hi Bryan, Would you call Mr. Phillips at 407-322-9113. He wants info on the Wekiva. The voicemails he keeps leaving are asking about SR 417, but he wants to know about the part over SR 46. Thanks. Christa Deason Public Information Officer Florida's Turnpike Enterprise P.O. -----------	---------	--

7/31/2006	2:33 PM	<p>Attended public workshop on 7/25/06. Robert submitted comment: "Having opposed any 46 alignment for nearly 20 years, I applaud the work that has been done on this study. This is a plan I can support. I am hopeful that northerly widening can be accomplished. Those extra few feet will make a big difference to the homeowners in the area as well as reduce the cost." Virginia submitted a comment: "Please do not plan to construct light poles and lights on the new bridge over the Wekiva River at Hwy 46. Bright lights at night would disturb the ecology of both animals and insects living in the area. Safety concerns after dark could be addressed by a lower speed limit. Thanks."</p>

Contact Notes	Cindy Poirier	
Date	Time	Regarding
9/26/2006	3:30 PM	PIO got 6 comment forms, all of the format from Cindy Poirier's campaign opposing the 46 bypass.
9/19/2006	5:18 PM	<p>PIO began receiving faxed comment forms with the following text from Cindy Poirier at the top: "Mt. Plymouth or Mt. Parkway the choice is up to you! (headline) The Wekiva Parkway</p> <p>The 46A realignment and the SR 46 Bypass will have a major impact if not signal the end of our community. The southern and eastern leg corridors have been defined by the Wekiva Protection Act signed into law by Gov. Jeb Bush. The SR 46 Bypass is not a part of that mandate. The OOCEA is closing public comments soon. The current alignment, except for a scant 4.2 miles that traverses the Mt. Plymouth-Sorrento downtown, places an undue burden on our community. The 46 Bypass crosses 46 between Orange Avenue and Round Lake Road, just down the street from Round Lake Elementary. The idea of completing a</p>

beltway around Orlando has been lost in the lust for new development in NE Lake County. Please help me in opposing the 46 Bypass and request that the OOCEA abandon this concept. Please don't delay, only your comments can make a difference. Please fill out & send in the attached form or download a blank form at: <http://epass.oocesa.com/futureplans/projectsandstudies/westernconnectors.shtml> Thank you for taking time to change Mt. Plymouth-Sorrento's future. Cindy Poirier" The forms have standard text in them and are simply filled in with names and addresses. The standard text reads: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children and the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."(We have received 7 such forms to date; some without the top text from Cindy Poirier)

9/17/2006	3:12 PM	<p>"Sept. 17, 2006Cindy Poirier25116 Springhill AvenueMt. 8/7/2006	4:54 PM	<p>PIO responded to Cindy Poirier: "Hello Cindy,Various initial alignment alternatives have been removed from consideration based on engineering analysis, input from local governments and/or state agencies, environmentalists, property owners or other stakeholders or for combinations of any or all of the above. The alternative concepts for the connection at US 441 via SR 46 are largely unchanged from the initial alignment alternatives, though we did review a few other interchange concepts. Some of those remain and some have been eliminated based on City of Mount Dora input.The Wolf Branch Sink alternative was requested to be removed by the Lake County Water Authority. Regarding where the SR 46 Bypass drops down to connect to the Systems Interchange in Orange County, we still have six alternative concepts, each with two different alignments, for a total of 12 options. If there is a specific alternative in question, perhaps I could be of more help. Please let me know. Mary Brooks</p>
8/7/2006	2:01 PM	<p>Cindy Piorier emailed: "Ms. Brooks,I was curious about the new alignment of the Wekiva Parkway and how it connects to Hwy 441 in Lake county? Could you please inform me as to the facts surrounding why all the other options that existed in Orange county to</p>

connect the parkway to 441 and why they disappeared? I did try and look on the website but it does not give specifics. I did find that Mt. Dora had asked that the Wolfbranch sink area be removed from consideration but there were several other routes that I did not see an explanation for. Thank you for your time and attention to this request. Cindy Poirierspringhillcindy@earthlink.net

Date	Time	Regarding
8/8/2006	9:52 AM	Dr. James Quinn 407-302-4180 said he owns a horse ranch on 46. It's 142 acres surrounded by the Seminole State Forest. I noticed you're trying to do mitigation property. I'm not interested in selling, but perhaps interested in giving up right of development, maybe mitigation rights. From a habitat or wildlife standpoint, that would probably help. He's in Lake County, 1 mile west of the Wekiva River, ¼ mile from SR 46. He said the parcel looks like upside down L, next to Wekiva Pines subdivision, inside Seminole Forest. PIO said I'd forward his query to the ROW folks and have someone contact him or get back to him with a contact. He said please contact him at 407-321-4230 or email jquinn@nsfp.org. He asked have they made accommodations for bicycle rides to get across Wekiva at 46 and continue riding? PIO noted haven't gotten into any details on that, though the need to accommodate bikes and perhaps a trail have been extensively discussed. He said if you want to reduce car use and traffic in Fla., then we should be able to use bikes and some other mode of transportation. He said SC has lots of trails but most of them don't go where anyone works; they're just for recreation.--1002 a.m.

Notes		
Date	Time	Regarding
8/31/2006	6:20 PM	PIO responded to Michael Ratay email: "Hello Michael,The intent of the Wekiva Parkway is to replace SR 46 in Seminole and Lake Counties as much as possible. This would be the case with most of the alternatives, with a few exceptions in Lake County, and in Seminole County depending on where we decide to connect to I-4. In Seminole County at the river the parkway would take up the current SR 46 corridor, plus another 60-100' either to the north (as noted in the alternative concept you referenced) or to the south. At no time in Seminole County was the Parkway supposed to be entirely north of 46.I can tell you we are, based on some of the public comments we have received, looking at whether one-lane frontage roads, instead of the previous two-lane frontage roads, would work in the area from the river and to just past the Lower Wekiva Preserve. This would reduce the amount of Right of Way needed somewhat. The exact extent as to how much of a reduction, or even if the one-lane frontage road system could handle the anticipated traffic has yet to be determined.We cannot purchase any right of way until we at least have an approved preferred alignment alternative. That is expected when the study finishes in late spring 2007.I hope that addresses your issue. Please call or email with other questions or concerns.Mary Brooks
8/31/2006	6:09 PM	PIO checked Michael Ratay/Wekiva River Oaks Subdivision query re: lot 3477 with regard to north widening and ROW query.
8/31/2006	9:43 AM	Michael Ratay emailed: "Hello Mary, I live in the Wekiva River Oaks Subdivision and received your email from Virginia Poe. I live on lot 3477, when looking at the Seminole Co WP wFontage Rds North Widening.pdf file, which is pretty much consume by the current right of way. I always assumed the Parkway would be north of SR46. Are there any plans or possibilities of the Parkway shifting north, possibly due to the gas line. Also, do you know when the right of way purchasing will occur? Thank you Michael Ratay 407-405-1610

11/7/2006	12:04 PM	PIO returned call to Bernice 407-716-7685 re: SR 429 opening to I-4, she said didn't you

say at the meeting that it was opening last Friday? PIO said no, we said first week of December. PIO noted I just confirmed with the Turnpike that it will be open Dec. 9. She said she could have sworn we said it was opening last Friday, but her husband didn't think so. They had company coming and wanted to give them directions. PIO reiterated schedule from Turnpike, noted it's always been first week of December some time as far as I knew. She said okay and thanks for calling back.

11/7/2006	12:01 PM	PIO called Christa Deason / Turnpike said SR 429 dedication moved to Dec.8 at 2 p.m. and open to traffic Dec. 9. Last 5 miles toll free on the 9th and 10th. She said she just sent Mike Snyder an email with that info a few minutes ago.
11/7/2006	9:17 AM	Bernice Reedy(??) MSG was at meeting other night (Zellwood Station), believe you mentioned 429 was going directly to I-4 past Disney, trying to find out if it's true if it connects now. We have company coming on Saturday and rather than give them the wrong address I'd appreciate if you give a return call.407-716-7685 thanks so much.

Date Time Regarding  
4/27/2006 1:16 PM PIO got call from woman (didn't ID herself) 352-357-5192 asking how to find a map on where the 429 is going to connect to I-4? I've found info but no map. PIO asked if she was on the EA website now? She said no. PIO gave her web address and text links, noted on Wekiva Parkway page she needs to scroll down and she would see the text links for the initial alternatives maps. PIO noted we're in the process of narrowing down to the more viable alternatives, still having meetings with local government and state agency officials. I think we may have 9 more meetings to go. PIO noted we hope to have viables by end of May, and next public workshops will be in mid-August. She asked when we were looking to start the road? PIO noted we're in the very preliminary stages and the project is not fully funded. PIO noted approved alignment expected spring 2007, would still have to do final design and ROW acquisition, so construction maybe 2012-2015. PIO noted that's highly dependent on funding which is a challenge with rising construction costs and land values. She said oh I know, especially with so much construction going on in this area. PIO asked if she's on the mailing list? She said no. PIO noted I'm in the car so can't take her info, but gave her my email address and asked her to send to me. She said she would and thanks for the info, you've been very helpful.

Date	Time	Regarding
1/30/2006	12:52 PM	PIO worked on response incorporating info but noting alternatives being tweaked and changes likely, no decision yet on route, etc.Beverly RiversP.O. Box 606Plymouth, FL 32768RE: Receipt of Public Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear Beverly,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. None of the initial alignment alternatives directly affected your property at 3654 Paulette St. in Apopka. The closest was segment OC-4, which would have been about 960 feet east of your property. Please be advised, however, the study is still underway and changes are still being made.Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being revised or shifted, some removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits and other information are available and will be updated in March on the Expressway Authority website at www ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 1/27/2006	12:22 PM	Comment Form:Beverly P. Rivers3654 Paulette Street (P.O.Box 606)Plymouth, FL 32768I

have been a resident of 3654 Paulette Street for 27 years. I have raised my children here and have shared the security and serenity with my grandchildren as well. I, as a widow among other widows in the neighborhood, do not want to be subjected to moving from our (my) home, just because of saving the county money. This is a poor excuse for impacting families' lives when it could be avoided. I as a widow am in a fixed income, retiring early because of family issues. I would be devastated if I was FORCED to sell my property. I have worked 45 years along with my deceased husband to have what we have now. I will fight with my last breathe to protect what I have worked so hard for... We have had a gopher tortoise living on my property and my neighbors behind me to my knowledge for 15 years. This would disrupt his habitat. We also have bald eagles resting in several trees in the neighborhood. Bringing this expressway would bring people from all walks of life, more crime, more noise and would ruin what we have worked so hard for to avoid. Beverly P. Rivers

3/29/2006	9:59 AM	Pulled Roberson nursery name and address from OC Property Appraiser website.Tropical Cuttings, 5918 Plymouth Sorrento Road. Co-owner Juanette Roberson.	

3/29/2006	9:46 AM	Ricky Robertson 407-886-3339 has there been ... know there's an upcoming meeting? Told him next public workshops in July. He asked have they started buying property? There are so many rumors out here. I heard they'd bought several parcels of property. PIO noted we don't have an alignment yet, only in the PD&E Study phase. PIO noted only properties we can acquire at this point are the four large tracts the legislature mandated we try to get for conservation. PIO noted we'd gotten conservation easement on the former new garden coal property, now known as the Wekiva Mitigation Bank, but that's all so far. he said that's in Lake County, right? PIO noted that's correct; it's surrounded by Rock Springs Run.I own nursery on Plymouth-Sorrento and Ondich roads, on the corner. It kept me in limbo for 4-5 years, it's kind of been a hardship because I don't know whether to reinvest in my nursery, been a hard ship to figure it out. PIO went over funding challenges and overall schedule, reiterated we're very early in the process. He said he appreciated the info.PIO asked if he was on the mailing list? He said he was but hadn't gotten anything in a while. PIO noted we're working on the next newsletter to probably come out in June. He said okay, he can wait until July to figure things out, that's not too far away now.--954 a m.

8/2/2006 11:36 AM Attended public workshop on 7/26/06. Submitted comment: "The route that ties into 417 at I-4 will make my home a noisy, polluted place to live. I'll have to look out my kitchen window at cars going by (ugly). This will devalue my home. Vibrations from construction could do structural damage to my home. I won't be happy with this route. I'm going to suggest to my neighborhood association that we should consider hiring a property attorney."

Regarding  
PIO called Joe and Patsy Roberts to relay info 407-328-1560, left MSG that their slanted rectangular parcel on Wekiva Park Drive is several parcels north of the blue alternative alignment in that location. PIO noted I was able to determine this by enlarging the map we'd discussed earlier to about 200%. PIO noted that alternatives are being added and removed on an almost daily basis, so they need to stay in touch and keep checking the maps on the website, but at this point they're in the clear. Left my number if they need to call me back.

8/21/2006 9:42 AM "Aug. 21, 2006 Patricia & Jo Roberts, Jr. 132 Wekiva Park Road Sanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Patricia & Jo, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/7/2006 1:19 PM Attended public workshop on 7/25/06.

7/31/2006 11:31 AM Attended public workshop on 7/25/06. Submitted comment: "Excellent work! Please also consider the construction of the bridge over the Wekiva River to make it as quiet as possible. The existing bridge is very noisy and we hope new construction techniques will offer an improvement. The new bridge will probably also be higher so the buffering effect of the trees will be less allowing the sound of traffic to carry much further. Thank you for all of the effort and thought that has obviously been put into this project."

Date Time Regarding  
8/9/2006 8:37 AM Attended public workshop on 7/26/06.

Contact Notes Candy Robey Hacienda Hill HOA

Date Time Regarding  
10/9/2006 5:09 PM PIO called back Candy Robey 30947 Vista View, H 352-735-4780, left MSG on home number that potential impact if south widening of SR 46 selected in her area. Told her she's welcome to call me and I will also call her cell. PIO also called cell number c 352-455-4542 PIO noted two SR 46 alternatives being considered for her area, there would be some impact if south widening selected. She said we were planning on moving when son graduated, already been doing a lot of work on the house. She said the satellite we have looks like easement or whatever comes right up to our house. We're already pretty close to SR 46. PIO noted status of study, hope to draft preferred alignment alternative by Dec. or Jan., further government and agency review and then public hearings in March 2007. She said they didn't go to workshops and didn't receive any mailings. PIO said I'd add them to the project database, confirmed their info. She said that would be great, they will wait to get something from me, maybe around the end of the year. Candy Robey (cq) & Glenn porter, 30947 vista view, mount Dora 32757 email address glennporter@earthlink.net --518 p.m.

10/9/2006 4:39 PM PIO worked on Candy Robey query 30947 vista view, 1 mile east from 441 on SR 46 in Mount Dora. H 352-735-4780, c 352-455-4542. LCPA shows this owned by Glenn Porter in Hacienda Hill subdivision with north property line along SR 46. Hacienda Hill is just west of Top of the Hill. Property is identified on the LCW SR 46 alternatives as parcel 2130. Potential impact if south widening (alt. 2?) is selected.

10/9/2006 1:54 PM Candy Robey called and left MSG I called Thursday and you were in a conference. We're over on 46. I'm going to leave the address - you told me to do that - we're at 30947 vista view, 1 mile east from 441 on SR 46 in Mount Dora. H 352-735-4780, c 352-455-4542 if you could give me a call back I'd appreciate it. Thanks.

10/6/2006 11:22 AM PIO returned call to Sandy ?? on SR 46 352-735-4780 h, 352-455-4532 c, left MSG detailed MSG on home number with my number and email address, asked that she get me property address and specific questions, noted I'm at a conference and in and out of meetings but will get back to her. PIO also called cell number, also left detailed MSG requesting address and leaving number and email address.--1127 a.m.

10/5/2006 3:02 PM Sandy ?? h 352-735-4780, c 352-455-4532, called and left MSG I live on SR 46. We were just concerned about some satellite photos we had seen about the western connector, 429

or whatever it is. Please call as soon you can."

2/6/2006	2:28 PM	Regarding
		PIO worked on comment form responses: Robert Kohl, Randy Robinson, Beth Emmons researched property - form gives address as 5312, but property appraiser lists address and records at 5322 Effie Dr.; it's parcel 2247 on OC concept, SW of Effie & Paulette, approx. 1500' west of OC-4), Pasert Khamphanh (4th parcel east of Effie north side Paulette, possibly parcel 2465, but concept lot line doesn't match OC property appraiser map), Mike & Pamela King (NE end of Paulette St., parcel 2463 at minimum would abut east side of OC4; form lists residence address as 3412 Paulette; OC property appraiser lists mailing address as 3612 Paulette) Copied response letters for file and CH2M Hill and sent.--416 p m.
1/30/2006	2:17 PM	PIO drafted response to Ronola Robinson: "Ronola Robinson 3412 Ondich RoadApopka, FL 32712RE: Receipt of Public Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear Ronola,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. The property at 3412 Ondich Road would have been partially affected by initial alignment alternative OC-9, or significantly affected by alternative segment OC-10, if either were chosen. Please be advised, however, the study is still underway and changes are still being made.Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being revised or shifted, some removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits and other information are available and will be updated in March on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. "--226 p.m.
1/30/2006	2:10 PM	PIO located Ronola (CQ per form & return address on envelope) Robinson property at 3412 Ondich Rd., parcel 2678 (or possibly 2676?) between Smith Lake/Lake Chaudoin and Plymouth Sorrento Road. Property would be hit partially by OC-9 or entirely by OC-10, if either was chosen.
1/27/2006	12:40 PM	Comment Form:Randy Robinson3412 Ondich RoadApopka, FL 32712Don't kill our scrub jays!

12/5/2006	4:04 PM	Finished Rolf letter and sent with brochure. Copied letter for files.

12/5/2006	3:30 PM	PIO worked on cover letter for Debbie Rolf FDOT ROW brochure.
11/30/2006	11:36 AM	PIO returned Debbie Rolf's call. She said she's real estate agent, have folks who feel they're in the path, sitting on the bull's eye. Want the latest info. Have we narrowed it down yet? PIO noted no, shooting for January for draft recommendation, noted meeting next week could update that schedule, but that's what we've been shooting for. She asked how long before construction? PIO went over PD&E and overall schedule, noted depends on funding availability. She asked once it's known property will be taken by eminent domain, what's the process. Are there appraisers brought in? is it based on market value, is there a formula? She noted her clients were in SC near I-4. PIO noted FDOT handling Lake and Seminole counties and have a ROW booklet. PIO noted it's very hectic right now, but will put her list to receive that. She said send to her Debbie Rolf, send ROW booklet to 2520 Cara Lynn Way, Longwood 32779. PIO noted if she doesn't get it in 4-5 days to call me back because it's very hectic right now.
11/30/2006	11:09 AM	Debbie Rolf MSG calling for latest scoop on Wekiva Parkway, call my cell 407-782-2088 thanks so much. 407-788-6640

7/31/2006	1:14 PM	Attended public workshop on 7/25/06. Submitted comment: "I appreciate the presentations that were given during the workshop as they were very clear to understand. However, I am opposed to the alternative presented connecting 417 to SR 46. As a homeowner in the Tall Trees subdivision, I was immediately drawn to the neighborhood for its peaceful quality as an ideal environment to raise a family. The 417 alternative is completely destructively to my community. It also segregates a group of churches and schools along Orange Blvd. that make up a large part of the community. Alternative routes that connect 46 to I-4 were presented that have much less impact on the surrounding neighborhoods. I've not heard compelling..."

Brooks--401 p.m.

8/24/2006	3:18 PM	Dave/Ch2M emailed: "All of these were mailed today. (included copies of full size map transmittal letters for Ed Meixsell, Lionel Rubio (Overall Project Layout - Viable Alternatives , James Grady and Dean Fritchen)
8/20/2006	4:23 PM	PIO emailed Lionel Rubio/attorney property owner list for study area as requested (as per Bob Mallet direction at Aug. 1 workshop): "Hello Lionel,I apologize for the delay in getting back to you regarding your request for the property owners' list for the Wekiva Parkway study area. We have been inundated with requests for maps and other project information since the recent public workshops. Please find attached the electronic files for the property owners in the study area. Please be advised owners are buying and selling these properties all the time, so some changes in ownership from what you see here are likely. Mary Brooks
7/31/2006	4:25 PM	PIO called Lionel Rubio/ Winderweedle, Haines, Ward & Woodman, P.A., 407-246-8663, what I was looking, trying to get an ownership list, of potentially affected property owners PIO noted he may have to file a FOIA, but I'll check and see. He said along those lines, can you send any other info you may have with re: to ... you had mentioned there may be more maps soon...? PIO noted yes, just heard the guys hope to get the workshop maps on the EA website within a week. He asked and you'll be able to ... Let me know the procedure? PIO said I'd get back to him. He said email info to lrubio@whww.com
7/28/2006	12:57 PM	PIO returned call to Lionel Rubio 407-246-8663, I'd like to get a copy of the different ROW maps. PIO noted we have 100 boards, which was he looking for? He asked if I had a list? PIO said no, but we plan to convert the meeting exhibits to PDF's and post them on the website after the last workshop, but it will take some time to convert those files. He said then he'll wait and go to the Aug. 1 meeting first and then call me if he still has any questions. He said thanks for returning the call.
7/26/2006	11:54 AM	Lionel Rubio called and left MSG I was calling to inquire regarding the Wekiva Parkway project. If you could give me a call407-246-8663 thank you.

Date Time Regarding  
7/31/2006 2:27 PM Attended public workshop on 7/25/06. Submitted comment: "After reviewing the route  
alternates for the connection of the beltway running along SR 46 and connecting to I-4, it  
seems the most efficient and least impacting solution is the [illegible]-angular connection  
directly to the existing beltway where it currently connects at I-4. Crossing Orange  
Boulevard and International Parkway."

Date Time Regarding  
8/25/2006 4:53 PM "Aug. 25, 2006 Ralph & Millie Sanjurjo 6254 Bordeaux Cir. Sanford, FL 32771 RE: Response  
to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment  
Alternatives Dear Ralph & Millie, Thank you for submitting a public comment form for the  
Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your  
time and concerns. Your comments will be reviewed and evaluated along with the more  
than 450 other public comment forms received, as well as input from local governments  
and state agencies. More than 1,200 people attended the recent public workshops.  
Currently we are evaluating the public comments - many of which represent competing  
interests - as well as local government and state agency feedback, and continuing the  
engineering analysis with regard to the viable alignment alternatives. That information will  
be used to draft a preferred alternative by the end of this year. That draft preferred  
alternative also must undergo government review and revision before being presented at  
formal public hearings in February or March 2007. Following the hearings the preferred  
alternative must be approved by the Expressway Authority, Florida Department of  
Transportation, Seminole County Expressway Authority and other state and federal entities  
The PD&E study is expected to finish with an approved alternative in spring 2007. All of  
the latest public workshop exhibits are posted on the Expressway Authority website at  
www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button.  
On the home page under "Construction Updates" click on the text link for the "Western  
Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text  
link for the "Viable alternatives workshops" maps. I encourage you to check the website  
periodically for updates, or to contact me with questions or concerns at © 407-702-8375,  
F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151  
University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued  
involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

Date	Time	Regarding	
11/27/2006	10:33 AM	PIO returned call to Chris Santullo/ Exit Real Estate Results 321-299-4359, PIO walked woman answering phone through website to FTP site with maps. She was very thankful for the assistance.	
11/21/2006	3:50 PM	Chris ??Santullo/ Exit Real Estate Results MSG trying to find map that I could print of Wekiva Parkway SR 46 bypass is being talked about, which neighborhoods will be affected Currently looking for land for some clients and they want to know where the project is planned and they don't end up buying something that could be nearby. Call me back and let me know if there is a website or an attachment that can be downloaded or where I can get a printable map of where this is supposed to be I'd appreciate it. 321-299-4359 I am on website that has info but there is no readable map that you can see.	

Contact	Notes	Maureen Sapp
Date	Time	Regarding
9/14/2006	10:28 AM	Maureen Sapp 407-341-7350 called, said they told her at work that I'd called. She's in Sanibel Island and wanted to know the latest. PIO noted any modifications on Kelly Park at this stage would not extend as far east as her property, would stop at her neighbor's property to the left or west. PIO noted that's if the Kelly Park IC is chosen, and we haven't made that decision yet. She asked when would we know? PIO noted we're shooting for a preferred alignment alternative to be drafted end of this year. She said she missed the last meeting; will we be having any more? PIO said yes, next public hearings shooting for March. She said and you will send out a notice like before? PIO noted that's correct, and will also be posting updated info on the website as soon as things slow down. She said well okay and thanks for the info.--1034 a.m.
9/14/2006	10:05 AM	PIO returned call to Maureen Sapp (407) 843-7171 (southern trucks?); Debbie said she was out of town this week. PIO left MSG with Debbie, who said she would make sure Maureen got it.
9/6/2006	10:01 AM	Summer/QCA tried to call her back at work but could not find her in the directory.
9/6/2006	9:46 AM	Maureen Sapp, Kelly Park Road Phone: (407) 843-7107 Called and left MSG I have a place on Kelly Park Road and I missed your July meeting and would certainly like to talk to you. My number at work is 407-843-7170.

3/1/2006	4:55 PM	PIO returned call to Alex Sarano/Hechtel Engineering 386-804-1069, left MSG to call me	

back and my number again.

3/1/2006 11:16 AM Alex Sarano/Hechtel Engineering left MSG just spoke with Pam Bentley at EA and she gave me your name and number 386-804-1069 and she said you might be able provide me with a little more info.

Contact	Robert Sargent	Orlando Sentinel - Lake County
Notes		
Date	Time	Regarding
2/15/2006	7:01 PM	PIO returned call to Robert Sargent, left MSG apologizing that between meetings this afternoon and trying to get cell fixed at Nextel service center, I just got his MSG. PIO noted if he still needs me to call back either phone number and I promise to pull MSG's and call him back.
2/15/2006	2:43 PM	Robert Sargent/Orlando sentinel 352-742-5909 give me a call when you get this.
2/14/2006	2:41 PM	PIO called Robert Sargent/Lake County Sentinel 352 742-5909, doing story kind of spinning off little info we got from fish and wildlife that bear road kills last year hit record high, 139 in state, lot of that happens in Ocala forest and Wekiva. Trying to look at ways transportation planners are trying to incorporate features into the roadways, to soften impacts on wildlife. Few examples I'm throwing in are widening on of S.R. 40, i4 in Volusia 4-mile segment includes two underpasses and an over pass. Two of our wildlife overpasses are on 46 in lake county, one built years ago and recently. Obviously idea of Wekiva Parkway. PIO noted goal is to have as much elevated as possible to allow free flowing wildlife, particularly through environmentally sensitive area. He asked how many crossings are planned? PIO noted don't have alignment yet or design details to be able to say exactly where will be elevated vs. at grade yet. PIO asked if he'd seen the alternatives maps? Timeline? Gave PD&E study timeframe, recapped public workshops and working through public comment and government feedback to tweak, remove or add alternatives to bring forward for further consideration. Noted should have approved alternative by March 2007, and some very preliminary design info in terms of where bridges might go, etc. As far as public input, have the environmentalists been very involved in the process? PIO noted yes, not only do they attend meetings and submit comment, but many of them, along with environmental agency reps are on the EAC for the project and also have opportunity there to give feedback. He asked if a separate study was being done about effect of roadway on wildlife specifically? PIO noted that's all part of the PD&E, we have to look at host of environmental criteria including wildlife habitat, water quality, wetland impacts, etc. PIO also noted conservation land acquisition component of this project. PIO noted he might hear some outrage from some environmentalists about one of the alternatives that hit Rock Springs run. PIO explained those were just initial alternatives that ha to be looked at, and we're fully aware some would not make it past the first round but you have to look at multiple alternatives. PIO noted we're very sensitive to the concerns of environmentalists and important to have their support for the project. Noted criteria in WPPA; makes this an unusual road project to say the least. Running story for weekend, Wekiva Parkway just one of several we're throwing in about roadway where because of attention put on wildlife and new roadways going in these areas, transportation planners looking at doing more than what we did 10 years ago, more of the roads I-4 has more details, and S.R. 40 which is PD&E through Ocala forest. Bear statistics and records set. Probably will focus on the other projects since so early in process on this one, but it bears mentioning. Robert should be one to get updates RSargent@orlandosentinel.com 1898 E. Burleigh Blvd., Tavares, 32778 can put him on project update list.--3 p.m

Contact	Stan Sarnowski	Colliers Arnold
Notes		
Date	Time	Regarding
8/21/2006	4:36 PM	Stan Sarnowski returned my call, said he wanted to know where the connections were going to be for the 429 extension? PIO confirmed he was referring to Wekiva Parkway? He said yes. PIO asked if he meant interchanges? He said how are you going to get there

from SR 46? PIO noted in most locations the parkway will replace 46, except for example where it drops down around Mt. Plymouth and Sorrento communities. He asked for help to find the maps on website. PIO walked him through. He asked if the one for Seminole County was on here? PIO noted they are all on there by county and by various alternatives. He flipped through the maps, asked about SR 46 alt. 1 and 2. PIO noted those were different configurations for the 46 IC if Wekiva Parkway goes all the way to I-4. PIO noted both of those would wipe out a considerable amount of existing commercial development already at the I-4 interchange. He asked if he could be on the emailing list?, PIO took all of his contact info: Colliers Arnold, 622 E. Washington Street, Ste. 300, Orlando 32801, email ssarnowski@colliersarnold.com PIO noted next bit of info going out will be toward end of the year when we draft a preferred alternative, start making some selections on some of these alternatives. He asked about the map further down on the web page. PIO noted that's an older map an that I would have the webmaster remove it. He said so the ones here are the latest? PIO noted correct, there's from the recent public workshops a couple of weeks ago. He said okay, he'd look at the maps and find what he needed. PIO said if he has any questions call me back. He said thanks.--445 p.m.

8/21/2006	4:08 PM	PIO returned call to Stan/Colliers Arnold. Receptionist said he left for a conference. PIO left MSG on voicemail returning his call, asked him to call me back and also noted public workshop maps are on the EA website, left address. Told him to call me if he needed help finding the maps.
8/21/2006	11:00 AM	Stan Sarnowski/Colliers Arnold in Orlando called and left MSG I have question about 429 project you're working on. If you can give me a call back when you get in I'd appreciate it Couple quick questions I have for you that I'm sure are easily answered. Give me a call and let me know when you get in 407-843-1723. Thanks

Contact	Loretta Satterthwaite	Orange Audubon Society
Notes		
Date	Time	Regarding
8/17/2006	12:28 PM	Submitted letter dated 7/25/06. "Dear Mr. Snyder: Orange Audubon Society (OAS) has reviewed the recent alignment and interchange proposals released by Orlando-Orange County Expressway Authority (OOCEA) during the July 7th Environmental Advisory Committee (EAC) meeting. We commend you on the improvements that you have made since the meeting with the EAC last year. As part of the Wekiva Coalition, we fully support the letter that they have sent to you regarding the Wekiva Parkway. However, we would like to add the following additional comments. Interchanges within Northwest Orange County - Pursuant to the recommendations made by the Wekiva River Basin Coordinating Committee that the Wekiva Parkway address regional transportation needs without promoting urban sprawl, OAS proposes that the Wekiva Parkway accommodate only the Ponkan Road interchange within northwest Orange County north of US441. OAS supports locating the proposed interchange at Ponkan Road because of its proximity to the established urban area of north Apopka and because of its more direct access to US 441. Further, we maintain that an interchange located at Kelly Park Road wiould serve to encourage future high-intensity development that would permanently impact the fragile Wekiva Springshed, and we request removal of this proposed interchange from consideration by OOCEA. 'Scrub Jay' Property West of Plymouth-Sorrento Road in NW Orange County and extending into Lake County - OAS feels that this property in its entirety should be impacted as little as possible and purchased if at all possible (Orange County may be a willing partner since it has beenlisted on their environmentally sensitive lands acquisition list for many years). There are at least three (3) important reasons for this: 1) Florida Scrub Jays (Aphelocoma coerulescens coerulescens) Live on this property and they are listed as Threatened Species by both the Federal and State agencies. 2) Scrub habitat may be the most endangered type of habitat in all of Florida and this acreage is of a significant size that it would allow proper management (i.e. controlled burns) as a scrub and as a habitat for the Florida Scrub Jay, Gopher Tortoises (another listed species) and other scrub inhabitants. 3) The predominant soil in this area is St. Lucie fine sand, which has a high water recharge capacity. this characteristic is very important to the Floridan aquifer from which 90% of Floridians get their drinking water. Please consider these comments as you finalize the alignments of the Parkway and acquisitions of land

pursuant to it. Thank you, in advance, for OOCEA's attention to our concerns."

8/9/2006	2:27 PM	Attended public workshop on 8/1/06.
8/8/2006	12:04 PM	Attended public workshop on 7/26/06. Alternate e-mail address is lns-oas@att.net
8/7/2006	11:06 AM	Attended public workshop on 8/1/06. Submitted comment: "(1) Orange County: Priority should be given to preserving the scrub habitat to the west of Plymouth-Sorrento Road. This is the largest piece of this habitat type in Orange County and it is large enough to be properly managed. The alternative that allows the least impact to this and the large nurseries in NW Orange County is #3. (2) The interchange with the least sprawl-inducement and therefore to be preferred is the Ponkan Interchange. (3) Alternative #5 or #2 in the E Lake County region would be preferred because of the least potential for impact in the public lanes region of SR 46. Thanks for the chance to comment."
3/20/2006	10:04 AM	Brian/CH2M Hill copied PIO on response to Loretta Satterwaite/Orange Audubon Society email: "Dear Loretta - We have not set a date for the next EAC meeting as of yet. You are still on my mailing list and will receive a notice when it is scheduled. We are looking at dates in late April or May. I believe there is a Maitland Boulevard EAG meeting scheduled in the near future which you may be speaking about. I've copied Mary Brooks, the public involvement officer on the project, just in case.Regards Brian____From: Satterthwaite,Loretta N [mailto:lorettan@ufl.edu] Sent: Monday, March 20, 2006 10:00 AMTo: Manwaring, Brian/ORLSubject: Environmental Advisory Group Hi Brian,I was informed that an EAG meeting has been scheduled recently. 7/24/2006	9:31 AM	PIO called back Glen Schneck 321-207-3569 to relay info, noted 3515 was a parcel away, etc. he said what about the property to the east, was also maybe interested in that? PIO noted that one could see some impact on the eastern edge as things stand now, depending on alternative chosen. PIO noted we also still have to determine retention pond locations and other details, and that since we're still in study phase things are subject to change, but 3515 is in the clear for the time being. He said when would we know for sure? PIO gave study timeframe and remaining process. He said if something changed and the 3515 were affected in the end, what would happen? PIO noted the EA has funds for design and some of ROW acquisition, so final design would proceed, details be nailed down and if his property were affected he'd be contacted and ROW negotiation process would begin. He said okay, thanks for the info. PIO noted we'd have additional info at the public workshops, could he attend? Eh said he's really busy this week, that's why he called. PIO noted exhibits also will be posed on the website after meetings, FYI. He said thanks of the info.
7/24/2006	8:35 AM	Glenn A. Schneck, x3569 <a href="mailto:gaschneck@kirchman.com">gaschneck@kirchman.com</a> emailed: "Mary, I currently have a contract to purchase a home and 2.5 acres of land in Apopka at 3515 Paulette Street. It is my understanding that some of my neighbors will be losing their house with the new extension of the 429. I just wanted to verify what impact this will have on the property that I am going to purchase before I close on the house. Please let me know what, if any, impact I would expect, thanks! Scot Schramkowski responded to PIO email: Thank you for the information.

9/28/2006 4:02 PM PIO responded to Scot Schramkowski: "Hello Scot, We have not made a recommendation yet on the Orange County interchange location. We plan to draft a preferred alignment alternative, including interchange recommendations, in Dec. or Jan. The majority of the comments we have received -- including from the City of Apopka and Lake County officials -- seem to support the Kelly Park Road interchange. There is no reason you can't place your property on the market, regardless. It would seem only prudent to let potential buyers know about the pending project and possible impacts, as well as the overall schedule. Please keep in mind that we hope to finish the Project Development and Environment (PD&E) Study in late spring 2007 with an approved alignment alternative. From there we still have to go through final design (2-3 years), right of way acquisition (2-3 years) and then on to construction. However, this project is not fully funded, so at the earliest you would be looking at construction on the first section starting in 2012-2015. That schedule is highly tentative and subject to change based on the availability of funding. If the property is sold, and the Ponkan interchange were selected, that just means we would have to acquire the property from someone other than yourself. I hope that helps. Please call or email with other questions or concerns. Mary Brooks

9/28/2006	8:10 AM	<p>Scot Schramkowski emailed: "Good Morning, Sept 28, 2006 I am hoping you would be able to share any information that you may have on the two interchange potential. 1. Ponkan Rd. 2. Kelly Rd. Currently I would like to place our property on the market, however I would like to know whether the interchange for Ponkan Rd or Kelly Rd has been finalized. The Ponkan interchange would take our property and if so would I still be able to place my property on the market today. What are some of the legal issues? I have a possible job offer out of state, however it would be nice to know what has been decided for the interchange. A government official in Apopka has said that the Kelly Rd. is what is the most likely one. Please share any info you have. Thank you for your time. Scot Schramkowski 3001 Phils Lane Apopka, FL. 4078864635 snoopetski@hughes.net</p>
7/17/2006	12:36 PM	<p>PIO drafted response to Scott &amp; Mary Schramkowski comment form and emailed as requested: "July 17, 2006 Scott &amp; Mary Schramkowski 3001 Phils Lane Apopka, FL 32712 RE: Receipt of Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment Alternatives Dear Scott &amp; Mary, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the hundreds of other public comment forms, as well as input from local governments. I understand you will not be able to attend the upcoming public workshops. So, regarding your questions I am emailing the following information as requested: 1. Following approval of an alignment alternative at the conclusion of the PD&amp;E Study in spring 2007, the project would typically enter final design (which takes about two years), Right-of-way acquisition (again another two to three years) before getting into construction. However, as noted previously, this project is not fully funded so that schedule will be highly dependent on the availability of funding sources. At this time, construction is estimated to begin anywhere between 2010-2015. Again, that is highly subject to change - could be earlier or later than that - based on funding. 2. Relocation and other such details would be discussed during the Right of Way Acquisition process if a property is needed. For Right of Way Acquisition questions on the Orange County portion of this project, you may contact Deborah Keeter of PBS&amp;J at 407-647-7275. Please keep in mind we are quite early in the process to discuss specifics with regard to acquiring properties. 3. Again, any questions with regard to the property acquisition process should be referred to Ms. Keeter at the number above. Following the upcoming workshops, and based on subsequent public and government input and the viable alternatives analysis, a preferred alternative or alternatives will be selected. Public hearings are expected to be held in February 2007. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. After the workshops, all of the latest project exhibits will be posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks</p>
7/12/2006	1:27 PM	<p>PIO gave Wills &amp; Schramkowski comment forms, and Wills response to Melaina. Brian M. noted he had all the forms in a box, there are too many to put in a drawer.</p>
7/12/2006	8:30 AM	<p>PIO received faxed public comment form from Scott &amp; Mary Schramkowski: "7-12-06, 3001 Phils Lane, Apopka, FL 32712 Unable to attend meeting 7/25 due to work &amp; care of elderly member. We have several question (sic). First I realize that our input means little as to where the road goes. So our question (sic) are: 1. When PD&amp; Study finish in 2007 what is the chronological time frame when construction starts (sic all errors) 2. How long do we have once OEA acquires our property to relocate (sic all) 3. Does our land go for fair market value 4 Do you help in locating property for us as it is not by our choice to relocate Please email answer to <a href="mailto:snoopetski@hughes.net">snoopetski@hughes.net</a> thank you for your time."</p>

Contact	Gary Schroeder	
Notes		
Date	Time	Regarding
8/10/2006	3:15 PM	Attended public workshop on 8/1/06.
7/11/2006	3:01 PM	PIO returned call to Gary Schroeder 352-735-2902. PIO noted we had to make the map a little small to fit everything in the newsletter, but the map is available on the website and you can enlarge it as much as you like. PIO gave her the web address and text links. He asked where the alignment turns from north to east and you have two parallel running east, who far is that from 46? PIO said I'd need a location to tell as the distance varies. He said how far south are the alignments from 46 and 437. PIO had trouble opening map on website, had to log out and open map independently. While I was doing that, he asked tell me this are the alignments still in OC at that point? PIO said that's correct. He said that's what he needed to know. he said he'd seen a map before and it didn't look like it was going to affect them and he figured that was still the case. PIO said if he gave me a specific location I could research it for him for sure. He said that's fine, he's got the website address and he'll look it up if he needs to. Thanks for calling back. PIO asked if he was coming to the workshops? He said yes, he also attended the last one at Apopka h.s.
7/11/2006	2:33 PM	Gary Schroeder 352-735-2902 called and left MSG I received your mailout with respect to Wekiva Parkway and my question is the map is so tiny, there are no definitive landmarks I an use to try to ascertain where is my property is with respect to this planned roadway Question is as looking at mailout with the map at the bottom, the proposed 429 extension seems to go north for maybe halfway and then two parallel roads Proposed Two parallel roads going back to east. How far northernmost parallel road is from hwy 46 or is this at intersection of Hass and Ondich road? that would be helpful in trying to ascertain how close this is coming to our property. Appreciate your help.352-735-2902

Contact	Keith Schue	
Notes	The Nature Conservancy	
Date	Time	Regarding
11/6/2006	12:18 PM	Keith Schue/Nature Conservancy 407-682-4530 called and said I heard there was a meeting tomorrow? PIO noted only thing I'm aware of going on is a presentation before the SCEA. He said oh, maybe that was it. He asked for time? PIO noted it's scheduled for 4 p.m. but will start whenever they finish with BCC business, which starts at 130 p.m. he said that's right. He asked when were we going to be making a decision? PIO said probably January to draft a recommended alternative including IC locations. He said he thought it was going to be next month? PIO noted they were originally hoping that would be the case, but there are still a number of issues that have to be ironed out, alternatives being adjusted, meetings with community stakeholders and agencies. PIO noted once draft recommendation developed, has to be approved and then we're looking at maybe March for formal public hearings.He asked if Mark would be the best person to talk to about this? PIO noted Mark or Dave Lewis. He said he had a MSG in to Mark and hopefully he'd call him back, can you tell him to call me when you see him? PIO noted we're in different buildings, but I'm sure if he left a MSG for mark he'd get back to him. He said okay and thanks.--1226 p.m.
8/9/2006	9:44 AM	Attended public workshop on 7/26/06.
8/2/2006	9:25 AM	Sent e-mail to Mr. Snyder, OCEA and Mark Callahan, CH2M, on 7/27/06: "Dear Mr. Snyder and Mr. Callahan: The Wekiva Coalition has reviewed the revised set of alignment alternatives developed by CH2MHill for the Wekiva Parkway project. In addition, a number of our respective organizations attended the Orlando-Orange County Expressway Authority Environmental Advisory Committee meeting on July 7th. In our view, the current revisions represent a notable improvement to the preliminary concepts presented last year, and we appreciate the attention given to our earlier comments. However, we also recognize that the newly revised alignments reveal important design features not apparent in the previous iteration, and that the location and configuration of such features

affect how the project impacts and functions within the fragile Wekiva corridor. Please accept the following supplemental comments on behalf of the Wekiva Coalition, in addition to any other comments that may be provided by our constituent organizations. We look forward to working with the Expressway Authority, Florida Department of Transportation and CH2MHill to develop a preferred alternative that will have support of the environmental community.

**ACCESS TO WEKIVA PARKWAY FROM SR46** - The revised alignments properly locate the primary interchange with SR46 west of Rock Springs Run State Reserve inside the northern pasture of the Neighborhood Lakes property. Consistent with the statutory mandate that this property be acquired for conservation, we believe that the simple diamond interchange depicted in the revised alignments should be modified so that both east-bound traffic heading to Seminole County can enter the Parkway from SR46 and north-bound traffic from Orange County can exit the Parkway onto SR46 without an intersection located on the portion of Neighborhood Lakes next to Rock Springs Run State Reserve. This can be achieved with a flyover access ramp or similar structure. A simple diamond interchange requires that, at any given time, traffic in one direction or the other must come to a full stop at a signalized intersection on the preserve side of Neighborhood Lakes. From alignment renderings, it appears that the proposed configuration would promote development typical of a major intersection on land targeted for conservation next to Rock Springs Run State Reserve, and could even lead to extension of the resulting stub road farther south into the property. A flyover at the interchange would effectively preclude this, enhance regional transportation efficiency, improve safety by eliminating the potential for accidents at an unnecessary traffic intersection, and better protect the conservation corridor.

**ELIMINATION OF SR46 ADJACENT TO BRIDGED SEGMENTS OF WEKIVA PARKWAY** - In order to minimize obstruction to wildlife movement SR46 should be eliminated as a road for vehicular traffic adjacent to bridged segments of the Wekiva Parkway. The revised set of proposed alignments successfully achieves this within that portion of the Parkway to be bridged over the west BMK tract of Rock Springs Run State Reserve. However, in one of two conceptual alignments through the core of the basin, CH2MHill suggests retaining SR46 as part of a "split-diamond" slip ramp interchange.

In this configuration, local access would be provided to two private enclaves by pairs of ramps located approximately two miles apart. Since residents in both enclaves would be required to use the connecting segment of SR46 depending on the direction of travel, this segment of the existing roadbed could not be removed. Rather than this "split-diamond" approach, the Wekiva Coalition supports the alternative concept proposed by CH2MHill that utilizes two full-access local interchanges and eliminates the associated segment of SR46 adjacent to the Wekiva Parkway. It should be noted that based on alignment renderings, this full-access design is virtually identical to the "split-diamond" design, with exception of the additional narrow slip ramps. Furthermore, since at least an entire mile of roadway can be eliminated using the preferred full-access design, we do not anticipate that this solution will be significantly more expensive.

**IMPACT TO ROCK SPRINGS RUN STATE RESERVE** - The revised alignments depict three potential routes through the southern portion of the Neighborhood Lakes property within Orange County. The Wekiva Coalition recommends against the most eastern route that unnecessarily penetrates a portion of Rock Springs Run State Reserve. We support selection of the western alignment in order to minimize direct impacts to existing public lands, to establish a protective buffer, to retain the ability to perform controlled burns, and to protect as much land as possible for conservation east of the Wekiva Parkway and contiguous with Rock Springs Run State Reserve.

**REALIGNMENT OF CR46A** - An essential component of the Wekiva Parkway project involves the realignment of County Road 46A west of the wildlife conservation corridor. The Wekiva Coalition fully supports the route depicted by CH2MHill that relocates CR46A outside of public conservation land and connects with SR46 west of the Wekiva Parkway. This alignment preserves the integrity of Seminole State Forest, enhances wildlife movement by eliminating a segment of CR46A within the conservation corridor, maintains the ability to perform controlled burns, and appropriately addresses transportation objectives in the area.

**IMPACT TO LOWER WEKIVA RIVER STATE RESERVE** - The Wekiva Coalition recommends reevaluation of capacity needs for SR46 adjacent to the Wekiva Parkway within Seminole County. According to typical cross-sections for the Wekiva Parkway provided by CH2MHill, the Wekiva Parkway within Seminole County west of Orange Boulevard would be straddled by frontage roads

consisting of two west-bound travel lanes north of the Parkway and two east-bound travel lanes south of the Parkway. Since these frontage roads do not extend across the Wekiva River and all regional traffic between Seminole and Lake County will be carried on the Wekiva Parkway, it is not clear why the equivalent of a four-lane road is needed for remaining local traffic. We suggest that two single lane frontage roads or a single two-lane road on one side of the Wekiva Parkway may be acceptable for most or all of SR46 west of Orange Boulevard. By reducing the number of travel lanes and potentially modifying proposed buffer and sidewalk dimensions, we believe that it is possible to reduce the total right-of-way footprint, avoid relocating the natural gas pipeline farther north into Lower Wekiva River State Preserve and substantially reduce proposed impacts to public conservation lands. DESIGN OF STORMWATER RETENTION FACILITIES - CH2MHill has advised that public land will be required for stormwater retention facilities. Where feasible, the Wekiva Coalition encourages the purchase of additional underdeveloped property for this purpose instead. In particular, within Seminole County we question the appropriateness of constructing a stormwater retention pond within Lower Wekiva River State Preserve when nearby vacant land appears to be available north and south of SR46. Similarly, we question construction of a retention pond inside the BMK tract of Rock Springs Run State Reserve directly within the wildlife corridor spanned by the Wekiva Parkway. Where public lands can not be avoided, we ask that stormwater retention areas be carefully integrated into the corridor's landscape in order to enhance rather than inhibit the protection of habitat and ecosystem connectivity. INTERCHANGES WITHIN NORTHWEST ORANGE COUNTY - In order to address regional transportation needs without promoting urban sprawl, recommendations of the Wekiva River Basin Coordinating Committee specify that the Wekiva Parkway should be designed to accommodate only one interchange within Northwest Orange County north of US 441. CH2MHill has identified the potential location of interchanges at both Ponkan Road and Kelly Park Road. The Wekiva Coalition supports the proposed interchange at Ponkan Road since it is located in closer proximity to the established urban area of Apopka. We maintain that an interchange located farther north would encourage intense future development, inappropriate within sensitive underdeveloped portions of Wekiva Springshed. WILDLIFE CROSSING MEASURES - Our Wekiva Coalition commends CH2MHill and the Expressway Authority for proposing designs that bridge significant sections of the Wekiva Parkway corridor across the BMK and STS tracks of Rock Springs Run State Reserve and across the Wekiva River floodplain. Recognizing that the Wekiva Mitigation Bank property formerly known as New Garden Coal) is now designated as an environmental restoration site and will become increasingly important as habitat within the basin, we ask that consideration be given to additional wildlife underpass structures along the Wekiva River Parkway adjacent to this property. To prevent wildlife mortality, we recommend barrier fencing wherever possible along those portions of the Parkway that are not bridged. In conclusion, on behalf of each of our constituent organizations, the Wekiva Coalition would like to reiterate its appreciation to you for addressing many of the concerns that we raised last year. Our continued support for the Wekiva Parkway project relies upon your ongoing commitment to a transportation solution that is environmentally responsible and satisfies objectives as set forth in statute. We request that these additional comments receive your highest degree of attention as design components of the Wekiva Parkway are further refined.

8/1/2006 3:20 PM attended public workshop 7/25/06

Contact Notes Wilmar & Paulette Schultz

Date Time Regarding

9/17/2006 2:30 PM "Sept. 17, 2006 Wilmar & Paulette Schultz 3443 Paulette St. Apopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Wilmar & Paulette, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the 500 other forms received, as well as input from local governments and state agencies.

More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

8/24/2006	4:14 PM	Attended public workshop on 7/25/06 Comment submitted: " Although we are totally saddened by the tollway going through our subdivision, we understand that it is probably going to happen . We still urge you to move the road closer to Plymouth Sorrento Road in order to avoid putting the road the last 2 lots on paullette Street. If this is not going to happen then we strongley urge you to choose a route as far away from our lot line as possible thus impacting our lifestyles and our lovely rural setting at the end of our street as minimally as possible."
8/8/2006	2:36 PM	Attended public workshop on 7/26/06.
5/24/2006	1:03 PM	AMTo: 'Gatorknightz@aol.com' Subject: RE: SR 429-Wekiva Parkway PD&E Study Good morning, I'm not sure what "notification" you're referring to. Nothing has been mailed or otherwise sent recently to the property owners or other members of the public. The latest map was posted on the website within the last week or so, and apparently your friends either checked for updates - which I always encourage everyone to do -- and found the viable alignment alternatives link, or called me for an update (which anyone is also welcome to do anytime) and I let them know a new map was available. You are on the mailing list for the project newsletter and meeting notices. We are currently working on the next project newsletter, which we hope to get out in June. It will contain the information about the next public workshops and other developments. The next public workshops will likely be in mid-August (dates and locations not yet set), so the public meeting notices will probably go out in July. Property owners and other members of the public will be invited to review the latest information and provide their feedback at the workshops. The map that was recently posted is in no way final. This represents the remaining more viable alignment alternatives based on the approximately 500 public comment forms received, local government and state agency input and engineering analysis. The two colors for the alternatives have no meaning other than to distinguish the two routes from each other. These alternatives may continue to shift, be eliminated or perhaps even new ones added before we begin to work on the one or two preferred alternatives this fall. From there, we expect to have public hearings on the preferred alternative(s) in February 2007. The study is scheduled to conclude with an approved alternative in spring 2007. Currently, the Project Development and Environment (PD&E) Study team is working to refine the more viable alternatives, continue to develop traffic projections and begin looking at pond siting and other preliminary project details. Your concerns will be evaluated and entered into the public record for this project, along with the hundreds of others that we receive. Our challenge is to weigh the multitude of conflicting interests with regard to this project: you may want a route shifted to the east; someone else may want it shifted to the west, etc. All of these concerns have to be balanced with determining the best route that makes engineering and

financial sense, minimizes the impact to the community to the extent possible and protects wildlife and water resources in this environmentally sensitive area as much as possible. Again, you are on the mailing list for materials that will be sent out. And you are welcome to call or email me any time - as hundreds of folks have done - with questions or for updates. Keep an eye out for the next newsletter in June, and the public meeting notices in July. Mary Brooks

5/24/2006 11:08 AM

Bryan/OOCEA emailed PIO: "Mary-This came through our OOCEA web site e-mail address. Have you received any contact from Mr. and Mrs. Shultz? See the e-mail below. Thanks Bryan Douglas Manager of Communication & Marketing Orlando-Orange County Expressway Authority 525 South Magnolia Avenue Orlando, Florida 32801 407.316.3800 (p 407.316.3801 (f) douglasb@oocea.com>>> <Gatorknightz@aol.com> 5/17/2006 6:20 pm >>> We were sent the link to get a new map of the proposed routes for the extension of the 429 on 5/12, and again, from another friend, on 5/16. We have been told that these represent the final path alignments for the road. The map is dated May 1, 2006. It is a shame that you seem to have lost our address, phone number, and email address so that you could have kept us informed, as you promised to do if we filled out the proper forms and completed your survey about route choices. We are extremely disappointed with your route choice, and even more disappointed that you have chosen not to let us know before those unaffected would know the routes. Your route choices put the road as our immediate neighbor! In all fairness, we understand someone has to be affected, but you were not candid with us when you said we would be kept informed! Although you probably could not care less, we would like to make one more plea for our neighborhood. By moving the road to the east, you could totally avoid cutting off our road and having neighbors move. It would also only disturb the developer's property named Bridal Path, which you are cutting through anyway. You are ruining our quiet rural lifestyle, but this way you can do it with absolutely no compensation to us. If you move the road to the east of the Emory Smith Subdivision, we would not enjoy our current status, but at least no one could throw things on our house from the road as they drive through our sanctuary. It should make no difference to the owners of Bridal Path because we are sure you will give them a nice settlement. Please reconsider! Move the road away from Paulette St. so that we can live here relatively in peace. As it is, you have rendered our property totally valueless. We can not sell, because no one would want to buy. We get no compensation because your line is on our property line. Please let us know if these are the final two choices, how & when a final decision will be made, the exact date and time for any hearing on the alignment, what the two colors represent, exactly, which forks are preferred on the map, when you will decide where retention ponds and exit ramps go, and ANYTHING that relates to our home, our property, and the progression of the road. Please do not keep us in the dark anymore! We should have been among the first you notified, and, in fact, you have yet to really notify us of anything. Once again, our contact information is as follows: Paulette & Wilmar Schultz 3443 Paulette St. Apopka, FL 32712 407-886-6954 Gatorknightz@aol.com

5/18/2006 9:20 AM

PIO responded to Paulette & Wilmar Schultz: "Good morning, I'm not sure what "notification" you're referring to. Nothing has been mailed or otherwise sent recently to the property owners or other members of the public. 9/17/2006 3:34 PM

Regarding  
"Sept. 17, 2006 Ronald Schwab 30821 Buttercup Lane Mount Dora, FL 32757 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Ronald, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the 500 other forms received, as well as input from local governments and state agencies. More than 1

200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/7/2006	10:53 AM	Attended public workshop on 8/1/06. Submitted comment: "If you are widening Hwy 46 to six lanes, then it would be appreciated if you would install a traffic signal at the intersection of Hwy 46 and Buttercup Lane. We are unable to see traffic coming up the hill going east bound. It has caused several accidents recently."

8/1/2006	3:51 PM	attended public meeting 7/25/06. Submitted comment: "In order to create a 4-lane road with 2 access roads along existing SR 46 through Seminole County east of the Wekiva River, land must be acquired/utilized north or south of the existing road. Having studied the plans showing the 2 alternatives, and questioned representatives at the meeting, we would support the northern alternative as it impacts far fewer homeowners. We appreciate that this would mean utilizing some land belonging to the Lake Wekiva River State Preserve, which we often walk in. However, as the Preserve is over four and half thousand acres, and the road would utilize a strip of a couple of hundred feet at most, from the Wekiva River to the park entrance or its eastern boundary, there would be little impact on the park [illegible] and homeowners would be seriously impacted by the southern alternative, and many others would be negatively impacted because they would be nearer to the road than they are now. Again, we support the alternative which acquires land to the north of existing SR 46, east of the Wekiva River in Seminole County.
7/31/2006	1:05 PM	PIO returned call to Glennys Selina 407-688-0999, relayed I received form and can read her comments and noted she's in favor of widening to the north on 46. She said thank you for letting me know you received it. You know how it is with faxes some times; I thought if you couldn't read it I would just mail it in. And I appreciated the workshop last week; there were a lot of people there to answer our questions. PIO thanked her, glad she found it helpful and thanks for submitting her comments, they were very well done. She said thanks for calling back.
7/31/2006	9:26 AM	Glennys Selina called and left MSG that I just faxed a comment form to your attention. I just wanted to know if it was received and if it was legible. Please call me at 407-688-0999 thank you.
7/31/2006	9:16 AM	PIO received faxed comment form from Glennys Selina.

Date	Time	Regarding
7/31/2006	12:23 PM	Attended public workshop on 7/25/06. Submitted comment: "Based on the maps, the 417 interchange would be the best alternative. There is an existing interchange and traffic flow from east to west would be steady. The I-4 connect faces drain to drive I-4 to connect w/ 417, I-4 bad enough, too much traffic and accidents. Plus it would face the fire station at I-4 and 46 to relocate, how long will the area be out of service due to that move. The I417 interchange would be the best solution."

8/15/2006	4:54 PM	PIO responded to Terri Setje: "Wow, that's weird. I've gotten numerous messages in the last couple of days, but nothing from you. I certainly apologize for any technical glitches! The advantage of Kinko's is you can get the map made any size you want, whereas we only do the 11"x17" size to distribute. Let me know."
8/15/2006	4:27 PM	Terri Setje responded to PIO email: "Monday afternoon was my first message and Tuesday around lunch was the 2nd. I'm not sure which map it is though the Summer 2006 publication that has the map at the bottom of page 1 appears to be what I need. Let me see if Kinko's can print it for me. T
8/15/2006	4:10 PM	PIO responded to Teri Setje/Crown Capital Group: "Hello Terri, I don't recall getting a voicemail from you; when did you leave a message? We're experiencing a high volume of calls, understandably, but I'm getting back to anyone who leaves a message. We have to produce hard copies of the maps; we don't have a cache of them stored. If your printer is giving you trouble, you can either download the file in question and have Kinko's or Office Max print it to whatever size you desire, or you can email me which map(s) you're looking for and I can add you to the list of folks to get 11"x17" hard copies. We have a significant number of these requests and it will take some time to get back to everyone. Let me know what you decide. Mary Brooks
8/15/2006	3:31 PM	Terri Setje emailed: "Mary, I've made multiple attempts to contact you by phone. I downloaded the PDF file from the internet regarding proposed routes for the 429 connection to SR46. Is there a way I can stop in to one of Expressway offices and pick up

some materials with this information as the PDF file is not printing clearly or in color and I need to be absolutely sure where the proposed ramp is coming in on 441 in the Plymouth area near Hermit Smith Road? Please let me know the quickest way for me to get this information. Thank you TerriTheresa N. Date	Time	Regarding
10/30/2006	8:48 PM	PIO responded to Patti Sholar email: "Hello Patti,I am back from vacation and weeding

through all of my emails. When you're at a computer next, call me so I can walk you through finding the maps that you need. Basically, you go to the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. All of the maps from the summer public workshops are there. Look for the Orange County Interchange Alternatives for Kelly Park and Ponkan Roads. We are to only select one interchange location in Orange County. The idea is for the Wekiva Parkway to parallel Plymouth Sorrento Road in this area, not to replace it. I hope this helps. Please feel free to call or email with other questions or concerns. Mary Brooks

10/26/2006	9:19 AM	Danielle/QCA responded to Patti Sholar email: "Good morning, Ms. Sholar, My name is Danielle Fitts and I am representing Mary Brooks this week as she is on vacation. Ms. Brooks will return on Monday, October 30. I will inquire as to whether or not any current maps highlight the areas you have specified. If I am unable to locate one, I will be sure to give your information to Ms. Brooks so that she can contact you directly upon her return. Thank you, Danielle Fitts Public Information Officer Representing Mary Brooks"
10/25/2006	1:28 PM	Patti Sholar emailed: "Ms. Brooks: Is there a map available yet showing the location of the connector road projected to run along Plymouth-Sorrento Rd. in Apopka to SR 46? I saw on your website a map with an area that is shaded in green, however, I am not clear if it is to run alongside of Plymouth Sorrento Rd. or replace it? 8/28/2006	9:07 AM	"Aug. 28, 2006 Jennifer & Lee Shollenberger 2087 Haas Road Apopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Jennifer & Lee, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Orange County has directed us not to affect the properties purchased through the Green Place Program with this project. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> , or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

Date 8/2/2006 Time 11:47 AM Regarding  
Attended public workshop on 7/26/06. Submitted comment: "I am very concerned about these proposed routes. When Orange County has already purchased properties to the north of Haas Road. These roads could be shifted into these properties and avoid taking homes and businesses. I could be threaded through several of the large undeveloped properties i.e. 240 + acres. This would provide large buffer and areas that can remain undeveloped and natural for recharge. There are many like myslef who have chosen to live in low density areas in agricultural environments."

Contact Notes Geraldine & Ralph Siletta

Date 6/9/2006 Time 6:34 PM Regarding  
PIO prepared info for Siletta and faxed. "June 9, 2006Geraldine Siletta3212 S. Gavilan LaneLas Vegas, NV 89122RE: Request for information on the Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Geraldine,I received your two faxes today asking for an update on the Wekiva Parkway Project Development and Environment (PD&E) Study, in particular with regard to your parcels no. 21-19-29-300-0030-0000 and 21-19-29-300-003B-0000 in Seminole County. It's my understanding these two properties are on the northeast side of the Wekiva River at the State Road 46 bridge. As the alignment alternatives in this area of Seminole County coincide with the location of the SR 46 bridge, there are potential impacts to at least one, and possibly both of your properties in this location from the new bridge that would have to be built for the Wekiva Parkway. The extent of the impact will depend on the alternative decided upon, as well as the details resulting from the subsequent final design phase of this project.Obviously, there are many questions that cannot be answered and details that are not yet available at this point. Also, as you can imagine, The Florida Department of Transportation and the Orlando-Orange County Expressway Authority face considerable challenges in trying to address the conflicting interests of various governments, property owners, business operators, environmentalists and other community stakeholders in developing this much-needed project.Currently as part of this study, we are developing traffic projections and other preliminary details for the viable alignment alternatives in preparation for the next public workshops to begin in late July. You are on the list to receive the project newsletter, now in production, as well as public meeting notices.Based on public and government input and analysis of the viable alternatives, one or two preferred alternative s) would be developed and presented at public hearings in February 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. Project exhibits and other information are available on the Expressway Authority website at www ExpresswayAuthority.com. On the entry page click the button for "Corporate Site." On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text links for the project files and other information.I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via

email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks  
Public Information Officer  
S.R. 414-Maitland Blvd. Extension Project & S.R. 429-Wekiva Parkway PD&E Study"

6/9/2006	6:04 PM	PIO researched Siletta property query on SCPA. The two parcels are on northeast side of Wekiva River, the first and second parcels north side of the bridge. Potential impacts to at least parcel immediately adjacent to bridge, if not the second parcel also.
6/9/2006	5:50 PM	Geraldine Siletta refaxed property inquiry as requested by PIO.
6/9/2006	1:04 PM	PIO called Ralph & Gerri Siletta to let them know I received fax but didn't come through clearly, hard to tell on some of the numbers. Left MSG asking them to call me confirmation parcel numbers and address or try faxing again. Left my phone and fax numbers.
6/9/2006	9:41 AM	Ralph & Gerri Siletta f 702-456-0958 faxed note dated June 8, 2006 To: public information workshop, Wekiva Parkway PD&E Study, regard to: Geraldine Siletta, 3212 S. Gavilan Lane Las Vegas, NV 89122 Property: Wekiva Parkway, Seminole County parcel, no.s 21-19-29-300-0030-0000, 21-19-29-300-0036?-0000 ATTN: Mary Brooks, public involvement coordinator Would you please bring me up to date on project or workshop information of the above property. Contact Notes Robert "Vince" Sims

Date Time Regarding  
12/28/2006 2:29 PM PIO emailed Robert "Vince" Sims re: property query: "Vince,I checked the location of your property at 29611 SR 46 in Sorrento, and you are correct that all of the alignment alternatives from the summer workshops would affect this property. As we discussed, the PD&E study team has been evaluating and revising these alternatives, and expects to draft a recommended alignment in January. That draft recommendation will have to undergo local government and state agency review and revisions. As we discussed, it would be a good idea for you to check the OOCEA website for updated maps for an update or contact me in late January. Once the draft recommended alternative has gone through the agency review and revision process, a preferred alignment alternative will be brought forward for formal public hearings, most likely in April.I could not find any other property in your name in the area of Seminole Woods in Lake County. I also checked Seminole and Volusia counties just in case, but found nothing there either. So I will need an address or property ID number to research that property further. Or let me know if the property is in fact in someone else's name that I could look up. Have a Happy New Year!Mary Brooks

12/27/2006 8:51 AM PIO returned call Robert Vincent "Vince" Sims 352-267-7607, wanted to know the road expansion near Heathrow estates on the one side, is that going to be ... Going to 44? PIO noted no, we're realigning 46A, shifting connection of that at SR 46 to the west near the eastern border of HCE. PIO noted current intersection heavily skewed, and road cuts through heavily used wildlife corridor. Environmental agencies and groups wanted to remove the section of road through the corridor, and new connection will create a safer intersection. PIO noted we haven't decided exactly where the 46A tie in will occur at 46 yet. Have met with HCE HOA and will likely meet with them again in January or February when we have updated info.He said he's trying to figure out if my properties are going to be affected... he has a nursery between 46a and 46. The map shows all potential lines going right through it. PIO asked for address? 29111 SR 46, Garden Rebel Nurseries or Sims Landscape. He looked out the map someone printed out for him, green lines going Robert Sims "Vince" email rvincentims@aol.com and mailing address 11148 Lane Park

Road, Tavares, FL 32778 In regards to Wekiva Parkway, understand the state because of deal with environmentalists has to purchase Seminole woods property, can you tell me if my other property is affected by that, it's the corner of 46a and 44, he doesn't have property id no. it's the absolute NE corner of Seminole woods. His property is 4.10 acres and it's in his name and his wife's name. I got a feeling it is in that tract, according to the map on the internet. PIO said don't know off top of my head if his property was included in the conservation land sought, noted WPPA had a specific legal description for the properties, and don't know if that included out parcels. He asked when would I know? PIO noted most people are off this week with the holiday, so on that point it will be after the first of the year. PIO noted I can send him an email on couple of his other questions in the meantime. Thanks again.--906 a.m.

Notes		
Date	Time	Regarding
8/8/2006	2:57 PM	Attended public workshop on 7/26/06
6/2/2006	9:32 AM	PIO emailed Dave, Mark and Brian/CH2M Hill: "Good morning, All, Just needed to pass along the gist of a conversation I had late yesterday with Beverly Halloran, Comm. Sindler's aide. She said Comm. Sindler wanted to be sure we were made aware that, according to one of their constituents, the City of Apopka had approved a development to go in between Yothers and 441. She said they thought the Wekiva Parkway alignment was pretty much set in that area, and were surprised at the news. I asked for the name and any other details on the development, but she had none. I told her I'd pass the info along, and noted this was a common challenge in developing this project. I told her we don't yet have an approved alignment, and property owners can do what they want with their land within the study area (noted it will just make things more expensive when we begin acquiring ROW). She again said they just wanted to make us aware of the info. Also, Dave Brian made me aware of the meeting schedule change and time crunch. Do you think I can still get those newsletter comments today or Monday? That way I can have the revised draft ready for review at Wed.'s meeting. Let me know - thanks
6/1/2006	4:28 PM	Beverly/Sindler 407-246-0948 called and said 429 going north from 441, that route is pretty much set, right? She said a constituent said city Apopka approving housing development in the alignment area, between Yothers and to the south, but within that ... know right now alignment to go through OC clay pit, if that's case there's rezoning taking place immediately south of that. Was wondering if you were aware of that? PIO noted that one doesn't ring a bell, but am aware of other development permits moving forward in that area. PIO asked if she had a name of the development? She said no since it was from a constituent, but she drove out there and there is a lot going on. She said Commissioner Sindler just wanted to be sure we were aware of it. PIO noted we have to connect to the MBX north of 441, so we're limited in the alignment in that area, but noted we don't have an approved alignment and property owners have the right to do what they want with their land including getting development permits. PIO noted we're facing that challenge in a number of locations and will just mean things will be more expensive come ROW acquisition time. PIO said I'd pass the lead on to the team, perhaps it will register with someone.
6/1/2006	2:59 PM	PIO again tried to reach Beverly/Comm. Bob Sindler's office 407-836-5850. Sebastian answered and said she was not expected in until tomorrow. PIO asked him to leave her message that I again tried to return her call. He said he would.
6/1/2006	9:13 AM	PIO returned call to Beverly/Comm. Bob Sindler's office re: some possible development

requests in the 429 location between 441 and Yothers Road. 407-836-5850. Shirley said Beverly wasn't in yet but should be here soon. PIO said just have her call me back, gave number again. She said she would.

5/31/2006	12:13 PM	Beverly/Comm. Sindler's office called and left MSG have question re: some possible development requests that from what I can tell are in the 429 location between 441 and Yothers Road. Give me a call back please. I'd like to find out if you're aware of this. 407-836-5850.

7/31/2006	2:49 PM	Attended public workshop on 7/25/06. Submitted comment: "i would like to point out that I attended the Nov '05 meeting in Sanford and submitted a comment but did not receive a response per your Web site and mailing. I am concerned with the southern option. As a homeowner in Capri Cove neighborhood, it does not appear that my earlier concern of access in and out of the neighborhood has been addressed. It appears we will be cut off. Also, our children walk to the nearby Wilson Elementary. How is their safety being addressed? Witout adequate access tot he school, it appears bussing would be the only option. I continue to be concerned with sound abatement issues, lighting and protection of the forested areas. I prefer looking at trees, not a highway.
7/10/2006	9:05 AM	PIO responded to Kathleen Sinninger: "Good morning, Kathleen,We are aware of the location of the Lakeside Fellowship United Methodist Church, and have discussed this matter previously with the church pastor. Please keep in mind this is the overall map, and not all items that fit each category are designated here (otherwise it would become too difficult to read). Please be aware that there are layers to this map for each designation that do have all of the members or locations of each group denoted.Mary Brooks
7/8/2006	1:38 PM	Kathleen Sinninger Ksinninger@aol.com emailed: "Dear Ms. Brooks, I have noticed the updated options for the Eastern section of the proposed highway does not list a church,

Lakeside Fellowship United Methodist Church. As a member of the congregation, I have a vested interest in what happens to this facility. I know it's absence was pointed out to individuals during the last public meeting in Sanford. Thank you, Kathleen Sinninger217

8/17/2006 11:57 AM Attended public workshop on 8/1/06. Bonita submitted comment: "I would like to express my appreciation to SCEA for addressing many of my concerns thus far about the Wekiva Parkway project in Seminole County. Supporting the Wekiva Parkway project depends on SCEA's ongoing commitment to a transportation solution that is environmentally responsible and satisfies objectives set forth in statute. In reviewing the recent alignments released by OOCEA during the July 7 EAC meeting, I have serious concerns regarding the proposed addition of four lanes of frontage road along SR 46 adjacent to the Wekiva Parkway and the accompanying stormwater facility within Seminole County. According to the illustration entitled, "typical cross-sections for the Wekiva Parkway" provided by CH2MHill, the Wekiva Parkway within Seminole County west of Orange Boulevard would be straddled by frontage roads consisting of two west-bound travel lanes north of the Parkway and two additional east-bound lanes south of the Parkway. It is not clear why the equivalent of additional four-lane road is needed along the Wekiva Parkway. The Seminole County Comprehensive Plan allows for two-lane roads within the Wekiva River Protection Area, and more than one single-lane road along the Parkway would not be consistent with the Wekiva protection provisions. Wouldn't two, single-lane frontage roads (or a single two-lane frontage road) be adequate along the Parkway west of Orange Boulevard? Wouldn't a reduced number of frontage lanes (with modified buffers and sidewalk dimensions) make it possible to reduce the total right-of-way footprint, thereby avoiding the need to relocate the natural gas pipeline north into Lower Wekiva River Preserve and substantially reduce proposed impacts to public lands? In addition to these above-mentioned impacts to public lands in Seminole County recently proposed by OOCEA I understand that additional public land will be impacted for the Parkway's proposed stormwater retention facilities. I question the appropriateness of constructing a stormwater retention pond inside the Lower Wekiva River Preserve when nearby vacant land appears to be available north and south of SR 46. SAS objects to this proposed impact to the Lower Wekiva River Preserve and strongly encourages the pruchase of private undeveloped property for the prupose of stormwater infrastructure siting. I am extremely concerned with the number of interchanges planned for Orange County. The Wekiva Coordinating Committee recommendations and legislations provided for ONE interchange at EITHER Ponkan Road or Kelly Park Road - NOT both. I request that my comments receive your highest degree of attention as design components of the Wekiva Parkway are further refined, and again we thank you for your commitment to keeping Seminole County 'Florida's Natural Choice.'"

1/3/2006 1:39 PM Began working on Lake County comment responses.Thomas Baker & Bonita Sivi; Frank Ambrogio; Steve Phelan; Marcia Ramsdell; Ellen Rocco; Elizabeth Tuten; Clark Morris.

9/22/2006	8:55 AM	Jim Small/Watson Realty responded to PIO email: "Ms. Brooks,I thank you for your immediate attention to my request and look forward to any future updates.Sincerely,Jim SmallWatson Realty CorpCommercial Real Estate 1445 W. SR 434 Suite 100Longwood, Florida 32750Office (407) 622-8581Fax (407) 767-5989Cell (321) 945-2835Email: jimsmall@watsonrealtycorp.com
9/20/2006	9:58 AM	PIO emailed info to Jim Small/Watson Realty, included map segment: "Hello Jim,I checked on your property, parcel ID No. 311930300006A0000. That shows up on our maps as parcel 1297, which would have a significant impact from the SR 417 alignment (if selected , ramps to International Parkway and a retention pond, as it stands now. Currently we are evaluating the more 540 public comments - many of which represent competing interests - from the recent public workshops, as well as government feedback, and continuing the engineering analysis with regard to refining the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That will include a recommendation with regard to whether we should connect to Interstate 4 at SR 46 or SR 417. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I would suggest staying involved in this process to keep abreast of the potential impact to the property in question. I am adding you to the project mailing list also. Please call or email with other questions or concerns Mary Brooks
9/19/2006	3:42 PM	Jim Small/Watson Realty responded to PIO email: "Mary, Many tks for the update I look forward to your information. Sincerely, Jim Small
9/19/2006	9:37 AM	PIO emailed Jim Small/Watson Realty: "Jim,I wanted to let you know that I received your message and you are still on my list of properties to research. However, I have received a number of such information requests so it may take me a couple of more days to get back to you. Just wanted to let you know I have not forgotten your request.Mary Brooks
9/18/2006	4:22 PM	Jim Small/Watson Realty called and left MSG calling about the Wilson property. I called Friday re: the 46 exchange and you were going to email me some info on that. If you would go ahead and email it to me I'd appreciate it, thank you.
9/15/2006	1:02 PM	Jim Small of Watson Realty 407-332-6666 called and said they have property in Lake Mary-Sanford corridor off Wilson. What is current status of that portion of the project? Have they decided whether they're going down 46 or what? PIO went over process we're at, evaluation of viables based on feedback ongoing, noted schedule for preferred alternative and public hearings.He said SC financial report on TV couple nights ago made comment it could be 15-18 years before project could start, is that something someone could hang their hat on? We have a developer interested in the property. But trying to figure out if it's going to affect the property or not. PIO asked for specific property location?Property is at Wilson and international, parcel number would be 311930300006A0000, address of adjoining property is 5335 Wilson Road. On south side of Wilson, opposite Tall Trees. Cross street Metz Avenue is dirt road crossing Wilson there Small o 407-622-8581, c 321-945-2835, jimsmall@watsonrealtycorp.com PIO noted on timeframe that if we get the funding, noted estimated cost of \$1.6 billion expected to go up to \$2 billion soon, would have to be done in segments since it's 25 miles, and if money in hand the earliest we'd be looking to start construction would be 2012-2015. That would be first segments, and hasn't been determined where that would be or how long segments would be. We had a bad connection and kept cutting out, repeated info several times and then lost him.--109 p.m.

Contact Notes	Elaine Smialek	
Date	Time	Regarding
4/4/2006	3:21 PM	Elaine Smialek responded to PIO email: "Hello Mary Brooks, Thanks for the information. I have been in contact with Mike Martin and also Keith Schue. I think that Mike is manager of the Seminole State Forest and Keith Schue is with the Nature Conservancy. Mike has sent the information concerning my property to the state. I will let you know what the outcome is whenever I hear. Elaine Smialek"
4/3/2006	10:55 AM	PIO emailed Elaine Smialek relaying info from last week's meeting: "Hello Elaine, I raised your query in the project team meeting last week, and it is indeed too early for the FDOT to begin advance acquisition. They have to at least get through the PD&E Study, and then funding has to be available, etc. But the team members suggested you contact the Seminole State Forest Manager about possible acquisition, since your property is surrounded by that state land. I hope that helps. Let me know what you find out, just out of curiosity. Please don't hesitate to call or email with other questions or concerns."
3/24/2006	11:25 AM	PIO attached map segment and forwarded emails to Dave, Brian and Mark/CH2M Hill for review of query: "FYI, Received the emails below from Elaine Smialek, who owns the property in east Lake County near the river (parcel 3286 shown here; hopefully the map segment comes through). I've told her, as you see in the emails below, that we are not in a position to acquire individual properties yet since we don't have an approved alignment and are still in the PD&E Study, but said I would forward her query for investigation. She wants to know if there's any way FDOT would buy her property now since she's surrounded by the forest... I suppose it's possible the SJRWMD or DEP could be interested in the property? Please let me know if there's something different I should be telling her."
3/24/2006	10:58 AM	Elaine Smialek responded to PIO email: "I believe The Parcel # is 140. On the FDOT maps that parcel had a hi-lited line around it and in November when I asked you about it you said the hi-lite was because my property was surrounded by state property. Perhaps you could just forward my original message to the proper contact person at FDOT. I can understand why it may not be possible to purchase it at the present time. I just thought I would give FDOT the opportunity before I decided if I wanted to sell to one of the 2 others who keep "bugging" me. Thanks for your very prompt reply. I appreciate it. Sincerely Elaine Smialek"
3/24/2006	10:45 AM	PIO responded to Elaine Smialek email: "Hello Elaine, Please provide the actual size and address and/or parcel number for your property. I would be surprised, since we don't yet have an approved alignment and are still in the PD&E Study phase, that any sort of purchase of your property would be possible at this time by FDOT, but if you forward the information I'll look into it for you."
3/24/2006	10:20 AM	Elaine Smialek emailed: "Dear Mary Brooks, I talked to you at the very informative Wekiva Parkway public meeting last November 14th. According to several large maps it appears that my relatively small parcel of land is located within the only planned route for the future Wekiva Parkway. The property is located on the North side of Rt 46, just west of the Wekiva River, surrounded by the Seminole State Forest and FDOT wetlands. The FDOT wetlands property was purchased from my father in 1994. The main reason for this message is to inform you of the following facts. I have had several individuals and 1 local realtor ask me if I was interested in selling and I have told them "No". However, now I am seriously considering selling it and I wanted to inform you of that fact. Could you please give me a FDOT contact name so I could immediately contact that individual to see if FDOT is interested or even "allowed" to purchase property before Wekiva Parkway properties are officially purchased? One other interesting fact is that a Wekiva Falls Resort sign is on my property. If by chance one of the interested buyers, whom I do not know personally, is in any way connected with the Middlebrooks (owners of Wekiva Falls Resort) the Middlebrooks could give FDOT much more difficulty than they did in 1994 when FDOT bought property from my father. That is a long story about the ridiculous hassle they gave FDOT- actually almost unbelievable to me. To make a long story short I certainly do

not want my property to ever be owned by the Middlebrooks. The other prospective buyer is a nice individual that I allow to hunt on my property. The main reason I do not plan on building a house on that property is because the state forest is open to hunters during hunting season. With hunters like Dick Cheney around who needs a house surrounded by hunting grounds? Looking forward to hearing from you. Sincerely, Elaine Smialek 3330 Easy Street Port Charlotte, FL 33952 (941) 255-8404

We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks
7/31/2006	2:30 PM	Attended public workshop on 7/25/06. In attendance: Barry, Kerri and Samantha Smith. Submitted comment: "While we understand the need for the road to be built and knew that the 417 interchange to 46 will be used, please consider elevating the road so the traffic noise will not be as loud. Having a flat road will be very noisy as we can already hear 46 and I-4. Thank you and appreciate the informative help that was given to everyone."

7/21/2006	9:55 AM	PIO responded to Barry Smith email: "Hello Barry,The upcoming public workshops will be open house format, so you will be able to ask questions during the entire meeting of the project personnel present. We will also have comment forms, as we have at the past meetings, for folks to give their written feedback. In the past we've also had court reporters for folks to give verbal comments on the project particulars.The last meetings for the PD&E study will be public hearings on whatever preferred alternative(s), which will have a more formal format, in February or March 2007.I hope that addresses your question. Please feel free to call or email with other questions. Have a good weekend.
7/20/2006	12:37 AM	Barry Smith bsmith61@cfl.rr.com emailed: "Mary Brooks, Public Information OfficerCould you please tell me if the meeting scheduled for Tuesday July 25th will have a question and answer session or will this just be a viewing of the proposed routes? If it is just the proposed routes, when will there be a time when the community has an input on the routes?Thank you.Barry Smith
1/23/2006	10:45 AM	PIO responded to Kerri Smith Kgator@cfl.rr.com: "Hello Kerri and thanks for writing. Here's where we are in the process.The hundreds of public comment forms are being reviewed and evaluated, as well as input from local governments. For example, the Seminole County Expressway Authority (SCEA) voted Dec. 20 to remove from consideration the yellow or northernmost alternative (which would have connected to Interstate 4 at US 17-92).There are many questions that cannot be answered and details that are not yet available this early in the process. Currently, the initial alignment alternatives are being analyzed based on all of the public input,as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being removed from consideration, while new alternatives also might be added. For example, the SCEA also requested that we add a route coming off SR 46, down International Parkway to SR 417 for consideration. We hope to have the maps updated with the latest alignment alternatives in March. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. As you may already be aware, all of the public workshop exhibits and other information are available and will be updated on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. "--1058 a.m.
1/22/2006	6:02 PM	Kerri Smith emailed: "Dear Mary, I know that I have signed up for meeting information and such on the Parkway but do you know how long it will be before the decision is made as to the route? We live in Berington Club near the proposed International Parkway, Wilson Road, Orange Blvd. to 46 route. My curiosity is getting the best of me trying to visualize where it would start to elevate before crossing Orange Blvd., how much retention area needed, and what it will look like, etc.We as a family and community want to stay here but wonder about the quality of life after the road comes.Thank you.Kerri Smith224 Meadow Beauty TerraceSanford, Florida 32771Berington Club

Regarding  
PIO responded to Darren Smith/Berington Club HOA: "Hello Darren, I called you back and left a message. For the Wekiva Parkway Project Development and Environment (PD&E) Study we will have formal public hearings on a preferred alignment alternative in either February or March 2007. The preferred alternative will be developed this fall based on public comment from the workshops (have so far received more than 400 comment forms) local government and state agency feedback and continuing engineering analysis. Once the preferred alternative is drafted, it must undergo government review and revision leading up to the formal public hearings. Prior to the hearings, we also typically have the Project Advisory Group (PAG) and Environmental Advisory Committee (EAC) meetings at the OOCEA headquarters. While those are open to the public to attend, they are working committee meetings and are not for public questions or discussion. The next PAG and EAC meetings have not yet been scheduled, but are usually a month or so before the public meetings. All of the public workshop maps are on the OOCEA website at www ExpresswayAuthority.com. On the entry page click on the "corporate site" button on the left. On the home page, under the "construction update" headline toward the left side of the page, you will see text including a highlighted link for the "Western Connectors." Click on that highlighted link and it will take you to the Wekiva Parkway page. At the top of the page is the link for the viable alternatives workshop maps, etc. I hope this helps. Please feel free to call or email with other questions or concerns. Mary Brooks

8/15/2006 1:30 PM Darren Smith emailed: "Mary, I just left you a voicemail. Below is my cell number or you can reply via email. I am a resident in Berington Club across from Wilson Elementary. I

have not been able to attend any of the meetings and I see I am located in the "blue blob" area on your site map. What is the best way of future schedule of meetings so I can get a bit closer to the details??Darren C.Smith | Vice President - Global Product EngineeringFiserv, CBS Worldwide | 600 Colonial Center Parkway Lake Mary, FL 32746 | Office: (407) 513-5856Cellular: (407) 474-3507 | eFax: (305) 946-7891

8/15/2006	12:55 PM	PIO returned call to Darren Smith c 407-474-3507, 407-513-5200, left MSG that all of the workshop maps on the EA website and he's welcome to give me a call when he's back at the computer and I can walk him through that and try to answer his other questions.
8/15/2006	11:28 AM	Darren Smith called and left MSG I'm a resident in Sanford. I live off Orange between 46 and 46A. I have not attended any of the meetings. I don't know if we've got anything in the mail or not. At this point in looking at the map sitting up on the site, ... I think it was Pam or Pat helped me to find it ...I am under the blue blob that I guess right now it's not confirmed as to where it's going to go.Trying to find out what meetings still exist and/or where there might be maps as to projected planning. I know I'm kind of late but if you could help me out that would be great. 407-474-3507 I know some times easier to reply to email, so I will send you an email saying I left you a voicemail and if you want to reply to that that would be wonderful. Appreciate your help. Thank you bye.

Date	Time	Regarding
1/23/2006	10:45 AM	PIO responded to Kerri Smith Kgator@cfl.rr.com: "Hello Kerri and thanks for writing. Here's where we are in the process. The hundreds of public comment forms are being reviewed and evaluated, as well as input from local governments. For example, the Seminole County Expressway Authority (SCEA) voted Dec. 20 to remove from consideration the yellow or northernmost alternative (which would have connected to Interstate 4 at US 17-92). There are many questions that cannot be answered and details that are not yet available this early in the process. Currently, the initial alignment alternatives are being analyzed based on all of the public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being removed from consideration, while new alternatives also might be added. For example, the SCEA also requested that we add a route coming off SR 46, down International Parkway to SR 417 for consideration. We hope to have the maps updated with the latest alignment alternatives in March. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. As you may already be aware, all of the public workshop exhibits and other information are available

and will be updated on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 8/2/2006	1:53 PM	Attended public workshop on 7/26/06. Submitted comment: "Alternative #1 systems interchange would be perfect. Enabling us to remain at present home. We own 20 acres and live in front, therefore the back acreage would be perfect. Thanks."

6/22/2006	10:20 AM	Researched Vernice & Ralph Smith's property location on OCPA website. Property about 4 parcels east of p-s road on south side of Boch, and north of Haas. Alternative coming out of systems IC cuts through middle 1/3 of property.
6/21/2006	9:36 AM	PIO returned call to Vernice Smith/2604 Boch Road Apopka. 407-886-7794. She said we were looking at some maps, and it shows the expressway probably coming through our area, right through our property. I was wondering if and when they have decided this and when they would buy our land? We just moved up here year ago; we had property on Boch Road for 30 years. PIO noted no decision has been made, and gave PD&E schedule. PIO emphasized meetings coming up beginning end of July, and based on public comment from those and government input, a preferred alignment or two would be selected, with public hearing in Feb. 2007. She said I'm not really upset about it. We have 20 acres here. We have known for some time it was going this way. We live out front on Boch Road and I'm sure they would need all of the land so we could stay on the rest of it. PIO noted that is often the case but it depends on what's slated for their location. PIO to check and get back to her. She said we've been on 429 and there are houses right next to the expressway so we know people can live with that. I'm 76 and Ralph's 80 and we just wanted to know if we were going to have to get out tomorrow. PIO noted no, even once the study finishes next year, still have to do final design, permitting, ROW acquisition before we get to construction. She said well okay and thanks a lot.
6/21/2006	8:01 AM	Vernice Smith at 2604 Boch Road Apopka. I would like some info re: 429 extension, please Would like to know when you're going to start acquiring property and when the final decision is of where the expressway will be going. I appreciate your call. Again my number is 407-886-7794 thank you and have a good day.

7/31/2006	11:20 AM	William Soderstrom attended SC public workshop.
2/23/2006	11:23 AM	<p>Debbie left MSG I'm trying to find out status of Wekiva parkway407-665-4760 145 p.m. PIO returned call to Debbie (Deborah &amp; William Soderstrom), heard they done away with northernmost route, is that one by port of Sanford. Are The one that goes across and connects with 417; my house is right in the path, so I'm trying to When will they make final decision? Study will concludeI live near Wilson road, if it comes across, would there be a bridge? More than likely. She said one of the lines comes right across our property, trying to determine how far ... it will come onto my property. PIO noted can't tell yet because don't have that detail, just trying to find a general corridor to begin planning the road at this point. PIO noted in final design will have better idea of those sorts of details. Right now don't even know if it will be 4 or 6 lanes, which of course will affect the width and impact to properties.Property 1415 Metz ave, parcel 1304, other side of Wilson road from tall treesIf it's finalized, how long would it be before they took my property? PIO noted have to finish study (another year), then get far enough along in final design to know what properties are needed before we begin outright acquisition. PIO noted first would probably do advance ROW acquisition, that is large parcels, couple hundred acres or whatever that we know there's no way we can avoid. PIO noted funding challenges, particularly with skyrocketing land values and construction costs, for the different phases will affect the schedule. PIO noted could be 2012-2015 before construction starts.She said she hopes they don't take her property at all, but it's difficult being in position where you don't know what's going to happen or when. PIO noted I understood and invited her to stay involved with the process, check the website for updates and feel free to call or email me as well. Noted if she's on the list she'll get newsletters and meeting notices in a couple of months. She said she has received those in the past.</p>

8/22/2006 7:19 PM

\_\_\_From: WG Spurlock [<mailto:wgspurlock@msn.com>] Sent: Tuesday, August 22, 2006 7:19 PM To: Mary Brooks Subject: Re: SR 429-Wekiva Parkway PD&E Study - Arc View Shape & unrestricted PDF files Hi Mary  
I can appreciate where you are coming from however our intent is not to represent the end result as an official expressway document, or for that matter represent it as coming from you as a source at all. What we were intending is to inform our investors as to the most recent status of the lay of the land relative to our holdings. I suppose our perspective would be one which would analyze the map with our holdings being the focus, you on the other hand view the expressway as the focus. Regardless of how you look at it the feat of misrepresentation could occur with or without your files. As a matter of fact we can produce a copy of your map by toggling the layers to accomplish the reproduction with a little more effort. Fraud in any form is unacceptable and we do not engage in it! Our request for fair use of your information was put forth in good faith with the end result being a map for our enterprise not to hatch a sinister plot. Regards, William G. Spurlock

8/22/2006 4:07 PM

PIO forwarded file request response to Greg Spurlock/Castles Realty: "Greg, I heard back from CH2M Hill, the firm doing the Wekiva Parkway PD&E Study re: your file request. As noted previously, they are not creating Arc View Shape files of these alternative concepts. CH2M Hill also does not provide unrestricted PDF's to the general public because they must maintain control of what is depicted on the project PDF's produced for the OOCEA and FDOT. Otherwise, attributes can be added and circulated, perhaps giving someone the impression that the information came from the project team. Also, project related items on unrestricted PDF's can be altered which could lead to confusion or worse. Please call or email with other questions or concerns. Mary Brooks

8/18/2006 9:11 AM

PIO responded to Greg Spurlock/Castles Realty: "Greg, CH2M Hill said the map files are not available in Arc View, but all of the PDF's for the workshop maps are on the OOCEA website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I hope that helps. Let me know if you have other questions or concerns. Mary

8/17/2006 1:51 PM

\_\_\_From: Jorza, Kathleen/ORL Sent: Thursday, August 17, 2006 1:51 PM To: Lewis, David/ORL Subject: RE: Arc View Shape files The easy answer is yes. The original request was for an Adobe pdf file that has full access. Mary can refer him to the ftp site where he can obtain whichever pdf files he

needs. It is not available in ArcView.

8/16/2006 8:55 PM PIO forwarded Spurlock Shape file request to Dave and Melaina: "FYI, note request below for arc shape files below. Let me know if and when this would be available so I can get back to him. Thanks.Mary Brooks

8/16/2006 8:54 PM PIO responded to Greg Spurlock/Castles Realty: "Greg,I'm forwarding your request to the CH2M Hill folks conducting this PD&E study and will let you know what I find out.Mary Brooks

8/16/2006 11:43 AM \_\_\_From: WG Spurlock [mailto:wgs spurlock@msn.com] Sent: Wednesday, August 16, 2006 11:43 AMTo: Mary BrooksCc: Brad MatthewsSubject: Re: Arc View Shape filesHi Mary,It was good to meet you at the town meeting in Apopka. Your group did a good job of putting together an informative and well run meeting. As a member of the local community let me express our gratitude for the information etc. Also I just wanted to follow-up on the map request we submitted with respect to the 429 beltway expansion a.k.a. Wekiva Parkway. Let me know if you can and the gang can help us out. ThanksRegards,William "Greg" Spurlock, Realtor, MBACastles Realty445 Douglas Avenue Suite 2205-KAltamonte Springs, Florida 32714407 865.6464 Business407.782.6490 Direct407.865.6461 Faxweb: http://fl.living.net/realtor/greg.spurlockemail: wgs spurlock@msn.com "Your source for real estate sales, financing, title and relocation solutions!"

7/24/2006 11:03 AM Greg Spurlock/Castles Realty responded to PIO email: "I understand, no problem. I will attend the Apopka meeting I look forward to meeting you then."

7/24/2006 10:54 AM PIO responded to William Greg Spurlock/Castles Realty: "Greg,I did forward your request, but the PD&E Study team has been scrambling in the last couple of weeks to wrap up agency review meetings and prepare all of the exhibits (about 100 maps and other graphics) for this week's public workshops in Lake, Orange and Seminole counties. I'm afraid it'll be after the workshops that I'll be able to get these folks to address your request. Sorry for the inconvenience. Will I see you at one of the workshops? If so, please introduce yourself. Take care.Mary Brooks

10/6/2006	9:23 AM	PIO responded to Roger/Attwood Phillips/Sylvan Lake Reserve HOA: Roger, we can shoot for November instead. There alternatives are changing as we go through the study. It's up to you. If you don't want an update, that's fine too. Just let me know ..."
10/5/2006	4:19 PM	Roger Stafford/Attwood Phillips/Sylvan Lake Reserve HOA: "Mary, I wouldn't be able to work in anything for October at this late date. Is there anything notable to report in the progress of the project? Roger Stafford, LCAM Association Manager Attwood-Phillips, Inc.
10/3/2006	3:17 PM	PIO emailed property management co. Megan/Attwood Phillips and the Glades at Sylvan Lake Reserve news@sylvanlakereserve.com: "Good afternoon,We are trying to schedule meetings with interested HOA's to give presentations updating them on the status of the Wekiva Parkway Project Development and Environment Study. We have two dates open in the evenings in the near future, Oct. 11 and Oct. 18, and wanted to know if the Glades of Sylvan Lake Reserve was interested in either date? Please get back to me at your earliest convenience. If one of these dates doesn't work, please let me know a date and time that would be more convenient for you. Thanks.Mary Brooks"
2/16/2006	6:15 PM	PIO arrived early at SC Sports complex, met Roger Stafford/Attwood Phillips/The Glades manager and couple board members. 710 p.m. PIO gave presentation to about 40 homeowners and board members updating them on PD&E study, recapping meetings and feedback, some alignments eliminated, upcoming maps updates and public meetings, overall schedule.Questions included the following: if property values go down, will we be compensated? PIO noted this is considered a major improvement for this area, and have never seen these types of projects result in lower property values, only the opposite. If anything, tends to spur redevelopment.Where will homeowners be able to access parkway? PIO noted we're looking at different configurations and where it makes sense to put slip ramps, so that's not determined yet.Will the project affect the school (Wilson Elem )? PIO noted the alignment skirts NE of the school property. Someone noted it does hit the church on Orange; Board president Rob Mangus said they're aware of that and are making contingencies for that.Question: why not use the RR corridor? PIO noted county has that corridor indicated for trail. Also noted not wide enough and consensus was this project in large part needed to replace S.R. 46 for safety - human and wildlife - and traffic flow efficiency.Has the county stated its preference for connection to I-4? PIO noted SCEA eliminated yellow alternative, has said do not want a full blown expressway tying in to I-4 at 46, and has asked us to look at alternative along International Parkway. Other than that nothing definitive yet, but we continue to meet with them. PIO noted while 417 connection makes most sense from engineering and connectivity standpoint; there are issues with that option as well including high costs.A woman asked how many fatalities? PIO noted didn't bring the traffic stats but recalled from Sentinel article it was something like 60 or 70 in the last few years. PIO noted understood there've been twice as many people killed on 46 as bears in that timeframe.Question: what will happen to 46 during construction? PIO noted some access to homes and businesses would have to be maintained during construction.Question: will DOT's part be free? PIO noted at this point that would be the case, however we have tremendous funding challenges ahead with this project, and I can't guarantee you the Florida's Turnpike won't at some point have to or be asked to step in for DOT's section. PIO noted the OC section being done by OOCEA will be tolled.Why not just four lane S.R. 46? PIO noted traffic models indicate with growth in area expected to continue; even four lanes would be inadequate in the not too distant future. Also from safety standpoint - and I know lot of you have difficulty pulling in and out of your subdivision with the traffic - it was determined that something else needed to

be done. So from human and wildlife safety standpoint, the consensus was an elevated limited access facility would be best. PIO gave out my business cards, encouraged folks to check the website for updated info around late March and thanked them for inviting me --745 p.m.

2/16/2006	3:32 PM	PIO returned call to Rodger/Attwood Phillips/The Glades HOA to let him know I plan to be there a little before 7 p.m. he said thanks and see you there.
2/16/2006	12:43 PM	Roger Stafford/Attwood Phillips in Winter Park left MSG we'd made arrangements with you to appear for Glades HOA tonight in Sanford, just calling to offer a little reminder. Meeting is scheduled to take place this evening. 470-697-9136 look forward to seeing you tonight.
1/31/2006	10:05 AM	PIO emailed Tom Percival, Anne Brewer, Noranne Down/FDOT, copied CH2M Hill: "FYI Just wanted to make sure you were aware that the Glades of Sylvan Lake Reserve HOA, which is in Seminole County, has requested a study update on Feb. 16 at 7 p.m. at the Seminole Sports Complex in Sanford. As requested by the county, I've also notified Jerry McCollum and Gary Johnson about the update presentation."
1/11/2006	1:45 PM	PIO responded to Rodger/Attwood Phillips/Glades Sylvan Lake: "Thanks. See you there!"
1/11/2006	11:24 AM	____ From: Roger Stafford [mailto:rogers@attwood-phillips.com] Sent: Wednesday, January 11, 2006 11:24 AM To: 'Mary Brooks' Subject: RE: Glades on Sylvan Lake HOA Presentation Mary, The arrangements are firm for your presentation on Feb 16th at the Lake Sylvan Sports Complex located on Lake Markham Road in Sanford. The meeting begins at 7 PM and you will be first on the agenda if present at that time. Thanks again for agreeing to speak, we look forward to seeing you Roger Stafford, LCAMA Association Manager Attwood-Phillips
1/9/2006	5:00 PM	Rodger/Attwood Phillips/Glades responded to PIO email: "Mary, There is always flexibility and considering that you are our guest I will try to rearrange the agenda to permit your appearance at 7 p.m. or shortly thereafter. Thanks for your acceptance."
1/9/2006	4:57 PM	PIO responded to Rodger Stafford/Atwood Phillips/Glades on Lake Sylvan Reserve: "Rodger & Megan, If there is no other option, then I will be there at 745 p.m. But please note that our day starts at 730 a.m. or 8 a.m., so it makes for a very long day on my end."
1/9/2006	2:22 PM	____ From: Roger Stafford [mailto:rogers@attwood-phillips.com] Sent: Monday, January 09, 2006 2:22 PM To: 'Mary Brooks'; 'Megan' Subject: RE: Glades on Sylvan Lake HOA Presentation Mary, Thanks for your willingness to attend. There is some initial business that the meeting needs to address at the opening, but I understand that you would like to get in and get out so what I propose is to schedule you 3/4 of an hour after the start of the meeting, which would be 7:45 p.m. if that's OK? You will be able to come in at 7:45, speak and leave. If this is unacceptable let me know. Roger Stafford, LCAMA Association Manager Attwood-Phillips, Inc.
1/9/2006	2:07 PM	PIO responded to Megan/Glades @ Sylvan Lake Reserve HOA: "Feb. 16 looks good, but if there were any way to put me at the top of the agenda, which is usually done as a courtesy, that would be greatly appreciated. I've found over the years that even when there are the best intentions to stay on schedule, once the meeting actually starts and they get into their HOA business, things invariably go longer than expected. Let me know - thanks!"
1/9/2006	11:35 AM	Megan Phillips/Atwood Phillips/Glades on Sylvan Lake Reserve emailed: "Ms. Brooks, Happy New Year to you! I am writing to inquire if you would be available for another update on the Wekiva Parkway Project at the Glades on Sylvan Lake Annual Meeting to be held on February 16, 2006. If you are available we would allow for approximately 30 minutes for you to cover the latest information on the project as well as any questions from those in attendance. Since your presentation will be during the association's annual meeting we believe that your presentation will take place around 7:30 pm as the meeting will begin at 7:00 pm and the Board will need to conduct some business before your presentation. Should you be available, we believe that if you arrived by 7:30 pm we could limit your

"down time" as well as keep the overall meeting flowing as it should. Could you please let me know at your earliest convenience if you are available on the 16th so that we can prepare the meeting materials to include an announcement of your presentation/Q&A? Thank you for your attention to this matter. Sincerely,Megan TaylorAssociation Manager's AssistantAttwood-Phillips, Inc.

8/7/2006 11:17 AM Attended public workshop on 8/1/06. Submitted comment: "For Orange County, the alternatives that do the least damage to the scrub parcels (Upland Habitat) should be the top choices (alternatives 2, 3, 5, 6). This is the most endangered habitat type the project impacts and is prime water recharge (Blue Belt) land. This area has been on the Orange County Environmentally Sensitive Land Acquisition List for many years. DOT, OCEA and Orange County should work together to acquire these lands. Of the above alternatives, #3 disrupts fewer businesses and in my opinion should be used. Thank you for the opportunity to comment. Do not think the Kelly Park Interchange should be built. The Ponkan Interchange would better serve urbanizing NW Orange County."

8/16/2006 10:19 AM PIO prepared Bob Stamps comment form response and sent: "Aug. 16, 2006Bob Stamps6330 Plymouth Sorrento RoadApopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Bob,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks"

Scott Stegall

Seminole County Public Schools

Regarding

Tom Percival, Mark Callahan, and PIO met with George Kosmac, SCPS Deputy Superintendent and Director of Operations, John Leroy, Project Manager Facilities Planning Scott Stegall, Director Capital Outlay, Building Official, Facilities Planning Department, and Principal Barry Liebovitz at Wilson Elementary in principal's office. Mark brought roll plots and went over the alignments from the workshops and latest adjustments. He noted we're avoiding the treatment facility on school property. Q: is it taking the vet's property to the north? Mark said yes. It was noted there's another vet's office also in the areaQ: will there be a problem with the retention planned next to their ASR? Mark said don't think so. Mark noted we'd be elevated over Orange, and then come down somewhat and then go up over Wilson.Mark noted we're working with Capri Cove and Tall Trees HOA's, Lakeside church, and have come up with some adjustments.Q: aren't there student walkers from the back of Tall Trees? Barry said they come along Wilson Road. There are some partitions along the fence they can get through. Mark said we will bridge Wilson and provide sidewalk and it would be lit under the bridge.Q: will it be an obstacle for them to continue walking? Mark said no, don't think there's sidewalk there now ... part of the sidewalk went in with new Wilson Place development.Re: 417 alternative from the workshop ... adjustment to move it away from Capri Cove and will end up a little farther from the school. But there is an issue with the church. It's also a little farther from Tall Trees... Alternative B is a tad closer to the school.Q: will all the alignments, will there be any taking from the school? Mark said no, very careful to avoid that.Q: what about noise abatement? Mark said we will look at it. We recognize that schools have special criteria. It would be a noise wall if anything. Discussion that distance from school property to road edge would be 100-150'.Q what grade at the school? Mark said the road might be 10' high or so.Q: will there be fencing beneath the roadway? Mark said ROW is fenced unless there is a vertical wall there. Also any ponds would be fenced.Q: Barry asked about egress off International Parkway? Mark said yes, that's the proposal. Mark noted only access to 417, not I-4 front International Parkway.Mark noted we're looking at refinements throughout the project. We hope at the beginning of the year to have recommendation for DOT, EA, SCEA, Lake County Board of County Commissioners, etc. and then public hearings in March-April. Then we would seek federal approvals. Mark noted we don't have funding to move forward. Looking at \$1.5 billion and growing. He noted the school system's involvement in planning will be very helpful. Mark noted 417 has more community impacts but a lot of traffic wants to get to Lake County. The SR 46 IC we would have to provide local 46 access, systems connection to the Wekiva Parkway and something for people on 417 wanting to get to the facility. He noted we're finishing the impact evaluations. There are more homes on 417 than 46. We're trying to weave our way through.Q: how many years before you start construction? Mark said 2012-2015 is the absolute best case depending on funding. We need to get things documented regarding the school. Barry expressed concern about egress from school to the parkway.George was concerned about noise potential and not inhibiting kids walking to school. Mark asked if school system dictated how kids should walk to school? Barry said it's up to families how kids walk to school. A lot of our students are driven to school. Some walk on Orange, Wayside and Wilson. Schools officials said they have requested sidewalk on Wilson, but the county said since the speed limit is 25 mph it's not warranted.Mark reiterated there would be sidewalk under the bridge, especially this close to the school. Scott said the main thing is you keep the Wilson Road connection. He said the ponds don't really concern us. It's primarily the co-location to the well. Mark going to get back with Glenn Forest on that. Scott noted there were setback requirements on that.PIO asked if we need to do presentation to school board or leave it at staff level? George said staff for now, especially until you get those issues squared away. George said there is one school board member interested. He might speak with her. Mark said we can do one-on-one meetings also.Discussion of impact to Lakeside Fellowship UMC. Mark gave Barry the roll plots and said would send an additional set.PIO mentioned Yankee Lake Elementary school site. Scott said they heard initially the ROW acquisition would occur to the north. Mark noted we're looking at the north and south though the south has three times the impacts.Scott asked how much additional ROW

would be needed? Mark said 46 ROW is 200', so 65'. Then another 50' for the gas line easement that needs to move north.Q: why can't gas line stay in ROW? Mark noted gas company wants separate easement.Scott said right now we've lost 50' for the easement, then we'd lose 80' (?). Mark said he's going to send them the north and south alternatives on SR 46.Scott said if it's half it's 80', or 120', the easement is already conveyed.Mark said some uses of easement allowed but will be restrictions such as buildings.Scott said Yankee Lake Elementary not planning to go forward at this time because of location, and issue of attendance boundaries due to proximity of Wilson Elementary. There are also Department of Justice issues. They confirmed the school district owns the parcel.George said the real question is how much of it is it going to take? We would be concerned if we'd lose a useable site for an elementary if the project takes too much.Mark reiterated he would get them additional plots, PDF's. PIO offered to coordinate follow up meetings, just let me know.--932 a.m.

Date	Time	Regarding
9/27/2006	9:56 AM	Dave responded to PIO email: "We are closing in on completion of the comparative impact analysis for the 417 connection alternatives. I'll let you know when Mark thinks it's ready to release. With regard to Heathrow Country Estates, we have been working on ROW for the 3 counties and updating the impact assessment so we haven't had time to prep the impact comparison for the various CR 46A alternatives. We hope to start on that this week. However, my recollection of the approach Mark indicated in the progress meetings was: complete the CR 46A alternatives impact assessment; meet with Joe Bishop of Seminole State Forest; meet with Scott Taylor, the landowner; then meet with Heathrow Country Estates."
9/22/2006	10:50 AM	Steve Homan responded: "There are no definitive studies with which I am familiar. Improved access clearly improves property values due to reduced commute times. Extremely close proximity to a transportation facility, with the exception of a commuter rail station, can have an obvious negative effect.Steve HomanPublic Information Officer386-943-5479 or 1-800-780-7102email: steve.homan@dot.state.fl.us
9/22/2006	10:44 AM	PIO emailed Steve Homan re: property value queries (Tall Trees et al): "Hello Steve,I've gotten a number of questions re: how the Wekiva Parkway could affect property values largely from Seminole County folks). I've asked around, but haven't been able to find any studies on property value impacts for this type of new roadway. Do you have any info you've come across in your many years of dealing with such questions? I've found a number of studies on access management and how it affects property values, largely in commercial areas.I asked George Lovett (as suggested by Brian Stanger), and he and his folks didn't have anything. Let me know - thanks!Mary Brooks
9/14/2006	2:43 PM	PIO finished Tall Trees HOA email and sent: "Hello Julian,We have been working to compile some of the information your residents requested when members of the SR 429-Wekiva Parkway PD&E Study Team met at the Tall Trees clubhouse on Aug. 22. We also have been looking at making some possible adjustments to the SR 417 alternative that could shift it slightly away from your subdivision, by say 50-100'. Any shifts farther away, however, would hit the nearby apartment complex, which the county has asked us to avoid. These adjustments and others based on public comments and government feedback are still being evaluated. To wit, your residents requested the following:1) Traffic number comparisons between the SR 46 and SR 417 alternatives2) Deaths on 46 between Orange (where the SR 417 alternative drops down) and I-43) Studies or other information on the impact of pile driving to nearby structures4) Residential and other impacts5) FDOT studies on property value impactsTherefore, please find attached: 1) The traffic data exhibits including a comparison of the two alternative connections to I-4 (5 PDF's).2) The crash fatalities map and a chart showing the number of accidents on SR 46 from US 441 in Mount Dora to Interstate 4.3) A memo regarding preliminary noise and vibration information with regard to pile driving.With regard to No. 4, we are updating the impact assessment based on field reviews and, as a part of that, will also perform

impact assessments for the latest SR 417 alternatives A & B (showing the adjustments indicated above). This is meticulously detailed work and will take some time. With regard to questions about property values, the FDOT has advised me they have no applicable information on property value impacts for a transportation facility of this nature. (Previous studies were done on the reconstruction and addition of access management to at-grade arterials in largely commercial areas, and did indicate those improvements led to increased safety and property values.) The assessment of residential/commercial impacts is being updated to include the two SR 417 connector alternatives developed at the request of the Capri Cove and Tall Trees HOA's, and will be sent to you upon completion. Once that has been received and reviewed by your board and residents, we will be happy to set up a follow up meeting with you and your board to go over the latest information. Please share this information with your homeowners. And please don't hesitate to call or email with questions or concerns. Mary Brooks

9/13/2006	4:23 PM	Dave/Ch2m Hill emailed re: Tall Trees HOA info request: "Attached are the traffic PDF's. I have sent you the fatalities info already. I'm waiting on the pile driving impacts Tech Memo from the geotechnical engineer which I'll get to you ASAP after receipt.
9/7/2006	3:06 PM	-----Original Message-----From: george.lovett@dot.state.fl.us [mailto:george.lovett@dot.state.fl.us] Sent: Thursday, September 07, 2006 3:06 PMTo: Mary BrooksCc: Brian Stanger@dot.state.fl.us; Tom.Percival@dot.state.fl.usSubject: Re: SR 429-Wekiva Parkway PD&E Study - Property Value StudiesMary, I have checked with our appraisal staff and we do not know of any studies related to the impact on property values due to proximity to a new roadway. It is clear, however, that landowners from whom we buy no land, are not entitled to compensation because a new roadway. Please call me at the number below if you have any questions. George S. Lovett D5 R/W Manager/General Counsel (386) 943-5029 or SC 373-5029 FAX (386) 736-5207
8/24/2006	5:21 PM	PIO emailed Tall Trees HOA meeting notes to team. "Greetings All, Please find below the notes from our presentation to the Tall Trees HOA on Tues., Aug. 22. The discussion was "spirited" and the HOA president thanked us for attending. There are several pieces of information that the HOA has requested, which I will forward to them (if and when available): Deaths on 46 between Orange (where 417 alt. drops down) and I-4; residential and other impacts; DOT studies on property value impacts; studies or other information on impact of pile driving to nearby structures; traffic number comparisons between 46 and 417 alts. The traffic numbers and fatalities we have, as well as the impacts. With the studies I will need some assistance. ..."
8/24/2006	2:43 PM	Mark asked if I was notifying Jerry McCollum and the county commissioners of these HOA meetings? PIO noted I was instructed to notify Jerry and Gary Johnson, and they wanted to pass on to commissioners, that's what we've been doing. He said that's fine, he just wanted to confirm that was happening. PIO noted as soon as I firm up the Capri Cove HOA meeting I'll do likewise. Mark said we probably should be doing the same thing for Lake and Orange counties also. He noted he has a meeting tomorrow with Jerry McCollum to go over how some of the adjustments for Tall Trees and Capri Cove might affect local roads. He noted we could move it 50' away from Tall Trees without impacting Capri Cove, but if it went much farther away from Tall Trees it would go into the other subdivision. PIO asked about option Tall Trees resident mentioned about the International Parkway ramp, pulling that in over or to the other side of the pond? Mark said that's one the things they have to talk with Jerry about tomorrow. PIO noted I'd only heard back from him and Tom on the Capri Cove meeting. He said that's fine, let's go with that.
8/22/2006	9:06 PM	Julian Steinbridge/Tall Trees HOA emailed: "Thanks so much for attending our board meeting. The residents certainly appreciated the presentation. Regards, Julian Steinberg"
8/22/2006	6:45 PM	PIO, Mark Callahan and Brian Stanger/FDOT met with 50-60 (people continued to come in throughout meeting) Tall Trees HOA board members and residents at their clubhouse. When we arrived we were given cards with questions we were to answer: 1) Do you work

for the OCEA?2) Who is the OCEA? Is it a company hired to work for the state government?3) Does this entity believe that this "unique roadway development" goal is being met?4) Why is it a good idea to congest these main arteries (I-4, 417, 429) within two miles of each other?5) Were the alternative routes really given consideration? Had this all been worked out before this public offering?6) In Jacksonville, the intersection for the two bypass roads (295 to the west and 9A to the east) come together at 95 in a non-congested area. Why then would the state choose a county with a history of high density to join these arteries?7) Does the Authority really want to "minimize community impact" when it is clear that they are creating a huge impact on this area by joining these roadways at this particular junction?8) Immediate homes may be compensated because of the proximity to this roadway but does the State consider the impact on a WHOLE COMMUNITY and its home values and life style?9) Has the state considered the calamity that will eventually happen when an accident involving a fuel tanker or ammonia container or terrorist bomb is located at this major junction? (This is putting our community at tremendous risk!) PIO introduced team members and emphasized FDOT has jurisdiction over development of project in Lake and Seminole Counties. Mark went over summary of project background, jurisdictions including role of SCEA. FDOT has jurisdiction in this area. Mark recapped the study originally looked at using the RR ROW in the late 80s and 90s. He noted the state didn't have all the preserved land in that area at that time. Meanwhile the EA had done work on their master plan identifying the NW Beltway to go into Lake County. Concerns were expressed including environmentalists and permitting agencies regarding the impacts to land use and the Wekiva Basin. In 2001-02 the Governor issued executive orders establishing a series of groups. Groups met 2002-2004 to look at the Wekiva area issues including transportation, land use, stormwater, water quality, springs, etc. Mark noted the make up of the committees. The Wekiva River Basin Coordinating Committee recommended, among other things, the Wekiva Parkway and the corridor, and that led to the state legislation in June 2004. Mark noted that is the guiding document we're using for the study. He reiterated the breakdown of joint project development, FDOT over Lake and Seminole counties. Mark noted broad area for possible tie-in to I-4, including early alternatives that went up to US 17-92. Mark noted in November the SCEA directed us to delete that alternative, which had higher impacts to residences, wetlands and floodplains. Mark noted the basic idea for the Wekiva Parkway, given the environmental importance of the area ... is all the traffic from SC going to Lake and Orange counties would be on the Wekiva Parkway. It would be elevated at the river and at other key environmental areas with known wildlife movements, and there'd be bridges where the bear crossings are now. Mark noted from LC the Wekiva Parkway would be four lanes expandable to six lanes. Then in SC it would run along 46 with frontage roads. There would be ramps along 46 to get on and off. Mark noted to cross the river you'd have to get on the Wekiva Parkway. He noted there are a couple of options we're looking at after the river, either continue on 46 or go down to 417... 46 would be pretty impactful, there would have to be widening either to the north or south. He pointed out system connection from I-4 to the Wekiva Parkway...A woman on the board asked at what point they could ask questions? Mark said go ahead. From that point on the meeting was characterized by rapid-fire questions, with multiple people speaking at once. When Mark tried to answer one of the questions, one or more residents would interrupt with comments or more questions. On a number of occasions both the PIO and HOA president Julian Steinbridge asked for only one person to speak at a time. Some of the questions included the following. Opportunities to actually answer the questions varied.Q: Does SR 46 become a toll road? Mark said no, at this time, for the east-west portion. But it would be a toll road in OC.Q: Is that also true if the other route, 417, is chosen? Mark said yes, same basic concept. He pointed out the Tall Trees entrance.Q: A woman asked who is Mary Brooks? I went to the meeting and filled out a form and what was the point since I haven't gotten anything back? PIO noted I'm Mary Brooks, and I have more than 450 forms on my desk that I'm in the process of responding to. PIO asked if Judith Segall was here? Hers was the last one I sent out today... The woman said she was Judith Segall.Q: Some at the meeting said the other option is not being considered? Mark said we're still considering all three. The key is SCEA has the say in the final decision. As you look at traffic, updated land use and comp plans ... traditional movement ... we have found with the changes in the land use and strengthening development in LC, that movement wants to go east to

west. People living in LC but there is not a lot of shopping or jobs there. If we tie to SR 46 the traffic that wants to go that way ... it's messy. Mark noted environmental and other issues, and that more homes impacted along 46.Q: How many homes affected by comparison for the two routes? Mark said we can get you that information, he didn't recall those particular numbers.Q: What can we expect as far as noise? We've been told it's even an issue whether we'd get a sound barrier? What kind of fencing then would we have, board on board ....? Mark noted it would be chain link fencing. PIO added typically vinyl coated near residences. Mark noted as we bridge over Wilson Road, the ROW would be pulled in.Q: What's the possibility of killing the exit on International parkway? Mark said SC has expressed there's a critical need for making sure folks can come to 417 .... There would be two ramps on east side. International Parkway is most important to the county.Q why put traffic on International Parkway? It's not big enough. Mark said DOT has been asked by SC to look at that.Q: what's the reasoning for SE curve from 46? Mark noted we tried to thread the needle, minimize impacts. (Attendees complained en masse about impact to their neighborhood)Q: What's the elevation where it goes from SR 417 to SR 46?A resident stated regarding them not getting any buffering or walls, made comment about "\$140,000 shack houses" along I-4 that have these great big walls. Why, if you're coming up to a neighborhood, why is there cost involved in the decision? I-4 was there when they built those houses. What does it take ... to put up walls, buffering?Mark noted the structured federal process, DOT procedures. We have to do noise modeling ... add 3-D geometry of roadway; determine where are the sensitive noise receptors, homes, churches, etc. .... Then the worst case traffic. When cars are at LOS C, when there's free-flowing traffic and they're going fast. We model that based on speed and volume. If it's 66 db or higher, it's considered impacted. We know several homes in this are will meet that. Next we're required to look at noise mitigation, walls similar to I-4. We have to reduce the noise to 5 db or greater, then there are (?)27 tests, safety, etc, also economic feasibility. How much does the wall cost divided by the number of homes benefited. If it's more than \$40,000/home benefited, it is considered not economically feasible. Again, multiple people called out comments and questions, complaints about the 417 alternative going through their backyard, etc.Q: how much of this really matters? Is it a fait d'compli? Mark said your input does matter at this point in the study. He noted SCEA has the say, but we've been told to continue looking at all of the alternatives.Q: How close are you going to the school? And you're taking the church out?Multiple comments at once about concerns about car accident crashing down off the highway. PIO noted schools near highway are a common configuration throughout central Florida. One woman stated she didn't care what was done elsewhere.Q: When would the noise study be done? Mark noted in a couple of months.Q: Why not veer north of 417 east of I-4 and go up to 46 and go over commercial property? There would be no residential impact? Mark noted that would have to tie in to 417 awfully close to existing 471/I-4 IC, could be operational and other issues.Q: Who is in charge of approving the federal funds you're asking for? Mark said FHWA determines amount of funds for state, and MPO's prioritize projects to receive funding.More rapid fire questions with many people speaking at once. A question about why not buy our homes since you're ruining the neighborhood? Mark said DOT would rather not impact people's property directly.Q: Does the state consider the impacts to the whole community? Mark said we look at direct impacts, which is if we need your property Mark said if you build a road and you're required to take homes and the person wants you to buy all of the property, if the owner doesn't want to stay.Julian Steinbridge, HOA president, noted his property had a direct impact and he did not want to remain with the road in his backyard. That's my worse case scenario. He wants to be purchased outright. Q: what happens to the remaining property? It's still part of the neighborhood? Mark said that's dealt with on a case-by-case basis, could be cleared, turned over for conservation or buffer, just depends. A man said sounds like you're not taking any input. It's already done. Others complained en masse.Resident discussion of getting county officials out to their meeting.Gayle Hoffman said she sent an email to the PIO on July 12 and didn't get a response. PIO said I'd have to look into that, don't recall it. She read the email, which asked what studies have been done on impact to real estate values and when would the road be built? PIO noted the DOT studies I'd seen indicated a transportation improvement of this nature, that made it easier to get from point A to B, increased property values. PIO motioned to Brian, who nodded in ascent. PIO said we can get them copies of the studies.

Mark went over funding issues and schedule, which is largely based on funding availability

Q: Will we suffer during construction?Q: What data is there from pile driving, what data re structural damage to houses?Q: How can you apply for funding if the decision is not made? Mark noted federal agency won't supply money until we're in the next stage. They send money to Tally, and MPO's and Dot set priorities, and some can be earmarked over the next 20 years. The process is incremental. Once we have an approved alignment the state could target some of the federal dollars for this project.Q: What effect will commuter rail have on this project? Mark noted the basic concept takes commuters from Volusia County to Kissimmee; it's a north south route. There is not a lot of interplay between these two projects.Q: Why do we need this if commuter rail is coming? Mark noted they're different projects, different goals. Mark noted SR 46 is a dangerous road. We can't widen the highway because of the environmentally sensitive areas. The purpose of this project is to take traffic off 46.Mark went over need for some 417 connection, went over traffic patterns discovered. Primarily 30% of vehicles on 417 trying to get to Lake County...Q: How do you calculate that, counting cars? Mark noted we run models based on future land use. How many homes are coming in, etc.Q: Do models show that there might be less driving with the gas going up? Mark said in 30 years he's never seen the models come in low.Q: how far will it stay elevated? Mark said at the river, in portions of LC. The real issue is 46 is two-laned and it needs to be widened today.A man complained that 20-15 years ago the 417 extension was going to follow the RR ROW. When I bought my house the models didn't show this path. Mark said the development patterns have changed. In 1986 LC had no idea they'd have the development they have today, and same in SC.Q: will there be an IC before here and LC? Mark went over slip ramps and IC's in LC.Q: if you're bridging over Orange, what about at the school? Mark noted at the school on Wilson it will be a little higher than the ground but not much.Q: can you put ramp to International Parkway on the inside of the pond instead of the outside so the pond can serve as a buffer to our neighborhood?Mark noted we're looking to trying to shift the alignment.Discussion that at Wilson the bottom of the bridge as to be 16', and then another 8' for the superstructure. Some confusion about bridging Wilson Road vs. the school area.Rapid fire questions, many people speaking at once. Mark said the 417 IC would be similar to the 429 and Turnpike.Q: Why build bridge over Wilson when you're going back down (in elevation)?A man complained about the uncertainty of what's going to happen, if you want to sell your house, there's a freeway coming in so people say don't buy over here. PIO noted there are people who want access to this type of transportation improvement, just look at 417 heading east and south, all of those new subdivisions that have been built right up to the highway. PIO noted I bought my house at nexus of 417 and 408 so I could get anywhere I wanted in Central Florida in 30 minutes, and there are a lot of people who want that convenience. Residents yelled out they don't want it. PIO noted that's fine, but if they try to sell their house there are folks who do want that access.Mark said regarding the schedule, we're looking at refinements for neighborhoods including yours. And will get back with you. We hope to have those adjustments, do detailed analysis, share with the public and come back here. We are looking to draft preferred alignment, impacts and costs by end of the year. but there are still issues have to work through, maybe by first quarter '07, to present to SCEA, LC Commissioners, Mount Dora, OCEA, City of Apopka. They may say yes, or they may say go back to the drawing board. So we might to have make additional revisions.Mark said we're shooting for March public hearings on the preferred alternative. Then seek approval from various entities and FDOT leadership. If there is consensus, we would seek federal approval of a single alignment and concept. The EA has some money for design and partial ROW, so they may proceed. DOT has \$40 million for ROW in LC, but that may be able to be moved around.If the money is there you're looking at 3-4 years minimum on a project o this size for design, ROW 3 threes for all of it, then 2014 to start construction. Looking at minimum 2-5 years if all of the money is there that we needed. Project now approaching \$2 billion.Q: can't they do something if you're going to spend billions to build the road, then should be able to compensate people? Mark said nothing in the law right now allows that.Q: where are you likely to start? Mark said they would probably identify key ROW areas given development pressures to get that locked down. I suspect they will start construction in OC, and LC before SC. The EA has indicated they might have money sooner.Discussion that Tall Trees wants to partner with Capri Cove and other subdivisions in the area and meet with Comm. Carey.

They noted a show of numbers will have greater impact. PIO to get back to them with following info: Deaths on 46 between Orange (where 417 alt. drops down) and I-4; residential and other impacts; DOT studies on property value impacts; traffic number comparisons between 46 and 417 alts.; and to research Gayle Hoffman email. Mark and PIO stayed after to talk with residents. One resident noted they're really nice people and have a great neighborhood and don't want that ruined. Julian/HOA president thanked us for coming, noted there were 130 homes in Tall Trees; no one knows they're there. Can't find this kind of neighborhood for this price... someone noted subdivision was 14 years old --830 p.m.

8/21/2006	8:32 AM	Deb Rogers emailed: I apologize; Jerry will not be attending this meeting. He just wanted you to be aware of the meeting taking place. Sorry for any confusion. Deb
8/21/2006	8:27 AM	Debbie Rogers/Jerry McCollum/SC Engineer's aide copied PIO on email to Comm. Brenda Carey and her aide Amy Lockhart, copied PIO: "We wanted you to be aware, if you are not already, of the meeting with the Tall Trees HOA (outlined below). Jerry will be in attendance. Deb (she forwarded PIO email re: HOA meeting)
8/19/2006	4:43 PM	PIO emailed Julian Steinbridge/Tall Trees HOA: "Hello Julian, Just wanted to let you know that, at a minimum, Noranne Downs and Brian Stanger with FDOT, Mark Callahan with CH2M Hill, which is conducting the study, and myself will be attending your HOA board meeting Tuesday at 7 p.m. Typically Mark gives a presentation letting folks know how we got to this point, and then we open it up for questions and ideas. We look forward to seeing you all then. Let me know if you have any questions or need anything else from me beforehand. Mary Brooks"
8/14/2006	3:17 PM	PIO called back Julian/Tall Trees HOA to let him know I'd forwarded the meeting request to FDOT and other project team members. PIO asked if many of them can't make it, could we schedule another meeting with the board? He said he's talked to enough people and they'd rather at least have the PIO there on Tuesday. Anyone else that can come also would be fine. PIO noted we had not been inviting county commissioners to these types of meetings, but they're welcome to invite who they want. He said he didn't know so that's fine. He said since it's a board meeting so anybody that wishes to attend from the neighborhood is going to come, don't know how many people will come. PIO said that's fine. PIO said I will attend in any case, and will email him on who else can attend, hopefully at least someone from FDOT. He asked if anything had changed since the meeting? PIO noted not at this point, in fact we're having our first progress meeting this Wed. since the workshops so we've got a lot of things to go over, more than 300 comment forms. He said okay and we'd see you Tuesday. He asked if I'd been there before? They're on Wayside, behind the car dealer. PIO said I could find it.
8/14/2006	2:13 PM	Julian Steinberg, pres. of Tall Trees called and left MSG I just want to confirm next Tuesday Aug. 22 at 7 p.m. our monthly HOA meeting at the clubhouse. Please confirm with me by either email or phone number 407-474-6902 jjstein1@earthlink.net and also whether or not you're bringing a county commissioner to the meeting. Thank you and we look forward to your attendance. 407-321-4919
8/9/2006	1:58 PM	Attended public workshop on 8/1/06.
7/28/2006	10:09 AM	407-321-4919 Julian Steinbridge called and said I live in Tall Trees. I, was going to go the mount Dora meeting, can they still talk about our area as well? I'm the president of the HOA. Couldn't go to meeting because was out of town on business trip, back up to Wilson o the curve, our house and next door. Mine shows it would go through back yard. PIO asked for date of next HOA meeting. He said third Tuesday of every month at 7 p.m. at the clubhouse at Tall Trees, would Aug. 22, will confirm it. We changed it to ... He said on my route, what are the chances of 417 being chosen? PIO went over advantages and disadvantages of each alternative, noted it's a challenge, trying to minimize impacts. He noted he understood that many people want to get to 417. I travel that way myself. As a homeowner I'm trying to plan what to do. My concern is for my own individual ... My house is one of two lots that cut right into the ROW. From that standpoint... if I was across the street... I don't have any problems with building more roads, because I travel

the state of Fla. And I want all the improvements I can get, but in my particular case the circle gets smaller. I've been here 35 years and I've seen this town grow. Driving is really difficult. For me to go the airport I've got to leave a half day early. ... He said he'd confirm the HOA meeting time on Monday. PIO said when I hear from him I'll get with the senior project manager Mark Callahan to move forward. He said sounds fine.--1024 a.m.

12/27/2006	8:24 AM	PIO responded to Valerie Whiting email: "Hello Valerie,All of the last public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the colored, highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. There are several maps for alternatives in Seminole County.Since the workshops last summer we have been meeting with community associations, churches, schools and government officials to help evaluate and refine the alternatives. We are wrapping up impact assessments now, and in January expect to have a draft recommendation for an alignment and interchanges. That draft recommendation will have to be reviewed and revised by local governments and state agencies. We will subsequently bring forward the preferred alignment alternative(s) to formal public hearings in April.Once you've reviewed the maps, feel free to email or call with further questions. Happy Holidays!Mary Brooks"

10/17/2006	4:00 PM	Mark/Ch2m emailed team: "Linda Stewart is a candidate for Lake Co Commission Seat currently held by Catherine Hanson. Ms. Stewart won the September primary and will be running against Egor Emery. Ms. Stewart had asked for a briefing on the Wekiva Parkway and I met with her on Monday October 16, 2006. I provided an overall review of the Wekiva Parkway and its various components. I provided some detail discussions on issues associated with the following areas: " SR 46/US 441 Interchange including access issues and Pond Road concerns " Alignment of six-lane SR 46 east of US 441 " CR 46A relocation alignments including new options developed in response to community concerns " Access alternatives for Lake Co EastIt was very clear that Ms. Stewart was familiar with many of the issues associated with the Wekiva Parkway. She offered her thought in several areas as follows: " Indicated a preference for the Ponkan Road Interchange. I mentioned that OOCEA will be working closely with Apopka and Orange Co on this issue. " Raised concerns with the new CR 46A options that impact Seminole State Forest and that extend to the east along existing CR 46A. " Supports the three interchange concepts in Lake Co East given continued vehicle conflict on SR 46 with Split diamond concept.Ms. Stewart indicated that she supported the Wekiva Parkway project.

Contact Notes Ruth Stokes Assist To Sell Real Estate

Date Time Regarding  
3/8/2006 8:45 AM PIO responded to Bobbie Stokes' email: "Hello BobbieWe are years away from construction. We're still in the PD&E Study phase, which should finish in spring 2007 with an approved alignment. From there we have to go into final design and then right of way acquisition, before we can start construction. At this point we do not have full funding for anything but the study and a little design. Unless some major funding becomes available in the near future, we are not likely to begin construction until perhaps 2012 or so. The schedule is very tentative at this point until the funding issues are resolved.We'll be having our next public workshops probably in July 2006 to review the more viable alternatives. If you're on the mailing list, you'll get the newsletter and meeting notices. If not, send me your address so I can add you.We should have some updated maps to post on the Expressway Authority website in late March or April. Be sure to check the site from time to time at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com)I hope that helps. Let me know if you have other questions."

Date Time Regarding  
8/25/2006 5:06 PM "Aug. 25, 2006Tom Stone5711 Deer PathSanford, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Tom Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is

expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

	2/10/2006	11:14 AM	<p>Brian/CH2M Hill emailed: "Mary, Laura Strach (407-629-8880) called in for information about updated WP concepts in Seminole Co. Apparently, she had already talked to you, but she also called FDOT-D5 and was then referred to Mark C. for follow-up. I gave her similar information regarding the elimination of the concept connecting with I-4 at 17/92 and let her know that the updated concepts will be available in the late-March timeframe. There is no need for any further follow-up at this point. Regards, Brian</p>
	2/7/2006	2:27 PM	<p>Laura Strach/Miller Legg responded to PIO email: "Thank you Mary. This was very helpful Laura Strach, E.I. Engineering Miller Legg 631 S. Orlando Ave., Suite 200 Winter Park, FL 32789 Phn: (407) 629-8880 Fax: (407) 629-7883 Email: <a href="mailto:lstrach@millerlegg.com">lstrach@millerlegg.com</a> Website: <a href="http://www.millerlegg.com">www.millerlegg.com</a> Improving Communities. Creating Environments.</p>
	2/7/2006	2:00 PM	<p>PIO emailed SC initial alignment alternatives concept to Laura Strach as requested: "Laura Was nice speaking with you. As requested, please find attached the Seminole County initial alignment alternatives for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. As noted, these maps are from the November public</p>

workshops and are in the process of being updated based on public comment and local government input since the November meetings. As noted, the yellow or northernmost alternative has been eliminated from consideration. We expect to have updated maps in March. All of the public workshop maps and other materials are on the Expressway Authority website at [www.ocea.com](http://www.ocea.com) or [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). Under "Construction News" click on the text link for "Western Connectors," which will take you to the Wekiva Parkway page. Then scroll down to the text links for the maps, etc. The updated maps also will be posted on the website. I hope this helps. Please feel free to call or email with other questions or concerns."

2/7/2006	1:47 PM	Laura Strach 407-551-0002 called to say she was doing a preliminary study for some properties for a developer in Sanford, and heard some of them are in the project study area. Are there any restrictions for development because of this? PIO noted not aware of any since we don't have an alignment yet; we're just in the preliminary study phase. PIO noted development is ongoing in this area, and that's something we'll have to deal with when we have an alignment and are ready to start acquiring ROW. She said she just wanted to be sure. She noted a couple fall right in middle of study area and couple are close to 417. She said she also contacted CH2M Hill and SC. Her project is due end of February. We were just curious as to how that works. She said I remember when 408 went through, they bought land from individuals. My clients want to do condos, so there would be lot of people affected. PIO asked if she had seen the initial alignment alternative map, which we're in process of updating? She said she had a map that shows the wide area at I-4, but doesn't show alignments. PIO said that's the study area map and I can email her the initial alignment alternatives, with understanding that it's being updated. She said that would be very helpful, send to her at <a href="mailto:lstrach@millerlegg.com">lstrach@millerlegg.com</a> . PIO also noted the yellow alternative that would connect to 17-92 already has been eliminated and that will be represented on the updated map. She said okay and thanks so much. PIO asked if she wanted to be on the mailing list, but she said that's not necessary.

Date	Time	Regarding
1/12/2006	10:19 AM	From: Brian.Manwaring@CH2M.com [mailto:Brian.Manwaring@CH2M.com] Sent: Thursday, January 12, 2006 10:19 AM To: mbrookssr417@cfl.rr.com Cc: Mark.Callahan@CH2M.com; David.Lewis2@CH2M.com Subject: Contact Update Mary -I just wanted to update you on the meeting with Eric Swanson and another property owner contact.Dave, Gary and I met with Eric yesterday to discuss the property that he is developing. The alignment had been shifted slightly to the east, which impacted him more than he had originally anticipated. Although disappointed, he understands the reasoning for the shift. Gary mentioned to him that we should have a more definite idea of the alignment around June. Eric is concerned about the timing of land acquisition. We will stay in contact with him in the coming months. Theresa Newcomer called FDOT, who referred her to Mark, for general information about the WP. I directed her to the website and went over the conceptual alignments with her. No follow up is needed with her at this time. Please add her to the mailing list: 1674 Cherry Blossom Terr., Heathrow, FL 32746. 407.804.8249. Regards,Brian Brian J. Manwaring CH2M HILL407.423.0030 x287
1/2/2006	11:05 AM	Eric Swanson returned my call. Said he wound up getting referred to PBSJ and met with Deborah Keeter/PBSJ ROW, went over the large maps. He said he's going to redo their subdivision so won't affect them so much. Will still plan a retention pond in a location affected, but PBSJ said the Ea would just buy that and build them a pond that worked. He said they were very glad he came in and tried to work with them. He said thinks we're in good shape now. PIO asked if he needed any more maps, etc.? He said he didn't' think so at this point. PIO noted the maps on the website will be updated, new lines going on and some lines coming off, so he'll want to check the website every month or two, or he's welcome to contact me for updates. PIO asked if he was on the mailing list? He said no, he's just been trying to find stuff on the website. PIO offered to add him to list; he said send info to him at 1250 Dunbridge St., Apopka 32703 email heritage-homes@hotmail.com. He said he sat down and looked at the blown up maps with PBSJ, where they're coming through unfortunately besides my parcel there's already a water plant here. They're locked in; there's no room to deviate. Their property is at Yothers and Plymouth Sorrento road. 10 acres and 5 acres, L shaped. 10 acre tract is one they're plowing

through, through the south 200;' and northern corner 150'. He was thankful for the follow up.--1117 a.m.

1/2/2006	10:53 AM	PIO again tried to reach Eric Swanson/Heritage Homes 407-497-7031, left a MSG noting wanted to make sure he got my previous MSG and to call me to help get info needed. Reiterated that all the files were on the website, gave address and text links.

Notes			
Date	Time	Regarding	
8/30/2006	11:15 AM	<p>PIO prepared response to Suzanne Symanski/Capri Cove: "Hello Sue,Below is the type of information that I have provided to realtors previously. Hopefully your realtor will find it helpful in addressing questions from potential buyers.As we are still in the Wekiva Parkway Project Development and Environment Study (PD&amp;E) phase, exact details are still being developed with regard to roadway elevations, lane configurations, retention pond locations etc. The Viable Alignment Alternatives and other maps, which were presentedat public workshops July 25-Aug. 1 are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.The public workshops were attended by more than 1,200 people who have submitted more than 500 public comment forms. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. We are also in the process of revising some of the alignment alternatives based on the public comments and other input received. That information will be used to draft a preferred alternative by early next year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings probably in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other local, state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. The project is not fully funded, and the availability of funding will greatly affect the development schedule. Typically, once we would finish the PD&amp;E Study, we'd go shortly thereafter into final design. For a project of this scope, design could take 3-4 years. At some point during final design, perhaps 30% completion, the Expressway Authority and FDOT would begin advance property acquisition typically large parcels that couldn't avoid being hit even if the alignment shifted slightly). Right of Way acquisition would begin in earnest typically once design is around 60% complete. Acquisition on a project of this nature could take 3-4 years, and then we would move into construction.A project of this magnitude also likely would be built in segments, the limits of which would be determined during final design. So you could be looking at 2013-2014 before construction began - if funding were available. Please be advised that</p>	

timeframe could be longer or shorter based on funding and other variables. With the increasing costs of construction materials, fuel and land, funding will continue to be a challenge. Because of the unknown variables, a completion timeframe for the project is not known at this time. I invite property owners and potential homebuyers to stay involved in the development process for this major transportation improvement. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. Please feel free to call or email me with questions or concerns. Mary Brooks

8/29/2006	6:18 AM	Good Morning Mary, First I want to Thank you and the rest of the team for coming and speaking to our community last night. I differently left the meeting with the feeling that you are listening to our concerns. Last night when we spoke you said that you send information all the time to real estate agents regarding the road, would it be possible to pass that information on, so that I may pass it on to my current agent. Currently we are listed with Assist 2 Sell, but we may be switching when our contract ends in a couple of weeks. Thank you again for your time and assistance, Sue Szymanski 216 Capri Cove Pl Sanford, Fl 32771 Home email: sue-ski@cfl.rr.com Cell - 407-474-7182

9/29/2006	4:00 PM	PIO returned call to Tony/The Barclay Group, who thanked me for calling back so quickly. PIO walked him through accessing workshop maps on website. PIO noted there are about 30 maps there, depending on what area he's interested in. He said he just wanted to see the whole project. PIO noted there's an overall project layout map there also. He asked if it was better quality than the one in the update? PIO said yes, it's a PDF that he can zoom in and out on. He asked if we had selected an alternative? PIO noted no, we're still evaluating all the feedback from the workshops from the public and local governments and state agencies. PIO noted we hoped to draft preferred alignment alternative in Dec -Jan., including interchange locations. Would have to undergo further government review and then public hearings in March 2007. He asked if the project was funded? PIO noted no the last cost estimate was \$1.6 billion and we had about \$100 million between the two agencies, so definitely not fully funded. PIO asked if he was on the mailing list? He said no, he wasn't. PIO noted I was en route, but if he emailed me his contact info I would add him to the project database. PIO gave him my email address, and he said he would. --407 p.m.		
9/29/2006	3:47 PM	Tony ??/the Barclay Group 727-?????? called and left MSG that he got copy of summer 2006 update off the website and couldn't read the map in it even after blowing it up. He asked if there was a way to get a better map to call him back.

Contact		Nita Taylor	Plymouth Landings HOA
Notes			
Date	Time	Regarding	
8/4/2006	10:17 AM	Nita Taylor called back , I'm little concerned because I jut recently moved here from Miami bought house in Plymouth Landings off Plymouth Sorrento Road. It's extremely noisy and busy. Where is new roadway going to be? PIO noted 414/429 IC will be to the west of her at TL Smith Road, about a block or so to the west, and in a few years the Wekiva Parkway will pick up from there.She's just near 441 and Plymouth Sorrento road. I'm not able to sleep at 4 in the morning because of the trucks going up and down. It's not the cars that are the problem. All of the homeowners along there are upset. There has to be something that says trucks can't disturb the peace and enjoyment of your home. I came from Miami and down there trucks couldn't just drive on residential streets. PIO noted that's true to some extent on internal neighborhood streets with 25 mph speed limits; most truckers like to avoid those anyway. But PIO noted Plymouth Sorrento Road is not a neighborhood road it's a connector road from 441 to the north to Kelly Park Road and beyond. That's a public thoroughfare, lot of those trucks heading to the various nurseries along Plymouth Sorrento road for pickups and deliveries etc.PIO noted the MBX IC and Wekiva Parkway are expected to take some traffic off Plymouth Sorrento road, but can't guarantee her that trucks will take it since it'll be a toll road. She continued to be upset, said there must be some sort of law to keep trucks off that road, she's ready to sell her house because of the noise and so are other homeowners. She said she got something from an attorney about the project and she's going to pursue that since I can't give her any guarantees. --1032 a	

m.

8/4/2006	9:41 AM	PIO returned call to Nita Taylor 407-264-5900 x 2115 Nieman Marcus, woman said store opens at 10. PIO asked if I could leave or MSG or have her voicemail? She said employees were in a meeting, not back to counters until 10. She said she'd take a MSG for her. PIO left my contact info, noted Nita wanted to know how the project would affect her house. She said she'd call Nita right away and give her the MSG.
8/3/2006	1:52 PM	Nita Taylor 407-264-5900 x 2115 called and left MSG I would like to speak with you re: location of the new beltway coming up. I just bought a house over there. I need to know where the proposed beltway will be and if you think it will alleviate traffic on Plymouth Sorrento Road. It's awfully busy and noisy and I'm getting a little frustrated about my move there. If you could give me a call maybe I can make a decision.

Lou Telsey

Tall Trees HOA

Regarding

Lou Telsey 407-688-7580 called and said he went to SC meeting about proposed highway coming through my back yard. Does it do any good to submit comments? PIO noted we received about 175 so far and will be tallying those. He said and you'll make a decision based on that? PIO noted we will consider public comment, as well as local government and state agency feedback and continuing engineering analysis - all of those things have to be weighed in this. He said my biggest fear is, of the number of people that's going to benefit from the road travel wise, and the few that are going to get hurt property value wise, those of us who are going to get hurt won't be heard. We don't have a chance. It's going to be 400' from my backyard. I can't imagine anyone would do that to someone. I've got I-4 on my back yard, 400 feet is close. People further south from me in Tall Trees, and they're going to have it 100' away. How are we supposed to sell our house with this thing coming through? Going to the meeting seemed like the minds were already made up. And that little comment box, how were you supposed to get the form in that little slot? PIO noted we emptied the boxes several times an hour, and if he had trouble he could have given the form to one of the staff members. He said it just doesn't seem like what we have to say is going to matter. The ones it really matters to is such a small percentage that ... PIO noted that I bought my house at the nexus of 417 and 408 for the convenience of getting where I needed to go in 30 minutes or less. Noted I can see 417 from my backyard. PIO noted there is large portion of population that wants the convenience, look at all the houses being built backing up to 417. PIO noted this is a frequent issue to come up, and FDOT has done a number of studies that show a transportation improvement such as this improves the area and improves property values. Perhaps he's not among them, but a large portion of the population wants to have access to these types of roads. They want to get where they want to go. He said maybe some times it doesn't hurt property values, but I believe in this case it will. And why? When there's already an alternative on 46, already businesses there, I don't see where anyone would get hurt. PIO noted we still have residential and other impacts on 46 because existing corridor only 200' wide; we need 265-300'. So 46 also has its issues as well. He said it's going to reduce people's property values. I'm sorry you don't feel that way. People are going to want to unload their houses before it goes through. Everybody feels they're going to lose value. Nobody should have to lose value at the expense of wildlife or anything else. I love the wildlife. We've had bears in our neighborhood. I don't want to have my property value that I've worked all my life to accumulate be destroyed by this. I just can't believe the people making the decisions would want this in their back yard. Who is making these decisions? How many people exactly? PIO noted remaining process of study, and that OCEA board, SCEA board, both have 5-6 people, FDOT - don't know how many people there have to review it, probably the secretary, traffic ops, director of operations, etc., and whomever at FHWA, no idea how many people. He said everything we've been doing like going to these meetings is a waste of time. I can't ... everybody feels like it's a waste of time. What's the purpose of going to the meetings and giving comments if we're such a small percentage of the people? You're hurting people. It's not right. Everybody that's doing all the deciding - they wouldn't want it if it was theirs. They wouldn't want it to be done to them. Not one person should have to get hurt because of this. He said we should use the SR 46 alternative, no one would get hurt, it's already there, and it's mostly commercial. PIO noted traffic models show if we go with the 46 alternative, and perhaps politically that's what may happen, that won't solve the problem in the long run because the traffic models show that will break down, and it still won't get people where they largely want to go, which is to 417. He said nobody in Lake Forest is going to get hurt in Lake Forest they're 1/3 mile from 46. I'm just calling and complaining. What else have I got to do? I've worked all my life to accumulate this. Now a road is going to destroy my retirement, the value I would have in my home by then. I'm trying to appeal to people's conscience. Don't do it to us if you wouldn't want it done to you. PIO noted I understand where he's coming from, but noted purpose of the study is to minimize impacts. PIO noted in an ideal world we could build a major transportation improvement such as this in a heavily populated

area like this portion of Seminole County and not affect anyone. But that's not reality. PIO noted each one of these alternatives has its issues, and each one will affect someone. We're just trying to minimize that impact and serve the needs of the overall traveling public. He complained repeatedly about the comment forms being a waste of time. He also complained the box at the meeting for the forms was too small --948 a.m.

11/21/2006	10:14 AM	From: Mary Brooks Tuesday - November 21, 2006 10:14 AMTo: tracy@fullcomp.com Subject: SR 429-Wekiva Parkway PD&E Study - queryHello Tracy,There are no additional maps ready for public distribution at this time since during the review and evaluation process the alternatives are frequently shifted in response to public feedback and agency review. We are still trying to finish evaluating the alignment alternatives and come up with a draft recommendation, which we hope to do in January. That recommended alignment will have to undergo local government and state agency review and revision. After that we will bring forward a recommendation for public hearings, in March or April, and of course have updated maps at that time.The PD&E Study is scheduled to conclude in late spring-early summer. Design on the Orange County portion, being done by the OOCEA, is expected to begin shortly thereafter. However, there is no funding for construction and right of way acquisition also is not fully funded. So there is no set schedule with regard to construction. Best case scenarios, which are tentative at best, put construction on the first segments perhaps beginning in 2012-2015. Again, that would only occur if all of the funding falls into place soon. Otherwise construction could be 10 years away.The PD&E study is underway, so there is no draft engineering report at this point. Those documents will likely be available in the spring.Mary Brooks
11/21/2006	9:30 AM	-----Original Message-----From: Tracy Tennyson [mailto:tracy@fullcomp.com] Sent: Tuesday, November 21, 2006 9:30 AMTo: mbrookssr414@cfl.rr.comSubject: Wekiva ParkwayMary,I received your telephone message, thanks for getting back to me. I am requesting information on the entire Wekiva Parkway project (in Orange County). I understand the parkway will extend through Lake and Seminole counties as well, however I am only interested in the Orange County portion. I wanted to know if there are any maps and plans other than what is on the website. (website link I am talking about: <a href="http://www.oocea.com/futureplans/projectsandstudies/westernconnectors.shtml">http://www.oocea.com/futureplans/projectsandstudies/westernconnectors.shtml</a> )Also, can I get a draft copy of the PD&E that is being completed? I understand that the Engineering report will be done in mid 2007. Do you know when construction is expected to begin?Thanks,Tracy Tennyson, Project ManagerTileston, Simon & Holloway, P.A.17110 Gunn HighwayOdessa, FL 33556(813) 792-1192

Contact		Connie Thomas
Notes		
Date	Time	Regarding
8/4/2006	4:24 PM	PIO called back Connie Thomas 407- 438-1753, let her know I couldn't find anything for the address or subdivision name. PIO asked if the property was north or south of 46? She said it's about a mile north of 46. PIO noted then we won't be affecting that, only affecting right along 46 in that area. She asked for confirmation that we're not affecting the property? PIO said not if it's a mile north of 46 on Round Lake Road, sticking to the 46 corridor. Only properties right on 46 in that area would be affected, might have to take some of their frontage for widening. She said okay well thanks very much.
8/4/2006	4:11 PM	PIO tried again to check Connie Thomas property on LC property appraiser site. Sullivan Ranch property on Round Lake Road. Nothing came up for Sullivan Ranch or 5303 Round Lake Road.
8/4/2006	10:35 AM	PIO tried to research Connie Thomas query, but LC property appraiser site wouldn't bring up round lake road. PIO checked concepts for that area.
8/4/2006	10:17 AM	PIO returned call to Connie Thomas 407- 438-1753 Sullivan ranch which is near Mount Dora on Round Lake Road, PIO asked for address. She said think it's 5303 N Round Lake Road. It's a new development going out there and they have a senior section. PIO said I'd check on location and give her a call back. She said that'd be wonderful; thank you.
8/3/2006	7:55 PM	Connie Thomas 407- 438-1753 called and left MSG I'm calling about the expressway situation going on right now. I was thinking about relocating to Sullivan Ranch which is near Mount Dora on Round Lake Road and I'm wondering if Round Lake and Sullivan Ranch will be affected by this. Please return my call I would appreciate it.

11/6/2006	3:28 PM	Dave/Ch2m responded to PIO Zellwood Station HOA email: "I am mailing 2 larger scale plots to Mr. Thomson today. Thanks for the address." He also sent transmittal after sending maps out.
11/3/2006	5:18 PM	PIO forwarded Robert Thomson/Zellwood Station address to Dave/ch2m as requested to send oversized map.
11/3/2006	6:22 AM	Robert Thomson/Zellwood Station Co-op President emailed: "Mary BrooksI appreciated you and David Lewis taking the time to present the information on the proposed extension of Rt. 429.I requested of David an enlargement of the section that will impact on Zellwood Station that would show the Community and the portion of the highway that will run north from Yothers Rd. to Ponkan Rd. It will be displayed in the Administration Office for

information purposes for the residents of Zellwood Station. If the scale can be shown, it would be useful. The material can be sent to me at Robert Thomson, President Zellwood Station Co-op, Inc. 2126 Spillman Drive Zellwood, FL 32798-9799. Thank you, Robert Thomson

11/2/2006

6:14 PM

PIO met Dave/CH2m Hill at Zellwood Station HOA meeting at the clubhouse restaurant. Robert Thomson, co-op president, led meeting and did introductions. PIO passed out previous project newsletter and noted we're working on the next one now, also my contact info is included if people have additional questions, want to be on the mailing list, etc. There were 43 residents in attendance. Thomson said they were expecting more people. Dave did a general overview of the project, agency jurisdictions, noted nothing is set in stone regarding alignments. He noted in Orange County there was not much wiggle room because we have to meet up with the MBX, and City of Apopka passed a resolution that said we have to stay west of Plymouth Sorrento Road. He noted there were two alignments with a potential IC either at Kelly Park or Ponkan. He noted the city of Apopka and Orange County have to make a decision on the IC location. He noted we have two public meetings on the Orange County portion, in November 2005 and July 2006. He said residents seem to favor Kelly Park. The traffic is not too different between the two locations but Kelly Park seems to distributed traffic a little bit better. Q: How close is the roadway? Dave said the closest house to the ROW is about 400' away. To the south, it's farther away about 800'. Dave noted we had to move away from the parcels on Plymouth Sorrento Road. There were 3 landfills (two former OC and one private). He said we're looking at the cheapest land and the least impacts. We don't actually get onto Zellwood Station, but it's 400' feet to the closest house from the ROW. Dave pointed out the toll plazas, systems IC location. Someone asked about all of the development going in with a road coming ... Dave noted we can't tell property owners what they can do with their property because of a road that may or may not be built. Q: are there going to be buffers going in? Dave noted we are doing a noise study. One of our technicians was out there the other day. ... He noted anything over 66 db would be considered intrusive. Q: is the road raised or at the elevation of the land? Dave said basically it will be at grade unless you're approaching a bridge. He noted even without an IC there will be a bridge at Ponkan. It will be closer to at-grade going south. Q: so there will be more tolls if you get on 429 at SR 50? Dave noted that's correct, pointed out toll plaza locations. Q: according to the new the MBX has been cancelled? Dave noted funded phase and unfunded phase. PIO added contractor bids out now for first section of phase I, with construction to start on that in January. Next section of phase I to start construction in spring 2007, so we are moving forward. Q: what's the anticipated traffic flow on the Wekiva Parkway? Dave noted 2032 design year it's projected the traffic - with growth and development plans plugged in the model - 60,000-70,000 in OC, and 90,000 in SC. Q: what's the purposed of the whole thing? Dave noted to complete the western beltway. We already have an Eastern beltway. Re: question on timeframe, Dave noted we hope to have conclusion on viables by Dec -Jan, recommend preferred alignment to FDOT and OCEA, then go into public hearings, finalize engineering documents, and have an approved preferred alignment by spring. He said normally the next step would be to take the preliminary work and go into final design, then ROW and construction. He noted we're talking about 28 miles of new roadway - it's very expensive. The I-4 IC could be several hundred million dollars. The project may be built in phases over time. He said the EA, assuming the MBX second phase comes back into the work program, the EA through bonds and toll revenue could have the capability to get started on the OC section, but they would have to be able to make a connection to SR 46. This thing's a long way off. If the funding were to become available soon, you're looking at maybe ROW acquisition in 2012, and construction could be phased over 10 years. So we're talking at least 6-7 years to get started if everything were to fall in place. Q: will it be elevated when paralleling SR 46? Dave noted the sections that have 3 wildlife bridges over the wildlife corridors. One bridge will be more than a mile alone. That's a lot more than what's there now. Q: does it impact the airport over here? No. Meeting broke up, but some folks stayed to look and boards and ask a few more questions. Robert Thomson requested a large scale map for their office. Dave said he'd get address from PIO and forward to him --730 p.m.

8/7/2006	1:11 PM	Attended public workshop on 8/1/06. Submitted comment form: "Lake County east - prefer maps 2 and 5 only. No light at Neighborhood Lakes intersection. Keep Wekiva Parkway elevated as much as possible. Seminole County - 2 lane access road only - 4 lane is not needed. Will not need to move gas line. Wekiva Park Drive and 46 - Montessori School should become drainage pond. It is the lowest site and school will be an eyesore. School traffic will be dangerous. Orange County exit should be at Ponkan Road only where populations is, not Kelly Park or both. Road should connect directly to 417 in Seminole County."

8/7/2006 10:29 AM Attended public workshop on 8/1/06. Submitted comment form: "Most of our doctors, shopping, pharmacy and churches, plus our daughters' employment as a nurse require crossing existing Wekiva River Bridge. Due to age and driving problems and additional difficulty of getting on a fast road raises the possibility of more accidents. Therefore we suggest strongly that two-way access across Wekiva River be maintained as a frontage road. Sure it would cost more money, but for the sake of safety it should be done."

4/7/2006 4:33 PM PIO responded to Dave noting would do and asked for the mailing address for Noah Touchton.

4/7/2006 4:07 PM Dave/CH2M Hill emailed PIO and Brian M.: "Please add Noah Touchton [(352)383-8654] to the mailing list. He is a property owner about a mile south of SR 46 off Wekiva River Road in east Lake Co. by the Wekiva River. He was referred to us by Lake Co. Comm. Hanson. I have spoken to him and addressed his concerns."

Contact Notes Melissa Tozier  
Date Time Regarding  
2/28/2006 8:50 AM  
PIO drafted and sent detailed response to Melissa Tozier, copied Mark/CH2M Hill and City of Orlando officials as requested: "Good morning Melissa,I'm Mary Brooks, the public information officer for the State Road 429-Wekiva Parkway & S.R. 46 Bypass Project Development and Environment (PD&E) Study. I apologize for the delay in getting back to you, but your query had to be referred from the City of Orlando to the project team, and was only received yesterday.I'd like to offer some information regarding the various concerns mentioned in your Feb. 17 email. This transportation project is being developed jointly by the Florida Department of Transportation and the Orlando-Orange County Expressway Authority, with input from affected local governments and the Governor-appointed Wekiva River Basin Commission. The Commission, which is includes state wildlife and environmental officials, is responsible for making sure the Parkway and Protection Act is adhered to with regard to development of the roadway and other initiatives. The study area for this project begins at US Highway 441 near Plymouth Sorrento Road, and heads north toward S.R. 46. The S.R. 46 Bypass would circumvent the Mt. Plymouth and Sorrento communities, as requested by those residents, and head west to connect with U.S. 441 in Mount Dora. The rest of the Parkway would head east generally along the S.R. 46 corridor to tie in somewhere on Interstate 4 in Seminole County.There is no alignment yet for this project, which obviously is still in the very early stages. In November 2005, the FDOT and Expressway Authority held public workshops in Lake, Orange and Seminole counties to get public comment and feedback on a set of initial alignment alternatives. Nearly 1,150 people attended these meetings, and we have received about 400 public comment forms, with some of those still coming in. Since those public workshops and other meetings with local government officials, the project team has

been refining the alternatives: some have been eliminated, others shifted or otherwise tweaked and new alternatives have been added for consideration. For example, the Seminole County Expressway Authority requested that the yellow or northernmost alternative that would have connected to Interstate 4 at U.S. 17-92 be removed from consideration, and that a new alternative along S.R. 46 and heading down International Parkway to connect to the S.R. 417 be considered. We expect to have updated maps showing the latest set of alignments, or more viable alternatives, in late March or April, with the next public workshops slated for mid-summer. The Parkway, as you may know, was authorized by state legislation, the Wekiva Parkway and Protection Act, which was signed by Gov. Bush in June 2004. The state law was the result of years of work by governor-appointed committees to address a litany of pressing issues in the Wekiva River Basin. Chief among the many issues being addressed - from water quality and groundwater protection to overhauling local government comprehensive plans to better tackle managing area growth - were the protection of wildlife and the environmentally sensitive lands that make up one of the most unique resources or jewels in the state. Recommendations by the Wekiva River Basin Coordinating Committee and the Wekiva Basin Area Task Force, which were made up of citizens, environmentalists, large land holders, developers and local and state officials, created the basis for the Parkway and Protection Act. The law includes a host of design criteria that must be met, such as accommodating wildlife crossings and including vegetative buffering, in order for the road to be built in such an environmentally sensitive area. Also, the consensus was that much of the roadway should be elevated, which would greatly reduce the type of direct conflicts currently witnessed on S.R. 46 and other area at-grade roads between vehicles and bears or other migratory species. Members of the various committees shared similar concerns to yours about "unmitigated access to once wild places." Hence, the number of interchanges allowed for the project was limited. I have attached a copy of the Coordinating Committee's Final Report, issued in March 2004, which describes the many issues considered, again wildlife, habitat and groundwater protection and growth management being chief among them. Also as required by the Parkway and Protection Act, the Expressway Authority and FDOT are required to try to acquire four parcels totaling nearly 10,000 acres for conservation as part of the development of this major transportation improvement. Several initiatives also are currently underway as required by the Parkway and Protection Act, including Comprehensive Plan reviews by local governments and Florida Department of Community Affairs, stormwater regulations review by the St. Johns Water Management District, septic tank regulation reviews by Florida Department of Health, as well as several other activities. The need for the Wekiva Parkway project is clear. The Wekiva Basin is an incredibly beautiful and desirable area that has drawn a tremendous number of new residents in the last decade or so. The additional traffic has contributed to significant congestion and other safety issues on area roads, in particular S.R. 46. The goal here is to address those growing traffic volumes and safety issues with a project that is also mindful of the surrounding environmentally sensitive nature of the area. We welcome your feedback and you are welcome to contact me with any other questions or concerns. If you will send me your mailing address I will add you to the project database so that you will receive newsletters and meeting notices. We appreciate your interest in this unique transportation improvement."

2/27/2006	5:30 PM	Charles/City of Orlando responded to Mark: "Mark: Thanks! On behalf of Laura Bornfreund, I will say that the City will follow the course of action you recommended. Charles A. Ramdatt, P.E. Transportation Engineering Division Manager City of Orlando Phone (407) 246-3186 Fax: (407) 246-2892
2/27/2006	5:29 PM	PIO responded to Mark/CH2M Hill: "I will put something together for Ms. Tozier."
2/27/2006	5:15 PM	Mark/CH2M Hill copied PIO on email to Charles/City of Orlando: "Charles, Thanks for the heads up. As you know the Wekiva Parkway has been the focus of two Executive Orders from Governor Bush which resulted in the Wekiva Parkway and Protection Act of 2004. All of the issues brought up by Ms. Tozier (and many more) were addressed as a part of the extensive work of the Wekiva River Basin Coordinating Committee and the Wekiva Basin Area Task Force which forms the foundation of the legislation. Several initiatives are currently underway as required from the Wekiva Parkway and Protection Act including

Comprehensive Plan reviews by local Governments and Florida Department of Community Affairs, stormwater regulations review by the St. Johns Water Management District, septic tank regulation reviews by Florida Department of Health, as well as several other activities

The Act also included an environmental land acquisition effort for four key parcels in the Wekiva area. If it is OK with the Mayor's office, I would suggest that Mary Brooks, the Public Involvement Lead for the Wekiva Parkway, can formally respond to Ms. Tozier and perhaps the Mayor could reply with a note indicating the Study Team will respond to her specific comments. Thanks, Mark Callahan 407 423-0001

x250 \_\_\_\_\_ From: Charles.Ramdatt@ci.orlando.fl.us [mailto:Charles.Ramdatt@ci.orlando.fl.us] Sent: Monday, February 27, 2006 4:27 PM To: Laura.Bornfreund@CityofOrlando.net Cc: Charles.Ramdatt@ci.orlando.fl.us; Roger Neiswender@CityofOrlando.net; Francis.Flynn@ci.orlando.fl.us; Jeffrey Arms@CityofOrlando.Net; Callahan, Mark/ORL Subject: Re: Fw: extension of Orlando's beltway- EMAIL TO MAYOR DYER Laura: This particular project, in various parts, is under the jurisdiction of Orange, Seminole & Lake Counties; the Florida Department of Transportation, the Orlando-Orange County Expressway Authority, the St Johns River Water Management District, the Florida Department of Environmental Protection, the US Army Corps of Engineers, and others. Unfortunately, the City of Orlando has no jurisdiction there. The Governor had previously empaneled a task force to review all the sensitive social, environmental and political concerns related to the project. Only after favorable constraints/recommendations were issued by the panel did he allow the project to go forward. I believe the project is in the early stages, with alignment review currently underway. The person who is best able to address public comments or concerns is Mr. Mark Callahan at the firm of CH2M Hill. He is a very sharp professional is well-prepared to handle public comment. By copy of this e-mail, I am advising him of the citizen's correspondence. Charles A. Ramdatt, P.E. Transportation Engineering Division Manager City of Orlando Phone: (407) 246-3186 Fax: (407) 246-2892 Laura A Bornfreund/EXO/EXO/Orlando 02/27/2006 01:02 PM To Roger Neiswender/TRN/TRN/Orlando@Orlando cc Charles Ramdatt Subject Fw: extension of Orlando's beltway- EMAIL TO MAYOR DYER Good afternoon, Please review the e-mail below and have someone respond to Ms. Tozier by 3/3. Please copy me on the response. Thank you for your time! Laura Laura A. Bornfreund Office of the Mayor Press Office 400 S. Orange Ave. Orlando, FL 32801 Fax: (407) 246-2842 Phone: (407) 246-3423 City website: www.cityoforlando.net

2/17/2006 9:51 AM

Toziergang@cs.com 02/17/2006 09:51 AM To mayor@cityoforlando.net cc Subject extension of Orlando's beltway Mr. Dyer, I am writing today to express my concern about the rapid rate of loss of natural areas in our state. The Orlando-Orange County Expressway Authority (OOCEA) plans to extend Orlando's beltway further north, connecting Highway 441 to State Road 46. The proposed extension would intrude on the environmentally sensitive Wekiva River Basin, severing the habitat corridor linking the basin's black bears to the Ocala National Forest population. Unchecked development is claiming countless acres of land, and essential wildlife habitat. New roads and highways enable and encourage this loss by providing unmitigated access to once wild places. In addition to the loss of habitat, roads and highways have extreme adverse effects on ecology. Countless animals are lost in road construction or in collisions with vehicles. Once a road is built, the surrounding physical and chemical environment is so altered, many species will avoid the area. Transportation corridors can effectively wall off habitat for migratory species. Transportation planners can go a long way to alleviate or aggravate this problem. In designing new roads, do you take wildlife and the preservation of natural areas into account? What steps do you take to avoid causing more damage and loss? How closely do you work with our state department of natural resources and federal agencies to prevent further endangering our wildlife? I am one of a growing number of citizens who are concerned about the loss of irreplaceable natural areas and the corresponding pressure on wildlife. We support continued economic growth, but not at the expense of irreplaceable habitat and the unique beauty of our state. Thank you and I look forward to receiving your response. Sincerely, Melissa Tozier

Date Time Regarding

7/20/2006 1:40 PM Prepared concept letter for Deborah Trent and sent: "July 20, 2006Deborah Trent 3312 Windsong Ct.Rockford, IL 61114RE: Viable Alignment Alternatives Concept requested for the Wekiva Parkway PD&E Study Dear Deborah,As requested, please find enclosed the viable alignment alternatives concept for the State Road 429 - Wekiva Parkway Project Development and Environment (PD&E) Study. As noted, we are preparing for the upcoming public workshops in Lake, Orange and Seminole counties July 25- Aug. 1. We encourage you to attend the public workshops to get the latest information about the development of this much-needed transportation improvement. Based on subsequent public and government input and the engineering analysis, a preferred alternative or alternatives will be selected. Public hearings are expected to be held in February-March 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. Following the public workshops, all of the exhibits and other information will be available

on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button on the left side of the page. On the home page under "Construction Updates" click on the highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the public workshop files. Please check the website periodically for updates, or contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. Sincerely, Mary Brooks

7/20/2006 1:05 PM Deb Trent responded to PIO email: "Hi, I downloaded the file, but was unable to open it. It just must be too large. Could you mail me a copy? Thank-you, Debbie Trent3312 Windsong Ct. Rockford, IL. 61114(815)639-9841

7/20/2006 10:00 AM Deborah Trent 815-639-9841 called from Illinois and said they're thinking of moving down there to the area but understand some of the neighborhoods they're looking at, like rock springs golf course on 435 might be affected by the project. She said there are a lot of houses for sale in some of these neighborhoods, but people aren't saying whether they'd be affected. I would have thought they had to disclose that. PIO noted not sure of real estate law, but noted we don't have an alignment yet, so folks don't know if they'll be affected or not. All they could say was there's a study to potentially locate a roadway through the corridor. She said went on the website and couldn't download the file. PIO noted it's a large file and some folks have trouble with it. PIO said I could email to her and if she doesn't receive it in 10-15 minutes let me know and I can send her an 11x17 hard copy. She said send to [debtreant@aol.com](mailto:debtreant@aol.com). PIO noted because of the file size, some people have trouble getting the emailed file. She said let's try that first. She asked MBX is about to start right? PIO noted yes, some prelim work late this year, bulk of construction January 2007 start. She asked but on 429 you still deciding where it's going? I was reading that it would run along p-s road? PIO noted yes, we're just in the study phase and have not selected an alternative. PIO noted we're not running along p-s road, but paralleling it to the west. She said oh that's right, that's what she'd heard. She asked if we were hitting Errol Estates? PIO said no, that's down by the existing 429 IC. PIO noted we'll be going along the eastern edge of Zellwood Station. She asked about crossing 435? PIO said we will need to do that in the area of Mt Plymouth Lakes, in the area where 435 is called Mt. Plymouth Road. She asked then you'll have MBX connect to 429? PIO said that's correct in the area of 441 near Plymouth Sorrento Road. She said they love the 429. It's a beautiful road. They're not against this project, just trying to figure out where to buy. I think it will make everything a little easier. PIO emailed viables concept to Deb Trent as requested.--1010 a.m.

8/2/2006 10:27 AM Sent e-mail on 7/27/06, stating: "Ms. Brooks, I attended the 07/25 workshop held in Sanford. I've since read the 07/25 Wekiva Coalition comments presented to Mike Snyder, Mark Callahan, et al. On a personal level I am fundamentally opposed to the Parkway. It will be a permanent scar on our preservation lands and it will only abet urban sprawl. I am, however, forced to accept that something will be built. I encourage you to follow the recommendations of the Coalition to make the best possible configuration of this highway. We must do nothing to encourage and everything to discourage further development in the delicate heart of the Wekiva basin. We need to protect the springshed in all parts of the basin as well. Please make the least possible impact on our dwindling natural lands.

There must certainly be no loss of our existing conservation properties. The alignments chosen should be those farthest from the existing preserves. This bitter pill will be much easier to swallow if all of the proposed land acquisitions: Neighborhood Lakes, Seminole Woods/Swamp, New Garden Coal and Pine Plantation; are fulfilled. The 'split diamond' intersection with its long stretch of surface road must not be the alternative chosen. I fear that this surface road will continue to be a hazard to wildlife roaming the corridor and for drag racing, shooting, partying and poaching as well. Thank you for including these comments in the public feedback."

7/31/2006 2:11 PM Attended public workshop on 7/25/06. Submitted comment: "I will be e-mailing comment after giving this some thought."

Contact Notes Leon and Barbara Tubbs

Date Time Regarding  
8/7/2006 10:52 AM Attended public workshop on 8/1/06. Submitted comment: "My concern is noise in Zellwood Station. I hope the road is not elevated near us. If it is ground level, will there be noise suppressing walls? There will be about 1400 homes in this mobile home park and we are very concerned about the nearness of this road."

The Public Information Officer responsible for this project is Mary Brooks, here is her contactinformation:Mary BrooksPublic Information Officer407-702-8375MBrooksSR414@cfl.rr.comI also thought you might appreciate some brief background information on this project:The Expressway Authority and the Florida Department of Transportation - District 5 continue to review and analyze public comment and local government input pertaining to the initial alignment alternatives for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study.Local government input has included a unanimous vote Dec. 20, 2005, by the Seminole County Expressway Authority (SCEA) to remove the yellow or northernmost alternative (connecting to Interstate 4 at US 17-92) from consideration. The SCEA requested that an alignment alternative be added for consideration that would veer off State Road 46 down International Parkway to connect to S.R. 417. The SCEA must approve any project alignment within Seminole County.Also, the City of Mount Dora passed a resolution on Dec. 6 requesting the interchange at S.R. 46 and US Highway 441 be designed to "discourage unintended vehicular traffic on S.R. 46 west of the interchange." Among other concerns, the Mount Dora City Council also requested that S.R. 46 be widened to six lanes at the time of the Wekiva Parkway construction, and that a separate bicycle-pedestrian trail or lane be provided along S.R. 46</p> <p>Project team members also continue meeting with various local government officials for their input.As the project team continues to analyze the alignment alternatives based on such input, as well as on engineering principles and other criteria, some alternatives are being removed from consideration, while new alternatives also might be added. By late February or March, the initial concept maps will be updated to reflect the remaining alternatives. The next public workshops to review the more viable alternatives are slated for summer 2006.Here is a link to the OOCEA webpage with additional information and an on-line survey form that I encourage you to complete and submit:https://epass.oocea.com/futureplans/projectsandstudies/westernconnectors.shtmlPlease let me know if I can be of additional assistance.Best regards,Brian HutchingsPublic Information Officer407-383-5817408work@OOCEA.com----- Message from gvan-luvanee@centexhomes.com on Wed, 22 Mar 200620:55:35 -0500 -----To: E-PASS@oocea.com Subject: 429 extension: a question</p> <p>&gt;&gt;&gt;&gt;&gt;..... To Whom It May Concern:I am planning to move to Zellwood Station about February 2007. Since the 429 extension is going to run so close to that community as well as other residential areas, i am wondering if sound barriers are being included in the design of the Expressway and what types are being used.Sincerely</p>

3/28/2006 3:03 PM PIO responded to Gail /Centex Homes: "Hello Gail,Thanks for writing. We are very early in the development of the State Road 429-Wekiva Parkway. We are about halfway through the Project Development & Environment (PD&E) Study, so we still don't have an approved alignment. We're working on creating a set of more viable alignment alternatives now, and hope to have those maps ready to post on the website by late April. From there we'll plan the next public workshops, probably for July. Following those meetings, and based on government and public input, we'll narrow down to one or two preferred alternatives. Public hearings would be held on those in January 2007, with an approved alternative expected by the time the PD&E Study is completed in spring 2007.From there, the project would still have to go through final design, permitting, right of way acquisition, and then construction. We still have to find funding for these subsequent phases, and that will affect the overall project schedule. Things are very tentative this early in the game, but at this point we're not looking to be ready to start construction until perhaps 2012-2015.You are correct that the alignment alternatives would be east of Zellwood Station. Details such as sound walls would be hammered out in the final design phase. A preliminary noise study is being done as part of the PD&E Study, FYI. A more detailed noise study typically is done as part of final design.Your questions are all good ones, but we're too early in the process to answer them, I'm afraid. I invite you to stay tuned and involved in the development of this major transportation improvement.Let me know if you're on the mailing list for project newsletters and meeting notices already. If not, I'll add you.I hope that helps for now. Check the Expressway Authority website www.ocea.com in late April and hopefully we'll have the latest maps posted.Take care. Please call or email with other questions or concerns."

3/28/2006 2:29 PM Gail L. VanLuvanee/Centex Homes' Orlando Division Architectural Department emailed:  
"Dear Ms. Brooks:Brian Hutchings thought you might be able to help me with some questions that i have concerning the proposed 429 Western Expressway extension that is being built north of 441, which i believe is called the Wekiva Expressway.I am planning on purchasing a home in Zellwood Station, a 55+ manufactured home community. From what i can see on the current map, the Wekiva Expressway will be running along the east rear property line of the community.Do you know if there will be sound barriers included in the design of the Expressway in that area?Also, do you know what its construction schedule is and when it is planned to be completed?Thank you for your time,Ms. Gail L. 8/17/2006	2:28 PM	Attended public workshop on 7/25/06. Submitted comment: "Re: Kelly Park interchange As a frequent user of this roadway, I want to vocalize my opinion on the location of the interchange on the Wekiva expressway completion. Kelly Park Road will provide easier, quicker and safer access to me as I go about my day - work, shopping, leisure. The Kelly Park location simply works better for folks who work and spend time in this area."
Contact Notes		Tom Vellanti                      WPCC-Twelve Oaks RV Resort
Date	Time	Regarding
10/11/2006	5:30 PM	PIO, Tom Percival/FDOT and Mark Callahan met with Tom Vellanti at the 12 Oaks RV Resort. Tom Vellanti noted the proposal would affect his office and entrance. He said there are about 300 sites, with 66-70% of the people staying here year round. He said in the winter they experience high traffic. The length of the entrance could be an issue because the big rigs with RV's stack up out onto the road during high season. He said he would have to reconfigure the entire park if he lost the entrance and would have to close the park while reconfiguring. Vellanti showed us a concept with an alternative going through Rock Church across the street and Designing Women. Mark noted we needed wider ROW than what he was showing, and we used a softer curve ...Mark said the tradeoff if we avoid the RV park would be to get into the church significantly, recognizing we need more width. Mark said we need 265-270', but because of the curve there we need more; we have to bow it out. Mark said it's close to Vellanti's suggestion, and noted we could slide

the bowing back. Still impact to nursery and the church. Mark said we need to contact the church (have already been in contact with Designing Women's lawyers), and look at which costs more. Vellanti said it would be more of a fair curve. Tom said we could look at it and do a cost comparison, get with the ROW folks. Tom said they can calculate the building costs, tenants, work out relocation, all that is taken into consideration to be made whole again. Mark said the process is a little different for mobile home parks. Vellanti said people here are 85, 95 - one lady just had her 100th birthday, so if I have to move them out ... Tom noted there's no funding yet for this; a little for ROW. Tom noted everything is outside of 5 years unless someone comes up with \$1.5 billion. Mark said he estimates 8 years if everything moves smoothly and someone hands us all the money before construction would start. Tom noted we can do some advance ROW acquisition. Vellanti said we should buy the church before it's built. Mark noted it's too late for that parcel; there is stuff popping up all over. There are probably 10 developments going in Seminole County. Mark noted we should have a final decision spring-summer 07 on preferred alignment. Tom said if we don't do this project you will have two lanes out here forever, so if you think it's bad now ... Tom said we will do a comparative analysis and if we can make a little shift... It's tough to get a road that big from her to Apopka without some impacts. Vellanti said he recognized the need for the road. He noted he's the only guy with a situation like this; he noted there is only one other RV park in Seminole County. Tom said he would like the DOT ROW folks also to talk to him about the process. Vellanti said he's been through 3 condemnations, including with DOT. Vellanti toured us around his property of 25 acres, noted how much he's done to the property since taking it over in 1995. Vellanti said I wanted you to see the situation and what I'm up against. I've been fixing this park up for 10 years, then this comes along. He said he appreciated us coming out to see everything. He confirmed the mobile homes are owner occupied. Tom noted if there's an economic loss they're supposed to come up with a value for that. Vellanti said he's 74. This is the end of my life's work. I'm not looking to make any money off condemnation. I don't need that. He said he's concerned about the people, and said the property is too pretty to destroy.--610 p.m.

10/3/2006	5:34 PM	PIO sent calendar item for 12 Oaks to Mark and Brian.
10/3/2006	5:29 PM	Tom Vellanti called right back and said that's fine, still concerned it may be dark. PIO noted it's about 530 p.m. now and the sun is still pretty high up, looks like we have maybe another hour, so think we will be okay. He said that's fine. PIO asked that he call me if anything changes. He said we can meet at the park office, it's right up front.
10/3/2006	5:26 PM	PIO called back Tom Vellanti c 305-951-3665 to confirm, left MSG that we can meet him at Oct. 11 at 530 p.m. PIO asked him to give specific location (park office?) and to call back to confirm he received the msg.
10/3/2006	4:24 PM	Tom Vellanti 305-247-3387 said he can be in town next week for a meeting, but it needs to be light so he can show us everything he needs to. PIO noted we have Oct. 11 open, could hopefully get up there at 530 p.m. that would still give us some daylight. PIO to check with team members and get back to him. He noted Janna doesn't work there anymore, so we'll have to stay in touch via phone.
10/3/2006	2:25 PM	PIO called Tom Vellanti/12 Oaks RV resort 305-247-6623 since no response to last conversation or email. Janna isn't with us any longer. She was away in Oklahoma and now no longer with us. PIO noted that would explain why no response to the email. PIO asked for another email address. Jane O'Brien, bookkeeper said they are not on email. PIO left number for Tom to call re: scheduling a meeting. She said he's out at a closing and would pass on the MSG.
9/21/2006	6:55 PM	PIO emailed Janna/Tom Vellanti's assistant/12 Oaks RV Resort: "Hello Janna and Tom, I spoke to Tom last week I think about sending me some dates and times for an onsite meeting at 12 Oaks to discuss his concerns regarding the Wekiva Parkway project, but have not received anything from him. Please let me know when you would like to do the onsite meeting so we can show you the latest info and try to address your concerns. Thanks. Mary Brooks

9/12/2006	10:18 AM	<p>Tom Vellanti/12 Oaks RV Resort 305-247-3387 called back about meeting, wanted to know if we were coming to see his place, thought that only made sense. PIO said yes, we would be doing a site meeting. PIO noted I was in the car and can't check my calendar. PIO asked if he could email me some dates and times we could possibly meet at his resort so I can run those by the project team? PIO noted I'd emailed back and forth previously with his assistant Janna, was she still with him? He said yes. He said he has a very simple solution that would just mean disturbing some flowers. PIO reiterated request for meeting dates and times from him. He said his email was tied to his accounting system but he would fax something to me.</p>
8/31/2006	4:47 PM	<p>Tom Vellanti said he got the MSG on his cell phone . I would really like to hook up with you. And show you what I have in mind which would Save everybody a lot of grief, the road department, EA and make things a whole lot simpler. I will call you when you come back from vacation and we can all hook up. Thank you very much and I hope you enjoy our time off.</p>
8/30/2006	5:07 PM	<p>PIO emailed Tom Vellanti (via his assistant Janna Lightfoot jlightfoot@adelphia.net): "Hello Tom and Janna,I left a voicemail on Tom's cell just now, but I'm sure you folks down south are hunkered down waiting for Ernesto to pass. When you get a chance this week, I'd like to discuss some dates that we could do a site visit in mid- to late September at the resort to see what we might be able to do to address Tom's concerns. We have been meeting with a number of neighborhoods and other property owners, and are looking forward to a similar discussion with you.Please call or email me with possible dates. We have typically been holding these meetings in the early evening at 6 or 7 p.m. Also, I'm on vacation next week, Sept. 4-10, so we would need to start looking at dates after that. I look forward to hearing from you. Take care.Mary Brooks</p>
8/30/2006	4:59 PM	<p>PIO called Tom Vellanti/12 Oaks RV Resort 305-951-3665 discuss field meeting, left MSG for him to call or email me with dates that we could do site meeting to try to address his issues. PIO noted I'm here rest of this week, but on vacation Sept. 4-10, so he'd have to try to reach me after that if we don't connect this week. PIO also gave my email address, and noted I'd also email his assistant Jan re: setting up a meeting.</p>
8/24/2006	4:47 PM	<p>"Aug. 24, 2006Thomas Vellantil7750 S.W. 248 St.Homestead, FL 33031 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment AlternativesDear Kathy,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns, and we will be in touch soon regarding scheduling a meeting to discuss how we might try to address your issues. Your comments are being reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks"</p>

7/31/2006	12:55 PM	<p>Attended public workshop on 7/25/06. Submitted comment: "My comments concern the Twelve Oaks RV Resort. I am the owner. There are approximately 275 families that live in Twelve Oaks. Both road configurations would greatly impact my park by destroying the entrance. I have no other entrance that is viable. If the road alignment was pulled down to the south to go through the plant nursery, it could drastically reduce the impact to the park. If I don't have stacking room for the RV's when they come in to register, it will kill my business. This park is worth about \$12 Million on today's market."</p>
7/13/2006	4:34 PM	<p>PIO returned call to Tom Vellanti 305-247-6623, PIO confirmed his mailing address. I submitted a plan to you, aerials, . He said nobody ever got back to me. Nobody ever said anything. I spoke before the SCEA and everything. PIO apologized, noted I gave the info to CH2M Hill who is leading the study, and remember Janna calling in April to get project manager's contact info Mark Callahan, which I gave her, so I assumed they'd met, I'm not clued in on those. He said no one ever contacted him. I said we're in the middle of preparing for the public workshops now, but I'll get with CH2M Hill and let them know we need to meet with him. PIO said I have his email address and I'd send a confirmation once we spoke with them. I've got 250 residents in there, more than are going to be affected than anybody else. I've got to have this resolved, . I'd appreciate it if you would mention it they've got to get with me. If they have to disturb my front entrance in the park, I'm going to have a major construction problem. My office is there. The manager's house is there. I would have to reconfigure my whole park and disturb my tenants. I don't know how I could do that. It's totally unnecessary. If they move the road a little to the south, PIO noted that we have had a very preliminary ROW assessment done along 46 in SC, that there's a gas line on the north side of 46 that is supposed to be very expensive to move, and they compared cost of relocating the gas line and residential impacts on the north vs. the south. Found that more expensive and more homes hit if widen to the south (like a difference of \$12 or 15 million) than to the north, even with the gas line, so wanted him to be aware of that. He said with me they don't have to go through any houses, just go through the plant nursery instead of my park. PIO reiterated I'd get with CH2M Hill about a meeting after the public workshops and get back to him. He said he'd appreciate it.</p>
7/13/2006	10:48 AM	<p>I understand ... My name is Tom Vellanti. I understand there is meeting in July in SC. I never received any kind of notice about that. Are you sending out notices? If so I'd certainly like to receive one. I sent some aerials with suggestions on route and never received a reply from anyone yet I understand other people have been replied to. I have a major problem with 12 oaks resort and would like to talk to someone about that. 305-247-6623, f 305-247-3387 thank you.</p>
4/12/2006	11:54 AM	<p>PIO returned Janna's call and emphasized we are not in design, just in the PD&amp;E study phase; design won't occur until after we have an approved alignment. PIO relayed senior project manager's contact info as requested: Mark Callahan CH2M HILL 225 East Robinson St. Orlando, FL 32801-4321 407-423-0030, mark.callahan@ch2m.com She said she sure appreciated that.</p>
4/12/2006	9:29 AM	<p>Janna/Tom Vellanti's office called and left MSG I called you yesterday and asked you to return my call. Could you give me a call please 305-247-6623</p>
4/11/2006	9:06 AM	<p>Janna/Tom Vellanti's office called and left MSG that he asked me to call you to get the name, address, phone number and email for the design engineer of the Wekiwa Parkway. If you could call me back with that information I'd appreciate it. 305-247-6623 thank you.</p>
4/6/2006	2:00 PM	<p>PIO returned call. Tom wanted me to ask when the next meetings will be, he doesn't want to miss them. PIO noted we were looking at July, but now probably more like August. PIO noted we're having some challenges scheduling all the comment meetings with local government officials and agency representatives. PIO noted we're working to update the maps now - thought we'd have them by now, but again scheduling of the government meetings has pushed that back. Hope to have the maps by late May and will post on the</p>

website. She said where would she go to see that? PIO gave her web address and text links. She said Tom is scheduling his vacation and doesn't want to miss the meetings. PIO noted we'll send meeting notices, and am working on the newsletter now and by the time that goes out will have the meeting dates also, which they'll get. She said Tom doesn't have internet access here, but I may go home and log on to look at it. She said thanks for calling back.

4/6/2006	11:53 AM	Janna/Tom Vellanti's office 12 Oaks RV Resort, if you could give me a call I've got a few questions for you. 305-247-6623 thank you

9/17/2006	3:46 PM	"Sept. 17, 2006Juanita Villalobos-Bell5085 Blacknell LaneSanford, FL 32771 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Juanita,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns.Your comments are being reviewed and evaluated along with the 500 other forms received, as well as input from local governments and state agencies. More than 1 200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That includes looking at additional SR 417 alternatives, for example, that would shift the alignment up to 100 feet away from the Tall Trees subdivision. As additional alternatives for your area are refined, we intend to once again meet with your HOA board to discuss.That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

Regarding  
Attended public workshop 7/25/06. Ken submitted comment: "As a resident of Tall Trees, I oppose the southern route for the Wekiva Parkway at the rear of our development. Please give consideration to the serious negative impacts to our community, that is, construction traffic and noise, and ultimately increased traffic and noise, lightning from an elevated road, and line of sight from our homes. Using SR 46 from the Seminole County line straight to I-4 has less negative impacts to residents. Please consider this as the best option." Juanita submitted comment: "As a resident of Tall Trees, I would like to comment that I oppose the southern route for the Wekiva Parkway at the back of our residential development. Residents have purchased here because of the nature trees that offer a respite from noisy I-4 and International Parkway. With the current proposal for the Parkway southern route, our privacy will be compromised by removal of buffering trees, road construction traffic and noise, increased automobile traffic once completed, and elevated traffic in sight of our homes. Access roads from International Parkway further increases these impacts. These additional ramps are excessive considering there are on and off ramps already at I-4. Although the option using SR 46 straight from the Seminole County line to I-4 directly seems a circuitous route to get to and from 417, the costs are comparable and have less negative impacts to fewer residents. Please give serious consideration to our community's concerns."

Regarding  
Attended public workshop on 7/25/06.

1/16/2006

5:46 PM

Continued working on comment response letters: Steve Kuiper, Robert Brooks, John Witzig, Neta Villalobos-Bell, Gabrielle Milch, RL & Lorna Wahlig, --615 p.m.

1/5/2006	1:24 PM	PIO returned call to Neta Villalobos Bell, left detailed MSG that comment forms still accepted though we've already been evaluating the several hundred we got as result of the public meetings. PIO gave email address (noted forms downloadable on EA website), fax number and mailing address to send form. Re: her statement about SCEA, PIO noted SCEA on Dec. 20 voted to remove the yellow or northernmost alternative from consideration, the one that would have connected at 17-92. PIO noted there are only two alternatives left in SC, along 46 and connecting to the 417.
1/5/2006	11:05 AM	Neta Villalobos Bell 407-302-7616. I wondered if public input or comment is still accepted. I wanted to make comments to FDOT as well as SCEA because I believe they have final say over the alternate route suggested at I-4. Please let me know if these are accepted and where to send comments, 407-302-7616 thank you.

1/27/2006	12:35 PM	Comment Form:Jean Volksen3611 Paulette StreetApopka, FL 32712Environmental study is very important because of endangered species such as scrub jays, bald eagles which are nesting in this area. We have at least 3 springs on our property which enable us to have water level if about 30 feet which is very good for us. We would have increased noise level which we don't want. This is a quite and peaceful neighborhood. Most important- why demolish our homes when it can be moved toward the south to open land. Thank you, Jean Volksen

Notes		
Date	Time	Regarding
7/17/2006	1:22 PM	Drafted concept letters and sent to:Gladys Williams, Bob Mills, Sue Hamilton, Mr. & Mrs. Warren Ackley, Amalia Corrigan, Bill & Eileen Walker, William Strickland, Ed Meixell
7/14/2006	9:09 PM	PIO called back Bill Walker 407-579-8312 to relay info. He asked was that the one we're choosing? PIO said no, we haven't chosen anything yet, that's just one o the remaining alternatives being considered. He said when will we decide? PIO noted we've got to get input on the remaining alternatives from the public and governments, then in the fall we work on one or two preferred alternatives, with public hearings in Feb.-March to approve an alternative. He said okay, he'll go t the meeting then, thank you.
7/14/2006	8:58 AM	PIO researched parcel on LC property appraiser's site: William and Eileen Walker, parcel ID. 36-19-27-000200000700. property is south of 46 on west side of Swan road, just south east of the eastern end of Coronado Somerset Drive. Northernmost alignment heading to systems IC would be right outside of SW corner of their property.
7/14/2006	8:45 AM	PIO returned call to 407-579-8312 Bill Walker said I got flyer in the mail, map on the thing I got out a magnifying glass and all I could see was the word Apopka. PIO noted the map was only meant as a graphic; we would have had to blow it up as big as the entire newsletter for people to have been able to use it as a locator. PIO said the map is posted on the website or I can send him an 11x17" copy. Well we've got the meeting coming up on the 1st ... has anything changed since the first meeting? PIO noted yes, a number of the alignments have been removed from consideration based on citizen and local government and state agency input. He said I'm concerned about where they're coming to the west side of Sorrento going to 46. PIO asked if there was a parcel in particular? He said I live at 30623 swan road. PIO said I could research that parcel and get back to him. He said I would appreciate it; thank you.
7/12/2006	1:50 PM	I would like to talk to somebody about the map they put in this Wekiva update. I can see the word Apopka but that's the only thing I can see. Why in God's name did anybody put a map in there nobody could possibly read? Could you please call me?407-579-8312

8/1/2006	2:31 PM	Attended public workshop on 7/25/06. Ruth submitted comment: "Regarding the options for the I-4 to SR 46 route - The option to follow SR 46 seems more plausible as the few homes in or near that path have owners who have already chosen to live that close to a major highway. The southern route would have drastic effects on Capri Cove and Tall Trees. A couple homes may be taken that currently enjoy a very rural feel. The homes that remain will suffer from outrageous amounts of road noise, pollution from runoff and seperation from our elementary school. The exit ramp to International shows complete disregard for the Tall Trees residents. If the southern route is used, this must be re-configured. Although the engineers have today said the 46 route would be difficult, it is possible and must be given strong consideration in light of the impact to homeowners in its path. The map shows an elevated road over Wilson Road behind my property. When pylons were built for the 46A/I-4 interchange, teh noise shook our windows in the middle of the night. This construction in our back yard is sure to cause structural damage to our existing home and the noise will be unbearable. What about my rights to peaceful enjoyment of my property? 417 makes other 90 degree turns or sharper. It can do it again at SR 46 and the I-4/417 connection. That's the responsible thing to do!"

8/10/2006	12:35 PM	Attended public workshop on 8/1/06.
8/9/2006	8:49 AM	Attended public workshop on 7/26/06.
3/8/2006	3:56 PM	Jeff Welch responded to PIO email: "Thank you very much, Mary. My experience with past workshops is less an agenda meeting and more pop in anytime type thing.
3/8/2006	3:55 PM	____From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Wednesday, March 08, 2006 3:55 PMTo: Jeff WelchSubject: RE: Public Workshop - 2030 Master PlanJeff,Confirmed it is a workshop tomorrow (Thursday) from 4-7 p.m. at the OOCEA on South Magnolia. Will be in the boardroom. Hope that helps
3/8/2006	10:48 AM	PIO responded to Jeff Welch email: Checking into it and will get back to you...
3/8/2006	10:44 AM	PIO emailed Kristy and Bryan/OOCEA re: Welch query: "Good morning,Had an email asking about the 2030 master plan meeting tomorrow. Is it a formal hearing, or a workshop where folks can come and go? I had the time as 4-7 p.m. - is that correct? Thanks for the help and I'll get back to this attorney.
3/8/2006	10:40 AM	Jeff Welch responded to PIO email: "Thanks Mary. It was the 2030 master plan. I can no longer find it on the website. I would be interested in attending if someone can provide some details.Thanks again.
3/8/2006	10:35 AM	PIO responded to Jeff Welch/ Palmer, Reifler and Associates, P.A. email: "Jeff,Not sure which project you're referring to. There is the Expressway Authority 2030 Master Plan public meeting tomorrow (Thursday) downtown. Believe it's from 4-7 p.m., but would need to confirm that.There are no project meetings scheduled for the Maitland Boulevard Extension Project, if that's the one you're referring to. That one is wrapping up design and will be going out for construction bids this summer.The next public workshops for the Wekiva Parkway will be this summer to review the more viable alternatives. That's not scheduled, but we're looking at July 2006 for those (one in each county). Once those meetings are scheduled, notices will go out and the info also will be posted on the website If you're on the mailing list, you'll receive the notice and newsletter. If not, I can add you to the list.I hope that helps. Let me know if you have further questions."

7/31/2006	2:38 PM	<p>Attended public workshop on 7/25/06. Submitted comment: "As property owners, residents, and operators of a retail nursery on CR 46A, we feel that East Lake County alternatives (in order of preference) 2, 1 and 3 represent reasonable options with minimal impact on local residents whom have opted for a rural lifestyle. Alternatives 4 and 5 (East Lake County) would destroy several beautifully developed equestrian facilities and have maximum negative impact on all of the existing residents. For what gain, one wonders. Please remove alternatives 4 and 5 from consideration. P.S. It would be nice if we could make and take copies of these sheets!"</p>

7/12/2006	5:36 PM	<p>PIO returned call to Gladys Williams 352-383-0494, we received the flyer in the mail yesterday, I couldn't read it. I even went in on the computer, could enlarge the map but not the print. 30549 Swan Road, Sorrento 32776 PIO said I could send her an 11x17" copy. She said would the print be any larger? PIO noted it'd be larger overall. I'll When I enlarged it on the screen, the print in the lake and OC line didn't get any bigger. PIO noted I hadn't encountered that before. PIO said I can send her a map, is there a specific question she has? She said I'm trying to find out where I'm located, how close am I to it? PIO said I'll check that and include some info when I send the map. She said she'd really appreciate it.</p>
7/12/2006	10:12 AM	<p>Gladys Williams called and left MSG, we just received the notice on the Wekiva Parkway</p>

EA. what I'm interested in is, we live on Swan Road, the map is so small we can't read it, even when we went in on the computer. If you would make a copy of it so we can read it, or at least mark where our home is so we could see what's going on. I live at 30549 Swan Road in Sorrento, 352-383-0494 and if you could fax me a copy of that and mark our street address I'd appreciate it. F 352-383-7249 thank you.

1/19/2006	10:23 AM	PIO called back Gladys Williams 352-383-0494 to relay info. PIO noted study not done so nothing final. She asked how far away would it be from their property? PIO noted can't say exactly because these are just concepts, not actual road dimensions. PIO noted the LCW9 alignment does cross the west and southwest portions of the property immediately to her west, so if that alignment were chosen it wouldn't be very far away. She said when will we know something new? PIO noted we're in the process of weeding out some of the alternatives and adding new ones based on the public comment and local government input we've been getting. PIO noted by March hope to have updated maps reflecting that. She said when will a final decision be made? PIO noted these studies typically take two years, and we're scheduled to finish with approved alternative by March 2007. She said well that helps her a lot. They wanted to make some improvements to their house, but didn't want to do anything if they were going to be taken. PIO noted all of the project maps on the website. She said she has internet access. PIO gave her web address and text links, told her she'd want the Lake County west map. She said thanks for the info.
1/19/2006	10:00 AM	PIO called Gladys back, who said property under Maxwell A Williams. She doesn't have property ID no. PIO located property: it is on SW end of Swan Road cul de sac, south of Rockland Ave. the study area border crosses the property. The LCW9 alternative passes diagonally west of the property.
1/18/2006	4:35 PM	PIO called Gladys Williams 352-383-0494 to let her know I was aware of her query passed on by Tom Burke of Lake County. Noted I'd been in meetings all day but would research it and get back to her tomorrow, hopefully before 10 a.m. would that be alright? She said that would be fine. PIO also gave my direct number in case she had any other questions. She said thanks for getting in touch with her.
1/18/2006	11:51 AM	PIO called Tom Burke 352-315-0170, receptionist said he went to lunch meeting. PIO left MSG on voicemail that I was having email trouble and just got his query. PIO noted I can call Gladys Williams if he hasn't already, just let me know.
1/18/2006	11:45 AM	PIO responded to Thomas Burke and Dave/CH2M Hill: "Tom, I can call Mrs. Williams back with this information, if you haven't already. Just let me know. Thanks."
1/18/2006	11:32 AM	Dave replied to Thomas Burke/Lake Sumter MPO et al: "According to our files Mrs. Williams' house is in the "Fairways at Mt. Plymouth" which is outside the project corridor and, therefore, no alignment alternatives impact her property. "
1/18/2006	10:45 AM	<p>__From: Burke, Thomas [mailto:TBurke@lakesumtermpo.com] Sent: Wednesday, January 18, 2006 10:45 AM To: Mary Brooks; Callahan, Mark/ORLCC: Manwaring, Brian/ORL; Lewis, David/ORL Subject: RE: Wekiva Parkway</p> <p>Mary, I got a call this morning from a concerned resident, Gladys Williams, in Sorrento. She was informed by a friend (not sure what knowledge this person may have) that her house (three houses on her street) is in the path of the Wekiva Parkway/SR 46 By-Pass. Her address is: 30549 Swan Road Sorrento, FL 32776 She and her husband want to put some money into their house in improvements, but, of course, would rather not spend the money if their house is going to be taken for the Wekiva project. I told her that the project was in the PD&amp;E phase and an exact alignment was not yet defined. Never the less, I told her that I would contact you to see if there was any merit to the rumor. Gladys can be reached at 352-383-0494. She said, when calling, that you should ask for her, even if her husband answers the phone (as he might be confused? Not sure, really). Would you like to call her? If not, if you can fill me in on the details, I can give her a call back, no problem. Just let me know! Thanks Mary! -Tom</p> <p>__Thomas W. Burke, P.E. Contact	Julius & Ada Williams	
Notes		
Date	Time	Regarding
3/2/2006	4:38 PM	PIO called back Ada Williams, and noted found property for 3245, not 3200. She said 3200 is the block, but we have a church and house on the property and that address is 3245. PIO noted that property is just outside and adjacent to the study area, so no direct impact at this time. PIO noted couldn't tell her how far away it would be because the alignments are shifting as they try to figure out where to put the road. PIO noted if she was any farther east like her neighbors she would be in the study area. PIO asked if she'd been getting the project newsletters, was she on the mailing list? She said no, she didn't think so, but would like to be. She said send info to 1162 Hermit Smith Road, Julius & Levada Williams. PIO invited her to stay involved with the process, things are changing and noted we'd be having the next public meetings mid-summer. Noted she's on the list now and will receive notices, etc. she said thank you so much. --445 p.m.
3/2/2006	4:20 PM	PIO called Ada Williams back, noted having trouble finding property. She said that's the address, though they've changed some things recently (?). PIO asked if property was under her name? She said it's under Julius Williams & Levada, or you might see it under Judy. PIO said I'd try again and get back to her. PIO went back to property appraiser site and found a 3245 Dew Berry Ave. listed (among other properties on Hermit Smith road) for Julius Williams. Compared to OC conceptual, and it is just west of but adjacent to the study area. Concept also shows a church on that property.
3/2/2006	3:55 PM	PIO returned call to Ada Williams. She said it's 3200 Dewberry Ave., it's close to Hermit Smith Road, there, about 3 miles north of 441. PIO said I'd have to check property location and get back to her; might be tomorrow. She said that would be fine and thanks for calling back. PIO checked OC property appraiser site for couple diff spellings of Dew Berry (cq) but finally found right spelling. However, no listing for 3200 Dew Berry.
3/2/2006	1:59 PM	Ms. Ada Williams called and left MSG I live in Plymouth area and I just wanted to know what the EA has ... will it have anything to do with 3200 Duberry Ave., do we have anything to worry about there. 407-889-9269 would you call me back please? Thank you so much.

Date	Time	Regarding
9/19/2006	3:24 PM	PIO called Dave Williamson after getting back to office to see if he was able to find maps. He said yes and he's been playing with them and there is a lot of stuff here. He said they live right behind Tall Trees. PIO noted we've been meeting with different communities and we could do a presentation for them if they had questions, etc. he said they're not a subdivision, some homes on 1-acre+ lots. We're not in the rich area. Everyone out here is kind of panicking. We don't know whether we should sell or what we should do. PIO went over PD&E study timeframe, noted funding challenges and overall timeframe, best case for construction start 2012-2015 if funding available. He said that was good to know. PIO said if he has a group of neighbors that would want us to come out and meet with them to let me know. PIO noted maps on website are from the workshops, and those alternatives are shifting based on public comments and government feedback, what we would bring out to show them will be the latest and greatest. He said thanks so much for the info and he is going to get with folks and will probably be calling me back.

9/19/2006	1:57 PM	PIO returned Dave Williamson's called, left detailed MSG with text links to get to the viable alternatives on the website and my phone number.
9/19/2006	1:52 PM	Dave Williamson called and left MSG o 407-320-7411 I live in Markham Woods and we're pretty sure this road, the Wekiva Parkway from out of Mount Dora, is going to come across us, it looks like. Is there anyplace person could go to get maps to see what's proposed and get a better understanding. We have to make some decisions about whether we're going to get out of here or what's going to happen to us. I've been to the map on the web and saw one in the newspaper. Just wondering if any place else I could go to actually look at a map. I know you probably get a hundred of these so I will let you go. Take care. Thanks.

Date	Time	Regarding
11/12/2006	12:45 PM	PIO responded to Lisa Wills email: "Lisa, The SR 417 alternatives that would shift slightly away from Tall Trees are still being evaluated along with all of the others. We're still running impact assessments and cost analyses. The PD&E Study team is on notice that your HOA is interested in an update once we've got something new and substantial to report.Mary Brooks

11/8/2006	10:52 PM	Lisa Willis/Tall Trees emailed: "Hello Mary,I wanted to give you a chance to hopefully gather some new information before bothering you again. If you have any further answers to my questions below, please let me know. Thank you.Lisa Wills
10/30/2006	8:20 PM	PIO responded to Lisa Willis/Tall Trees email: "Hello Lisa,I'm just back from a week's vacation and trying to get through all of my emails. I still need to be brought up to speed on any new developments last week regarding the project alternatives and I will then get back to you.Regarding your earlier email, please see my comments below in CAPS:"Hi Mary, The Tall Trees HOA provided me with your name and email address for questions regarding the extension of SR 417 and its effect on our neighborhood. I also received a copy of an email sent to a member of our board and have a couple of questions. You stated in that email, "We also have been looking at making some possible adjustments to the SR 417 alternative that could shift it slightly away from your subdivision, by say 50-100'. Any shifts farther away, however, would hit the nearby apartment complex, which the county has asked us to avoid." 1. Can you tell me who or what department you were referring to when you said "the county?" Also, what is the name of the apartment complex that you refer to? DISCUSSIONS WITH THE COUNTY HAVE INCLUDED THE COUNTY ENGINEER, COUNTY PUBLIC WORKS DIRECTOR, COUNTY PLANNING OFFICIALS AND THE SEMINOLE COUNTY EXPRESSWAY AUTHORITY, AMONG OTHERS.I WILL HAVE TO FIND OUT THE NAME OF THE APARTMENTS IN QUESTION.2. I understand that you recommended that residents of our neighborhood contact Commissioner Brenda Carey to express our concerns. I contacted Commissioner Brenda Carey regarding this issue. We have not spoken yet, but she left me a message stating that the construction of SR 417 is "not under the jurisdiction of the county...it is a FDOT project." THERE ARE APPARENTLY DIFFERING INTERPRETATIONS OF THE LEGISLATION ESTABLISHING THE SEMINOLE COUNTY EXPRESSWAY AUTHORITY. THE PD&E STUDY TEAM'S UNDERSTANDING IS THAT THE SCEA MUST APPROVE ANY ALIGNMENT IN SEMINOLE COUNTY. THAT BEING SAID, THE FDOT OBVIOUSLY IS PRIMARILY RESPONSIBLE WITH REGARD TO DEVELOPING THE ROADWAY IN SEMINOLE AND LAKE COUNTIES. 3. Has there been any further development with regards to the decision to shift the roadway further from Tall Trees? I WILL HAVE TO CHECK SINCE I'VE BEEN OUT ON VACATION.You can email me at lmwills@bellsouth.net or call me at 407-323-1855. I am currently playing phone tag with Commissioner Carey. I would greatly appreciate clarification of the above issues and questions at your earliest convenience. Thank you.Sincerely, Lisa Wills, Tall Trees

Resident "Mary Brooks

10/26/2006	5:29 PM	<p>__From: Lisa [mailto:lmwills@bellsouth.net] Sent: Thursday, October 26, 2006 5:29 PMTo: MBrooksSR414@cfl.rr.comSubject: Tall Trees inquiry-follow up to earlier emailDear Ms. Brooks, I received a phone call this afternoon from Commissioner Bob Dallari. He did not seem to have any information or knowledge of the consideration being made to move SR 417 50-100 feet further away from Tall Trees. He told me he would look into this and get back to me. I just wanted to let you know that I had spoken to him regarding this issue. I have not had the opportunity to speak with Commissioner Carey as of yet. Again, if you have any more information, please contact me. Thank you very much. Lisa Wills</p>

7/12/2006	1:27 PM	PIO gave Wills & Schramkowski comment forms, and Wills response to Melaina. Brian M. noted he had all the forms in a box, there are too many to put in a drawer.
7/10/2006	5:50 PM	<p>Worked on comment response to William Wills and sent: "July 10, 2006William Wills 495 Still Forest Terr.Sanford, FL 32771RE: Receipt of Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment Alternatives Dear William,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments and state agencies. As you can imagine, The Florida Department of Transportation and the Orlando-Orange County Expressway Authority face considerable challenges in trying to address the conflicting interests of various governments, property owners, business operators, environmentalists and other community stakeholders in developing this much-needed project.We are refining preliminary stormwater retention siting, traffic projections and other details for the viable alignment alternatives in preparation for the next public workshops. The Seminole County meeting is scheduled for July 25 from 5 p.m. - 8 p.m. at the Sanford Civic Center, 401 E. Seminole Blvd. I encourage you and your neighbors to attend the public workshop to get the latest information and to provide further feedback. Based on public and government input and analysis of the viable alternatives, a preferred alternative or alternatives will be developed. Public hearings are tentatively scheduled to be held in March. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. Project exhibits and other information are available on the Expressway Authority website at www ExpresswayAuthority.com. On the entry page click the button for "Corporate Site." On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text links for the project files and other information.I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks</p>
7/10/2006	11:11 AM	<p>William Wills faxed over public comment form dated 7/10/2006:"William Wills wwills@national.aaa.com)495 Still Forest Terr., Sanford, FL 32771I live in 'Tall Trees,' a very attractive yet small development. An Expressway tearing the rear portion of our development would take down much of the mature trees that are our development's namesake. The Expressway would drive down home values and add to the already excessive noise pollution in the area. While I generally support a beltway extension, I respectfully request that it be route in a way that does not approach our development. A shift to using 46 or a shift further down I-4 would be preferable. Finally, I would suggest simply widening SR 46 rather than extending the Expressway - thanks."</p>

Date	Time	Regarding
10/9/2006	4:38 PM	<p>PIO responded to Rebekah Wolford: "Rebekah, That explained it. Thanks for getting back to me. I show this Orange County property, 6947 Swain Road in Sorrento, parcel no. 05-20-28-7334-00-010 with the north property line abutting the Lake-Orange County line. It looks like the property is northeast of Boch Road and west of Mount Plymouth Road According to the alignment alternatives for the Orange - Lake County Systems Interchanges alternatives, this property is actually off the east edge of the map and not shown. That would indicate there is no anticipated impact to the property at this time. However, please be advised that the alignment and interchange alternatives are being refined, adjusted and otherwise modified, so that it is important that you stay tuned in to the progress of this Project Development And Environment (PD&amp;E) Study . Currently we are evaluating the more than 540 public comments from the summer public workshops - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. 10/9/2006	3:25 PM	<p>Worked on Rebekah Wolford query for 6947 Swain Road in Sorrento, Orange County. The parcel number is 05-20-28-7334-00-010. OCPA shows property owned by GORCHESS FREDRICK J JR and SCHACKOW DEBRA L. north edge of property abuts Lake-Orange County line, property NE of Boch Road and west of Mount Plymouth Road.</p>
10/7/2006	10:08 PM	<p>Rebekah Wolford responded to PIO email: "I am sorry - the property is just over the Lake County line and is actually in Orange County. The address still says Sorrento, FL. The numeric is 6947 Swain Road. The parcel number is 05-20-28-7334-00-010. Thanks - Rebekah Wolford</p>
10/7/2006	8:10 PM	<p>PIO emailed Rebekah Wolford: "Rebekah, I've searched the Lake County Property Appraiser's site by both this address and your name "Rebekah Wolford," but find no property or location coming up for either. Please confirm owner's name of property in question and the address. It's Swain, not Swan Road, right? Let me know. Thanks. Mary Brooks</p>
10/7/2006	8:07 PM	<p>PIO worked on Rebekah Wolford query. LC property appraiser site showed no hits for 6947 Swain Road in Sorrento or for Rebekah Wolford.</p>
10/5/2006	10:05 AM	<p>Worked on Rebekah Wolford property query 6947 Swain Road, Sorrento, but LC Property Appraiser site gave error MSG: "We are sorry, the parcel you have selected or are looking for is currently not available. Work is in progress to complete all parcels in Lake County as soon as possible. Please check back often and thank you for your patience."</p>
10/4/2006	12:45 PM	<p>Rebekah Wolford responded to PIO email: "Thank you so much for your response. The property address is 6947 Swain Road, Sorrento, FL 32776. Thank you so much. Rebekah Wolford"</p>
10/4/2006	8:25 AM	<p>PIO responded to Rebekah that I needed property address or parcel ID. Number to research her query.</p>
10/3/2006	7:47 PM	<p>Rebekah Wolford emailed: "Hi, Thanks for taking my email. We are looking to purchase a piece of property off of Swain Road in Sorrento, FL. It is near where the 429 is coming</p>

through. Is there anyway you can tell the distance of the proposed 429 from Swain Road/Rainy Road in Sorrento (right over the Lake County line into Orange County). We would hate to purchase this land and find out the at the front door is the 429. If you can not give a distance, is there anyway you can give the numeric of the plot number that the 429 is coming through on Swain Road? It looks like when Swain Road curves toward Haas Road the property at the end, where it dead ends, is going to be taken for the 429, is that correct? If there is anyway you could help me with this I would appreciate it or direct me in the right direction. Thank you, Rebekah Wolford

7/5/2006	8:25 AM	Don Works faxed in comment form from his office at Jackson Hewitt Orlando: 166 Osprey Hammock Trail, Sanford 32771 The proposed alignment along SR 46 east of the Wekiva River abuts several neighborhoods, including ours. It would seem that existing SR 46 could be used for local access if the new Parkway were located several hundred yards to the north. Most of the land there is public and little acquisition would be required. This would help maintain peace and quiet in the residential areas. Thank you fro considering this input. Sincerely, Don C. Works.

Date	Time	Regarding
12/12/2006	11:52 AM	From: <David.Lewis2@CH2M.com> Tuesday - December 12, 2006 11:52 AMTo: <brooksm@oocea.com>, <mark.callahan@CH2M.com> CC: <gjskaff@pbsj.com>Subject: RE: SR 429-Wekiva Parkway PD&E Study - GreenPlace property assessmentsAttachments: Mime.822 (2739 bytes) [View] [Save As] My recollection from the progress meeting is that Mark said he willadvise Comm. Brummer re: the assessment results as a first step beforewe go further.

12/12/2006	10:18 AM	Maxwell Wright/2621 Boch Road emailed: "Mary,Any updates on the information below? Was there a timeframe that CH2MHILL had to lay out the alignment alternatives and impacts for the GreenPlace property?Maxwell
------------	----------	--

12/12/2006	10:05 AM	From: Mary Brooks Tuesday - December 12, 2006 10:05 AMTo: Maxwell Wright@pgnmail.com Subject: SR 429-Wekiva Parkway PD&E Study - GreenPlace propertiesHello Maxwell,We discussed in last week's project team meeting that CH2m Hill was wrapping up the impact assessments for potential alternatives on the Orange County's GreenPlace properties. They said they hoped to finish that soon and schedule a meeting this month with the County's Environmental Protection Division to discuss the findings, keeping in mind the County has in no way approved allowing any alignment alternatives to be placed on the properties. They only authorized taking a look at it. Overall, we should be bringing forward a draft recommended alternative (including alignment and interchange choices) in January. We will be posting the new maps on the OOCEA website, and subsequently going through the review and revision process with local governments and state agencies. We hope to get through that process and bring forward a preferred alignment alternative to formal public hearings in April.Will keep you posted.Mary
------------	----------	---

10/4/2006	5:13 PM	PIO emailed Maxwell Wright/2605 Boch Road: "Maxwell,I received some updated info
-----------	---------	--

today regarding the Sept. 28 meeting between Wekiva Parkway PD&E Study Team members and officials from the Orange County Environmental Protection Division regarding the OC GreenPlace properties. Given the concerns from Boch and Haas Road residents including yourself, the county agreed in the meeting only to let us analyze the potential impacts if we were to place alignment alternatives for the Orange County-Lake County Systems Interchange on the GreenPlace property (former Fazio parcel). The county agreed to let us look at the impact of potentially taking half of the needed right-of-way from one of the property owners (who was affected by both the north and south alternatives in your area) and half from the GreenPlace (former Fazio) property. The county also agreed to let us analyze the impacts of taking 100% of the needed right-of-way from the GreenPlace property. However, the county emphasized that they do not want the conservation property fragmented. It was agreed that CH2MHILL would lay out the alignment alternatives and evaluate comparative impacts and report back the findings. This will not be a quick exercise, as it involves reconfiguring the systems interchange, relocating stormwater ponds, calculating impacts, as well as estimating construction and right-of-way acquisition costs. Please note the Orange County Environmental Protection Division did NOT agree to have the Wekiva Parkway alignment alternatives on the conservation parcels; they only agreed to allow an analysis to be done. I hope this helps. Please feel free to call or email with other questions or concerns. Mary Brooks

10/4/2006	4:44 PM	PIO reviewed OC GreenPlace property meeting notes to prepare info for Maxwell Wright and Ken Morris.
10/4/2006	8:23 AM	PIO emailed Dave and Mark/CH2m asking for update from Sept. 28 meeting with OC re: the public lands, forwarded Wright's email.
10/4/2006	8:18 AM	PIO responded to Maxwell Wright/Boch Road: "Hadrn't heard, but let me check."
10/3/2006	5:49 PM	Maxwell Wright/Boch Road emailed: "Mary, Any news from the meeting on the 28th?"
9/21/2006	5:13 PM	PIO responded to Maxwell Wright: "Hello Maxwell, CH2m Hill is scheduled to meet with the county on this matter next week (Sept. 28). Will get back to you after that meeting with some info. If you don't hear from me within a couple of days of that date, please drop me a reminder. Thanks. Mary Brooks
9/20/2006	1:13 PM	PIO responded to Maxwell Wright email: "Hello Maxwell, I know the senior project manager for CH2m Hill is on vacation, but I'm trying to track down someone who might have some info and will get back to you. Mary Brooks
9/20/2006	1:12 PM	PIO forwarded Maxwell Wright email to ch2m Hill: "Please see the email below from Maxwell Wright and let me know the status of any meeting and the discussion about the county property so I can get back to him. Thanks. Mary Brooks
9/20/2006	11:05 AM	<p>__From: Wright, Maxwell D. [mailto:Maxwell.Wright@pgnmail.com] Sent: Wednesday, September 20, 2006 11:05 AM  To: Mary Brooks  Subject: RE: 2605 Boch  Mary, I understand that CHM2 Hill has asked the Environmental Protection Division of the county to reevaluate their position on not allowing the Parkway to affect the Fazio tract of land which is the land North of us. They were supposed to have a meeting last week to discuss and I wanted to find out what knowledge you had and maybe what the status is. This is obviously a path that would be very beneficial and one that would lessen the residential impact which is again a documented objective. I was told by the county the initial plans for the land was for some type of passive recreational use---hiking and maybe a relocate for gophers and burrowing owls. It's beyond me to think that those reasons would result in making people move and change their lives. There has to be other long-term plans for that land involving some type of development which is helping drive the idea not to use the land for the Parkway. Anyway, let me know what you have heard about the possibility of using that land for the Parkway. thanks Maxwell Wright</p>
8/30/2006	3:00 PM	During progress meeting PIO noted Maxwell Wright got back in touch looking for details of why we couldn't use the Green Place county properties? PIO noted I didn't have details and he needed to contact the county. Mark and Dave noted they have requested info from county, hoping to get a letter from them soon.
8/28/2006	9:11 AM	"Aug. 28, 2006 Mindy & Maxwell Wright 2605 Boch Road Apopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment

AlternativesDear Mindy & Maxwell,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities

The PD&E study is expected to finish with an approved alternative in late spring 2007. 8/22/2006	3:59 PM	PIO responded to Maxwell Wright: "Just that they purchased that property for conservation through their Greenplace program and they didn't want the project to affect it. I haven't heard what the county plans specifically for the property, only that it would be something passive. Mary Brooks
8/22/2006	3:30 PM	Maxwell D. Wright/2906 Boch Road emailed: "Mary, So what exactly is the reason Orange County is saying again not to use the vacant land they purchased to the North of our home on Boch Rd for an alignment? Was it strictly for a gopher conservation area or was there anything additional? Thanks Maxwell D. Wright"
8/6/2006	4:18 PM	Maxwell Wright responded to PIO email: Thanks. I want to direct some of my attention to the county as well regarding this situation.Maxwell"
8/2/2006	11:50 AM	Attended public workshop on 7/26/06. Maxwell submitted comment: "I'm okay with Alternative I systems interchange since it impacts less people." Mindy submitted comment "I'm okay with Alternative I systems Interchange since it impacts less families." Additional comment: "None of this is good, this should be shifted north where they plan to develop later. However, we are supportive of Alternative I and Alternatives 3,5 and 6 if you take 2821 (2605 Boch). No Alt 2 - too close to 2821 (2605 Boch). We will not want to look at it. No Alt 4 - too close to 2821 (2605 Boch) and it takes my parents' house but not mine. Don't want to look at it and won't."
6/6/2006	2:23 PM	Worked on comment response to Mindy & Maxwell Wright/2605 Boch Road and sent."June 6, 2006Mindy & Maxwell Wright2605 Boch RoadApopka, FL 32712RE: Receipt of Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Mindy & Maxwell,Thank you for submitting public comment forms for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments and state agencies. Obviously, there are many questions that cannot be answered and details that are not yet available at this point. Also, as you can imagine, The Florida Department of Transportation and the Orlando-Orange County Expressway Authority face considerable challenges in trying to address the conflicting interests of various governments, property owners, business operators, environmentalists and other community stakeholders in developing this much-needed project.As discussed, we are developing traffic projections and other preliminary details for the viable alignment alternatives in preparation for the next public workshops to begin in late July. You are on the list to receive the project

newsletter, now in production, as well as public meeting notices. Based on public and government input and analysis of the viable alternatives, one to two preferred alternative(s) would be developed. Public hearings are tentatively scheduled to be held in February 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. Project exhibits and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click the button for "Corporate Site." On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text links for the project files and other information. I encourage you to check the website periodically for updates, or to contact me with questions, comments or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

PIO received two comment forms and letters (entered verbatim, spelling and grammatical errors included): "Mindy and Maxwell Wright 2605 Boch Road Apopka, FL 32712 Wekiva Parkway PD&E Study Comment Form attachment June 1, 2006 We are writing to express our opinion, about the Wekiva Parkway PD&E Study. On June 1st we were told by Mary Brooks in the your department that you Orange County has acquired to the north of Boch road 2 pieces of public land and requested that the Wekiva Parkway not impact the two recently acquired conservation properties. Orange County has indicated to you that they have no development plans for those properties, other than some restoration or passive use. Well, this is mostly raw land and restoration is ridiculous. I want to make sure that you understand that less than 4 years ago our family had to go through a long process to get a special exception to build our dream home from Orange County. Not to mention my parents live in a house they build 25 years ago on the same 6 acres on the property, they care for our son and we are here to help them since they are elderly. Less than 2 months after we started building our house, as we were pouring the foundation, we saw Orange County on the road, surveying for the 439 expressway. Orange County made us pay for this exception, told us to build our dream home, please see attached pictures and tell me this is not a dream. Orange County told us after a year, go ahead build the house, all is well. So for the past 4 years so far everyday since we started pouring the foundation we have had severe mental stress over a road you want to put over our house or too close to it, that is no way to live. Would you want to live like that? Then you tell us you don't have the funds to buy the property, well Orange County just bought a lot of property so you do have to but the road that will not take a of the beautiful home on Boch Road. That leads us to believe you are not considering any other options since you have plenty of land already without more funds just north of Boch Road. So to make a long story short we are going to hire representation because, we live at 2605 Boch Road and your decision to put a road here and Orange counties request not to build on the land they just bought north of Boch Road, makes me think that our request not to put a road over our house is as important if not more important than Orange Counties request since we live here and you have an option to build a road just North of us on land Orange County already owns. Or south of us for that matter that is vacant and does not displace residents. By hiring representation we want to make sure that if we are displaced from our home or the road is too close for comfort that Orange County will not be allowed to build on the land they purchased just north of Boch Road for the next 50 years. We understand they may not have plans in writing today, which we don't believe, but we are being pressured to hire representation. To make sure if you take our dream home, Orange County will ever be able to build on those 2 pieces of property. How would you like to have a County tell you they won't be buying homes till they have the funds, but they just bought a lot of land North of you which is perfect for the road. How would you like to be in the beginning stages of building, a year worth mental stress with the County making not only jump through hoops, but pay for a special exception, go to a public hearing only to get 2 months into your building process and see that same County on your Road surveying to take the house your building. Do you think your life is full and happy for the past 4 years? And how long will we have to wait before you offer us something half way reasonable to build another \$\$\$\$\$\$ dollar home and enough to buy the same

amount of property some where close to Orlando and as nice as we have now????????????? Don't you think it will take a pretty penny? Do you worry over this every day, you bet, and that is were representation comes in, we certainly won't let it come out of our pocket since you are have put us through all of this and continue to give us heartache every day. We had our 1st baby here 2 years ago and this where we want him to grow up, and we certainly don't think the choice to go over Boch Road is a smart one. WE did not eat peanut butter and jelly for 2 years for nothing; we spent every dime on this dream home. We have a multi level deck beautifully groomed acres, \$\$\$\$\$\$ worth of pavers, and a custom home we built ourselves worth \$\$\$\$\$\$. Not to mention our sons grandparents live behind us and take care of since we both work and we look after them as well. Especially, since Orange County gave us permits and already knew they were going to take the house, the mental anguish itself is hardly bearable. Take a look at the attached to get an idea what ORANGE COUNTY let us do with our hard earned money and sweat. If this road takes our house, I expect that Orange County will never be able to develop anything on the already vacant land just purchased north of Boch Road, we will have representation on this issue. Sincerely, Mindy Wright June 2, 2006 We are infuriated, that your team or environmentalist group could begin to think that any other piece of property North of Boch Road can be anymore precious than what we have. I will call all of the groups that have attended your meetings next week, but I am formally requesting your team to come out here and see for yourselves the environment that these 3rd and some 4th generation families are surrounded by. My parents bought this property 20 years ago to raise their teenagers and sold pieces of the property to other families that wanted to do the same. At least 7 home sites on the North side of Boch road are surrounded by 150+ year old large oak trees. Not to mention that we lost over 60 during hurricane Francis and had to clean up and haul off tens of thousands dollars worth of debris ourselves 2 years ago, and we are not fully recovered from that, but we do what we can. There is no more property for us to go to like what we have preserved. All the developers have torn it up. This is beautiful land. Every time someone comes out to our home they comment on the unique setting Boch Road still offers Orange County. We think that the 429 can go somewhere a little further away from Boch to preserve this precious land. Don't get me wrong, we all need the road, but not at the expense to go over these beautiful trees that are so rare, taking all the life out of the North side of Boch road, where would the birds go? I will invite you or any group to come see why my 2 year old runs down the hall every single night saying "whoow whoow" owl to go to our back deck and see huge owls with 5-6 ft wing spans fly by. We listen to them every night they are out. So you have property to offer us as close as we are from Orlando that has been preserved as we have preserved it? And I don't want front door to look at either, that would ruin it. Or neighbors have a small spring behind their house with a stream, and my parent's house that is behind ours, your own surveyor could not see and did not know existed till I told him is nestled less than 300ft behind our house in these 150+ year oak trees and we are surrounded by them. Our neighbors on both sides of 2605 and 2621 Boch are so far into the trees that you don't know they are there. Where can any environmentalist find this? My parents well is only 40 feet deep and taps right into Rock Springs water supply channel. Can they offer anything cleaner, odorless, cold water, anywhere in this state? Not to mention that every home on this road has one form or another of livestock from horses, cows, goats, turkeys, a pig at one time, dogs and cats, etc. Where would they all go? We can walk out on any given day and see a rabbit, coyote, fox, turtle- (are they gopher turtles?) come take a look, snakes, armadillos, raccoons, black bears, wild hogs, woodpeckers, beautiful birds, owls, that is only to name a few. How can any environmentalist or your own study group say that we do not deserve the same protection as undeveloped land? We all have many acres since it has been in our families for many years and this is where we want to raise our kids. I cannot imagine that anyone would disagree that this land cannot be found anywhere else in Orange County. You can't just go buy a house, a home, or property like this, there is no more!!! Come take a look!!! I am going to call all the environmental groups I can, and the new stations, and papers to invite them out here to see what you dismissing as not environmentally protected, treed or precious wildlife land. We may have just a hand full of houses out here, but they are on very well kept very rich land. Sincerely, Mindy Wright 2605 Boch Road, Apopka, FL 32712 By the way, you tell me I can send in letters since Nov. 2005, and your website does not give a correct mailing

address, I printed the form and the zip code is missing, was that on purpose? Help save our homes and land on the North side of Boch Road. The Orange County Expressway Authority wants to put the Wekiva Parkway over it. Please read my letter to the Expressway Authority and come see why this land is not just something to be destroyed like the environmentalist and the county think it should be just because there are 7 houses on the whole North side of the road and they think undeveloped land is better to save? For what, so they can develop it and get more taxes than what our little seven homes produce. Our home is nestled in 150+ Oak Trees, hundred of them, the wildlife is unbelievable and we take care of our properties, we can move anywhere besides the Ocala National Forest to get something else like what we have. And we work in Orlando, where would we find anything like this, springs, ponds, hills and very large old trees. Not to mention the wildlife, large owls, fox, coyote, bob cats, bears, wild boar, rabbits, armadillo, raccoons, woodpeckers, turtles, snakes, I could go on. I invite you to come see for yourselves what the Expressway Authority and environmentalist thinks is not worth saving. Thank you, Mindy Wright 2605 Boch Road Apopka, FL 32712

6/5/2006

3:57 PM

Mindy Wright 407-310-9534 called. PIO noted I'd received both her info in the mail and via fax and hadn't had a chance to respond yet. She said she was very upset when she wrote that but is better now. She said she really just called because if looking at the map, our house is where the on-ramp is, to the southwest is the historical site. It could be about 1/8 mile up the road, where it quits being paved and goes to dirt. It's a building that's falling down and used to be schoolhouse many years ago. Mrs. Avery asked about it yesterday. If everyone looks at it on this road and knows where the historical site is; it's actually further east down the road. Where our property is, there's another east of us, then two more and then it's on the south side of road east of us. It's right below Top Nursery at the end of the road on top of the hill, not even 600-800' SW. Maybe they thought it was Mr. Boch's house, which looks like a historic site. She said my parents are in California, but they have a bird sanctuary with scrub jays, and there's naturally flowing spring. We've got springs, turtles, birds and foxes - everything you can think of here. It doesn't make any sense that it's okay to take our property; it's no different from the county property. Mrs. Wright had extensive comments and questions about the fact they had to get a special exception to build on their property. She wanted to know why the county would grant that if they knew the road was coming? She said there was someone surveying out there four years ago for the 429. She said it seemed like a young kid who didn't know where the houses were. She acknowledged they were hard to see before Charley, etc. She said it just doesn't seem they know what all is out here. She complained again about the county granting the exception when they knew the road was coming. PIO noted there was a previous 429 project for this area that also had a study... and eventually the project was scrapped due to lack of funding and support. PIO noted neither the county nor the OCEA can stop people from improving or developing their property if there isn't an approved alignment, which we won't have until February 2007 after the public hearing. PIO discussed at length the project timeframe and funding challenges. She said so by February we should know if they're going to take our property? PIO said we would have an approved alignment in that timeframe, though study won't be done until spring 2007. PIO noted funding will affect schedule for ROW acquisition. She had number of questions about what could be included in ROW acquisitions. She said for example, the property appraiser shows their property as a two bedroom but they have four bedrooms, would we go by the OCPA or do our own appraisal? PIO noted appraisals are done as part of the process. She noted she has a business also out of the property, also asked something about whether we would help them get another special exception when they found 10 acres to build on once their property was taken? PIO noted not up to speed on special exceptions and zoning issues, but they can raise that as needed when the time comes. She complained of the stress of having to tell her 2 year old that they will have to lose their house one day, thinks about this 24-7. How are people supposed to cope with this hanging over their heads for years at a time? She said they had planned to add on to the house this year but now don't know what to do. PIO encouraged her to be calm, stay informed and live their lives, reiterated overall timeframe and funding issues. PIO noted if any improvements are made they can raise those during ROW acquisition, if it comes down to that. She discussed at length the stressfulness of the situation. I don't mind the

city but Maxwell has to live out someplace like this.If we are displaced and had to go through special exemption, ... if we have to find 10 acres some place else....She said they weren't against the road. If we live out here we want the road; we just don't want to lose our house, and if we have to we certainly want to be compensated. She said she couldn't decide if she'd want to have to look at it, or if she'd want the entire property purchased. PIO said we get folks who stand on all sides of those arguments, just depends on what they want. She said they have a forest in front of their house; she said she could stay if we put up trees between them and the roadway. She said she's driven the rest of the 429 and it's not bad looking.She said it would be helpful to have, in addition to the newsletters etc., something to help calm people down like how I'm talking to you. She mentioned she'd spoke to Joyce Avery who was also upset. PIO noted I'd spoken to Joyce yesterday. PIO noted we typically only send out project info, but if she knows someone is upset tell them to call me and I'd be happy to talk with them. She said she appreciated that and appreciated my time. --425 p.m.

6/5/2006	2:45 PM	PIO received original letters and comment form in the mail from Mindy and Maxwell Wright.
6/1/2006	3:00 PM	Maxwell Wright responded to PIO email: "Thanks Mary. I really do appreciate you taking the time to address our concerns and we will stay involved in the process to remain up to date with any changes that may happen. Regards,Maxwell
6/1/2006	2:55 PM	PIO responded to Maxwell Wright email: "Maxwell,I understand your concerns, which will be entered into the project record. It is extremely challenging trying to develop a major transportation improvement of this nature in an area where there are so many conflicting interests (you want the northernmost alternative shifted north; others want it shifted south, etc.). Please keep in mind that we are in the very early stages of developing this project, and changes are entirely possible. This project is also not fully funded, so we are possibly talking several years before we might begin acquiring properties. The schedule will depend heavily on the availability of funding.I encourage you to remain engaged and aware of the developments with regard to this project. And I'll do my best to provide the most accurate information as it becomes available. Mary Brooks
6/1/2006	2:07 PM	____From: Wright, Maxwell D. [mailto:Maxwell.Wright@pgnmail.com] Sent: Thursday, June 01, 2006 2:07 PMTo: Mary BrooksSubject: RE: SR 429-Wekiva Parkway PD&E Study - Boch Road queryThanks for the information but that means we most likely will need to start looking for another piece of land even though we just built here less than four years ago. Our relatives live on the same piece--2621 Boch Rd--and have been there for over 20 yrs. We moved out here to be close to them and raise our son. We even had to go through a special exception hearing with the county to be able to build on part of their land because it was less than 10 acres. Obviously there is the southern alignment that may be selected but I don't know if I would choose to be that close to the noise. It's a shame the county can just make those decisions which will severely interrupt families' lives when there are alternatives to limit the residential impacts. Part of the project objectives are to limit the amount of residential and business loss but it just so happens in our case it doesn't seem so. It's extremely hard to imagine and sickening to know we stand a very good chance of being displaced. I can't even imagine the process we possibly would have to go through in negotiating fair market value but I guess that's where good representation is needed. You probably are in a thankless position when it comes to these issues but this is very important to us and concerns us greatly. Thank you for your time.Maxwell
6/1/2006	12:03 PM	PIO emailed Maxwell Wright: "Hello Maxwell,As I suspected, we are aware of the northern alignment access impacts on the Boch Road connection to Plymouth Sorrento Road, and are in the process of assessing options. Regarding the public land Orange County has acquired to the north, the County has formally requested that the Wekiva Parkway not impact the two recently acquired conservation properties. They have indicated that they have no development plans for those properties, other than perhaps some restoration or passive use. Orange County also requested that the project not impact the spring on the parcel immediately north of the former Strite parcel. That left us only a narrow corridor

for the east/west alignment. We might have some Boch Road access concepts ready by the August public workshops, which we are in the process of scheduling. Please keep in mind there are numerous local access issues that have to be addressed as part of this study. So please stay tuned! I wanted to check to see if you've submitted a public comment form listing your concerns? If not, you can pull the form from the Expressway Authority website on the Wekiva Parkway pages. I encourage you to check website periodically for updates. We're also working on the next project newsletter, which you'll receive in late June or July. Thanks for your patience and interest as we develop this major transportation improvement. Mary Brooks"

6/1/2006	11:02 AM	PIO emailed Maxwell Wright: "Hello Maxwell, I've taken a look at your property and the systems interchange alternative in question, and have a query in to the study engineers on your questions about plans for Boch Road access and the county's public land in that area. As soon as I hear from them, I'll get back to you."
5/31/2006	5:28 PM	Maxwell Wright Maxwell.Wright@pgnmail.com emailed: "Mary, We spoke briefly yesterday regarding the northern most alignment for the parkway and my question is about it interfering with Boch Rd. That road is north of Haas and is a dead-end road. I was wondering about access issues for the folks at the end of the road. Where Boch Rd meets Plymouth-Sorrento is where that entire component of the parkway would have to be bridged over a good distance (including on/off ramps) so Boch Rd residents would still be able to enter Plymouth-Sorrento unless there were some other plans to handle that issue if that particular alignment is favored at all. I can't imagine why that alignment couldn't be shifted just to the north somewhat if it's chosen so that Boch Rd is not affected at all unless there are plans for the public land that is just to the north. It seems like there are other feasible alternatives so that the parkway itself and all of the ramps are not coming right over the intersection of Boch/Plymouth-Sorrento Roads. If you have a chance to pull up the map and call me on Thursday I would certainly appreciate it. My office # is 407 804.8835 Thank You Maxwell D. Wright
5/31/2006	5:04 PM	Maxwell Wright called 407-7711200 asking about alignments in area of Boch Road. Were we going to bridge over that or would there no longer be access? PIO noted was in the car and didn't have map in front of me; asked that he email query so I could research and get back to him tomorrow. He said he would.

8/28/2006	9:37 AM	<p>"Aug. 28, 2006 Chris Wynn 568 Wekiva Bluff St. Apopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&amp;E Study Viable Alignment Alternatives Dear Chris Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. As requested, please find enclosed the Orange County Wekiva Parkway Viable Alternatives Ponkan Road Interchange. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities</p> <p>The PD&amp;E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text</p>

link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely,Mary Brooks

8/2/2006	12:11 PM	Attended public workshop on 7/26/06. Submitted comment: "I was wondering if I could get a copy of the Orange County map with the potential Ponkan interchange. Thanks."

Notes		City of Mount Dora
Date	Time	Regarding
1/3/2006	1:37 PM	Mark CH2M Hill forwarded City of Mount Dora letter & resolution to project team: "December 16, 2005Mike SnyderExecutive DirectorOrlando-Orange CountyExpressway Authority525 South Magnolia AvenueOrlando, Florida 32801RE: Wekiva Parkway Dear Mr. Snyder:Please find enclosed a copy of the City of Mount Dora Resolution 2005-28, approved by the Mount Dora City Council on December 6, 2005.As previously requested by the Expressway Authority, the City Council has formalized in the resolution its concerns regarding the Wekiva Parkway and the interchange at U.S. Hwy. 441 and State Road 46 On behalf of Mayor Jim Yatsuk and the City Council, thank you for your attention to this important matter.Michael QuinnCity ManagerMQ/mcmenc.RESOLUTION NO. 2005-28A RESOLUTION OF THE CITY COUNCIL OF THE CITY OFMOUNT DORA, FLORIDA, PERTAINING TO THE WEKIVAPARKWAY; PROVIDING FOR AN EFFECTIVE DATE.WHEREAS the City Council of Mount Dora has been supportive of the efforts to date of the Orlando-Orange County Expressway Authority and the Florida Department of Transportation to create the Wekiva Parkway System; andWHEREAS, the Orlando-Orange County Expressway Authority and the Florida Department of Transportation have been cooperative partners with Mount Dora and other communities in this effort; andWHEREAS, Mount Dora is continually engaged in long term planning, which planning now necessarily takes into account the Wekiva Parkway System; andWHEREAS, Mount Dora's future well being as a thriving community will be directly impacted by the Wekiva Parkway System, particularly as that system relates to access to those parcels on Mount Dora's Future Land Use Map designated as employment center; and WHEREAS, the Wekiva Parkway System is to be designed to have the least impact possible on environmentally sensitive lands; andWHEREAS, the Wekiva Parkway System will stimulate opportunities for both positive and negative impacts; andWHEREAS, the most recent iteration of the Wekiva Parkway System plan is a cause for some concern to the City Council; andWHEREAS, the westernmost alignment crosses the environmentally sensitive Wolf Branch Sink property, while the eastern aliments more readily serve the employment center areas without adversely impacting residential areas; andWHEREAS, the existing traffic analysis of State Road 46 conducted by the Lake-Sumter Metropolitan Planning Organization shows that State Road 46 will need to be a six lane highway at the time the Wekiva Parkway System is under construction;NOW, THEREFORE, be it resolved that:Section 1. The City Council urges the Orlando-Orange County Expressway Authority and the Florida Department of Transportation to examine design alternatives to the interchange at U. S. Highway 441 and State Road 46 that will discourage unintended vehicular traffic movement on State Road 46 west of the interchange, and which will provide a separate, safe bicycle and pedestrian crossing over or under U. S. Highway 441, and to provide for landscaping and buffering along the portion of State Road 46 west of the interchange so as to maintain the quality of life that exists.Section 2. The City Council urges the Orlando-Orange County Expressway Authority and the Florida Department of Transportation to select an alignment and connection to State Road 46 that is east of the current intersection of State Road 46 and Round Lake Road, and to abandon the route shown by the westernmost alignment Section 3. The City Council urges the Orlando-Orange County Expressway Authority and the Florida Department of Transportation to expand the travel lanes on State Road 46 from two lanes to six lanes at the time of initial construction of the Wekiva Parkway System, and to provide a separate bicycle/pedestrian trail or lane along State Road 46 at that time. The council believes this alternative transportation trail or lane will provide much needed interconnectivity and will benefit the school system and the children within

the school system. Section 4. The City Council hereby reasserts its desire to work cooperatively with the Orlando-Orange County Expressway Authority and the Florida Department of Transportation in creating the Wekiva Parkway System. Section 5. This resolution shall take effect immediately upon its final adoption by the City Council. PASSED AND RESOLVED this 6th day of December, 2005, by the City Council of the City of Mount Dora, Florida. James E. Yatsuk, Mayor City of Mount Dora Attest: Michael Quinn, City Clerk City of Mount Dora Approved as to form: e:9.269 TOTAL P.84"

Contact Notes		Karl Yeager
Date	Time	Regarding
1/30/2006	2:35 PM	<p>Drafted Yeager comment response: "Karl Yeager 3544 Ondich Road Apopka, FL 32712 RE: Receipt of Public Comment Form for Wekiva Parkway PD&amp;E Study Initial Alignment Alternatives Dear Karl, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. The property at 3544 Ondich Road would be partially affected by initial alignment alternative segment OC-9, if chosen. Please be advised, however, the study is still underway and changes are still being made. Currently, the initial alignment alternatives are being analyzed based on public input, as well as on engineering evaluations, to create a set of more viable alternatives. During this process, some alternatives are being revised or shifted, some removed from consideration, while new alternatives also are being added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input and the viable alternatives analysis, a preferred alternative will be selected. Public hearings are expected to be held in late 2006 or early 2007. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits and other information are available and will be updated in March on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text link for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement.</p>
1/27/2006	12:32 PM	<p>Comment Form: Karl Yeager 3549 Ondich Road Apopka, FL 32712 From attending many meetings and asking questions I get the feeling that any consideration is being given to the preservation of existing small lakes and possible (probable) contamination of the aquifer through these lakes and ponds.</p>

Contact Notes Bill Ziolkowski

Date Time Regarding  
6/26/2006 11:29 AM Bill Ziolkowski 407-834-5280 called and said We close in 3 weeks on the house, trying to put an offer on this one house, but it looks like this goes right through the back yard. He asked if that was a done deal? PIO noted we still had two alignment alternatives: SR 46 and 417, but that from engineering and traffic flow efficiency standpoint the 417 was the most logical. He said he used to live in the neighborhood and that's why he wants to get back there. It's great piece of land. I think it's the biggest lot in there. It just makes sense ... there's only few very low income houses down the street. PIO noted overall time frame and funding challenges, given how transient this area is there are homes that will be bought and sold maybe a couple of times before we get to construction.He said there weren't any other offers on this house and its' been on the market for months. If I have to sell it in a year with this road still hanging over it, I'm not going to get my money back. How long before they'll know which route they're taking? PIO noted when the study concludes next spring it will include an approved alignment alternative.He asked What about the development that just went in down the road? Would it go through that? PIO asked which development he was referring to, but he didn't recall the name. He said it's further toward Wayside Avenue? PIO noted we have public workshops coming up including Sanford Civic Center July 25. Did he want to receive the newsletter we were

working on now with that info? He said yes. We close on this house in 3 weeks and we don't have another one yet so hopefully the post office will forward their mail. 2487 Fieldingwood Rd., Maitland 32751Email buffalobill91@yahoo.comHe said If I don't live there it does make perfect sense to put it there, I know the easiest thing is to come down Wilson. I know you're not going to go through Heathrow, and I know you're not going to go through Lake Forest with all those folks up there. ... I know how it is with the folks in Tuskawilla and the beltway going through their back yards. I'm really not holding out hope PIO said I'd add him to the project database so he'd get info.--1018 a.m.

Contact		Mitigation Marketing
Date	Time	Regarding
7/25/2007	10:40 AM	A woman called from Mitigation Marketing (did not give name) 407-481-0677 said she got the letter from us but when she tried to log on to the FTP site it asked for a password. PIO walked her through another way to access project PowerPoint and viable alternatives maps. She appreciated the assistance.
Contact		Matt Pratt
Date	Time	Regarding
3/20/2007	3:46 PM	PIO returned call to Matt 407-330-2564, 407-330-9901 and walked him through the web links to the alternatives maps from the summer workshops. PIO noted we're in the process of updating the maps and will get those posted when available. he's interested in 46 and I-4 and found the file needed. He said this is perfect and thanks for calling me back so quickly.
3/20/2007	3:38 PM	Matt Pratt left MSG he's trying to get more info on 429 Wekiva Parkway project, I think there's web page that gives you all the info, if you could call me back and let me know best Place to go to get updates 407-330-9901.
Contact		Mr. & Mrs. Warren Ackley
Date	Time	Regarding
2/8/2007	3:10 PM	Mrs. Ackley called from 6148 Plymouth Sorrento Road, near Ondich Road. She said she heard they picked a route? PIO noted city of Apopka voted yesterday on corridor from where MBX will end at 441 west of Plymouth Sorrento Road to the north end o the city limits, and that will allow us to begin acquiring property along there. She said that won't affect her, what about up by her? She went on to describe her property, there's woods in back of us, don't want the road back there but that would be better than taking our house She wants to put in a pond but doesn't know what to do or when the road is going to come in. PIO noted overall schedule and funding challenges. She said there are lots of people out here adding on, nursery is building a new greenhouse and she things they're doing it because the road is coming through. She said it's very unsettling not knowing what's happening. PIO noted couple of the preliminary recommendations but also that that's a fluid thing because we continue meeting with various city, county and state agency officials. She asked for updated maps? PIO noted they're changing almost every time we meet, so not putting anything out now but will be doing newsletter and website update soon once we firm some of these things up. PIO noted PD&E schedule. She asked if any sort of environmental study was going to be done, noted the bear and other wildlife, and how could we know about that if we haven't gotten permission to come into people's yards? Pi noted this is a Project Development and Environment Study and there is a heavy environmental component to that. She asked if their property was being taken, how long would they have to move? She said they heard they would only get 30 days? She said you'd have to come out there and fight them, there's no way with the operation we have here we could move in that time. PIO noted there is a lot of miscommunication out there, and that relocation is something that part of the negotiation process. PIO noted I appreciate her concern and we will be getting updated info out to them in the coming weeks. She said okay and thank you for your time.--321 p.m.

Date	Time	Regarding
5/10/2007	2:45 PM	<p>__From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Thursday, May 10, 2007 2:45 PM To: 'jaubrey7@yahoo.com' Subject: SR 429-Wekiva Parkway PD&amp;E Study - Update Jay, I was in Miami at a conference this week and just got your email. We continue to work through meetings with local government boards and state agency representatives, and getting input from homeowners associations, churches and other community stakeholders facing potential impacts. Scheduling these meetings and working through various issues takes time, and has pushed back the project schedule. And consequently, the publication of the newsletter also has been pushed back. We had a meeting this past Tuesday with the Seminole County Expressway Authority, though I was out of town and unable to attend. We also have a meeting with the Mount Dora City County May 15 at 7 p.m., and a presentation before the Lake County Board of Commissioners in June, to name a few. We hope to be ready to bring some recommendations forward for public hearings in September or October, with the study hopefully concluding with an approved alignment and interchange locations in late 2007 or early 2008. I hope within the next 4-6 weeks to have updated maps that we can post on the website. Once the public hearings are scheduled we will get notification out to you all. Thanks for your patience. Feel free to call or email with other questions or concerns. Mary Brooks</p>
5/8/2007	1:37 PM	<p>From: j sims &lt;jaubrey7@yahoo.com&gt; Tuesday - May 8, 2007 1:37 PM To: &lt;brooksm@oceca.com&gt; Subject: Fwd: SR 429-Wekiva Parkway PD&amp;E Study - Update Attachments: Envelope Mary, Just checking in for any updates you may have available...Thanks</p>
1/25/2007	3:51 PM	<p>From: Mary Brooks Thursday - January 25, 2007 3:51 PM To: jaubrey7@yahoo.com Subject: SR 429-Wekiva Parkway PD&amp;E Study - Update Jay, My duties expanded in the last three months, and the project schedule has changed, hence the longer stretch than originally anticipated between newsletters. However, we are working on the next one now, which should come out in February or March. I also will be updating the project website in the next couple of weeks. The recommended alignment alternative should have been drafted, have gone through the agency review and revision process, and be ready to be brought forward for formal public hearings in April-May. We continue to meet with local governments and state agencies, as well as homeowners associations etc. during this process. Just a brief update for you for now. Stay tuned. Mary Brooks Public Information Officer</p>
1/25/2007	2:11 PM	<p>_From: j sims [mailto:jaubrey7@yahoo.com] Sent: Thursday, January 25, 2007 2:11 PM To: MBrooksSR414@cfl.rr.com Subject: Wekiva Prky update Mary, The most recent Wekiva Parkway and SR 46 Bypass Update is Summer '06. When will the next update be posted on Expressway Authority Website? <a href="https://epass.oceca.com/futureplans/projectsandstudies/westernconnectors.shtml">https://epass.oceca.com/futureplans/projectsandstudies/westernconnectors.shtml</a> Thanks Jay Aubrey Mount Dora, FL</p>
Contact		John Austin
Date	Time	Regarding
10/18/2007	11:21 AM	<p>John Austin/Irish American Partners 407-342-3500 called and said they're in real estate. Regarding the road from 441 to the north around the Wekiva Parkway, is that funding in place? PIO noted Wekiva Parkway limits and that it was not fully funded. Gave funding and overall schedules for OOCEA and FDOT. He asked when would the funding be in</p>

place? PIO noted five year plan for OOCEA has design and some ROW, so would be 2012-2015 at current funding to do construction on OC portion. PIO noted FDOT says at current funding would be 10-15 years to build. PIO noted that's without something changing, like toll increase. Also noted looking at other funding options, federal, FTE, etc. He asked will it still be the 429? PIO noted that's the plan at this point, though can't guarantee what would happen in 10-15 years. He asked will it connect to I-4? PIO said that's the plan. He asked how he could get more specifics on funding? PIO noted those questions have not been answered yet, everyone wants to know how to pay for it. He was thankful for the assistance.

Contact Date	Time	Jerry and Joyce Avery Regarding
12/12/2007	10:30 AM	Joyce Avery 407-886-7840 called to see when the meeting was. PIO noted still looking at February-March, there are documents have to be finalized before can schedule the meetings. PIO noted they would get newsletter prior to hearings with details. She said okay. She also said their computer is down and can I send her the latest maps? PIO confirmed she wanted the one for OC? She said that's correct.
9/25/2007	8:36 AM	Joyce Avery 321-230-3435 said lawyers sent letter with map showing their house is being taken. PIO noted it's just a solicitation letter, I'm still waiting for the official and accurate maps, and nothing has changed since we last talked a few weeks ago. PIO noted don't know the source of the attorney's map; can she send it to me to see what they're circulating out there? She said Jerry is out but would have him do that when he got back. She said the alternative that they were hoping we'd take, and that we said we were leaning toward, they show on the map the other one, the one that takes our house and most of our property. She asked for confirmation that public hearings in January, not October? PIO said that's correct. She said thanks for the confirmation and glad you had a good vacation.
9/5/2007	3:47 PM	Jasmine James/QCA PIO returned Jerry Avery's call. He was out in the yard and spoke with Joyce. PIO introduced herself and said was filling in for Mary Brooks while on vacation. Joyce said Jerry was calling because they received letter in the mail from the lawyers. Their house is the first on Boch Rd. from Plymouth Sorrento. Mary stated that she believed the alignment that would be recommended is the one coming in behind them and goes to Sanford. Maps that the lawyer sent out shows they are taking their whole property. The PIO asked if she knew that the public hearings have been moved to January 2008. Joyce said she had received a flyer on that. PIO said that Mary would return in two weeks. Joyce would really like some information before then. PIO will try and find out some information regarding her property.
9/5/2007	11:54 AM	Jerry Avery called and left MSG: Calling to see if Mary had any calls about a law firm Fixel, Maguire, and Willis sending out maps that they obtained recommended alignment and show properties within the alignment. Would appreciate a call. Jerry did not leave number.
7/26/2007	9:02 AM	PIO returned call to Jerry Avery and reiterated that the PowerPoint does not have the same acuity or clarity as the updated maps that I'm waiting on, but does give you indication of director we're headed. He said okay and he will stop bothering me until we get the new maps.
7/26/2007	8:39 AM	Jerry Avery called and left MSG yesterday I tried to bring up the map again. I used my sister's computer with high speed, almost new computer. It brought up all 50 of the different deals and every one of them works fine except no. 12, which is the area we're in.

I just wondered if you'd had any other complaints about that one not working properly. On small picture it's fine but if you try to blow it up it gets blurry. I wondered if it works okay for you or if anybody else had complained. I appreciate it if you can give me a call and let me know.

7/25/2007 10:19 AM Joyce Avery 321-230-3435 called back with another email address, think she said it was her sister's, for me to send info Jaylou35@hotmail.com <mailto:Jaylou35@hotmail.com> PIO reiterated I don't have the updated maps but would forward when available.

7/25/2007 8:57 AM PIO returned Joyce Avery call to discuss I still don't have new maps but lot of info she's looking for is in the PowerPoint posted on website. PIO noted I'd tried to send her info about that but her email came back.

7/24/2007 8:58 AM Avery email bounced back. PIO called Joyce Avery 407-886-7840, let her know email bounced back and told her bout the PowerPoint presentation posted on the website that contained lot of the info she was looking for, though I still didn't have the updated maps. She said don't know why the email bounced back, but she doesn't use it. She said she will go on the website later today. PIO reconfirmed the web address and text links to get to the info. She said she appreciated it.

From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]  
Sent: Tuesday, July 24, 2007 8:51 AM  
To: 'oneavery@aol.com'  
Subject: SR 429-Wekiva Parkway PD&E Study - recommendations

Hello Joyce,  
I'm still waiting on the updated maps, but in the meantime you might want to check out a new PowerPoint presentation we have posted on the Expressway Authority website at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> . The first text link at the top for the Wekiva Commission presentation has our recommendations to date for the preferred alternatives, including for your area of Orange County. There's a lot of good info in there.  
Hope that helps. I will get the new maps posted as soon as I get them.  
Mary Brooks

7/19/2007 10:54 AM Joyce Avery 407-886-7840 called to see what was new, any meetings scheduled yet? PIO said not scheduled but still looking at October. PIO noted I don't have new maps yet, but have her on the list for what she wants. She reminded me they're at Boch Road and I said I recalled that. PIO noted they should be getting a mailer soon, don't know when or if it went out yet because the guy's mom died, don't know when he will be back in, but hope to get them something by end of July. She said okay, and when you have something please email to me. PIO said she's on the list and will do.

6/29/2007 9:07 AM -----Original Message-----From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Friday, June 29, 2007 9:07 AMTo: 'lavery@netscape.com'Subject: RE: 429Joyce,I'm still waiting for the updated maps. The guys are supposed to get them to me in July (or it might be August...) so I can post on the website. Will let you know when I have them and send the one of interest your way.Mary Brooks

6/29/2007 8:58 AM -----Original Message-----From: lavery@netscape.com [mailto:lavery@netscape.com] Sent: Friday, June 29, 2007 8:58 AMTo: Mary BrooksSubject: 429Mary Thank you for the prompt response you have always given us.You said that you would E-mail me an up to date map when I got my e-Mail straightened out. I have finally got it straight, Soif you

could send it to me I would appacharate it.Joyce Avery

6/12/2007	8:30 AM	Joyce and Jerry Avery 407-886-7840 called to see what I'd found out? PIO noted I'd emailed them last night, but it bounced back. She said they're changing their email. Jerry can tell you what it is, and you can tell him what you found out. Jerry got on the phone and PIO relayed that preliminary recommendation is OC-LC systems IC alternative 1, westernmost IC and which the southernmost east-west alignment would be south of their property, so no direct impact. He said was glad to hear it, they were not looking forward to moving. PIO noted this is not approved, only preliminary, reiterated remaining schedule PIO noted even if an impact were determined to a property, this is not something that is going to happen in the next year, or even next 5 years because this project is not fully funded. Noted we only have in OC money for design and a little ROW, not all of the ROW nor construction. PIO noted that's not funded in the next 5 years, so could be 10 years or more, unless funding becomes available, federal money or they raise tolls. He said he wasn't aware it was that far off. PIO said when he gets his email worked out to send me his new address; he said he would, they're in the process of changing servers. He thanked me for the info.--841 a.m.
6/11/2007	8:17 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Monday, June 11, 2007 8:16 PM To: 'oneavery@aol.com' Subject: SR 429-Wekiva Parkway PD&E Study - 6303 Plymouth Sorrento Rd. Joyce,I took another look at your property at 6303 Plymouth Sorrento Road; it's noted as parcel 2802 on the project maps from last summer's public workshops. The preliminary recommendation for the Wekiva Parkway's Orange County-Lake County Systems Interchange in your area is for Alternative 1. This alternative features the westernmost interchange, the southernmost east-west alignment and would result in no direct impact to your property. The east-west alignment of this interchange would be south of your property. However, please be advised that this recommendation is strictly preliminary, has not been approved and is still subject to change. Also, the project maps from last summer's workshops are in the process of being revised based on the input and direction from local and state officials. So the potential property impacts could change once the alternatives are revised.As noted, we hope to have the updated maps posted on the OOCEA website in July, and the formal public hearings on the preferred recommendations in September or October. We will be sending out info soon to the public I hope that helps. Please feel free to call or email with additional questions. Mary Brooks
6/11/2007	11:07 AM	PIO returned call to Joyce Avery 407-886-7840 and gave update on schedule, working on brief mailer to go out soon. she asked about recommendation in their area, any little bit of info will help? PIO said I'd look that up again, don't remember off top of my head and get back to her. She said she'd appreciate it.
4/23/2007	11:59 AM	Joyce & Jerry Avery called and left MSG We were just wondering if there were any updates on the road, anything new you could tell us? C 321-230-3435 Thanks Mary.
4/2/2007	11:06 AM	PIO returned call to Joyce Avery 407-886-7840 noted still at least June-July before we have hearings, and was in meeting this morning where they said could even be as late as September. PIO noted since we last spoke March 1, the OC BCC approved recommending the Kelly Park IC location. She said right, she saw that on the internet. PIO noted other than that still working through officials' meetings. She said okay, appreciate you calling me back.
3/30/2007	10:07 AM	Joyce Avery 407-886-7840 left MSG asking if there was anything new, any public meetings please call me.
3/1/2007	3:00 PM	PIO returned call to Joyce Avery 407-886-7840/6303 Plymouth Sorrento Road, let her know nothing has changed since we last talked couple weeks ago, still looking at May or

June for public hearings, but until we get through all of these officials' meetings, we can't schedule the public meetings definitively. PIO noted we hope to have some new maps soon to post on the website. She said okay and thanks for calling back, she will check back with me.

2/23/2007	10:02 AM	Joyce Avery MSG I'm just calling for any update you can give me 407-886-7840, c 321-230-3435 call me back, thanks.
2/5/2007	5:33 PM	PIO returned call to Joyce Avery 321-230-3435, PIO noted preliminary recommendation at this point was southern east-west alternative due to lower residential impacts and environmental impacts. She asked and when is the meeting? PIO noted we're still meeting with local officials, DEP and other agencies, so can't have hearings until we get done with those. PIO noted they discussed on Friday that more than likely it will be May now before we can schedule the public hearings. PIO noted of course they will again get a notice once the meetings are scheduled. She said she appreciated me calling back, any info they can get helps, everybody has been waiting so long. PIO noted we're in the home stretch, will finish the study this summer with an approved alignment, but keep in mind this is not fully funded, no telling when will have the money to buy land or start construction, but at least they will have an idea of what, if any, impacts they might be facing. She said thanks again.
2/5/2007	8:58 AM	Joyce Avery MSG call me at 321-230-3435 Just seeing if anything new from Friday's meeting. Thanks appreciate if you call me back.
1/29/2007	11:25 AM	PIO returned call to Joyce Avery (& Jerry) on Boch Road 407-8867840, 321-230-3435, left detailed MSG that we're still going through agency meetings to get input and work toward a recommendation, probably will be doing that the next month or so. PIO noted EAC/PAG meetings Feb. 2 at 10 and 130 p.m. same info will be presented at both, good opportunity to get an update but noted info not final. PIO noted public are allowed to observe the committee meetings. PIO said any other questions give me a call back.
1/29/2007	8:12 AM	Joyce Avery (& Jerry) left MSG We are on Boch Road. We've talked to you before. I am wondering if anything new going on with the road. If you could give me a call back at 407-886-7840 if you don't get me there call 321-230-3435. Thanks.
1/2/2007	5:33 PM	PIO returned call to Joyce Avery 407-886-7840, c 321-230-3435 (PIO traded messages with them 12-12 and spoke to them 12-13), left MSG that nothing has changed since I spoke with them two weeks ago, still looking at public hearings in April and draft recommendation late this month or early February. If they have other specific questions give me a call.
1/2/2007	10:42 AM	Joyce Avery MSG Jerry and I both have talked to you at different times. We're out here off Boch road off Plymouth Sorrento. I thought you might be able to give you any info now after the New Year, if there are any time set for a meeting or whatever info you could give us, I'd appreciate it. 407-886-7840, c 321-230-3435 thanks.

Doris,

As noted below, FDOT is developing the project in Seminole and Lake Counties. We must first finish the study and then begin final design before right of way acquisition typically gets going. You are, however, welcome to contact the FDOT toll free number, 1-800-780-7102, and ask to speak to someone in right of way about how FDOT handles that process.

Subject: SR 429 - Wekiva Parkway PD&E Study - 1575 Metz Ave.

Hello Doris,  
It does appear that there could be potential impact to the property at 1575 Metz Avenue in Sanford from the Wekiva Parkway SR 417 Interchange alternative. Please bear in mind, however, that we do not have an approved alignment, and these things are still subject to change.

We are in the last stretch for the SR 429 Wekiva Parkway Project Development and Environment (PD&E) Study, which began in January 2005. The Florida Department of Transportation is developing the Seminole and Lake County portions of this project; the Expressway Authority is developing the Orange County portion.

We are trying to wrap up this round of local officials and state agency representative meetings to finish getting their input regarding recommendations for alignment and interchange .locations to bring forward for formal public hearings in October. I hope to have updated maps also to post on the website in July-August.

We hope to complete the study in late 2007 or early 2008 with an approved alignment.

From there the project would typically proceed to final design, then property acquisition and then construction (each taking about 2-3 years depending on a host of factors). However, this \$1.7 billion project is not fully funded. FDOT said it could be 10-15 years at current funding levels before they have enough money to buy all of the property needed and build the Wekiva Parkway in Seminole and Lake Counties. If federal or other funding were to become available, that timeframe would move up. OOCEA has some funding to move ahead with design and some right of way acquisition in Orange County over the next five years, so that project could begin construction maybe between 2012-2015. If more funding became available, that could accelerate the schedule

I hope that helps. Please feel free to share this information with potential homebuyers or neighbors, and feel free to have them contact me directly as well.  
Mary Brooks

My name is Doris Bacon-Elsea and I live at 1575 Metz Avenue, Sanford, FL 32771 (407-321-0799). I have attended all the public hearings at the Sanford Center to keep abreast of decision for the extension of Highway 417 to Apopka. According to the latest maps, my property is part of the proposed extension right of way. My concern at this time is I need to sell my 1.4 acres with house and move my husband and myself to a smaller dwelling considering our advancing age. It is proving difficult to sell when you have to tell potential buyers the land and house will be taken soon and yet you can define soon. I am willing to sell now for a reasonable sum. Can you give me any encouragement that this situation will end soon with concrete times, places, and dates? Thank you for any help you can provide, Doris

Date	Time	Regarding	
11/26/2007	2:15 PM	JR Ball/Madden Engineering 407-629-8330, -8903 called and said he left SC about 7 months ago and now working for Madden. It's small firm, about 17 people and they don't do government contracts but developments. He said they have a small landowner near Wilson and International Parkway. He asked when was this project likely to go to design and ROW acquisition? PIO noted it depends on the section in question. He said the part at I-4 and SR 417. PIO noted FDOT does not have any money programmed for design, and a little programmed for Row acquisition but not nearly enough. PIO noted FDOT is saying it will be 10-15 years before construction at the current funding levels. He said so what happens to these property owners if the alignment hits them? PIO noted once we get into design and the extent of any impact would be determined, then they'd have to go through the ROW acquisition process. We discussed that the alignment still can shift or be tweaked as well as pond locations, etc. he said he understood that. He said that helped. PIO asked if he wanted to be on the mailing list? He said absolutely, jr@madden-eng.com <mailto: jr@madden-eng.com>, Madden, Moorehead & Glunt Inc., 431 E. Horatio Avenue, Ste. 260 Maitland, FL 32751	
5/29/2007	6:40 PM	PIO emailed JR Ball: JR,I checked the two properties in question against the recent Wekiva Parkway SR 417 interchange adjusted alternatives and found the following:Parcel 25-19-29-501-0400-0010:SR 417 Interchange (IC) Viable Alternative (summer workshops - direct impact SR 417 IC Refined Viable Alternative 2 - impact to southern half of triangleSR 417 IC Refined Viable Alternative 1 - impact to southern half of triangleSR 417 IC Alternative A - direct impact northern third of triangleSR 417 IC Alternative B -direct impact, 2/3 to 3/4 of property SR 417 IC Alternative C - direct impact to half or more of propertyParcel 25-19-29-501-0200-0030:SR 417 Interchange (IC) Viable Alternative (summer workshops) - minimal impact SR 417 IC Alternative A - direct impactSR 417 IC Alternative B - minimal impact, NW cornerSR 417 IC Alternative C - no direct impactSR 417 IC Refined Viable Alternative 1 - minimal impact, sliver of NW cornerSR 417 IC Refined Viable Alternative 2 - no direct impactAt this time we are leaning toward SR 417 IC Refined Viable Alternative 1, but that is by no means the final recommendation. Please be advised that these maps are in a state of flux as we continue to work through various issues and meet with different officials. Potential impacts are highly subject to change at this time. We hope to have the maps firmed up enough to post on the OOCEA website in July, I'm told now.Please call or email with other questions or concerns.	
5/22/2007	7:56 PM	PIO responded to JR Ball: JR,Will get back to you on this. You had the initial alignment alternatives in your emails. The viable alternatives from last summer's workshop are on the OOCEA website at ftp://ftp.ch2m.com/Wekiva_Public_Boards/. And we will have updated maps posted in the coming weeks.Mary Brooks	
5/22/2007	2:48 PM	JR Ball/ Madden, Moorhead & Glunt emailed: Mary,Thanks for the return call. We are evaluating these sites for development -- parcel ID's are shown below. From the Wekiva Parkway Exhibit we obtained from Seminole County, it appears that one of the proposed alignments will take-out both parcels - the route intersecting with I-4 @ SR-417 -- perhaps the favored route... (attached for our client)Let me know about the status of the alignment selection and any anticipated date for a selection decision. -- I have a copy of the Summer 2006 newsletter (attached for our client). And, add me to any newsletter, announcement or notices list, if you would please.It was good to speak with you again after all of these years. Thanks for the help.(Parcel ID #s 25-19-29-501-0200-0030 /	

25-19-29-501-0400-0010)With JR Ball'', P.E.Madden, Moorhead & Glunt431 E. Horatio Avenue, Ste 260Maitland, FL 32751407-629-8330 (Voice)407-629-8336 (Fax jr@madden-eng.com

5/22/2007 9:28 AM PIO returned call to JR Ball/Madden Moorehead & Blunt, he used to work for SC Engineering. He has client looking at property at Wayside and SR 46, the western end of Wayside and 46. he has copy of Wekiva Parkway and looks like goes through property on the SR 417 alternative. He noted the guy does not own it; just doing due diligence. PIO asked for address? JR did not have but would email; PIO gave email address. He said he understood 417 was the preferred alternative and that makes sense as someone who used to work in county engineering. PIO noted maps on website form last summer's workshop and are being adjusted, so new maps will be different, FYI. PIO noted working on adjustments based on community stakeholders concerns. PIO said can check on property on adjusted alternatives and get back to him. He said he'd appreciate it, good talking to you again. --937 a.m.

5/18/2007 8:25 AM JR Ball MSG we have not talked in probably 10 years. I'm with traffic consultants and we're taking look at land appears to be in alignment of Wekiva Parkway. Would like to talk to you about that. Timing of everything and if any alignment has been selectedGive me a call 407-629-8330 would love to talk to you under any circumstances.

For months now we have been meeting with various local and state officials to gather their input and direction on which of the various alternatives should be eliminated, and which should be tweaked and/or continue to be evaluated. This process has included both individual meetings with various Seminole County Commissioners and county staff, as well as presenting updated information to the SC Expressway Authority in early May.At this point, the recommendation is to widen the SR 46 corridor to the north in Seminole County, so there would be little if any direct impact to your neighborhood entrance. Also in Seminole County, we are recommending the SR 417 interchange connection to Interstate 4. I know it has been a while since you've heard from us, and I just wanted to bring you up to speed. We have a few more local government meetings for example Lake County Board of Commissioners on June 5 and the Wekiva River Basin Commission in June or July), and then we hope to be able to post updated maps in July on the OOCEA website at ftp://ftp.ch2m.com/Wekiva_Public_Boards/ .We are now shooting for formal public hearings in each county in September or October. We will be getting some updated information out to everyone in the coming weeks. Please call or email with any questions.Mary Brooks

Subject: SR 429 - Wekiva Parkway PD&E Study - 2635 Boch Rd. Query  
Hello Gary,  
I just got a chance to look up your property at 2635 Boch Road as requested. The OC Property Appraiser's website shows this parcel on the north side of Boch Road and four parcels east of Plymouth Sorrento Road. If this is the correct location, there would be no direct impact from the Wekiva Parkway since the recommended preferred alternative in this area would pass south of Boch Road.  
The OOCEA Board today moving forward to public hearings with the recommendations, so we are looking to have those hearings in late January or February. I also soon hope to have the latest maps posted on the OOCEA website.  
I hope you find that information helpful. Please feel free to call or email with other questions.

Subject: SR 429-Wekiva Parkway PD&E Study -  
Hello Donna,  
Your emails were forwarded to me regarding your public information request pertaining to the SR 429-Wekiva Parkway Project Development and Environment Study. I have responded to your enumerated requests below:  
1) I am interested in the Right-of-Way Maps showing the preferred

alignment/alternative with the property lines and the current and proposed right-of-way takings for the project.

We are in the PD&E Study phase, which is not complete, and we do not yet have an approved alignment. Therefore, we do not yet have right of way maps. The recommendations for the preferred alignments and interchange locations can be found in a PowerPoint presentation on the Expressway Authority website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> . We also hope to have updated PDF's of the project maps available online soon, perhaps in November.

2) If the right-of-way documents are not available, I would like to request the PD&E Study Maps or Concept Plan Maps showing the preferred alignment/alternatives with the existing and proposed right-of-way for the project. I would like the maps to be 60% or better, but I understand that if the Design Stage is not complete, I may only get the 30% maps from the complete Study Phase, and these are subject to change.

Again, the recommendations for the preferred alternatives can be viewed in the above mentioned PowerPoint presentation, and actual updated maps with the recommendations are forthcoming. You also may view the viable alignment alternatives that were presented at public workshops in the summer of 2006 on the OOCEA website. FYI, final design will not begin until some time after the PD&E Study has concluded in summer 2008.

I hope this helps. Please feel free to email or call with other questions.

Subject

Wekiva Parkway & SR 46 Bypass  
Project in District 5:

Good Afternoon Ms. Fox:

I would like to make a public information request for an information on the Wekiva Parkway Project through Orange, Lake and Seminole Counties. I am not sure what the FDOT Project numbers are. I believe some of it is #238275, 407573 and 240200. According to my research, this project is being

developed by the FDOT and the Orlando-Orange County Expressway Authority and it is a 25 mile project. The roadway is to begin at SR429/SR414 (Maitland

Blvd Extension) interchange at US 441 in Apopka, go north and then east along the current SR 46 alignment, and connect to I-4 near Sanford. The project also includes the SR46 Bypass, which would begin at US 441 and SR 46 near Mount Dora and connect to the Parkway at a systems interchange in northwest Orange County.

I am interested in the Right-of-Way Maps showing the preferred alignment/alternative with the property lines and the current and proposed right-of-way takings for the project. If the right-of-way documents are not available, I would like to request the PD&E Study Maps or Concept Plan Maps showing the preferred alignment/alternatives with the existing and proposed right-of-way for the project. I would like the maps to be 60% or better, but I understand that if the Design Stage is not complete, I may only get the 30% maps from the complete Study Phase, and these are subject to change.

Please respond to my e-mail address or I may be contacted at 1-800-675-8931.

And let me know if there are any costs associated with obtaining this information.

Thank you in advance for your time on my request. I look forward to hearing from you soon. Have a great afternoon and a super week!

Donna Beaugrand

To: 'CBROWN045@CFL.RR.COM'  
Subject: SR 429 - Wekiva Parkway PD&E Study - 6034 Plymouth Sorrento Rd.  
William & Peggy,  
I'm responding to your query about your property at 6034 Plymouth Sorrento Road with regard to potential impacts from the SR 429-Wekiva Parkway Project Development & Environment Study. According to the Orange County Property Appraiser's website, this property is located three parcels north of Ondich Road on the west side of Plymouth Sorrento Road. If this is the correct property location, our recommendation for the systems interchange in this area shows a potential impact of 1/3 to 1/2 of the western portion of this parcel.

The latest Wekiva Parkway recommendations can be viewed on the Expressway Authority website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> , as well as other project information.  
Please be advised that these alignment and interchange alternatives during the study phase are conceptual and subject to change. We anticipate holding public hearings on the

preferred alternatives in January 2008, with the study on track to conclude with an approved alignment in summer 2008. As you're probably aware, this project is not fully funded, and the scheduling of subsequent project phases is tentative at best. I hope this helps. Please email or call with other questions or concerns.  
Mary Brooks

10/9/2007	9:55 PM	From: Chris Brown [mailto:CBROWN045@CFL.RR.COM] Sent: Friday, October 05, 2007 4:22 PM To: MBrooksSR414@cfl.rr.com Subject: 6034 N Plymouth Sorrento Rd Ms Brooks, I was given your name and email address as a possible source of info on the Western connector (I think that is the proper name for it these days) Our address is 6034 N Plymouth Sorrento Rd Apopka, FL 32712. We have received some info from an independent lawyer stating that plans had been firmed up and that out property would be taken. To date we have heard nothing form the county to this fact. We can be reached by phone @ 407-886-0292/ Cell 407-383-6647 or by return email . Any enlightenment would be appreciated! Thanks, The Bennett Family
1/16/2007	10:50 AM	PIO returned call to Peggy Bennett, said she misunderstood reading chart and thought meeting would be February. Had talked to Mr. Snyder and he said at the Apopka high school meeting could be December or January. PIO noted we originally thought it would be sooner, but in having to work through various issues and scheduling government and agency meetings, it got pushed back to April PIO noted in February hope to have draft recommendation, then has to undergo another round of review before we can bring forward for public hearings in April. She said that's good, that gives me something to plan on. PIO asked if she got the newsletters? She said yes. PIO said we'll get the actual dates and locations out to them.
1/16/2007	8:36 AM	Peggy Bennett 407-886-0292 MSG please give me or my husband Scott Bennett a call, want to know an update on when the meeting going to be for the 429 extension. Thank you.

Berkley@myfloridahouse.gov Subject: Re: next public hearing on Wekiva parkway  
Hello Alice, Ken Morris left a message for me Wed. right as I was heading to the project team meeting, and I just have not had time to get back to him, but we will. The tentative schedule for the formal public hearings is May; however that is subject to change until we get through all of these city, county and state officials' meetings to get them to weigh in and help hone some preliminary recommendations. We will be updating the Expressway Authority website soon with some of this information, and will send out a project update to the community, just FYI. Mary

Contact Date	Time	Matt Blake Regarding
11/15/2007	10:40 AM	PIO called back Matt Blake, who said his biggest question was why his property wasn't outlined? PIO noted his property is far enough away from those with any direct impacts that they just don't highlight ones like that. PIO noted the local access road to be built between the two red lines that will allow him access to what was 46 and the various ramps. PIO noted discussion has been that remaining portions of 46 could become county roads, hence the two different ROW lines on both sides of that local access or frontage road. He said he's fine with the configuration, Mark C. had shared that with him previously and he's known Mark since the project had a different name in the 80s. PIO noted he mentioned there was a meeting in August, but we haven't had a meeting. We've done presentations to SCEA and OOCEA boards, thought we'd have hearings in October but that's been pushed back, difficulty getting an appropriate site in one of the areas. PIO noted we're looking at February or March now for the hearings, and will send something out probably in January on that. he thanked me for the call back, you've answered all of my questions. --1052 a.m.
11/15/2007	10:22 AM	PIO looked up Blake property at 28512 SR 46 on LC Prperty Appraiser site. There are two parcel lengths between his property and SR 46 to the north, and he's about 3-5 parcels west of where CR 46A ends at SR 46. the parcel does show a faint west and north property line; its stair-stepped east border is shown in bold, as is the rest of the parcel adjacent.
11/15/2007	10:15 AM	PIO returned call to 352-989-0627 Matt Blake, live near 46 and 46a in Lake, corner Deerwood Farms, ... He asked what the red line was? PIO noted that would be the ROW line. He said doesn't look like would affect his property at all, maybe have to take couple hundred feet of his road but that wouldn't bother him. He asked why his property line was faint when the one next to him showed a bold outline? PIO noted did not know, would have to look into that. He asked about slip ramp access to his property? PIO said I'd have to look up his location and get back to him. He said that's fine.
11/14/2007	3:34 PM	352-989-0627 Matt Blake called and left MSG, I've talked with you a few times before in the past. I'm calling about the Wekiva Parkway and have a few questions about the preferred alignment that's on the internet now. If you could call me back I won't take much of your time.
3/8/2007	11:41 AM	PIO returned call to Matt Blake relayed schedule pushed back , still working through issues, meetings with officials, noted as example OC BCC just on Tuesday approved the Kelly park IC, looking at formal public hearings for May-June. Website has been updated, and once have dates nailed down will get another project update out to you guys. He said he appreciated the quick call back.

3/8/2007	11:26 AM	Matt Blake in Lake County MSG calling to see if schedule for three meetings in orange, lake and Seminole counties for the beltway coming through Wekiva area, this was supposed to be the month where they named the alignment 352-989-0627 Appreciate a call back whenever you can.
Contact Date		Mary Brabham SJRWMD Regarding
7/31/2007	2:20 PM	PIO responded to Mary Brabham/SJRWMD: "Hey Mary,As I recall from our discussions about the Nesler property, those "springs" did not reach the aquifer. I'm forwarding your query to the other study folks and will get back to you as soon as I can. Good to hear from you.Mary Brooks
Contact Date		Jean Brackett Coldwell Banker Commercial Regarding
8/16/2007	9:10 AM	Carolyn/FDOT Orlando Construction 407-482-7800 said the district office got a call from a Kim Brackett about the Wekiva Parkway, and it was forwarded to them, then sent to John Moore and he said contact PIO. PIO said I spoke to someone by that name yesterday, did she mention she worked for Dean Fritchen? Carolyn said she didn't know, said the number was 407-718-0541. PIO said I'd check to make sure that's who I spoke to yesterday, though name sounded right. She was thankful for the assistance.
8/15/2007	10:13 AM	Jean Brackett 407-975-3487 called and said she got my number from Dean Fritchen in her office, gave her a map from a while ago but she's looking for updated map. PIO noted last maps we have are on the website, though I'm waiting for new ones. She asked how to find them? PIO walked her through website address and links, noted PowerPoint actually shows our recommendations for preferred alternatives. She knew nothing about the project and asked for corridor, where it will connect to US 441 and I-4, which I told her. She said so oh, this isn't built now? PIO noted only study stage, and hope to finish study in summer 2008 with approved alignment and interchange locations. She said so, then construction would start 2009? PIO noted no, project not funded, even if were funded would still be looking at 5-10 years. With current funding, could be looking at 10-15 years, unless federal or other funding becomes available.
Contact Date		Carol Laurretta & Jason Bransford
10/3/2007	6:19 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, October 03, 2007 6:14 PM To: 'Laurretta, Carol A' Subject: RE: SR 429-Wekiva Parkway PD&E Study - 28515 SR 46 Okay Carol, thanks for the additional info, that did the trick. The property shows up as six parcels east of Old McDonald Road and in between CR 46A and SR 46, with the southern edge of the property abutting SR 46. If this is the correct location, there would be no impact from the recommended CR 46A realignment alternative which at this point would be about 100 feet east of Heathrow Country Estates. We did look at one alternative that would have run just west of your property, but that was not found to be feasible to move forward. Regarding the Lake County East local access interchange in this area, the recommendation as noted in the PowerPoint on the OOCEA website at < <a href="http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf">http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf</a> >) at this point is for the red or south alternative, which would parallel SR 46 to the south, so there would be no direct impact to your property.

Please bear in mind that none of these alternatives have been approved and all are still subject to change. I will post the latest study maps as soon as they are finalized and approved. The public hearings have been moved from October to January 2008. We hope to conclude the study with an approved alignment in summer 2008. I hope this helps. Please feel free to call or email with other questions or concerns.  
Mary Brooks

Subject: SR 429-Wekiva Parkway PD&E Study - 28515 SR 46  
Hello Carol,  
I tried to research the location of your property on the Lake County Property Appraiser's site, but nothing came up under your name or the address of 28515 SR 46. Would the property be under someone else's name? Do you have a property ID number or other identifying information that I could also try? Need to nail down the location to be able to compare it to the remaining CR 46A realignment alternative. Please advise at your convenience. Thanks.  
Mary Brooks

9/25/2007 10:47 AM

PIO returned call to Carol Laurretta 407-702-6844, was looking at the latest presentation on the website, there was something on the 46A, called the realignment, name of sheet says LCE alternative refinements. There was one place where they showed 46a realignment... guess the other places were on the other side of the state forest. One alignment the ROW is right at the corner of my property. This one alignment that was put in here  
I knew they were going to close 46a where forest was so the animals could cross. The one alternative next to our house just would seem to detract from that. I had just never seen these before.  
PIO noted that during the viable alternative workshops summer 2006 we have alternative right on the HCE property line. From their meeting comments and meeting with them separately, they asked us to look at different alternatives further away from them, which we did. But they were pretty much found not to be feasible for a host of reasons, went over KARST areas, would have taken a home, would impact the forest. PIO noted the last discussions were that we were looking at having it 100-200 feet east of HCE property line. She said she's closer to where 46a and 46 split, there's a cypress mill there. She said on that one alternative that she hadn't seen before, the ROW line on the right hand side of the road cuts the corner of our property.  
28515 SR 46. My husband is an engineer and he said I just don't see that happening, you already have a viable road on that end for the homeowners that are behind us. PIO said I'd confirm their property location and any impact from the remaining alternative, but from her description it doesn't sound like what we're looking at now would affect them directly.

PIO to email her info  
Email: carol.a.lauretta@parsons.com <mailto:carol.a.lauretta@parsons.com>

9/24/2007	4:42 PM	Carol Loretta?? MSG I have property on SR 46 in east Lake County. I have a question about one of the alternative refinements for the 46A realignment that I just saw on the website. I need to ask which one of these is the preferred alignment because one of them comes right next to my house. I just need to find out. My work number is 407-702-6844. Thank you.

6/1/2007	2:13 PM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Friday, June 01, 2007 2:13 PM To: 'Angie Brown' Subject: RE: Bridle Path Property - Wekiva Parkway Angie, I've checked the two adjacent properties mentioned below, which show up as 5526 and 5502 Plymouth Sorrento Road (both on the west side of Plymouth Sorrento Road and east of Effie Dr.). The properties are in the area of what is proposed to be the Wekiva Parkway's Orange County-Lake County Systems Interchange. I've checked the properties against the six interchange alternatives, as noted below: OC-LC Systems Interchange Alternative 1 - curves through westernmost third of largest parcel to the west, but just east of that parcel's lake or wetland depression. No impact to smaller parcel on Plymouth Sorrento Road. OC-LC Systems Interchange Alternative 2 - same OC-LC Systems Interchange Alternative 3 - same OC-LC Systems Interchange Alternative 4 - Similarly hits western third just east of lake/depression, but hits property on north end with less of a curve, more of a due north-south alignment. Less impact to northern panhandle of property. OC-LC Systems Interchange Alternative 5 - same as 4 OC-LC Systems Interchange Alternative 6 - same as 4 & 5 The properties are designated on the project maps as parcel 2374 (larger property sort of shaped like Texas) and parcel 2349 (smaller property). You can view the Wekiva Parkway systems interchange and other maps from last summer's public workshops at ftp://ftp.ch2m.com/Wekiva_Public_Boards/. We are in the process of narrowing down alternatives and updating these maps. I hope to have some new ones posted on the OCEA website (www.expresswayauthority.com) in July. We are shooting for public hearings on the remaining recommended alignments in Sept.-Oct., with the Project Development and Environment (PD&E) Study to conclude in late 2007 or early 2008 with an approved alignment. I hope that helps. Feel free to email or call with other questions or concerns. Mary Brooks

5/25/2007	2:28 PM	Angie Brown/appraiser called and said she has a property on Plymouth Sorrento Road just south of Haas and every alternative she saw on the maps clips through it. She wants confirmation of this, potential impacts. PIO said send address and parcel ID for me to confirm. PIO asked if she was getting project newsletters? She said don't need to be on mailing list, only doing appraisal. PIO noted maps on website are from summer workshops and are being updated, new maps will have eliminated some alternatives and shifted others, hope to have those up in June ( July). She asked when a decision would be made? PIO noted public hearing, approval and study schedule, as well as funding challenges. She said she would send the property info and thanks for the help.
Contact		Sue and Joe Brown
Date	Time	Regarding
8/30/2007	11:44 AM	Suzanne Brown 407-328-7831 called and left MSG, I called yesterday and was returning your call, I was calling about the Wekiva Parkway, I will try to reach you later because I'm in and out today. (She also called 110 p.m.)
8/29/2007	2:23 PM	PIO returned her call. She said something came out last week about the fellowship church and they're putting in baseball diamonds next to academy of learning, it's right where the road was supposed to go, if it's still going there. We've been waiting to retire, it's tough at 65 when you're just waiting and want to sell your house but you can't because the road is going through. That's why when I saw they were building something at the church wondered if something had happened. PIO noted study schedule changes and reasoning, but think we're on track to finish now in summer 2008, hearings moved from October (summer mailing) to January. She said so we still have to wait, I thought it would start next year. How are people allowed to build on their properties with the road coming through? PIO noted property owners have right to develop property as they see fit, particularly since we don't even have an approved alignment yet. We have recommendations. So once alignment approved and we've done the design and are ready to buy property, we have to address any development at that time. PIO noted this project not funded, FDOT doesn't have ROW or design money for SC, so do not know schedule for subsequent phases. PIO noted we're looking at different funding options, Turnpike has looked at it, but that would have other issues if it was done as a toll road. She said no idea it would take so long, thought we would start construction next year. PIO said even if we had funding, still takes 2-3 years for design and couple years for buying property. These types of projects are usually developed in 5-10 year blocks. And that's when there is funding. She said that's disappointing, guess they just have to keep waiting. This has been going on since 2005. PIO noted many issues that have to be worked out for something like this, and many agencies that have to be coordinated with; it's a very involved and lengthy process. She said okay, thanks for returning my call.
1/23/2007	11:33 AM	PIO returned call to Sue Brown 407-328-7831 I saw on Ch. 4, said they showed 46 and one that goes toward 417, and other night they only showed only the 417, story was about this guy Keen, they were showing map on TV with area he had purchased off 46

near Mount Dora. PIO noted we are working toward a recommendation and in the process of meeting with local government and state agency officials; obviously their direction will affect the decision. She said she thought she would just check it out. PIO noted still shooting for formal public hearings in April or May.

1/22/2007 3:07 PM Sue Brown 407-328-7831 MSG I'm calling re: getting update on Wekiva Parkway and SR 46 bypass on portions from orange avenue to SR 417 connection. they had something on TV the other night on NBC, showed map of Wekiva Parkway. It looked like they had chosen the southern route going from SR 46 to 417, vs. going SR 46 straight through to I-4 . I'm in the middle of that. I was wondering if any more meetings or other update info on that. thank you.

		Subject: RE: Wekiva Parkway	
		Craig,	
		The Kelly Park interchange recommendation is based upon approval in March by the Orange County Board of Commissioners, so that is not a "rumor."	
		We are looking to finish the study in late 2007 or early 2008 with an approved alignment and interchange locations by the various agencies involved. From there the project must go through final design, right of way acquisition and then construction.	
		However, this project is not fully funded. OOCEA for the OC portion has funding over the next five years for design and partial ROW acquisition. At current funding levels, OOCEA's portion would not begin construction for 5-10 years. Similarly on the FDOT portions in Lake and Seminole counties, you'd be potentially looking at 10-15 years for construction to start at current funding levels. All subject to change if funding becomes available.	
		I hope that helps.	
		Mary Brooks

Subject: RE: Wekiva Parkway

Hello Craig,

Thanks for checking in. We still don't have an approved alignment for the SR 429 Wekiva Parkway, but we have been working through getting direction and other input from local and state officials, and are narrowing down alternatives and working toward recommendations. Here are some of the preferred alternatives that we likely will be bringing forward for formal public hearings in Sept.-Oct.:

Orange County:

- Local access interchange at Kelly Park

Seminole County:

- Widening SR 46 corridor to the north (to avoid impacts to major residential development on south side)
- SR 417 interchange connection to Interstate 4

The SR 417 route to I-4 will be slightly different from what you might have seen at the public workshops last summer or on the website. We have been making adjustments to try to accommodate concerns from a number of neighborhoods and business owners, keeping in mind that if we move the road away from one community, it's closer to - or hits - another property.

Lake County:

- Widen SR 46 corridor to the north coming out of Mount Dora to Round Lake Road to avoid major residential impacts on the south side
- We still have to firm up recommendations in other project locations. We hope to be through this round of meetings with local and state officials, and be able to provide some updated maps on the OOCEA website in July. Again, the public hearings at this point will likely take place in Sept.-Oct. We hope to subsequently have an approved alignment and interchange locations by late 2007 or early 2008.

We are working to get you all some information out along those lines. I hope that helps.

Hello Craig, Thanks for checking in. We still don't have an approved alignment for the SR 429 Wekiva Parkway, but we have been working through getting direction and other input from local and state officials, and are narrowing down alternatives and working toward recommendations. Here are some of the preferred alternatives that we likely will be bringing forward for formal public hearings in Sept.-Oct.:  
Orange County: " Local access interchange at Kelly Park  
Seminole County: " Widening SR 46 corridor to the north (to avoid impacts to major residential development on south side) " SR 417 interchange connection to Interstate 4

Subject: SR 429-Wekiva Parkway PD&E Study - Kim Buchheit property  
Hello Kim,  
Just wanted to relay some information from our progress meeting yesterday. The team reconfirmed the southern alternative, as noted on page 12 of the PowerPoint you and I discussed, continues to be the recommended alternative and has not shifted. The width of the Wekiva Parkway in your location, and the resulting acquisition needed, would be 300 feet from your southern property line. There is no movement at this time to acquire Pine Plantations as a conservation parcel, only to acquire the property needed for roadway right of way. I hope that helps. Take care.  
Mary Brooks

9/26/2007 3:00 PM At end of progress meeting, Kathy said expressway everywhere will be 300', except where we've squeezed it along the state lands in Seminole, where it will be 270'. SR 46 coming out of Mt. Dora will be 130', four lanes. SR 46 in Seminole after Wekiva Parkway peels off will be 200 feet. So we will be taking 300' from the Buchheit property.

Kim Buchheit 407-331-0505 called and noted they're meeting with surveyors out there tomorrow to make sure where they do their borings doesn't cause a problem. She said they really need confirmation on the preferred alternative and the width of the road, thought it was 300' but have heard rumors its more like 200', will make a difference re: impact to their property. PIO noted recommendations for most preferred alternatives are in the PowerPoint; PIO still waiting for maps, they had to finish up some agency meetings, get input, do any tweaking, and then it has to go before the OOCEA board before we can post the maps. She said she tried loading the PowerPoint, but it was very slow, and it's actually a PDF of a PowerPoint. She said it's such a long document and she couldn't find what she needed, it took forever to load. PIO called up PowerPoint and noted info she was looking for was on slide 12, the OC preferred recommendation. PIO noted it took a little

time but powerpoint was up. She said hers was still loading...page 12 finally came up. She indicated their property was NE of Haas and Plymouth Sorrento Road, the only gray parcel amidst all the mustard yellow property (Pine Plantations) on north side of alternative before it curves to go north. PIO noted the south alternative is hitting south end of their parcel, can check with Ch2m Hill to see how much of a hit we're looking at. PIO noted corridor width will vary somewhat in places depending on configuration, but thought in this area would be elevated roadway at or near 300'. She asked so has the alternative shifted at all? PIO noted I'd been out for last couple of weeks and know there were other meetings still going on, can check with Ch2m hill on that.

She asked when was the (Pine Plantations) property likely to go public? That could make a difference in what we decide to do with our property. PIO noted last I heard, and this has been a while, neither the FDEP nor OCEA had the funds or much motivation to acquire this property any time soon, certainly not in its entirety. She asked which part was likely to still be public? PIO said not sure that specific conversation has happened yet but can ask. Biggest concern is well is on s. side of property, 300 also comes close to back of one our buildings, having to redo water system and whether building is a loss. Clearly the well is big issue with the alignment. PIO noted if it does come down to acquisition she would have to be reimbursed for impacts such as well or access. She said she's aware of that but right now we have spring water, best water quality, our neighbors don't have good water quality out of their wells. There's no guarantee if they have to move well they will get another good spot, depends on what's going on with the cavities underground. We had an issue with north side alternative, that's our access. So we can't decide, my husband and I, which is worse.

PIO apologized, noting I'd seen the Kunzen email but have been out a couple of weeks and am still catching up. She said don't worry about it; she's been out also, and also had been having some email issues on her end, had tried to send PIO something and it bounced back, just resent it.

She said so the questions are: Width of acquisition on their property? Corridor width in this area 200 vs. 300? Potential for Pine Plantations acquisition all or part?

She said she's been out for a week.

Will meet with geotech tomorrow. PIO noted we have our next progress meeting on Wed. will try to get some answers for her and either email or call her back. She said she'd appreciate it, it's not a rush thing, just trying to get an update. They're trying to make some decisions about improvements. They're not the type of people to put something really expensive on their property just so they can get paid more money by the agency. They want to make some good decisions but they can't without having the info.

Kim-

We're planning to drill to about 20' below existing grade, so we'll need to use the rig to perform the boring. As far as the desired location, please refer to the attached image. I'd like to drill right up against your eastern property line, in the location shown by the red dot.

I am planning to come out to the area with my field tech on Friday morning for locating and staking of the borings (not to perform the actual borings). I would be happy to meet with you then. Mike has provided me with your cell number so I'll give you a call. With

regard to the additional information on the project that you requested, I have no problem in disclosing project info, but I would suggest that you direct the questions at CH2M instead, seeing as how they have the most complete and up-to-date information. I really don't know that much beyond where I'm told to drill.

Subject: Soil Boring on Property 05-20-28-0000-00-005

Tom-

Thanks for checking with us about the boring that you need to perform on our property. Is it a hand auger or do you need to bring in a rig?

About where do you plan to do the boring?

Could you send us a sketch so that we can approve the location and make sure that there are no conflicts with our private utilities?

We have a private system of some underground power lines and an extensive PVC irrigation system.

Would it be possible for us to meet your crew on site?

Friday 9/21/07 AM, first thing would be good for us this week. Also, do you have the most current information for the preferred alignment and the proposed R/W through our property?

It would be great if you could provide us with a copy of the latest exhibits.

The last we heard, the southern alignment was preferred by Orange County. Is this correct?

Has the proposed R/W width been decided through this area? We have heard unconfirmed rumors of 200', although we were expecting that it would be 300' from previous OOCEA info.

Perhaps Mark Callahan or Mary Brooks can answer or give you the ok to discuss project details with us.

Thanks-

Subject: MBX & WP

Mary,

The Mount Plymouth Sorrento Advisory Committee has asked the MPO to come out to their meeting tomorrow evening (Tuesday, October 16) at Roundlake Elementary School. One of their requests is for an update regarding major projects in the area. Chief among those would be the Maitland Boulevard Extension and Wekiva Parkway/SR 46 Bypass. They have asked we come equipped with some poster sized graphics showing the latest and greatest in alignments.

Could you please email me, or provide access to an FTP site with graphics showing the latest alignments for each of these projects? I have visited your website and found a PowerPoint presentation for WP showing preferred alignment, but the maps do not show very well when printed on 8X11, so I think a plot would probably be worse. Is this something you could please help me with? We can do the plots here...I just need the quality electronic files. Please let me know ASAP as they chose not to give us a whole lot of advanced notice.

Also, as we will be delivering the Expressway Authority's message to the public, I want to make sure I have all my facts straight. If there is anything vital that you think I need to know at this point in time that you could share with me, I'd greatly appreciate it.

Thanks!

-Tom

Subject: Wekiva Parkway Preferred Alternative  
Mark or Mary,  
Who can I coordinate to get graphics showing the preferred alternative for the Wekiva Parkway? Sorry for the last minute nature of this request, but I just found out about this meeting late Friday. I can plot the graphics here. I just need access to the file(s). Again, the PowerPoint graphics are unclear (quality-wise), so if I can get access to the actual graphics files, that would be great.  
I am attending the Mt. Plymouth Sorrento Planning Advisory Committee Meeting tonight, so anything you can do to point me in the right direction would be appreciated!  
Thanks,  
-Tom

10/16/2007 2:13 PM Tom Burke/Lake Sumter MPO called and left MSG I'm attending meeting this evening of Mt. Plymouth Sorrento planning advisory committee. They gave me really short notice. they wanted TJ and he's out so I'm going  
They wanted graphics of Wekiva Parkway, 437 from OC to Lake County, I went onto OCEA website and found PowerPoint with preferred alternative but when I print it, it doesn't print out very good quality. Was hoping to get better quality graphics to plot out and bring to this meeting. I looked through the website just couldn't find anything other than the PowerPoint. Could you give me a call? 352-315-0170  
I sent an email yesterday not sure if you had access to email. If I have to go empty handed, I will go empty handed and will just go verbally. Was hoping to also talk to you about the schedule for public hearing. Last I heard I think it was January. If you'd give me a call I'd appreciate it.

Date	Time	Regarding
3/27/2007	4:13 PM	PIO called back Linda Burnett 407-889-9955 let her know most people download the files to disk and take them some place like Kinko's or Office Max to get large copies made. She said she really appreciated me calling her back on that. she said so there's no way for her to print it out large? PIO noted she can print it out but will be small; file was created to be a large exhibit board, that's why. She said thanks again, very helpful.
3/27/2007	9:11 AM	Linda Burnett left MSG 407-889-9955 you were so helpful to me, I did find all the info and it was just so clear when I enlarged it, but when I printed it out I could barely read it, it wouldn't print out in the enlarged version. Is there a way I can do that or is that prohibited by the display itself. Sorry to trouble you with this rather technical question. Would really like to have an enlarged copy. If it's possible, and you have a manner in which I could get that enlarged, could you call me back. I know how busy you must be.
3/22/2007	2:33 PM	PIO spoke with Linda, noted the project info she was seeking was on the website, gave her address and text links. Gave her overall status update. She also asked about other road plans for the three county area? PIO noted she should check the various county public works websites for their plans, I'm not privvy to that. She said she was tasked with

putting together some info for their neighborhood, trying to decide whether they want to annex into the city or not. She was appreciative of my assistance. PIO said if she has trouble finding the project files call me back while she's on the computer and I would walk her through it.

3/21/2007	2:31 PM	Linda Burnett MSG I just had a meeting with roger ?? and another one with Vince Sandersfeld and another one coming up with a few of them and I Need if you would be so kind to send me the proposed roads and locations being worked on in this NW corridor, 429 that's going to hook up with the 417, via 46, would you be good enough to send that to me. Linda Burnett, 2211 Rock Springs Road, Apopka, FL 32712 407-889-9955 thanks. I really appreciate it.

Contact		Elizabeth Caldarone	Stoneybrook Hills HOA
Date	Time	Regarding	
6/19/2007	6:45 PM	PIO met Liz Caldarone/Stoneybrook Hills HOA manager. Also attending meeting where John Byrd, aide to OC Comm. Brummer and Jim Martin/OC School Board and I-4 PIO. About 22 people attended the meeting. one woman initially wanted the meeting rescheduled, noted they have a lot more residents than this, some of the key people couldn't be here and the meeting was not properly noticed. Other residents said they are here now and would like to hear what the representatives have to say, don't know if they can make another meeting. John Byrd discussed resident concerns about a public park being in their neighborhood, also about the park possibly replacing the school. John said there were no plans for a park instead of a school, but that if there were a park, it would be co-located with the school. He said however with funding being what it is, all parks are on hold until the tax cuts are figured out. Discussion about the quality of the school, parents not happy school grades keep going down. Jim Martin said he could bring in Principal Duda to discuss her plans for improvements at the school at their next meeting. he also discussed how the state has just changed grading again to make it more difficult for school to get good grades. PIO gave overview of Wekiva Parkway, noted IC locations, US 441/SR 46 IC alternatives and recommendation. PIO noted Mt. Dora wanted the Alt. 1 grade separated with higher flyover. PIO noted no direct impact to their community or entrance, since our work on US 441 would stop north of the RR bridge (they're south of the RR bridge). Someone asked about plans to widen US 441 south of 46? Jim Martin said there was nothing in the 5-year work plan for that. it was discussed there are a lot of projects that are needed that are competing with needs on Interstate 4 and other projects Residents were supportive of the at-grade interchange with lower flyover and asked what they could do to emphasize that. PIO noted we are looking at public hearings in Sept.-Oct. and will have comment forms they can fill out. PIO also noted that, although they are in OC, they can still write to City of Mount Dora officials expressing their support of IC	

Residents very concerns about being able to see the flyover from their community, especially since it will be on higher ground from them.They asked why Mt. Dora supported grade separated IC? PIO noted they expressed concerns about too many traffic lights on US 441; want to keep traffic moving, and about errant traffic clogging up their quaint downtown. PIO noted we thought signalized intersection would be safer for pedestrians and bicyclists.Someone asked cost difference between the two alternatives? PIO noted the grade separated is about \$20 million more expensive.Several questions about timing of interchange decision and overall project, which PIO addressed.PIO also noted the SR 46 widening alternatives, and that we're recommending north widening to six lanes to avoid residential development on the south side. Noted would be an at grade arterialOne woman took issue with six laning 46, said that will be unsafe for residents entering that road. PIO noted the roadway will have a median, sidewalks and curb and gutter, and is a common configuration throughout Central Florida, with many, many subdivisions on these types of roads. John Byrd echoed that sentiment.A gentleman asked about funding for the project, which PIO noted we are not fully funded, different options being looked at including federal funds, and schedule will be heavily reliant on funding. A gentleman asked why the OC IC was going to be at Kelly Park Road when that does not connect to US 441? PIO went over advantages and info from traffic models.He asked so is Kelly Park going to be extended or widened? PIO noted we would update the road at our IC, but it would be up to the county to do anything beyond that. John Byrd said he was not aware of any plans for Kelly Park Road.Residents repeated concerns about having a voice in the decision on the IC flyover given that they're in OC.They also asked several questions about noise and whether they'd get a noise wall. PIO explained federal criteria and cost benefit analysis, they would be too far away to warrant a wall. Jim Martin jumped that once you're 300 feet or more away, a wall does you no good because sound just travels up and over. Jim noted he was with the FDOT for 12 years and now does for the FDOT what PIO is doing for the OCEA.PIO handed out business cards and encouraged residents to call or email with questions or for updates. PIO noted we'd be sending out an update mailer soon, and will send info when the public hearings are scheduled. --8 p.m.

6/19/2007	12:40 PM	PIO returned call to John Byrd, left MSG that I will attend meeting tonight, just picked up boards needed. PIO apologized, thought I'd emailed back that I would attend.
6/19/2007	12:30 PM	PIO picked up boards for Stoneybrook and Bella Foresta meetings from Dave. He said he hopes DOT will be able to attend the progress meeting tomorrow; they haven't been there since April 11 and there are a number of issues.
6/19/2007	12:24 PM	John Byrd/OC Comm. Brummer MSG was just checking to make sure you're going to be at the Stoneybrook hills meeting at Hampton inn on 441, believe meeting starts at 7 p.m. I am planning to be out there tonight for Comm. Brummer. Hope to see you there. If you need to call me I'm at 407-836-5850 thanks
6/18/2007	3:21 PM	From: LCaldarone [mailto:lcaldarone@easylivinglifestyle.com] Sent: Monday, June 18, 2007 3:21 PM To: 'Mary Brooks' Subject: RE: SR 429-Wekiva Parkway PD&E Study - Stoneybrook Hills Hi Ms. Brooks, Yes we are and I was waiting to find out from one other resident if she had any questions just to make sure I had your back. First question: How far down 441 will the expansion go for the fly-over will the lanes be widened all the way down to Stoneybrook Hills? Second : How high will the fly-over be the residents have heard 25 feet to 50 feet which will it be (they hope 25 feet)? Third : Will there be a sound barrier of some kind so that the traffic noise will not be a problem. The amount of traffic now is 9 500 and will increase to 38,000? Those are all I have for now and I think the most important. I apologize for waiting so long to get back to you but, the one person who will have the most questions Cheryl Jones was the one I was waiting to hear from. Now I am

told she will not be back from out of town. If you have any other questions please feel free to e-mail if I can answer them I will be glad to. Elizabeth R. Caldarone...

Contact		Larry Calhoun
Date	Time	Regarding
2/22/2007	12:04 PM	PIO returned call to Larry Calhoun, just checking in with highway department see what's gong on with Kelly park road. PIO went through preliminary recommendations for OC, noted city of Apopka corridor approval Feb. 7, public hearings pushed out to May or June. He said he hopes its may because he will be out of town in June. PIO noted latest study schedule. Still working through officials meetings, noted meeting with OC commissioners

on March 6 I believe. He asked what are the chances of exit on Kelly Park? PIO noted that is the preliminary recommendation but OC has to weigh in on that. He said I think it should be at Kelly Park. And Brummer thinks so too, right, he's the head of that now? PIO noted commissioner Brummer served on board but Mayor Crotty was still chairman. He asked if we'd gotten any money for the project yet? PIO went over current financing and project stages. He asked why they have money for ROW in LC? PIO said FDOT doing that portion, think that had been appropriated previously for the widening of SR 46 but since this now supersedes that project, it could be used for the parkway. He said well he hadn't heard anything in a while and was wondering what was going on. PIO noted we had hoped to have preliminary recommendations and get a newsletter out to them in Dec. or Jan. but there have been so many issues to work out and has taken so much time to get through all these review meetings, the schedule has been pushed out. He said thanks for the info, can I call you again? PIO said no problem, and we will be updating the website soon, and once have some things nailed down will be sending out updates with meeting info, etc.--1214 p.m.

2/22/2007 10:37 AM 407-222-4238 Larry Calhoun left MSG to call him back.

Contact		Thomas P. Callan

10/12/2007	4:50 PM	PIO returned call to Melanie/Thomas Callan, Valerie Reed said she had left. PIO left MSG that public meetings in January, but we haven't set dates or locations yet. She said so they will be notified? PIO said that's correct.

10/12/2007	4:06 PM	Melanie/Thomas Callan law office called and left MSG asking when is the next Wekiva Parkway meeting? 407-426-9141. she said ask for her or Claire.
------------	---------	--

Contact		Brenda Carey	Seminole County Board of County Commissioners
Date	Time	Regarding	
1/29/2007	1:00 PM	Meeting with SC Commissioner Brenda Carey, Brian Stanger/FDOT, Mark Callahan, and Noranne Downs (she had to leave early) and PIO. Mark noted the 417 is the only one that works. With the amount of traffic coming on 417 you would to be able to accommodate that on I-4 (to get to 46). On the north vs. south alignment along 46, we're recommending widening to the north. He noted that gets into the Lower Wekiva State Preserve. The north alternative has a lower cost. We are setting up meeting with FDEP to discuss. Mark went over various options, starting with one from summer workshop. He noted alternative A gets us off Capri Cove but hits the Lakeside Fellowship church building. Everything we look at hits the church property. He noted we can accommodate Tall Trees without additional impacts, but Capri Cove adjustments get us into 4-5 more homes. Alternative B: would avoid the church but we're a little closer to Capri Cove, we're still away from Tall Trees, still hit some additional homes. Alternative C: stays off the Lakeside Fellowship church, gets out of Twelve Oaks but at the expense of Rock Church. Mark noted Twelve Oaks entrance and stacking issues during peak season, building amenities. He said they priced the ROW and would be expensive, noted some residents there year-round. Brenda noted the mobile home park has been there for some time, park could be redeveloped. She expressed concerns about taking a new church building (Rock Church . Mark pointed out the ponds, noted concerns about the one at Capri Cove, also a corner clip of the adjoining parcel to the south that would affect their access. He noted there are still more impacts, \$10-12million more expensive. He said the alternative they looked at last week would move another 25-30' from Capri Cove, total of 40 feet. Could move the	

pond to other side. Mark said he thinks we have a meeting Feb. 19 with Capri Cove. ... This alternative would miss the extra homes. Mark noted we have avoided the veterinarian's office near Capri Cove. He discussed the roads to stay open and those that need to be cul de sac'd in area of Wayside and Orange. Brenda asked about Romey ??, the Israeli property owner off the SW corner of Tall Trees ... mark recapped discussions with various property owners and county officials. Viable refined alternative 2: Mark noted SW corner of Tall Trees is about 50-60' away, but it's elevated so it will be seen by some residents. Noted need for sidewalk. Couldn't move much farther because of Wilson road and apartments (Cobblestone Crossings?). Brenda noted IC design looks tighter. Mark noted we did some work on that. Brenda noted the hot project for her is to punch through 417 to International parkway, because right now they have to get on Rinehart and other local roads, cutting through neighborhoods. She noted there is a small window of opportunity to get ROW from Colonial Properties, the Bowmar Tract. Brian said that project is kicking off in design. There are some utility easement issues between SC and FDOT, who's going to pay to relocate utilities. Mark noted the space under the 417-I-4 bridge is not big enough to handle the new IC ramps. Have to make a bigger bridge, rebuild IC, and change the I-4 profile. Brenda noted when they do the I-4 2012 (was originally supposed to be 2009) work, they need to accommodate this. Brenda noted LC traffic taking Rinehart, International Parkway, Orange, Markham Woods Road, etc. It's a big problem. The connection to International parkway needs to happen and ... There's a light on International Parkway at SR 46. Mark said we would get with FDOT on the Twelve Oaks vs. Rock Church issue. He noted all the alternatives now stay off Tall Trees. Mark noted if we hit Rock church, Designing women nursery also has impact. Brenda said she assumed this would be a toll road. Brian said they're going to craft a message about future funding, including possibly tolling option, will be raised generally at public hearings, that we're keeping our options open. Mark said hopes to get federal funding for this project. Discussion of folks wanting to make short local trips across the river... Brenda asked about the Turnpike's concerns on her punch through idea? Brian noted concern about "free ride" issue, others. Discussion of properties in area, history of development and roads environmental properties, early ideas for beltway. Brian said will get commissioner an update re: the 417 design to international parkway. Brenda asked about coordination with Lake County commissioners; Mark brought her up to speed on meetings with new members, staff, etc. Mark gave Brenda copy of impact assessments for various alternatives discussed. Brenda asked for preference? Mark said this one works the best and then we think we can stay off Rock Church with a little more work. Brenda asked when we were going to SCEA? Mark said thinks in March. The commissioner requested we come back and give her an update before going to the SCEA.--207 p.m.

Sandy Carter  
Regarding  
PIO called Sandra Carter 407-323-5143, who lives at 633 Capital Lane, Sanford, FL 32771-8015. noted I believe she called the last time I was on vacation asking for a map, but there was confusion as to whether she was looking for the Wekiva Parkway SR 417 alignment alternative, or if she had received a notice or read something about the SR 417 north corridor feasibility study or the FTE SR 417 wide. She said she was looking for the one to see where 417 goes over SR 46. PIO asked to confirm she was referring to west or I-4 heading to the river, or east of I-4 where the mall is? She said heading to the river. PIO said we'd get that out to her now that we knew which project she was referring to, and apologized for the delay. She said that's okay.

3/5/2007	12:23 PM	From: Mary Brooks	Monday - March 5, 2007 12:23 PMTo: KCaskey@metroplanorlando.com CC: david.lewis2@ch2m.com, mark callahan@ch2m.comSubject: Re: Metroplan Board meetingKeith, I got your message this morning about an abbreviated Wekiva Parkway presentation for the Metroplan Board on March 15. I have confirmed that Mark Callahan already had this on his schedule and he will be making the presentation when he gets back from vacation. If you have any other questions, please don't hesitate to ask. Mary Brooks

3/1/2007	9:15 AM	PIO left for Metroplan MAC presentation, met briefly with Harry Barley to discuss project and OOECA activities. Tom Percival also attended. PIO gave PowerPoint presentation, provided background, current status, overall timeframe and funding challenges, answered questions re: timing, why will it take so long, extensive discussion about funding challenges, options, competition for limited funds, etc. Tom noted good thing is we have consensus now on the need and that this will address the problems, whereas simply four-laning 46 will not. He noted it's simply a funding issue to move forward, whereas previously there was not a consensus.--11 a.m.

Hello Ben,  
Got your voicemail today. I'm still waiting for the updated project maps to post on the website, but you can view a fairly recent PowerPoint presentation that has a lot of the recommended alignments and interchanges at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> . Click on the top text link to view the presentation made to the Wekiva Commission recently.  
I hope to get the updated PDF maps in August, and will post as soon as I have them.  
Please call or email if you have trouble accessing the PowerPoint or other info on the website.  
Mary Brooks

7/23/2007 2:17 PM

Ben Champion called and left MSG re: Wekiva Parkway. You sent out a status update. I was trying to look at Ch2m's web page that's list in this newsletter, and it appears to be password protected. You may get a lot of calls like this one. Please call me back on how I can get access at 407-687-4314 thanks

Subject: RE: Min Sun Cho maps

Mary,

FYI: Spoke to Ms. Cho. I explained the maps had been sent to the printers and should hope to get them today or tomorrow. I said she would receive them no later than the middle of the week. She was very excited and thanked me. D:)

11/15/2007	11:17 AM	Min Cho called and left MSG and said I'm at the nursery, last time I called you said new maps would be in November, and this is the middle of November so if you have a new map I would like to have it 407-880-1115 thank you
11/1/2007	9:44 AM	PIO Deana Leffler received call from Ms. Cho. She left voice mail requesting the new maps.
10/16/2007	11:31 AM	Min Cho 407-880-1115 called to ask if we had new maps available for the 429 Wekiva Parkway? PIO noted maps were going to the Board for approval on Oct. 24, so would be able to release them after that. She said so I can call back a couple days after that? PIO said that's correct. She said okay thanks.
8/20/2007	10:52 AM	Min Cho 407-880-1115 called asking for the final decision? PIO noted don't have final yet, but do have recommendations, what area was she in? She said she lives at 4068 Plymouth Sorrento Road, Apopka 32712. PIO noted in that area we are recommending the KP IC alternative. She said so that's final? PIO said no, we were planning to have public hearings in October but now that's pushed to January. PIO noted after hearings will go through agency approval process, so probably summer 2008 to finish study with approved alignment. PIO said if she's been getting mailings she would also get public hearing notice. She said she got something a long time ago, last year. PIO noted we'd just done mailing in July-August. She said she did not get letter. PIO noted I have her in the database and her address, not sure why she did not receive. PIO asked if she had email, I could email her the letter? She said she does not have email. PIO said I'd have to check, but doesn't sound like we'd be affecting her property in that area. She said last time she saw maps that was true, but we were affecting her neighbor and she wanted to see if anything has changed. PIO noted KP alignment would be passing west of her, unless she had a very large parcel. She asked several times if that was final decision and PIO reiterated that's direction we're heading but nothing final or approved yet. I told her we're recommending Kelly Park Road interchange. She said she's in the middle of Ponkan and Kelly Park.

Contact		Dr. Hang Ju Chon

Subject: RE: Wekiva Parkway

Ms. Cioci:

Please see the attached aerial-based preliminary design drawing of Wekiva Parkway. Your property is parcel number 1728. Based on the current alignment as depicted, the impact to the eastern-most portion of your property may be approximately 0.6 of an acre. This is still preliminary and has not been approved by the Expressway Authority, but it gives you a good indication that the preliminary alignment does not impact 90% of your property. In answer to your question, the width of the right-of-way from one side to the other is 300 feet. I hope this helps you.

Dave Lewis  
CH2MHILL

Good morning, Cindi,

I am filling in for Mary Brooks while she is on vacation. It is my understanding that nothing has been decided yet regarding the final recommendations for Wekiva Parkway and even the recommendations in the works are still subject to change. The formal public hearings regarding the final recommendations have been changed from October 2007 to January 2008. If you will give me the nearest cross streets to your property, I will get all this information to Mary in addition to your address, and she can contact you regarding the side to side alignment including buffer after she returns from vacation after September 13.

Thank you,  
Jasmine James

Mary, I received a map of the latest alignment involving my property from an attorney today. The letter says that the "highlighted area" indicates the portion of my property O/OCEA anticipates it permanently needs (90% of it according to the map I received). My address is 3150 Phils Lane.

My question is, how wide will the actual side to side alignment measure including the buffer. Is it possible that this area measures 1000 ft. or more?

Cindy Cioci 407-889-0305 called and said she was at an Apopka Chamber meeting and they were talking about the recent mailing, but she had not received anything. She wanted update on the public meetings? PIO noted mailer seemed to hit most folks last weekend or this week. PIO said I can email her the mailer; she took down my email

address and said she'd email me as a reminder. PIO noted we were looking at October for the public hearings, but found out after mailer went out that it's going to be more like January. She said she was going to be affected when we were looking at the Ponkan Rd. IC, but was at the OC meeting where they voted for the Kelly Park IC. She wants to see the updated map on that. PIO noted I'm still waiting for individual PDF's, but she can view the recent PowerPoint on the website that has our recommendations for preferred alternatives. PIO noted she' can't really manipulate the slides like the PDF's I'm waiting on, but it will give her an idea of where we're heading. She said she would check that out and thanks.

6/7/2007	4:58 PM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, June 07, 2007 4:58 PM To: 'Ed Ciriaco' Subject: RE: Wekiva Parkway - Retreat at Wekiva Hello Ed, We still don't have an approved alignment for the SR 429 Wekiva Parkway, but we have been working through getting direction and other input from local and state officials, and are narrowing down alternatives and working toward recommendations. In Seminole County, it looks like the preferred alternatives that we will be bringing forward for formal public hearings in Sept.-Oct. will be: Seminole County: " Widening SR 46 corridor to the north (to avoid impacts to major residential development on south side)" SR 417 interchange connection to Interstate 4 The SR 417 route to I-4 will be slightly different from what you might have seen at the public workshops last summer or on the website. We have been making adjustments to try to accommodate concerns from a number of neighborhoods and business owners, keeping in mind that if we move the road away from one community it's closer to, or hits, another property. We hope to be through this round of meetings with local and state officials, and be able to provide some updated maps on the OCEA website in July. Again, the public hearings at this point will likely take place in Sept.-Oct. We hope to subsequently have an approved alignment and interchange locations by late 2007 or early 2008. We are working to get you all some information out along those lines. I hope that helps. If you're not on the mailing list, please send your mailing address so we can be sure to get the latest info to you. Mary Brooks

I wanted to find out what the final path for this project is going to be. I am looking at the 12/2006 Appendices A and B, but wanted to know if there are any concrete plans made. Thank you, Edward A. Ciriaco Mobile 407-592-0996	

Contact		Jean & Patrick Ciullo	Capri Cove HOA
Date	Time	Regarding	
		PIO attended meeting at Capri Cove HOA, about 18-20 residents present at 204 Capri Cove (Jean Ciullo's house). Mark noted original 417 viable alternative was at the Edwards' property, recapped neighborhood concerns re: impacts, noise, visibility, pond etc. Mark noted re: the SR 46 I-4 IC alternative the future traffic projections show heavy	

movement from SR 417 WB to I-4, and we can't get all the ramps in at SR 46 given the proximity of SR 417 IC, short of taking out the Seminole Towne Center. It starts breaking down, resulting in problems on International Parkway, Rinehart, etc. So we've been working on 417 at Capri Cove and Tall Trees, given the constraints of Wilson Elementary, Lakeside Fellowship and further north Rock Church and Twelve Oaks RV Resort. Mark proffered the SR 417 viable alternative as the "base case" and said he'd give info on the additional alternatives based on that. With the 417 viable the roadway was 50' from the corner of the Edwards' lot, Lakeside Fellowship was 250' away from the road, 16 homes experience direct impacts, cost of \$736 million (including ROW at current market value, land use, access, host of things taken into account in preliminary appraisals done by FDOT ROW folks). Alt. A - 500' from Edwards' property line, cuts through Lakeside Fellowship Church building, 7 additional homes, \$18 million more (mostly ROW). Alt. B - 150' from the Edwards, 140' from Lakeside Church, 2 additional homes, \$6 million more (including differences in access and bridge lengths). Alt. C - 200' from Edwards, 110' from Lakeside FCC, 3 additional homes, \$12 million more. Refined Alt. 1 - 50' from front lot, 250' from Lakeside, 2 more homes, Refined Alt. 2 - 90' away, 220' from Lakeside, 1 more home, \$10 million more. Mark noted we've had similar issues with Tall Trees, and in all the scenarios above we could get 70' away from that subdivision. Mark noted we were trying to move it away as far as possible without hitting any more homes. Mark noted we met with Lakeside FCC, whose folks noted they have future plans for expansion, didn't want to move, concerns about being able to find another property in the area to serve their congregation. Mark noted with Alt. A going through church, that's probably not what we'd recommend. Mark had given out impact assessment and exhibit handouts, which homeowners reviewed and asked questions about. An inconsistency was determined between Marks' large exhibits and number of homes taken on Alt. B in handout. He's going to get that fixed. Q: why is pond still there? The only one you don't have it on is Alt. A, which you said wouldn't go? Mark said we have to have a pond in this area. We're cutting off access to this property due east of you, which makes the back piece of the property not as attractive or useful. The owner could say we're damaging him if we only did a partial take. So we would propose taking entire property and using this portion for a pond. If we move it we'll impact someone else who isn't already damaged or affected. Mark noted we can't move the water from one basin to another. Questions as to why we could not use and existing "pond" residents pointed out behind the video store? Mark noted that's actually classified as a wetland. We're obligated to avoid wetlands or mitigate somewhere else. Q: why can't we put the pond on the other side, on the NE corner of the same property? Q: Can you leave a buffer of trees if the pond could be smaller? Mark said that's something we could look at. Homeowners pressed Mark for a recommendation from all the alternatives, they want to know what they're actually fighting. Mark said he could see justification for either Alternative B (150' away) or Refined Alternative 2 (90' away), while raising the least additional problems. Blaine Henry said if he could work a deal re: getting the church to relocate, would that help? Mark noted we would still have to pay for the building and property, unless you can get them to give it to us for free. Q: Where do we go from here? Mark noted we're talking to SCEA reps, Sanford and Lake Mary, need to go back to the other HOA's, Lakeside FCC hasn't seen these alternatives and to the neighborhoods further west. Then we sit down with FDOT to comb through the evaluations to identify a preferred alternative. Mark noted on Thursday we will brief the new FHWA staff person for this area. She may re-direct us. We were hoping May-June to do public hearings, but have to get the new federal person up to speed first. Q: What about our access? Mark said the road would bridge Orange and we would relocate Wayside to maintain access. Q: what would the elevation be here? Mark said closer to 30' Q: will there be a noise barrier? Mark noted still doing the noise study. Q: Can we keep some trees on the back side of the pond? Brian said we can look at that; that's something

you get more into in final design. Blaine asked can we look up who owns a property so we can talk to them? We noted SCPA website has that info. He also mentioned the flooding problems from 2004 hurricanes. He stated where you put the pond will have a lot to do with whether people are going to be flooded. Mark noted we're required as part of DEP and SJRWMD permit not to increase flooding in neighborhoods. And we have to provide adequate outfalls. ... Environmental resource permits have to deal with wildlife... Q: what is the jurisdiction of the SCEA in all of this? Mark noted the enabling legislation says they will set any expressway alignment in this county. Aside from that, DOT has learned we need to work with local governments in designing these things. The FHWA will make a decision based on FDOT recommendations. Mark noted we'll probably present to SCEA in March or April and to the Division Administrator for FHWA for Florida. Jean asked for that person's name. Mark and Brian said they'd have to look it up. Jean stated this was not the outcome we hoped for. We're not going away. We will be relentless. We appreciate that these alternatives have been looked at but it's not what we wanted. It's not much better. Discussion of what's likely to happen at SCEA, public hearings, counties may take some sort of resolutions after the public hearings. Then we sit down with FDOT and go over the evaluations and comments, look for their direction. Blaine stated they appreciated us coming out and meeting with us. Jean stated we're trying to protect our way of life. Mark said he would email the PDF package with corrected impacts to Jean for distribution to homeowners. Q: When would construction start? Mark said right now FDOT trying to fix I-4 in this area, there is a new IC coming at 46 & I-4. He noted FDOT has \$40 million in LC for ROW, but nothing for design or construction. As FDOT projects out their revenues, they don't see the type of money needed for this project. We will be looking at other options. ... The design for the SR 417 IC is probably \$8-10 million. Q: Is this something at you're looking to do in segments? Mark said absolutely, would probably start in OC. Q: What is public-private financing? Mark noted private companies finance and run a facility for a number of years to get their money back, could involve tolling. Q: I thought you couldn't toll this part because it's replacing SR 46 and there's no other way to go? Mark said that is an issue, would have to be looked at. Q: What's the status of the SR 417 connection to International Parkway? Brian said we just finished the PD&E Study. Mark noted the ramps from 417 IC to get on and off on the exhibit. Brian noted they kicked off design; the county is purchasing the ramp ROW. He said I think that's pushed out to 2011 for construction. Mark noted that would allow residents to get on 417 at International parkway. Eventually the Wekiva Parkway would replace those ramps. Brian will email Jean the International Parkway PDF. Q: How would we get on and off the parkway? Mark noted to go to LC, go up to 46 to get on the slip ramps. Otherwise get on at International Parkway. Q: What is the cost of an overpass? Mark said a basic one would probably cost \$2-3 million, more if it's skewed, like the one we would have here, or if the bridge is longer. Q: what did the school say when we met with them, were they concerned about the kids walking under an overpass? Mark and PIO noted they did not express such concerns. We discussed we would be adding sidewalk, talked about some other issues. A resident noted conversation she had with a school official who she said stated children should walk to school by themselves, not with their parents. Q: What sort of lighting will be on the Parkway? Mark and Brian noted we don't know that yet. Resident noted they'd like to minimize the light pollution.

James Clark  
Regarding  
PIO returned call to Jim Clark MSG 352-383-7263 live on SR 46, just west of Round Lake  
road and east of 441, deep concern , talked to somebody in OC, got his land taking notice  
already , he said here was something substantially different that was approved in February  
PIO noted city of Apopka Feb. 7 approved corridor within their city limits. Then OC  
Commission in March approved the Kelly Park IC location. PIO noted alignment slightly  
different depending on IC selected, but still in same general corridor. He said so there's no  
new IC being proposed by the OC line? PIO noted the systems IC has always been near  
the OC-Lake County line; there are a number of alternatives. PIO noted early one we  
considered an alternative that dropped down from SR 46 into the Wolf Branch Sink  
Preserve, but Lake County requested we remove that from consideration.I drove down  
there and didn't see any room with that ranch with the new building they have there.PIO  
asked if he had seen the maps online? He said no, can't find them. PIO offered to walk  
him through it if he was at a computer? He said yes; PIO walked him through finding the  
maps, suggested he start with the overall alignment alternatives to get a feel for overall  
project.He asked several times if the road would affect SR 46? PIO noted configuration of  
where parkway would replace SR 46, area in Mt. Plymouth-Sorrento that it would remain  
in place for local traffic.Are they going to do anything with the 441-46 intersection? PIO  
noted several alternatives being considered for that location including those with flyover  
for the heavy SB 441 to EB 46 traffic.He asked when we would have another meeting?  
PIO said once we've gotten through these meetings with officials, will bring forward  
preferred alignment alternative for public hearings, at this point maybe in June-July.

Regarding  
From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]  
Sent: Monday, July 23, 2007 6:49 PM  
To: 'CharlesWClayton@cfl.rr.com'  
Subject: SR 429 - Wekiva Parkway PD&E Study - recommendations  
Nancy and Charles,  
I got your voicemail today.  
I don't have the updated maps yet to post on the website, but there is an updated  
PowerPoint presentation noting our recommended alignments and interchanges on the

OOCEA website at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>>. Click on the first text link for the Wekiva Commission PowerPoint, and go to the county info of interest. When I get the actual map PDF's I will have them posted on the website, hopefully some time in August.

Please feel free to call or email with other questions.

Mary Brooks

7/23/2007 3:29 PM Nancy/Charles Clayton Co. called and left MSG Mr. Clayton looking to find out what the latest maps are for the 414 extension going into mount Dora, can you email to me the latest maps or give me a call and tell me where I can find them. 407-622-0000 email [charleswclayton@cfl.rr.com](mailto:charleswclayton@cfl.rr.com) <<mailto:charleswclayton@cfl.rr.com>> thank you

4/23/2007 1:38 PM PIO called Nancy/Clayton properties 407-622-000 to make sure she got the 4-19 email re: list of property queries? She said she did and from what she could tell the only one that would be affected is what he calls sunset grove hills, she said she underlined the information he needed to know, gave him pictures and hopes he understands it all. PIO said if they have further questions to give me a call back. She was appreciative of the info.

4/19/2007 1:47 PM \_\_\_\_\_From: Mary Brooks [<mailto:mbrookssr414@cfl.rr.com>] Sent: Thursday, April 19, 2007 1:47 PM  
To: 'charleswclayton@cfl.rr.com'  
Subject: RE: Clayton Properties on S.R.46  
Nancy and Charles Apologies for the delay in getting back to you regarding your property queries. To say things have been hectic over the last few weeks or months would be an understatement. In any case, I have looked at the property locations and if I'm seeing them correctly, the properties would face the following potential impacts:1) Parcel ID# 27-19-27-000300004600 alternate key 3834164. This appears to be a large parcel on the north side of SR 46 west of Round Lake Road in Lake County. - As the preliminary recommendation in this area currently is to widen to the north side of the SR 46 corridor, this property would be looking at some potential impact along the southern border. Again, this is preliminary and subject to change.2) Parcel ID# 25-19-27-000200003800 alternate key 1814464 appears to be a skewed, split parcel east of Swan Road in Lake County. Part of it is north of SR 46 and east of Hobdy Road; part of it is south of SR 46 and west of Hobdy Road. - This property is well east and north of the alignment alternatives in this area so there would be no potential impacts from this project.3) Parcel ID# 25-19-27-000200001100 alternate key 1814472 is shown as 31599 GUNNS RANCH RD SORRENTO FL 32776. This large parcel on the north side of SR 46 east of Swan Road abuts and surrounds parcel 25-19-27-000200003800 alternate key 1814464 to the north above). - This also is well east and north of the alignment alternatives in this area, so there would be no potential impacts from this project. We are continuing to gather input from local governments and state officials as we work toward bringing a preferred alignment alternative forward for formal public hearings in September-October. We hope to finish the Project Development and Environment (PD&E) Study by the end of this year. From there, typically, we would go into final design, right of way acquisition and construction, but as noted this project is not funded for those future phases. As you're probably aware, the Florida Department of Transportation is developing this project in Lake and Seminole counties, and the Expressway Authority is handling the Orange County portion of the project. As this project currently is not fully funded - not even close - the best estimates for construction to begin in Lake and Seminole counties is 10-15 years out, unless some funding becomes available. The Expressway Authority might be able to get their section under construction in 5-10 years, depending on funding availability. I hope you find this helpful. Please call or email with other questions or concerns. Mary Brooks

4/2/2007	11:20 AM	<p>_____From: charleswclayton@cfl.rr.com</p> <p>[mailto:charleswclayton@cfl.rr.com] Sent: Monday, April 02, 2007 11:20 AMTo: mbrookssr414@cfl.rr.comSubject: Clayton Properties on S.R.46I believe the properties he is talking about are the following:Parcel ID# 27-19-27-000300004600 alternate key 3834164 owned by CWC Investments, Ltd. Mr. Clayton is managing partner with 1%, four children are other ownersParcel ID# 25-19-27-000200003800 alternate key 1814464Parcel ID# 25-19-27-000200001100 alternate key 1814472 owned by CWC Properties, LLC (Mr. Clayton's four children)Hope this will be of help to you.Nancy</p>
4/2/2007	11:00 AM	<p>PIO returned call to Charles Clayton 407-622-0000, Nancy/secretary said he's on way back from New Smyrna. PIO noted he'd called with questions about a certain property? She said she could try to look that up, ... he owns one property and his children owns the other one, not sure which one he was calling about. PIO asked if she could email the property locations, IDs and his questions, that would be very helpful. Gave my email address; she said she would and thanks.</p>
3/29/2007	3:15 PM	<p>Charles Clayton MSG I own property along SR 46, around new proposed pathway of road running from 441 up Mt Plymouth Sorrento, believe its SR 437. Was talking to Deland, referred me to Shirley Martin and Shirley said you'd have more on the ROW for Wekiva Parkway. Call me re: what public info you have on the Wekiva Parkway, 407-622-0000 thank you.</p>
Contact Date 8/24/2007	Time 9:59 AM	<p>Casey Collins Gaylord Merlin Regarding Casey/Gaylord Merlin 813-221-9000 called for update, noted she'd last spoken to me some weeks ago. She asked for schedule update? PIO noted still finalizing recommendations, meeting with agencies, etc. had thought public hearings in October but now looking at January 2008. Noted had hoped to have maps in August but not told October. PIO noted there is PowerPoint on website with our recommendations so far; can't zoom in on maps but gives you an idea. PIO noted after hearings have to go through agency approval process, study finish summer 2008 with approved alignment and IC locations. She said so when would construction start? PIO noted not determined since project not funded, went over current funding, noted at current levels we're looking minimum 5-10 years. She said okay and thanks for the update, will check out the PowerPoint on the website.</p>
Contact Date 7/27/2007	Time 2:51 PM	<p>T.C. Collins Regarding From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Friday, July 27, 2007 2:51 PM To: 'Judith Adams' Subject: FW: Property in Lake Monroe.. T.C., I'm having trouble with my server today, but from what I can tell from the previous maps, this property at 4770 Ohio Avenue is north of Orange Boulevard and the Lake Forest subdivision. Our project in this area would only widen SR 46 by 100-200 feet north of the current corridor. So, if this is the correct property location, there would be no direct impact. Please feel free to call or email with other questions. Mary Brooks</p>

Contact		David Cooksey	
Date	Time	Regarding	
4/20/2007	2:36 PM	PIO returned call to David Cooksey in Sorrento 352-406-0668, left MSG to call me back or email me with specific questions so I can get back to him. He called right back. He stated we have a designated committee in Sorrento by county commission ... we're putting together LRD's going to the county for our area ... it's coming out in the new comp plan. We want to look at ... it's going to affect our area drastically. It's going to turn the Sorrento area ... the western leg, main concern is bypass. The whole bypass was put together ... our committee was requesting this 3-4 years ago. We wanted to preserve 46 as two lanes in Sorrento. I think it may go to four lanes. That was whole reason for the bypass. Mt Plymouth Sorrento is anything east of Round Lake Road, ... He went on about how we could have brought it up south of 46, but that Mount Dora did a power play to stop that, noted the office/manufacturing area they're trying to establish near Round Lake Road. PIO noted we had some alternatives south of 46 initially, in fact one went through	

wolf branch sink, but LCWA was against that so it did not move forward. He continued on how Mount Dora would have been against that for their own purposes... PIO asked several times what his question was, was it why we didn't elevate the road along 46 instead of having it at grade? He said sort of, or why we didn't take it south of 46. PIO noted we were recommending the northern widening of 46 because of all the residences on south side. He described some background about wolf branch sink, how city if permitting a landfill next to it though they were against the road being there, etc. ... PIO noted we hope to have some updated maps for them in next 2-4 weeks, public haring been pushed back due to all the issues to be worked out, noted hope to finish study before end of the year but subject to change. PIO noted if he doesn't see anything new on the website to call or email me back. He said okay and thanks for the call back.--258 p.m.

4/20/2007	8:05 AM	David Cooksey called and left MSG I live in Sorrento. We've talked in the past. Give me a call 352-406-0668 I just had a brief question to ask you. Thank you.
1/18/2007	8:19 AM	PIO returned call to David Cooksey 352-406-0668, left MSG to call me back and if he gets voicemail to leave more info so I can research for him
1/17/2007	9:14 AM	David Cooksey MSG question about 429 and committee that's represented, 352-406-0668 give me a call back

Contact		Beth Corino
Date	Time	Regarding
2/8/2007	2:35 PM	PIO returned call to Beth Corino 407-330-3339 meeting I went to was under impression between following 46 to I-4 and then 417. PIO noted preliminary recommendation is for 417, still meeting with county, city and state officials, etc., so still in process of refining. She said she hates to hear that; it splits up residential property. PIO noted have been trying to minimize impacts to homes, have adjusted the 417 alternative to miss homes in Tall Trees and Capri Cove, and were only hitting a couple in each even as of last summer's workshops. It was mentioned Markham forest and 46, that they would have to take 5 houses out of new Ryland development. PIO relayed that north widening is preliminary recommendation to avoid all the homes along the south, but would still have to work out issue with DEP because would hit strip of lower Wekiva preserve on the north. She owns property, 3 different parcels, two on sylvan avenue and one on ??, she started out getting info but has gotten no mailings for a year and half. PIO noted we're working on newsletter now, last one was for summer workshops last year. PIO to add her back into project database, apologized for whatever reason she fell off the list: 408 country wood circle, Lake Mary, fl 32746, email bcorino@cfl.rr.com It's not going to affect my property, but those homes on the other side of Tall Trees, they don't have a HOA or the money to fight it like Tall Trees, they may not even know about it. She became agitated. PIO had to clarify several times where schedule stood re: public hearings, presentation to SCEA maybe in March, and former schedule. She said she was calling Commissioner McLean, her commissioner and comm.. Carey, because these people probably don't know it's being moved toward them. PIO noted this was all evolving and we would be getting info out in the newsletter and on the website to that effect soon. She thanked me for returning the call.--256 p.m.

2/7/2007	2:37 PM	Beth Corino MSG questions on the Wekiva Parkway project, 407-330-3339 thanks.

Date	Time	Regarding
11/13/2007	2:27 PM	Donna Cox 407-246-0948 called and asked about the Wekiva Parkway. She said we rent a property on Boch Road, and own 10 acres on Haas, she said they haven't received

anything and said their in-laws live on Boch Road and Haas Road. She lives at 2486 Boch Road Apopka 32712, no email at home. PIO noted we don't have an approved alignment yet, have recommendations posted on the website and walked her through how to find those. PIO noted looking at public hearings February-March, and will send something out on that once we have details, probably in January. She said Our property on haas we want to build a house, but don't want to build a house if the road is going through there. She was aware that the road would not be built for several years. PIO noted that's correct, it's not fully funded.

Subject: SR 429 - Wekiva Parkway PD&E Study - public hearing schedule

Hello Joyce,  
I apologize for the delay in getting back to you, but your email was just forwarded to me this afternoon after having been sent to the general OOCEA internet email address. I apologize for any confusion there may have been regarding the scheduling of formal public hearings for the Wekiva Parkway Project Development and Environment (PD&E) Study. You are correct that the hearing timeframe has changed several times as we run into issues and concerns from government agencies and the community that need more time to work through. There also is significant documentation that has to be drafted and approved, including federal paperwork, before we can actually schedule the hearings. We hope to have all of that taken care of and be able to schedule the public hearings for February or March.

I understand your frustrations. Studies for large, complex transportation projects such as this do require extensive evaluation, engineering analysis and in-depth community coordination. And all of that takes time. We are nearing the home stretch now, and after the formal public hearings hope to have an approved alignment alternative by summer or fall 2008.

As you are no likely aware, as things stand now, we still face significant funding challenges with the Wekiva Parkway. But the OOCEA has made this project a priority, and is committed to working with major transportation and other stakeholders to ensure that it continues to move forward to fruition.

Once the public hearing dates are nailed down, we will be sending out another project newsletter, updating the Web site and otherwise getting the word out. If you're not already in the project database to receive this material, please email me you mailing address.

I hope this helps. Please contact me directly in the future with any questions or concerns.  
Mary Brooks

Hi Mary,  
I hope you enjoyed the holidays. I'm going through the internet account and found one for you. Thanks!  
-Paul

I have read in my local paper, The Apopka Chief, two differing accounts  
of when the next public meeting is supposed to be held on the Wekiva  
Parkway section of the 429.  
One account stated it would be held in early 2008, after the first of  
the year.  
The second account was quoted as being early summer.  
Has this meeting date been set? If not, then do you have some idea  
of when it will be held? We who know we are in the pathway of the  
road are really getting tired and weary of waiting for something to get  
started. It is hard to know you are going to lose your home but not  
know when this loss will take place.  
Please advise.  
Thank you,  
Joyce Cravey
