50 PMTo: 'Craveycrafts@aol.com'Subject: RE: Wekiva ParkwayHello Joyce, The Project  
Development and Environment (PD&E) Study for the SR 429-Wekiva Parkway is not yet  
complete. The public hearing schedule has been pushed back as we continue to meet with  
local government and state agency officials to get their input and direction on alignment  
alternative recommendations. For example, we will be doing a presentation to the SC  
Expressway Authority May 8 at 4 p.m., and also have meetings planned with the Mount  
Dora City Council and Lake County Commission in May and June.We're shooting at this  
point to have a preferred recommendation(s) ready to bring forward to formal public  
hearings in September or October, with the study hopefully concluding with an approved  
alignment by late 2007 or early 2008.Are you on the project mailing list? We plan to send  
an update out to folks on the list in the next few weeks. If you're not on the list, please  
provide your mailing information so that I can be sure to include you. Thanks.Mary Brooks

3/7/2007 4:37 PM

-----Original Message-----From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Wednesday, March 07, 2007 4:37 PMTo: 'Cynthia Dahlman'Subject: SR 429-Wekiva Parkway PD&E Study - UpdateHello Cynthia,The schedule for the Project Development and Environment (PD&E) Study for the Wekiva Parkway has been pushed back quite a bit as we continue to work through various issues along this 25-mile corridor. Preliminary alignment recommendations are taking shape as we continue to meet with local government, state agency representatives, environmentalists and other stakeholders to get their input.On Feb. 7, 2007, the City of Apopka Council approved a project corridor within their city limits, thereby allowing the Expressway Authority to proceed with advance right-of-way acquisition along that segment. The vote was requested since the alignment in this area would have to connect to the northwest end of the planned extension of State Road 414 (Maitland Boulevard), and there would be little room for shifting the proposed roadway. Public comment, local government and state agency input, engineering analysis, impact assessments and right-of-way cost estimates are helping to shape the draft recommendations. The intent is to minimize impacts to homes, businesses and the environment, while also developing a transportation facility that meets the region's growing transportation needs. Once the preliminary recommendations have been refined, the resulting preferred alternative will be brought forward for formal public hearings this summer. We hope to have some new maps to post on the website within the next 30 days  
And once the hearings are scheduled we will be sending out new project updates.The PD&E study, which began in January 2005, is expected to finish with an approved alignment by fall 2007.Funding remains a challenge for this \$1.6 billion project. The OCEA has funds to do final design, the next step, and to buy some right of way, but not all, for the Orange County portion. FDOT has no funding programmed for design, and only enough money for a very small portion of the right of way needed for the Lake and Seminole county portions. Based on funding availability, this project could be 10-15 years from construction.I hope that helps.Mary Brooks

RE: Refined Alignment Alternative Concept requested for the Wekiva Parkway PD&E Study  
Dear Ella,

As we discussed yesterday on the phone, please find enclosed the last concept map that I have for the State Road 429 - Wekiva Parkway Project Development and Environment PD&E) Study in your area. As noted, I'm waiting for the latest maps to be finalized and approved for distribution. We are working to schedule the formal public hearings to review the recommended preferred alternatives in January 2008.

This exhibit, Wekiva Parkway SR 417 / Interstate 4 Interchange - Alternative B, shows an impact of one half to two-thirds of the property at 115 Orange Avenue (parcel 2876 on the map).

As we discussed, this is only a recommendation and is subject to change. We will not have an approved alignment until the PD&E Study finishes in summer 2008.

As this project is not funded, the scheduling of subsequent project phases is tentative at best. At current funding levels, conservative estimates have the Florida Department of Transportation beginning construction on the Seminole County portion of the parkway in perhaps 10-15 years. There is currently no money programmed for the next phase after the study, which would be final design.

I hope you find this information helpful. Please contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com <mailto:MBrooksSR414@cfl.rr.com>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817.

Sincerely,  
Mary Brooks

10/3/2007 5:21 PM

PIO called back Ella Davis 407-322-4469 and relayed info. She said last time she had someone check they were taking all of her property. PIO said sometimes owners negotiate that rather being left with a remnant. She said so you're taking my house then, it's right in the center? PIO noted from the concept I had I couldn't see her house, but looks like impact is to top or northern 2/3 of property. She said she has 4 acres; PIO noted maybe 1 5 acres would be left, just eyeballing it, not measuring. She was having trouble visualizing how it was crossing her property. She does not have a computer or internet access. PIO noted the parkway starts to turn off SR 46 at Designing Women nursery, then crosses northern edge of her neighbor to the west (she noted he has 5 acres) and there is also a pond shown for his property. And then it continues to dip south across the top half to 2/3 of her property and crosses Orange Avenue.

She said she has lived there 50 years. PIO noted even after we finish study in summer 2008, FDOT doesn't have funding for future phases, could be 10-15 years before construction. She said but you will have it all sorted out before then? PIO noted we'd have to buy property before that, but have to first do final design, nail down the engineering details so we know what we need to buy. PIO noted this is not something that's going to happen next year or even in a couple of years.

She said well when they build this aren't they going to do it all at once? PIO noted no, OOCEA has funding for final design and some ROW acquisition, so you might see construction start in OC in 5-10 years. FDOT doesn't have that future funding. PIO also noted they would have to break it up into sections; one contractor wouldn't be able to do the whole thing.

PIO noted public hearings pushed from October to January, with study to finish in summer 2008. PIO noted waiting on the latest maps, thought I'd have them by now honestly, but they're still being finalized and have to be approved. When I get them can send her a copy

Noted her parcel was referenced as 2876 for her info. She took that down.  
She said she was thankful for the information and me calling back.  
--534 p.m.

Contact Date	Time	John Deloise Regarding
10/2/2007	9:09 PM	PIO researched Ella Davis/115 S. Orange Avenue property location on SCPA website. Property borders SR 46 on the north, Orange Ave., on the east. It is designated as parcel 2876 on the project maps, and is shown east of a parcel containing a pond on 417 Alt. B. Wekiva Parkway along 46 and 417 alignment would take half to 2/3 of property. Confirmed against Wekiva commission PowerPoint that was recommendation moving forward.
9/18/2007	2:59 PM	Ella Davis/115 S. Orange Avenue, Sanford 407-322-4469. She said she's off SR 46 2 miles west of I-4. They were drilling on my property and they didn't let me know anything. They weren't courteous. I walked out to find out what they were doing. They said they were getting dirt samples for FDOT. They said they were from FDOT. I called FDOT and they referred me to you. PIO noted we sent out letters when the study first began about geotech and other field work needed. She said oh, that's what they were referring to? She said they said I was notified, but I thought they meant someone was supposed to call me. She said last October when they had the meeting in Sanford, there were three options. I saw the charts and the one they preferred was going right through me. Lawyers have been sending letters to me showing that. My home is here, I live here. PIO said I'd have to check her location against the latest recommendations and get back to her PIO noted we've had issues with some lawyers putting out erroneous info and getting people panicked. PIO noted study and overall project schedule, lack of funding; this is not something that's happening any time soon. She asked how long will it be before they go to construction? PIO noted at current funding levels, 5-10 years for OOCEA portion and 10-15 years for FDOT part. She was thankful for the info, said she felt better after talking to me, just wanted to know what was going on. PIO noted public hearings now set for January instead of October, so will have latest info for them then. --306 p.m.
10/17/2007	10:24 AM	John Deloise 407-539-2714 called and asked if the Wekiva Parkway IC was still going to be at Kelly Park? PIO said that is still the recommendation. He said he wanted to be sure it hadn't changed to Ponkan. PIO noted no. PIO relayed remaining meeting and overall schedule, and noted OOCEA Board to review and hopefully approve the latest maps on Oct 24 for us to post on website. He asked will they be able to see those? PIO said correct, they will be posted to the website if approved for public review. He was thankful for the info.
1/2/2007	5:36 PM	PIO returned call to John Deloise 407-539-1440 or 2714 (CF Landbrokers) x226, left MSG that draft recommendation alignment expected late January or early February, agency review process and then formal public hearings in April, one in each county as we've done in the past. Any other questions call or email me, gave number and email address.
1/2/2007	10:53 AM	John Deloise MSG would like to inquire about the next meeting that's planned for the Wekiva Parkway. If you have a date for that. 407-539-1440 thank you.

7/2/2007	10:57 PM	<p>__From: sdevine@bellsouth.net [mailto:sdevine@bellsouth.net] Sent: Monday, July 02, 2007 10:57 PM  To: Mary Brooks  Subject: Wekiva Parkway Public Hearings  Ms. Brooks: This is what the website still says about the public hearings for the Wekiva Parkway. The preferred alternative is currently slated to be brought forward for formal public hearings in May or June. The PD&amp;E study, which began in January 2005, is expected to finish with an approved alternative in late summer or early fall 2007. Do you have a new timetable for this? Any idea what is holding up completion of the study?  Thank you,  Steve Devine  sdevine@bellsouth.net  407-330-9598</p>	
2/20/2007	3:21 PM	<p>PIO returned call to Steve Devine/Lake Forest HOA, who's the chair of the community affairs committee, was looking to give folks an update, been trying to keep up with what's going on. He referred to dates on the website. PIO noted schedule pushed back due to working through all the issues on the 25-mile corridor and trying to schedule staff and officials meetings with the various governments and state agencies. PIO noted we're in the process of updating the website now, just sent info to the webmaster this morning.</p>	

PIO noted we do not have a preferred alternative. We have some preliminary recommendations for some locations, and others we still working through issues. PIO noted prelim recommendation in their area is for the 417 connection to I-4; the 46 connection just doesn't work, not enough room to fit in all the ramps, etc. with all the commercial constraints, etc. PIO also noted re: SR 46, prelim recommendation to widen to the north to avoid the residential impacts on south side, but that puts us in state park, which raises federal red flags. PIO noted the recommendations we have at this point are just what the impact assessments, engineering analysis and row estimates point to. It's not signed off on, approved or authorized, and is highly subject to change. He said he understood there was also a political aspect to it. He asked when we were going to meet with SCEA? PIO said in March or April, already been meeting with commissioners individually, as well as folks with cities of Sanford and Lake Mary. He said so the public hearing won't be in March? PIO said no, schedule has been pushed back and more like May or June. He asked so when are you going to know something for sure? PIO said still hope to finish study with approved alternative by late summer, maybe early fall. He was thankful for the call back and info.

2/20/2007	2:02 PM	Steve Devine/Lake Forest HOA I sent an email but it's not going through road runner. I'm trying to find out what the preferred alternate route is for the Wekiva Parkway on the west On the website that route was to be picked in Dec. or Jan and then public hearings in March. Can you call me?407-330-9598

Date	Time	Regarding
2/12/2007	11:48 AM	Susan MSG I just need to get some information about the access of this road. 407-834-5185 I don't know where to get it. The last thing I got they didn't know where the road was going. I need to know being as I'm right there.

2/12/2007	10:08 AM	Susan DiGiovanni left MSG I wasn't notified of the meeting. My property is probably right adjacent to the parkway where it's going to go. I was told the alignment was finally settled where exactly it was going to go. I have had to stop the sale of my property because I couldn't sell the property because a road might go through it. I need that piece of paper saying where exactly that road is going through. I'm sure the meeting did say that. 407-834-5185 or mail to me, if there is such an item, about the info on the parkway whereabouts. My address is 1402 Noble St., Longwood St., FL 32750 the property I'm referencing is not my home, it's in Lake County right on 46 just west of the sawmill.
-----------	----------	--

2/8/2007	1:37 PM	PIO returned call to Susan DiGiovanni 407-834-5185, left detailed MSG that no decision had been made on alignment, there's no formal paper to give her. PIO noted at committee meetings on Feb. 2 they discussed preliminary recommendations for some locations, but don't even have that for all of the locations. PIO noted we're still working through the
----------	---------	---

process, still meeting with local and state officials to get their input on what recommendations should move forward. PIO left email and cell number if she has specific questions for me.

Contact		Leslie Diller
Date	Time	Regarding
2/19/2007	3:56 PM	PIO prepared letter response for Leslie and Harold Diller and sent.
2/19/2007	2:34 PM	PIO researched location of Leslie and Harold Diller/6256 Plymouth Sorrento Road on OCPA website. Parcel on west side of p-s road, 4 parcels south of Boch Road, 7 parcels north of Ondich. PIO checked OC-LC systems IC alternative 1 map, parcel is exhibit parcel number 2786. No direct impact from alt. 1; roadway would cross SW corner of parcel 2785, immediately south of the Dillers. East-west portion coming east from system IC is south of Boch RoadAlt. 2 - system IC would cross p-s road SE of the Dillers, would cross parcel two properties down from them, 2782, on its SE corner. East-west portion coming east from system IC is south of Boch RoadNo direct impact.Alt. 3 - same as alt. 2 East-west portion coming east from system IC is south of Boch RoadAlt. 4 - would be total take of 2786 and several adjacent propertiesAlt. 5 would take all of 2786 but the SE cornerAlt. 6 same as alt 5.
1/17/2007	4:20 PM	Joe B./OOCEA provided letter received from member of the public:6256 Plymouth Sorrento Road, Apopka, FL 32712Jan. 14, 2007Dear Expressway Authority,Due to the recent expansion plans for the beltway system near Plymouth Sorrento Road, I felt it necessary to contact you concerning this matter. It is my understanding that the proposed turn off toward Mt. Dora would occur either two doors before my property or two doors past it.My husband Harold Diller(sp?) had brain surgery recently and has had an extremely difficult recovery. He spent 11/2 mos. Hospitalized, with half that time in ICU. I must tell you that it would put a hardship upon us to move, and even consider it, in the near future and hope you will take this into careful consideration in the decisions you are now deciding Sincerely,Leslie R. Diller

3/27/2007	4:07 PM	_From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, March 27, 2007 4:07 PMTo: 'Suzette DiMascio, CHE, CMCE, CPC'Subject: SR 429-Wekiva Parkway PD&E Study - Update lHello Suzette,We have preliminary alignment and interchange recommendations in some locations, and are still working through some issues in other areas of the 25-mile Wekiva Parkway corridor as part of the Project Development and Environment (PD&E) Study. We have been continuing meetings with city, county and state officials to get direction and input for drafting the recommendations. We've already gotten votes for recommendations from the City of Apopka and the OC Commission (Kelly Park interchange), and are meeting again with the Mount Dora council, the Florida Department of Environmental Protection (FDEP) and SC Expressway Authority, among others.Please indicate the location you are most interested in and I will let you know if we have a recommended alternative. We hope to get through these meetings and have a preferred alignment alternative to bring forward for formal public hearings in June or July; that's probably at the earliest. Please keep in mind that this project is not funded, so the scheduling of subsequent phases is tentative at best. We do expect to finish the PD&E study by the end of this year.All of the exhibits from the summer public workshops are available at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the entry page, click on the "corporate site" button on the left side of the page. On the home page, under the left column headline "construction update" click on the highlighted text link for	

"Western Connectors." That will take you to the Wekiva Parkway page. At the top of that page you will see underlined text links for the workshop exhibits and other info. There is also considerable information on the PD&E study below on that page. We hope to have some updated maps soon and will post those also when available. Please call or email with other questions. Mary Brooks

This is a brief summary of a portion of the Lake Co. Commission meeting this morning concerning CR 46A Realignment and US 441/SR 46 Interchange Modification. Mike Snyder, Brian Stanger and I attended. The discussion on CR 46A lasted about 2 hours. Jim Stivender did a short background intro, discussed the 250 ft. for R/W and buffer, and said the purpose today was to decide whether to authorize the chairman to sign the letter to FDOT recommending Alternative 1A. Board Chairman Cadwell opened the meeting to speakers. The following people spoke in favor of, or against, Alternative 1A (this is not in order of appearance): In favor - Charles Lee, Audubon and WRBC member; Scott Taylor, landowner; Rory Tromber, Friends of Wekiva; Keith Schue, The Nature Conservancy; Mike Martin, Division of Forestry; Mayor James Yatsuk of Mount Dora (he said the City Council had voted its unanimous support); Robert Curry, citizen; Peggy Bellflower, Sorrento. Those against - Bill Smalley, Heathrow Country Estates (HCE) resident; Ray Palmer, HCE resident; Allison Drake, HCE resident; Brad Milsap, HCE project director; William Anderson, HCE resident; Bob Regal, Sorrento resident; G.G. Washington, HCE resident; Thomas Montali, citizen; Catherine Hanson, former Lake Co. commissioner; Jacob Martinez, HCE resident; Janet Smalley, HCE resident; James Lloyd, HCE resident; Tom O'Brien, citizen. Essentially those opposed to Alternative 1A asked the Board to delay voting on the letter to FDOT and instead appoint a committee to study other alternatives. Commissioner Linda Stewart strongly defended the results of the PD&E Study and complimented OCEA and FDOT for all the efforts put in to date. She said there have been many public meetings and many alternatives evaluated. Mike Snyder was asked to clarify why the Board recommendation to FDOT on CR 46A was needed now. Mike advised the commissioners that the preferred alternative had to be selected in order to take it to the Public Hearing with the rest of the Wekiva Parkway project around Feb. of 2008. The Board voted 3 to 1 in favor of sending a letter to FDOT recommending Alternative 1A. Commissioners Cadwell, Stewart and Renick voted in favor, while Commissioner Hill voted against. Commissioner Stivender was absent. The discussion on the US 441/SR 46 Interchange lasted about 10 minutes. Mayor Yatsuk said in an Oct. 17, 2007 letter to FDOT, the Mount Dora City Council had clearly expressed its preference for Alternative 1 (grade separated). He said they found out at the recent

WRBC meeting that Alternative 2 (at-grade) was recommended by FDOT. He acknowledged that FDOT and their consultants had met several times with him and city staff and with the City Council on the interchange alternatives, but he said the \$20 million difference in the cost of the alternatives should not be a big issue for a \$2 billion project. He asked the Lake County BOCC to support Mount Dora. Jim Stivender was asked by a commissioner if county staff had a position on this. He said he thought the Alternative 2 concept was developed to minimize traffic going west of US 441 into Mount Dora. T.J. Fish of the Lake-Sumter MPO staff said he thought the MPO would support Mount Dora. The Commissioners voted unanimously to send a letter to FDOT in support of Mount Dora to "do away with an intersection at the interchange".  
-- End of Summary --

2/27/2007

5:30 PM

Heathrow Country Estates HOA meeting, Mike, Tom, Brian, Mark and PIO. Also attending were Keith Schue, Scot Taylor, Commissioner Stewart, Stumpy Harris and about 45 residents. PIO did introductions. Mark gave brief overview, noted when we last visited with you in august the main issue was the relocation of CR 46A. He noted the summer viable alternative for 46A, residents' concerns, and that we considered additional concepts  
Alternative 1: similar to original but 50' off the HCE property line and would allow bufferAlt 2: 800' east of property line. Half way from the home to the east and the property line to the westAlt. 3: east of property impacted and enters the Seminole State Forest and KARST areaAlt. 4: keep CR 46A in place but bridge over areaPreliminary evaluations: #4 - according to the WPPA passed by legislature, that alignment is not consistent with the act. The cost would be significantly higher than any others, and it doesn't meet the objectives#3 - gets into state owned lands that they are trying to protect. Also is not consistent with the WPPA. Park managers are opposed to this, so it has been eliminated So that leaves 1, 2 and the original alignment remaining for consideration.LC staff have said put it as far west as possible because it will be a county road. We continue to gather input from the county.Q: what specific buffering technique is being considered? Mark said not yet; unless property owner would sell, we may not be able to condemn ... would have to have transportation purpose to buy it legally, so maybe looking at some vegetation or moundingQ: what about the old concept of T-ing in at SR 46 and 46A...? Mark said the traffic numbers showed it made more sense to provide connection to Plymouth and Sorrento.Q: emphasis should be getting people from west Volusia and east Lake County if they're coming through the area, make it so it's not using 46 as a thorough fare... Mark noted if we did that it would be more lefts, intersection operation would suffer. There is more traffic on 46 than 46A.Q: why is it necessary to connect 46A and 46, and if so why not use 437? Mark noted intent was to provide the Wekiva Parkway for through movement around Mt. Plymouth, remove portion of 46A, create an IC to provide access so Mt. Plymouth folks can get to Seminole County. Otherwise you would have to go back to Round Lake Road or Kelly Park Road. The travel desires are such that people wan tot go various directions. This connection provides local access points. Trying to reduce the number of developments if there were more interchanges. Mark noted significant demand on 46A wanting to get on 46 and to SC. And that demand will continue to grow. You would have to have the county have a say in that.He noted the county is looking at doing something with CR 437 but that is not part of this study.Several people voiced concerns about realignment proximity.QA why not shift the karst alignment west off of the karst area? Mark aid that would go through the one home and we're tying to avoid direct impacts to homes.Residents stated there are 320 homes affected by what we're proposing and one home is more important? Mark noted when he is referring to direct impacts he means we're actually taking a home, not taking any HCE homes.Several concerns expressed about noise and property values. Mark noted basing it on traffic projections for the region 5-30 years out regarding the connection, and without that traffic would go to

436 and 46. We haven't studied not connecting it. Someone requested to see impacts and stats for not building the 46A and 46 connection. Q: new alignment two or four lanes? Mark said initially two lanes with enough ROW for four lanes. We would have an area to possibly provide vegetation. Q: cost differential of the far east alternative? Mark said about \$70 million because of the bridge. Q: why? We need to maintain the wildlife corridor as per the statute. FDOT would just four lane 46 but that area is too sensitive, the issue was studied thoroughly by area leaders and environmentalists and was stated in the statute. Q: asked to point out 46 on exhibit? Q: where would 46A tie into 46? Across from Camp Challenge. There's a sinkhole right at 46A and you're talking about going through there? Mark discussed KARST area specifics. Trevor: look at 2.5 range, just west of sinkhole, if there's a house in the way then take it... Brian: we're required by law to show a need. There are certain requirements to take a home. Q: what can we do that's positive and proactive? It seems like you've already decided? Mark said we have to work within the legislation and with the park land managers. We're also mandated to minimize impacts to residents. Q: what about the impact to county tax revenue and our property values? Mark said when Wekiva Parkway is built and there is direct convenient access to SC, property values will go up much more quickly than with the existing 46. There would probably be some flux during construction, but the additional access with the roadway access would be seen as a benefit. Q: what's the timetable? We're finishing the study and working with county, we hope to go to public hearings in June or possibly later. We will take input and make refinements, seek FHWA approval. This project is very expensive. We don't foresee design, ROW or construction funding for at least 5-10 years. Would suggest first section to be built would be in OC. Q: cost alignment at the property line? Mark said \$52 million, not a lot of difference between the three western ones, that's including land and construction. Easternmost would be most expensive. Q: what about 800' alternative? Mark noted that one splits the property more; county indicated they prefer the ones further to the west. Q: why one homeowner more important than all of us? Mark confirmed in this area it's 10-15 years away. Trevor: why not put it along the state land western border? Mark noted if you're impacting state lands, many proceedings and parties involved, also issues with lake officials. Paul Roeke said Stumpy Harris is representing the HOA. After meeting broke up, residents viewed boards and asked individual questions. A woman expressed concern about county line road/Ergang Road access with system IC, need to get back and forth to Oak Lane and other areas. You need to include access for bikes and horses.--7 p.m.

2/6/2007 10:19 AM \_\_From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, February 06, 2007 10:19 AM To: 'Joe DoBosh' Subject: SR 429-Wekiva Parkway PD&E Study - Heathrow Country Estates Importance: High Hello Joe, I hope this finds you well. We would like to schedule a presentation to the Heathrow Country Club HOA to bring you up to date on the latest project info. Please let me know the schedule for your next couple of HOA meetings, and at which meeting you would like for us to present. Or, if you don't have any regularly scheduled meetings, please let me know some dates that you might like to try to schedule a presentation for your homeowners. I look forward to hearing from you soon. Mary Brooks

 Ms. Brooks, Thanks for the information provided at subject meeting. Could you send or provide a link to the updated proposed plan handed out at the meeting Thursday night; showing the shifted alignment of the 417? Only 10 copies were available at the meeting and I would like to review as our property is located in the SW corner of Tall Trees closest to the proposed 417 planned route. Thanks for the information,

Contact Date	Time	Megan Eaves Regarding	Pools by Bradley
8/30/2007	9:58 AM	<p>Megan Eaves/Pools by Bradley 407-323-7611 called to say they're hearing lot of rumors. They thought they knew where it was going but now hearing something different. They are ready to develop their property at 310 S. Orange Boulevard, across from Dr. Mills/veterinarian. We have a one acre lot. Everybody's talking about it at the football field. What's the latest on where it's going? PIO noted I wasn't in the office but we have the recommendations, or most of them, in a PowerPoint on the website, has she seen that? She said she hadn't been the site recently PIO walked her through the web links for the PowerPoint. She said will that really show where it's going? PIO said yes, it shows the alignment and parcel lines; you just can't zoom in and out on those like you can on the map PDF's. PIO noted I'm still waiting for the updated maps. She asked when the decision will be made? PIO noted the mailing this summer - she said she got it - said hearings in October, but that's been pushed back to January. Then we'd have to make any last minute revisions based on public input, then go through the agency review and approval by summer 2008.</p> <p>She said after the approval then what? I know there's lack of funding...? PIO said that's correct, FDOT said at current funding levels it could be 10-15 years for construction. They're looking at different funding options; FTE has looked at it a couple times but making it a toll road presents issues. PIO said I encourage people to live their lives, do what they feel is best with their properties. Then if the state has to purchase it at some point, any development or improvement would have to be taken into consideration. She said they're trying to decide how to live their lives, whether they build something cheap knowing it will be taken by the road, or building something they can be proud of. She said she thinks they've decided to build something to be proud of. She thanked me for the update, I know I have bugged you several times and you're always so nice. PIO said I know this has been going on for a while and people want to know what's going on. That's what I'm here for.</p> <p>--1006 a.m.</p>	
2/16/2007	4:19 PM	<p>PIO called back Megan Eaves 407-416-0384, left detailed MSG apologizing for delay in getting back to her, but noting couldn't find property in question, only the oak knoll property. Gave her my email addresses and asked if she could send property ID or other additional info so I could look that up for her, also left my cell number.</p>	
2/16/2007	4:13 PM	<p>PIO researched Megan Eaves recent query at 310 South Orange Boulevard. Only property that came up for her was 3494 Oak Knoll Point in the Summer Estates.</p>	
1/31/2007	12:29 PM	<p>Megan / Pools by Bradley MSG we are moving forward with building our land at 310 south orange boulevard, the initial proposal was for the alignment to go directly through our land based on last years Public forum with the alignment on the maps around the road, would like to know what the latest and greatest is on that if I could get some info from someone that would be great. 407-416-0384 appreciate your time on this.</p>	

Contact		Jeannie & Willard Eldridge
Date	Time	Regarding
10/8/2007	10:20 AM	PIO returned call to Jeanie, let her know we were looking at October for public hearings, had sent out mailer this summer, but afterwards that got pushed back to January 2008. PIO noted the dates and locations for those meetings not set yet, but we will send them something in advance about the meetings. She said thanks for much for getting back to her.
10/8/2007	9:36 AM	Jeanie Eldridge/Locksburg, TN 931-766-5909 I own property at 5425 Wilson road in Sanford, I would like to know when the next meeting will be for this expressway, Wekiva Parkway, whatever. We understand it will take our property. I would really appreciate if you would give me a call. Someone said there was an October meeting, but I haven't received anything about that and I would really like to be at the meeting. Thanks so much.
5/17/2007	2:43 PM	PIO pulled FDOT real estate acquisition process pamphlet, 417 IC alternative and comment form and sent to P.O. box 543, Lawrenceburg TN, 38464 with note: "Jeanie, It was good speaking with you today. I'm sorry for your recent loss, and for the delay in getting this information to you. We will be sending out more info soon. Take care, Mary E. BrooksP.S. As noted, FDOT is handling the Lake and Seminole portions of the project. This map is in the process of being updated, FYI."
5/17/2007	2:21 PM	PIO returned call to Jeanie Eldridge 931-766-5909, apologized that when she called before I was handling 4 different people's jobs and some things fell through the cracks. PIO said the meeting May 8 was not a project meeting; we just gave a presentation to the SCEA regularly scheduled meeting. PIO noted we have not decided any alignments though getting local government and state agency input and working toward recommendations. PIO noted looking at Sept.-Oct. for public hearings. Once those are scheduled we will get newsletter with information out to the property owners. PIO noted it has taken much longer than anticipated to get through all of these issues and government meetings, that's why they haven't received anything in a while. She said being up here, we wanted to make sure we went to the meetings. She said she lost son in law in March. he was just 54 years old. it was a work accident. he was a pastor. it's been tragedy here, things haven't settled down but we wanted to know what was happening. PIO said I'm sorry again and that I would drop pamphlet in the mail to her once we got off the phone. She was thankful for the call back.
5/17/2007	11:18 AM	Jeanie Eldridge 931-766-5909 live in Lawrenceburg, TN MSG would like some info on the SR 46 bypass. I own property 5524 Wilson Road. I have not heard any more, I talked to you a while back, you were supposed to make sure I got some literature and I have not had anything since spring 06. now Someone told me you're having a meeting in may ... I'd like to know what's going on, if you don't mind calling me back. I appreciate it so much.

Contact		Joanna Emmanuel
Date	Time	Regarding
7/31/2007	3:32 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, July 31, 2007 3:32 PM To: 'Nyokal@earthlink.net' Subject: SR 429-Wekiva Parkway PD&E Study - 31129 Duxbury St. Joanna, I checked the location of the property in question at 31129 Duxbury Avenue. This appears to be in the Mt. Plymouth Estates or Country Club subdivision. The roadway alignment

alternative in this area is east of the subdivision and passes within the boundaries of the former Neighborhood Lakes parcel (now known as the Wekiva Mitigation Bank) so there would be no direct impact to your property.  
I hope this addresses your question. Please call or email with other questions or concerns.  
Mary Brooks

7/27/2007	2:51 PM	PIO returned call to Joanna Emmanuel re: house located along boundary of neighborhood lakes property. 352-735-1763. She said they live at 31129 Duxbury Avenue in LC, south of Camp Challenge. Can email info to Nyokal@earthlink.net <mailto:Nyokal@earthlink.net> she said they were on the west side of parcel 2. PIO said would look up the location and get back to her. PIO noted project is not fully funded, DOT at this rate won't have the funding for ROW and construction, unless federal money or tolls are used, for 10-15 years, this is just the PD&E study. She asked if I was going to send her a map? PIO noted the previous maps are on the website, and I'm waiting for updated ones from the engineers. PIO noted that the viable on the website would be the only map I could send her at this point. She said when she tried to enlarge it, the scale went caddy-wampus. PIO said I'd look into it and get back to her, probably Monday.
7/27/2007	1:25 PM	Joanna Emmanuel called and left MSG re: Wekiva Parkway, my house located along boundary of neighborhood lakes property. It looks like parcel 2 on the north end. We're trying to sell our home and trying to get a feel for how close the road is going to be to the front yard. Looks like it's going to be pretty close. We also want to know when the project is funded, this phase of the project, and when we can anticipate construction on this highway through here. If you want to give me a call I would appreciate some input. 352-735-1763

2/13/2007	4:34 PM	From Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, February 13, 2007 4:34 PMTo: Erickson, EricSubject: RE: SR 429 - Wekiva Parkway PD&E Study - Wekiva Country Estates HOA Eric, Thanks for clearing that up. Do you have someone that you deal with at Wekiva Pines Country Estates on the HOA that I could try to contact? Let me know - thanks. Mary Brooks
2/13/2007	4:16 PM	____From: Erickson, Eric [mailto:eerickson@seminolecountyfl.gov] Sent: Tuesday, February 13, 2007 4:16 PMTo: Mary BrooksSubject: RE: SR 429 - Wekiva Parkway PD&E Study - Wekiva Country Estates HOAMary,Thanks for the response; our subdivision (Wekiva Estates) has only 7 homeowners on 9 lots. If you do happen to set up a HOA meeting with Wekiva Pines Country Estates (about 40 lots / 20-25 homeowners), we can attend that meeting. Let me know, meanwhile I'll distribute Alternative No.1 (of 4) to my 6 neighbors. We support the Wekiva Parkway project and the homeowner and environmental considerations as reflected on the interchange layout plan. Thanks,Eric B. Erickson 321-303-1076-Cell / 407-665-5666-Work
2/13/2007	3:40 PM	____From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, February 13, 2007 3:40 PMTo: 'eerickson@seminolecountyfl.gov'Subject: SR 429 - Wekiva Parkway PD&E Study - Wekiva Country Estates HOAEric,Sorry I missed your call back yesterday. We are in the process of scheduling meetings with various HOA's to provide project updates. If your HOA would like a presentation, please get back to me with some possible dates and times, and a location so that I can set something up with members of the study team. I look forward to hearing

from you.Mary Brooks

2/12/2007 2:10 PM Eric Erickson MSG said you returned my call earlier, I will let people in neighborhood know we're leaning toward alternative 1 of the 4 there from LC east, I'm looking at it and that's the one will SR 46 will go under Wekiva Parkway to the south when you get west of Wekiva pines country estates ... and that will frontage along the new expressway ... Sims landscape to the west. ... The one 46 will go under ... If anything changes, give me a call, I will let them know you're leaning towards that, unofficial at this point of course, but more than likely that will end up being the lay out there. Thanks a lot.

2/12/2007 1:22 PM PIO called Eric Erickson/SC engineer 407-665-5666, left detailed MSG that prelim recommendation discussed at EAC/PAG meetings was East Lake County local access alternative 1, red alignment with split diamond configuration, would leave portion of SR 46 in front of his property in place for cross access. PIO noted some issues on part of some with leaving that there, but with engineering analysis and impact assessments, that was what was thought to be best at this time. PIO noted this is not final, subject to change, still meeting with various county and state agencies to get their input. PIO if that recommendation stands he'd see little impact, maybe if we modified that portion of SR 46 as part of this. PIO left email address and cell number.

2/9/2007 10:36 AM Eric Erickson/SC engineer 407-665-5666 MSG did anything change on Feb. 2 meeting for the PAG? Home is at 31243 SR 46, north side of 46, exactly Mile west of Wekiva River in Lake County. Wondering if IC still on there or if there are any changes or adjustments to that. Give me a call - thanks.

Date	Time	Regarding
3/7/2007	1:30 PM	Steven Erlsten mailed in comment form: "While I am delighted to see significant conservation lands being purchased to offset damage done directly by the proposed Wekiva Parkway, it is my opinion that this good will pale(sic) in comparison to the overall degradation to the environment and quality of life caused by this new highway. New roadway projects create the illusion of traffic improvement while actually adding to the problem. This roadway will fuel the uncontrolled suburban sprawl that has wreaked havoc across Central Florida. This sprawl-based development then overwhelms the existing infrastructure. The recent scandal involving development of land near the proposed highway highlights how powerfully limited-access highways drive development. This proposed highway will draw development money away from our urban cores into the exurban (sic) fringes, where once-beautiful lands will be cleared for more tract housing. This process will enrich many developers, but it will continue the degradation (sic) of our citizens' quality of life. While cancelling the planned highway is not practical, I urge you to minimize the number of access points in order to prevent runaway sprawl from devouring even more of our precious green space."

Glenn,  
Good to hear from you, and yes I got your message, along with a lot of other calls today. I'm still waiting on the latest maps, but there is a PowerPoint on the OCEA website that has the preferred alternative recommendations. You might want to check that out at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> . The PowerPoint, which was presented to the Wekiva River Basin Commission recently, is the first text link at the top of the page.  
FYI, the University Boulevard address is just our mailing address, PO Box. When I get the updated maps we will be posting those on the website as well, hopefully soon.  
As far as land acquisition, we're working on the four conservation parcels, as well as the project corridor within the City of Apopka limits in Orange County. That's all so far.  
Mary Brooks

7/23/2007 3:05 PM Glenn Forrest called and left MSG, interested in the Wekiva Parkway project, I realize your office is near me, I'm at 7200 Aloma between Forsythe and Palmetto. , if you have maps

at your office I could pop over, if that was convenient, or if you could direct me to the appropriate place to look at some maps. Meanwhile I will try the website that came in the notice I received a few days ago.  
Interested from perspective of SJRWMD water supply ASR project, and also would like to say hello to you if you are available 407-647-8600 look forward to hearing from you

Do not believe we have begun ROW acquisition on the Wekiva Parkway yet, but will look into it and get back to you.  Mary Brooks</p>	

Contact		Dean Fritchen	Coldwell Banker Commercial
Date	Time	Regarding	
11/8/2007	10:25 AM	Dean Fritchen/Coldwell Banker 407-619-8848 called and said he's in Plymouth Sorrento and has someone who wants to list their property and needs to know when this thing will be built? PIO noted no funding for construction. As that's in OC, OOCEA has funding for final design, which it plans to start shortly after study finishes in summer 2008, and some money for ROW, but not all. PIO noted design takes 2-3 years, so we'd be at 2010-2011, so does ROW acquisition (if we had funding), so that'd be 2010-2012, maybe 2009 at the earliest depending. And then if funding available, construction to start 2012-2014. He said okay that helps, he will let his client know. He asked if we'd decided on where it was going? PIO noted latest recommendations were presented to OOCEA Board on Oct. 24 and they authorized moving forward with those to formal public hearings. PIO noted the latest maps were posted on the website yesterday. He said okay, so I can go look at those? He thanked me for the assistance.	
9/13/2007	2:32 PM	PIO Deana Leffler called Mr. Fritchen back. He wanted to know if the project was fully funded and when the project start date was. PIO explained to him the project was still in design stage and the public hearing was pushed back to January of 2008. PIO pointed him to the OOCEA website and walked him through it to the Western Connector.	
9/13/2007	2:30 PM	Mr. Fritchen called and left vmail for Mary regarding the parkway.	
3/21/2007	10:01 AM	PIO returned call to Dean Fritchen 407-571-5525, 407-975-3476 he's interested in Round Lake Road and 46, PIO noted north and south alternatives, widening to the north less impactful and costly. Noted we're meeting soon with Mount Dora commission to get some direction on the 441 and 46 IC, so some preliminary recommendations but still working through issues in other locations. When will construction start? PIO noted might see some construction in OC in 5-10 years, but on the Lake and Seminole portions FDOT does not have any funding programmed for 10 years, and doesn't foresee that becoming available at current funding levels. PIO noted so could be 10-15 years for construction on those sections unless some federal or other funding becomes available. PIO noted they're looking at different options, public-private partnerships, tolling options, etc. he said that's not what I wanted to hear. He asked when the decisions would be made? PIO noted we're still working through officials' meetings and working through issues. Noted at the earliest could have public hearings in June or July. Hope to finish study by end of the year. He asked if there was somewhere he could go for info? PIO noted we have updated the project page on the website, same maps are there but soon hope to have new maps to post, reminded him of web address. He said thanks for the call back.--1013 a.m.	
3/21/2007	9:42 AM	Dean Fritchen 407-975-3476, 407-571-5525 MSG we're about at the end I dare say of the public involvement period or period of doing engineering reports and all, wondered, people ask me and I don't know what to tell them, we might expect this project on the Wekiva and highway 46 to proceed, looking for fix on where we were at. 407-571-5525 would appreciate your calling me, so I can get a little bit of a handle to explain things a little better than I'm able to do right now.	
Contact		Debbie Fullstrom	
Date	Time	Regarding	
5/11/2007	9:18 AM	PIO returned call to Debbie Fullstrom 407-665-4760, h 407- 474-3437, watched some meetings this week, can you verify if the state or county is doing my section? PIO said FDOT is doing the lake and Seminole portions; OOCEA doing the OC portion. She asked then why would SC be putting money toward this? PIO noted they're not really, but the SCEA charter states they have to approve the alignment and interchange locations for a road of this nature in their county. So they're not building it, but they have to bless it	

before it can move forward. She said I live close to where the road would connect to I-4, do you know when it will be built? PIO said FDOT does not have the funding for this, it's \$1.7 billion and FDOT has \$40 million for ROW in Lake County. They can move that around some, but still won't make a dent. PIO noted FDOT doesn't anticipate having the funds for at least 5 years, possibly 10-15. PIO noted they are looking at different options, federal funds, P3 (public private partnerships). She said so it could be 5 years before they start buying ROW? PIO said correct, unless funding becomes available. PIO reiterated unless some funding became available, or something changes, it will be a number of years down the road. she said okay and thanks

5/8/2007 4:51 PM Debbie Fullstrom MSG appreciate if you give me call back tomorrow 47-665-4760 or tonight at 407- 474-3437 thank you

3/28/2007	8:50 AM	<p>From: "Gardner, Angela" &lt;GardnerA@helenachemical.com&gt; Wednesday - March 28, 2007 8:50 AM  To: "Mary Brooks" &lt;brooksm@oocea.com&gt; Subject: RE: SR 429-Wekiva Parkway PD&amp;E Study - 22640 Rockland Ave.  Attachments: Mime.822 4156 bytes)  [View] [Save As] Thank you so much for getting back to me regarding this matter. I didn't know that the project is not yet funded,,, but am glad to hear that the recommendation will be to the west of me. Thank you again for taking the time to chase this down for me. Hope you have a good day!! Angela Gardner Helena Chemical</p>
3/28/2007	8:41 AM	<p>From: Mary Brooks Wednesday - March 28, 2007 8:41 AM  To: GardnerA@helenachemical.com Subject: SR 429-Wekiva Parkway PD&amp;E Study - 22640 Rockland Ave.  Angela, Heard back from the engineers late yesterday. I pulled your property location from the Lake County Property Appraiser's website. It showed 22640 Rockland Avenue south of Coronado Somerset Dr. and slightly west of the southern end of Swan Road. That property is designated parcel #1035 in our database. We intend to recommend Lake County West Alternative 1. The eastern roadway right-of-way line of LCW Alt. 1 would be approximately 580 feet from the southwest corner of the property in question. There may be a pond located between the roadway ROW line and this property, but the property would not be physically impacted. Please keep in mind that all of this is highly preliminary at this point. Details can change somewhat when the studies are done and the project enters final design. But at least this gives you an idea of potential impacts. And again, this project is not funded, so we could be looking at 10-15 years before construction might begin in this area. We're shooting for formal public hearings in June-July, and will post the latest alternatives' maps on the website once available (when we've finished getting the latest input from the various officials in the three counties.) Stay tuned. Mary Brooks</p>
3/27/2007	3:57 PM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, March 27, 2007 3:57 PM  To: 'gardnera@helenachemical.com' Subject: SR 429-Wekiva Parkway PD&amp;E Study - 22640 Rockland Ave.  Angela, Just a quick note to let you know that I do have a query in to the engineers to find out the potential impact to 22640 Rockland Ave. from the latest alternative being recommended for your area. Those alternatives have been adjusted since the summer workshops. Will let you know what I hear back. Mary Brooks</p>
3/22/2007	10:08 AM	<p>Angela Gardner called 352-383-8139 and said she thought there was supposed to be a meeting in April about the Sorrento bypass and she didn't want to miss it? PIO noted</p>

originally were looking at March for hearings, but it's taken longer than expected to work through issues and get through all of these meetings with city, county and state agencies. PIO asked if she was on the mailing list? She said she and her husband went to the meeting at Lake Receptions and filed out the form that they hadn't receive anything in the mail. PIO asked for her address to be sure she gets the next update: P.O. Box 1133 , Mt Dora, 32756. PIO noted at this rate we're looking at June-July at the earliest for the hearings, and once we schedule those she will be sure to get the project update when that goes out. She asked so once they do the meetings and say this is what's going to happen, is the next meeting scheduled, is it that this is where you are and you want more input, or is it this is what's going to happen? PIO noted at the hearings we will bring forward preferred alternative based on the input from local and state agencies, engineering analysis, and impact assessments and seek further input from the public. PIO gave examples of OC Commission and City of Apopka having voted on their preferences in particular areas. Still working through that process. She said the part I'm concerned are SR 46, under Sorrento there's IC then there's a or b choice to go to the west, that's where my concern is primarily, systems IC to connect up to 46, there 's a pond back on piece of property that A or B goes one way around the pond , Rockland avenue, 22640 Rockland Avenue, choice B went directly through middle and A was about 1,000 feet to the left. If someone has 5 acres, and beltway is proposed to take or go through part of it a corner, would they just take what they need or take the whole thing? PIO noted we only take what we need for transportation purposes, do a lot of partial takes. PIO noted however there are some homeowners who don't want the road in their back yard or near their house and asked for all of their property to be purchased; noted that's reviewed and negotiated on a case by case basis. [gardenera@helenachemical.com](mailto:gardenera@helenachemical.com) PIO said I'd look up that property and get back to her.

	Sent: Thursday, October 04, 2007 3:57 PM
	To: 'Chuck Giambrone'
	Subject: SR 429 - Wekiva Parkway PD&E Study - Update
	Chuck,
	We are still in the Project Development and Environment (PD&E) Study for the Wekiva Parkway, though we're nearing the finish. We had hoped to be ready for formal public

hearings on the recommended preferred alignments and interchange locations in October, but that has been pushed to January 2008. We hope to subsequently gain agency approvals and finish the study in summer 2008.

From there the project typically would go into final design, then right of way acquisition and then construction. However, as you're probably aware, this project is not fully funded, so the scheduling of the subsequent phases is tentative at best.

The Expressway Authority, which is doing the Orange County portion, has the funding to proceed to final design, and to begin some property acquisition. Construction, if the rest of the funding becomes available, could begin in Orange County in 5-10 years. The Florida Department of Transportation, which is doing the Lake and Seminole portions, does not have money programmed for design, so outside estimates are that it could be 10-15 years at current funding levels for those sections to begin construction. Obviously if federal or other funding becomes available, that schedule would change.

I hope this helps. Please feel free to email or call with other questions.

Mary Brooks

Gordon,

You can also reach the maps by logging onto the Expressway Authority website at [www.oocaa.com](http://www.oocaa.com) or [www.expresswayauthority.com](http://www.expresswayauthority.com), and clicking on the "corporate site" button on the left side of the entry page. That takes you to the home page, where you will see a "Construction Update" headline with text underneath. The first graph of text has a highlighted text link for "Western Connectors" - click on that highlighted link, and that takes you to the Wekiva Parkway page.

At the top of the Wekiva Parkway page you will see several text links. The first is for a recent PowerPoint presentation that shows our recommendations for alignment and interchange locations. This presentation includes the latest maps, but you can't zoom in and out on them.

The second link takes you to the exhibits from the last public workshops. You can zoom in and out on these maps. I'm awaiting the updated versions of these map PDF's that folks also will be able to zoom in and out on.

I hope that helps.

Mary Brooks

Subject: web updated maps

Dear Ms.Brooks,

I tried the following link and it will not open without a log in id,  
can you help based on letter on Wekiva Parkway status update.

Paul Gren

Regarding

PIO returned call to Paul Gren and let him know study status, funding constraints and timeframe. He said looking at projected paths through there no matter how you cut it it's coming through there. He said given that the north side of 46 seems to be less encumbered by HOA's and developed parcels, there's a lot more undeveloped land. My two properties are completely surrounded by public land at this point. We're getting ready to put a single home on each of the two parcels. We wanted to have houses up there within 18 months, but wife and I talked about it last night. Theses are two fairly sizeable portions of land, 4 and 6 acres. By the time we put the house on, will go from \$850,000 a piece to closer to \$5 million. We realize the EA coming through there and all of the sudden those properties are going to ... We don't want to get into situation where I'm sitting on property with a market value of close to \$5 million and then get into a long drawn out drama to recoup my money. It's easier to do something now. PIO reiterated several times that we can't buy property until the alignment is approved and study complete, and even then FDOT does not have the full funding for this project, so that will greatly affect the timeline. PIO noted I'd pass on to the FDOT project manager that you're interested in discussing advance acquisition, but want to make sure he's aware of funding constraints and that we havd to go through the process. PIO asked if he was on the project mailing list? He said no, just been recently looking into this. He's not on the mailing list: 3048 Alatka(cq) Crt., Longwood, FL 32779 and email paulgren201@aol.comno phyiscal addresses, they're A-1 lakefront parcels immediately adjacnet to SR 46 right next to wekiva river conservaton area, parcel 23-19-29-300-0030-0000 & 22-19-29-300-002B-0000

3/20/2007

1:54 PM

Paul Gren 407-466-5040 MSG I have two parcels immediately adjacent to SR 46 fronting on Yankee lake, right next to the Wekiva river protection area, conservation area in SC, that I was interested in knowing if FDOT would be interested in buying. I'm getting ready to put houses on each of the two lots, but aware extension would go through front of these properties which would subject them in next few years to having to be purchased out. So Piroor to installation and increase in value of the property that time might be right for FDOT to look at acquriign them. Thanks I will look for your call.

Richard Halblieb

Regarding

Richard Halbleib called Are they ever going to finish the bypass? PIO noted we're building the 414 now, will open in summer 2009. PIO asked or was he talking about the Wekiva Parkway? He said both. He said they need to get this thing built. Can't they invoke the right of way? PIO noted yes, we do eminent domain on these projects, but we try to negotiate first with the property owners because it cheaper than going to court. He said we went to Disney and I didn't realize you could go all the way to I-4 now. It's so much nicer. We need that up here, to be able to get to I-4 so I don't have to go through Longwood. We need to spend the money, we need the roads. PIO noted where we were with the Wekiva Parkway study, formal public hearings in

January-February, but still years from construction. PIO noted it's an expensive project, funding is an issue. Last estimate was \$1.7 billion. He said we're spending a billion dollars for venues, and they should be spending it on this. We need the roads. I live in Apopka, my wife works in Maitland so that's (SR 414 extension) is going to help her a lot. PIO asked if he'd like to be on the mailing list for these projects? He said yes, he lives at 452 Spreading Oak Cir., Apopka FL 32712 ldrhalbleib@embarqmail.com <mailto:ldrhalbleib@embarqmail.com> --340 p.m.

		From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, July 05, 2007 11 49 AMTo: 'Csandrawho@wmconnect.com'Subject: RE: July 20th Wekiva Pkwy meetingC'Sandra,I saw the Orange County ad in the paper also. Under the 2004 Wekiva Parkway & Protection Act, in addition to the requirements that have to be met for building a major roadway in this area, the various municipalities also had to make changes to their rules and regulations regarding land use, water and stormwater treatment and a host of other items as per the legislation. The OC Commissioners have already voted on the recommendation for the Wekiva Parkway local access interchange to be at Kelly Park Road that was pretty much what we needed from them to continue moving forward with the PD&E Study in that area. I do not know if they will mention that or other project info at

the July 20 meeting. We have not started advanced right of way acquisition yet, but are awaiting approval to begin that process from the FHWA. So it is unlikely that any private attorneys would be paid by the Expressway Authority at this time. Mary Brooks

Good morning Mary, You haven't heard from me in a while-C'Sandra Hall parcel#24-20-27-0000-00095. I would like to know if the upcoming July 20th meeting of the Orange County Comprehensive Policy plan concerns our property and the other owners around us? I also would like to know how I find out if our lawyer is getting paid by the expressway authority for his services as he has not done one thing for the 6 owners out here who have contracted with him. We have to tell him if there is anything going on out here and we never receive any updates. Is there any way we could get parcel payments started so we could start looking for another place to live? Just asking never hurts to ask. Thanks Mary and have a great day hope to hear from you soon  
C'Sandra Hall -3715 Hideaway rd Apopka off Plymouth Sorrento and Ponkan.

5/3/2007 9:16 AM \_\_\_\_From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, May 03, 2007 9:16 AM To: 'Csandrawho@wmconnect.com' Subject: RE: WEKIVA PARKWAY STUDY  
C'sandra, I understand your frustration with the complexities and time involved in trying to develop a major transportation improvement such as the 25-mile Wekiva Parkway. Please keep in mind that this Project Development and Environment (PD&E) Study is not solely an Expressway Authority project, but it is being done jointly by OCEA and the Florida Department of Transportation. The FDOT actually has the lion's share of this project (Lake and Seminole counties). You're correct. We originally thought we'd be ready to have a formal public hearing on recommended alternatives in January or February. However, a project of this magnitude generates a litany of issues that have to be worked through, including trying to address the input and adjustments requested by the hundreds of homeowners along the corridor. We continue meeting with HOA's, churches and other community stakeholders who face potential direct impacts from this project. We also are continuing to meet with local government and state agency officials to get their input and direction on recommendations for alignment alternatives. It takes time to work into the schedules of all of these various officials and agencies. For example, we got some direction from the City of Apopka in February and the OC Board of Commissioners in March. We are meeting with the SC Expressway Authority on May 8 at 4 p.m. in Sanford, the Mount Dora City Council on May 15 at 7 p.m., and have a meeting with the Lake County Board of Commissioners in June, to name a few. We now hope that we will have recommendations that are ready to bring forward for formal public hearings in September or October, with the study hopefully concluding by end of 2007 or early 2008 with an approved alignment. I hope soon to have some updated maps to post on the website and to send out some information to property owners and others in the coming weeks. In the meantime you're always welcome to call or email with specific questions. Mary Brooks

5/3/2007 8:54 AM \_\_\_\_From: Csandrawho@wmconnect.com [mailto:Csandrawho@wmconnect.com] Sent: Thursday, May 03, 2007 8:54 AM To: mbrookssr414@cfl.rr.com Subject: WEKIVA PARKWAY STUDY  
Mary The expressway authority is unbelievable. Completion dates for the study 8/06, oh no let's drag it out some more. Then Jan-Feb 07, oh no for sure June or July 07. Now Sept, Oct 07 or maybe even 08. This has been going on for 6 years, talk about living on the edge, we are it's so unfair what you do to property owners. C'Sandra Hall

To: Rolltide1952@wmconnect.com Subject: SR 429-Wekiva Parkway PD&E Study -  
acquisition questionC'Sandra, The OOCEA would purchase any property needed for this  
project, or any other project, directly, not through any sort of limited partnership. It  
sounds like developer activity to me. We have only purchased in relation to the project  
corridor a couple of parcels in OC in conjunction with the county's GreenPlace program for  
conservation; I believe they were the Strite and Fazio properties. The Expressway Authority  
can now begin advance acquisition in Orange County along the project corridor within the  
City limits of Apopka as per the City's Feb. 7 vote to approve that section of the corridor.  
That section was basically set because it has to tie into the planned SR 414/429 Maitland  
Boulevard Extension. Otherwise, I have no information about this entity that you're  
referring to, I'm afraid. Mary Brooks

Subject: Turnpike portions of SR 417  
Found this on the Turnpike website [http://www.floridasturnpike.com/about\\_system.cfm#4](http://www.floridasturnpike.com/about_system.cfm#4)  
<[http://www.floridasturnpike.com/about\\_system.cfm](http://www.floridasturnpike.com/about_system.cfm)> :  
Toll Road 417 is a 55-mile, tolled, limited-access transportation corridor serving Osceola,  
Orange and Seminole Counties, and is a joint project of the Orlando-Orange County  
Expressway Authority (OOCEA) and Florida's Turnpike Enterprise. Florida's Turnpike  
operates the northern 17 miles of Toll 417 as the Seminole Expressway, beginning at the  
Seminole County line and extending north to its terminus at Interstate 4 in Sanford. The

OOCEA operates the middle section of Toll 417, from Milepost 6 in Orange County to Milepost 37.5 at the Seminole County line. This section is known as the Central Florida GreeneWay. The Turnpike also operates the southern end of Toll 417, from Milepost 1 at Interstate 4 to Milepost 6 in Orange County. This section of Toll 417 is known as the Southern Connector Extension, but it also referred to as the southern end of the Central Florida GreeneWay. Please call or email if you need additional info...Mary Brooks

Subject: Orlando Sentinel questions about beltway lengths, Wekiva Parkway connection  
Importance: High  
Jay,  
OOCEA built and operates 33 miles of SR 417 from the Orange-Seminole County line south to International Drive near SR 535. I don't know how long the Turnpike's portion of that roadway is...  
I did find that the SR 429 from US 441 to Interstate 4 in Osceola County (which includes the Turnpike's portion) is about 32 miles.  
Attached is the SR 414 map I referred to. The dotted portion is phase 2 of the extension and ends in the area of US 441 and Plymouth Sorrento Road where the Wekiva Parkway will pick up.  
Let me know if you need additional info.  
Mary Brooks

11/16/2007 11:30 AM

Jay Hamburg called in during weekly OOCEA PIO meeting with questions about the Wekiva Parkway. PIO and Lindsay discussed with him on the speaker phone. Among other things, he asked for length of existing beltway, which I said I would provide to him. He also asked for a map of the SR 414 showing where that would connect to the Wekiva Parkway. PIO to provide also. Most of the discussion was regarding Mayor Crotty's latest statement that he would consider a toll increase for the Wekiva Parkway, and that he wanted to get all the stakeholder together to figure out how to get it done since it is the OOCEA's top priority.

10/2/2007 2:21 PM

Jay/Orlando Sentinel called back, said story pushed for this coming weekend now. He said editors want to know exactly which part of CR 46A being abandoned? PIO noted basically portion in forest, though there is a gate to the forest that we still have to provide access to, and there are properties on the east end where 46A meets SR 46 that have to have access, so road would remain there.  
He asked what would the road be called at that point, after the realignment? PIO noted haven't heard any discussion about that, but it will be a county road so that's really up to the county to decide.  
He asked a round about question something to the effect of, if once we realign 46A and four lane it, is it expected that more traffic would use it? PIO noted if he's asking if 46A will be used to get to the Wekiva Parkway, then the answer is yes. PIO said if he's asking is more traffic expected to use CR 46A in the future, that's more a factor what happens on SR 44 and Eustis and other areas that people come down from to get to SR 46 and I-4. He said that's a good point, that there are other pressures at work on that portion of the road also, not just four-laning.  
PIO also noted there are traffic maps on the website for the various scenarios, walked him through those links but he was having trouble with his system (my system pulled the maps and traffic models up no problem). He noted I'd gotten him the traffic stats

previously anyway, so he thinks he's okay there.

He noted the LC BCC definitely has an item on the agenda of their next meeting, and it will likely be heavily attended. He also noted they're doing the meeting on Oct. 22 at the chamber and FDOT et al were supposed to be invited. PIO noted I mentioned it at our last meeting, but no one seemed to have heard about it, though I don't know who they invited. He said if there are any other questions, he will give me abuzz, but thinks we're set for now.

9/28/2007	5:03 PM	<p>Jay/Sentinel called and asked if the design year speed meant that's when it will be built? PIO said no, that's when it's expected to be at or near peak capacity. PIO reiterated tentative overall schedule based on funding constraints (5-10 years for OOCEA; 10-15 for FDOT)</p> <p>He asked if FDOT was doing preliminary work and OOCEA was doing construction of whole thing? PIO said no, we're doing the study jointly, then OOCEA design and build OC portion FDOT the lake and Seminole portions. He said so FDOT would build 46A? PIO said that's correct.</p> <p>He said he confirmed there is another LC commission meeting since haven't sent letter to FDOT, will review draft letter and accept public comment on Oct. 23. Basically since some people complained there wasn't enough notice of the previous meeting.</p> <p>He said he thinks that's all the questions, but editor may have something later on.</p>
9/28/2007	2:22 PM	<p>From: Hamburg, Jay [mailto:JHamburg@orlandosentinel.com] Sent: Friday, September 28, 2007 2:22 PM To: Mary Brooks Subject: RE: SR 429 - Wekiva Parkway PD&amp;E Study - Schedule</p> <p>Thanks, Mary. Please call or email with other questions or concerns.  
Mary Brooks

9/26/2007 3:00 PM PIO met extensively with Jay, recapped latest info from progress meeting on 46A alternative. Noted alternative recommended will be 100' east of property line to allow buffering, ROW estimates he has still valid; they're not doing new ones; won't know what Scott Taylor would be paid until the acquisition is negotiated; still waiting on updated maps but one he has is still representative; road will be built for ultimate 4 lanes, but whether 2 or 4 lanes to start will depend on what's out there and traffic at the time. Re: speed, will depend on configuration and what's out there at the time, and could possibly be 55 mph. LC BCC on Aug. 28 supported this alternative and said plan to send a letter to FDOT to that effect.  
Jay said HCE complained they were not given enough notice that LC BCC would be making a decision at this meeting. HCE planning a meeting at or with the East Lake Chamber either Oct. 22 or 23 and have invited FDOT, EA and local elected officials. He said whatever date they're meeting (he wasn't sure) the next day they planned go to the LC BCC. Don't know if they're an agenda item or just plan to speak during public comment. We again went over map and why various alternatives were ruled out. Jay said the residents claim we were not thinking about realigning CR 46A until Scott Taylor offered the west side of his land. PIO noted the realignment of CR 46A was in the WPPA, idea was to remove conflicts between traffic and animals and open up the wildlife corridor in the state forest. He asked how long that had been discussed? PIO noted don't know when

idea originally came up, but know it was among the recommendations of the WRBCC and the Wekiva Basin Task Force, did he have those reports? He said he believe he did somewhere. So that's what, at least five years?

Jay said it's interesting that the both the HCE folks and Scott Taylor claim they're environmentalists, noted Scott Taylor has been active in that area for some time. PIO noted interesting HCE as environmentalists when they wanted to build the road through the state forest. He said their reasoning for that was because they thought then it wouldn't be developed around there. He noted they said with alternative we have now, it could be developed. He said Scott Taylor has said he has no plans to develop, and indeed has been in that location a long time.

Scott Taylor claims the HCE is getting a free buffer while he will have to build one on his side.

PIO noted this again is just one example of the conflicting interests that we have on a project of this magnitude. PIO noted the challenge is that homeowners such as HCE feel they have an impact with a road being built nearby, but legally the actual impact is to the property owner the road is built on. That's what comes up in court and we have to have justification for the impact. Otherwise state dollars wind up being used for expensive legal battles. Especially when the property owner is willing to work with us if the road goes in a certain location.

We again went over schedule and funding challenges.

We also discussed configuration of SR 46 coming out of Mt. Dora, four-lane divided highway. Also noted where it will tie into the Wekiva Parkway (east of Camp Challenge). Discussed that details worked out in design and still some room for tweaking or adjusting. He asked if the city or anyone else had to weigh in on CR 46A? PIO noted pretty much Lake County since they will be taking over the road; FDOT wanted to build consensus with them on the alternative, but FDOT has final call. PIO noted Mt. Dora's main issue was 441-46 IC, which we coordinated with them closely on.

PIO noted updated maps to be reviewed by OOCEA board hopefully in October and then can put on the website. Jay asked if the schedule was on the website? PIO noted it was but thinks it needs to be updated.

9/26/2007	3:18 PM	<p>PIO called Jay Hamburg/Orlando Sentinel, left detailed MSG updating him on CR 46A, alternative recommended will be 100' east of property line to allow buffering, ROW estimates he has still valid; they're not doing new ones; won't know what Scott Taylor would be paid until the acquisition is negotiated; still waiting on updated maps but one he has is still representative; road will be built for ultimate 4 lanes, but whether 2 or 4 lanes to start will depend on what's out there and traffic at the time; LC BCC on Aug. 28 supported this alternative and said plan to send a letter to FDOT to that effect. PIO noted I'm heading his way as requested.</p>
9/25/2007	4:17 PM	<p>PIO returned call to Jay Hamburg/Orlando Sentinel, discussed last conversations I had about 46A, between 100-200 feet east of HCE property line, but noted I have progress meeting tomorrow afternoon and can get him more updated info. He said the LC Commission is meeting on this tomorrow, are they making the final decision or FDOT? PIO noted this is FDOT's project in Lake and Seminole, but certainly they want local buy-in from cities, counties and other stakeholders. PIO also noted this will be a county road when we're done, so they've had opinions on where it should be, etc. PIO noted as many times as we've met with county staff and commissioners, received their input and made adjustments, there shouldn't be any surprises at this point. But in the end it's FDOT's call. What the current thoughts are, four lanes, 55 mph? PIO noted believe it was to be four lanes, but will confirm, have been on vacation and away from project details for a bit. Current cost estimate for 46A? Overall project? PIO to check at the meeting.</p>

Potential timeline for 46A? PIO noted same as timeline for overall project, study to finish summer 2008, agency limited funding to start design, after that schedule will depend on funding availability, looking at different options, federal funding, could it be P3? Could turnpike take another look? All those questions still have to be answered.

Would FDOT pay for Scott Taylor land? PIO noted yes, FDOT developing project in Lake and Seminole counties.

46 at Plymouth, will that be 4 lanes? PIO noted four lane divided highway coming out of mount Dora to where CR 46A will tie in, and then it starts to go south to systems interchange. PIO noted he should be able to see how the ROW line widens at that point to indicate elevated roadway.

Status new maps?

Estimates on Scott Taylor's land? Any change in ROW costs for alternatives? PIO noted that info was on the spreadsheet we provided to him previously; he checked and it was there. Wanted to know number for Taylor's land. PIO noted that would have depended on the various alternatives, more expensive to take his house than to have it at edge of his property. He said HCE said there's no info on that, would have been difficult to tell. PIO to get info.

PIO to call him after progress meeting tomorrow. He also will be at the board meeting.

--439 p.m.

9/25/2007 2:26 PM

Jay Hamburg/Orlando Sentinel 407-420-5673 I have a couple questions, just trying to catch up on something. I have looked into and talked to you guys about the Wekiva Parkway 46a fight, shall we say ongoing debate with HCE homeowners and Scott Taylor and where the routes are going to go. Understand it's down to just two options. My bosses interested in doing catch-up on that and lay out where things stand, especially since down to just one or two alternatives. I wanted to make sure my understanding of that was correct and see what is new, what is left to happen before final decisions might be made. So if you can give me a shout.

Also the current maps of the alternatives that are left on the table, or maybe it's the same map. I Wanted o see what any updated documents look like

This is not a story for Wed., but if you have a minute just to touch base so I can get started, figure out how much else I have to catch up with I'd appreciate it.

6/29/2007 10:05 AM

PIO met with Steve Homan/FDOT D5 PIO and Jay Hamburg/Orlando Sentinel, gave map and assessment handouts, went over CR 46A alternatives and related issues and costs to each. Discussed at length the competing interests in this location with HCE and Scott Taylor, but also throughout the corridor. Discussed history between the HCE and Taylor he originally opposed development, court order involved, etc.) Discussed Taylor's willingness to sell property if kept on west end. Helped Jay understand impact assessment table; Steve noted it did not include geotech costs, so add about 30% to that. Discussed intent of the WPPA and Lake County direction to keep the realignment to the west of property, with maybe a 100-150' buffer, and that it will be a county road. Steve noted the residents are opposed to future development, but their community was developed in that area only a short time ago. Discussed that FDOT has to show need to take the home or move alternative east and leave a remnant, not a good position to take in court. Jay asked if we placed the viable alternative before or after Scott Taylor came forward as a willing seller? PIO said would have to find out about that, but that would have been a likely location to check an alternative in any case. PIO to get the geo tech-weighted costs for Hamburg, who said the story probably run for a couple of weeks. He's off next week Discussed resident noise concerns. PIO pointed out on table 14 properties could see minimal noise increase. Steve went over noise wall criteria, noted cost-benefit analysis has gone up from \$35,000 per benefited property to \$42,000, how close and densely packed

homes have to be to qualify, and these people won't with 5 acre lots. We noted that sounds goes up and over so wall doesn't help if you're farther than 200-300' away. Jay said these folks don't want a sound wall. Steve said with space in between could maybe do berm as well as vegetation. Discussion of trying to be sensitive to community impacts, difference in direct vs. indirect impacts. PIO noted improved access will be benefit for this community, something they seem to overlook. Steve said this is a good example of someone developing a property and then wanting to raise the drawbridge so no one else can develop. We discussed other areas on project with competing interests: Mt Dora not happy about 441-46 IC alternative, Capri Cove-Tall Trees issues with SR 417 connection to I-4, east Lake County local access interchanges, etc. PIO noted you can't build a transportation improvement of this nature in a growing area with affecting someone, and you can't make everyone happy. Do our best to minimize impacts and balance needs for protecting environment and meeting transportation need. Jay asked what we tell these people concerned about the multi-million dollar homes? PIO noted explain the process, esp. the impact assessments, the WPPA and other constraints we're under, meet with them multiple times to hear their input, provide new info and do what we can to address that. Beyond that, some people will get it, and some people will continue to take an emotional stance. PIO pointed out retention ponds, noted those were just possible locations ponds could go for the diff alternatives, won't need that many. Jay asked if ponds can be an issue? Steve discussed that people get very upset when their house was shielded by trees and all of a sudden an area is cleared for a pond and they can see and hear the road. Can also have issue with fact pond needs to be fenced. He noted they often plant some trees around the ponds, but can't replace the buffering of dense vegetation. Reiterated ultimate benefit, and positive impact to property values. Noted we find it interesting that these folks, like some others, don't want it even close to them, yet they are willing to have it dropped right on top of someone else's house. We emphasized we're talking about an at-grade, two-lane county road with enough ROW to widen to four lanes if needed.--11 a.m.

6/26/2007	5:59 PM	PIO called back Jay/Sentinel to discuss once back at the office (phone on charger). He asked about Thursday or Friday, otherwise could push it to next week or the week after. PIO said I'd check with Steve on Thursday or Friday and get back to him.
6/26/2007	5:14 PM	Jay/Sentinel MSG don't know what happened, let's see if we can regroup, something has popped up tomorrow afternoon, meeting with our team and editors, charlotte. Let's see what we can do
6/26/2007	5:09 PM	PIO called Jay/Sentinel, noted Steve Homan and I could do interview tomorrow at 2 p.m. Jay said he had a team meeting with editors scheduled in that timeframe now and can't do that. PIO asked when could do it, but my battery died.
6/22/2007	4:30 PM	Jay/Orlando Sentinel called saying he'd met with the HCE folks and also Scott Taylor and wanted to get the particulars on the different alternatives being looked at for CR 46A, advantages and disadvantages of each, go over maps. He said HCE had given him a copy of a map with some different alternatives on it. PIO said would need to get the board pulled, maybe could get together on Wed. afternoon. He noted some resident issues. PIO noted we'd met with them a couple of times, went back and looked at the alternatives they suggested, a number of which don't work for various reasons. PIO noted issue of going through park goes against intention of the WPPA, which was to protect the wildlife corridor in the area, that's why road is being realigned. Noted alternative in KARST area would have to be mostly bridged, which is more expensive. He asked if we had cost info. PIO said believe maybe something very preliminary but would have to check. PIO noted this is just one example of competing interests that we face throughout this 25 mile corridor. If you shift an alignment to try to appease one group, it affects someone else

over here. PIO noted we are not directly impacting or taking any HCE property. PIO noted the level of emotion from HCE seems to indicate they expected the worst, an elevated highway on their doorstep. PIO noted we'd be only talking about a four lane, at grade road. PIO noted understand there is nothing there now, but there's also nothing that precludes the property owner from developing that property next to HCE.

Apparently the sign is located on Plymouth Sorrento Road just south of OBT. It is a very suspicious looking sign. Thanks, Brian	
10/25/2007	8:42 AM	From: blbfoliage@msn.com [mailto:blbfoliage@msn.com] Sent: Thursday, October 25, 2007 8:42 AM To: Mary Brooks Subject: Re: SR 429 - Wekiva Parkway PD&E Study - Heritage Homes PD query	

Thanks

10/25/2007 8:37 AM Deborah/PBS&J ROW called and said she checked on the Stanton Ridge sign and it says Future Home of Orlando Expressway Authority and the web address. She said Stanton Ridge approached the OOCEA about selling, but they are not in serious negotiations. Said the OOCEA has not really given authorization for full fledged pursuit of properties yet. So there have been some approaches from owners and some fledgling discussions but that's it at this point. She said Heritage Homes also approached, don't know if that property will be pursued or not. Some issue with legal going on there. She reconfirmed that we did not put up the sign, the owners did.

10/24/2007 5:39 PM From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]

Subject: SR 429 - Wekiva Parkway PD&E Study - Heritage Homes PD query  
Paul,  
I confirmed with the Right of Way acquisition folks for the OOCEA that we are not yet negotiating with Heritage Homes. And they reconfirmed we do not own, nor are we under contract, with Stanton Ridge. They're going to check on why that sign is posted. Hope that helps!  
Mary Brooks

10/24/2007 2:39 PM PIO called back Paul Hampton, and relayed info from ROW. He said there is a sign out front of Stanton Ridge saying "property of OOCEA." PIO reiterated was told we're in negotiations, don't actually own it. He reiterated what the sign out front says. He asked if the "Heritage Homes PD" meant they had been paid, or that it was just a planned development? PIO noted it's for "planned development. He asked if we were in negotiations with Heritage Homes? PIO said I'd have to check and find out. He said he sold that property to the developer and the guys there were supposed to give me back my house and they haven't done so. We go to court the 30th, and if they're in negotiations with OOCEA, then someone is not negotiating with us in good faith. I know you guys don't want to get in the middle of my nightmare. PIO said I'd look into it, can I send him an email? He said email him at blbfoliage@msn.com <mailto:blbfoliage@msn.com>. He appreciates the assistance.

10/24/2007 1:37 PM Paul Hampton called and left MSG 407-383-7828 I've been in touch with you in the past about the 429. I'm trying to see when you might be doing land acquisition, I know right behind me you bought some property from Cambridge and I'm just north of there. If you would return my call please.

Sent: Thursday, August 09, 2007 9:15 AM  
To: 'titeworkmail@aol.com'  
Subject: FW: SR 429 - Wekiva Parkway PD&E Study - 100 S. Center St.  
Patty,  
I have reviewed the location of 100 S. Center St., which the SC Property Appraiser shows at the southwest corner of Forest Avenue and Center Road. If this is the correct location, as noted in the figure below, there would be no direct impact to this property from this

proposed project. This figure can also be seen in the PowerPoint posted on the Expressway Authority website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> .

There would need to be improvements to SR 46, Center Road, Forest Avenue and Wayside Drive in this area to address access and other issues. There would not, under this concept, be a taking of this property.

Please bear in mind that this project is only in the Project Development and Environment PD&E) Study phase, so all concepts remain subject to change until we have an approved alignment. The recent mailing said we were looking to do formal public hearings in October, however, that schedule has now been pushed back to January, FYI.

We hope to conclude the PD&E Study in summer 2008 with approved alignment and interchange locations. Please understand that this project is not funded, so the scheduling of final design, right of way acquisition and construction are tentative at best, and highly subject to funding availability.

I hope this addresses your question. Please feel free to email or call with other questions or concerns.

PIO researched Patty Hartwig property query 407-782-3208 100 S. Center Road. They're west of Orange Boulevard off SR 46. [titeworkmail@aol.com](mailto:titeworkmail@aol.com) <<mailto:titeworkmail@aol.com>> SCPA shows property southwest corner of Forest Avenue and Center Road. No direct impact

8/7/2007	11:10 AM	<p>PIO returned Patty Hartwig 407-782-3208 call. She said I believe you spoke to Sonny, which I said was true, going to get back to her this afternoon with some info. She said they pulled up the map, but can't see clearly. They live on the corner of Center and Forest 100 S. Center Road. She said their family owns all of Forest except for one house at Wayside. Her mom has a house further down. They're west of Orange Boulevard off SR 46</p> <p>PIO said could research the property and email her info. She said send to <a href="mailto:titeworkmail@aol.com">titeworkmail@aol.com</a> &lt;<a href="mailto:titeworkmail@aol.com">mailto:titeworkmail@aol.com</a>&gt;</p> <p>She said when you pull the map up ... one map comes through several houses ... now everyone we see is fuzzy, doesn't show detail. PIO noted the PowerPoint does not have the clarity, can't zoom in. PIO noted I'm hoping to get updated PDF's any day now.</p> <p>She said they have had five different people recently trying to buy my property, so I've been wondering what's going on. I love where I live. I don't want to have to move but if I have to, I understand how these things go. PIO noted there is tremendous amount of speculation surrounding this project, people trying to buy up land so they can charge top dollar when road comes through. PIO said will research her location and get back to her.</p> <p>She said she heard I was sick and am glad I'm better, appreciated the call back.</p>
8/6/2007	6:15 PM	<p>Patty Hartwig I left you a MSG, I also talked to Deborah Keeter and Sherry Chastain and they said if I didn't hear back from you tomorrow they'd try to see what they could do for me, but I was going to leave you a MSG. if you could give me a call back at 407-782-3208 thank you so much</p>
8/6/2007	2:41 PM	<p>Patty Hartwig/attorney McClanahan's office in Sanford 407-322-6012, 407-324-4444, c 407-782-3208 please call me back as soon as you can if it's possible</p>

Hello,  
We are hoping to finish the Wekiva Parkway Project Development & Environment Study with an approved alignment and interchange locations in spring-summer 2008. However the project is not fully funded, so the timing of the subsequent phases (final design, right of way acquisition and construction) is in flux. Best estimates are, based on FDOT's current levels of funding, that construction might not start for 10-15 years. That is heavily contingent on whether additional funding becomes available. FDOT is responsible for the Lake and Seminole county portions; the Expressway Authority for the Orange County portion.  
I hope that helps. Please feel free to call or email with other questions.

Hi Mary,  
My name is Theresa Hastings and my address is 22540 ST Rd 46., parcel #1510244 on the Lake County map  
I received your pamphlet in the mail and looked online at Alternative II on line and the corner of the road off ramp and the widening of ST RD 46 is on our property. I would appreciate a time table of events so that we can plan our lives. We do have a standard bred breeding business so we can't just move on a short notice, and any construction would be detrimental to our animal's health. Our lives are on hold as far as doing anything but maintaining our home, so please give us some information.  
Thanks  
Hunter and Theresa Hastings

Date	Time	Regarding
7/5/2007	10:18 AM	PIO returned call to Tom Heimke, who asked if they'd decided where it's going to go? PIO said we have some recommendations, but nothing final, working to finalize preferred alternative, which has to go before formal public hearing and agency approvals, probably end of this year or early next year. PIO asked if there was an email address for him? He said no. PIO asked was there specific area he was interested in, could relay some recommendation info? he said he has property off 46 west of Sorrento, in between Round Lake Road, its 22821 Rockland Have. Sorrento 32776. he said they said it was going to

miss my property, but wanted to know the latest. PIO said expecting to get new based any day now based on local government and state agency input, but would look up his property in the meantime.

7/5/2007 8:08 AM Tom Hiemke 954-610-4843 I'm looking for latest alignment of 429, or mail to me 1350 SE 3rd Ave., Unit 101, Dania Beach, FL 33004.

Contact		Kevin Hines
Date	Time	Regarding
10/25/2007	3:09 PM	Kevin Hines called back, thanked me for calling him back. He said he lives on 46A near Seminole state forest. Do you know where the bear bridge is? The second one? That fence line is my fence line, right across from entrance... thaw website? He said he went on the website and didn't really see what we were closing. PIO walked him through the web links, PowerPoint and maps from last workshop. He said oh, okay I see my property. He asked how will they end that, will we be able to turn around? PIO said typically they end a road like that in cul de sacs. He said he's excited, said you know that's a bad cut through. He said he knows the HCE people are not happy but ... PIO noted we met with them several times, and looked at additional alternatives at their suggestions, but they would have gone through the forest, or Mr. Taylor's home, or otherwise went against the legislation or other criteria. PIO noted they're fearing the worst, but after years of doing this the reality is seldom as bad as people think, and we are not looking at an elevated parkway here, but a four lane road with vegetative buffer. He said people fear change. He said thanks very much for the info, you've been a big help. Kevin.hines@siemens.com <mailto:Kevin.hines@siemens.com> he said he's the last house so he's happy, walked him

10/25/2007 1:38 PM PIO returned call to Kevin Hines 407-739-4287, left MSG with contact info and noted he can call or email me today, but heading on vacation tomorrow for a week, also noted there is information on recommendations including the CR 46A realignment on the OOCEA website.

10/25/2007 9:37 AM Kevin Hines 407-739-4287 called and left MSG Live on 46a and saw the article in the paper yesterday. It was kind of confusing, want to ask a couple of questions about what will happen on 46a if you have the answers. I appreciate it. Thanks.

Subject: Wekiva Parkway Information  
Mike,  
Attached you will find the Wekiva Parkway map file, The 2004 Wekiva Basin Protection Act presentation which includes information about the legislation and a map of FY08 - FY 12 Major Projects. The Authority's system is down and they are unable to access the internet and email. Paul Schatz from the Authority will email the Toll Rate Comparison first thing tomorrow. I will send you the aforementioned in separate emails as the files are large. Should you have any questions please contact Mary Brooks at 407-702-8375 or email mbrooksss414@cfl.rr.com.  
Deana Leffler for Mary Brooks

12/12/2007 2:20 PM Mike Holfeld/WKMG arrived late for interview, didn't really know what was going on, didn't ask many questions we mostly fed him info. mholfeld@wkmg.com <mailto:mholfeld@wkmg.com> PIO to email overall alignment map, typical section, toll agency comparison, WPPA.

6/6/2007	1:39 PM	PIO called back Bill Howell 850-245-2770, left MSG noting workshop maps are on the website, gave address and text links. PIO noted maps being updated so not doing shape files, hope to have new maps in July. Gave my email address and cell number in case he has other questions.
6/5/2007	4:30 PM	Bill Howell MSG I was at the meeting June 1 last Friday with the Wekiva task force thing. I wanted to get the shape files for the EA alignment along the northern part that goes through Wekiva state park or whatever. The ones I'm getting off the PowerPoint don't have good enough resolution; we can't transfer those over to our resource maps. If you could call me back it's 850-245-2770 I'd really appreciate it.

3/19/2007	11:36 AM	PIO returned call to Nancy Husselman?/Charles Clayton Company 407-622-0000re: most recent decision on what the 429 corridor will be from R 46 in Sanford to Sorrento Mt Plymouth and from 441 in mouth Dora to Sorrento Mr. Clayton wanted to know if they've come up , from mount Dora to Plymouth Sorrento and where the two come together. PIO noted we had some preliminary recommendations in some areas, starting to get some approvals from city of Apopka and OC Commission, but still working through meetings and input from city, county and state officials. PIO noted we had hoped to have info together to do public hearings in June, but quite honestly with continuing through the approval process it will probably be later than that. She said if nothing is final she will let him know that and that should help for now. PIO noted we're working to post some preliminary info from the study on the website, but again, won't have final alignment on there for some time, working to get some updated maps soon though. She said okay and thanks for getting back to me.	
3/14/2007	2:19 PM	Nancy Husselman / Charles Clayton Company MSG we received your notice about corridor clearing for first section of 414. Mr. Clayton would like to know most recent decision on what the 429 corridor will be from R 46 in Sanford to Sorrento Mt Plymouth and from 441 in mouth Dora to Sorrento. Any maps of the latest corridor that has been approved there please give me a call.

7/31/2007	3:12 PM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, July 31, 2007 3:12 PM To: 'Len94508' Subject: SR 429-Wekiva Parkway PD&E Study - Hojin St. Property & CR 46A Alternative Leonard, Thanks for the quick response. I looked up the property in question with alternate key 3771985. This property shows up as four parcels north of SR 46 on the west side of Hojin St. The proposed CR 46A Alternative and a potential pond would affect properties on the east side of Hojin St. There would be no direct impacts to the west side properties. The Wekiva Parkway Project Development and Environment Study is currently slated to conclude in spring-summer 2008 with approved alignment and interchange locations. Typically a project would go from PD&E Study to final design, and then right of way acquisition and construction. However this project is not fully funded, so that schedule is highly subject to change at this point. We are examining various funding options, but at the FDOT's current level of funding, there wouldn't be enough money for construction on the Lake and Seminole County portions of this project for 10-15 years. The CR 46A realignment is at this point proposed as a four-lane, at-grade connector road. Once built it would be turned over to the county for maintenance and any further improvements. Please bear in mind that details can change from the conceptual PD&E Study phase to the more detailed final design phase. I hope that helps. Please feel free to call or email me with other questions or concerns. Mary Brooks

Subject: SR46a alternative

Dear Ms.Brooks.

I own land on Hojin Street off SR 46 in Sorrento. I have looked at the maps on the website and it appears that a proposed road is going to be built right through Hojin Street. My question to you is, is my reading of the map correct. When will this road be built? What is the size of this road?

Thank you in advance,  
Leonard Jacobs

Contact Date 9/27/2007	Time 10:47 AM	Bryan Johnson Regarding PIO returned call to Bryan Johnson 407-648-2199 x215 Pinel & Carpenter real estate appraisers, re: question about estimated date of completion and even estimated date of start of construction of Wekiva Parkway and SR 46. PIO noted we don't have an approved alignment yet, just in the study phase and hope to finish study summer 2008. PIO noted not sure if he's aware, but there is significant funding shortfall for this project. He asked if that was because of the latest tax legislation, saw something in the paper about schools not being able to borrow more than a year out ... PIO noted this has been an issue prior to the tax cut legislation. PIO noted last estimate, probably outdated, was for \$1.7 billion for this project. PIO noted FDOT does not have that funding programmed in the next 5 or even 10 years. PIO noted at current funding levels could be 10-15 years before construction started on FDOT portions. PIO noted they are looking at different funding, federal, turnpike, etc., unless something comes through, looking a ways down the road. He asked why is that? PIO noted this project, which is just in the study phase, is competing with I-4 and host of other projects that need funding, many of which are much farther along in the planning process. PIO asked if he'd like to be on the mailing list? He said sure, send emails to bryanj@pinelcarpenter.com <mailto:bryanj@pinelcarpenter.com>. He said he doesn't want hard copies mailed to him. He lives in a condo and his box is maxed out as it is. --1055 a.m.	Pinel & Carpenter
9/26/2007	12:15 PM	Bryan Johnson MSG trying to get some info on the estimated date of completion and even estimated date of start of construction of Wekiva Parkway and SR 46 in north Orlando and Lake County. If you could contact me 407-648-2199 x215 let me know if you guys have those dates. I'd appreciate it.

To: 'CJONES266@cfl.rr.com'  
Subject: SR 429-Wekiva Parkway PD&E Study -Stoneybrook Hills  
Hello Cheryl, Not sure I follow you on this one: "Can you please tell me the date Stoneybrook Parkway was decided to run through to Round Lake Road and Ondich?" Do you mean the Wekiva Parkway? Or are you referring to a road within your subdivision? Sorry you couldn't make the meeting. Below are my notes from that evening. 6-19-07 645 p.m. PIO met Liz Caldarone/Stoneybrook Hills HOA manager. Also attending meeting where John Byrd, aide to OC Comm. Brummer and Jim Martin/OC School Board and I-4 PIO. About 22 people attended the meeting. One woman initially wanted the meeting rescheduled, noted they have a lot more residents than this, some of the key people couldn't be here and the meeting was not properly noticed. Other residents said they are here now and would like to hear what the representatives have to say, don't know if they can make another meeting. John Byrd discussed resident concerns about a public park being in their neighborhood, also about the park possibly replacing the school. John said there were no plans for a park instead of a school, but that if there were a park, it would be co-located with the school. He said however with funding being what it is, all parks are on hold until the tax cuts are figured out. Discussion about the quality of the school, parents not happy that school grades keep going down. Jim Martin said he could bring in Principal Duda to discuss her plans for improvements at the school at their next meeting. He also discussed how the state has just changed grading again to make it more difficult for school to get good grades. PIO gave overview of Wekiva Parkway, noted interchange (IC) locations, US 441/SR 46 IC alternatives and recommendation. PIO noted Mt. Dora wanted the Alt. 1 grade-separated with higher flyover. PIO noted no direct impact to their community or entrance, since our work on US 441 would stop north of the railroad bridge (they're south of the RR bridge). Someone asked about plans to widen US 441 south of 46? Jim Martin

said there was nothing in the 5-year work plan for that. It was discussed there are a lot of projects that are needed that are competing with needs on Interstate 4 and other projects (Jim Martin worked for FDOT for 12 years and currently is a public information consultant on the I-4 projects). Residents were supportive of the at-grade interchange with lower flyover and asked what they could do to emphasize that? PIO noted we are looking at public hearings in Sept.-Oct., and will have comment forms they can fill out. PIO also noted that, although they are in OC, they can still write to City of Mount Dora officials expressing their support of at-grade IC. Residents were very concerned about being able to see the flyover from their community, especially since it will be on higher ground from them. They asked why Mt. Dora supported grade separated IC? PIO noted they expressed concerns about too many traffic lights on US 441; the city wants to keep traffic moving, and about errant traffic clogging up their quaint downtown. PIO noted we thought signalized intersection would be safer for pedestrians and bicyclists. Someone asked cost difference between the two alternatives? PIO noted the grade-separated IC is about \$20 million more expensive. Several questions about timing of interchange decision and overall project, which PIO addressed. PIO also noted the SR 46 widening alternatives, and that we're recommending north widening to six lanes to avoid residential development on the south side. Noted would be an at-grade arterial. One woman took issue with six laning 46, said that will be unsafe for residents entering that road. PIO noted the roadway will have a median, sidewalks and curb and gutter, and is a common configuration throughout Central Florida, with many, many subdivisions on these types of roads. John Byrd echoed that sentiment. A gentleman asked about funding for the project, which PIO noted we are not fully funded, different options being looked at including federal funds, and schedule will be heavily reliant on funding. A gentleman asked why the OC IC was going to be at Kelly Park Road when that does not connect to US 441? PIO went over advantages and info from traffic models. He asked so is Kelly Park going to be extended or widened? PIO noted we would update the road at our IC, but it would be up to the county to do anything beyond that. John Byrd said he was not aware of any plans for Kelly Park Road. Residents repeated concerns about having a voice in the decision on the IC flyover given that they're in OC. They also asked several questions about noise and whether they'd get a noise wall. PIO explained federal criteria and cost benefit analysis, they would be too far away to warrant a wall. Jim Martin jumped in that once you're 300 feet or more away, a wall does you no good because sound just travels up and over. PIO handed out business cards and encouraged residents to call or email with questions or for updates. PIO noted we'd be sending out an update mailer soon, and will send info when the public hearings are scheduled. --8 p.m.

6/22/2007	1:55 PM	<p>From: "Cheryl Jones" &lt;CJONES266@cfl.rr.com&gt; Friday - June 22, 2007 1:55 PM</p> <p>To: "Mary Brooks" &lt;brooksm@oocea.com&gt; Subject: Stoneybrook Hills</p> <p>Attachments: Mime.822 (3294 bytes) [View] [Save As]</p> <p>Hi Mary, I am very sorry I could not attend the meeting on the 19th. I am glad it got to you. I knew you were the right person to answer my questions. Cheryl Jones</p>

2/22/2007 8:46 AM From: Mary Brooks Thursday - February 22, 2007 8:46 AM To: CJONES266@cfl.rr.com Subject: SR 429-Wekiva Parkway PD&E Study - 441 and SR 46 Cheryl, Your email below was sent to the general OOCEA email address, so I just got it yesterday. Please send any further email queries to my email addresses below for the quickest response. As we discussed on the phone, we are still in the Project Development and Environment Study (PD&E) phase of this project, with construction being a number of years off, largely based on the future availability of funding. The Florida Department of Transportation is developing the Lake and Seminole County portions of the Wekiva Parkway; the OOCEA is doing the Orange County portion. At this time, FDOT does not have funds for final design, which would be the next phase of development. They do have some money for acquiring right of way or property in Lake County, and there are no funds currently programmed for construction. Even if the funds were to become available soon, you would still be looking at 2-3 years for final design, another couple of years for right of way acquisition, and then construction could take 2-5 years depending on how big of a segment is done at a time. So regarding your question below, any scheduling information beyond the current study is speculative at best at this point. That is subject to change obviously if funding becomes available. There are several alternatives still under consideration for the US 441/SR 46 Interchange that would be part of this project. Re: your question on the US 441/SR 46 IC flyover, it would be approx. 5,100 ft. from Stoneybrook Hills entry road off US 441, and probably a greater distance from your residence. - Alternative 1 w/ SR 46 and US 441 grade separated (one road passes over the other): flyover would be approx. 50 ft. above SR 46. - Alternative 2 w/ SR 46 and US 441 intersection at grade (typical signalized intersection): flyover would be approx. 25 ft. above SR 46. Details such as length of merging lanes, etc., would be determined in the next phase, which would be final design. An overall noise study is being done for the entire corridor as part of this PD&E Study, not just for any individual property. The study and all of the particulars is anticipated to be complete with an approved alternative in late summer or fall of this year. I hope this helps address your questions. Please send further queries to me as noted below. Mary Brooks

2/19/2007 4:20 PM Cheryl Jones 352-383-8027 called, noted had spoken a while ago about the Stoneybrook hills property. PIO noted I'd sent her an email at 230 p.m., read what the email said. She said she did not receive it. PIO confirmed email address was correct. She said her concern is how much more noise going to be generate once flyover ramp goes , before train overpass on 441, U Haul and AC company, my back porch faces that, it's an open field, it's clear shot to SR 46, my porch is a pocket. I wasn't informed about it by the developer, probably a mile south of SR 46, I can see 46. Trying to picture how high the flyover ramp would be and how much noise. That might not bother some people but it would drive me nuts. I only have certain amount of time to do anything about where I live. PIO said I'd resend the email, and get back to her about the flyover elevation.

2/19/2007 4:13 PM From: "Cheryl Jones" <CJONES266@cfl.rr.com> Monday - February 19, 2007 4:13 PM To: <info@oocea.com> Subject: 441 and SR 46 I was informed by Mary Brooks that SR 46 will serve as a connector road to 429. I would like to know when SR 46 will become a fly over ramp and widened to four lanes? When will 441 be widened to six lanes for on and off merging? How long will the merging lanes be? Mary Brooks is doing a noise study for me. Can you please find out when I can get the results? Thank you. Cheryl L. Jones 5602 Ansley Way Mount Dora, FL 32757 (352) 383-8027

2/19/2007 2:30 PM From: Mary Brooks Monday - February 19, 2007 2:30 PMTo: CJONES266@cfl.rr.com CC: mbrookssr414@cfl.rr.comSubject: SR 429-Wekiva Parkway PD&E Study - 5602 Ansley Way, Stoneybrook HillsDear Cheryl,Many apologies for the delay in getting back to you, but my duties have expanded three-fold in the last 3.5 months. Nonetheless, I have researched your property at 5602 Ansley Way in the Orange County subdivision of Stoneybrook Hills. This property appears to be approximately seven parcels south of the Lake-Orange County line, and a short distance east of US Highway 441. Therefore, there is no direct impact from the SR 429 Wekiva Parkway project in this area. The Parkway corridor would be well to your north along SR 46 coming out of Mount Dora, or well to your east in the area of Plymouth Sorrento Road.I hope that addresses your questions. Please feel free to email or call with other questions or concerns.Mary Brooks

Contact Date 2/6/2007 Time 10:44 AM Dennis Jones Keller Williams Prestige Realty Regarding From: Mary Brooks Tuesday - February 6, 2007 10:44 AMTo: djonesteam@yahoo.com Subject: Re: Committee meeting on 2/2/07Dennis,We don't typically post the committee meeting minutes on the website, but a copy could be made available to you once available. We also are in the process of updating the site with the latest project info. Stay tuned.I can tell you that nothing changed from our last conversation as a result of the committee meetings regarding Tall Trees. We are still looking at the SR 417 alternative being about 50' off the subdivision property line.Mary Brooks

2/5/2007 3:14 PM From: Dennis Jones <djonesteam@yahoo.com> Monday - February 5, 2007 3:14 PMTo: <brooksm@oocea.com> Subject: Committee meeting on 2/2/07Mary,We spoke last week about the Tall Trees subdivision and I would like to know if the minutes of the committee meeting will be posted on the website anytime soon. I'm sure that would be important to anyone feeling affected by the extension. Your response is appreciated Dennis Jones Keller Williams Prestige Realty407-721-6734

1/29/2007 11:58 AM From: Mary Brooks Monday - January 29, 2007 11:58 AMTo: djonesteam@yahoo.com Subject: Re: Tall Trees impact from 417 extensionDennis,I have verified the parcel in question is not in the potential area of impact for the SR 417 alternative of the Wekiva Parkway. The only parcels originally looking at potential impacts were at the very southwest corner of the Tall Trees subdivision. As I believe I mentioned previously, we have shifted that alternative off the southwest corner of the subdivision by 50-100 feet.I hope this addresses your question.Mary

1/29/2007	11:37 AM	<p>From: Mary Brooks Monday - January 29, 2007 11:37 AM</p> <p>To: djonesteam@yahoo.com</p> <p>Subject: Re: Tall Trees impact from 417 extension</p> <p>Dennis, I'm trying to get confirmation now that there would be no impact to the property below if we went with the SR 417 alternative. Will get back to you on that. Also re: meetings, we have the Environmental and Project Advisory committee meetings on Friday, Feb. 2 at 10 a.m. and 130 p.m. and they are open for the public to observe. This would be a good opportunity to get an update, although the information obviously would not be final as we are continuing to meet with local governments and state agencies to get their input for a recommended alignment and interchange locations. The committee meetings will be in the OOCEA board room at 525 S. Magnolia Avenue in Orlando. The actual meeting notices are on the website at <a href="http://www.ooce.com">www.ooce.com</a>. Mary</p>
1/24/2007	3:31 PM	<p>PIO returned call to Dennis Jones/Keller Williams prestige realty re: client in Tall Trees 407-936-9600, c 407-721-6734</p> <p>PIO noted I had not responded to this email yet because hadn't had time to research that parcel, have a number of such requests. PIO noted in general the 417 alternative would have clipped SW parcel of that subdivision, and after hearing the residents concerns we were looking at shifting that 100' or so off the property line, might leave some room for buffering. He asked about a noise wall? PIO noted we were familiar with residents concerns about noise, but noted this project not fully funded, and those types of decisions still to be made. PIO noted we could put noise wall in concept, but question is being able to pay for it. PIO noted overall project estimate, and only very minimal funding for both agencies at this point. He asked when we would know about funding? PIO said hard to say, noted we're following federal guidelines to try to secure federal funding, but that's a long process also. PIO gave overall timeline for project and study timeline, noted public hearings in April May, and EAC/PAG meetings Feb. 2, noted notices on website. He requested web address again, PIO gave him address and page links. He asked if there was anything in writing recapping what I just said? PIO noted we're working on agency meetings with recommended alternative, working on newsletter, know the website needs to be updated and will do so. He said the info I've provided was helpful and thanks for getting back to him.</p>
1/24/2007	11:15 AM	<p>Dennis Jones/Keller Williams Prestige Realty MSG I have a question about the effect on the Tall Trees neighborhood. I also emailed you 407-721-6734 if you could call me on my mobile.</p>
1/23/2007	11:47 AM	<p>From: Dennis Jones &lt;djonesteam@yahoo.com&gt; Tuesday - January 23, 2007 11:47 AM</p> <p>To: &lt;brooksm@oocea.com&gt; CC: Larry Schreier &lt;lschreier@earthlink.net&gt;</p> <p>Subject: Tall Trees impact from 417 extension</p> <p>Miss Brooks, Thanks for returning my call- sorry I had just stepped out. My client lives at 487 Still Forest Terr. in Tall Trees. He has someone interested in his home for sale- their concern seems to be if there will be any homes taken from Tall Trees for the extension- where they might be? Is there a possibility that the new route could go thru Tall trees? And/or is there a MOST likely route for it to take based on available lands or cost impact. I've reviewed the preliminary maps and they cover such a wide area of Sanford/46 interchange that it seems that a lot of people should be nervous. The most logical path looks to be south of Wayside Dr &amp; Tall Trees with no concern for eminent domain in that neighborhood but what do I know? Any information is appreciated. Also would like to know of any scheduled meetings that are more definitive. Thank you in advance.</p> <p>Dennis Jones Keller Williams Prestige Realty 407-721-6734-cell</p>
1/23/2007	11:35 AM	<p>Dennis Jones/Keller Williams MSG Sorry I missed your call ... 936-9600 will be here next 30-45 minutes, will shoot you an email but could clear up my question with you fairly quickly if we had a one minute conversation</p>

 Pam,  
 The Wekiva Parkway Project Development & Environment (PD&E) Study is now scheduled

to have formal public hearings in January, with the study to finish with approved alignment and interchange locations in summer 2008. The OCEA has design funded for the Orange County portion in the current five-year work plan. The right of way maps would come out of the design process, which could take 2-3 years. Beyond that, however, I cannot give you a firm schedule at this time.

dleffler@qca-inc.com

PIO arrived at Mayor Crotty's office to assist with Wekiva Parkway interviews. Mike Snyder arrived short time later. First interview with Bob Kealing/WESH Ch.2. Mayor Crotty went over history of interstate funding in Florida. Orlando wasn't initially big enough to get beltway funds. He noted in the 1970s there were discussions about an Orlando beltway. The Wekiva

Parkway is now the missing link in that. Noted the two task forces/committees that have vetted the environmental and growth issues.

Mayor Crotty noted this is an "almost completed asset ... \$1.8 billion, it's bigger than the city / county venues

Mayor Crotty noted it's a \$13 billion asset. Kealing asked where that figure came from.

Mayor noted Lindsay, who as out rest of the day, provided that.

Mayor noted he was pulling together FDOT Secretary Stephanie Kopelousos, Mike Snyder, Jim Ely/FTE, Sen. Daniel Webster, FDOT D5 Secretary Noranne Downs as a working group to see how to handle funding. He said everything is on the table. The group is to report back after their first meeting.

Then the Mayor will gather a larger stakeholder group, including environmentalists, other stakeholders. Wants them to meet before Jan. 18-20 Regional Chamber CF Partnerships meeting, wants to start a community initiative to support completion of the Wekiva Parkway.

Kealing asked the most viable option to raise revenue? Mike Snyder said it's wide open, everything is on the table.

Will it take extra toll dollars to make it happen? Mayor said he has been opposed to tolls. However if that's what it takes to get this done, so be it.

Mayor said working group will be looking to fund the entire thing; not in pieces.

Kealing asked are Lake and Seminole counties on board? Mike noted yes, very much so.

He recapped discussions from the various LC and SCEA meetings involving the Wekiva Parkway. Mayor noted LC and SC will be part of the larger stakeholder group.

Mayor noted the goal is to get the community engaged and supportive of the funding option chosen. Mayor stated I oppose a toll increase unless we can close the loop with this

This would be the agency's first toll increase in 16 years. Compared to other toll agencies; we're pretty low.

Kealing asked is it true there won't be wholesale exits, that you're trying to fight sprawl effects with this? Mayor noted Charles Lee and Keith Schue, two respected environmentalists support project and want it built now. He said this is being touted as a model for the future across the country.

Mayor said it's a model of not just good transportation system but environmental system as well.

Kealing asked what bout the political element, that killed mobility 2020, the Guetzlotization if you will of something like this? Mayor said I hate tolls too, but is' a funding mechanism this city was built on (inability to get the beltway funding goes back to the 60s.)

Kealing said he talked to motorists on 46 about a toll increase; said 50-50 for/against.

Mayor said toll increase is only part of the equation. We need \$1.8 billion to finish a \$13 billion beltway, compared to \$1.1 billion for city venues. It's a good investment as far funding we should leave everything on the table. Closing the beltway is so valuable to the community. Failure to finish the Wekiva Parkway will result in the old way of doing business, a lot of intersections, a lot of strip malls.

There's the double advantage of closing the beltway and doing it in an environmentally friendly way.

Mayor said as the economy slows down, as taxes come down, ... the worst thing is the infrastructure deficit, the longer we wait the farther behind we get.

If we don't get it done in the near future, it will never happen. Then you'll see the old way of business with urban sprawl.

Kealing asked how do you sell a toll increase? Mayor said it's easier to sell a user fee than

a tax, make a compelling enough case about successes ... the best roads in CF are toll roads.  
Kealing said \$200 million/year generated by tolls, why isn't that enough? Mayor said that money is already spent. Drive around and see the widenings, new plazas, ramps. If we're going to close the loop all of the options have to be on the table.

Discussion of other options: bonding, P3, federal and state funds

Mayor said you have to have community resolve. When the community sees the benefits of closing the beltway, we believe they'll support it. After years of hard work we have to close the loop and have a true beltway.

Mayor said focus short term if the financial planning.

Mike noted we've acquired two of the 4 parcels required by WPPA, working on the third. The fourth one we don't touch and they won't talk to us.

Mayor said working group hopes to meet after first of the year and before the Jan. 18-20 chamber meeting.

Failure to do the Wekiva Parkway will be the difference on SR 46 between South Semoran or the GreeneWay. It would be a disaster in terms of urban sprawl and urban planning.

Discussion of getting reporter toll agency comparisons, system map with Wekiva Parkway study area, and \$13 billion number source.

Mayor noted it's been 18 years since we raised the OC millage. We're going to be in an uncomfortable position if crime continues to go up.

Kealing asked would it take a public referendum to raise tolls? Mayor said if the working group decides OOCEA portion involves raising tolls, then it takes 3 votes on the OOCEA board.

This will be the most significant public works project in the history of the region.

Bob said story running at 6 p.m.

Mayor said economic diversification is the key.

Contact		Pete Kelley	Highway and Heavy Constructors
Date	Time	Regarding	
7/18/2007	11:28 AM	Pete Kelley/contractor 352-326-2128 called asking for the target construction date on the Wekiva Parkway? PIO noted project not fully funded, OOCEA looking at design and partial Row over next 5 years, but possibly another 5 years before that before construction funded, so 5-10 years for OC portion. PIO noted DOT at current funding levels not looking to have the money for construction until 10-15 years. PIO noted PD&E schedule and subsequent phasing.	
		He said he was looking to put together where the dirt would come from, but guess he has to find some other rats to kill. PIO said stay in touch because if federal funding becomes available or OOCEA raises tolls, that schedule would change. He said okay thanks.

1/31/2007	11:55 AM	From: Mary Brooks Wednesday - January 31, 2007 11:43 AM To: gerry.king@siemens.com Subject: RE: SR 429-Wekiva Parkway PD&E Study Gerry, We are only in the Project Development and Environment (PD&E) Study phase, so construction is a long way off. Particularly since the project is not fully funded - not even close. Rough estimates, if funding becomes available, put construction starting at the earliest in 5-10 years. For the

OOCEA portion in Orange County, we have enough funds to go into final design when the study finishes, and then to begin buying some right of way or property. ROW acquisition is not fully funded, nor is construction. The Florida Department of Transportation has some funds allotted to ROW acquisition, but that's it. This is going to be a process that takes many years, unless federal or other funding becomes available. Mary

1/31/2007 9:25 AM From: "King, Gerry A P433" <gerry.king@siemens.com> Wednesday - January 31, 2007 9:25 AM To: "Mary Brooks" <brooksm@oocea.com> Subject: RE: SR 429-Wekiva Parkway PD&E Study Attachments: Mime.822 (3784 bytes) [View] [Save As] Mary Thanks for your quick reply. I will not be able to attend those meetings. What is the latest projection for the start/completion of the highway? Gerry

1/29/2007 5:19 PM From: Mary Brooks Monday - January 29, 2007 5:19 PM To: gerry.king@siemens.com Subject: SR 429-Wekiva Parkway PD&E Study Hello Gerry, We had some delays due to project issues that continue to be worked out, but are now working on the latest version of the Wekiva Parkway newsletter or update (probably out in March). My duties have expanded three-fold in the last couple of months, but I anticipate updating the website copy on this project within the next couple of weeks. Basically, we continue to have meetings with local government officials and state agency reps to get their input in working toward a recommended alignment and interchange alternatives. In fact, as you probably saw on the website, we have Environmental and Project Advisory Committee meetings this Friday, Feb. 2, which the public is allowed to attend and observe. The same info will be provided at both meetings to the two committees (EAC at 10 a.m. and PAG at 130 p.m.) at the OOCEA Boardroom, 525 S. Magnolia Avenue in Orlando. This will be a great opportunity to get an update if you can make it, though obviously the information is not final. We will probably be continuing the agency meetings for the next month or so, and then hope to bring a recommendation forward for formal public hearings in the April-May timeframe. I hope that helps. Please email or call with other questions or concerns. Mary Brooks

1/29/2007 1:52 PM \_\_From: King, Gerry A P433 [mailto:gerry.king@siemens.com] Sent: Monday, January 29, 2007 1:52 PM To: mbrooksSR414@cfl.rr.com Subject: 429 North Dear Ms. Brooks, I see a Highway 429 Wekiva Parkway, SR 46 Update newsletter on the Expressway Authority website. However, it is for Summer 2006 Please send me the latest information on this project. Gerry King

Date	Time	Regarding
3/21/2007	12:09 PM	PIO returned call to Joann Klepzig(cg) 407-886-6126, and relayed that OC Commission voted on the Kelly Park IC a couple of weeks ago, so we still have to have public hearings but that's direction at this time, barring anything dramatic. PIO noted still going through officials' and agency meetings, so earliest for formal public hearings will be June-July. PIO noted there was info on website, we're in the process of updating the maps soon, had she seen that? She said they haven't really looked at website; their computer has dial up and takes forever to try to open files. She noted I met you at the Apopka h.s. meeting. she was thankful for the call back.

3/21/2007 11:37 AM Joann Klepzig called and left MSG, homeowner in the area for the Wekiva Parkway project, I am just wondering if either the Kelly Park or Ponkan ICs, if one looks more favorable than the other for those roadways. both of which go through our land, one goes through our home and other through back of our property. We're just wondering what the timeframe for final decision and if one looks more favorable than the other. 407-886-6126

thank you

Contact		Michelle Kovac
Date	Time	Regarding
12/11/2007	2:43 PM	PIO returned call to Michelle Kovac, noted I hadn't seen Fox news report and there are three studies going on re: SR 417 which one did she mean? She said she only caught tail end of report, they said something was approved... PIO noted on the Wekiva Parkway, we have not approved anything; we have recommendations that are going to public hearings in February-March. She said that's what she was interested in; where is it connecting to 417? PIO summarized route and noted maps are on the web site, offered to walk her through the links if she's at a computer? She took the web address and thanked me for the info.

12/11/2007	1:46 PM	Michelle Kovac 561-319-7166 called and left MSG I'm trying to find out info given on Fox news this morning re: the 417 expressway. If you could get back to me that would be great. Thanks.

Date	Time	Regarding
4/20/2007	3:49 PM	PIO returned call to Mr. Kowch at 407-333-9696. Wondering what's going on, is it dead? PIO noted preliminary recommendations of 46 north widening and 417 IC connection to I-4. PIO noted schedule has been pushed back considerably due to still working through various issues along the 25 mile corridor and getting around to all the local and state officials for their input. PIO noted for example we are going before the SCEA May 8 with preliminary recommendations for that area, hope to have formal public hearings in Sept.-Oct., and will send out a newsletter prior to that. PIO noted the website has been updated with new info, so he can check there also. PIO asked and he said he isn't on the mailing list but would like to be. Eugene Kowch (CQ) P.O. Box 951275, Lake Mary, FL 32795 no email. He said he didn't hear anything, nothing in the paper. Was wondering if it was dead? PIO said no, still working through the process, hope to finish study with approved alignment by end of the year.

Cameron Lashbrook

Lakeside Fellowship of United Methodist Church

Regarding

Meeting with Cameron Lashbrook and two other church members, Brian Stanger and Tom Percival/FDOT, Mark/CH2m and PIO. Mark noted Alt. B is the recommendation so far; it does a partial take of their property. Cameron said if that is a major hit, how do you negotiate a total take? I know that's an issue with the ROW folks and not you all necessarily. Tom and Mark said they can have Mac McGough give them a call. Cameron said I can't speak for the whole team that that's what they would want to do; we're so well centrally located to serve our congregation. The availability of land is so limited Church member noted the biggest challenge to this location is so much of the grass area is designated for parking, so we can't expand the building. Tom asked if we could look at parking under the bridge like they have downtown under I-4? Mark said could discuss it, but they were looking to do facility expansion, not just parking issue. Church member noted that Refined Alt. 1 leaves us 3 acres; Alt. B leaves us nothing. Mark noted the difference is the distance from Capri Cove. Mark said could put wall beside church instead of sloped embankment, give them a few more feet. Cameron noted the next step for their building is to build an education building on the east side of the property. We would have to see if that would still fit and parking would be an issue. They're parking now between Wayside and the church, and a little on the Orange Boulevard side. Tom said worst case would be if you build the new building, FDOT will pay for any improvements. Cameron said they have to present a viable picture so people can see we can still grow and invest in it Tom said we don't see the budget in the future for this. Mark said it would be 25-30' where it crosses Orange Boulevard. Cameron asked about the timeline? Mark said 7-10 years at the earliest given the funding constraints. He said the chances are it would be longer than that, but some of these things get green lighted, funding becomes available. Tom noted this has the WPPA behind it, and think the need for something to be done on SR 46 could push this at some point. Cameron asked what's the process from here on? Mark noted we're formalizing recommendations. Tom noted we will present final concepts at September hearings, then review public comment, and make recommendations for FHWA. Mark added we're also meeting in May with SCEA to update them, probably won't take action but after the hearings we will be looking for direction from them. Tom said next phase, which is not funded, would be final design and ROW maps, then we would need funding to buy property to secure corridor. Then finally construction, which is a big dollar amount. I think the IC is \$400 million alone. Discussion that we'd hope to finish study by end of this year. Design would be 2-3 years; ROW 2-3 years, construction could be 10-15 years depending on how many sections it's broken into and again funding. Tom noted the OC section likely to go first since OCEA has ability to toll and pay back bonds. Cameron asked when route decision expected? Tom said preferred June-July, formal route decision probably in December. Mark said there are some factors that could delay that, the federal process and other project issues. Cameron said once there is a decision on the route made, what's the psychological effect expected on their membership? Have churches been taken before? Tom said ask Paul Horn/FDOT ROW 386-943-5000, think he's the relocation administrator. Cameron said one potential effect is will people heck out, go somewhere else because they don't think we have a future here. Mark said attorneys can also tell you what to expect. Cameron said they've been looking at that. Cameron said our decision is do we see ourselves staying or not? And if we stay, how do we make it work? Church member asked how do you get off going west? Noted if they had to move they would have to go to LC to find land. Discussion of property across Orange Boulevard owned by Catholic Diocese Cameron asked if there were studies re: effect on property values? Mark said yes, though

he didn't have those readily available. He said during the uncertainty of deciding an alignment and during construction, there could be some less than favorable effects on values. But once the roadway is built and access improved, you would generally see property values enhanced. Discussion of what's happening now with SR 417, public hearing next Tuesday. Mark gave them copy of Alt. B plot to show to their congregation. He noted we can put things in the study for design to look at such as doing wall instead of slope, extend the bridge so you could park under it, etc. Church member noted their main drive is under the bridge. Mark said we'd have to look at that. Mark thanked the church members for being reasonable and open to listening to the challenges in this area. Cameron said the fact that I don't like it doesn't change that we need it, Florida is growing. I can't argue with that. Discussed access to a couple of subdivisions. Mark said SR 46 has gotten so bad this project is appealing to more and more people. Cameron noted once the alignment is decided, some people will want to move so some other properties may become available in the same area. Church member asked so the SR 46 IC alternative is gone? Mark discussed traffic pattern and constraints with doing anything for a systems IC at 46. He noted LC has become a bedroom community with no jobs or shopping, so all of that traffic is coming east. Discussion that Paul Horn of FDOT might help them see options they wouldn't have otherwise.--7 p.m.

Sent: Thursday, December 13, 2007 1:48 PM  
To: 'Richard Lee'  
Cc: 'Deana Leffler'  
Subject: SR 429-Wekiva Parkway PD&E Study - schedule query  
Hello Richard,  
Regarding your question about the construction schedule for the State Road 429-Wekiva  
Parkway, it is very early in the process, indeed. We are only in the project development  
and environment (PD&E) study phase of this project. We hope to have formal public  
hearings on the recommended preferred alignment and interchange locations in February  
or March, and to have an approved alternative in summer-fall 2008.  
As you've probably heard, this project is not fully funded - far from it -- so the schedule for  
the rest of the project is tentative at best. The Expressway Authority (OOCEA) has funding  
to proceed to final design and to buy some right of way or land for the Orange County  
portion of the project. The OOCEA does not have enough money for all of the right of way  
acquisition or for construction in the current five year work plan.  
The Florida Department of Transportation is developing the portions of the project in Lake  
and Seminole counties, and does not have money programmed for design, though they  
have a little money for buying land.  
Conservative estimates, at the current funding levels, put construction starting on this  
project from five to 15 years from now (probably sooner in Orange County on the OOCEA  
portion than the other counties on the FDOT portions). However, various funding options  
are being explored, and agency leaders are scheduled to meet soon to figure out how to

get the project fully funded and to accelerate the construction schedule.  
We will keep you informed as other information becomes available. I hope that helps.  
Please feel free to call or email with other questions or concerns.  
Mary Brooks

Subject: Wekiva Parkway - Latest Recommendations

Mr. Lee,

Thank you for your interest in the Wekiva Parkway Study. I will send you the maps early next week. Have a wonderful holiday weekend!

Please be advised that the latest Recommended Preferred Alignment Alternatives for the State Road 429-Wekiva Parkway & SR 46 Bypass Project Development and Environment (PD&E) Study have been posted on the Expressway Authority website at  
<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml> <<http://exchange.qca-inc.com/exchweb/bin/redir.asp?URL=http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>><<http://exchange.qca-inc.com/exchweb/bin/redir.asp?URL=http://exchange.qca-inc.com/exchweb/bin/redir.asp?URL=http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>>

. These maps, in Adobe PDF format, can be downloaded and printed.

These recommended preferred alternatives will be provided for public review and comment at formal public hearings being scheduled for some time in February 2008.

Please check the OOCEA website regularly for public hearing notices and other Wekiva Parkway updates. Please feel free to email or call Mary Brooks with questions or concerns.

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - map requests  
I touched base with both of the contacts and informed them I will have to get more maps produced. I have the overall maps but Ms. Krepzig would like OC and Mr. Lee wants OC and LC. I told them I would have it in the mail early next week. They were fine with that. Mr. Lee would like me to email him instructions to the website. I'll do that shortly! FYI: Mr. Lee is the owner of two nurseries. Here is his contact info:

PIO Deana Leffler returned call and spoke to Ms. Lewis. PIO informed her the new approved maps should be posted on the website within the next week. PIO walked her through the website and showed her where the new maps would be. Ms. Lewis has family property which she has questions about. PIO said Mary Brooks would be the best person to speak to. PIO explained Mary was on vacation and would make sure she contact her. PIO took contact information and added to the database.

10/29/2007 3:41 PM

Ms. Lewis called and left voice mail wanting updated maps. Specifically around the Mt. Dora area.

Laurie,

Just wanted to add that none of these alignments or interchanges have been approved. As such they are still all subject to change. We're looking at the public hearings in January 2008, with the study concluding with an approved alignment and interchange locations in summer 2008.

I'm waiting for the updated maps, and will post those online once available, hopefully by the end of October.

Laurie,

It was nice speaking with you this morning. I got a chance to get to a computer and checked the Kelly Park Road interchange online. The ramps for this interchange would be roughly 2400-2600 feet west of Plymouth Sorrento Road, with the mainline Wekiva Parkway crossing a couple hundred more feet to the west, follow by another couple hundred feet before the westernmost ramps. I don't have any information on the county road you refer to as Jason Dewley Parkway.

I hope this helps. Please feel free to call or email with other questions or concerns.

Mary Brooks

9/25/2007 9:26 AM

Laurie L'Heureux 407-425-9142 called, said she has been having trouble with her work email and didn't know if I'd received hers yesterday. She said she lives in the Kelly park area and wants to know where the Wekiva Parkway is crossing. She said she knows it's between Mt

Plymouth and Plymouth Sorrento Road, but that's a broad area. PIO noted early on we had stakes out there showing exactly where it was crossing. PIO noted I'm out of the office now at meetings, but would be happy to respond to her email when I get back to the office, it will probably be tomorrow. She said she would also resend the email from her home address since they're having problems with the filters at work.

Subject: Western 429 Extension

Hi Ms. Brooks,

I was reviewing the information on your website pertaining to the 429 western extension and the exit on Kelly Park Road. I live in that area and am having a hard time determining exactly where that exit will be from the maps. I can tell that it is between CR 435 and 437, however, exactly where in between is what I am trying to decipher.

There is a new road coming from the Northwest Recreation Complex extending out to Kelly Park Road called Jason Dewley Parkway. Could you please advise as to which side of Jason Dewley Pkwy that exit will be on?

I appreciate the information.

Thank you,

Laurie L'Heureux

7/31/2007	1:51 PM	<p>From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com]  Sent: Tuesday, July 31, 2007 1:51 PM  To: 'Lmmontessori@aol.com'  Cc: 'Greatscott65@aol.com'  Subject: SR 429-Wekiva Parkway PD&amp;E Study - parcel 21-19-29-300-0010-0000</p> <p>Scott,  Apologies for the delay but I wanted to get back to you regarding potential impacts from the Wekiva Parkway Project Development and Environment (PD&amp;E) Study.  As I believe we discussed on the phone, we are recommending the SR 46 corridor in Seminole County be widened to the north to avoid the extensive potential residential impacts on the south side of the roadway. The current SR 46 right of way is approximately 200' wide, so we would need to widen 70-100 feet to the north side of the roadway to accommodate the Wekiva Parkway and related frontage roads. The exact impact would be determined once this project moves into final design.  We are slated to complete this PD&amp;E Study in spring 2008 with approved alignment and interchange locations. Typically projects would go directly into final design, then right of way acquisition and construction. However, this project is not fully funded so that timeframe is highly speculative at this point. We are examining different funding options, but at FDOT's current levels of funding, it would be 10-15 years before this project would be funded for construction.  We have a recent PowerPoint presentation on the OOCEA website at &lt;<a href="http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml">http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml</a>&gt; that lists the various recommendations that are to be brought forward for formal public hearings in January 2008. I am waiting also for PDF's of the latest maps, which you would be able to zoom in and out on the property of interest, that we will post on the website as well.  I hope this helps. Please call or email with other questions or concerns.  Mary Brooks</p>

5/22/2007	8:59 AM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, May 22, 2007 8:59 AM To: 'Jeanie Lombardi' Subject: RE: hwy 46 and US 441 Jeanie, We made a presentation to the Mount Dora City Council on May 15 informing them of the interchange alternatives still being considered for the SR 46 and US Highway 441 interchange. The preliminary recommendation is for an at-grade, signalized intersection (instead of one road passing over the other) with a flyover to accommodate the heavy southbound US 441 traffic trying to go east on SR 46. The Council took it under advisement, expressed some individual comments and requested additional traffic info but did not vote on which alternative they preferred. We go before the Lake County Board of County Commissioners on June 5 to give them an update and get further input or direction. We are shooting at this point to have all the local government and state agency input for this round and to bring forward a preferred alignment alternative for public hearings in Sept.-Oct. We will be sending out updated info and newsletters prior to that time.

going. I own some property out here, anxious to get any info that you have available. My mailing address is ...(MSG cut off)

Contact Date	Time	Patricia Loy Regarding	TITAN PROPERTIES
9/18/2007	2:00 PM	PIO returned call to Patricia Loy 407-650-2057 but phone just rang and rang and no voicemail. PIO found another number for her in the database and left detailed MSG with tentative project schedule being based on funding availability, 10-15 years to construction for FDOT and 5-10 years for OCEA at current levels. Also left my number.	
9/18/2007	10:49 AM	Patricia Loy 407-650-2057 called asking for update. Said she knew still in study phase and think that's supposed to be done in spring 2008. She asked when would it go to construction, thinks it has to go to design and then to construction, wants to know when the bids will come out.	

Contact Date	Time	Barry Lundin Regarding	Intram Investments
6/7/2007	5:13 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Thursday, June 07, 2007 5:13 PM PMTTo: 'blundin@intram.com' Subject: SR 429-Wekiva Parkway PD&E Study - Corridor in City of Apopka BarryWas nice speaking with you. Please find attached the corridor within the City of Apopka limits that the city council approved in February, I believe. That approval allows us to begin advance right of way acquisition of large properties that we would not be able to miss even if the alignment was shifted slightly. I hope this helps. As discussed, we hope to have updated alignment maps available on the website in July. I hope that helps. Please call or email with questions or concerns. Mary Brooks	
6/7/2007	4:38 PM	PIO returned call to Barry Lundin 407-354-2200 x221, walked him through website links to maps, noted he wanted the OC Kelly Park and OC Ponkan Road IC exhibits. He said he saw those, which one we're leaning toward? PIO noted Kelly Park. He said that's odd, much more developed at Ponkan Road. PIO went over reasoning, proximity of 414 extension, higher ROW costs to skirt Zellwood Station and Kelly Park provides better access to far north Orange and Lake county. He said he understood that and that's significant info for him to know. PIO noted these maps are being updated, some alternatives being eliminated - though OC IC maps probably won't be very different, maybe a little tweaking here or there. PIO noted we hope to have updated maps to post in July. He said okay, he'd check back. PIO said I could email him the corridor exhibit approved by city of Apopka, covers that Ponkan Road area? He said that would be great, email to him at blundin@intram.com. PIO asked if he wanted to be on the mailing list? He said that would be super: Intram Investments, 5728 Major Blvd., Ste. 601, Orlando 32819. He thanked me for the call back.--449 p.m.	
6/6/2007	2:34 PM	Barry Lundin MSG I'm trying to get current best thinking on map as to where the 429 lays out in relationship to Apopka, the area around Plymouth Sorrento, Lester, Ponkan and all that. I've downloaded something and it's too broad and I can't see how they anticipate, at least guess anyway today, where they think the road might be. Is there some way you can help me or direct me somewhere? 407-354-2200 x221 thanks so much

2/13/2007	1:36 PM	-----Original Message----- From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, February 13, 2007 1:36 PM PMTTo: 'SLUPORI1@cfl.rr.com' Subject: RE: RE: SR 429

Wekiva Parkway PD&E StudyNo, the latest alternatives being considered for the area of Capri Cove would put the roadway 25-50 feet away from the subdivision. No home would be directly affected. The alignment will have to bridge over Wayside Drive in the area of Capri Cove, so it will be 20 feet or so up in the air at that location. Mary Brooks

2/13/2007 12:52 PM -----Original Message-----From: SLUPORI1@cfl.rr.com [mailto:SLUPORI1@cfl.rr.com] Sent: Tuesday, February 13, 2007 12:52 PMTo: Mary BrooksSubject: Re: RE: SR 429 Wekiva Parkway PD&E StudyThanks for your reply. Just to make sure I understand, the expansion would affect one home directly. These homeowners will have to move. Will the road be overhead of the other homes in the neighborhood so that all the noise will be heard? Or how exactly would that work? Also, is the home affected #228 Capri Cove Place? This is the home the buyer is looking to buy. Thanks again I appreciate all of your help. Sincerely, Suzanne Lupori

2/13/2007 11:57 AM -----Original Message-----From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, February 13, 2007 11:57 AMTo: 'SLUPORI1@cfl.rr.com'Subject: RE: SR 429 Wekiva Parkway PD&E Study Suzanne, Thanks for the email. We have been working closely with the Capri Cove HOA on this project. The original alignment alternative that would connect from SR 46 to SR 417 would have hit the northeast corner of one of the parcels in the neighborhood. Based on the community and other input, we looked at additional alternatives at varying distances away from Capri Cove. Unfortunately in this heavily developed area, if you move the alignment very far from Capri Cove, you hit other homes and a church. We are still looking at an alternative that would move the roadway 25-50 feet off of the community property line. We are meeting Feb. 19 at 7 p.m. with the Capri Cove HOA at house number 204 on their street (there is only one). If you were interested, I'm sure the HOA president would not mind you attending. In the area of Longwood Markham Road, the Parkway alignment would be along SR 46. The alternatives originally considered were either to widen the SR 46 corridor to the south, or to the north from the river to approximately Orange Boulevard. The impact assessments show a much greater impact to homes and higher cost if we widened to the south, so the preliminary recommendation for that portion of the project is to widen to the north. That, however, would affect a strip of the Lower Wekiva State Preserve, which we know is an issue for the Florida Department of Environmental Protection. Nothing has been decided. We are continuing to meet with county and state officials to refine the preliminary recommendations. We hope to finish this part of the process and have some preferred recommendations to bring forward for formal public hearings in May. The study is scheduled to conclude with an approved alignment this summer. We will be updating the project web page <https://epass.oceca.com/futureplans/projectsandstudies/westernconnectors.shtml> in the near future, and also getting out the next newsletter. I hope this addresses your questions. Please call or email with other questions or concerns. Mary Brooks

2/13/2007 9:51 AM -----Original Message-----From: SLUPORI1@cfl.rr.com [mailto:SLUPORI1@cfl.rr.com] Sent: Tuesday, February 13, 2007 9:51 AMTo: mbrookssr414@cfl.rr.comSubject: 46 expansionMary: My name is Suzanne Lupori and I have left you a couple of messages and we seem to be playing phone tag. I know you are very busy so I thought I would send an email and it might be quicker for you to respond. The main neighborhood I am concerned about is Capri Cove in Sanford. The street name is Capri Cove Place. I am representing a buyer who is looking in that neighborhood and wants to make sure his value will be protected. As I live not far from there in Markham Estates off of Longwood-Markham Road I wondered if that will be affected to. Thanks for all your help. Sincerely, Suzanne Lupori

2/12/2007 2:14 PM Suzanne Lupori MSG I'm representing a buyer looking at a home in Capri Cove in Sanford. Another real estate agent said they thought the expansion was cutting through that neighborhood. I wanted to see if I could find out exactly where that extension is scheduled to go through at this point and what neighborhoods that's going to hit? They looked at two other houses and want to make sure none of them are going to be affected by it. 407-312-0883

2/12/2007 1:34 PM PIO returned call to 407-330-6365 Suzanne Lupori 407-312-0883, left MSG asking her to leave specifics on voice mail or send me email, left cell number and email address.

2/12/2007 11:22 AM Suzanne Lupori left MSG 407-312-0883 I have questions about the 417 expansion. I guess that's the Seminole Expressway. What neighborhood it looks like it might be going through? Thank you very much.

Lynn,  
Apologies for the delay, but I was on vacation until yesterday. We have not scheduled the public hearings yet (having trouble finding a suitable location in one of the counties). Once we do, we will send out a newsletter with the public hearing details and we also will post it on the website. At this point we are shooting for late January or February 2008. Stay tuned.

Subject: Public Hearings/Western Connectors SR 429

Good Morning Ms. Brooks,

I noticed on the O/OCEA website under project and studies that public hearings have been scheduled in regards to the Western Connectors (SR 429). But I am unable to determine or find the dates of these workshops/public hearings. Would you please send me information regarding these public hearings (dates, times, locations, etc.)? I can be reached via this email address.

Thank you for you assistance with this request.

Lynn Luzadder

Dan and Charlie, See notes below. I'm having to resend because initial transmission bounced back due to file size and server limitations. Another batch coming... Mary Brooks Public Information Officer	
		From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Friday, December 07, 2007 3:27 PM To: 'charlie.shaw@lakesylvanreserve.com'; 'danmacaluso@sylvanlakereserve.com' Cc: 'Deana Leffler' Subject: FW: SR 429- Wekiva Parkway PD&E Study - Sylvan Lake Reserve Board committee mtg. Greetings,	

The following is the list of action items from the Dec. 4 meeting Mark and I attended with the Sylvan Lake Reserve HOA board committee at Dan Macaluso's home:

HOA Board committee members requested the following info:

- 1) Distance from ROW line to southern edge of pavement with the Wekiva Parkway compared to the southern edge of pavement now?
- 2) Comparison data of what the noise level is now compared to what we're projecting?
- 3) Comparison of the model to other areas of SR 417 to validate? (Mark said FDOT District 5's Bill Walsh had done that, believe for I-4)
- 4) International Parkway concepts and report
- 5) Cost difference between the SR 46 interchange vs. SR 417 interchange
- 6) Plan sheets for all of Seminole County, not just in front of their development.

Attached please find a partial response to the request, namely:

- 2) Comparison of existing to projected noise (Be sure to use the two PDF exhibits with the "Seminole Impacts" table to determine monitor locations).
- 4) Analysis of International Pkwy ramps concept
- 5) Cost estimates for SR 46 IC versus SR 417 Interchange connection (It is important to note that cost was not the only criteria; most important is that the connection at the SR 46/I-4 IC failed the comparative traffic operations analysis);

I will send the other items as they become available.

Mary Brooks

Mark/Ch2m Hill and PIO met at Dan Macaluso's Sylvan Lake Reserve home with Tony Cerino, Charlie Shaw, Bill and Andrea (not sure of the last two names). Dan's wife later joined us.

Mark gave an overview of the project using a roll plot.

Q: Where would the tolls be?

Mark noted at this point OC portion would be tolled as its being developed by the OOCEA. He noted FDOT portions for now not tolled but that is being considered as part of funding options, since project far from being funded. Andrea raised concern about having to pay a toll to use SR 46. Mark acknowledged that is a concern that would have to be addressed.

Q: How many people are expected to drop down to the systems interchange vs. staying on 46 (through Mt. Plymouth and Sorrento)?

Mark noted there are already issues with SR 46 in this area of Lake County, including signals, so we believe a lot of people will try to avoid that.

Mark noted the main driver for the project in Seminole County has been the improvements needed on SR 46. He noted it's one of the most dangerous roads in Central Florida, and there's a high fatality count on the Lake County portion. Environmentally, it has been determined that widening SR 46 is not an option to state and federal permitting folks. He described that Wekiva Basin part of Wekiva Ocala Greenway, which next to the Everglades is the largest in the state, also notable for its biodiversity. He noted the drive to improve that natural corridor and that SR 46 is considered a barrier to wildlife migration.

Residents noted they get black bear in their backyards, particularly on trash days.

Mark noted the other purpose of the project is to complete the beltway around Central Florida.

Q: So you're not planning improvements on SR 46 in Mt. Plymouth? Mark said that's correct, or at least not capacity improvements.

Mark went over the CR 46A realignment, again idea to open up the wildlife migration and get the road out of the forest.

Discussion of Wekiva Parkway replacing SR 46. Mark noted that was the intention of the Wekiva Parkway & Protection Act, to break that road up, leaving portions only for local access. He noted how different communities in east Lake County, for example, would access the parkway. Several residents said they were not aware the parkway was replacing SR 46.

Mark pointed out on plot how they would access different directions from their two entrances, ramp locations.

Residents complained about harm done by '10 lanes in front of Sylvan Lake Reserve entrance'. Mark noted the elevation at their Glade View Dr. entrance will be similar to SR 46 going under I-4.

Discussion of width of footprint, 270' in Seminole County, widens out to when it drops down to SR 417. as far as elevations, Mark noted road in this area will be about 28' at highest point and get down where we can to about 12'.

Q: Where will the wall on the beltway be? Mark noted on the typical section that it will be 60-70' from ROW line, close to where the road is now. It was noted the frontage roads will be closer to the ROW line than the existing roadway. It was discussed that we're also proposing to widen the remainder of SR 46 heading east from the parkway to I-4.

Q: What will be the southern edge of pavement with the Wekiva Parkway compared to the southern edge of pavement now (distance from ROW line)? Mark noted he didn't have that off hand. PIO to relay that info to them. Mark noted the frontage roads will be 27' from the ROW; probably right now 46 is maybe 50-60' from ROW.

Q: will there be a traffic light at Glade View under the bridge? Mark said he didn't believe so. Discussion that there will be less traffic on 46 frontage roads with the Parkway.

Q: was the noise impact assessment for a four-laned road? Mark went over the federal and FDOT noise criteria required on all studies. He noted we have to identify the sensitive noise sites, in your case homes. He said then we get the ambient noise levels (what is the noise out there now?), measured in the morning and evening, at least twice in the various locations. We also count the cars of nearby roads. The data is used for the noise model. They put in three dimensional geometry of the roadway, compare the model to the data to determine ambient levels to identify noise impacts. If the hourly level reaches 66 dba then it's considered an impact. Or if the proposed project results in a noise level 15 dba higher than existing (usually in a rural area), and then it's considered a noise impact. Mark noted they then input the proposed roadway, profiles in the model off CADD files. They identify the receptor locations and added more receptors to identify the noise levels. For the roadway they use a LOS C, which is where the highest speeds occur. (He noted in congested areas traffic is slower and less noise). He said they assumed a higher level of traffic than today; projecting out to 2035.

Q: Do you factor in prevailing winds? We have a lake which won't absorb the sound? Mark said we look at that. Mark went over 66 dba zone on plot; about 280' along SR 46, then goes out to 400' as it turns south to 417.

Dan asked for comparison data of what the noise level is now compared to what we're projecting. Mark said we can get them the table.

Q: Do you compare the model to other areas of SR 417 to validate? Mark said FDOT District 5's Bill Walsh had done that, believe for I-4, we can see if we can get that.

Mark said the noise impact requires us to look at abatement. Mark noted the barrier wall planned will help with tire noise, but the truck stacks are also a noise source. Mark noted we put the noise wall in the model up on the roadway. Residents asked why not at ROW line to block view of road? Mark noted wall in that location would have to be 30' tall.

Mark noted when we look at the homes, the wall has to reduce the noise by at least 5 dba to be considered effective, and then we have to look at the cost per benefited home.

Q: What will be the speed limit on the frontage road? Mark said maybe 45 mph.

Mark emphasized the issue is not whether they can hear the road at all, but the projected noise level meeting criteria.

Residents repeatedly expressed concerns about noise traveling across the lake, noted they can hear SR 46 traffic now.

Q: Have there been models looking at water? Mark said yes, we look at that.

Residents emphasized we have a noise concern, whether it qualifies for abatement or not, there will be a difference.

Discussion that as far as aesthetics, and referencing WRBCC report, residents felt a sloped embankment that could be landscaped would be better looking than a blank wall.

Q: is this set? Can it be changed? Mark said until it's built, it's never "fixed" but this is our recommendation.

Residents noted that despite PIO presentations, which they appreciated, more people are getting concerned now because the project is getting closer, we have a preferred alignment.

Q: Can this be changed off SR 46? Mark said not in keeping with the WPPA. Mark noted the public has the burden to be heard on their concerns, but with public officials, meetings like this, etc. our responsibility is to let people know what's going on.

Q: What's the timeline going out? Mark noted public hearings first quarter 2008. Then take public input and make adjustments. Then going to agency approvals including FHWA. Hope to have approval in summer 2008.

Q: At the last SCEA meeting commissioners seemed most interested in getting land, has any been bought? Mark said no.

Resident noted 'we've got homes here for \$1 million plus, and to have to drive under an overpass to get there, that's going to kill our property values.'

Q: Is there any law saying how close you can build to a school? Mark noted no, schools build next to highways all the time.

Discussion of Academy of Learning and Lakeside Church impacts ... discussion of Seminary land purchase ...

Q: What about other alternatives? Mark noted we looked at International Parkway at request of SCEA, but the geometry doesn't work, the curves won't fit, and interchange issues with 417 at I-4 being at an angle.

Mark to get International Parkway concepts and report to HOA.

Q: Why not go right down SR 46 to I-4? Mark noted impacts, couldn't get 46 interchange in and to work, and besides traffic from SR 417 wants to get over here (pointed on plot to 46 heading toward river).

Q: Are there takings on SR 46? Mark noted yes, some impacts and takings.

Q: What's the width of the roadway going past the church ball fields? Mark noted about 300'.

Residents stated: "this will impact our property values. We have visual concerns, concerns about the noise and the aesthetics."

Q: What about 12 Oaks RV Resort? Mark noted we'd be taking their entrance, community building, but not the pool. They would have to redo their set up with this project. We've met numerous times with the owner there.

Q: Any concerns with pollution from runoff? Mark said we have to build the retention ponds based on the rules at the time, which by then should be stricter, some changes expected. PIO noted required to capture runoff in a closed system, we have to be permitted by the state.

Q: Why were northern alternatives eliminated? Mark noted SCEA asked us to delete a couple of those, there were higher residential impacts. SC has bought some public lands up here, and it didn't get traffic where it wants to go (417).

Resident stated that "with the physical height of the road we're essentially diked or barriered by this road. There are 220 houses in here. There is no other neighborhood that you're wrapping around like this."

Q: When do we get heard? As far as approval of federal funds? Mark noted it's not really a vote type situation. He said all of the public input is being considered. PIO noted we have to balance that with the transportation need.

PIO also noted filling out forms at public meetings, we crunch those numbers.

Residents asked who is supporting this project? They said in talking to their neighbors no one is in favor of it. They also noted they have contacted Capri Cove and plan to hold a meeting with other HOA representatives, plan to fight this together.

Q: How long will this road sustain traffic levels? Mark noted they're building it for 2035.

Discussed long term schedule and funding, OOCEA has \$50 million for design and ROW.

FDOT said \$45 million in Lake but may be moved around. He noted this is a \$1.8 billion project, the SR 417/I-4 interchange probably about \$300 million. SC is probably the most expensive section, maybe \$700 million.

Q: What is the cost difference between the SR 46 interchange vs. SR 417 interchange?  
Mark said we have those figures.

Mark went over traffic models and noted that even if we 4, 6 or 8 laned SR 46 it would not work; need a different concept like parkway.

Residents said they would like to see International Parkway reinstated as an option. Mark noted International Parkway also is the county's HID area.

Resident stated: "This is a quiet community we need some noise mitigation whether we meet the criteria or not. We have peace out here yet we can still be close to I-4 and the mall. This would have a major effect on us. ... We also want some beautification."

Mark noted our job is to look at alternatives, whittle them down based on input from local officials and public...

Q: I'm not an engineer, but have you thought about taking this below grade? Mark said that would quadruple the cost. Water table issues ... have to keep it from floating, would involve pumping, etc.

Mrs. Macaluso said she lived in D.C. inside the 495 beltway and is very concerned about aesthetics, doesn't want to have to look at something like that everyday.

Q: What is the next best alternative if SR 417 were off the table? Mark said from an engineering perspective, the road needs to end at SR 417. International Parkway doesn't work. We could look at shifting it slightly, but not much.

Residents complained so the alternative really is set in stone. PIO noted it was not approved, but this is the result of nearly 3 years of public involvement and evaluations.

Discussion of presenting latest recommendation to large HOA meeting, tentatively Jan. 17. HOA to get back to us to confirm and with details.

We spent time going over all of the plan sheets and concepts Mark brought.

Residents requested plan sheets for all of SC, not just in front of their development.

Discussion of various elected officials who have been involved in this process. Mark noted Commissioner Bob Dallari, now SCEA Chairman, would probably be interested in your concerns. Also suggested setting up meeting with SC Commission Chairman Brenda Carey. Mark noted to PIO that Dallari has requested to be informed of all community meetings henceforth.)

Mark noted on profile sheets 28' elevation at Glade View, noted at sta. 1039 west end of their property it gets down to almost ground level.

Discussion of Sylvan Lake levels and past flooding, closed basin.

Q: Would you be opposed to doing additional noise measurements? Mark said they would have to request that and he'd have to see if FDOT would authorize it.

PIO recapped action items, info owed to HOA.

Q: When will the PD&E Study be available? Mark went over schedule for public hearings, official comment period (though we will accept after that), changes based on input, respond to comments, get local stakeholders government approvals, finalize documents and then seek FHWA approval.

Q: When will you be re-evaluating the ROW? Mark said we're doing some numbers now, but FDOT mostly handling that.

Mark went over overall schedule if we had funding: 3-4 years to design, so 2012, 3-4 years for ROW 2016, 10 years to build in phases, so 2026 to open entire road best-case scenario. He noted PD&E had a shelf life of about two years, so would need to do a re-evaluation at design.  
--815 p.m.

Dan Macaluso, HOA president, Tony Cerino, subcommittee chair, Charlie Shaw and Mark, Tony: key thing is thanks for the map, it draws one large concern, assuming road will be elevated, and what would be the average height we would expect from bridge crossing Wekiva to where roadway would pass through orange blvd.

Mark: at the roadways where we are bridging over, including Longwood Markham, lake Markham, and your entrance Glade View, veers off 46 to east of your entrance. At each of those locations roadway will be elevated to provide access underneath with a bridge. Coming out of your access to Glade View you will be able to take right to Sanford or left to go to Lake County. At those locations, bridges 16.5' clearance, roadway structure depth about 6' so surface of roadway in neighborhood of 22-24.

To extent we can, we try to bring the roadway down. It does not along any location along 46 come down to the existing grade.

Charlie: it would seem by the map the overpasses are fairly close together. Mark said right never back at grade, so probably 22-24 at access point, may go down 5-6' between bridges before going back up. We have preliminary profile we will share with you, in the midst of preparing draft reports for the clients

You will take a left on WB frontage road and then ramp to get onto Wekiva Parkway to go into Lake County

?: No tolls from anywhere it exits I-4 to Lake County? Mark: at this point we're not proposing tolls. DOT has been very clear that they really don't know how it's going to be funded, considering all options including tolling. If that comes about there will be additional public hearings about what we're doing.

? Last toll on this leg is the Lake Jesup toll. ... If you were to continue on around would they put a toll on the county line? Mark said would doubt tolls on 46 SC piece because not enough room, but with electronic tolling they could just put those gantries.

Mark said slip ramp between river and Longwood Markham road, a little hard to see on the maps because of the scale.

? What neighborhood... is it between ... if you look those slip ramps are called out. Halfway between river and Longwood Markham.

Charlie: thin red lines are they row boundaries? Mark said red is where we need new or additional ROW for the roadway.

What becomes of lakeside Methodist church? Mark we're going right behind them, we've

been working with them; they're concerned about that impacts. You know there's a ball park going up right there. Mark said we're threading the needle, trying to stay out of neighborhoods. I'm not saying anybody's real happy, but I think everybody understands what we're trying to do.

In all seriousness

Has study been commissioned that would assess impact to quality of the neighborhood. We're doing impact assessments and those will be made available to you all after clients. What about property values? Is that criteria you will be looking at? Mark said most of the cases when these facilities built, some construction impacts, but in general very enhanced access to the properties and we would expect as we've seen across the country the property values to increase.

Thinking of resale value, elevate the road and noise. Mark said noise and visuals are a component to it.

Is there an assessment of at elevation at 22' how much of the roadway visible to the communities? We could do that on location basis...

Mark: from my perspective being out there and talking to lot of people, you can hardly get out on 46 today. This will allow you to get out there more safely.

Dan: 80 percent of the people come out on the orange blvd. we already have easy access.

Dan: after seeing this and having it be revised again. I've lived in the area 30 years, have seen it go through diff options... some comments I've heard if you look at entrance to our neighborhood, burden of price, our neighborhood is going to pay for this going by both entrances is a little harsh. We're only neighborhood this thing is wrapping around ... going around both entrances right in front o fit and not going back to ground level. Have seen other locations north of the St. Johns bridge... mark said those alternatives were looked at lot of state owned land that prohibit it from going up there.

Dan: it's a heavy cost that you're expecting this community to deal with, wrapping around this community

Mark: I can't argue with you

Charlie: on behalf of bob Watson on our committee, curious if any routing was considered going further down 46 and swing down international parkway? Mark said yes, looked at that and also taking it to i-4 and 46. As we looked at International Parkway -- we can share those concepts -- it would go east from your entrance and then turn south 90 degrees then button hook to I-4, it became too restrictive. We couldn't get it in with the design requirements we had to meet.

Other suggestion to take it to east of I-4, but would go right through mall.

?: Underlying goal in your explanation is that the beltway has to be connected, why? Mark said intuitively it would be nice for the roads to meet, though on the south end it does not. So we examined several locations to tie in. A lot of concern raised by SCEA about one to the north and there were lot of impacts. One at 46 we looked at pretty thoroughly, ran traffic projections. We found lot of traffic wants to go between Wekiva and 417, Lake County to eastern portions of SC. If we put it at 46, traffic trying to get to 46 and Wekiva, couldn't get connections to work on I-4, so it would dump additional traffic on International Parkway, Rinehart Road. So if it didn't tie two beltway systems together it creates more problems than solve in that area.

?: the northern connection that was one of the alternative that hit I-4 north of the bridge would alleviate traffic that wanted to side skirt ... you said there were obstacles to looking at that.

Mark we looked at it, impacted more homes up there, quite a bit of conservation land. As we worked with SC folks that became something they were not interested in. impact is where land would be required.

? This alternative I'm seeing here ... you don't consider the Glades being impacted

because you're not acquiring property? Mark said will be visual and noise impacts, and during construction. But direct impacts are people's property being acquired for the roadway and having to be relocated.

Charlie: noise criteria ... mark said is we id any noise sensitive sites that would have hourly average decibel levels of 66 or greater.

Do you know current level at 66? Mark said did some measurements but don't have those in front of me. We run the model for worst case traffic conditions, highest speeds, then we put in truck percentages, how many and what type, 3 dimensional geometry, roadway, That will allow us to identify where there are noise impacts, in your neighborhood there are several impacts. And we're required to look at noise abatement, several criteria. One that generally directs whether, one is economic criteria, take number of homes benefit reducing noise by 5 db or more) and cost of barrier and divide, and if it's greater than \$40k then it's not economically feasible.

Does cost of project anticipate ....

Mark we put in number, in the earlier estimate we didn't have an idea... haven't gone back

Charlie: I'm assuming we did study with existing traffic at ground level. Mark said we did the model, compared what we heard in the field with what the model showed.

Charlie: did you extrapolate that to be at higher elevation and speeds? Mark said exactly, that was done.

Charlie: my assumption is elevated roadway with through traffic, speeds will be greater than on existing 46.

Charlie: sounds to me like you're saying based on federal criteria our community is outside of the noise impact area for abatement

Mark: I believe that is the case... based on the study that is the indication.

?: time line, you don't have money or schedule for construction

Mark went over funding for OOCEA and FDOT. Some folks would like to get started with design next year, but there's no certainty to that. Could see some design initiated by next year.

\$1.7 -8 billion would be for whole program, all three counties

Charlie: what's cost for SC? Mark would say fairly big component of it, \$600-700 million.

Charlie: how do you propose to get the funding? Mark: variety of funding sources. Beltway to the east, ... hope to get federal funding for some if not all of SC. If it gets tolled, which OC would be, they would sell bonds and fund it the way they have their other projects.

Those are the two fairly traditional methods. Beyond that P3, concessionaires have their funding and in return they operate facility for some time frame and repay from revenues. It could be a toll road, but at this point we're not proposing tolls in Seminole or Lake County.

Charlie: what is the timeline?

Mark public hearings in Feb. working through several processes and trying to get things together, taking longer than hope. We will be setting that date in Dec and letting folks know, Mary will send out newsletter and also notices to all the folks in the ROW.

Charlie: May meeting of SCEA were looking at Sept. hearings and the n coming back, what ar you looking for in the meeting next Tues? Mark said it's just to give them an update and review what we are proposing as preferred alternative, which is similar to what we proposed in May. We would like them to say please move forward and let us know what input you've received.

Mark said we will indicate that we plan to take this forward to public hearing and come back to them. Its same basic alternative, think we moved a few ponds, but not a lot of changes have occurred. We're not asking them to approve anything other than move forward to the hearing.

Dan: what's the approval process and when might you anticipate getting approval. Mark said after hearings there is a 10-day comment period, assuming DOT still interested in

build alternative, will finalize documents, we would go to OOCEA, LC and SCEA and review input from hearings and ask them for their thoughts, if they want to concur or whatever that's up to them. It's a DOT project so DOT could just move forward, but these days and times we would really hope the commissions approve.

So with that timeline ... Rough range for finishing? Mark in summer seek federal approval on the project. Finance would have to be addressed after.

Dan: in the meetings, is the public allowed to speak? Mark said yes, also form to provide comments.

Dan: we're talking to you and Mary, do these concerns, I know you're hearing this, but do we need to make someone else aware of this? PIO noted issues are documented and presented to FDOT, OOCEA and other study team reps at the progress meetings, and any follow up info taken back to community.

Dan: summary of concerns: impact to our neighborhood going by both entrances is a little much to ask for one neighborhood

Noise and various takes on noise

--what's the current noise we have now? Is it close to the 66 db?

And also our property values

Charlie: point you made after construction it enhances property values with improved access, but that's as long as it's not at your front door

Dan: Most people moved there because it's nice and quiet, and there's wildlife, so we're very concerned about the impact and the noise

Northern and eastern boundaries of the community will be encircled... without belaboring that road will be elevated.

Charlie: have son in south Florida and travel Sawgrass and see the concrete barriers that are in the backyard of homes. Mark said that's not the case in your neighborhood.

Charlie: key to us would be to having profile, and rendering to assess what the impact would be.

Mark said we can come out and meet with your full association, apologize we've be

Dan: next board meeting Nov. 15, it's every 3rd Thursday; annual meeting is in Feb. and know that Mary has spoken at that a couple of times. Mark said he doesn't want to wait until February.

Discussion that we will shoot for early December for a committee/board meeting with Mark and Mary.

Charlie: assuming approval in Q3, when do you start acquiring land? Mark said If we had all the money in our pocket, with the federal approval would go to final design, that would be easily 2-3 year process for design given size and magnitude, so 2011, then ROW would start after that, minimum 2-4 years, and project would probably be phased, start in OC and SC would be later, though with higher priced ROW in SC might try to buy that earlier, best case 2015 we'd have all the ROW and then construction would start and could be phased over 10 years.

Dan: this area growing, how does that impact when you come back and look at it in 2-3 years, additional impacts. Mark said do re-evaluation in design and ROW, have to look at impacts reported in previous phase, whether original study or subsequent re-evaluation and see what the differences are, if significant, have to do public meetings, etc. there's lot of pressure out there not only in SC. Some has eased with market but that's probably short term.

Charlie: we don't want to appear NIMBY ...

Charlie: what is our window to affect any change in the routing? Mark said study phase is critical and would invest your efforts in that, or even after the study. Your best way is probably through SCEA which is your board.

Mark said we've resolved issues in LC with ... have received letter from LC indicating their decisions.

Discussion of them wanting to know what other communities have done, requested copy of the database. Mark noted Capri Cove and Tall Trees in SC have been most active. He said the extensive comments from the previous public meetings fill two large binders. PIO noted dbf has 2800 entries and some of those easily have 50 pages of contact history. Dan said he deals with access and other databases, and said he has ACT, requested database in electronic form. PIO confirmed will get that, the profiles to them, and get with them re: committee and/or board meeting in first week of Dec.

10/19/2007 3:31 PM The amount of traffic diverted is suspect while the impact to our community is extreme. The Wekiva Extension connector to I-4 should be north of the St. Johns bridge to eliminate interstate bottlenecks. The Glades on Sylvan Lake Reserve will be impacted by having the route pass by both of its entrances. This is too extreme. Wildlife crossings on SR 46 will be restricted, if not permanently altered with the current access road plus expressway design.

The public hearings will be held in January, but we don't have dates or times set yet. Once we have the updated maps, it will be easier for you to gauge the impact to your property and to be able to make plans for what you might want to do. The maps will be posted once finalized and approved (most likely now in November). I will also send out an email alert when they are available on the website.

Hello Ama,

The alternative being brought forward for recommendation in the area of the Orange-Lake County systems interchange for the Wekiva Parkway is Alternative 1. If you will recall when I researched this for you back in May, this alternative would run along the north border of your property and there would be no direct impact. Please be aware, however, that this alignment has not been approved and is still subject to change. We are looking at January 2008 for our public hearings on the recommended preferred alternatives, and then hope to finish the study in summer 2008 with an approved alignment.

I hope that helps. Please feel free to email or call with additional questions.

Hi Ms. Brooks

Can you please tell us what is the status of the extension passing near our 10 acre parcel please? Our church is quite anxious to begin building and need your assistance in this matter to let us know how to proceed.

Do have a wonderful day!

Thanking you in advance for your kind assistance

Ama Mahabir

Cc: 'pkrl962@hotmail.com'  
Subject: SR 429-Wekiva Parkway PD&E Study - 2115 Haas Road, Apopka  
Ama,  
I have checked the property 2115 Haas Road, parcel ID no. 06-20-28-0000-00-027 and show it as on the north side of Haas Road about 10 parcels east of Plymouth Sorrento Road. This property is shown as parcel 2764 on the project maps on the Expressway Authority website at ftp://ftp.ch2m.com/Wekiva\_Public\_Boards/  
The property would see the following potential impacts based on the alternatives under consideration:

OC-LC Systems IC Alternative 1 - project right of way line runs along north border, no direct impact  
 OC-LC Systems IC Alternative 2 - takes sliver off north border, minimal impact  
 OC-LC Systems IC Alternative 3 - takes sliver off north border, minimal impact  
 OC-LC Systems IC Alternative 4 - east-west alignment is well north of property (hits north side of large parcel to the north), no direct impact  
 OC-LC Systems IC Alternative 5 - east-west alignment is well north of property, no direct impact  
 OC-LC Systems IC Alternative 6 - east-west alignment is well north of property, no direct impact  
 Please be advised that these maps are being updated and revised, and that significant changes are likely as we work through various issues and meet with local and state officials. Please also be aware that potential impacts are highly subject to change at this point. We hope to have the maps updated and firmed up to where we can post new ones on the OOCEA website in July. We are shooting for formal public hearings on alignment and interchange recommendations in September or October.  
 I hope this helps and thanks for your interest in this major transportation improvement. Please call or email with other questions or concerns.

My friend buy land at Haas Road near Plant Sorrento road. He wants to construct church on that land. So he went to county for approval. But county said that they are not sure about future route of SR429. SO Please guide me about that. My friend</p>

project delay due to this problem. So give me proper guidance about that. Thanks.Pravin

5/11/2007 9:25 AM PIO returned call to Pravin Patel 407-467-7210 429 extension, one of my friend buy the land at Haas Road, wants to build a church. He said the county doesn't approve church because of 429; they said not sure where exactly the 429 is going. My question is can you give me where it is going exactly? PIO noted we do not have an approved alignment, but could email him some maps. He said send to email pkr1962@hotmail.comPIO asked address of friend's property? He said it's on Hass, it's 4-5 miles from Plymouth Sorrento road, think it's on the east side but don't know address. He said he bought he land almost 6-7 months before and wants to build Hindu ashram temple. I'm working on ... I'm civil engineer, so he told me to find out what's going on. I'm working on turnpike ITS project, I'm consultant inspector. PIO noted we did not have an approved alignment, though noted OC BCC approved the OC interchange at Kelly Park Road, so that's what's likely to move forward to public hearing. PIO noted I'd send him the maps, but advised these are being updated and will have new ones that will be different in the coming weeks, please be sure to advise your friend of that.He asked when there would be a decision? PIO said public hearings Sept.-Oct. And study to conclude end of 07, or early 08 with approved alignment. He said he'd send me the property address and thanks for your support. Said he tried to email me ... PIO confirmed email address, said he can just respond to what I send him.

5/10/2007 10:42 AM Pravin Patel called and left MSG want to know about some special route of SR 429, one of my friends buys lot at Haas Road, and he wants to build a church and county doesn't decide the plan crossing because of the future 429 on east side of that 4 ... OBT road. Give me a call 407-467-7210. Thank you and have a good day

Contact		Bob & Frances Manuel	Lake Forest HOA
Date	Time	Regarding	
12/18/2007	4:20 PM	Bob Manuel/Lake Forest HOA	407-322-2318 called and said Mark made presentation to SCEA recently and he wanted to get large poster sized copies of the latest maps. He asked if I could get those for him? He said their annual meeting is in Jan. and they want to give a brief update. PIO said we don't keep stores of those around; PIO noted I usually have those made at Kinko's or Office Max, or he can download the file from the web site and have it made to the size desired, which would usually be quicker. PIO noted I actually email files to Kinko's, tell them what I want and they have it ready when I get there. PIO noted the latest maps are on the web site, had he seen those. He said yes, he can do that
		PIO asked if they wanted us to present at their HOA meeting? He said no, there are 7 projects going on around them and they're just going to hit a couple minutes on each one. He also said the meeting is going to be outside under a tent because their clubhouse isn't big enough.

		Subject: SR 429 - Wekiva Parkway PD&E Study - 141 N. Center Road	
		Elsie,	
		It was a pleasure speaking with you earlier. If I have your property location correct, 141 N Center Road is two parcels north of SR 46 on the east side of Center Road, and two parcels west of Orange Boulevard. If this is correct, there would be no direct impact from	

this proposed project (as noted in the figure below).  
 This figure is taken from the PowerPoint posted on the Expressway Authority website at  
<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>  
 .  
 Please bear in mind that this project is only in the Project Development and Environment  
 PD&E) Study phase, so all concepts remain subject to change until we have an approved  
 alignment. The recent mailing said we were looking to do formal public hearings in  
 October, however, that schedule has now been pushed back to January, FYI.  
 We hope to conclude the PD&E Study in summer 2008 with approved alignment and  
 interchange locations. Please understand that this project is not funded, so the scheduling  
 of final design, right of way acquisition and construction are tentative at best, and highly  
 subject to funding availability.  
 I hope this addresses your question. Please feel free to email or call with other questions  
 or concerns.

8/7/2007	3:25 PM	PIO returned call to Elsie Marforio 407-322-7235 who said she's 83 years old, she has a broken hip, and if the road is coming through and she has to move, she's going to have a problem. PIO said I can research her location for her. She said she's at 141 north center road, mile west of I-4, P.O. Box 470340, Lake Monroe, FL 32747, <a href="mailto:elsie_l_n@msn.com">elsie_l_n@msn.com</a> <a href="mailto:elsie_l_n@msn.com">&lt;mailto:elsie_l_n@msn.com&gt;</a> she asked if I could send a map. PIO noted we have maps on the website. She said tried to get on but it said wasn't available. PIO noted I'd just been on a few minutes ago. She said she would try it again, had tried it at 2 a.m. this morning when she couldn't sleep. PIO noted lot of these types of request but will try to get back to her tomorrow. She said thanks so much.
----------	---------	---

8/6/2007	4:12 PM	Elsie Marforio(cq) 407-322-7235 I'd like more info on the new highway that's coming out between I-4 and Wekiva River, 417, thank you

Contact		Richard and Lorna Mattern
Date	Time	Regarding
3/29/2007	9:11 AM	PIO returned call to Richard Mattern 407-833-8409, spoke to wife Lorna, who said we're looking at property near 46 and community called Bella Foresta, 3 miles west of I-4. I know the GreeneWay supposed to come through route 46, but also talk of a 46 bypass. Do you know if the plan for 417 to right where 46 currently is. We don't want to invest in a home our lifetime earnings if there is going to be a road right there. PIO explained the preliminary recommended route in Seminole County, asked if she'd seen the maps? She said they one she saw was too small. PIO asked if she was at a computer, I'd walk her through it. PIO walked her through website and links, guided her to SC alternative w/ frontage roads and north widening. She said she could see exactly what she was looking

for; don't think they want to buy there now. PIO noted as far as noise concerns, we are looking at noise impacts as part of the study. She said but they couldn't put walls up on a parkway? PIO said we could, similar to what's happening with 408 in downtown Orlando, but project is not funded? She said so the walls are for certain? PIO said that's correct. PIO also gave funding challenge and overall timeframe, could be 10-15 years, though could be sooner if funding became available. She said this is exactly what I needed; it's not what I wanted, but it's what we needed. So we won't be buying there. Why would they put such a high end development there with eh road so close? She thanked me for my time and patience. PIO said no problem, wanted her to have the correct info.

3/28/2007 11:34 AM Richard Mattern 407-833-8409 left MSG asking how the Wekiva Parkway would impact 46, looked at maps on internet, there's so small can't tell a thing. There's a house he wants to buy in the area.

 Subject: SR 429 - Wekiva Parkway PD&E Study - 5545 Wilson Rd.

Kim,  
 The property at 5545 Wilson Road is shown in yellow on the Seminole County Property Appraiser map below, between Garda and Pacific avenues. You can see the SW corner of the Tall Trees subdivision to the right on the north side of Wilson Road.

If you look at the relevant portion of the Wekiva Parkway map for Seminole County, which I've copied below, you will see that the same parcel in question is about 2 or 3 parcels west of where the new roadway would cross Wilson Road. Comparing the two maps, the new roadway would cross Wilson just east of Pacific Avenue, which is east of 5545 Wilson Road. I hope that helps.

(PIO insert snapshot from SC recommended preferred alternative)  
 Mary Brooks

12/24/2007 1:21 PM Kim McCall 407-362-8989 called and thanked me for the email response. She said I have people interested in 5545 Wilson Rd. between Wilson Park subdivision, near Emmett road, ...and Metz Avenue. She said she still can't tell where the Wekiva Parkway is crossing Wilson Road, is there a better map? PIO noted that is the project map for that area. She said if you can help me specify exactly where this is going to fall in relation to this property, I'd really appreciate it. PIO confirmed I still had her email, would research the location of the property in question and get back to her. She said this is a done deal right? PIO said no, this is not approved, has to go through public hearing and approval process. And even after approvals it's not funded for construction. She said okay, so it's just a recommendation? PIO said that's correct.

 Subject: SR 429 - Wekiva Parkway PD&E Study - Wilson Road query

Hello Kim,  
 I'm happy to try to help. For starters, it looks like you've got a couple of different projects confused or commingled here, judging from the emails below. There are in fact two projects being evaluated in the area of SR 417 and Interstate 4. As noted in the initial emails below, the Florida Department of Transportation is studying the extension of SR 417 from Interstate 4 to International Parkway. As noted that project would not affect Wilson Road.

In this same area however, the Wekiva Parkway is being evaluated and the recommended preferred alternative would come east from the Wekiva River along SR 46, and drop south just west of Orange Boulevard to connect to I-4 at SR 417. The confusion is understandable since, although these two projects started separately, they do overlap in one area.

The recommended alignment for the Wekiva Parkway, roughly speaking, would cross Wilson Road between the southwest corner of the Tall Trees subdivision and the eastern border of Wilson Elementary school.

I hope that helps. Please feel free to call or email with other questions.

Please comment on the above depiction that shows construction practically in the side yard of the property you are representing as not affected by the western extension.

Cheers,

Dale

Dale,

I have asked them to respond to give me information on "any future projects" as it may relate to Wilson Road. When I get that response I can forward that to you.

Reading further, you asked the wrong question. The property you are selling is WEST of international parkway and may be very close to the extension. Please follow up.

cheers,

Dale

Dale,

I spoke with the owner and confirmed that county water is not available. The house has 2 wells. (2" and 4") The quality of the water softener is top grade. The owner spent over 3K on the softener it self and feels you can't beat the water quality, and not having to pay a water bill is a nice plus!

Please let me know if you have further questions or would like to schedule a showing.

Thanks again!

Kim McCall

 Steve,  
 Can I get additional information on the pending project:  
 SR 417 - Extend SR 417 from I-4 to International Parkway (FM No. 415587). Design is funded in FY 06/07, and construction in FY 11/12 at an estimated cost of \$22 million. Is there a map that I can view on line to give me specifics on where this expansion will intersect with Wilson Road?  
 Thanks  
 Kim McCall

Sent: Tuesday, August 07, 2007 4:14 PM  
To: 'asheystanford1@mac.com'  
Subject: SR 429 - Wekiva Parkway PD&E Study - 5940 Forest Ave.

Sonny,

I have reviewed the location of 5940 Forest Avenue, which the SC Property Appraiser shows as backing up to SR 46 and three parcels west of Center Road. If this is the correct location, as noted in the figure below, there would be no direct impact to this property from this proposed project. This figure is taken from the PowerPoint posted on the Expressway Authority website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> .

There would need to be improvements to SR 46, Center Road, Forest Avenue and Wayside Drive in this area to address access and other issues. There would not, under this concept, be a taking of this property.

Please bear in mind that this project is only in the Project Development and Environment PD&E) Study phase, so all concepts remain subject to change until we have an approved alignment. The recent mailing said we were looking to do formal public hearings in October, however, that schedule has now been pushed back to January, FYI.

We hope to conclude the PD&E Study in summer 2008 with approved alignment and interchange locations. Please understand that this project is not funded, so the scheduling of final design, right of way acquisition and construction are tentative at best, and highly subject to funding availability.

I hope this addresses your question. Please feel free to email or call with other questions or concerns.

(Email bounced back.)

4:14 PM

PIO called Sonny McClanahan 407-417-0040, who corrected email address to ashbystandord1@mac.com <mailto:ashbystandord1@mac.com> she asked what did I find out. PIO noted looked at the maps online including PowerPoint and no direct affect to their property, noted 417 veers south of their area at Designing women across from 12 Oaks RV Resort. She said she was familiar with that, but what about if it goes to SR 46. PIO said at this point our recommendation is to go to 417; it doesn't work going to 46, traffic models show that's not where traffic wants to go, and would be tremendous impact to that commercial area. She said that's what she thought. PIO noted some improvements needed to 46 and side streets but doesn't look like need a taking. She said thanks so much for your efforts and calling back.  
PIO resent info to correct address.  
--423 p.m.

8/6/2007

5:31 PM

PIO returned call to Sonny McClanahan who said her property is at 5940 Forest Avenue off Wayside (backs up to Wayside) and SR 46. It's the second entrance; not the entrance to fire station.  
Email ashbystanford1@mac.com  
PIO said would look up the property and get back to her, didn't think off top of my head

that it would be affected but just have to see for sure. PIO also emphasized we're just in the study phase, if study finishes summer 2008, 2-3 years each for design and ROW acquisition before get to construction. 2012-2015 for construction if we had the money, which FDOT does not. At current funding levels FDOT saying could be 10-15 years for construction.

8/6/2007 3:11 PM Sonny McClanahan MSG this is my second call, it's now 310. 407-417-0040 I need a return call re: expressway Wekiva thank you. I look forward to talking with you. Just need a few moments of your time.

8/6/2007 2:47 PM Sonny McClanahan 407-417-0040 I need a return call. I wish to speak to Mary brooks re: the paperwork that was sent to me re; the expressway that is going through my property. I've got to speak to someone. This is the first piece of paperwork that I have received and I need to know what's going on.

Contact Date	Time	Jerry McCollum Regarding	SC Public Works & Engineering
9/4/2007	4:43 PM	Jasmine James/QCA PIO called PBS&J and spoke with Michelle Maikisch about Debbie's need to know if an OOCEA PAC meeting is being held in their facility. Michelle said there was no meeting on that date but was in the process of sending out announcements for the next meeting. Asked who Debbie was with. Jerry McCollum. Michelle was very familiar with Mr. McCollum and said she would contact Debbie and relay the meeting information. The PIO gave Michelle her phone number, 407-665-5651.	
9/4/2007	1:25 PM	Jasmine James/QCA PIO called and left MSG for Michelle Maikisch to regarding Debbie's inquiry into a OOCEA PAC meeting on September 6. Is anything scheduled at the facility? Can reach me on Mary's cell phone, 407-702-8375.	
9/4/2007	1:14 PM	Jasmine James/QCA PIO returned the call. Debbie/Jerry McCollum is trying to find out the status of the OOCEA PAC meeting on 9/6. as soon as possible because Mr. McCollum has a conflict with that date. The PIO asked if it was project specific. Debbie said that it just said OOCEA. It was one of those things that at the previous meeting they had thrown the date out there and now has it as a recurring item on his schedule. The PIO asked for the meeting location. Debbie said it was to be held at PBS&J off of Keller Rd. in Attorney Rm. 417. The PIO said she would see what she could find and call her back. Debbie thanked the PIO.	
9/4/2007	12:50 PM	Debbie, Jerry McCollum's Secretary, called and left MSG: Wanted to see if there will be an OOCEA PAC Meeting on Sept. 6 from 9-5. Lennon? told me to call you. Please call back at 407-665-5651.

Subject: RE: SR 429-Wekiva Parkway PD&E Study-3545 Paulette St.  
Good afternoon, Angela,  
My name is Jasmine James and I am filling in for Mary while she is on vacation. I called and left a message for you earlier today. Under the current preliminary alignment concept of Wekiva Parkway, the 3545 Paulette Street property is located west of the alignment. The eastern boundary of the property is 480 feet away from the western right of way line, about one to two parcels away. This has been formally been approved by the Orlando-Orange County Expressway Authority yet and is subject to change. The final public hearings for Wekiva Parkway have been moved from October 2007 to January 2008  
The Expressway Authority website has been updated with the Preferred Alternative PowerPoint presentation that was given to the Wekiva Commission on June 1st and can be found at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>>, and has some good visuals of the alignment concepts.  
I hope this helps. Mary will return in two weeks.  
Thank you,  
Jasmine James  
Public Information

Angela McCurdy would like to know if there have been any significant changes from June to now with the preferred alignments that would affect her property listed at 3545 Paulette St.(Parcel # 2465) in Apopka. She also called the hotline this morning regarding if there would be another meeting to finalize the plans.

9/5/2007 11:46 AM Jasmine James/QCA PIO returned the call to Angela McCurdy and left MSG: Filling in for Mary Brooks while on vactaion. The alignments are still not decided yet. Public hearings have been moved from October 2007 to January 2008 and the study is now scheduled to conclude in Summer 2008. Hope the information was helpful. Otherwise, Mary will return on September 14. Thanked Andrea and said to call the hotline with anymore questions.

9/5/2007 11:26 AM Angela McCurdy/Coldwell Banker left MSG: Needs information on Kelley Park and Plymouth Sorrento for Apoka. Mary helped her last month with 429 extension information. Her main question is will there be another meeting to finalize the plans for that route. Number is 407-468-4544.

Joe,

I neglected to mention that there is a PowerPoint on the website that has the latest recommendations with regard to alignment and interchange alternatives. Have you seen it? It's the first text link at the top of

OOCEA web page <[http://www.expresswayauthority](http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml)

[com/futureplans/projectsandstudies/westernconnectors.shtml](http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml)>

Let me know if you have any questions after checking that out.

Joe,

I'm waiting for the latest maps to be finalized. They then must be reviewed and approved by the Expressway Authority Board. After that, we will post them on the website.

You are correct. Soil borings and other geotechnical work continues for pond siting and other activities related to the Project Development and Environment Study, which is being conducted by consultants for FDOT and the OOCEA.

To: 'dmcgregor@transland.com'  
Subject: SR 429 - Wekiva Parkway PD&E Study - Ramlee Holdings query  
David,

I'm responding to your query about approximately 61 acres at the northeast corner of SR 46 and Round Lake Road and potential impacts from the SR 429-Wekiva Parkway Project Development & Environment Study. According to the Lake County Property Appraiser's Office, there are a total of three parcels in this location owned by Ramlee Holdings property ID numbers 26-19-27-00300001301, 26-19-27-000300000200 and 26-19-27-000300000102).

If these are the correct properties in question, and with the widening proposed in this area to the north side of the SR 46 corridor, there would be some impact to the southern portions of the two parcels closest to Round Lake Road (note the blue line in the sketch below). The road in this location would be a four-lane, divided at-grade arterial. However, the project footprint widens about 2/3 of the way through the middle parcel and throughout the southern portion of the easternmost (third) parcel as the road elevates, for a potentially larger impact (note the thin yellow lines indicating a wider right of way).

Please keep in mind we are only in the study phase and these alignment alternatives are conceptual and subject to change. We anticipate bringing forward the recommendations for preferred alternatives, which can be viewed in a PowerPoint presentation on the project website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> on the Expressway Authority website, along with other information about the project. We are shooting to have public hearings on these recommendations in January 2008, and to conclude the study with an approved alignment and interchange locations in summer 2008.  
I hope that helps. Please email or call with other questions or concerns.  
Mary Brooks

10/4/2007 6:14 PM PIO returned call to David McGregor 407-341-5557 he's looking at 61 acres at SR 46 and Round Lake Road, NE corner, just didn't know when ... how many decades in the future ... I understand the road is going to be realigned? PIO noted we're doing study, which will finish in summer 2008. But FDOT doesn't have money programmed for next phase, final design. At current funding, estimates are that it could be 10-15 years before start construction. He said the property they're looking at is in Lake county, prop ID 26192700300001301. PIO said I'd have to check the location , but doesn't sound like there would be any impact except for widening SR 46 to four lanes. He said the owner said we might have been looking at some retention there. PIO said that's possible, will research and get back to him. Email him at dmcgregor@transland.com <mailto:dmcgregor@transland.com>. He said he'd appreciate anything you can find out.

10/4/2007 3:31 PM David McGregor called and left MSG I need some information on the western beltway, I have some property I'm looking at on SR 46. Could you please give me a call 407-341-5557 thank you

4/19/2007 9:21 AM \_From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, April 19, 2007 9:21 AM To: 'David McGregor' Subject: RE: Western Connector David, We do not have a schedule for construction of the Wekiva Parkway as this project is not funded. We hope to have formal public hearings to review the preferred alignment alternatives around September of this year in each of the three counties, and then finish the Project Development and Environment (PD&E) Study by the end of this year. The Expressway Authority, which is doing the Orange County portion, has the funding to go from there into final design, which takes 2-3 years, and a little money to begin right of way acquisition. There is no money currently for construction of the Orange County section. The Florida Department of Transportation, which is doing the Lake and Seminole County portions, has a little money for right of way acquisition but that's it. The FDOT does not predict funding would become available - at the current rate - for perhaps 5-10 years. The best guesstimates at this point regarding starting construction, given that the project is currently not funded, would be 5-10 years on the Orange County section, and 10-15 years in Lake and Seminole counties. That of course could change if federal or other funding became available. You can find more information on the Wekiva Parkway by logging onto the Expressway Authority website at [www.expresswayauthority.com](http://www.expresswayauthority.com). On the entry page click on the "corporate site" button on the left side of the page. On the home page under the "construction update" headline, click on the highlighted text link for the "Western Connectors." That will take you to the Wekiva Parkway page. You can find the maps from the last public workshops and other information there also. We hope to have some updated maps showing alternative refinements posted soon. I hope that helps. Please feel free to email with other questions Mary Brooks

Regarding

From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com]

Sent: Thursday, August 09, 2007 11:38 AM

To: 'Jack McIntosh'

Subject: SR 429-Wekiva Parkway PD&E Study - 110 Wekiva Park Dr.

Jack,

As we discussed, we are still in the Project Development and Environment (PD&E) Study phase of the Wekiva Parkway project. The SC Property Appraiser shows your property at 110 Wekiva Park Drive on the north side of SR 46 approximately three parcels east of the Wekiva River.

The existing State Road 46 corridor through there is about 200' wide. The Wekiva Parkway concept being developed - elevated roadway with frontage roads on each side - would require an additional 70-100 feet of width. We looked at alternatives to either widen the SR 46 corridor to the south, or to the north.

Due to the high residential impact on the south, we are recommending widening to the north side of SR 46, so there would be a need for approximately 70' -100' of frontage from the property in question.

A map indicating this can be seen in the PowerPoint posted on the Expressway Authority website at <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/PreferredAlternative.pdf>> .

Please bear in mind that all concepts remain subject to change until we have concluded the PD&E Study with an approved alignment. The recent mailing said we were looking to do formal public hearings in October, however, that schedule has now been pushed back to January, FYI.

We hope to conclude the PD&E Study in summer 2008 with approved alignment and interchange locations. Please understand that this project is not funded, so the scheduling of final design, right of way acquisition and construction are tentative at best, and highly subject to funding availability. At the current funding levels, it could be 10 - 15 years before the Florida Department of Transportation would have the money to build its portions of the project in Lake and Seminole Counties. If federal or other funding became available, it would affect that schedule.

I hope this addresses your question. Please feel free to email or call with other questions or concerns.

305-453-5399 fax

8/2/2007 4:00 PM Jack McIntosh 407-474-4762 called and thanked me for the previous info. He said they're at 110 Wekiva Park Dr on the north side of SR 46, east of the bridge. They're right on 46 and was wondering about impact. PIO noted corridor through there is about 200' wide, and we need 70-100 feet to be able to fit in the parkway and frontage roads. PIO noted due to high residential impact on the south, we are recommending widening to the north, so he'd be looking at about 70' impact or so. PIO noted PD&E and overall schedule and funding challenges. He said its good to know timeframe, but he has been trying to sell the property and people won't touch it once they hear about the road coming. PIO noted I can email him info that he can share with potential buyers. He said he would email me his info and would appreciate that.  
He said there's a schedule graphic on the website on the page at the bottom that still says the study was to finish last spring. PIO apologized for the error and said will correct it.

7/31/2007 3:39 PM PIO returned call to Jack McIntosh/property at 46 and Wekiva River. 407-474-4762, PIO left MSG noting recent info posted to website so curious where he was looking. Also noted can email me with property in question address or parcel ID number, or other questions.

7/31/2007 11:46 AM I got your name and number from OOCEA website. My name is jack McIntosh. I own property at 46 and Wekiva River. Looking at the website and trying to follow along and it said the PD&E study should finish spring this year. I still haven't heard any more and there doesn't seem to be any update on the website, wondering if you've got any info for me 407-474-4762 thank you very much

Contact Mary McKeever Keller Williams RealtyRecord Manager  
11/28/2007 11:00 AM PIO returned call to Mary McKeever, who asked when we were going before the SC commissioners? PIO noted we did an update presentation on Nov. 13, but I didn't attend because I had a conflict (408 east public workshop). She said she did not receive any notice of the meeting. PIO noted it was the regularly scheduled monthly SCEA meeting, we just provided an update. She asked what the county's decision was? PIO noted I could not attend, and hadn't heard anything about commissioner comments. She asked what happens next? PIO noted shooting for public hearings on the recommended alternatives in late February, maybe March. PIO asked and she said she had seen the latest maps on the Web site. She said what happens after that? PIO noted any revisions based on public feedback from hearings would be done, and then go into agency approvals, probably summer and fall 2008. she said that's what she needed and thanks.

11/28/2007 9:57 AM Mary McKeever 407-688-9283 called and left MSG 321-231-4248 I want to talk to you about the Wekiva extension from I-4 to Wekiva river. I wanted to get a timeframe ...for it to be presented to SC commissioners. I'm sure you probably still have your hand in it. I tried a gentleman by name of Brian Stanger and he is not in; he's in a meeting.

Contact		Matthew Miller	Realty Capital
Date	Time	Regarding	
10/24/2007	3:16 PM	<p>PIO responded to Matt Miller/Realty Capital: Hello Matt,</p> <p>The OOCEA Board received an update today at the monthly meeting on the Wekiva Parkway. The Board approved moving forward with the recommended preferred alignment alternative to public hearings in late January or February. We are still hoping to finish the Project Development &amp; Environment (PD&amp;E) Study in summer 2008. The Expressway Authority has the funding and plans to move into final design on the Orange County portion shortly thereafter, by late 2008 or early 2009. Final design will take 1.5 - 2 years, and during that time they will begin right of way acquisition. However, the OOCEA does not have the funding to buy all of the OC property, nor to begin construction. So schedules remain tentative at best. If funding remains as it is, those subsequent phases would not be funded until the next five year work plan, or after 2012.</p> <p>For the Lake and Seminole County portions, the Florida Department of Transportation continues to indicate they will not have the money, at current funding levels, for construction for 10-15 years. Alternative funding is being investigated, including federal</p>	

funds, public-private partnerships, and whether part or all of the project should be taken up by Florida's Turnpike Enterprise. Again, the schedule for the project remains highly speculative based on the availability of funding. The last estimate put this project cost at \$1.7 billion. We are in the process of updating that estimate, and will not be surprised if the cost has increased by now. That's what's driving, or not driving as the case may be, the schedule. I hope that answers your question. There really isn't any more definitive info at this point on the schedule given the tremendous funding shortfall.

Contact		Paul Moczynski	Real Estate Research Consultants
Date	Time	Regarding	
5/2/2007	3:58 PM	Paul Moczynski, real estate research consultants, 407-367-2105 called asking when Wekiva Parkway would be finished? PIO noted still in PD&E stage, don't have alignment, went over overall schedule and funding challenges, looking at 10-15 years out if funding becomes available. He said we've been retained by SC to investigate unrelated issue about meeting facility in I-4 corridor, trying to see if 15 years down the line if there would be any impact from Wekiva Parkway. PIO noted we'd be sending out some info in the next 4 weeks or so, would he like to be on the mailing list? He said yes, send info to 14 E. Washington St., Ste. 500, Orlando 32801, Paul@ercinc.com

Real Estate  1368111 0006  28 19 28 0100 091 00100  Mt Plymouth Lots 1, 2, BLK 91 PB 8 PG 85  ORB 2483 PG 2093  Monks, Edward  34 Jardin Dr.  East Haven, CT 06513-1318 tele: 203-468-1782  This is in reference to Wekiva Parkway (SR429)/SR 46 Realignment Project Development and Environment Study. Please call me or send me the information we talked about.  Thank you.</p>
11/7/2007	3:15 PM	<p>PIO returned Ed Monks call, he said his parents died and he inherited property, has never been there, doesn't know exactly where it is. He wanted to know effect. PIO asked if he was referring to the July mailer stating public hearings in October? He said yes. PIO noted those hearings have been moved to late January-February, just FYI. PIO asked for property location to check potential impact from latest alternative? He said he didn't know the address, just had info from the Lake County tax bill. PIO asked him to send me the property or parcel ID number, and the name of person it's listed under. He said it's in his name, not sure which number on bill was the parcel ID. PIO described should be a series of numbers separated by hyphens, ranging from 2-6 digits. PIO confirmed he had my email address from the letter; he said yes. He said he would send the info.</p>
11/7/2007	3:01 PM	<p>Ed Monks 203-468-1782 called, I own two lots in Mt. Plymouth, I'm up here in Connecticut where my taxes are sent to. I had a mailing that parkway going through this area and it said to call you to get some info. I think there were some maps that could be sent, off the internet possibly. I'd like to speak to you as soon as possible. I got this quite a while ago ... I was meaning to call you sooner.</p>

Mary,  
Thank you for all your help. The website is exactly what I needed. I have 1 question for you; At this point is there a "proposed" on/off interchange at Ponkan Road in Apopka? The PowerPoint is a little ambiguous in that it discusses a recommendation that the local access interchange should be located at Kelly Park Road. What is ambiguous is that I can't tell if this is in addition to the interchange at Ponkan Road or in place of. You have been more than helpful, and I thank you for it.

Subject: SR 429 - Wekiva Parkway PD&E Study - Website links

Jared,  
 Glad we finally connected. You can access information on the State Road 429 - Wekiva Parkway Project Development and Environment (PD&E) Study on the Expressway Authority website at [www.expresswayauthority.com](http://www.expresswayauthority.com/) <<http://www.expresswayauthority.com/>>.  
 On the entry page, click on the "corporate site" button on the left, which will take you to the home page. There under the headline "Construction Update" you will see a first paragraph of text with "Western Connectors" highlighted. Click on that highlighted text link and that will take you to the Wekiva Parkway page.  
 There is a lot of general information on this page, as well as at the top of the page are several text links. The first link takes you to a recent PowerPoint presentation that shows the latest recommended alignments and interchange locations. The second link takes you to the page with all of the alternatives maps from the last public workshops.  
 I hope that helps.  
 Mary Brooks

8/9/2007	9:22 AM	PIO returned call to Jared Moon 727-239-5180 who said he was a developer possibly looking at going into that area. I understand only in the study phase, but do you have idea of where it would go or where interchanges would be? PIO said yes, all of that on the OOCEA website, maps of alternative alignments and interchanges from last public workshops. PIO noted I'm waiting for updated maps now. PIO gave OOCEA web address and said I'd email him the text links to find info. He said he'd appreciate it and thanks very much. PIO said if he has questions after looking at info, he can call or email me. Email jmoon@paradisdev.com
8/8/2007	2:47 PM	Jared Moon MSG looks like we're playing a little phone tag. Got your MSG last night, appreciate you call me back, was on the other line. ... Still trying to get little info on extension of 429 or whatever toll road you guys have planned in the future through the Apopka area. If you can give me a call back I'd appreciate it. 727-239-5180 thank you
8/7/2007	4:38 PM	PIO returned call to Jared Moon 727-239-5180, left detailed MSG that all maps, PowerPoint, etc. available on line, gave web address and text links, noted waiting for updated PDF's but preferred is in the PowerPoint. Noted having trouble with cell, so can try calling me back or shoot me an email with questions, left contact info.
8/7/2007	3:05 PM	Jared Moon called and left MSG I actually got your name and number form FDOT main switchboard. Trying to get some info re: extension of 429 north of 441 up through the Apopka area. I understand that's under review, not currently in design. Would like to get a grasp of what the possible plans are If possible would like to come in and sit down and look on a map to see what you guys have planned. 727-239-5180 thank you and I look forward to your call back

My duties have expanded threefold: in addition to my projects, I also have been serving as the interim OCEA Communications and Marketing Director for the last three-plus months, so things have been hectic to say the least. But I wanted to let you know that I got your message, and I mentioned in last week's project team meeting that you were looking for an update. Gary Skaff with PBS&amp;J, the supervising consultant on this project, is going to get in touch with you soon; he said he needed to get some more information on the Greenplace property concepts and then would get back to you. Take care and thanks for your patience</p> <p>Mary Brooks</p>
2/16/2007	3:21 PM	<p>From: Mary Brooks Friday - February 16, 2007 3:21 PM To: Alice Berkley@myfloridahouse.gov</p> <p>Subject: Re: next public hearing on Wekiva parkway</p> <p>Hello Alice, Ken Morris left a message for me Wed. right as I was heading to the project team meeting, and I just have not had time to get back to him, but we will. The tentative schedule for the formal public hearings is May; however that is subject to change until we get through all of these city, county and state officials' meetings to get them to weigh in and help hone some preliminary recommendations. We will be updating the Expressway Authority website soon with some of this information, and will send out a project update to the community, just FYI.</p> <p>Mary</p>
2/16/2007	2:58 PM	<p>From: "Berkley, Alice" &lt;Alice.Berkley@myfloridahouse.gov&gt; Friday - February 16 2007 2:58 PM To: "Mary Brooks" &lt;brooksm@oceca.com&gt;</p> <p>Subject: next public hearing on Wekiva parkway</p> <p>Hello Mary, do you know when the next meeting will be held? Harvey and Ken Morris's property may be taken for the road, so they are concerned and need to know when the next meeting will be held. Thanks for your reply.</p> <p>Alice Berkley Chief Legislative Assistant to State Representative Bryan Nelson District 38, 407-880-4414, or Suncom 354-2023 Capitol, 850-488-2023</p>
2/13/2007	11:01 AM	<p>Ken Morris/2121 Haas Road left MSG the individual who had political decision to put the s Wekiva Parkway through my house and my property. I gave you some input several months ago on that and I just wanted to check with you and see what the latest info is on the EA route to see if anybody had thought of changing that for the reasons I gave in my information, to put it on the county line where it ought to be in the best interest of all parties involved. Please give me a call 407-467-2799 I would like to discuss where we stand on this issue at the moment, so I know whether or not I should taking further information at this time.</p>
Contact Date 11/6/2007	Time 3:44 PM	<p>Aneeta &amp; Bob Morton</p> <p>Regarding</p> <p>PIO returned call to Bob Morton 321-777-7436 h or c 321-960-5405, said main reason for calling was when was meeting, and understand you said it was not set, and wanting to be on mailing or email list. PIO noted we have Aneeta's info in the database, believe she attended one of the public workshops and submitted a comment form. He said that's correct. He said it's my wife and brother and sister that own the property. He also said her sister's address needs to be added, ronmck3@cox.net &lt;mailto:ronmck3@cox.net&gt;</p> <p>Dolores and Ron McKelvy.</p> <p>PIO noted they would get a newsletter with the meeting info, but not yet set, and maybe email notification.</p> <p>He said there was recent posting on website of PowerPoint with recommendations, who has to</p>

Critical question, the recommended alternative goes directly through the property these people own, because of that would OOCEA be interested in buying it? 44 acres. The people really really want to sell, my wife's sister is 70 and not in good health, and would just as soon get money out of it now even if they have to get somewhat less, but a fair price. The brother of the three is not as anxious to sell but has agreed that if it's \$45,000 an acre or more that he would sell.

Slight complication is it is currently ... it borders the OC line; it's in OC. The owner of a piece of property to the north in LC also wanted to sell. They have joined together because the two pieces together would be way more useable and sellable; they went in with realtor who has listing until January. If anything would happen before January that other parcel would be involved also. The other piece in LC owned by Jerry Jones (?-not sure I caught the name right) Is 10 acres.

PIO noted the OOCEA has discussed advanced acquisition of very large parcels, mainly developments that would be hit regardless, to buy them before developers start putting houses on them. He asked was it worth contacting anyone about it now? PIO noted that's not happening any time soon, we at a minimum have to get through the public hearings, find out if there is any major opposition or tweaking that needs to be done before going through agency approvals. PIO noted I would relay his request for advance acquisition to the project team. He said okay, tried to get a feel if there was likely to be major change likely in the alignment? PIO said I would be surprised, given the extensive coordination we have done over the last nearly 3 years with various agencies, property owners, developers community organizations, they've all had a chance to weigh in on options and know that we've tried to balance these alternatives between impacts to the community, the environment and engineering requirements. He said okay, thanks for getting back to him, he will stay tuned.

11/5/2007 12:51 PM Bob Morton called and left MSG you should have info from Deana Leffler. I called last week while you were out. My wife and her sister has property that may be affected by the 46 bypass. They're trying to get info on the meetings that might be coming, and also would like to get on the email or mailing list you might have. We sent an email on this. I would appreciate a call to get what info you can  
Appreciate it. 321-777-7436 h or c 321-960-5405 Please give us a call.

Satellite Beach, FL 32937

10/30/2007 3:00 PM PIO Deana Leffler spoke to Mr. Bob Morton. His wife is Aneeta. They have family property and want to find out if there property will be aquired. PIO noted they want to get in touch with ROW. PIO said she would have Mary Brooks follow up when she returns from vacation.

Contact Margaret and Victor Moss

Date Time Regarding

12/11/2007 5:48 PM PIO returned call to Margaret Moss 407-245-5542, left MSG that our lawyers have not sent out any letters about buying property; we don't have an approved alternative yet, only property purchased so far is large conservation land. PIO noted we have recommended preferred alignment alternatives, have to get documentation done to go to public hearings hopefully in Feb.-March, after that we'd do any tweaking based on public input, then agency approvals, with approval hopefully summer-fall 2008. PIO said she can call or email me with other questions, left my email address.

12/11/2007 2:07 PM Margaret Moss called and left MSG I live on SR 46 and I just received letter from an attorney to represent us for land acquisition for the Wekiva Parkway. I'd like to get a little more info on where we are with that.  
407-245-5542 thanks.

Subject: Mary, I am writing this with much dissapointment in the lack of cooperation by yourself as a public servant. On June 22, 2007, I had requested in person from your office and yourself all files pertaining to the OOCEA's purchase of the Silvestri Property. By Florida Statutes this is information available to the public, and policy of the OOCEA as posted in the lobby office also states the availability of such information to the public. After numerous excuses and stonewalling by your office, I was informed by you that this information was only available at the Law Office of Broad & Cassell. This was related to me after I had waited for over 1 hour and given numerous excuses pertaining to the lack

of access to requested files. When I at that point offered to go to the offices of Broad & Cassell to view the files, you then proceeded to inform me that I would not be able to have access to such information. This information would be made available in the next few days by y This is my second formal request to view these files, the next request will go to both the press and the FDLE.Rich Mozdzer

6/22/2007 12:40 PM Sherry/OOCEA asked for PIO assistance with gentleman requesting Silvestre property file. s She said Pam is out sick today, she doesn't know where it is. PIO noted we'd need the file number. She said she told him to contact Deb/PBS&J, she might know.PIO spoke with Rich Mozdzer in the lobby, noted Pam is out, would need to know the file number to pull the file. He was indignant we could not immediately pull the file for him. PIO said we would get him the info he sought, just have to track down the file number.PIO left MSG with Deb/PBS&J asking if she knew the file number.He asked then who else would know about the file? Sherry said maybe Joe Berenis but he is out at meetings. Sherry called Joe, and PIO explained what Mozdzer was looking for. Joe said Bob Mallett would have the file; we don't have that one here.PIO relayed that to Mozdzer, who was incredulous that we didn't have our own public record. PIO noted we get copies when the files or projects are finalized, but this is just in PD&E and not finished. PIO left MSG for Bob Mallett to call re: getting the file for review. Mozdzer accused us of giving him the runaround, pulled records statement from the lobby case and said it says right here you have to give it to me.PIO noted we have given him everything he's requested in the past, and we will get this file for him, but it will not be today. PIO said I can get with Bob Mallett to either arrange time for him to see it there, or Bob can send it here for him to review. He complained he will have to make another trip to Orlando. PIO noted next time he can call or email ahead of time so we can arrange it beforehand and he won't waste a trip. PIO gave him my card, noted he already has my contact info and we will get back to him.

5/30/2007 9:20 AM Rich Mozdzer 727-409-0253 called and asked when the next meeting was on the Apopka portion of the Wekiva Parkway? He said not the public meeting, but they gave a presentation to Bob Mallett of Broad & Cassel, and Bob told them there was a meeting coming up on either June 8 or 11. PIO noted we just had the board meeting May 23, maybe he was referring to a committee, maybe the ROW committee? He said that sounds

like it and wants to know when the meeting is. PIO said I could check and either call or email him. He said email both [bridlepathllc@aol.com](mailto:bridlepathllc@aol.com) & [richmozdzer@aol.com](mailto:richmozdzer@aol.com)

3/13/2007	6:10 PM	From: Mary Brooks Tuesday - March 13, 2007 6:10 PM To: <a href="mailto:bridlepathllc@aol.com">bridlepathllc@aol.com</a> Subject: SR 429-Wekiva Parkway PD&E Study - Silvestre Property Richard,Apologies. In going through my notes I realized that I might not have gotten back to you about the query on the Silvestre property (6868 Plymouth Sorrento Road). The Expressway Authority purchased this property for conservation for \$7,953,200. Is that what you were looking for? Let me know if you have other questions.Mary BrooksOOCEA Interim PIO &Public Information OfficerSR 414-Maitland Blvd. Extension Project &SR 429-Wekiva Parkway PD&E StudyC 407-702-8375F 407-381-9038BrooksM@oocea.comMBrooksSR414@cfl.rr comwww.ExpresswayAuthority.com
3/2/2007	2:18 PM	Rich Modzer 727-409-0253 said he was trying to find PIO office on University Boulevard. PIO noted that's just a mailing address, I'm here at the OOCEA building. He said they understood they could look at the latest maps for the 429. PIO noted all of the workshop maps are on the website, and I do not have updated maps yet. He said the ones on the website were hard to see; don't you have an exhibit or big board? PIO noted I did but not with me today, looked briefly around the office to see if someone else had one but didn't see one. PIO asked if he was looking for something specific I could research for him.He said they want the latest information, heard it was going at Kelly Park in OC and wanted to know if that was final, heard there was meeting Feb. 7 at city of Apopka for part of it. PIO noted the traffic models and impact assessments point to Kelly Park, but we don't have any approval or authorization on that, in fact going before OC Commission on March 6, I think, and hope to get some direction from them on that. PIO noted we have to get through all of these meetings and getting input from various local and state officials, each meeting results in shifting the alignment here or there, etc. PIO noted as soon as I get the updated maps, we will post them. He said you said you were going to have a decision already by now. PIO noted yes, the schedule has been pushed out several times as well work through a number of issues, lot of complexities on a 25 mile corridor, and trying to get through all of these officials' meetings. He said they are paying on their property and can't do anything with it, the delay is costing them. PIO noted I understand that, it's a common situation throughout the corridor, but there is a process that we have to get through.He said he heard you guys bought property at 6868 Plymouth Sorrento Road. PIO noted wasn't in my office, where was that? He said up by Haas. PIO noted we went in on some properties with OC Green place, Silvestre, Strite and Fazio, for conservation. He said he went on tax assessor's website and it said we owned the property but didn't say how much we paid for it. PIO noted I'd have to research that and get back to him. He noted it was the Silvestre property and 192 acres, if that helps. PIO to fax f407-880-8224 or email <a href="mailto:info@bridlepathllc@aol.com">info@bridlepathllc@aol.com</a> --230 p.m.

Attached please find the overall viable alignment alternatives for the SR 429-Wekiva Parkway Project Development and Environment (PD&E) Study. As we discussed these are being further reviewed and revised as we work toward a preferred alignment, which we hope to bring for formal public hearings in May or June. There is additional project information on the Expressway Authority website at [www.oocea.com](http://www.oocea.com).

On the entry page, click on the "corporate site" button. On the Home page in the middle under "construction update" click on the highlighted text link for the "Western Connectors" and that will take you to the Wekiva Parkway page. Please feel free to call or email if you have other questions. Mary Brooks

3/13/2007	9:09 AM	PIO again tried to call Mary Muellman 407-971-0558, let her know the property of interest 104 River Oaks Cir. Would be approx. 300-400' from roadway. She said so right about where the road is now? PIO noted we would be holding the ROW line on the south side of SR 46, so yes. PIO noted the exact distance would be nailed down in the next phase, which would be final design. She said well thanks for getting back to me; that saves me a lot of anguish and pain.
3/6/2007	3:25 PM	Mary Muellman 407-971-0558 called and noted we'd spoken earlier, she found the website and was looking at the map. She asked where Wekiva Parkway would be compared to SR 46 where it crossed the Wekiva River from Orange to Seminole County? PIO noted we're replacing the 46 corridor with the parkway, crosses the river between lake and Seminole. She indicated map she was referring to, which was on the work plan page, not the actual project exhibits. PIO oriented her to correct river crossing, noted where the county border was. She asked several times where the road would be in reference to 46, and I told her it would replace the 46 corridor in that area, that was the intention of the WPPA. She asked if it would be high up? PIO said it would be elevated in that area. She said they're looking at a house close to 46, 104 River Oaks Cir. In River Oaks. She said where 46 is now we hear terrible noise, so if it's going to be in the same place I know we don't want to buy there. PIO noted we will have to widen 46 corridor to one side, at this point leaning toward north widening. PIO noted project not funded, at least 5-10 years out. PIO to research location and get back to her with distance from planned road, noted it would take a day or two. She said she appreciated the assistance.
3/1/2007	2:20 PM	Mary Muellman returned call, said she saw I called. She said she talked to Karen, she was looking at 5 year plan on the website, heard there was going to be a turnpike up by the Volusia- Seminole line. Mandm121954@aol.com someone told her that where it's running along 46 that there was going to be a turnpike? PIO noted we have info on the website on the Wekiva Parkway pages including maps; did she want me to walk her through find those? She said her computer was too slow. PIO noted at the Volusia-Seminole county line we previously had some alternatives that would have veered off SR 46 up to the area of the St. Johns River, but all of those have been eliminated, only alternatives now to stay on 46 or drop south from 46 to 417. She said the reason in hurry we would like to buy the house in River Oaks, but if there's going to be a turnpike there that will make a big difference. PIO noted then she's talking about the Lake-Seminole county line at the Wekiva River? PIO said in that case yes, we are going to be on the SR 46 corridor in that location. PIO noted project not funded, so looking at 5-15 years for construction. PIO asked if she'd like to be on the mailing list? She said yes, very much: Mary Muellman, 787 Long Lake Drive, Oviedo 32765. PIO to email her a map showing project corridor and viable alternatives, noted it's a large file and might take some time to come through. She said okay and thanks for the info.
3/1/2007	8:55 AM	PIO called back Mary Muellman 407-971-0558 - no answer or machine.
2/26/2007	10:59 AM	Mary Muellman 407-971-0558 I have question and was directed to you, about expansion around Sanford over at 46, please give me a call. Thank you

Contact		Claudia Muse
Date	Time	Regarding

7/23/2007 9:23 AM Claudia Muse 407-322-8688 called and said she heard a rumor. She lives off SR 46 on Maureen Drive, 3 miles west of I-4 in SC. She said rumor was that when this was built it will be a toll road? Is that true? We don't want to have to pay a dollar every time we go to town.

PIO noted FDOT is developing the LC and SC portions and EA the OC portion. PIO noted FDOT was not planning to build a toll road, however, they also won't have the money to build this road for years. So they are looking at various funding options, one of which is whether the FTE should build it instead. PIO noted issue with that is we know we'd have to provide some sort of local access. She said like a frontage road? PIO said something to address that issue, its part of the discussions. PIO noted nothing has been decided yet, just looking at options. She said so eh can go to these meetings and express her opinions? PIO said yes, and we will have comment forms there also. She thanked me for the info.

Contact		Ruth Myers
Date	Time	Regarding
7/23/2007	10:17 AM	Woman (did not identify herself but number matched Ruth Myers in database)

407-850-1010 called and said she got the mailer, Got newsletter in mail, on Apopka extension of 429, meeting Feb.

and was asking questions where we were going to be with regard to Plymouth Sorrento road, how were we going to get there from 429? PIO noted MBX realigning 429 to connect to 441 near Plymouth Sorrento Road and TL Smith Road. PIO asked if she had looked at the project maps on the website? She said no and continued asking questions trying to picture it. PIO noted if she has computer and internet access I can walk her through maps which will be much easier. PIO walked her through web links and helped her to get oriented. She was interested in Appy Road, said she drives by Plymouth Ridge. She was having difficulty orienting herself, said she's horrible with directions. PIO noted various landmarks and roadway orientation, noted recommendation was for Kelly Park road interchange, noted where we would cross Plymouth Sorrento Road for the systems IC. She began to get it and thanked me for the assistance.

2/5/2007	3:46 PM	From:	<Mark.Callahan@CH2M.com> Monday - February 5, 2007 3:46 PMTo: <GJSkaff@pbsj.com>, <berenisj@oocea.com>, <david.lewis2@ch2m.com> CC: <brooksm@oocea.com>Subject: Orange County

Folks,Renzo left me a message this afternoon and indicated that we are tentatively scheduled to present to the County Commission on Kelly Park vs. Ponkan Rd on Tuesday, March 6, 2007. It appears we will be in the Morning. He has suggested that we prepare a brief PowerPoint that reviews the interchange locations and assessments and close with a bullet slide of recommendations. He has asked that we let staff review the presentation in the next couple of weeks. Unfortunately I will be on vacation from March 1 through March 13 so we need to decide who will present.Mark

Contact		Jean Negrón
Date	Time	Regarding
4/20/2007	8:54 AM	PIO received call from 352-735-1171, woman did not identify herself (phone matched Jean Negrón in database). She said she lived in the area of Round Lake Road and SR 46, and info she saw said we were supposed to make a decision on the alignment in January or February. PIO noted the schedule had been pushed back considerably, still working through issues and meeting with officials to get their input, now looking at September for the formal public hearings. PIO noted for the alternatives along 46 in that area,

preliminary recommendation is to widen corridor to the north to minimize impact to residences on the south side of 46. She said her property is where it drops down from 46 toward the county line, one alternative went through her and another went beside her. PIO noted I was in the car, could she email me her information and I would see what I could find out regarding the latest alternatives and her property. She confirmed my email address, said she was looking at the website.

Contact		Lyle Nelsen	Rebman Properties
Date	Time	Regarding	
5/25/2007	10:28 AM	Lyle Rebman/Rebman properties	407-875-8002 called and asked if I was still doing project PIO? PIO said yes, am done with in-house OOCEA communications. He said he saw story about OOCEA doing bond issue and wanted to know if that would fund the Wekiva Parkway for construction? PIO said no, have money for design and some ROW, but Wekiva Parkway construction not funded in 5 year plan. He asked then when would it be funded, they have ea development that hinges on that? PIO said depends when funds become available, maybe if they're able to raise tolls. He asked when that might happen? PIO said after previous discussions said wouldn't even entertain it until audit comes back in June or July. He was thankful for the update but that's not what they wanted to hear.

Contact		Maria Nelson	Fowler, White, Boggs & Banker, P.A.
Date	Time	Regarding	
10/19/2007	9:32 AM	Maria Nelson said the question was in SC, along 46 we have a client before I-4 in the portion after Orange Boulevard. Are you doing any widening there? PIO noted that section already at least four lanes, we probably would have to do something to 46 right where the parkway drops off to tie it in, but don't believe we're doing significant widening to 46 east of that. She said her client got a letter from another lawyer saying we were widening it and they brought it to us, so I had to look into it. She asked about schedule, which I told her based on funding. She asked about specifics on widening, etc. PIO noted we're still in conceptual study phase; those details won't be hammered down for sure until design, FDOT doesn't have design funded, etc.

Mary,  
I had talked to the surveyors on the property I had asked you about 7200 SR 45. They have indicated that there is a right of way of approx. 100-200 ft. on SR 46. Do you know at this point if the project calls for extending the right of way when the road is widened or if the actual road widening on SR 46 will occur within the right of way?

8/20/2007

3:59 PM

From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]  
Sent: Monday, August 20, 2007 3:59 PM  
To: 'eolejnik@watsonrealtycorp.com'  
Subject: SR 429 - Wekiva Parkway PD&E Study - 7200 SR 46 query  
Edyta,  
It was nice speaking with you last week. As discussed, regarding your query about the property at 7200 SR 46 in Seminole County (which you said was near Lake Markham Road on the north side and backs up to the Yankee Lake facility). As we discussed, as part of the SR 429 Wekiva Parkway Project Development and Environment (PD&E) Study, we had to decide whether to widen the SR 46 corridor to the north or south (the existing corridor is 200' wide, but we need 275-300' for the proposed parkway). Also as noted, we did an evaluation and based on all the dense development on the south side, our recommendation is to widen the SR 46 corridor to the north side. So if the property in question is right on the north side of SR 46 in that area, you would be looking at 75-100' of frontage being needed for the project.  
Please be advised that we're still very early in the process as we're only in the study phase. We now expect to hold formal public hearings in January 2008 on the project alignment and interchange recommendations, with the PD&E study to finish with an approved alignment in summer 2008.  
The Florida Department of Transportation is developing the Lake and Seminole County

portions of this project, and does not have funding for future phases (final design, right of way acquisition and construction). So it could be possibly 8-12 years before property acquisition and 10-15 years before construction. That schedule is heavily based on the availability of funding.

Regarding the attorney's solicitation letter you received, the FDOT has not started right of way acquisition, nor formally determined which properties would be affected. If this property were to be affected, the property owner would be contacted by an FDOT representative or via agency correspondence.

Again, right now we're not doing anything other than trying to finish the study and explore funding options.

Mary Brooks

8/16/2007 4:32 PM

PIO returned call to Edyta Olejnik/Watson realty, in Seminole county right before lake Markham, it's on the north side backs up to Yankee Lake, what's gong to happen in that area? PIO noted we had to decide whether to widen to the north or south along that portion of 46 because corridor is 200', but we need 275-300'. PIO noted did evaluation and based on all the dense development on the south side, recommendation is to widen to the north side. So if property is right on 46 in that area, would be looking at 75-100' of frontage being needed for the project.

PIO noted however we're still very early in the process, only in the study phase, PD&E study to finish summer 2008. FDOT developing SC portion and does not have funding for future phases, so could be 10-15 years before construction. Schedule heavily based on funding. She said so it would be that long before they might buy property? PIO went through phases and estimated timeframes, noted usually at some point during final design they begin ROW acquisition, but again noted no funding for either of those activities. She said what about the attorney's letter? PIO noted attorneys often send solicitation letters out to property owners when they know a project like this is planned, some times they are not very clear or ethical in the way they do this, they make it seem like it's happening now or definite. PIO emphasized we are not doing anything now other than trying to finish the study.

She said she receives the mailings and got letter about public hearings in October. PIO noted that schedule has been pushed back to January now for the meetings.

PIO said I'd send her this info in an email to share with her client. She said she would appreciate it, thanks. [eolejnik@watsonrealtycorp.com](mailto:eolejnik@watsonrealtycorp.com) <<mailto:eolejnik@watsonrealtycorp.com>>

8/16/2007 1:45 PM

Edyta/Watson realty called and left MSG in regards to widening of SR 46 project. I'm calling re: lot at 7200 SR 46. Wanted to see if you have any indication if that was going to be taken by eminent domain? 407-474-0213 we have received a letter from an attorney claiming that property may be taken for the widening project. I just wanted to see if there was any final decision or approved information you can give me regards to that site. Thank you.

Richard Ornstein  
Regarding

Glickstein Laval Carris, P.A.

PIO returned call to Richard, let him know preliminary recommendation being considered but that's not final, still meeting with county governments and state agencies, working toward formal public hearings in May, schedule been changed with scheduling all of these meetings and trying to work through issues. He asked about portion of 46 in front of Wekiva pines Country Estates,? So no impact to Wekiva Country Estates? How people would get on and off, what about 46 to the west of CR 46A? He also asked about the 46A realignment; PIO noted various options reviewed but two remaining would take it a little

east of HCC. He asked about portions of CR 46A to remain and portion to be abandoned.

2/12/2007 1:28 PM Richard Ornstein MSG c 407-461-6619 I'd sent you an email couple weeks back about pending date for final path decision on the Wekiva expressway, which was expected this month. Wanted to touch base on when that might be happening. Understand you guys might be tied up with other issues. Hope to hear back from you as soon as possible. We're still looking for property up there and wanted a better feel for where that path might be before we make a decision on where we should decide on buying. Hope to hear from you soon.

Date	Time	Regarding	
12/10/2007	12:15 PM	PIO returned call to Jim palmer 321-228-6657, 407-862-2543 left MSG that there is lot of documentation at this stage that has to be finalized before we can set the formal public hearings, particularly that which has to be provided to FHWA. PIO noted we're shooting now for late February to March, though really want to hold it to February. PIO noted I'm sure he knows latest recommendations are on the OOCEA web site. Told him to call or email me with additional questions.	

12/10/2007 10:38 AM Jim Palmer 407-862-2543 called and left MSG calling to check on the public workshop for Wekiva Parkway, I know the website has been inaccurate for a year and a half about when that was going to occur. It keeps getting backed up every 3 months or so. Hopefully we're going to get to that in the immediate future and would like to know if it's going to be in Jan. or Feb. as we've been told several times. 321-228-6657

Contact		Steve Parker	The Rock Church
Date	Time	Regarding	
4/11/2007	9:17 AM	From: <Kathleen.Jorza@CH2M.com> Wednesday - April 11, 2007 9:17 AM To: <mark.callahan@ch2m.com>, <david.lewis2@ch2m.com> CC: <brooksm@oocea.com> Subject: Meeting with Rock Church Attachments: MTG SUMMARY Rock Church doc (48128 bytes) [View] [Open] [Save As] Mark and Dave, Attached is a quick summary of the meeting with Pastor Steve Parker of Rock Church. Kathleen Jorza, E.I CH2M HILL 225 E. Robinson Street Suite 505 Orlando, FL 32801-4322 Tel 407.423 0030 Direct 407.423.0001, ext. 222 Fax 407.839.5901 Kathleen.Jorza@ch2m.com A meeting was held on April 10, 2007 at the temporary office of Rock Church, 600 Rinehart Road, Lake Mary to discuss the alignment alternatives in Seminole County. After showing Pastor Steve Parker the Overall Project alternatives and briefly discussing the status of the project, the discussion moved to the Seminole County alternatives in the area that may impact the Rock Church. Pastor Parker expressed his support for the alternatives that will not require acquisition of the Rock Church (Viable Alternative, Alternative B, or Refined Viable Alternative 1). He stated that he would be adamantly opposed to any alternative that would take Rock Church and would be vocal about it. He said that Seminole County told him back in 2002 that Wekiva Parkway would never be built, and that he would consider a lawsuit against the county if the alignment takes the church. He does see the need for the project, and does support it, but not at the expense of the church. Pastor Parker said that the church will be open in approximately two weeks. He discussed the process of getting to this point. He said that it has taken four years to get the church built, and that he paid \$1 M for the property and had to give Seminole County the wetland area for \$1. He believes that it would be very difficult to find a similar property for the price the church paid for this one four years ago. He has also had a lot of opposition from the residents of Glades on Sylvan Lake, located directly behind Rock Church. They were not happy to have anything built, and Pastor Parker seemed surprised that we have not had	

any organized opposition from them. Pastor Parker asked how to stay informed on the status of the project and was given the web address for the Expressway Authority. Both Mary and Kathy gave him business cards and let him know that we would be available to answer any questions he may have. Kathy verified that he would be able to receive mail at the church location when the church opens, in approximately two weeks.

4/10/2007 4:00 PM

Kathy/Ch2m and PIO met with Steve Parker and his father Ira Parker of the Rock Church at 600 Rinehart Rd., in the Strang Communications building. Kathy went over the project corridor, noted various alignment and IC alternatives and some recommendations made Steve said they move into their church in two weeks. He asked about the elevation of the roadway? Kathy noted it will go up at bridges and come back down otherwise; frontage roads in SC will be at grade. She noted north-south 46 widening alternatives, no impact to them with north widening. He liked that. Steve noted the residents behind their church (Glades of Sylvan Lake) have been very hostile about any development going in on the Rock Church property, was originally going to be a bar. Kathy noted the viables and that due to Capri Cove and Tall Trees HOA's; we made some additional alternative adjustments Alt. A: we pushed out alignment away from Capri Cove and hit Lakeside Fellowship UMC property and part of Rock Church property. She noted this was NOT being recommended Alt. B: pushes more off Tall Trees, does not hit Rock Church and doesn't take Lakeside structure. This is one of the ones we're recommending move forward. This one hits 12 Oaks RV Resort. Steve expressed concern about their members being able to get to the church. He noted they started in 2004 and just now are getting in. he said they have people coming from Kissimmee, Daytona Beach, five counties represented in church. He expressed concern about having to change how they get in and out of the church. They just paid \$100,000 for a right turn lane into the church. Alt. C: would cause impacts to Rock Church; Kathy thinks it take the structure. This is not what we're recommending Steve noted there's no other piece of land like this in this area that's affordable. We would not be happy about having to sell. Already had to "sell" the county an acre for \$1 to be able to build here. Surprised we're allowed to build in this area. PIO noted requirements in the WPPA including having to buy 10,000 acres of land for conservation because of the environmentally sensitive nature of the area. He acknowledges the project needs to be done. They're not opposed to the highway. Refined Alt. 1: farther from Tall Trees, less impact on Designing Women, no impact to Rock Church Refined Alt. 2: pushed off 12 Oaks and Capri Cove, but hits Rock Church and cuts off Designing Women Steve said there's no reason to hit us when you have vacant land across the street. PIO noted that's why we're recommending the north widening, to minimize residential impacts. Steve said pulling out now, it's pretty busy ... I understand the need for the freeway. We bought the land in 2002. Met with county and asked them then about this project. We were hearing rumors. But SC said it will never happen. But after the closing we asked again and they said well, it could happen but maybe 10 years from now. Kathy noted 2002 was when WRBTF was in effect, just had study area. PIO noted what SC initially referred to was probably the heated debate between the various factions, environmentalists, etc. PIO and Kathy went through schedule, noted now looking at September for public hearings. Study may finish late this year, early next. Kathy said once alignment approved by stakeholders (DEP, SCEA, etc.) and FHWA, then they hope to start advanced ROW. Hopefully have preferred alternative in June-July. Steve said he lives in Eustis; noted SR 46 was one of the deadliest roads in Central Florida. (Sentinel story). He said his niece hit a black bear in November; it tore her car up and killed the bear. We gave him our cards, noted we'd be sending out info closer to hearings and he should check the website for updates.--445 p.m.

3/26/2007 9:08 AM From: "Mindy Barnes" <Mindy@therockofcentralflorida.org> Monday - March 26, 2007 9:08 AMTo: "Mary Brooks" <brooksm@oocea.com> Subject: RE: SR 429-Wekiva Parkway PD&E Study - The Rock ChurchAttachments: Mime.822 (2134 bytes)  
[View] [Save As] Hi Mary, Pastor Steve said that he will be able to have an office meeting in the beginning of April. I'm looking at Tuesday, April 10. Please let me know if this day will work and we'll set up a time. Thank you, Mindy

3/21/2007 10:13 AM PIO spoke to Mindy / The Rock Church 407-688-2445 re: providing a presentation on how the Wekiva Parkway could affect their new church on SR 46. PIO asked whom to speak to about scheduling a meeting and she said she would be the one. PIO asked for dates and times in the evening to provide presentation for their congregation and board. She said they're really busy with the building project, would need to be a month or two out because don't know where they will be from one day to the next. PIO said we could do the presentation wherever they meet now? She said we are at Strang Communications at Rinehart road in Lake Mary, but we have to pay every time we use the room. PIO said we can do something tentatively... She said let's schedule for June because we will definitely be in the building by then, say mid June 12 or 13. PIO said will run that by the project team and shoot her an email. She said send to mindy@therockofcentralflorida.org PIO asked the pastor's name? She said Steve Parker and she will let him know the date and time. PIO also gave her my name and number in case she needs to reschedule or has questions.

3/21/2007 9:54 AM From: Mary Brooks Wednesday - March 21, 2007 9:54 AM To: mindy@therockofcentralflorida.org Subject: SR 429-Wekiva Parkway PD&E Study - The Rock Church Hello Mindy, It was good speaking with you earlier. The Florida Department of Transportation project manager for the Wekiva Parkway is concerned that waiting until June might be too late in the process to meet with you all and get your input. Would it be possible to instead do a small office meeting with the pastor and a couple of other church leaders some time during the day in the next month or so? Let me know- thanks. Mary Brooks

3/19/2007 10:40 AM PIO again tried calling Rock Church, rang and rang, no answer or machine.  
3/19/2007 10:26 AM PIO called Pastor Mike / The Rock Church 407-688-2445. Their office hours are Monday-Friday 8am-4:30pm. Phone rang and rang but no answer. PIO checked internet but no website found for church. Went on SCPA website to get owner info, Rock of Central Fla., parcel id no. 25-19-29-300-0290-0000, property address only given as W. Highway 46, but mailing address is 5224 SR 46

Sent: Wednesday, November 14, 2007 2:43 PM  
To: 'tod parker'  
Subject: SR 429 - Wekiva Parkway PD&E Study

Tod,  
Please be advised that we are still in the Project Development & Environment Study phase for the Wekiva Parkway, so we do not have an approved alignment and no property can yet be acquired (other than large conservation parcels mandated by the state). We are shooting for formal public hearings on the latest recommendations for alignment and interchange locations in February or March. These recommendations are available for review on the Expressway Authority website at [www.expresswayauthority.com](http://www.expresswayauthority.com) <<http://www.expresswayauthority.com>> .  
After the hearings, any tweaking would be done and the preferred alignment alternative must then undergo agency approvals. We hope to finish the study with an approved alignment by summer-fall 2008. It has been discussed that some advance acquisition fairly large parcels that are in danger of being developed into subdivisions, etc.) could possibly begin after that time, but that is not certain.  
As this project is not fully funded by either the OCEA, which is doing the Orange County portion, or the Florida Department of Transportation (Lake and Seminole portions), there is no set schedule for property acquisition or construction. Once the study is complete, the project would have to first go through final design (usually 2-3 years) before we could begin buying individual properties. The Expressway Authority has money for design and some right of way acquisition programmed over the next five years. Construction of the

Orange County portion, at the current funding levels, would have to be programmed some time after that as money was available.  
FDOT does not have money programmed for design, but has some money for right of way acquisition. The Department is saying, at current funding levels, that it could be 10-15 years before construction starts on their portion of the project. Again, all of these estimates are highly speculative based on funding availability.  
We are examining various funding options, including federal funding or FDOT's portion being handled by Florida's Turnpike Enterprise.  
I hope that helps. Please feel free to call or email with other questions or concerns.  
Mary Brooks

Adrienne & Gerald Pence

Sylvan Glade

Regarding

Adrienne Pence 352-735-3091 said I spoke to you about a year ago, was wondering about the decision on project up here, heard they were looking at maybe taking it to the north to I-4 in Volusia? PIO noted we had a couple of initial alternatives that did that, but had significant environmental and residential impacts, didn't go where traffic wants to go, so county told us to discontinue consideration. She said they live in Sylvan Glade, back up to 46, they're about a ¼ mile west of Designing women. PIO noted recommendation for that

area was to widen to the north, and in the area of Designing Women turn southward to connect with SR 417. She said they have a 6' fence and already see the tops of cars going by. If the road is elevated we will see everything. PIO noted we're doing noise assessment as part of study, and part of that is looking t potential need for sound walls. PIO noted that has not been decided upon, but is being looked at. She said will they do the walls when they build the road or later? PIO reiterated that not decided upon, but if it were, would typically be done as part of roadway. She asked how high the road would be? PIO noted depends on location. In some areas only about 10 feet, others at bridges over side streets 20-25 feet up. She said that's going to devalue their properties, they will be worthless, will have to stay there the rest of their lives because would never be able to sell. PIO noted our understanding was that such a transportation improvement increases property values, makes it easier for people to get where they need to go. PIO noted there's no question SR 46 is dangerous, over capacity and something needs to be done with it. She agreed about that but continued concerns about elevated roadway. She said so there's nothing we can do about it? PIO noted we were looking at October for public hearings but just learned will be more like January, and they can give comment at that time. She thanked me for listening and for the info.

To: 'rperez@orlandosentinel.com'  
Subject: SR 429-Wekiva Parkway PD&E Study - additional wildlife bridge info  
Robert,  
It's important to note what's out there now regarding the wildlife tunnels or crossings, and what is planned with the Wekiva Parkway.  
Today we have the following bridges in the critical environmental area:  
West Wildlife crossing: 55 feet long  
East Wildlife crossing: 47 feet  
Wekiva River Bridge: 561 feet  
Total: 663 feet  
The PD&E Study is proposing for wildlife crossings:  
West Bridge: 1,956 feet long  
East Bridge: 3,995 feet  
Wekiva River Bridge: 2,140 feet  
Total 8,091 feet  
So in addition to separating traffic from the wildlife with an elevated parkway, we're looking to Increase the wildlife corridor openings by 12 times the existing condition.

These bridge areas teamed with special fencing will significantly improve the habitat connectivity of the Ocala Wekiva Greenway system.  
Please call or email with other questions. Good talking to you!  
Mary Brooks

10/24/2007	5:06 PM	PIO called back Robert/Sentinel to let him know spoke with Mark and he would be sending over bridge concepts, noted that's all we're looking at at this point. He said so there's nothing else we're doing to protect the wildlife? PIO noted the whole concept of an elevated parkway was designed to remove traffic from the animal's level, at-grade, to avoid conflicts, that with the bridges is what we're looking at. PIO noted Charles Lee and Keith Shue both spoke at the OOCEA Board meeting today in favor of what we were looking at for the parkway, don't know if you've talked to them for your story? PIO said don't know if anything else might come up when it moves into design? He asked if anyone had started design yet? PIO noted no, we have to finish the PD&E Study first and then has to go out for bids from design firms. He said when Kevin Spear suggested the story, he seemed to think there were a number of different structures or techniques that we were going to use for the parkway. He said send him what we've got, as well as detail on lengths, height and anything else you can tell him about the bridges. PIO noted we should be able to get him some conceptual level dimensions.
10/24/2007	5:03 PM	PIO relayed reporter's conversation to Mark/CH2m, noted need to know what's coming and when? He apologized, said the ball was in his court but he hadn't had time to pull up those concepts. PIO asked what would be coming, noted reporter looking for innovative strategies and structures to preserve wildlife? He said they did a couple concepts of wildlife bridges, but that's all we're looking at at this point. He said he would dig those up and send over. PIO thanked him for the assistance.
10/24/2007	4:53 PM	Robert Perez / Orlando Sentinel 407-322-1298 called to check status of the wildlife preservation graphics. PIO noted CH2m Hill has been slammed, had presentations today at OOCEA, yesterday at LC BCC and last week Wekiva Commission. PIO noted I've asked several times for what's coming and when, but still pursuing. He said he really needs to know what to expect and when. PIO said I would call Mark Callahan today after I hung up with him, noted I asked Mark again at the OOCEA meeting today and he said they were buried. PIO noted the ch2m hill graphics guy has a lot on his plate, also trying to get the latest maps posted to the website and there are other media requests as well. PIO suggested we regroup tomorrow at 10 a.m. and I would have some news, and hopefully some concepts by then. He said okay but really needs something tomorrow.
10/12/2007	3:42 PM	PIO returned call to Robert/Sentinel, who said he's not working on a daily story. They want to do a local in depth and put together a package showing the kinds of techniques or designs the Wekiva Parkway will use to protect wildlife and minimize impacts to the environment. Things like culverts, diversion fencing, etc. what kinds of things they are looking at. They need a lot of graphics. PIO noted we'd be doing extensive bridging where the bear tunnels are now, and new there were some directives in the WPPA, but would check with Ch2m Hill on where we're at, don't know if that's something we get into detail in the study or if that happens in design. He said even if it's something that's done in design, looking for ideas or concepts that could be considered. PIO asked when is the story running? What's the deadline? He said his deadline is in November, so he would need material from us by Oct. 26. He said even if it's just ideas in the arsenal. PIO said I'd get with ch2m now and get back with him on Monday. He said that would be fine.
10/12/2007	12:02 PM	Robert Perez/Orlando Sentinel c 321-663-7449 called and left MSG to call me re: Wekiva

Parkway.

9/18/2007 2:10 PM PIO called Robert Perez/Orlando Sentinel 407-322-1298. His voicemail said he's off till Sept. 24. Left detailed MSG about study status, public hearings pushed back because still working out some issues, meetings with local and state officials, getting their input, making tweaks and other changes and making the rounds again to make sure everyone is on board. Told him to call or email me when he got back from vacation.

3/14/2007 3:34 PM PIO returned Robert Perez call, left MSG about Tall Tree HOA presentation tomorrow at 7 p.m. but not aware of any other public meetings in SC per se.

3/14/2007 1:44 PM Robert Perez/Orlando Sentinel MSG if you folks are hosting any kind of informational meeting tomorrow on 429 in SC. I have a vague rambling complaining note from resident in the Heathrow area who seems to think there is a meeting tomorrow. I'm not aware of one but hope you can tell me differently 407-322-1298 thanks

For months now we have been meeting with various local and state officials to gather their input and direction on which of the various alternatives should be eliminated, and which should be tweaked and/or continue to be evaluated. This process has included both individual meetings with various Seminole County Commissioners and county staff, as well as presenting updated information to the SC Expressway Authority in early May.At this point, the recommendation is to widen the SR 46 corridor to the north in Seminole County, so there would be little if any direct impact to your neighborhood entrance. Also in Seminole County, we are recommending the SR 417 interchange connection to Interstate 4. I know it has been a while since you've heard from us, and I just wanted to bring you up to speed. We have a few more local government meetings for example Lake County Board of Commissioners on June 5 and the Wekiva River Basin Commission in June or July), and then we hope to be able to post updated maps in July on the OOCEA website at ftp://ftp.ch2m.com/Wekiva_Public_Boards/ .We are now shooting for formal public hearings in each county in September or October. We will be getting some updated information out to everyone in the coming weeks. Please call or email with any questions.Mary Brooks

2/23/2007	4:53 PM	From: "Petrone, Michael" <mpetrone@national.aaa.com> Friday - February 23, 2007 4 53 PMTo: <brooksm@oocea.com> Subject: FW: Markham Forest HOA - Wekiva Markham Forest HOA - Wekiva Parkway PD&E Study Update Just wanted to express my sincerest appreciation and thanks for a job well done last night. Your presentation was professional, informative and well received. We look forward to hearing about any updates in the future.Best regards, Michael Michael	

Petrone, CEC Director, AAA Tourism Information Development AAA Diamond Rating  
Process MS #51 1000 AAA Drive Heathrow, FL 32746 (407) 444-8379

Markham Forest HOA presentation at Lake Sylvan Park/SC sports complex, Mark, Brian, Frank Hickson and PIO. About 20 homeowners in attendance including Michael Petrone, HOA president. Mark gave overview and history; noted original study done in 1986. He noted the focus on SR 46 and that traffic had increased from 8,000 VPD to 23,000+ in 20 years. Mark noted environmental concerns for wildlife, various committees and finally the WPPA with restrictions including limited number of interchanges. He noted the SR 46 corridor concept of a parkway with frontage roads (one way), side streets tie into frontage road and Wekiva Parkway bridges over. He noted 200' existing SR 46 ROW; concept needs about 270'. Question of whether to widen corridor to the north or the south, went over potential impacts including gas line, etc. Evaluation showed if you widen to the north and move the gas line (50' easement) it would be about \$20 million to relocate the gas line. But if you widen to the south there would be more residential impacts (about 30 homes) and more costly. He said we were recommending the north alignment, which would mean no direct impact to the Markham Forest neighborhood. Mark noted we have to work closely with the FDEP, who thinks it should go to the south. SC Commissioners say go to the north. He noted the south alignment would hit 8 properties in the neighborhood; doesn't hit houses but yards. Q: Would the houses be purchased? Mark noted the DOT can acquire property needed for transportation purposes. If the property owner says buy the whole thing, on a case by case basis they might be able to work that out individually. Q: What's the timeframe to know whether you go to the north or south? Mark noted we have to meet with FDEP. In June or July we should have a good feel where it's headed. We hope to know in March where FDEP is heading. Q: Would it help to write to Commissioner Carey? Mark said write to all of the commissioners. SCEA members are saying they support the north widening. You might even want to try to meet with them. Q: What are the traffic forecasts for 5-10 years out? When this expands, will there be multiplication in use? Mark noted for FDOT, if they could just build four or six lanes of SR 46 it would be cheaper, but it's clear that getting four lanes across the river won't happen unless it's something like this. 2030 you're looking at 80,000 vehicles on the Wekiva Parkway, or 40,000 like it is now and you can't get in or out. Mark noted the studies show four lanes over capacity by 2020. Lake County and Seminole county are growing. There are a lot of trips from Lake County to the mall, etc. Q: What would be the negative impact to home values? Mark said when there's uncertainty about where it would go or when you're doing construction, people tend not to want to buy. But ultimately you will have access to a beltway system and property values will go up. Mark walked through the north alignment frontage roads, noted Longwood Markham ramps to go west to Lake County. East in Seminole County, you would take the frontage road or just west of Longwood Markham. Many people support this because they can't get out on SR 46 now. Q: I-4 access? Mark went over 46 and 417 IC's. Traffic models show people on 417 want to go west. You can't get those connections on I-4 with a 46 IC, problems on International Parkway and Rinehart. Recommending 417 IC, would have International Parkway ramps. Mark noted 2011 construction of International Parkway connection from 417. Wekiva Parkway is well off in the future. Q: if you take the north widening, would the frontage road be closer than current 46 boundary? Mark said yes, the frontage road and sidewalk would be in what's a grassy area of the ROW now. It would be 20-30' away from the ROW line. The frontage road will have less traffic than 46. Q: will trees and wall be taken out? Mark noted DOT is committed to some landscaping. We're doing a noise study to see if this area meets the criteria for a noise wall, which would be up on the Wekiva Parkway. Q: where would Longwood Markham Road bridge end to the east? Mark said Wekiva Parkway will be up in the air and bridge over the side street. Q: timeframe on the study? Working with FHWA on

process details. We hope to have federal approval by end of the summer. FDOT has very little money for ROW, none for design or construction. Last estimate was \$1.7 billion overall. We don't know when that will be available. Could be 10 years from now, best case

Q: Will SC Commissioners make the decision on north or south widening? Mark noted they will give their opinion. We would go before the SCEA prior to the public hearing, and again after the public hearing and at that point they may take action. FHWA makes ultimate decision based on FDOT recommendations and what the county wants. We hope the county will weigh in this summer.Q: funding for project? Mark went over EA funding with tolls, haven't discussed tolls in LC and SC, but looking at variety of options. Q: backyard against SR 46, have great concern with noise, final product and construction time. What are your considerations? Mark noted the contractor has to follow considerations, but we can't tell you there won't be noise. Typically they will monitor vibration and can minimize that to some extent.Q: is there any opportunity for pre-construction wall? Could be two walls as far as I'm concerned... Discussion of construction phasing and impacts. Mark noted since only two lanes now, would probably only build ...Q: when would they start acquiring properties? Mark said you might see limited acquisition within the next 5 years, but they don't have enough money at this point Q: interim improvements for SR 46? No, turn lanes but that's it.Q: what side would construction start on?Q: timeframe for construction? Would be built in pieces, phased over 10-15 years, the 417 IC would probably take 3 yearsQ: are we 4 or 6 laning? Mark said looked at both, ultimately traffic projections showed we would need 6 lanesQ: why frontage roads two lanes? Mark noted as you go to the west we may to down to one lane on those.Q: why not toll road?Q: How many communities affect by the SR 417 alternative? Really just Tall Trees and Capri Cove.Q: Why not put it in Volusia? Mark noted concerns about environmental impact to Ocala GreenwayQ: with people moving every 7 years, this thing is not planned for 10 years, what is that going to do to my home value? Once the uncertainty is resolved... speculation on property around projectsQ: noise study? Results in the next month or soQ: how can they market property on the north side of 46 with all of this going on? Mark noted issue of property rights. Commissioners can't say no if it meets county requirements. They can do what they want with their property. If we decide to go north they should disclose to buyers. In some cases it's a ploy to raise the price if FDOT at needs the land.Q: what about liability re: damage from construction? Mark noted they typically video buildings adjacent to the highway and if cracking occurs, it's noted and compensated for. But the methods today keep vibration fairly isolated. As far as construction noise at night ... they probably won't provide walls but may be some screens. DOT said they can do some restrictions on night work in residential areas.Q: will it be elevated all the way? Mark went over bridges and elevations. It will come down some before Longwood Markham ... it won't ever get all the way down to grade.PIO noted info on website is being updated so check in and distributed business cards.--750 p.m.

From: Mary Brooks Tuesday - February 13, 2007 5:49 PM To: mpetrone@nationalaaa.com Subject: RE: Wekiva Parkway-Markham Forest Hello Mr. Petrone, As the public information officer for the SR 429-Wekiva Parkway PD&E Study, I would like to find out some possible dates and times that your HOA might like to receive a project update. Once I receive that information I will run it by the project team and get back to you to firm up a meeting. Regarding your questions below, you are correct in that we are still working through issues throughout the corridor. We have developed some preliminary recommendations in some locations, and are working with city, county and state agency officials to refine those. We will continue those meetings over the coming weeks, and hope to have a preferred alignment alternative ready for formal public hearings in May. 1.. The two alternatives in the area of Markham Forest were to widen the SR 46 corridor to the south or to the north to accommodate the parkway. The impact assessments and right of way estimates resulted in a preliminary recommendation to widen the corridor to the north to minimize residential impacts. This is not final. A north widening raises the issue of taking a portion of the Lower Wekiva State Preserve, which is a significant issue for the Florida Department of Environmental Protection. 2... Again, the preliminary recommendation is to widen to the north along this portion of the SR 46 corridor. 3... The Project Development and Environment (PD&E) Study is scheduled to finish this summer with an approved alignment for the entire 25-mile corridor. However, this project is not funded, so there are no true schedules at this time for construction. If funding were to quickly become available somehow, you could potentially see construction begin on the first segments in 5-10 years. Again, any schedule at this time is highly speculative based on funding. The project would likely be built in sections, with a section potentially taking 2-3 years, depending on the length and work involved. 4... A noise study is being conducted as part of the development of this project. Once that study is complete, any recommendations for sound walls would be forwarded for consideration during the actual design phase. 5... The number of lanes is still under discussion for both the Parkway in various locations and the frontage roads in Seminole County. Both 4 and 6 lanes have been looked at for the parkway. The primary concept is for two-lane, one-way frontage roads on both sides of the parkway. In the area of the Lower Wekiva Preserve, the environmental community has asked us to look at one-lane frontage roads to reduce the impact to the park. 6... The Parkway will be elevated in order to bridge over Markham Road. Again, the study will conclude with any recommendations for noise walls or other abatement, which would have to be considered by the Florida Department of Transportation during design. FDOT is responsible for the portion of the project in Lake and Seminole counties; the Expressway Authority is developing the project in Orange County. 7... We will discuss this information and more, and listen to your concerns at the meeting with your HOA. The formal public hearings at this point are tentatively scheduled for May. In the future, please feel free to email me directly regarding this project at MBrookssr414@cfl.rr.com or at brooksm@oocea.com. You can also call me at c 407-702-8375. We look forward to hearing back from you. Mary Brooks

Michael Sent: Monday, February 05, 2007 1:58 PM To: 'info@oocea.com' Subject: Wekiva Parkway-Markham Forest Hello, I represent 42 homeowners within the Markham Forest community at the corner of SR46 and Longwood Markham Road in Seminole County. We are very concerned about the potential impact to our community with respect to the proposed redesign of SR46 as part of the Wekiva Parkway. We would appreciate some information pertaining to the following questions:1...We notice that there are two proposals with respect to the path of the proposed expressway as it relates to the Markham Forest community. One path, has the expressway following the existing SR46 corridor with minimal impact (other than sound) to our community. The other proposal, outlines the potential for the county to access part of our land and essentially ruin the market value of our homes. Can you share with us the need to access our land when there is clearly enough room for the expressway by using land on the north side of SR46?2...Is one of the scenarios above more in favor right now? In other words, which one is more likely? 3...If approved, when will construction begin and when will it end? approximately) 4...Are there plans for a sound barrier similar to the walls along I-4 near the SR434 exit? 5...Will the expressway be 4 or 6 lanes (not including the side frontage roads)? Are the frontage roads going to be one lane or two?6...Will the expressway be elevated past our community? If so, what are the results of the sound impact study and how will the county minimize road noise with respect to our community?7...When is the next community meeting we can attend to ask questions and voice our concerns? We understand that some of the details are not yet finalized but we would sincerely appreciate any information that you could provide us.Thank you. Hello Ian,

Yes, we are still in the PD&E Study, with public hearings now looking like January 2008 instead of in October). I'm waiting on the latest PDF's but you can view our recommendations for preferred alignment and interchange alternatives in a PowerPoint that was presented recently to the Wekiva Commission by logging on to the project web page at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> . That page also has the maps from the viable alternatives workshops last year, as well as other information. Let me know if you have other questions.

Contact		John Polasek	Florida Site Selectors
Date	Time	Regarding	
5/3/2007	3:16 PM	John Polasek 407-331-3328 called looking for an update on the Wekiva Parkway. We have property on 46 west of I-4, has there been a route that has been chosen? PIO went over preliminary recommendations in SC. He said the 417 connection makes sense. He said we had looked at expanding the property but think will hold off and see what the recommendation is. It's vacant property right now. We're trying to decide if should get some development on it; it does front on 46. But we won't worry about it until something is decided. PIO went over schedule for remaining study activities, noted meetings with officials, working through myriad issues raised by members of the public, etc. he said he was aware of the SCEA meeting next week and planned to attend. He said we are supporters of progress and new roads, we're not obstructionists. We're not going to be voicing any objections. He asked are you running into problems because of the Wekiva protection area? The Wekiva River is 3-4 miles west of our property but restricts what we can do with the property. PIO noted all of that was taken into consideration with the formulation of the WPPA, which has host of guidelines and requirements for developing roadway in environmentally sensitive area. PIO asked if he wanted to be on mailing list, hope to have some new maps to post and info to send out soon to folks? He said yes, send to 1015 Maitland Center Commons, Ste. 110, Maitland fl 32751, email polasek@floridasiteselectors.com he thanked me for my persistence in calling him back.	
4/25/2007	11:17 AM	John Polacek called and left MSG thanks for returning my call. I had called about Wekiva Parkway. Looking for updated info, wondered if route had been decided, think there was still some question as to which route it was going to go in my mind. Also what kind of schedule you're on. When you can give me a call back at o 407-331-3696 should be in	

most of day today. Thank you.

4/19/2007	1:52 PM	PIO returned call to John Polacek 407-331-3696 / Fla. Site Selectors, left MSG to call me back or email me with questions, left my cell number and email address.
4/17/2007	12:53 PM	John Polacek MSG have an info sheet on Wekiva Parkway, and want to get an update on that 407-331-3696 thank you

3/23/2007	1:02 PM	Bea Pond MSG live in Sanford where one of the proposals of the parkway would be coming close to my home, like to find out whether the authority determining where the parkway supposed to go has made a decision, or when they might make a decision? Can you please call 407-321-1350
3/23/2007	4:36 AM	PIO returned call to Bea Pond in Sanford 407-321-1350 , she lives off Orange Boulevard and 46, north of it. Preliminary recommendations were to widen SR 46 to the north to minimize residential impacts, and to connect to I-4 at SR 417. She said I like the connection at 417, there's a lot of congestion on I-4 with people trying to get to SR 46. One of the engineers told me at the last meeting that made the most sense to connect at 417. PIO noted from standpoint of where the traffic on 417 is trying to go, that connection will serve the greatest transportation need. She said but I though the 417 IC was more expensive? PIO noted actually once we really looked at it, and because of the nature of the IC we'd have to do at SR 46, which doesn't really work anyway, it would be closer in cost than we originally thought. She said okay and thanks for calling back.

6/11/2007	8:08 PM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Monday, June 11, 2007 8:06 PM To: 'shademor84@earthlink.net' Subject: SR 429-Wekiva Parkway PD&amp;E Study - 2621 Boch Rd.</p> <p>Frankie, I checked your property location at 2621 Boch Road, which shows as four parcels east of Plymouth Sorrento Road. Looking at the project exhibits from last summer's workshops, I see the following potential impacts from the Wekiva Parkway's Orange County-Lake County Systems Interchange alternatives in that area:</p> <ul style="list-style-type: none"><li>OC-LC Systems IC alternative 1 (southern east-west alternative) - no impact</li><li>OC-LC Systems IC alternative 2 (southern east-west alt.) - impact to SW corner of property</li><li>OC-LC Systems IC alternative 3 (southern east-west alt.) - impact to southern half or "panhandle" of property</li><li>OC-LC Systems IC 4 (northern east-west alt.) - impact to northern portion of property</li><li>OC-LC Systems IC 5 (northern east-west alt.) - impact to total property</li><li>OC-LC systems IC 6 (northern east-west alt.) - impact to total property</li></ul> <p>In order to minimize the impacts to residential properties on Boch Road, and to eliminate the need to reconstruct Boch Road to allow continuing access to these properties, the preliminary recommendation is OC-LC Systems IC Alternative 1, which features the westernmost interchange location and the southern, east-west alignment. This would mean no direct impact to your property. However, please be advised that this recommendation is strictly preliminary, has not been approved and is still subject to change. Also, the project maps from last summer's workshops are in the process of being revised based on the input and direction from local and state officials. So the potential property impacts could change once the alternatives are revised. As noted, we hope to have the updated maps posted on the OOCEA website in July, and the formal public hearings on the preferred recommendations in September or October. We will be sending out info soon to the public. I hope that helps. Please feel free to call or email with additional questions. Mary Brooks</p>
6/11/2007	10:39 AM	<p>PIO returned call to Frankie Rakes, who said she lives at 2621 Boch Road. Maxwell Wright's my son in law. The north alternative went right through our property. We thought we were going to hear in the spring, then the summer... PIO noted it's taken longer than expected to work through all of these issues throughout the 25 mile corridor, and to schedule all of these meetings with local and state officials. PIO noted we're hoping to finish this round of meeting with officials, revise the alternatives based on their feedback and post new maps in July on the website, and have formal public hearings in Sept.-Oct. she said what would the hearings be on? PIO noted with the feedback we've received the maps they saw at the last workshops are being revised, some alternatives eliminated, so we would be bringing forward the recommended alternatives. She asked if they'd receive anything before the hearings? PIO said we're working on a mailer now that I hoped to get out by end of June, but not getting folks signed off on that as quickly as I would have hoped. But that will go out by early July at the latest. Then when we nail down the public hearings we will send a full newsletter with details. She asked if there was anything unofficial I could tell her now? PIO said I'd have to look up her property again and see what they were leaning toward in that area, there are too many of these alternatives to recall that area off the top of my head, haven't looked at that one in a while. PIO said I could research it and email her. Email shademor84@earthlink.net --1047 a.m.</p>
6/11/2007	10:34 AM	<p>Frankie Rakes called and left MSG I called Friday, I would like you to call me back re: the</p>

6/8/2007 10:44 AM 429, my number is 407-889-0830  
Frankie Rakes called and left MSG I live on Boch Road. My property would be directly affected by the 429 connection, the western beltway. I was wondering if you had any kind of info about when we'd hear anything. Please call me 407-889-0830 I'd appreciate any info you have. Thank you.

Date Time Regarding  
2/21/2007 8:49 AM From: Mary Brooks Wednesday - February 21, 2007 8:49 AM To: Michael.L Ratay@ngc.com Subject: SR 429-Wekiva Parkway PD&E Study - Update Hello Michael, We are furiously working through some remaining issues in some areas, and do have some very preliminary recommendations in others. We are in the arduous process of meeting with a host of city, county and state staff and elected officials to help draft recommendations that we now hope to bring forward for formal public hearings in May or June. As for Seminole County, the impact assessments, right of way estimates and engineering analysis at this point indicate widening SR 46 to the north, to avoid the residential on the south, would be the better alternative. The drawback with that being that we impact the state park lands to the north, which will raise state and federal red flags. The other preliminary recommendation for Seminole County is to connect to Interstate 4 at SR 417. Obviously these preliminary recommendations are highly subject to change as we continue meeting with various officials. We will be updating the website soon and will send out newsletters once we get the public meetings nailed down. Stay tuned. Mary Brooks

Subject: SR 429 - Wekiva Parkway PD&E Study - Community Meeting  
Good afternoon, Mark,  
Mark Callahan mentioned that you needed me to speak before the mobile home park at US 441 and SR 46 regarding the Wekiva Parkway, with emphasis on that interchange. Please let me know the meeting date and time, and any other pertinent information. I've also left a voicemail message at your office. I look forward to hearing from you.  
Mary Brooks

7/19/2007 1:56 PM PIO called Mark Reggentin, Planning & Development Director (352) 735-7112, left MSG for him to call me re: speaking engagement details, left my number.

7/19/2007 11:46 AM Mark/CH2m called and said Mark Reggentin/City of Mount Dora wants someone to present on Wekiva Parkway 441/46 IC to mobile home park and thought PIO would be perfect for that. Mark noted it shouldn't be controversial, just want some info, and take the overall and two IC boards. Mark reiterated city wants Alt. 1 (grade separated) but FDOT directing us to do Alt. 2 (at grade). He asked that PIO call Reggentin, thinks the date might be Aug. 1. PIO said would do. He said Dave is back in today.

To: 'rogerr@reliableconstructors.com'  
Cc: 'dleffler@qca-inc.com'  
Subject: RE: SR 429-Wekiva Parkway PD&E Study - Reliable Constructors  
Roger,  
The engineers confirmed my suspicion that we would not need to take any of the front of the property at 22435 SR 46 under the latest recommended alignment alternative. The retention pond and other improvements at this point are planned south of the existing SR 46 right of way line in your location. Please be advised that we do not have an approved alignment and details are still subject to change. These recommendations will be brought forward for formal public hearings in February or March 2008. We will send out notifications of the hearing details once they become available.  
Please don't hesitate to call or email with other questions.

Mary Brooks

11/12/2007	1:15 PM	<p>Roger Rehfeldt called back; he had not checked his messages. PIO noted I have to verify with engineers, but latest recommendation looks like little if any impact to front of their property. He said when we were looking at alternatives 1 and 2, one of them looked like we'd have lakefront property. PIO noted the latest maps are posted on the website now. PIO noted latest recommendation does show a pond there... we are widening to the north along 46 west of them, but at the parcel just west of them we start to veer south for the parkway.</p> <p>PIO confirmed his email address is the same, and said I could send him the map. He said he'd pulled it up and was looking at it now. PIO said okay, then I'd let him know what the engineers said. He said very good and thanks.</p>
11/12/2007	12:08 PM	<p>PIO called back Roger Rehfeldt and left MSG that I was able to pull up the property, and that looks like little of any frontage would be needed based on latest alternative. PIO said am trying to verify that with the engineers and will get back to him with what I find out. PIO noted email address I have for him and asked him to email me whether that was still correct or what the new one was, as well as any other questions he might have. PIO noted re: lawyer letters, many firms doing solicitations on this project trying to drum up business, and some of them have been dicey in the info they're putting out there, getting people upset for no reason, etc.</p>
11/12/2007	11:52 AM	<p>PIO called back Roger Rehfeldt/Reliable Constructors 22435 SR 46 in Sorrento 352-383-3159, left MSG asking for owner name or property ID, noted nothing came up with I put the address in the LC property appraiser database. Gave him my number and email address and asked him to get back to me so I could look up potential impact from latest recommendation.</p>
11/12/2007	10:13 AM	<p>Roger Rehfeldt/Reliable Constructors called and left MSG we're at 22435 SR 46 in Sorrento we're right where the connector is going to come in at SR 46. I keep getting letters from lawyers about how much property they're going to take of ours, I've been looking at the drawings and I can't see where they're taking much of our land. I was wondering if you could give me a call at 352-383-3159 thank you very much. I look forward to hearing from you later.</p>

\_From: WHEELIEFIELDS@aol.com [mailto:WHEELIEFIELDS@aol.com] Sent: Thursday, February 08, 2007 1:14 PMTo: MBrooksSR414@cfl.rr.comSubject: Wekiva BeltwayMary Brooks: For ten years the minds of people residing on highway 46 and by the 46A area have been told they probably lie in the way of the beltway. Yes, maybe, yes, maybe. Most people who live in this area are frustrated to the point they don't know what to do. Should I make home and land improvement or should I just say "what for". I am sure the commission has it problems identifying what, when, where and how much. But the other thing that should play in their thoughts is what is this all doing to the people who have lived with the indecision for the last ten years that whatever they have may end up in a pile of dirt. Don't get me wrong the beltway is an absolute necessity, but the peace of mind for the residents who live in this area should be considered. We need to know.

Wade,  
It was good to hear your voice again after all this time! Hope you're doing well.  
To access the recent Wekiva Parkway PowerPoint presentation showing the recommendations for the preferred alternative, as well as all of the maps from the last public workshops, log on to [www.expresswayauthority.com](http://www.expresswayauthority.com) <<http://www.expresswayauthority.com/>> or [www.oocaa.com](http://www.oocaa.com) <<http://www.oocaa.com/>> . On the entry page, click on the "corporate site" button on the left. On the home page under the headline "Construction Update" you will see several paragraphs of text. The first

paragraph has a highlighted text link for "Western Connectors" - click on that highlighted link. That takes you to the Wekiva Parkway page, at the top of which are links for the PowerPoint as well as the workshop maps.  
Remember the site has been down, so it may be tomorrow or Wed. before you can get in. After that, call or email me with any continuing issues. Take care!  
Mary Brooks

8/13/2007	3:53 PM	Wade Rich/Embarq 407-814-5383 called and said he got the letter about the project, and they were trying to look at the maps and couldn't get into the site. PIO noted the OOCEA website is down, apparently got hacked this weekend. He said one of his colleagues tried to reach the maps last week and couldn't get in either. PIO noted I'd been on the site a number of times last week without any issues. He said is there a password or something needed? PIO said there shouldn't be. PIO asked for his email address and I would send him the links needed to access the workshop maps and PowerPoint. PIO reminded him site is down now, so maybe try tomorrow. He said okay and appreciated the help, good to talk to you again. Email lindy.w.rich@embarq.com <mailto:lindy.w.rich@embarq.com>
Contact 6/6/2007	4:55 PM	<p>Roberto Seminole Estates HOA</p> <p>PIO returned call to Roberto, who said I live off 46 in Seminole Estates subdivision. I'm looking at the thing I got in the mail about the study about the proposed extension, I'm trying to see if this goes through and where would it be in respect to my property. PIO noted we don't have an alignment yet, just the study area, PD&amp;E schedule for preferred alignment, public meeting schedule. Two sides of my property are bordered by the Wekiva Preserve. What does that mean would the road come through there or not? PIO noted with some much protected land in that corridor that is something we're challenged with and working with FDEP and Florida Park Service, in fact had meetings with those folks on Friday. PIO noted once we start coming up with initial alternatives, will get public and agency input and be able to answer more questions about what will be affected. PIO noted there are a lot of people trying to sell or buy houses, or just find out what the effect is on their property and we have to go through this painstaking process that takes time before we can begin to answer those questions. He said so we'll have that meeting in October? PIO confirmed meeting set for November, and if he got he newsletter he'll get the meeting notice for that also. He said okay, then he'll wait to hear something then.</p>
6/6/2007	4:27 PM	Roberto left MSG that I reside in Sanford and calling re: Wekiva Parkway and Bypass, 321-377-0116 call me back please.
Contact Date 4/2/2007	Time 11:19 AM	<p>Candy Robey Hacienda Hill HOA</p> <p>Regarding</p> <p>PIO returned call to Candy Robie, went online and Glenn tried to email She's mile from 441 and 46, at Hacienda Hill, some pictures we've seen over couple months pretty much shows part of the roadway coming at our kitchen or through out kitchen, we were concerned about the house, are they taking our house? PIO noted alternatives Her son is going into last year of school so we were planning to move out to Ocala. We didn't know if could put it up for sale, are we stuck? PIO noted north-south alternatives considered, south side recommended to minimize impacts to residential areas. So if we want to sell our house? PIO noted they can sell, would be good to let any buyers know area being studied for major transportation improvements, but until alignment is approved, not much ore can tell them at this point. She asked when we would know, went on line and maps are from last year? PIO noted hope to have some new maps soon but they keep changing as we meet with various officials, ask for tweaking here and there, some are giving us recommendations, new maps will be different, have far fewer alternatives. PIO noted</p>

public hearings now maybe late summer, then study to finish before end of the year. She said okay. Well it helps to know you're going to the north, thanks for calling back.--1127 a m.

4/2/2007 10:58 AM PIO returned call to Candy Robey 352-735-4780, left MSG to call me back or email me specific questions.

4/2/2007 10:06 AM Candy Robey MSG I live on SR 46 in Mount Dora, left MSG last week, will be home most of the day today, would like to talk to you on my day off, kind of hard to get me at work, wondering what's going on with the road 352-735-4780, C 352-455-4542 give me a call back as soon as you can

3/29/2007 8:09 AM Candy Robey and Glenn Porter MSG I spoke to you a few months ago, went online trying to figure out ... we live right on 46, Had a few about what we saw on line. You can reach me at 352-735-4780 until 830, and between 9-4 at 352-735-0059 if you could return my call at your first convenience. Thanks.

Contact		Rudy Rode	Wekiva Pines Country Estates
Date	Time	Regarding	
2/20/2007	10:48 AM	PIO called Rudy Rode /Wekiva Pines Country Estates 321-277-2210-Cell, 352-383-6339 he said Sandy Weld is acting pres., they disbanded the formal HOA 4-5 years ago. They just have an informal group; they maybe get together once a year. PIO asked if they would be interested in an update on the Wekiva Parkway, as we have been giving presentations to various HOA's and other community groups? He said he was sure they would be and would get with Sandy. PIO requested some dates starting in latter part of March, gave him my cell number. He was driving so could not take my email address. He said he'd get back to me.	

Contact		Debbie Rolf	
Date	Time	Regarding	
1/29/2007	10:38 AM	PIO again tried Debbie Rolf (cq) 407-782-2088, who said thanks for calling and she did get my MSG the other day. She said she planned to get on the website, wondering if the meeting has occurred where the engineer was going to give his idea of what a final version would look like. Last time we spoke you said you thought that would happen in mid January. PIO noted we're still in the process of meeting with local governments and state agencies, have several of those this week with SC and OC, noted the schedule has been pushed out due to trying to schedule all of these agency meetings. PIO informed her of the EAC/PAG meetings Feb. 2 at 10 a.m. and 130 p.m. at the OOCEA boardroom, gave address, noted that will be the latest and greatest info but not final. She said she understood. PIO noted same info would be presented at both meetings, just to update the two committees. PIO noted public can attend to observe but it's not an open forum. PIO said once we get the input from all of these entities, hope to come forward with a recommendation in March and public hearings in April-May. PIO asked if she was on the project mailing list? She said she gets a periodic newsletter but thinks that's because she has EPASS. PIO to add her to project database: Rolf, 2520 Cara Lynn Way, Longwood, 32779, email Debbie-rolf@cfl.rr.com. She said that would be great and thanks.	

1/23/2007 11:36 AM PIO returned call to Debbie Rolf 407-782-2088, Dave Brewer Realty, left MSG to email me questions and property in question or call back.

1/22/2007 4:18 PM Debbie Rolf MSG I have some questions about Wekiva Parkway, extension of 429, appreciate return call ASAP. 407-782-2088 Thank you.

Contact		Jamie Russell	
Date	Time	Regarding	
9/10/2007	9:54 AM	PIO Deana Leffler returned call and said nothing is slated until the first of the year. Ms.	

9/10/2007	9:52 AM	Russell would like to be included on any project updates. She is mostly concerned with the alignment and is wondering if Orange Blvd would be affected. PIO Deana Leffler received phone call from Jamie Russell requesting information on the pkwy project.
Contact Date		John Saggio Remax Regarding
6/1/2007	5:22 PM	John Saggio 407-572-5193 called asking if I'd found anything out about the Brogan property? PIO noted I'd sent him an email. He said he did not see it , what did it say? PIO noted there was no direct impact to the property in question from the project alternatives in that area. He said that's good news and thanks for the info, will let him client know.
6/1/2007	3:31 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Friday, June 01, 2007 3:31 PM To: 'johnsaggio@yahoo.com' Subject: SR 429-Wekiva Parkway PD&E Study - 3100 Poverty LaneJohn, I checked the location of the property owned by Wendell Brogan at 3100 Poverty Lane, and I show it as four parcels north of West Ponkan Road and approximately 11 or so parcels west of Plymouth Sorrento Road. The project alignment in this area is within two parcels west of Plymouth Sorrento Road.The subject property's project parcel number is 1688 (on the project maps at ftp://ftp.ch2m.com/Wekiva_Public_Boards/ ), and it is six parcels west of the Orange County alignment for the Wekiva Parkway in this area. There is no direct impact to this property from the proposed project.I hope that addresses your question. Please email or call for additional information. Mary Brooks
5/31/2007	3:00 PM	John Saggio/Remax said he's representing Mr. Brogan who has a property on west Ponkan west of Plymouth Sorrento Road. property is actually 3100 Poverty Road. he wants to see how close it is coming. PIO said I can research for him and email him info. he said send to johnsaggio@yahoo.com he noted back of property is 1000' east of Golden Hymn, which goes north - south to Kelly Park Road. PIO noted we're recommending the Kelly Park Road interchange, so less impact in the area of Ponkan Road, but again will check on property. PIO noted all the workshop maps are on the OOCEA website, gave him text links, etc. PIO noted if he has trouble finding maps, let me know. PIO noted we're in the process of updating the maps, hope to have in next month or so, but the maps posted now will give him a starting point. He was appreciative of the assistance.
Contact Date		Vince Sandersfeld City of Apopka - Planning Regarding
2/20/2007	8:09 AM	Vince Sandersfeld/City of Apopka 407-703-1739 called asking for shape file for OC alternative for their planning purposes. He said he'd left several MSGs for Mark, but he was ignoring him, so he was going straight to the top(!) PIO noted we've had requests in the past for the shape files and guys were reluctant to create them because they're changing frequently with all of these officials' meetings. PIO said I'd relay his request and get back to him. vsandersfeld@apopka.net
Contact Date		Maureen Sapp Regarding
6/20/2007	8:55 AM	Maureen Sapp 407-886-5340 called asking what's happening with Kelly Park, they live right near there. PIO noted nothing new since OC BCC approved moving forward with recommendation to have IC at Kelly Park in March. PIO noted looking at public hearings in Sept.-Oct., and hope to have updated maps on the website in July. She said they live like 700' from that intersection and want to know how it's going to affect them, what they

need to do. PIO reminded her that we still need to finish the PD&E Study end of the year or early next, and then have to go to design, ROW. PIO noted full ROW and construction not funded in this 5-year work plan, so could be 5-10 years before construction. PIO noted that's unless additional funding, such as raising tolls becomes available, in which case the schedule changes. She said oh, okay, didn't realize it was that far out. PIO noted we were working on an update to send out to them, hopefully by first week of July. She was appreciative of the info.

3/1/2007 9:01 AM From: Mary Brooks Thursday - March 1, 2007 9:01 AM To: parks@southerntruckequipment.com Subject: SR 429 - Wekiva Parkway PD&E Study - 3103 W. Kelly Park Rd. Maureen, Apologies for the delay, but my duties have been expanded three-fold in the last four months. In any case, I checked and, even with the latest adjustments to the alignment alternatives, your parcel (#2099 on our maps) is not affected. Even the improvements to Kelly Park Road for the interchange probably will not reach your property line. I hope that addresses your question. Mary Brooks

2/19/2007 12:22 PM Maureen Sapp 407-843-7171 called asking if there was going to be a meeting in March? PIO said no, still working through local government and state agency review meetings, had to work out some issues so schedule has been pushed out, public hearings now looking at May. She asked if they'd made any decisions yet? She's at 3103 W. Kelly Park Road, about 700' from Plymouth Sorrento Road. PIO noted we're working toward some preliminary recommendations, and in her location we're leaning toward Kelly Park Road for the IC. She said last time she asked we told her we wouldn't affect her, but she wanted to know the latest. PIO to check and get back to her, can send an email to her at work parks@southerntruckequipment.com she said she'd appreciate the assistance.

Subject: SR 429 - Wekiva Parkway PD&E Study - project website & status  
Derek,

It was good speaking with you earlier. You may find information on the SR 429 - Wekiva Parkway Project Development & Environment Study on the Orlando-Orange County Expressway website at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>>. this project will pick up where the SR 414/429 John Land Apopka Expressway leaves off at US 441 near Plymouth Sorrento Road.

There at the top of the web page you will find a PowerPoint presentation with the latest recommended alignment and interchange alternatives, the many map exhibits from the summer 2006 public workshops, as well as extensive project background.

I'm adding you to the project database so that you will receive meeting notices and other information henceforth. I will also look into what may be happening with Stanton Ridge with regard to this project, and will forward that info to you.

In general, we are scheduled to finish the PD&E Study in summer 2008. From there the OOCEA, which is developing the Orange County portion of the project, is expected to proceed into final design, and then has some money to begin right of way acquisition. The Expressway authority does not, however, have funding in the current Five Year Plan to finish property acquisition or for construction. Unless something changes regarding funding, the subsequent phases of the project could be 5-7 years out.

Mary Brooks

10/8/2007	12:55 PM	<p>PIO returned call to Derek Schaefer, we're 1 mile off 441 and Plymouth Sorrento road, next to Stanton ridge, the new Cambridge development ... my west property line hits their east property line. Just heard rumors that there was stop order on the neighborhood because the road was coming through. PIO said not aware of the stop order, but know that is one of the subdivisions we were trying to get advance ROW acquisition on before there were a lot of houses there. PIO noted we need to finish the study in summer 2008 and then go on to design and ROW acquisition.</p> <p>He said we hadn't heard a single thing. We wouldn't have planned to build a \$300,000 house here if we knew there was a highway going through my backyard. PIO asked how long he'd owned the property? He said they just went to permit, bought the property last year, and closed like in November. PIO noted then he probably just missed the last newsletter, though should have gotten the summer update. PIO noted we've had two sets of public meetings on the project since the study started in January 2005, and are looking to have the next public meetings in January 2008. PIO said I'd be happy to take his info to send him all of the subsequent project info. He said mail to P.O. Box 966, Plymouth fl 32768</p> <p>He said I talked to Apopka planners and they gave me a number that didn't work and a website that didn't go anywhere. He said they also have email <a href="mailto:adnschafer@yahoo.com">adnschafer@yahoo.com</a> &lt;<a href="mailto:adnschafer@yahoo.com">mailto:adnschafer@yahoo.com</a>&gt;</p>
10/8/2007	11:17 AM	<p>Derek Schaefer MSG I'm calling for info on 414, own property that backs up to new development that we were just now told had a stop order placed on it. If you would give me a call at 407-509-4425, 407-880-9770 thank you.</p>

Contact Date 5/19/2007	Time 5:23 PM	<p>Fred Schneider                      Lake County Dept. of Public Works Regarding From: Mary Brooks [<a href="mailto:mbrookssr414@cfl.rr.com">mailto:mbrookssr414@cfl.rr.com</a>] Sent: Saturday, May 19, 2007 5:23 PM To: 'Schneider, Fred' Subject: RE: Western Connector I forgot to mention, OOCEA has funding for design for the Orange County portion. 2/13/2007	8:30 AM	<p>__From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, February 13, 2007 8:30 AM  To: 'gatorknightz@aol.com'  Subject: RE: Route for 429/Western connector/Wekiva Parkway  Hello Paulette &amp; Willie, We have been trying to work through a host of issues throughout the corridor, including looking at additional alternatives raised as a result of the public workshops last summer and requests from local government and state agency representatives. We have some very preliminary recommendations for some locations, and are continuing to meet with city, county and state agency representatives to refine those. In some locations, however, we still have to reach a recommendation. As has been discussed in the past, the very beginning of the Wekiva Parkway in Orange County could not vary much because it has to connect to the planned SR 429/414 extension of Maitland Boulevard. That section of the corridor, within the city limits of Apopka, is what the City approved on Feb. 7, thereby allowing the Expressway Authority to begin advance right of way acquisition. Beyond that short segment, we have not selected any alignments, only have some preliminary recommendations. For Orange County, as it stands now, the preliminary recommendations would be for the Kelly Park Interchange, the westernmost systems interchange, and the northernmost alignment coming out of the systems interchange towards Neighborhood Lakes and Rock Springs Run. This is all highly subject to change. Again, we are still meeting with a host of officials to refine these draft recommendations. We hope to be through that process and be able to bring forward a preferred alternative for formal public hearings in May. We still hope to conclude the study with an approved alternative this summer. In the next couple of weeks I will be updating the website, and we are working on getting the next project update out to you all.  Mary Brooks</p>
2/12/2007	5:16 PM	<p>_From: gatorknightz@aol.com [mailto:gatorknightz@aol.com] Sent: Monday, February 12, 2007 5:16 PM  To: MBrooksSR414@cfl.rr.com  Subject: Route for 429/Western connector/Wekiva Parkway  It has been a long time since we have had any updates. The Apopka City Council apparently approved a route at their last meeting. We are not in the city limits. Is there a route decision yet? Our home hangs in the balance, and we really would like to know if we get to keep it or not. When will we know a definite route? This has been an agonizingly long process for those of us in danger of having our land taken away. Please keep us informed of any decisions/updates/meetings. Thank you.  Paulette &amp; Willie Schultz  3443 Paulette St  Apopka, FL 32712  Gatorknightz@aol.com</p>

Contact		Larry Scollo	Seminole Towne Center
Date	Time	Regarding	
10/8/2007	3:46 PM	<p>-----Original Message-----</p> <p>From: Deana Leffler [mailto:dleffler@qca-inc.com]</p> <p>Sent: Monday, October 08, 2007 3:46 PM</p> <p>To: Mary Brooks</p> <p>Subject: RE: SR 429 - Wekiva Parkway PD&amp;E Study - Contact info</p> <p>Mary,</p> <p>I had to call the mall directly and get their management office. Larry Scollo is the mall manager. The mall number is 407-323-2262. The number below rings and does not go into voice mail. Larry's email is lscollo@simon.com. Here is his physical address.</p> <p>200 Towne Center Circle</p> <p>Sanford, FL 32771</p>	
10/3/2007	1:16 PM	<p>Larry ??/Seminole Towne Center manager 407-323-1812 said he's been trying to stay on top of what's going on with the project, when will it go to construction? PIO noted funding challenges, 10-15 years at current funding, looking at other alternatives, Turnpike, federal, P3. Noted OOCEA could start their section in OC 5-10 years.</p> <p>He said he saw the two alternatives to connect to I-4 at SR 46 or SR 417, which one was approved? PIO noted we have recommendation to connect at 417, but don't have an approved alignment. PIO noted were going to do public hearing on recommendations in October but that's been pushed to January, then have to undergo agency approvals, then hope to finish study in summer 2008, but noted don't have money in his area allotted yet for design.</p> <p>He also asked about widening SR 46? PIO noted Wekiva Parkway will replace much of SR 46 in Lake and Seminole County. PIO noted Wekiva Parkway will run on top of SR 46 in Seminole from river to about Orange Boulevard, then parkway will dip south to 417. PIO noted remainder of SR 46 to I-4 already 4 or 6 lanes.</p> <p>He said and I know it's supposed to go to Mt. Dora, what happens to it over there? PIO noted Wekiva Parkway for most part follows SR 46 corridor west from river to about Neighborhood lakes, then there is the SR 46 bypass that will just be 4 lane divided roadway, not elevated expressway that continues from about Round Lake Road to 441 and 46 in Mt. Dora.</p> <p>He was thankful for the info. PIO noted didn't recall speaking to him previously, does he want to be on the project mailing list? He said absolutely, he's going to email his contact info. PIO said feel free to send any additional questions he might have also. He said he would and thanks for your time.</p> <p>--124 p.m.</p>

committee mtg.

Greetings,

The following is the list of action items from the Dec. 4 meeting Mark and I attended with the Sylvan Lake Reserve HOA board committee at Dan Macaluso's home:

HOA Board committee members requested the following info:

- 1) Distance from ROW line to southern edge of pavement with the Wekiva Parkway compared to the southern edge of pavement now?
- 2) Comparison data of what the noise level is now compared to what we're projecting?
- 3) Comparison of the model to other areas of SR 417 to validate? (Mark said FDOT District 5's Bill Walsh had done that, believe for I-4)
- 4) International Parkway concepts and report
- 5) Cost difference between the SR 46 interchange vs. SR 417 interchange
- 6) Plan sheets for all of Seminole County, not just in front of their development.

Attached please find a partial response to the request, namely:

2) Comparison of existing to projected noise (Be sure to use the two PDF exhibits with the "Seminole Impacts" table to determine monitor locations).

4) Analysis of International Pkwy ramps concept

5) Cost estimates for SR 46 IC versus SR 417 Interchange connection (It is important to note that cost was not the only criteria; most important is that the connection at the SR 46/I-4 IC failed the comparative traffic operations analysis);

I will send the other items as they become available.

Mary Brooks

Charlie,

The request for the database is being reviewed by legal, as it is an unusual one. I have attached, however, something that I think might be more useful if you're interested in issues raised by other HOA's.

Also, Mark got back to me that he can also make Dec. 4 at 6 p.m. so we are set. Can you send me direction to the home in question from SR 46?

Thanks, Mary. Would appreciate still further clarification on d:

1. Existing noise levels of 66.dBA or greater, or projected (with the new roadway)
2. Is it 66 dBA or greater AND an increase of 15 dBA or more, or 66 dBA or greater OR an increase of 15 dBA or more

Regards,  
Charlie

Charlie,  
A. The noise monitoring location is where the equipment was set up to measure the noise levels. The noise impact receptor is a house, business, church, etc. that is within the expected noise impact limits.  
B. Correct, match line is how you line the maps up from different pages  
C. Number of feet from the edge of pavement from which the noise contour lines are located  
D. Correct, locations which have existing noise levels of 66 dBA or greater, and which could expect to see an increase of 15 dba or more from current levels.

Charlie,  
I was waiting for some clarification info on the profiles, which I just got yesterday. Attached you will find the profiles showing the Wekiva Parkway in Seminole County, including as it would pass your community. The profile grade line for the Wekiva Parkway runs north of SR 46 where it is much lower than existing SR 46. That means the roadway would have likely had to be raised for any improvements to meet current drainage and other standards.  
The preliminary profile for the frontage road in that area shows a proposed grade elevation of approximately 1-foot over existing (existing elevation ~ 49.5). The elevated mainline (SR 429) proposed profile is approximately 28' above existing grade - or 27' above the planned frontage roads - at Glade View.

You've also got the noise impact exhibits, as discussed. The orange spots are the homes or other structures within the federal affected range; the red dots are where the noise receptors were placed during the study.

How would the evenings of Dec. 4, 5 or 6 at 6 p.m. work for Mark and I, and probably FDOT representatives, meeting with your HOA board and/or committee? Please let me know.

Mary Brooks

Subject: SLR - Wekiva Parkway Committee: Elevation Drawings

Hi Mary,

One of the action items I believe you took back from our conference call last Friday was to send us elevation drawings of the roadway and overpasses we can expect in the vicinity of our community. If at all possible, we would like to have those first thing in the morning in order to have a chance to review them prior to the SCEA meeting tomorrow afternoon. Please let us know if you will be able to email them to us. Thanks.

Regards,

Charlie

Dan Macaluso, HOA president, Tony Cerino, subcommittee chair, Charlie Shaw and Mark, Tony: key thing is thanks for the map, it draws one large concern, assuming road will be elevated, and what would be the average height we would expect from bridge crossing Wekiva to where roadway would pass through orange blvd.

Mark: at the roadways where we are bridging over, including Longwood Markham, lake Markham, and your entrance Glade View, veers off 46 to east of your entrance. At each of those locations roadway will be elevated to provide access underneath with a bridge. Coming out of your access to Glade View you will be able to take right to Sanford or left to go to Lake County. At those locations, bridges 16.5' clearance, roadway structure depth about 6' so surface of roadway in neighborhood of 22-24.

To extent we can, we try to bring the roadway down. It does not along any location along 46 come down to the existing grade.

Charlie: it would seem by the map the overpasses are fairly close together. Mark said right never back at grade, so probably 22-24 at access point, may go down 5-6' between bridges before going back up. We have preliminary profile we will share with you, in the midst of preparing draft reports for the clients

You will take a left on WB frontage road and then ramp to get onto Wekiva Parkway to go into Lake County

?: No tolls from anywhere it exits I-4 to Lake County? Mark: at this point we're not proposing tolls. DOT has been very clear that they really don't know how it's going to be funded, considering all options including tolling. If that comes about there will be additional public hearings about what we're doing.

? Last toll on this leg is the Lake Jesup toll. ... If you were to continue on around would they put a toll on the county line? Mark said would doubt tolls on 46 SC piece because not enough room, but with electronic tolling they could just put those gantries.

Mark said slip ramp between river and Longwood Markham road, a little hard to see on

the maps because of the scale.

? What neighborhood... is it between ... if you look those slip ramps are called out.

Halfway between river and Longwood Markham.

Charlie: thin red lines are they row boundaries? Mark said red is where we need new or additional ROW for the roadway.

What becomes of lakeside Methodist church? Mark we're going right behind them, we've been working with them; they're concerned about that impacts.

You know there's a ball park going up right there. Mark said we're threading the needle, trying to stay out of neighborhoods. I'm not saying anybody's real happy, but I think everybody understands what we're trying to do.

In all seriousness

Has study been commissioned that would assess impact to quality of the neighborhood.

We're doing impact assessments and those will be made available to you all after clients.

What about property values? Is that criteria you will be looking at? Mark said most of the cases when these facilities built, some construction impacts, but in general very enhanced access to the properties and we would expect as we've seen across the country the property values to increase.

Thinking of resale value, elevate the road and noise. Mark said noise and visuals are a component to it.

Is there an assessment of at elevation at 22' how much of the roadway visible to the communities? We could do that on location basis...

Mark: from my perspective being out there and talking to lot of people, you can hardly get out on 46 today. This will allow you to get out there more safely.

Dan: 80 percent of the people come out on the orange blvd. we already have easy access.

Dan: after seeing this and having it be revised again. I've lived in the area 30 years, have seen it go through diff options... some comments I've heard if you look at entrance to our neighborhood, burden of price, our neighborhood is going to pay for this going by both entrances is a little harsh. We're only neighborhood this thing is wrapping around ... going around both entrances right in front of it and not going back to ground level. Have seen other locations north of the St. Johns bridge... mark said those alternatives were looked at lot of state owned land that prohibit it from going up there.

Dan: it's a heavy cost that you're expecting this community to deal with, wrapping around this community

Mark: I can't argue with you

Charlie: on behalf of bob Watson on our committee, curious if any routing was considered going further down 46 and swing down international parkway? Mark said yes, looked at that and also taking it to I-4 and 46. As we looked at International Parkway -- we can share those concepts -- it would go east from your entrance and then turn south 90 degrees then button hook to I-4, it became too restrictive. We couldn't get it in with the design requirements we had to meet.

Other suggestion to take it to east of I-4, but would go right through mall.

?: Underlying goal in your explanation is that the beltway has to be connected, why? Mark said intuitively it would be nice for the roads to meet, though on the south end it does not. So we examined several locations to tie in. A lot of concern raised by SCEA about one to the north and there were lot of impacts. One at 46 we looked at pretty thoroughly, ran traffic projections. We found lot of traffic wants to go between Wekiva and 417, Lake County to eastern portions of SC. If we put it at 46, traffic trying to get to 46 and Wekiva, couldn't get connections to work on I-4, so it would dump additional traffic on International Parkway, Rinehart Road. So if it didn't tie two beltway systems together it creates more problems than solve in that area.

?: the northern connection that was one of the alternative that hit I-4 north of the bridge

would alleviate traffic that wanted to side skirt ... you said there were obstacles to looking at that.

Mark we looked at it, impacted more homes up there, quite a bit of conservation land. As we worked with SC folks that became something they were not interested in. impact is where land would be required.

? This alternative I'm seeing here ... you don't consider the Glades being impacted because you're not acquiring property? Mark said will be visual and noise impacts, and during construction. But direct impacts are people's property being acquired for the roadway and having to be relocated.

Charlie: noise criteria ... mark said is we id any noise sensitive sites that would have hourly average decibel levels of 66 or greater.

Do you know current level at 66? Mark said did some measurements but don't have those in front of me. We run the model for worst case traffic conditions, highest speeds, then we put in truck percentages, how many and what type, 3 dimensional geometry, roadway, That will allow us to identify where there are noise impacts, in your neighborhood there are several impacts. And we're required to look at noise abatement, several criteria. One that generally directs whether, one is economic criteria, take number of homes benefit reducing noise by 5 db or more) and cost of barrier and divide, and if it's greater than \$40k then it's not economically feasible.

Does cost of project anticipate ...

Mark we put in number, in the earlier estimate we didn't have an idea... haven't gone back

Charlie: I'm assuming we did study with existing traffic at ground level. Mark said we did the model, compared what we heard in the field with what the model showed.

Charlie: did you extrapolate that to be at higher elevation and speeds? Mark said exactly, that was done.

Charlie: my assumption is elevated roadway with through traffic, speeds will be greater than on existing 46.

Charlie: sounds to me like you're saying based on federal criteria our community is outside of the noise impact area for abatement

Mark: I believe that is the case... based on the study that is the indication.

?: time line, you don't have money or schedule for construction

Mark went over funding for OCEA and FDOT. Some folks would like to get started with design next year, but there's no certainty to that. Could see some design initiated by next year.

\$1.7 -8 billion would be for whole program, all three counties

Charlie: what's cost for SC? Mark would say fairly big component of it, \$600-700 million.

Charlie: how do you propose to get the funding? Mark: variety of funding sources. Beltway to the east, ... hope to get federal funding for some if not all of SC. If it gets tolled, which OC would be, they would sell bonds and fund it the way they have their other projects. Those are the two fairly traditional methods. Beyond that P3, concessionaires have their funding and in return they operate facility for some time frame and repay from revenues. It could be a toll road, but at this point we're not proposing tolls in Seminole or Lake County.

Charlie: what is the timeline?

Mark public hearings in Feb. working through several processes and trying to get things together, taking longer than hope. We will be setting that date in Dec and letting folks know, Mary will send out newsletter and also notices to all the folks in the ROW.

Charlie: May meeting of SCEA were looking at Sept. hearings and the n coming back, what ar you looking for in the meeting next Tues? Mark said it's just to give them an update and review what we are proposing as preferred alternative, which is similar to what we proposed in May. We would like them to say please move forward and let us know what input you've received.

Mark said we will indicate that we plan to take this forward to public hearing and come back to them. Its same basic alternative, think we moved a few ponds, but not a lot of changes have occurred. We're not asking them to approve anything other than move forward to the hearing.

Dan: what's the approval process and when might you anticipate getting approval. Mark said after hearings there is a 10-day comment period, assuming DOT still interested in build alternative, will finalize documents, we would go to OCEA, LC and SCEA and review input from hearings and ask them for their thoughts, if they want to concur or whatever that's up to them. Its' a DOT project so DOT could just move forward, but these days and times we would really hope the commissions approve.

So with that timeline .... Rough range for finishing? Mark in summer seek federal approval on the project. Finance would have to be addressed after.

Dan: in the meetings, is the public allowed to speak? Mark said yes, also form to provide comments.

Dan: we're talking to you and Mary, do these concerns, I know you're hearing this, but do we need to make someone else aware of this? PIO noted issues are documented and presented to FDOT, OCEA and other study team reps at the progress meetings, and any follow up info taken back to community.

Dan: summary of concerns: impact to our neighborhood going by both entrances is a little much to ask for one neighborhood

Noise and various takes on noise

--what's the current noise we have now? Is it close to the 66 db?

And also our property values

Charlie: point you made after construction it enhances property values with improved access, but that's as long as it's not at your front door

Dan: Most people moved there because it's nice and quiet, and there's wildlife, so we're very concerned about the impact and the noise

Northern and eastern boundaries of the community will be encircled... without belaboring that road will be elevated.

Charlie: have son in south Florida and travel Sawgrass and see the concrete barriers that are in the backyard of homes. Mark said that's not the case in your neighborhood.

Charlie: key to us would be to having profile, and rendering to assess what the impact would be.

Mark said we can come out and meet with your full association, apologize we've be

Dan: next board meeting Nov. 15, it's every 3rd Thursday; annual meeting is in Feb. and know that Mary has spoken at that a couple of times. Mark said he doesn't want to wait until February.

Discussion that we will shoot for early December for a committee/board meeting with Mark and Mary.

Charlie: assuming approval in Q3, when do you start acquiring land? Mark said If we had all the money in our pocket, with the federal approval would go to final design, that would be easily 2-3 year process for design given size and magnitude, so 2011, then ROW would start after that, minimum 2-4 years, and project would probably be phased, start in OC and SC would be later, though with higher priced ROW in SC might try to buy that earlier, best case 2015 we'd have all the ROW and then construction would start and could be phased over 10 years.

Dan: this area growing, how does that impact when you come back and look at it in 2-3 years, additional impacts. Mark said do re-evaluation in design and ROW, have to look at impacts reported in previous phase, whether original study or subsequent re-evaluation and see what the differences are, if significant, have to do public meetings, etc. there's lot of pressure out there not only in SC. Some has eased with market but that's probably short term.

Charlie: we don't want to appear NIMBY ...  
Charlie: what is our window to affect any change in the routing? Mark said study phase is critical and would invest your efforts in that, or even after the study. Your best way is probably through SCEA which is your board.  
Mark said we've resolved issues in LC with ... have received letter from LC indicating their decisions.  
Discussion of them wanting to know what other communities have done, requested copy of the database. Mark noted Capri Cove and Tall Trees in SC have been most active. He said the extensive comments from the previous public meetings fill two large binders. PIO noted dbf has 2800 entries and some of those easily have 50 pages of contact history. Dan said he deals with access and other databases, and said he has ACT, requested database in electronic form.  
PIO confirmed will get that, the profiles to them, and get with them re: committee and/or board meeting in first week of Dec.

Subject: Conference call: 9:00 AM, Fri, 9 Nov. Sylvan Lake Reserve Community HOA and Wekiva Parkway Extension  
Thanks for setting this up, Mary.  
All,  
Per my phone conversation with Mary Brooks a short time ago, our conference call with Mark Callahan and Mary is now scheduled for tomorrow morning, 9 Nov, at 9:00 AM.  
Dial-in #: 866-711-9922, and passcode 1952629.  
Expected participants from our homeowners association committee are:  
Tony Cerino  
Giselle Weber (to be confirmed)  
Charlie Shaw  
Vanessa Macaluso (tentative)  
Bob Watson, our final committee member will be on travel, and so will not be able to participate.  
Dan Macaluso, our HOA President, is also expected to participate.  
Regards,  
Charlie

Subject: RE: Sylvan Lake Reserve Community HOA and Wekiva Parkway Extension  
Charlie,  
Ch2m Hill would not be able to do a live meeting on such short notice, so we will stick with the conference call. The number will be 866-711-9922, and passcode 1952629.  
Mark is going to see if they can pull together profiles to show the road elevation at your two entrances. I will email those to you when I get them.  
If for some reason your folks can't manage tomorrow morning, Mark said he has some time Monday morning, but he will be busy also getting ready for the SCEA meeting on Tuesday so...  
I think you already have the SC alternative, but I attached it again here just in case.

Ch2m Hill said your subdivision is outside of the anticipated noise impacts as per the federal criteria. They are expecting the noise impacts only to extend about 100 feet from the ROW line in your area.  
Mary Brooks

11/8/2007 2:31 PM

PIO called Charlie Shaw/Lake Sylvan Reserve 407-688-0788, who said he would check with his folks and see if they could do conference call tomorrow some time 8-10 a.m. He asked if evening wasn't possible? PIO noted I've got appointment already and I know Mark is booked most of the day.  
Charlie asked what the red lines were on the map? PIO noted that is the ROW.  
He asked about the elevations, with the bridges near them is it likely the road will drop down much. We both pulled up the SC map and noted the 4 bridges from their entrance to the east, so no chance there, maybe a little possibility of lowering profile between their entrance and Lake Markham road. He said their community is concerned about: impact of property values with the road passing both their entrances (second one on orange Boulevard across from Academy of Learning); visibility of roadway; road noise. Before they had a nice natural setting to the Orange boulevard entrance and now you'll come out looking up at a roadway. He was interested in the elevations in their area, and any other drawings showing what it will look like that Mark might have. PIO said I'd check, but noted the typical section has been on the website since the last workshops. He said they've seen those.

PIO noted re: noise concerns, noise impact assessment being done as part of this study, and with more dense development in SC, more likely to meet some of the federal criteria for noise walls, PIO noted also depends on distance from roadway (if it's more than 200-300 feet a wall would be ineffective because sound that went up would already have fallen back down at that distance), cost-feasibility \$45,000 / benefited property, etc. PIO noted they are lucky in the respect that they will continue to be able to turn left or right out of their 46 entrance because of the bridge; their neighbors have to go down and make a U-turn to go west.

He said it would be hard to sell people that they're lucky about that. PIO noted bottom line is SR 46 is dangerous, congested and only getting worse. Everyone agrees something needed to be done, simply four laning not an option, wouldn't meet the long-term need with the growth and doesn't address environmental concerns. PIO noted all of the consensus building with the various sectors of the community that went into this parkway concept.

He asked if we could do a go-to-meeting or live meeting, where everyone is looking at the same exhibit as the person points things out. PIO said I'd check with Mark on that, and if he has any other exhibits he thinks would be helpful. He's checking with his people on the time.

Hi Mary,

Thanks for retuning my call today. As we discussed, I called last week following our committee meeting, but you were out of the office. I spoke with Deanna, who said you were on vacation until this week. Deanna mentioned she had delivered the new maps to OOCEA, and they should be up on the site shortly. I haven't been able to find them, and

you said you were going to check with the OOCEA Webmaster. In the interim, you agreed you would email the file to me, ~ 9M in size.  
Per our discussion, I understand you would email Mark Callahan today about my suggestion to schedule an evening conference call with our committee using Windows Live Meeting prior to the SCEA meeting on 13 November. Please advise status when you hear from Mark. Thanks.  
I am copying our committee members on this email.

Hi Mary,

This is in follow-up to our conversation earlier this afternoon. As I mentioned, I'm sure our community association will take you up on your offer for an update briefing. We will have a meeting of the committee formed to look into the project's community impact next Thursday, and I will discuss with the other committee members the best time frame for such an event, subject to your availability, of course. I'll let you know the outcome, and also check back with you the week of 29 October as to the availability of the updated maps.

The following link is broken on the Wekiva Parkway Web page: <<http://www.wekivacommittee.org/>>. Is there an update? Thanks.

Have a nice weekend.

10/19/2007 2:51 PM

PIO returned call to Charlie Shaw/Sylvan Lake Reserve, who said he realized after he left the MSG that I don't have anything to do with SCEA minutes. PIO noted that's okay. He said there are a lot of rumors and misconceptions going around, one is SCEA has nothing

to say in this and it's been completely taken over by the state. PIO confirmed this is an FDOT project, but SCEA charter says they have to approve any expressway in their county

He noted some of them went to the 417 meeting a week or so ago because they thought it was related. He relayed some of the misconceptions that residents had, such as ramps being right at their entrance. PIO noted on 46 there will be frontage road and then slip ramp to get up onto the parkway. He noted they also have an entrance on Orange Boulevard. PIO noted we are widening to the north on 46, so not changing anything at their entrance, no taking, will hold the south ROW line of 46. PIO noted the road pavement will be closer than 46 is now.

He said they have a committee of the board members to get up to speed on what's happening with the project and how it will affect them. PIO noted we'd presented to a number of HOA's, and asked if we'd presented to their folks before? He said we did but it's been more than a year, things were still pretty sketchy back then. PIO asked him to email his questions and concerns, and I would put some info together. PIO also asked for their HOA meeting dates and we can coordinate a presentation with project personnel, give them an update, and bring exhibits. PIO noted the latest maps are going to the OOCEA Board on Oct. 24, and after that we will post them on the website, so we will be able to bring updated boards to their meeting. He said their committee meets next Thursday and he will relay this and get back to me after that. PIO said at his convenience, that's fine. He said they will probably go to the Nov. 13 SCEA meeting. PIO noted I hadn't heard that we'd be doing an update at that one, but they often don't give us much notice when they want an update so it's possible. He said he will keep looking for an agenda, hadn't seen one yet for Nov. 13.

--307 p.m.

10/19/2007 2:39 PM Charlie Shaw/Sylvan Lake Reserve HOA called and left MSG our board was looking at activities going on with Wekiva expressway and how it's going to impact community. Noticed from SCEA website that there was a meeting on May 8, and I see you attended, but the minutes are not posted. Can you tell me how I could get a hold of those? 407-688-0788 I see there's a meeting scheduled Nov. 13 and just wanted to confirm on that and update on any changes. Because there will be a couple of us that might want to attend that. I will follow up with an email just in case you miss this or any of the details. Thanks.

Contact  
7/24/2007 9:14 AM Wayne Shelton  
PIO returned call to Wayne Shelton/6900 Swain Road called 352-357-6068, let him know PowerPoint with recommended alternatives was on website, and walked him through links OC bought Fazio, my property is right in front of his, it's like a park. Ms. Elizabeth's has dumbwaiter that goes to third floor, third floor attic has been renovated to be a child's playhouse. He said he would really like to know what they're going to do with that house. PIO noted I'd heard they were looking at relocating one historic home to a park, but don't know if that is the one or what was decided, whether it was too costly, or what. Was thinking about putting house on 37 acres, but don't want to put a house out there and have to tear it down. PIO gave him links for PowerPoint. He tried to get on but was having difficulty, but said would do so

7/23/2007 5:02 PM Wayne Shelton/6900 Swain Road called and left MSG, haven't had a lot of time to go to meetings due to my work schedule. I'm trying to find out, thinking about building house but I don't want to build on property that's going to be next to the highway or rezoned for commercial use. I'm reading your letter now. Wish you would give me a call if you can if you have the time.

Give me a call if you can, 352-357-6068

8/22/2007	5:44 PM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, August 22, 2007 5:44 PM To: 'j.shin1@yahoo.com' Subject: SR 429 - Wekiva Parkway PD&amp;E Study - 2695 and 2675 Boch Road query</p> <p>John,</p> <p>To follow up our phone conversation, I checked the location of the property you asked about, 6431 Plymouth Sorrento Road with regard to the State Road 429-Wekiva Parkway Project Development and Environment (PD&amp;E) Study. Nothing came up for this address on the Orange County Property Appraiser website. However, your properties at 2695 and 2675 Boch Road did come up. These two properties are at the northeast corner of Plymouth Sorrento Road and Boch Road, and are in the position of what would be 6431 Plymouth Sorrento Road.</p> <p>If that is the correct location, then these properties would not be affected by the alignment being recommended at this time in this area. That portion of the systems interchange would pass two parcels south of Boch Road in this area; the properties in question are on the northeast quadrant of Boch and Plymouth Sorrento Road.</p> <p>Please be advised that we do not have an approved alignment or interchange locations, so things are still highly subject to change. We are looking at holding the formal public hearings on the recommended alignment and interchange locations in January 2008, with the study to conclude with an approved alignment in summer 2008. Please also bear in mind that this project is not funded, so the schedule for subsequent project phases is highly subject to funding availability.</p> <p>I hope this addresses your question. Please feel free to call or email with other questions or concerns.</p> <p>Mary Brooks</p>
8/22/2007	5:09 PM	<p>PIO researched John Shin property 6431 Plymouth Sorrento Road j.shin1@yahoo.com &lt;mailto:j.shin1@yahoo.com&gt; PIO checked OCPA website and nothing came up for that address, though did she Shin properties at 2695 and 2675 Boch Road. The two properties are at the corner of Boch Road and Plymouth Sorrento Road, and are in the location of what would be 6431 Plymouth Sorrento Road.</p> <p>PIO checked parcels against recommended alternative in that area. Recommended alternative would be two parcels south of Boch in this area; properties in question are on the NE quadrant of Boch and Plymouth Sorrento Road.</p>
8/20/2007	3:18 PM	<p>John Shin 808-375-9112 called and said he was looking for newly made maps? PIO noted I have not gotten the latest maps yet, but he can view our project recommendations in a PowerPoint on the expressway Authority website, gave address. PIO offered to walk him through the various links, but he said he was not at a computer. He said he just needed to know if we were affecting his property? He said he has property at Boch Road and Plymouth Sorrento, 6431 Plymouth Sorrento Road. PIO said I'd have to research that for him and get back to him in a day or so. He said can email him at email j.shin1@yahoo.com &lt;mailto:j.shin1@yahoo.com&gt;</p> <p>Also asked about public hearing dates? PIO noted don't have firm dates yet, were going to do it in October but that's been pushed back to January 2008. He said oh, so not this year? PIO said correct. PIO said would look up his property but again encouraged him to view PowerPoint presentation on website with recommendations, PIO noted if he has trouble finding it can call me when he's at a computer. He said he thinks that will be</p>

helpful and thanks.

Contact Date	Time	Lee & Adam Shpritz Regarding	Inner Harbor Realty
10/19/2007	3:40 PM	<p>Adam Shpritz 410-365-3595 called and said you emailed my father Lee, thank you for responding so quickly. I just had a few questions. He said they bought the five acre parcel to retire there, didn't know about the road coming in, have there been a lot of people opposing this? PIO noted there have certainly been people who said they moved out there to get away from the city and didn't want the road. But that's the problem when everybody moves to the country, it's not the country any more. PIO noted safety and design issues with SR 46, one of the most dangerous roads in the state; most people recognize something needs to be done.</p> <p>He asked how wide the corridor would be, how much are you taking from property south of them? PIO said couldn't tell him that at this point, just that the corridor would be about 200' wide or a little wider.</p> <p>He asked how are they supposed to be able to get out of Hojin Street if there is a parkway there? PIO noted it would be an at grade arterial at that point, the elevated parkway doesn't start until farther east.</p> <p>He asked when is construction supposed to start? PIO noted \$2 billion project not fully funded. FDOT doing Lake and Seminole sections, at current funding levels, looking at 10-15 years to start building. PIO noted looking at different funding options, federal, turnpike, public-private partnership, but this is not something that's going to happen in the next couple of years, there are a number of phases they have to go through before construction.</p> <p>He said he lives in Baltimore and works on utility projects so he's familiar with that, all the money is in utility work on these projects, someone will make a lot of money. PIO noted there will likely be multiple contractors, this job is 25 miles and will likely be done in sections. He said thanks for the info. He guesses he doesn't have to lose any sleep over this for a while.</p> <p>He asked if we were sending out weekly emails? PIO noted no, nothing changing week to week. PIO noted will send out email when the latest maps are posted, probably end of this month. Then we will send a newsletter when we're ready for the public hearings in January. He said thanks for the e info.</p> <p>--352 p.m.</p>

Paul Sills  
Regarding  
Paul Sills 407-629-1692 called and said the company I work for has property in Seminole County. We've been receiving letters from lawyers and trying to figure out what they're talking about. Do you have maps of the property that's going to be taken? PIO noted we're just in study stage, don't have approved alignment so don't have ROW maps. PIO noted attorneys have been sending solicitation letters since study started in January 2005; probably timed it for when we were looking to have public hearings in October, but that's been pushed back to January 2008. PIO noted we have some maps on the website, but waiting for new maps to be approved by OCEA before they get posted. PIO noted there is a PowerPoint on the website that gives a pretty good idea of where we're heading with the recommendations. He said he thinks he saw that. PIO went over study and overall schedule, funding challenges. He said he thought that was the case, but when they got the letter, thought they should check. PIO said no problem, I'd rather they get the real story from me than go on rumors and innuendo. He said he did not think they were on the mailing list, gave me his contact info. P.O. Subject: RE: Wekiva Parkway

Hello Dan,

This week is crazy with meetings and catching up from being out last week, so a meeting won't work. But I can tell you where things stand.

As part of the Wekiva Parkway Project Development and Environment (PD&E) Study we have recommendations for an alignment and interchange locations for the 25-mile roadway through Orange, Lake and Seminole Counties. The Expressway Authority Board on Oct. 24 approved bringing those recommendations forward for formal public hearings and input in late January or February. The dates and locations still need to be finalized. Following the hearings, any revisions would be made and then we would proceed to agency approvals of the preferred alignment alternative. We hope to conclude the study with an approved alignment in summer 2008. As you've probably heard, this project is not fully funded - far from it. So there are no real schedules involving construction; just highly tentative guesstimates.

The Expressway Authority has the funding for the next phase - final design - for their portion in Orange County, as well as some funding to begin buying right of way. Each of those phases can take 2-3 years. At the current funding levels, the OOCEA would be looking at 2012-14 before there would be sufficient funding to finish the property acquisition and begin construction.

The Florida Department of Transportation, which is developing the Lake and Seminole portions of the project, does not have the funding for final design, though they do have a little money for some right of way acquisition. At current funding levels, the Department is estimating that it could be 10-15 years before they begin construction on their portions. We are investigating funding options, including federal funding, possible development of the project by Florida's Turnpike Enterprise (which would present its own challenges) and public-private partnerships. But at nearly \$2 billion, this is an expensive project to bring to fruition.

We have some past maps and a PowerPoint presentation showing the recommendations on the OOCEA website at [www.expresswayauthority.com](http://www.expresswayauthority.com) <<http://www.expresswayauthority.com/>>. On the entry page click on the "corporate site" button. On the home page under "Construction Updates" on the left there are several paragraphs of text. Click on the highlighted text link for "Western Connectors," which will take you to the Wekiva Parkway page. At the top of that page are several links for the PowerPoint presentation as well as the last maps that were available. Hopefully the new map will be posted any day now.

I hope this helps. Let me know if you have any difficulty finding the info on the website. And feel free to call or email with additional questions.

Dear Ms. Brooks,

My company is considering the acquisition and development of some properties in the vicinity of the wekiva parkway (429 extension through Apoka to the North and East) I am planning on coming down to the area next week (November 8th) and would like to meet with you or someone at the Expressway Authority to discuss the plans for the extension ie: status, design, construction schedule, etc.) if you are available (probably in the early afternoon)...

Please get back to me and let me know... (Deana has informed me that you are currently on vacation so I hope you come back well rested!)

Hope to speak with you soon...

Regards, Dan

Hello Maurice, As part of the ongoing SR 429-Wekiva Parkway Project Development and Environment (PD&E) Study, we are continuing to meet with local government and state agency representatives to get their input on the remaining alignment alternatives in order to help arrive at some recommendations. For example, we will be presenting an update on this project to the Seminole County Expressway Authority on May 8 at 4 p.m. in the County Commission chambers in Sanford, and to the Mount Dora City Council on May 15 at 7 p.m. We hope to be ready to bring these recommendations forward for formal public hearings in September or October, with the PD&E Study potentially finishing with an approved route by the end of the year or in early 2008. We hope to be getting some updated information out to folks within the coming weeks. If you're not already on the mailing list, please forward your address so that I can be sure to send you the latest. Please feel free to call or email with other questions. Mary

Mr. Lovett,  
I would like to get a copy of the most recent maps as well as the original maps showing the area between the Wekiva River and Orange County showing the original proposed roads and the most recent proposals with particular interest in the 46, 46-A and 44 area. I can pick these up from your offices in Deland when they are available or at another location as needed.  
Thank you in advance,  
William Smalley

Subject: Wekiva Pkwy - Lake Co. BOCC Mtg. on 10/23/07  
This is a brief summary of a portion of the Lake Co. Commission meeting this morning concerning CR 46A Realignment and US 441/SR 46 Interchange Modification. Mike Snyder, Brian Stanger and I attended. The discussion on CR 46A lasted about 2 hours. Jim Stivender did a short background intro, discussed the 250 ft. for R/W and buffer, and said the purpose today was to decide whether to authorize the chairman to sign the letter to FDOT recommending Alternative 1A. Board Chairman Cadwell opened the meeting to speakers.  
The following people spoke in favor of, or against, Alternative 1A (this is not in order of appearance): In favor - Charles Lee, Audubon and WRBC member; Scott Taylor, landowner; Rory Tromber, Friends of Wekiva; Keith Schue, The Nature Conservancy; Mike Martin, Division of Forestry; Mayor James Yatsuk of Mount Dora (he said the City Council had voted its unanimous support); Robert Curry, citizen; Peggy Bellflower, Sorrento. Those against - Bill Smalley, Heathrow Country Estates (HCE) resident; Ray Palmer, HCE resident; Allison Drake, HCE resident; Brad Milsap, HCE project director; William Anderson, HCE resident; Bob Regal, Sorrento resident; G.G. Washington, HCE resident; Thomas Montali, citizen; Catherine Hanson, former Lake Co. commissioner; Jacob Martinez, HCE resident; Janet Smalley, HCE resident; James Lloyd, HCE resident; Tom O'Brien, citizen. Essentially those opposed to Alternative 1A asked the Board to delay voting on the letter to FDOT and instead appoint a committee to study other alternatives. Commissioner Linda Stewart strongly defended the results of the PD&E Study and complimented OOCEA

and FDOT for all the efforts put in to date. She said there have been many public meetings and many alternatives evaluated. Mike Snyder was asked to clarify why the Board recommendation to FDOT on CR 46A was needed now. Mike advised the commissioners that the preferred alternative had to be selected in order to take it to the Public Hearing with the rest of the Wekiva Parkway project around Feb. of 2008. The Board voted 3 to 1 in favor of sending a letter to FDOT recommending Alternative 1A. Commissioners Cadwell, Stewart and Renick voted in favor, while Commissioner Hill voted against. Commissioner Stivender was absent.

The discussion on the US 441/SR 46 Interchange lasted about 10 minutes. Mayor Yatsuk said in an Oct. 17, 2007 letter to FDOT, the Mount Dora City Council had clearly expressed its preference for Alternative 1 (grade separated). He said they found out at the recent WRBC meeting that Alternative 2 (at-grade) was recommended by FDOT. He acknowledged that FDOT and their consultants had met several times with him and city staff and with the City Council on the interchange alternatives, but he said the \$20 million difference in the cost of the alternatives should not be a big issue for a \$2 billion project. He asked the Lake County BOCC to support Mount Dora. Jim Stivender was asked by a commissioner if county staff had a position on this. He said he thought the Alternative 2 concept was developed to minimize traffic going west of US 441 into Mount Dora. T.J. Fish of the Lake-Sumter MPO staff said he thought the MPO would support Mount Dora. The Commissioners voted unanimously to send a letter to FDOT in support of Mount Dora to "do away with an intersection at the interchange".

-- End of Summary --

and CR 46A AlternativeAttachments: Mime.822 (6423 bytes) [View] [Save As]  
Brain and Frank,Bill Smalley, a resident of Heathrow Country Estates, called TuesdayJune  
12, 2007 and I reached him yesterday. &nbsp;Mr. Smalley essentiallyrequested that we  
consider a new alternative alignment for CR 46A. &nbsp;Thealignment would extend to the  
east and cross into the Seminole StateForest east of the karst areas that are located near  
the western borderof the Forest property.I explained that the Lake Co Commission had  
provided us fairly cleardirection to stay out of the Forest and to look at options that  
providea buffer between the road and the neighborhood. &nbsp;I also indicated thethe  
Department of Agriculture has a letter forthcoming indicating theirconcern about the CR  
46A alignment. &nbsp;Based on this we are going tocoordinate with County Staff and seek  
a solution that is consistent withthe Lake Co, Commission direction. &nbsp;Therefore,  
&nbsp;at this time we are notpursuing any new alternatives that would traverse the State  
ForestLands.Mr. Smalley discussed several additional issues related to the Lake  
CoCommission and the Wekiva Commission direction and requested that weexamine this  
new option. &nbsp;I committed to review this request with FDOT.I spoke to Brain Stanger  
today and he does not believe that examinationof a new alignment in the Forest makes  
sense given the directionreceived. &nbsp;With this input we are not going to examine the  
alignmentsuggested by Mr. Smalley unless otherwise directed by FDOT.Thanks,Mark

Date	Time	Regarding
9/18/2007	2:15 PM	PIO called back Geoff Smith 317-224-5723 who asked the timeframe for the decision being made and the roads opening? PIO noted study concludes with approval summer 2008, but since not funded other phases of development are tentative. PIO noted could be 5-10 years in OC for OOCEA to get to construction, and 10-15 years for FDOT in Lake and SC at current funding. He said so the preferred alignment that you have now, is that likely to change? PIO noted wouldn't think you'd see much change in SC or OC from Kelly Park south, there are still some issues to iron out regarding some of the interchanges, and still have public hearings which could result in some changes also. PIO noted we're getting to the point where shifts are a matter of a few feet more likely, than of a ¼ to ½ mile or more. He said that answered his questions and thanks for calling back. PIO asked if he'd like to be on the mailing list? He said yes, his contact info is: 8425 Woodfield Crossing Blvd., Ste. 201E, Indianapolis. IN 46240, gsmith@ppusa.net <mailto:gsmith@ppusa.net>

Date	Time	Regarding
9/12/2007	2:00 PM	Mr. Smith called PIO hotline and had another question. PIO was in CH2M Hill meeting
9/12/2007	8:30 AM	PIO Deana Leffler returned Mr. Smith's phone call. PIO said nothing has been decided yet and even the recommendations in the works are still subject to change. PIO also said there is supposed to be a public hearing meeting in January 2008. He would like Mary to return his call as he has more questions about the project that are not on the OCEA website.

9/12/2007	8:27 AM	Mr. Smith called and left voice mail asking about project start date for the Wekiwa Parkway.
9/12/2007	3:30 AM	PIO Deana Leffler returned call to Mr. Smith. He was asking about the alignments. PIO said nothing was final. The project is in design phase and could change after public meetings. Mr. Smith was satisfied. PIO gave him contact info.

7/23/2007	12:51 PM	PIO returned call to Bernice Smith/2604 Boch Rd in Apopka 407-886-7794 was wondering if heard anything out here. PIO noted we have recommendations in a PowerPoint on the website, does she have internet access? She said yes, but via phone line so can't get on while on the phone. PIO suggested she look at the OC recommendations and call me back with any questions. We had 15 acres, last meeting they said it wasn't going to hit us, but wanted to be sure. Just built here couple years ago instead of going into assisted living, wanted to be out here with out daughter so she would have a place. Ralph is 85 and I'm 77 and we'd hate to pack up and move if we didn't have to. PIO reminded her this is just the study phase, you're looking at 5-10 years before funding for construction on this. She said you're kidding? Well then we won't be packing up any time soon then. She thanked me for the info.

7/23/2007	8:24 AM	Bernice Smith/2604 Boch Rd in Apopka called and left MSG we received a letter from you saying new map has been revised, couldn't pull it up on the computer so I wanted to talk to you just a minute regarding the ROW that's supposed to affect our property. 407-886-7794 if you would give me a call I would appreciate it.

Regarding

From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com]  
Sent: Monday, December 10, 2007 8:54 AM  
To: 'Debbie'  
Subject: RE: Wekiva parkway update  
Debbie,  
The Orlando-Orange County Expressway Authority in October approved moving forward to formal public hearings with the recommended preferred alignment and interchange alternatives, which have been posted on the OOCEA website at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> . There are numerous documents that have to be finalized for the PD&E Study before we can set the formal public hearings, but we are hoping to be ready to have those in late February or March. We will be sending out a newsletter prior to the meetings with the details.  
I hope this helps. Please feel free to call or email with other questions.  
Mary Brooks

From: Debbie [mailto:dsoderstrom@cfl.rr.com]  
Sent: Monday, December 10, 2007 6:33 AM  
To: MBrooksSR414@cfl.rr.com  
Subject: Wekiva parkway update  
What is the latest new on the parkway? My home is located near I-4 and in the path of the preferred alignment.  
When is the next meeting?  
Thank you  
Debbie Soderstrom

2/14/2007 9:20 AM Debbie Soderstrom 407-665-4760 said she has spoken to PIO before and heard there was a meeting on Feb. 2, what was decided? PIO asked area she was in (SC) and went over preliminary recommendations. She said she lives in the back corner of Tall Trees, the next two properties over at 1450 Metz Avenue, two parcels south of Tall Trees. We've been on our property for 28 years. The people in tall trees have been there 10 years and they're

not taking their houses but they're taking ours? What makes them so much more special? PIO said I'd have to check her location for potential impact given alternative adjustment and get back to her. PIO noted none of this is final and we're still working through prelim recommendations in some areas, meeting with local and state officials, hope now to have public hearings in May, and finish study in the summer. She said they're not ones who like to move, but she understands this is happening to other people as well.

1/15/2007	2:12 PM	PIO returned call to Debbie Soderstrom 407-474-3437 I was wondering, my house in middle of one of the paths for Wekiva Parkway, knew first of year they were going to make a decision, have they done that? PIO noted we have a couple more agency meetings with OC and FDOT at the end o the month, and hope to have draft recommendations for alignment and interchanges by mid February. PIO noted we'd post the latest maps on the OOCEA website at that time. Had she seen the website? She said yes. She said We want to replace the windows and stuff, but not if they're going to take the house. PIO noted the project is not fully funded, could be a number of years before we get to ROW acquisition and construction. She said she heard that but then she heard other things too. PIO noted it also depends on where your property is (she said she's in Seminole County). PIO noted OOCEA has said in OC, they will proceed to final design and ROW acquisition right after the study finished this summer, and they have money for that, but not all of ROW and not for construction. PIO noted FDOT has some money for design but not for ROW or construction, and haven't said what their schedule will be. She said oh, so it's different agencies? PIO said correct, DOT doing Seminole and Lake... PIO noted it could be 5-10 years before property is purchased, or some federal or other funding could become available and it could be sooner than that, just a lot up in the air right now. She said the property across the street is 10 acres and it's all for sale. She said I was wondering how they can sell? PIO noted don't know exact real estate law, but understand as long as you disclose that a project being considered for the area you can still sell your property. PIO noted I suggest people live their lives the way they normally would, and if improvements are made that make the property more valuable, then that would have to be dealt with in the ROW acquisition process. PIO noted also hoping to get the newsletter out in February or so. Was she on the mailing list? She said yes. She said it's just frustrating, taking so long. PIO noted I understood her concerns. She thanked me for calling back, said she works for the government and they're closed today. PIO noted agency is closed but I'm still working.--225 p.m.

Contact		Kevin Spear	Orlando Sentinel
Date	Time	Regarding	
4/11/2007	4:52 PM	PIO as requested called Kevin/Sentinel, who said he was doing a story on state efforts to buy land, but they're running out of money. They had hoped for additional allocation from legislature, even when ... They've got existing contracts to make good on, one of them is Neighborhood Lakes. DEP was big partner in Neighborhood Lakes, but I think they asked OOCEA to pick up land and hold it until they come up with the money. He talked to interim director of DEP and state lands, but he didn't have time to get to the details. He asked PIO to check with finance folks on whether this makes sense? Whether EA loaned or is assisting DEP temporarily in the purchase of the neighborhood lakes. E.g. WMD doing Joshua creek, WMD and state were to split the cost, but for right now, deal closed last week, right now district owns most of it, but in July state will hand over money. He said it's not for tomorrow, may not even write it until next week, it's not screaming out for deadline stuff. PIO noted I will put the feeler out but go on vacation	

Date	Time	Regarding
2/15/2007	7:00 PM	PIO went over overall alternatives board for Glades of Sylvan Lakes HOA; about 50 people

in attendance (they had a quorum for the first time in two years). PIO noted status of study, meetings and review process still underway, public hearings hoping for May. Questions included: what will the road elevation be? PIO noted in location s of bridges it will be up 20-30 feet, but we will try to bring it back down otherwise when possible. What about noise walls? PIO noted there is a noise abatement component as part of this study that is being done. Where will we get on and off? PIO briefly discussed slip ramps. Where will it turn south off SR 46 to 417? PIO noted in the area of designing women and 12 oaks RV resort. When will construction begin? PIO noted funding challenges and guestimate of overall schedule. Did you look at going down International Parkway? PIO noted yes, both at the request of residents and Comm. Carey. PIO noted however the engineering wise the radiuses and other wise didn't work; also county has intentions for international parkway as corporate corridor that this concept might have conflicted with. Where will you cross wayside? PIO pointed out on map near Academy of Learning and the church. Are they still considering the RR corridor? PIO noted no. Will there be toll booths? PIO noted FDOT is developing road in Lake and Seminole counties, so at this point it would be a free road. PIO reiterated funding lacking and that all funding options are being looked at. Can't promise them it wouldn't one day be tolled. Are the maps on the website? Yes, gave web address and told them to call or email me if they have trouble finding the maps. PIO noted preliminary recommendations for SC, but emphasized these are not final, still meeting with local and state officials for input and revisions, so maps changing everyday. What will the speed limit be? PIO noted possibly 55-65 mph depending on the location. What about beautification, will it look like a parkway? PIO noted WRBCC included recommendations on aesthetics, particularly since the roadway was going into an environmentally sensitive area so that is being considered. PIO reiterated that with any additional amenities comes additional cost, when we don't have the basic project funded, so that will be a challenge. The PIO distributed business cards. They were appreciative of the presentation.--730 p.m.

2/15/2007	4:46 PM	PIO called Rodger/Attwood Phillips to reconfirm for this evening's Glades of Sylvan Lakes HOA meeting. He said thanks for calling back and see you there.
2/15/2007	1:07 PM	Megan/Atwood Phillips MSG are you still attending tonight's meeting for Glades of Sylvan Lakes, meeting at Lake Markham Road sports center, you're near top of agenda, there are couple minor items and then you get to talk to the crowd. Please call Roger on cell. Our phones are out today, 407-697-9136 and confirm you will be there

 AMTo: 'chstark@bellsouth.net'Subject: SR 429 - Wekiva Parkway PD&E Study - Update Hello Charles,Yes, I remember you. The SR 429-Wekiva Parkway Project Development and Environment PD&E) Study is continuing.We originally thought we'd be ready to have a formal public hearing on recommended alternatives in January or February. However, a project of this magnitude generates a litany of issues that have to be worked through, including trying to address the input and adjustments requested by the hundreds of homeowners along the corridor. We continue meeting with HOA's, churches and other community stakeholders who face potential direct impacts from this project. We also are continuing to meet with local government and state agency officials to get their input and direction on recommendations for alignment alternatives. It takes time to work into the schedules of all of these various officials and agencies. For example, we got some direction from the City of Apopka in February and the OC Board of Commissioners in March. We are meeting with the SC Expressway Authority on May 8 at 4 p.m. in Sanford, the Mount Dora City Council on May 15 at 7 p.m., and have a meeting with the Lake County Board of Commissioners in June, to name a few.We now hope that we will have recommendations that are ready to bring forward for formal public hearings in September or October, with the study hopefully concluding by end of 2007 or early 2008 with an approved alignment.I hope soon to have some updated maps to post on the website and to send out some information to property owners and others in the coming weeks. In the meantime you're always welcome to call or email with specific questions. Mary Brooks

 PMTo: 'chstark@bellsouth.net'Subject: RE: SR 429-Wekiva Parkway PD&E Study - UpdateCharles We have been trying to work out a number of issues throughout the project corridor, many of which are still being resolved through meetings with local government and state

agency representatives. So yes, the schedule has been pushed back. I am in the process of updating the website, and we should be getting a new newsletter out in March. The preliminary recommendations for Seminole County, and let me emphasize preliminary, based on the engineering analysis, public input, impact assessments and right of way estimates, seem to be leaning toward the SR 417 interchange alternative with Interstate 4 and widening to the north for the portion of the Wekiva Parkway along SR 46 before it dips south to SR 417. We will continue to meet with the various officials on all of the preliminary findings over the coming weeks. We are shooting to have a refined recommendation and bring it forward for formal public hearings in April or more likely May. We're still looking to finish the study this summer with an approved alignment. Mary Brooks

3/19/2007	7:32 PM	__From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Monday, March 19, 2007 7:32 PM To: 'Jules Steinberg' Subject: SR 429-Wekiva Parkway PD&E Study - Tall Trees meeting follow up Julian, As discussed after the Tall Trees HOA meeting on March 15, attached please find the Wekiva River Basin Coordinating Committee Final Report, which includes much of the background some of your folks were asking for, and lays the groundwork for what was in the Wekiva Parkway & Protection Act, which is included in this email below.. Mary Brooks Public Information Officer Senate Bill sb1214er CODING: Words stricken are deletions words underlined are additions. ENROLLED 2004 Legislature CS for CS for CS for SB 1214 2nd Engrossed 1 2 An act relating to the Wekiva Parkway and 3 Protection Act; creating part III of ch. 369, 4 F.S., consisting of ss. 369.314, 369.315, 5 369.316, 369.317, 369.318, 369.319, 369.320, 6 369.321, 369.322, 369.323, and 369.324, F.S.; 7 providing legislative intent; providing a legal 8 description of the Wekiva Study Area; defining 9 the Wekiva Parkway; providing guiding...

PIO arrived at Tall Trees clubhouse, help set up boards with Mark, Brian, Tom and Frank Hickson/FDOT also were present. About 35-40 people attended, some standing outside door of clubhouse (very small). PIO did introductions, noted FDOT responsible for Lake and Seminole portions though study being done together with OCEA. Mark gave overview of overall project, noted I-4 connection alternatives. Q: timeframe? Public hearings in summer, federal approval by fall to end of year, but no money to go to design or ROW in this area. Q: what are you basing the recommendations on? Mark noted home, business, wetland impacts, noise impacts, alternatives costs, how does it meet the future traffic needs in the area? Recommendation to be reviewed by SCEA, FDOT. Will present consultant recommendation to SCEA in about a month. Q: why is this neighborhood picked to impact? Mark noted there was a desire to connect the beltway, and as we looked at the traffic, the studies find 30% of the traffic coming from 417 and heading toward the river.

24% going north on I-4, smaller numbers going elsewhere. There was a significant desire to get to and from west Seminole and Lake Counties.Q: why can't you use the same path as today? Mark noted existing SR 46 traffic is growing very fast. Its about 23,000 VPD; back in the mid 80s it was 8,000 VPD.Q: who objected to just widening SR 46? Mark noted FDOT would do that, but because of the sensitivity of the environment and state lands acquired in this area, the permitting authorities wouldn't accept that.Mary McKeever got up and moved to board and spoke extensively. She went over the International Parkway option she said she suggested. Mark noted we did evaluate that but it had problems.Mark noted we have adjusted the 417 alternative about 100' off the subdivision line, no more direct impact.Q: if 417 is used, how will our home values be impacted? Mark noted as there is uncertainty about where the road will go, some people will be concerned. As construction gets underway, certainly there may be some disruption to selling, but once constructed the values will increase because the roadway provides enhanced access, that is what we've seen historically.Mary McKeever made a statement that from this point forward these people are required by law to disclose this. Another gentleman countered you only have to say there is a proposal being considered, don't have to fully disclose until it's been approved.Tom noted we don't have the money to do this in the foreseeable future. There is not design within 5 years; the road would be built in sections. First part probably in OC because the EA can toll their roads. Even if design is done in 5 years ... you're looking at 11 years at best if we have the money.He noted the projected traffic is 90,000 in 25 years. You know how bad it is to get out onto 46 now. We ran a 4 lane scenario and that won't help that future trafficQuestion about the International Parkway connection to 417. Tom said it's an interim fix. It will offer some relief for area roads. It takes some traffic off Rinehart and there's an easement there so we don't have to buy ROW. The issue of cars on 46 trying to get to 417... mark noted we can't get ramp connections in. Q: if my house backs up to your chain link fence, am I impacted? Mark said would see indirect impact of noise.Residents argued their impacts would be direct. Team members noted referring to actual taking of homes and or property when we say "direct impact." No taking for Tall Trees.Several people argued we should be using the SR 46 IC, although it was explained several times that does not work because would have to be a systems IC, local access, ramps can't get in, already problems with existing IC, tremendous commercial development around IC, etc.Q: so you just don't want to lose the tax dollars? Mark sated legislature passed WPPA defining study area, guiding principles, noted early alternatives that would have connection at 17-92 that were eliminated, higher res impacts, county said no.Q: why not go through businesses, or international parkway? Mark said type of facility and geometry doesn't allow that type of button hook or reverse curves, did look at it, and there's high land use in SC comp plan for that area.Mark went over task force and WRBCC history, established what could be done; also ... Q: why aren't you going through Heathrow? Mark noted early alternative from 1980s to use RR corridor, but since then things changed, state bought all of this land and we cannot cross it.Tom showed maps with densely populated developments in green, noted we had to try to snake through, but something needs to be done, 46 is going to get worse, it makes senses to tie in at 417. He sympathized with the homeowners, understood their concerns, but noted can't build something like this without some impacts.Q from McKeever: why look at SR 46 if it was never going to happen? Tom noted we had to look at 46. We didn't know in the beginning that it does not work up there.Q: where funds come from eventually? Tom said it will probably take a special funding source, but don't see it in foreseeable future, possible public private partnerships or tollingMark gave update on alternative refinement, roadway has moved 110' from back corner of subdivision. Noted constraint with apartment complexes. He said number of homes needed for ROW is down to 18 homes, trying to minimize number of homes, businesses and churches affected. Still looking at some adjustments in area of church and Capri Cove.Q: why can't ramp be

farther away?Q: what about the fence? Why not make it more sound proof? Mark noted we're doing a noise impacts, have state and federal standards for impacts, and have done the monitoring to calibrate the modelQ: Wilson Road will be same access road we have now, how high will it be over? Mark noted 25-30' over WilsonQ: what happens during construction when our houses are damaged? Mark said we do full inventory of structures, videotape, there are different techniques to minimize vibration damage. If damage occurs... Brian noted vibration monitoring occurs throughout construction. Mark noted different types of piles used to minimize vibration. He said you will hear it but ... PIO noted if there is damage you contact us and if it was caused by construction we will address it. Mark also noted residents are welcome to video and photograph their property before construction starts. Mark noted we are looking at noise mitigation. Have pushed the road so we do not need any property from Tall Trees. Several residents and McKeever stayed afterwards to view boards and continue asking questions or making statements. Julian said he appreciated us coming, noted many people were emotional but if you look at it reasonably that's where it needs to go, he noted he understood home values would eventually increase, but expressed concern about realtor speaking negatively about project to potential buyers, couldn't be good for her business or us. PIO noted several people didn't seem to know history of project, would he find it helpful to send the WRBCC report and WPPA? He said yes, that's fine.--824 p.m.

2/16/2007	2:47 PM	PIO returned call to Julian Steinberg/Tall Trees 407-321-4919, c 407-474-6902 who said their meeting is usually on the 3rd or 4th Tues. PIO noted Mark is on vacation the first week of March, how about ht second week, either Tues. 13th or Thurs. 15th? He said they're wide open. PIO to run those dates by the project team and get back to him. He said they will send out a newsletter to the residents once we know the date. He asked if we had made any decisions yet? PIO noted some preliminary recommendations, still working through other issues, and nothing by any means final. PIO noted impact assessments and ROW estimates lean toward the 417 alternative, and we have been looking at adjustments to move it slightly off Tall Trees and Capri Cove. PIO noted we're still going to meetings with county and state officials, so that is subject to change.
2/15/2007	2:32 PM	Julian Steinberg/Tall Trees MSG I talked to Denise in century management and she suggested we get together on a different day rather than during our monthly meeting so we have more time to give to you and more time for our monthly meeting. Please get back with me so we can schedule something for both of our conveniences. 407-321-4919, c 407-474-6902 Thank you.

Contact Date	Time	Stephanie
7/31/2007	9:23 AM	<p>Regarding  PIO returned call to Stephanie 407-461-7044 and walked her through web links to get to project info, including recent PowerPoint. She said her computer is old, and she will try it on a newer computer. PIO said she has trouble call me back. She asked if I could mail the maps? PIO noted I was waiting for the updated maps and they would be posted on the website, but the PowerPoint has some of that info now, you just can't zoom in and out like you will be able to on the maps I'm waiting for. She said okay and thanks for calling back.</p>
7/30/2007	3:57 PM	<p>Stephanie called and left MSG I'm interested in western connection. I got a letter and it says website would be updated in July or august. I was just wondering if there's any map up there yet because we're in the way of the project. Please call me at 407-4617044 and let me know when they will put the map up because right now all I'm getting is a blank page</p>
Contact Date	Time	Charle Stephens
8/3/2007	3:26 PM	<p>PIO returned call to Charles L. Stephens Sr., who lives on Orange Boulevard in the Payola area, 407-402-8356 thank you  I own property at 1780 and 1790 Orange Boulevard. I've been looking on the Internet and I just wondered ... the property is up for sale. It's a big chunk of property and there are four owners. Ssomeone wants to develop high end houses here.  Alternative B on the Seminole connection, looked like it's going down by kids academy and church. I just wondered, it looked like they were bringing off 46 and running that direction  The developer wants it to be close to beltway but not on top of our property. I'm down by the water plant; it's brand new and didn't think they wanted to have to tear that down.</p>

PIO noted we have been adjusting the alignments based on concerns and comments from local governments, HOA's churches, etc, and this is the recommendation at this point, still need to go through formal public hearings, take additional input, make any final adjustments and go through agency approvals. PIO noted study to finish with approved alternative summer 2008. He said okay, just wanted to be sure. He said he moved across the river. He lived here for 30 years. There are two parcels of about two acres. Now they want to put high dollar homes out here. His new mailing address is 1923 S. Viscaya Cir, Deltona 32736. He appreciated the return call.

8/3/2007	11:11 AM	(No name given but number matches Charlie Stephens) called and left MSG I wanted to talk to you about the western section of beltway if you could call me at 407-402-8356
8/2/2007	12:34 PM	Charlie Stephens called and left MSG I live on orange boulevard in the payola area, had couple questions thought you might be able to answer for me about the expressway alternative B. if you would call me on my cell at 407-402-8356 thank you

Date	Time	Regarding

Subject: Wekiva Pkwy - Lake Co. BOCC Mtg. on 10/23/07

This is a brief summary of a portion of the Lake Co. Commission meeting this morning concerning CR 46A Realignment and US 441/SR 46 Interchange Modification. Mike Snyder, Brian Stanger and I attended. The discussion on CR 46A lasted about 2 hours. Jim Stivender did a short background intro, discussed the 250 ft. for R/W and buffer, and said the purpose today was to decide whether to authorize the chairman to sign the letter to FDOT recommending Alternative 1A. Board Chairman Cadwell opened the meeting to speakers.

The following people spoke in favor of, or against, Alternative 1A (this is not in order of appearance): In favor - Charles Lee, Audubon and WRBC member; Scott Taylor, landowner; Rory Tromber, Friends of Wekiva; Keith Schue, The Nature Conservancy; Mike Martin, Division of Forestry; Mayor James Yatsuk of Mount Dora (he said the City Council had voted its unanimous support); Robert Curry, citizen; Peggy Bellflower, Sorrento. Those against - Bill Smalley, Heathrow Country Estates (HCE) resident; Ray Palmer, HCE resident; Allison Drake, HCE resident; Brad Milsap, HCE project director; William Anderson, HCE resident; Bob Regal, Sorrento resident; G.G. Washington, HCE resident; Thomas Montali, citizen; Catherine Hanson, former Lake Co. commissioner; Jacob Martinez, HCE resident; Janet Smalley, HCE resident; James Lloyd, HCE resident; Tom O'Brien, citizen. Essentially those opposed to Alternative 1A asked the Board to delay voting on the letter to FDOT and instead appoint a committee to study other alternatives. Commissioner Linda Stewart strongly defended the results of the PD&E Study and complimented OCEA and FDOT for all the efforts put in to date. She said there have been many public meetings and many alternatives evaluated. Mike Snyder was asked to clarify why the Board recommendation to FDOT on CR 46A was needed now. Mike advised the commissioners that the preferred alternative had to be selected in order to take it to the Public Hearing with the rest of the Wekiva Parkway project around Feb. of 2008. The Board voted 3 to 1 in favor of sending a letter to FDOT recommending Alternative 1A. Commissioners Cadwell, Stewart and Renick voted in favor, while Commissioner Hill voted against. Commissioner Stivender was absent.

The discussion on the US 441/SR 46 Interchange lasted about 10 minutes. Mayor Yatsuk said in an Oct. 17, 2007 letter to FDOT, the Mount Dora City Council had clearly expressed its preference for Alternative 1 (grade separated). He said they found out at the recent WRBC meeting that Alternative 2 (at-grade) was recommended by FDOT. He acknowledged that FDOT and their consultants had met several times with him and city staff and with the City Council on the interchange alternatives, but he said the \$20 million difference in the cost of the alternatives should not be a big issue for a \$2 billion project. He asked the Lake County BOCC to support Mount Dora. Jim Stivender was asked by a commissioner if county staff had a position on this. He said he thought the Alternative 2 concept was developed to minimize traffic going west of US 441 into Mount Dora. T.J. Fish of the Lake-Sumter MPO staff said he thought the MPO would support Mount Dora. The Commissioners voted unanimously to send a letter to FDOT in support of Mount Dora to "do away with an intersection at the interchange".

6/18/2007 1:22 PM From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Monday, June 18, 2007 1:22 PM  
PMTTo: 'Tony Tanico'  
Subject: RE: Wekiva Parkway / SR 46 Bypass  
Hello Tony, Will do my best to answer your questions, though some of these things are years away...The Expressway Authority is developing the Orange County portion. The OCEA has funds to design that portion, and a little to start Right Of Way Acquisition but not complete it. The remaining ROW acquisition and construction are not funded in this 5-year-work plan. Either that would be another 5 years out, or if tolls were raised it could be done sooner. FDOT is doing the Lake and Seminole portions and has a little money for ROW acquisition in Lake County, and that's it. Subsequent phases of project development are not funded in this 5 year work plan. Barring federal funds or other funding source, those Lake and Seminole portions of the project could be 10 or more years away. All scheduling is based on funding availability. Conservative estimates are for OCEA to begin design in 2008 (takes 2-3 years), during design they would begin advance ROW acquisition (another 2 years). That would put us in the following 5-year work plan, and hopefully funds would be available to begin construction 2012-2015. Again, all heavily reliant upon whether tolls can be raised or other funding becomes available. FDOT is saying it could be 10-15 years before construction starts on their portions, if federal or some other funding does not become available. Once construction is funded, it would likely be done in sections, with a typical section taking 2-3 years. Won't know when it would be finished until they determine how many sections they need to break it up into. Many of these questions will be much easier to answer once we've finished the Project Development and Environment Study and have moved into the design phase. Hope that helps. Mary Brooks

6/4/2007 11:24 AM 1  
Tony/Barclay group 727-480-6363 is the interchange in Apopka, is it going to be Ponkan or Kelly Park? PIO noted Kelly Park is the recommendation signed off on by City of Apopka and OC. He said he was surprised we chose that one farther north, why was that? PIO noted Ponkan ROW more costly, less usage due to proximity to MBX IC at 441, and Kelly Park would better serve NW Orange and LC residents. He said what else has to happen now in the process? PIO noted we're still getting input from local governments, e.g., have LC BOCC tomorrow, direction on eliminating and revising alternatives. PIO noted public hearings Sept.-Oct., then go into agency approvals through late 07-early 08 for approved alignment. He said when will you start buying ROW? PIO noted some money for ROW in OC, but first have to begin design. PIO noted without a toll increase, would have to wait another 5 years to have enough for all ROW acquisition and construction, that's not funded currently. He said so we could be talking 10 years out? PIO said that's correct unless funding becomes available. He asked is there a document somewhere that shows the latest? PIO noted the public workshop maps are still on the website, but we're still working to revise those based on finishing up this round of local government and state agency meetings. PIO noted hope to have updated maps to post in July. He said he was supposed to be on a list where he got info automatically, but hasn't gotten anything in 8-9 months. PIO noted we have not sent anything out in a while, noted we thought we'd be ready to send something out end of last year, but with all of the many issues and hundreds of public comments from last workshops, it's taken longer than expected to get through the process. PIO noted we're working on an update now to go out to let folks know where we stand. He said okay, and thanks for the update, he will continue to touch base. PIO said that's fine. --1140 a.m.

Contact		Lou & Lynn Telfeyan	Tall Trees HOA
Date	Time	Regarding	
3/8/2007	2:21 PM	Lou/Tall Trees returned call, thanked me for the MSG, noted so this means if roadway was going to be 400' away before, now it's going to be 50-100 feet further away? PIO said that's correct for the entire subdivision. PIO noted we would have exhibit of the latest	

alternative at the meeting next Thursday. He asked if we would have the old one for comparison? PIO said yes, he would be able to see his property on the exhibits. PIO noted we're doing presentation March 15 and will have all the exhibits. He expressed concerns about noise, said they can hear I-4 when it's quiet and it's a mile away. PIO noted noise abatement is part of this study. He asked about the chain link fence; said that wasn't necessary, their HOA covenant prevents it (although he was allowed to have it at the back of his property since no one was behind him. Why don't we take that money and put some thing useful like a noise wall up, like they have on I-4? PIO noted fence would be vinyl coated near neighborhood, and it is important security feature to keep people from walking up on the roadway, esp. children. He said okay he could see that, but this is the major investment of his life, this is his retirement and the need for a noise wall should weigh heavy in our plans. PIO reiterated that's part of the overall study.

3/8/2007 11:37 AM PIO returned call to Lou & Lynn Telfeyan 407-688-7580 (Pioneer Capital) re: Tall Trees, left detailed MSG that having heard residents' concerns we have alignment alternative that would skirt the TT subdivision by 50-100 feet. PIO noted that would potentially leave more room for buffering. PIO noted that as of the study phase; some times in the design phase when they're working at more of detailed level they might be able to look at some other accommodations. PIO noted we are scheduled to present to the subdivision HOA March 15 at 7 p.m. in their clubhouse, and also noted we've updated info on the project website at [www.ocea.com](http://www.ocea.com).

3/8/2007 9:25 AM Lou 407-688-7580 left MSG he was calling re: parkway coming through back of Tall Trees subdivision, heard rumor couple months ago that maybe the road was going to be pushed south a little bit. Would like to get some kind of verification on that. Call me and have a good day.

5/17/2007 1:25 PM -----Original Message-----From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, May 17, 2007 1:25 PMTo: 'Tracy Tennyson'Subject: RE: Wekiva Pkwy (Orange County)Tracy,We still don't have an approved "alignment" yet for the Orange County portion of the Wekiva Parkway, nor for any of the project, for that matter. In March the OC Commissioners did approve the recommendation that the county interchange should be at Kelly Park Road. That interchange alternative is available on the Expressway Authority website at [ftp://ftp.ch2m.com/Wekiva\\_Public\\_Boards/](ftp://ftp.ch2m.com/Wekiva_Public_Boards/) along with the other

project alternatives from last summer's workshops. Please keep in mind none of these alternatives have been approved and are all still highly subject to change. We are currently continuing to get feedback from local governments and state agencies, and hope to have some updated maps posted within the next few weeks. We are now looking at formal public hearings in September - October of this year, with the study concluding with an approved alignment by late 2007 or early 2008. Mary Brooks

5/16/2007 2:25 PM -----Original Message-----From: Tracy Tennyson [mailto:tracy@fullcomp.com] Sent: Wednesday, May 16, 2007 2:25 PM To: MBrooksSR414@cfl.rr.com Subject: Wekiva Pkwy Orange County) Mary, I was just wondering if the alignment is available yet for the Orange County portion of the Wekiva Parkway. Please let me know. Thanks, Tracy Tennyson, Project Manager Tileston, Simon & Holloway, P.A. 17110 Gunn Highway Odessa, FL 33556 813) 792-1192

3/9/2007 11:07 AM PIO returned call to Tracy, let her know schedule pushed back as we continue to work through issues, meet with officials for input. PIO noted looking at May-June now for public hearings, once those are scheduled also will send out next project update; believe she's on the mailing list? She said believes so. PIO noted we'd also updated some info on the website, and will place new maps when available. She said so she should just check back with me in month or two? PIO said that's correct. She said thanks for calling back so quickly.

3/9/2007 10:19 AM Tracy Tennyson/Tileston, Simon and Holloway MSG re: the Wekiva Parkway project portion in OC, had in my notes the recommended alignment was due in March. I wanted to see if it was available and could get a copy before I sent in a public records request. Give me a call back. 813-792-1192 I would appreciate it. Thanks.

6/4/2007 4:45 PM From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Monday, June 04, 2007 4:45 PM To: 'francinethomas@juno.com' Subject: RE: SR 429-Wekiva Parkway PD&E Study - 22325 Coronado Somerset (Barnes) Francine, The Florida Department of Transportation does not have funding for design or construction of the Wekiva Parkway in Lake or Seminole counties. The FDOT has some money to buy right of way in Lake County but not likely enough. Given the funding constraints, it could be 10-15 years before this project is built, unless funding otherwise becomes available. For example, the FDOT is trying to get some federal funding for this project also. I don't handle right of way acquisition, but I can tell you it's very early to be discussing actual dollars and which properties would be acquired for certain. Even once an alignment is approved in the PD&E Study, there is still the possibility that adjustments could be made - and frequently are - during design that could affect whether or not properties are ultimately affected. Unless of course we're talking about properties of several hundred acres that will be hit regardless; those are often purchased during advance right of way acquisition. You could also call the FDOT at 1-800-780-7102 and ask for the right of way office to try to get specifics on how such acquisitions might be handled. I hope that helps. Mary Brooks

Ann Tindell  
Regarding

Bradford Building Corp./Bella Foresta

PIO arrived at Bella Foresta sales office, set up boards while waiting for Wade Bradford to arrive. PIO met with Ann Tindell, Pam and Wade Bradford (Jeff Heaton was not available), went over boards for SR 46 north-south widening noting north recommendation; SR 417 IC, overall board and provided handouts of Bella Foresta location on Wekiva Parkway, elevation and typical section sheets. PIO noted the north SR 46 widening being recommended to reduce residential and business impacts, though that gets into state lands. We will have to deal with those issues. PIO noted from existing southern ROW line, looking at about 27' to EOP of frontage road, and mainline a number of feet farther north from there. PIO noted since they're between the Lake Markham and Longwood Markham Road bridges, the roadway will basically be at grade in front of their subdivision, pointed that out on the elevation sheet. They were very pleased to hear it. Wade said that's what he thought was happening, but homebuyers were coming in panicked about being able to see bridges being on their doorstep. Wade asked if we'd hold the same center line? PIO said no, looking at a different footprint and need a wider corridor for the parkway. Ann asked the length and height of the bridges? PIO said could get that for her, but keep in mind the PD&E Study produces a concept with estimates. It's when we get into design that we nail down those sorts of details. All of this is subject to change at this point. PIO discussed noise abatement study, only front properties would see minimal noise impact based on preliminary data. PIO noted noise abatement study info will be available at public hearings in October. PIO noted shouldn't be noise impacts to any other front houses. Wade said they're leaving the front of development natural, also doing their own efforts, adding bamboo. Wade said info presented was what he expected, but homebuyers have been panicking that there was going to be a bridge they could see on the doorstep. He said this is good news. PIO noted they're in middle of two bridges, and road will begin to rise again as approach bridges. PIO noted PD&E and overall schedule, funding challenges. Wade asked if there would be the same centerline as SR 46? PIO said no, we will be looking at a wider footprint, and we will be moving the north ROW to the north. PIO went over handouts. Discussed safety issues with existing SR 46, difficulty getting out. Anne noted they went to a meeting early on about the project and the said SR 46 was the most dangerous in the state. PIO noted this will help with that. Wade said yes, I see this as a benefit. He said 30 years from now when this area is built up like Orlando, no one will think twice about this road. Wade asked if people buy in here, and they don't have direct impact but feel their property values or quality of life have been damaged somehow, is there recompense of some sort? PIO noted not really, they're buying a house on a state road that could've been widened at any time. The flip side is they're getting improved access, big benefit in terms of improved access and safety. Ann asked if there will be signals on this? PIO said not on the mainline but probably at side streets, under bridges. She said they have 10 houses under construction. They don't have any residents yet. They're building 50 one-acre properties. PIO said when they get some residents I will be happy to come back and give them an update. Ann asked if I did that often? PIO said yes, we've met with many HOA's and other community groups. PIO showed Pam how to find maps on the website. They had a small printout of the initial alternatives. PIO noted that was outdated. Ann asked if there were alternatives going north, what happened to those? PIO noted we eliminated those initial alternatives because of the residential impacts, environmental impacts, it didn't get people where they wanted to go and SC did not support them. PIO said feel free to send any homebuyers with questions to me, gave them business cards. PIO also noted hope to have updated maps posted in July-August. They were thankful for the info and visit.--248 p.m.

6/18/2007	4:37 PM	Ann/Bradford responded: GREAT!! Thanks, again. Ann Tindell Broker Associate 407-453-4568 PH863-206-3362 Cell

6/16/2007	5:16 PM	__From: Ann Tindell [mailto:ann@bradfordbuildingcorp.com] Sent: Saturday, June 16, 2007 5:16 PM To: mbrookssr414@cfl.rr.com Cc: Jeff Heaton; Wade Bradford; Pam Beatty Subject: Wekeiva Parkway Project Meeting Mary, Just to confirm our appointment for Monday the 25th @ 2 00PM at Bella Foresta. Bella Foresta is located 3.3 miles West of I4, just past Lake Markham Road. You will see the cut-over to turn left into Bella Foresta. Thank you, Ann Tindell Broker Associate 407-453-4568 PH863-206-3362 Cell
6/15/2007	5:01 PM	Ann Tindell/Bradford Building 407-324-5144 called, said she was surprised to get me but wanted to know when PIO would be available for a meeting re: Bella Foresta? PIO noted I'd spoken to Jeff Eaton and he was going to email me some dates and times for me to check my calendar, but I have not received anything. She said there was apparently a mix up and he thought another partner was going to do it. PIO reiterated I offered to meet Tuesday before my Mount Dora meeting, but was told that did not work. Discussed various times and settled on June 25 at 2 p.m. at their development on SR 46....
6/15/2007	1:38 PM	PIO called back Pam/Bradford Building and was passed to Jeff Heaton, who said they're very concerned about the project, have \$1.5-\$4 million homes and people backing out of contracts because of uncertainty about the road. He said if there is going to be a big bridge in front of their community it will kill this property. PIO asked for their location? He said they're 3 miles west of I-4 and less than a mile east of the river. PIO asked the name of the nearest cross street, was it maybe Longwood Markham Road? He did not know, said they're west of sylvan glade. He went over the disclosure requirements for real estate ramification of not giving their clients most up to date info, could get sued, very upset about impacts. He was very upset about noise and visibility impacts. PIO noted preliminary recommendations for that area are to widen to the north, yes, we would be bridging at most cross streets, noted there would be frontage roads along the parkway so there would be some distance from the ROW line and the elevated parkway. He said someone told them it was going to be 30-40 feet high, but one guy said only 10 feet high. We need to get the right information to give our clients. PIO said it will vary in areas, probably minimum 20 feet plus at bridges. PIO noted we are in the PD&E study phase, so elevations today might not be what is decided when we get to final design. PIO also noted that as part of study we are doing a noise assessment, which would determine whether some sort of abatement, such as noise wall, landscaping, berms etc. were warranted, so that is a consideration we're looking at. He was very animated and a little hard to keep up

with. PIO noted I have a meeting Tuesday evening in mount Dora at 7 p.m. and could stop by their place beforehand at say 5 p.m.? he said that would not work, developer leaves at 3 or 4 pm. PIO noted I was in the car, could he email me some possible days and times and I could check my calendar. He said he would. He expressed concerns about the study, that they might tell people something and it turns out the bridges move or something else changes. He noted he was going to buy a house in the area of where the 429 is now years ago, and the real estate agent said the road was coming right through there and talked him out of it. He said it turned out the road was a mile away. So he could have bought that house and made a lot of money. He said all of them have been very upset and worried about the project and impact to their development. PIO said I'd be happy to help them, need to see how far their houses would be from the ROW line. He calmed down a bit and said they will have 50-60 foot trees up front, so if the elevated road is 100 yards away, then maybe it wouldn't be so visible or if there were noise walls it's wouldn't be so bad. He thanked me for the call back and said they would get with me on days and times.

6/15/2007	1:29 PM	Pam/Bradford Building in Sanford MSG I was hoping you could get back to sales director Jeff Eaton or Anne Tyndall, we wanted to stop by and talk to you about the project and how it's going to impact our community. We're trying to get a visual of the overpass and what would be visible from our community. Have the map on line - assume that's latest one that shows the proposed interchange. We just have a few questions. If you could get back to us. 407-324-5144 it would be great. Thank you.
3/19/2007	11:41 AM	PIO returned call to Anne Tindell/Bradford Building 407-453-4568 developers and builders of Bella Foresta on 46. She said we're just west of Lake Markham road on 46, we're on the website and looking at the dotted purple lines, it almost looks like it goes through our community, on south side. PIO noted two alternatives in that area and that we're leaning toward north widening to minimize residential impacts and less expensive, noted that still has to be approved. Where is it planned to be elevated? PIO noted with the side street crossings it will be elevated through much of the corridor, noted preliminary recommendation is to connect to I-4 at 417. In some areas it might come down to 10-20' instead of 20-30', but only if there isn't a bridge nearby. She asked what about sound barriers? 46 right now is noisy, on the homes we have you can hear some noise and we have the homes set back as far as we can, and you can hear it now? PIO noted noise assessment is part of this study, there are state and federal criteria that have to be met, but we expect there are locations where noise walls will be called for. When is the projected to start construction? PIO noted funding challenges, FDOT doesn't foresee funding for 10-12 years at current rate, looking at different funding options, public-private partnerships, tolling, etc. She said that is helpful and thanks of the call back. PIO noted we're posting some preliminary info on website, hope to get maps updated soon to post, public hearings being pushed back, would be June at the earliest.
3/19/2007	11:16 AM	Anne Tindell/Bradford Building Corp. left MSG we're the developers and builders of Bella Foresta on 46, 407-453-4568 we have a few questions for you
2/25/2007	3:06 PM	PIO responded to Ann Tindell/Bradford Building Corp.: Ann, I recall speaking to you, and yes, I will add you to the mailing list. Let me know if you have any specific questions regarding your development, and if so, where exactly it will be located on SR 46. Mary Brooks

Date	Time	Regarding	
3/29/2007	8:57 AM	PIO returned call to Vickie Topes/FDEP 850-245-8492 said I'm associated with permitting the Wekiva River Mitigation Bank. I wanted to try to pin down citation or location where I can find latest info on the alignment through 46 at the mitigation bank. I've been involved enough to see what the alternatives are, guess what I'm trying to pin down is has there been a decision made? PIO noted think we had meeting last week with DEP but didn't hear the outcome, and think we still have to get back with Lake County on that. PIO noted I don't know when that's scheduled. Would there be another public meeting? PIO noted yes, have to get through all of these officials meetings, so would be June-July at the earliest. She asked could things change after the public hearings? PIO said yes, could be some adjustments. She asked if everybody is okay with it, other than minor tweaking, then what? PIO noted goes to EA and FDOT for formal approval, then to FHWA. PIO noted we hope to have study done with approved alignment before the end of the year.She said she would be the one who modifies the mitigation bank permit if it goes through there, so I needed to see when it was appropriate to start on that. PIO suggested she get with Dave Lewis at CH2m Hill, gave his number, for details on the latest meeting schedule. She said that helps and thanks.	
3/28/2007	10:16 AM	Vickie Topes/FDEP 850-245-8492 I'm associated with permitting the Wekiva river mitigation bank, left MSG wanted the latest and greatest information about the alignment of the SR 46 bypass and that status. Give me a call and give me some websites.

Stephen Vaughn

Vaughn Realty Corp.

Regarding

PIO returned Steve Vaughn's call 352-383-7187 he said I got it in the mail yesterday.  
Thanks so much. He said but on the two sheets but it shows a blank for Mt. Plymouth and  
Sorrento? PIO noted we sent him the Lake East and West sheets, which show everything  
we're doing in those areas as far as our project. He said oh, so it's not affecting those two  
areas? PIO said that's correct, we're only going where the roadway is indicated. He said  
thanks very much. You're a good person.

12/17/2007 1:32 PM

Steve Vaughn 352-383-7187, c 352-223-0250 called and left MSG that I haven't gotten  
anything from you yet about the 429 extension up to 46. If you've already sent it, then  
disregard this. If not, I really need it. My computer's on the fritz so I can't take any emails  
or anything like that.

(PIO checked database on map sent to Vaughn:

Mary,

Mr. Vaughn's maps are in the mail. While doing this I took an inventory of my maps.

12/13/2007	4:47 PM	<p>PIO returned call to Stephen Vaughn/Vaughn Realty in Mount Dora 352-383-7187, c 352-223-0250 He said he has people who want to buy some commercial land. Tim(?) said it's pretty much been decided. I know they have to go through zoning and permitting, but I need to know where the road is going. PIO noted we have recommended preferred alignment and interchange locations, maps are on the web site. He said his computer is down. PIO said we can send him the maps. He said send to 1324 Sylvan Dr. Mt Dora, FL 32757. PIO asked for location in questions? He said it's 3 properties on 46 east of round lake and then west of Orange Avenue, west of 439.</p>
12/13/2007	11:44 AM	<p>Stephen Vaughn/Vaughn Realty in Mount Dora called and left MSG, I've talked to you before. Tim Bailey said I need to call you because I need a layout. It's been decided now I understand where the 429 is going to come into 46.</p> <p>I've got some people who want to do some construction out in that area. So if you can give me a call back I'd appreciate it greatly. 352-383-7187, c 352-223-0250 Thank you very much.</p>

11/12/2007	11:16 AM	<p>WPCC-Twelve Oaks RV Resort</p> <p>PIO returned call to Sid Bennett/12 Oaks RV Resort 321-578-2239 c, PIO noted SCEA meeting tomorrow, believe it's at 4 p.m. he said he was aware of the meeting and tried calling the county to find out the time, but no answer. PIO noted it's Veteran's Day. PIO also noted the latest maps are posted on the OOCEA website, don't believe the one for your area looks much different from when we met a while ago with Tom et al. he said I was on the website this morning and saw that. He said he appreciated the call back and would get with the county to nail down</p>
11/12/2007	9:56 AM	<p>Sid Bennett/12 Oaks RV Resort called and left MSG trying to find next meeting for EA is or when the next information might be available on the 46 connector out here. 321-578-2239 c if you could give me a call I'd appreciate it. Thank you.</p>
10/1/2007	12:00 PM	<p>1152 a.m. Tom Vellanti/12 Oaks RV Resort 305-247-6623 called and asked for a schedule of Wekiva Parkway and SCEA meetings. PIO noted I don't know when SCEA meets; it's probably on their website. PIO noted we were going to meeting October but have pushed that to January. We haven't set the dates yet because we're having trouble finding a location in one county. He said you usually meet with SCEA beforehand right? PIO said true, thought recommendation hasn't changed since we last met with them. PIO said guess we might meet with them again for an update as a courtesy in December maybe. PIO noted recommendations in PowerPoint on website but he's already seen that. He said that's the one that goes through my property? PIO said correct. PIO noted not much has changed, we had an issue to work out with FDEP about going through the park, but I don't think that affects him. He said so you're privy to all of these secret meeting, when are they going to start buying property? PIO noted in LC and SC, FDOT doesn't have any money programmed for final design, which is the next step. You need to get the engineering details nailed down before you can start buying property. PIO noted typically</p>

the final design is 2-3 years and some time toward the end of that they start buying property, but with no funding for the next step, they're talking 10-15 years to start building this thing.

PIO noted we're looking at different options, Turnpike, federal funds, rumors about P3 that might accelerate that. He said what are the chances the Turnpike would pick it up? PIO said I haven't heard any commitment so far; they have to run earnings and feasibility numbers before they would pick it up. PIO noted while their bonding capacity has increased with the legislation recently, they also have many projects that already need funding. He noted they're already doing a lot of work on the turnpike itself, so I know that's a priority. PIO said correct.

He asked if the Turnpike was responsible for 417? PIO noted OOCEA has OC portion; FTE SC and Osceola. He said he saw something about 417 moving forward with one section, aren't they already starting it? PIO noted there are a couple of things going on with the 417, a study to widen 417 existing, and a study to extend it from I-4 to International Parkway. Both of those are by FTE and not part of Wekiva Parkway.

He said okay, thanks for the info; sounds like it could be 5 years before start buying property. PIO noted I would be surprised if was any sooner than that in LC and SC. PIO noted OOCEA will start some acquisition in a couple of years. He said thanks again. PIO said feel free to call back for updates and once we nail down the meetings I will send him some more info.

--12 p.m.

6/6/2007	1:42 PM	PIO returned call to Sid Bennett/12 Oaks RV Resort 407-302-5686 (left MSG), 252-883-3832 c, left MSG that acrobat files should have been able to enlarge or minimize, noted other maps on website but not the adjusted alignments, asked him to call or email me to get it figured out.
6/6/2007	11:49 AM	Sid Bennett/12 Oaks RV Park in Sanford MSG I have the two maps fro alternative 1 and 2 you sent me attached to email, but having trouble getting them blown up so the detail comes through. Is there anyway I could download the original file before you shrank them to email. If there is I have internet connection at home and if there is some way I could get that file I'd certainly appreciate it. 252-883-3832 c and I will take your MSG immediately. Thank you.
5/17/2007	1:41 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Thursday, May 17, 2007 1:41 PM To: 'hobol4@bellsouth.net' Subject: SR 429-Wekiva Parkway PD&E Study - Refined Alternatives Hello Sid, It was good meeting you yesterday with Tom Vellanti and his son at Cracker Barrel. I wanted to touch base to let you know that I did not have the electronic files you wanted (SR 417 Refined Alternatives - North Widening - 1 & 2), but have requested them from the engineers. I will forward them to you as soon as I get them. Just FYI. Mary Brooks
5/16/2007	3:00 PM	PIO met with Tom Vellanti, his son (missed his name) and RV park manager Sid at Cracker Barrel north of SR 46 and east of I-4. PIO went through alternatives starting with the one from the summer public workshops. PIO noted impacts and issues with each one. PIO noted at this point we're recommending the SR 417 interchange connection to I-4, noted issues with SR 46 IC... also noted recommending north widening on SR 46 due to heavy residential development on the south side. PIO noted alternatives A-C attempts to address concerns expressed by Capri Cove and Tall Trees neighborhoods, but much higher impacts including hitting Lakeside Church, etc. Tom liked refined alternative 2-north widening since there is no impact to his property. PIO noted however there would be considerable impacts to other properties; we have to consider all of the impacts along the alternative

routes. PIO noted differences in costs between refined alt.'s 1 and 2 on the impact assessment sheets, gave them a copy. (\$746 million vs. \$735 million). PIO noted we are leaning toward refined alternative 1 which has lower overall impacts (we miss Rock Church less damage to Designing Women, other residences) but which will affect the front of his property. PIO noted we need to try to minimize overall impacts and costs, noted project is not funded by FDOT. Could be 10-15 years unless funding becomes available. Tom and Sid said they would have to shut down the park if we hit their entrance and building, raze everything and completely rebuild the park. He said the water and electric are right next to the building. They would have to relocate 300 residents while rebuilding, and those folks aren't likely to come back if they settle somewhere else. Tom said you're looking at \$15 million easy; you will basically shut us down. PIO noted I understood his concerns. If this alternative was approved, his impacts would have to be specified and negotiated. PIO noted the church and designing women would also claim specific commercial impacts; not just the buildings or land. Tom asked if we could have made a mistake on the estimate? PIO noted FDOT ROW folks do this all the time; granted these are preliminary estimates and don't take into consideration all the individual details. PIO noted those would be covered later in the process. He asked what can he do to fight this? PIO noted he can try to meeting with SC Commissioners, since most of them sit on SCEA and they have to approve any alignment in the county. PIO also noted he can continue to give input at the Sept. - Oct. public hearings. He asked if commissioners had any say in recommending refined alternative 1? PIO noted we've been meeting with them individually and as a group all along, and the information was presented at the May 8 meeting though they took no action. PIO said I cannot promise him he would be successful in swaying the commissioners, just that that is an option available to him. We discussed project funding challenges. His son acknowledged this is 10 years away. "You'll be pushing up daisies by then." PIO noted unless funding becomes available ... Tom asked how could that happen? PIO noted we're seeking federal dollars, and another option being considered is tolling the road, though it has drawbacks. PIO noted that could potentially accelerate the project. PIO noted issue of, since we'd be replacing SR 46 corridor with Parkway, would be an issue of people not having a choice but to take a toll road to go across the river, to Lake County, to the grocery store, etc. His son said "so you just make a quarter so something. People will pay up to a dollar. it's going to be a toll road." Tom said if it's that far out, he knows other people have attorneys, why? PIO noted attorneys have been doing solicitation letters on this corridor for couple years now, probably before study started. He asked if it does any good? PIO noted we're not at ROW acquisition stage, so not sure, maybe they can explain the process and help them determine their damages. He said he knows the lawyers want to go for the biggest condemnation; he'd like to stay if he could PIO to email refined alternatives 1 & 2 north to Sid at hobo14@bellsouth.net. If they have trouble let me know and will follow up with hard copies. PIO said sorry to bring bad news, but I knew it had been a while since we talked to him and I wanted him to be up to speed on the challenges we face and what we've been looking at. He said it's better to have the info and thanks.--4 p.m.

5/11/2007

8:58 AM

PIO called Tom Vellanti/12 Oaks RV Resort 305-247-6623 - rang and rang, no answer or machine. PIO also called 305-951-3665, asked to meet with him soon to go over latest alternatives and impact assessments, we agreed to meet Wed. at 3 p.m. at the Cracker Barrel on 46 near I-4. he said he did not want to meet at the RV park because people already are nervous about this project. He said he's already had people not want to move in there because they think the road is coming next year and they don't want to be disturbed. PIO noted with the funding challenges, unless some money falls out of the sky, we're looking at 10-15 years before FDOT would have the money to build this. He said okay and thank you for calling.

Contact		Jennifer & Wade Vose
Date	Time	Regarding
2/13/2007	4:50 PM	PIO called back Jennifer Vose, left MSG clarifying that it was the southernmost alternative we are recommending coming east out of the systems IC, not the northernmost as previously stated.
2/13/2007	3:55 PM	Jennifer Vose said they haven't heard anything and wanted to know what was decided regarding their property on north side of Boch Road, 7 parcels east of Plymouth Sorrento. They don't live on the property, it's either 2425 or 2325 Boch Road. She said they were pretty much resigned to the fact that most of the alternatives would hit them. PIO noted based on the impact assessments and ROW estimates, at this point the preliminary recommendation is for the westernmost systems IC, westernmost left going NW from the systems IC to 46 in LC, and the northernmost alternative coming off the east side of the systems IC. PIO noted that's still highly subject to change, continue meeting with county commissioners, public works directors, city managers, etc. PIO relayed City of Apopka vote on Feb. 7 that allows us to advance ROW on that segment, since we had to tie into the MBX. PIO went over latest schedule, noted things had been pushed out due to trying to work out issues and all these meetings with various officials. She said he knows how that is because she works in government. She said so by the summer they should know for sure? PIO said that's correct, and keep in mind the project still isn't fully funded. She said they just want to know when they are going to be bought out so they can buy somewhere else.

Plymouth region Connie, I would need your property address and/or parcel ID number to be able to tell you which map applies to your area. Mary Brooks
7/25/2007	10:50 AM	Wally Wagner/Wagner Chiropractic 712-258-6763 called and said they have property in Mount Plymouth, and they're trying to find an area map. PIO walked his assistant Naoma through the web links for the PowerPoint and maps, and noted which groups of maps would have Mount Plymouth info. PIO also noted I was waiting for updated maps that would hopefully be posted in the same place soon, though the PowerPoint had a lot of the recommendation info. They said the property is three blocks south of SR 46 at Lockmar Cir PIO noted I was not familiar with that side street, but suggested they view either the LC West SR 46 alternatives or the OC-LC systems IC. They repeatedly asked which map they should look at. PIO noted there are different alternatives for each location, and without know exactly where their property was, I couldn't tell them which map to view (I was on the road). PIO said check out the ones I suggested and if you can't find what you need, email me the property address and/or parcel ID and I would look it up for them. He said he would.

Contact		Dale & Debi Wagner
Date	Time	Regarding
3/13/2007	1:25 PM	Debbie Wagner said I thought they were going to make a decision in February on Wekiva Parkway? PIO noted that schedule has been pushed back due to issues that have to be worked out throughout the 25 mile corridor and meetings with various city, county and state officials to get their input and revisions to the alternatives. PIO noted have some preliminary recommendations based on impact assessments, ROW estimates, and getting some approvals from local governments, e.g. city of Apopka and OC commissioner on Kelly Park IC. PIO noted we hope to have a preferred alternative to bring forward to formal public hearings in may-June. She said the part she's interested in is Will it go along 46 or continue across back by Wilson Road to 417? PIO noted preliminary recommendation shows 417, but that still has to be approved by SCEA and FDOT. She said so what do I do, keep checking the website? PIO said yes, we have updated that and hope to have some new maps 2-4 weeks. Also will be doing update when have meetings nailed down, or she's welcome to call and check in in another 30 days. . Debbie Wagner she said she's been to the meetings and is on the mailing list. She said okay and thanks for the information.--138 p.m.

Dave,  
Thanks for the coverage of the Wekiva Parkway on the website. Just wondering if you're going to post the current map we sent? The one you have posted is quite outdated (shows just a study area when we have an actual proposed alignment now). Let me know - thanks!  
Mary Brooks

10/25/2007 3:45 PM PIO reviewed WDBO website posting:  
Environmental Groups Back Beltway  
Dave Wahl 10/24/2007 13:15:18

Final steps are underway to complete the long proposed beltway. Environmental groups are urging the road, which has been on and off the drawing boards for nearly 20 years, be fast tracked.  
Charles Lee of Florida Audubon is backing the proposed Wekiva Parkway alignment that would run in the State Road 46 corridor. A three mile elevated section would protect wildlife, like black bears that are being run over and killed on the existing road. "Let's get moving and build an environmentally desirable road."  
Lee and others urged the Orlando Orange County Expressway Authority and the Florida Department of Transportation move quickly especially in Seminole County near the I-4/417 interchange area.  
"Land acquisition in that area needs to begin yesterday."  
The Wekiva Parkway would run from roughly Apopka north to SR-46 and east to I-4. It would cost nearly \$2 billion dollars. The Expressway Board voted to move forward. Public hearings begin in February.  
Get more on the Wekiva Parkway here <<http://www.ocea.com/futureplans/projectsandstudies/westernconnectors.shtml>>.

7/31/2007	2:16 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, July 31, 2007 2:16 PM To: 'rfireguy@comcast.net' Subject: SR 429 - Wekiva Parkway PD&E Study - 30623 Swan Rd. Bill, Apologies for the delay in getting back to you, but I've had so many of these queries since folks received the latest mailing. The property in question at 30623 Swan Rd. would be approximately three parcels east of the Lake County West Alignment Alternative 1, so there would be no direct impact. This information is included in the recent PowerPoint presentation available on the Expressway Authority Web site at < <a href="http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml">http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml</a> >. Once I get the updated map PDF's, which will allow folks to clearly zoom in and out on the latest recommendations, these also will be posted on that website. I hope this addresses your questions. Please feel free to call or email with other questions or concerns. Mary Brooks
7/24/2007	10:49 AM	PIO returned call to 352-385-0232 Bill Walker to let him know I have not had a chance to look up his info yet, have a number of such requests but hope to get back to him by end of the week. He said that's fine, thanks.

7/24/2007	8:22 AM	<p>Bill Walker called and left MSG 30263 Swann Road, talked to you yesterday, discussed proposed routes, you said you were going to look to see what you could find about which route looks like might happen, you were going to give me a call or email something to me at  rfireguy@comcast.net &lt;mailto:rfireguy@comcast.net&gt; I'd appreciate to get the information. Thank you.</p>
7/23/2007	7:04 PM	<p>Bill Walker in Sorrento 352-385-0232 is the meeting in August going to tell us which route you're taking? PIO noted we were looking at October for formal public hearings to discuss the preferred alternative recommendations, but heard on Friday after the letters went out that is being pushed back. He said to when, November? PIO said more like end of year but don't have date. He said it kills them having an investment property and not knowing where it's going, we've got \$2,000 a month mortgage payment. If it's the east route coming down 46, property is 30623 swan rd. if it's directly behind us it kills this property, if it's the west one then we 'd be okay. I've talked to engineering and they said it was the west one, but I need to know for sure. PIO asked for email address, said I'd look into it and get back to him.  rfireguy@comcast.net &lt;mailto:rfireguy@comcast.net&gt; either one not touching but east route takes back  8.85 acres</p>
Contact Date 8/2/2007	Time 5:09 PM	<p>David Walters  Regarding  David Walters 303-917-1628 called from Denver about the toll road in Apopka. They're looking at property somewhere along the project. PIO asked was he referring to 414 or Wekiva Parkway? He indicated the latter. PIO gave info on project scope, status and timeline. He was particularly interested in schedule, when it would be built? Asked about planned developments in the way. Asked about impact to Plymouth Sorrento Road. Asked if there was speculation related to the project. PIO noted info on website, walked him through links. Again discussed timeframe and funding challenges. He said thanks, you've been a good resource. PIO noted if once he reviewed the info on the web he could email me with further questions.</p>
Contact Date 4/11/2007	Time 3:00 PM	<p>G. G. Washington                      Heathrow Country Estates  Regarding  During progress meeting, discussion of a Heathrow Country Estates resident G.G. Subject: SR 429 - Wekiva Parkway PD&E Study - Oak Ridge query  
Howard,

I looked up the Oak Ridge subdivision and your property at 4389 Marigold Isle Avenue, which is in the middle of the subdivision. Although your subdivision entrance, Berry Oak Dr, connects to Plymouth Sorrento Road, the body of the subdivision is about 1500' east of Plymouth Sorrento Road, and about 2000' south of Kelly Park Road. The interchange ramps for the Wekiva Parkway at Kelly Park Road are about 2000' west of Plymouth Sorrento Road. So the subdivision is basically 3,500 feet east of the planned roadway. I hope that helps. Please feel free to email or call with other questions. Again, we are shooting for February or March now for the formal public hearings on the recommended preferred alternatives. Stay tuned!  
Mary Brooks

11/12/2007 11:20 AM

Howard Washington 407-884-0351 called and said he's a new resident off Plymouth Sorrento Road. I see the projected path of the expressway and proposed interchanges. As understand it there will be IC at Kelly Park. I'm just curious, how far roughly would that interchange be from Kelly Park and Plymouth Sorrento Road? PIO said I could check that and get back to him. He said email at Hjwash2006@yahoo.com <mailto:Hjwash2006@yahoo.com>. He's in the Oak Ridge subdivision, wants to know how far away highway will be from their neighborhood. PIO said would get back to him.

Subject: RE: Independence Pkwy

An interchange with SR 429 and New Independence Parkway is complete and open to traffic. New Independence Parkway is located near McKinney Road in southwest Orange County. The developers of Horizons West are responsible for building the connections to New Independence Parkway. In some instances these connections will be done in partnership with Orange County. I don't know the schedule for constructing these connections.

The Expressway Authority is also committed to building another interchange with SR 429

and Schofield Road, which is about 2 miles south of the New Independence Parkway Interchange. Construction for this interchange is not in the upcoming 5-Year Work Plan.

Subject: Independence Pkway

What is the status of the Independence Parkway exit from 429? We live in Independence and when we purchased in the community we were told we would have access to 429 via Independence Parkway. It doesn't look like there is any current construction in that area, and according to your website it doesn't look like anything is planned in the near future.

Contact		Morgan Wiseman
Date	Time	Regarding
7/16/2007	3:44 PM	A gentleman who didn't give his name 407-843-7070 (number matches Morgan Wiseman

office) said he was working on development at US 441 and SR 46 and was trying to find out about the SR 46 Bypass, were there maps somewhere showing where it was going? PIO noted new IC will be in same location, and there were maps on the OCEA website. If he's at a computer I can walk him through that? He said he was and PIO talked him through links to latest PowerPoint showing preferred alternative. He was thankful for the info, asked when a final decision would be made? PIO noted study to finish late this year or early 2008. PIO noted for the Lake and Seminole portions, FDOT does not have funding so could be 10-15 years at current funding levels. PIO noted that's subject to change if funding becomes available. PIO asked if he was on the mailing list? He said he knows his company is, they're getting all the newsletters, etc. PIO said if he has any other questions feel free to call or email. He said he would and thanks.

6/12/2007 9:31 AM Morgan Wiseman 407-843-7070 said he spoke or emailed PIO a couple of months ago, and asked if we'd decided on the IC up at the north part of the county, were we going with Kelly Park or Ponkan? PIO noted Kelly Park recommended by OC BCC in March, and that's what we're bring forward for public hearings in Sept.-Oct. he asked where he could see the alignments? PIO walked him through website links and he found maps.

4/19/2007 8:16 PM \_From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Thursday, April 19, 2007 8:16 PM To: 'Morgan Wiseman' Subject: RE: Project 429-201Morgan, The 2005 work plan is woefully out of date, particularly with regard to current construction materials costs. We will be posting the updated 5-year work plan soon, hopefully next week, which will give you a much better picture of the projects that currently are - or are not - funded. The OC Commission last month, I believe, approved the recommendation to locate the interchange at Kelly Park Road. Mary Brooks

4/19/2007 4:33 PM \_From: Morgan Wiseman [mailto:mwiseman@realtycapitaltcn.com] Sent: Thursday, April 19, 2007 4:33 PM To: 'Mary Brooks' Subject: RE: Project 429-201RE: Orlando - Orange County Expressway Authority Wekiva Parkway SR-429 (from Orange Blossom Trail / US 441 to the Lake County line Mary: 1. Today, while looking at the five year plan dated August 29, 2005, on your website it shows that the referenced is funded. This seems to conflict with your comments below. Is there a difference in the 2 projects? 2. Can you confirm where the interchange will be. I understand there will be only one. Either: a. Ponkan Road b. Kelly Park Road Thanks. Morgan

Contact		Dave Wood
Date	Time	Regarding
6/26/2007	12:51 PM	PIO returned call to Dave Wood, who said his neighbor is in negotiations with FDOT to buy his land and he wanted to know if he should be contacting something there also. PIO asked where was his property? He said right at 46 and CR 46A. PIO noted we're not doing acquisition yet, don't have an approved alignment. PIO asked what his neighbor's property was? He said some kind of mitigation bank. PIO said okay, that makes sense since only property we're buying yet is conservation land. PIO noted four conservation parcels required by WPPA. He asked when would we make a decision on where it's going? PIO noted study to end this year or early next with approved alignment, then final design and ROW acquisition based on funding, which has major challenges. PIO noted I was in the car, but if he wanted to email me with any questions, feel free.He said there were 5 alternatives in the area of his property and all of them crossed over him. He said his only question was where it was going. PIO noted public hearings coming up in October, we haven't sent anything out in a while but will in July and again once meetings are scheduled. He said thought public hearings were supposed to be in March. PIO noted it's taken longer than expected to work through all the issues raised in the public workshops and to get around to all the local and state officials for their input. He said okay and

thanks for the quick call back.

6/26/2007 12:50 PM I need to speak to somebody about my land and upcoming 46 extension project on 429,  
407-718-0154 my Name is Dave Wood

Contact Ryan Wren  
Date Time Regarding  
7/24/2007 9:03 AM PIO returned call to Ryan Wren 407-427-5026 live on Coronado Somerset off Round Lake Rd., alt. 2 shows road going right over the house. We were planning to build a house but don't want a road going through it. PIO explained funding and scheduling, noted at current funding levels FDOT looking at 10-15 years before having money for construction. He asked if the study is approved would they start buying land then or wait 10-15 years? PIO noted next step would be final design, which takes 2-3 years and at some point during that they start buying property, but they don't have money yet for design or ROW acquisition. He said they bought the house a year ago, got letter couple days ago but was addressed to the previous owners. He's Ryan wren, 22822 Coronado Somerset Dr. Sorrento 32776 email stephaniew@cfl.rr.com <mailto:stephaniew@cfl.rr.com> he said alt 2, SB lane goes over barn and NB goes right over the house, so I said we need to figure something out. PIO noted there is a PowerPoint on the website that has latest info that he may find helpful. He said he would check that out.

7/23/2007 3:46 PM I called the EA and they gave me your number, Ryan ?Rim 407-427-5026 if you could give me a call, I have questions concerning lake county, west end of SR 46 extension of the 429, when are they going to decide where it's going or what they're finally going to do.

Still leaning toward the southernmost east-west alignment south of Boch Rd? Thanks Maxwell Wright

2/19/2007 4:32 PM From: Mary Brooks Monday - February 19, 2007 4:32 PM To: Maxwell Wright@pgnmail.com Subject: RE: SR 429-Wekiva Parkway PD&E Study - Greenplace properties Maxwell, Sorry for the delay in getting back to you, but my duties have been expanded three-fold in the last 3.5 months. We're still in the early stages for recommendations, but the engineering analysis, impact assessments and right of way estimates seem to point toward the southernmost east-west alignment coming out of the systems interchange and paralleling Boch Road (south of Boch Road). The ability to not impact Boch Road access was a factor in this preliminary recommendation, which is highly subject to change at this point based on continuing review and revision by various officials We also are leaning toward the westernmost alignment coming down from SR 46 in Lake County toward the systems interchange. We are still working through issues in other locations and have not yet arrived at preliminary recommendations. We are still in the process of meeting with a host of city, county and state officials to review and refine the preliminary recommendations we have, and to help draft recommendations where there are still issues. In fact I believe we have a meeting with the Orange County Board of Commissioners to get their take on the matter coming up soon. At this point we hope to arrive at a preferred alternative that we can bring forward for formal public hearings in May or June. The study would conclude in late summer or fall with an approved alignment I hope that helps. We will be sending out a project update once the meeting info is nailed down, and also will be updating the website in the next couple of weeks. Mary

James Yatsuk  
Regarding

City of Mount Dora

Subject: Wekiva Pkwy - Lake Co. BOCC Mtg. on 10/23/07

This is a brief summary of a portion of the Lake Co. Commission meeting this morning concerning CR 46A Realignment and US 441/SR 46 Interchange Modification.

Mike Snyder, Brian Stanger and I attended. The discussion on CR 46A lasted about 2 hours. Jim Stivender did a short background intro, discussed the 250 ft. for R/W and buffer, and said the purpose today was to decide whether to authorize the chairman to sign the letter to FDOT recommending Alternative 1A. Board Chairman Cadwell opened the meeting to speakers.

The following people spoke in favor of, or against, Alternative 1A (this is not in order of appearance): In favor - Charles Lee, Audubon and WRBC member; Scott Taylor, landowner; Rory Tromber, Friends of Wekiva; Keith Schue, The Nature Conservancy; Mike Martin, Division of Forestry; Mayor James Yatsuk of Mount Dora (he said the City Council had voted its unanimous support); Robert Curry, citizen; Peggy Bellflower, Sorrento. Those against - Bill Smalley, Heathrow Country Estates (HCE) resident; Ray Palmer, HCE resident; Allison Drake, HCE resident; Brad Milsap, HCE project director; William Anderson, HCE resident; Bob Regal, Sorrento resident; G.G. Washington, HCE resident; Thomas Montali, citizen; Catherine Hanson, former Lake Co. commissioner; Jacob Martinez, HCE resident; Janet Smalley, HCE resident; James Lloyd, HCE resident; Tom O'Brien, citizen. Essentially those opposed to Alternative 1A asked the Board to delay voting on the letter to FDOT and instead appoint a committee to study other alternatives. Commissioner Linda Stewart strongly defended the results of the PD&E Study and complimented OCEA and FDOT for all the efforts put in to date. She said there have been many public meetings and many alternatives evaluated. Mike Snyder was asked to clarify why the Board recommendation to FDOT on CR 46A was needed now. Mike advised the commissioners that the preferred alternative had to be selected in order to take it to the Public Hearing with the rest of the Wekiva Parkway project around Feb. of 2008. The Board voted 3 to 1 in favor of sending a letter to FDOT recommending Alternative 1A. Commissioners Cadwell, Stewart and Renick voted in favor, while Commissioner Hill voted against. Commissioner Stivender was absent.

The discussion on the US 441/SR 46 Interchange lasted about 10 minutes. Mayor Yatsuk said in an Oct. 17, 2007 letter to FDOT, the Mount Dora City Council had clearly expressed its preference for Alternative 1 (grade separated). He said they found out at the recent WRBC meeting that Alternative 2 (at-grade) was recommended by FDOT. He acknowledged that FDOT and their consultants had met several times with him and city staff and with the City Council on the interchange alternatives, but he said the \$20 million difference in the cost of the alternatives should not be a big issue for a \$2 billion project. He asked the Lake County BOCC to support Mount Dora. Jim Stivender was asked by a commissioner if county staff had a position on this. He said he thought the Alternative 2 concept was developed to minimize traffic going west of US 441 into Mount Dora. T.J. Fish of the Lake-Sumter MPO staff said he thought the MPO would support Mount Dora. The Commissioners voted unanimously to send a letter to FDOT in support of Mount Dora to "do away with an intersection at the interchange".

state.fl.us'Subject: SR 429-Wekiva Parkway PD&E Study - Mt. Dora CouncilTo add to your  
Mount Dora Council meeting info, some additional notes below. Just FYI.5-15-07 7 p.m.

Mount Dora City Council meeting: Mayor Yatsuk, Council Members James Homich/Vice Mayor, Stewart Holley D1, Michael Tedder D4, Robert Thielhelm D2, Judy Smathers D3, Melissa DeMarco At Large, Michael Quinn/City Manager, Clifford Shepherd/City Attorney

Mark noted team members present Brian Stanger/FDOT and PIO, went through PowerPoint presentation. Project overview, Wekiva Parkway will form remaining section of beltway in CF, relief to SR 46 and local roads... Two key issues: reconstruction of SR 46 from US 441 to the east, six lane facility, controlled access, 120-125' for corridor, will require additional ROW from what's there now. Looked at widening to north or south; there are a lot more impacts and properties and cost to go to the south. We're recommending to go to the north. Typical section: 6 lanes to east of round lake

Mark noted have reviewed north widening with staff, everyone seems to be in agreement. Re: Rebuilding US 441/46 IC, more discussion. Today IC grade separated, 441 goes over 46. Doesn't meet current design standards, existing bridges wouldn't provide type of widths we would need for ultimate traffic. With Wekiva Parkway we're seeing fairly large traffic coming south out of Tavares, Eustis and wanting to go east on SR 46, and the return movement. Based on traffic volumes, we feel it's necessary to provide flyover for SB to EB. Based on traffic projections... Alt 1 - rebuild existing IC, portions of 441 and 46, new ramps with better sight distance, provide flyover (third level to IC). This impacts some properties for city facilities on SE quadrant, and also encroach into portions of Pond Road development. We have met with them a couple times. All the alternatives include flyover; we acknowledge there will be noise impacts to west side as well as Pond Road and to the north. We're working on noise mitigation and whether walls would be appropriate for the area. Alt 2 - eliminate existing IC, provide at-grade signalized intersection, also flyover. One major benefit of the Wekiva Parkway is traffic on US 441 S. of 46 would be greatly reduced, consequently ... Also felt additional impedance for people wanting to cut through city and around the lakes. We don't see a lot of difference. This would eliminate the grade separation but still provide a flyover. SR 46 would come up a little and US 441 would come down. Have to match the grades of the roads on either side. We're still working on how much would be adjusted. Flyover would be higher than present US 441 but lower than other alternatives. Flyover ramps comes from outside. Alt 3 - flyover comes from inside median. There are not a lot of advantages; we're not thinking this should be carried forward.

Traffic at US 441/SR 46: 2007 - 27k VPD N. of 46 on US 441; 25k to the south; and on SR 46 E. of US 441, 11k. What happens if we do not build Wekiva Parkway, what do we see in 2032? The 27,200 would become more than 62k. S. of SR 46 on 441, would go up to 60k. SR 46 E. of 441, 11k would jump up to 26k. That's over the capacity of the two lane road out there. To the west, 6400 we have today would go up to 15k, if Wekiva Parkway doesn't come. There will be growing traffic pressures on all of the roadways.

Grade separation traffic 2032: N. of 441 73k, S. of 46, 441 only gets up to 40k because Wekiva Parkway is pulling traffic off US 441. Significant volumes on 46 to the east and pressure to the west. The at-grade intersection volumes are a little different, but the percentages of difference is fairly small. In most cases it was only a couple hundred or couple thousand.

Construction and ROW costs: Alt 1 \$77.2m Alt 2 \$58.5m Alt 3 \$56.2m

Recommendation: Alt 2, recognizing as you move north of SR 46 on US 441, we're seeing already a number of signals in place. The traffic operations with Alt 2 and at-grade intersection will be consistent with corridor we see to the north and much less cost. That would be an at-grade with flyover coming from the outside. Mark said most of draft reports have been prepared and they're making revisions and responding to comments. Public hearing mid- to late September to present preferred alternative to the public. There will be one in each county as we've done with other meetings. Seek approval from various agencies, FDOT, OOCEA, SCEA, FHWA by end of year. (Female council member; blocked by podium): The 40,5k in 2032 S. of 46, is it mostly local trips? What mile radius these people traveling? Mark didn't know offhand but model shows with updated land use

undertaken by lake Sumter MPO, significant residential development along corridor, along Leesburg and other locations, folks seeking jobs and shopping in orange and SeminoleShe said I'm surprised you're not pulling a greater number. Mark said that could be generally more localized trips, more people going to OC, which would be tolled.Yatsuk: what's height difference between alt 2 and alt 1? Mark said working on it, maybe 10' lower , will have more info as we continue development of some of these alts.Holley: The \$74m and \$55m, I'm assuming that doesn't include noise mitigation? No. what about landscaping? Mark said noise walls would probably be similar for all the alternatives. Landscaping probably part of construction, probably wouldn't go up that much.Mark said you're limited in what you can do in that regard. Either walls, or prohibit trucks on roadway. Some times use berms but need more ROW.Yatsuk: With the flyover so high up it will be tough to mitigate...(Female Council member): Are you extending trails from 46 down to intersection? Mark said we're working with the county on trails. We're looking to ensure a trail could get from SC to LC across the Wekiva River, and can get south to tie in to WOT and west to tie into whatever county decides on. As we get to US 441 have to look at that in more detail. Mark said we have had initial conversations with TJ Fish at the MPO. Female council member): If there's a light there's a potential to get across there. If not, I'm not sure how they would traverse that. Mark said the RR bridge would be an opportunity. Discussion of on-road cyclists vs. trail cyclists.Mark said we won't decide where the trail goes specifically, just that we make sure have opportunities for imp crossingsHomich: Re: trail, we have park property across from trail at Summerbrooke, which would provide access to our parks across this IC. Would there be possibility to get trail connection that way, similar to trail on 429 about halfway down (WOT).Mark noted this portion of 46, we wouldn't be raising road, would be regular access... Homich said talking about 441... will cut across Summerbrooke, have an easement for a trail, .. mark said that'd be difficult spot to cross that far north, ramps will be coming in , lot of auto activity right there. Homich said how about tunneling under like at 429, that would keep everyone away from major intersectionsHomich: I would question the study parameters re stop light vs. flyover. Traveling old 441 much preferred route for lot of people than going up and turning left... when they hit that light they're going to turn left, ... don't believe putting intersection there will help our traffic problem, people will stop and turn left if given that alternative. Not too worried if people driving from 46, ... Whatever keeps people flowing around the city, we've limited the number of stop lights, to make sure 441 remains an open corridor. What' you're proposing with alt 2 is opposite to what we've been planning for 5 years. Don't' want to throw out alt. 1.If you've been on 5th Avenue, just the construction project has quadrupled the traffic and stop light will do the same, alt 1 is a much better for long term solution for the city, people flow right past the city and they'd have to ...Yatsuk: I don't agree with that. I believe people will go through, ... It will be 6 lanes at that point. It will be a smoother point...Homich: more stop lights you add the more flow...(Female member): If a traffic light were a deterrent no body would be cutting through town. A fraction of the 40k will be stopped by the light... We want them to have an opportunity to safely turn off. Timing on the light ... it will be interesting to see if there are long waits for left turn signals. More risk if people are waiting forever if there's long left signal.Mark said FDOT and study team acknowledge that providing grade separation will be reserve capacity, but what we're seeing... The number of signals that have come in and down and around the curve, with introduction at US 441 and SR 46 signal, it will be consistent with the remainder of corridor to the north. Mark noted graphic that showed future signal and existing. We would expect a desire for additional signals along US 441 which will create a condition you see further north and west on 441. It's coming this way not so slowly.Holley: I drive US 441 from Lady Lake to Kissimmee. I'm concerned about a light there because ... I frequently see myself cutting through towns and neighborhoods on 441 or any major road to break the monotony of the drive, so I do have concerns. At

46 and Old 441, it is primarily residential.... I have serious concerns; any additional info would be appreciated. I'm sure we would see significantly more cut-through traffic if we add more lights. Judy Smathers: We need to cut down on truck traffic through town. We have signs but they still come through. In your fall public hearing will you provide elevations of scenarios? Mark said we will have pictures showing profiles and heights. Holley: Will the perspective be from west side or looking down? (Female Council member): How did your meetings go with hidden pond? Mark said will continue to coordinate with them. There are impacts to the front of their neighborhood and noise they're very concerned about. Thielheim: Re: the at-grade intersection, you've moved the starting point (of the flyover) to the south? Mark said existing IC doesn't meet current day standards. NB on ramp has sight distance problem, ... If we rebuild will have to bring it up to more current standards requires some ramps to be little longer than they are today. Thielheim: If you go with the at grade, moving the ramp to 46 coming south, move that starting point further south, with a stop light, won't there be traffic accumulation trying to get to the flyover ramp? Mark said we're able to move that further south because it doesn't need to be quite so high in that alternative. Thielheim: With traffic light, I'm assuming you won't have traffic accumulation building up to point that it impedes where ramp begins. Mark: As we get to 2032, there will be pressure on that ... even with the grade separated IC those same conditions we project to happen. Thielheim: I don't want us to create an accident happening in the future just to save some money. Are the cost figures for 2007 or 2006? Mark said 2007 dollars. Mark said at-grade would be one signal. With grade separation there would have to be two signals, will have to have signals at ramps because of traffic volumes. Tedder: I'm in favor of not stopping traffic at an intersection, but I can see if you're trying to get from east side of 441 to the west, as a pedestrian that can help... Discussion that we took off drawing board the alternative that hit the mobile home park. Tedder said except for traffic light I like design of alt 2. Homich: Re: additional stop lights, I can't think of any development that would require additional stop light. I don't imagine with service road requirements... We have a goal in mind to keep 441 as open as possible. I think we're achieved that. Just want you to be aware that we have a different vision than others re: signals. Mark said DOT not looking to put in additional signals but over time these requests come up, so they asked us to look at what could happen in future. Thielheim: We want all the lights being synchronized. Quinn: Describe how the LOS would be impacted between the flyover and at-grade alt. traffic volumes essentially same, but at-grade vs. not ...? Mark said ramp terminals where signals are, they started experiencing LOS problems as well. Same with Alt 1 as the at-grade. We will provide more detailed traffic study and you can look at that and provide additional comments. Because we're pulling so much traffic off US 441, there are some advantages there re: operations.--749 p.m.

5:02 PM

From: <Mark.Callahan@CH2M.com> Wednesday - May 16, 2007 5:02 PM To: <noranne.downs@dot.state.fl.us>, <george.lovett@dot.state.fl.us>, <frank.hickson@dot.state.fl.us>, <brian.stanger@dot.state.fl.us> CC: <david.lewis2@ch2m.com>, <SnyderM@oocea.com>, <jberenis@oocea.com>, <GJSkaff@pbsj.com>, <brooksm@oocea.com> Subject: Mount Dora City Council An update for the Wekiva Parkway was presented to the Mount Dora Council on Tuesday May 15, 2007. The meeting started at 7 PM. Team members in attendance were Brian Stanger, Mary Brooks and Mark Callahan. The presentation provided a brief review of the the Wekiva Parkway project and its purpose and need. The key issues of interest to Mount Dora were reviewed included six-laning of SR 46 from US 441 to east of Round Lake Road with the recommended preferred option involving widening to the north. This option involved the least impact to existing land uses and provided the most cost efficient option. The other issue discussed was the US 441/SR 46 interchange. The three viable alternatives were

reviewed including Alternative 1 which replaced the existing grade separation and provided a SB to EB flyover., Alternative 2 which involved converting the US 441/SR 46 crossing to an at-grade condition and providing a flyover with an outside take-off. Alternative 3 is similar to Alt 2 with an inside take-off. Indicated a recommended preferred alternative as Alt 2 with similar impacts and traffic operations for the design year and lower costs. There was a mixed discussion on the US 441/SR 46 interchange. The Mayor and Council Person DeMarco agreeing with the recommendation, two other leaning toward Alt 1 and remainder not clear on their preference. Also significant discussion on trail connections and options. Council asked for additional back-up on the evaluations and elevation of the flyover. Noise impacts were discussed. And some picture visualization were requested. The session ended with mixed opinions. I called Mark Reggentine (City Planner) and he indicated that the Council now seems to favor Alt 1 and they may send a letter to FDOT stating such. We will follow-up with the requested materials. Regarding

From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, May 29, 2007 7:35 PM To: 'Carl Zeigler' Subject: SR 429 Wekiva Parkway PD&E Study - 5450 Wilson Rd. Carl, As you can imagine there are many property queries such as this one that we have to work on, and it is a rather involved process to check these against the various Wekiva Parkway alternatives being considered. I show this property, 5450 Wilson Road, at the SW corner of the Tall Trees subdivision and on the north side of Wilson Road. It is shown as parcel 1445 on the project maps on the Expressway Authority website at ftp://ftp.ch2m.com/Wekiva\_Public\_Boards/ The property would be looking at varying potential impacts from the Wekiva Parkway SR 417 interchange connection to Interstate 4. Some of these alternatives have been adjusted since the summer workshops and are not yet available on the website because they're still in a state of flux as we work through issues and continue meeting with various officials: SR 417 IC Viable Alternative (summer workshops) - direct impact, 2/3 - 3/4 of property SR 417 IC Alternative A - direct impact to 1/2 - 2/3 of property SR 417 IC Alternative B - same as Alternative ASR 417 IC Alternative C - same as Alternative ASR 417 IC Refined Viable Alternative 1 - same as Alternative ASR 417 IC Refined Viable Alternative 2 - same as Alternative AAs noted these maps are being updated. We hope to have them firmed up and posted on the OOCEA website in July. Please be advised that potential property impacts are highly subject to change at this time. We are shooting to have a preferred recommended alternative ready for formal public hearings in September or October. I hope that helps. Please call or email with other questions or concerns. Mary Brooks

Please see the attached document regarding the Wekiva parkway project. I am asking that you reject the 'Recommended Preferred Alternative (RPA)' route which, if approved, would cut a swath through our neighborhoods, destroy the natural beauty and quietude of the Wekiva River Basin area we all call home, and negatively impact our property values. I do not believe this is the best alternative for our community.

Thank you.

Contact		Carrie Arnold	Data Research Solutions
Date	Time	Regarding	
3/14/2008	7:05 PM	-----Original Message----- From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Friday, March 14, 2008 7:05 PM To: 'Carrie Arnold' Subject: SR 429 - Wekiva Parkway PD&E Study - schedule & funding Hello Carrie, You can find this and other information -- including maps -- on the Wekiva Parkway on the Expressway Authority Web site at <a href="http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml">http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml</a> . In short, we anticipate finishing the PD&E Study with an approved alignment in late 2008 or early 2009. This project is being done jointly by the Orlando-Orange county Expressway Authority (Orange County portion) and the Florida Department of Transportation (Lake and Seminole portions). The OOCEA has funding in the current five-year work plan for the next step, final design, and a little money to begin right of way acquisition. There is no	

funding currently for construction of the OC portion.  
The FDOT does not have money programmed for design, but a little money for right of way acquisition. FDOT does not have any money programmed for construction.  
Since the project is not totally funded, the schedule at this point is tentative at best. Estimates run from 5-8 years to 10-15 years to finish the project.  
That being said, there is a commitment by a number of agencies to come up with a financing plan in order to be able to finish this 25-mile missing link of the beltway sooner rather than later. I expect to have some information from this agency group in the next month or two, certainly by the time we hold the formal public hearings on the preferred alignment in July.  
Once the financing has been determined, we will be in a much better position to draw up a firmer schedule. So stay tuned.  
Please feel free to call or email with other questions. I hope that helps.

Subject: SR 429 - Wekiva Parkway PD&E Study - Info Request

Hello Bethany,

Your email was forwarded to me as the public information officer for the

Wekiva Parkway Project Development & Environment (PD&E) Study. We are shooting for formal public hearings this summer, perhaps in July. Details have yet to be determined.

Please forward your full name and mailing address and I will make sure you receive project newsletters, meeting notices, etc.

You can also find the latest maps showing the recommended Preferred Alternatives and other project information on the Expressway Authority Web site at  
<<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>>.

The Expressway Authority is responsible for the Orange County portion of the 25-mile project; the Florida Department of Transportation is overseeing the Lake and Seminole County portions. We hope to conclude the PD&E Study with an approved alignment alternative by the end of this year.

Please feel free to email or call with additional questions. Thanks for your interest in this major transportation improvement.

Mary Brooks

Typically the county would handle any future plans for a local road; the Turnpike and Expressway Authority only deal with toll roads. You might check with the county to see if there are any plans for this location. Most of the counties have their future projects on their web sites. I hope that helps. Mary Brooks

Thank you for your response. I am actually inquiring about the already existing 429. There is an exit called independence parkway or independence exit. It extends west but dead end prior to entering the Independence neighborhood in Winter Garden. I wanted to see if there are plans to connect the 429 to the existing neighborhood. Thank you.

Subject: RE: 429 Independence

Hello Arthur, Your query about a possible extension of SR 429 was forwarded to me. I just wanted to confirm that you're referring to the south end of SR 429 where it currently ties in to Interstate 4 down by the attractions? If so, that portion of the 429 was built by the Florida's Turnpike Enterprise. I am not aware of any plans for further extension of the 429 in that area, but you could also check with the Turnpike's Public Information Officer Christa Deason at Christa.deason@dot.state.fl.us <mailto:Christa.deason@dot.state.fl.us> or check out future plans on the Turnpike web site at <[http://www.floridasturnpike.com/construction\\_future.cfm](http://www.floridasturnpike.com/construction_future.cfm)>.

10/22/2008 8:22 AM

The Expressway Authority is working with the Florida Department of Transportation to realign and extend the north end of SR 429 through northwest Orange, Lake and Seminole counties. That project is known as the Wekiva Parkway and is currently in a Project Development and Environment Study. I hope you find this information helpful. Please feel free to email or call directly for additional information.

Jerry and Joyce Avery

Regarding

PIO returned call to Joyce Avery, and let her know that the public hearings have been pushed back to August. PIO noted we will send out info once those meetings have been nailed down. She asked what's been going on, they haven't heard anything? PIO noted we've been finalizing documents, noted the noise study, biological assessment reports are on the web site and will be posting the traffic report soon. She asked when is it likely to go to construction? PIO noted that's still dependent on the availability of

funding. PIO noted several agencies have been working on a funding plan and we hope to have some info on that for the public hearings. PIO noted once the funding is nailed down we will have a better idea on the schedule. She asked if it had moved at all, was behind their house and wasn't going to affect them? PIO noted the OC alternatives have not changed in quite some time, though don't recall when the last time was that we spoke. She said it hadn't changed the last time we spoke either. She said does it look like this is going to happen? PIO noted everything I'm hearing is we're moving forward and the financing plan is in the works; I haven't heard anything about roadblocks or tie ups. She said okay and she will check back with me after a while. PIO said she's welcome to do so.

5/20/2008 1:01 PM Joyce Avery called and MSG we're out here on Plymouth Sorrento and Boch road, I haven't called you in a while. Just wanted to touch base with you and if you don't mind give me a call back and let me know any updates or what's going on, or any meetings any time soon or what. 407-886-7840 or c 321-230-3435 thanks Mary.

Patti,

You email was passed to me and your information will be added to the Wekiva Parkway project database to receive meeting and other project information. However, we still need a mailing address for you.

We are shooting for public hearings on this project in summer 2008, with the study hopefully finishing with agency approvals by the end of this year. Please email or call with other questions or concerns.

Contact Date	Time	Thomas B. Ball, III
11/11/2008	5:22 PM	Regarding PIO returned call to Tom Ball, who said he just saw the email, will try to attend the meeting. PIO noted I'm delivering disks tomorrow. He would like to have the info, call me on cell 701-2228 and we can rendezvous and will try to save you some time if I can. He said his daughter's basketball game might be only reason he can't make the meeting. He said he only has a small property there south of SR 46, 3.5 acres. PIO noted his name came up as one of those that could be potentially affected. He was thankful for the contact.
11/11/2008	5:12 PM	Tom Ball 407-324-0444 returned call and left MSG I got your message. I will check the email and look at it, was just trying to call you back. I wanted to speak to you. If you need to reach me at office number an cell is 407-701-2228 thanks Mary.
11/11/2008	2:45 PM	PIO delivered WPCC disk to Thomas Ball's home office, gave to his wife as he was tied up, as discussed.
11/10/2008	4:23 PM	PIO called Thomas Ball/Thomas Ball Real Estate 407-324-0444, left detailed MSG noting I was following up email on the SCEA Board meeting, planned discussions on WPCC alternative and impacts to port and other community stakeholders. Also let him know I have the material with maps, etc., that I'd like to get to him before the meeting. Asked him to call or email me back.
11/10/2008	4:19 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Mon 11/10/2008 4:19 PM To: Tom@TomBall3.com Cc: Deana Leffler Subject: SR 429 - Wekiva Parkway PD&E Study - Important Meeting Information Dear Community Stakeholder: The Florida Department of Transportation (FDOT), which has been conducting the Wekiva Parkway Project Development and Environment (PD&E)

Study in Lake and Seminole Counties, wishes to notify you of important information that is scheduled to be discussed at the Seminole County Expressway Authority (SCEA) Board meeting on Tuesday, Nov. 18 at 4 p.m. The meeting will be held at the Seminole County Services Building, Room 1028, 1101 East First Street, Sanford, FL 32711. A community-based group, the Wekiva Parkway Community Coalition (WPCC), has proposed an alternative alignment for the Wekiva Parkway in Seminole County that would potentially affect you and other community stakeholders in your area. The SCEA Board asked the FDOT to review and evaluate this suggested alignment, referred to as "WPCC Alternative G." The FDOT has completed the evaluation of this proposed alternative, and will be discussing the findings at the Nov. 18 SCEA Board meeting. We would be happy to provide a summary of this information to you in advance. Please contact me at your earliest convenience so I can arrange to get either a hard copy or electronic files on disk to you. Please feel free to contact me with any questions or for further information.

Subject: SR 429 Wekiva Parkway PD&E Study - Metroplan MAC Meeting

Greetings,  
Below please find the notes from this morning's Municipal Advisory Council meeting at Metroplan. The members present expressed support for the project and eagerness for it to get to construction, just FYI.

8/7/2008

9:40 AM

PIO arrived at Metroplan, greeted MAC committee members and placed PIO biz cards for all on dais. Staff noted presentation was already loaded (committee members also had hard copies in their packets).  
Present were Mayor Gary Bruhn, Windermere, chairman; Mayor Mary Lou Andrews, Oviedo; Mayor Bush; Mayor David Strong, Winter Park; Commissioner Dan Anderson, Longwood; Mayor Bob Goff, Casselberry. Late comers were Mayor Douglas Kinson, Maitland; Commissioner Shirley Gray, Lake Mary; and Mayor Scott Vandergrift, Ocoee.

PIO provided presentation with additional detail, etc. Also discussed public involvement and meetings with stakeholders, conservation land acquisitions, etc. Mayor Bush asked if we were building it to six lanes? PIO noted some locations will necessitate that initially, otherwise will start as four lanes. PIO noted we're buying the ROW initially for six lanes in any case. Initial laneage will depend on the traffic numbers when we get to design. OC for example may start off as four lanes; SC may need to be six lanes right off the bat. Commissioner Anderson said re: the CR 46A realignment if you're really working with the homeowners, why not buy up to the park so they have trees and a buffer behind them? PIO noted there was private property between the planned road and the state land, and we only need a small portion of that for the realignment. PIO noted the forest is actually some distance away. Mayor Bruhn asked if we'd be tearing up the CR 46A asphalt with the realignment? PIO said we will leave some for access to gates at state lands, but otherwise yes, that will be removed.

8/7/2008 9:39 AM Commissioner Anderson discussed other parkways and noted tree buffers will be crucial to the success of this project. PIO noted there is design criteria in the WPPA, and that the intention is for the road to have a parkway feel. PIO noted for example FDOT is considering a buffer between Heathrow Country Estates and the at-grade realignment of CR 46A, possibly vegetative, berm, etc. PIO noted the parkway feel is intrinsic to the study but that is also a funding item. Mayor Andrews said she travels between Sanford and Tavares quite a bit and loves the drive; it's so pretty along there. She asked how the wildlife crossings were going to work, how were we going to funnel them in there? PIO noted currently that's how they work with fencing and underground crossings. But we are building wildlife bridges so the animals will be on the ground and have free range under the bridges. Commissioner Anderson said the SR 417 interchange is the only one that makes sense. Otherwise you're having to get on and off of I-4 or other roads and what's the point of that? PIO noted the SR 417 IC will provide more of a true beltway, and that traffic models show that is the movement a lot of people want to make, to go from SR 417 to SR 46 in SC and LC. PIO noted the models show that without the Wekiva Parkway, local roads will ultimately break down if people have to make that jog. Mayor Vandergrift asked what happened to the John Land going across 429 to Lake County? PIO noted there was a prior project, the SR 429 Northwest extension, that would have taken 429 north from its current terminus and into Lake County. PIO noted due to the growth that occurred in that area, it did not have local support and was shelved. PIO noted the Wekiva Parkway is now the extension of SR 429. PIO noted SR 429 being realigned as part of the JLAE to connect to US 441 near Plymouth Sorrento Road, and the Wekiva Parkway will continue north from there.

8/7/2008 9:38 AM Commissioner Gray asked best case scenario, when would we see this? PIO noted funding limitations, first activity likely in OC; OCEA has funding for design and some ROW but not all and not construction. PIO noted if funding becomes available, could see construction start 2012. but PIO noted that's heavily dependent on funding, EA traffic is down, a number of funding options being looked at including raising tolls but with the current economy that would be an issue. PIO noted FDOT doesn't have money programmed for design, but some for ROW in Lake County, could possibly move that over to jump start design, but no funding beyond that. PIO noted EA, FDOT and FTE working together to try to come up with a financing plan to make this happen sooner rather than later. Mayor Bruhn asked if he'd see it in his lifetime? PIO noted this is a priority and we're working toward that, so we're going to do our damndest to make that happen. PIO thanked committee members for the opportunity and for their support of the project.

Subject: Wekiva Parkway Presentation - MPO Presentations  
The purpose of this memorandum is to provide you with a summary of the discussion following my presentations to the following METROPLAN Subcommittees:  
CAC -- Wednesday July 23  
BAC -- Wednesday July 23  
TTC -- Friday July 25  
CAC -- Wednesday July 23  
Rob McKey (407 797-7497) asked if we performed a comparative analysis of the proposed typical section in Seminole County with 4/6 expressway on embankment with frontage roads on either side within an approximately 240 foot right-of-way versus placing the 4/6 lane expressway on bridge structure over existing SR 46 and using less right-of-way. I explained to him that the right-of-way along SR 46 in Seminole County was very wide ( approximately 200 feet ) and that bridge structures were much more expensive than embankment. However, he still requested additional information.  
BAC -- Wednesday July 23  
Mighk Wilson expressed concern that when the Wekiva Parkway was built, SR 46 would be cut off and the existing route would be lost to bikers and other users. I indicated that was possible but unlikely since construction on the Wekiva Parkway was currently unfunded, it would be a number of years before the road was built.  
The Group had a general discussion over how the trail would cross the Wekiva River. I indicated that a number of alternatives were under consideration such as hanging a walkway from the new bridge crossing or utilizing the existing crossing for pedestrian and bicyclist traffic only. One of the participants noted that FDOT has already eliminated using the existing route. Is this correct?

7/25/2008 12:14 PM TTC -- Friday July 25  
Jeff Arms with the City of Orlando asked a similar question to Mighk's regarding the need to coordinate with the Counties to insure that SR 429 does not take ROW that could potentially be used for trails where the road and trails are parallel.  
IN summary, I feel the graphics need to be enhanced to highlight the Preferred Alignment on the aerial base. Otherwise the PowerPoint presentation displayed well.

1/24/2008	6:19 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Thursday, January 24, 2008 6:19 PM To: 'Lindsay Hodges' Cc: 'Mark.Callahan@CH2M.com'; 'David.Lewis2@CH2M.com'; 'dleffler@qca-inc.com'; 'berenisj@oocea.com'; 'GJSkaff@pbsj.com'; 'Stanger, Brian'; 'steve.homan@dot.state.fl.us' 'Hickson, Frank' Subject: SR 429 - Wekiva Parkway PD&E - WFTV Ch. 9 interview recap
-----------	---------	---

PIO did interview late this afternoon with reporter Steve Barrett and producer Jeff Harwood of WFTV Ch. 9 about the Wekiva Parkway. Reporter asked about the schedule for the PD&E study and overall project, and when information became available to the public.  
Specifically, they are investigating the purchase of two parcels on the south side of SR 46 near CR 46A by Dennis Benbow and Jack Spillane, partners in the Wekiva Mitigation Bank. They noted a 2500 SF home was being built on one of those parcels now. We reviewed the overall recommended alternative, which showed a potential pond crossing the south side of the two parcels. I informed the reporter that during the PD&E Study stage we are very conservative with pond siting: map shows more where a pond could go as opposed to where one definitely will.  
They asked for the size and cost of the Neighborhood Lakes parcel and Wekiva Mitigation Bank. They intimated that Benbow and Spillane had access to someone formerly associated with the Authority who may have provided information not readily available to the public.

Reporter asked if we knew speculation was occurring in conjunction with this project? PIO noted it's generally acknowledged that occurs with a project of this type. PIO went over the initial alternative, viable alternative and current recommendation stages and all of the community, elected official and agency meetings that occurred at each stage to get feedback from the public. PIO noted the latest concepts were mailed or emailed to anyone requesting them, were posted at each stage on the website, and were provided for review at probably hundreds of the various meetings that have taken place over the last three years of this study.

Reporter asked if there was a period where concepts would have been available to a select few, say for six months, before being released to the public? PIO noted no, meetings were ongoing pretty much the whole time and we provided concepts at the majority of those.

He asked if we tracked the speculative buying and selling of properties along the corridor? PIO noted that was not possible given the size of this corridor, and not the focus of our mission. PIO noted we received info on the permitting of large developments, for example, from our meetings with city planning and other officials.

PIO noted the tremendous history behind this project, groundbreaking legislation that was a result of all facets of the community having been at the table - environmentalists, property owners, developers, elected and agency officials, etc. noted we've provided literally hundreds of maps and concepts to anyone requesting them, has been a model for openness and transparency.

PIO noted the overall project stages, funding challenge and Mayor Crotty's campaign to get stakeholders together to ensure the completion of the beltway is funded.

Jeff Harwood asked for a list of all of those who requested maps. PIO noted do not have a list specifically for that. They also asked for the percentage of the overall project cost consumed by ROW acquisition. I think that's the gist of it. The story is supposed to run in the sweeps period.

1/24/2008	2:28 PM	PIO called back Steve Barrett/WFTV Ch. 9 and noted I left MSG about hour ago, was he still looking to do something this afternoon? He said he hadn't had chance to check his MSG's. PIO asked what area or properties was he referring to, have a number of maps I could either bring or send to him? He said right where it spits out on 46 in LC, parcel 1597641 and 1597633. PIO asked if he meant east or west Lake County? He said east end toward river before Sanford. PIO noted that's actually the FDOT portion of the project; I'm contracted through OOCEA. PIO said I'd need to check with FDOT to see if they want to handle the interview or want me to do it, and will get back to him. He said the story not for today, just trying get the interview done.
1/24/2008	1:28 PM	PIO Left MSG for Steve Barrett/WFTV Ch. 9 that think I've got my schedule to where can meet with him this afternoon. Asked for what areas or parcels he was looking at; noted I have a number of maps I can bring or send him depending on the area. Told him to call me back to set up.
1/24/2008	12:08 PM	Steve Barrett/WFTV Ch. 9 called and said you've dealt with Jeff Harwood I think on this. I'm looking at land purchased by people during the time the more final routes were being put in place. Can you go on camera today to discuss the timeline that took place and what will take place in terms of when that road is going to be finished and finalized? PIO noted PD&E schedule vs. overall project schedule and funding limits. PIO noted complex acquisition involved: conservation parcels, advance ROW acquisition/willing sellers large properties and future ROW acquisition. PIO said I'd have to check the schedule for this afternoon and get back to him. 407-466-8165 He said they're looking at speculators and parcels that have changed hands.

Mike and Donna Belinski

Regarding

PIO called back Donna to let her know the preferred alignment has been posted for some time on the expressway authority web site. She was not aware of that. PIO offered to walk her through finding them, but she said the computer wasn't on and would take a while. PIO noted couple links to look for to find the maps. She said we live on p-s road where it makes the turn, that's our property. Say they go with this proposed route, how long before they try to buy our property? We have just been ... we have 3 acres, want to put a pool in, but we've waited and waited. I finally told my husband. We were told by the real estate agent that pool wouldn't increase the value ... wouldn't be able to get the money back. I told my husband by the time all this is done I'll be too old to enjoy it. How long is it going to be? Weeks, months, years? PIO noted we need to finish the study, hopefully early 2009. You're in OC and EA has money for design, the next step, and hopes to go right into that maybe late summer or fall. PIO noted they'd have to get partly into design, maybe 30%, to know exactly how much property they needed from the owners. So at the absolute earliest you're looking at late 2009 but more like 2010-2011 to buy property. And that's contingent upon getting money for all the purchases; they don't have that right now. She said so say it shows like it comes the back third or so of our property; do they just take that or the whole thing? PIO noted we only take the property we need; we don't have enough money now to buy that, let alone extra. PIO noted in some cases, however, where property owners don't want the road close to them they ask us to take the whole property. Some times that can be negotiated but would be the owners' urging.

She said that would be me. We bought this acreage to be away from all that; if it's going to be right on top of me I'm certainly not going to be happy. She said two of them (viable alternatives) took the back of my barn...PIO reiterated she should look at the map of the recommended preferred and after that I'd be happy to discuss with her further. She said she would do so and thanks so much for calling back.

7/8/2008	2:31 PM	PIO returned Donna Balinski's call, left detailed MSG that we were hoping for formal public hearings in August, but that looks like it's getting pushed back to late September. PIO noted there is documentation that has to be reviewed and signed off on by the state and FHWA before we can advertise the hearings, and that process is taking longer than anticipated. PIO noted we will be sending out a newsletter with the meeting details and will post on the web site to all of the property owners, etc. PIO said can call me back with other questions.
----------	---------	---

7/8/2008	1:06 PM	Donna Balinski called and left MSG I have a question about Wekiva Parkway. My house on the map is in the little blue square. On most of the proposals it takes my property. We were told at the last meeting there was going to be another meeting in July that would pretty much tell us what was the proposed route ... If you would give me a call 407-889-5902. Thank you.

Contact		Dick Belshner
Date	Time	Regarding
6/17/2008	2:51 PM	PIO returned call to Dick Belschner, who said after he called me he found some of the traffic info he was looking for. PIO noted yes, it's on the web site. He asked what's the latest with the project, has some people interested in a project out there. PIO noted PD&E schedule, continuing funding challenge but push for a financing plan. PIO noted current OCEA funding for design and some ROW, but not all of it and not design. PIO noted we were hoping agencies pushing for project would have a financing plan in next couple of months. Noted public hearings set for August, but details TBD. He asked so do you think construction is a couple years away? PIO noted even if had the money would still have to do final design and ROW acquisition, so more like 4-5 years before construction in Orange County. He said he appreciated the call back and info.

6/16/2008	12:20 PM	Dick Belschner 407-333-9565 called and left MSG I recall back some time ago when you guys were putting on the presentations for Apopka, you had some maps that showed the different configurations and locations for both 429 the Wekiva northern extension and the JALE. Believe you had some notes on there with notes about traffic, what traffic was expected on each of those roads. I'm wondering if there is somewhere I can get my hands on those it would be greatly appreciated. 407-421-8111 thanks.

Please find attached my comments regarding the proposed Wekiva Parkway.

Contact		William and Peggy Bennett
Date	Time	Regarding
3/25/2008	10:34 AM	PIO returned call to Peggy Bennett, spoke to her husband, and noted she'd asked about eh john land Apopka expressway. PIO noted phase I was under construction now, what was the question? He said they're at Plymouth Sorrento Road and Haas Ondich... PIO said oh, so you're interested in the Wekiva Parkway? He said yes, they get them confused. PIO noted we're still finalizing documentation for the public hearings, still shooting for July and will send info out once it's set, still hope to finish the study by the end of this year with approvals. He said they hadn't heard anything in such a long time. PIO noted it's a very large study area and a lot of complex issues, coordination with different agencies, so yes, it has taken longer than we thought in the beginning, but it hasn't gone away. He said they could only hope. He noted they built house in '70 and had the land before that, so we've been out here for a while. He said he didn't want to be 80 years old out here and not know what was going on. PIO reiterated we'd get something out to them, hope to nail down the public hearing dates in the next few weeks. He said he appreciated the update.
2/24/2008	5:08 PM	Peggy Bennett 407-886-0292 called and left MSG I'm calling in regards to expressway john land Apopka , we haven't heard anything, thought I'd check in with you to see if there's any update. We do not have a computer so we cannot look on the computer screen. If you would give us a return phone call that would be very helpful to us. My husband's cell is 407-383-6647, h 407-886-0292 thank you
2/21/2008	9:23 AM	PIO returned call to Peggy Bennett/6034 N. Plymouth Sorrento Road 407-383-6640 c, h 407-886-0292 left MSG that public hearing timeframe has been moved to summer this year, probably July. PIO noted we had significant amount of documentation that has to be finalized, including evaluation of potentially historic sites. PIO noted just did field evaluation yesterday of the last historic site, so we should be staying on track for the

summer hearings. PIO noted they will get something in the mail in advance of the hearings. Thanks for checking in.  
Mary Brooks

2/21/2008 7:53 AM Peggy Bennett/6034 N. Plymouth Sorrento Road 407-383-6640 c, h 407-886-0292 called and left MSG I was just interested in knowing when we were going to have a meeting on the beltway. I thought you told me we should already have had one by now. Please give me a call back as soon as you can.

Contact Ray Benoit  
Date Time Regarding  
12/2/2008 11:53 AM I called Mr. Benoit and gave him this info.

12/2/2008 11:49 AM The conceptual preferred alternative impacts a portion of 12 Oaks RV Resort closest to SR 46. This is only preliminary; the actual impacts will not be determined until final design is complete. Final design/right-of-way acquisition/construction are not currently funded. I do not know if renters are reimbursed by FDOT for relocation expenses. I suggest you advise him to call Jim Clark at (386)943-5099 at the FDOT District 5 Right-of-Way Office for process related questions.

11/25/2008 7:53 AM I received a call from Mr. Benoit who lives at 353 Snowbird Circle at 12 Oaks RV Resort (on SR 46, 4 miles past the I-4 Interchange near Orange Ave) - he wanted to know if the preferred route will take 12 Oaks RV Resort and if residents living there will be reimbursed for the cost to relocate (they own their trailers but rent the property they are on). I said I would check into it and that I would get back to him.

11/25/2008 7:44 AM I called Mr. Benoit - he wanted to know if the preferred route will take 12 Oaks RV Resort and if residents living there will be reimbursed for the cost to relocate (they own their trailers but rent the property they are on). I said I would check into it and that I would get back to him.

11/19/2008 7:45 AM After SCEA Board meeting, Pam with Seminole County said there was a resident of Twelve Oaks RV Resort who had questions but had to leave. She gave contact info for Ray Benoit 321-696-3024. She said he doesn't have email. He owns the trailer but not the land its on, question about impact to his location. PIO said I'd call him.

www.interstarlending.com <http://www.interstarlending.com>

4/3/2008 9:28 AM Andrew Bernstein 813-832-9900 called and said he's the lien holder on property bridle path. He wants to know when we're going to buy the property. PIO said hadn't heard much about discussions on that one but could look into it and let him know. He said send info to him at Andrew@inter-star.net <mailto:Andrew@inter-star.net>.  
He asked if you're not in discussions now, what's the time table on when you might buy it? There is no final alignment on this yet is there?  
PIO noted we have recommendations for preferred alignment and interchange locations, need to take those to public hearings and then agency approvals, hope to finish the study by end of this year or beginning of next. PIO noted I'd be surprised if we finished any of the advance ROW acquisitions - very large parcels we're trying to get before houses go up - before that. Noted the other phases of project development and funding status, funding affecting schedule.  
He said I'm owed money on this property and not able to collect. While borrower is ... trying to figure out how to do this. I didn't want to be involved in this in first place, and certainly not for this long. I don't know if there's anything that anyone can do at this point? PIO said would look into it and get back to him. PIO noted if there are discussions ongoing will put him in touch with the point person. He said he would appreciate that.

8/19/2008	9:12 PM	We believe the proposed Wekiva Parkway is a bad idea for hundreds of residents in the affected area who have worked hard to live in the communities they reside in and cannot afford to see their property values plummet. In addition, there is simply no good reason to build a new roadway where existing routes can be used toward the same end. The noise level in this area is already high. At times, we can hear traffic from I-4. We cannot imagine what the noise pollution levels will increase to if this parkway becomes a reality.

Subject: Wekiva Parkway Comment Form Submission  
Please find attached my comments regarding the proposed Wekiva Parkway.

5/3/2008	7:55 PM	We bought our house in the Berington Club last July, having avoided several other neighborhoods because of the then-proposed route for the Wekiva Parkway. How troubling it is to learn that a new proposal places this traffic and noisemaker in close proximity to our neighborhood. I must say that the noise level from 46 is already disturbing. I cannot imagine living with the additional noise caused by this basically unnecessary link to I-4. Why not stick with a route that is already carved out (46) instead of disturbing new territory and existing neighborhoods? The state should not have the right to compromise the value of its citizens' homes, yet that is exactly what this roadway will do, no matter where it goes through. We moved to this area because it offered so much less congestion than neighborhoods to the south on I-4, and I cannot emphasize enough how upsetting this proposed roadway is to us and to everyone we know. Develop a better plan or abandon the plan for now.

Hi Mary,  
It's nice to hear from you! I will be out of the state next week, through Wednesday, October 8, so we will have to put it off until after that. Can we look at the week of the 13th? As long as you can make it either first thing in the morning or late afternoon, I can probably break away either Monday (13th) or Thursday (16th). Let me know how those work and we'll go from there. I am looking forward to seeing the study results.  
Gary Brender  
Deputy Mayor  
City of Lake Mary

Dear Commissioner Brender,

The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with each of the SCEA Board members to discuss our latest findings regarding the alignment alternative suggested by the WPCC. We would like to set up a meeting with each of you at your earliest convenience, and certainly prior to the Board's regularly scheduled public meeting in November.

Please provide several dates and timeframes that you would be available to meet with us. We greatly look forward to updating you on the alternative evaluation and to getting your further input.

I look forward to hearing from you at your earliest convenience.

Mary Brooks Public Information Officer SR 414 - John Land Apopka Expressway & SR 429 - Wekiva Parkway PD&E Study C 407-702-8375 F 407-381-9038 MBrooksSR414@cfl.rr.com

Subject: SR 429 - Wekiva Parkway PD&E Study - 200 Stanley Bell Dr. in Mt. Dora  
Diane,

I wanted to get back to you about your query on 200 Stanley Bell Dr. in Mt. Dora. According to our parcel records, the Brennan's are listed as having three separate, contiguous parcels on Stanley Bell Drive -- #30606, #30613 and #30640. In the attachment, they are highlighted in yellow and outlined in red. The Lake County West Preferred Alternative, which includes modifications to the US 441/SR 46 interchange, does not affect the properties in question. The existing US 441 right-of-way line stays the same. In fact, with the proposed modification, the existing ramp will be removed, a retention pond built in that location and the new ramp would be further away from these properties. Also, as we discussed, this project is not funded for construction. The Expressway Authority has funding for final design and some right of way acquisition; the Florida Department of Transportation has no money programmed for design, but some for ROW acquisition. Even if we had the full funding -- \$1.8 billion - we still could be looking at 5-8 years for construction to start. That schedule will be heavily dependent upon the availability of funding. We are exploring a number of options, and the Expressway Authority has made bringing this much-needed project to fruition a priority. As noted, project information can be found on the Expressway Authority Web site at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> .

I hope that addresses your questions. Please feel free to email or call with additional questions.

Mary Brooks

2/11/2008

10:54 AM

Diane & Phil Brennan called 352-383-8530 and said they've been hearing different things, their property backs up to exit ramp at SR 46. They're wondering if they should put any more money into their home if it's going to be taken? She said we're really in limbo now. Nobody's house is selling around here, but that's as much to do with the market as anything else right now. She said they've gotten some things in the mail and hearing rumors, and just want to hear what's really going on.

PIO noted we have the latest maps posted on the OCEA web site and the public hearings are pushed to this summer, hopefully July. PIO noted there's lot of documentation that has to be finalized under state and federal requirements before we can set the public

hearings, and they're working on that now. PIO asked if she had internet access? She said yes. PIO noted she can take a look at the maps and see where her property is, and whether there is any impact. Or if she can't figure it out, give me her address and I can research it for her.

She said the existing ramp coming off 441 to 46 is behind our property. We had been led to believe that within the city limits nothing was going to be touched, but there are all kinds of rumors going around.

She said their property is at 200 Stanley Bell Drive, near SR 46 and US 441 interchange. We have a lot of oak trees, a lot of cover. They're doing construction right now on that road and it can keep you up at night. We're concerned if they don't take our property but they take all those trees down it's going to be terrible. She said we have garage apartment that sits on the back end and were also worried about that.

She said they need a new roof - when are we going to start construction? PIO noted this project is not funded for construction. Went over funding availability for OCEA and FDOT noted even if had funding could be looking at 6-8 years for construction to start. She said they won't wait that long to put on a new roof. PIO noted keep in mind any improvements that add value to the home in that time would be taken into consideration if the property is needed during ROW negotiations. She asked for the OCEA web site, which I gave to her. PIO offered to walk her through finding the info, but she said she was not at a computer. PIO gave her the text links for project info.

She said that helps and thanks for the info. PIO said I'd research her property, get back to her in a couple days, also have others asking for the info. She said that's fine and thanks. Email [dnbrennan@hotmail.com](mailto:dnbrennan@hotmail.com) <<mailto:dnbrennan@hotmail.com>>

Contact Thomas Briggmann

Date Time Regarding

4/13/2008 10:52 AM I am writing to express my opposition to the "preferred alignment" connecting the 417 by the 46A exit ramp. The proposed elevated highway would run adjacent to the back entrance to Sylvan Lake Reserve, aka, The Glades on Sylvan lake community. My house is the first one on Walden View Drive so I would be directly impacted. It is my understanding the highway would also interject the front entrance along SR 46. I moved to Sylvan Lake Reserve from unincorporated Winter Park for the semi-rural environment

4/13/2008 10:51 AM It was my understanding Orange Boulevard was the demarcation line which starts the Wekiva River Basin which severely limits construction to protect the vital resources associated with the Wekiva River. Having an elevated highway run right next to our community would not only affect the environmentally sensitive river but also adversely affect the tranquil, semi-rural community we have all grown to love. It is my hope the committee will listen to the residents who are most affected by this project and reconsider the planned alignment. Thank you in advance for your consideration.

I was trying to find information about that on line without a whole lot of success. Wondered if you could give me a call and let me know if in fact there is a meeting and where it is, that sort of thing. I will continue to look. My number is 352-385-9095 thanks I look forward to talking with you soon.

Hello Barry,  
 I wanted to let you know that we have received your comment form. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. We are working to schedule formal public hearings and will send out a project newsletter with details and update the Expressway Authority web site (www.oocsa.com <>) with this information once available.  
 Please feel free to email or call with questions or additional concerns.

Brummer questions Good afternoon, I was going over my notes from the meeting with OC Commissioner Brummer, and he had the following questions on which I need assistance. 1) What kind of mitigation dollars are we looking at? 2) Why not have frontage roads in Lake County for local access since it will likely be tolled? Your assistance on how to respond to these questions would be appreciated. Thanks. Mary Brooks	
9/8/2008	2:00 PM	PIO met with John Byrd (who left meeting early) and Commissioner Brummer. PIO went over status of SR 414, SR 429 / US 441 and Wekiva Parkway projects. Commissioner Brummer wanted to know and PIO informed him of the latest on the public hearings. He also asked what kind of mitigation dollars we were looking at? PIO said I'd have to find that out and get back to him. He asked when would construction start in Orange County? PIO noted if finish study in first quarter of 2009, OOCEA has funding for design, maybe fall '09, and some - but not all of the - money for right of way acquisition, which could start 6 months to a year into design. PIO noted no money for construction, but if economy turns	

around and we're able to raise tolls, could start in 4-5 years.

9/8/2008	1:59 PM	Commissioner asked why we weren't planning frontage roads along Wekiva Parkway in Lake County? Concerned about local access for residents that don't have an alternative since it will likely have to be tolled.... PIO noted those preliminary discussions about how we would address that issue are being held, one idea would be to supply transponders, yet to be determined. PIO noted additional cost of the frontage roads in that area. Commissioner said he has not been getting many calls from constituents other than 'what's going on? Haven't heard anything in a while...' He said now the people who are affected know they are, and those who aren't know they aren't. So it's pretty quiet. He said having the maps and web site updated has been a huge help. He frequently refers people to the site. He was not happy about SR 414 Phase II funding being tied to Wekiva Parkway. He didn't want to wait that long. Other than that no real issues with SR 414. PIO noted issues with Agape Word Church and Capital Restaurant, in case he should hear from them. PIO explained turn lane reduction during construction on SR 429/441, what we're doing there. He recalled expressing concern to Hal Worrall about eight years ago that the previous single left turn lane on 441 at SR 429 was too short and was backing up. He was glad when they added the second turn lane. He said even dropping down two one lane it's still longer than what was there, and it will only be temporary. The commissioner asked for a sign on NB SR 429 south of Ocoee Apopka Road: "University of Florida Agricultural Research Center (via Harmon Road)" similar to the one we have elsewhere.

Subject: OOCEA Apopka Area Projects - Update Offer  
Commissioner Brummer (and John),  
I wanted to follow up the Aug. 19 (11:05 a.m.) voicemail I left at your office to see if you needed an update on the Wekiva Parkway, State Road 414 - John Land Apopka Expressway or the latest project to start in your area, the SR 429 and US Highway 441 interchange improvements. That project, which is Phase I of the ultimate extension of SR 429 to Vick Road, is expected to cause some traffic congestion during construction, particularly once we start periodically closing turn lanes. Please let me know if you feel an update would be helpful and I would be happy to schedule a presentation at your office. I hope all is well and I look forward to hearing from you. Have a safe and pleasant holiday weekend.  
Mary Brooks

8/19/2008 11:05 AM PIO called OC Commissioner Fred Brummer 407-836-5850 (John Byrd), left detailed MSG asking if we needed to schedule a meeting with Comm. Brummer to update him on JLAe, Wekiva Parkway and new project 429-441 intersection improvements. PIO noted that will cause some backups during construction, especially once we start closing turn lanes. Left number and email address for him to get back to me.

Hello Patty and Ron,

I wanted to let you know that we have received your comment form. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. The Seminole County Expressway Authority Board will be discussing this matter at their Nov. 18 meeting at 4 p.m. The meeting will be held in the commission chambers at the County Services Building, 1101 E. Main Street in Sanford.

We also are working to schedule formal public hearings and will send out a project newsletter with details and update the Expressway Authority web site (www.oocea.com) with this information once available.

Please feel free to email or call with questions or additional concerns.

Mary Brooks

Subject: RE: SR 46 - Wekiva Parkway - Lake Forest Village Shoppes query

Hello Greg,

Regarding any potential impact to the Lake Forest Village Shoppes, 5220 W SR 46. I have researched and confirmed that it does not appear that there would be an impact to this property even with the widening of this portion of SR 46. That is as per the recommended Preferred Alternative for the Wekiva Parkway at this time.

However, please be advised that the alternatives are still subject to change during the PD&E Study, particularly after we get feedback during the formal public hearings this summer. Also, there is the potential that some frontage might be needed when this project gets to design.

We will be sending out a newsletter once we have the details for the formal public hearings and you are on the list to receive that info. I hope that helps.

Date	Time	Regarding	
7/16/2008	10:31 AM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wed 7/16/2008 10:31 AM To: Mark.Callahan@CH2M.com; David.Lewis2@CH2M.com Cc: Brian.Stanger@dot.state.fl.us; Deana Leffler; GJSkaff@pbsj.com Subject: SR 429 - Wekiva Parkway PD&E Study - LC BCC Trails Master Plan Good morning, Some notes of interest for the Wekiva Parkway from the Lake County Board of County Commissioners' discussion July 15 about the trails master plan. The plan was accepted to move to the Lake-Sumter MPO. TJ Fish said the plan would go today before the MPO Technical Advisory Committee and on Thursday before the BPAC committee and next week before the board. The plan also must come back before the BCC for formal public hearings. Among the top five trails listed for pursuit was the Lake - Wekiva Trail, which David (did not get last name) of Inwood noted relies very heavily on the Wekiva Parkway being implemented. Mt. Dora has submitted an application for the first half of that. He noted there have been many conversations with resource managers and there are other ideas about ways you could connect from East Lake Park to Seminole County. He told commissioners when they go through the PD&E process they will look at additional alternatives, which will be needed to qualify for federal funding. He noted the current	

master plan "is a planning document. It doesn't qualify for NEPA."  
During the questions period, Commissioner Linda Stewart noted that "the wildlife corridor on the Wekiva is so important they're actually elevating a large part of the road to protect the corridor." She stated that at the Wekiva Commission a concern was raised about the trail being along the elevated section, possibly deterring the wildlife. She said consideration should be given for an alternative route through the Rock Springs area. "It would be more enjoyable going through a wild area instead of right along the roadway" David of Inwood said he agreed. "There's a balance or tension. You're right about the impact of trails adjacent to a wildlife structure." He noted there have been several conversations with Rock Springs Run, and they discussed going to an elevated concept or no paving because of that concern.

7/16/2008 10:30 AM

Keith Schue of the Nature Conservancy said, "I applaud Lake County for your efforts with the trail program, trying to get this off the ground to where we can have a robust trail system for residents and visitors to enjoy." He also referenced the Wekiva Commission meeting on Friday, noting the Lake-Wekiva Trail going east to the Wekiva River passes through an ensemble of public lands. "The design of the Wekiva Parkway has been focused on how to protect that. Looking at the trail through there, it must also be consistent with that." Schue stated about the current concept "from a recreational standpoint, it's probably not going to be the most recreational experience to ride a bicycle along a highway. From an environmental standpoint it's also not the best because you have an additional paved surface next to a wildlife crossing. Also what has been found elsewhere is that if you have easy human access to wildlife crossing structures you may have undesirable human activities under the bridge." He noted the Nature Conservancy a couple of weeks ago met with Mike Martin of the Seminole State Forest and some Rock Springs Run trail users to discuss ideas, including possibly using rural roads and stabilized surface. "It's a way of allowing people to more closely experience the natural amenities of the Wekiva Park system and getting from point A to B. It's an idea that doesn't yet have a shining endorsement ... but it's a good beginning. I would ask for your support in having that discussion." He also submitted a letter to commissioners. Mike Martin of the Florida Division of Forestry commended commissioners on the trail concept. "This is a fantastic start to things. The challenge you have is there is so much conservation land - we envy you all with all the natural lands," said Martin, who noted he lived in Seminole County. "It's a balancing act of how we can get citizens to the natural lands without excessive damage to the environment. Everyone's looking at the Lake - Wekiva Trail ... You just have to have an idea of what the concepts are and where the trails are going to go." I checked the LC BCC web site but neither the minutes nor the master plan PowerPoint have yet been posted, just FYI.

Date	Time	Regarding
10/2/2008	9:56 AM	Larry Calhoun 407-22-4238 called and said he has a place on Kelly Park Road, lot number 39. What's happening on the hearings? I haven't received anything. PIO noted we have not yet scheduled the hearings. PIO noted we have to get documentation approval on environmental assessment from FHWA before can publish for a public hearing, and we are still waiting on FHWA. He said oh, he thought I could tell him something about the hearings. PIO reiterated we are in a holding pattern with the FHWA, hope to get that approval and hold the hearings in November. He said if it's early November that would be okay, but if it's late he may be out of town. He asked if hearing would be in Apopka? PIO said we would hold one hearing each in Orange, Lake and Seminole counties as we have done in the past. He said okay, will check back later. PIO noted as soon as dates are set we will send something out to everyone and update the web site.

Contact		Thomas P. Callan
Date	Time	Regarding
7/23/2008	3:00 PM	Claire/Tom Callan's law firm 407-447-9141 called asking when the public hearings were? Had they been scheduled? PIO said no, we had been shooting for August but were now looking at late September. PIO noted documentation review process involving FHWA and FDOT taking longer than anticipated; have to have those approvals before can schedule hearings. PIO noted we will send out a newsletter and update the web site when the hearings have been set. She said okay and thanks for the info.

10/21/2008	10:51 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tue 10/21/2008 10:51 PM To: DRogers@seminolecountyfl.gov Cc: Deana Leffler Subject: FW: Community Contacts to Notify About Alt. G Thanks Debbie, and please thank Jerry for me. Take care. Mary Brooks	
10/21/2008	2:40 PM	From: Rogers, Debbie [mailto:drogers@seminolecountyfl.gov] Sent: Tuesday, October 21, 2008 2:40 PM To: Mary Brooks Subject: Contacts Good afternoon Mary, Attached is a list of contacts discussed during the briefing meeting with Commissioner Carey.	
10/20/2008	10:00 AM	Notes from WPCC update meeting with SCEA Board Member SC Comm. Carey, with George Lovett, Brian Stanger, Michelle Maikisch, Jerry McCollum, Gary Johnson, Mark Callahan and PIO. Mark went over original WPCC alternative and impacts, meetings with county staff. Comm. Carey: ...What if you come up the front of Yankee Lake and up the power easement?	

10/20/2008	10:16 PM	<p>Mark: We're trying to stick to their alternative. It would hit some residences and would be outside the study area.</p> <p>Discussion of additional state land impacts from WPCC alternative.</p> <p>Comm. Carey asked what FDEP's reaction was likely to be? She said she asked the question at the Wekiva River Basin Commission meeting and the environmental folks basically said 'No.'</p> <p>Mark: Noted WPCC alternative crosses I-4, no interchange, their proposal would have us on Martin Luther King Blvd. county staff has indicated we need to keep that local road separate.</p> <p>We've run traffic studies, and the people who want to go to Volusia County aren't going to do this. They would get off at SR 46. You would have to six lane 46.</p> <p>Jerry: You basically blow up access with no system to system connection.</p> <p>Mark: SR 46 east of I-4 actually improves. Without IC at SR 417, International Parkway sees some improvement, but more traffic on Orange. The concept creates more problems than it solves, and it doesn't meet the traffic needs.</p>
10/20/2008	10:15 PM	<p>Mark went over refinements looked at to get it to more closely meet purpose and need.</p> <p>Added ramps to and from I-4 eastbound</p> <p>Jerry noted the predominant movement is east to west</p> <p>Comm. Carey: Where we're talking about bringing airport Blvd. ... Jerry said there's a conflict there we will talk about more later.</p> <p>Carey: At CR 46A could you come down Martin Luther King and come around where airport road is going?</p> <p>Jerry: You wipe out any access along here... you would have to raise it so the residents along here (exhibit) would have undue impact. Commuter rail station (FDOT bought Mrs. Brown property), also transit oriented development and future land use impacts</p> <p>Carey: It's new industrial ...</p> <p>Mark: We looked at it on Bevier Road. To tie in you have to make adjustments to their community right here ... it's pretty tight in here.</p> <p>We still need to six lane SR 46 but it provides some improvement, but still pressure on SR 46/I-4 IC. There is a benefit east of I-4 on 46</p> <p>SR 417 realizes reduced traffic</p>
10/20/2008	10:14 PM	<p>Carey: I think having the beltway close to the transit station is a good idea.</p> <p>Mark recapped impacts: less impacts to homes, significant increase in public land impacts, significant increase in additional ROW needed (300+ acres), wetland impacts, additional cost - doubles with alternative G</p> <p>Jerry: Their alternative without I-4 connection is still \$300 million more than the preferred alternative.</p> <p>Jerry: You eliminate some homes, think it's 10-11 less, less noise, fill, etc., but the price is a different issue.</p> <p>Carey: I'm not too worried about the price. I'm trying to figure out what works. Until someone finds a couple of billion dollars, nothing's going to happen.</p> <p>Jerry: Noted Alternative G is no different than the early alternatives A, B, C (green, magenta and yellow), but they never went over here (east of I-4) because that's outside the study area</p>
10/20/2008	10:13 PM	<p>Carey: Does the legislation identify SR 46 as the core, would SR 417 alternative be in there?</p> <p>Mark and Gary noted configuration of the Wekiva Parkway study area, noted it's shown on some other maps in the packet.</p>

Gary noted parts of the Alternative G going through state lands actually also outside the study area.

Carey: Where are we at on the punch through (interim 417 connection)? We need that so badly right now. She also noted there was a time limit in ROW agreement with Colonial Properties. ROW is date certain.

Jerry: Construction in 2010-11, which is within the agreement timeframe

George: We worked with Colonial on the schedule for the work program, and they seemed okay with that.

Carey: The (interim) connection is critical. You have to get on Rinehart now.

10/20/2008 10:12 PM

George: While the project is not funded now ... we are running a lot of models ... we're looking at trying to get this built as a single piece. We're really struggling to make it work at the present day cost. While we don't have it funded ... if we add \$800 million to the project, the chance of funding falls to virtually zero. It's really going to be a stretch as it is. The portion that works as an expressway is Orange County. ... We're trying to get it all built as one, but if Seminole County costs doubles, we may end up with a partial beltway. There is a lot of conversation going on about taking money from the rest of OCEA system to make this work, but if you add \$800 million that's not going to happen

Carey: I know Lake County is not crazy about having ... what if you just do OC portion and just improve SR 46 to six lanes?

Mark: In SC it's straight forward, but LC communities are not interested in even a four laned SR 46. You'd be looking at a total rebuild, and even six laning doesn't work. It blows up well before the design year.

10/20/2008 10:11 PM

Jerry noted FDOT did have a study on tap at one point for six laning SR 46... There's a tremendous demand for traffic paralleling 441. The OCEA looked at an alternate route between 441 and 46 ... you're picking up some demand from 441 on 46 ... also Mt. Plymouth ...

Carey: Look at 436 and 434, it's six laned and that traffic looks pretty good. Why not look at doing a better job of the 46 IC?

Jerry: The legislation was a limited access facility. To do something different you would have to get in line at Metroplan behind a lot of other projects. Right now there's no support for that.

Carey: You have action by the previous SC board to be controlled access ...?

George: The real problem is with the environmental community in Lake County. The vision was to get rid of the road at grade, provide wide expanses for critter movement.

Carey: At some point we're going to have to pay more attention to people need than bear needs.

10/20/2008 10:10 PM

Jerry: The people who like bears also control the permits. The ability to get permits ... through state lands ...

Jerry: you'd also be whacking the Port of Sanford, that's a \$1 million check each year Comm. Carey asked what's next?

Mark: We recommend continuing to move forward with the preferred alternative to the public hearing.

Jerry: At the public hearing they will go through the history

Mark: We will discuss the alternative we looked at; all the material will be available.

Carey: We need to have a list of what we looked at and why it doesn't work.

Went over preferred alternative, noted tweaks made to address very community concerns.

Mark: We're not in Capri Cove, though not far enough away for their liking, not in Tall Trees. It'll be elevated, walls, some slopes...It will come down some at Wilson Elementary and then go back up over Wilson Road.

10/20/2008 10:09 PM Carey: Have you pushed it as far to the north as you can away from the Glades and Sylvan Lake?  
Mark: Yes, we got FDEP to agree to widening SR 46 corridor to the north.  
Discussion of elevations, frontage roads (one way), Glade View Dr. folks can go either east or west out of their entrance under bridge (no U turns)  
Carey: Does the rest of 46 need to be six laned? It's built out.  
Jerry: Need approval ... will probably be done in sections...  
Mark noted public hearing has slipped to Dec. possibly after first of the year. PIO noted issue with venues getting booked for holidays.

10/20/2008 10:08 PM Discussion of SCEA co-hosting public hearing so they don't have to turn around and do the same thing, invite the same people to another meeting on same material  
PIO noted stakeholders east of I-4 and northwest not aware this alternative was considered, had previously discussed need to reach out to these folks to let them know what's going on. They may want to come to the hearing.  
Carey: You can send a letter to the HOA's (northwest of I-4), the church would be opposed, can let the port know, Sid, Kelly and Tom (property owners). Mark said we could call them; also send a letter with PDF noting that we were asked to look at this

 Dear Chairman Carey (and Amy),  
 The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with each of the SCEA Board members to discuss our latest findings regarding the alignment alternative suggested by the WPCC. We would like to set up a meeting with each of you at your earliest convenience, and certainly prior to the Board's regularly scheduled public meeting in November.  
 Please provide several dates and timeframes that you would be available to meet with us. We greatly look forward to updating you on the alternative evaluation and to getting your further input.  
 I look forward to hearing from you at your earliest convenience.

Subject: Re: Wekiva Parkway - Alternative Alignment Proposed by WPCC  
Commissioner,

We are aware of the Yankee Lake facility and plans. Once we complete our preliminary assessments we intend to meet with County staff and review their concerns. In addition we think it would be appropriate to talk to the Port of Sanford and some of the Neighborhoods in the area.

After we coordinate with the stakeholders we will reach out to SCEA Board members.

Mark Callahan

8/12/2008	11:30 AM	<p>From: David.Lewis2@CH2M.com [mailto:David.Lewis2@CH2M.com] Sent: Tuesday, August 12, 2008 11:30 AM To: ALockhart@seminolecountyfl.gov Cc: jmccollum@seminolecountyfl.gov; George.Lovett@dot.state.fl.us; Brian.Stanger@dot.state.fl.us; Mark.Callahan@CH2M.com; mbrookssr417@cfl.rr.com Subject: Wekiva Parkway - Alternative Alignment Proposed by WPCC Amy: As requested by Commissioner Carey, attached are pdfs which depict our understanding of a proposed Wekiva Parkway alignment in Seminole County (i.e., Map G) suggested by the Wekiva Parkway Community Coalition (WPCC). This alignment concept work is preliminary as we are still developing and evaluating it, as well as preparing a traffic operations analysis. After completion of the preliminary analysis, we will meet with Seminole County staff to receive their input and suggestions. If so requested, we would then provide a presentation on our analysis of this WPCC alternative to the Seminole County Commissioners and/or Seminole County Expressway Authority Board. Please let me know if there are any questions. Dave</p>
8/12/2008	11:10 AM	<p>PIO called Amy/Comm. Carey's office 407-665-7209 and asked if she got my MSG from yesterday evening about the concept requested? She said yes, understand its being worked on and we will forward as soon as it's ready. PIO clarified that we're waiting for FDOT to bless it and will pass it on. She said that's fine and thanks.</p>
8/12/2008	9:40 AM	<p>From: Carey, Brenda To: Lewis, David/ORL; Lockhart, Amy Cc: McCollum, Jerry ; George.Lovett@dot.state.fl.us ; Brian.Stanger@dot.state.fl.us ; Callahan, Mark/ORL; mbrookssr417@cfl.rr.com Sent: Tue Aug 12 09:40:23 2008 Subject: RE: Wekiva Parkway - Alternative Alignment Proposed by WPCC You may or may not be aware that Seminole County is currently trying to obtain a permit from the SJRWMD to expand the Yankee Lake facility. Please check with John Cirello 407-665-2003) in Environmental services to see how this would conflict with that project. Thanks! Commissioner Brenda Carey Seminole County Government</p>
8/11/2008	6:14 PM	<p>PIO called Amy/Comm. Carey 407-665-7209, left detailed MSG re: alternative concept Comm. Carey requested. Let her know I got with CH2m Hill, who noted analysis was not finished, but they would get concept to FDOT for their review, and as soon as DOT blesses it will get it to her as requested. PIO noted still looking at impact analysis, traffic, etc. left my number and asked her to call me with any questions.</p>

8/11/2008 4:42 PM Amy/SC Comm. Carey's Office called and said Comm. Carey had someone in her office and was asking if we were looking at a northern alternative? PIO noted we were evaluating the alternative G of the WPCC which goes into that area, is that what she's referring to? She said wasn't sure and would put the commissioner on the phone. Commissioner Carey asked what came out of the meeting at FDOT in July? PIO noted we talked through the various alternatives that the WPCC has suggested and together whittled down to alternative G as the one with most promise. She said so there was more than one alternative? PIO said yes, there were several, the same ones they presented at the SCEA Board meeting. PIO noted CH2m Hill has been doing a closer evaluation of that, running traffic, etc. She asked who was paying for the evaluation? PIO noted FDOT is developing that portion of the project and authorized the evaluation. She asked if the alternative went through the forest? "If so, the FDEP is not going to go for that. And if it goes up to the river, there are going to be problems with that as well." PIO apologized that I couldn't put my hands on the alternative as we were speaking ... She said she's seen what's on their web site, but it's taken from out of space so you can't see anything. She requested a copy of the alternative that she could actually see where it would go. PIO said I'd get with CH2m Hill on that and get back to her tomorrow.

Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC database entries  
Good afternoon, Commissioner Carey, Please forgive the previous empty email. I was informed by Brian Stanger of FDOT that you wished to have a copy of the correspondence between the Wekiva Parkway PD&E Study Team and the Wekiva Parkway Community Coalition. I have attached the project database entries for Dan Macaluso, who as you

know is the president of the Sylvan Lake Reserve HOA as well as the leader of the WPCC. I also have attached the database entries for Charlie Shaw, another key member of both groups.

We have included the interaction back to April 30, when we met with the Sylvan Lake Reserve HOA board and were "officially" notified about the formation of the WPCC and their activities to date. You will notice some overlap, as the two gentlemen often copied each other on their correspondence, though not always. Certainly Dan Macaluso's history report contains the majority of our interactions with the WPCC.

I hope you find this helpful. Please feel free to call or email with any questions or if you need additional information.

Mary Brooks

5/9/2008	2:28 PM	PIO returned call to Amy/Comm. Carey's office 407-665-7209 and said I got her MSG and would call the gentleman back. She said she thought about calling him and might have been able to answer his questions, but didn't want to raise any issues or put any incorrect info out there. PIO said that's fine and not a problem, had been in meetings and will call him when I'm back in the office. She said thanks.
5/9/2008	2:01 PM	Amy Lockhart/Chairman Brenda Carey's office MSG Gary Johnson gave me your name as the best person to help answer some questions from a citizen. Wondering if you could give Joe Pollock a call? He lives in Lake Forest, missed the meeting and kind of thought everything was quieted and then heard about eh latest meeting with the SCEA on Tuesday and is looking for updated information. I'm really not well versed enough to answer his questions. His number is 407-230-8653. My number here at the office is 407-665-7209. I really appreciate if you can help me out with that.
5/6/2008	4:00 PM	<p>4 p.m. SCEA Board meeting.</p> <p>AUTHORITY BOARD MEMBERS:</p> <ul style="list-style-type: none"><li>. Bob Dallari, Chairman - County Commissioner</li><li>. Michael McLean, Vice Chairman - County Commissioner</li><li>. Brenda Carey - County Commissioner</li><li>. Dick Van Der Weide - County Commissioner</li><li>. Carlton Henley - County Commissioner</li><li>. Gary L. Brender - Lake Mary City Commissioner</li><li>. Art Woodruff - Sanford City Commissioner</li></ul> <p>Approximately 70-90 people in audience.</p> <p>Keith Landry/Fox 35 asked what's happening today? when would construction start? What's next? Isn't there limited funding? Aren't there supposed to be a limited number of interchanges to minimize development in environmentally sensitive area?</p> <p>WESH Ch. 2 also attended meeting. Did not see WMFE.</p> <p>Mark went over PowerPoint including purpose and need: Need a safer facility on SR 46. Given the nature of the corridor around the river, the project is to enhance wildlife habitat connectivity and reduce wildlife-vehicle conflicts.</p>
5/6/2008	3:58 PM	He went over the Preferred alternative slide including CR 46 realignment in Lake County. He noted for Seminole County, we're recommending one-way access roads along corridor on SR 46, then to the east the Wekiva Parkway drops south and east to tie into SR 417 at I-4. Also six laning of SR 46 from that point also. He went over the typical sections and activities since the last SCEA meeting Nov. 13, 2007: Wekiva River Basin Commission, finalizing documents (will be added to web site), coordination with

state agencies and FHWA, FDEP, FFWC with regard to impacts to park lands. He noted there was a new area engineer with FHWA in this district and we have briefed him on the project. Community meetings: Sylvan Glades, and WP community coalition (including Tall Trees and Capri Cove and others) and they clearly have some concerns with regard to the preferred alternative. He noted the public hearing will tend to slip into late summer; we're still trying to get to public hearing ASAP. Will keep your staff informed.

5/6/2008	3:57 PM	Board Chairman & SC Commissioner Bob Dallari: How many hearings? Mark noted one official hearing but it will be held each in Lake, Seminole and Orange counties. The entire project will be available for review at every meeting but we will be focusing on the appropriate county at the time. Dallari: So there will be no official decision until after public hearing? Mark said after the hearing there will be a formal comment period for 10 days. He noted we have to go through the comments. We may have changes we need to make based on input, and then revise the documents and coordinate with SCEA as well as Lake and Orange county representatives, then go to FHWA. There will be three or four months after the public hearings in which a lot of that will be going on.
5/6/2008	3:56 PM	SC Commissioner Brenda Carey: On the study schedule . at the end of this year, it's been four years we've been studying this corridor. ... It's a process and it seems we can never get it moving fast enough to keep up with the demands and needs. Mark: Some accuse me of trying to stretch it out to retirement, but that's not the case. There are processes that have to be carefully followed with FHWA, they deliberate with FDOT. But for the historic issues we'd be much further along in terms of looking at the hearings. Carey: In the transportation bill being looked at, is there any language in there to help this project? Mark: At this point I'm not aware of any (Mike Snyder/OCEA shook his head 'no'). Carey said she'd be in Washington next week. was wondering if there was something she needed to take up on it while she was there.
5/6/2008	3:55 PM	SC Commissioner Michael McLean: Obviously some folks have some interest in having flexibility in the preferred. I would like you to clarify the process and how much flexibility is in the process. You'll be taking comments; potentially there could be alternatives to what we're looking at today? Mark: Correct, . these projects are not really set in stone until construction is done - things happen. We continue to work with all the stakeholders, and will look at any further ideas that might be out there to make this an even better project Carey: An idea came up in the commission ... it was the idea of pushing farther north onto state and county owned lands. I know at that time when you reported back to us, our environmental friends weren't very interested in looking at that as an option. Any discussion of being able to use that property?
5/6/2008	3:53 PM	Mark: We've been to approx. 200 meetings. We have visited with some of the neighborhoods here to day -- Tall Trees, Capri Cove - and continue to talk to these folks. . I can assure you we make ourselves available within a day or two or even less to respond to people's concerns . in fact the public involvement actually extends back to 2002. Van Der Weide: people telling me is the environmental community has priority and what the residents wants is secondary. Mark:

We've looked at each of these issues: the environmental, social and cultural. I will say the WPPA itself provided specific law and language that we must follow that require certain environmental protections, specifically in Lake County. We have to balance all of these impacts. Van Der Weide: . so there has been involvement? You're satisfied? I wasn't on task force, we had one or two members. it's a state project right? Mclean: Whatever alignment that's taken up, one thing that is important is to protect whatever residents and businesses that happen to be near the alignment. Some sort of barrier for noise and appropriate landscaping for aesthetic purposes so it's something as pleasing as we can get to. Would it be helpful for this authority to specify specifics to work from? Has that come up in your community meetings?

5/6/2008 3:52 PM Mark: just completed noise report and that's on the web site. We follow FHWA and FDOT for those studies. 12 oaks RV resort area meets criteria for sound wall. Other areas don't meet criteria, mainly the economic feasibility tests. That has been looked at. In terms of aesthetics, FDOT is committed to do what they can do. Won't say we have a design or any plan at this point. Mclean: when you say economic feasibility, are we saying there could be noise that could be disturbing, but the dollars don't add up? Mark said there clearly are noise impacts in SC, when we look at those we take those receptors, homes, and look at cost of a wall that would be required to reduce the noise by 5 db or greater. Of the homes benefited, take the cost of the wall (divided by) the number of homes benefited and if the number is higher than \$40k+ then it does not qualify.

5/6/2008 3:51 PM McLean: Regardless of where the alignment ends up we want to see whatever protections possible for our residents and businesses, .. People will have to deal with something different than what they bought into and what they expected. We ask that you stretch that economic case as far as possible Sanford Commissioner Art Woodruff: After the hearings what will this board be asked to do? Mark said after hearings we would look at comments, respond to most of the major comments and to all within a period, then come to this board and present input, and our thoughts as relates to input, potential changes of alignment or characteristics of the project. And seek you direction, whether that's good or you want something else. Dallari: this board will be making the decision on the alignment Mark said not today, I'm not asking Woodruff: does this board have any ability to oppose an additional requirements regarding noise or landscaping? Mark: I'm confident FDOT would do everything they could to work with you. ??FDOT: we can make that commitment

5/6/2008 3:50 PM Carey: we've had a number of requests from different residential developments. sound walls and some of those types of things. . DOT has been pretty specific about what their criteria is. My experience has been they're not real flexible about that because it gets to a point where it doesn't make any sense, or it doesn't do what it's supposed to do. I live mile from I-4 and depending on how the wind blows some nights its quiet and some night I hear it as plain as day. For the benefit of traveling public and all of us, we some times have to make those tough choices, looking forward to hearings so we can hear all the public testimony.

5/6/2008 3:49 PM Lake Mary Commissioner Gary Brender: Mark, go back in history.. The concern was brought up in a coalition meeting regarding early resolutions from the task force and the placement of the road. That it wouldn't be a toll road ... in 1998 and then in 2001. Can you give us history on the morphing of this project and how we came to this point where we are now where the preferred brings us southeast to hook up to 417, and the importance of the east-west traffic flows?

5/6/2008 3:48 PM Mark: The first significant study done in late 80s, in SC followed old RR line, where the trail is now, would come into I-4 where 417 is today. Several things happened . The Department had laws that allowed them to reserve ROW and those were found to be unconstitutional, so state purchased pieces of property where alignment went through. Western beltway was pulled off the long range transportation plan, .. About mid-90s or about 2000, Congressman Keller said we need to think about whether we want to complete the beltway. SR 46 traffic was increasing, safety was deteriorating, and that led to considering possibility again a beltway.

5/6/2008 3:47 PM OCEA was doing separate project to go into Lake County of the Western Beltway. then Gov. Jeb Bush in 2002 created Wekiva Basin Area Task Force, which convened in 2002. I believe SC Comm. Daryl McLain was on the task force. Seminole County passed a resolution indicating they didn't want expressway in SC, should go into Volusia County. However task force deliberations continued and we wound up with a corridor not unlike what we have today. The initial legislation failed because local governments weren't involved.

5/6/2008 3:46 PM In 2003 Gov. Bush said let's have a coordinating committee and get everyone involved. In 2004 they issued the final report establishing a specific corridor. WPPA was developed with requirements relating to road and other issues, comp plan, septic tanks, and it established the corridor. That law is the starting point for this study, as well as other things in the law such as the acquisition of conservation land and where interchanges can go. Carey: I think was an action that this commission or the SCEA took that said they wanted a limited access highway.?

5/6/2008 3:45 PM McCollum: We asked for controlled access; limited was more the I-4. The board asked for controlled access, which is what Mark has presented today. The other thing Mark mentioned is the corridor that was looked at in the 2004 recommendation went north to the river to Lake Monroe and down to SR 417, so that was the swath being looked at.. Brender: I wanted to make sure people are aware that this thing has changed with traffic counts, with the arrival of the actual study. The whole intent is to build a road that is efficient and benefits the motoring public. We don't want to put it where it is not going to do any good.. As I understand it the traffic counts and east-west flow was established fairly early on. (End of presentation)

Subject: SR 429 - Wekiva Parkway

Madame Chairman Carey,

As requested, below you will find notes from last night's meeting between members of the Wekiva Parkway PD&E Study team and the Wekiva Parkway Community Coalition. I hope you find this helpful. Please feel free to call or email me with any questions.

To summarize some of their main points, of which you are no doubt aware:

- 1) Coalition members stated they feel their concerns have not been properly relayed by study team members to commissioners.
- 2) They feel alternatives other than the "preferred" should be re-evaluated. (We have committed to taking another look at their suggested alternatives and get back to them).
- 3) They feel their community and others, along with the school and church, should receive noise abatement and challenge the noise study findings. (We stated that at subsequent meetings we would have FDOT's noise expert also attend).
- 4) They feel the roadway should have a parkway feel with buffers, and are opposed to vertical walls facing their communities. (We noted not having walls means taking more homes, etc.)
- 5) A number of the residents oppose tolling the parkway along the SR 46 corridor. (We noted FDOT does not have the funding for this project and various options, including possibly tolls, are being considered.)

5/1/2008

4:47 PM

4-30-08 630 p.m. Dan Macaluso/Sylvan Lake Reserve HOA president and his wife Vanessa hosted a meeting of the "Wekiva Parkway Community Coalition" (WPCC), with about 15 people including Julian Stein/Tall Trees HOA president, Harold Shubert/Tall Trees, Blaine Henry/Capri Cove, Sid Bennett/Twelve Oaks RV Resort; Henry Dean, Charlie Shaw, Tony Cerino, Gizelle Weber, Linda Orman and several others from Sylvan Lake Reserve. Study team attendees were Brian Stanger of FDOT, Mark Callahan of CH2m Hill and Mary Brooks, PIO, of QCA.

Everyone introduced themselves and discussed the pending SCEA meeting on Tuesday.

Blaine: Our concern is that our voices be heard ... We've been making our concerned know to the county commissioners.

Discussion that Wekiva Parkway public hearings coming up in July-August, with details to be determined. PIO noted we would let them know and are working on the next newsletter now.

Charlie: I have a problem with the map being labeled "preferred alternative" - who preferred this? We did not. Maybe it's CH2m Hill's "preferred..." This hasn't been approved yet, right?

5/1/2008

4:46 PM

Mark noted that FDOT and OOCEA have given input and direction to move forward with the preferred alternative to public hearings, and also the SCEA has acknowledged this and said it's okay to move forward with this alternative to the public hearings. Question about SCEA having to approve the alignment for the project to go forward? Mark said his understanding of the enabling legislation is that they have jurisdiction in this county, though he acknowledged he is not a lawyer and there is some room for interpretation there.

Mark noted the terminology "preferred alternative" has been used for years in this process and stems from ... federal legislation.

Blaine: What is the value of the CH2m Hill contract? Mark said we just did an amendment to the contract, so not sure of the exact amount, but believes it's \$3-4 million.

Sid: If this is so preliminary, why would the CEO of an appraisal firm out of Tallahassee with your same maps be coming to my property about this? He said he worked for FDOT. He took issue with the fact that the study team members initially were not sure what he was asking.)

Brian/FDOT noted the Department has to figure out the value of impacts and the value of affected properties. That's part of the process.

Mark noted there was a firm in Volusia County that was asked to develop preliminary ROW costs, which are used in our study matrices, and are used as part of the assessments, and they look at a series of alternatives. Mark noted the estimates have been done three to four times over the years.

5/1/2008 4:45 PM

Sid: This was the first appraiser to come onto his property. Mark noted they don't always have to go onto the property, especially very early on.

Harold: When is the first phase of the extension taking place?

Mark said we hope to go to the public hearings this summer. We would make whatever changes as a result of the public hearings, update the documents and seek approvals from local officials including Seminole County. ... After the study the subsequent phases would be design ROW acquisition and construction. There is some OOCEA money for design or all of design and some money for ROW (but not for all of it). FDOT has \$40 million for ROW in Lake County and I understand that could be moved around ... So I can't tell you when the first construction will start. There are a lot of discussions about funding options.

Question: Is it going to be extended to International Parkway first? Mark said I would expect the Orange County portion to begin construction first ... but those discussion are still out there.

Brian noted there is an interim project to connect SR 417 with International Parkway. Mark said that has been approved and design has started. ... As we phase in the Wekiva Parkway, that movement would be removed. We will have to rebuild the interchange.

Tony: With regard to the noise study, certain areas exceed the noise criteria but the only recommendation for abatement is in front of Twelve Oaks...?

Blaine: -- They only looked at SR 46.

Mark said we look at noise on all of the corridor. ... If there's a noise impact, we're required to look at abatement. There are something like 27 factors, but the most impact is the economic measure of a noise wall ... the cost-benefit feasibility ... believe that figure is \$42,000 ... that was established by FDOT and federal guidelines. Mark pointed out noise concept on laptop and noted anything within the line is considered a noise impact.

5/1/2008 4:44 PM

Tony: So what do we do, we're looking for a strong recommendation of further remediation. You've got impacts with homes, a school and a church here?

Brian/FDOT said make sure your voice is heard. ... For us to deviate from the criteria, it would need to go higher up...

Charlie: A parkway look and feel is required by the legislation, so not walls but slopes and buffers...

Mark said the definition of a parkway is up to interpretation. We're trying to minimize impacts to homes.

Brian said if we don't go vertical (with walls) we take a lot more homes. That's part of the process: the economics, the social impacts and the environment. It's one of those things handed down to us and we have to work with what we have.

Blaine: The environmental is No. 1 - we're bears too. We live here.

Dan: Is what we have the latest (alternative map)? Have you done any tweaking? Mark

said I don't believe so.

Dan asked where would the tolls go in Seminole County? Mark said at this point there are no tolls in Seminole County or Lake County.

Brian/FDOT said we don't have the money for this, so any new roads could be tolled ... there are many options: P3, federal funds... discussion that the Orange County section will definitely be tolled (Expressway Authority).

5/1/2008 4:43 PM

A number of residents took issue with possible tolling of the parkway on the SR 46 corridor.

Resident stated: In Orange County it's new geography, but in Seminole County you're looking at SR 46 corridor, which was free.

Dan: So there are no new options?

Brian said we're focusing on this because we've evaluated the others.

Question: What is the problem with going further north? Mark said we had an alternative that went up that way, but we had more homes, conservation lands, there were floodplain impacts and there was a concern about tying into the river. He said Seminole County was not comfortable ... imagine trying to create an interchange with I-4 at Lake Monroe... Several residents made comments about bridging the conservation and floodplains. Mark noted issue of expense and other issues.

Julian: We've been meeting with the commissioners and there's a gap between what they're telling us and what you're telling us is different. They said Volusia County alternative they're not against it but they don't know if it can be done. ... In 1992 (Mark corrected him it was 2002) the commissioners said there would be no expressway in Seminole County, and now in 2007 ...

5/1/2008 4:42 PM

Blaine: -- My research shows you get \$20 million from Seminole County

Mark said Ch2m Hill has a contract for environmental services program with Seminole County, but that is not related to the Wekiva Parkway.

Mark said in 2002 the Wekiva Basin Area Task Force was created by Gov. Bush, was made up of politicians and other stakeholders ... at that time Seminole County wanted it to go into Volusia County; the Task Force felt differently. Legislation from the Task Force didn't pass due to a lack of some cities being represented. So the Governor created the Wekiva River Basin Coordinating Committee to include more of those folks, and they got different input from Seminole County, they voted for the recommendation including an alignment in Seminole County. That eventually led to the Wekiva Parkway and Protection Act. Which was signed in June 2004; that established where we could look (study area).

Blaine: The chain of communications has been one way from SCEA to the people and not the other way. We're very concerned you're not listening to our environmental concerns. We know there are traffic problems... but it needs to be attuned to the people it's passing. I don't feel we're being listened to to preserve the beauty of our communities.

Charlie: ... One of the commissioners said it's going to turn your rural area into an urban area and separate neighborhoods, just like the East-West Expressway.

5/1/2008 4:41 PM

Mark: We're willing to look at this again ... but this will still be the preferred alternative moving forward (pointing to the board).

Resident stated: We purchased homes in 1998-99 knowing no expressway would be passing by - you have to appreciate that.

Charlie mentioned a news story about SC Commissioner not allowing it in the county, but there was nothing about the 2002 committees. Mark said there were subsequent news articles.

Blaine: We're trying to work with you. We recognize there's a transportation problem ...

Mark: If Seminole County gives direction to not have an expressway or look at different

alternatives, we would do that.

Woman asked if all of Dan's and the coalition's hard work was for nothing? What can we do?

Mark: Working with local officials is the best thing you can do, and that's what we've always said at the community meetings.

Julian: What is the responsibility of the developer? The builder had to have known this. He bought up the land and built homes. I bought and no one ever discussed this ... he was allowed to make money on all of these homes...

5/1/2008 4:40 PM

Mark noted with the 1989 study it was going down the railroad corridor. Then the MPO removed it off the long-range plan. So from the mid-1990s until the Task Force ... even then there were no official plans. There was nothing on the map until this study. I don't know the real estate laws and ethics. If there had been an approved alignment I believe they have to disclose.

Blaine: If you can't change the alignment through the Wekiva Basin you can change how you interface. We're saying please don't blight our neighborhoods.

Vanessa: If Seminole County says 'No go,' what is plan B? What would you look at then?

Mark said I don't know. At this point our direction is to move forward with the preferred alternative. If that were taken off the table, I suppose we'd go back and look at some of the hundreds of other alternatives we looked at in the past.

Question: What is your primary priority?

Mark said the primary priority is to meet the purpose and need, which is safety and addressing the regional traffic needs. We looked at what would happen if we tied into SR 46 ... We found a large amount of traffic wanted to go from SR 417 to west Seminole and Lake Counties. The SR 417 alternative is the best to meet that travel demand.

Mark noted there are issues with spacing between the interchanges ...desire to have an expressway interstate facility.

5/1/2008 4:39 PM

Question: When would SR 46 be widened? Mark said right now there is nothing planned on this part of SR 46 but something being looked at east of I-4.

Mark said we looked at International Parkway, and it's too tight. The geometry doesn't work to meet the design criteria, which is a safety issue.

Dan: When you look at International Parkway, what if you flatten it out? Lower the speeds?

Question: Why can't you bring SR 417 up east of I-4 to SR 46?

Brian/FDOT: Let us take a look at the alternatives you've suggested.

Mark: We're willing to do that but this is the preferred alternative and that's where we're headed to the public hearings.

Dan gave an overview of the WPCC and their activities. He noted they have met with most of the county commissioners and they're meeting with Art Woodruff tomorrow. He gave us a copy of the packet with their concerns and have explained their suggested alternatives to them. They also inform the commissioners of who their stakeholders are and where and show them the petition.

5/1/2008 4:38 PM

Dan stated from what we've seen between November 2002 and January/February 2003 is when the study corridor got redefined. He said they have talked to Comm. McLain; he's the one who said you're not going to bulldoze through the county.

On Dec. 10, 2002 resolution R-188 opposing the toll route or expressway in Seminole passed. Everyone thought it's not going to go through here. But a change occurred in five to six weeks, but nothing said it changed.

Mark noted there were several newspaper articles subsequent to that.

Dan: These are what we know (pointing to the Task Force and WRBCC reports)...

Charlie: Only two commissioners now were around during the task force...

Dan: I hope when the commissioners ask you to go back and revisit this that you would.

Brian/FDOT: If they ask us to look at something we will.  
Tony asked what happens with the PIO's notes from tonight? PIO noted they go to the study team and are discussed at the progress meetings, and Comm. Carey has asked for a recap of tonight's meeting.  
Charlie explained the petition effort and that they have a study comment form that people can fill out that will go to the SCEA members.  
Question: How many consultants are working on this? Mark went through the list of consultants for traffic, geotech, historical/archeological, public involvement, ROW estimates, Expressway Authority's peer review consultant (PBS&J)...

5/1/2008 4:37 PM Question: Is there another group that looks at this? Brian noted we went through a selective process...  
Question: Can FDOT get another group to look at this also?  
Brian noted FDOT is very small and they depend on consultant support. They're the experts in these areas.  
Blaine: How do you find the list of consultants? Mark said he can give a copy of his contract which shows those on his team.  
Charlie requested the comments to the draft reports from FDOT/OOCEA and their consultants. Mark noted it's several file cabinets and boards like these. It's voluminous; you would need to tell us what you wanted, and probably come in and look at it.  
Charlie asked what was the scope of the comments? Mark said there are specific formats that have to be followed. The comments are an issue here or there, did you look at this or that. The comments won't generally be "you should move the alignment..."

5/1/2008 4:36 PM Tony: Is there any third party evaluation of the noise study? Mark said Bill, the FDOT noise expert, went through our material extensively. It would be best if we have another meeting that Bill attend.  
Sid: You said we're not in the design phase yet and we don't know when we will be?  
Mark said changes can be made in the design phase. He said design could start right after the study. He reiterated the funding shortfall and challenges.  
After further discussion about the likely technical nature of the draft comments, Charlie and Dan said they would not likely find them useful. The meeting broke up into individual discussion.

Subject: SR 429 - Wekiva Parkway PD&E Study - Wekiva Parkway Community Coalition request

Good afternoon Chairman Carey and Commissioner Dallari,  
I wanted to make you aware that we have been requested to meet with some Sylvan Lake Reserve HOA board members as well as other members of the "Wekiva Parkway Community Coalition," which we are told also consists of other area HOA members. Mark Callahan of Ch2m Hill, Brian Stanger of FDOT and I are meeting with them this evening, Wed., at 630 p.m. at the home of Dan Macaluso, Sylvan Lake Reserve HOA president, at 6675 Sylvan Woods Drive, Sanford. They have asked us to review and comment on additional alternatives they are proposing (though we understand at least some of these alternatives have already been evaluated).  
Please let me know if you have any questions, or if you plan to attend so that we can wait for you. Thank you.  
Mary Brooks

Subject: SR 429 - Wekiva Parkway PD&E Study - Neighborhood Coalition against SR 417 Alternative  
Good morning Chairman Carey and Amy,  
I left a voicemail in your office also. We wanted you to be aware that during a recent Wekiva Parkway presentation to the Sylvan Lake Reserve HOA, we were informed that

HOA, along with those for Capri Cove, Tall Trees and Berington, have formed a coalition to oppose the proposed SR 417 connection of the Wekiva Parkway to Interstate 4. Dan Macaluso with Sylvan Lake Reserve said they planned to get in touch with you to meet. We wanted to be sure you were aware of this neighborhood movement, and to provide you with any information beforehand that might be helpful. We also, of course, are willing to join you in any meeting with the coalition, should you so desire. Please let me know if we can assist you further in this matter. Thank you.  
Mary Brooks

1/24/2008 10:15 AM PIO called Amy Lockhart/SC Chairman Brenda Carey's aide (407) 665-7209 alockhart@seminolecountyfl.gov <mailto:alockhart@seminolecountyfl.gov> and left detailed MSG about recent sylvan lake reserve HOA presentation and their coalition formed with Capri Cove, Tall Trees and Berington to oppose the SR 417 alternative to connect to I-4. PIO noted HOA reps said they planned to get with Chairman, if they haven't contacted her already, and wanted to give her a heads up and provide any information in advance that might be helpful. Please call me and I will also send an email to this effect.

Greetings All,  
I hope the New Year is treating you well. The SR 429 Wekiva Parkway PD&E Study team wanted to inform you that we have been requested to present on the project at the Sylvan Lake Reserve annual HOA meeting at the SC Sports Complex at Sylvan Lake Park on Jan. 17 at 7 p.m., as noted below. Please let me know if you would like to attend also, or if you have any questions or need additional information. I look forward to hearing from you.  
Mary Brooks

Hello Mary,  
The meeting on January 17th is our Annual Community HOA meeting. It is at 7:00 pm at Sylvan Lake Park, main building in the large meeting room. You attended our annual meeting last year and I believe your 15 - 20 minute update and summary was very well done. We will have a projector and laptop there for your use, if needed.

We would like to thank you again for your participation in this matter and look forward to seeing you there. If you have any questions or need further assistance, please do not hesitate to contact me.

Respectfully,

Dan Macaluso

Sylvan Lake Reserve (Glades at Sylvan Lake), HOA President

7/28/2008	9:12 AM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Mon 7/28/2008 9:12 AM To: 'Carpenter, Mary Lu W.' Cc: 'Mighk Wilson'; Deana Leffler; kci@kbird.com; president@floridafreewheelers.com; coachunger@aol.com Subject: RE: Wekiva Parkway Hello Mary Lu, It is the intention of the Florida Department of Transportation and the Expressway Authority, which are jointly developing the State Road 429 Wekiva Parkway, to facilitate the crossing or passing of trails being developed by the various counties and other entities. This includes planning for some sort of biker-pedestrian facility in conjunction with the new bridge over the Wekiva River. The recommendations for the Preferred Alignment and other project information can be found on the Expressway Authority Web site at < <a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx</a> > . We are currently looking at formal public hearings in each of the three counties in late September-October. We hope to conclude the project Development and Environment PD&E) Study with agency approvals in early 2009. As you know this project is not fully funded, so the scheduling of subsequent phases - final design, right of way acquisition, permitting and construction - remains somewhat in flux. For the Orange County portion, the Expressway Authority has funding for final design and some right of way acquisition. The OCEA anticipates starting design on its portion in late summer-fall 2009.
7/28/2008	9:11 AM	The Florida Department of Transportation is developing the Lake and Seminole County portions and does not have money programmed for design, but has some (but by no means all) of the money needed for property acquisition. As it stands now, it could be 2012-2015 to see construction begin in Orange County, with an even longer period for the other work to move to construction. There is a concerted effort on the part of the various agencies to come up with a financing plan to accelerate that schedule, and we hope to hear something out of those discussions in the coming weeks. I hope this helps. We also will add you to the project database so that you are kept informed of developments on this project. Mary Brooks

3/3/2008	2:13 PM	<p>PIO returned call to Pam Carter, let her know I don't have oversized copies of the maps. Would have to go and get one made at Kinko's or Office Max. PIO noted most people just download the files and get the maps made whatever size they want, which is faster. She said she wanted to check with us first, looking for a very big map to show a large group of people. PIO noted Kinko's can make them whatever size you want. She said I know ch2m hill is doing the study, but what about the Orange County portion, who's doing that? PIO noted ch2m hill doing it for the entire corridor. She said she didn't know if they would have the maps. PIO reiterated most people just get whatever size they want made. PIO noted we'd have to charge her whatever Kinko's did to make the map. She said maybe she'd do that also then.</p> <p>PIO asked if she had any other questions about the project? She said she pulled a couple inches of info off the web site, said the web site was a gold mine. She really appreciated all of the information she was able to get there. PIO said I'm glad she found the site helpful. She said they're preparing for this meeting, so she may have other questions as they go along. PIO said don't hesitate to get in touch with me if she does. She said she would and thanks for calling back so quickly.</p>

5/1/2008	8:36 AM	<p>Study Orange, Lake and Seminole Counties Comment Form Date: May 1, 2008</p> <p>Name: Anthony A Cerino, Jr</p> <p>Address: 667 Montreal Lane</p> <p>City: Sanford State: FL Zip Code: 32771</p> <p>Please use this Comment Form to express your opinions about the Wekiva Parkway PD&amp;E Study. You can email, fax, or mail this form to the email address, fax number, or postal address shown below. By clicking on the "Submit by Email" button, your comments will also be sent to members of the Seminole County Expressway Authority.</p>
5/1/2008	8:35 AM	<p>Mary, please note: I tried to use the electronic form set up on the <a href="http://www.sc-wppc/">www.sc-wppc/</a> web site, but was unsure if the email was submitted via the site's email agent. Therefore, for certainty, I am sending this form via "normal" email to ensure you receive it. Also, thank you for attending the meeting last night and your continued professionalism. .</p> <p>Comments:</p> <p>Based on document reviews and briefings on the Wekiva Parkway preferred alternative, as it currently exists and is planned from the Wekiva River to the I-4 intersection, it is my belief that the routing is not in compliance with the PD&amp;E study and guidelines.</p>
5/1/2008	8:34 AM	<p>In order to minimize any condemnation of property, a routing was selected that causes the most disruption to businesses, churches, recreation and residential communities. The routing exists in very close proximity to occupied properties, with very little in the way of natural boundaries. This is in clear violation to the "parkway" or "park like" setting as outlined in the PD&amp;E of the planned road. Furthermore, the noise studies demonstrate that noise is above recommended levels at multiple points. However, due to the economic guidelines, remediation or mitigation is not recommended for many locations. The level of added noise will further compromise the existing environment.</p> <p>The 10 lane roadway bed will be, generally, in excess of 260 feet. wide. While the 6 lane roadbed at the bend (the section from Rock Church to the I-4 intersection) is expected to be less, it is still an impressive footprint in a semi-rural community. Compounding the width of the roadbed, is the fact that much of the bed, from the Wekiva to I-4, will be elevated. This is another impact to the area. The net affect will be a very wide, elevated roadbed, towering over the existing landscape, causing more noise, and light intrusion from the passing traffic at night.</p>
5/1/2008	8:33 AM	<p>The current design attempts to place this all in a very narrow footprint. The consultants have said, quite proudly, that they are "threading the needle". The design seems to have little concern for the amount of human fabric frayed by the design. The communities affected currently have a quality of life which will be severely impacted by this routing. The design, in its zeal to fulfill an objective, disrespects the desires of the community. While quality of life is important, and will certainly be eroded, home values, already depressed, will certainly plummet, as the blight of the roadway is added to our front doors</p> <p>The SCEA should understand in effect the roadway is akin to docking a number of super</p>

tankers, bow to stern, from the Wekiva to I-4. Clearly there have to be other, more creative, less disruptive options to fulfill the objective of improving traffic flow.

5/1/2008 8:32 AM The SCEA, as a representative of the community, needs to understand the amount of impact and amount of voter concern and frustration as this roadway design proceeds. Many of the people who purchased property in the affected area did so when the expected and committed, Parkway roadbed, was in an area removed from the now targeted location. This drives another sense of abandonment of community representation.

Subject: Stanton Ridge Homes

Good afternoon Mary,

As we were discussing on the phone today, I understand that the Expressway Authority has purchased the property, (Stanton Ridge) off of plymouth Sorrento Rd. I am very interested in purchasing and moving the Model home onto my property just several hundred feet to the north. I have been doing some research with a few home movers and orange county to make sure that this move is feasible as well as cost effective . I am wondering when and how this home will put out to bid. I have given my address to Debra Ketter with PBSJ and she informed me that the expressway would contact me when they are ready for these homes to move. Is this going to be weeks, Months, or years before this will happen? If I could get a time frame as to when this will happen, it would be very helpful to me with the planning. As you know, the purchase of the home is miner compared to the the moving and reset of the home.

Thank you so much for your help

David Cipollone  
Project Superintendent  
Cherry Hill Construction  
A Perini Comany  
Office #863-424-1071  
M# 863-227-2779

11/11/2008	1:23 PM	David Cippilone 863-424-1071 called and said he'd spoken to Deborah Keeter and was told Stanton Ridge had been purchased several weeks ago. He was interested in buying one of the model homes and wanted to know when that would go out for bid as surplus. PIO apologized, noted I was not involved in that process, but if he sent me an email, I would see what I could find out. he said he had my address and would do so.
7/3/2008	2:45 PM	David Cipilone 321-303-3600 called and noted we'd spoken a couple of months ago. He's on Plymouth Sorrento Road, and the Stanton Ridge development has the sign about OOCEA. He said he knows that's not our sign, but asked when we'd purchase the property? PIO noted there were initial discussions with developer at their request, but they wanted too much money so not purchasing it at this time. He said but the road is still going through there, right? PIO said correct, the preferred alignment has not changed. He asked when do you think they will buy the row? PIO noted we're still in study phase, working toward public hearings but probably pushed back to late September, documentation has to be authorized by FDOT, FHWA, etc. before hearings can be advertised. He said he knew we didn't have any money and it could be 5-10 years away. PIO noted that is correct, sorry I don't have much more to tell him at this point? He said that's okay, he will keep checking in.
3/7/2008	3:06 PM	PIO returned call to David Cipollone, who said he lives near Yothers Road. Said he saw the sign that we had bought that development that backs up to his property. PIO noted if he was referring to Stanton Ridge, we did not put up that sign and have not purchased that property. PIO noted the developer put up the sign and then approached us about buying them out. PIO noted we'd entered preliminary negotiations with them but don't own that yet, understand the appraisal came in too high. He said that was pretty bold of them to do that. PIO noted not our sign and not sure of their motivation. He said the couple of houses they have built in there are right against his property, how would he go

about buying one of those? PIO noted we don't own that yet, so he'd have to deal with the developer. He asked how would he go about it if the OCEA does buy it? PIO noted not sure, would have to have him get with the ROW folks on that if that happens. PIO said he's welcome to stay in touch on the project progress. He asked when did I think we'd be buying properties? PIO noted for OC portion, OCEA has funding for design, next step, and part of ROW acquisition but not all of it. Noted project not fully funded and that will determine schedule. PIO noted several agencies working on a financing plan now and hope to have info on that in a couple of months, then we can say more about the schedule. He said okay and thanks for the quick call back.

3/7/2008 3:04 PM David Cipollone called and left MSG I have questions concerning the future expressway north of 441. 321-303-3600 that's nights and weekends. During the day it's 863-227-2779 I'd appreciate it if you called me back. Thank you Mary.

5/23/2008	4:00 PM	Charles Clayton 407-622-0098 called asking who was doing the ROW for FDOT on Kennedy Boulevard? Someone in his office said they thought it was the county, but he said it was FDOT. PIO noted I'm not familiar with that project; I handled Wekiva Parkway and JLAE. PIO suggested they call FDOT in Deland and gave them the toll free number. They were thankful for the information.

I wanted to let you know that we have received your comment form. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. We are working to schedule formal public hearings and will send out a project newsletter with details and update the Expressway Authority web site (www.ocea.com) with this information once available.

Please feel free to email or call with questions or additional concerns.

Subject: RE: GIS layers for Wekiva Parkway  
Thanks David. The easiest way for us to deal with this is to provide you with an FTP site and please upload all the files for the parkway to it. We will then select what we need which will likely be most of it) to make sure our map accurately shows the proposed route as of this date. At this point we are using a file which was based on a scan so getting the original files will provide us with much better information. Two specific pieces of information we need are the precise locations of the proposed bridged sections (for wildlife passage) and the newest proposed route for the CR 46A extension. I hope these will be included.  
Here are the FTP site instructions:  
Below is the login information:  
ftp.pandionsystems.com <ftp://ftp.pandionsystems.com/>  
login: wekivariver  
password: rivers\_rule1  
Please let me know when you have been able to get the files uploaded. We will be happy to credit CH2M Hill - please let me know if this is needed.  
Thanks so much for you help

Subject: GIS layers for Wekiva Parkway  
Mary - here's the email you requested in our recent phone conversation.  
We need to have a map in the management plan for the Wekiva Wild and Scenic River that clearly shows the preferred alignment of the Wekiva Parkway together with the current proposal for the bridged sections and the new alignment for CR 46A. I understand this information, in the form of GIS layers that we can directly use in our mapping, is available from CH2M Hill. Please pass this message onto whomever at CH2M Hill can help us send have them send the files directly to Greg Forcey, our GIS specialist working on the maps (cc.ed on this message). We are trying to get these maps finished as soon as possible so if you can secure these GIS files for us by the middle of next week I would be very appreciative.  
Thanks so much.  
Pete  
Peter Colverson

8/8/2008 1:54 PM Peter Colverson/Pandion Systems called, said he's not sure who he spoke to a week or so ago, but he'd requested the GIS files for the Wekiva Parkway alternative for the management plan for the Wekiva Wild and Scenic River but hadn't gotten it. Think he'd spoken to someone at CH2m Hill but did not recall whom. PIO noted I did not recall the request. PIO noted I'm out of the office, but if he will shoot me an email with what he needs and the timeframe I will be happy to get with Ch2m Hill about it. He said he would do so and thanks.

9/23/2008 5:10 PM PIO called Sen. Constantine's office to run over his quote with him. Abigail said he was in a meeting. PIO asked if I could email to her? She said yes and she would get it to her.

Contact Brian Cooper  
Date Time Regarding  
3/13/2008 12:43 PM Brian Cooper 407-894-6932 called asking about Wekiva Parkway, was that actually going to happen or is it just something being looked at? PIO noted we're only in the study phase but strong push in state legislation and from leaders to finish beltway around metropolitan Orlando.  
He asked if the whole thing would be tolled? Where are the exits and toll plazas? PIO noted OC portion by OCEA will definitely be tolled. PIO noted Lake and Seminole portions by FDOT not tolled at this time, but in looking at how to finance road, tolls have been discussed for that portion also, noted FTE looking at project. PIO noted interchanges in OC at US 441, Kelly Park Road... he kept referring to odd references on a map and said he knew we had a number of alternatives being looked at. PIO asked if he was looking at the most recent map? what did it say? He read off something that seemed outdated. PIO walked him through links on OCEA web site to get to the recommendations for the preferred. PIO noted these are the only alternatives remaining and being brought forward for public hearing.  
He asked when this was likely to get built? PIO noted that will be more clear once funding determined, noted several agencies working on a financing plan now, expect to have something from them in a month or two, certainly by the public hearings in July. PIO noted at that time we'd have a better idea of schedule when we knew how to pay for it. PIO noted estimates now anywhere from 10-15 years to 5-8 years.  
He said he's looking at property in Sorrento, was interested in access points to the new roadway. He said he could see the interchanges on the maps and that helps very much. He said his only issue with the maps is that you can't see all of the street names, wish there were more of those, but this helps.  
PIO asked if he was on the project mailing list? He said no but would like to be: 103 Country Hill Dr., Longwood 32779, email briancooper@accord-insurance.com <mailto:briancooper@accord-insurance.com>  
He also asked if we'd started buying private property yet for the project? PIO noted no, we've purchased couple of conservation parcels required but haven't bought any other ROW.

Contact Jim Cozad  
Date Time Regarding  
4/17/2008 11:55 AM Jim Cozad called 407-897-3907 and said he had this number on the list to call about what's going on with the Wekiva. Is there something on the internet he can find rather than bothering someone? PIO said if he's at a computer I can walk him through the links. He said he was and that would be wonderful, he's getting older and not very good with the computer. PIO walked him through the links to the project page and maps. He said he's on SR 46 across from lake Markham Woods Road, has property over there on Yankee Lake but doesn't want to put anything there if we're just going to tear it out. He said the

map shows the road going right up to the lake. PIO suggested he enlarge the map to 150-200% and he would see there will still be land between the proposed retention pond and the lake. He asked how to do that, push the plus sign? PIO said correct. He again thanked me, noted he is not very good with the computer and said yes, he can see much better now.

4/17/2008 11:54 AM He said he was planning to put his access where the retention pond was. He also said there's a pond there now ... he said that is not going to leave him much space. PIO said if he wanted to remain on the property and his access was affected by us needing the property, we would have to address alternative access. He said you have been very helpful So many people in government don't want to help you; they just care about the paycheck PIO noted that's why I'm here, to make sure you get the right info. PIO asked if he wanted to be on the mailing list? He said he has tried in the past but doesn't make it on. He said he has to get info from his sister who lives next door. PIO took his info, noted we had not sent anything out in a while but were working now on a newsletter that we would send out about the hearings and the status of the study and he would receive that. He was very thankful for the assistance.3233 Raeford Road, Orlando 32806. Email jacozad@earthlink.net <mailto:jacozad@earthlink.net>

callahan@ch2m.com  
Subject: RE: Stanton Ridge, et al. v. OOCEA (document request)  
Malinda,  
Below is information on when various items were posted on the OOCEA web site. I did not  
have specific posting dates on some items, but did have submission dates to the OOCEA  
webmaster, and items were usually posted either the same day or within 1-2 days later.  
I've requested the electronic versions of the initial and viable alternatives from Ch2m Hill,  
which is conducting the PD&E Study for OOCEA and FDOT.  
Revised PD&E study area map submitted to webmaster 7-7-05.  
Updated study map submitted 9-5-05 (posted by 9-21-05).  
Initial alternatives workshops were held in Lake, Orange and Seminole counties Nov. 9-14,  
2005.  
Initial alternative overall map submitted to webmaster 10-17-05; posted 10-18-05.  
Latest initial alternatives & traffic comparisons submitted to webmaster 11-8-05; posted  
before or by 11-15-05.  
Link to Ch2m Hill FTP site with all initial alternatives workshop exhibits and comment form  
posted 11-11-05.  
Wekiva Parkway conservation parcel map posted on or about 11-7-05.  
Viable alternatives public workshops held late July-early August 2006 in all three counties.  
Viable alternatives posted 8-2-06.  
Preferred alternative presentation to Wekiva River Basin Commission posted 8-23-07.  
You've already been provided the date for posting of the recommended preferred  
alternatives (following the Oct. 2007 OOCEA Board meeting) by the current OOCEA  
webmaster, and can access those maps on the site.  
It is worth noting that the latest versions of the maps also were presented at dozens of  
city and county public meetings, and in meetings with HOA's and other community  
stakeholders throughout the life of the PD&E study.  
I hope this helps. More to come...

Subject: Stanton Ridge, et al. v. OOCEA (document request)  
Thank you for speaking with me over the phone regarding the document request our office received from Stanton Ridge's counsel. The purpose of obtaining the requested information is to respond to the discovery requests that were filed in the above-referenced lawsuit.  
The following are the two questions that we discussed over the phone:  
State the date on which each and every variation of the alignment map showing the portion of the Wekiva Parkway located within the city limits of the City of Apopka, Florida was initially posted on OOCEA's website and produce a copy of each such alignment map, indicating on or with each such document the date on which it was posted on OOCEA's website.  
State the name, business address, name of company, business telephone number and title of each person who participated in or attended on behalf of OOCEA a presentation on the Wekiva Parkway alignment made to the Apopka City Council on or about February 7, 2007  
Also identify by date, author and title or description and produce all slides, presentation materials, power point presentations, photographs, maps, charts, summaries and other documents prepared for or used in that presentation, including, but not limited to, meeting sign up lists, notes, minutes of the meeting, tapes or disks or other recordings of that meeting, post-meeting memoranda, summaries or other documents concerning the meeting, including e-mails regarding this meeting and the outcome thereof.  
Please produce those documents in your possession which are responsive to these requests. I appreciate you taking the time to look into this on such short notice. Please feel free to call or e-mail me should you have any questions. I look forward to hearing from you!!

4/24/2008 11:10 AM Malinda/Winderwheedle called and said she just got my name and number late yesterday and they have a records request that they need to respond to tomorrow. Noted she is working with Joe Passiatore and couple others. She is not sure if I can help ... PIO said run it by me and I would try. PIO noted I was in the car and didn't have materials to research but I could try to help off the top of my head. She asked about who attended the Feb. 7, 2007 City of Apopka meeting, do we have the minutes, and what materials might have been presented, they'd need a copy of that. PIO noted we might have done a PowerPoint that I could get a copy of. PIO noted we aren't required to take minutes; the municipality

would typically do that and they usually post those on their web sites. She said if it's outside our scope that's fine. PIO said we can get the other info. She said they also need to know when the various alternatives were posted on the web site and want copies of all of those. PIO said I'd have to research that. PIO noted I was headed to back to back meetings so it would be late this evening or tomorrow by the afternoon. She said that would still work, they can courier it over. PIO reiterated I'm in the car and could she email me the specifics she needed so I can get back to her. She said she would do so and thanks for the assistance.

I wanted to let you know that we have received your comment form. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. We are working to schedule formal public hearings and will send out a project newsletter with details and update the Expressway Authority web site (www.oocfa.com) with this information once available.

Please feel free to email or call with questions or additional concerns.

Hello Cyndee,  
 We are still hoping to schedule the Wekiva Parkway public hearings in August, but have not nailed down those details yet. There are issues with potential venues and we also have to finalize certain documents before we can schedule the hearings. We've been posting these documents as they are finished on the OOCEA web site at [www.oocea.com](http://www.oocea.com) <<http://www.oocea.com/>>. We will send out a newsletter with public hearing details once determined, and also will post this info on the web site. Stay tuned.

Hi, Mary. Don't know if you remember me from working for Commissioners Randy Morris  
and Daryl McLain. Also through PFLAG and the AIDS Ministry at St. Augustine Church. And  
finally, another friend of our tennis-playing Robert, formerly (as so many of you are) of  
the Sentinel staff.  
Anyway, here are the earliest dates when Comm. Dallari will be available for you for a full  
hour, which is what he has requested:  
Thursday 10/9 9:00 AM, 10:00 AM or 2:00 PM  
Thursday 10/16 1:00 PM, 2:00 PM or 3:00 PM  
Let us know as soon as possible so that we may release any dates/times you are not using  
If none of these will work, we'll go to the following week or two. Thanks.

Dear Commissioner Dallari (and Diane),  
The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with  
each of the SCEA Board members to discuss our latest findings regarding the alignment  
alternative suggested by the WPCC. We would like to set up a meeting with each of you at  
your earliest convenience, and certainly prior to the Board's regularly scheduled public  
meeting in November.  
Please provide several dates and timeframes that you would be available to meet with us.  
We greatly look forward to updating you on the alternative evaluation and to getting your  
further input.  
I look forward to hearing from you at your earliest convenience.

Hello Mary,

The meeting on January 17th is our Annual Community HOA meeting. It is at 7:00 pm  
at Sylvan Lake Park, main building in the large meeting room. You attended our annual  
meeting last year and I believe your 15 - 20 minute update and summary was very well  
done. We will have a projector and laptop there for your use, if needed.

We would like to thank you again for your participation in this matter and look forward  
to seeing you there. If you have any questions or need further assistance, please do not  
hesitate to contact me.

Respectfully,

Dan Macaluso

Subject: FW: SR 429 - Wekiva Parkway PD&E Study - Potential Impacts to Pine Plantation Clark,

Attached as discussed please find a graphic indicating the portion of Pine Plantations needed for the Wekiva Parkway. We are only impacting one of the parcels collectively known as "Pine Plantation", the Rockwood Groves, Inc. parcel shown on the attached graphic. The total roadway and pond right-of-way for that parcel (CH2M HILL parcel ID #2792) is 40.1 acres. The impact areas are hatched on the graphic. Note that the parcel is oddly shaped so there are two sections of the parcel that are impacted.

I understand that Bob Mallett of Broad & Cassel also supplied some information to you today. Hopefully you've gotten everything you need now. Please call or email with other questions or for additional info.

Mary Brooks

1/28/2008	4:00 PM	PIO called back Clark Davis, noted I'd relayed his request to the engineer and was expecting to have the info on how much we needed for the road when I got back to the office and would forward his way. Noted sorry couldn't get it before his 3 p.m. meeting. He said that's okay. He said in the meantime they'd heard back from Bob Mallett so don't go through any trouble. PIO asked for his email address? Clark.davis@dep.state.fl.us <mailto:Clark.davis@dep.state.fl.us> and said I'd forward it to him. He said thanks.
1/28/2008	1:06 PM	Clark Davis/FDEP called back and said of course as soon as we got off the phone an other question came up. Of the 600 acres in the Pine Plantation parcel, do you have any idea of how many acres are needed for the roadway? And whether the remainder is considered conservation type property? I'm going to try to get an aerial photo and try to see what it looks like. If you would touch base back with me if you think you can be of any help. 850-245-661. Thank you.
1/28/2008	12:53 PM	PIO returned call to Clark Davis/FDEP, noted we had Wekiva Mitigation Bank and Neighborhood Lakes, as he probably knew since they were partners, and understood discussions were underway on some parts of Pine Plantations. PIO noted didn't know exactly which parcels, but could check and get back to him. He put his boss on speaker phone and relayed to him also that discussions were being held with some of the Pine Plantations folks, OCEA leading those as per the WPPA. Clark noted they also had a call in to Bob Mallett but had not heard back from him yet. They thanked me for the assistance.
1/28/2008	11:39 AM	Clark Davis/FDEP called and left MSG the Secretary of the Department Mike Sullivan?? has asked for info regarding the acquisition efforts on the beltway. Which would be the Strawn parcel, Pine Plantation ... we've picked up Neighborhood Lakes. Looking for someone that would have some info. We have meetings this afternoon and would like someone to get back with me. 850-245-2661 thank you

Melissa DeMarco(Mayor)  
James Yatsuk (Councilmember, At-Large)  
James Homich (Councilmember, At-Large)  
Stewart Holley (Councilmember, District 1)  
Robert Thielhelm (Councilmember, District 2)  
Judy Smathers (Councilmember, District 3)  
Michael Tedder (Councilmember, District 4)

Study team members attending: Frank Hickson, Brian Stanger, David Marsh, Mark Callahan and PIO.

Mark Callahan did introductions. He reviewed where we're at with the US 441-SR 46 Interchange (IC) and modification alternatives. Went over next steps and schedule. Noted recommended preferred alternative for Wekiva Parkway. Mark said the purpose tonight is to focus on the US 441-SR 46 IC, which has been discussed with council previously. He noted we have examined several alternatives, and three different IC alternatives.

Alt. 1: Grade-separated, three level IC ... We will need to rebuild that portion of US 441. Will include a third level flyover from SB 441 to EB 46. This one allows for continued grade separation. Mark noted it's quite high in the air; the land in each of the quadrants is at about 140-150' existing elevations. This flyover will extend up to 180' in the air at the highest point. At Pond Road, as you go east on SR 46, the topography of the land drops down to the east. The existing elevations at Pond Road are about 80'. As the flyover goes over, we would have to go over Pond Road, and would be at 118'. That's 30' higher than Pond Road; it will be a very big visual thing for them. It will be noticeable.

Alt. 2 - At-grade IC, raising SR 46 slightly, lowering 441, and will be a signalized location. The flyover remains for SB 441 to EB SR 46. This would be a much lower IC, 20-30' lower depending on location. At Pond Road there would be a significant drop of 10' lower. With this alternative the ability to get flyover down is easier. Where the flyover takes off from US 441, with Alt. 1 it takes off farther north because the grades require more room to get the ramps up and over. With Alt. 2 it takes off a couple hundred feet farther south; the ramps are not as long.

Mark noted the cost difference between two alternatives is about \$20 mill with Alt. 2 being cheaper.

Mark showed the profile of the alternatives.

He noted another important component is traffic: projections for 2032 for Alt. 1 show dramatic improvements on US 441 south of SR 46; NB traffic will get off at 46. Alt 1 will include improvements to ramp intersections, will operate at LOS B. But with US 441 to the north, given the continuing increasing traffic even with six lanes on US 441 to the north, in 2032 we will see a LOS F. it's a fairly congested condition, given the number of signals.

Compare that with the at-grade Alt 2: South of SR 46 there is a good LOS on 441. Intersection operations would be at LOS C in 2032; that's an acceptable LOS. Cars will have to stop when the light is red; there will be good operations. As we continue north on US 441 we once again have LOS F, even with the six laning. (continued...)

Construction & right of way costs comparison:

Alt 1 \$77.2 million

Alt 2 58.5 million

Mark noted FDOT is moving forward with Alt 2; the city has said it wants Alt. 1.

Mark said at the point this goes to design, we will look again at this with updated info and refinements. He noted FDOT is reviewing the draft reports. We will be coming out to the public in the coming months. The public hearings have moved back. We have some issues working with the state historic preservation agency. Looking at public hearings end of July timeframe with approvals to follow.

James Homich: So you're going ahead with Alt. 2, contrary to what we requested, but you will come back and re-evaluate? Mark said yes. Homich added, "If you come back and talk to us are you going to listen?"

He also noted, whereas the separated IC has LOS B in future... the at-grade intersection will be LOS C in future?

In regards to the F, is that with the four lanes or six lanes? Mark said the long range plan for this facility has six lanes to the OC - LC line; our analysis assumes six lanes. This indicates to us that we need to expect US 441, even with improvements, will continue to experience congestion as growth continues.

Homich: Is the LOS F prior to that stop light? Mark said I believe just north of SR 46 will be an F. It's not really related to signals; the six lanes won't be enough for the traffic we're going to see out there.

Melissa DelMarco: is there pedestrian accommodation in this plan? Mark said we will have sidewalks on SR 46 on either side, probably 6-8 feet wide. Mark said we understand there is a trail LC is looking at. They're hoping to take it down the existing rail corridor and crossing US 441 with the trail ... At this point we're not looking at a trail through the US 441-SR 46 concept area.

Demarco said I would be very disappointed with that. ... Very iffy subject, very expensive. You're building a roadway - there's no more opportune time to lay a trail system in place. Assuming you will be listening ... and be interested in city's point of view. I know pedestrian access very important.

Jim Yatsuk: What's total price of project? \$1.7 billion. Jim said there are a lot of citizens who have access right at that point ... Won't the at-grade intersection tend to back up traffic? Instead of taking US 441 to get on the system, lot of people expressed concerns about getting out of their development.

Mark said with Alt. 2 the ramps will be farther away; the ramps will be there as well.

Yatsuk: There are a lot of (driveway) cuts right near that area. It's a big concern that's been expressed to me. I know the height is a problem for me, but the backup on First Avenue would make me want to go to the flyover without the at-grade.

Robert Thielhelm: When you look at the traffic analysis, the numbers are different? Mark said there is some difference based on configuration of IC.

Thielhelm: The at-grade peak hour is 1.9 ... and grade separation it's 1.7? Mark said the flyover on Alt. 1 takes off farther north, so you need to add the two numbers. Where the 700 is ... whereas this shows the number where the flyover is ... Mark noted there was an error on the graphics

Thielhelm: During the peak hour on the at-grade intersection, the buildup ... at what point with the starting point of the flyover does that occur? Mark said to the north; he will have to find that out.

Thielhelm: Orlando had a flyover put in and it caused severe traffic accidents to occur ... between 408 and downtown, now you're having to correct that.

I'm concerned that traffic will build up farther north than start of flyover, raised that issue last time you were here and still haven't heard an answer. ... I can envision that traffic buildup with the at-grade intersection. The buildup will be farther north than the start of the flyover.

Mark noted the flyover will be taking a good portion of the traffic off SB US 441.

Thielhelm: You're still going to have traffic going south on 441 ... all we're doing is creating an accident point.

Stewart Holley: I'm concerned where you're building in down First Avenue. It looks like four blocks. Are you going to rebuild that portion of 46? Or is that just there to illustrate ... on Alt. 2 picture?

Mark said I think there are some ROW impacts on First Ave. to the north; the rest we believe we can fit in the ROW.

Holley: Are you building down to where that's highlighted? Mark said yes.

Holley: How are you going to be reconstructing that, will there be landscaping? Mark not at this point; that would be determined in design. Holley said I'm very concerned about how you're going to build that out.

DeMarco: Is there any reason US 441 can't be lowered further so the elevations won't be as high? Mark said to lower US 441 you have to lower SR 46. The existing bridge is not long enough to have the turn lanes and other things we need underneath. So have to raise the existing bridges to make it longer to provide more room. With Alt. 1 US 441 will be a little higher than it is today.

DeMarco: Isn't there room to the east to accommodate a longer exit and entrance on SR 46 if you were down lower on US 441? Mark said the grade is fairly dramatic on both sides We'd be chasing grade; that's kind of a problem today.

Homich: We own an easement north of the IC with US 441 and SR 46, on the east side, directly across US 441 from our park. I would like to incorporate at least ... West Orange Trail that runs into SR 429 ... wanted to see about incorporating that, when you're doing the grading put in the culvert ... it's part of our overall trail system. I would like to connect those two. I wouldn't imagine with all the grading you're going to do that it would be a significant addition to the project. ... It's about the same area where you're going to be grading for the flyover. .. It didn't seem like a very difficult structural problem.

Martha,

Thank you for taking the time to submit your comments. Your concerns will be shared with the Wekiva Parkway Project Development and Environment Study team, including representatives of the Florida Department of Transportation, which is developing the corridor in Lake and Seminole Counties. We are still shooting for formal public hearings in July, and will provide those details once available.

Mary Brooks

5/4/2008 2:22 PM

I have been looking at the proposed highways and there are two comments I would like to make.

1.) I understand the need for improvement of the highway systems into Orlando. However, I do not understand why the long established communities in Seminole county have to be severely compromised so that Lake county residents can have a better commute. This really seems to be putting the needs/desires of Lake county residents ahead of Seminole county residents. And the impact to these communities in Seminole county (noise, urbanization, quality of life as well as property value) will be substantial and negative while the impact to Lake county communities will be substantial but positive as these properties will be more desirable with easier commuting to Orlando.

I would truly hope that some alternative can be found where the highway can be built from Lake county into Orange county that does not sacrifice the quality of life in these currently beautiful, quiet communities in Seminole county.

2.) On a slightly different topic, I find it difficult to believe that an interchange will be built at International Parkway for the 417 at an estimated cost of \$580 million(?) and then "thrown away" if the current alternative to the Wekiva Parkway goes forward. This seems like a tremendous waste of taxpayer money!

Contact Date	Time	Steven Devine Regarding	Lake Forest HOA
11/11/2008	1:45 PM	PIO met Steve Devine/Lake Forest HOA at Lake Forest Publix plaza, gave brief synopsis of material on disk. He asked what other stakeholders thought of coalition alignment? PIO noted got email from Astor Farms that they plan to make a statement against it. PIO very briefly mentioned some issues with Alt. G, including additional \$800 million cost. He said even if he didn't live in Lake Forest, it still just makes sense to connect at SR 417. He asked if they could speak at the meeting, understand it's not a public meeting per se. PIO said check with SCEA, Sheralyn Brinson; we're just presenting. He thanked me for the info esp. on a holiday.

Subject: SR 429 - Wekiva Parkway PD&E Study - Important Meeting Notice  
Dear Community Stakeholder: The Florida Department of Transportation (FDOT), which has been conducting the Wekiva Parkway Project Development and Environment (PD&E) Study in Lake and Seminole Counties, wishes to notify you of important information that is scheduled to be discussed at the Seminole County Expressway Authority (SCEA) Board meeting on Tuesday, Nov. 18 at 4 p.m. The meeting will be held at the Seminole County Services Building, Room 1028, 1101 East First Street, Sanford, FL 32711. A community-based group, the Wekiva Parkway Community Coalition (WPCC), has proposed an alternative alignment for the Wekiva Parkway in Seminole County that would potentially affect you and other community stakeholders in your area. The SCEA Board asked the FDOT to review and evaluate this suggested alignment, referred to as "WPCC Alternative G." The FDOT has completed the evaluation of this proposed alternative, and will be discussing the findings at the Nov. 18 SCEA Board meeting. We would be happy to provide a summary of this information to you in advance. Please contact me at your earliest convenience so I can arrange to get either a hard copy or electronic files on disk to you. Please feel free to contact me with any questions or for further information.  
Mary Brooks

10/15/2008 2:50 PM Steve Devine/Lake Forest HOA called, said he saw the update on the OOCEA web site and wanted to know what was next, what's going on? PIO noted we still haven't set the public hearings, waiting for FHWA to approve environmental documents. PIO noted we would be giving an update to the SCEA Board Nov. 18, so he might find that interesting if he's looking for info. PIO noted don't know time but sure it's on their web site. He said he would probably attend. PIO also noted I've received quite a few comment forms from Lake Forest. He said good, glad you're getting those.

5/7/2008 5:13 PM PIO returned call to Steve Devine/Lake Forest HOA 407-330-9598, there 730 houses in here so when it's something we care about, it's not hard to get people out. he said he didn't understand about what they were saying about not knowing about this. He said the first meeting he went to was at sylvan lakes because someone he knew who lived there told him about it. PIO noted we've met with the community no fewer than 3-4 times. He asked what the coalition wanted, for it not to go through at all? PIO said they don't mind the 46 alternative, but barring that they want it pushed farther away from them if it's still going to connect to 417 at I-4. PIO said we will continue to keep them informed and

appreciated the balance of opinions presented at the meeting, think it was good for the board to hear and see that.

5/7/2008 11:46 AM Steve Devine/Lake Forest HOA called and left MSG thanks for the heads up about the meeting yesterday. We had an opportunity to get some people there to present our position. It was interesting they said they hadn't been informed about any of this. One of the first meetings I went to was ch2m hill put on at sylvan lakes a couple years ago. I thought you'd been doing an excellent job of keeping everybody informed but ... We will stay in the loop here and try to get everybody to go to the public hearings this summer and turn in their comment forms. We definitely support the southern route not just for us but for all the businesses along SR 46 that would be impacted. Thank you again. Appreciate it.

12/30/2008	6:20 PM	Hi Mr. DiFonzo - I am looking into your questions and will try to have answers back to you before the end of the week.

Best regards,  
Brian Hutchings  
Public Information Officer

Hello -  
I am trying to get the current status of the Wekiva Parkway project in Seminole county, and also get a few questions answered.

Has the final alignment in Seminole county been established? I have been waiting for notice of a final public hearing but haven't seen it yet.

Does the Board of County Commissioners still have to vote on the final alignment proposal?

It's difficult to look at the maps and determine the attributes of the roadway being proposed. E.g., where is it on the surface and where is it elevated? For elevated sections, what is the road height being proposed? Will there be sound barriers installed as part of the project, and if so, where?

Specifically, at the place where the road crosses over Wilson Road and again over Orange Boulevard, what should we be expecting in the way of bridges? how high and how long will they be?

Someone has started a project to build a baseball complex right where the road is supposed to intersect the east side of Orange Boulevard; will that project be halted and demolished for the roadway?

Finally, what is the anticipated date when land clearing will begin, and when is road construction in Seminole county planned to be complete?

Thanks for any help and information you can provide.

Joe DiFonzo

Sanford, FL 32771

Contact		Jane Doe
Date	Time	Regarding
10/7/2008	9:34 AM	A woman (did not give name) 407-422-1644 called and said she saw the story yesterday in the paper that they're putting a toll road in SC. She said they're looking at a house near the river and wanted to know if it would be affected? PIO asked which side of SR 46 it was on? She said south side at River Oaks. PIO noted south ROW line along SR 46 from river to about Twelve Oaks RV Resort will remain the same and we will widen to the north in that area, from there it dips south to connect to SR 417 at I-4. she said the house they're looking at is about four houses down from 46. She said they were out there last night and you could already hear the road, is that going to get worse if they do a toll road, won't there be more traffic? PIO said traffic is expected to increase in future years. PIO noted that as part of the PD&E Study FDOT is doing a noise impact assessment, determining areas likely to see significant increase in noise and what, if any noise abatement should be done that's cost-effective and feasible. PIO noted can't say at this point if noise walls or earthen berms would go in or where.
10/7/2008	9:33 AM	She asked how certain this was to happen? Paper said it would be five years? PIO noted history of project, and that SR 46 is one of the most dangerous roads in the state. PIO noted traffic is expected to increase, especially once the economy turns around. Either the Wekiva Parkway will take place, or SR 46 would have to be widened to 6-8 lanes through

an environmentally sensitive area and no one wants that. She said they live in Altamonte now between 434 and 436 near I-4, and can hear the roadway. They were thinking of moving there since it's so nice and there isn't a lot of development right now. PIO walked her through OOCEA web site to find map so she could see exactly where the road was going to be in relation to the property in question. PIO noted the configuration with frontage roads and elevated parkway would be similar to SR 408 through downtown Orlando with Anderson and South streets on either side. PIO noted the sound walls on 408 definitely help, but no decision at this point about that regarding Wekiva Parkway. She said this is good info and she doesn't think they will buy that house, will be too close. PIO asked if she wanted to be on the mailing list, we're planning public hearings soon? She said know, she sees those in the paper.

5/2/2008	9:23 AM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Fri 5/2/2008 9:23 AM To: BoltQueen@aol.com Cc: Deana Leffler Subject: RE: SR 429 - Wekiva Parkway PD&E Study - meeting & funding query Hello, We are shooting for having the formal public hearings in July, but have not yet nailed down details. The Wekiva Parkway also will be discussed at a couple of agency meetings coming up, in case you care to attend: Seminole County Expressway Authority Tuesday, May 6 4 p.m. (or whenever the meeting beforehand finishes) SC Administration Building 1101 E. First Street Sanford, FL 32771 I believe public comment will be allowed at that one. Public comment will NOT be allowed at the two meetings below as they are working committee meetings, though you can listen in.
5/2/2008	9:22 AM	Orlando-Orange Expressway Authority Wekiva Parkway PD&E Study Project Advisory Group Friday, May 9 130-330 p.m. OOCEA Board Room 4974 ORL Tower Rd. Orlando, FL 32807 Orlando-Orange Expressway Authority Wekiva Parkway PD&E Study Environmental Advisory Committee Friday, May 9 10 a.m. - 12 p.m. OOCEA Board Room 4974 ORL Tower Rd. Orlando, FL 32807 The Expressway Authority is responsible for developing the Orange County portion of the project. The FDOT is handling the Lake and Seminole County portions. As you know there is a funding shortfall for this project. The OOCEA has funding for design (the next step after the study) and some money for buying property; FDOT has some money for right of

way acquisition. These and other agencies are seeking funding options to bring this project to fruition, and I hope to have some information on that within the next month or two. We will keep you posted. Thanks for coming to me to seek accurate information.

You must be working late! Thank you for the info. To be honest, I am concerned about the closing of part of 46 between Old McDonald Rd and Mt. Plymouth. It seems like it lends to further delays should we ever need emergency vehicles. I'm not sure why this is being recommended in this particular area. Thank you again. Marilyn Dorman

2/12/2008	6:39 PM	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Tuesday, February 12, 2008 6:39 PM To: 'Mdorman2@aol.com' Subject: RE: Wekiva Parkway - Responses to questions Correct Incorrect. This \$1.8 billion project is not fully funded. Even if we had the funding, it would take 2-3 years for the next step, final design, and another 2-3 years for right of way acquisition before we could begin construction. So if it was funded, you'd be looking at 4-6 years to start construction. Since we're talking about 25 miles of roadway, construction will likely be done in segments stretched out over several years. However, again, since it is
-----------	---------	---

not funded, presumably the schedule will be much longer. However, the Expressway Authority has made this project a priority and the agency is working with other agencies and local governments to come up with a way to get it done sooner rather than later.

Subject: Re: Wekiva Parkway - Responses to questions  
Thank you for your response to my email.  
Just so I am clear and to settle an argument with my husband.... From your response, I understand that we will not be able go west on 46 into Mt. Plymouth from Old McDonald Rd. Our only access will be to go east on 46 to the interchange at 46A to go either East or West on the Wekiva Parkway.  
At the meeting at Heathrow several months ago, I believe I heard that the Wekiva Parkway construction was put on a fast track and the estimated completion of this road is 3 years. Is this correct?  
Once again, I appreciate your time and answers..  
Thank you,  
Marilyn Dorman

Subject: RE: Wekiva Parkway - Responses to questions  
Marilyn,  
Regarding your questions below:  
, 2., 3. & 5 As the Wekiva Parkway Lake County East Alternative map indicates, a portion of existing SR 46 will remain in the area of Old MacDonald Road. The new Wekiva Parkway, which will run south of SR 46 in this area, will bridge over Old MacDonald Road. Residents on this side street will continue to access SR 46 in this area, and take that to CR 46A to get to the various ramps to get onto the Wekiva Parkway to either go east or west.  
4. Correct.  
6. We will share your meeting date request with the study team at tomorrow's progress meeting.  
7. The next Wekiva Commission meeting is scheduled for Feb. 27, 2008 AT 1:30 PM at the East Central Florida Regional Planning Council, 631 N. Wymore Rd., Ste. 100, Maitland, FL 32751. Please bear in mind that these meetings do not only discuss the Wekiva Parkway, but all of the aspects of environmental and development changes required by the 2004 Wekiva Parkway & Protection Act. We do not have any additional public presentations scheduled at this time for any local governments. You can find out more about the Wekiva Commission at <<http://www.ecfrpc.org/main/Main.asp?CategoryID=4&SubCategoryID=45&ContentID=41>> I hope that helps. Please feel free to call or email with other questions.

Subject: Wekiva Parkway - questions  
Good Morning Mary,

Thank you for talking with me this morning. I had some questions about the impact to me and my neighbors as a residents living on Old McDonald Road when this road is built. In reviewing the most updated "Lake County East" map:

1. In reference to the green markings that indicate the bridges for the wildlife crossings next to Old McDonald Rd, and between 46A and the Wekiva River bridge and the Wekiva River bridge...will SR 46 actually be disrupted in these areas, not allowing any traffic to flow on SR46 at these bridges/wildlife crossings?
2. If so, as a resident on Old McDonald Rd, what route would I have to take in order to go to Mt. Plymouth or to Sanford?
3. I have family that live on the opposite side of SR 46 about a quarter mile from the present entrance of Old McDonald Rd and SR46 going east? Would I have access under the Wekiva Parkway to the present SR46 or would I have to somehow go to the proposed interchange at SR46A and SR46 and get on SR46, then driving West on SR 46 to get to their home?
4. We have a bus stop at the end of Old McDonald road that currently 5 children use. Will the school bus have to get on the new road at the Camp Challenge interchange, drive down to the interchange at SR46A and SR46, get on the old SR46 in order to pick up those children, turn around and go back to the interchange and get back on the new road?
5. What are the plans for access to the new Wekiva Parkway from Old McDonald Rd. Will there be access right at Old McDonald Rd? or...Will the state build an access road spanning approximately 2 miles either way to get to one of the proposed interchanges? If so, will this access road be paved or regularly maintained?
6. In reference to the public meetings this summer. At least 6 citizens in this area try to attend these meetings when we hear of them. Would it be possible to have the public meeting in our area either in June, or between the 1st and the 17th of July, or after the 18th of August?
7. Please advise of any upcoming meetings that we may also attend with the local governments?

Thank you so much for offering to review my questions and I welcome your response.  
Sincerely,  
Marilyn Dorman

Please find attached my comments regarding the proposed Wekiva Parkway.

Contact		Curtis and Sharon Duffield	Mount Plymouth Advisory Planning Committee
Date	Time	Regarding	

7/9/2008	3:30 PM	<p>Mt. Plymouth Advisory Planning Committee meeting, Sorrento Christian Center, Committee Members:</p> <p>Priscilla Bernardo Drugge, G. Curtis Duffield, Jeanne Etter, Leslie E. Garvis, Dr. Ronald E. Holman, Judith C. Weis, Lisa Yonke</p> <p>Team: Brian Stanger, Dave Marsh, FDOT D5 Planning Liaison,(?? - did not catch name) /FDOT, Tony Nosse/FDOT, Mark, PIO, (??-did not catch name) Lake County Staff, Keith Schue, LC Comm. Stewart. About 10 other people from the public in attendance.David Marsh noted he was here august last year, question then about safety and operational aspects of SR 46, as a result we did a study, provided to committee and Comm. Stewart. Introduced Brian S., Mark C., who is PM on Wekiva Parkway and did trail supplement.Tony Nosse: SR 46 from Orange to Adell, 2.2 miles long, Fowler Davis did the study, Sept 5-6, 2007 engineers reviewed corridor, crashes, speed and other characteristics. Recommendation of oversized chevron on the curve ... reduce the speed limit from ?? to Mt. Plymouth... trimmed vegetation near CR 437 north to increase signal visibility... requested LC increase CR 437 green time ...</p>
7/9/2008	3:29 PM	<p>2009 safety project will include audible safety pavement markings (thermoplastic with bumps you hear when you go over them)Mark C. presentation: We've been working on project for four years. There's been a lot of outreach. Previous committees/task forces identified primary constraints in the corridor, legislatively identified corridor area in WPPA of 2004. Identified wetlands, major development areas, other natural systems, floodplains, etc. Recapped development of alternatives ...series of meetings in each county on initials... developed viables... have done more detailed evaluation ... have recommended preferred alternative a year ago ... some issues since that time... went over alignment ... 8k feet of bridging in neighborhood lakes for wildlife ... branch off to north and west ... run along 46 corridor, ... rebuilding SR 46-US 441 interchange to at-grade signalized intersection w/ flyover for SB 441 to EB 46 to take them out of the intersection. Mt. Dora prefers 3-level IC &amp; LC BCC said that's best solution. FDOT said based on traffic today the at grade with flyover meets characteristics of the corridor, as you go to the north where they're 6-laning, ... spending additional money on more expensive IC wouldn't approve operations. When goes to design FDOT has committed to look at that again; no design funded yet.</p>
7/9/2008	3:28 PM	<p>Continued along alignment east in LC, ... relocation of CR 46A ... WPPA very direct to remove 46A and 46 in this area so wildlife connection could be made. Direction to stay out of public lands with relocation of 46A... HCE remains very concerned relative to noise and other impacts with proximity of the road to their development. When it's built will remain a county road, FDOT compelled to work with county relating to design features of that roadway, been coordinating with LC public works, ... alternative would have 100' buffer from HCE property line to road itself based on county suggestion, but still some concerns in that neighborhood re: Q: On the 46A the way you have it planned ... would that dead head into 46 or go directly onto onramp of beltway? Mark said couple diff ideas... one concept take 46 down and curve it, tie in existing 46 into that on a curve. Other option, which we're proposing is have 46 remain on its alignment and have 46a T into that. Saw higher traffic volumes wanting to do this ... (pointed to board) than this. Might be something that could change when traffic is re-evaluated.</p>
7/9/2008	3:27 PM	<p>Q: So you wouldn't use part of 46 to get onto beltway? Mark said yes, come down 46A, take a right or left on 46... people in here (pointed to board) will be using 46, otherwise how would they get to Wekiva Parkway.</p> <p>Q: How long is the one little branch before it V's off? Mark said between a half mile and a mile.</p> <p>Q: Will it have a signal? Mark said yes believe so. Will be a fairly busy interchange so will</p>

need signal. May not need signal at IC ramp.

Q: Where exactly will the IC be? Mark said in the neighborhood lakes property just south of existing 46... there are some wetlands in there. There is small depressional area... and some wetlands in here. Road does get into some ... but we've stayed mostly away from those; have worked very closely with FDEP and other stakeholders.

Q: What is the distance between ... ? Mark said maybe 3 miles, but can get you that.

Q: Where is the T? Mark said less than a half mile from Round Lake, right where the RR starts to get off the alignment. Intersection at Round Lake and 46 either with or without the Wekiva Parkway will become more problematic. Concern about how it will affect Round Lake Elem.

Q: Is there a direct web site that you can go to see the map? Mark gave OOCEA web site address. She said but then you have to navigate. PIO noted on home page under News there is a headline for Wekiva Parkway public hearings and that will take you to all the maps and documents.

Jane? Noted you can give you email address to Mary and she will send updates, I get stuff from her every week.

7/9/2008 3:26 PM

Q: Is the parkway 6 or 4 lanes? Mark said appears right now, depends on when it's built, that portion would be 6 lanes initially and even where it's 4 lanes it will be built to accommodate

Q: How wide will it be? Mark said similar to 429, about 300'. In SC it will be frontage road system with parkway on the center.

Q: Concern about access on and off by a lot of people, concerned about backtracking and being cut off? Mark noted 46 ... relocation of 46A ... couple pockets of private properties ... westernmost bear crossing ... and other one over here ... cypress place ... neighborhood lakes long bridge for wildlife... Here elevated through here... bridge will overpass Old MacDonald Road to maintain access... folks in these parcels down here ... or want to access old MacDonald or the forest, they will get off at this IC ... noted where 46A will cut off at state lands, not sure where exactly. ...people here would have to get onto Wekiva Parkway ... two smaller subdivisions on north side, and then the Wekiva Falls area. Would have ... Wekiva Pines access ... rock springs run ... existing 46 not open to the public in this area, this area will have 4,000 bridge for habitat connectivity.

Q: What will you do with the road? Will work with land managers and county, suspect much of the pavement will be removed... there's still fire equipment that has to be able to gain access. FDOT willing to work

7/9/2008 3:25 PM

Q: How many IC's from Sorrento to SC? One to get on ... two here ... not high volume to serve these properties. Desire to cut off 46, didn't want to keep traffic ... and then ramps off frontage road system in SC. You will not be able to get from Wekiva falls to Mt. Plymouth unless you get on Wekiva Parkway, same here to get across the river.

Q: No toll on that area? Mark said right now fairly certain there will be a toll in OC. This project approaching \$1.8 billion and we don't have funding for that. OOCEA and FDOT considering what funding options are out there. That might include additional portions being tolled or P3. There will be a lot more discussions as funding plans are put together and ideas kicked around. That will be actively brought out to the public as well. This is a big project and unfortunately we're not seeing the same funding for interstate

Q: Will there be consideration for folks who can only get to their property through the parkway? Mark said understood, some things kicked around, special transponder. ... It hasn't settled.

Q: How does the condemnation work for ROW? Brian said after PD&E go to design, then ROW acquisition; we have a whole dept. that does that. Wouldn't do anything in PD&E stage, has to go through NEPA process and FHWA, at this point not really approaching anyone.

7/9/2008 3:24 PM Q: What exactly accomplished through PD&E? Mark said PD&E study... working out issues with FHWA and SHPO, historic homes in OC, meeting with FHWA in couple weeks. Hope to be out to public hearing by end Sept., could push back depending on how well we can get out documents processed and work through the system. Once we have the public hearings we will get a lot of comments. We will respond and might be some changes made based on comments. At that point, go to OOCEA, LC BCC or MPO, SCEA and present findings and solicit input from them whether to move forward or not. If move forward, finalize docs and submit to FHWA for approval and sign off. At that point move to next phase, design where we prepare construction plans and ROW docs, how much land we need from each prop owner out there. When ROW maps available FDOT and EA will start acquiring Row, will notify prop owners in advance, appraisals, provide opportunities for owners to get appraisals, once ROW and permits in hand, will go to construction. Would suspect start in OC, but might see something happen with 417 and I-4 because that will take

Q: If you had \$2 billion fall from sky, what length of time would it take to have the road in place? If study finished end this year, design take 3 years - 2011, start ROW acquisition a year before design done, 2010, ROW may take 3 years - 2014, to construct, if put it on the street at once maybe 4-5 years. So maybe 2020, but others will say it can be done faster

Q: The major amount of traffic will be on the parkway, at that point how much traffic will be on 46 between the two IC's? Mark said informal discussions with county, that would be turned over to county and be a county road, hope would be Wekiva Parkway becomes 46, get trucks on there.... Once this is built FDOT would be happy to turn remaining 46 over.

7/9/2008 3:23 PM Sue Brooks: How many exits between IC at Neighborhood Lakes and IC in OC? Mark said 2, Mt. Plymouth IC provides access to a very focused area, ... and other the Wekiva Falls area ...

Q: Around round lakes, do you cover the area that would do improvements to round lake road or is that county? Mark said we'd have to do some improvements to Round Lake Road / SR 46 intersection, would be done in coordination with the county.

Sue Brooks: I've seen some maps where they show round lake being 4 lanes? Mark said that's the county, would suspect at very least will need additional turn lanes on round lakes. Models show round lake will get some additional traffic.

Q: Is there still an exchange where Haas and Ondich meet, where 429 ...? Mark said can go down 437 to Kelly park road

Q: So if you live just south of 46 ... if I get on ...? Mark said from Plymouth Sorrento Road, right on Kelly Park Road ... or

Q: What will happen to Plymouth Sorrento road? Improvements along Kelly Park will extend into intersection with p-s, but p-s is an orange county road.

Q: At lake county line what will happen to p-s road? Mark said get with LC public works

7/9/2008 3:22 PM Q: Usually there is a half mile of improvements on cross street when there's an interstate...?

Q: Is this pretty much cast in stone this route? What you see is pretty much what we'll be carrying to the public hearing

Q: How long is that bridge again? This one is 4,000 and this one is 2,000, and another bridge here about 800 feet.

Q: With access to the homes and two IC's, what's the logic between needing two IC's there instead of just allowing people to use 46? Mark said we kicked ideas around... there is desire to abandon as much of SR 46 as possible. FDEP who owns many of the lands that we're impacting that was so important to have the two IC's, and if we wanted to do ... discussion of impact to wildlife and get traffic up onto parkway.

7/9/2008 3:21 PM Trail supplement

Mark said as we moved into study, it was clear there was a lot of activity on trails, each of the counties... Dept. committed to look at various plans going on ... and ensure that what we're doing with Wekiva Parkway does not block our ability to have trails. Have coordinated with SC... they're proposing trail coming up lake Markham and south side of frontage road here will have wider sidewalk for trail, then bridge across the Wekiva and be consistent and be able to connect to trail concepts that LC has developed. There may be changes to those, but whatever comes out of that we will make sure we can tie into that. We do not want to put the trails within the limited access of the roadway. We don't want people drifting into parkway and having accidents. And cost and scope does not incorporate putting the trail in there. Some people would like us to do a lot more...

Q: Will trail be equine friendly? Linda Stewart said they're aiming for that, we're discussing that.

Sue brooks: will there be disconnect if trails not in LA ROW? Mark said don't want people walking within that area, would need to be outside the roadway area. ... Would possibly go under some of the bridges also... couple options could be at grade or a bridge. Mount Dora has idea of putting tunnel under 441, has some issues. We're just making sure you can get there and we're not blocking them. We are not taking on the cost or the environmental permitting.

Q: We can be side by side with the bears? Mark noted some concerns with that.

Contact Anganie Durbal OC Transportation Planning  
 Date Time Regarding  
 5/9/2008 1:30 PM About 130 p.m. on Friday, a couple of people showed up for the PAG meeting, not knowing it had been cancelled. PIO informed Debra Laisure/FDEP and Anganie Durbal/OC Transportation Planning (said she was attending for Renzo Nastasi) that the meeting was cancelled because many group members said they were going to the Commuter Rail meeting called on short notice instead. PIO apologized for the change and noted we'd let them know when it was rescheduled. They said they were not aware of the Commuter Rail meeting. PIO apologized again and got their email addresses (Debra.Laisure@dep.state.fl.us <mailto:Debra.Laisure@dep.state.fl.us> and Anganie.Durbal@ocfl.net <mailto:Anganie.Durbal@ocfl.net>).

Contact Carlton Edge Bookertown Community Improvement  
 Date Time Regarding  
 11/19/2008 7:27 AM Ass.  
 After SCEA Board meeting, PIO spoke with Carlton Edge/Bookertown Community Improvement Association, who said the group is still active, still meet monthly. There are about 65 homes in the community, usually get 20-25 people at meetings. He said it

seemed like it would be a ways away from them; how about the Port? PIO noted it would go through the Port. He said oh, so it would be closer than he thought. PIO gave him copy of the WPCC CD for the association's information, also PIO business card. Carlton, who works for Progress Energy, gave me his card. Said cell is best way to reach him: c 321-279-6074; h 407-330-7483.

11/17/2008	2:20 PM	Found number for Carlton Edge, left detailed MSG about WPCC alternative and SCEA Board meeting 11-18 at 4 p.m. PIO noted I have a disk with information on the alternate alignment that I can try to get to him today, otherwise the information will be discussed at tomorrow's meeting. PIO noted I also left a MSG on Friday for Gloria Cumming, who I was able to find a number for. PIO noted we just wanted their community to be aware of this. PIO also noted the FDOT preferred alternative would connect to I-4 at SR 417. PIO asked him to call me to discuss further, noted I wasn't sure if their association was still active. PIO apologized for the late notice, but noted I just tracked down a number for him.
------------	---------	--

11/14/2008	11:32 AM	Tried to find number for Carlton Edge, president Bookertown Improvement Association (inactive) but no longer has a listing in the area. Found one for Gloria Cummings. PIO called Gloria Cummings 407-323-1982 VP/Bookertown Improvement Association (inactive), left detailed MSG about WPCC alternative and SCEA Board meeting, asked her to call me.

Contact		Jean Edwards
Date	Time	Regarding
11/10/2008	11:05 AM	Jean (didn't catch last name) from South Carolina called 803-730-2462 and asked if we had any idea on when we were going to have the community meetings on the 429? She said they would be heading down here soon. PIO noted don't have dates, still waiting on documents to be approved by FHWA that we have to have at the meeting. PIO noted we thought it would be done by now, but FHWA keeps saying it's coming... She said we looked at the internet and didn't see anything new. PIO noted we would put out the info as soon as we have dates set, at this point probably after the first of the year. She said we're sitting on the verge of 46 and 441, at Stanley Bell Drive. We're trying to see if we can sell the property or what. It's not our main home... I appreciate your time.
7/7/2008	4:52 PM	PIO returned call to Jean Edwards, who said we're on Stanley Bell Road and SR 46 where the big flyover is going to be. We can't sell the place because of this. We were just trying to figure out what we're should do. She's seen the maps on the web site. She noted Stanley Bell parallels 441 and runs into 46. I feel like they've got to take our property to do what they want to do. PIO noted we haven't done any acquisitions; only thing we've looked at is some developer parcels who approached us about selling since market is in the tank. Noted we wouldn't be doing any acquisition until after the study and have an approved alignment. She said we've got to make a trip and were trying to get some idea of how long we need to stay. Our granddaughter is having a birthday and we're going to go regardless, but with gas at \$4 a gallon we didn't want to have to come down twice if we could help it. PIO noted we're still working to finalize documentation and get authorization from FDOT and FHWA before we can advertise the hearings. PIO noted as soon as we have it nailed down we will send out a newsletter and post the info on the web site.
7/7/2008	3:16 PM	Jean Edwards called and left MSG 803-730-2462 c, I'm in South Carolina and I was wondering if they have come up with a scheduled meeting date for this SR 429 in Mount Dora? Thank you.

6/6/2008	10:03 AM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com]  Sent: Fri 6/6/2008 10:03 AM  To: edwardstles@bellsouth.net  Cc: Deana Leffler  Subject: SR 429 - Wekiva Parkway - PD&amp;E Study - map request</p> <p>Jean,</p> <p>It was nice speaking with you earlier. Attached is the Lake County West map for the Wekiva Parkway that includes the roadway location in Mount Dora. I hope you find this helpful. Please feel free to call or email with questions or concerns.</p> <p>Mary Brooks</p>
6/6/2008	9:01 AM	<p>Jean Edwards called and said I called you yesterday; thanks for calling me back but we missed each other. We have a house on sandy bell road in Mt. Dora; you sent email that meetings would be in July. Is alternate 1 still the one you're looking at? PIO noted we had recommendations for preferred alternatives now, have had them posted on the web site for a while. She said she hadn't been on the web site in "a couple of weeks." PIO said I could email her the map for that location. She asked that I send to her email edwardstles@bellsouth.net &lt;mailto:edwardstles@bellsouth.net&gt;</p> <p>She said we're trying to make a trip down there from South Carolina, but with the price of gas ... PIO noted we're working on the next newsletter and will send that out several weeks before the hearings are scheduled. She said thank you so much.</p>
6/5/2008	5:28 PM	<p>PIO returned call to 803-730-2462. Original call 421 p.m. but no MSG. PIO left MSG to call me back, if get voicemail please leave MSG so I can research info and get back to you.</p>

Contact		Kurt Eiken
Date	Time	Regarding
10/2/2008	9:52 AM	Kurt Eiken (sp?)/Fla. Senate Committee on Transportation 850-487-5938 called saying he saw a Jan. 2008 report including info on SR 46 in east Lake County. Is that still the preferred alternative? PIO said yes, preferred alternative posted on OOCEA web site hasn't changed in quite some time. He asked would that be tolled? PIO noted SR 46 portions in Lake and Seminole counties being developed by FDOT and not tolled at this time, but as you know this project is not fully funded, and future funding scheme may have to include tolling. He asked what's happening now? PIO noted we're waiting for final approval of EA from FHWA so we can set the public hearings, hope to have those in November or December, and finish study in early 2009. He said okay, so you're just waiting for the public hearings and then will go from there? PIO said that's correct. He said okay, thinks that's what he needed.
Contact		Jeannie & Willard Eldridge
Date	Time	Regarding
3/28/2008	12:15 PM	Jeanie Eldridge/Wilson Road 931 231 5668 called and said I'm in Fla. and we heard on the news that they were going to go from I-4 up by the St. John's River and not come by us, is that true? PIO noted the alignment has not changed since we last spoke, and indeed hasn't changed significantly for some time. PIO noted the maps are on the web site. She said they don't have a computer. She said she was in Florida, hadn't heard anything in a very long time, and thought if something was going on they could attend while they were here.  PIO noted we're still finalizing all the documentation needed to set the public hearings, still looking at July. PIO noted we will send out info once those dates have been set, but she hasn't gotten anything because we don't have anything new at this point. She said they keep getting things from these lawyers, what should we do about that? PIO noted that's up to them, but keep in mind project is not funded, and even if funded you'd be looking at 5 years before construction. PIO noted lawyers have been sending solicitation letters not just to them but to thousands of people - several times - in the study area. PIO said it doesn't necessarily mean they are directly affected. PIO said if they are directly affected they would be contacted by FDOT in Lake and Seminole counties, or the EA in OC. PIO went over schedule for rest of study, and noted agencies working on financing plan, hope to have some news in a month or so, or certainly we would have more info on funding and schedule at the formal public hearings. She said okay, sorry to bother you, but thanks for the info, will check in again some time. PIO said she's welcome to do so.

Date	Time	Regarding	
6/24/2008	4:37 PM	Tyler Everett/Akerman Senterfitt law firm 407-254-3598 called regarding the Wekiva Parkway. Said he saw the overall preferred alternative on the web site and wanted to know if it was the latest and greatest? PIO said that's correct, that's what we're taking forward to the public hearings in August. PIO noted if there's a consensus of opinion out of the hearings, there might be some changes to the alternative as a result. He said he understood it wasn't final, that's what he needed. They have a client and are just trying to keep track on where the road is going.	

Contact		Lou Fabrizio	Primerica Group
Notes		Regarding	
Date	Time	PIO met with Lou Fabrizio and David Salanitro/Primerica Group at OCEA conference room. Lou said they have property on the SW corner of SR 46 and Orange Boulevard in SC and in LC on CR 437 and SR 46 (no direct impact to that one, he acknowledged). He asked about access to the Wekiva Parkway? PIO noted there will be slip ramps in various locations in Seminole County, noted if you blow up the map on the web site, you can see them. They also asked about the configuration of the road in the area of their SC property, which PIO discussed. PIO noted will be at grade in that location; they're just east of where the elevated parkway will turn south from 46 to go to SR 417. PIO noted no apparent impacts to their property access on SR 46 or Orange Boulevard. Lou asked about projected traffic? PIO noted 2030 projections show upwards of 90,000 vehicles a day in some locations. PIO noted traffic maps are on the web site under the viable alternatives meeting exhibits. They asked about traffic coming from different directions and access to	
9/2/2008	3:00 PM		

property, which PIO pointed out on the board. We also discussed SR 417 interchange and ramps to International Parkway, as well as interim FDOT project in that area. Lou asked if this was it? PIO noted it's the preferred alternative that's a result of more than three years of this study. It is what has been determined most closely minimizes impacts will meeting the transportation need. PIO noted they may hear about a coalition of HOA's pushing another alternative. PIO pointed out that potential route on the board, noted associated issues. Lou said he'd heard some homeowners were battling Brenda Carey on something...Lou asked about the schedule? PIO went over funding challenges, project breakdown (DOT vs. OOCEA). PIO noted it will likely be done in sections and OC probably first.

9/2/2008	2:59 PM	David asked about SR 414 and realignment of SR 429, which I pointed out on maps. PIO noted schedule for SR 414, phase I by June 2009, noted Phase II being packaged with Wekiva Parkway in terms of funding. David asked about CR 46A realignment. PIO noted area of existing CR 46A to be abandoned, trying to open up wildlife corridor. PIO noted coordination with HCE, FDOT looking to put roadway 100' away with a buffer, but homeowners still not happy. PIO noted we have to be able to defend condemnations in court and have to show we tried to minimize direct impacts. We discussed the SR 46 configuration in LCW and the SR 46/US 441 interchange. Lou said he understands Mt. Dora not happy about that. PIO noted the at-grade intersection with a flyover is less expensive, less visible to surrounding residents and similar to what's been built to the north on US 441 on the improved sections. Lou said he's on the Lake County Chamber; he's familiar with SR 46 being replaced largely by the Wekiva Parkway, especially through Plymouth. They asked if the road would be tolled? PIO noted at this point only OC portion tolled since being done by OOCEA. PIO acknowledged with the funding issue, a number of funding options including tolls also being looked at for the rest of the roadway. PIO noted there already are discussions about local access issues that would have to be addressed if road were tolled, folks not going to want to have to pay for short local trips when they don't have an option. David asked about the OC interchange? What happened to Ponkan? PIO noted Kelly Park Road has been selected as the local access interchange for Orange County as preferred.
9/2/2008	2:58 PM	They asked several questions about timeframe for the project, will it ever be built? PIO noted even if we had the money it would take 4-5 years to start construction, with the other phases we have to go through. PIO noted there is push on by various agencies to come up with a financing plan to make this happen sooner rather than later. They were thankful for the meeting, wanted to be sure they were telling commercial clients the right thing about the property.

5/2/2008 12:46 PM To Whom it may concern,  
We encourage those whose decisions influence this project to consider alternative routes away from The Glades at Sylvan Lake. 5+ years ago there was very little development and it resulted in a nice quiet community which was part of the reason for moving here. Little by little the peace is being taken away from us through continuous real estate development and now major road construction.  
The bears, racoons, hawks and many other forms of wild-life have co-habitated with us over the years and soon this will disappear should you elect to intrude via major roadways  
  
PLEASE consider a peaceful alternative route.  
Thank you  
Ron Fava

Cc: Deana Leffler  
Subject: RE: WEKIVE BELTWAY MEETING  
Hello,  
I'm just back from vacation and seeing your email. Before I left, we were waiting for approval on some study documents from the Federal Highway Administration. Once those documents are approved, we can publish them and schedule the public hearings. This process is required by law. We had certainly hoped to have the FHWA approval before now, hence the previously published hearing timeframes, but we must wait for the FHWA to move forward.  
To my knowledge, the preferred Wekiva Parkway alignment alternative posted on the OCEA web site has not changed in quite a few months. That alternative was arrived at after more than 200 meetings with the public, local, state and federal agencies and elected officials, and other community stakeholders, whose input was invaluable and which resulted in many, many revisions to the alignment along the way.  
I will get with my colleagues to see what the latest is, and if I hear anything different has come up while I was out, I will get back to you.

Subject: SR 429 - Wekiva Parkway PD&E Study - Query Response

Hello Mark,

Your email below to the Governor's office was forwarded to me via FDOT, so I apologize for the delay in responding. As we have discussed in your other recent email (sent directly to me), I understand and appreciate your frustrations. There is a complex and detailed process that must be followed when developing a project of the magnitude of the Wekiva Parkway, a 25-mile roadway that will complete the beltway around metropolitan Orlando. There also are a variety of agencies and stakeholders involved, and we must include all of their input in our evaluations and attempts to develop this project while minimizing impacts to property owners, community facilities and the environment. While we have, as part of the Project Development and Environment Study (PD&E), arrived at a Preferred Alignment Alternative, that has not yet been approved. The Preferred Alternative must be formally reviewed and commented upon at formal public hearings before we can begin the formal approval process. We are in the process of setting these hearings, but have been awaiting some finalization of documents from FHWA. Once that is received (I believe the study team has another meeting with FHWA today, in fact), we can schedule the hearings, hopefully in late October to November.

9/17/2008 8:28 AM

If there is no overwhelming consensus that revisions are still needed to the Preferred Alternative, we will proceed through the final approval process and wrap up the PD&E Study probably in the first quarter of 2009. From there, as you know, the schedule becomes more tentative as this project is not fully funded. For the Orange County portion, the Expressway Authority has funding for final design, which could start by late 2009 and typically takes a couple of years. OCEA also has some - but not all - of the money needed for right of way acquisition, which could begin a year or so into design and also typically takes a couple of years. The remainder of right of way acquisition and construction are NOT yet funded. The Florida Department of Transportation, which is developing the Lake and Seminole County portions of the project, does not have money programmed for the next step, final design, but has some money slated for right of way acquisition. The FDOT also lacks funding for the remainder of property acquisition and construction of their portions of the Wekiva Parkway. (Once right of way acquisition begins affected property owners will be contacted directly by either the OCEA (or their consultant) or the Florida Department of Transportation or their agents, depending on their location.)

9/17/2008 8:27 AM

So the schedule for this project remains heavily dependent on the future availability of funding. As I believe I've mentioned, several agencies have been working on a financing plan to be able to proceed with the next phases of the project, and I hope to have information on that plan by the end of the year. I hope that helps. We will be sending information to all property owners and other interested parties as soon as we can set the public hearing dates. Please stay tuned, and feel free to contact me directly with other questions or concerns.

Mary Brooks

Cc: Deana Leffler  
Subject: RE: WEKIVA BELTWAY MEETING

Hello Mark,  
You are correct - the public hearing dates have had to be pushed back a number of times. We are still waiting for approval from FHWA, the National Park Service and another agency or two on various documents that must be finalized before we can set the hearings. We were hoping to have them in mid-October, but now it's looking more like late October to early November. I understand your concerns and frustrations. We are also anxious to finish the study.  
Once the hearings are set we will send out a newsletter, as well as update the information on the web site. We probably also will do an email blitz to all those with email access. Stay tuned.

Subject: FW: ANOTHER PLEA FOR ANSWERS

9/10/2008 11:56 AM From: WHEELIEFIELDS@aol.com [<mailto:WHEELIEFIELDS@aol.com>]  
Sent: Wednesday, September 10, 2008 11:56 AM  
To: Governor Charlie Crist  
Subject: ANOTHER PLEA FOR ANSWERS

DEAR GOVERNOR CRIST:

AFTER 20 YEARS OF ATTENDING MEETINGS, READING ARTICLES, AND BEING APPROACHED BY ATTORNEYS WITH MAPS SHOWING THAT WE IN THE AREA OF HWY46 AND 46A IN SORRENTO FLORIDA LIE IN THE PATH OF THE WEKIVA BELTWAY. NOW THAT THE PREFERRED ROUTE HAS BEEN BROUGHT OUT AND NOW IT'S PROCEEDING TO THE DESIGN STAGE, IT IS TIME TO TELL US FEW HOME OWNERS WHO REMAIN TO BE TOLD ANYTHING. TWENTY YEARS WE ATTENDED MEETINGS SHOWING US IN THE PATH AND NOW MAPS STILL SHOW US IN THE PATH. IT SEEMS THAT NOTHING HAS REALLY CHANGED, EXCEPT A BUNCH OF PEOPLE DID GET RICH OFF THOSE YEARS. I AM MAKING A PLEA FOR THOSE OF US IN THIS AREA TO TELL US SOMETHING AND NO LONGER LEAVE US IN THE DARK. WE KNOW ITS GOING TO HAPPEN AND IT'S A DONE DEAL. BUT IT SEEMS THAT WE THE VERY FEW SMALL TIME HOMEOWNERS ARE LEFT IN THE DARK. WE ARE OF MOSTLY UPPER IN AGE AND WOULD LIKE TO KNOW HOW TO PREPARE FOR OUR REMAINING YEARS. HOPEFULLY NOT OUT OUR HOMES INTO A NURSING HOME BECAUSE EVERYONE HAS DECIDED WE'LL TELL THEM WHEN WE GET READY. MEETINGS CONTINUELY GET POSTPONED BECAUSE THEY ARE AFRAID THAT IF THEY TELL US THEY HAVE TO DEAL WITH US. LAWYERS SAY CONTINUE LIVING YOUR LIFE AS IF NOTHING IS GOING TO HAPPEN. THAT IS EASIER SAID THAN DONE. AFTER 20 YEARS OF THIS AND NOW BEING TOLD ITS APPROVED AND HEADING FOR DESIGN STAGE, PLEASE LET US IN THE EASTERN LAKE COUNTY AREA KNOW.

9/10/2008 11:55 AM MOST OF THE PEOPLE IN THIS AREA ARE ANGUISHED AND DEPRESSED NOT KNOWING. WE SMALL TIME OWNERS HAVE THE LEAST FINANCIAL IMPACT ON THIS BELTWAY, BUT YET WE SUFFER THE MOST MENTAL ANGUISH OF BEING LEFT IN THE DARK. TRY LIVING WITH THIS FOR ALL THESE YEARS, NOW TOLD ITS GOING TO HAPPEN, BEING APPROACHED BY LAWYER AFTER LAWYER AND HAVING THE SCUM COME OUT SAYING THAT WANT TO FIND A HOME IN THE COUNTRY AND WANT TO LOWBALL YOU BECAUSE THEY INTEND TO MAKE A FEW DOLLARS AND KNOW WE ARE MENTALLY BEATEN UP. WE ARE TRAPPED, TRY SELLING YOUR HOME AND PROPERTY WHEN IT LIES IN THE

PATH OF THE WEKIVA BELTWAY. PLEASE TELL US.

THANK YOU FOR LISTENING

MARK FIELDS

10/3/2008	9:49 AM	PIO returned call to Larry Fisher 407-665-1130, 321-947-6189 my mother in law's property at orange avenue and 46 in Sanford is proposed to be taken by Wekiva Parkway, was wondering when you're going to start purchasing. Heard Lee Constantine was on Bud Hedinger and he said we could be driving on it by 2015, is that true? PIO noted it's 2008 so that's possible depending on how we overcome the funding challenges; this project is not fully funded, not even close. PIO noted it's 2008, we need to finish the study say early 2009. But FDOT, which is doing lake and Seminole portions, doesn't have money for future phases. FDOT has no money for final design, some for ROW, but none for construction. PIO noted agencies are working on a financing plan, hope to have something on that by end of the year.

10/3/2008	9:48 AM	He said another thing Lee said was they had closed on the Pine Plantation property, is that true? PIO noted closing is next week and appropriate agencies have approved it, believe Florida cabinet approved on Tuesday and OCEA board on wed. He said when would be the best time to get a lawyer? PIO said that's up to individual and people do it at all stages some have lawyers now; others wait until they absolutely need them. PIO noted personally, until we get into design and start nailing down exactly how much property we need from each owner, there's not a lot a lawyer can do. He said okay, he appreciates the input and appreciates me calling him back. PIO said as soon as we can schedule the public hearings we will be sending something out to everyone.
-----------	---------	---

10/2/2008 2:29 PM Larry Fisher called and left MSG I live in SC and the Wekiva Parkway is taking some of my property. I'd like to know when the actual purchasing is going to be taking place for properties the road is on. 321-947-6189 Thank you.

Contact Notes Camille Flankey

Date Time Regarding  
11/12/2008 9:30 AM Camille Flankey 407-886-3347 called looking for the route for the 429 extension through north Apopka, knew it split off and went to Mt. Dora and then to the east. PIO noted we have maps on the OCEA web site, if she's at a computer I can walk her through the links She said she would be later this morning. She asked for the web address, which I gave her.

Dean Fritchen

Coldwell Banker Commercial

Date            Time  
9/16/2008      1:48 PM

Regarding  
Dean Fritchen/Coldwell Banker 407-975-3476 called, said he got PIO's MSG the other day and thanks. Did her understand correctly ... PIO noted nothing has changed re: preferred alternative, still working toward public hearings, probably early November-December, waiting for info from FHWA. He asked about construction schedule? PIO noted funding challenges, schedule in flux, even if had money would still be 4-5 years to get to construction, agencies working on funding plan. He asked what would happen out of the public hearings? PIO noted public will review and comment on the preferred alternative.

Either there will be a consensus to move that to approval, or if there's overwhelming opinion that something needs to change, then revisions would have to be made, then go to approval process. He thanked me for the info, wanted to be sure he was telling people the right thing.

9/5/2008	5:07 PM	PIO returned call to Dean Fritchen/Coldwell Banker, left MSG sorry I missed his call. PIO noted he can call me Monday when he's in front of the computer and I can walk him through accessing the maps. PIO noted the preferred alternatives on the web site are the same ones we have discussed in the past; nothing has changed.
9/5/2008	10:34 AM	Dean Fritchen/Coldwell banker called and left MSG. we've talked about the property at Round Lake and SR 46. I just wanted to find out the state of the final decision of the final configuration is. I think it's there. I'm on the internet now but wanted to visit with you before I ...determine if this is what it is. Would you tell me ... you can leave a MSG if you want. I'm in my office at 407-571-5525 maybe you could tell me exactly what to pull up to see the configuration that exists today. I'd appreciate it if you could. Over and out. Bye. Thanks.
7/3/2008	9:11 AM	PIO returned call to Dean Fritchen/Colwell Banker Commercial 407-571-5525, c 407-619-8848, left MSG that nothing has changed re: SR 46 and Round Lake Road re: recommended alignment, or in any other location for that matter. PIO noted now it's looking more like late September before we have all the authorizations from FDOT and FHWA on all of the documentation needed before we can hold the public hearings. It's really an administrative process at this point. PIO noted once those are scheduled we will be sending info out to everyone. Any other questions email or call me back.
7/2/2008	10:44 AM	Dean Fritchen/Colwell Banker Commercial called and left MSG I was touching base to get an update on what's going on with Highway 46 and the beltway. I know I can go to the email and all that sort of thing, but frankly I just like to visit with you. I have a couple of ... I'm talking about is that 61 acres, a very key location as it's turning out. I welcome the opportunity of talking with you because you're always very helpful. 407-571-5525 When you get a chance to return my call. If I don't talk with you, I hope to get to talk to you before the 4th of July, if not have a nice weekend. Always great to talk to you. Am trying to find out what's going on... what the latest is on Highway 46 and the beltway and the timeline. ... I know it's an indefinite thing... frustrating for all of us. Over and out. Bye bye. It's about 46 and Round Lake Road.

1/2/2008	4:10 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, January 02, 2008 4:10 PM To: 'Deana Leffler' Subject: SR 429 - Wekiva Parkway PD&E Study - OC map Deana, Please send a Wekiva Parkway OC map to Bertha Garner, 3384 Harry St., Apopka, FL 32712. Thanks. Please let me know when that's sent... Mary Brooks
1/2/2008	3:52 PM	PIO called back Bertha (and Eddie) Garner 407-889-3878, she wasn't there, spoke to Ed loud child noises in the background so hope he understood me) and told him Wekiva Parkway not affecting his parcel, project going in closer to Plymouth Sorrento Road, there are 10 parcels in their subdivision and then the large parcel that its actually going through. He said okay then.
1/2/2008	1:54 PM	Bert Garner 407-889-3878 called and said she lives on Harry Street, and asked when is the new road coming through? PIO asked if she was referring to the Wekiva Parkway? She wasn't sure. PIO asked what the nearest major cross street to her was? She said she's near hermit smith road, 3384 Harry Street. PIO explained we have begun buying property for phase II 429-201, but don't have funding for construction, could be another 5 years, unless funding becomes available. PIO noted we're working on phase I now from 441 to 429, and should finish that in summer 2009. She said she's seen that construction out

there. She asked if the project was going to affect her property? PIO noted we've started buying ROW, so she probably would have been contacted if we were going to affect her, but will check and get back to her. She said I had gotten brochures from real estate people, and before they said they were taking 11 people's houses. She said she would appreciate the follow up. PIO said it might take a couple of days to get back to her. She said that's fine.

5/7/2008	8:51 PM	<p>My name is Randy Garrett. I am a resident of Seminole County and I live in the Wilson Park Subdivision, which is located at Wilson Road and Orange Blvd. I am very involved in the community and local politics. Our HOA is in the process of forming its first Board of Directors. I will be running for the board, and once elected will encourage our board to join the Wekiva Parkway Community Coalition in an effort to keep the 417 expansion from winding through or near our community. I have reviewed the proposed routes, and I would like to express my support for Alternative Parkway Alignment Map C, which would allow for the expansion the parallel to the commercial area of International Pkwy. I cannot support and will fight any route that threatens to interfere with the peace and tranquility of Wilson Elementary School and our residential communities. It only makes sense that the route be ran through as much commercial area as possible, rather than disrupting the Students at Wilson Elementary School and the residents of the surrounding communities. I am just realizing the potential of the proposal and plan to join the coalition in an effort to mobilize the community. Thank you for your time and consideration.  I may be reached, if necessary, at (407) 739-8583.</p>	

Contact		Chris Gauthier	Apopka Chief & Planter
Date	Time	Regarding	
6/10/2008	12:33 PM	<p>PIO returned call to Chris Gauthier/Apopka Chief wondering since Jim Palmer's land if they're getting ready to start buying other property in this area? No, explained WPPA requirement to obtain conservation parcels and noted this was the latest one of those. She asked if project was funded? PIO noted current agency funding limits and efforts to fund, including looking at option of raising tolls. She said that got approved, right? PIO noted legislature approved allowing OCEA to tie its tolls to some price index, whether its' consumer or construction, so that tolls could go up with cost of living. But PIO noted the board would have to approve not only whether to increase tolls, but by how much and whether it would be cash only, or what. None of that has been decided. She asked so when would this project be built? Are we looking at another 10 years? PIO noted with the subsequent phases needed, and finishing the study in early 2009, even if we had the money you'd still be looking at 4-5 years for construction to start. She said what's</p>	

happening now with the project? PIO noted finishing documents, some posted on web, getting ready for formal public hearings in August, dates and locations not set yet. She said will the meeting be like the ones we had before? PIO said no, will be formal hearings, some time for people to review materials and then formal presentation and comment period. PIO noted will evaluate all the comments and if there is an overriding consensus then maybe some change or tweaking to the alternative might be called for. Re: her question about acquisition, PIO noted only discussions that have taken place about acquisition was Stanton Ridge developers approached OOCEA about early acquisition, but we did not agree on a price so that didn't go anywhere. PIO noted that's the one that put out the sign "future home of OOCEA..." noted we got a number of calls about that though that was not our sign. She asked if there anything else I wanted to add? PIO noted the importance of this project to finish the beltway around northwest Orlando, strict adherence to environmental protection in the Wekiva Basin, noted example of greatly increasing current wildlife crossings with new bridges that we will build, can get her the numbers on that if she's interested. She said not necessary. She said she'd been on the web site and got the map. PIO noted key points for OC are the local access interchange at Kelly Park Road, systems interchange just south of Lake County line, and interchange with future portion of JLAE at 441. She said that's all she needed, thanks.

6/10/2008 10:11 AM Chris Gauthier/Apopka Chief called and left MSG I want to do an update on the Wekiva Parkway. Please give me a call at 407-886-2777

5/5/2008	4:26 PM	<p>My biggest concern isn't the proximity to my home, whether it goes in as planned, or preferably over/on State Road 46. My biggest concern is that if it goes in as planned it will be within a couple of hundred feet from Wilson Elementary School, the day care facility next to it, and the Holy Cross Church which also has a day care facility. Not only the noise is of concern (most homes/hotels/businesses that purposely locate near a freeway take extra efforts for noise abatement in the construction) but of more concern is the fumes 5000 cars a day will produce right next to an elementary school and several day care facilities.</p> <p>Wayne Densch has put up a million dollars to create the new 4 field baseball facility that is already under construction and the planned path would literally put that on top or immediately next to it. The current plan is just nuts when consider the amount of undeveloped land on either side of SR 46 - or if you look at the area around the St. Johns</p>	

River just north of SR 46.

5/5/2008 4:25 PM

We all had choices to move to where we most wanted to be. I used to be an Orange County resident for 22 years. I moved here because of the peace and quiet (and excellent services) Seminole County had to offer. For me and my wife it was worth the extra 40 minute commute. Wilson Elementary has been a wonderful experience for my two boys. Why the current plan was developed is simply bewildering. If we as citizens cannot change the nonsense the current plan suggests, I would recommend we all make sure we challenge our property valuations - as our property values would decline, so should our taxes. And on that note, based on the last year's property value downturn, you should be doing that already... it will simply be worse if a freeway is built in our backyards and next to our school.

Subject: SR 429 - Wekiva Parkway PD&E Study - public meeting & property query

Mary, I sent the below response to Emma on Aug. 13 regarding the public hearings, and believe you were copied on it as well. As noted below, we are looking to have the public hearings now in late October or early November.

Re: the Live Oak Animal Hospital at 5720 Wayside Drive in Sanford, the Seminole County Property Appraiser's office shows this parcel as located at the northwest corner of Orange Boulevard and Wayside Drive. If that is the case, and if you review the Wekiva Parkway Preferred Alternative for Seminole County on the Expressway Authority web site at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/assets/WekivaParkway/Ex%201-6%20Sem%20Co%20Pref%20Alt.pdf>>, you will see that the planned parkway would hit the southern portion of this property on Wayside Drive. I've included in this email a thumbnail view of the property in question with regard to the project alignment in that area.

Since we are only in the conceptual stage with this PD&E Study, the exact impact would be determined once the project moved into final design. Please be advised that the Florida Department of Transportation, which is developing the Seminole and Lake county portions of this project, does not have funding currently for design, so the schedule for that is tentative at best.

However, the FDOT, Expressway Authority and other agencies are working together to develop a financing plan to make this project a reality sooner rather than later. I hope to have more information on a financing plan by the end of the year. I hope this helps. We will send out a project newsletter once the public hearings are scheduled, and will also update the OOCEA web site. Stay tuned.

Hello Emma,  
In a recent meeting with FHWA, they told us they need more time to review the study  
documentation, so it is now looking more like late October or early November before we  
can hold the public hearings. Again, we will send out info to everyone in the database  
once the timeframe has been nailed down, and will also update the web site. Stay tuned.

Date	Time	Regarding	
5/14/2008	11:30 AM	Mary Gorman/attorney in Tampa 813-254-8980 called and said Eric Ryder in our office had emailed you and you were so generous to get back to him quickly, thank you. She said they're representing some clients and asked if the SR 46 bypass funding would be separate or part of the overall Wekiva Parkway? PIO noted SR 46 bypass is in Lake County and FDOT was developing the Lake and Seminole portions. PIO noted bypass being included in overall funding. She said so the \$40 million would go to the Bypass? PIO noted that in no way has been determined as the project is not fully funded. PIO noted the conversation has been that the \$40 million currently programmed for ROW in Lake might be moved to design, the next step, so the FDOT could continue moving forward with the project. She said and the public hearings are still in July or August? She asked if I work of the FDOT? PIO said no, I'm a consultant for the EA but have been serving as the PIO on this for both agencies. PIO said it's looking more like August at this point. She said okay and thanks for the info.

8/19/2008

3:07 PM

To Whom it may Concern:

I wish to express my extreme dislike for the "Preferred Alternative". I moved into Berington Club subdivision in April 2007 and was surprised to find that the Seminole County's Commissioners statement that no expressway would traverse Seminole County had been discarded.

I moved to this more rural and restful location to avoid traffic and noise created by just this kind of road. I am writing to ensure my voice is heard prior to any selection of this noisy, traffic producing, eyesore is made through our rural neighborhood.

I believe there is a solution to the problem. It is the route currently being proffered as an alternative by the WPCC and listed as the "Northern route". This would eliminate all of my concerns and ensure my full support of the Western Beltway.

Thank you for considering my thoughts and please take whatever action you can to ensure the Northern Route is selected as the true "Preferred Alternative".

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the\_\_\_ middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only\_\_\_ reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".\_\_\_\_\_ In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.\_\_\_\_\_

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - acquisition query

Susan,

I'm afraid you're misinformed. We have not begun right of way acquisition for the Wekiva Parkway. The only properties we have been seeking are the four listed in the state legislation, which are supposed to be acquired for conservation in conjunction with developing the roadway. We have acquired three of the four conservation parcels now.

We anticipate finishing the Project Development and Environment Study in spring-summer 2009. As part of that, we hope to have the public hearings on the preferred alignment alternative in Dec.-Jan. Once the study is complete, the Expressway Authority could begin final design in, say, late summer-fall 2009. We would need to get well into design, where details affecting properties would be more nailed down, before right of way acquisition would begin in earnest. I hope you find this information helpful. You can also find maps and other information about the project at

<<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.a.spx>>

Hello C'Sandra, You've got a couple of different things going on in your email below... The Binion Road area is on the SR 414/429 John Land Apopka Expressway project phase II, which is not yet funded for construction. Some of the ponds on phase II, however, have been dug because we needed the fill dirt. On the SR 429 Wekiva Parkway, we haven't set the public hearing dates yet, and it's looking more now like late September before those will happen. Before we can set and advertise the hearings we have to get approval on a number of documents from FDOT and FHWA, and that administrative process is taking longer than expected. We will send out a newsletter with hearing details once nailed down and also will update the web site when that info is available.  
Stay tuned!

C'Sandra,  
Apologies for the delay in getting back to you. As we have discussed previously, it is correct that the Wekiva Parkway is not yet fully funded, and that funding challenge puts the project schedule somewhat in a state of flux. We anticipate finishing the Project Development and Environment Study with an approved alignment late this year or early in 2009. As noted, the Expressway Authority has funding for the next step, final design, as well as some money for designated real property acquisition in Orange County. However, funding has not yet been secured to complete right of way acquisition nor for construction on the OOCEA portion.

4/8/2008 10:00 PM The Expressway Authority, the Florida Department of Transportation and other agencies are actively working to develop a financing plan to bring this project to fruition, and I expect some news in that respect within the next couple of months.  
However, due to the uncertainty of scheduling, I always advise property owners to live their lives and do whatever repairs, renovations or other changes to their property as they deem fit and/or necessary in the meantime.  
We will be able to provide additional information for property owners such as yourself in the coming months. Thank you for your patience as we work through developing this major transportation improvement.

Hello mary,  
I just wanted to let you know I sent you a fax this morning from our lawyers secretary concerning 429. If I could have a response I would greatly appreciate it. Thank You So Much. C'Sandra hall

4/7/2008 9:09 AM PIO received fax from C'Sandra Hall/3715 Hideaway Rd., Apopka 32768 noting meeting with her attorney and OOCEA's Bob Simon and Joe Passiatore and Deborah Keeter, at which it was stated the OC portion of the roadway may never be built. She requested verification that was the case.

4/4/2008 3:24 PM Good morning Mary - we received this from our lawyer and I don't really understand. I contacted you last week and was told meeting were being prepared for July, We are assuming this meeting was to set things in motion. Now we are being told that this part may not be built at all and go ahead with our land sales if we choose or whatever else we choose to do with it. Have you been advised of this?

Wilson, Garber & Small Letter to the Hall's

On April 1, 2008, Mr. Wilson and I met with Robert Simon (attorney for the Expressway) to get a status as to when the Authority might seek acquisition of your property. They advised us that at this time the preliminary plans of the Authority indicate that your entire property will be taken. However, we were told that there is currently no funding for design or construction nor has the final alignment been approved. In fact, Mr. Simon stressed that this segment of the expressway might never be built at all. Mr. Simon promised to keep us in the loop to any future developments and indicated that there would be several public hearing occurring in the future regarding alignment issues.

Yours,  
B. Diane Smith

Subject: SR 429 - Wekiva Parkway PD&E Study - update & ROW query

Hello C'Sandra,  
The public hearing schedule has been pushed back to this summer, hopefully in July. There's a lot of documentation required to be finalized by state and federal regulations before we can set the formal hearings. Among those are assessments of potentially historical properties, some of which we've had trouble getting access to. We think we have those issues worked out and will have everything ready to be able to hold the hearings in July. We will, of course, be sending out info to everyone once the hearing details are determined.  
We are only the PD&E Study stage and must get at least part of the way through final design before the right of way acquisition process will begin, so I don't know at this point who will be handling the property acquisition. We will keep you posted. I hope that helps.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.  
Comments: We are in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County

---

We believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area. We understand that any route has negative impact on someone. However, if a route is needed then the least impactful on the environment and the existing residential neighborhoods and businesses should be used, as well as the route that will accomplish the goals of the Parkway most completely

---

We are opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street". In our opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so we do not support this option. If the Wekiva Parkway is to reduce congestion on I-4 then it must have a direct connection to I-4 or few people will choose to take it. Sincerely,  
William and Lynda Hammond

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - Stanton Ridge purchase

Thank you so much for keeping me in mind. I spoke with Deborah and she told me that it wasn't a critical part as of yet. If you have any voice in this matter and can convince them to take a hard look I really would be grateful. No the land is not in my name but I do have a vested interest in it.

Thank you again, Paul

Subject: SR 429 - Wekiva Parkway PD&E Study - Stanton Ridge purchase  
Paul,  
As we just discussed, the Expressway Authority has acquired Stanton Ridge. For more information you may contact Deborah Keeter of PBS&J at 407-647-7275 or ddkeeter@pbsj.com <mailto:ddkeeter@pbsj.com>.

Subject: RE: Stanton Ridge Homes  
Okay thanks. A Paul Hampton also has inquired several times about the purchase of Stanton Ridge; believe he's involved in some sort of lawsuit with the developer... Should I let him know the sale has taken place, or do you think he's already been contacted?  
Mary Brooks

831 a.m. PIO called Paul Hampton/BLB Foliage 407-886-8552, who also owns 3003 Yothers Road to let him know the Stanton Ridge purchase went through just a few weeks ago and for him to contact Deborah Keeter, the purchasing agent. He said he'd never spoken to her before. He said he's working in his greenhouse. PIO said I'd email him the contact info, confirmed his address. He said so they're able to do land acquisition now? PIO said I'd not heard anything about it after the last negotiations died, but guess Stanton Ridge came down on the price to where they were able to do it. He said thanks so much for your help. Here's something I'd done in good faith, they were supposed to deed the house back to me and they didn't and the bank is foreclosing on them.

10/9/2008 5:21 PM PIO called back Paul Hampton who said 3003 Yothers Rd. is slated to be taken away by EA  
I'm paying attorneys to fight the lawsuit. I sold the land and they were supposed to deed me back 3003 Yothers Road with 2 acres and a house, but they didn't so I'm suing. He said the developer is not putting up any houses because the market is bad, so the bank is foreclosing on them. I've got a suit against them and the bank, and the bank has foreclosures against them. So if you did some kind of early acquisition, it would help all three of us out of this situation. The path of the road for the last 3-4 years, my house is in your pathway. There's not much way around this house.

10/9/2008 4:32 PM Paul Hampton 407-886-8552 called and left MSG sorry I missed your call the other day.  
I'm looking to talk to the purchasing agent for you guys, to try to hash out some kind of deal. I know it's not my property, but can we perhaps still try to hash out a deal that all of us can come to an agreement with. Maybe it's better for the road to buy now rather than later to get to the end of the lawsuit. Was hoping to get his or her number or have them call me at 407-383-7828 to set up an appointment with them. Thank you so much and have a great day

10/9/2008 4:31 PM PIO noted I can pass along his request to the ROW folks, but want him to know that we are not doing any early acquisition, only the conservation parcels required by state legislation. He said he knows you shut down the property next to me ... PIO noted Stanton Ridge put up that sign; that was not our sign. We did not take nor pursue Stanton Ridge. They came to us when the market died for early acquisition, but they wanted too much money so those negotiations went nowhere. He said what about I read in the news that

Gov. Crist signed this law for transportation. PIO noted that had not trickled down to the OOCEA at this time. PIO noted traffic and revenues were down, reiterated we have not started early acquisition - just the conservation parcels required by law. PIO reiterated I would pass his request along to the ROW folks, but wanted him to know the straight dope He said he's lying awake at night wondering if he's going to lose his house, is trying to take care of his family and if EA bought this it would end a very tedious situation. He said he appreciated anything we could do.

10/3/2008	9:08 AM	PIO returned call to Paul Hampton 407-383-7828, 407-886-8852, left MSG that if he's calling re: Wekiva Parkway, we're still waiting for FHWA to approve some documentation so we can schedule the public hearings. Hoping will be in November but maybe also December. Left my number so he could call back or email me, left my address.
9/30/2008	12:09 PM	Paul Hampton 383-7828, 407-886-8852 please call about the road.

Please find attached my comments regarding the proposed Wekiva Parkway.

8/19/2008 9:15 PM I am deeply concerned about the proposed location of this extension. The current path  
will put in the path of local homes, ball parks, churches and family run businesses. In  
addition the proposed path goes very close to Wilson Elementary, which is a huge concern  
for the local families. Our community off of Wayside and Orange has been a nice sleepy  
community with great family values. I do not understand why anyone would want to run  
a major highway down through Orange and Wayside where many make their home and  
lives. Highway 46 is already close to a major artery, why would you not utilize this  
already completed highway to assist in your goal to connect the 429 and 417 to I-4?  
International Parkway is also a viable option from 46. There is plenty of space and land  
that is not utilized at the corner of 46 and International Parkway that can be used to cut  
through to the I-4 connection. I would ask that you really consider the impact this  
current proposal will have local families who have worked very hard to have these homes  
and small town feel, and would really like to keep it that way! In the current times of the  
economy it is unbelievable to me that local government would move to displace families  
and impact a simple life that has been fostered off Orange and Wayside! Please keep our  
small town feel community intact! It is the last greatest thing in America. NOT every  
piece of grass needs to be demolished in this Country and there needs to come a time  
where our local elected officials start fighting for the citizens of the communities they  
serve and stop worrying about big business and development, which are the deep pockets  
We will never fix the political system in this County, Country until we take money out of  
politics and start doing what is really right for the citizens that are impacted by decisions  
like this.

To: Mary Brooks  
Subject: property on SR 46 near Wekiva Parkway plans  
Hello Mrs. Brooks,  
Thank you for taking the time to speak with me yesterday. I know how busy you must be with all the current projects underway! I have attached the boundary survey for the 10 acres we discussed. It is directly on SR 46 in Sanford, just east of the Wekiva River and the bridge at the Seminole/Lake county line.  
The address is: 8400 W SR 46, Sanford  
Currently there is a single residence with a detached garage. Although they keep the grounds looking nice, it is basically untouched except where the house was placed. This property is totally surrounded by the Lower Wekiva River Preserve State Park. It is also unusually positioned in that the rectangular shape of the parcel is turned on an angle. In other words the parcel is turned so that the "corner" of the rectangle touches the SR 46 versus a "side". (Will make more sense when you open attachment!)

10/15/2008 12:05 PM I am representing the owners who need to sell this property. Therefore, I am looking into every prospect, every opportunity. According to the most recent alignment for the Waive Parkway this property may be of great value in the implementation of that plan.  
Please take a look at the survey and let me know what you think. If there is another department more appropriate for me to work with, please forward that information to me.  
Thank you for your time and assistance,  
Tamera Hartman

Attached is the graphic we discussed -- this depicts the concept for the preferred

alternative. Your client's parcel is #3675.

10/14/2008 12:14 PM PIO spoke to Tamara Hartmann/ Grace Realty-Commercial Division (321) 228-3888 who asked about the Wekiva Parkway status, noted she was representing a very sweet elderly couple who desperately needed to sell their home. She wanted to know if their property was affected, and if so by how much. Said it was hard to tell from the maps. PIO noted I was on the road, but if she would email me the details I would look into it for her, gave her the email address. She said she would, really hopes she can help them, looking at all avenues.

Sent: Tuesday, June 10, 2008 2:06 PM  
To: 'Harwood, Jeff (CTV-Orlando)'; 'Lindsay Hodges'  
Subject: RE: Right-of-way  
Jeff,  
Regarding your questions below:  
1) This is a question that would more appropriately be posed to Rep. Dean Cannon, who we understand you've been in touch with. As noted previously, the detailed terms of the deal are being worked out in a Purchase Agreement to be executed between the seller and the collective buyers.  
2) Pine Plantation was raised as an information item at the OOCEA ROW committee meeting. No action was taken and the subject will be brought back at a later time for further discussion.  
3) Our understanding is that Rep. Cannon was the only elected official at the aforementioned meeting. For more information on this meeting, it would probably be more appropriate to speak to Rep. Cannon.

To: Lindsay Hodges; Mary Brooks  
Subject: Right-of-way  
A couple of questions:  
1) Why was Dean Cannon riding shotgun on the Pine Plantation deal? Has Broad & Cassel signed off on it?  
2) I understand Pine Plantation was discussed at yesterday's Right-of-Way Committee, what decision, if any, was reached?  
3) Were there any other public officials in the May 21, 2008 meeting chaired by Rep. Cannon? If so, who were they? Were did this meeting take place?  
Thanks,  
JJ

6/10/2008 9:00 AM

PIO met with Harwood/WFTV Ch. 9 and provided purchase agreements for conservation parcels. Also provided Pine Plantations memo obtained from Lindsay. Jeff requested copies of Pine Plantations memo only. He said Lake County court records showed \$80 million for the Neighborhood Lakes purchase, not \$74 million. PIO noted I'd not heard that figure. PIO asked that he forward the question in an email and I'd get with the lawyers on that. He said he would do. Harwood paid \$0.60 for the four pages.

Subject: SR 429 - Wekiva Parkway PD&E Study - conservation parcels purchase II  
Jeff,  
As the lead acquisition agent designated in the 2004 Wekiva Parkway & Protection Act, the Expressway Authority paid the following on the other conservation lands:  
New Garden Coal \$ 2,500,000  
Silvestri (Parcel F) \$ 7,953,167  
The New Garden Coal agreement involves a both a fee title acquisition for the Wekiva Parkway right of way and a conservation easement over the remainder.  
FDOT may still reimburse the OOCEA for the New Garden Coal purchase price.

Subject: SR 429 - Wekiva Parkway PD&E Study - conservation parcel purchases  
Jeff,

Apologies for the delay. Below is the cost and breakdown for the Neighborhood Lakes conservation parcel purchased as part of the requirements of the 2004 Wekiva Parkway & Protection Act. I'm working on the info on the other two parcels also and hope to get to you this afternoon. Please give me a hard deadline so I can pass that on to the right of way folks. Thanks.

Neighborhood Lakes

At closing the payments for the property by the various purchasing parties were as follows:

Florida Department of Environmental Protection: \$23,940,980

Orlando-Orange County Expressway Authority: \$30,063,960

St Johns River Water Management District: \$12,558,122.80

Orange County: \$ 7,436,937.20

\$74,000,000

The above-referenced amounts for Neighborhood Lakes include \$10 million that was paid at closing by the Authority on behalf of the FDEP and which is to be reimbursed by FDEP to the Authority. Also, for the amount paid by SJRWMD, Lake County contributed funds toward that amount, post-closing.

Mary Brooks

6/4/2008	9:40 AM	PIO went to OOCEA to assist Jeff Harwood/WFTV Ch. 9 in reviewing Wekiva Parkway conservation parcel appraisals. Jeff requested 39 pages, total \$5.85 for copies. He also requested the total purchase costs of the New Garden Coal, Silvestri and Neighborhood Lakes properties. Said he already had the other two (both for Pine Plantations). He left but said he would be back with the \$5.85; didn't have change and OOCEA staff was in meeting. ... PIO briefed Mike Snyder and Paul on the WFTV records review.

 Hello Jeff,  
 As the public information officer for the State Road 429 - Wekiva Parkway Project Development and Environment (PD&E) Study, your query was forwarded to me. I will look into your information request on the Lake County land purchase and get back to you. What is your deadline for the information needed? As for your legislation question, the Wekiva Parkway and Protection Act was signed by then-Gov. Jeb Bush in June 2004, and included the directive to purchase several conservation parcels totaling approximately 10 000 acres. I've attached a copy of the legislation for your information. The portion dealing with the conservation acquisitions begins on page 8. Again, please let me know the

deadline for the remaining information requested. Thanks.

Subject: SR 429 - Wekiva Parkway PD&E Study - Request Response

Jeff and Steve,  
Thank you for the opportunity on Thursday to discuss the openness and transparency that has been the foundation of the Wekiva Parkway Project Development and Environment PD&E Study. The following information will address many of Steve's questions. Although both the need for the completion of the beltway and concerns about potential impacts to the Wekiva River Basin have been discussed for about 30 years, the discussions really gained momentum in 2002 when then-Gov. Bush appointed the Wekiva River Basin Task Force, followed in 2003 by the Wekiva River Basin Coordinating Committee, which had an even broader representation across the community spectrum. The WRBCC's recommendations for developing the roadway while also preserving this environmental jewel were codified in the Wekiva Parkway and Protection Act, signed in June 2004. The WPPA included creating the Wekiva River Basin Commission to oversee development of the Wekiva Parkway and to ensure the rest of the legislation was adhered to with regard to water quality and other resource protection. All of these committee and commission meetings have been posted and were/open to the public. It should be noted that the development process for the Wekiva Parkway is being heralded as a model for openness, engagement of all facets of the community and integration of land conservation in the planning of a major roadway. Area environmentalists, who in years past were the staunchest opponents to any project within this environmentally sensitive area, now point to the Wekiva Parkway as the way in which all such major roadway corridors should be handled. Anyone who called, emailed or otherwise requested information at any point along this PD&E Study received what was available at the time, including supplying hundreds - if not thousands - of maps over the last three years. Additionally, we have presented study information and received feedback from approximately 170 meetings with city and county commissions (posted and public), individual city and county commissioners and staff members, state agency representatives and state elected officials, HOA's and other community groups, churches, businesses, school officials and private property owners. We also have received and accommodated information requests from potential home buyers,

realtors, appraisers, attorneys, developers and consultants. And we've held six (6) public workshops in the three counties.

...

1/28/2008 11:54 AM

...Regarding No. 1: I tried sending the Wekiva Parkway overall alignment alternative map, but apparently the file is too big for your server. I emailed Jeff the link Friday to pull the map directly from the OOCEA Web site <<http://www.expresswayauthority.com/assets/Wekiva%20Parkway/Ex%201-2%20Overall.pdf>> as a matter of expedience.

This overall alternative is the result of three years of creating, evaluating, eliminating and refining a multitude of alternatives.

Steve also requested the size of the conservation parcels listed in the Wekiva Parkway & Protection Act for acquisition as part of developing this "missing link" of the beltway, to wit: Neighborhood Lakes, 1,587 acres in Orange and Lake Counties

Seminole Woods/Swamp, 5,353 acres in Lake County

New Garden Coal, 1,605 acres in Lake County

Pine Plantation, 617 acres in the City of Apopka

Regarding No. 2: As we discussed during the interview, a multi-agency agreement was reached to acquire Neighborhood Lakes in Dec. 2006 for \$60.2 million by the Florida Department of Environmental Protection Division of State Lands, St. John's River Water Management District and OOCEA.

The Seller for Neighborhood Lakes is listed in the agreement as Barn LLP, 6355 Metrowest Blvd., Ste. 330, Orlando, FL 32835, Attn: Nancy Rossman, President, Phone:

407-523-2323, Fax: 407-578-8323. The general partners in Barn LLP are listed as Seminole Investors, NRP Ltd. and North American Capital Corporation.

If you have further questions about this complex purchase, I can forward you the 55-page agreement.

As we also discussed, the necessary 300-foot right of way and a perpetual conservation easement were acquired on the former New Garden Coal property, now known as the Wekiva Mitigation Bank, in May 2005 by the FDEP Division of State Lands, Florida Department of Transportation and OOCEA for \$2.5 million. You're already aware of the owners for that LLC.

Again, if you have further questions about this complex purchase, I can forward you the 30-page agreement.

As also noted, discussions have begun with owners of the Pine Plantation property.

The Seminole Woods owners thus far have declined to discuss the sale of their property for conservation; it should be noted we do not need right of way from this parcel to build the Wekiva Parkway.

Steve also requested the estimate for acquiring ROW for this project as a percentage of the overall cost.

1/28/2008 11:53 AM

...This cost estimate is highly preliminary based on conceptual plans only. Of the estimated total cost (\$1.79B), the estimated cost for right-of-way in Orange, Lake and Seminole Counties is \$310.6M - about 17.35% of the total. More detailed ROW costs will be determined once the project moves into and through final design.

Steve also asked about the project phases. The OOCEA is responsible for the Orange County portion, which will be tolled. The FDOT is responsible for the Lake and Seminole County portions. If the project were, theoretically speaking, fully funded today, each remaining phase - final design, ROW acquisition and construction - would typically take 2-3 years. Since this is a 25-mile corridor, construction would most likely be done in sections, so it could be 5-10 years just to build the Wekiva Parkway completely (not including final design and ROW).

As noted this project is not fully funded. OOCEA has funding for final design and a small

portion of the ROW acquisition money needed. FDOT does not have money programmed for design but has some money programmed for ROW acquisition in Lake County. Due to the need to complete the beltway in an environmentally sensitive fashion, Orange County Mayor Richard Crotty, also Chairman of the OCEA Board, has formed a working group of core agencies to come up with a plan to fully fund this project. Once that working group reports back, the effort will be broadened to include a coalition of local and state agencies to obtain that funding. I hope that addresses your query. Please call or email for further information.

Subject: Re: Wekiva  
Jeff-  
The OOCEA Board in late October approved moving forward with the  
recommended Preferred Alignment and interchange alternatives to public  
hearings. The latest maps were posted on the web site in the first or second  
week of November.  
However, working drafts of these maps have been shared with dozens of city,  
county, state officials, HOA's, churches, schools, large property owners -  
any community stakeholder involved in the dozens of meetings we've had over  
the last year or so. To get to the maps we have today, we've gone through  
untold number of revisions and additional alternatives that were considered  
based on community input.  
We've taken the latest version of whatever maps were applicable to most of  
these meetings. There have been about 85 meetings to date.

Contact		Jerry and Mae Hawthorne	Hawthorne Realty
Date	Time	Regarding	
2/27/2008	3:42 PM	PIO returned call to Jerry Hawthorne/Hawthorne Realty	407-416-2049. He said he has

property in SC where it drops down to 417, at Wilson and Atlantic and has been getting letters from attorneys saying the county is taking his property. He said he's not so much worried about that, but wants to know when this thing would be built, knows it's some years off? PIO noted I'd just left a meeting where they were talking about that very thing. PIO noted funding is driving the schedule. PIO noted they've been working on the funding, and it was stated today that if everything falls into place the entire road could be open by 2017. He said so they wouldn't be buying property until right before then? PIO said really depends on funding. Noted typically would start buying large parcels 30-60% into design, and then move into individual homes, etc. PIO asked if his property was large, couple hundred acres or a homestead? He said it's 9/10 of an acre. PIO noted if funding falls in place, probably 2-3 years for acquisitions of that nature, maybe sooner depending on location and nature of the property. He said what's to stop him from putting a house on the property now? PIO said not a thing; we don't have an approved alignment yet. PIO noted whatever is on the property when we begin acquisition is what we would have to negotiate to buy. He said okay, that helps, thanks for calling back so quickly.

2/27/2008	3:34 PM	Jerry Hawthorne/Hawthorne realty service called and left MSG I'd like some information on the expressway or Wekiva extension. You can call me at 407-416-2049 I would appreciate it.

Notes			
Date	Time	Regarding	
6/5/2008	5:26 PM	returned call to 407-383-9967 (call but no MSG at 206 p.m.) Jeff/ Bradford Builders, who said he'd called because they had a family relocating from Seattle, WA. He just gave them PIO's number. He said my understanding in front of our Bella Foresta where we are on 46 it won't be elevated? PIO noted depends if there is a bridge over a side street near you; that's what drives the elevation. PIO noted in between bridges it will be a little lower. He said they're close to Markham Woods Road. He said understands from when PIO was out there a few months ago that it's going to be on the north side and SR 46 will be a service road. PIO noted it will be elevated and yes, we will have frontage roads on both sides. He said he told the family to call me.

Subject: SR 429 - Wekiva Parkway PD&E Study - SCEA Board Member & WPCC Update Meetings

Greetings All,  
All of the meetings regarding the WPCC suggested alternative have been set. Please let  
me know if you are missing any calendar items.  
Meetings Scheduled with SCEA Board Members on WPCC Alternatives  
- October 13, 2008 at 8:00 AM in Lake Mary at City Hall with Lake Mary City Commissioner  
Gary Brender (George Lovett, Brian Stanger and Mark Callahan)  
- October 15, 2008 at 2-3 PM in Sanford at County Services Bldg., third floor Rm. 3104  
with Seminole County Commissioner Carlton Henley (George Lovett, Brian Stanger, David  
Lewis, Jerry McCollum and Gary Johnson)  
- October 15, 2008 at 3:30 PM in Sanford at City Hall in the Railroad Depot Conference  
Room with Sanford City Commissioner Art Woodruff (George Lovett, Brian Stanger, Jerry  
McCollum and Dave Lewis)

10/10/2008 8:48 AM October 16, 2008 at 3:00 PM in Sanford at County Services Bldg., third floor Rm. 3114  
with Seminole County Commissioner Bob Dallari (Mike Snyder, George Lovett, Mark  
Callahan, Jerry McCollum and Gary Johnson)  
- October 20, 2008 at 10:00 AM in Sanford at County Services Bldg., third floor Rm. 3110  
with Seminole County Commissioner Brenda Carey (George Lovett, Mark Callahan, Jerry  
McCollum and Gary Johnson)  
- October 21, 2008 at 10:00 AM in Sanford at County Services Bldg., third floor Rm. 3118  
with Seminole County Commissioner Michael McLean (George Lovett, Brian Stanger, Jerry  
McCollum, Gary Johnson and Dave Lewis)  
- Commissioner Dick Van Der Weide was briefed by Gary Johnson and declined a meeting  
We also have a meeting scheduled with the WPCC for Oct. 27 from 330-5 p.m. at FDOT  
District 5 Office in Deland, Volusia Co. Conference Room (George Lovett, Brian Stanger,  
David Lewis, Jerry McCollum, Gary Johnson, Damon Chase, Charlie Shaw, Elinor Schell,

Patricia Peek)

Importance: High  
Dear Commissioner Henley,  
The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with each of the SCEA Board members to discuss our latest findings regarding the alignment alternative suggested by the WPCC. We would like to set up a meeting with each of you at your earliest convenience, and certainly prior to the Board's regularly scheduled public meeting in November.  
Please provide several dates and timeframes that you would be available to meet with us. We greatly look forward to updating you on the alternative evaluation and to getting your further input.  
I look forward to hearing from you at your earliest convenience.  
Mary Brooks

Contact Bobby Hester

Notes

Date	Time	Regarding
12/3/2008	12:28 PM	Mr. Hester called asking questions about the proposed alignment of the Wekiva Parkway. He said that based on the map, the proposed road would go through his property at Summer Lake Grace Groves. I said no final alignment had been determined yet. I said that we would be holding public hearings in the beginning of the new year and would be sure to make sure he was notified.

12/2/2008	5:29 PM	When will the land for the Wekiva Parkway be acquired. It looks like the Mount Dora access for the beltway goes through 251+/- acres owned by Summer Lake-Grace Groves. Grace Lindbloom and I own 50% each. Thanks, Bobby Hester 5581 Living Waters St. De Leon Springs, FL 32130 hm:386-985-9967 cell:386-624-8393 email:bobbyandelicia@yahoo.com

Contact Suzzette Hicks

Notes

Date	Time	Regarding
5/22/2008	11:39 AM	Suzanne or Suzette (didn't really catch name) 352-326-4007 called and asked if we had set the dates for the public hearings? PIO noted we'd been looking at July but now looking at August. PIO noted we have to finalize documentation before the hearings, noted we'd been posting stuff on web site as it's done, noted what we've got up and coming so far. She said she'd been on the web site, that's how she got my contact information. She asked what's the timeline for the project? PIO noted that's heavily dependent on funding since project is not fully funded. PIO noted several agencies were working on a financing plan and hope to have that info at the public hearings in August. PIO noted once we have the money, we can better say when things will happen. She said so you don't have any idea at this point? She noted they live off Ondich Road and for every alignment we're right in the middle of where it splits. It sits right on top of us - we're parcel 2713 on the map. She asked about the alternatives on the web site, are they the same ones they saw at the meeting at Apopka High School?

5/22/2008	11:38 AM	PIO noted those were the viable alternatives, and there were more of them. PIO noted we now have the preferred alternative with one recommended alignment or interchange location in the various locations. She said we've never been through this before and are trying to understand what to expect. PIO noted that even if we had the money today, we'd still have to finish the study, which will be late 2008-early 2009. To move into final design there'd have to be a few months while they put that out for bids, so maybe start design by summer-late 2009. then they've have to get into final design a bit, maybe a year before could start doing ROW, so maybe summer 2010? She asked if they'd be likely to try to fast track this? PIO noted there are efforts to also fast-track this, so could be sooner than that but ... PIO noted right now land values and construction costs have stabilized so they would want to take advantage of that if they can. She said that helps, at least they know they have maybe a couple of more years in their house. PIO said we will keep them posted.
-----------	----------	--

Contact Olan Hill

Notes		
Date	Time	Regarding
4/1/2008	12:23 PM	PIO returned Olan Hill's call, noted we have the recommendations for the preferred alignments and interchange locations on the OOCEA web site. He said after he called he saw that. He asked what the timeline was for approving that? PIO noted we still have to have public hearings, hopefully in July, and then study would end in late 2008-early 09 with agency approvals. He said that's what he needed. PIO asked if he wanted to be on the mailing list for meeting notices and newsletters? He said yes, can he do that online? PIO said just shoot me an email with his info and I will add him to the database. He said he'd do that and thanks for the call back.
4/1/2008	10:46 AM	Olan Hill/MSBW n Orlando. Was given your name and number by one of the planners in the city of Apopka, Clark Sprinkles. What the status of planned Wekiva Parkway is, more specifically the planned IC n the Apopka area along the Wekiva Parkway. There's been some discussion of having one along Kelly park road. He wanted me to confirm the status of that and if the Wekiva Parkway and IC had been finalized and if not when that might be expected. We're representing some potential clients in that area. City can't really help us until they do the land use study and has to do that one year after IC has been approved So we're just trying to get a timeline for our client. If you'd give me a call back I'd certainly appreciate it. 407-893-4705 If not here feel free to leave a MSG. and I thank you for your assistance.
Contact		Clark Hinkle
Notes		
Date	Time	Regarding
3/27/2008	8:45 AM	PIO returned call to Clark Hinkle 404 787 2984 who said he was trying to find out where and when 429 completed up to 46? PIO noted we're in PD&E study phase, should finish with approvals end of this year. PIO noted project not fully funded, so don't have set construction schedule. PIO noted even if we had the money we needed, would still be about 5 years out because need time to do final design and ROW acquisition. PIO noted estimates have ranged from 5 to 10-15 years to begin construction. He asked if I thought it would happen at all? PIO noted yes, it is the intention of the OOCEA and FDOT to develop this project. PIO noted agencies working on a financing plan now to try to make it happen sooner rather than later, hope to have info on that in another 4-6 weeks. He said the reason he's asking is he's planning to build cell tower so could get in there before all the other service providers, but needed to know where it was going. PIO noted we have recommendations for preferred alignment on the web site, so we have a pretty good idea of where it's going. PIO asked if he wanted to be on the project mailing list and he said yes. 2011 Gees(cq) Mill Road, Conyers, GA 30013 email clarkhinkle@gmail has been on website but Map wasn't really clear. PIO noted you should be able to zoom in on those to see parcel lines. He said he'd take another look at it when he got back to the office. PIO said if has trouble with them call me back. He said he should would. You told me what I needed to hear but not what I wanted to hear, but thanks for calling back.
3/26/2008	10:06 AM	Clark Hinkle called and left MSG if you could call me at 404-787-2984 want to talk about SR 429 and 46 bypas.
3/25/2008	10:53 AM	Clark Hinkle 404 787 2984 called and left MSG I would like to talk about SR 429 and intersection of 46 highway. If you could call me I'd appreciate it. Thank you

Contact		Joe Hoffman
Notes		
Date	Time	Regarding
11/24/2008	12:26 AM	<p>Joe Hoffman 321-257-5113 called and said he just got something in the mail and was wondering about the Wekiva Parkway study area, are we taking all of the properties within that? PIO noted no, that was the area within which we were allowed to look at possible alignments, as per the 2004 Wekiva Parkway and Protection Act. PIO noted we would only need the properties right along the Preferred Alignment. He asked when will we know where the road is going? He lives in Windsong subdivision near Oregon and Orange Boulevard, north of SR 46, and is concerned. PIO noted I was driving and not looking at a map, but it sounds like he would be north of the alignment. PIO noted we stay along the SR 46 corridor from the river up to about Orange Blvd. and then we drop down to tie in to SR 417 at I-4. PIO noted we have a recommended preferred alternative that will be going to formal public hearings, possibly in January. PIO noted after that, the Preferred Alternative will go through the agency approval process, and we hope to have an approved alignment by next summer. PIO noted he can view the alignment on the OCEA web site, gave him address. He was thankful for the information.</p>

Contact		Jerry & Ruth Strite Holder
Notes		
Date	Time	Regarding
9/15/2008	10:17 AM	<p>PIO returned call to Jerry Holder 352-223-0479 re: Wekiva Parkway next steps, left detailed MSG that we're still working toward public hearings, had hoped for mid-October but still waiting for final docs from FHWA, NPS and couple other agencies. Have to have that in hand before we can advertise the hearings. PIO noted now maybe late October-early November. Beyond that hope to finish study in early 2009. PIO noted hope by then to have a financing plan and will have better idea of the schedule.</p>
9/11/2008	11:33 AM	<p>Jerry Holder called and left MSG you and I met some months ago on the (Ruth) Strite property. I was just trying to figure out where things were. Everything went kind of quiet, I know it's an up and down thing... If you could give me a call. I'd like to let mom and dad know how things stand, get them ready for the next bit of information coming their way. 352-223-0479 Thanks.</p>
2/20/2008	10:00 AM	<p>PIO arrived at the Strite Holder property, met with Jerry Holder who explained how tough this all was for his elderly parents, noted they knew everyone around them; she's lived in the house her entire life. He noted they had to go through a similar process when the power lines came down Plymouth Sorrento Road, and also when the county wanted an environmental easement on Haas Road. He said after going through all of this he now knows how the Indians must have felt when the settlers just kept coming. PIO noted I hadn't been out here in a while, but was surprised to see how far along the subdivisions were on the south end of Plymouth Sorrento Road. We agreed the growth was coming their way, the market may slow it down some, but development is inevitable. PIO noted that's the thing about the country: everyone wants to live there, and then it's not the country anymore.</p> <p>We were joined by Amy Streelman and Rob of Janus. Amy explained that they have to look at the Area of Potential Effect (APE), and have to look at potential cultural resources and then narrow that down to actual ones that are impacted. She noted they have to document historic resources that are 50 years old or older and determine if they're significant using national criteria. She noted she's worked for Janus for 10 years. Is based in Atlanta but is from Florida. She noted they have to send the information to the State</p>

Historic Preservation Officer. She noted this was the last property we need for that report. Amy said the Boch House has been determined eligible. Jerry said that has the same architecture as Mom's place, and there's also one over on Maguire. He thinks they all have the same architect and were built around 1910. Amy said as far as the process, they will take photos and notes. They don't have to go inside if he's not comfortable with that. She said they're interested in the history of the place. Jerry showed the title / deed to the property, cover sheet dated 1883. Also presented a legal description dated 1917. Jerry said the whole thing was part of the Edinburn estates... somewhere along the line George Haas was involved. He said his great-granddad bought the property in the 1920s; it was a wedding gift for his grandmother. Amy asked if the property was subdivided since they had it? Jerry said he does not believe so. Jerry noted besides what we show on the map, they also bought the property on the northwest corner of their original parcel, where the chicken coops are. He also noted there was a piece across Haas Road that they sold to Orange County for an environmental easement.

2/20/2008

9:59 AM

He noted the whole thing was bought at once, about 130 acres (an 80 acre and 50 acre parcel). He noted Edgar Kitchen was grandmother's father. His mom's parents were Alice Kitchen and Edgar Strite (mom's name is Clara Ruth Strite). Jerry noted there was a seepage spring pops up out of the ground, travels a bit and then goes back under. He said when they were doing Haas Road, they did a dye test in the spring and it came up in Rock Springs. Jerry noted that prior to the 1920s it was timber land. His granddad cleared and blasted it and turned it into orange groves. He noted after the freeze in 1962-63, they put in the chicken house. (He later noted they had 30,000-40,000 chickens at one time). He said in 1982-83 there was another freeze and the lost many of the groves, and the put in pine and hay. He noted a lot of natural oaks have come up in the past 20 years. He noted they're expanding the hay fields and also work some fields off site. Rob brought out historic aerials for comparison to today's conditions. Amy asked what was going on in the area at the time? Jerry said they worked with Golden Jim, who took care of the grove when his grandfather died. They also worked with Ropers, which was a big producer back then. They grew the oranges for juice and fresh fruit. He said when the groves went in the 1960s, a lot of the chicken houses went in. Jerry noted his grandfather also was farming in Maryland. Tara showed the overall alignment, noted ramp M impact to structure. She pointed out bridge at Plymouth Sorrento Road, embankment areas where it will be about 30' high, and then it comes down to grade to the east of their property.

2/20/2008

9:58 AM

Jerry said he knows there are many parties in the study and was trying to get a feel for the players and who was best to talk to. Tara noted can talk to Mark Callahan, the CH2m Hill project manager, or David Lewis, who she noted believes he spoke to. He said yes. PIO noted I'm the suggested point person since I'm easiest to reach and am in communication with all the players, can get whatever info he desires. He said he assumed he'd be talking to someone else when it came down to acquiring the property? Jerry asked about where things stood, what's next? Tara noted looking at public hearings in July and to finish the study some time this year. She said there really isn't any funding for design or ROW going forward. PIO clarified that FDOT doesn't have design programmed, but OOCEA has design and some ROW funded in the Five year work plan, so the OC portion will move on to the next step. Jerry said but it's still just a study right- am I going to be 90 when it's done? Isn't it possible they'll decide not to do it after all? PIO noted this project has state legislation

behind it, and OC Mayor Richard Crotty has set a priority for finishing the beltway. PIO noted there is a working group looking at how to fund this, so it's more a question of when, not if. PIO noted working group should report back on funding, so hope to have some better schedule info at the public hearings.

Jerry noted they've been converting the chicken houses to hay barns on the north side, and they're continuing knocking down treed for more hay fields (south of the alignment and ramp). He said so they have to be able to move equipment back and forth, and their customers need continued access.

Jerry asked about the egg cooler building on the north property where the ROW line crosses the corner. They wouldn't actually take the corner off that building would they? Wouldn't they shift the line a little?

Tara said they could shift that in design; in PD&E the goal is to just note the impacts. Jerry noted there was concrete under the buildings.

2/20/2008 9:57 AM

He said they keep the equipment in the hay barns. Tara (I think) asked how much equipment they had? He said six tractors and peripherals (right then a tractor drove by us)

She asked the route they took to the fields. Jerry pointed out on the concept the path they take would go between sta. 385 and sta. 390 on mainline. PIO asked how often they had to go back and forth?

He said during hay season they may have to go back and forth 7-10 times a day.

Jerry noted concern for their water sources: there is a well on the north parcel and pipes over to the fields, and another well near the house. He expressed concern about what happens to those with the road? Tara noted the issue would be access to work on the lines; we would have to relocate those.

Tara pointed out OC Greenplace parcels on the exhibits and why the alignment was placed where it was and not farther south.

Tara noted we have to look at avoidance alternatives for the house. Amy said relocation is a possibility. Jerry said he's talked to his mom about moving the house to the other part of the property. He said at 75 years old it's just better for her to stay on her property.

Amy said we just need to evaluate the house; we're not here about listing it. We don't have to go inside if you don't want us to. Then we have to report to SHPO, give our recommendation based on the national criteria.

Jerry asked what happens if it's determined eligible? Amy said it won't place restrictions on the property, but will guide us in how we have to move forward with any mitigation.

Tara said basically it's to provide protection against transportation improvement and make sure we've done all we can to avoid it.

Jerry noted their home in Maryland was listed, and they had to jump through hoops to fix the porch. Amy said that was probably a local designation, which is more restrictive; the national one is not so much so.

Amy said this is the test we use to see if it is eligible, and that's what we use to move forward. She said listing would typically come from the property owner or local governments. We don't recommend listings, though I supposed someone could use our report in a listing effort.

Jerry asked about the orange dots on the one of the maps he and his neighbors saw at one of the public meetings. He said a lot of his neighbors were curious what those were.

Tara noted the land suitability mapping was the one where they had orange dots; showed potential cultural resources.

2/20/2008 9:56 AM

We walked back from the entrance past the hay barns and egg cooler (Amy shot pics), down what's left of the circular drive. Jerry noted his grandfather planted all the camphor trees along there. Noted they've withstood hurricanes, don't bend much; only trouble is the squirrels.

Jerry said there was a front porch originally that had columns; the current screened enclosure does not. Jerry noted he has been trying to get his mom to let him paint the house for years, just now got her to let him paint the back portion. He said she argued painting the house would increase her property taxes and wouldn't let him do it. Amy asked and Jerry noted back portion of house was also original to structure. He also noted makeup of the roof; there are no load-bearing beams in the middle, it's all to the outside.

Jerry said the tin roof was original, noted as long as it's kept painted it lasts forever and is fire resistant.

Jerry pointed out garage and said it was original to the house, pointed out a model A flatbed truck and a Massey-something tractor in back of the out-building. Also noted water tower, no longer functioning. He said his mom would want the water tower to go with her if house is relocated).

Discussion about back side porch and noted columns.

Jerry noted there used to be another out building, didn't know if it was slave quarters or what, back and off to the side of the garage, his mom remembers making mud pies as a little girl on those porch steps, but that came down long ago.

Jerry also walked us down to the spring-fed swimming pool, which he said was in use until the 1970s. It has concrete block siding and concrete floor, but much of it is silted over now. He explained how water was captured from the spring in a box and piped to the pool. Leaving the residence area we saw an old sign that said N.E. (for Newton Edgar) Strite and something about a Citrus Grower's collective.

We thanked Jerry for his time and cooperation. PIO noted I'd get him a summary of the meeting to make sure we covered all of his concerns. He said he'd appreciate it.

1/29/2008	8:55 PM	Jerry Holder returned my call and said Feb. 20 at 1030 a.m. was good for him. He apologized for calling so late, said he thought he was calling my office phone. PIO said I'd let the senior historic architect know so she could book her flight.
1/29/2008	1:53 PM	PIO called Jerry Holder (352) 223-0479 re: survey of Strite home, left MSG that last time we spoke he said he thought Feb. 20 might work but didn't see 100% sure. PIO said calling to confirm, especially since senior historic architect has to fly in and need to book that. Noted I'd emailed her around Jan. 17 I think but not sure if he got that. Asked him to call me back to confirm meeting.
1/18/2008	11:34 AM	PIO called back Jerry Holder 352-223-0479 to let him know I sent him an email, but didn't know if he'd had a chance to look at it yet. PIO relayed that on Feb. 20 at 1030 a.m. PIO, Amy Streelman, senior historical architect and Tara Jones of Ch2m Hill would be visiting him. PIO said once we actually get to the house should only take a couple of hours. He said that sounds good, think we can plan on that. PIO said Amy has to fly in, so if there's any issue we need to know ASAP. He said okay, he will plan on that and if anything changes will let me know ASAP. Said he will touch base the week before just to make sure everything is still on track. He said this is excellent and thanks for arranging this.
1/17/2008	9:25 AM	PIO returned call to Jerry Holder 352-223-0479 re: Ruth Strite house, trying to sort this out with my mom and dad, talked to someone a while ago from Janus about whether they needed access, and they said they'd just go with what they had for now. He said the house was built in the early 1900s and my mom has lived here for 75 years. She could care less about all of this stuff, or whether the county things they need to bring a road through here. this is her home. My mom has the memories here nobody else has or cares about. My mom is not thrilled about all of this. He said he checks his emails fairly regularly, especially if he's expecting something.

oneloghome@netzero.net <mailto:oneloghome@netzero.net>  
 He had a number of questions about the process:  
 Do they need to be in side? PIO noted that's a possibilty if they need to verify something about the structure.  
 How do they deem it historic? PIO noted there is a process and guidelines that frankly I don't deal with. PIO noted first have to deem it historic, and then state historic preservation officer determines what needs to be done with the structure.  
 He wants someone knowledgeable and experienced to walk him through the criteria and process so he can explain it to his parents. He said he's been trying to lay the groundwork with them. He wants to prevent as much invasiveness as possible, would prefer external survey only, though they could go under the house if need be (there is open crawl space). This is something where if it comes down to it, I've tried to lay groundwork for mom that they could be coming through here  
 One of the guys with Janus that was doing Fazio tract, I know there's no way the two folks out there could figure that out; they were straight out of college on some internship program.  
 How do we figure out if moving house is an option, or if house is structurally sound enough to move?  
 I'm okay with sitting down with somebody that's knowledgeable  
 I don't need someone to come out of college with checklist wandering through mom's house and making silly comments, that's going to infuriate my mom. Worked with orange county folks in the past on the road paving, some were good to work with.  
 PIO asked if any dates within the Feb. 9-28 timeframe worked better for him? He said m-w is better, in the morning after 9 a.m. he said he wants someone come out to his house first to educate him on the process, and then he will ride them up to the property. He said he thinks he's going to try to get his parents out of the house that day, don't want them getting upset by all of this. He recognizes that progress happens, and the Indians probably weren't real happy about it either.

1/16/2008	2:03 PM	Jerry Holder called and left MSG my mom is Mrs. Ruth Strite, she received a ldtter from your department or somebody's department dealing with the expressway authority out there on plymouth sorrento road. I need to ttalk to you to find out where we need to go from here. This letter was actually from a Bob ?Deason and it's got your name and number in there. If you could give me a call so we can chat about where we need to go with all of this, my number is 352-223-0479 again it's re: letter sent to my mom Ruth Strite

Michael "Mickey" House

The Preserve at Astor Farms House of Management

Date  
11/10/2008

Time  
4:05 PM

Regarding  
PIO called Michael "Mickey" House/House of Management Enterprises (HOME)/Preserve at  
Astor Farms 5205 S. Orange Avenue, Suite 206, Orlando, FL 32809, Ofc 407-852-5300,  
Fax 407-852-5301, who said he'd heard about the WPCC alternative. PIO let him know  
about the SCEA board meeting and that evaluation of the alternative would be discussed.  
PIO said I can email him some info, but there's a lot more info that's too large to email  
and can get to him on disk. He said send whatever you can to mhouse@houseofmgmt  
com He said his server has 40 of 50 MB capacity, so most things should get through. PIO  
said we'd either email or get it to him on disk, confirmed the S. Orange Avenue address is  
where it should be sent. He said that's correct and thanks for calling.

3/6/2008	4:38 PM	<p>Worked on LCW map letter for Greg Hughes and sent.</p> <p>March 6, 2008  Greg Hughes  850 Maury Rd.  Box 6, First St.  Orlando, FL 32804  RE: Recommended Preferred Alignment Alternative Concept requested for the Wekiva Parkway PD&amp;E Study  Dear Greg,  As we discussed earlier this week on the phone, please find enclosed the Lake County West map for the State Road 429 - Wekiva Parkway Project Development and Environment (PD&amp;E) Study. The map includes the area in question at the Southernaire Mobile Home Park fronting the US Highway 441 / SR 46 interchange. The map indicates that the Florida Department of Transportation, which is developing the Lake and Seminole County portions of this project, does not intend at this time to take any mobile homes adjacent to the interchange.  As noted, we are working to schedule the formal public hearings to review the recommended preferred alternatives in July 2008. Please be advised that as we are still in the study phase, details remain subject to change.  We expect to have an approved alignment when the PD&amp;E Study finishes in late 2008.  As this project is not funded, the scheduling of subsequent project phases is tentative at best. At current funding levels, conservative estimates have the Florida Department of Transportation beginning construction on the Lake and Seminole County portions of the parkway in perhaps 10-15 years. There are, however, several agencies working on a financing plan to be able to build this project sooner rather than later. We will keep you posted on funding and scheduling developments.  I hope you find this information helpful. Please contact me with questions or concerns at</p>

© 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com <mailto:MBrooksSR414@cfl.rr.com>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. You may view all of the project maps on the Expressway Authority Web site at [www.expresswayauthority.com](http://www.expresswayauthority.com).  
Sincerely,  
Mary Brooks

3/4/2008 10:48 AM Greg Hughes 407-212-2766 called and said I got your name off the computer. I'm thinking about buying a trailer at 441 and 46. Right now I'm in College Park at the infamous park where they're kicking us out for the school. Understand there are big plans for a flyover up there. Is that going to be way up in the air like spaghetti? Will it be a loop interchange? Will it affect the mobile home park? PIO noted we're looking to go from the grade separated IC that's there not to an at-grade intersection with the SB 441 flyover to go east on SR 46, would be about 20-25 feet in the air. PIO asked if he'd been on the web site, we have a map showing the proposed alternative? He said someone had to help him get my name off the computer. He asked if I could mail him the map 850 Maury Rd. Box 6, First St., Orlando, FL 32804. He said the place I'm proposing to buy is three places down from the road. PIO noted we're not looking to take any of the mobile homes. He said well and I'm sure if you did you'd do it through eminent domain, which is the humane way to do it. He said the school board didn't do it through eminent domain but through the private developer. School board could have bought it through eminent domain for \$3 million, but they paid the developer \$8 million and now the taxpayers are having to pay another \$15 million. He said he's one of the three hold outs left.  
If you'd send me that and I will just study it and I will probably move ahead with it.  
Thanks.

Subject: Wekiva Parkway Study Comment Form  
As a Seminole county resident I support only the proposed southern route for the beltway extension. This would appear to be the obvious choice considering that it creates a natural interchange at I-4 allowing traffic to flow in all four directions without any impediments or impact upon the traffic on local roads. Any route proposed north of SR. 46 would simply defeat the purpose of a seamless beltway around the metro Orlando area.  
Sincerely  
Howard Hughes

Time  
11:15 AM

Regarding  
Jim Jackson called and left MSG I'm a resident of Lake Forest and I'm calling to voice my support for the southern alternative to Wekiva Parkway. We prefer to have that route. It

minimizes impacts to our neighborhood here in Lake Forest, and we also believe it's the most cost efficient and most direct routing. And we hope you support that measure. I also faxed in a PD&E study to your fax number. Thanks again for your assistance.

Subject: RE: Wekiva Pkwy - Mtgs. with SCEA Board Members on WPCC Alt.

Gary and Jerry:

At the meeting on Sept. 10 to review our analysis of the Wekiva Pkwy Community Coalition (WPCC) alternative alignment, you asked us to check on a few items as shown below.

WPCC Map G Alternative with I-4 Interchange

- Would SR 46 east of I-4 have to be six-laned and, if so, when? The traffic analysis indicates SR 46 east of Upsala Road (CR 15) would need to be widened to six lanes around the year 2024. This is calculated using the LOS D threshold for a four lane Class II arterial of 32,700 AADT. This section of SR 46 does not need to be widened to six lanes in the Preferred Alternative.

- Would the alignment impact the Transit Oriented Development (TOD) parcels around the proposed Sanford commuter rail station? Yes, the alignment passes through the western portion the TOD site.

- Would the alignment impact the new First Harvest Food Bank site or land holdings of Real Vest? The food bank site would not be impacted. 2 parcels owned by Real Vest would be impacted -- one parcel (a complete take) has two structures and a parking lot; the other parcel is currently vacant. It should also be noted that in addition to the new Catholic Church, the adjacent site of the proposed Catholic high school would also be a take.

9/25/2008 2:49 PM

- Does the Seminole County planning agreement with DCA limit roadway expansion? Tony Matthews of the County Planning Dept. advised us that the Comp Plan addresses constrained roadways/scenic corridors in the Wekiva River Protection Area (Markham Rd., Longwood-Markham Rd., Lake Markham Rd.), but it specifically states that it does not apply to Orange Blvd. or CR 46A.
- Schedule a meeting with Dr. John Cirello, Director of County Environmental Services, to review impacts to the Yankee Lake Water Treatment Facility. Mark Callahan and Brian Stanger met with Dr. Cirello and his staff today; we will incorporate their comments in the analysis.
- Schedule individual meetings with the SCEA Board members. We are doing that now as noted in the email below which you were copied on.

Please let us know if you require further information.

Hello Mary,

The meeting on January 17th is our Annual Community HOA meeting. It is at 7:00 pm at Sylvan Lake Park, main building in the large meeting room. You attended our annual meeting last year and I believe your 15 - 20 minute update and summary was very well done. We will have a projector and laptop there for your use, if needed.

We would like to thank you again for your participation in this matter and look forward to seeing your there. If you have any questions or need further assistance, please do not hesitate to contact me.

Respectfully,

Dan Macaluso

Sylvan Lake Reserve (Glades at Sylvan Lake), HOA President

Contact Notes		Tammy Kagen
Date	Time	Regarding
7/14/2008	9:32 AM	Tammy Kagan 352-383-6132 called and asked if the maps on the web site were the latest info? PIO said yes. She said saw something in the paper recently and thought they'd finalized the route. PIO clarified that we have a recommended route, but that still has to go through public hearings and agency approval, still a chance could be tweaked or shifted here or there. She said okay she has a gentleman who has property right along there who wants to sell, but can't really do that since no one wants to buy a property that will be taken by eminent domain. PIO noted we have the maps on the web site - had she looked at those? She said yes, she saw the OC alternative and it was real clear it was going through his property. Okay, that's what she wanted to know and thanks.

Subject: RE: 414 Expansion

Hello Gin,

Apologies for the delay in getting back to you, but I was out for most of last week. The schedule for the Wekiva Parkway is heavily dependent on funding; as you may or may not know, this project is not yet fully funded. The Expressway Authority and other agencies are working on a financing plan, and hope to have that together by the end of the year. Even if funding were available, we would still need to finish the PD&E study, probably in early 2009, need 2-3 years for final design, another couple of years for right of way acquisition, and then another 2-3 years for construction. Since this project is so large, it would likely be done in segments. The Orange County section being handled by the Expressway Authority would likely be the first section. So even with the funding in hand, you'd still be looking at least at 2012-13 before construction began. Again, that is highly speculative. Stay tuned.

Subject: RE: 414 Expansion

Hello Gin,

If your community is in Mt. Dora, I'm wondering if you're actually inquiring about the Wekiva Parkway instead of the SR 414 project? Or maybe you're promoting both to your residents?

All of the Wekiva Parkway study maps are on the Expressway Authority web site at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec>>. The overall map is shot from very far out to get the entire project in. However, the individual Lake County and other maps have much greater detail and would perhaps be more helpful to you?

If you are indeed looking for the SR 414 John Land Apopka Expressway project, you can download that map at <<http://www.expresswayauthority.com/Corporate/oursystem/SR414/assets/WEBEXHIBIT.jpg>>. I've also attached the 414 extension map for your reference.

Please let me know if these maps help, or if you need further assistance.

Mary Brooks

You get once chance to do it right. I strongly support what has been the "recommended" approach, the southern roadway. I also understand that a coalition has formed a new approach and from what little I know recommends that the new roadway doesn't directly connect to I-4. This of course defeats the reason for the road in the first place...the ability for people in and those going through our area to travel on a highway and get where they're going without causing huge traffic impact on local surface streets. I appreciate the hard work you're doing in carefully considering all options but wanted to strongly support the best one. Thanks and feel free to contact us if you have any reason. Hi Mary,  
I apologize for the confusion, but this is one of the maps I was referring to.  
Thank you for walking me through this.  
Claire L. Kohake  
Project Coordinator

3/31/2008 11:18 AM  
Claire Kohake 407-260-0308 called and noted we'd been emailing back and forth, one of their client's Clark Hinkle was under impression project would be finished in 5-6 years... PIO noted said at earliest construction would likely start in 5-6 years, project is not fully funded. She oh, okay, wanted to make sure they were on the same page. She said so is it absolute it will start in 5-6 years? PIO said no, not funded and schedule subject to funding availability. PIO noted several agencies working on a financing plan which I hope to have in the next month or so, certainly by July public hearings. At that point we will have a better idea of the scheduling of the rest of the project phases. She asked where the hearings would be? PIO noted that has not been determined yet, but if she give me her mailing address I will make sure she gets the newsletter we'll send out in June with that info. She said that'd be great, please send to her business: 300 crown oak center drive Longwood 32750. PIO also explained subsequent phases project must go through prior to construction. She said thanks for the info.

Claire,  
Not sure how you're looking at the map, but we will be crossing the Wekiva River with a longer, taller bridge in the same location as the current bridge on SR 46.

Good morning Mary,  
I wanted to thank you (again) for your quick response; the information you sent to me is very helpful. I have one last question: I thought that there had been a decision to not have any further interruption of the Wekiva River, and therefore the WEkiva Parkway would be "piggy-backing" SR 46 where it crosses the Wekiva. However, the current map does not show this. Is this something that is still being debated? Thanks again for your time,  
Claire L. Kohake

3/24/2008	4:15 PM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Monday, March 24, 2008 4:15 PM To: 'clkohake@gmail.com' Subject: SR 429 - Wekiva Parkway PD&amp;E Study - map link Claire, Was nice speaking with you. All of the maps can be found on the Expressway Authority Web site at &lt;<a href="http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml">http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml</a>&gt; These maps represent the latest recommendations for the preferred alignment and interchange locations. These recommendations will be reviewed at formal public hearings this summer, and then undergo the approval process which should conclude the study at the end of the year or early 2009. I hope you find this helpful. Please feel free to call or email with other questions. Mary Brooks</p>
3/24/2008	4:09 PM	<p>Claire called back, work for company that builds cell phone towers, didn't realize in study phase, looking for more finalized map of the plan, of where you're going to put the Wekiva Parkway and SR 46 overpass so could figure out where we should look for land acquisition for the towers. On line seemed like everything was outdated. PIO noted all of the latest recommendations are on the OOCEA website, if she's at a computer I can walk you through finding them. She said no, she's at a hospital, but I can take notes on how to find them. PIO asked if she had email, I could send her the overall map and link for the others. She said just sending the link would help and thanks so much. She gave me her email address.</p>
3/24/2008	12:15 PM	<p>PIO returned call to Claire, left MSG to call or email me with specific questions, left email address. Noted regarding her MSG we are in study phase of Wekiva Parkway, and are years away from construction.</p>
3/24/2008	11:50 AM	<p>Claire Kohake called and left MSG I found this number on line as project hotline for Wekiva Parkway and SR 46 bypass, information hotline, if this is the right number, if you could give me a call back I'd like some information about the current construction. My number is 321-246-8516 thanks so much talk to you soon.</p>

Date	Time	Regarding
11/13/2008	11:30 AM	PIO headed to Astor Farms, delivered 2 disks to Tony Konrath for David Marini. He asked if this was set in stone? PIO said no; FDOT has a preferred alternative, not approved, and the community coalition is offering this one up also. He said remembers before it was supposed to go up here a while back. PIO noted we had some very early alternatives in this area that SC told us to eliminate. This new coalition alternative follows a similar path to some extent. He said this would affect 3,000 people living in this community, we are definitely not in favor of it. He said he plans to attend the meeting Tuesday.
11/12/2008	2:38 PM	PIO called back and said I wouldn't be able to get up there today, but could drop it off after my meeting tomorrow morning, after 11 a.m. he said he'll be home off and on, but if not home just drop it on the front door. PIO said will leave 2, one for him and for David Marini the president. He said that's fine.
11/12/2008	2:13 PM	Tony Konrath/Preserve at Astor Farms, 4767 Cains Wren Trail, 407-323-3738 called and said he saw notification email. He got the email about meeting notice and wanted to get the info on the coalition alignment. He's not on the board but works with the board members. PIO noted I'd tried to get it to David Marini yesterday, but no luck, was delivering to other stakeholders in the area. PIO said will call back in 15 minutes to see if I could get up there and back before my 4 p.m. meeting. He said okay thanks.

11/26/2008	7:08 AM	Mary spoke with him. Hello Mary, I am a resident of the Astor Farms Community in North West Sanford. I have been looking at the proposed location of the Wekiva Parkway. The maps I have seen lead it just South of SR46 to make the connection to I-4 near the current 417 entrance. I have hear that there is also a proposal for the route to run North of SR46, but I can't find any maps showing that route. I am assuming it would have to run behind my neighborhood, and somehow empty out to I4 before the St Johns river. Could you email or fax me anything that shows this proposed route. Also, where and when is the next meeting regarding this matter. Sincerely,  J.R.  Subject: SR 429 / US Highway 441 Intersection Improvements (Vick Rd. Extension Phase I - Fact Sheet  
 - Fact Sheet  
 Good morning, All, I hope you are safe and dry and that T.S. Fay causes you no harm. Attached please find the project fact sheet for the SR 429 / US Highway 441 Intersection Improvements, which constitute Phase I of the SR 429 - Vick Road Extension. The Expressway Authority has restricted lane closures to off-peak hours and will otherwise maintain through traffic to minimize the impact to the traveling public. However, please be advised that some turn lanes will have to close during various phases of construction. We apologize for any inconvenience this may cause. As always, you are welcome to refer any members of the public with questions or concerns to me regarding this project. As you will recall from the weekly project update, we are scheduled to shift SR 429 traffic onto a temporary diversion road on Thursday, Aug. 21, as part of this project. Please be advised that construction schedules are subject to change depending on weather and other unforeseen circumstances.  
 I hope you will find this information helpful. Please don't hesitate to call or email me with any questions or concerns.

Subject: Wekiva Parkway Comment Form Submission

Please find attached my comments regarding the proposed Wekiva Parkway.

5/17/2008 1:28 PM Looking at the different proposals, it seems that keeping the new road along 46 would be the least destructive to homes & property values in our area. The engineers want a seamless merge onto 417, but that creates other issues for residents in this area. The drivers will easily figure out how to get from 417, to I-4, to the new road. The businesses along 46 will continue to grow and may get more exposure if travellers have to follow that route anyway.

Regarding  
I drive to and from work on 417 every night. What I don't understand is why the 417 extension needs to be brought through the communities it does and over the churches and school that it will. I do understand the need to create a connector. What I don't understand is why are the woods on the west side of International Parkway and 46 and then the cow pasture on the west side of I4 not even mentioned in this proposal for the interchange? This would have the least effect on communities and homeowners. If this road comes through as proposed why do developers continue to build Town Homes from Wilson Road up to Wayside Drive? Has there been any discussion about what will happen to Wilson elementary school? This road will be built right over the top of this school. What effect will that have on all the communities that send their children there? I know I am late to expressing my concerns but this proposal seems to have no thought given to the total effect of not only my community but all the surrounding communities. This will effect property values for many years to come because if this proposal is accepted I will have the freedom and flexibility to sell my home immediately because I do not have children that will be impacted by this road. While that is unfair to those people that do not have the same flexibility in their lives it should be a consideration given to the life that people wanted to establish for their families when they moved here. I am positive I will not be the first to sell nor the last.

5/7/2008 8:42 PM I sat on my back patio tonight enjoying the fresh air, the cool spring breeze and the openness of the surrounding. If this road goes through my air will be auto fumes and my line of sight will be a roadway. This is quality of life choices made. I moved here because

of that very reason. Quality of life. You will take that away from a lot of people if this road goes through. Unfortunately, apathy comes from lack of up to date, relevant information disseminated to the communities this effects. For whatever reason there are a lot of apathetic communities, but why is that? I was apathetic until I saw the proposals and read more about this highway extension and I am no longer sitting back assuming the "right" decision will be made for me. I am now an activist and will do my part to educate as many people as I can so they can make informed decisions and have a chance to express their vote.

5/7/2008 8:41 PM For those people that think this road will not effect their lives they need to consider that out of desperation people will sell their homes to the highest bidder, whatever that price might be. The domino effect will have been started. That is when they will see the impact of this road and its' effect on their lives.

Thank you for taking the time to submit your comments. Your concerns will be shared with the Wekiva Parkway Project Development and Environment Study team, including representatives of the Florida Department of Transportation, which is developing the corridor in Lake and Seminole Counties. We are still shooting for formal public hearings in July, and will provide those details once available.  
Mary Brooks

5/4/2008 11:48 AM I find it distressing that the alternative route that is being considered does not appear to have any consideration of homeowners in the communities effected by this roadway. There was money spent for an engineering firm to make this proposal? At whose interest does this proposal serve? Certainly not the communities it will wind up displacing.

A second point I'd like to make is if the county commissioners that will be making the decision for accepting this proposal were in the place of the homeowners in the surrounding communities, would you still think this was a viable alternative? To have your home, your community, your schools and churches, your local business, being forced to close and relocate would you still think this was the correct decision? You will be doing away with a tax base that you will not be able to replace.  
People in these communities are already trying to sell their homes so they do not lose their entire life's investment in a community that they choose to live work and raise there children in, and these are people selling in a housing market that is already severely depressed. How desperate are they that all they want to do is get out with whatever they can before this roadway destroys the life they have worked hard to attain?

With a number of alternative recommendations that I know my community board members have proposed and which would have the least amount of impact on established communities in the area, for this current proposal to be considered a best alternative shows a lack of foresight and vision by the county commissioners, and a disregard for those neighborhoods this will impact.

She said that's okay, you've been very helpful, the information you've given has been much better than what they got from FDOT. She said they talked to folks at FDOT but everyone gave a different story. PIO noted OOCEA is the lead agent by statute in pursuing the conservation parcels; she said she'd seen that in the statute. She said the owner of the property has asked for a loan and wants to put the statute up as collateral, but also understand you're only interested in portion for the roadway and that things are just in the discussion phase. PIO noted that's correct, I know one appraisal has been done and believe a second may be in the works. She said and those usually aren't public. PIO noted Bob Mallett will be the best one to talk to about all of that. Noted he travels between Orlando and St. Pete but is good about emails. PIO said if she has trouble reaching him call me back and I'll figure something else out to connect you too. She said you've been very helpful and thanks.

3/13/2008 2:55 PM Nancy Lenan (sp?)/Carlton Fields firm 888-224-9191, 407-849-0300 in Tally. Dana Watson from our firm had contacted you by email the other day at the suggestion of Bobby Duerning??? to get info on where EA was in relation to the pine plantation property. Your info was very helpful. I have a follow up question if you wouldn't mind giving me a call. Frankly what the issue is, I represent a likely lender who has been contacted by the Pine Plantation people. They have pointed out the statutory authorization to buy the property. And my guy has been told that this is all collateralized because the state is buying the property. But being a former state employee I'm kind of looking for the money particularly on the conservation side. So give me a call if you wouldn't mind. I'd really appreciate it.

Subject: SR 429 - Wekiva Parkway PD&E Study - Sullivan Ranch query  
Hello Carl,  
It was good speaking with you earlier. As discussed, attached please find the Lake County West recommended Preferred Alternative for the Wekiva Parkway. I'm adding you to the project database so you also will receive the meeting notices and other important information. As you can see from the map, if your property is immediately adjacent to the

east of the Wolf Branch Sink - except for right at SR 46 - there would be no direct impact. Please feel free to email or call with other questions.  
Mary Brooks

2/25/2008 9:51 AM PIO returned call to Carl Lewis 407-427-4784, having house built in Sullivan ranch near round lake road, know the 46 bypass going through there and my house will butt right up to Wolf Branch Sink. PIO noted we're staying on 46 until Round Lake Road and then east of there it drops south to the systems IC. PIO noted we originally had an alternative that went through the Sink but that was eliminated for various reasons. He said he thought he saw some where that was taken off the table by Mount Dora or something. He just wanted to be sure. PIO asked if he's seen the maps online? He said he went on line but wasn't sure if he was looking at the right thing. PIO said if he's at a computer now I can walk him through it. He said he isn't. PIO got his email address Clewis131@cfl.rr.com <mailto:Clewis131@cfl.rr.com> and said will send the map. It's on Gidran Terrace (don't have the number because there's nothing there right now). It's a new neighborhood been building for about a year. He asked if it was going through there they wouldn't be building houses, right? PIO noted we are just in the study phase and do not have an approved alignment. PIO noted there are bona fide developers who have been working on subdivision plans for years and are building in the study area or at or near alternatives; there are also speculators who have no plans to build and just buy land to cash in when the road comes through, so you will see different types of activity on the corridor. PIO reiterated we're in the very early stages of this project. PIO asked if he'd like to be on the mailing list, we have some public hearings coming up in the summer. He said yes, would like that very much. He said he's moving in a couple months but right now he's at 120 Orion Way, Sanford, 32773 (said it's on the Lake Mary line).

2/22/2008 7:20 PM Carl Lewis 407-427-4784 called and left MSG wanted to talk with somebody and get a few answers to some questions I have about this Wekiva Parkway and the 46 bypass... I'm building a house in a neighborhood that's right there next to wolf branch sink and I have some questions. If you could give me a call back I'd appreciate it.

Contact Mary Linn Carter and Associates

Notes

Date	Time	Regarding
9/26/2008	12:44 PM	PIO returned call to Mary Linn and walked her through getting the preferred alternative county maps on the OOCEA web site. PIO noted it's hi-res PDF so can zoom in on the property in question. She said this is just what she needed and thanks.

9/26/2008	11:26 AM	Mary Linn/Carter and Associates in Orlando called and left MSG we represent an owner who has property in the Apopka area. Trying to find out some info about the Wekiva Parkway in the works. We have a large area map but I'm trying to find something that pertains more toward Apopka , any map that you have. If you can call me back at 407-420-1315 thank you

Subject: RE: SR 429-Wekiva Parkway PD&E Study - parcel 21-19-29-300-0010-0000  
Scott,  
The red line is the Right of Way line, the limits of the property needed for the project. The yellow lines are the roadway lanes. The green represents a bridge.  
Under the recommended Preferred Alternative, the properties that make up the triangular area abutted by SR 46 to the south and Wekiva Park Drive to the west, including your parcel 21-19-29-300-0010-0000, would all be needed for both the roadway and a proposed retention pond. Keep in mind this alignment is subject to change, based on input from the public hearings in late September and pending agency approvals. Also pond sites are subject to change once the project moves from the current PD&E Study to final design. I hope that addresses your question. Please feel free to email with other questions or concerns.

Hello Scott, You can view the recommended Preferred Alignment Alternative for each of the three counties, as well as other project information, on the Expressway Authority web site at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx>>. We are now working toward formal public hearings for review and comment on the Preferred Alternative in late September. We will send out a newsletter with the meeting details once available, and also will post the information on the web site. Some changes to the recommended alignment is possible pursuant to the hearings If there is a consensus on any particular revision or realignment, etc. from there we will proceed to agency approvals, which we hope to have by early 2009 to complete the PD&E Study. I hope that helps. Please let me know if you have additional questions.

Subject: RE: Questions For You.  
Hello Patricia,  
We don't have a start and completion date for phase II of the John Land Apopka Expressway. That portion is not yet currently funded for construction and is not in the five year plan. At current funding levels, if nothing changes, that project would be at least five years out.  
We are only in the Project Development and Environment (PD&E) Study phase of the Wekiva Parkway, so construction is a number of years off. The project is not currently funded for construction, so schedule estimates vary and are entirely speculative. For the Orange County portion, the Expressway Authority has funding for the next step - final design - and some right of way acquisition in the current five year plan. The rest of right of way acquisition and construction would have to be funded in the future. The Florida Department of Transportation does not have money programmed for final design, and a little for right of way acquisition, so that schedule is more tentative.  
All of that being said, this project - which would complete the beltway around metropolitan Orlando, has been made a priority by area leaders, and they are trying to figure out a way to pay for construction sooner rather than later. So stay tuned.

Cc: Deana Leffler; '408Work'  
Subject: SR 429  
Hello Susan,

Brian forwarded your SR 429 query to me. Your query covers several OOCEA projects, two underway and one in the PD&E stage.

You are correct that SR 429 currently ends at US 441 south of Vick Road. We have begun the SR 429/US Highway 441 intersection improvements, which is phase I of the ultimate extension to connect to Vick Road. That is a very short connection and will not extend farther north than Vick Road. If you will recall studies in the past, the development that has since occurred in this area precluded this being used as the route to further extend SR 429 to the north. We will be posting an exhibit of this project shortly on the OOCEA web site.

8/5/2008 3:29 PM The "true" extension of SR 429, if you will, will occur at the end of the SR 414 - John Land Apopka Expressway. Phase I of that project will connect to SR 429 in the area of Ocoee-Apopka Road. Phase II will realign SR 429 and take it west and north to US 441 near TL Smith Road, west of Plymouth Sorrento Road. From there, the Expressway Authority's Wekiva Parkway - now in the PD&E study phase - will ultimately continue SR 429 north and west of Plymouth Sorrento Road into Lake and Seminole counties. You can go to this page on the Expressway Authority web site to view the overall SR 414 extension alignment <<http://www.expresswayauthority.com/Corporate/oursystem/SR414/assets/WEBEXHIBIT.jpg>>.

You can view the SR 429 - Wekiva Parkway alignment by logging onto the Expressway Authority web site at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/assets/WekivaParkway/Ex%201-2%20Overall.pdf>> . I hope that addresses your questions. Please don't hesitate to call or email for additional information.

Bryan: I read the following on the OOCEA website:

"Studies for the Western Beltway date back to 1974. By the early 1980s, plans were taking shape for a 55-mile limited access road connecting to I-4 in both Seminole County and Osceola County. However, eventually the portion from US 441 in Apopka north and east into Seminole County - designated as Part B - was deemed to have an adverse environmental impact on the Wekiva River Aquatic Preserve and was eliminated. "

Farther down it says:

"The Expressway Authority has made it a priority to extend SR 429 in order to finish the beltway around metropolitan Orlando. The OOCEA and the FDOT have been jointly conducting a Project Development and Environment Study for the Wekiva Parkway. That project would extend SR 429 from US Highway 441 in Apopka for 25 miles through Orange, Lake and Seminole counties with a connection to Interstate 4 at SR 417 (Central Florida GreeneWay). "

I'm trying to determine whether the connecting portion of SR 429 might be developed. Right now, SR 429 ends directly across from Vick Road. However, portions of the Maitland Boulevard Interchange, SR 414 are supposed to cross over SR 429 and end just west of Plymouth Sorrento Road. Have the plans progressed enough to know whether the future SR 429 connector will be built adjacent to Plymouth Sorrento Road or Vick Road?

Thanks.

The area north and south of the St. John's River bridge is already a bottleneck during the morning and evening rush hours. Keeping beltway traffic routed on the beltway, and not diverted onto I-4 for one exit, reduces the amount of merging traffic, and consequently reduces the opportunity for traffic accidents in an already congested area.</li> <li>2) Connecting the beltway at the 417 interchange simplifies the issue of toll calculation &amp; collection. It would eliminate any potential for squabbling between the State and the</li> </ol>

Federal government over funding for road maintenance on the section of I-4 supporting toll-road beltway traffic.

10/3/2008 7:48 PM 3) The intersection of route 46 and I-4 is also very congested with traffic entering/exiting for the Sanford Towne Center mall. There are currently 6 traffic lights within 1/2 mile on route 46 where it crosses under I-4 between International Pkwy and Rhinehard Road. Funneling the beltway traffic into this existing traffic restriction will cause serious congestion.

4) There is a growing problem with transportation noise pollution in Lake Forest, particularly the eastern section. Adding the beltway traffic to route 46 would only worsen the existing issue: (i) Traffic noise from I-4 is already clearly audible, particularly in the evening. (ii) The news helicopters circle at low altitude for long periods over the St. John's River Bridge area, including over Lake Forest, monitoring the traffic flow, and (iii) The traffic pattern for the increasing number of international jets into the Sanford airport brings them circling directly overhead of Lake Forest -- bringing enough noise to drown out conversations until the jets fly past.

5) There is a potential safety concern for the assisted care facility, the church, and the child care center located directly on 46 between Orange and International Parkway. For these reasons, we support the routing of the new beltway according to the existing Preferred Alternative/Southern Route. We strongly encourage you to continue supporting this option as well.

Thank you very much.

Best regards,

Date	Time	Regarding	
11/17/2008	1:21 PM	PIO returned call to Dave Lutz, who said he has 4.5 acres and people are asking how long his business is going to be there. PIO apologized for delay in getting back to him; he called while I was on vacation. PIO noted we're still in the PD&E study, waiting for approval from FHWA before can hold the public hearings, hope to finish the study by spring 2009, working to finalize a financing plan. And they'd still have to get into design, ... typically go after the larger parcels first, developments before houses go up before acquiring individual properties. Noted tough to nail down the schedule at this point. Given where we are, he's probably looking at a year easy before acquisition. PIO said as soon as we get FHWA approval will send info out on hearings and go from there. he said alright, appreciate the call back.	
11/3/2008	11:32 AM	PIO DL returned call to Dave. Explained that the project does not have an approved alignment and there is no funding for acquisition at this time. Noted his property is the Black Bear Nursery property. He said Exxon wanted to buy his property but he can't sell because the alignment goes over his property. Noted we have to do some work with FHWA. Once finalized we can move to Public Hearing. Noted we would notify him as soon as the hearings were set.	
11/3/2008	10:24 AM	PIO DL returned call to Dave. Explained Mary was on vacation. Got his lot number and told him I would see what I could find out and circle back with him.	
11/3/2008	9:51 AM	Dave Lutz called and left MSG I own property along SR 46, have lot #3278 on your maps that I see for the proposed Wekiva Parkway. I need somebody to call me about that. I thought we were going to be informed about some meetings over the summer and	

haven't seen anything. Need to know where we're at. We can't build on this, my business is going to have to move. Need timeframe on when you're going to take the land and what the procedure is from that point. Thanks appreciate the call back.)

Subject: Weikva Parkway Project

Dear Ms. Mary Brooks,  
Attached you will find my comments to the proposed Weikva Parkway Project.  
I have lived in Lake Forest for over 10 years and have seen a great deal of growth. The traffic has increased yes, but it is because of positive growth from housing and business. This has turned into a nice little area to live. This all can come to an end if the Southern Route of the proposed Weikva Parkway is not considered as the best route by the planning board. I would hate to see all this planning of making this area nice for all the communities and businesses that have developed here go to waste.

Thank you for your time

Janet Maas

 Subject: Original Western Connector Information - Old Railway Corridor

Hi Mary,  
 I hope you had an enjoyable and relaxing vacation.  
 Our group met last night and asked me to forward a request to you. Do you know where we can get information on the original Western Connector that went south of SR 46 - Old Railway Corridor? In the information that we have, this alternative was simply shelved and abandoned in 1990 because of financial feasibility criteria concerning right-of-way reservation maps. The information also states that a PD&E study was completed by the FDOT in 1989.  
 We would very much appreciate any information on the "Old Railway Corridor" alternative or how to obtain the PD&E study that was completed for it.

 Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC meeting questions

Hello Dan, After discussions with the Wekiva Parkway Study Team members, I wanted to provide the following information in response to your questions:

- 1) Agenda - Review Study Team findings relative to the assessment of the WPCC Map G Alternative
- 2) Once we have met with all of the SCEA Board members and incorporated their input, we will provide material to the WPCC prior to the Oct. 27 meeting.
- 3) We plan to record this meeting so that detailed minutes can later be made available to all.
- 4) Regarding the PD&E Study timeline, the Study Team is working with FHWA on specific documents and project issues. It is FDOT's intent to go to Public Hearings once FHWA has approved the documents for public distribution. At this point we unfortunately do not have firm dates for the hearings.
- 5) All SCEA Board members will have been briefed on the WPCC alternative evaluation by Oct. 22.
- 6) FDOT has indicated who was to be invited, as noted in the previously sent calendar item. However, FDOT will not restrict access to other interested parties from any meeting. Interested parties will be asked to hold all comments until such time that their input is most appropriate.

I hope this addresses your questions. As always, feel free to call or email for additional information.  
 Mary Brooks

To: Mary Brooks  
Subject: 10/27 meeting questions...  
Hi Mary,  
I have informed the group of the October 27 meeting date. We have a few questions for you concerning the meeting that we hope you can answer.  
1. What is the agenda of our meeting on 10/27?

2. Can we have any information or subject matter forwarded to us (mail or email) prior to the meeting to help us prepare?

3. Can we request that meeting minutes be taken at this meeting?

4. Is there a time line now for the project going forward? If so, will we hear this at the meeting? or can you send it to us?

5. Can you let us know the meeting dates that have been set with the Commissioners? We would like to know when the information is relayed to them.

6. It is our expectation that this meeting is with the listed invitees and the WPCC and that we will not have unknown guests or other organizations attending.TX. DWM.

Mary,  
  
The consensus is either date is good for us. Please pick one and let us know the time (3 00 pm?), place (FDOT 5? - same as before) and I will forward it out to everyone.

Greetings All,  
The coalition's suggested date and time below conflict with the Commissioner Woodruff meeting. I've asked them for additional dates and possible timeframes. Please note the remainder of their comments below and advise whether you feel any sort of response

would be appropriate, or whether we can simply discuss at the actual meeting.

Mary,

I have a consensus time of October 15 at 3:00 pm.for the meeting at FDOT in Deland.  
Please let me know if this is OK.

On an additional note. The FDOT CH2M Hill will be presenting information to us which they have spent months putting together. This information will be based on significant assumptions and quantitative information with which they are familiar, and which we are not. Therefore, to the extent any or all of the findings are not at their face value acceptable to the WPCC, then it would seem unreasonable that we could be expected to have time during this meeting to develop possible rebuttals or challenges. Further, it seems reasonable to assume there may be clarifications or additional details we might ask for which are not answerable at this meeting. This, of course, is the exact reason why the WPCC wanted to be included during the process and before the presentation to the SCEA. Unfortunately, this was not done and this information will be presented to all parties without our input and feedback. For these reasons, we consider this a preliminary update and that we have an expectation that there could very well be a need for a follow-up meeting and FDOT's commitment in this regard.

Mary,

I apologize for the confusion, but after I sent this email to you a couple of WPCC members stated that Friday, October 17 at 3:00 pm would be a better choice. Please let me know.

TX. DWM.

9/30/2008 1:00 PM PIO returned call to Dan/WPCC, who asked if we were scheduling multiple meetings with WPCC, or just one? PIO said I was looking for potential dates for one meeting. He asked what the agenda of the meeting would be? PIO noted we will be going over their suggested alternative, related issues, refinements needed to make it work, and impact assessment. He relayed discontent among his group's membership that they feel they've been kept out of the process, are very frustrated and emotional about how long this has taken. PIO said that's understandable for people who have not been through or are not familiar with what we have to do as part of these evaluations. He said people are complaining that we, the study team, are not putting their alternative out there for the

public to see. PIO noted their alternative has not been fully evaluated, we've only been looking at this for a few months (whereas the preferred alternative is the result of 3 years of study and analysis). He said people are very frustrated that we, the study team, are not getting their opinions out there.

9/30/2008 12:59 PM He said any alternative is going to have drawbacks; we think this one has the least. He asked if they were going to be part of the commissioner meetings? PIO said our direction from county staff was to meet with the individual commissioners first, and then meet with the coalition. He asked what would take place in the commissioner meetings? PIO said same thing, going over the suggested alternative, refinements and impacts. He reiterated complaint that they feel they've been kept out of the process. They didn't want to be brought in after everything was decided. PIO said sorry they feel that way. Nothing has been decided, but there is a protocol that's being followed, and we are committed to meeting with them before the SCEA Board meeting. He noted his emails don't touch the amount of emotion and hostility that he's getting from his members. PIO noted I can understand that and we will get back to him on a meeting date.

9/30/2008 12:41 PM Dan Macaluso/WPCC called and left MSG I just wanted to talk to you about email we sent you on Fri. to get a clear understanding of what you suggested in the email Friday afternoon or morning about setting up meetings. Give me a call at the office or send me an email. I will be leaving country wed. until Monday and back in office Tuesday. My cell phone 407-797-2817 I'll talk to you later.

Subject: Re: SR 429 - Wekiva Parkway PD&E Study - WPCC

Hi Mary,

Thank you for the below response. After review and consultation with other members of the WPCC Executive Committee, our consensus view on the response is very discouraging. The WPCC has consistently maintained the belief that the views of the citizens in the communities we represent have not been historically communicated in a fair and balanced manner to the SCEA Board. It is for this very reason that we insist to be a part of the discussion, before presentations are made, as to whether the package being prepared is appropriate to be presented to the SCEA Board - particularly with regards to how it represents WPCC views, and any comments on the WPCC proposed Northern Alternative. If we make the Board aware that we were intentionally kept out of any participation in the assessment process, other than the initial presentation of the proposal on July 15 at FDOT R5. At that July 15 meeting, FDOT's George Lovett told the WPCC he would insure there would be another meeting with his staff prior to anything being finalized or presented to the County. Unfortunately, we have had no such meeting, and absolutely no feedback on any of the details of the analysis of our proposed Northern Alternative. Combine this with your most recent response, and the WPCC consensus interpretation is that the proposed RPA alignment is actively being tweaked to be approved, while the WPCC Northern Alternative is being reviewed for "discussion" and eventual "rejection".

9/25/2008 9:19 PM

We are also dismayed by the fact that we should have had by now a definitive answer to our question raised at the July 15 meeting of "whether the SCEA Board is open to considering a Northern Alternative". We have followed up several times since the meeting with CH2M Hill, and it still has not been answered. CH2M Hill, et. al. were directed to "work with us" by the SCEA Board at the May 6 meeting. It should be noted, that to this point, it is our view that all their efforts have been directed at holding meetings, creating renderings of the RPA, nullifying our proposals (i.e. "playing Devil's Advocates") and offering nothing in return that advances the situation to an amicable resolution. This is clearly not "working with us" as they were enjoined to do, most recently, by the SCEA at the May 6.

We continue to get unanimous positive feedback for the WPCC Northern Alternative in all our meetings with local businesses, churches, schools and communities. All the PD&E Study comments that we, the SCEA, and you, have received have consistently directed the SCEA to reject the proposed RPA in favor of the WPCC Northern Alternative or similar route. We urge you to pass this information on to CH2M Hill and the County Staff so they are aware of the groundswell that has been created and that their decisions are based on reason, available resources and what the vast majority of the area constituents want.

Respectfully,

Dan Macaluso

Subject: Re: FW: SR 429 - Wekiva Parkway PD&E Study - Perspective Renderings for WPCC

Hi Mary,

Please express our appreciation and gratitude to all the professionals involved in creating these renderings. We have also received the large-format paper copies last weekend, as well.

After reviewing these renderings and adding realistic vehicle traffic images to the roads, we believe our fears of the proposed Recommended Preferred Alternative have been validated even further. The renderings at GladeView, CapriCove, and especially at TwelveOaks, and Walden are particularly disturbing as they visually depict how the RPA can not possibly meet the core requirements of a Parkway. They also clearly illustrate our concerns that the proposed RPA will divide our long-established neighborhoods forever by "threading the needle" through our businesses, schools, churches and communities.

As you know, the proposed WPCC Northern Alternative addresses these required and critical issues, while providing the following advantages:

9/22/2008 9:19 AM

Provides a limited access parkway roadway

- Allows for a seamless SR 417 / Wekiva Parkway connection, providing a continuous loop
- Provides stronger I-4 access points (one at the new I-4 - Wekiva Parkway - SR 417 interchange ramps at St. Johns River bridge, as well as utilizing the existing SR 417 East / West I-4 connection, and the existing SR 46 access)
- State Road 46 east of the Wekiva River can remain fully functional, traffic will flow freely as it does now, with no need to add overpasses, and no need for the disruption caused by construction down time
- Complies with the requirement to cross the Wekiva River at the existing SR46 crossing point
- Preserves approved planned SR 417 / International Parkway linkage. This road (the temporary project) would be later removed under the Recommended Preferred Alternative RPA), whereas the WPCC Northern Alternative avoids a significant charge write-off (\$40 000,000+) to the taxpayers for what would otherwise be a temporary road,exchange
- Minimal right-of-way condemnation of residential, recreational, business and church property
- Primarily utilizes undeveloped County and State Park land
- Provides a natural buffer for wildlife, thus significantly decreasing animal/wildlife unwanted encounters and fatalities. This 'seal' around developed areas to the south of the roadbed would also effectively make potential future development in the wilderness area to the North not feasible due to lack of road access, and would hedge against possible pressure in the future to free up the land for development.
- Takes advantage of existing right of ways

9/22/2008 9:18 AM

Potential for close to "at grade" reduced construction expense for much of the roadbed

- Potential SR 46/417 ramps at Bevier Rd and SR 46 section. This will substantially increase business access and opportunity East of I-4 on SR-46, while allowing easy access to the downtown Sanford area and businesses.
- Eliminates need for service roads - potential for significant taxpayer savings
- Potentially no impact to 24 inch natural gas line on north side of SR46 - potential for significant savings
- The sewage force main to Yankee Lake can remain where it is - potential for significant savings
- Electrical and water distribution along SR46 will not be affected - potential for significant savings
- Allows for potential future expansion. If the RPA is expanded beyond six lanes, right of way acquisition would immediately impact bordering communities
- Provides room to develop a "Parkway" like roadway (through more remote location of the routing), in keeping with the "Seminole County Florida's Natural Choice" theme and

the mandate of the Wekiva Parkway and Protection Act, whereas the RPA, because of right of way economic constraints, provides virtually no environmental buffers between the roadway and adjacent communities after departing the SR46 alignment. Instead, a 28' vertical wall is planned, with the roadway threading its way through the communities

- Maintains a rural atmosphere for Wekiva Basin area communities
- The alignment will preserve full, bi-directional SR46 access for Capri Cove, Bella Foresta, Lake Sylvan Estates, Sylvan Lake Reserve (aka Glades on Sylvan Lake), Sylvan Glades, Colonial Estates, Ross Lake Shores, Markham Forest, Foxspur, 12 Oaks, and The Estates at Wekiva Parkway, among many others, for residents
- Limited impact to commercial and residential areas during construction

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - WPCC Update 2  
Hello Dan,  
Regarding your query below:  
We met last week with some Seminole County staff to go over the suggested alternative, but we were requested to arrange meetings with other county personnel as well. We have been asked by county staff to include additional analysis and information in the evaluation. The county staff has also requested that we meet individually with all members of the SCEA Board prior to meeting with the coalition in advance of the next SCEA Board meeting in November.  
It was determined that we should put on hold finishing the additional stakeholder list until after we complete all the individual meetings with Seminole County staff and SCEA Board members.  
The preliminary ground view renderings have been completed, however, after review some refinements to them were requested by county staff.  
I can't give you a date at this time for when we will be able to meet with the coalition, but it is our intention to do so as soon as possible after completing the various meetings requested by Seminole County staff. Part of that timeframe will be the ability to schedule individual meetings with each of the SCEA Board members.  
I hope that helps.

 Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC Update 2  
 Hello Mary,

We wanted to touch base with you to get an update on the items listed....

1. Did the list of additional stakeholders get compiled? If so, can we receive a copy?
2. It has been 8 weeks since our FDOT/CH2M Hill/WPCC July 15 meeting, therefore -  
 Do you have an update on the status of the WPCC Northern Alternative route investigation process?  
 Do you have an update on the status of the projected ground view cross sections of the RPA?
3. Did you receive any feedback concerning the "openness" of a Northern Alternative route from the SCEA staff, CH2M Hill or Commissioners?
4. Do you know when the follow-up meeting with the WPCC will be held?

Thank you for your response and we hope you are doing well.

DWM.

 Hello Dan, Regarding your email below, we are in the process of compiling a list of additional stakeholders who will likely have an interest in the WPCC's suggested Alternative G. I can provide that list once complete. You and many of your members are already in the project database and on the email list for updates, as a number of you have acknowledged receipt of same in the past. We have not sent any new updates out recently but have updated the OOCEA web site to reflect that the public hearings are now expected in the fall, perhaps in late October or early November. Once the hearings have been nailed down, we will send out a project newsletter with the details and also will update the web site. We typically also do an email blast to those with email addresses listed in the database, such as yourself, prior to the hearings. As noted in my email below, it is our intention to meet with the WPCC, as well as concurrently reviewing the Alternative G evaluation findings with Seminole County staff, to seek additional coalition input.

I hope that addresses your points of interest. As always, you're welcome to call or email with additional questions or concerns.

Mary Brooks

Subject: Re: SR 429 - Wekiva Parkway PD&E Study - WPCC Update

Hello Mary,

We apologize if we were not clear before. We had asked if you had found the Commissioners "Open" to a Northern Route alternative - of which the WPCC Map G Alternative is one such example. We anticipated that you would actively seek out this information, via the SCEA staff - within the protocol guidelines and from the appropriate sources, as it would make everyone's effort more efficient, less-costly, and focused. Our belief is that the SCEA Commissioners would be open to a Northern Route alternative such as proposed by the WPCC. Thus, in a effort to help the process, they are copied on this email. We ask that if you find that our belief is incorrect via any responses or information that you obtain, that you please let us know.

We would like to request the following based on your last response:

- May we have the list of the other "stakeholders" that may have interests with the concept proposed by the WPCC? Considering, that the WPCC has involved or talked to most communities immediately West of I-4 along SR-46, we would like to know who we may have missed.

8/18/2008 8:42 AM

May we be included on the "update" list for this project, thus we can receive proactive and timely updates? We anticipate that there is already setup a email list, website or some form of electronic data transfers that routinely provide updates as the project progresses.

- May we request an "In Process Review" with CH2M Hill and/or FDOT following the completion of your Tasks #2 & #5. It is critical that the WPCC message and intentions are conveyed correctly and fully before any summary information is forwarded to SCEA staff or other concerned parties. As you would agree, we believe that conveying accurate and complete information is of the utmost importance. We would like to help you in this effort.

Thank you all everyones efforts.

Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC Update

Dan,

I've had a chance now to speak at length regarding your Question #1 below (re: Seminole County Commissioners) with Mark, who also has reaffirmed the procedure they're following with FDOT officials. At our meeting with the WPCC we did not commit to "poll" Seminole County Commissioners on this concept. We were very clear on what we would do and we are moving forward with those efforts. They include:

- Based on the discussions and information provided by the WPCC, we have laid out some concepts that respond to the group's desire.
- To give your idea a fair look we are assessing several factors related to the concepts including impacts, costs and traffic service.

8/11/2008 6:02 PM

As we complete these analyses we will also assess whether the concept addresses the purpose and need of the project (as required by FHWA) and review with FDOT.

- Once we have finished that effort we will coordinate with Seminole County Staff to get their input and further direction. (If staff directs us to coordinate with SCEA Board members at that point, or if Board members request information, we will adhere to those requests.)

- Otherwise, we will then coordinate with other stakeholders that may have interests associated with the concept proposed by the WPCC.

- At that point we will loop back to Seminole County staff to review what we have heard and ask their direction relative to meetings with SCEA Board members.

- Concurrently we will loop back with the WPCC and provide a summary of the findings and input and ask for their additional input.

As we mentioned this will take five weeks at least and we are trying to get this done, in addition to the other tasks and documentation required for this PD&E Study. We hope the coalition membership will understand that this is a general process and protocol we use on all of these types of studies.

Mary Brooks

8/7/2008 1:33 PM

PIO returned call to Dan Macaluso 407-585-0250 had meeting last night, went good. They got the northern route blown up, a bigger picture, and he's meeting with Berington HOA tonight and going to Buckingham in a couple weeks to give them updates.

8/7/2008 1:32 PM

Question 1: There was a stark difference between what Mark said commissioners were open to and what Damon was saying. Is he going to meet with them, the commissioners? Some people were asking last night why that hasn't happened yet. PIO noted when I spoke to Mark on Monday he just got back from two weeks vacation. PIO also noted this is not the only activity underway for this study; we are also working on other items. PIO said I'd get with Mark re: his plan for the commissioners and get back to him.

Dan pointed out again what Damon said and Mark said re: commissioner opinion was exactly opposite. PIO noted we have been meeting with the commissioners for three years so Mark has a very good read on where they have been and where they stand now, but will get back to him on that.

Dan said about the timing, so you know what we're after... if commissioners are not open to it, then we don't believe FDOT will address it and will continue with the preferred alternative. We would have to go back to Damon and verify ...

8/7/2008 1:31 PM

Question 2. We don't know what's going to happen ... Sept. 15 was the next public

meeting. We know there are public meetings and if this northern alternative is something that will be considered or looked at further, are they going to ... what's going to happen, are they going to continue to present the recommend alternative...are they going to wait for the commissioners to say no, we want you to look at this one? PIO noted can't speculate what Mark will say or what will happen, but reiterated that George Lovett said he wants the best alternative with regard to meeting transportation need, minimizing impacts and being financially feasible. PIO noted until we finish the review of their alternative, we don't know if it does that better than the preferred alternative, so can't say what will happen. If it turns out to be the best alternative then George Lovett said that's what the Department wants. He said one thing that did not come up in the meeting was, we brought out alternatives and we all talked about why this one or that one should be eliminated, but the state didn't come forward with any new alternatives. PIO noted we have been vetting alternatives since the beginning of this study. We have already gone through the initial and viable alternatives evaluation process. This where we are in this study, at a preferred alternative, but the Department is entertaining your additional alternative for evaluation. Dan said every alternative has negatives. It's easy to sit there ... there's no alternative that doesn't have issues. We understand you have to pick one that has the most advantages and meets core objective of the project.

8/7/2008 9:21 AM Dan Macaluso/Sylvan Lake Reserve HOA president and WPCC called and left MSG I want to talk to you about the couple of emails we've sent, give me a shout, thought it would be better to discuss it on the phone as opposed to emails.

Subject: RE: WPCC - Update  
Good morning Dan, An update on some of the activities taking place since the July FDOT meeting with the WPCC and items from your email below:  
1. Will get back to you.  
2. Will get back to you.  
3. Will get back to you.  
4. We are working on alignment concepts and geometry based on WPCC Map G, including the related construction cost estimates and the traffic operations analysis. We hope to have the aerial based concepts and documentation of the engineering/traffic analyses complete within the next couple of weeks for review by FDOT. Please be aware that schedule must also take into account the many other parts of the overall study that we are dealing with at the same time.  
Also, we have started on the five perspective views that your coalition requested, and should have those complete within the agreed upon five-week period. We will have to get

back to you regarding the other items.

Subject: WPCC - Update  
Hi Mary/ Mark,

Just wanted to check in and see if you had any questions for us, since the July 15 meeting? If so, please feel free to call (407.585.0250 W, 407.324.8017 H) or email. We had a couple of questions, that we hope that you may be able to answer for us.

1. Did Mark find that the Commissioners were now open to a Northern route, as Damon Chase stated in the July 15 FDOT meeting?
2. What is the expected process and timing of the next meeting based on the investigation of the WPCC Northern alternative? Meaning, what impact, if any, will there be on the schedule or what the SCEA will be presented?
3. The State made a comment at the July 15 meeting concerning the WPCC Northern alternative (Map G). The gentleman stated that we must keep our eye on the "Northern Star", meaning that the WPCC Northern alternative must meet the original traffic relief intentions. After the meeting we discussed this comment and did some research. Other Northern alternatives were being considered, but were discontinued from consideration see 12/20/2005 meeting presentation) for reasons that were unclear. It is our belief that because Northern alternatives were being considered that they did meet the original traffic relief intentions. Is this your belief also?
4. Is there any update to the investigation of the WPCC Northern alternative - Map G - "Seminole County/Bevier Rd Alternative" Thank you for your response and continued support.

DWM.

Subject: RE: WPCC submitted Wekiva Parkway Alternatives - Resending Traffic Report Info

Dan, As a follow up to the additional traffic questions raised, the east-west distribution of Wekiva Parkway traffic is shown on Figure 5-1. This figure traces Wekiva Parkway traffic on the facility at the Seminole/Lake County Line and how it is distributed through Seminole County. The largest percentage of traffic is heading to a portion of Seminole County to the east of I-4 along SR 417 (37%). Most of this traffic utilizes the Rinehart Road, CR 46A, US 17/92 and Lake Mary Boulevard/CR 427 interchanges to access land uses along those corridors and in the Sanford area. Some traffic continues on SR 417 to the south to the Oviedo/Winter Springs/UCF area. The information related to the 10,300 daily traffic reduction on I-4 south of Lake Mary Boulevard was in reference to the question of Wekiva Parkway's impact on I-4. This impact is found by comparing the traffic volume at that location in the 2032 No-Build condition (Figure 3-8A) to the 2032 Build condition (Figure 6-8A). Connecting Wekiva Parkway to SR 417 allows the traffic movement between Lake County and Sanford and the surrounding areas (including the US 17/92 and CR 46A corridors) to be accessed directly using the expressway system. This relieves traffic along SR 46 at the I-4 interchange, near the mall, and on into downtown Sanford by diverting these through trips onto the expressway. It relieves future congestion along this section of the SR 46 corridor and allows better operating conditions. Today this direct movement does not exist resulting in the majority of this traffic movement remaining on SR 46 to go between Lake County and Sanford. Hopefully this answers the question about Rinehart Road traffic volumes. I hope this further addresses the questions raised.

Hello Mary,  
We just finished with our WPCC Exec. meeting and the July 15 date at 3:30 in Deland is good. Please expect between 5 to 8 representatives of the WPCC Exec committee. I can give you a final count in the next few days as we confirm the last couple of people. As far as the meeting agenda is concerned, we are assuming it will cover Open Issues 1, 2 and 3 which we have had previous communications on. (see below). Thank you again for accommodating us and also for everyones efforts concerning this very important matter. DWM.  
1. Review and discussion of the WPCC Alternatives submitted at the May 6th SCEA meeting (last correspondence - 5/6 SCEA meeting).  
2. Review and discussion of other Alternatives presented by CH2M Hill (last correspondence - 5/6 SCEA meeting).  
3. Ground level graphical views of the Recommended Preferred Alternative (last correspondence - Bob Watson - 5/14)

Subject: RE: FW: WPCC submitted Wekiva Parkway Alternatives  
Dan,  
As previously noted, we will discuss items 1 and 2 below in the pending meeting, tentatively set at the FDOT District Office in Deland on June 19 at 3 p.m. (just waiting to hear back from you all to confirm). CH2m Hill is working on number 3, which they also hope to have by the June 19 meeting. I provided information earlier for item 4A, if you will

As regards item 4B and potential impacts to Orange Boulevard, the traffic consultants indicate that when looking at the future year conditions in 2032, the presence of Wekiva Parkway results in lower traffic along Orange Boulevard in Seminole County as it provides another option for traffic to go between the I-4 corridor area and the SR 46 corridor. The cut-thru traffic along the local roadways that occurs in the No-Build condition can use Wekiva Parkway in the Build condition. In addition, the inclusion of the Wekiva Parkway/International Parkway interchange provides direct access for the trip interactions between Wekiva Parkway and the employment centers along CR 46A and International Parkway. Thus, this interchange provides direct benefits to the local roadway network by removing these trips from the local roads. The 2032 No-Build and 2032 Build directional design hourly volumes and LOS for Seminole County are shown in Figure 3-9B (pg. 74) and Figure 6-9B (pg. 150), respectively. Figure 4-10 (pg. 96) shows a comparison of traffic in Seminole County under the four Build Wekiva Parkway alternatives. In this figure, the direct connection to I-4 at SR 417 is shown to have a lower volume along Orange Boulevard south of SR 46 compared to the other build alternatives.

I hope you find this information helpful.

Subject: Re: WPCC submitted Wekiva Parkway Alternatives  
Thank you!

Mary Brooks wrote:

Regarding the WPCC query about traffic, you will likely find some helpful information in Section 5.1 (Traffic Distribution) of the traffic report (pages 101-103). The traffic consultants point out that if a direct connection between SR 417 and Wekiva Parkway is not made, there is not enough right-of-way along I-4 between SR 417 and SR 46 to widen I-4 sufficiently to accommodate all the direct traffic movements between SR 417 and Wekiva Parkway. This is mainly due to the presence of the existing mall. As a result, not only would level of service on I-4 degrade, but overflowing traffic from westbound SR 417 trying to reach the Wekiva Parkway would be required to use local roadways (Rinehart Road, International Parkway and existing SR 46) to make this connection. Since this is a strong traffic movement, the loading of the expressway traffic onto the local roadway network would result in more congestion and reduced level of service, neither of which are

desirable. This same condition exists today with SR 417 westbound traffic destined for SR 46 west of I-4. Today that traffic must exit off at Rinehart Road to access SR 46 as there is not a direct connection from westbound SR 417 to the I-4/SR 46 interchange. When looking at the direct impacts to I-4, the presence of the Wekiwa Parkway would reduce the interstate traffic by approximately 10,300 daily vehicles (almost 6 percent) south of Lake Mary Boulevard. This would benefit travel conditions along this area of I-4. I will also follow up on the Orange Boulevard question and get back to you.

Hi Mary,

Thank you for the update. In my last email, I believe the 4 request Items made by the WPCC members were summarized. Since then, request #4 has been delivered, but has prompted 1 new question and a repeat request to provide direction to supporting data. Here is the summary of the open Items:

1. Review and discussion of the WPCC Alternatives submitted at the May 6th SCEA meeting (last correspondence - 5/6 SCEA meeting).
2. Review and discussion of other Alternatives presented by CH2M Hill (last correspondence - 5/6 SCEA meeting).
3. Ground level graphical views of the Recommended Preferred Alternative (last correspondence - Bob Watson - 5/14)
4. Traffic studies as they pertain to SR429-I4-SR46 connectivity (Mary Brooks delivered 5/28, Charlie Shaw - 5/30)
  - Request to "...point us to the specific data in the study from which the conclusion is drawn that there would be a significant traffic impact on I-4 if the direct connection is not made."
  - Request to "...provide comments to the Level of Service (LOS) and traffic impacts provided by the build alternatives in the WPCC area"

We certainly appreciate everyones efforts and look forward to a meeting to discuss the Alternatives. As we stated previously, we anticipate the meeting to be a bi-directional flow of information and new ideas. Please contact me anytime with updated information or questions and I will coordinate the distribution and collection of the material and feedback.

Thank you.

Dan,

We discussed a number of things in our meeting late Thursday with FDOT, including the numerous requests we are receiving from different members of the WPCC, and that it is becoming difficult to keep up with. We would request that you designate one person, perhaps yourself, to liaise with us. That way it will be easier to track the requests and to not let something fall through the cracks. Also, I will be your sole point of contact henceforth, as I'm in close communication with all of the parties involved in the study and have the dedicated time to attend to your questions and requests. You are, of course, welcome to continue to copy anyone you like on emailed requests to me. We continue to work through evaluating some of the suggested WPCC alternatives, and hope to have some information on those in about three weeks. We also have a number of questions about some of the other alternatives that your group has suggested. We would like to meet with you and a few core members of the coalition, perhaps in the third week of June, to go over what we have and to get more information from you. I've got to check with the FDOT calendars and will be getting back to you soon with some dates. We understand that you all are anxious for information, and we're doing our best to keep up with your requests. But we ask that you remember there are a number of other items we are dealing with along this 25-mile corridor, as well as the required engineering and documentation required at this stage in the PD&E study. We appreciate your cooperation and patience, and will be getting back with you soon.

Dan, Thanks for the note and sorry for the delay in responding. We have looked at the concepts your coalition has provided and we are in the process of coordinating with the Florida Department of Transportation on any question there may be regarding your ideas. As we get our questions together I think that will be a good time to get together. Mary will stay in touch as we get a time frame established. Thanks, Mark Callahan

Sylvan Lake Reserve HOA meeting at Sylvan Lake Park  
Dan Macaluso, president  
Adrienne Zeca, vice president  
Lori Bragg, secretary  
Charlie Shaw, webmaster

Mark gave brief history and overview. Noted purpose of project was connectivity and improvements to address environmental concerns.  
Noted the progress through the study to get to recommendations, finalizing documentation, summer public hearings. Noted issues being worked out with FHWA.  
Went over SC preferred alignment and typical section.  
Noted major changes re: access to subdivision with regard to visibility, noise relating to the project.  
Noted there will be a bridge at Glade Road that will allow direct access to the west on SR 46. also bridges at Longwood Markham Road and River Oaks, went over elevations. Mark noted between the bridges the road will come down some, in a couple of places almost to grade.

Q: Do you have to get on the Wekiva Parkway in SC, can you just stay on the frontage roads? Mark noted yes, in Seminole County and then you'd have to get on at the river.

Q: When will you be turning dirt? Mark noted FDOT and OOCEA current funding levels...  
With the funding situation, we don't have a good idea of when it's going to the next phase design. Noted timeframes needed for various phases and we don't have all the money needed for design ... 10 years would be more realistic, and it will be done in sections.  
PIO noted that OC Mayor Richard Crotty, chairman of OOCEA, has been working to build a stakeholders' coalition, turnpike, local governments, etc., to find a way to fund the Wekiva Parkway. PIO noted with that, and the power of state legislation behind it, don't believe this project will be one to just sit on the shelf.

Q: What are the FHWA issues causing the delay? Mark went over 106 section, noted issue with historic house in OC that appears to meet the criteria, process involves State Historic Preservation Officer.

Q: Who "recommended" the preferred alternative? Mark said that is the result of the consultant's study, and FDOT and OOCEA have accepted that recommendation to move forward to public hearings. He noted it's called the "recommended" because some changes, mostly minor tweaking, still possible based on input at hearings.

Q: Will the tax cut amendment affect this? Mark noted don't believe so at this point, from what he understands the focus is on local government millage. We would not be receiving those types of funds for this project.

Q: Where is the Wekiva Parkway crossing Orange Boulevard? Mark noted at the Lakeside church ball fields, that property will likely have to be acquired.

Q: What is the elevation at Orange Boulevard? Mark said bridge would be about 25-28 feet above grade.

Q: What about noise and aesthetic mitigation? Mark said there would be some landscaping though we're trying to minimize the land being taken and that limits what you can do. Noted with some of the bridges there would be some opportunities for aesthetic treatments. Think FDOT will be looking to incorporate this in design.

1/17/2008

7:00 PM

(Continuation of HOA meeting...)

There was a concern raised by residents about not wanting the Wekiva Parkway to look like SR 417 at Upsala, which they considered blight. Mark said communities can work with their commissioners to get them to impress upon FDOT the need for aesthetics.

Mark said we've done noise study and have received comments, should finalize those and put on web site in next 4 weeks or so. He noted there were some noise increases but the impact approach 66 db in some locations. We have looked at some abatement. Mark explained the process: checking ambient noise and existing traffic volumes, described FHWA criteria, model to predict noise levels. Then we plugged in improvements and traffic in the model (LOS C). model predicts noise sensitive receptors (homes mostly). He said we looked at abatement (walls) in those locations, looked at varying heights and lengths. He noted the wall has to reduce the noise by at least 5 db. If that can happen, then they do cost-benefit analysis, can't be more than \$42,000 per benefited property in order to be feasible.

Mark noted this area does not meet that criteria. Dan had a PowerPoint playing of info we had sent them, including the noise maps. He noted all of the info was on their web site [www.sylvanlakereserve.com](http://www.sylvanlakereserve.com) <<http://www.sylvanlakereserve.com>>

Q: I've noticed when the lake is up and there is no vegetation, you can hear the noise a lot more from SR 46. Was that taken into account in the noise study?

Q: Did you take into consideration airport noise? Mark said no, we're focused on the highway, and we're not in a position to abate airport noise.

Q: Why not use the vacant land on the other side? Mark went over the former alternatives north of SR 46, noted those involved a lot of wetlands and floodplains. Much of that land has been purchased for conservation.

Q: What is the power of SCEA to make decisions in this process? PIO and Mark noted FDOT wouldn't push something like this through without local government support. Mark noted SCEA enabling legislation says that the EA has final say on any expressway alignment in SC.

Q: What happened to the old alignment south of there, that's where it was going to be when I moved here 10 years ago? Mark went over transportation planning changes and state land purchases that led to area being removed from consideration. He also noted Wekiva Parkway committee work and study area we were given to work from.

Q: I understand that none of the portion on SR 46 would be tolled, but from what you're saying it doesn't sound like that is cast in stone? Mark noted OC portion by OCEA would be tolled. He said right now we're not looking at the Lake and Seminole portions to be tolled, but that possibility may come about. He noted different options that had been bandied about if that were to come to pass, to allow residents local access without having to pay tolls.

Q: Where are the ramps to get on? Mark noted about 500 feet east of River Oaks, then in front of Bella Foresta, and then east of Orange drops back down. Mark noted project includes six laning east end of SR 46 to Interstate 4.

(HOA meeting continuation 3 ...)

Mark noted with the Wekiva Parkway the traffic will probably be less on the frontage roads so it will be easier to get in and out of subdivisions. Most of the traffic will be up on the parkway.

Q: Will there be a signal at our entrance? Mark said he would suspect there would be a light under the bridge.

Q: What happens at the river? Mark noted the bridge will be raised about 30 feet higher and it will be longer for the environmental corridor. It will allow animals to pass via the direct river habitat.

Q: Will there be an exit to get off to go to Mount Dora? Mark pointed out that route on the exhibit.

Q: Will CR 46A be closed? Mark went over realignment, noted portion being abandoned again to open up wildlife corridor. He noted goal of opening up the expansive Wekiva-Ocala wildlife area.

Mark went over east-west movement at SR 417. he noted originally they thought it would show the IC needed to be at SR 46 and I-4. he said it became clear that wouldn't meet the traffic needs, pointed out east-west flow from SR 417 to Lake County.

Q: Why can't it go down International Parkway? Mark noted we couldn't get the IC movements in, and it's the county's high intensity corporate development corridor, very expensive land in there. Dan noted there is a civic center planned in there now. He had slide of the International Parkway alternatives up on the screen.

Dan noted they have developed a coalition with Tall Trees, Capri Cove, and Berington and have been meeting the last two months, all are opposed to this alternative, this is not why we moved out here. it's been proposed elsewhere and it's moved before, so they can do that again. We're going to become active. he noted they have made commissioners aware of their coalition and plan to meet with them, have professional help in crafting additional alternatives, lobbying, etc.

Someone commented that the reason the 417 alignment was selected was because of the Lake Forest development, and that a commissioner lived in there.

Someone commented that SC was still allowing development along 46 and its not cheap - it's going to be expensive to buy that property for the road.

Mark noted the most expensive ROW along the corridor is in SC.  
Mark said we could come back after the noise study has been released if they wanted, or closer to the July public hearings. The HOA folks thanked us for our time.

Hello Mary,  
The meeting on January 17th is our Annual Community HOA meeting. It is at 7:00 pm at Sylvan Lake Park, main building in the large meeting room. You attended our annual meeting last year and I believe your 15 - 20 minute update and summary was very well done. We will have a projector and laptop there for your use, if needed.  
We would like to thank you again for your participation in this matter and look forward to seeing you there. If you have any questions or need further assistance, please do not hesitate to contact me.  
Respectfully,  
Dan Macaluso  
Sylvan Lake Reserve (Glades at Sylvan Lake), HOA President

Hello Charlie,  
Happy New Year! January is filling up fast with meetings, and I need to confirm the date, time and location for your HOA meeting that we are supposed to attend this month. I think we had talked about it being on the 17th? Please confirm and provide details. Also, is this your subdivision master HOA meeting, or is this the one where you were going to invite members from other outside HOA's? Please advise - thanks.

Hello Greg,  
That portion is on Phase II of the State Road 414 - John Land Apopka Expressway, which is not yet funded for construction. The design is nearly complete and in the meantime the Authority is trying to acquire the right of way, but there is no schedule yet for construction until funding becomes available. However, there is a concerted effort being made to come up with a financing plan for the Wekiva Parkway, which would extend north of the project limits in your attachment, and it is understood for connectivity that phase II of the John Land Apopka Expressway would be included in that funding. I'm told the Authority hopes to have a financing plan in place by the end of the year. Stay tuned.

Date	Time	Regarding	
7/30/2008	4:33 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wed 7/30/2008 4:33 PM To: omtatsatinst.ofyoga@gmail.com Cc: Deana Leffler Subject: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report Ama, It was good speaking with you. You may view the Noise Study Report on the Expressway Authority Web site at < <a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=NoiseStudy">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=NoiseStudy</a> >. Please let me know if you have other questions. Take care. Mary Brooks	

7/30/2008 4:17 PM Ama Mahabir/Om Tat Institute 407-227-0565 called and noted we'd spoken several times about them wanting to build a church (Orange County). She asked was anything going on? Is it still alternative 1? PIO noted that we had hoped to have the public hearings in August, but the document review process by state and federal agencies is taking longer than expected, so we're looking now at late September. PIO noted as far as the recommendation for the preferred alternative posted on the OOCEA web site, that has not changed in months. She said we started checking with architects concerning the land and there are not many places we can build on the 10 acres. Do you know if there will be the big walls like they have on SR 408? PIO noted a noise study was done as part of this project and the report is posted on the OOCEA web site. PIO noted don't recall her area specifically, but generally it takes an urban, densely developed area to warrant incurring

the cost of a noise wall, and her area I don't believe would qualify for that. PIO noted we do, I believe, have recommendations for noise abatement in some areas of Seminole County that are densely populated.

7/30/2008	4:16 PM	<p>She said they are getting ready to meet with Orange County on our plans, sure there will be questions about water, etc. she said they have met with the engineers. We will see if we can start building and we will proceed from there. She noted alternative 1 doesn't affect us at all; can we be sure that won't change? PIO noted the recommendations for the preferred alternative posted on the web site has been through quite a bit of public and agency input already, though there is the chance that there might be an overwhelming consensus that something needs to shift or be tweaked out of the public hearings. PIO noted we do have organized faction in Seminole County that is trying to change an interchange location, for example, though haven't heard of anything like that afoot in OC. She said they are planning a \$1 million undertaking and don't want to build it and then have the property needed for the road. PIO noted I understand her concern and it is one shared by many. PIO also noted to keep in mind even if we finish the study in early 2009, we still need 2-3 years for design and another 2-3 for ROW acquisition, it'd be 5 years really before construction began and that's if we had the funding, which we don't. She reiterated we're going to proceed. She said thank you for the info, you're always very helpful.</p>
5/14/2008	9:45 AM	<p>Ama 407-227-0565 called and asked if anything had happened with the 429 extension? PIO confirmed she was referring to the Wekiva Parkway, noted we're still working to wrap up the study. PIO noted public hearings now looking more like August instead of July. PIO noted as documents are being finished they are being posted on the web site, noted the noise report had been posted and EBSA could be posted today. She said but nothing has been decided as far as the final route? PIO noted we have a recommended Preferred Alternative for the alignment and interchange locations. After the public hearings that would go through the agency approval process. She said okay and thanks.</p>
1/10/2008	8:58 AM	<p>----- Forwarded message ----- From: Om Tat Sat Institute of Yoga &lt;omtatsatinst.ofyoga@gmail.com &lt;mailto:omtatsatinst.ofyoga@gmail.com&gt;&gt; Date: Jan 9, 2008 8:58 AM Subject: Re: 2115 Haas Road, parcel ID no. 06-20-28-0000-00-027 To: Mary Brooks &lt;mbrookssr417@cfl.rr.com &lt;mailto:mbrookssr417@cfl.rr.com&gt;&gt; Good Day Ms. Brooks Thanks for your prompt return call this morning. Hope you were not stuck on I-4 with the massive 50 car accident involvement. This is per our conversation whereby I am to remind you to send us the 11 x 17 map of the 429 Extension north of this subject property  Again, from our Guru (Priest), many, many thanks for your kind assistance in this matter. Happy and Healthy New Year 2008 Ama Mahabir Assistant to the Secretary</p>
1/10/2008	8:37 AM	<p>PIO returned Ama's call, said she had emailed with me back in October, and I'd told her their property to build the temple would be about 80 feet away from the alignment. She said she was looking for an update, hadn't seen anything from PIO on the hearings. PIO</p>

noted hearings not set yet, still waiting though hope to know in the next couple of weeks. PIO noted we'd been shooting for late Feb.-March so have to know something soon. She asked about whether they should build on their property? PIO noted while there is always possibility of things changing, do not believe any changes have taken place in their area of the OC alignment. PIO noted the maps are on the web site if she wants to see the latest. She said the guru of their temple is 74 years old and not good with the internet, etc , can we meet you somewhere? PIO said we can send them an 11x17 hard copy of the map if she thinks that will help? She said yes. PIO said I'm in the car so shoot me an email to remind me with their mailing address. She asked if I thought they should build on the property or not? PIO said can't tell them that, just depends on whether they want to be close to an elevated expressway or not. Doesn't appear we would directly affect their property, though there's always the possibility that in design things can shift, though not usually toward developed property. PIO said if after she gets the map she still wants to meet, to let me know. She said I'd been very helpful and thank you.

Subject: SR 429 - Wekiva Parkway PD&E Study - Important Meeting Notice  
Dear Community Stakeholder: The Florida Department of Transportation (FDOT), which has been conducting the Wekiva Parkway Project Development and Environment (PD&E) Study in Lake and Seminole Counties, wishes to notify you of important information that is scheduled to be discussed at the Seminole County Expressway Authority (SCEA) Board meeting on Tuesday, Nov. 18 at 4 p.m. The meeting will be held at the Seminole County Services Building, Room 1028, 1101 East First Street, Sanford, FL 32711. A community-based group, the Wekiva Parkway Community Coalition (WPCC), has proposed an alternative alignment for the Wekiva Parkway in Seminole County that would potentially affect you and other community stakeholders in your area. The SCEA Board asked the FDOT to review and evaluate this suggested alignment, referred to as "WPCC Alternative G." The FDOT has completed the evaluation of this proposed alternative, and will be discussing the findings at the Nov. 18 SCEA Board meeting. We would be happy to provide a summary of this information to you in advance. Please contact me at your earliest convenience so I can arrange to get either a hard copy or electronic files on disk to you. Please feel free to contact me with any questions or for further information.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.  
Comments: I am in favor of the Preferred Alternate "Southern" Route for the Wekiva Parkway in Seminole County

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the\_\_\_ middle of a developing business and residential area between Orange Blvd and I-4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only\_\_\_ reduce the congestion on I-4, but will also keep most east/west through traffic, off our "Main Street".\_\_\_\_\_  
In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.\_\_\_\_\_

Mary, I am the President of the HOA at the Preserve at Astor Farms. I and others from our community will be attending the meeting. I have put together a letter which outlines our community's position on this proposed alignment and I would like to have the opportunity to read it into the record at that meeting. Can I get 5 minutes on the agenda to do so? It is only one page and I will provide copies to the committee prior to the meeting commencement.  
Please let me know. Thanks.

Hello Mary,

The meeting on January 17th is our Annual Community HOA meeting. It is at 7:00 pm at Sylvan Lake Park, main building in the large meeting room. You attended our annual meeting last year and I believe your 15 - 20 minute update and summary was very well done. We will have a projector and laptop there for your use, if needed.

We would like to thank you again for your participation in this matter and look forward to seeing you there. If you have any questions or need further assistance, please do not hesitate to contact me.

Respectfully,

Dan Macaluso

Sylvan Lake Reserve (Glades at Sylvan Lake), HOA President

Subject: SR 429 - Wekiva Parkway PD&E Study - Dave McDaniel of WESH interview request

Hey Lindsay,

Dave McDaniel is trying to track you down for an on-camera interview about Pine Plantation and what it all means for Wekiva Parkway early this afternoon. Can you give him a call at 407-766-2246 at your earliest convenience?

If you're tied up in meetings, let me know when you will be available and I would be happy to pass that on to him in the meantime.

Mary Brooks

Kathy McDonald

Regarding

Mr. Massey, I am Kathy McDonald, you have spoken with my husband, Jack, on several occasions. It is my understanding that you requested an e-mail with our concerns regarding the plans for SR 46, east of Camp Challenge Road to the Wekiva River.

For many years, it has been our understanding that when the Parkway project was completed, SR 46 would be disconnected at the Wekiva River and people wanting to go to Seminole County would need to get on the Parkway. This was a wonderful happening, it would get all this traffic off of SR 46. My husband was born and raised on the south side of SR 46, at the end of what is now known as Old McDonald Road, I moved here in 1969 from Miami. State Road 46 had so little traffic you could count the cars going by, bears were not being hit and killed on the road, only a skunk now and then.

Early last year we found out, when we attended a meeting concerning the connection location from 46A to SR 46, that our hoped for nice little local road, with very little traffic, had been devastated. It seems, according to what I have been told by T.J. Fish, MPO Director for Lake and Sumpter County, that the environmentalists had been campaigning to virtually close down SR 46, and it appears they won. Current plans disconnect SR 46 where it runs through what is now property owned by the State. Two bear tunnels, built at

a cost of almost 3 million dollars, are on these properties. The plans to disconnect SR 46 leaves two "islands" for lack of a better word, with their only access to the world being the Beltway. We would have to leave our house - travel 2 miles to the East to get on the Beltway, and then travel 5 miles back to the west, passing where we started, just to get to the IGA grocery store in Mt. Plymouth. Currently, this is a 3 mile trip using SR 46.

The plans mean that law enforcement, fire protection, ambulance, mail, UPS, FedEx, garbage trucks, school buses, etc. must get on and off the Beltway in order to get to our "island" and the other "island." What happens if there is an accident or fire that closes the Beltway - we have no way in or out - can't get our children at school, hospital or anything. This is WRONG - and has been done without the knowledge or input of any of the 1,000 +/- residents affected by these plans. There are also several businesses along this strip of road who would probably be put out of business.

You asked for a list of names - below I am listing only a few people who we have talked with. I know Mary Brooks, who I believe is with the Expressway Authority, has a list of property owners along the path of the Beltway. She can easily get from the Property Appraiser the names and addresses of all the property owners who rely on SR 46 and 46A for access.

We are requesting a meeting be set up, probably at the Sorrento Christian Center on County Road 437, to allow the residents involved in this drastic change of plans to have input. I worked for Lake County for 30 years, retiring in 2003. Florida Law required counties to hold public hearings and notify adjacent property owners prior to closing of public roads. I would certainly think that this law would apply to the state as well.

We plan to make an appointment to speak with Senator Carey Baker when he returns from Tallahassee, regarding these plans. We have already spoken with Jim Stivender, Lake County Director of Public Works. Jim tells us that the Lake County Board of County Commissioners approved this plan regarding SR 46 - but our District Commissioner Linda Stewart told my husband that she did not vote for any plan like this one.

I realize that you have resigned your position at the Expressway Authority and will be leaving soon. I certainly hope you can pass this information on to Mike Snyder, and any others who might have an interest in meeting with us. Thank you so much for listening to us.

Kathy McDonald  
20815 State Road 46

352-383-4323

12/23/2008	2:54 PM	I called Kathy to let her know that we received her letter and that we would be in touch with her at the beginning of the new year to set up a meeting with the key team players to address her concerns. She said that would be great. I gave her my contact info and asked her to give me a call if she needed anything before then.

Regarding  
While the current preferred alternative route looks to be the shortest as the crow flies, it seems to fly in the face of local homeowners/voters best interests and will disrupt the

quality of life Seminole County purports to support. I live in Sylvan Lake Reserve and will be impacted by any beltway but the current preferred alternative is not preferred by me or any of my neighbors.

Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC alternative update to SCEA Board members REVISIONS  
Importance: High  
Greetings,  
Please respond at your earliest convenience to the items below:  
1) Since Noranne gave the nod for Brian to solely represent FDOT in the remaining unconfirmed meetings, we can schedule Comm. Van Der Weide for Oct. 9 230-330 p.m. with Brian and Mark (and Jerry and Gary, if available) to meet with. There was a conflict with the previous Oct. 14 meeting set for this commissioner. The commissioner's aide said this time slot is still available.  
Please let me know if this works and I will send out a calendar item to confirm.  
2) Commissioner Henley asked if he can move his 330 p.m. meeting today (Oct. 6) to Oct. 15 from 2 p.m.-3 p.m. since we will be in Sanford to meet with Commissioner Woodruff later that afternoon? I believe George and Brian were available and Dave could stand in for Mark. Please advise on this ASAP so I can cancel this afternoon's meeting and send out a new calendar notice.  
3) I received a meeting cancellation from Comm. McLean's office for the 21st. I have a message in to his aide and will get back to you with an update on that one.  
I look forward to hearing from each of you soon.

Subject: RE: Answer to letter of October 11, 2007  
Mary,  
Do you have any contact information for either Christa or Steve?

1/24/2008 2:00 PM Fran Macdonald/SC Comm. Michael McLean's office 407-665-7205, 665-1130 called and asked if I was familiar with a Bruce Lieske? Said they got an email from the CWHOA noise abatement task force asking why there weren't noise walls on their side of SR 417. PIO checked database but name did not come up in database, though noted maybe someone else from the organization had contacted me. PIO noted we did hear recently about a

coalition of subdivisions formed to fight the SR 417 connection to I-4 of the Wekiva Parkway, perhaps this was someone from that group. PIO asked if she could forward me the info? she said she'd send the email, though it references a letter that she cannot find. PIO said we'd see what we could find out.

Contact		Raechele McMahan
Date	Time	Regarding
2/18/2008	11:30 PM	Raechele McMahan 407-513-6439 called and asked if you were the right person to ask about the 429 and 46 extension? PIO confirmed she was referring to the Wekiva Parkway? She said yes. She said her father has land shows road is running through, wondering if any projections on when it was going to take place, when are they planning on doing this? PIO noted we have maps and other info on the website, has she seen that? She said yes, she has seen the maps, road going through property. PIO noted public hearing schedule this summer, maybe July. PIO noted hope to finish study end of 2008 with approvals, then move into final design. PIO noted maybe a year into final design might start individual property acquisitions. She said he has a farm on the property. There isn't really a house there so there is no real address. She said the property is in Orange and Lake counties, off Oak Lane which is off Plymouth Sorrento. PIO noted for the OC portion, the expressway authority has funds for design and some ROW, so will probably be within couple of years to start some acquisition. PIO noted she may hear that some property already has been purchased. PIO noted that's very large properties mandated by the state legislation that we had to buy for conservation. She said they have 45 acres. PIO note the conservation parcels are 1500-1600 acres, 300 acres. So if she hears something being acquired, that's what that's about. She said they are hearing so many different things; would I be the one to set things straight? PIO said that's correct, don't hesitate to call or email if not sure about something. She said so doesn't look like anything would be happening before summer 2009? PIO said at the earliest. PIO noted even once study finishes they still have to bring on board the firms to do the design, etc., so there will be some lag time there. She said her parents tried to look into it but kept getting the runaround. She said she appreciated the info; that helps. PIO said I'd add her also to the update list so she gets info directly. Raechele McMahan, 4910 Legacy Oaks Dr., Orlando 32839, email mcmahanr@aetna.com <mailto:mcmahanr@aetna.com> She said thanks; that will probably help her explain things to her parents, who are elderly. --1024 a.m. Mary Brooks

Hello Mark, I am just following up on our phone call earlier this week. You were going to see if there were parts of the noise study that you could email me. Just in case you misplaced or misspelled my email id - you can see it from this email (and I've typed in below).

If there aren't any parts that you can send me, do you have an estimate of when it will be available? Days, weeks, months?

Thanks in advance,

Mike McQuaid

Mary/Prineet Sharma's office 407-843-0404 said client is Live Oaks Animal Hospital, you sent us some information last week about impact to the property from Wekiva Parkway. She said client was thinking about selling business, but doesn't know if his access will be

affected, or if he will have to disclose to potential buyers. PIO noted if his access is via wayside then there could be some impact, if it's on Orange Boulevard then that is not likely. She asked if I knew the driveway configuration of this property? PIO said no, we have 25 miles on this alignment and thousands of properties. PIO noted even if there were an impact to his access, as she well knows that would be addressed in the negotiations for the taking. She said the client also was wondering about timing. PIO noted as in email, all based on funding availability, this is not something that's going to happen in a year regardless. She said okay, she would get back to Prineet with that and appreciated the help.

Subject: RE: 429 Extension  
I appreciate your help. Next week is fine.  
I pulled the info from the link you sent previously. That gives a good account of what the on/off traffic will look like, I was hoping for more info on how the traffic from both Clarcona and Keene will be affected. How much are the trips going to increase? If that isn't something readily available, that's ok I have a general understanding. I would assume that the surrounding roadways will increase in volume, just won't know how much.  
Any and all help is appreciated. Thank you for getting back to me. I will look for info on SR 429 later next week.  
Thanks again.

Subject: RE: 429 Extension  
Hey Jared,  
Your first email deals with the SR 414 John Land Apopka Expressway, and we have traffic projections for that project on the Expressway Authority web site at <http://www.expresswayauthority.com/futureplans/projectsandstudies/publicinfo.shtml>  
</exchweb/bin/redir.asp?URL=http://www.expresswayauthority.com/futureplans/projectsandstudies/publicinfo.shtml> .  
You second email pertaining to Kelly Park Road and Plymouth Sorrento Road actually deals with the SR 429 Wekiva Parkway. I don't have any updated traffic projections on that one, though we did have some for the viable alternatives that were presented at the last public workshops a little while back. Let me check with the engineers to see what's available and I will be happy to forward that your way, probably early to mid- next week. Will that be okay?

Subject: 429 Extension  
Mary,  
I apologize for the additional e-mail, however I am looking for the same information I requested on the 414 extension for the interchange of the 419 and Kelly Park. Basically I am looking for what kind of traffic impact will the interchange create for Kelly Park and Plymouth Sorrento. I can see from the exhibits online that as part of the extension work will be done on both Kelly Park and Plymouth Sorrento... I am looking at some development sites in the area and need to have a better understanding of what the future will hold. Any help is appreciated.  
Thanks again.

5/5/2008	7:12 PM	<p>-----Original Message-----</p> <p>From: Rosalie Morace [&lt;mailto:rjmorace3@yahoo.com&gt;]</p> <p>Sent: Monday, May 05, 2008 7:12 PM</p> <p>To: MBrooksSR414@cfl.rr.com; MBrooksSR414@cfl.rr.com</p> <p>Cc: Rosalie Morace</p> <p>Subject: Expressway alternatives</p> <p>Please see the attached comment form relating to the CH2M Hill "Recommended Preferred Alternative" Wekiva Parkway alignment in Seminole County. Thank you.</p> <p>Rosalie J. Morace</p>
5/5/2008	7:11 PM	<p>Please consider another alternative to the CH2M Hill "Recommended Preferred Alternative" Wekiva Parkway alignment in Seminole County. The fact that it cuts through our rural neighborhood will impact the very feel of Sanford as a lovely, quiet, neighborhood town. I understand the need to run it along SR 46 (although it would be nice if it didn't have to), but to cut through established neighborhoods, recreation areas, and school zones seems very unnecessary. Other alternatives are available that would go from 417 to I4 to the new 417 that seem to make much more sense to me. Surely it would be so very much less expensive to go this way.</p> <p>I understand you wish to keep the 417 as a continuous route, but as a traveler I can tell you that many, many routes we have taken require a jog over another road to then take the direction we require. It is not a difficult thing to do, especially in this day and age of the GPS to guide you. I feel the Authority must consider the final cost to the taxpayers and not spend any additional to take over developed lands, escalating the price, when other alternatives exist. To establish a new exchange at the I4/417 intersection has to be much</p>

less expensive. Thank you for your careful consideration of additional alternatives.

Mary, sorry for the mistaken confusion on my part. Something I read previously (not by speaking with anyone) led me to conclude, obviously incorrectly, that the last study was done. It must have just been just "a" study--not the last one...which you indicate may run to the end of this year. Wow. And we thought things were "about to happen."

Which makes one wonder why "we" have made it so hard (and thus so expensive to the taxpayer) to get anything done. And I wonder who the "we" was that did that. But such is a totally different discussion.

OK, we remain here, waiting. Thanks you so much for your kind, complete response.

Bob

Aneeta and Bob,

I'm not sure whom you've spoken with, but we have not even had the public hearings yet -- which are a crucial part of the PD&E study process -- so it's not possible for the study to be complete. The FDOT and OCEA from day one - January 2005 - have been jointly conducting this study, so I'm not sure about why there would be any confusion there. The engineers are, as stated below, finalizing the many documents needed to move forward with the formal public hearings. We have a recommended preferred alignment and interchange locations, and those are subject to final revisions depending on the feedback we get at the formal public hearings.

The finalization of the documents and some issues that we've had to resolve regarding changing requirements for public meeting venues have led us to have to push the date for the hearings back several times. As noted part of the documentation issue is the historical

structure information that we are required to provide, but have not been able to due to trouble getting access to certain properties. We believe we have those issues resolved and are moving forward. All of this takes time.

Once the draft documents are done, we plan to post them on the OOCEA web site for review. They will have to be finalized after the public hearings and the final agency approval process. We hope to conclude the study by the end of the year.

We understand your frustration, but this is a major transportation endeavor - 25 miles through a largely environmentally sensitive area, and there are strict and extensive state and federal protocols that must be followed. We appreciate your patience and your input throughout this process, and will continue to keep you informed. We will be sending out a newsletter once the public hearings details have been ironed out.

You are, as always, welcome to email or call me with any questions. Thanks for hanging in there.

Mary, I checked the web site on 2-1-08 and see the words shown below the

---dashed---line

We'd appreciate some straight talk about why the delay. I am also concerned about the "jointly studying" phrase. We were under the impression that all of the studies had been completed. What's up--really?

Summer 2008: Public Hearings Set for New Timeframe

The continuing finalization of federal and other documentation for the Project Development and Environment (PD&E) Study for the Wekiva Parkway has led to the formal public hearings now being set for summer 2008. The Expressway Authority and the Florida Department of Transportation are jointly studying the 25-mile highway authorized by the 2004 Wekiva Parkway & Protection Act. The PD&E Study Team has been working to finalize the study documentation, including meeting requirements pertaining to potential historic sites. Team members also over the past several months have been meeting with local government and state agency representatives to get their input to help form and refine alignment and interchange recommendations. Likewise, study team members have met with numerous community stakeholders and received valuable feedback that also was evaluated in working toward the recommendations.

Hello Bob,  
Happy New Year!  
We are shooting for late February to March for the public hearings, but have not yet set dates.  
There is extensive state and federal documentation that has to be prepared as part of the PD&E study before the hearings can be set, and we're working feverishly on that. I hope to have more info on the public hearing schedule soon.  
We also will post the info on the Web site and will send out newsletters beforehand with the details. Do we have your mailing address for the project database so you will be sure to get that info? Let me know, thanks.

Notes			
Date	Time		Regarding
11/12/2008	3:15 PM		Judy/Stirling Realty is representing the Academy of Learning, has a map from last year and wanted to see latest map of Wekiva Parkway? Has it changed? PIO walked her through web site links. PIO noted alignment has shifted in several areas, Capri Cove, Tall Trees, and Heathrow Country Estates due to concerns from HOA's. That has resulted in additional impacts to others. She pulled up SC map and noted looks like we're taking more of her property now. She asked how does that work, would they take the whole business? PIO said we only take what we need; however, some property owners willing to negotiate want the entire thing taken because they don't want it in their back yard. PIO noted that's determined on a case by case bases. She said okay, that's what I needed.

Subject: RE: Wekiva Parkway Project - Lake County  
Hello Kathy,  
I received your voicemail after my afternoon meeting. We will add you to the project database so that you will receive public hearing and other information updates. As discussed yesterday, we are only in the Project Development and Environment Study stage of the Wekiva Parkway. We hope to finish the PD&E Study in early 2009. As you are likely aware, this project is not fully funded (last estimated cost \$1.8 billion). For the Orange County portion, the Expressway Authority has funds to proceed to final design perhaps late summer-fall 2009), and a portion of the funding for right of way acquisition could perhaps start in 2010). There is no funding currently to finish ROW acquisition or begin construction.  
For the Lake and Seminole County portions, at this time the Florida Department of Transportation does not have money programmed for design, has a little money for some ROW acquisition and no money budgeted for construction. However, several agencies have been working on a financing plan to pay for this project, and we hope to have some information on that by the end of the year. Again, the schedule for the future phases of this project are tentative and heavily dependent on the availability of funding.  
I hope that helps. Stay tuned.

9/15/2008	3:05 PM	Katherine Grace 904-730-9001 I'll be here till 4, I spoke to you a little while ago, wanted to get on the mailing list, if you could please give me a call, also wanted to ask you a couple more questions.
9/15/2008	2:38 PM	Kathy 904-730-9783 called and said she's been looking for a schedule on the Wekiva Parkway on the web site but can't find it. When were we going to construction? PIO noted we're just in the PD&E study phase, don't have dates yet for public hearings, but hope to finish the study in early 2009. She said well that helps, that gives her some information. PIO asked if she wanted to be on the project mailing list? She said quite possibly but would check and call me back on that.

To: MBrooksSR414@cfl.rr.com  
Subject: Wekiva /417 PD&E Study  
Ms Brooks, I am very concern about locating the continuation of 417 along SR 46. It is already difficult to get out on to SR 46 to drive to the Mall or get on 417 and I-4. The traffic will continue to be heavy with another development and new shops located just east of Lake Forest. The Continuation of 417 needs to be located south of SR 46 at least at the Lake Forest / Publix lights and access. The current building has already impacted our water ways and wildlife . This freeway will drastically reduce our quality of life . We need SR 46 to take care of local traffic, not build a freeway though neighborhoods, newly built shops and wild life refuge lands. The point of 417 is to move traffic around the beltway, not create new problems for local traffic and neighborhoods. THERE IS LARGE AREAS OF VACANT LAND SOUTH OF SR 46. Please think of what you are doing to our neighborhood at this point a tranquil retreat..  
Thank you Deborah Nelson Lake Forest Sanford Fl 32771

8/4/2008	3:56 PM	<p>Maria Nelson / Fowler et al attorneys 813-228-7411 called and noted she got the emails noting material was on the web site. She asked if the study was almost finished? PIO noted we were looking at early 2009 to finish the study. She asked will it go right into design? PIO noted OOCEA has design budgeted and was looking at late summer-fall to advertise, but that's entirely tentative. PIO noted FDOT does not have money programmed for design, so not certain when that will occur. She wanted confirmation of firm design schedule, but PIO reiterated entirely driven by funding, and given economy slow down and toll revenues down, schedule is entirely speculative at this point. PIO noted most firm thing is we're looking to finish the PD&amp;E study by early 2009, public hearings now looking at late Sept.-October instead of August. She said that's for the approvals? PIO said no, that's for public to give last comments on alignment. Then we go into agency approvals. She said okay, she will continue to check with me, noted there was no schedule info on the web site. PIO noted that's because the schedule is in flux based on funding, though several agencies are working to try to make this happen sooner rather than later. She said thanks for the update.</p>

Wekiva Parkway PD&E Study  
Orange, Lake and Seminole Counties  
Comment Form Date: 10/5/08

Name Wendy and Doug Olin\_\_\_\_\_  
Address 5270 Vista Club Run\_\_\_\_\_  
City Sanford\_\_\_\_\_ State FL\_\_ Zip Code 32771\_\_\_\_\_

10/6/2008 12:32 PM

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County  
I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area  
I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the\_\_\_ middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only\_\_\_ reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street". In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Sent: Thursday, March 20, 2008 2:04 PM  
To: Mary Brooks  
Subject: Call Follow Up  
Hi Mary,  
I received a call from a Bill Owen. Said he's from Real Estate Research Consultants and they're already working for us on a 528 project. He's asking for information on our projects in northwest Orange County. Sounds like a Wekiva thing since the feasibility studies do not cover that area. Thanks  
-Paul

3/20/2008 1:25 PM PIO returned call to Bill Owen, said they were working with a client and trying to find out timeframe for phase II of 414 and Wekiva Parkway. PIO noted phase II not skeded for construction, no funds yet, and would likely be tied to funding for Wekiva Parkway. PIO noted not funded, but several agencies working on financing plan which I hope to have in a month or two, certainly by formal public hearings in July. He said if you had to guess, what would be the earliest it would be built? PIO noted estimates have varied, but if we had the money now, went hrough the phases and typical time needed, 2012-2015 to start construction, but noted for various reasons could be longer than that. He asked if it would likely be done all at once? PIO said no, more likely in sections. He asked if OOCEA building whole thing? PIO noted agency breakdown, and that FTE also looking at FDOT portions in Lake and Seminole since FDOT doesn't have funding. He asked so is that section not likely to be built? Would they do part of it and let the other part die? PIO noted this project has been developed jointly and with the intention of entire completion of beltway being done; no disussions of only doing a portion of it. He said well that's helpful and thanks.

3/20/2008 1:17 PM Bill Owen/Real Estate Research Consultants in Orlando called and left MSG. We're real estate advisors doing work for OOCEA on 528 corridor with DRMP. Have question about the projects in NW OC about some time tables.  
407-843-5635 ext123 Appreciate if you could give me a call back as soon as you can, look forward to speaking with you.

Cathy,

As discussed, I have attached the Wekiva Parkway story ONLY so you can check the length and determine whether you'd have space for the entire thing, or whether further cuts will be needed. I understand you will call or email me and let me know either way.

As we discussed, we are waiting for final approval from Mayor Crotty, so this is NOT FOR PUBLICATION until we receive his say so. I understand that by giving this to you now, you will be able to wait until tomorrow to receive approval (or revisions) from Mayor Crotty.

Should the Mayor provide any revisions tomorrow, I will send you an updated version ASAP and call you to make sure you received it.

Thanks for your understanding.

Mary Brooks

9/24/2008 5:28 PM PIO called Cathy, told her story is ready, is around 1,000 words but we're waiting for Mayor Crotty's approval. She said send it to her and she would see if she had any jump space. She said could wait for the morning for his approval. PIO said I'd send it now and thanks.

Dear Mary,  
The following is Senator Webster's statement for the FL Transportation Monthly magazine.  
"The Wekiva River Parkway and Protection Act recognizes the importance of the Wekiva River Basin to Central Florida's water supply. It ensures that the building of the Wekiva Parkway will not adversely affect the Wekiva River Basin and its surrounding land. Transportation, moving people and freight, is a fundamental component of Florida's economy. Thus, it is vital for our state's infrastructure to keep up with our growth. The Wekiva Parkway and Protection Act will relieve congestion while protecting our environment."  
If you have any questions or need any additional information, please do not hesitate to let me know. Have a blessed day!!  
Cindy Brown

Cathy,  
Attached is a hi-res PDF of the Wekiva Parkway overall preferred alignment alternative to go with the story, which I hope to get to you by 3-4 p.m. FYI. We don't really have any more graphics, but I'm hunting for some file photos from the Wekiva area that we might also use. Stay tuned.  
Mary Brooks

9/24/2008 11:24 AM PIO called Cindy/Sen. Webster's office to make sure she saw email. Ann said she was out for a few hours. PIO noted she was helping me get a quote from senator today for a story, asked if I could forward to her to be sure Cindy received? She said that's fine, Cindy's

gone to his business office. She gave me her email address, drawdy.ann.s09@flsenate.gov and she would make sure Cindy was following up.

Subject: SR 429 - Wekiva Parkway PD&E Study - Fla. Transportation Monthly  
Hello Cindy,  
It was good speaking with you just now. As discussed, we are doing a story for Fla. Transportation Monthly magazine's "green" October issue on the Wekiva Parkway. The story includes information on the various committees formed in 2003-04, their recommendations and the 2004 Wekiva Parkway & Protection Act, the conservation parcel acquisitions, extensive wildlife bridging, limited number of local access interchanges, etc. We were looking for a quote from Sen. Webster since I understand he was instrumental in helping to pass the Act on his thoughts about the unique "green" aspects of this project, or any other insights about the uniqueness of the planning process to get to this point with regard to protecting the environment. Any insights he has about the Wekiva River Basin and what this unique project will mean with regard to protecting it would be much appreciated.  
Unfortunately the magazine gave us a very tight deadline, so I would need his comment today, maybe by 3 or 4 p.m.? I'm sorry for the short notice but greatly appreciate any insights he would care to share with us. Thanks for your assistance on this.  
Mary Brooks

9/24/2008 10:39 AM PIO called Sen. Daniel Webster's office, spoke to Cindy Brown about needing quote for mag story, got her email and told her I'd email specifics. She said he's not in the office right now, did I want him to call me or ... PIO said that, or if it's easier for him to just email a statement, that's fine too. She said that would be better and she would get with him on it. PIO said I'd send the email right now.

Cathy, Mary Brooks wanted me to circle back with you on your absolute deadline date and time for the Wekiva story. She has a good draft that is being reviewed. Also, are the graphic images you requested good or do you need some more? Please reply to all at your earliest convenience. Thank you in advance! Regards,  
Deana N. Leffler

9/17/2008 1:18 PM Keith Schue/Nature Conservancy called to discuss Wekiva Parkway and magazine article. He said the Wekiva Parkway represents a broad regional consensus... the culmination of all the state agencies, local governments, environmentalists and other stakeholders to agree on how to develop a road in this environmentally sensitive area. This has been a significant process... a major collaborative effort that involved...Efforts that went into this pursuant to the executive orders from the governor. Keith said the more typical environmental assessment can appear to be little more than "checking the boxes" that an evaluation has occurred. "This is something much more comprehensive. What is it going to take to protect this ecological corridor and you also have this transportation issue that's

not going away. The Wekiva Parkway entails "a commitment to do substantial design ... bridging for wildlife movement. We haven't seen the likes of this anywhere else in Florida."

9/17/2008 1:17 PM It's a great example of what the Expressway Authority can do when collaborating with environmental groups."  
"It's really a landmark type effort. There's nothing like it in the state. Very inclusive as a process..."How often do you see a set of environmental groups say 'let's build a road? Championing a road project? It's because we knew the Wekiva Parkway was being done in such a way to protect the environment. ... The alternative of a SR 46 that stays on the ground, and is widened to six or eight lanes with all sorts of development ... that's what will happen if the Wekiva Parkway doesn't get built. WPPA took important lands off the table for development. Now we need to figure out how we get past some of the stumbling blocks

Here are some key points on the Wekiva Parkway and Protection Act (2004) which resulted from the Governor's appointment of the Wekiva Task Force and Coordinating Committee:  
· Led to Florida's first ecologically defined collaborative process to design and locate the route of a major new roadway in Florida.  
· Integrated environmental mitigation in the form of major land acquisition efforts...designed to preserve lands that might otherwise be thrust into development as a result of the economic impacts of the new parkway.  
· Incorporated the first comprehensive wildlife corridor/wildlife crossing design within a new highway project in Florida.

9/16/2008 9:21 PM Resulted in unprecedented intergovernmental coordination on the topics of land use plan impacts of a major new highway, leading to regulatory changes and local government land use changes intended to offset at least in part the impacts of the new parkway.  
· Left the legacy of a permanent "Wekiva River Basin Commission" which provides oversight to the various aspects of environmental, land use, and transportation questions arising in the area designated by the Legislature.

Charles

9/16/2008 5:15 PM Charles Lee/Audubon Society 407-6205178 called as per PIO email, said he was on the way back from Tally and would give it some thought and email me some info tomorrow for the magazine story. Discussed Pine Plantation events today.

Hello Keith,  
It's been a while. Interesting turn of events today in Tallahassee ...  
I am working on a story on what makes the Wekiva Parkway a "green" project, perhaps the first in the state of Florida, and would like to get your input in this regard. Can you please call me when you get this? Or if you have some thoughts you'd prefer to send via email, that's appreciated also. I'm afraid the magazine gave me a pretty tight deadline Friday, Sept. 19) so anything you can contribute at your earliest convenience would be greatly appreciated. I look forward to talking to you soon.

Mary:

Great talking with you again after so long...glad all's going well with QCA (I can say that now since we're not competitors anymore) Audra told me about your new HQ bldg...cool...

Anyway...to business: The story for the October edition: about 900 +- words plus art...good hig-res stuff...like we talked about...a simplistic map showing location, rendering of critter crossings, project logo, whatever...If possible, I'd like it by 9/19, but if I know its coming and I do, I can give you a few more days...thanks in advance, cause I know it will be good.

It's really good to be back in the game...

Cathy Palmer  
Chief Editor  
Florida Transportation Magazine

9/5/2008 11:12 AM Cathy Palmer/Fla. Transportation Monthly returned my call, said the October issue is "green" and Lindsay said Wekiva Parkway would be first green road in the state. That's the focus she wants. Deadline is Sept. 19. two page spread of 900 words plus graphics. Need simple line map similar to the expressway system map showing alignment. PIO noted can get wildlife crossings concept, conservation parcel map. PIO noted design criteria in act supposed to mesh/be sensitive to environmental surroundings, conservation acquisitions, wildlife crossings. She said graphics need to be hi-res PDF's. PIO said I'd have to look into green construction discussions. She said any time there's something going on with any projects, just give her a call. Can do feature or even just a couple graphs. PIO next story we want to get in about opening of phase I of JLAE, project has lot of history behind it and named in honor of Apopka Mayor Land, 55 years in office. she said that's fine. She said she'd send an email also with details.

9/5/2008 10:23 AM PIO left MSG for Cathy Palmer/Fla. Transportation Monthly Magazine 863-223-0555, editor@FLtransmag.com <mailto:editor@FLtransmag.com> re: Wekiva Parkway story she wanted, asked her to call with details, deadline, etc., and I'd be happy to get her whatever she needed.

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - update request  
Hello Tod,  
We are still in the Project Development and Environment Study phase, and are hoping to have public hearings set for late October - December. We intend to finish the study after the first of the year. The schedule from there is less firm. The Expressway Authority has the funds to begin the next step, final design, in Orange County perhaps in fall 2009. That would take a couple of years. Maybe a year or so into that the right of way acquisition could begin. However, the Authority does not have full funding for all of the right of way needed, so that could affect the schedule. Property acquisition typically takes a couple of years. So even if we had the funding, you'd be looking at four to five years for construction to start in Orange County.

9/11/2008 12:57 PM The Florida Department of Transportation, which is doing the Lake and Seminole County portions, does not have any money programmed for design, and very little for ROW acquisition, so the schedule for those areas is in flux. But there is a multi-agency push to come up with a funding plan for this project, and I hope to have some info on that by the end of the year.  
Agencies conduct their own appraisals, typically by a contracted appraiser, on properties to be acquired. A host of variables (nature of property/use, amenities, structures, cost to cure, etc.) go into the negotiated price for acquiring properties.  
Thanks for your continued interest in this major transportation project. Stay tuned.

Adrienne & Gerald Pence

Sylvan Glade

Notes

Date

Time

Regarding

11/14/2008

9:43 AM

PIO returned call Adrienne Pence 321-624-8891, who said she was trying to see where the road was going and how it would affect her property. They are in Sylvan Lake across from Girard nursery, they back up to 46 and are concerned about cars being able to see in. they were thinking about putting in a pool, but of course this would ruin that. Besides what we paid for it, we've already put \$300,000 into this house. it will be hard to sell our house, we would lose so much. We would basically be stuck here with that thing right behind us. PIO noted planned configuration of one-way frontage roads on both sides and elevated parkway in the center. PIO said I could get the distances for her, think maybe frontage edge of pavement 30-50 feet from south ROW line. PIO noted we have to widen SR 46 corridor and plan to do that from the north, so existing southern ROW line would remain and no taking of her property. PIO noted there would have to be takes in area of Orange Boulevard where it starts to veer off 46 and head south to SR 417. she said she understood that it went through Designing Women Nursery; we're further down from that. She asked if we planned any walls to shield their property? PIO noted that a noise abatement study was done looking at that and that some locations were indicated that might meet the criteria. PIO noted that won't likely be nailed down at this stage, but during design. PIO noted they also have to look at cost on that, still working on financing plan.

She said she knows it's not set in stone, but when would they be building it? PIO noted OOCEA and FDOT want to do it ASAP, land values are down and so are construction costs,

and there's a pressing need to finish the beltway due to the traffic and safety issues on SR 46. PIO noted we should finish the study in 2009, take a couple of years to do design and ROW, so maybe construction start 2012-2013, but again that is tentative. She reiterated concerns this will kill their property values. PIO noted while there would be challenges to selling during construction, typically such transportation improvements increase property values because they improve access and safety. PIO noted understood she didn't want to live right by the road, but that others appreciate that easy access, noted subdivisions built right next to others portions of the beltway. She said understood that but they won't be as close as we are. PIO noted the SCEA Board meeting on Tuesday she might find interesting, will be discussing the project. She said she might attend. PIO said I'd dig up the measurements and email to her. She said she'd appreciate it.  
adriennepence@bellsouth.net <mailto:adriennepence@bellsouth.net>  
--10 a.m.

11/6/2008 5:17 PM PIO DL returned call to Ms. Pence. Explained Mary was on vacation. Asked her if I could help. She wanted to know the status of the Wekiva Parkway. Noted she lived in Sylvan Glade and has put over \$300,000 into her house. She wants to put in a pool but does not know if the parkway will come through her yard. She also wanted to know it was going to be elevated in her area. PIO DL said the PD&E study has not been approved by the FHWA. Once approved it will move to public hearing. After the public hearings there is potential modifications. PIO DL said Mary would be the best person to speak with and would have her call when she returns from vacation. PIO told her she was already in the database and she would be notified when we moved to public hearing. She thanked me for calling her back and looks forward to speaking with Mary. End 5:27 PM

11/6/2008 5:16 PM Ms. Pence called and left a message for Mary to call her.

Subject: SR 429 - Wekiva Parkway PD&E Study - 5714 North Rd. query

Hello Chris,

I wanted to get back to you about your query about the potential effect of the Wekiva Parkway on 5714 North Road in Seminole County. According to the SC Property Appraiser's Web site, this property is north of SR 46 in the area between Orange Avenue and Center Road. The recommendation for the Preferred Alignment Alternative includes widening the SR 46 corridor to the north in this area by about 70-100 feet, but this would not affect the property in question. The alignment alternative shifts south from SR 46 at Orange Avenue to connect to SR 417. So, again, there would be no direct impact to this property.

Please be advised that we are still in the Project Development and Environment Study phase of this project, and details are subject to change. We are shooting for formal public hearings this summer, hopefully in July, and to finish the study with an approved alignment by the end of this year.

I hope this addresses your concern. Please feel free to email or call with other questions.  
Mary Brooks

3/10/2008 10:24 AM

Researched Chris Petris SC / Wekiva Parkway property query, 5714 North Road, in SC west of I-4 and SR 46 near Orange Boulevard. SCPA shows parcel 6-7 parcels north of SR 46 on north side of North Road between Orange Avenue and Center Road, not within the area of the recommended preferred alternative.

3/5/2008 4:52 PM

PIO returned call to Chris Petris 407-323-7804/corvette clinic, left MSG returning his call, noted would also try his other number. PIO also called 407-416-9672. Chris said they live at 5714 North Road, in SC west of I-4 and SR 46. The nearest cross street is Orange Boulevard. One of the original alignments went over our property. PIO said I would research the property and get back to them, asked for his email address? info@corvetteclinicinc.com <mailto:info@corvetteclinicinc.com> He said at first there was a helicopter taking photography of the back end here. We have a bay head; during hurricanes we had quite a bit of water back there. I noticed in plans there appear to be retention ponds in that area along 46. Wondering if something is going on. The helicopter was a few weeks ago. Then we had a guy here on Monday surveying looking for a couple of grant line markings out here. PIO asked but he didn't see what company he worked for. PIO said will look into it and get back to him, said didn't think we still had any folks out there at this point. He said thank you very much for your time.

Date Time Regarding  
4/2/2008 10:50 AM PIO returned call to Clare (CQ) Phillips 407-333-1604 / Fla. capital, walked her through finding maps on web site. She said she was looking at buying home at Rock Springs ridge, she works in Heathrow. I would have to go up 435 and over 46 and up and over the park, I was hoping there might be IC at Rock Springs or 435. PIO noted recommended interchange at 441 for JLAE just west of Plymouth Sorrento Road, and also at Kelly park road. She said Kelly park road would be great. She said thanks for calling me back and walking me through this. PIO asked if she wanted to be on the mailing list, will be sending out info soon on the public hearings? She said that would be great:  
Phillips, 1520 Black Bear Crt. Apopka 32712, email [clarecat5@hotmail.com](mailto:clarecat5@hotmail.com) <<mailto:clarecat5@hotmail.com>>

4/1/2008 2:51 PM Clare 407-333-1604 called and left MSG I was just trying to get info about the 429 extension they're talking about going up to Sanford. Exactly what route would it be and if there are any on ramps at various points. I tried going online and googling it and found a summer 2006 newsletter, but that was the most current I saw on there so if you could give me a call 407-333-1604 I would appreciate it.

Dear Commissioners,  
Attached is our comment form regarding the proposed extension route regarding the Wekiva Parkway Route. I am hopeful that by sending this form, our voices will be counted. It seems that we are all so busy that we forget our great Country was established with a principal of government for THE PEOPLE BY THE PEOPLE. So, as 2 of the people, we would like our voices to be heard and counted in this most serious decision. :)  
Thank you for the opportunity to participate.  
Many thanks,  
Gary & Kristen Plourde

Contact		Joe Pollock	Lake Forest HOA
Date	Time	Regarding	
5/9/2008	4:15 PM	PIO called Joe Pollock/Lake Forest HOA 407-230-8653, who said we were a little concerned about the idea of moving the beltway ...? PIO recapped formation of the WPCC and their approaching SCEA, speaking at the meeting and providing alternatives. Board asked us to review their alternatives seriously to see if something could be done, but PIO noted we are still taking the preferred alternative to public hearings with the SR 417 connection. PIO noted if there are any changes based on hearing input or these other alternatives that would take place after the meetings. He said it makes the most sense for me, and it has even when we were planning Lake Forest. I can't see how they could possibly think they could have a cloverleaf at I-4 and 46 ... and have anything but just a nightmare. He said thanks for calling, that's what he wanted to know.	

Contact		Darlene Price
Date	Time	Regarding

1/17/2008 1:20 PM Helen Price 352-383-1152 called about the Wekiva Parkway public hearings. The last time I talked ot you it was going to be in January. PIO noted that must have been some time ago. Noted last timeframe was Feb.-March, but just found out a day or two ago that we're now looking at July. PIO noted there are some historic preservation issues that still have to be worked out with the feds. She asked if we'd chosen a route? PIO noted we have recommendations posted on the OOCEA web site; had she checked that recently? She said no, but that she would. She said their property was in the way of one of the alternatives. She asked when this would happen? PIO noted we're just in the PD&E Study phase, still have to do design, ROW acquisition, and those phases are not funded. PIO noted it could be 10-15 years for construction at the current funding levels, maybe a little sooner in OC. PIO noted the schedule is dependent on funding. She said so it could be years then? PIO said correc, the OC section could be a little sooner if the OOCEA can raise tolls. She said something needs to be done. SR 46 with two lanes is just horrible - it's impossible to get out and it's so dangerous. PIO noted I understand and thanks for checking in.

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - Bridge Trail accommodation  
Jim,  
The Florida Department of Transportation - District Five is in discussions with Lake and Seminole Counties on this issue, and it is expected that a multi-use trail crossing of the river of some type will be accommodated in the preliminary concepts for the Wekiva Parkway. However, the multi-use trail bridge, like the entire potential trail system in the project area in all three counties, is not a part of the Wekiva Parkway construction cost estimate and would have to be funded by others.  
Mary Brooks

5/1/2008 8:30 AM Dr. Jim Quinn called and left MSG I sent an email reply but not sure that would get to you or not. I'm curious what the alignment of the new expressway will do as far as making access across the Wekiva River for bicyclists. I talked to you about this a while ago at one of the information meetings and I still don't see anything in any of the planning to get bicyclists across the river.  
This is very heavily used bicycle area between Seminole and Lake County. There's no viable alternative if this is not provided for. I wondered if in subsequent meetings you've heard of any arrangements being made. 47-321-4230  
Thank you very much.

Regarding  
Richard ??(didn't catch last name) 407-733-8152 called and asked for details and the timeline on the Wekiva Parkway in Lake County. He said he owns property on SR 46 and Wekiva Pines Drive, near CR 46A, where the bear fences end, I'm on the corner. He said last map he was things were still in flux, we were looking at a wide area. He needs to know what's going on because he is making plans for his property, needs to know where to put trees, etc. PIO noted we have recommended preferred alternatives on the EA website and walked him through finding the LCE map. He said he could see his house and this helped tremendously. He asked if this was likely to change? PIO noted while it's not approved and we have not yet gone to public hearings, I wouldn't expect it to change much at this point, maybe some tweaking here or there. PIO noted regarding timeline, it's speculative with current funding but several agencies working on a financing plan that I hope to have in 1-2 months, or at least by the public hearings in July. PIO noted once we have the funding nailed down we can set a more realistic schedule. He said that's great news, he's in favor of the project and wants to see it come through. He said he thinks he has the info he needed and thanks.

Regarding  
PIO returned call to Adelee Richey/Mill Fisher Realty 352-483-3113, F 352-589-2910 who said she has a couple thinking they want to relocate to Apopka adelee@1400lakes.com the woman lives in lake and works in Apopka and wants to get closer to work. PIO noted if they're looking at the subdivisions on the east side of Plymouth Sorrento Road down on the south end by US 441, they would be fine. We're west of Plymouth Sorrento Road in that area. She said yes, they want to stay close to 441. She said they're looking at existing subdivisions; they want an established subdivision because they like the mature trees. PIO said all the project maps are on the expressway authority website. If she's at the computer I can walk her through finding those, they clearly show the alignment and surrounding properties. She said she's in her car. PIO noted I could fax the map but being an aerial it probably won't come out very clearly. PIO said I could email her the map. Noted it was a large file so let me know if she doesn't get it.

8/25/2008      10:06 AM

Adelee Richey/Mill Fisher Realty 352-483-3113 called and left MSG trying to get an idea of the subdivisions in the Apopka area that these expressways are going to come close to. If you could call me or fax me the general outline of it, that would be wonderful F 352-589-2910 thanks again.

Address \_\_\_\_\_849 Edgeforest Terrace\_\_\_\_\_  
City \_\_\_Sanford\_\_\_\_\_ State \_\_\_FL\_\_\_ Zip Code \_\_\_32771\_\_\_

10/6/2008 8:22 AM

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.\_  
I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area  
I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the\_\_\_ middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only\_\_\_ reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".  
In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

6/6/2008	9:15 AM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Fri 6/6/2008 9:15 AM To: arolly@harlinglocklin.com Cc: Deana Leffler Subject: SR 429 - Wekiva Parkway PD&E Study - map request
		Good morning, Angela, I called you back this morning, but the receptionist said you were not yet in and gave me your email address. I need to know the area of the Wekiva Parkway you're looking for and what type or size map you had in mind? I typically recommend as the most expedient way to get large maps is for folks to download them from the Web site and take them to Kinko's or Office Max for large scale production. (Actually that's what I do when I need them...). But if you're having trouble for some reason downloading the maps, I'd like to find out more about that, as well as try to help you get what you need. Let me know.

Mary Brooks

6/6/2008 8:46 AM PIO returned call to Angela/Harling Locklin, receptionist said she wasn't in yet; they only work a half day on Fridays. PIO noted she'd called looking for Wekiva Parkway maps; was there anyone else there who might know which ones she was looking for? She checked but said no. PIO asked for Angela's email address to follow up: arolly@harlinglocklin.com

6/2/2008 11:12 PM Angela/Harlin Locklin & Associates 407-629-1061 called and left MSG I'm trying to get a good map of the missing link for the beltway. My boss sits on Metroplan and we could really use those for some new projects we'll be doing. I see these on the internet but they really don't print out very well. we need some large maps. I was wondering if you could give me some copies or what you had. Please give me a call when you get this. thank you.

Hello Angela,  
If by the "429 extension" you mean the Wekiva Parkway, all of the maps for the recommended Preferred Alignment Alternatives are on the OOCEA Web site at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>>. If you're unable to access those for some reason, let me know and we can send you hard copies.  
The SR 414 John Land Apopka Expressway (formerly Apopka Bypass and Maitland Boulevard Extension) maps and other info can be accessed on the Web site at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/publicinfo.shtml>> . You can find both the overall project alignment there, as well as the project section maps. Again, let me know if you have difficulty accessing any of those and still need hard copies.

Cc: Deana Leffler  
Subject: SR 429 - Wekiva Parkway PD&E Study - Pine Plantation acquisition  
Ike, As discussed earlier today, please find attached a graphic depiction of the Pine Plantation property being acquired for conservation by the Expressway Authority as mandated in the 2004 Wekiva Parkway & Protection Act. I hope you find this helpful.  
Mary Brooks

7/14/2008 8:40 AM Ike Ross 407-836-8699 called, said a friend said I was the person to talk to about property  
OOCEA was acquiring for the new road in the area of Haas and Mt. Plymouth Road. PIO said he's referring to the Wekiva Parkway? He said didn't know what it was called, but he's on Mt. Plymouth Road about halfway down from Haas Road. PIO noted only acquisitions in that area so far have been conservation parcels, and we either have or are in negotiations on all the ones we need in that area. He said there's a big tree farm behind him, been trying to figure out if that's the one we're acquiring for conservation. PIO walked him through web site links to get to the conservation parcel map, and also the OC preferred alternative showing Pine Plantation. We discussed that's a consortium of LLC's and different developer groups. PIO noted not sure which of the parcels we needed, didn't need all of it, but know that Jim Palmer is head of the one group we're negotiating with. He asked for a map of the parcels we were actually acquiring. He said Herschel Builders owns a big property behind me and he wanted to know if that's going to be the conservation property acquired. They want to know if there's going to be something really nice behind them. PIO said I'd check with the row attorney to see if they had a graphic depiction of the parcels acquired. He said great, his email is ike.ross@ocfl.net <mailto:ike.ross@ocfl.net>. PIO noted might take a couple of days. He said that's fine.

Comments:

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I-4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Eric,  
The public hearing date has not been set yet, and is looking more like September before those will happen. Before we can set and advertise the hearings we have to get approval on a number of documents from FDOT and FHWA, and that administrative process is taking longer than expected. We will send out a newsletter with hearing details once nailed down, and also will update the website when the info is available. We will also add your contact information to our project database for future mailers. Thank you!

Subject: Wekiva Parkway

Ms. Brooks-

Please advise if the summer 2008 public meetings re: the Wekiva Parkway project referenced on the Expressway Authority's website have been scheduled, and if so, what the date(s) and location(s) of those meetings will be. Also, I would like to be added to the Expressway Authority's e-mail distribution list/mailling list for information on the Wekiva Parkway project if such lists exist.

Thank you.

Subject: RE: Wekiva Parkway/SR 46 Bypass

Eric, Apologies for the delay in getting back to you. The Florida Department of Transportation, which is developing the Wekiva Parkway in Lake and Seminole Counties has only partial funding -- \$40 million -- for ROW acquisition in Lake County in their current five year work program. I would have to look further to find out for which fiscal years...We have not yet set the dates for the formal public hearings, but are anticipating some time in late July or August. We are working on the next newsletter and will be sending that out once the details are nailed down. I hope that helps. Mary Brooks

Subject: RE: Wekiva Parkway

Eric,

I researched the property in question at 3603 W. Kelly Park Drive, Apopka, FL 32712. According to the OC Property Appraiser's Web site, this property is approximately three parcels east of Effie Drive and 18 parcels west of Plymouth Sorrento Road. In review of the Wekiva Parkway Orange County Alternative in this area, the subject property appears to be either just west of, or at the very west end of the resurfacing/widening area for Kelly Park Road. In light of this, it would appear that minimal, if any right of way, would be needed from the front of this property. I've included a map segment below to illustrate.

Please be advised, however, that changes are still possible in the current Project Development and Environment Study phase, as well as in the next phase, final design. We encourage all property owners to stay tuned to developments as we continue the planning

for the Wekiva Parkway. I hope that addresses your question. Please feel free to call or email with other questions or concerns.

Evelyn Sanchez

Date	Time	Regarding
6/16/2008	3:34 PM	Evelyn Sanchez 407-621-4379 called and said she was looking for info on the new 429 extension to Mount Dora. PIO confirmed she was asking about the Wekiva Parkway. She said she's been on the web site and sees they selected some type of roadway construction blueprint. My question is when will it get approved? How long does the project run? Reason I'm inquiring I'm building a home in mount Dora and this could affect that. PIO noted status of PD&E, preparing for public hearings in august, then agency approvals and study to finish probably early 2009. PIO noted after that final design; OCEA has money for design and little ROW acquisition, but not for all of it nor for construction. PIO noted if we had funds it would still take 5 years to get to construction in OC. PIO noted FDOT does not have money programmed for design for Lake and Seminole counties, so schedule tentative at best. PIO noted agencies have been working on a financing plan to get this done sooner rather than later, but those details remain to be seen. She said okay, you've answered my questions. PIO asked if she wanted to be on the mailing list? She said yes, Evelyn Sanchez, 910 Teatro Crt., Orlando 32807, Email evelyn.sanchez@sprint.com <mailto:evelyn.sanchez@sprint.com>

Maureen Sapp

Date	Time	Regarding
6/6/2008	2:47 PM	Maureen Sapp / 3103 Kelly Park Rd. called and asked if we were ever going to have a meeting on the Wekiva Parkway? PIO noted public hearings had been pushed back to August, had lot of documentation been working on and some issues with the locations. PIO noted will be sending them out newsletter with meeting details. She asked if it was going to affect her property? PIO noted thought we'd discussed before she was beyond

the project limits. PIO checked database and found email from March 2007 that was sent to her to that effect. She said oh. PIO noted there's always a chance when it gets to design that something might change, but that's where it stands in the conceptual stage we're in now. She asked if there were any maps she could see? PIO noted maps are on the OCEA web site, did she have internet access? She said yes. PIO noted if she's at the computer I can walk her through the links to find them. She put me on with someone else who was at the computer, and I walked them through the links. PIO confirmed they were able to see their property and their questions were answered. She said so this is it? PIO noted that's the recommendation for the preferred alternative that we are bringing forward to the public hearings for approval. She said okay thanks.

10/1/2008	12:42 PM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, October 01, 2008 12:42 PM To: Marc K. Scheel x3568 Cc: 'Lindsay Hodges'; 'Tracy, Dan'; Deana Leffler Subject: RE: FW: Beltway Hello Marc, Your query about the State Road 429 Wekiva Parkway project was forwarded to me. There are a couple of Expressway Authority projects involved in answering your query. Currently, as you noted, SR 429's northern terminus is at US Highway 441 east of Erroll Estates. Phase II of the State Road 414 John Land Apopka Expressway will involve building a new alignment for SR 429 further west and which will connect to US 441 near Plymouth Sorrento Road. That phase, which is not yet funded for construction, will become SR 429, and the existing SR 429 segment at US 441 will become SR 451 (as noted on the attached map). From the end of the John Land Apopka Expressway at US 441 near Plymouth Sorrento Road, the SR 429 Wekiva Parkway will pick up and proceed north toward the Orange-Lake County line, and then west into Mount Dora as well as east through Lake County and into Seminole County to end at Interstate 4. The Wekiva Parkway would not affect properties near the current northern terminus of SR 429 such as Erroll Estates and others. You can view the Wekiva Parkway maps for the Preferred Alignment Alternative on the Expressway Authority web site at <a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec</a> &lt;/exchweb/bin/redirect.asp?URL=<a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec</a>&gt; . As discussed, I'd like to be added to the mailing list for any documentation your division creates regarding the Wekiva Parkway &amp; SR 46 Bypass project. Our address is:  750 Oakland Hills Circle, #214  Lake Mary, FL 32746  Email address is reflected above.  What is the next expected publication that gets mailed to everyone on this list and what will it entail?  Thank you,  Lisa Schmidt</p>

7/28/2008 7:57 AM Lisa Schmidt 614-264-3084 called and said she was from Ohio and they were looking at some property in Lake Mary and wanted to know where the Wekiva Parkway was going? PIO asked if she'd been on the EA web site? She said all they could find was from summer 2006. PIO gave her address and links for latest alignment, documents and other info. PIO noted latest public hearing schedule, asked if she wanted to be on the mailing list? She said yes. PIO asked that she send me an email with her info. she said she had my address and would do so.

Contact	Tanner Schofield	Northwest Orange County Improvement Assoc.
Date	Time	Regarding
5/12/2008	11:01 AM	Tanner Schofield 407-889-0069 called and said he got the email from PIO about bringing Wekiva Parkway exhibits to the Zellwood Corn Festival. He apologized profusely since he already committed to give us space, but said Marvin the organizer said they don't have any more space; they had to turn away a couple concessionaires. PIO said we wouldn't need a full tent, just a table somewhere... He said he tried to explain that, but the spacing is full and they have a fire code limit on exhibitors. PIO said okay, no problem. He repeatedly apologized, especially given how he treated PIO when she couldn't make their meeting a while back. PIO said these things happen. PIO said maybe if they have a HOA meeting some time I can come out and give an update. He said that would be great, noted Board meetings are the first Thursday of each month and the second Thursdays are the dinner meetings, but their summer schedule is different. He said he will keep an eye on the schedule and be sure to stay in touch. PIO said okay and wished him well for the event. He said he has concerns because they're changing the schedule with regard to Christian Day (no alcohol), when they typically have lower attendance. They're doing that on Sat. this year instead.

Subject: SR 429 - Wekiva Parkway PD&E Study - Zellwood Corn Festival  
Tanner, It was good to reconnect with you at today's EAC meeting. I checked my schedule and at this time I can make the festival and will bring some Wekiva Parkway boards and other OOCEA info. Please let's stay in touch as we get closer to the event as things do change in these crazy times! Thanks again for coming up and saying hello. Have a great weekend. Mary Brooks

5/9/2008 9:55 AM Prior to the EAC meeting, Tanner Schofield / NWOCIA h 407-889-0069, c 407-616-7670 thanked PIO for the updates and noted things run in the paper. He said they get my letters, but some people are still spreading rumors, etc. He noted on May 24-25 is the Zellwood Corn Festival and invited PIO to come out. PIO noted I would have to check my calendar but maybe we could bring some Wekiva Parkway info, boards. He said that would be great, with enough notice they can give me a 10x10 tent, and can certainly set up a table. He said Saturday is the big day. He said a lot of people want to know what's going on. He also noted the Orlando Sentinel was an event sponsor. He noted so it would help if you could come out to the event. I said I would get back to him either way. PIO again apologized for previous technology glitch that resulted in my missing their meeting. He said don't worry about it, it's forgotten, and forgive him if he was rude about it. PIO said I really appreciate that and will get back to him.

Contact		Keith Schue	The Nature Conservancy
Notes			
Date	Time	Regarding	
9/17/2008	1:18 PM	<p>Keith Schue/Nature Conservancy called to discuss Wekiva Parkway and magazine article. He said the Wekiva Parkway represents a broad regional consensus... the culmination of all the state agencies, local governments, environmentalists and other stakeholders to agree on how to develop a road in this environmentally sensitive area. This has been a significant process... a major collaborative effort that involved...Efforts that went into this pursuant to the executive orders from the governor. Keith said the more typical environmental assessment can appear to be little more than "checking the boxes" that an evaluation has occurred. "This is something much more comprehensive. What is it going to take to protect this ecological corridor and you also have this transportation issue that's not going away. The Wekiva Parkway entails "a commitment to do substantial design ... bridging for wildlife movement. We haven't seen the likes of this anywhere else in Florida."</p>	
9/17/2008	1:17 PM	<p>It's a great example of what the Expressway Authority can do when collaborating with environmental groups." "It's really a landmark type effort. There's nothing like it in the state. Very inclusive as a process..."How often do you see a set of environmental groups say 'let's build a road? Championing a road project? It's because we knew the Wekiva Parkway was being done in such a way to protect the environment. ... The alternative of a SR 46 that stays on the ground, and is widened to six or eight lanes with all sorts of development ... that's what will happen if the Wekiva Parkway doesn't get built. WPPA took important lands off the table for development. Now we need to figure out how we get past some of the stumbling blocks</p>

Subject: RE: Wekiva Parkway Comment Form Submission  
Thank you for submitting your comments regarding the Wekiva Parkway Project  
Development and Environment Study. Consultants for the Florida Department of  
Transportation are currently evaluating the Alternative G suggested by the  
Wekiva Parkway Community Coalition. We also are finalizing study  
documentation and awaiting federal and other agency review and comments.  
Once this part of the process is complete we may schedule the formal public  
hearings. Thank you for your interest in this major transportation  
improvement.

Notes

Date Time  
1/25/2008 12:27 PM

Regarding  
PIO returned Kim/Brigham Moore's call, she said her clients were wondering when we're  
going to start buying properties? PIO noted we don't have an approved alignment yet.  
Public hearings this summer, then after that agency approvals, maybe by end of the year.  
From there have to go through final design, then ROW. PIO noted OOCEA has final design  
funded for OC and some ROW, but FDOT does not for final design, though some ROW. So  
PIO said funding will drive the schedule. PIO noted we might do some advance ROW  
acquisition of large parcels before they get developed, noted we'd entered discussions  
with Stanton Ridge, but they'd have to be right in the middle of the alignment. She said  
one of their clients did have such developable property in Seminole County. PIO said we're  
working on the funding, and hope to have better info on that and scheduling after the  
public hearings this summer. She said thanks for the info.

1/25/2008 10:47 AM Kim Sewell-Lindsberg/Brigham Moore called and left MSG if you get an opportunity to give  
me a call this morning as soon as you get a minute I have a quick question for you.

Date	Time	Regarding
12/3/2008	12:39 PM	I am in favor of the preferred alternate southern route for the wekiva parkway. I believe that this will provide the most direct rute and is the route that will have the least impact to the businesses and residents of this area. In my opinion, the proposed northern route will greatly increast traffic on 46. Without an I-4 interchange, 46 would be the shortest route and the route most drivers would take between I-4 and the parkway.

I answered about status of hearings and Pine Plantation being approved, but referred her to Lindsay re: funding plan etc. She will probably call you shortly. Mary Brooks	

5/22/2008	10:35 AM	PIO reviewed WMFE Wekiva Parkway "This Week" DVD. Used very little of Mike Snyder's interview, was mostly Capri Cove and Sylvan Lake Reserve residents' concerns. Though they did interview some residents who live off 417 who said it's not a problem for them, either don't hear it or get used to the noise. They also had Gary Johnson/SCEA Executive Director and SC Public Works Director and Charlie Shaw/WPCC and Sylvan Lake Reserve HOA in studio. Gary did a good job of explaining how and why we'd arrived where we were and corrected erroneous reporter info, noting that the Seminole portion was being done by FDOT (not OCEA). Shaw was straightforward in reiterating the group's position, noted they're not opposed to the road, etc.

Hi Will!

The show aired around 8:45 PM tonight. The first half of the show was about property foreclosures. The second half all about Wekiva Parkway. If you could please record the second half of the show I would greatly appreciate it. I will be in your neck of the woods around 12:00-12:30 PM tomorrow. The number I have for you is 407-281-8855. I'll call you when I leave downtown. I'm not exactly sure where In-Focus Media is but I assume around Stillwater? Hopefully tomorrow works for you? If you have any conflicts give me a call otherwise, I'll see you tomorrow!

Regards,  
Deana N. Leffler

 Hello Brittany,  
 The preferred alignment must be approved by the Federal Highway Administration, the Florida Department of Transportation, and the Boards for the Orlando-Orange County Expressway Authority and Seminole County Expressway Authority. The FDOT typically also would seek consensus from the Lake County Commission. The approval process will commence after the public hearings now looking more like August) and after any final revisions based on public input are made. I hope that helps. Please feel free to call with any additional questions or info needed. Mary Brooks

Subject: SR 429 - Wekiva Parkway PD&E Study - WMFE interview  
Greetings, Notes from the WMFE interview Mike did today. We think it went well. Show to  
air Thursday 830 p.m. They do plan to also shoot the SCEA meeting tomorrow, FYI.  
1020 a.m. PIO assisted with Brittany Shane/WMFE TV interview with Mike Snyder Q:  
What's happening with the Wekiva Parkway? Mike noted we're moving to the public  
hearings in July. We will give the community another opportunity to look t the alignment  
and provide feedback. Then we will refine the alignment based on that and the documents  
Then we go into what's called the record of decision, FHWA, NEPA process, agency  
approvals. Q: This will come from federal funding? Mike said we're looking at all of the

options. It's a lean time. Looking at what state and federal dollars are out there. Those from the gas tax are dwindling due to high gas prices and people cutting back on usage. Q

Is this a necessity? Mike said yes, it's not just about completing the beltway in an environmentally sensitive manner. It's about the overall transportation package - people have to have options. Depending on where you're going it can be a great advantage ... our agency is doing SR 414 and that will connect to 429 and the next phase of that will be part of the Wekiva Parkway. ... It is critical for the overall community transportation package. He noted we're in a lull right now ... so it could be a boon to the economy with the amount of construction and jobs that will take place, there will be a spin off in the community. It's about transportation first and foremost and then about economic development.

5/5/2008

5:51 PM

Q: What's it going to take to finish? Mike said the study should end this year, then we would go into design and ROW. The big issue is funding ... we're working with FDOT and other agencies. It will take all of our funding partners to make this a reality. I'm optimistic that by this summer we will have a funding plan. Q: if you have the money, when could you start building? Mike said we can have (429-201) under construction by next year, that would become part of the Wekiva Parkway. The remaining portion in Orange County could start in three years. And the rest of it maybe 7-10 years to start. Q: What are you presenting to the SCEA tomorrow? Mike said we will go over where we are with the study, some of the issues with various communities. Q: What issues? Are a lot of people losing their homes? Mike said there are a couple of impacts. There are a few properties that need to be taken but it's really minimal for a project of this size. Q: What's going to happen if residents are displaced? Mike went over the process of appraisal, offer, property owner negotiations. ... We understand that people chose to live in a certain place and are probably not happy about having to move. But financially it usually works out very well for them. Q: you posted the noise study last week, do residents have noise concerns? Are specific areas affected? Mike went over the noise assessment process, use of computer models for projected traffic and noise volumes, take into account distance and elevation of roadway. He noted the federal criteria for noise attenuation, which in the majority of cases refers to a barrier.

5/5/2008

5:50 PM

Q: What does the sound barrier do, just block out sound? Mike said essentially, within a certain distance. Beyond about 300' the sound barriers are not effective. Q: What are the areas with the highest noise? Mike said he hasn't read the noise report, but generally the areas closest to the roadway. He noted the area in Seminole County is under FDOT, so he hasn't looked at that closely. Q: what's the cost of sound barriers? Mike noted they're very expensive, maybe \$50/square foot, or a couple million dollars a mile. But he noted in the grand scheme of a \$2 billion project, it's a relatively small portion. Q: So what are the residents saying? Mike noted the overwhelming feedback from public workshops is when are you building it? When are you buying my land? He noted in each series of workshops there were 1200 people attending. He said the majority want the road, but communities such as Capri Cove, Tall Trees, Heathrow Country Estates. People like that are not happy. They don't want it. We have to look at the big picture of Orlando and this region of the state, but we have to be sensitive to the communities and if we can move it to accommodate them, we will look at that. Q: What is I live over here (off the corridor), why should I care? Mike noted even if you don't or wouldn't use the road, commercial traffic, good and services that you patronize would. Deliveries. This would mean options for commercial drivers, which are always trying to keep their gas costs down and the time they spend on the road. This is critically important to the economic vitality of Central Florida. Q: What's happening now? Mike noted we're trying to finish the study. It's priority No. 1 for the OOCEA and the FDOT. We're doing everything we can to find funding for the project...

Q: Would there be a pollution effect on the river? Mike noted with the WMD and FDEP standards we must comply with - during the Wekiva Commission those were elevated - so we will have to build to a much higher standard, discussed treatment for runoff ... The water and runoff from the highway will be far more controlled than it is today. Some improvements have been made in Seminole County (on SR 46), but the Lake County SR 46 section is the old design. There is no containment for water running off the roadway. That will vastly improve.  
Mike noted re: air pollution, cars in stop and go traffic or idling produce more exhaust. With an expressway it will mean more free flowing movement of traffic so less car emissions, for some period of time.

5/5/2008 5:49 PM Q: Is the project even more important with commuter rail falling through? Mike said it's always been important, but probably so. This will provide an alternative that commuter rail would have provided. Continued discussion of project and review of map while cameraman shot B-roll. PIO noted most vocal opposition not from people whose property would be acquired, but from people who would be near it, don't want to see it, hear it, etc we pointed out interchange locations, CR 46A realignment and purpose, wildlife crossings.  
Q: Won't this lead to more urban development? Mike said the intention of the legislation was to limit growth along the roadway, limited number of interchanges allowed, no local access to systems interchange, had to provide local access interchanges in east Lake County. Mike noted if it weren't for the Wekiva Parkway, FDOT eventually would just have to widen SR 46 through this area and you'd have a SR 436 or SR 434 with strip centers, etc. Brittany said they have to edit on Wed. for the Thursday night broadcast (830 p.m.) she said she would not likely attend tomorrow's meeting but send cameraman. Subject: SR 429 - Wekiva Parkway PD&E Study - WMFE reporter interest

FYI,

I received a call this afternoon from Brittany Shane of WMFE's "This Week" TV show (airs Thursdays at 830 p.m.) who said she was interested in featuring the Wekiva Parkway next week. Details of our conversation are below. In general, we discussed status and schedule for the PD&E Study, SCEA meeting coming up on Tuesday (which she may cover), and those for and against the project. She was also informed of the noise study and maps posted on the website.

124 p.m. Brittany Shane/WMFE reporter 407-273-2300 and asked what's going on with the Wekiva Parkway right now? PIO noted we're finalizing documents and getting ready for the public hearings in July-August though haven't nailed down details yet. She asked so what is actually going on now? PIO noted there is extensive documentation that has to be done for the study that's being finalized. PIO noted for example we just posted the noise study report on the web site this week. She asked when? PIO said the emails to property owners went out yesterday, so think it was Tuesday. She said that's good to know she's going to check that out and may call me back.

5/1/2008 1:24 PM

She asked when the study would be finished? PIO went over overall timeframe; hope to be done late 2008-early 2009.

She asked if there were any people not happy about the project? PIO said yes, any time you build a major transportation improvement in a developed area there are going to be people who are not happy. PIO noted, for example, a number of residents with concerns along SR 46 in Seminole County, and also in Orange in the area of Boch Road, Haas Road and Plymouth Sorrento Road.

PIO also noted we were making a presentation on Tuesday on the project to the SCEA, 4 pm. Or whenever the commission meeting beforehand finishes. PIO noted some of the people with issues about the project will be in attendance. She said that's great, that would be a great hook for the story, better than the noise report. She said she's working on a story for their Weekly program Thurs at 830 p.m. "This Week on PBS." In fact it's on tonight.

PIO gave her my email address in case she needed additional info, graphics. PIO noted maps are on the website, though I could try emailing her the overall alignment, though it's a big file and some people have trouble with it. She gave me her email address. bshane@wmfe.org <mailto:bshane@wmfe.org>

5/1/2008 1:23 PM

She noted the friends of the Wekiva seem very excited about this. PIO noted it's groundbreaking to have such consensus building that led to the legislation for this project. She said she was familiar with that. She asked if this would be a good thing for the community right, why are people upset about it? PIO noted this would finish the beltway around northwest Orlando, will address safety and congestion issues on SR 46. PIO noted SR 46 one of the deadliest roads in the state for people and animals. Something needed to be done and the traffic models showed that simply widening the road wouldn't solve the problem, besides issues with going through an environmentally sensitive area. PIO noted some sort of expressway or parkway was shown to be needed. PIO noted that there will always be people who don't want to look at a road, hear it, worry about the effect on their quality of life, etc.

She said this is great info and she will definitely be calling me back.

Henley'; 'Art Woodruff'; 'Gary Brender'; 'Mejias, Norma'; Brian.Stanger@dot.state.fl.us; Frank Hickson@dot.state.fl.us; David.Lewis2@CH2M.com; GJSkaff@pbsj.com; chad thompson@dot.gov; dlewis@ch2mhill.com; 'Brinson, Sheralyn' Subject: RE: SR 429 - Wekiva Parkway PD&amp;E Study: Analysis of WPCC Proposed Northern Alternative</p> <p>Dear Mr. Johnson:</p> <p>Thank you for your detailed status update. I have consulted with other members of the WPCC Executive Committee in preparing this response, which represents our consensus views.</p>
9/17/2008	12:06 PM	<p>We take at face value and accept your assessment that the work product CH2M Hill presented to you last week was so preliminary that it did not make sense at this time to schedule a meeting with WPCC participation. However, we very strongly believe it is critical to insuring there is a fair and balanced view represented in the final product that we be allowed to participate in the review with the County staff and CH2M Hill prior to any discussions of the merits of the 'various concepts' with the SCEA Board members. Further, it is our intention to meet individually with the SCEA Board prior to the next SCEA Board meeting, if necessary, to discuss and/or rebut any points made in the County staff and CH2M Hill recommendations. We do not want to be placed in the position of having insufficient time to do so. The proposed schedule does not give the WPCC sufficient time to evaluate any modifications or new proposals that we would expect CH2M Hill to develop in an effort to work with us.</p>
9/17/2008	12:05 PM	<p>I know you are aware the WPCC has consistently maintained the belief that the views of the citizens in the communities we represent have not been communicated in a fair and balanced manner to the SCEA Board. It is for this very reason that we wish to be a part of the discussion as to whether the package is adequate to be presented to the SCEA Board - particularly with regards to how it represents WPCC views, and any comments on the WPCC proposed Northern Alternative.</p>
9/17/2008	12:04 PM	<p>If we are not allowed to participate during the course of the review, we will have little recourse but to make the Board aware that we were intentionally kept out of any participation in the assessment process, other than the initial presentation of the proposal</p>

on 15 July at FDOT R5. At that 15 July meeting, FDOT's George Lovett told the WPCC he would insure there would be another meeting with his staff prior to anything being finalized or presented to the County. Unfortunately, we have had no such meeting, and absolutely no feedback on any of the details of the analysis of our proposed Northern Alternative. When you stated you "...were given a quick overview of the alignment you submitted as well as some items they have been working on to possibly refine their alignment.", the WPCC consensus interpretation of that statement is that the RPA proposed alignment is actively being tweaked to be "approved", while ours is being reviewed for "discussion" and eventual "rejection".

9/17/2008	12:03 PM	We are also dismayed by the fact that we should have had by now a definitive answer to our question raised at the 15 July meeting of "whether the SCEA Board is open to a Northern Alternative". We have followed up several times since the meeting with CH2M Hill, and it still has not been answered. CH2M Hill, et. al. were directed to "work with us" by the SCEA Board at the 6 May meeting. It should be noted, that to this point, it is our view that all their efforts have been directed at holding meetings, nullifying our proposals i.e. "playing Devil's Advocates") and offering nothing in return. This is clearly not "working with us" as they were enjoined to do by the SCEA.
9/17/2008	12:02 PM	<p>We therefore request reconsideration of your position with regards to timing of meetings with the WPCC Executive Committee, and that such be scheduled in accordance with our request in our email to you of 21 August, at each of the following milestones in the CH2M Hill review:</p> <ul style="list-style-type: none"><li>· Provide an assessment to the Seminole County staff as to whether the concept (WPCC proposed Northern Alternative) addresses the purpose and need of the project.</li><li>· Review with the Seminole County staff what has been heard from stakeholders, and ask their direction relative to meetings with SCEA Board members.</li></ul> <p>Because of the relatively short time remaining prior to the November SCEA meeting, we would appreciate a prompt response. Please feel free to contact me for clarifications if necessary.</p> <p>Charlie Shaw</p>
9/12/2008	3:43 PM	<p>From: Brinson, Sheralyn [mailto:SBrinson@seminolecountyfl.gov] Sent: Friday, September 12, 2008 3:43 PM To: Charlie Shaw Cc: McCollum, Jerry; George.Lovett@dot.state.fl.us; Mary Brooks; mark.callahan@ch2mhill.com Subject: SR 429 - Wekiva Parkway PD&amp;E Study: Analysis of WPCC Proposed Northern Alternative</p> <p>Mr. Shaw: As a follow-up to your September 11, 2008, e-mail, provided herein is current status of my involvement in the Wekiva Parkway Project. Jerry McCollum, County Engineer and I met with representatives from CH2M HILL this week and were given a quick overview of the alignment you submitted as well as some items they have been working on to possibly refine their alignment. Both the County Engineer and I had some questions that need to be addressed. In my opinion, the work product the consultant presented is preliminary at this time and more data is to be provided for our review.</p>
9/12/2008	3:42 PM	<p>As to the consultant meeting with the WPCC Executive Committee, I believe that once the consultant has finished their review of the alignment you submitted and the modifications are complete to the alignment they are developing, a meeting should be scheduled. It would be appropriate at that time for everyone to meet, review and discuss the two concepts that are being refined. As to the timing of the WPCC Executive Committee meeting, our normal process is that once the data is provided and reviewed by the County</p>

Engineer and me, we determine if it is adequate to be presented to the SCEA Board members. The consultant or County staff would then brief the SCEA Board members individually on the various concepts. After the meetings with the SCEA Board members, a meeting with the WPCC Executive Committee would be scheduled to review this information and obtain feedback. These actions would be prior to the formal SCEA Board meeting.

9/12/2008 3:41 PM I hope that within the next 30 days the consultant will have completed development and review of the concepts so County staff can finish their review. In this timeframe the SCEA Board members would also be briefed on these alignments.  
Thank you for your e-mail and we will keep you informed as we continue in this process. If you have any questions, please contact me.  
W. Gary Johnson, P.E.

Hi Sheralyn,  
This is in follow-up to my phone conversation with you last Friday, 5 Sep., during which you said you would check with Gary on the status of a response to the below email. There is a meeting of the WPCC Executive Committee this evening, and I thought I would check back with you with regards to the status on this request to meet with Gary, sent three weeks ago. I would like to be able to provide the committee with an update. Thanks  
  
Charlie

Subject: SR 429 - Wekiva Parkway PD&E Study: Analysis of WPCC Proposed Northern Alternative  
Hi Gary,  
I trust you've been following the below dialog regarding the PD&E study of the WPCC proposed 'Northern Alternative'. One of our requests was that CH2M Hill / FDOT schedule "In Process Reviews (IPR's)" with the WPCC at each of the two milestones in the process where Mary Brooks stated reviews would be held with "Seminole County staff". Those milestones (restated) are:  
1. Provide an assessment to the Seminole County staff as to whether the concept (WPCC proposed Northern Alternative) addresses the purpose and need of the project.  
2. Review with the Seminole County staff what has been heard from stakeholders, and ask their direction relative to meetings with SCEA Board members.

8/21/2008 10:19 AM From Mary's email, it does not appear that our request to have these reviews with the CH2M Hill PD&E study team will be accommodated. We feel WPCC involvement at these two points in the evaluation of our proposal is critical to insuring our position and concerns are accurately and fully incorporated into what is being reported to the Seminole County

Commissioners and to the SCEA. As was stated when Dan Macaluso and I appeared before the SCEA Commission meeting in May, one of our constituents' biggest complaints to date was that they either were not being heard, and/or that their concerns were not being accurately and fully reported to the SCEA.

8/21/2008 10:18 AM On 19 August, the WPCC Executive Committee met for their regularly scheduled bi-weekly meeting. After discussion of Mary's response regarding our request for involvement during the Northern Alternative review process, we decided to instead request those meetings with Seminole County staff. Consequently, I took an action item to contact you and request the IPR's be held with yourself, and/or members of your staff, at each of the two milestones mentioned above. On our side, 2-3 members (maximum) of our Executive Committee would participate. Please let us know your thoughts on this matter at your earliest convenience. Please also feel free to call me if there is any need for clarification. Hope all's well, and that Fay is not keeping you too busy.  
Best regards,  
Charlie

Hi Mary, Hate to be so incremental, but we have had some inquiries by new WPCC constituents along SR46 to the west of the elevations previously sent. Specifically, we would appreciate very much if you would send us at your earliest convenience the preliminary concept plan view and profile sheets, to include the WR bridge crossover, east to P/PR-37. Thank you very much.  
Charlie

7/16/2008 4:38 PM As a followup to the additional questions raised, the east-west distribution of Wekiva Parkway traffic is shown on Figure 5-1. This figure traces Wekiva Parkway traffic on the facility at the Seminole/Lake County Line and how it is distributed through Seminole County. The largest percentage of traffic is heading to portion of Seminole County to the east of I-4 along SR 417 (37%). Most of this traffic utilizes the Rinehart Road, CR 46A, US 17/92 and Lake Mary Boulevard/CR 427 interchanges to access land uses along those corridors and in the Sanford area. Some traffic continues on SR 417 to the south to the Oviedo/Winter Springs/UCF area. The information related to the 10,300 daily traffic reduction on I-4 south of Lake Mary Boulevard was in reference to the question of Wekiva Parkway's impact on I-4. This impact is found by comparing the traffic volume at that location in the 2032 No-Build condition (Figure 3-8A) to the 2032 Build condition (Figure 6-8A). Connecting Wekiva Parkway to SR 417 allows the traffic movement between Lake County and Sanford and the surrounding areas (including the US 17/92 and CR 46A corridors) to be accessed directly using the expressway system. This relieves traffic along SR 46 at the I-4 interchange, near the mall, and on into downtown Sanford by diverting these through trips onto the expressway. It relieves future congestion along this section of the SR 46 corridor and allows better operating conditions. Today this direct movement does not exist resulting in the majority of this traffic movement remaining on SR 46 to go between Lake County and Sanford. Hopefully this answers the question about Rinehart Road traffic volumes. Let me know if you have any other questions or if I need to clarify any of these points. Thanks

Subject: RE: WPCC submitted Wekiva Parkway Alternatives - Resending Traffic Report Info  
Thanks, Mary. It looks as if there may be some misunderstanding as to the question regarding the east-west movement, which is the one I inquired about at the meeting today. What we are trying to discover are numbers for the east-west (and west-east) traffic along SR46 moving from/to Eastern Seminole County (i.e., SR 417) and Lake County. Several statements have been made during the course of PD&E Study related meetings that there would be significant traffic impact on I4 if a direct connection was not made for east-west traffic, and the traffic subsequently had to transit I4 connecting from SR417 to the Wekiva Parkway. Your below email references traffic south of Lake Mary Boulevard, and I don't see the connection between that and the question raised. Also, you

didn't mention (and I couldn't find) where the "10,600 daily vehicles" figure comes from in the report.

7/16/2008 12:21 AM Back to our question. I note that the "ANNUAL AVERAGE DAILY TRAFFIC" (AADT) shown in fig. 2-3B for the SR417 off ramp at Rinehart Rd. is 5,530, and the "DIRECTIONAL DESIGN HOURLY VOLUMES (DDHV)" in fig. 2-4B is 700. As confirmed in discussions with Mark and FDOT officials, this relatively light traffic includes not only the total traffic trying to move from SR417 to Volusia County via SR46, but also includes traffic headed to the mall, southbound on Rinehart, eastbound on SR46, southbound on I4, and to all businesses and communities accessed via westbound SR46 and its crossroads in Seminole County. Again, what we are looking for are the documented traffic numbers for east-west movement between Eastern Seminole County and Lake County (excludes traffic terminating in the I4/SR46/SR46A/I-Pkwy area). These are the numbers that have been used to support various arguments for/against different alignments and the operational requirements for the roadway. Thanks in advance for your help, and please call to clarify if there are any questions about the understanding of our inquiry.

Subject: RE: FW: WPCC submitted Wekiva Parkway Alternatives  
Dan,  
As previously noted, we will discuss items 1 and 2 below in the pending meeting, tentatively set at the FDOT District Office in Deland on June 19 at 3 p.m. (just waiting to hear back from you all to confirm). CH2m Hill is working on number 3, which they also hope to have by the June 19 meeting. I provided information earlier for item 4A, if you will. As regards item 4B and potential impacts to Orange Boulevard, the traffic consultants indicate that when looking at the future year conditions in 2032, the presence of Wekiva Parkway results in lower traffic along Orange Boulevard in Seminole County as it provides another option for traffic to go between the I-4 corridor area and the SR 46 corridor. The cut-thru traffic along the local roadways that occurs in the No-Build condition can use Wekiva Parkway in the Build

condition. In addition, the inclusion of the Wekiva Parkway/International Parkway interchange provides direct access for the trip interactions between Wekiva Parkway and the employment centers along CR 46A and International Parkway. Thus, this interchange provides direct benefits to the local roadway network by removing these trips from the local roads. The 2032

No-Build and 2032 Build directional design hourly volumes and LOS for Seminole County are shown in Figure 3-9B (pg. 74) and Figure 6-9B (pg. 150), respectively. Figure 4-10 (pg 96) shows a comparison of traffic in Seminole County under the four Build Wekiva Parkway alternatives. In this figure, the direct connection to I-4 at SR 417 is shown to have a lower volume along Orange Boulevard south of SR 46 compared to the other build alternatives. I hope you find this information helpful.

Subject: RE: WPCC submitted Wekiva Parkway Alternatives  
Regarding the WPCC query about traffic, you will likely find some helpful information in Section 5.1 (Traffic Distribution) of the traffic report (pages 101-103). The traffic consultants point out that if a direct connection between SR 417 and Wekiva Parkway is not made, there is not enough right-of-way along I-4 between SR 417 and SR 46 to widen I-4 sufficiently to accommodate all the direct traffic movements between SR 417 and Wekiva Parkway. This is mainly due to the presence of the existing mall. As a result, not only would level of service on I-4 degrade, but overflowing traffic from westbound SR 417 trying to reach the Wekiva Parkway would be required to use local roadways (Rinehart Road, International Parkway and existing SR 46) to make this connection. Since this is a strong traffic movement, the loading of the expressway traffic onto the local roadway network would result in more congestion and reduced level of service, neither of which are desirable. This same condition exists today with SR 417 westbound traffic destined for SR 46 west of I-4. Today that traffic must exit off at Rinehart Road to access SR 46 as there is not a direct connection from westbound SR 417 to the I-4/SR 46 interchange. When looking at the direct impacts to I-4, the presence of the Wekiva Parkway would reduce the interstate traffic by approximately 10,300 daily vehicles (almost 6 percent) south of Lake Mary Boulevard. This would benefit travel conditions along this area of I-4. I will also follow up on the Orange Boulevard question and get back to you.

Dan,  
We discussed a number of things in our meeting late Thursday with FDOT, including the numerous requests we are receiving from different members of the WPCC, and that it is becoming difficult to keep up with. We would request that you designate one person, perhaps yourself, to liaise with us. That way it will be easier to track the requests and to not let something fall through the cracks. Also, I will be your sole point of contact henceforth, as I'm in close communication with all of the parties involved in the study and

have the dedicated time to attend to your questions and requests. You are, of course, welcome to continue to copy anyone you like on emailed requests to me. We continue to work through evaluating some of the suggested WPCC alternatives, and hope to have some information on those in about three weeks. We also have a number of questions about some of the other alternatives that your group has suggested. We would like to meet with you and a few core members of the coalition, perhaps in the third week of June, to go over what we have and to get more information from you. I've got to check with the FDOT calendars and will be getting back to you soon with some dates. We understand that you all are anxious for information, and we're doing our best to keep up with your requests. But we ask that you remember there are a number of other items we are dealing with along this 25-mile corridor, as well as the required engineering and documentation required at this stage in the PD&E study. We appreciate your cooperation and patience, and will be getting back with you soon.

Thanks, Mary, for the Traffic Report.  
Mark,  
In the attached email thread, we asked that you "...point us to the specific data in the study from which the conclusion is drawn that there would be a significant traffic impact on I-4 if the direct connection is not made." There is a ton of data and information in the Traffic Report, and it would help us all greatly if you could provide some words, referencing documents in the report and data therein, which talk to this question. Another matter of concern raised during WPCC discussions, is traffic impact of the Recommended Preferred Alternative on Orange Blvd. (CR431) south of SR46. Several of our communities in the WPCC front on this road, as do Wilson Elementary, The Academy of Learning, and Lakeside Fellowship Church. Looking at the studies, it seems none of the build alternatives offer an acceptable Level of Service (LOS), just different levels of LOS (worst level) for Orange Blvd. From a layman's perspective, it's obvious a significant amount of traffic to/from the employment centers centered on SR46A and International Parkway will use CR431 as a path to access SR429 at the SR46 on-ramp. This is especially troubling to us, and we would appreciate your comments. Finally, we would appreciate if you could at least provide us a target date for providing the other information requested.  
Thanks.Charlie Shaw

Subject: Wekiva Parkway Traffic Studies: I-4 considerations  
Hi Mark,

There have been numerous references to the impact on I-4 traffic if a SR 429 - SR 417 direct connection is not made. For our better understanding of this issue, would you please provide us (or, direct us to) the supporting traffic studies? Of particular interest are those studies which support the postulated significantly increased I-4 traffic load caused by added traffic trying to transit from Lake County to SR 417, and vice-versa; i.e., not traffic originating in or destined for the immediate area of the employment and commercial centers in the I-4, International Parkway, SR46/SR46A vicinity. Thanks.

Subject: SR 429 - Wekiva Parkway PD&E Study - Wekiva Parkway Community Coalition request

Good afternoon Chairman Carey and Commissioner Dallari,  
I wanted to make you aware that we have been requested to meet with some Sylvan Lake Reserve HOA board members as well as other members of the "Wekiva Parkway

Community Coalition," which we are told also consists of other area HOA members. Mark Callahan of Ch2m Hill, Brian Stanger of FDOT and I are meeting with them this evening, Wed., at 630 p.m. at the home of Dan Macaluso, Sylvan Lake Reserve HOA president, at 6675 Sylvan Woods Drive, Sanford. They have asked us to review and comment on additional alternatives they are proposing (though we understand at least some of these alternatives have already been evaluated). Please let me know if you have any questions, or if you plan to attend so that we can wait for you. Thank you.  
Mary Brooks

Subject: Meeting Request With Wekiva Parkway Community Coalition  
Hi Mary,  
Our Wekiva Parkway Community Coalition (WPCC) [www.sc-wpcc.org](http://www.sc-wpcc.org) </exchweb/bin/redir.asp?URL=http://www.sc-wpcc.org>, have made quite a bit of progress since we last met with Mark and yourself. Over the past couple of weeks we have been meeting individually with Members of the SCEA to state our case, and propose alternatives. So far, we have met with four of the Members, and have scheduled meetings with the remainder prior to the 6 May meeting of the SCEA. Since the specific proposals we are advancing were finalized after our last meeting with you and Mark, it was suggested during our discussions with the Members that we schedule another meeting with Mark to discuss our proposals prior to the 6 May SCEA meeting. The best available dates/times for our group are next Wednesday (30 APR), or Thursday (1 MAY) at 6:30 pm. We can again meet at Dan Macaluso's home, 6675 Sylvan Woods Drive, Sanford. Please let us know if this is acceptable. Although not necessary from our perspective, you are also most welcome to attend.  
Regards,  
Charlie Shaw

Charlie,  
The public hearings coming this summer will be just that, not workshops as the previous meetings have been. Certainly all local officials will be invited to the hearings; whether they attend is up to them, though SC Commissioners have attended the workshops in the past. Hope that helps. Will keep you apprised as hearing details develop.

Subject: Wekiva Parkway PD&E Study Public Hearings  
Hi Mary,  
First, thanks so much for your and Mark's attendance at our HOA meeting last week, and the informative presentation. It certainly helped some of the other homeowners who have not been quite as engaged as our group get up to speed on the latest happenings.  
I have a question regarding the "formal public hearings" (quote from the OOCEA Web site) now rescheduled to the July 2008 timeframe. Would you be so kind as to provide some details as to how these hearings are conducted? Will they actually be "formal hearings", or will they be the more the informal 'open house' type affairs we have seen in the past, with maps and other media displayed in a large room along with engineering consultant's available for Q&A's? Will the SCEA commissioners and staff also be present? Thanks in advance for your assistance.

Hello Charlie,

Happy New Year! January is filling up fast with meetings, and I need to confirm the date, time and location for your HOA meeting that we are supposed to attend this month. I think we had talked about it being on the 17th? Please confirm and provide details. Also, is this your subdivision master HOA meeting, or is this the one where you were going to invite members from other outside HOA's? Please advise - thanks.

Notes		
Date	Time	Regarding
3/6/2008	12:14 PM	Phil Shaw 407-645-5244 called with a question about the Wekiva Parkway extension. He wanted to see if could get better timeline for my own sake. I know you have started acquiring property for the extension, what does that mean for timeline on when that will be complete. Know the road improvements haven't been funded, but when do you plan to come forward to get funding? PIO noted only property purchased is conservation lands required by state law. Noted we have one subdivision that has approached us about selling before they put houses up, but that's in the very early stages of negotiations. PIO noted the schedule remains tentative due to funding issues, but there are several agencies working on a financing plan to get this portion of the beltway finished sooner rather than later. Hope to get some info from them in a couple months, hopefully by the July public hearings, and we will have better or firmer schedule info at that time. PIO asked if he was on the mailing list? He said no, but send info to Phil Shaw, 660 Jackson Avenue, Ste. 202, winter park, FL 32789 email pshaw@ecpdevelopment.com <mailto:pshaw@ecpdevelopment.com> . PIO noted we'd send something out once the public hearings are set. He said thanks for the info. --1214 p.m.

Hi Lindsay,

Can you tell me about a meeting, that I've only heard, is on this upcoming tuesday regarding the Wekiva Parkway? I understand March's noise study will be discussed, anything else?

Also what's the state of funding for this project based on the recent budget decisions by the legislature?

I am trying to file something before 1pm this afternoon and face a 1230pm deadline.

Thanks for your help. I'll try your cell also. And don't I remember you from Tallahassee...was it DOH? or DOS that you were with before?

Hello Vince,  
We are finalizing the documentation necessary to move forward with the public hearings in fact we did our last field evaluation of the last historic site needed yesterday). We're looking at the public hearings in July, with the study wrapping up after everything gets approved by the various agencies (hopefully) by the end of the year. We have the recommendations for the Preferred Alternative on the OOCEA web site at <<http://www.expresswayauthority.com/futureplans/projectsandstudies/westernconnectors.shtml>> .  
Have you seen those?  
Let me know if you have other questions.

Subject: question  
Dear Mary:  
Do you have a final date set as yet as to when the final decision will be made for the Wikiva Parkway? If not a date what month do you think it will be?  
Sincerely, Vince Sims

Hello Steve, I wanted to let you know that we have received your comments. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. This matter is expected to be discussed at the Nov. 18 Seminole County Expressway Authority Board meeting. We also are working to schedule formal public hearings and will send out a project newsletter with details and update the Expressway Authority web site [www.oocea.com](http://www.oocea.com) (<>) with this information once available. Please feel free to email or call with questions or additional concerns.

Subject: Comment on Wekiva Parkway PD&E Study  
Dear Ms. Brooks, This is e-mail is submitted as my comment on the Wekiva Parkway PD&E Study. It makes no sense to bring the 417 extension though or close to our communities when there is a northern alternative available that will disturb little in comparison. Why have the Seminole County Commissioners reversed their previous stand? We need commissioners who will lead the fight against this, rather than passively watch our communities being divided, our quality of life degraded, and our home values affected. Why is wildlife preservation more important than the preservation of our communities? Yes, the link needs to be built, but not through our communities when other alternatives exist. I have tried numerous times to find out the position on this issue of our commissioner, Brenda Carey. Her administrative assistant says she will get to it. My guess is that won't happen or it will be sometime after the election. I think it is safe to say she is not our side.  
Please! Use the northern alternative and spare our communities!  
Sincerely,  
Steve Skiles

Hello Elaine,  
We are proceeding with the Wekiva Parkway Project Development and Environment Study and are still looking to follow the SR 46 corridor in the area you mentioned. The last mailing was done in summer 2007, and we are currently working on the next newsletter which will contain details about the public hearings. We are working to schedule the public hearings in August and will get the word out to everyone once that's all set. You can view the recommendations for preferred alignment and interchange alternatives on the Expressway Authority Web site, as well as some of the study documents, at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx>> . I hope you find that helpful and we will be sending you all more information soon. We hope to conclude the study with an approved alignment in early 2009.

Subject: Wekiva Parkway  
I own a parcel of property in Lake County on the North side of Rt 46, located between the Seminole State Forest and Wetlands west of the Wekiva River. I have not received any information for several years concerning the Wekiva Parkway. If that area is still being considered as a possible route of the future Parkway I would like to be added to the mailing list for future Updates.  
Thank You.  
Mrs. F. Elaine Smialek

After November 1 and until April 15, 2009 we will once again be living in FL at  
3330 Easy Street  
Port Charlotte, FL  
33952

3/3/2008 9:12 AM PIO returned Chuck's call, relayed that project is not fully funded, noted conservative estimates suggest 10-15 years before roadway is built. PIO noted if we had the funding today, still need to go through other stages and would be looking at probably 6 years before construction. PIO noted concerted effort afoot to get a financing plan together so it happens sooner rather than later, so all of that is in flux. He said he understands that. He said he saw the preferred connection to I-4 but understands there is more than one of those. PIO noted no, the preferred is to connect to SR 417, though we also plan to make some improvements to SR 46 as part of this project. PIO noted there's one preferred option for each of the counties now. PIO asked if he'd like to be on the mailing list? He said that would be very helpful. Email c2smith@hotmail.com <mailto:c2smith@hotmail.com>, mailing address: 2057 Courtyard Loop, Apt. 203, Sanford, 32771. PIO noted we are shooting for public hearings on the preferred alternatives in summer, hopefully July, and we will send something out about a month prior to that. He said you've been very helpful and thanks for the call back.  
--901 a.m.

3/3/2008 8:15 AM Chuck Smith 407-232-4708 called and left MSG question on 429 beltway connection to I-4 up around Sanford. I've seen the options on the web and understand those. When is that going to be completed or when does construction start? I know it's kind of like looking into a crystal ball and guess but maybe you can do that and give me a call back. Thank you.

4/8/2008	12:38 PM	PIO returned Debbie's call and let her know we're still shooting for Wekiva Parkway public hearings in July but haven't set dates, having some issues with some of the venues and still finalizing documentation. She said okay, hadn't seen anything in a while and was wondering. We're in limbo out here. PIO noted I understand and we will be sending them the meeting info once everything is nailed down, noted still hoping to finish the study end of this year or beginning of '09. She said okay, thanks for calling back.

4/8/2008	12:32 PM	Debbie Soderstrom called and left MSG is there any update on the Wekiva Parkway. Call me 407-665-4760 until 5 p.m. thank you.

Kevin, I'm forwarding some graphics CH2m Hill found. Let me know if any of these are what you're looking for. There will be several batches...  
Mary Brooks

8/15/2008 2:08 PM PIO called Kevin Spear/Orlando Sentinel to get clarification on what he was looking for as far as map and acquired parcels. He went back and forth between wanting just what acquired, but also Seminole Woods. PIO noted for example we had a rudimentary map with white background early on that had all the parcels mentioned in the WPPA, but we have not acquired all of that. PIO noted for example we are not acquiring all of Pine Plantations that was mentioned, and so far no indication Seminole Woods owners even will entertain talking about selling. He said that's true. He said he thought he might also have some graphics we sent him previously for Pine Plantations.

PIO noted Ch2m Hill said they'd see what they had, but it would probably be Monday. He said he's writing Wed. for Thurs. so Monday would be fine, though he joked he might only get 2 inches of spaces given the size of the news hole these days.

Subject: SR 429 - Wekiva Parkway PD&E Study - chronology

Hey Kevin, Lindsay mentioned you were looking for some chronological information on the Wekiva Parkway. I've attached a chronology which, admittedly, I have not had the chance to update in quite a while. I added the list of meetings that I had in my records from where the chronology ends. We've had many more meetings even since then, and I'm trying to get the updated list from CH2m Hill and will forward that to you also. I hope you find this helpful, and please let me know of any other assistance I can provide. Also, we did a presentation earlier this month, May 6, I believe, before the Seminole County Expressway Authority, and they post the video from their meetings on their Web site, <<http://www.seminolecountyfl.gov/scea/>>, if you're interested. Meeting video is at the very bottom of the screen, and the Wekiva Parkway update was the primary topic of discussion. That presentation was pretty indicative of some of the many presentations we've been making, and resulting discussions, in the last few months. What's your deadline for the remainder of the activity list?

Spence

Regarding

PIO returned call to Spence, who said was looking at a house in River Oaks just east of the Wekiva River. He said he made an offer on Sunday but had questions. PIO noted it would be elevated roadway with frontage roads on both sides to get on and off of the road. PIO noted at this point it would not be a toll road; however this project is not funded. PIO noted various funding options are being looked at including whether that would be a toll road. He asked how soon was construction? PIO noted we're just in study phase, looking to have public hearings in July and finish study either late this year or early next year. Noted if we get the funding, will still be minimum 5 years to construction because have to go through design and ROW acquisition.

4/14/2008	10:51 AM	<p>He asked if SC had approved this yet? PIO noted we'd made several presentations to SC, and our understanding is their SCEA would have to approve an alignment in the county. PIO noted after the public hearings any last adjustments would be made, and then we would seek agency approvals.</p> <p>(I was driving but I think he said he's looking to close on the house the first week of May.) PIO asked if he'd like to be on the project mailing list since he's looking to move to that area. He said yes. PIO asked if he could email his contact info, gave him my email address and noted I was driving. He said he would do and thanks for the call back.</p>
4/14/2008	10:25 AM	<p>Spence (couldn't understand last name) 305-310-5857 called and left MSG I have a quick question re: the Wekiva Parkway. I want to buy a home in River Oaks, was trying to look at the plans but was having trouble understanding so I wanted to talk to you for a second. Is it going to be elevated? Will be four lanes? Will it be toll road all the way to I-4? If I buy a house there am I going to have to pay a toll?</p> <p>If you would call me back ASAP I would appreciate it. Thank you.</p>

Should this property be acquired as an advance acquisition, I would recommend that the fence stay as a security measure until construction, which as you know is some time in the future.</p> <p>In the past, the Authority has not sold items like this. If they were to decide to sell, it would probably be put to public bid. This is the second inquiry about this fence. Please let me know if you have any questions.</p> <p>Deb</p>
3/12/2008	10:04 AM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, March 12, 2008 10:04 AM To: 'Keeter, Deborah D.'; 'Robert Mallett' Cc: 'passiatorej@oocea.com' Subject: SR 429 - Wekiva Parkway PD&amp;E Study - Stanton Ridge fence</p> <p>Good morning, All,</p> <p>I got a call this morning from the HOA president of Countryside Heights off Lester Drive who understood we might be acquiring Stanton Ridge and was interested in purchasing the vinyl fence from that property. I informed him that any acquisition would be some time down the line, and also that typically the demolition contractors count on being able to sell or reuse such materials. But he requested that I ask if it might be possible for them to buy that fence at some point, or similar fence from other property to be acquired for the Wekiva Parkway.</p> <p>Please advise if the Authority has done anything similar in the past, or is in any way interested in such a proposition so that I may get back to this gentleman. Thanks.</p> <p>Mary Brooks</p>
3/12/2008	9:50 AM	<p>PIO talked to Bill Spiegel HOA president for Countryside Heights, off of Shopfke Lester and</p>

countryside drive, neighborhood in the process ... we have a scalloped wooden fence, community was built in 1989. We're looking to upgrade fence, don't know if you do recycling. We noticed Stanton ridge has 6 foot vinyl privacy fence and that you all were buying that. I know that's down the road. But would it be possible to get that fence? PIO noted typically the contractors bidding on demolition of properties count on being able to sell or reuse those materials, but will check with ROW folks to see if they've done anything like that before hand. PIO reiterated this project and any taking would be down the road, project not fully funded.

We have 700 feet, we're only a small neighborhood, thought it was worth asking. There's a lot of PVC fence out there, as well as wrought iron, think that would be more marketable

Doesn't have to be from that particular development; maybe some other property you're looking at. PIO said I'd check and would get back to him. He said he'd appreciate it. Email [apopkarvp@embarqmail.com](mailto:apopkarvp@embarqmail.com) <<mailto:apopkarvp@embarqmail.com>>

3/11/2008	2:20 PM	Bill Spiegel called and left MSG I know Jim martin through the rotary and I had a question about the Expressway Authority and the one of the 429 projects, and he gave me your name and number and said you might be able to answer it. If you could give me a call 407-925-4382 thank you very much

Hello Emma,  
We were looking at August for the public hearings, but now it's looking like that may get pushed back until September. There are very large documents that have to be reviewed by FDOT and FHWA prior to us being able to set and advertise the public hearings. We've been working through those documents, and as they're finalized they're being placed on the Expressway Authority web site at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx>> . Perhaps you've viewed some of those? Based on your request, we will add you to the project database to receive newsletters and other project information. We will be sending out a newsletter to everyone once the hearings are set, and also will post on the OOCEA web site.

Hello Julian,  
Just wanted to give you an update on the noise study copy that the Tall Trees HOA requested. The final draft was submitted yesterday to the Florida Department of Transportation for final review. As soon as we get clearance from FDOT (or any revisions needed), we will make the study available. Can't give you a timeframe for FDOT's review but hope it will be soon. Just FYI.

12/19/2008	3:59 PM	<p>From Michelle M. John Stevely, Apprasier Irwin, Stokes and Robertson 1515 W Smith St Orlando, FL 32804 (407) 426-7772</p> <p>Mr. Stevely inquired about the status of the PD&amp;E which I explained what the acronym stood for as he was not aware. He is looking at an appraisal for a property at the intersection of I-4 and 417 in the NW corner. I explained the process and that FDOT is waiting for approval from FHWA then public hearings would be scheduled then the study team would finalize a recommended preferred alignment that would then move into a design phase. However no funding had been yet identified for the design. FDOT and OOCEA working in that direction. He did not want to be added to mailing list as this is a inquiry for a one time appraisal. I encouraged him to continue visiting the website should he have further questions. Give me a call if you have any questions. MM</p>

Subject: RE: Wekiva Parkway (SR 429)  
Hello Mary,  
Apologies for the delay in getting back to you, but I was out most of last week. We are still shooting to finish the Wekiva Parkway PD&E Study in early 2009. From there the schedule is more tentative due to a lack of funding. The Expressway Authority currently has funding for final design, which it would like to start in say fall-late 2009, and some money for ROW acquisition. The Florida Department of Transportation does not have money programmed for final design of the Lake and Seminole County portions, but has some funds for ROW acquisition. Final design is expected to take two to three years, during which time at some point the right of way acquisition process would begin. The Authority, FDOT and other agencies are working on a financing plan and I hope to hear something on that by the end of the year. That information will help to firm up the schedule. As we are still in the study phase, there are no right of way maps at this time. All of the project preferred alignment alternative maps and other documents can be viewed on the OOCEA web site at <http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx> . I hope you find this information helpful. Please feel free to email or call with other questions or concerns.

Hello Mary,  
Thank you for returning my call. I am looking for any type of electronic file such as, CAD computer aided drawing), or ESRI shape file that is geo-referenced, which will allow me to

properly place it into my map of the Lake County East area. I appreciate your help.  
Sincerely,  
Pratima Strong

9/3/2008	3:10 PM	PIO returned call to Patima, left MSG to please email specific GIS request for Wekiva Parkway files so I can get with the guys and see what we have. If she has other questions give me a call back, left my email address.
9/3/2008	1:45 PM	Patima Strong MSG returned my call. Thank you so very much for calling me back and leaving that helpful information. I was able to get out on the website and look at the maps you had. I was wondering if you had anything in an electronic format that I can plug into my GIS without having to lay this map over top of my GIS which is very difficult to do without coordinates. This map isn't geo-referenced in any way. If you have CADD drawing or some type of drawing of the proposal I could put in my GIS layer that would really be helpful. If you would return my call at your earliest convenience 352-343-9739 x5727 thank you
9/3/2008	11:23 AM	PIO returned call to Patima Strong/LC GIS and left detailed MSG about finding the maps on the OOCEA web site. Noted she would want to look at both the Lake West and East maps. PIO also left my number and email address in case she needed to contact me further.
9/3/2008	11:02 AM	Patima Strong/LC GIS called and left a MSG Our growth management redevelopment dept is looking for me to put a map together with the proposed alignment for 429, guess it's called the Wekiva Parkway, if you have anything electronic you can send to me or even not electronic that I can look at and see if it's in Lake County, anywhere in Lake County. I would really appreciate it. 352-343-9739 X5727

gjohnson@seminolecountyfl.gov; gbrender@LakeMaryFL.com  
Subject:

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.

9/29/2008 1:51 PM

The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.

5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.

6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Finally, this has taken long enough of your time. A decision had been recommended by the experts. Now a few people come up who want to make changes. I attended the last meeting. There were a very few from the neighborhoods who wanted any alternative route. However, those of us who supported the preferred route were there en masse. This recommended route makes sense. Approve it and move on you have much too much on your plate to keep rehashing things that need not be revisited over and over. This issue is one that has been lingering much too long. For the sake of the County and the entire Region, if this road is going to get built approve it now. We need the employment can use the revenue stream.

Tony,  
"Is there any funds available for the second phase?"  
As noted, design of Phase II of the SR 414 - John Land Apopka Expressway was funded and is all but complete. ROW acquisition also is funded and has begun. Construction is not yet funded, as noted. Again, any additional funding found for the Wekiva Parkway would also include completing phase II of the John Land Apopka Expressway.  
"What is the current status of identifying the shortage of funding?"  
I'm not sure what you mean by this one. The agency stakeholders are working on a financing plan for the Wekiva Parkway and we hope to have something firm out of that group in a couple of months, which will make things much clearer regarding the schedule.  
"Is there still talks about raising tolls?"  
A toll increase is among the financing options being considered. OC Mayor and OOCEA Chairman Richard Crotty has said the only way he would raise tolls is if it's necessary to build the Wekiva Parkway. Beyond that, no decisions have been made.  
I'm afraid you want concrete answers when those are not yet available, but do stay tuned. At the latest, we expect to have a financing plan and firmer schedule by the Wekiva Parkway public hearings in July.

Subject: RE: SR 429 - Wekiva Parkway PD&E Study

Tony,

I got a message passed along today that you were interested in the following information:

1. What is really going on with the Wekiva Parkway Project Development and Environment Study?
2. Is phase 2 of the Maitland Blvd Extension is part of the Wekiva Parkway?
3. Are there any upcoming meetings on the Wekiva Parkway? Is there a mailing list to be notified of any such meetings? (I realize I did not answer this question in your email below)

Here is some information that I hope you will find helpful:

We are in the home stretch of the Wekiva Parkway PD&E Study, with all of the required documentation being finalized. Once this is finished, we will be posting much of it on the OOCEA Web site, where you can currently view the recommended preferred alignment alternatives. We are shooting for formal public hearings this summer, probably in July, and will be sending out a newsletter with those details once the hearings have been set. I will ensure you are in the project database so that you will receive that information. Following the public hearings, the preferred alternatives will have to undergo agency approvals. We anticipate the study will conclude at the end of this year. From there, the availability of funding will drive the schedule. The OOCEA has the funds allocated in the current five year plan to proceed directly to final design and to begin some right of way acquisition. However, at the current funding levels, the remainder of ROW acquisition and construction would have to be funded in the next five year plan. The Florida Department of Transportation, which is developing the Lake and Seminole portions of the 25-mile project, does not have money programmed for design, but some money for ROW acquisition.

A number of agencies are working together now on a financing plan in an attempt to be able to fund this project sooner rather than later, and we hope to have some information on that within the next couple of months, certainly by the summer public hearings. As for Phase II of the SR 414 - John Land Apopka Expressway, that is a separate project that also is not funded for construction in the current five year plan for the Expressway Authority. The OOCEA, however, has done the design for that, and has begun acquiring right of way. While this project is separate, it would have to be in place prior to the Wekiva Parkway in order to truly finish the beltway. It is generally contemplated that any additional funding found for the Wekiva Parkway would also include completing phase II of the John Land Apopka Expressway.

As noted, I will add you to the project database for Wekiva Parkway. I hope this addresses your questions. Please don't hesitate to call or email with other questions or concerns.

Subject: FW: Email List - Tony Tanico

Mary,  
This is the gentleman we just spoke about via phone. See the email below from Paul for Mr. Tanico's request to be added to the list for the studies. I called him to inquiry which study he was inquiring about he said specifically the SR 429 to US 27 Connector Concept Study and also the Wekiva Parkway. He apparently is a retail real estate broker and has clients interested in properties within the areas of these projects. I explained that I would pass his information on to the study team that performed the SR 419 to US 27 study in the event that the study moves forward into a PD&E so that he would receive updates. However for now, he should continue checking back to the OOCEA website for this particular information. Regarding the Wekiva Parkway study, I explained that I would pass his information on to you. He specifically would like to know "what is really going on" with the Wekiva Parkway Study and if phase 2 of the Maitland Blvd Extension is part of the Wekiva Parkway? He mentioned he has spoken to you previously. He also said he has spoken to Lennon Moore today. They apparently discussed the differences in a concept study and PD&E as well as who is managing these projects. Although he still seemed a little confused about which consultant is doing what. He said she had told him that Keith Jackson was over the Wekiva project. My impression is that he is looking for information and will be calling around to find out what he can which may actually confuse him further. Below is his contact information to update in your database. If you have any questions please let me know.

Carol Tanner/Realtor 407-290-6059 called and said she's been on web site for about an hour, trying to understand one area of future construction. PIO asked if she was on the Wekiva Parkway page? PIO talked her through getting to Wekiva Parkway maps and Seminole County alternative in particular. She said the property is Savannah Park, a planned development on International Parkway south of 46. She said she's looking at the 417 as it crosses I-4 and goes out to the Wekiva River. She said she's trying to understand the funding and timing on all of this. PIO noted the funding challenge, project not fully funded, FDOT has some money for ROW but not for final design the next step, might move some money around but not sure at this point. PIO noted several agencies working to come up with a financing plan, hope to have that by end of the year. PIO noted even once they have funding, still a couple years each for final design and ROW acquisition before construction. She asked if they had started buying any property yet? PIO said no, project just in study phase, need to get into final design and hard engineering before start buying property. She asked what did the "preferred alternative" mean? PIO noted that of all the alternatives we've looked at in the three years of the study, this one has the least impacts while most closely meeting the transportation needs. She said so as a commercial agent representing buildings that are not built yet I need to be very honest with prospective buyer about 'yes, the interchange is potentially going to come in, but that's a big "if," depending on funding, ROW acquisition, etc. so all I can honestly say is what map says this is the proposed best alternative at this time. When, we don't know. Have been hearing stuff, some people saying they're going to start the IC at 417 next year. PIO noted we won't finish the PD&E study until early 2009, so that is not happening. PIO noted maybe she's also hearing stuff about the interim project to connect SR 417 and International Parkway? PIO noted it's possible that could happen in a couple of years, if the Wekiva Parkway is pushed off a ways. She noted the connection could make the property more valuable. She asked how to find out about that? PIO said shoot me an email and I'll see what I can find out and get back to her. She said she would do. PIO asked if she wanted to be on the mailing list for the project? She said absolutely, would email her contact info.

Subject: SR 429 - Wekiva Parkway PD&E Study - public hearings  
Tracey,

I was informed at a meeting last night that the Wekiva Parkway public hearings are now slated for July. We will send out information on the hearings once the dates are finalized. Just FYI since we had spoken earlier in the day yesterday.  
Mary Brooks

1/15/2008 12:22 PM Tracey Tennyson/attorneys 813-920-5781 called and said we spoke a while ago and the public hearings were supposed to be in late Feb. or March, do you have dates yet? PIO said no, though I hope to find out soon. PIO noted she's on the mailing list and will receive the newsletter with the hearing info, and we also will post on the web site. She said also one of her clients said her neighbor was already purchased by the OOCEA in Orange County, have they really started ROW acquisition? PIO said no, don't have an approved alignment, though there are some very large parcels they're looking at for advance ROW acquisition. PIO noted I only knew of one of those so far, Stanton Ridge that they were negotiating with and they had come to us. She said that's what she thought. PIO said I'd need more details on the property in question to investigate further. She said okay and thanks.

1/2/2008 2:15 PM Tracey Tennyson 813-920-5781 called and asked when the Wekiva Parkway public hearings were that we're supposed to have this month? PIO said that schedule has been pushed back to February, possibly March. PIO noted there's lot of documentation we're required to have ready under federal guidelines to be able to set the hearings, so they're frantically trying to get that done. She asked if we were still planning to finish the study in summer? PIO said we're shooting for that, though may slip to fall. PIO noted we're working on a newsletter to send out once the hearings have been set, so she will get that. She said she was just checking in and thanks.

Notes			
Date	Time	Regarding	
9/24/2008	10:14 AM	PIO returned call to Mike Thomas/Sentinel, who asked what the legal interpretation was there at the EA about whether you had to buy the Pine Plantation property. PIO said I wouldn't be the one to talk to about that; Lindsay Hodges might have been briefed by attorneys on that. He said that's right, recalled speaking to her previously. He asked if we had started ROW acquisition of other properties for Wekiva Parkway? PIO noted no, still in study phase. Noted have to get into design and nail down some details before starting to buy properties. PIO noted we had been approached by some willing sellers like Stanton Ridge, but they wanted too much money. He asked where that was, was it on the alignment? PIO noted yes, on the OC portion. He asked if we had an approved route? PIO noted we have a preferred alignment alternative, route we believe it should go as a result of 3 years of study, but it's not approved, has to go to public hearing and then formal approval process. He said he tried finding it on web site but couldn't. PIO walked him through links to maps, OC map in particular. He noted Jim Palmer has several parcels along the alignment. PIO noted that was my understanding. PIO said would relay question about legal interpretation to Lindsay; was that all he needed? He said thinks so and thanks PIO asked deadline? He said story is for tomorrow.	

9/17/2008	4:27 PM	PIO returned call to Mike Thomas/Orlando Sentinel, who asked if we could build the road without the Palmer property? Did we have to get the legislation changed to go forward? PIO noted didn't know status of any renegotiation with Palmer, but I was heading to a meeting with Lindsay and she might be able to address some of those issues. PIO said I'd call him back in a few minutes.
-----------	---------	---

9/17/2008	2:48 PM	Mike Thomas/Orlando Sentinel called and left MSG I had a quick question on the Jim Palmer's property. 407-420-5779. Thanks.

Contact		Robert Thomson	Zellwood Station Club-Co-Op Inc.
Date	Time	Regarding	
11/20/2008	6:20 PM	PIO arrived at Zellwood Station HOA, set up boards, introduced Brian and Paul, went through presentations for both projects and took questions. Emphasis on SR	

414 was on the initial electronic tolling only opening in February. Brian and Paul handed out coupons; Brian estimated crowd at 60-70 people. Questions included noise concerns and sound walls, interchange locations, are we still looking at Ponkan Road? Distance from new roadway?

Members of the audience were appreciative of the information and seemed positive about the prospects for both projects.

Managing agent Karen McMican and HOA president Robert Thomson, as well as many members of the audience, thanked us for the presentation.

Robert Thomson asked for a large copy of the Wekiva Parkway Orange County map. PIO noted all the maps are on the web site and they can download them and have Kinko's or whomever make them whatever size they like. PIO noted that's usually fastest way to get what they want. I can put in a request for one ... he said that's okay, he 'd check with the residents in question and see what they really wanted. PIO said shoot me an email and we'll get them taken care of.

Hello Tom,

It was good speaking to you yesterday afternoon. As noted, I will be bringing exhibit boards and a PowerPoint presentation, so the use of your equipment would be appreciated. My colleagues and I also will be bringing E-PASS coupons for your residents in attendance, since when part of the SR 414 John Land Apopka Expressway initially opens in February it will be for E-PASS usage only. The cash lanes and rest of the roadway from US 441 to SR 429 will be complete by June.

Please let me know if you have any questions or require anything else from me. I look forward to seeing you all.

Mary Brooks

Subject: Presentation to Zellwood Station on November 20. 2008

Mary Brooks ,

Thank you for taking the time to give us an update on the 429 Extension and Maitland By Pass of Apopka. I would like to know whether you will be bringing your own equipment or wish us to provide it for you? We have the capability to project PowerPoint slides and a remote clicker. So if you are using PowerPoint, you only have to bring the file to use. Looking forward to seeing you again.

Tom Caldwell

Co-op Secretary

11/10/2008 4:40 PM

PIO returned call to Robert Thomson/Zellwood Station HOA want update on 429 and Maitland Blvd. PIO asked and he said they expect 100-150 people. Have equipment for PowerPoint. Also have mikes. He said they're doing a reorganization, so while they're counting ballots you'll give the presentation. He asked how long I needed? I said to give update on both projects, 30 minutes plus Q&A time. He provided directions to the golf country clubhouse. He said he was very glad that I called back and that I can make the

meeting.

11/7/2008	10:56 AM	Mr. Thomson called wanting to speak to Mary. PIO DL noted Mary was on vacation. He said they are having a meeting Nov. 20th at 6:30 and wanted Mary to do a presentation and give an update on the presentation she gave last year. PIO said I would make sure Mary got back to him. He thanked me.

Mary,  
I am with the SJRWMD and I am looking to get a shapefile or file's of the wekiva parkway boundary. Do you have an overall shapefile of the parkway preferred alternative yet. Please e-mail me or give me a call and I will be happy to answer any questions. I am making maps for the District and the boundary would be very appreciated.  
atomlins@sjrwmd.com <mailto:atomlins@sjrwmd.com> or 386-312-2314. In the past you all have sent me cad files and that is acceptable as well. Thanks for your cooperation in this matter.  
Thanks,  
April Tomlinson

Date	Time	Regarding	
9/12/2008	2:04 PM	Alyssa Torres/OC Planning 407-836-0924 called and asked if the public hearings had been set for Wekiva Parkway? She said they had a meeting yesterday with several staff members and some questions came up. PIO noted we had hoped for mid-October, but still waiting for some final info from FHWA. PIO said at this point it would be late October or November. PIO noted we're in a holding pattern. She asked when would the OCEA board take action on having the OC interchange at Kelly Park Road, and any other entities that would have to weigh in on that? PIO noted that occurred quite some time ago, noted OC and City of Apopka also have weighed in on that, think the city was Feb. '07 if I recall. She said she had some info on when it came before the OC Commission, but didn't know if that was something that could change after the public hearings. PIO noted the PD&E process has resulted in a preferred alternative that we are moving forward with, barring some overwhelming consensus to the contrary from the public or agencies, though we've been coordinating with them all along. She said okay, there were attorneys and others at the meeting yesterday and she was chosen out of the meeting to try to get answers to the questions.

9/29/2008	11:58 AM	<p>Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the___ middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only___ reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street"._ In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.</p>

Contact Jon Trout All Souls Catholic Church  
 Notes

Date Time Regarding  
 11/14/2008 11:55 AM Jon Trout/All Souls Catholic Church 407-322-3795 returned my call. PIO explained WPCC  
 alternative vs. preferred alternative and that we wanted to be sure they knew about it and  
 meeting. He said they plan to build a school next to the church (church offices still at old  
 property). He asked likelihood of it going through, how does it compare? PIO noted  
 impacts and preferred actually completes beltway more directly, less expensive and gets  
 people where they want to go. WPCC alternative is two miles longer and more expensive  
 and affects a lot of people outside the original study area. He asked for location of county  
 services building, which I provided him. He said they plan to attend. PIO noted I have a  
 disk of the info that I can bring to him. Directions to church office: i-4 east on 46, right on  
 17-92, offices haven't moved to the new church, right on 17-92 and left on 8th street, 3  
 block in is church office. cream color brown trim. 301 w. 8th St. there until 4 p.m., after  
 that hour go up stairs and can leave on a table (he lives up there)

11/14/2008 11:06 AM PIO called Jon Trout/All Souls 407-322-3795, spoke to Betty who said Jon was out. PIO  
 gave brief info about WPCC alignment affecting them and others and about Nov. 18 SCEA

Board meeting. She said she would let him know and have him call me.  
PIO also talked to Vicki Fordham/ pastor's secretary said Jon would be the best one, is the pastor's brother.

11/10/2008 12:58 PM PIO called All Souls Catholic Church 407-322-7003, left detailed MSG noting I was following up email on the SCEA Board meeting, planned discussions on WPCC alternative and impacts to port and other community stakeholders. Also let him know I have the material with maps, etc., that I'd like to get to him before the meeting. Asked him to call or email me back.

Cc: Deana Leffler  
Subject: SR 429 - Wekiva Parkway PD&E Study - Important Meeting Notice  
Dear Community Stakeholder: The Florida Department of Transportation (FDOT), which has been conducting the Wekiva Parkway Project Development and Environment (PD&E) Study in Lake and Seminole Counties, wishes to notify you of important information that is scheduled to be discussed at the Seminole County Expressway Authority (SCEA) Board meeting on Tuesday, Nov. 18 at 4 p.m. The meeting will be held at the Seminole County Services Building, Room 1028, 1101 East First Street, Sanford, FL 32711. A community-based group, the Wekiva Parkway Community Coalition (WPCC), has proposed an alternative alignment for the Wekiva Parkway in Seminole County that would potentially affect you and other community stakeholders in your area. The SCEA Board asked the FDOT to review and evaluate this suggested alignment, referred to as "WPCC Alternative G." The FDOT has completed the evaluation of this proposed alternative, and will be discussing the findings at the Nov. 18 SCEA Board meeting. We would be happy to provide a summary of this information to you in advance. Please contact me at your earliest convenience so I can arrange to get either a hard copy or electronic files on disk to you. Please feel free to contact me with any questions or for further information.

To: Mary Brooks  
Subject: RE: S.R. 46/S.R. 46A Area  
Mary:  
Thanks for the SR 46/SR 46A information.  
A couple of friends & myself bought a small 3+ acre site on the north side of SR 46 between 437 coming in from the south & where 437 goes north. Almost downtown Sorrento. I talked with Ross Pulta's office yesterday trying to find the date & a copy of the newest PD & E that is being done for traffic along SR 46. I was told that FDOT was doing the work & to contact your office.  
Any ideas and/or help?  
I really do appreciate all you do. I know you must be buried with work with this mess.  
Thanks again.  
Michael L. Tubbs  
407.461.2011

mikeltubbs@yahoo.com <mailto:mikeltubbs@yahoo.com>

1/31/2008 12:02 PM PIO called Michael Tubbs to get a better understanding of his question. PIO noted the study is ongoing and documents being finalized, that will have them available prior to public hearings in July. He said someone had told him the study would be done in a couple of weeks? PIO noted no, after hearings, still have to make any revisions and go through agency approvals and we hope study to conclude by end of the year. PIO asked if he'd seen maps on the web site? He said yes. He said a family owns that property, each of them have 5 acre tracts and trying to decide what to do. He said there was another interchange we were looking at one point but that's gone? PIO noted correct, one alternative had 3 local access interchanges in that area, but now we have two. He noted he'd spoken with someone from CH2m Hill a while back. They're also working to help Sorrento redevelop their downtown, want it to be something like Winter Park. He was thankful for the call and said the info helped. PIO said call or email with any more questions.

1/30/2008 12:44 PM From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com]  
Sent: Wednesday, January 30, 2008 12:44 PM  
To: 'michael tubbs'  
Subject: RE: S.R. 46/S.R. 46A Area  
Michael,  
I researched the location of the aforementioned parcel and according to the Lake County Property Appraiser's web site it is located north of SR 46, south of CR 46A and east of Old McDonald Road. The Lake County East Preferred Alternative for the Wekiva Parkway in this area would run south of SR 46, so there would be no direct impact to the property. The remnant of SR 46 in this area would be left in place to provide access to local properties, as well as to ramps to get onto the parkway. Although we are abandoning a portion of CR 46A farther north in the Seminole State Forest, the portion of the roadway closest to the property in question also will remain to provide local access.  
  
I hope this addresses your questions. Please feel free to call or email with other questions or concerns. Mary Brooks

Alternative Analysis  
Importance: High  
Greetings All,  
Attached please find the latest schedule for SCEA Board meetings on the WPCC Alternative  
Analysis, including known attendees.  
I'm still waiting for Comm. Brender to return from out of state (on Oct. 8) to confirm his  
Oct. 13 meeting at 8 a.m.  
Comm. Van Der Weide is leaving town Oct. 15, but his aide is checking whether he might  
be available after the SC BCC meeting on Oct. 14, say 4 p.m. or shortly thereafter,  
depending on the proceedings.  
Please advise if Oct. 14 at 4 p.m. or the end of the BCC meeting (which starts at 130 p.m.  
would work for each of you to meet with Comm. Van Der Weide. (Brian, I believe you  
said you're available?)  
Otherwise he leaves town Oct. 15-Nov. 3, and we're trying to get his meeting in before we  
meet with the WPCC on Oct. 27.  
I look forward to hearing from each of you.  
Mary Brooks

10/7/2008 10:27 AM PIO called back Diane/Comm. Van Der Weide's office. she said he's leaving Oct. 15-Nov. 3  
PIO noted we need to update him before meeting with the coalition Oct. 27. PIO noted  
9th doesn't work, neither does Oct. 14 in morning, but what about after the BCC meeting?  
Shesiad just depends on how long they take, starts at 130 but could go until 5, or just a  
couple of hours. PIO said can she check if he would meeting at 4 p.m. that day or  
immediately following the meeting? She's going to check and PIO checking with team also.

10/7/2008 9:31 AM Diane Eswine/Comm. Van Der Weide give me a call, don't see any other availability Thurs 230 or before board meeting at 830 a.m. 14th

Brian,  
Comm. Van Der Weide is leaving town on Oct. 15 so his window of availability is quickly shrinking. Is there anyone else from the Department that could do the 9th? I know George is out that week and I think Noranne may have a conflict. Please advise - thanks.

Subject: Comm. Van Der Weide WPCC update  
Commissioner Van Der Weide's aide said he could be available Oct. 14 at 9 a.m., but the BCC meeting starts at 930 a.m. that morning (I believe George also is a 'no' for that date). Commissioner Van Der Weide was also available Oct. 9 between 1-230 p.m., but George is out that week. Do you think Noranne could do the Oct. 9 date? Please advise.

Diane,  
Got your voicemail but have to dash off to a meeting. We've been scheduling these meetings for an hour, but let me check on Oct. 14 at 9 a.m. If it works for folks, maybe we can squeeze it in.  
Just in case, is there another date or time this month that's a possibility?  
Mary Brooks

Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC update to SCEA Board members  
Importance: High  
Well, it's not pretty, but attached is the updated calendar with who is available when. Looks like we can confirm Commissioner Gary Brender for 8 a.m. Oct. 13 (will confirm that still works for him) and Commissioner Dallari for any time 1-3 p.m. on Oct. 16. George is out the week of Oct. 6, and other than that I can't connect him and Mark to the same meeting. We could maybe do Commissioner Woodruff on Oct. 15 at 330 p.m. if Dave could stand in for Mark? Brian, don't know your availability for that day?

That still leaves Commissioners Carey, Henley and Van Der Weide with no dates where George, Mark and Brian could make it. Please advise at your earliest convenience. Thank you.  
And yes, I'm waiting for some dates and times from the WPCC that we also need to work into this schedule, just FYI.  
Mary Brooks

Dear Commissioner Van Der Weide,  
The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with each of the SCEA Board members to discuss our latest findings regarding the alignment alternative suggested by the WPCC. We would like to set up a meeting with each of you at your earliest convenience, and certainly prior to the Board's regularly scheduled public meeting in November.  
Please provide several dates and timeframes that you would be available to meet with us. We greatly look forward to updating you on the alternative evaluation and to getting your further input.  
I look forward to hearing from you at your earliest convenience.  
Mary Brooks

Contact	Andrew VanGaale	Seminole County Port Authority
Notes		
Date	Time	Regarding
11/11/2008	2:10 PM	PIO met with Andrew VanGaale/SC Port Authority, and gave brief synopsis of what was on disk. He asked if this was likely to move forward? PIO noted issues with the coalition alignment. He said they are an industrial complex, so would be a lot more expensive than buying some houses, and they also have expansion plans. He noted they also contribute \$1 million a year in tax revenue. PIO noted SC had mentioned that as a major concern. He noted he knew the project was not fully funded. PIO noted the expressway Authority and FDOT are working diligently on a financing plan and that the project will move forward. He thanked me for the info and said he plans to attend the meeting.

Subject: SR 429 - Wekiva Parkway PD&E Study - WPCC alignment on disk  
Andrew, I'm heading your way with the disk as discussed, probably get to you about 215-230 p.m. Please call me when you get this so I can get directions to your office.  
Thanks.  
Mary Brooks

11/10/2008 1:49 PM Andrew VanGaale/Port Authority returned my call, said he has the meeting on his calendar and plans to attend. He said he does want to see the maps, can I PDF them to him? PIO noted they're too large to email but I'm having some disks made and as soon as they're ready, I'll contact him to arrange delivery, have to deliver some to others in that area. He asked where was this coming from, not from an environmental group? PIO said no, a group of communities south of SR 46, Sylvan Lake Reserve, Tall Trees, etc. he said okay, so they're trying to push it north? PIO said that's correct. He said he looks forward to getting the info.

11/10/2008 12:53 PM PIO called Andrew VanGaale/Port 407-322-4798, receptionist said he was out until 130 p m. or so. PIO left detailed voicemail noting I was following up email on the SCEA Board meeting, planned discussions on WPCC alternative and impacts to port and other community stakeholders. Also let him know I have the material with maps, etc., that I'd like to get to him before the meeting. Asked him to call or email me back.

Subject: Wekiva Parkway Comment Form Submission

Please find attached my comments regarding the proposed Wekiva Parkway.

5/5/2008	4:34 PM	To the Members of the Seminole County Expressway Authority: Let this document convey our opposition to the preferred and proposed alignment of the SR 417/Wekiva Parkway to be presented to the Authority on May 6, 2008 by the CH2MHill Company. We acknowledge the Authority's interest in finding a viable solution to the completion of SR 417, but at the same time we believe that this plan is not the best alternative to approve. Just the high cost involved in implementing such a proposal is enough to justify a negative response. In turn, we encourage the Authority members to continue the search for other choices that do not affect the present environment, quality of life and appeal of the Wekiva River Basin area and to preserve it for the future generations the way we currently enjoy it . Thank you in advance, Rafael J & Edda C Velázquez

Date	Time	Regarding	
11/14/2008	11:22 AM	Tom Vellanti/12 Oaks RV Resort 305-951-3665 called asking if there was a hearing on Tuesday? PIO noted SCEA Board meeting is Tuesday at 4 p.m.	
5/16/2008	2:29 PM	From: Brinson, Sheralyn [mailto:SBrinson@seminolecountyfl.gov] Sent: Friday, May 16, 2008 2:29 PM To: Mary Brooks; Mark.Callahan@CH2M.com Cc: Johnson, Gary Subject: May 6, 2008 SCEA Meeting - Citizen Input Info Attached Good afternoon: Attached is the citizen input information we received at the May 6, 2008, SCEA meeting. ...Sheralyn Sheralyn J. Brinson, Administrative Assistant	
4/30/2008	5:20 PM	Sid Bennett /Twelve Oaks RV Resort left MSG I got a call from Bob Watson and he invited me to the meeting tonight. So I can meet you at the meeting tonight and you can give me the maps then. It's 517 (p.m.) so I haven't given you much notice so if you're on the way I will just see you at the meeting. My cell is 321-578-2239.	
4/29/2008	4:39 PM	From: David.Lewis2@CH2M.com [mailto:David.Lewis2@CH2M.com] Sent: Tuesday, April 29, 2008 4:39 PM To: mbrookssr417@cfl.rr.com Cc: mark.callahan@ch2m.com Subject: WP - 12 Oaks RV Resort Re: you voice message earlier -- I spoke with Sid Bennett, Mgr. of 12 Oaks. We have plotted what he wants; he is going to pick it up.	
4/29/2008	2:23 PM	Sid Bennett 407-302-5686 called and said he downloaded the map and took it to Kinko's but it came out so pixilated it was useless. He said this can't be the maps that the engineers use, how can he get those? PIO noted sorry he had an issue but that's how I get my large maps, downloading those same files, taking them to Kinko's and have never had a problem. He argued those can't be the maps the engineers use. PIO noted those maps came directly from the engineers conducting the study, they are high resolution and I hadn't heard anyone having problems with them before. He became very frustrated and	

argumentative, so I said I could see if I had the map he was looking for and would give him my copy. He said where can he meet me now? PIO noted I'm out of the office and on another project, but when I get back to the office I can see what I have. PIO said if I don't have what he needs, I can see what I can get made and take it to him at 6 p.m. Wed. when I have to be in his area for another meeting with an HOA.

4/29/2008	2:22 PM	He continued to be frustrated and argumentative and intimidated that we were trying to stop him from getting what he needed. PIO reiterated offer to bring map to him tomorrow at 6 p.m. one way or the other. He asked how the engineers were? PIO noted Ch2m Hill is doing the study. he said he would just call them. PIO noted that's his right to do so, but we have a process in place where I try to handle as much of the public requests as possible so the engineers can focus on actually finishing the study. he said he wants the map today. PIO said even if he called Ch2m Hill it's unlikely he could get it today as they're swamped with study activities. PIO also asked if he got the map that I emailed him? He said he hadn't checked his email. PIO reiterated one way or the other I would get him the map he needed and bring it to him tomorrow at 6 p.m. he seemed agreeable to that.
4/29/2008	12:04 PM	Sid Bennett/Twelve Oaks RV Resort said he couldn't find the web site. PIO reiterated the web address, noted no space between the words. He said he keeps coming up with the SCEA. PIO noted he didn't have to do a search, just put the address in the top address window, spelled it out for him. He tried it a couple of more times and got to the OOCEA site. PIO walked him through the rest of the links to the SC map. He said oh, so it's the OC Expressway Authority? I thought it was the SC Expressway Authority? PIO noted SCEA has to approve any alignment within SC but they are not developing this project. He said oh, he understood. He found the maps: so this is what I have to download to get reproduced? PIO said that's correct. He said okay and thanks for the assistance.
4/29/2008	10:03 AM	<p>From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, April 29, 2008 10:03 AM To: 'Sid Bennett' Cc: 'Deana Leffler' Subject: SR 429 - Wekiva Parkway PD&amp;E Study - Seminole County Alternative</p> <p>Sid, It was good speaking with you. Attached please find the Seminole County Preferred Alternative for the State Road 429 - Wekiva Parkway PD&amp;E Study. As we discussed, most people have found it quickest to download these files from the web site (<a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx</a> &lt;/exchweb/bin/redirect.asp?URL=<a href="http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx">http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx</a>&gt;) and take them to a reproduction place such as Kinko's or Office Max to get whatever sized large scale map you want. That's what I do also when needed. As the attachment is a large file and some folks' servers can't handle it, please confirm that you received this.</p> <p>Thanks and I hope this helps. Mary Brooks</p>
4/29/2008	9:51 AM	Sid Bennett/12 Oaks RV Resort 407-302-5686 called and said the owner Tom Vellanti was looking for a large map of the new road from I-4, is there a way I can get one of those or get one made somehow? PIO said most people just download the web site and take the file on disk to Kinko's or Office Max or some place like that to get whatever size they want. He said Kinko's will do that? And it comes out clear so you can read it? PIO said yes, that's what I do when I need a big map made. He asked what web site the maps were on? PIO noted the expressway Authority Web site and offered to walk him through finding the link

on his computer. He said he wasn't at the computer, but you say it's on the Expressway Authority web site? PIO said that's correct. PIO said I can try to email it to you but it's a large file. PIO confirmed his email address. PIO noted it's a large file so if he doesn't get it in 10 minutes or so to let me know. He said he has DSL so it should be okay and thanks.

		As a resident of Sylvan Lake Reserve, I am extremely concerned that the projected path of the Wekiva Parkway will disrupt environmentally sensitive areas and destroy the natural beauty and quietude of the Wekiva River Basin.	
		We purchased our home because of the beautiful neighborhood and surrounding area and I hope that the Parkway project does not destroy that. I believe the projected path of the Parkway will negatively impact our property values.	
		Homeowners will experience increase traffic and congestion, air pollution, loss of property values, and noise from construction.	
		Please count me among the many that oppose the "Recommended Preferred Alternative RPA)" route .

Date	Time	Regarding
1/30/2008	1:20 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Wednesday, January 30, 2008 1:02 PM To: 'rwwjent@comcast.net' Cc: 'dleffler@qca-inc.com' Subject: SR 429 - Wekiva Parkway PD&E Study - Update Bob, It was a pleasure speaking with you earlier. As discussed, we are in the Project Development and Environment (PD&E) Study for the Wekiva Parkway, and anticipate now having formal public hearings in July 2008. We expect the study to finish following agency approvals in the latter part of this year. The Orange County portion is being done by the Orlando-Orange County Expressway Authority and the Lake and Seminole County portion by the Florida Department of Transportation, although OOCEA is hosting all of the project info on its web site <a href="http://www.expresswayauthority.com">www.expresswayauthority.com</a> < <a href="http://www.expresswayauthority.com">http://www.expresswayauthority.com</a> >. You can also see the recommended Preferred Alignment Alternatives on this site. As discussed this project is not fully funded, so the timeline will be heavily dependent funding availability. The OOCEA has in its current 5-year work plan the funding for final design and some right of way acquisition for the OC portion of the project. The FDOT has no money programmed for design, but some for ROW acquisition in Lake County in its

5-year plan.

Also as mentioned, a working group of core agencies led by OC Mayor and OOCEA Chairman Richard Crotty is working on a plan to be able to fund and build the Wekiva Parkway sooner rather than later. Please stay tuned, and feel free to call or email with other questions or concerns. If you will provide your mailing address I will make sure you're on the list for project newsletters and meeting notices.  
Mary Brooks

1/30/2008	10:44 AM	PIO returned call to Bob Walker 352-516-9873, who said he represent developers and builders in Sorrento and wanted to know the latest as to when the extension was going to be done in Apopka and Sorrento. He said the last time I went to a meeting they were talking about 2011-2012. PIO noted we're just in the PD&E stage; next milestone will be public hearings in July and study finishing latter part of this year. PIO asked if he was aware the recommended preferred alternatives were on the OOCEA web site? He said no, but he would check those out. He said he wasn't sure who was doing the road. PIO noted OOCEA in OC, FDOT in Lake and Seminole, though OOCEA hosting all of the project info on its site. He asked were we still looking at 2011? PIO said the schedule is heavily dependent on funding as this project is not fully funded. Went over existing funding for both agencies, related timeframe. He said so what you're saying in a round about way is it could be 2020 before this is built? PIO noted even if we had the funding today, which we don't, it's have to be built in sections because it's a 25-mile corridor. PIO noted OC section would likely progress first, but construction not funded in OOCEA five year plan. PIO to email him my contact info so he can reach me directly at rwwjent@comcast.net <mailto:rwwjent@comcast.net> .

9/9/2008	2:12 PM	PIO returned call to Rick Watkins/Gray Robinson 407-843-8880, left MSG that we still haven't gotten dates for Wekiva Parkway public hearings. Noted we were looking at mid-October but still waiting for approvals from FHWA and other agencies. Looking now at late October or November. Noted would send something out once dates were firm.	
9/9/2008	12:35 PM	Rick Watkins/Gray Robinson called and left MSG, I was wondering if you can give me the inside scoop on the Wekiva Parkway meetings, if you have any.. I know we've changed to late fall. I know if you had those dates you'd be sending them out to us, but I thought I'd give you a personal call and see if you could give me something... 'think it's going to be in November, or not...' 407-418-6586 direct line. Anything you could throw my way would be greatly appreciated and I'll see you at the meeting. Take care have a good day.

Subject: WPCC  
Dear Mark: This email is in follow up to our discussion subsequent to the SCEA meeting last Tuesday. You have agreed to send the WPCC several cuts of the "Parkway" showing the view at ground level as it passes thru our community. Two Commissioners have asked you to provide this as well, namely Gary Brender and Bob Dallari. In your presentation that day one of the depictions you shared of the "Parkway" was that of a four lane Parkway rendering with much green grassy area. This rendering was subsequently referred to during the meeting by Commissioner Carey as representative of the "Parkway" look.

5/13/2008 11:53 AM My view of the road schematics starting from the time that it turns south east off of Route 46 toward I-4 and through to I-4 reveals that this is in fact six plus lanes. (I see no 4 Lanes in this area) Additionally my view of what I have been shown references elevations in the 25-30 feet range. Is that correct? If so it is this elevation it would be of great concern to the communities. Will we have the grassy buffer depicted in the referred to rendering? We want to know the character of the road that we might expect passing through our neighborhoods if the SCEA were to approve this routing. Please show us the "Parkway" character that is called for in the task force recommendation 3. Your early response is appreciated. In His Love  
Bob

Hello Dana,  
Neighborhood Lakes and New Garden Coal, now known as the Wekiva Mitigation Bank,

already have been acquired as per the 2004 Wekiva Parkway & Protection Act.  
The owner of Seminole Woods has rejected discussions about acquisition for conservation.  
The Expressway Authority is in discussions now with owners of the portion of Pine Plantations that would be needed for the roadway only, not the entire parcel. The Pine Plantations parcel is the last one actually required for the Wekiva Parkway project; we would not impact Seminole Woods with this project as currently proposed.  
I hope that helps. Please feel free to email or call with any other questions.

5/6/2008	10:10 AM	<p>It is difficult for me to understand how you can accept the recommendation of the "preferred alternative route". This seems to be the one that is the most disruptive to a large area of homeowners, schools, churches, community businesses. On the one hand, you are building communities and trying to promote a "Natural Choice" access to our businesses, schools, churches, etc by giving us sidewalks and trails. Now, you want to take that away from us and bring us noise pollution, esthetic pollution, and safety concerns especially for our children. It just does not make sense to me. Please re-evaluate your decision, re-consider one of the other routes or draw up a new one. We love our community, that is why we live here. Please do not turn our community into a "Concrete Jungle".</p>

Transportation Monthly</p> <p>Hello Cindy,</p> <p>It was good speaking with you just now. As discussed, we are doing a story for Fla. Transportation Monthly magazine's "green" October issue on the Wekiva Parkway. The story includes information on the various committees formed in 2003-04, their</p>

recommendations and the 2004 Wekiva Parkway & Protection Act, the conservation parcel acquisitions, extensive wildlife bridging, limited number of local access interchanges, etc. We were looking for a quote from Sen. Webster since I understand he was instrumental in helping to pass the Act on his thoughts about the unique "green" aspects of this project, or any other insights about the uniqueness of the planning process to get to this point with regard to protecting the environment. Any insights he has about the Wekiva River Basin and what this unique project will mean with regard to protecting it would be much appreciated.

Unfortunately the magazine gave us a very tight deadline, so I would need his comment today, maybe by 3 or 4 p.m.? I'm sorry for the short notice but greatly appreciate any insights he would care to share with us. Thanks for your assistance on this.

Mary Brooks

9/24/2008	10:39 AM	PIO called Sen. Daniel Webster's office, spoke to Cindy Brown about needing quote for mag story, got her email and told her I'd email specifics. She said he's not in the office right now, did I want him to call me or ... PIO said that, or if it's easier for him to just email a statement, that's fine too. She said that would be better and she would get with him on it. PIO said I'd send the email right now.
9/23/2008	5:14 PM	PIO called Abigail/Sen. Constantine's office. She said she received the email and is printing it as we speak.
9/23/2008	5:10 PM	PIO called Sen. Constantine's office to run over his quote with him. Abigail said he was in a meeting. PIO asked if I could email to her? She said yes and she would get it to her.
9/23/2008	11:24 AM	PIO called Cindy/Sen. Webster's office to make sure she saw email. Ann said she was out for a few hours. PIO noted she was helping me get a quote from senator today for a story, asked if I could forward to her to be sure Cindy received? She said that's fine, Cindy's gone to his business office. She gave me her email address, drawdy.ann.s09@flsenate.gov and she would make sure Cindy was following up.

Date	Time	Regarding	
12/19/2008	4:06 PM	Hey - I got a letter from Judy Wilhelm with the Sanford Women's Club. Here is what she wrote:	
		Dear Mr. Hutchings	

Thank you for agreeing to make a 20 minute presentation at the Women's Club of Saford on Wednesday, January 7, 2009. Please arrive at 11:00 a.m. We first have a general meeting and you will speak following our meeting. Please join us for lunch after your presentation about the Wekiva Greenway Project in Seminole County.

When you arrive, there will be a parking place directly in front of our building reserved for you. We are located at 309 South Oak Avenue, Sanford, FL 32771. To get to the Women's Club from Orlando, take I-4 east and get off at Rt. 46. Turn right on Rt. 46 and go into downtown Sanford and make a right on Oak Avenue. We are three blocks down on the left  
I know mapquest can help you.

If you have any further questions, please contact me on my cell at 407-375-6580.

Sincerely,  
Judy Wilhelm  
3rd Vice President

I spoke to her and she is aware that you are going to come along. She has requested that we email her a bio for each of us for introductions. If you email me yours, I will include it with mine and will pass it on to her.

Have a great weekend!  
Brian

Thanks for the quick response, Bill. I appreciate you taking the time to go into the details. I still might consider having (paying for) someone to come out and re-measure the sound level. I would need to coordinate with my HOA to do this. Please send me any information you have on someone that I could use for this purpose. One last question - how often through this process is the noise level re-assessed? Thanks again - no need for a

conference call at this point. Bill

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
Bill:  
Thank you for your response. I think that rather than try to explain things through emails, we could handle this quicker and facilitate greater understanding through a conference call  
I will likely ask our consultants who prepared the Noise Study Report to sit in.  
I ask everyone to check your calendars so that we can find a good time over the next two weeks.  
Here are some answers to some of the questions you raise in your email to get us started:  
· At 1/3 to 1/2 mile from I-4 there is absolutely nothing that can be done to mitigate for noise coming from this road. The presence of absence of trees makes no significant difference. Noise abatement walls are normally effective for homes that are up to about 150 - 200 feet from the wall. At 2000 - 2400 feet distance, noise levels are not high enough to warrant consideration of a noise wall and even if a wall were built it would have absolutely no effect on noise levels from I-4 on Tall Trees Subdivision.  
· Traffic noise levels of 66 decibels during peak hour traffic levels at a noise sensitive site including homes) would cause an area to be considered for a noise abatement wall. If the cost criterion is exceeded or the wall simply would not do anything to significantly reduce the noise levels, the area would cease to be considered.

5/5/2008 12:50 PM Inputs to the Traffic Noise Model are worst case scenario. We use what we call Level of Service (LOS) C Traffic. This is the greatest traffic volume traveling at the highest speed.  
· Vegetation is very ineffective at reducing noise levels. The buildings that will replace the trees will likely interfere with noise transmission more than the trees. But again, at this distance there is no significant effect.  
· The model considers the elevation of the roadway at Wilson Road.  
· No vegetative buffers were used in the modeling. This again assumes worst-case conditions. This model did not consider any tree stands (assumed that there were none there) so that any removal of trees will not affect the results.  
· The modeling of future noise levels at Tall Trees did not consider noise from aircraft. If it did, this would have further decreased the likelihood that this area would qualify for a noise wall. One of the key criteria used to justify the construction of a noise wall is the degree to which the wall would be effective. This asks the question "What difference will the presence of a wall make?". Since a wall could do nothing about aircraft noise, the effectiveness of the wall (difference that it could make) would be reduced since the aircraft noise would remain, unabated. This would not only pertain to aircraft noise, but also to noise from other sources such as Industrial Parkway or Wilson Road.  
If this answers all of your questions, please let me know. Otherwise we will be happy to speak with you.  
Again, thank you for your correspondence and for the chance to respond to your concerns.  
Sincerely,  
Bill Walsh.

Sent: Friday, May 02, 2008 9:43 AM  
To: Walsh, William

Cc: Stanger, Brian; Mary Brooks  
Subject: RE: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
Hi Bill - thanks for your response.

There are a number of concerns that I still have:

1. When the measurements were done previously, the adjacent lot to Tall Trees (between Tall Trees and I-4) was still a lushly wooded forest. Now that has been completely razed and is slowly being replaced by much needed condos and a strip mall. The noise level from I-4 has noticeably climbed. Trees provide great noise abatement.
2. If I understand your e-mail correctly, traffic decibels of 66 or above are considered high enough to require a noise abatement wall. Also, it sounds like it's an average of 66/per hour which I assume includes the times such as from 10pm to 4am when I-4 has little traffic. If that is the case, then it seems like an inaccurate measurement of noise impact. Please correct my understanding if I'm wrong. I hope the study only includes times that people are actually up and about, and when I-4 actually has marked traffic. I would actually submit that peak dBA's should be used because if the dbA's peek at 75 during rush hour, making it painful to be outside, that would be a significant impact on quality of living, despite only occurring for a portion of the day.
3. According to the study done near Tall Trees, the measured ambient noise level was 54 3 dBA and this is projected to increase to 62.7 dbA with the addition of the expressway. As noted in point #1, the landscape has changed since the measurement, and it will continue to change. Secondly, the expressway will be in very close proximity to Tall Trees. I'm assuming the model takes this into consideration, along with using some of the projected traffic levels for the expressway and the fact that the expressway will be elevated over Wilson Road (near the tops of the trees) allowing for more noise penetration? Traffic on SR 46 will increase as well as more stores and developments are created. While a wall between Tall Trees and SR 46 would not be required, do the measurements include projected growth in traffic on SR 46 as well? I would think that an aggregate growth in traffic should be calculated on all roads that could create ambient noise. And if that total is > 66, then a wall between I-4 and Tall Trees would at least reduce the I-4 road noise so that the overall noise level is < 66. Does that make sense?

5/2/2008 9:42 AM

While not related to the expressway construction, our neighborhood seems to also be directly under an airport approach path. Large airliners, often 747's, fly directly over Tall Trees, rattling the windows of our homes. I've been in my pool as one flies over and you literally have to shout in order to be heard. Adding the expressway to the noise level from the jets will absolutely exceed 66 dbA's. Is that considered as part of the "noise equation"? I would like the names of some consultants that I can commission to re-measure the noise levels. I'm sure you'll agree that it's in the communities best interest to make sure the environment is kept livable despite the rapid growth we are experiencing. I'm particularly disheartened that a neighborhood like Tall Trees, which is unique because it has newer homes, larger lots, and is covered with many large oak trees, is being picked apart by growth.

Thanks for you help with this. Sorry for the long e-mail.

Subject: FW: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
Dear Mr. Wills:  
Thank you for contacting Mary Brooks with your questions regarding noise levels from I-4

and the proposed Wekiva Parkway project. Traffic noise is an important aspect of both existing and proposed transportation facilities in Florida. The homes at the east end of the Tall Trees Subdivision are the closest homes to I-4 (Still Forest Terrace). These homes are approximately 2000-2400 feet from the edge of the nearest travel lane of I-4. Traffic Noise Impacts are considered to occur (Federal Highway Administration and FDOT regulations) at 66 decibels (average noise level at peak hour). At that distance from I-4, traffic noise from I-4 would be audible, but less than 60 decibels. The peak noise levels recorded during any measurement period would be caused by activities within the neighborhood or from local streets like International Parkway and Wilson Road. Traffic noise is clearly audible at levels below 66 decibels and will tend to dominate the noise environment down to about 55 decibels. Some people are bothered by levels as low as 55-60 decibels and some are not. Any field measurements would confirm the estimates from above. Should you wish to measure these levels for yourself there are several consultants in the area who could help you or you might be able to rent a Type II noise meter. Should you wish to pursue this, please feel free to contact me and I may be able to help you. I realize that this may not answer all of your questions and I would be happy to discuss any additional questions you might have. Please feel free to contact me. I will be out of the office tomorrow (Friday).  
Bill Walsh.

Subject: FW: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
William,  
Some information from the engineers regarding your email below:  
With regard to the questions from Mr. William Wills, 495 Still Forest Terrace, Sanford (Tall Trees):  
Ambient noise monitoring was conducted on 10/17/06 at Monitoring Location No. 41 (see attached Exhibit 5-21 from the Noise Study Report). That monitoring location is not far from Mr. Wills' home as noted by red star on attached Mapquest graphic. Two photos of the monitoring device on-site at Monitoring Location No. 41 on 10/17/06 are also attached  
  
The attached Table 5-6 from the Noise Study Report indicates the existing ambient noise level is 54.3 dBA at Monitoring Location No. 41. The projected 2032 noise level under the Build condition is 62.7 dBA. Neither the 8.4 dBA increase nor the 62.7 dBA meet Federal or State criteria for abatement.

5/1/2008 2:04 PM As stated on page 4-1 of the Noise Study Report: "FHWA and FDOT consider traffic noise impacts to occur based on two criteria. If the predicted noise levels approach or exceed the noise abatement criteria (NAC), or if the predicted noise levels substantially exceed existing noise levels, then a noise impact will occur and noise abatement shall be considered.  
FDOT defines the term "approach" as noise levels within 1 dBA of the FHWA NAC. For Activity Category B, which applies to the noise sensitive sites along the project study area, this translates to 66 dBA. A substantial noise increase is defined as 15 or more decibels

above the existing noise level as a direct result of the transportation improvement project in question".  
We would like to set up a conference call with you to discuss the matter further. Please provide your phone number and dates and times that it would be appropriate for the study team members to speak with you.  
I look forward to hearing back from you soon.  
Mary Brooks

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
Mary, I read the information on the noise level study and I'm confused. If I stand in my driveway any weekday morning during rush hour, the noise level is almost deafening. I would submit that the current traffic on I-4 resulting in the current noise levels probably warrants a noise-abatement all in itself. And then to read that the new extension, which is going to be adjacent to Tall Trees will not cause noise levels high enough to warrant any walls is confusing. May I request a noise study in Tall Trees to measure current I-4 noise levels? If so, how would I do it? Or would I need to get my own dB measuring device, capture levels and pursue this myself?  
Thanks for your help -

4/30/2008 2:18 PM Subject: SR 429 - Wekiva Parkway PD&E Study - Noise Study Report  
Greetings,  
As many property owners have inquired about the Noise Study Report for the Wekiva Parkway Project Development & Environment Study, I wanted to let you know that has been posted to the Expressway Authority web site. You can access the various sections of the report by logging onto the Wekiva Parkway page at <<http://www.expresswayauthority.com/Corporate/oursystem/SR429/WekivaParkway.aspx>> and clicking on the noise study report sections as indicated.  
We will be posting other study documents as they become available. We are still targeting July for the formal public hearings, and will provide meeting details once available. Thank you for your patience and your input as we work to develop this major transportation improvement.

(I added Doug and Mary Lu to the reply)

7/24/2008 12:47 PM Keri, Hal & Tom:  
You may have heard some stories about the Wekiva Parkway project, a limited access expressway being planned to go from I-4 near Sanford to US 441 near Plymouth-Sorrento Road. As currently planned, the project would eliminate portions of SR 46 from just east of the Wekiva River to west of the CR 46A intersection in Lake Co. (just west of the Rock Springs Reserve entrance). This means bicyclists will not be able to travel between northern Seminole County and eastern Lake County. The Expressway Authority and FDOT have planned to accommodate the construction of trails through the corridor, but not to actually provide those trails through the project. It is conceivable (though admittedly not probable\*), that the expressway could be built and that bicyclists (and hikers, the Florida National Scenic Trail crosses the Wekiva on SR 46) would be unable to cross the river and the corridor for some years until trails are constructed. The Expressway Authority will be holding public hearings on the project in September (dates and locations have not yet been published). It is important they understand many cyclists use SR 46, and have done so for many years. I suggest clubs/groups could document their use very easily with cell phone cameras on regular rides (and perhaps post them to a photo-sharing site), and should attend one or more of the hearings to express concern about access.

7/24/2008 12:46 PM While this is not expected to be a federally funded project, the possibility of federal funding exists, and OCEA has even gone through the federal environmental planning process in the case that such funding becomes available. If the project becomes "federalized," it will fall under the US Code, which includes the following language:  
"The Secretary shall not approve any project or take any regulatory action that will sever an existing major nonmotorized route or adversely affect the safety of nonmotorized traffic and light motorcycles, unless a reasonable alternate route exists or is established."  
Considering that this project could eliminate cyclist and pedestrian access from the corridor, FS 335.065 could also be invoked:  
335.065 Bicycle and pedestrian ways along state roads and transportation facilities.--  
(1)(a) Bicycle and pedestrian ways shall be given full consideration in the planning and development of transportation facilities, including the incorporation of such ways into state regional, and local transportation plans and programs. Bicycle and pedestrian ways shall be established in conjunction with the construction, reconstruction, or other change of any state transportation facility, and special emphasis shall be given to projects in or within 1 mile of an urban area.  
Local cyclists need to get involved now to ensure their access to this corridor will be protected.

6/2/2008

9:16 AM

Morgan Wiseman 407-843-7070 called and noted we'd spoken about a year ago, April 2007, and he had some similar questions to what we spoke about then, about the western beltway extension. He said from what he saw in the paper, it looks like it's been approved? PIO noted we have a recommendation for what should move forward, but nothing has been approved. PIO noted we still need to go to public hearings, and if there is a significant consensus of a change that needs to be made, then we'd make that and then it has to go through agency approvals. PIO noted we're looking to finish the study in early 2009. He said well that's not that far away. PIO noted we're shooting for public hearings in August but those have not been set yet. He asked what about the interchange going north from 441, has that been decided? PIO noted the recommendation if for the IC in OC to be at Kelly Park Road. He asked will that be a diamond or full on or off? PIO noted yes, a full interchange is planned there. He asked when they notice for the meetings ... we don't live out there, but we own some property nearby... PIO noted if he sent me his info in an email we'd add him to the project database. He confirmed my email address and said he would do so, thanks for the info.

Hello Joe,

I wanted to let you know that we have received your comment form. Thank you for taking the time to submit this information. Your comments will be shared with the Wekiva Parkway Project Development and Environment Study team. We appreciate your input. We are working to schedule formal public hearings and will send out a project newsletter with

details and update the Expressway Authority web site (www.oocaa.com <file:///www  
oocaa.com/>) with this information once available.  
Please feel free to email or call with questions or additional concerns.  
Mary Brooks  
Public Information Officer

9/29/2008	3:07 PM	<p>From: Joe Wolf [&lt;mailto:jwolf76@cfl.rr.com&gt;] Sent: Monday, September 29, 2008 3:07 PM To: MBrooksSR414@cfl.rr.com; dmerkt@seminolecountyfl.gov; fmacdonald@seminolecountyfl.gov; alockhart@seminolecountyfl.gov; deswine@seminolecountyfl.gov; gvenn@seminolecountyfl.gov; woodrufa@sanfordfl.gov; gjohnson@seminolecountyfl.gov; gbrender@LakeMaryFL.com Subject: Wekiva Parkway PD&amp;E Study - Comments September 29, 2008 Ms. Mary Brooks Public Involvement Coordinator 10151 University Boulevard, Suite 222 Orlando, FL 32817 I support the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons: 1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River to complete the beltway.</p>
9/29/2008	3:06 PM	<p>Traffic proceeding East or West SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route. 3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district. 4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ townhomes in Dunwoody Commons, 700+ apartments planned for NW Oregon, 284 townhomes in Terracina and several hundred homes on Orange Ave. 5. Traffic congestion at SR46 and Lake Forest Blvd. and increased noise are concerns in Lake Forest and surrounding communities. 6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46. Joseph A. Wolf</p>

adding him to the project database to receive meeting notices and other information. Thanks for passing him on. Please feel free to let me know if there are others whom I need to contact regarding this project. Thanks. Mary Brooks

5/27/2008 4:20 PM As requested by Seminole County, PIO called Claude Wolfe (407-206-0066 Office, 407-325-4430 Cell, [claudeinorlando@att.net](mailto:claudeinorlando@att.net) <<mailto:claudeinorlando@att.net>>). He said he's been in Sanford all day today at the county. I have seen documents where you've decided the intersection of Interstate 4 and I was wondering where you are in the process? PIO noted we've got a preferred alignment including interchange at I-4 and SR 417, will be going to public hearings in late August (dates have not yet been set) and after that any changes would be made based on public input and then we'd go through agency approvals through end of 2008-early 2009. he asked if it would be final after the public hearings? PIO noted we're in the PD&E Study phase, and some changes are possible after the hearings before going to agencies. He asked about the schedule. PIO noted that's dependent on funding, project is not fully funded, FDOT doing Lake and Seminole portions but does not have money programmed for design. PIO noted FDOT and other agencies have been working on financing plan for several months and hope to have some info on that at the public hearings. Once we know about the funding we can answer more of the public's questions about schedules. PIO asked if he was on the mailing list, noted we hadn't sent anything out in a while but did he receive the newsletters in the past? He said no and he'd like to be on the list. Please send info to him at PO Box 500, Orlando, FL 32802. He said he owns property looking to be developed on Wayside, adjacent to the Ford dealership. PIO asked if he had any other questions? He said no, think you've covered it all. PIO said I'd send him an email so he could have my contact info in case he had any other questions. He said he would appreciate that.

10/15/2008	4:45 PM	Russ requested maps and Dave said he would mail him a full set.	
10/15/2008	3:30 PM	WPCC update meeting with SCEA Board Member Art Woodruff/Sanford Commissioner, Russell Gibbons, ??(Woman with city), George Lovett, Brian Stanger, Dave Lewis, PIO and Michelle Maikisch. Dave provided Russell and Comm. Woodruff with packet of material, began giving overview. Believe question came up about number of takings along the preferred. George noted property in vicinity of Tall Trees that looks like a medical hardship an older woman represented by Stumpy Harris wrote us a letter. FDOT is doing an appraisal. George thinks it's on Wilson Road Jerry said if you don't use the property for roadway, SC may need it for drainage issue in that area. Dave recapped various meetings:	

SCEA May 6, July 15 WPCC meeting and their various 8 suggested alternatives, agreed to further investigate Map G

10/15/2008 3:29 PM Discussion of impacts: black bear wilderness, scrub jay, floodplain and wetlands (all have to be bridged), Port of Sanford; also no I-4 IC, still would have to do something with SR 46 IC, impacts to Catholic Church and high school site, commuter rail station impact  
Jerry: would have to realign proposed Airport Blvd.  
Dave: doesn't meet the purpose and need, there's no system to system IC. As the SR 429 beltway it needs a system to system interchange You would see traffic as a result blow up SR 46, Orange Blvd. and other local roads Dave went over what it would take to meet purpose and need:  
--Add I-4 IC to Alt. G. to and from the east  
--CD system for SR 417 IC and access  
--Requires six laning SR 46 west of I-4

10/15/2008 3:28 PM Jerry: any time you don't provide the property function, the local roads bear impacts. The last thing we want is dealing with any traffic going down Orange that doesn't have to  
Discussion that construction cost doubles for Alt. G, wetland impacts triple; not sure could get it permitted (since we have an alternative with less impacts)  
Art: asked about the boundary for public land near SC land/Yankee Lake  
Dave: G hits state land, county preservation land and black bear habitat  
Dr. Cirillo said we would have to bridge RIB site (rapid infiltration basin)  
Jerry: without a system to system IC, it's \$1.2 billion, compared to preferred alternative \$850 million  
It's about a third more because of the bridging  
But it does eliminate some residential impacts  
Russell: impacts to Sanford land uses and tax base, business and industrial park developments unfolding in that corridor. We have projects now under review there... Chris Killian (?)...  
Further down Martin Luther King Jr corridor, plans submitted today for a subdivision

10/15/2008 3:27 PM Jerry: commuter rail station site ... we don't want an expressway facility there  
Dave: ROW estimate might reflect plans; FDOT went out and put a value on parcels on proposed development. Showtime would have business damages, for example  
Russell: assessment was direct parcel impacts, not consequential land use impacts like access?  
Dave: correct, that's not something we can look at at this point  
Jerry: in terms of residential impacts, there's a net difference of 14  
Art: I wouldn't want this coming through my neighborhood  
Dave: with future subdivisions planned, the residential impacts would go up with this alternative  
The current impacts are individual direct impacts to homes, not part of subdivisions  
Dave noted SC asked us to get rid of the magenta, green and yellow alternatives in Dec. 2005 also because of the environmental impacts. G is similar to those west of I-4  
Jerry noted SCE board didn't approve preferred alternative, but said it could go to public hearing

10/15/2008 3:26 PM Art: is the curve on green reasonable?  
--were these (yellow, magenta and green) done cost estimate with IC? Dave noted we did impact assessments  
Art: so the bottom line is, it's twice as expensive and it doesn't work anyway?  
Dave said it doesn't work as well. It will work but it has issues  
Art: didn't we look at an IC at I-4 and SR 46?  
Jerry: you're putting everything on an inadequate loop ramp  
Dave: the problem with doing anything at I-4/SR 46, you would have to superimpose a

system IC over a local IC. You would have to do frontage roads, blow up local road network  
Jerry: without a proper system to system connection  
Russell: if consideration is creating a connection to SR 417 east of where it terminates at I-4, what were the factors to tying in there?  
Jerry: this was initially the CSX line. Intent was to hit CSX RR and keep going all the way to the river. ... Where the trail is now ... that was 1986-88... We filed ROW reservations but that was ruled unconstitutional... in the early '90s Metroplan took the road out of the plan because of environmental issues

10/15/2008 3:25 PM  
Jerry: the impacts of the preferred are a lot less substantial than we first thought. They did thread the needle. The alignment worked pretty well.  
Art: you looked at trying to use International Parkway, but it didn't work? Dave said did several analyses. There was a speed issue.  
Jerry noted you'd have to drop the ramps down to 25-35 mph  
Dave said the bigger problem is trying to tie in, we can get to 417 but it doesn't work very well. Can't use 417 interim ramps. We did two or three concepts, but it really just doesn't work  
Also total impacts to SC HIP (high intensity), International Parkway. It would be a big mess and don't get a whole lot for it.  
Russell: procedurally what will unfold if ... preferred alternative will continue to advance?  
Dave: finish meeting with SCEA Oct. 21, WPCC Oct. 27 ...  
Jerry: what's represented today, the numbers, travel, residential component, this mitigates home impacts but that's minimal compare to going from \$850 million to \$1.6 billion and would still have to build system to system IC. The numbers seem to be appropriate, wetlands and floodplains horrendous impacts, and without system to system IC  
Art: additional pavement?  
Dave: two more miles  
Jerry: that raises the cost too  
Dave noted SCEA Board meeting Nov. 18 with recommendation map G be eliminated

10/15/2008 3:24 PM  
Discussion of SCEA co-sponsoring Wekiva Parkway public hearing rather than having to have another one  
Russell: should the city of Sanford take a position on the alignment?  
Art: said will talk to the chairman and see  
George: at some point we want to get your land use concerns on the record. There are several ways to do that, resolution, etc.  
Art: doesn't make sense as close as we are to the public hearing as the SCEA meeting is going to be, doesn't make sense to eliminate it beforehand  
Jerry: we need to treat them all with equal status. It's a timing issue...so close to the public hearing  
George: this is one of many alternatives we've looked at. The point of the public hearing is to see... gosh, have we got it wrong. If someone shows up at the public hearing with a concept that's better and cheaper, then that's what we want to build  
Jerry: maybe after WPCC meeting, do a 1-2 page talking points / summary on all the alignments and the one from WPCC

Good morning, Commissioner Woodruff and Mr. Gibson,  
I would like to follow up with you to schedule a meeting on Wed., Oct. 15 at 330 p.m. at  
the city location of your choosing. Please advise if this date and time still works for you  
and where you would like us to come to meet with you. Attending would be George Lovett  
and Brian Stanger of FDOT and David Lewis of Ch2m Hill, the firm conducting the Wekiva  
Parkway PD&E Study, and possibly also myself.  
I look forward to hearing back from you at your earliest convenience. Thank you.

Subject: RE: SR 429 - Wekiva Parkway PD&E Study - WPCC update to SCEA Board  
members  
Importance: High  
Okay, I will proceed to confirm the following SCEA Board member meetings:  
Commissioner Brender - Oct. 13 8 a.m. (George, Brian & Mark)  
Commissioner Dallari - Oct. 16 3 p.m. (George, Mark) Brian, are you available?  
Commissioner Woodruff - Oct. 15 330 p.m. (George, Brian and Dave)  
If Brian and Dave could make it, I could also try to confirm Commissioner McLean for Oct.  
21 at 10 a.m. Brian and Dave, please advise.

Brian and Mark could do Commissioner Henley on Oct. 6 at 330 p.m. but George is out that week...  
I will get some more availability timeframes for Commissioners Carey, Henley and Van Der Weide and get back to you.

Dear Commissioner Woodruff,  
The Wekiva Parkway PD&E Study Team would like to schedule an individual meeting with each of the SCEA Board members to discuss our latest findings regarding the alignment alternative suggested by the WPCC. We would like to set up a meeting with each of you at your earliest convenience, and certainly prior to the Board's regularly scheduled public meeting in November.  
Please provide several dates and timeframes that you would be available to meet with us.

We greatly look forward to updating you on the alternative evaluation and to getting your further input.  
I look forward to hearing from you at your earliest convenience.  
Mary Brooks

7/28/2008	8:59 AM	<p>From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com]  Sent: Mon 7/28/2008 8:59 AM  To: 'sandyworley'  Cc: Deana Leffler  Subject: RE: Alignment of Wekiva Parkway</p> <p>Hello Sandy, We are still in the Project Development and Environment (PD&amp;E) Study phase of the State Road 429 Wekiva Parkway, so it is still early in the process. We are now looking at formal public hearings on the preferred alignment in late September-October of this year. From there the alignment must undergo agency approvals, which we hope to conclude by early 2009. As this project is not fully funded, the scheduling of the subsequent phases of the project - final design, right of way acquisition, permitting and construction - are somewhat in flux. For the Orange County portion, the Expressway Authority has funding for final design and some right of way acquisition. The OOCEA anticipates starting design on its portion in late summer-fall 2009. The Florida Department of Transportation is developing the Lake and Seminole County portions and does not have money programmed for design, but has some (but by no means all) of the money needed for property acquisition. As it stands now, it could be 2012-2015 to see construction begin in Orange County, with an even longer period for the other work to move to construction.</p> <p>There is a concerted effort on the part of the various agencies to come up with a financing plan to accelerate that schedule, and we hope to hear something out of those discussions in the coming weeks.</p> <p>I hope that helps. Please feel free to stay in touch or forward other questions.</p> <p>Mary Brooks</p>

Subject: SR 429 - Wekiva Parkway PD&E Study - Stanton Ridge sign  
Hello Lee,  
As the public information officer for the State Road 429 Wekiva Parkway Project Development and Environment (PD&E) Study, your email was forwarded to me for a response. The Expressway Authority did NOT put up the sign at the Stanton Ridge development. The developer put up this sign. The recommended alignment for the Wekiva Parkway would pass through this development, but that alignment has not been formally approved. The Stanton Ridge developer has approached the agency about purchasing their property in light of this. We are in the very early stages of discussions with the developer, and do not own this property. I cannot speak to the developer's reasoning or intention behind putting up the sign.  
I hope this helps. Please feel free to email or call with other questions.

Contact	Notes
Date	Time
4/8/2008	4:46 PM
	Regarding
	Yvonne (didn't catch last name??)/Coldwell Banker 407-430-3002 called and said she had a question about acreage off 46 in Sanford. She asked where will the proposed Wekiva Parkway interchange with 46? PIO walked her through finding the Seminole County map on the OOCEA web site. PIO noted she would see yellow on SR 46 and 417 at I-4, but the actual interchange is recommended for SR 417. PIO noted the yellow on SR 46 leading up to I-4 indicates widening and other improvements we will have to make there, but that's not where the interchange will be.
4/8/2008	4:45 PM
	She said her client has property on the north side of 46 just west of the big nursery near Orange Boulevard and they plan to put in 28, 1-acre lots. PIO noted we're widening to the north in the area of the parkway before we dip south to connect to SR 417. PIO noted the parkway dips south at Designing Women Nursery, if that's the one she means. PIO noted I believe I recall we need 60-100' of ROW on the north side along the parkway. She said that's what she needed to know. She asked if there were going to be any sort of overpasses along there? PIO noted we will be bridging over some side streets, noted she could see the green along the parkway indicating where those were, Longwood Markham, Lake Markham Road, etc. She said this isn't final yet, right? PIO noted no, we still have to take the recommendations to formal public hearings and then get agency approvals. She said you've been so helpful and thanks so much.

City Sanford State FL Zip Code 32771

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

1. **Comments:** During the past 10 years as homeowners in Lake Forest we have witnessed the development of the RT 46 corridor from Lake County to the Rt 417 Greenway. Homes and business have replaced forest and wetlands. We strongly believe that the southern route for the proposed Wekiva parkway must take the southern route as most favored route studied and recommended by the engineers of the Expressway Authority. It would be the most direct road to connect the existing SR 417 to the crossing over the Wekiva River.

2. The engineering consultants haven't evaluated the newly proposed northern route, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

We strongly urge the commissioners to accept the  
"southern route" to the Wekiva Parkway.

We believe the multiple housing on SR 46, as  
well as the increasing congestion on 46, precludes  
the rationale of using 46 as the connection of  
417 to the Wekiva Parkway. We also are  
concerned about the likelihood of additional backups  
of cars on I-4 when trying to use the entrance  
to 417.

Please use the back of this form if more space is needed to express your opinions.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

### Comments:

AS A LAKE FOREST RESIDENT, I SUPPORT THE PREFERRED ALTERNATIVE/SOUTHERN ROUTE FOR THE WEKIVA PARKWAY IN SEMINOLE COUNTY. I BELIEVE IT TO BE THE MOST DIRECT ROUTE AND THE MOST EFFICIENT ROUTE DUE TO LESS CONGESTION ON I-4, IT WILL BE SAFER, AND IT WILL HAVE THE LEAST DAMAGING IMPACT ON THE NEIGHBORHOODS AND HOMEOWNERS ALONG SR-46. THANK YOU FOR YOUR SUPPORT IN THIS MATTER.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Comments: Hello. I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County. This is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.

The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district. This route would be in direct conflict of one of the stated project objectives on the Expressway Authority website which states "The project would relieve congestion on US Highway 441, State Road 46 and local roads, and ...". SR 46 has already become much more congested over the past few years as development and growth along 46 has increased.

The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina. Also, traffic at the Lake Forest front entrance will be congested and noise will increase in Lake Forest

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and thus the route most drivers would take between I-4 and the Parkway, and 46 would likely become more like a parking lot, so I do not support this option.

*Orange, Lake and Seminole Counties*

## **Comment Form**

Date: October 5, 2008

Name: Eugene S. Risler

Address: 5342 Lake Bluff Terrace

City: Sanford State: Florida Zip Code: 32771

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Please use the back of this form if more space is needed to express your opinions.

Please mail or fax to:

Ms. Mary Brooks, Public Involvement Coordinator  
10151 University Boulevard, Suite 222  
Orlando, FL 32817  
Telephone: (407) 702.8375  
Fax: (407) 381.9038

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Comments: \_\_\_\_\_ **I have lived in the Central Florida area since 1984. I also moved to the Atlanta area from 1998 to 2005 until returning back to the Lake Forest area. While in Atlanta, I understand the importance of an outer loop and how it can affect the flow of traffic. I strongly believe in the current proposed preferred southern route and how it can support and relieve traffic congestion on I-4. If we continue to use state road 46 as a main artery for the outer loop or a feed into I-4, I truly believe the tax payer's money will be wasted and the good intent of the outer loop will not be achieved. Also, as a resident of a wonderful community like Lake Forest, State Road 46 will be a heaven of accidents and repeated fatalities that will live with us for a long time.**

Fax: (407) 381.9038

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Please use the back of this form if more space is needed to express your opinions.

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: We are in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

In our opinion this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

We are opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developed and developing business and residential area between Orange Blvd and I 4 and will adversely affect the area. The southern route connecting directly to the present end point of SR 417 will not only reduce congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

It is obvious that the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so we do not and cannot support this ill-conceived option.

Please use the back of this form if more space is needed to express your opinions.

Please mail or fax to:

Ms. Mary Brooks, Public Involvement Coordinator  
10151 University Boulevard, Suite 222  
Orlando, FL 32817  
Telephone: (407) 702.8375

Comments: I have lived in this area for over 10 years. I have seen a lot of growth in that time. I remember when I had to drive to Lake Mary to go grocery shopping or have a nice dinner. Now there are many restaurants to chose from as well as a Publix and most importantly Ace Hardware. This has turned into a very nice area to live. I now have concerns over the Weikva Parkway project and the impact it will have on this area. After reviewing all routes, the only possible route I see is the Southern Route through Seminole. This will have the least amount of impact to this area.

Thank You

Please mail or fax to:

Ms. Mary Brooks, Public Involvement Coordinator

Please use this Comment Form to express your opinions about the Wekiva Parkway PD&E Study. You can mail or fax this form to the address or fax number shown below.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Please use the back of this form if more space is needed to express your opinions.

## **Wekiva Parkway PD&E Study**

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option. Millions has been already spent on determining these routes and now the Preferred Route. Enough, lets get started on this road, NOW!

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

**• Comments:**

Enclosed is a copy of the comment form in regards to our opinion for the Wekiva Parkway Study. Please read the comments carefully.

We moved here specifically for the peace and quiet this area provides. Placing a highway through here on 46 would disturb all of the natural beauty and peace Sanford has to offer and would dramatically lower property values in this already struggling economy.

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County. I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Sally C. Hashem  
914 Wood Briar Loop  
Sanford, FL 32771

I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Comments: I understand that the Public Hearings to present and receive comments on the preferred route selected by the Study Team for the Wekiva Parkway will be held sometime later this fall. I am writing in advance of the hearings to say that I agree with Study Team that the best route for the Parkway in Seminole County is the southern route that connects directly to the current end point of SR417. I believe that this route will provide the best traffic flow for both I-4 and the Parkway and will have the least negative impact on the residents and businesses in Seminole County.

Fax: (407) 381.9038

Lake Forest supports the Preferred Alternative / Southern Route for the Wekiva Parkway in Seminole County for the following reasons:

1. It is the most direct route to connect from the existing end of SR417 to the crossing over the Wekiva River.
2. Traffic going East to West and vice versa on SR417 will not have to get on and off I-4 between SR46 and 417. Congestion on I-4 will be less with the Southern Route, and the road will be safer for anyone unfamiliar with the multiple on and off ramps that would be required for the SR46 route.
3. The route replacing SR46 all the way to I-4 would run down the middle of a developing business and shopping area between Orange Blvd and I-4. This would destroy what is planned to be our main street shopping district.
4. The SR46 route will impact a much larger number of homes than the southern route. There are 732 home sites in Lake Forest, 200+ in Dunwoody Commons, 700+ apartments planned for NW Oregon and 284 in Terracina.
5. Traffic at the Lake Forest front entrance will be congested. There will be increased noise in Lake Forest.
6. The newly proposed northern route hasn't been evaluated by the engineering consultants, however there is not an interchange proposed for where it crosses I-4. Traffic coming from and going to I-4 would have to loop around several miles to the east to SR417 and then back to I-4. Much of this traffic may use SR 46 as the route to and from I-4. This would greatly increase the traffic on SR 46.

Comments: I am in favor of the Preferred Alternate Southern Route for the Wekiva Parkway in Seminole County.

I believe that this will provide the most direct route and is the route that will have the least impact on the businesses and residents of this area.

I am opposed to the route replacing SR 46 all the way to I-4, as it will run expressway traffic down the middle of a developing business and residential area between Orange Blvd and I 4 that will someday be our "downtown". The southern route connecting directly to the present end point of SR 417 will not only reduce the congestion on I 4, but will also keep all through traffic, including all trucks to and from Tampa, off our "Main Street".

In my opinion, the proposed northern route (without an interchange between it and I-4) will greatly increase traffic on SR 46. Without an I-4 interchange, SR 46 would be the shortest route and the route most drivers would take between I-4 and the Parkway, so I do not support this option.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

I AM IN FAVOR OF THE SOUTHERN ROUTE FOR THE WEKIVA PARKWAY. THE SOUTHERN ROUTE SEEMS TO BE THE MOST DIRECT IN CONNECTING WITH 417. IT IS VERY IMPORTANT FOR TRAFFIC NOT TO HAVE TO GET OFF 417 GOING EAST/WEST, CONGESTION WILL BE LESS WITH THE SOUTHERN ROUTE AND ALSO SAFER. THERE WOULD BE A GREATER CROSS NEGATIVE IMPACT ON HOME HOMES AND BUSINESSES WITH THE SR 46 PLAN. HOME VALUES WOULD DECLINE MEANING LESS TAX REVENUE TO THE COUNTY.

### Comments:

When you weigh all the factors the southern route wins, hands down, everytime. This is supported by the design and construction of the 417 Bypass and its intersection with I-4.

The southern route will have less impact on the quality of life we currently enjoy.

KEEP POLITICS OUT OF YOUR DECISIONS!!

**2008**  
**WPCC PETITION**

To: Seminole County Expressway Authority (SCEA) members, and Seminole County Commissioners

We, the undersigned concerned citizens of Seminole County, call on the Seminole County Expressway Authority members and Seminole County Commissioners to reject the CH2M Hill “Recommended Preferred Alternative” Wekiva Parkway alignment in Seminole County (Figure 1), which proposes a route through or in very close proximity to established neighborhoods, ball fields, churches, schools and businesses.

We call on the SCEA members and Seminole County Commissioners to adopt our collective vision of maintaining and enhancing the quality of life for residents of the Wekiva Basin area, retaining the “natural choice” environment of our neighborhoods. This is in alignment with Seminole County's unique character, and its claim as “Florida’s Natural Choice”.

We further call on the SCEA members and Seminole County Commissioners to consider alternative alignments recommended by the Wekiva Parkway Community Coalition (WPCC), as enumerated in “WPCC Alternative WP Alignments”, which would individually or collectively:

- Reduce impact on surrounding neighborhoods and businesses
- Reduce cost
- Enhance business access
- Reduce impervious cover
- Reduce time and impact of construction
- Reduce noise and visual impact to surrounding neighborhoods
- Enhance connectivity
- Enhance landscape
- Enhance safety
- Accomplish above goals while also reducing traffic congestion and expanding highway capacity

Click [HERE](#) to sign the petition.

- 10

**Name:** Anthony A. Cerino, Jr. on Apr 10, 2008

**Comments:** I implore our elected officials to inspect the route selected. Please consider the disruption to homes, business, churches, recreational facilities and quality of life that the route will have on these existing properties. I personally selected my home's location with the understanding that any future loop connector would not be located in such close proximity. It would seem the intent of such a route is to put future development ahead of existing residents and tax payers.

- 92

**Name:** Matt McGinley on Apr 29, 2008

**Comments:** Its very difficult to understand how the route that appears to be the most disruptive to the most stakeholders has become the recommended plan. Many alternatives look to build on existing infrastructure (i.e. 'don't reinvent the wheel') and provide less impact to area homeowners and businesses (i.e. voters and taxpayers) than does the recommended plan. Without a plausible explanation, motivations and benefiting constituencies should be examined. On the surface, common sense seems to dictate a less invasive route for a community and county concerned about its quality of life.

**Comments:** I would like to know how many of the decision makers on the proposed path of the Wekiva Pkwy would be in favor of it plowing through W SR 46 if they lived in this area How many of these decision makers would agree to a path of a huge express way if was going to run 200 yards from their house. How many You can always justify an unfavorable decision if it does not affect you. From the start of the discussion concerning the path of the Wekiva Parkway, I have felt like my voice was not listened to or considered. It appears that the decision on the path of the Wekiva Pkwy was pre-ordained and the opposition from home owners was never a factor. My perception is that the final say on the direction and the scope of the pkwy rests in the hand of

special interests and developers, not with the will of the people. And the path will certainly not be in the best interest of the homeowners who made their decisions to live in this area to get away from the hustle and bustle of Orange County and enjoy the pleasures of having property in a fairly rural setting. In the Fox Spur and Wekiva Park general area, there are homes that range from 300K to 750K+. Our home/property values and our "curb appeal" will be significantly impacted if the Pkwy's path is through our back yards. The serene nature of the area will disappear because of the constant noise. We will start become Orlando North. Our elected officials, in the surrounding cities and Seminole County, should be representing the interests of their constituents not those whose primary interest is making \$\$\$ and the continued exploitation of the rural nature along the W SR 46 corridor. Why is it that the little guys (home owners) always get the short end of the stick There has been a perfectly viable solution proposed to route the pkwy through Volusia County where this is much less impact to large numbers of home owners. If the proposed route of the Wekiva Pkwy was added to the ballot in November, how would the people vote Please give us a voice!

**Comments:** Please find an alternative route to the □ currently preferred Wekiva Pkwy route that is south of 46□. The preferred plan will harm numerous existing neighborhoods (Tall Trees, Berrington Club, Wilson Park, etc,) by changing their quiet, rustic, rural countryside landscape to one of □loud noise, traffic congestion, tall and ugly overpasses & ramps and sky lit nights□. In addition to destroying the harmony and lifestyles that the residents currently enjoy, our property values will greatly decrease (and who will pay for that). Thank about it □. who wants to live near an elevated 8 lane road towering over buildings with on/off exits spanning to I4 in both directions and then to the 417. Stop This Project and find another route !

**Name:** Sheri Cabrera on May 24, 2008

**Comments:** It is disappointing to think our community leaders are considering Wekiva Parkway to be routed adjacent to an elementary school and existing neighborhoods when there are clear options to route where the human impact is less. Consideration for elementary school children, neighborhoods, and families' livelihoods (home values) does not appear to be a factor in the decision process. I am a registered and active voter and will continue to exercise my rights to vote during all elections which impact my family and my lifestyle. Please consider options more responsible and considerate of our neighborhoods. Thank you.

**Comments:** Thank you to the members of the WPCC for working to preserve our neighborhood.

- [629](#)

**Name:** Peter S. Ingrassia on Oct 14, 2008

**Comments:** The Recommended Preferred Alternative (RPA) extends I-4 congestion, which will be compounded by projected major traffic increases from Volusia County, past the CR-46 intersection, south to the RPA intersection. On its way, it disrupts wholesome neighborhoods comprised of family homes, schools, churches and businesses. In comparison, Volusia County traffic, with its projected increases, reaches the WPCC-recommended Seminole County/Bevier Alternative (SC/BA) north of CR-46. This permits reduction of both current and projected Volusia/I-4 traffic along the miles between both alternatives, making for earlier and faster access to the beltway, while minimizing impact to existing, long established communities. Thus, the SC/BA achieves (2) key Expressway goals: efficient flow of traffic, and minimal impact to communities

**Comments:** We are extremely disappointed that the Wekiva Parkway continues to be an project under consideration, despite the fact that traffic levels do not warrant building this "link."

Additionally, hundreds of families who have invested their money into nice homes in the area will see their property values plummet even further as the result of this project, not to mention having to deal with the noise level. Considering that we can hear I-4 from our house during peak traffic times, I can only imagine what the daily roar of this nearby traffic will be. It is upsetting that our state and federal governments, who have already done considerable damage to our economy through misguided policies, want to continue damaging citizens and homeowners, not to mention spending taxpayer dollars on frivolous projects such as this. I can only imagine that money has changed hands, promises have been made, and someone is expecting their pay off. No matter that lives will be destroyed and people will be trapped in homes they invested in for years and possibly decades. Shame on our officials if they allow this to be built.

- [655](#)

**Name:** Kelly Hart on Oct 27, 2010

**Comments:** Building this road in the proposed location will be devastating to my community. Property values right now are at an all time low. Currently I am over \$100K upside down.....I can only imagine what this new road will bring due to the noise, view, etc. This is the worst location to put this road. PLEASE, PLEASE, PLEASE revisit other alternatives. A better location would be north of Orange Blvd. near the Central Florida Zoo. This location is logical, and less disruptive to developed communities that people call home. How would you feel if the parkway were to be built in your backyard?????

### Comments:

Please consider Map G, "Seminole County/Bevier Rd Alternative" as this does not disrupt existing neighborhoods and will make use of mostly undeveloped land. We are all concerned about the affect on the value of our properties and this route seems to best satisfy the concerns of the most people. Thank you.

### Comments:

Please consider finding an alternative route for the extension of the 417 Greenway so that it doesn't effect the serenity and pristine qualities of our subdivision. I am a lifetime resident of Florida and have always wanted to live in "Paola". My dream came true eleven years ago when we moved into Sylvan Lake Reserve. Please do not allow this proposed extension to come so close to our homes here. Thanks

### **Comments:**

To the Seminole County Expressway Authority Commissioners:

Please reject the current "Recommended Preferred Alternative" alignment of the Wekiva Parkway through Seminole County. I moved into my current house 10 years ago partly because of the Wekiva River Protection Area designation assuming that would protect the relatively quiet, low-density development of the area. Now, consultants and engineers are recommending this environment be destroyed by routing a major multilane expressway within spitting distance of multiple neighborhoods, three churches, a Little League ballfield complex, and an elementary school while ignoring multiple alternatives that have a much lower impact on existing residents and local infrastructure. In particular, I ask you to seriously evaluate the alternative known as Map G - "Seminole County/Bevier Rd Alternative" which routes the parkway through areas not currently developed.

As you are the only people representing the voting public of Seminole County, I am grateful for your attention to this matter.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

I am writing to express my views as a Seminole County resident and taxpayer in connection with the Wekiva Parkway. The current "Recommended Preferred Alternative" is extremely disruptive to our current communities, businesses and feel of the area. This part of Sanford has been trying to establish itself as a pleasant area to live and many families have in the past 20 years moved into the area and put considerable effort into upgrading the community. As a professional who spends a lot of time in the office, I want a place to come home to that is safe, pleasant, supports my desired quality of life, and maintains value for the future. Having a highway wind right through our neighborhoods will be detrimental to those goals.

I strongly support the much less disruptive Map G "Seminole County/Bevier Rd Alternative" proposed by the Wekiva Parkway Community Coalition (WPCC). This route has been determined in a meeting with the SCEA to have potential, as it avoids the existing neighborhoods, makes maximum use of undeveloped land and existing right-of-ways, and maintains the "parkway" look.

The current "Recommended Preferred Alternative" may be the preferred ones by the engineers because it is the easy way out, but it certainly is not a solution for the residents of the area who will have to live with it. I urge you to review the Map G option and I am sure you will conclude that this is a viable alternative.

### **Comments:**

#### **To Whom it may Concern:**

I wish to express my extreme dislike for the "Preferred Alternative". I moved into Berington Club subdivision in April 2007 and was surprised to find that the Seminole County's Commissioners statement that no expressway would traverse Seminole County had been discarded.

I moved to this more rural and restful location to avoid traffic and noise created by just this kind of road. I am writing to ensure my voice is heard prior to any selection of this noisy, traffic producing, eyesore is made through our rural neighborhood.

I believe there is a solution to the problem. It is the route currently being proffered as an alternative by the WPCC and listed as the "Northern route". This would eliminate all of my concerns and ensure my full support of the Western Beltway.

Thank you for considering my thoughts and please take whatever action you can to ensure the Northern Route is selected as the true "Preferred Alternative".

### Comments:

We believe the proposed Wekiva Parkway is a bad idea for hundreds of residents in the affected area who have worked hard to live in the communities they reside in and cannot afford to see their property values plummet. In addition, there is simply no good reason to build a new roadway where existing routes can be used toward the same end. The noise level in this area is already high. At times, we can hear traffic from I-4. We cannot imagine what the noise pollution levels will increase to if this parkway becomes a reality.

### Comments:

I support the WPCC's proposed northern alternative (Seminole County/Bevier Road Alternative) and am opposed to the Recommended Proposed Alternative (RPA). I believe that the RPA negatively impacts both the aesthetic and property values of the surrounding communities. The proposed northern alternative better utilizes undeveloped land and avoids a greater number of neighborhoods.

I respectfully request that the Seminole County Commissioners and the Seminole County Expressway Authority reject the RPA in favor of the Bevier Road Alternative.

### Comments:

I wish to express my concern for the proposed route and design for the Parkway. I wish in no way to say we don't need the road, just ask for concern regarding the current route which would eliminate a Little League ball park (under construction), create multiple bridges and overpasses in and around neighborhoods and as currently planned not provide any noise barriers to the many homes in the area. I have heard of a proposal which would run the route further north and connect with I-4 near Lake Monroe. Please give consideration to this route as it appears to allow for construction in vacant lanes without impacting current highways, neighborhoods and businesses. While this may raise the cost of the project, it should allow for seamless construction during a large portion of this project since the land is currently vacant. Just imagine the issues which will occur while construction is on-going for Hwy 46, Orange Blvd and Wilson Elementary School.

Thank for you giving real consideration to this newly proposed route.

Rob Mangus

### Comments:

I wish to express my concern about the proposed route of the Wekiva Parkway along Highway 46. We live about 2 blocks south of the highway and currently receive a great deal of road noise from it. It is especially loud when the wetland area between the Sylvan Lake Subdivision and Highway 46 has at least some water in it. The noise reflects off the lake and directly into our back yard and patio. I am concerned that the new expressway will bring a large increase in traffic and with it much more road noise.

I am in favor of the route that would take the road further north with less impact on existing homes and more specifically with less noise to our home.

Thank you for this opportunity to express my opinion.

### Comments:

Dear Ms. Mary Brooks,

I am deeply concerned that the Seminole County Wekiva Parkway Expressway (417 extension) is being planned without consideration for a less populated route. It appears that political influences have surpassed common sense when developing the route that 'snakes' its way through several heavily populated communities here in the Markham corridor. I strongly suggest that you consider the Wekiva Parkway Community Coalition's (WPCC's) suggestion and look at moving the proposed highway further north where it will have less of an impact on homeowners and businesses. Upon reviewing the suggested route by the WPCC, I strongly endorse their recommendation.

Please add my comments to the official public record as being opposed to the plan as it is recommended today.

Sincerely,

Walter Magiera

### Comments:

I strongly support the selection of the "Seminole County/Bevier Rd. Alternative" instead of the current Recommended Preferred Alternative route. I just makes more sense to select a route that avoids our neighborhoods, maximizes use of undeveloped land and maintains the intended parkway look.

I live about 2 blocks south of Hwy 46 and currently receive a lot of road noise. The current selected route would increase that noise dramatically with the increased traffic load it would encourage. When lakes are not dry and contain water we have increased noise levels. During Fall-Winter and early Spring when foliage is less, we experience more noise from the road. Increased traffic from a road this near would be detrimental.

There is also a visual factor that could have impact to our property values. As I understand with the current preferred route, we would see raised roadways adjacent to both our front and back neighborhood entrances. This would not help at time of selling properties nor be visually pleasing for each time we enter or exit the neighborhood.

Thank you for considering the northern route to allow me more peace when living in my home.

Sincerely,  
Janet Peters

### Comments:

On behalf of my family and neighbors we ask that this parkway not infringe on our community. This would destroy our property values that we have worked so hard to have.

We expect our elected officials to stand by it's voters to do what is right and protect our interests. Our homes. Our life styles. We do understand the need for better travel routes and roads to rid I-4 of congestion but we also know there are better alternatives. Please do not bring this thing through the wayside/Orange Blvd. route.

### Comments:

I strongly support the selection of Map G – "Seminole County/Bevier Rd Alternative", instead of the current Recommended Preferred Alternative, since it avoids our neighborhoods, maximizes use of undeveloped land, and maintains the intended 'parkway' look. Please do not disrupt our community of neighborhoods, churches and Wilson Elementary.

Please use the back of this form if more space is needed to express your opinions.

I TOTALLY REJECT THE:

"Recommended Preferred Alternative "(RPA)" route which, if approved, would cut a swath through our neighborhoods, destroy the natural beauty and quietude of the Wekiva River Basin area we all call home, and negatively impact our property values. There has to be a better solution!!!!!!

### Comments:

I think the Northern Route Alternative is an excellent plan and fully support this alternative. I think the route would be scenic and make use of undeveloped lands instead of cutting through business and neighborhoods.

### Comments:

The WPCC's Northern Route Alternative is the best route to take due to the fact that it will avoid disrupting many neighborhoods and make the best use of undeveloped lands. Also, I think that traveling north on the 417 to I-4 East to Daytona Beach etc that this route would dump traffic onto I-4 way north of the current I-4 exit and relieving congestion between exits 101A and 101C (Hwy 46).

Thank You,  
George Tilton

### Comments:

Dear sirs

The proposed "Recommended Preferred Alternative (RPA)" route which, if approved, would cut a swath through our neighborhoods, destroy the natural beauty and quietude of the Wekiva River Basin area we all call home, and negatively impact our property values. I feel the assessment process was flawed as a proactive method of garnering meaningful community involvement and assessing real influence on outcomes.

I strongly urge adoption of the WPCC's proposed northern alternative to the Seminole County Commissioners and the Seminole County Expressway Authority (SCEA).

Thank you for your attention.

### Comments:

The WPCC has been very proactive and trying to work in partnership with the Wekiva Parkway PD&E study group, as well as our elected officials on the SCEA. The WPCC proposed Northern route offers a much less disruptive routing to the current RPA. Clearly, as part of the PD&E process, the voice of the affected communities needs to be heard, and the comment forms are a key indicator to the amount of voter discontent. I am very disappointed with the lack of any meaningful feedback from these groups to the WPCC or a response to the WPCC initiatives. I have read reports in the local papers which would indicate community acceptance to the RPA. This is highly filtered communication, and DOES NOT represent the will of the community. The RPA with its routing from the Wekiva River to the planned I-4 interchange causes a significant amount community, residential, business, religious, recreational and educational disruption. I can not envision any more impact to all these affected parties in such a constrained space. Furthermore, the RPA does not fulfill the basic charter to create a "parkway" like setting. To hear our county officials say, as a positive attribute, that the RPA is "threading the needle" besides being a major negative to the bordering communities is also another violation of the PD&E, as the amount of land available for natural or scenic boarders simply does not exist. When communities have to join together, as we have in the WPCC, to provide less disruptive, more intuitive options to a bad choice, this represents a failure in governmental oversight and project governance. There is still time to address the WPCC and affected community concerns, and make the needed roadway routing changes to ensure a win-win for the county, Central Florida, and the people who have chosen Seminole County as their place to reside, do business, attend churches, educate their children, and enjoy a quality of life that is not eroded by an elevated multilane highway, which is not even close to the definition of a parkway, running though the fabric of their existing communities.

Please use the back of this form if more space is needed to express your opinions.

Comments (cont):

An option to gain a true level of area dissatisfaction would be for the SCEA to chair an open meeting with the parties affected by the RPA Wekiva River to I-4 interchange routing. This would provide a forum to understand the scope of the concern. I look forward to hearing back on my concerns and suggestions. Make no mistake, I think a parkway is needed. There are simply better options.

Thank you.

Anthony A. Cerino, Jr.

### Comments:

We urge you to reject the "Recommended Preferred Alternative (RPA)" and look for alternatives that will have less impact on local neighborhoods, and property values. In reviewing the many alternatives, there appear to be a couple of different options that would have less impact on already established residential neighborhoods, schools, and local businesses.

Thank you for your consideration of this request.

### Comments:

I am a homeowner residing in Tall Trees. I wish to go on record in support of the "Seminole County/Bevier Rd Alternative" plan. This plan would help preserve the quality of life that we sought when we purchased our home in Tall Trees. Further it would preserve the value of our homes which has already deteriorated due to uncontrolled development directly behind our neighborhood on International Parkway. A 40 unit townhome project was converted to a 60 unit apartment complex. This request by the developer was rubber stamped by Seminole County. Please consider the long time residents of Tall Trees and other nearby neighborhoods when you make your decision. Thank you very much for your consideration.

Lisa Wills

### Comments:

Please consider rejecting the "Recommended Preferred Alternative" route for 417 that brings it both behind and in front of my neighborhood ... Sylvan Lake Reserve. Nobody in our area South of 46 wants to see this thing built through all of these dense neighborhoods, churches, or small businesses. I am fully in support of the less intrusive and perfectly obvious alternative proposed by the WPCC ... a far less disruptive path.

We're tired of the FDOT and Expressway Authority trying to ram this thing through our area all while denying that a route is anywhere near being finalized. The fact that the WPCC is able to propose such a less controversial route so easily should be an embarrassment to all of the bureaucrats that came up with the original piece of junk ... the RPA.

### Comments:

I would like to voice my opinion that I am heavily against the Recommended Preferred Alternative that the Seminole County Expressway Authority is considering building near our neighborhood. I believe the better alternative is to keep the road on SR 46 where 190 ft of right-of-way is already owned by the county. Or an even better solution is not to run the road through our neighborhoods at all and take it to the North behind our neighborhoods and on this side of the St. Johns with an extended roadway which will bring traffic closer to downtown Sanford.

The City of Sanford, the Marina and the Boardwalk would all benefit from bringing a large amount of traffic closer to downtown Sanford with a feeder road being designated to drop the traffic right into downtown Sanford if the WPCC Recommendation is adopted. Waterfront high-density development would certainly increase the tax base for the City of Sanford. Metro-Orlando would benefit overall from having a high-density commercial development area being available on the beautiful St. Johns River. This could be a great opportunity for the City of Sanford to capitalize on encouraging downtown development by bringing large traffic volumes and easy access to downtown by considering the WPCC recommended Northern route.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

I live in Tall Trees and am very unhappy of the route that the Wekiva Parkway is taking. To avoid commercially valuable land, the path of the proposed expressway is adjacent to our neighborhood and clips the rear corner of one of the lots. This is in such a proximity to not only our neighborhood, but others nearby as well, that it will substantially impact the quality of life. These neighborhoods are established and maintained - many with heavily wooded lots. It doesn't make sense to destroy these areas solely to increase traffic into Lake County. Again the county takes the interest of the developers first and existing communities second.

I urge you to route the Parkway north of the proposed location in order to avoid already populated areas. If you would like further information or comments from me, please feel free to contact me at [wwills@national.aaa.com](mailto:wwills@national.aaa.com).

Thanks.

### Comments:

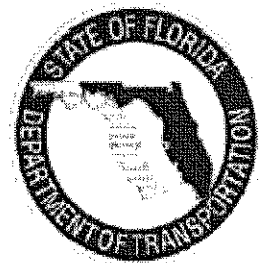

I believe the proposed northern alternative route should be chosen by DOT to complete the bypass around Orlando. The route appears to have the minimum impact on existing communities when compared to the route most recently put forward by the consulting group. When 417 was completed as far as it is there was a plan to extend it straight through to hook up with Hwy 46 and then go to the west. Once homes were built in the proposed path it looks like the consulting company/DOT decided to forget about this original route and reroute 417 further to the north.

If there is the freedom to reroute the roadway then let's do so and avoid as many communities as possible. The northern route does this and access to I-4 would not have to be added since the current 417 provides this.

### Comments:

Map G the Seminole County/ Bevier Rd makes the most common and economic sense to select. The impact on existing neighborhoods is minimal, compared to the other routes, the cost for the undeveloped land is much less than would be required for existing homes, the locations for limited access to the parkway would be much easier to define and there would certainly be less disagreements over where to access and exit the parkway, the choice goes around, rather than through the community as a whole, it is the least cumbersome route. the least litigious route. Maybe it makes too much sense to select that route.

Thanks for listening to our input.  
Keith Cleborne

The choice of routes does not make much difference to my specific house, but Map G seems to be the most closely aligned with the limited access desired and it disrupts the least number of communities. Seems a slam dunk to me,

### Comments:

I feel that the current proposed route for the Wekiva Parkway would adversely affect this whole community. We moved to this area because it was quiet and out of the hustle and bustle of the city and do not want this roadway to jeopardize this quiet community we live in. It would also disrupt local businesses and churches where we frequent. Please consider moving the Parkway to a different location that would not adversely affect our community.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

We have been residents of Sylvan Lake Reserve for the past 5 years and highly value the serene suburban life in a community of mixed age ranges. It makes NO SENSE to bring the Wekiva Parkway close to SR46 and Orange Blvd., upsetting so many long settled neighborhoods, including elementary schools, when another, and even better, alternative exists.

Moving the Wekiva Parkway to the north makes sense as Orlando sprawl continues to move upward, and will better accommodate those bedroom communities to the north of us. We vote our elected officials into office with the assumption they will make good long term decisions for us, and we expect that any final decision on this project will be made with little or no disruption to our neighborhoods .

Please use the back of this form if more space is needed to express your opinions.

### Comments:

I support the new Northern Alternative to the Wekiva Parkway! This route creates a more efficient loop of the area and allows residents a less congested alternative. The current proposed route affects too many homes and runs right through heavily congested areas and does not alleviate traffic. Please change the current proposal for the good of all Seminole County homeowners and tax payers.

Thank you!

### Comments:

I heartily endorse the proposed Northern Alternative. I feel that if the current proposal is built, the citizens of Seminole county will pay for the citizens of Lake county to have easier access to Orlando and Orange County. Seminole county neighborhoods should not be penalized by snaking an expressway between long time existing residential neighborhoods. The current proposal has such a large negative impact on these beautiful residential neighborhoods. The noise levels would dramatically increase. The visual impact is indescribable - having a 12 lane expressway curve around your community can only be described as a homeowners nightmare. The impacted neighborhoods in Seminole county will be separated from each other by concrete walls and and expressway. Many people bought these homes because they were "semi-rural" where the development was surrounded by lakes, trees and farmland. We have many wild creatures - some are a nuisance like the bears - but others (turtles, birds, otters etc.) The space is so limited that describing this expressway as a "parkway" is a joke.

The proposed Northern alternative allows quick access to Orlando and Orange county which will enhance property values in Lake county with minimal impact on existing communities in Seminole county. There is enough space to allow the road to be built in such a way that it can be a parkway. Not a concrete roadway jammed into too small of a space. Why should Seminole county pay the price for Lake county? Property values have been hit hard enough in the current real estate market without the current expressway proposal diminishing them further.

Please choose to give the citizens of Lake county their expressway connection to Orlando without penalizing the residents of Seminole county. We chose to live in this part of Seminole county because of the quiet.

### Comments:

I FAVOR the northern alternative proposal of the Wekiva Parkway based on the impact on established communities, businesses, and traffic. The cost of eminent domain along the ORIGINALLY proposed site is too high, financially and in terms of area impact. The alternative proposal is a better choice.

### Comments:

Based on the information I reviewed regarding the PD&E study it is clear that the process used did not evaluate properly the financial and environmental impact this will have on the home owners potentially impacted. It is also unclear why a route would be selected that impacts so many home owners and citizens while another alternative that has minimal to no impact has not been the primary route to plan for.

### Comments:

I can understand the need to expand the Infrastructure of our great state and applaud the Expressway Authority for the steps it has taken to ensure the impact of this expansion is a positive one on our communities and our State as a whole. I would just like to encourage you all to think of yourself and how you would feel if personally impacted when approving the original "thread the needle" option leaving what is now a beautiful and peaceful area of Seminole County with a major expressway cutting right through our communities. The "Northern Alternative" currently under review would take the expressway through a much less developed area causing far less impact on our communities way of life and property values. I appreciate your time in reading my concerns and hope the final approved route takes the peoples considerations into play.

Best Regards,  
Todd W. Rogers

### Comments:

I would like to express my opinion on the "Recommended Preferred Alternative" route. As a resident of Seminole County the RPA cuts through a number of neighborhoods and will destroy the current peace and quiet of these neighborhoods, to say nothing of the property values. The new "Northern Alternative" that takes the road through currently less populated areas is much preferred. As a Seminole County property owner I do not understand why I should give up not only property value but quality of life, in order to benefit the residents of Lake County. This section of highway will get them to Orange County quicker, at the expense of the residents of Seminole County. The route chosen must have little or no impact on the residents of Seminole County as we do not benefit from this at all. Dan Desmond

### Comments:

I urge you to adopt the WPCC alternative route ( Map G ). This route provides passage through undeveloped land and easily connects to I-4 and the 417. Following this proposed route will protect established neighborhoods abutting 46 and will protect the property values of home owners. It also avoids the congestion that will surely be a nightmare at the intersection of I-4 and State Road 46.

### Comments:

I urge you to adopt the WPCC alternative route ( Map G ). Snaking this roadway through existing neighborhoods will destroy the peaceful way of life of many families. You need to be aware of the needs of people rather than just what is good for business. Connecting this parkway to I-4 near SR 46 makes no sense. The area is already overcrowded with vehicles. The alternative route makes much more sense than what is presently proposed. This route will provide easy access to I-4 through undeveloped land without disrupting the lives and property values of many citizens.

### Comments:

To whom it may concern,

I am writing to ask you to reject the "Recommended Preferred Alternative (RPA)" route for the Wekeiva Parkway. If this route is approved it would cut a swath through our neighborhoods, destroy the natural beauty and quietude of the Wekiva River Basin area we all call home, and negatively impact our property values. As a home owner in this area for the last 6 years, I have watched this community develop and flourish with new businesses, new homes, communities, schools, churches and even a newly planned ball Field. Approving this "RPA" would essentially ruin what we have worked so hard to achieve in growing our community.

I urge you to select the WPCC Proposed Northern Alternative for the expansion of this needed parkway.

Thank you for your attention to this matter,

Regards,

Melani Formisano

### Comments:

I URGE YOU TO RECONSIDER APPROVING THE NORTHERN ROUTE FOR THE WEKIVA PARKWAY. THIS ROUTE WILL IMPACT ADVERSELY FAR LESS COMMUNITIES AND POPULATED AREAS. IT SEEMS THAT ALL THE YEARS THAT POTENTIAL ROUTES FOR THE PARKWAY WERE BEING CONSIDERED, BUILDING NEW SUBDIVISIONS WAS BEING ALLOWED AND ENCOURAGED BY THE COUNTY. THE NOW PREFERRED ROUTE DOWN STATE ROAD 46 TAKES IT THROUGH MANY MORE HOMES THAN WHEN THE ROUTE WAS FIRST PROPOSED.

# Wekiva Parkway PD&E Study

Orange, Lake and Seminole Counties

## Comment Form

Date: 8/30/2008

Name Heather Wright

Address 343 Still Forest Terrace

City Sanford

State FL

Zip Code 32771

Please use this form to express your opinions about the Wekiva Parkway PD&E Study. You can email, fax or mail the form to the email address, fax number, or postal address below. To send by email, click on the "Submit by Email" button, and your computer's email client will open an email message for you to send with this form as an attachment.

### Comments:

To Whom it May Concern,

My name is Heather Wright and I live in the community, Tall Trees. I wanted to send this email to voice my concerns about the proposed direction of the Parkway. I am a huge supporter of connecting the 429 with Seminole County. I have a sister in Groveland that I pick up every weekend. As of now, on a good day it takes me 1 hour and fifteen minutes each way and more money than I care to think about; this will greatly be reduced with the Parkway. I am eager for the Parkway to get here, however I do hope that the Northern proposal will be considered. The current direction that is proposed will cut off the back of my neighborhood, and so many other valuable homes will decrease in value over night. I say that it will decrease over night because as soon as the current proposed path is made final, no one will want to purchase these homes. I LOVE my home, and I LOVE this area; I just want it to remain the unique area that it is. This area is so close to I-4, 417, the mall and the beach. I am really looking forward to adding the Wekiva Parkway to this list, however I do want you to consider how appealing Sanford will become if this parkway skirted around the populated areas to connected with the 417. I know that the major reason for putting in this road is the amount of people that now travel 46 to get to their jobs in Seminole County, but speaking as someone that made that commute before I moved from Clermont to Sanford, I would not mind the Parkway going north to avoid homes. The people that make this trip on a daily basis will be so happy to have this road that they would not care if it looped around several times;) I understand concerns about staying on budget, but as with any major decision the bigger picture has to be considered; and this includes the effect that the current direction will have on homeowners.

Thank you for your time

To send by email, click on the "Submit by Email" button, and your computer's email client will open an email message for you to send with this form as an attachment.

### Comments:

While the Wekiva Parkway Study has been going on for these last 10 or so years, the area from the Seminole County line/Wekiva River bridge to the I-4 interchange has become densely populated. Communities, schools, churches, and parks now cover most of the area being considered.

The impact on families and neighborhoods will be considerable, and negative. The concerns of all citizens affected by this project need to be addressed. We respectfully ask for your full consideration of all options available that would greatly lessen the impact on established communities.

Please use the back of this form if more space is needed to express your opinions.

### Comments:

Dear Commissioners:

Please be advised that I am opposed to building the Wekiva Parkway through at the proposed or current form. This will negatively impact neighborhoods. Please consider other alternatives that do not impact the residential. This should look and be a parkway feel with lots of green space and not a concrete city.

### Comments:

I am protesting the current RPA route that has been planned for the Wekiva Parkway. As a 10-year resident of Sylvan Lake Reserve, a community that will be directly impacted by the current RPA, I find it hard to believe that wildlife, homes, businesses, and people would be held in such disregard by the "powers that be". I currently back up to the St. John's River Management Conservation Area and enjoy a variety of wildlife including bears, raccoons, foxes, otters, and myriad birds not excluding families of sandhill cranes. All of these have seemed to have finally "settled in" after a prolonged period of development in the area along with the human families that will be affected.

I ask that the new northern alternative proposed by the Executive Committee of the Wekiva Parkway Community Coalition be given serious study and consideration by the Seminole County Expressway Authority and the Seminole County Commission. The northern alternative appears to take much less of a toll on existing homes and businesses and I can't imagine that it would be less cost-effective to take the WP through the northern route than to have to buy out all that would be necessary to pursue the current RPA. Unless, of course, someone with more money than the ordinary citizens affected has already "spoken" and the plan was predestined from the beginning.

I am opposed to the "Recommended Preferred Alternative" (RPA) route which, if approved, would cut a swath through our neighborhoods, destroy the natural beauty and quietude of the Wekiva River Basin area we all call home, and negatively impact our property values.

### Comments:

Please reconsider the placement of this beltway..... Please reject the Recommended Preferred Alternative! This parkway would disrupt the lives of so many when there are many other rural areas nearby. The landscape of this beautiful area has already been impacted enough with development..... don't ruin it by putting a beltway through the center of it!

Please look at the alternatives..... there are a couple of good ones which would probably cost less while impacting fewer families!

Thank you,  
Ann and Brian Ludlow

### Comments:

We moved to the Lake Forest Community because of its' natural beauty and seclusion from all the traffic nearby. While we are newcomers to the area, we have grown fond of Lake Forest and the privacy of the community. It is peaceful and relaxing.

We have now been informed of the pending plans for a highway that will pass right outside the entrance to our community. While we understand the importance of creating a safe haven for the animals to live in with a natural corridor beneath the overpass/highway, we are also extremely concerned that the proposed rerouting of the highway will negatively affect the Lake Forest community and the surrounding nearby communities including residential and commercial properties. The traffic will be horrible, there will be increased noise due to the speed limit increase and there will be increased pollution. Aesthetically, the "view" will be ruined. There will no longer be a normal county road. There will be, instead, a highway which will be even more dangerous than the road is now because of the speed limit increase. We will have to worry about access ramps just to get to and from Lake Forest.

We will be at the meeting on Tuesday, November 18th to support those people of the Wekiva Parkway Community Coalition. We do not approve of the proposed realignment of the Wekiva Parkway along State Road 46.

Date	Time	Regarding	
8/26/2009	11:15 AM	Brian S. forwarded me this to add to the database files:	

Dear Mr. Arthur,

Thank you for meeting with Brian Stanger and me on August 14, 2009 in reference to the Wekiva Parkway and your property. As we discussed, we are still in the Project Development and Environmental (PD&E) process, which must be finished before we can begin design.

Once the PD&E is approved and final alignment is chosen, we can complete design, right of way acquisition, and construction when funding is available. At the current time, it is not decided whether the Orlando-Orange County Expressway Authority (OOCEA) or the Department of Transportation (DOT) will design the Wekiva Parkway. However, we will continue to work as a team as we go from the study into the design.

If the final design substantially diminished access to your property, you and others in the same situation will be compensated and/or a new access will be provided. At this time, we cannot determine the location of that new access. Once the design starts, you and other members of the public will be kept informed as these important decisions are made.

Please let me know if I can be of further assistance to you.

Sincerely,  
Noranne Downs  
District Five Secretary

Brian Hutchings  
Public Information Officer

Peter Bernath  
Regarding  
Mr. Hutchins,  
The meeting was the OCEA Board Meeting minutes dated 11/19/08. Here is the  
statement that I was talking about. I will also attach the file

"Mike Snyder began with some history of the Concept and Feasibility Studies. In the summer of 2005 we held four workshops in preparation for the development of the 2030 Master Plan. At those workshops Osceola County, Brevard County, and Lake County made presentations asking the Authority to consider taking a look at expansion projects outside of Orange County. The 2030 Master Plan identified five concept studies and the Board authorized staff to move forward with these studies. Mr. Snyder showed the concept study areas on the map.

The primary goal of the Concept and Feasibility Studies was to determine whether there is a transportation need for any of the expansion projects. If it was determined that there was a need, the next step was to determine if it could be done in an environmental and community sensitive manner. If that answer was yes, then we then had to determine if it was financially viable.

Mr. Snyder presented the findings and recommended corridors for the Concept and Feasibility Studies:

SR 417 Northern Extension from SR 417 to Seminole/SR 46

The recommended corridor does not meet the transportation needs. Because we have not been invited into Volusia County, there simply is not enough traffic generated without the traffic coming from SR 415. The traffic around the Orlando-Sanford Airport and SR 46 does not justify the expense of a limited access facility in that region. This project was dropped several months ago from further consideration. "

If this project is still in the works, is there any way that you could send me a detailed map in PDF format that I could zoom in on to see exactly where the road is planned to go?

That would be great.

Thanks

Peter Bernath

4/1/2009 4:58 PM

Dear Mr. Bernath - Thank you for your inquiry. Unfortunately, I am unaware of the meeting minutes you are referring to in your email. If you could provide me additional information on what meeting the minutes were taken from, I might be able to provide you more specific information regarding your concerns in purchasing property at the Tall Trees subdivision. I can assure you, however, the Wekiva Parkway Project Development and Evaluation Study (PD&E) remains an active project. If you can provide me with your phone number I will be happy to give you a call to discuss further.

I hope this addresses your concerns. Please let me know if I can be of further assistance or if you have additional questions.

Best regards,  
Brian Hutchings  
Public Information Officer

I read in a recent meeting minutes that this extension of sr 417 connecting 417 to the wekiva expressway has been taken off of the planning board. I am planning on purchasing a home in the Tall Trees subdivision and would like confirmation that this project has been cancelled, as tha property that I am interested in would be affected by the planned route.

Could you please email a response as to whether or not this project will be taking place?

Thank you.

Peter Bernath

Kay

4/30/2009 12:23 PM

From Lake County Commissioner Linda Stewart

Hi. Thanks for forwarding this correspondence to me. The only thing I can think Ms. Borglum meant when she referred to "the modifications" she discussed with me is the possible solutions to the tolls for the citizens along the Parkway of which we are now involved in discussion with the orlando/Orange county expressway authority. I am completely happy with the preferred alternative plans which I voted to support.

Thanks.  
Linda

4/28/2009

5:00 PM

Dear Ms. Borglum,

Thank you for your email regarding your public records request for the Wekiva Parkway as it pertains to tolls and exit ramp details. The preliminary engineering and environmental study for the Lake County and Seminole County portions of the proposed Wekiva Parkway project are managed by the Florida Department of Transportation (FDOT); the Orange County portion is managed by the Orlando-Orange County Expressway Authority (OOCEA). At this time, only the Orange County portion of the proposed Wekiva Parkway is certain to be tolled. A funding plan is under development for the project by FDOT and OOCEA, which may include tolling of the Wekiva Parkway in Lake and Seminole Counties, but that has not, as yet, been determined.

We will be happy to mail to you at no charge a large scale plot of the recommended Preferred Alternative for Wekiva Parkway in the east Lake County area if you will provide your mailing address. We will also add your contact information and mailing address into our Wekiva database to ensure that you are notified of future public hearings and that you receive the next newsletter on the Wekiva project. The color plot on an aerial base map shows the preliminary concept and depicts the configuration and locations of the on/off ramps. Please note that the recommended Preferred Alternative concept is based on preliminary engineering, not final design, and is subject to change.

By way of history, the recommended Preferred Alternative concept was unanimously supported by the Lake County Board of County Commissioners in vote taken at their June 5, 2007 meeting, so it is not clear about your reference to modifications being discussed with Lake County Commissioner Linda Stewart. If you have details on this that you are able to provide, that would be helpful. However, our coordination with Lake County officials and all stakeholders in the three-county project area is continuous and on-going.

We hope this information is responsive to your request. Please let us know if you need further information or assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

RE: Exit Ramp and Designated Toll Wekiva Parkway Construction  
Project/Orlando-Orange County Expressway Authority

Pursuant to Florida Statutes Chapter 119, our Wekiva River Property Owner Association Board would like to view the details of the tolls and exit ramp for the Wekiva Parkway. We understand that modifications are in discussion with Commissioner Linda Stewart as of April 23, 2009 and we are requesting the most up to date specification of exit ramp and designated toll locations as of April 23, 2009.

I am looking forward to your email regarding when we will be able to view the details. These details will assist us in our search for what we can expect as North Lake County residents who rely on the State Road 46 Wekiva River bridge for access to work, school, groceries, etc.

Please provide us with the charge for the 1 page exit ramp and designated toll information, plus the cost of postage, prior to printing.

I thank you in advance for your assistance.

Regards,

Kay

6:21 PM

Honorable Sen. Baker:

Thank you for your time this afternoon to speak with me regarding concerns of the proposed closing of State Road 46 and County Road 46-A in North East Lake County.

I am in favor of the Wekiva Parkway system, but have researched the closing of SR 46 and CR 46-A to find that the burden of closing the roadway is greater than the non-measured suggestion that closing or altering these roadways would save "hundreds of animals." Closing this roadway would cause a measurable financial hardship on constituents and create a decline in the quality of life of my Lake County neighbors and for my family.

State Road 46 and County Road 46A should not be closed and it should remain as a service road for residents, and relatives of those residents, to utilize.

I am providing a copy of this email to Brian at the Wekiva Parkway Project Development and Environment Study, as well as to Lake County Commissioner Linda Stewart's office.

I was impressed with your quick response to my request to speak with you. Thank you for your continued research into the solution to this important transportation and quality of life issue.

Sincerely,

Kay

Regarding  
What the HELL are you doing to my rural setting! Why the HELL are you putting a light at Kelly Park Road and Rock Springs Road??? No one travels to the right. Everyone turns at that corner to the left! What have you done??? A light is needed at Mt. Plymouth and Kelly Park Road! So many people take 435 to 46 to Seminole Mall. Traffic has become dangerous at rush hour. So many close calls. You can't build near me thank God. I have the springs to protect me. Fix It! Get rid of that pole at Rock Springs Road and move it. When is the next thing for Apopka?

Contact		Carol Lauretta & Jason Bransford
Date	Time	Regarding
5/11/2009	3:08 PM	Hi Carol - I saw that my colleague Mary Brooks responded to your email regarding the Wekiva Parkway project. I wanted to introduce myself and to encourage you to contact me if you have any further questions on that project or if I can be of any assistance.
		Best regards, Brian Hutchings Public Information Officer 407-383-5817 construction@oocea.com
Contact		Brien
Date	Time	Regarding
7/20/2009	4:35 PM	We appreciate you taking the time to email us and express your concerns.
		Regarding your concern about the Wekiva Basin and the environment; this is one of the primary reasons that the Florida Legislature authorized in 2004 the Wekiva Parkway and Protection Act. It is within the parameters of this legislation that the Wekiva Parkway project has been created. Specifically, it will provide an alternative to Interstate 4, and relieve SR 46, US 441 and other area roads of traffic congestion resulting from growth and travel between Orange, Lake and Seminole Counties while at the same time engineered to minimize impacts to the community and to Wekiva River Basin resources, improve wildlife habitat connectivity between conservation lands and make travel safer for motorists and wildlife alike.
		Since the study area falls within the jurisdictions of OOCEA and the Florida Department of Transportation both agencies are jointly managing the Wekiva Parkway Project Development & Evaluation Study (PD&E). Together they continue to work with the all of the communities, local governments, state and federal agencies to complete the planning process. Currently, the Wekiva Parkway PD&E study team is waiting for approval from Federal Highway Administration (FHWA) on documentation submitted so that formal public hearings can be scheduled for public review and comment on the recommended Preferred Roadway Alignment. If you would like to be included on the mailing list for the notice of these hearings, please provide me your name and mailing address.
		Your concerns have been added to our database and will be considered during the ongoing review process for this project. Please let me know if I can be of further assistance or if you have additional questions or concerns.
		Best regards, Brian Hutchings Public Information Officer
7/15/2009	1:04 PM	Thank you for sharing your comments regarding the State Road 429 Wekiva Parkway Project Project Development and Evaluation Study (PD&E). Your concerns have been

added to our database and will be considered during the ongoing review process for this project. Also, you may be interested to know that the Lake County and Seminole County portions of the project, are being developed by the Florida Department of Transportation. The Expressway Authority is developing the Orange County portion.

After holding more than 300 meetings and having extensive community, agency and environmental interest group input, a Preferred Alignment for the Wekiva Parkway has been recommended that will be presented for public review and comment at formal public hearings. The Wekiva Parkway PD&E study team is currently waiting approval from Federal Highway Administration (FHWA) on documentation submitted so that these public hearings can be scheduled.

Once the hearings have been scheduled, we will be sure to alert all area property owners via a mailing, and will also get the word out with media alerts and of course the Expressway Authority's website at [www.ocea.com](http://www.ocea.com) <<http://www.ocea.com>>. If you would like to be notified of these public hearings, please provide me with your name and mailing address and we will add you to our mailing list.

Following the public hearings, the Seminole County Expressway Authority (consisting of county commissioners as well as city commissioners) will be presented with the findings from the hearings and will vote on whether or not they believe the parkway should move forward in their area. As a result, currently we have no firm schedule for final design, right-of-way acquisition or construction.

I hope this addresses your concerns. Please let me know if I can be of further assistance or if you have additional questions or concerns.

Best regards,  
Brian Hutchings  
Public Information Officer

Contact		Sue Brown
Date	Time	Regarding
5/26/2009	3:31 PM	Hi Sue - Since September of 2008, the Federal Highway Administration (FHWA) has been reviewing the Wekiva Parkway materials and making comments and requesting additional information. The project team has been responding to their requests. Once FHWA completes their review, we will be able to proceed with holding public hearings (possibly in early 2010). A final route has yet to be determined and the project team is still looking into funding options for the project (currently it is unfunded). Once these steps are in place, right of way aquisition will be able to move ahead. However, at this time, it is impossible to say when the right of way process will take place.
		Please let me know if I can be of further assistance.
		Best regards, Brian Hutchings Public Information Officer

5/26/2009	3:23 PM	When will you start purchasing properties in the path of the parkway?

6/3/2009 1:20 PM I spoke with Shirley Martin with DOT right of way regarding Mr. Carson's email. She said she would be happy to take a look at it and that she would contact Mr. Carson with any info she has and that she would cc me in her reply to Mr. Carson.

6/2/2009 6:54 PM Since he is a RE valuation consultant in Ormond Beach, we wouldn't have him on our property owners mailing list. This is the first contact I've seen from him.  
I can't help you with this request; suggest you speak to your OOCEA manager to see how they want to respond. Also, the property he's talking about appraising/selling is in Lake Co. which is FDOT's Wekiva Pkwy project area. But it doesn't sound like the property is within the WP project study area (i.e., "just west of the St. Johns River").

6/2/2009 3:30 PM Brian, I am appraising 626 acres of vacant landlocked wetlands in Lake County, just west of the St. Johns River and my client may be interested in selling their current holdings. I understand that the expressway authority has purchased several wetland and or landlocked parcels recently. Would you be so kind as to forward this request for a list of wetland and or landlocked parcels purchased by the expressway authority AND any appraisals used to purchase those parcels, I would be very grateful. I have appraised a few wetland and or landlocked parcels in lake and Volusia Counties in the past 4 years. I will be happy to share what I have with you.  
Thank you.

To: Brian Hutchings; Stanger, Brian  
Subject: Wekiva Parkway Status

Is there anything new to report regarding the FHWA route approval?  
Can you email me a copy of the September and October FDOT Status Reports for the Wekiva Parkway?

Thank you,  
Steve Devine

7/20/2009 4:36 PM

Mr. Devine,  
The documents are the section 4(f) and programmatic 4(f) evaluations. The environmental document is the Environmental Assessment.

The schedule link on the update page I sent you is not up to date. Once we update the schedule I will sent you a copy.

Brian M. Stanger, P.E.  
District Environmental Management Engineer  
District Five

7/16/2009 2:54 PM

Thanks Brian. I think I understand it, but I am not sure. Is the only thing preventing you from holding the final Public Hearings a response back or an approval from the FHWA after you submitted revised Section 4(f) documents to them?

What document are the Section 4(f) and Section 106 in reference to?

Looks like there is a schedule that is part of the Report. Can you send it also?

Thanks again  
Steve Devine

Sure here is the June report.

Mr. Devine,  
This is an internal scheduling tracker that the FDOT uses for all our projects. The status update sheet that Brian forwarded to you is the most up to date summary of the Wekiva Parkway PD&E project.

Hi Steve - no new updates now but that may change in the next few weeks. FHWA is still reviewing the Wekiva Parkway documents and they still have 'ball in court.' We are looking to hold public hearings in early 2010 if all goes as planned. Regarding the Status Report from FDOT, not sure what it is you are exactly looking for but will be happy to ask if you can let me know details on this request.

Thanks again Brian. Is CH2M Hill providing periodic status reports of the progress of the FHWA review that I can see?

Steve

5/6/2009 12:48 PM

Hi Steve - All things considered, and subject to change, the earliest we will be able to hold the Wekiva PD&E Public Hearings will be in early 2010. The review is being coordinated by FDOT, OCEA and facilitated by CH2M Hill. I think everyone in the study team is in agreement that the FHWA review process is taking far longer than anyone would have liked. Recently, several members of the study team drove up to Tallahassee to meet with FHWA and try to expedite the review process. That's where things stand now. Hopefully, in the near future, the review will be completed and we will be able to move forward with

this process.

I hope this is helpful.

Best regards,  
Brian Hutchings  
Public Information Officer

>>> <sdevine@bellsouth.net> 05/05/09 10:42 AM >>>  
Brian:

Do you have a tentative schedule for the Public Hearings? Is the review by the FHWA being coordinated through the FDOT, the Orlando-Orange County Expressway Authority, or directly with CH2MHill?

Is this normal for the route study, selection and approval to take so long? Seems like the FHWA would have been involved along with all the other groups as the study progressed.

Thank you,  
Steve Devine

5/5/2009 11:48 AM

Hi Steve - Yes, FHWA is still conducting their review, requesting additional information and asking more questions. All requested information is being provided and we are hoping that they will conclude their review in the near future.

Best regards,  
Brian Hutchings  
Public Information Officer

>>> <sdevine@bellsouth.net> 05/04/09 5:47 PM >>>  
To Brian Hutchings

Orlando-Orange County  
Expressway Authority

Brian:

Are you still waiting for the Federal Highway Administration to approve the route selected in the PD&E Study for the Wekiva Parkway? If so, do you have any idea when that might happen? If they have approved the route, do you know when the Public Hearings will be held?

Thank you,  
Steve Devine  
sdevine@bellsouth.net  
407-330-9598

3/10/2009 2:51 AM

Hi Steve - My understanding is that FHA is conducting a comprehensive review of everything. They started the review process in September 2008 and continue to submit questions for clarification. I would not call the process a formality based on the time/effort FHA and project staff at this end have put into this review process. I know we were

hoping to hold the public hearings earlier but based on the review process, it was not possible. Hopefully, we will be on track to hold them on late summer/early fall. I am keeping my fingers crossed that it be so!

Let me know if you need anything else.

Take care,  
Brian

>>> <sdevine@bellsouth.net> 03/09/09 10:21 AM >>>

Thank you for the quick response Brian. Last I had heard the Federal highway Administration was only looking at the environmental impacts and their approval was a formality that would be timely so that the Public Hearings could be held in February. Has something changed?

Thank you,  
Steve

3/10/2009 12:21 AM

Hi Steve - Sorry about the old info on our website. The Wekiva Parkway webpage information has been updated recently, I am just waiting for it to post - it should be up by the end of the week. To answer your question, it looks like if all goes according to plan that we will be looking at holding the public hearings sometime late summer/early fall of this year. Currently, the Federal Highway Administration is conducting a comprehensive review of the various alignment options, public input to date, environmental impact etc. We hope to have their final report sometime in the near future. Once we receive that, we will be able to move forward and start planning for the public hearings. Once scheduled, we will be sure to alert all area property owners via a mailing, and will also get the word out with media alerts and of course our website.

I hope that answers your question. Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings

1/5/2009	5:10 PM	Dear Mr. DiFonzo - Attached are renderings which show perspectives looking north on Orange Blvd. at Walden View Dr. and looking west on Wilson Rd. from Tall Trees. I hope this helps. Also, please be aware that only conceptual preliminary engineering has taken place thus far - no final plans have been reviewed or approved.

Best regards,  
Brian Hutchings  
Public Information Officer

1/5/2009	4:53 PM	Dear Mr. DiFonzo
----------	---------	------------------

Thank you for your inquiry about the State Road 429 Wekiva Parkway Project Development and Environment Study. The Seminole County portion of the project, which you inquired about, is being developed by the Florida Department of Transportation (along with the Lake County portion). The Expressway Authority is developing the Orange County portion.

After extensive community and agency input, the two agencies have selected a Preferred Alignment for the Wekiva Parkway that will be presented for public review and comment at formal public hearings. The public hearings have not yet been scheduled as we are still waiting on approvals from the Federal Highway Administration. Rest assured, we will be sending out advance notifications to the public once the hearings have been scheduled. This information will also be posted on the Expressway Authority's website at [www.ocea.com](http://www.ocea.com).

Following the public hearings, the Seminole County Expressway Authority (consisting of county commissioners as well as Sanford and Lake Mary city commissioners) will be presented with FDOT's findings from the hearings and will vote on whether or not they believe the parkway should move forward in their area.

On the parkway maps, the alignment or roadway is indicated in yellow and the bridges are indicated in green (at the cross streets). Where possible in some areas the roadway will be brought down closer to ground level. However, in areas where there are several bridges in relatively close proximity, the roadway will be largely elevated.

A noise assessment has been done as part of the PD&E Study, and determinations made as to which locations meet the federal criteria for sound barriers. You may view the details of this report on the Expressway Authority Web site at <http://www.ocea.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=NoiseStudy>.

Typically, fairly dense development that abuts the roadway is required to meet the cost-benefit requirements for sound barriers.

In the area of the Wilson Road crossing the roadway will be approximately 20+ feet high. The bridges would typically only be long enough to span the side street including holding the public hearings and getting agency approvals sometime in 2009. The FDOT does not have funding currently programmed for the next step, final design, but the FDOT, Expressway Authority and other agencies are diligently working on a funding plan to accelerate development of the parkway. Once the funding is acquired, it will still take several years to design the project and purchase the needed right of way before construction could begin.

Owners of developed properties impacted by the parkway will be compensated as required by law.

I hope this addresses your questions. Please feel free to call or email with other questions or concerns.

Thank you,  
Brian Hutchings  
Public Information Officer

12/9/2009	5:20 PM	Excellent! Glad to be of assistance on the map. Not sure who to put you in touch with regarding the septic tank issue. I would start with your county commissioner and/or state representative.	

Good luck,  
Brian

>>> "Erickson, Eric" <eerickson@seminolecountyfl.gov> 12/09/09 11:29 AM >>>

Brian,  
The PDF was sent to me from Dave Lewis. Just got off the phone with him. The service/frontage road concept looks great to me. Getting on the expressway (east-bound) in Seminole County may produce some static from some people in Lake but you can't please them all. If we can lend any support to this alignment let me know.  
Another issue: The septic tank up-grade we are galvanized in our opposition. If you have any updates or can refer me somewhere to track the septic issue I would appreciate it.  
Thx, Eric - Wekiva Estates

12/9/2009	2:17 PM	Brian, Can you send me a PDF of the SR 46 service road concept? I won't be able to attend the public meeting on the 17th. I'm @ 31243 SR 46, a mile west of the river. Three of my neighbors have heard of three different alignment concepts for SR 46. I can update them with the actual alignment. All nine lot owners of Wekiva Estates fully support the Parkway construction, the sooner the better. Thx, Eric 407-665-5666 / 321-303-1076

6/16/2009	7:34 PM	I called Mr. Fabrizio and left him a voicemail message asking him the specific address of the property in question and the closest intersecting streets. I also asked him to let me know if he is available to meet at CH2M Hill on Wed. June 22 or Thurs. June 23 and at what time. I gave him my phone and email info so I should hear back from him shortly.
-----------	---------	---

6/15/2009	5:30 PM	Notes from Sep. 08 meeting Mary B. had with Mr. Fabrizio: PIO met with Lou Fabrizio and David Salanitro/Primerica Group at OOCEA conference room. Lou said they have property on the SW corner of SR 46 and Orange Boulevard in SC and in LC on CR 437 and SR 46 (no direct impact to that one, he acknowledged). He asked about access to the Wekiva Parkway? PIO noted there will be slip ramps in various locations in Seminole County, noted if you blow up the map on the web site, you can see them. They also asked about the configuration of the road in the area of their SC property, which PIO discussed. PIO noted will be at grade in that location; they're just east of where the elevated parkway will turn south from 46 to go to SR 417. PIO noted no apparent impacts to their property access on SR 46 or Orange Boulevard. Lou asked about projected traffic? PIO noted 2030 projections show upwards of 90,000 vehicles a day in some locations. PIO noted traffic maps are on the web site under the viable alternatives meeting exhibits. They asked about traffic coming from different directions and access to property, which PIO pointed out on the board. We also discussed SR 417 interchange and ramps to International Parkway, as well as interim FDOT project in that area. Lou asked if this was it? PIO noted it's the preferred alternative that's a result of more than three years of this study. It is what has been determined most closely minimizes impacts will meeting the transportation need. PIO noted they may hear about a coalition of HOA's pushing another alternative. PIO pointed out that potential route on the board, noted associated issues. Lou said he'd heard some homeowners were battling Brenda Carey on something...Lou asked about the schedule? PIO went over funding challenges, project breakdown (DOT vs. OOCEA). PIO noted it will likely be done in sections and OC probably first.

Subject: PD&E study District Five question

Good Morning:

I live on Highway 46 in Lake County Florida. I noticed a PD&E study for highway 46 between 441 running to the Seminole County line. Could you please tell me what that project consists of. Is this in conjunction with the Wekiva Beltway project or is it something totally different. Are there maps of the proposed project.  
Thank you

Mark Fields

1/28/2009

12:17 PM

Hi Brian Hutchens:

My name is Mark Fields, address 29540 State Road 46. The formal meeting you mention to take place after FDOT signs off on the proposed route, has been held in limbo now with the same excuse that FDOT must sign off for two years now. The impact to this area hasn't really changed since proposed in the first meeting I attended in 1987. They know, after all the millions that have been spent, and with all the studies and research that has been done, the route has been chosen. After all there isn't any more land in this area that the State can purchase in the name of the Greenway Project . They already own it all and we are totally surrounded by State owned land.

Thank you,

Mark Fields

Hi Mark (I did not catch your last name or your mailing address in your email) - After more than 200 agency and community meetings and extensive evaluations, once the Federal Highway Administration (FHWA) signs off on the required environmental documents so they can be published for public review, the Expressway Authority and Florida Department of Transportation (FDOT) are hoping to hold the long-awaited, formal public hearings for the Wekiva Parkway. The proposed 27-mile roadway would begin at the planned SR 429/SR 414 (John Land Apopka Expressway) interchange at US 441 in Apopka, go north and then east along the current SR 46 alignment and connect to I-4 near Sanford. Additionally, SR 46 would be realigned beginning at US 441 and SR 46 in Mount Dora and would connect to the Wekiva Parkway at a systems interchange in northwest Orange County.

The Wekiva Parkway Project Development and Environment (PD&E) Study, is being conducted jointly by The Florida Department of Transportation - District Five - and the Orlando-Orange County Expressway Authority. The Expressway Authority is responsible for the portion of the project in Orange County (which will be tolled) and FDOT is overseeing the Lake and Seminole County portions of the roadway. The Wekiva Parkway PD&W Study was designed to find the best possible route with the least amount of Social, Cost, and Environmental impacts to this region. (REFER TO MAP) From this intensive process, came the Preferred Alignment. Once the FHWA approves a Preferred Alignment, additional public meetings will be held. Homeowners and businesses in the area will be notified once these meetings are scheduled and this information will be also posted on the OOCEA website at [www.ooccea.com](http://www.ooccea.com) <<http://www.ooccea.com>>. Dates for these public meetings have yet to be set.

I hope that answers your question. Please let me know if I can be of further assistance.

Best regards,

Brian Hutchings

Hi Mary - After more than 200 agency and community meetings and extensive evaluations, once the Federal Highway Administration (FHWA) signs off on the required environmental documents so they can be published for public review, the Expressway Authority and Florida Department of Transportation (FDOT) are hoping to hold the long-awaited, formal public hearings for the Wekiva Parkway. The proposed 27-mile roadway would begin at the planned SR 429/SR 414 (John Land Apopka Expressway) interchange at US 441 in Apopka, go north and then east along the current SR 46 alignment and connect to I-4 near Sanford. Additionally, SR 46 would be realigned beginning at US 441 and SR 46 in Mount Dora and would connect to the Wekiva Parkway at a systems interchange in northwest Orange County.

The Wekiva Parkway Project Development and Environment (PD&E) Study, is being conducted jointly by The Florida Department of Transportation - District Five - and the Orlando-Orange County Expressway Authority. The Expressway Authority is responsible for the portion of the project in Orange County (which will be tolled) and FDOT is overseeing the Lake and Seminole County portions of the roadway. The Wekiva Parkway PD&W Study was designed to find the best possible route with the least amount of Social, Cost, and Environmental impacts to this region. (REFER TO MAP) From this intensive process, came the Preferred Alignment. Once the FHWA approves a Preferred Alignment, additional public meetings will be held. Homeowners and businesses in the area will be notified once these meetings are scheduled and this information will be also posted on the OOCEA website at [www.ooccea.com](http://www.ooccea.com). Dates for these public meetings have yet to be set.

I hope that answers your question. Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings

Brian:

Can you please provide me with any updated information on this project? My client has property on Wayside Drive in Sanford and we are trying to provide him with updated information on the status of the project. I understand that the preferred alignments have been finalized and a public hearing will be held in early 2009. Can you please confirm that the alignment sheet on the website is the final preferred alignment and also when the public hearing will be held?

Thank you in advance for your assistance.

Date	Time	Regarding
4/6/2009	6:28 PM	Hi Karen - I looked into this for you and you will be pleased to know that your mother's property will not be directly impacted by either the Wekiva Parkway or the SR 414 John Land Apopka Phase II projects. Please let me know if you have any additional questions or concerns.
		Best regards, Brian Hutchings Public Information Officer
4/6/2009	5:07 PM	Mr. Brian Hutchings Public Information Officer Good Morning Mr. Hutchings: Thank you for your time and helpfulness on the phone this morning. We are writing in regard to our Mother, Margaret Glass who resides at, and owns the property at the address: 761 N. Plymouth-Sorrento Road, Apopka, FL 32712. The Parcel ID # is 062128717201111. It is our understanding that the Beltway that is part of the Wekiwa Parkway is scheduled to begin construction in the near future (relatively speaking), and we are interested in learning how it will relate to the above referenced piece of property. Mom Glass is interested in selling her property soon as she is aging. Any and all information that you can provide will be greatly appreciated. Please phone either James or Karen Glass at (352)589-2376. If you wish to phone Margaret Glass, her phone is (407)886-1497. She however has indicated that she would prefer one of us to speak with you. Thank you very much, Karen Glass
4/1/2009	5:09 PM	I called Ms. Glass and a gentleman picked up the phone saying Glass Nurseries. I asked for Ms. Glass and he said she was unavailable. I asked if I could leave her a message and he said yes. I told him I was from the Authority calling regarding the Wekiva project and left him my phone number.

I had a call from a Mrs. Karen Glass(352-589-2376), requesting information regarding a road that she had heard was going to be constructed in Plymouth. Mrs. Glass mentioned that the road in question is north of Plymouth / Scerento Road off of 441, and is annexed to Apopka. If you have any information regarding this, could you forward to me or if you like, I have added her phone if you would like to call. Thanks, Cindy

Doug Goldin  
Regarding

Time  
11:36 AM

Hi Doug - Currently the only portion of the proposed Wekiva Parkway which is certain to be tolled is the Orlando-Orange County Expressway Authority portion in Orange County. The portions of Wekiva Parkway in Lake and Seminole Counties are the responsibility of the Florida Dept. of Transportation. Decisions on tolling those portions have not been made, as a financing plan is still under development. In Lake County east of US 441 near Mount Dora, SR 46 is proposed to be realigned to connect to the Wekiva Pkwy in Orange County. East of Mount Plymouth the existing SR 46 would end at an interchange with Wekiva Pkwy. East of that to the Wekiva River, remnants of existing SR 46 would remain only for local access. East of the Wekiva River in Seminole County, frontage roads on either side of Wekiva Pkwy are proposed for local access. None of the realigned or remnant portions of SR 46 in Lake County, or the frontage roads in Seminole County, would be toll facilities, but the Wekiva Parkway may or may not be tolled depending upon the conclusions of the funding plan. The current design concepts are only preliminary. It is a very expensive project and all funding options, including tolling, are being examined.

I hope that clears things up.

Have a great weekend.

Brian Hutchings  
Public Information Officer

2/5/2009 7:27 PM

Thanks Brian. I really appreciate the response because we are buying our first house and I don't want to regret it later on. Ok, so just to clarify, we are looking at a home that is on the south side of SR46 between longwood-markham and orange. Would the current preferred route of the Wekiva Parkway project have a toll road that would be situated just north of SR 46 (as if SR46 was the accessroad or side road alongside the highway) or would folks take SR 46 to get on to the Wekiva Parkway which would start further due West?  
Thanks,

Doug

2/5/2009

6:40 PM

Hi Doug - Final plans for the proposed route for the Wekiva Parkway project have not been determined. Under the current preferred route, SR 46 would not be tolled and the proposed Wekiva Parkway would be constructed to the northeast side of SR 46. As I mentioned, no final route has been approved at this time. Even when/if a final route is approved, the next challenge will be to try to find funding to build the new roadway. So, unfortunately, there are no firm answers for me to provide you at this time. I would encourage you to periodically check our website at [www.oocsa.com](http://www.oocsa.com) for updates on the Wekiva Parkway PD&E project, or you can always contact me with questions. I am happy to be of assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

>>> doug goldin <douglasgoldin@gmail.com> 02/05/09 11:35 AM >>>  
Brian,

I am considering buying a house right off of SR 46 in Sanford, West of I4. How would the Wekiva Parkway effect the roadways? Would SR 46 be turned into a toll road or would the toll road be built next to SR 46, and if so, would the toll road be north or south of SR 46.

Thank you,

Doug Goldin

Jerry and Mae Hawthorne  
Regarding  
I called Mr. Hawthorne and provided him with this information:  
Hawthorne Realty

Brian:

Per our conversation today, and since you are following up with Mr. Hawthorne, I would suggest you ask him to send in a written request for advance acquisition of his property to Shirley Martin our District ROW Manager. It would be helpful for him to outline his situation and provide contact information for us to follow up with once we have time to review the situation.

Her contact information is as follows:

Ms Shirley Martin  
District Right of Way Manager  
Florida Department of Transportation District 5  
719 Woodland Boulevard  
Deland Florida 32720

To: Brian Hutchings, QCA (Wekiva Pkwy PIO)

This is in regard to the request you received from Mr. Hawthorne on Wilson Rd. in

Seminole Co. concerning hardship R/W acquisition.

The designated R/W contact for Wekiva Parkway at FDOT D5 is Mike McPhail  
386-943-5071).

8/22/2009 12:56 PM Mr. Hawthorne called to say that he believes FDOT purchased several plots of land that abut his property located at 1450 Atlantic Road just off Wilson Road. He said he owns 1 parcel of land that is broken into 5 lots. He said he is very sick and needs to go into an assisted care facility. He said he believes his property is on the 'hit list' for the Wekiva Parkway project and he would like to expedite a sale so he can pay for his care. I said I would look into it and that I would get back to him with an answer. I emailed this info to Dave Lewis per our conversation yesterday at the Wekiva Progress meeting.

The best way to contact me via mail is P.O. Box 682 Plymouth, FL 32768  
The best email is oneloghome@net.net.  
Thanks for keeping me in the loop on this.  
Jerry Holder

7/29/2009 4:21 PM Dear Mr. Holder - We are in the process of updating our community organization database files and I wanted to make sure your information was up to date. I have your contact information listed as follows:

Jerry Holder  
6229 Plymouth Sorrento Road  
Sorrento, FL 32776

If that is not correct, would you mind sending me an email with corrections? Also, a quick update on the Wekiva project, we are waiting for the Federal Highway Administration to complete their review of the project information, once they have released their report, we will be able to schedule public hearings. We want to make sure that we have your correct contact information to ensure that you are notified when we hold these hearings. If all goes as planned, we should be able to hold the public hearings in early 2010.

Please let me know if you have any questions.

Best regards,  
Brian Hutchings  
Public Information Officer

2/2/2009 11:46 AM I received a call from Jerry Holder regarding the status of the Wekiva Parkway. I reviewed with him that we are working with the FHWA to get some issues resolved on historic impacts. Jerry's family owns the property where the Strite House is located. He has been supportive of the project but is anxious to get a sense of when the project may move forward. He is making some decisions regarding the use of his land and indicated it would be beneficial to get a handle on when his land may be needed. I indicated that we can not precisely pin down the time frame although the Expressway Authority remains interested in advancing the project if they can work out a financing approach. He understood but it became clear that it might be beneficial for someone to chat with him regarding the potential acquisition of his land.

District Right of Way Administrator-Relocation  
(386) 943-5047  
I spoke with Mr. Horn this morning. He said that the group would like to meet sometime after April 1st. I said that would be good in order for everyone to have ample time to adjust their schedules. He asked about the Sorrento Christian center and if there was any cost involved in holding the meeting there. I said I did not know and that the last time we held a meeting with homeowners at the Christian Center, it was reserved by the homeowners. Mr. Horn said he would contact the center and make arrangements and that he would be back in touch with time/date options.

3/12/2009 2:47 AM Hi Paul - I wanted to let you know that I received your email and that I will be back in touch soon.

Spoke with Michelle M. on a number of Wekiva issues. She mentioned that Mark C. said WPCC website had public hearing info on their site. I checked:  
Formal Public Hearings Again Delayed: The formal public hearings, originally planned for summer 2007, have now been targeted for 2-4 SEP 2009.

Hi Brian,

Charlie is asking for the minutes of the 10/27/2008 meeting that we (The WPCC) had at the FDOT R5. The primary subject of the meeting was to review the FDOT/CH2M Hill summation of the WPCC Northern Alternative (Map G). Deana was present and I believe she was recording, as Dave Lewis states below. To my recollection and investigation, we have not received these minutes in either a recorded audio format or written/email.

I will be at the Wekiva River Basin Commission meeting tomorrow, if you would like to give them to me then. I will have a laptop and memory stick available if it is electronic.

TX. DWM.

Subject: Wekiva Pkwy Study/SR 46 Bypass Study

Happy New Year, Mary,

I was wondering if you could be of assistance. I am looking for a "Project Study Area" map for Wekiva Parkway and SR 46 Bypass.

If you could let me know how and where I could obtain one, it would be very appreciated.

Any questions, please do not hesitate to email or call me at 407-657-9200.

Cc: Martin, Shirley  
Subject: RE: Wekiva Pkwy - Requested Hardship Acquisition

Brian:

Per our conversation today, and since you are following up with Mr. Hawthorne, I would suggest you ask him to send in a written request for advance acquisition of his property to Shirley Martin our District ROW Manager. It would be helpful for him to outline his situation and provide contact information for us to follow up with once we have time to review the situation.

Her contact information is as follows:

Ms Shirley Martin  
District Right of Way Manager  
Florida Department of Transportation District 5  
719 Woodland Boulevard  
Deland Florida 32720

Please let me know if you need anything else from me on this issue.

1:35 PM

Sorrento Christian Center Meeting 2 p.m. Monday, February 9, 2009

Wekiva Parkway PD&E Attendees:

Brian Stanger - FDOT  
Dave Lewis - CH2M Hill  
Mike Snyder - OOCEA  
Brian Hutchings - OOCEA PIO

Property Owner Attendees:

Markus W. Fields - 29540 State Road 46  
Matthew F. Blake - 29512 SR 46, Sorrento, FL 32776  
Jack McIntosh - 110 Wekiva Park Drive, Sanford, FL 32771  
Marilyn and Phil Dorman - 31146 Old McDonald Road, Sorrento, FL 32776  
Beverly Cauther - 28700 CR 46A, Sorrento, FL 32776  
Elizabeth Tutlon - 31426 Old McDonald Road, Sorrento, FL 32776  
Shane and Tracy Chavis - 28541 SR 46, Sorrento, FL 32776  
Joe McDonald Sr. - 31200 Old McDonald Rd., Sorrento, FL 32776

Jack and Kathy McDonald - 28015 SR 46, Sorrento, FL 32776  
Judy Neal Benton - 22437 Coronado Somerset Drive, Sorrento, FL 32776  
Emma Sterling - 1201 E. Robinson St., Orlando, FL 32801  
Jim Stivender Jr. - Lake County

Meeting Notes:

Brian H. asked attendees to sign in on sign in sheet. Dave L. provided a history of the proposed project and provided handouts to the dozen attendees. Dave spoke about the Wekiva Conservation District, Wekiva River Basin Commission, etc. He didn't get far before the questions began...

Group Questions in unison: What about fire department access, mail access, why blocking off SR 46. What happens if the new parkway closes down due to an accident? If it closes, how will the kids get home from school, how will emergency vehicles respond? Why should we be forced to get on the beltway just to get to the store to pick up groceries? We don't like the idea of a school bus on a highway, it's unsafe. Have the sheriff, school district, medical response folks approved of this plan?

Mike Snyder stepped in to further explain the process. He said they were trying to get Federal documents approved then we will hold public hearings. He then walked group through the preferred alternative and addressed access concerns.

Group: The preferred alternative would ruin access to neighborhood continuity of no less than three neighborhoods.

Mike S.: That is why we are requesting public input. That is why we held workshops.

Group: No one from here attended those meetings.

Mike: I was at those meetings and hundreds of folks were also there. We have been through 5 years of meetings to get us to where we are today. When we hold public meetings, no date yet, I urge you to attend and share your concerns.

Mike: I understand, the plan we have is a plan you don't like.

Group: You got that right!

Mike: This preferred alignment is what we are taking to the public hearing. But, often these change based on public input. That is why it is so important for you to attend. At this meeting you will have an opportunity to have your input recorded. If you can't come, you need to send in a letter with your comments. What will occur after the public hearings we will take a look at the public comments and other input and will go to Lake County Commission, Seminole Commissioner, Parkway Commissioners etc. to obtain final approval before we move ahead.

Kathy McDonald: "So, it's not too late to make a change."

Mike: "If it was too late, I would tell you it was too late but I am telling you there is an opportunity for change." What we are trying to do at the end of the day, everyone will not be satisfied, but we are going to do our best to make a road that works for the community. A final decision has not been made. It is close but it has not been made. We will let you know when we hold the public hearing. (note: BH be sure to give Kathy McDonald a heads up on this).

Group: Give us an access road to the river and we will be happy. Will we be forced to use this road and pay tolls?

Mike: We are close to looking at that stage of the issue.

Group: When are these public hearings going to take place?

Mike: We are looking at several months, even if the FHWA approved the alignment today.

Group: How is this going to be funded and when are you going to start buying right-of-way?

Mike: We hope to have a funding plan worked out soon. From the date we can sit here and tell you there is a funding plan for this project, we have to get through the state and federal process for the alignment (PD&E process), we hope to get through that this year. Once approved and with the funding plan in place, we would immediately start the design at of the roadway which will include the making of maps which will help to identify what properties will need to be purchased. We will take a close look at this during the design process.

Group: So, no funding in place now?

Mike: That is correct. But we are working on a funding plan. If you are impacted we will try to come out and meet with you as quickly as possible.

Group: How will we be notified if our home/property will need to be taken? We are in purgatory!

Jack M.: Lots of old information on Website.

Brian H.: We will be working on this in the very near future to make it more user-friendly, more informative, and more up to date.

Group: We want to make sure we are all notified of the next public hearings. We feel that before we were not properly notified.

Mike: Brian is the new PIO and make sure he has your contact info and he will be in touch with info on the public hearings.

The formal part of the meeting ended at 3:00 p.m. We mingled with the group afterward and addressed individual questions.

Contact		Robin McEwen	Apopka Woman's Club
Date	Time	Regarding	
7/21/2009	6:12 PM	Robin McEwen at 407-814-0935 is the new contact for the Apopka Woman's Club. Robin said that they will be holding new elections in the next couple of months but she was happy to serve as the point of contract. She said she is in charge of scheduling their speakers and that they would love an update on the Wekiva project - she remembered me presenting to them about 6 months ago. I said we might have something big to report in the next few months and gave her my contact info and said give me a call in a couple months and I would welcome having the opportunity to present in front of the ladies again.	

Contact		Tom McKane	Lake County Sheriff's Office
Date	Time	Regarding	
12/7/2009	12:53 PM	Left Sgt. McKane a vm regarding security for the Dec. 17 Wekiva Pkwy public workshop at Sorrento Christian Center.	
12/4/2009	4:52 PM	Hi Sgt. McKane - I wanted to let you know that a public workshop has been scheduled at	

the Sorrento Christian Center on Thursday, December 17 between the hours of 5pm and 8pm. A formal invitation to attend was mailed but I wanted to touch base with you to make sure you were aware of it. Also, we would like to arrange to have a uniformed officer there since we expect it to be a fairly large crowd in attendance. Can you please let me know what the cost would be to have an officer on site from 4:30pm-8:30pm that evening and how we should arrange payment for the officer?

Thanks and have a great weekend.

Brian Hutchings  
Public Information Officer

9/24/2009 12:11 PM Sgt. McKane to attend the Sorrento Christian meeting to discuss Wekiva Parkway Monday evening Sep. 28.

8/26/2009 4:52 PM Hi Sgt. McKane - it was great meeting you all yesterday. I wanted to let you know that I have added your information to our Wekiva Parkway Database and that you will receiving any future newsletters/public notices on the project.

Please let me know if you need anything further from this end.

Thanks,  
Brian Hutchings  
Public Information Officer

8/19/2009 12:26 PM FYI - From Sgt. Thomas McKane:  
Our agency has extended an invitation to Lake County Commissioner Stewart and we are awaiting her response. So far the Sheriff and I are definitely going to be there. As I get more info, I will provide it to you.

Thanks,  
Tom

Sergeant Thomas D. McKane IV  
Traffic Enforcement Unit / Motor Unit  
Special Operations Bureau

8/18/2009 1:59 PM Hi Sgt. McKane - It looks like we are all set to meet at the Lake County Sheriff's Brian Hutchings Department at 2PM on Tuesday, August 25th. Do you have a list of attendees on your end? That will be helpful for us. I believe you mentioned that you would know who would be attending once we established a date and time. Please let me know when you get the chance. We look forward to meeting your group next week to discuss the Wekiva Parkway project.

Thanks,  
Brian Hutchings  
Public Information Officer

>>> "McKane, Thomas" <Thomas.McKane@lcso.org> 08/11/09 1:33 PM >>>  
I believe the Sheriff will have a better idea of who can attend once we pick a date.

Sergeant Thomas D. McKane IV  
Traffic Enforcement Unit / Motor Unit  
Special Operations Bureau

8/14/2009 2:35 PM Hi Tom - I have been asked to see if you all are expecting detailed information on projected traffic operations, especially in the US 441/SR 46 area. This will help us to determine who from our team will need to attend the meeting.

Thanks,

Brian Hutchings  
Public Information Officer

8/14/2009 11:32 AM Great, thanks Kristy. We will look forward to seeing everyone then.

Best regards,  
Brian Hutchings  
Public Information Officer

>>> "Marden, Kristy" <Kristy.Marden@lcso.org> 08/13/09 4:29 PM >>>  
Mr. Hutchings:

Sergeant McKane forwarded your email to me to confirm a date/time for the meeting with Sheriff Borders and others regarding the Wekiva Parkway. I have marked the Sheriff's calendar for Tuesday, August 25, 2009 at 2 p.m. and we can host the meeting at the Sheriff's Administration Building located at 360 West Ruby Street, Tavares-Sheriff's Conference Room, 2nd floor.

As for additional people who should attend, I will defer to Sergeant McKane.

Thanks and have a great day. We will see you on the 25th.

Kristy Marden  
Director of Administration  
Lake County Sheriff's Office

8/13/2009 2:08 PM Hi Tom - it looks like the team is available to meet with you all either Wednesday, August 19, 2009 at 3 p.m. or Tuesday, August 25, 2009 at 2 p.m. Please let me know which of those dates works best and I will finalize the meeting at our end.

Thanks,  
Brian Hutchings  
Public Information Officer

8/11/2009 4:38 PM Very good - you should be hearing back from me before the end of the week.  
Brian Hutchings  
Public Information Officer

>>> "McKane, Thomas" <Thomas.McKane@lcso.org> 08/11/09 1:33 PM >>>  
I believe the Sheriff will have a better idea of who can attend once we  
pick a date.

Sergeant Thomas D. McKane IV  
Traffic Enforcement Unit / Motor Unit  
Special Operations Bureau

Thanks Tom - I forwarded this to the project team and will be back in touch with meeting Brian Hutchings  
dates once I hear back from them. Also, were you going to provide a list of folks from  
your end that plan on attending this meeting. I would like to pass that on to the Wekiva  
Parkway project team as well.

Best regards,  
Brian Hutchings  
Public Information Officer

>>> "McKane, Thomas" <Thomas.McKane@lcso.org> 08/11/09 10:33 AM >>>  
Brian,

The following dates are open on the Sheriff's calendar for the Beltway  
presentation.

Wednesday, August 19, 2009 at 3 p.m.  
Thursday, August 20, 2009 at 3 p.m.  
Tuesday, August 25, 2009 at 2 p.m.

Please let me know what works for you guys and we can host the meeting  
here in Lake County.

Sergeant Thomas D. McKane IV  
Traffic Enforcement Unit / Motor Unit  
Special Operations Bureau  
Lake County Sheriff's Office  
Gary S. Borders, Sheriff

8/6/2009 11:40 AM

Ms. Hodges,  
I was given your contact information by Noble Olasimbo as a possible contact for the  
Beltway Project. Our agency would like to request a meeting with project representatives  
to get an overview of the project and how it will affect Lake County Public Safety and our  
citizens. Please advise if you are the correct person to coordinate this or please provide  
me with the correct contact person.  
Thanks in advance,  
Tom McKane  
Sergeant Thomas D. McKane IV

Special Operations Bureau  
Lake County Sheriff's Office  
Gary S. Borders, Sheriff  
360 W. Ruby Street

Contact		Karen McMican	Zellwood Station Club-Co-Op Inc.
Date	Time	Regarding	
8/19/2009	5:08 PM	I called Ms. McMican to update our Wekiva Community Organization contact records. She was still the HOA president but had a different mailing address than the one in our system. I updated the database with her correct mailing address.	

Contact		Anita McNamara	
Date	Time	Regarding	
8/10/2009	6:09 PM	I called Ms. McNamara and updated her on wehre things are right now with the Wekiva project and said that we are hoping to hold public hearings in early 2010. She asked if there was only going to be one. I said no, that we would hold at least 3 - one for each county (Lake, Seminole, and Orange). She said thanks and said she might be in touch again for an update. I said please do.	
8/10/2009	6:09 PM	Good morning. I am a frequent visitor to the Wekiva Parkway web pages. I don't see any updated schedules or timelines and I had heard from a colleague at another municipality that public hearings concerning the final locations of the interchanges would be held near the end of this year. I just want to verify that this is the case because Orange County is required by Statute to establish interchange land use plans within 12 months of the approval of the interchange locations. Given our public hearing processes, this is a tight schedule on our end. Any information of these dates would be extremely helpful. Thank you very much. Anita McNamara, AICP Principal Planner Orange County Planning Division 201 S. Rosalind Avenue Orlando, FL 32801 <a href="http://www.orangecountyfl.net/planning">www.orangecountyfl.net/planning</a> < <a href="http://www.orangecountyfl.net/planning">http://www.orangecountyfl.net/planning</a> >	

Contact		Brucene and Curtis McNeil	
Date	Time	Regarding	
3/25/2009	7:22 PM	I called Mr. McNeil and provided him with an update as per the information provided by Dave Lewis. Basically I said that under the current preferred alternative, his property is a total take. I said that the route was not set in stone and that there was opportunity for for public comment. He said he submitted public comment two years ago and no one read it. I said to the contrary. I said I had pulled up his information in my database when I last spoke with him and then proceeded to tell him what meetings he attended, on what dates and what he said in his comment cards. He was impressed. I said that his comments as well as the hundreds of others are currently being reviewed by the FHWA as they review the various plans. He thanked me for getting back to him.	
3/24/2009	4:22 PM	I received a call today from Mr. Curtis McNeil who owns a home at 22546 Coronado Somerset Drive, Sorrento, FL 32776. I Google Earthed it and the property is located about 1/4 mile south of SR 46 and a 1/5 east of Round Lake Road. He wanted to know if his property would be impacted by the Preferred Alternative route. He is in my ACT! database and attended the 8/1/06 public workshop. He also attended the public meeting in 11/10/05 and submitted the following comment card: Public Meeting Comment Card 11/10/05: On one of your plans your roads goes right through the middle of our house. So we are	

against this, the light yellow line would be better for us.

We know the area is growing fast but we would not like the blue line to go through, I am sure we are not the only family effected by this but that is our feeling about it. We do want to keep the natural environment it is very important to us also. You are taking it away.

Contact		Marlene Metcalf
Date	Time	Regarding
7/15/2009	6:41 PM	Ms. Metcalf,

We appreciate you taking the time to email us. The Wekiva Parkway Project Development and Evaluation Study (PD&E) is ongoing. As of July 2009, OCEA and FDOT are continuing to coordinate with the Federal Highway Administration (FHWA) and awaiting review comments on environmental documents. FHWA approval of those documents is required before public hearings on the recommended Wekiva Parkway alternative can be scheduled. It is anticipated that the public hearings could be held in late 2009 or early 2010.

We have your contact information within our database as:  
Ms. Marlene Metcalf  
3001 S. Atlantic Ave, #443  
New Smyrna, FL 32169

Please let me know if there has been a change. Once the public hearing dates have been scheduled, we will notify you via United States postal service. In the meantime, if I can be of any further assistance please let me know.

Thank you,  
Brian Hutchings  
Public Information Officer

Contact		Brad Millsap	Heathrow Country Estates
Date	Time	Regarding	
7/23/2009	7:02 PM	Brad is the best contact for Heathrow Country Estates. Wants to be updated on anything Wekiva Parkway Related so he can distribute it to the community. He said he is eager to know anything going on with this project. He said anything he can do to help us out just let him know. He was up to speed on everything since he attened the recent commisioner meeting where Mike S. presensted.	

Contact		Shirley Minatelli
Date	Time	Regarding
12/17/2009	1:29 PM	See attachments. Send these to her and advise her our records indicate 200 Capri Cove Place, currently owned by Rudy & Cynthia Wilson, is parcel # 2516 on the plan view graphic (it is located at the entry to Capri Cove). The other attachment is a rendering of how the Wekiva Pkwy may appear looking east from the Capri Cove entry road.

I received a call from Shirley Minatelli who is 10 days away from purchasing a home located at 200 Capri Cove Place in Sanford, FL 32771. It is located in the Capri Cove subdivision of approximately 18 homes located just off Orange Avenue and Wayside. She just heard about the Wekvia Parkway and is rattled. She wants to know if she will be

possibly impacted before she signs the papers.

Contact		Mike Mohler	Professional Engineering Consultants
Date	Time	Regarding	
7/15/2009	7:02 PM	Hi Josiah - I received a call from him as well and left him a voicemail when I returned his call. Thanks for providing that information to him.	
		Brian	

>>> Josiah Banet <JBanet@HNTB.com> 07/15/09 10:08 AM >>>

Brian,  
FYI...I received a call from Mike Mohler at Professional Engineering Consultants asking about the preferred configuration of the Kelly Park Road interchange. On the viable alternatives workshop figures, we show a full diamond configuration. I left him a message, referencing the OOCEA website for information regarding Wekiva and that the Kelly Park Road interchange was shown as a full diamond at the viable alternatives workshop. I also referred any additional questions to you, leaving your phone number 407-383-5817) and email address.

Let me know if you have any questions.

Thanks,  
Josiah

Contact		Rosalie Morace	Women's Club of Sanford
Date	Time	Regarding	
2/1/2009	2:26 PM	Attended Women's Club of Sanford meeting

<ronmck3@cox.net> <mailto:ronmck3@cox.net>  
Date: Saturday, April 26, 2008 9:27:03 PM  
Mary, I have a link to Authority website to watch for anything to happen (public meetings,  
etc.) for the 46-bypass/Western Connectors. When I opened my saved link  
(<<http://www.ocea.com/futureplans/projectsandstudies/westernconnectors.shtml>>)

I got:  
=====

Page Not Found (404 Error)  
Sorry for the inconvenience. We have recently re-designed the structure of our website.  
The page that you have requested no longer exists. Please return to the Corporate Home  
Page <<http://www.ocea.com/Corporate/>> and select the desired topic from the main  
navigation. If you accessed this page via a bookmark, please update your bookmark once  
you have found the appropriate information.  
=====

So I went to that page, and it was not clear at all how to find the info on  
46-bypass/Western Connectors. I navigated around a bit and eventually found  
<<http://www.ocea.com/Corporate/oursystem/SR429/WekivaParkway.aspx>>

Is that the page I should watch for anything happening on the 46-bypass--or is that page  
just for Wekiva Pkwy?

2/11/2009	12:21 PM	Mr. Nazario called asking for an update on the project and I filled him in on where we are at.

Contact		Bob and Judith Nelson
Date	Time	Regarding
7/29/2009	6:30 PM	I spoke with Ms. Nelson and she said that Bob is no longer president of their HOA, that he has been replaced by Mr. Gene Bebbbar. Mr. Bebbbar was in my database and I asked her if she knew his address and she said she did and I ran the one I had in my database past her and she said that was correct.

Contact		Bryan Nelson	Florida House of Representatives
Date	Time	Regarding	
6/25/2009	4:21 PM	Dropped off the Wekiva info print-outs with Tresa at Rep. Nelson's office. Afterwards, dropped by the 414-211 job and checked out progress on the bridge arch over SR 441.	

6/11/2009	6:04 PM	Here is a wrap up from today's meeting with Representative Nelson and Rep. Precourt:
-----------	---------	--

Attendees:

Representative Nelson  
Representative Precourt  
George Lovett  
Noranne Downs  
Brian Stanger  
Mike Snyder  
Mark Callahan  
Brian Hutchings

Topics:

- Mark C. - Public hearings likely early 2010
- Rep. Nelson tolls? Mark C. no toll amounts set at the moment. Mike came in, and said estimating tolls at 16 cents/mile, probably \$3-\$3.25 end to end
- Mike S. Phase II SR 414 - need to purchase about 15 more parcels. Working on right of way to negotiate a settlement with 10 of those owners now, leaving 5 - in about 9 months and we should have all parcels in hand
- Mike S. OOCEA to sell bonds in Jan. and July 2010 to build the SR 414 extension and help fund the Wekiva Parkway
- Mike S. and Mark C. discussed the Auxillary road option for the folks off SR 46 in the Plymouth Sorrento area. Investigating cost to build the road. Can't make it too nice to draw traffic from the toll road but it will be serviceable for the folks that live in that area.
- Rep. Nelson requested a write up on the Wekiva project for him to be able to provide to constituents. Mark said Brian had this. Brian said we have something that could work but it probably needs to be updated and reviewed. (Michelle - I'm thinking that one-pager you did awhile back would be perfect for Rep. Nelson's purposes). Brian to work on this, have it reviewed/approved and to send to Rep. Nelson

Those are pretty much the main points of the meeting. Let me know if you have any questions.

Thanks,  
Brian Hutchings  
Public Information Officer

8/27/2009	11:38 AM	We bought a home in Sylva Glade, Sanford backing up to Rt. 46 in 2004. To date we have invested another \$250 - \$350,000 in our home. We understood that Seminole County had stated the Wekiva Pkw. would never go through the county. Having a raised 6 lane highway outside our home and our neighbors will devalue the homes and cause us to loose the peace and quiet previously granted us. We feel a northern corridor, such as the previous route proposed around the St. John's River bridge to be more desirable to all homeowners concerned. We strongly oppose the proposed highway alignment along Rt. 46 impacting Retreat at Sylvan Reserve & Sylva Glade, this would be a travesty. We invested our savings in what we hoped would be our last home with intent to live our lives in peace and comfort. Thank you in anticipation of your future help.	
8/26/2009	3:55 PM	Dear Ms. Pence - I received a copy of your email containing your contact information and a blank comment form. I have added your contact information to our Wekiva Parkway database and you will receive any further newsletters/public notifications on the project. If you would like your comments to be included in the database, please email me back with those comments and I will be sure to have them included for future considerations. Regarding

Hi Brad - The I-4 Master Plan Improvements call for a new loop ramp and a relocated I-4 off ramp adjacent to the former Bill Heard Chevrolet dealership property, but the proposed widening of SR 46 as a part of the Wekiva Pkwy project does not impact the property (see attachment). I have attached a map of the former Bill Heard Chevrolet property area as it relates to the Wekiva Parkway project and also a map of the Preferred Alternative route in Seminole County. I hope that helps with your questions. The project will be funded by a mix of bonds supported by toll dollars (on the paid road sections) and by state and federal tax dollars for the untolled section.

Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

Hi Brian,

Thanks for your time today. It would be appreciated if you could please review the below and make sure I have my fact straight and hopefully help fill in some of the blanks I have. My contact information is below.

Orlando Beltway / Wekiva Parkway

State Road 417 is the eastern Interstate 4 beltway connecting Osceola County and Sanford, and State Road 429 is the partially completed western Interstate 4 beltway connecting Osceola County and Apopka. The Wekiva Parkway is a planned 22-mile toll road which is the last remaining northwest stretch necessary to complete a beltway around metropolitan Orlando, connecting SR-429 to SR-417 in Sanford.

Wekiva Parkway would begin at the intersection of SR-429 and US-441 in Apopka and connect with Interstate 4 at SR-417. For approximately \_\_\_\_ miles, Wekiva Parkway will run parallel to SR-46 from approximately \_\_\_\_\_ to \_\_\_\_\_. SR-417, SR-429 and Wekiva Parkway reflected with a dotted line, are identified on the Orlando location map. The Preferred Alignment for Wekiva Parkway is with the Federal Highway Administration awaiting environmental sign-off which is expected later in 2009. Once approved, public hearings will be held in 2010 and it is expected that construction would begin in 2014 or 2015. The projections are for construction to take a minimum of 5 years. The project, which is estimated to cost \$2.0 Billion, currently is not funded but funds are expected to be raised from \_\_\_\_\_.

The completion of an Orlando Beltway will provide a seamless alternative to Interstate 4 around the metropolitan area and also provide a bypass from downtown. The completion of Wekiva Parkway is expected to dramatically increase the traffic flow and spawn significant commercial development in the Sanford area where Interstate 4, Wekiva Parkway and SR-417 all link up.

Thanks,

Brad

Mark Reggentin has indicated a presentation to city staff should be scheduled. Mark Callahan told him you would be calling him to arrange the meeting. His number is (352)735-7112. Please include Brian Stanger and Josiah Banet in the meeting date/time scheduling. Thanks.

Contact		Christie Reneer
Date	Time	Regarding
3/16/2009	7:04 PM	Ms. Reneer called me to let me know that she and her husband are considering purchasing a new home located near SR 46 and that she recently became aware of the Wekiva Parkway project. She said she liked the area but had concerns about purchasing a property that might end up being impacted by the project. I asked her if she had gone to our website and looked at the preferred alternative map. She said she had and that it was unclear to her whether the property she was interested would be impacted. I explained to her that the plan is currently under review by FHWA and that upon their final report we will move forward with public hearings. I said the public hearings will give the public opportunity to share their views on the proposed route. I explained that because we were still in the planning stages an exact final route has yet to be determined. I told her nothing was finalized at this time and that I understood that this is frustrating as she considers purchasing a home. In the end, I said she will just have to consider the available information and make the best possible decision based on that. I told her that if she does purchase the property that she would be contacted via mail with information on the public hearings. She thanked me for the info.

4/10/2009 11:59 AM

Dear Mr. Rubin - Thank you for your inquiry regarding the State Road 429 Wekiva Parkway Project Project Development and Evaluation Study (PD&E).

The Wekiva Parkway PD&E study team is currently waiting approval from Federal Highway Administration (FHWA) on documentation submitted so that the public hearings can be scheduled. Once the hearings have been scheduled, we will be sure to alert all area property owners via a mailing, and will also get the word out with media alerts and of course the Expressway Authority's website at [www.oocsa.com](http://www.oocsa.com).

At this time, funding options for this project are being explored. Right of Way activities will commence once the final alignment is determined and this has not occurred as of yet. I will be happy to include you on our database to receive any future mailed alerts, newsletters and other notifications.

Please let me know if I can be of further assistance or if you have additional questions.

Best regards,  
Brian Hutchings

Vince Sandersfeld  
Regarding  
City of Apopka - Planning

Vince: The City of Apopka and Orange County approved the PD&E Study recommendation for a Wekiva Parkway (SR 429) local access interchange at Kelly Park Rd. in late 2007 (see attached graphic). The interchange is a part of the recommended preferred alternative for Wekiva Parkway in Orange County. However, the overall Wekiva Parkway recommended preferred alternative in Orange, Lake and Seminole Counties has not yet been through the public hearing process due to extended project coordination with the Federal Highway Administration (FHWA). With regard to the quote you referenced below (i.e., "Except as otherwise expressly provided, by January 1, 2006, each local government within the Wekiva Study Area shall amend its local government comprehensive plan to include the following: (1) Within 1 year after the establishment of the interchange locations, local governments hosting an interchange on the Wekiva Parkway shall adopt an interchange land use plan into their comprehensive plans"), it may be useful to seek an opinion as to what constitutes "establishment" of the interchange location since the Preferred Alternative cannot be finalized until after the public hearings. Currently, we do not foresee those hearings being scheduled until the Fall of 2009 or perhaps even later depending upon the duration of FHWA coordination. Hope this helps.  
Dave

4/30/2009 5:52 PM

Hi Vince - just to let you know that I received your email and that I am looking into this for you. I will be in touch soon.

Thanks,  
Brian Hutchings

Dear Mr. Hutchings:  
I'm currently working on the City's Comp Plan and looking for some information on the date of when the interchange for the planned roadway was established. Below is a Florida Statute requirement that would impact us and I wanted to do some pre-planning on Kelly Park intersection (per the FS). The question I have is to find out the date this intersection was established. Is this something your agency would have some information on. I contacted DCA, FDOT and Orange County and wasn't able to obtain any specifics. Any help or if you have any advise to re-direct me that will be greatly appreciated. Thanks  
Vince Sandersfeld, Apopka Community Development Dept - 407-703-1739  
369.321 Comprehensive plan amendments.--Except as otherwise expressly provided, by January 1, 2006, each local government within the Wekiva Study Area shall amend its local government comprehensive plan to include the following: (1) Within 1 year after the establishment of the interchange locations, local governments hosting an interchange on the Wekiva Parkway shall adopt an interchange land use plan into their comprehensive plans. Each interchange land use plan shall address: appropriate land uses and compatible development; secondary road access; access management; right-of-way protection; vegetation protection and water conserving landscaping; and the height and appearance of structures and signage. Local governments within which the Wekiva Parkway is planned shall amend their local government comprehensive plan to include the Wekiva Parkway. Interchanges located on Interstate 4 are exempt from this subsection.

11/30/2009                      1:20 PM                      Thanks, Brian. That's what I'm looking for.

I made the changes you requested to the Comment Form on our web site.

Happy Thanksgiving.

Charlie

11/24/2009 4:29 PM Hi Charlie - If you are referring to the traffic operations analysis of the frontage roads east of the Wekiva River as requested by Seminole County Engineer Jerry McCollum (which was mentioned at the last SCEA Board meeting), the PD&E Study traffic consultant is in the process of preparing that information now. After the analysis has been reviewed and completed, we will be happy to provide it to you.

Thanks,  
Brian

11/24/2009 2:57 PM Will do, Brian.

Can you tell me how we can access the traffic projections in Seminole county for the build where SR 46 will cross the Wekiva (Lake County's request)? I understand the studies have been provided to the SCEA in order to assess impact. Thanks.

Charlie

Charles L. Shaw | Executive Committee Member | Wekiva Parkway Community Coalition (WPCC) , Inc.

11/12/2009 4:01 PM Hi Charlie - I have been advised that the draft Environmental Assessment (EA) has not been submitted to FHWA. FDOT and OOCEA are continuing to coordinate with FHWA and other agencies on environmental (i.e., historic resources and public lands) matters in Orange and Lake Counties; those items must be completed before the draft EA can be prepared and submitted to FHWA. Then FHWA must approve the draft EA for public availability before public hearings can be scheduled on the recommended Preferred Alternative for Wekiva Pkwy. The best case estimate at this time for public availability of the draft EA is May 2010. This estimate is subject to change due to events outside the control of FDOT and OOCEA. The Finding of No Significant Impact (FONSI) is not prepared until after the public hearings and other items have been completed. The best case estimate at this time for having a draft FONSI which has been reviewed by FHWA is Fall, 2010. This estimate is also subject to change.

I hope that answers your questions. Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

11/12/2009 1:30 PM Hi Mr. Shaw - I am looking into this for you and will let you know as soon as I get an answer.

I hope all is good at your end.

Thanks,  
Brian Hutchings

Subject: RE: WP and SR 46 Extension from Lake to Seminole County  
Mr. Shaw,

After meetings with Sen. Baker and other elected officials about Wekiva Parkway in east Lake County, OOCEA and FDOT are considering possible alternate engineering and financial solutions to the expressed concerns. This was addressed in a PD&E Study update presentation to the Wekiva River Basin Commission on June 29th. However, we are at a very early development stage and no conceptual plans, impact assessments or cost

estimates have been completed. These considerations will follow the same project development process that we are using for the Wekiva Parkway PD&E Study.

Subject: WP and SR 46 Extension from Lake to Seminole County

Hi Brian,

A quick question I have been meaning to ask since a conversation I had with Sen. Baker's COS, Tom Hammons, last month. Tom called me in regards to an email I had sent to Sen. Baker in May asking about his position on the WP route. During the conversation, Tom mentioned Lake County had raised concerns about accessibility for some communities along the SR 46 corridor if the WP is built out according to current plans. He said the concerns centered around access and travel distance/time for emergency service vehicles, school buses, and other necessary services if the vehicles had to access the WP to get to point A from point B. Tom said that as a result of discussions held with FDOT this spring, agreement had been reached to provide extended service road access along the present SR 46 corridor in Lake County to mediate the concerns. Tom also said, that as part the agreement, the service road would cross the Wekiva River and connect with SR 46 in Seminole County. My question: is my understanding of the conversation factually correct? If not, please correct. If so, are there revised plans available that we can access for the WP segment crossing the Wekiva? Thanks.

7/29/2009 4:24 PM Had a long conversation with Mr. Shaw. He said his contact info was correct. He then said he heard a rumor that there was a plan to have SR46 cross over the river to provide access to the folks that live there. I said I was not aware of such a plan and that I would be surprised to find out if it was actually true. He said he was surprised as well but said he heard it from a political connection that would know about such things. I said interesting and that I would keep my ears open on this.

4/28/2009 6:06 PM Dear Mr. Shaw - Attached, please find a meeting summary of the WPCC meeting held last October. Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

Thanks, Brian - no rush.

Charlie

Hi Charlie - I have a very rough set of unofficial minutes take by a former colleague (not Mary Brooks) listening from a very poor quality recording of the meeting. I am going to work on it this week to make it into a useful document. Once approved, I will be sending a copy your way. Until then, let me know if you need anything else.

Best regards,

>>>

Thanks, Brian. I didn't think it would be easy. However, I think you would agree it's unacceptable to not have official minutes available for a meeting which was intended to report back the findings and ensuing discussions of a major work effort. Although the study report has been published, the concern is about not having a record of the presentation of the report to the citizen's group (Wekiva Parkway Community Coalition (WPCC)) on whose behalf the study was commissioned, and comments made at that meeting during discussions of the report's findings.

2/26/2009 6:49 PM

Hey, if all else fails we should still have the tape from that meeting, either in the Wekiva Parkway files you have or maybe I still have it, though would have to check. The easiest thing at this point might be to give them a copy of the tape, though Lindsay and all parties would have to agree to that.

Let me know if you don't find the tape on your end.

Hi Brian,  
I was just updating our records, and was not able to locate a copy of the meeting minutes from our 27 OCT 2008 meeting at FDOT R5 (see Mary's # 3, below). Would you please forward a copy of the minutes? If previously sent, please resend, and our apologies for having misplaced the mail. Thanks.

Hello Dan,

After discussions with the Wekiva Parkway Study Team members, I wanted to provide the following information in response to your questions:

Agenda - Review Study Team findings relative to the assessment of the WPCC Map G Alternative

Once we have met with all of the SCEA Board members and incorporated their input, we will provide material to the WPCC prior to the Oct. 27 meeting.

We plan to record this meeting so that detailed minutes can later be made available to all. Regarding the PD&E Study timeline, the Study Team is working with FHWA on specific documents and project issues. It is FDOT's intent to go to Public Hearings once FHWA has approved the documents for public distribution. At this point we unfortunately do not have firm dates for the hearings.

All SCEA Board members will have been briefed on the WPCC alternative evaluation by Oct 22.

FDOT has indicated who was to be invited, as noted in the previously sent calendar item.

However, FDOT will not restrict access to other interested parties from any meeting.

Interested parties will be asked to hold all comments until such time that their input is most appropriate.

I hope this addresses your questions. As always, feel free to call or email for additional information.

Subject: 10/27 meeting questions...

Hi Mary,

I have informed the group of the October 27 meeting date. We have a few questions for you concerning the meeting that we hope you can answer.

1. What is the agenda of our meeting on 10/27?
2. Can we have any information or subject matter forwarded to us (mail or email) prior to Page 143 of 167 the meeting to help us prepare?
3. Can we request that meeting minutes be taken at this meeting?

4. Is there a time line now for the project going forward? If so, will we hear this at the meeting? or can you send it to us?

5. Can you let us know the meeting dates that have been set with the Commissioners? We would like to know when the information is relayed to them.

6. It is our expectation that this meeting is with the listed invitees and the WPCC and that we will not have unknown guests or other organizations attending.

TX. DWM.

2/17/2009 6:57 PM Thanks for the update, Brian. We'll be on the lookout for the web update.

2/17/2009 12:10 PM Hi Charlie - You are correct, I am also hearing sometime late summer/early fall for the public hearings. But I would not stake my life on it. All I can say for sure is that the Federal Highway Administration is currently conducting a comprehensive review of the Wekiva Parkway PD&E and are continuing to make requests for additional information/clarification. This information is being provided. FHWA has been conducting the review since Sept. 08. Our hope is that they will complete the review and make a formal recommendation within the next couple of months - at which time we will be able to get to work on preparing for the public hearings. I am working now on updating the web page and it should be up to date soon.

I hope that helps. Please let me know if I can be of further assistance.

Thank you,  
Brian Hutchings

Hi Brian,

I've heard the public hearings have been pushed out until at least SEP '09. True? Also, I think you would agree that the statement "The PD&E Study is expected to finish with an approved alignment by spring 2009." is now a bit misleading as to timing, if not as to expectation. What say you, and when can we expect an update to the web page? Thanks in advance for your response to this.

Charlie

11:55 AM

Hi Charlie - Happy New Year to you as well. Unfortunately, the public hearings have not yet been scheduled as we are still waiting on approvals from the Federal Highway Administration. Rest assured, we will be sending out advance notifications to the public once the hearings have been scheduled. This information will also be posted on the Expressway Authority's website at [www.oocaa.com](http://www.oocaa.com).

I have a Post-It note on my board reminding me to keep you posted if anything new/interesting happens on the Wekiva Parkway PD&E, so you will be one of the first to know if anything happens.

I hope you have a great 09!

Regarding

To all,

It is requested that a meeting be arranged on a date between May 26 and June 10, 2009 in Sorrento regarding the planned changes to State Road 46, County Road 46-A and the additional interchanges for the Wekiva Parkway. This evening I attended a local meeting of the Chamber of Commerce at which a group of individuals brought in over 1 000 signatures on petitions concerning this matter.

Mike Snyder, Mark Callahan, Noranne Downs, T. J. Fish and Sandy Minkoff it is

requested that you review your calendars to see which evening during this time frame might work, I will also be contacting the offices of Congresswoman Corrine Brown, Congresswoman Suzanne Kosmas and Congressman Alan Grayson requesting a representative from their offices be in attendance as well since this project may involve Federal monies. If you have any questions or need additional information feel free to contact me by e-mail at WDSmalley1@aol.com<mailto:WDSmalley1@aol.com> or by phone at 407-474-9246. I will contact each of you over the next few days to firm up a date and the location for this meeting.

Respectfully,  
William Smalley

Charles H. Stark, P.A.  
986 Douglas Avenue, Suite 100

4/1/2009 5:06 PM Dear Mr. Stark,  
  
Thank you for your inquiry regarding the State Road 429 Wekiva Parkway Project Project Development and Evaluation Study (PD&E).

After extensive community and agency input, the two agencies have selected a Preferred Alignment for the Wekiva Parkway that will be presented for public review and comment at formal public hearings. The Wekiva Parkway PD&E study team is currently waiting approval from Federal Highway Administration (FHWA) on documentation submitted so

that the public hearings can be scheduled. Once the hearings have been scheduled, we will be sure to alert all area property owners via a mailing, and will also get the word out with media alerts and of course the Expressway Authority's website at [www.oocaa.com](http://www.oocaa.com).

Once the public hearings have been held and the final alignment determined, the Expressway Authority and the Florida Department of Transportation will work on how to fund the design, right-of-way, and construction costs for the project. Currently, these funding decisions have not been made.

I hope this addresses your question. I have also included a map of the study area as per your request. Please let me know if I can be of further assistance or if you have additional questions.

Best regards,  
Brian Hutchings

Contact Emma Starling Harris, Harris, Bauerle & Sharma  
8/13/2009 12:16 PM Hi Emma - our records indicate the property ID #21-19-29-300-0010-000 you indicated is parcel 3641 (see attachment) in the northeastern quadrant of the Wekiva Park Dr./SR 46 intersection. The preliminary Wekiva Pkwy concept shows it as a full take (parcel size 4 10 acres; 1.19 acres needed for roadway and 2.91 acres needed for stormwater pond). Our records indicate that the property owners are listed as: Linville, Scott A. and Sheila M. As far as updates, as you probably are aware, the recommended Preferred Alternative has

not been to public hearings (estimated to be in early 2010), and no funding is currently programmed for design/ROW acquisition/construction.

Please let me know if you have any additional questions or if I can be of further assistance.

2/9/2009 3:41 PM Hi Emma - today at 2 p.m. there is a small meeting at the Sorrento Christian Center. The meeting was requested by Kathy McDonald in order to open a dialogue regarding some issues they have with access to SR 46 under the current preferred alternative of the Wekiva Parkway Project.

I hope that answers your question.

Best regards,  
Brian Hutchings  
Public Information Officer

Dear Brian:

A client of ours said that he had heard there was a meeting today about the closing of SR 46 - we have not heard anything about this - could you please let me know if he is correct?

Your prompt response is appreciated.  
Kind regards,  
Emma Starling, Esq.

Contact David Whitmer  
Date Time Regarding  
4/16/2009 7:19 PM Dear Mr. Whitmer,

Thank you for your inquiry regarding the State Road 429 Wekiva Parkway Project Project Development and Evaluation Study (PD&E).

The Wekiva Parkway PD&E study team is currently waiting approval from Federal Highway Administration (FHWA) on documentation submitted so that the public hearings can be scheduled. Once the hearings have been scheduled, we will be sure to alert all area property owners via a mailing, and will also get the word out with media alerts and of course the Expressway Authority's website at [www.ocea.com](http://www.ocea.com).

Once the public hearings have been held and the final alignment determined, the Expressway Authority and the Florida Department of Transportation will work on how to fund the design, right-of-way, and construction costs for the project. Currently, these funding and design decisions have not been made. I am certain that a comprehensive Maintenance of Traffic (MOT) plan will be developed and implemented in order to maintain commuter traffic during the period of construction.

The construction currently underway on SR 46 is being conducted by the Florida Department of Transportation. For details on that, you may wish to contact Steve Olson, the Public Information Officer for FDOT District 5:

Steve Olson  
Florida Department of Transportation

4/24/2009 12:35 PM Mr. Wiseman called to say that he was on the Wekiva website and that the info on it was old and dated and he wanted to know if there was anything new to report. I gave him the general update as to where things stand right now and said that the website should be updated in the near future, that it was waiting for a final review before it goes live. I checked my database while I was on the phone with him and said I had his mailing address, confirmed that it was accurate and said that he would receive notice in the mail when we hold public hearings. He said good enough.

Contact Becca Woodham  
Date Time Regarding  
5/7/2009 1:15 PM Hello Mr. Homan,  
I am hearing that when the Wekiva Parkway is built that SR 46 will be taken away. I would like to verify that this will not be taking place. I can understand wanting to complete the expressway around the city of Orlando, but I feel its unfair to local residents and local businesses to be taking away our access road to Sanford. If this does take place then you will be forcing us to you the toll road because the only other way around is SR 44 through Deland then south/west on I4 or taking back roads through Apopka to end up on SR 434 and I4 and take it north/east to Sanford. This is just wrong. I have tried to find a map on the dot website but none of them are very clear to me.

Thank you,  
Becca Woodham

Dear Ms. Woodham:  
Thank you for your email that was received by the District Five Department of Transportation on April 09th. We appreciate your interest in this major transportation improvement study. The Wekiva Parkway Project Development & Environment Study that you reference in your email is currently underway and is scheduled to finish later this year. We currently do not have any funding in place for the design or construction of this project; however the Florida Department of Transportation and the Orlando-Orange County Expressway Authority are working towards a funding plan. The Wekiva Parkway is one component of a comprehensive plan developed at the direction of the former Governor Jeb Bush. Through a 2002 Executive Order the Wekiva Basin Area Task Force was created and tasked to make recommendations on a corridor alignment. Through a 2003 Executive Order, and the subsequent 2004 State Statute entitled the Wekiva Parkway and Protection Act, the Wekiva River Basin Commission was created and tasked with balancing transportation needs and environmental concerns. Recommendation 4e in the Wekiva River Basin Task Force report states: "...when the design and construction of the Wekiva Parkway is completed it should close existing SR 46 at an appropriate location west of the Lake-Seminole County line so that the remaining sections of SR 46 continue to be open only to provide local access to private properties and recreational and conservation lands, and prevent through traffic...". In January of 2005, the Wekiva Parkway Project Development & Environment Study kicked off. The purpose of this study is to select the most appropriate alternative for the roadway to serve the community's needs while minimizing potential impacts to the environment, surrounding homes, and business. One of the alternatives analyzed in the study was to construct two full interchanges in the Lake County East area and eliminate the portion of

existing SR 46 between them. This alternative was heavily supported by the Florida Department of Environmental Protection, Wekiva River Basin Commission, and the Lake County Commission. However, the project development and environment process is not complete. There is still an opportunity for your concerns about closing portions of State Road 46 to be considered. The public hearing for this project is another excellent opportunity to express your concerns. We have not scheduled an exact date for the public hearing, however we think it will be scheduled by the end of year. You will receive notification weeks prior to the public hearing stating the exact time and locations. This is the email address to view the Wekiva Parkway map as you requested: <<http://www.oocsa.com/Corporate/oursystem/SR429/WekivaParkway.aspx>>  
Thank you for your concern and interest that you have given to this project. If you have any questions or concerns, please call me at 386-943-5391.  
Brian M. Stanger, P.E.

Date	Time	Regarding
4/20/2009	6:20 PM	>>> Kathleen Wooster <kathleen_w2@yahoo.com> 4/20/2009 12:59 PM >>> To Whom it May Concern,

I recently became aware of a petition in my area opposing the SR 46 bypass. I'm trying to get some information on the bypass. In most areas there are alternate routes around the toll roads, for those who can't afford to take them and if I read this correctly there will not be any alternate except for the proposed parkway. If this is correct it'll put a financial hardship on the folks who live in the Mt. Plymouth/Sorrento area who work in the Sanford area, because there is only one way to get there. Not only will it put a hardship on the commuters it'll also hurt the merchants who depend on traffic to stay in business. Please let me know if the information above is correct and if so, believe me I'll be more than gladly to sign the petition and as a matter of fact I'll be out there helping them get more signatures to stop this from going through.

Thank you for your time.

Kathleen

Date	Time	Regarding	
2/23/2010	12:18 PM	<p>Dear Mr. Arigo - thank you for sharing your concerns regarding the proposed Wekiva Parkway. I have included your comments with other public comments we have received for this project which will be incorporated into the review process.</p> <p>Best regards,          Brian Hutchings          Public Information Officer          407-383-5817</p>	
2/23/2010	12:16 PM	<p>Clearly, the Wekiva Parkway project is important to the economic development of the Orlando area, however we should not sacrifice the environment in the process. The overall impact to the environment and existing neighborhoods should be paramount, over an above completing the project economically and as quickly as possible. All alternatives should be vetted for their merits and negative attributes. Specifically the Route 46 and Interstate 4 interchange in Seminole county. As quoted in the Orlando Sentinel this past weekend, "Dan Macalusa, president of the Sylvan Lake Reserve homeowners association, said his group has offered a different route for the parkway, but it was rebuffed by the agency as too expensive and poorly designed. Macalusa maintains the authority has misrepresented his group's plan: "It's not that we don't want the beltway. We think that there are better alternatives." I agree with Dan, consider there are better alternatives.</p> <p>Andrew Arigo, CLU, ChFC          Senior Consultant          The Newport Group          300 International Parkway          Suite 270          Heathrow, Florida 32746          Direct.Dial (407)531-5943          Mobile (407)221-1199          Fax (407)333-2815</p>	
Contact		Johnathan Arnon	
Date	Time	Regarding	
2/23/2010	12:15 PM	<p>Dear Mr. Arnon - thank you for sharing your concerns regarding the proposed Wekiva Parkway. I have included your comments with other public comments we have received for this project which will be incorporated into the review process.</p> <p>Best regards,          Brian Hutchings          Public Information</p>	
2/23/2010	12:13 PM	<p>To whom this may concern:</p> <p>As a resident of Seminole county and a constant user of 46A I</p>	

don't think it is necessary to construct the Wekiva parkway. 46A can accommodate all of the current traffic fine. Not only will building the Wekiva parkway cost a lot of money (I read 1.8 billion dollars) it will destroy the last refuge of wildlife in the central Florida area. Unfortunately urban sprawl has destroyed much of central Florida's once uninhabited areas. I hope you reconsider the need for the Wekiva parkway.

Thank you

--  
ARNON, JONATHAN

fax 407-571-8350

1/4/2010

4:05 PM

Dear Mr. Baer - we are working to place the maps on our website at [www.ocea.com](http://www.ocea.com). I am hoping they will be up in the next week or two. Regarding your other concerns, I expect that a soundwall study will be conducted in developed areas and that would likely include the Mount Plymouth gold course community. We are still in the PD&E stage of the Wekiva Parkway Project and the final design has not been conducted or approved. The Federal Highway Administration is currently conducting a comprehensive review of the Wekiva Parkway proposal and once they report out with their findings, we will be able to conduct our formal public hearings (hopefully sometime this summer). At the hearings, the public will have an opportunity to comment on the proposed alignment and share any concerns they might have about it. After that, we will be able to move ahead with the final design of the project and start obtaining the needed right of way. We also still have to come up with the \$2 billion needed to construct the project - but we are working on that.

Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

1/4/2010 3:57 PM I attended the public hearing last night in Sorrento, and have several questions:  
When will the display boards showing the proposed route and service roads (the ones at the meeting last night) be available online?  
I live in the Mt Plymouth Golf Course community. This community has been established and developing for more than 50 years. The parkway will encroach within several hundred feet of the community. What provisions will be made for noise abatement in the neighborhood?  
Will there be an interchange at CR 435?

Orange County Parcel No. 2785 - right in middle of attached graphic, just north of systems interchange. Estimated Property Impact: 0.24 acre Preliminary, not based on final design; could change.</p>
Contact Date	Time	Michael Benner CEU Institute Regarding
4/12/2010	4:46 PM	<p>Hi Michael - I have added you to our database so you will be notified via email when we announce the Public Hearings or send out any other project updates.</p> <p>Best regards, Brian Hutchings Public Information Officer&lt;/DIV&gt; 407-383-5817&lt;/DIV&gt;</p> <p>Thanks for the reply Brian. Is there a way to be on a notification regarding the hearings, community feedback, etc.?</p>
4/12/2010	2:24 PM	<p>Hi Michael - I believe you are referring to the SR 417 Wekiva Parkway project. The Wekiva Parkway study team has continued to coordinate with state and federal agencies to obtain the appropriate approvals to move forward with the recommended Wekiva Parkway route. Once approved, we will be holding the much anticipated public hearings in Seminole, Lake</p>

and Orange Counties. The public hearings, which we hope to hold later this year, will be an essential next step in gathering further community feedback on the proposed parkway route. You will be notified in advance of the locations, dates and times.

Other study related activities have included an extensive financial analysis that estimated the total cost of construction of the parkway to be \$1.8 billion (2008 dollars) and with declining transportation dollars available to The Florida Department of Transportation (FDOT), it became evident that the Wekiva Parkway from Apopka to Sanford may not be financially feasible without tolls. OOCEA and FDOT District 5, remain committed to this very important regional transportation initiative-the completion of the beltway around Metro-Orlando. As we move forward in the study process, the study team will continue to meet with citizens and community groups while awaiting the necessary approvals. In addition, funding options and opportunities for the parkway are also ongoing and will continue as the project moves into the final design phases which will begin upon finalizing the PD&E Study.

I hope this answers your question. Please let me know if I can be of further assistance.

Thank you,  
Brian Hutchings

Regarding  
We prefer the service road concept. less interchanges means less impact. traffic passing through will not be slowed down at these interchanges. local traffic on 4 and 46A will have a lower traffic and thus safer service road alternatives for their daily commute - great idea!

Contact Ryan Brown Watkins Paint and Wallpaper Inc.  
Date Time Regarding  
3/17/2010 3:39 PM I dropped in on Mr. Brown to let him know that crews would be working on the crosswalks this weekend. He said fine, but wanted to know why the street drainage was blocked. He said that it impeded the street storm drainage during the recent storms and that it caused flooding on the street and sidewalks. I said I believed it was for environmental purposes while the project was underway but that I would request a detailed answer. he said he appreciated that.

Thank you for your timely response.

Mary Brooks, if I asked the question correctly, had told me that all the land needed for the toll road had been purchased. You stated that it has not when I spoke to you on the phone yesterday. Our home (3612 W. Kelly Park Rd) is really close (7/10 mile west of 437 on Kelly Park Rd) to the last proposed alignment. We would like to know for sure if our home is or is not in the planned path including the retention pond land needed. We would like to know more about our future home situation. With the toll road that close and the toll road on-ramp last proposed to be on Kelly Park (is that still true?), we would really like an idea of the impact construction will have on our access, dust, dirt, equipment noise, overall etc. Is my map below fairly accurate ?

Chris Capp Keller Williams Heritage Realty

I am working with a client trying to sell her house and it is near the proposed Wekiva Parkway and wanted to know if the state or county might be interested in acquiring the property for anything related to the construction that will be going on. I included the parcel ID's and links to the property appraisal site to give you an idea of it's location.

Cypress Things by J&S Cypress  
Sorry to see you are putting us out of our family owned and operated business. We have 10 people that depend on us for a job. They're families are depending on them to make a living. No food or clothes. It's only job some of them have ever had, they know nothing else. We provide mulch, chips, lumber for a lot of people. They won't be going 10 miles out of their way to buy from us. Emergency transport will be going way out of the way to get to us.

1/7/2010	12:26 AM	Thank you for coming to Sorrento but a lot of feel you should have also had a discussion with us after we looked at the maps. I do not feel you should be cutting off 46 - make this road the service road. no trucks! We were here 1st and those who have business on 46 should still have 46 open to them we do not need to build a service road. We almost have one 46. This entire deal seems to us that we are the losers and we must lose it all so everyone else can get to the other county's at our loss and expense. We do not seem to have a clear voice. PS the next time we meet, please talk to us as a group so we can express our opinions and hear your answers all together.

Thank you.

Date	Time	Regarding
10/14/2010	9:44 AM	Dear Mr. and Mrs. Clark - thank you for your email. The grey shaded area in the Wekiva Parkway/SR 46 realignment study area map you attached shows the area that was considered for the proposed Wekiva Parkway (i.e. all areas in the grey area were considered as possible routes for the proposed road). I have attached a copy of the Orange County map for the proposed alignment of the Wekiva Parkway. That will give you a more clear view of the actual route the proposed Wekiva Parkway. We will be holding public hearings to discuss the proposed alignment of the Wekiva Parkway as well as to receive public comments on the proposed alignment later this month (I have attached a copy of the public hearing notice FYI). I encourage you to attend the public hearing nearest to you to learn details and to provide you the opportunity to register any concerns you may have on the proposed alignment.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,  
 Brian Hutchings  
 Public Information Officer

 Attn: Brian Hutchings or whomever can answer this:

Wekiva Parkway (SR 429)/SR 46 Realignment Study Area <[http://www.expresswayauthority.com/Corporate/oursystem/SR429/assets/WekivaParkway/Exh1-1\\_Project\\_Study\\_Area.pdf](http://www.expresswayauthority.com/Corporate/oursystem/SR429/assets/WekivaParkway/Exh1-1_Project_Study_Area.pdf)>

Our house is at 28827 State Road 46 in Sorrento. Our house is on 46, directly above the lettering Wekiva River Mitigation Bank.  
The house is now in the grey shaded area of the proposed road.  
Does being in the shaded area mean the road will take our house?

The proposed route in our area has moved considerably north to 46 since Oct 2009, when the last proposed maps were displayed at the hearing.  
As of last year's maps, we were not going to be impacted. The road in our area was going to be on the high bank, about 1 mile further south.  
Why has it moved so far north?

What are the chances the path will move back further south, where it was?

Thank you; please respond.  
Tom and Ellen Clark

1/6/2010	3:48 AM	The service road plan is much better plan than the current alternative. There really is no comparison - it far outweighs the current alternative in fairness to everyone.

Gene Cosco

Dear Mr. Cosco - Thank you for your question. Unfortunately, we are not at a stage where we have identified the 'exact' route for the Wekiva Parkway project since we are still in the PD&E (Planning, Development and Environmental) stage. Currently, the Federal Highway Administration is conducting a review of the proposed route and we are hoping to have that review wrapped up in the near future. After that is completed, we will be able to start the public hearings in Lake, Orange, and Seminole counties (hopefully to take place later this year). After that we will be able to conduct the final engineering on the Wekiva Parkway which would provide the exactness of route that you requested. I have attached a copy of the parkway's preferred alternative route in Seminole County as well as a project update. I hope you find this information of assistance.

Please do not hesitate to contact me if you have any questions or if you would like additional information.

Best regards,  
Brian Hutchings  
Public Information Officer

I would like to know EXACTLY the route that this project will take once it enters seminole county .What existing street and roads will be intersected or crossed over when it connects to 1-4 .In essence a proposed map that CLEARLY outlines the streets and roads being crossed and intersected.

Date	Time	Regarding
11/29/2010	7:42 AM	Received Nov. 28:
		Mr. Brian Hutchings,
		My wife and I have been residents of Lake Forest since 2004 and are raising our two boys, age 2 and 4, in this lovely neighborhood. Last year we acquired a second larger home in Lake Forest which we currently rent to another family of four. Both our family and our tenant family enjoy the neighborhood so much that we've actually agreed to switch homes in November so that my family can have more space and theirs can lower their rent while we both continue to enjoy the unique community life of Lake Forest. My family is figuratively and literally very invested in Lake Forest.
		Traffic noise has significantly increased over the last 6 years with increased traffic on S.R. 46 and since the forest that stood where the Terracina town homes now stand and separated the perimeter of Lake Forest from S.R. 46 was leveled. But we still love the natural serenity of the neighborhood, the varied architecture, the facilities, the conservation space and the occasional deer or bear sighting and other wildlife.
		I am writing to express my support of the Preferred Alternative Alignment or proposed Southern Route for the Wekiva Parkway. As you can imagine, I also strongly oppose the non-preferred alternative that would route the parkway directly in front of Lake Forest. That alternative would be hugely detrimental to residents of the Lake Forest community and to the surrounding ecosystem. A decision to turn the already crowded S.R. 46 into a major expressway directly in front of Lake Forest would undoubtedly destroy hundreds of thousands of dollars in property value for Lake Forest families like mine and significantly spoil one of the most unique and pleasant residential communities within Seminole County.
		I have not reviewed any cost estimates of the various alternatives but intuitively, the Preferred Alternative Alignment, also seems like a natural extension of S.R. 417 (which I use frequently) vs. a radical realignment of S.R. 417 to connect with S.R. 46 right at I-4. I am told, and logic dictates, that the Preferred Alternative Alignment / Southern Route is a much more cost effective application of taxpayer funds. So obviously as a taxpayer, I also support the Preferred Alternative Alignment on this basis. And as a driver who uses the existing portion of the beltway frequently, I also favor the convenience of the Southern Route.
		Thank you in advance for your consideration of my views as you and your colleagues finalize plans for S.R. 429 and the realignment of S.R. 46.
		Regards,
		David Dervish

Hello. This letter is to express concern regarding the proposed Wekiva Parkway. I have been concerned since day 1, but did not realize just how close the parkway would be coming to my property line, until I received a letter in the mail. I have spoken to Linda Stewart and have been informed that much work has been done to protect those living in the Heathrow Country Club area. I would like to see the proposed protective measures that will be placed in order to help me and my family maintain our country living lifestyle. I currently hear no noise when I walk outside. The only thing I see is beautiful nature. It is my current understanding that I will be looking at a large road from all views of my property that is enclosed in a tall prison like fence. In addition, I will no longer be able to hear the chirping of birds and wind blowing over the loud noises of a newly built road. More importantly, during the construction phase of this proposal, I am concerned about increased noise and the safety of my two toddlers. I will be present at the Lake County hearing. In addition, I intend to get neighborhood support. Unfortunately, the location of my property is more effected my this roadway than any of my neighbors. Essentially every other neighbor has a much different view and a lot of trees for buffering noise and eye sores of new roads.

In addition to the new road, there have been some recent changes to our property line that I am unhappy with. After a saw came and chopped tree limbs down (that actually could have been a noise buffer) they left the mess for 4 days. In addition, the state fence has been taken down and the ground below rutted up with some machinery. It is an eye sore which lowers the value of my property. Anywhere else in the county, and you would have neighborhood complaints and potential law suits. I hope that you can work with me in an effort to improve the current situation that my family is in.

Sincerely

After a saw came and chopped tree limbs down (that actually could have been a noise buffer) they left the mess for 4 days. In addition, the state fence has been taken down and the ground below rutted up with some machinery. It is an eye sore which lowers the value of my property. Anywhere else in the county, and you would have neighborhood complaints and potential law suits. I hope that you can work with me in an effort to improve the current situation that my family is in.

Sincerely  
Joy Garza

>>> c'sandra hall 12/16/10 8:23 AM >>>

Hi Brian my husband and I talked to you at the meetings. Our names are Ellis and C'Sandra Hall we live at 3715 Hideaway Apopka. What I am writing about is the article in The Apopka Planter that came out yesterday.

We understood and was told that there would be appraisals of our property in 2011, we all in this little spot have resigned ourselves in 2007 that we were losing our properties and so now we are ready to go, were not getting any younger.

In the paper it states that OOCEA spokesman Lindsey Hodges said the earliest that property acquisition would begin in 2015. Please tell me this is a typo.

Thank you for your time, my husband has heart problems and I just found out 3 days ago that my liver is affecting my heart and I know the OOCEA could give a care about any of this but it does put a big worry on us and our neighbors with their problems.

1/20/2010	6:48 PM	COMMENT FORM:

I am in complete opposition to the new proposal for the parkway that is taking all rights/planning away for the taxpayers of SC and honoring the special interest groups. We are the base for the wealth of this county and the thought that we would have no input and control at all into the potential ruin of our home wealth and tax basis is unbelievable.

SC must fight this and you as an elected official must support the best interests of these homeowners. We have over 600 voting residents in our neighborhood alone.

Thank you.

1/20/2010	6:51 PM	COMMENT FORM:	

I have been to several meetings on the Wekiva extension. I just got notice of one that started half hour ago. No one seems to have any idea where this is going, who will be dosplaced, or when it will happen. Why are there so many unknowns?

We would like to know how this is going to impact our community of Buckingham Estates. The draft also says that Seminole County has to concede to the wishes of the OOCEA?!? Is that true? That would be absurd and probably illegal.

Comments: I have made the Tall Trees Community my home for over 15 years. I chose this community because of its secluded yet convenient location as well as the lush landscapes on each homesite. I am sure my neighbors used the same selection criteria when they purchased in our unique and beautiful neighborhood. It is irresponsible of the Wekiva Parkway authorities to damage such a pristine community when there are other viable options to consider that do not include encroachment into our neighborhood. I respectfully request that other alternatives be explored so that our neighborhood and our serenity can be preserved.

Hello,

I am trying to print the 2010 Wekiva Parkway Environmental Assessment Report, having downloaded the files from the Wekiva website.  
Several exhibits in the document can be viewed in Adobe Acrobat, but will not print. A "MissingData" error prints instead of the exhibit.

The exhibits are:

- From EA\_Section3\_Part\_2.pdf Exhibit 3-4, Study Area Sub Areas
- From EA\_Section4\_Part\_2.pdf Exhibit 4-4, Generalized Existing Land Use
- From EA\_Section4\_Part\_3.pdf Exhibit 4-5, Generalized Future Land Use

I have tried re-downloading files, printing different printers, and also reducing the file size using Acrobat Professional without success.

Please advise if I may request a copy of these sections of the EA on CD or file transfer, or if these exhibits are available individually elsewhere on the Wekiva Website.  
Thank you for your consideration.  
Regards,

Lynn Hogan

Contact                      Joe Hughey  
Date                        Time                      Regarding  
4/27/2010                   4:55 PM                Hi Joe - Actually, we are still in the Project Development and Environment (PD&E) study. The study team has continued to coordinate with state and federal agencies to obtain the appropriate approvals to move forward with the recommended Wekiva Parkway route. Once approved, we will be holding the much anticipated public hearings in Seminole, Lake and Orange Counties. The public hearings, which we hope to hold later this year, will be an essential next step in gathering further community feedback on the proposed parkway route. You will be notified in advance of the locations, dates and times.

Other study-related activities have included an extensive financial analysis that estimated the total cost of construction of the parkway to be \$1.8 billion (2008 dollars). With declining transportation dollars available to The Florida Department of Transportation (FDOT), it became evident that the section of the Wekiva Parkway between Apopka and Sanford would not be financially feasible unless built as a toll road. Residents of east Lake County that live and work along existing SR 46 expressed concerns over having to pay a toll for local trips. In response to those concerns, the study team analyzed options to provide a non-tolled service road in east Lake County along the proposed Wekiva Parkway route. These preliminary concepts were presented to the east Lake County community at a public workshop in December 2009 and work on finalizing the concepts continues. OOCEA and FDOT District 5 remain committed to this very important regional transportation initiative-the completion of the beltway around Metro-Orlando. As we move forward in the study process, the study team will continue to meet with residents and community groups while awaiting the necessary approvals. In addition, funding options and opportunities for the parkway are also ongoing and will continue as the project moves into the final design phases, which will begin upon finalizing the PD&E study.

Dear Brian Hutchings,

I am a Mount Dora resident and supporter of the Wekiva Parkway, however I was curious if you are willing to entertain an alternate design for the northern part of this project? I would simply make a draft of what I think could save a lot of costs on the construction of this project including integrating the 429 and 46 into one road instead of multiple roads running side by side and yet still maintain adequate access to the many side and cross roads with minimal effects on travel speeds and safety.

Thanks and please let me know.

Sincerely,  
Michael Ingram

First let me say that if you do not respond to these "contacts" you shouldn't have them!

Second, thank you for the recent public updates on the 429.  
This kind of communication is great!

Now to the point of my writing.

I am a business owner on General Electric Rd. in Plymouth/Apopka. The 429 will be built very close to my business, so:

1. Do you plan to close General Electric Rd. at any time? If so, when?
2. At the meetings there were maps of the 429 crossing General Electric and the interchange to be built on 441. How can I get a copy of this map?
3. This area has suffered 3 major mice infestations in the last 15 years. Will the construction cause another infestation? What are your plans to control it?

Thank you in advance for your response.

7/28/2010	4:22 PM	Pam called me and asked if we were having a meeting to discuss the Wekiva Parkway project tonight at the Sorrento Christian Center. She said she received a call from a Fox news reporter trying to find out what the meeting was all about. I said the last meeting we held there was on December 17th of 2009 and that there is no meeting scheduled tonight by us. I then received a call from Antonio Berhardt with Fox news seeking information on the meeting at the Sorrento Christian Center tonight - I asked him to take another look at his assignment sheet and lo and behold it got lifted from the Public Workshop we did back in December 2009. He then started asking questions about the project (mispronouncing Wekiva). He said he's new. I said I would send him an update on the project that we recently sent out and said that would bring him up to speed. I took down his email address and sent it to him.	
1/27/2010	3:38 PM	Hi Pam - as promised, attached please find a copy of the Wekiva Parkway Fact Sheet in both English and Spanish. Please let me know if I can be of further assistance.

12/2/2010	3:45 PM	Hi Pam - we just held the public hearings at the end of October and are now working on a final report to submit to FHWA. We are hoping that they will approve on the proposed build alternative sometime by the spring of 2011. Once they approve the alignment, we can go ahead and go into the actually design-engineering of the project. After that, we can obtain any needed right-of-way and then hopefully start construction sometime in 2014 and have cars on the new road by 2018. Key to all of this is to determine the funding for the project. That effort is ongoing.	

I hope that answers your question.

1/6/2010	3:54 AM	Dead ending areas of 46 is not the way to proceed. why not utilize the existing road and build temp roads at areas where 46 needs raised? I don't know the exact dollars but building miles of new road has to be more expensive than building a few miles of temporary road. Making people back track to go the complete opposite way isn't resonable The service road is most definitely the way to go. I should not be forced to take a toll road to travel from Mt. Plymouth to Sanford or Mt. Dora, but you need to remember the residents and small businesses present. Most of us are located in this area to ge away from the 6 lane highways and such. We like our scenic county drive.

Mr. Macaluso-  
Lindsay Hodges, OOCEA's Manager of Public Relations and Communications, requested that I contact you regarding the Wekiva Parkway PD&E Study comment form. I

understand that you all met at a meeting yesterday and spoke briefly about this. The form you currently have up on your site (WPCC.COM) is the form we are using during this comment period. However, Mr. Brian Hutchings contact information has changed (see below). We suggest that you revise your form to reflect these changes so that the comments are received in a timely manner and can be included as part of the study. Should you have any questions please do not hesitate to contact me or Brian.

Date	Time	Regarding
2/26/2010	2:51 PM	Hi Glenda - Parcel is #5213 approx. 0.18 acre in size. It is located approx. 4,800 ft (0.91 mile) north of proposed alignment of Wekiva Pkwy. See two attached graphics. 8912 Wildlife Lane is in a cluster of smaller parcels on the west side of Wekiva Park Drive almost a mile north of SR 46. Second graphic shows cluster of small parcels, #5213 is in the middle portion. The property is almost a mile from the proposed alignment and is, therefore, outside the area where we assess indirect impacts.

I hope that helps. Please let me know if I can be of further assistance.

Best regards,

2/24/2010	6:48 PM	Hi Glenda - Please click the following link for maps on the Wekiva Parkway project:  < <a href="http://www.oocaa.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec">http://www.oocaa.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec</a> >  Please let me know if you have any questions or if I can be of further assistance. Date	Time	Regarding
12/13/2010	10:31 AM	Received Monday, December 13, 2010

Dear Mr. Hutchings - According to information I have received from OOCEA, the 5 acres I, my wife and son live on will probably be directly impacted by the Wekiva Parkway (SR 429 SR 46 realignment project.

My wife and I were probably the third party to move to this street in 1972, about 40 years as long or longer than anyone else being affected by the project. Due to the fact that I have owned and resided here since 1972, I would hope this would have some bearing on modifying alignment slightly to avoid impacting our property.

Another possible alignment would be property on the west side of our property, a one person residence, William Randolph new 22514 Coronado Somerset Drive, Sorrento, FL 32776.

We enjoy the peace and quiet as we have good neighbors and property adjoins woods to the south, lots of squirrels, gophers, tortoises, different kinds of birds also we probably have some of the best drinking water in Lake County, when the well was drilled in 1971 William B. Griffith well driller stated that the well bit penetrated a 13 foot cavern possibly rock springs aquifer channel. Also, in my opinion, it would be hard to replace all of the above qualities. We recently had our water tested and it checked out very good. We would appreciate any consideration to this matter as we really love this property.

Sincerely,

Date	Time	Regarding
3/19/2010	5:03 PM	Thank you, Mr. Hutchings, for your knowledgeable assessment regarding the status of this project. You have been most helpful in answering my questions, and providing me with information to make an informed decision. At this time, I have decided to leave things as they are, armed with the knowledge that I may apply for the hardship-based early acquisition if need be. I am hoping that this will not be necessary. Please keep me informed of any further updates. Once again, my thanks to you. Marlene Metcalf
3/16/2010	1:50 PM	Dear Ms. Metcalf - It was a pleasure speaking with you this morning. I have attached a 2 page graphic which shows your parcel (it is #1539 in our system). This parcel is immediately north of Wilson Rd. (near Wilson Elem. School) and the preliminary west right-of-way line of the Wekiva Parkway under the preferred alignment passes through the northeast corner of your property. As I mentioned during our conversation this morning, this has not received final approval and remains the preliminary proposed alignment. In our system your parcel is located near the center of the first graphic. Of the 5.23 acres in parcel #1539, only 0.44 acres would be impacted so that would normally be considered a partial take. However, the structure in the northeast corner of the parcel would be

impacted. However, as I mentioned, we cannot give you a firm schedule at this time for right-of-way acquisition. The proposed Wekiva Parkway is still in the planning phase. Before right-of-way could be acquired, the final design of the project would have to be completed. That may be several years away. I suggest you contact Mr. Mike McPhail at the FDOT District 5 Right-of-Way Dept. (386-943-5071) to see if, in your particular circumstances, you might qualify for hardship-based early acquisition.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

I own a five acre parcel of land in Seminole County (Sanford) that is in the proposed path of the Western Beltway. I would like to sell this property, but have been unable to do so, due to full disclosure.

Can you please give me an update or the current status of this project, as my (current) retirement is dependant upon the funds that this property will generate for me.

Thank you.

Medea Minnich  
Regarding  
Brian,

I've just spoken with Mark Reggentin, and we'd like to combine our community meeting with the regular Mt. Dora City Council meeting on Tuesday, 1/4/11. This would get all the people in the room and be a more inclusive and comprehensive meeting.

I've edited my original message below to reflect this change in dates/purpose.

-Medea

Subject: Meeting with Lake Franklin residents

Dear Brian,

I write on behalf of concerned residents of the Lake Franklin area of Mt. Dora. We'd like to schedule a meeting with you and your colleagues, as well as Mayor DeMarco and the Mount Dora City Council, to discuss some issues related to the link up of the Wekiva Parkway with 441 at 46 in Lake County. Our neighborhood is bordered by 441 on the east and 46/1st Ave. on the south.

Here are the specific areas of our concern:

- details (3-D renderings if available) and rationale for the interchange alternatives
- noise mitigation, particularly along the east side of Stanley Bell
- proposed changes to traffic flow through our neighborhood, particularly Stanley Bell and Pinecrest
- timetable for construction.

The date we are considering for the meeting is Tuesday, January 4th, 2011, at 7 p.m.  
Please let me know if this date is okay with you and your colleagues, and we'll start to get the word out. Thank you.

Yours truly,

Medea Minnich

4/14/2010	7:12 PM	Mr. Nystrom, The proposed service road concept will differ from existing SR 46 in that it will be elevated in the same areas as the Wekiva Parkway to allow wildlife connectivity.	
-----------	---------	---	--

I have an air quality analysis report for the Wekiva Parkway. You are more than welcome to look at this report. I'm not sure I can email to you due the size of the report. I have scanned and attached the Executive Summary and Conclusion pages out of the report.

This is a link to the traffic study completed for the Wekiva Parkway: <<http://www.oocaa.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=TrafficReport>>

The projected traffic volume in year 2032 on the Wekiva Parkway with the local service road concept just west of the Wekiva River is approximately 71,600 Average Annual Daily Traffic.

Brian,  
Thank you for letting me know the projected traffic on the service road when I will be 91. I will keep those figures in my heart if not my soul.  
And I will try to keep global warming projections out of my mind because is that not when Sugar Loaf Mountain is projected to be the new port for Carnival Cruse Lines?  
Getting back, are we not getting back to square one?  
Is this not swapping an existing two lane road for a new mangled two lane road for local use plus the 1.8 billion+ other thing?  
Where is the gain in local capacity? What is the positive here for us local yokels?  
Oh, could you tell me about were I can drill in your web pages looking for pollution data relating to traffic numbers?  
Is there any data on traffic projections for the beltway through the Wekiva north and south?  
Thanks.  
John

3/29/2010 3:29 PM

Mr. Nystrom,  
Nice talking with you last week about the Wekiva Parkway PD&E study. I'm not sure I understand your request. Are you asking about the parallel service road concept through Lake and Seminole Counties?

Brian,

Can you send me information regarding OOCEA request for an arterial road in the Wekiva Parkway SR 46 corridor?  
John

3/22/2010

7:17 PM

Dear Mr. Nystrom:

The proposed Wekiva Parkway is in the planning/preliminary engineering phase referred to as a Project Development & Environment (PD&E) Study. The Lake County and Seminole County portions of the PD&E Study area are managed by the Florida Department of Transportation (FDOT). Once this process has concluded, the project will move to the design phase.

As recommended by the Lake County Commission, the Wekiva River Basin Commission and the Florida Department of Environmental Protection (in keeping with the mandates of the Wekiva Parkway & Protection Act), the preliminary Wekiva Parkway plans in east Lake County eliminate SR 46 as a through road from the Neighborhood Lakes area eastward to the Wekiva River. At the time the Act was passed in 2004, it was assumed the Wekiva Parkway in Lake and Seminole Counties would be built by FDOT. However, after an extensive financial analysis estimated the total cost of construction of the parkway to be \$1.8 billion, and with declining transportation dollars available to FDOT, it became evident that the Wekiva Parkway from Apopka to Sanford would not be financially feasible without tolls.

In early to mid 2009, citizens in the east Lake County area who live and work along existing SR 46 expressed concerns over paying a toll for a local trip. In mid 2009, the study team began analyzing options to provide a non-tolled service road in east Lake County along the Wekiva Parkway route. In response to those citizen concerns, and to those of local and state elected officials on behalf of their constituents, a non-tolled service road concept was developed. A duly advertised public workshop on the service road was held in Sorrento on December 17, 2009. FDOT is now in the process of incorporating the service road in the Wekiva Parkway alternative for east Lake County. OOCEA maintains the Wekiva Parkway project website, so you can review the service road concept graphic at: <<http://www.ooce.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=LatestRec>>

We are coordinating with the Federal Highway Administration (FHWA) to obtain the appropriate approvals to move forward with the recommended Preferred Alternative alignment. Once approved by FHWA, we will move forward with public hearings in each of the impacted counties. After a recommended Preferred Alternative is approved and funding is identified, the next phases of the project would be: final design, the right-of-way acquisition, and construction.

Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

Regarding  
Hi Brian,  
I am interested in purchasing a property and need some information about the Wekiva Parkway going through and the specific alignment.  
I got your message and if you can please email me a detailed map like the ones at the meeting on 10/28/10.  
The One's in a PDF on the website are too generic and do not show much detail. I need to know how close the highway right of ways will be to this parcel. And how the water runoff will impact the drainage and highly sensitive area "Weikva Basin" , as there are many existing water problems in many of the surrounding areas of this property in which this road will impact. As the position of CRHILL 2 I think that is the engineer firm's name? Says that they will have blinders on when it comes to the existing water problems and will not impact the area anymore than it already is, but that is not physically possible. That is like saying I am going to build a house on a swamp without impacting the area, well that would be true if I built it on stilts, but if I move the dirt and dig retention ponds then I would have to say I am changing the swamp into viable land and would have to purchase property elsewhere in order to change the current land from swamp land to buildable land that will impact this area. So I would like to know where all the water will go if there is a hurricane and where the overflow of the retention ponds will spill into?

Subject: RE: SR 46 Wekiva Parkway Project

To: Wynde Reneke

As shown on the attachment, your three parcels (1909, 1979 and 2020 outlined in red marker) at 7460 Colonial Court in Sanford are not impacted by the preliminary proposed alignment for the Wekiva Pkwy which is shown at the top of the graphic along the SR 46 corridor. As indicated in the previous email, there is no advance right-of-way acquisition prior to alignment approval and final design except in cases of extreme hardship. Thank you for your inquiry.

Mr. Lewis

I am the owner  
Property address is 7460 Colonial Ct., Sanford Fl 32771

To: Wynde Reneke

The Florida Dept. of Transportation and the Orlando-Orange County Expressway Authority are not advance acquiring right-of-way for the proposed Wekiva Pkwy/SR 46 Realignment project; also, the proposed project does not as yet have a formally approved alignment. However, if you will send me some info about the property (location/property owner's name/etc.) I will check its location and the current recommended alignment and get back to you.

Regarding

Dear Ms. Richardson - thank you for your email. Try visiting our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>> for information on the proposed parkway. To answer your question, if all goes according to schedule, we will be starting to acquire any needed right of way property in 2012 and hope to start construction by 2014. We hope to have the new Wekiva Parkway completed by 2018.

Please let me know if I can be of further assistance.

Comments: While the Wekiva Parkway Study has been going on for these last 11 years, the area from the Seminole County line/Wekiva River bridge to the I-4 interchange has become densely populated. Communities, schools, churches, and parks now cover most of the area being considered.

The impact on families and neighborhoods will be considerable and negative. The concerns of all citizens affected by this project need to be addressed. I don't think that full consideration of all options available has been fully investigated. The attitude seems to be - "Just get it done." There has to be a better way - a way that would lessen the impact on established communities and real estate values.

Emma Starling

Harris, Harris, Bauerle & Sharma

Regarding

Hi Emma - this is what I heard back from the project team:

The parcel you identified with arrows (#3240) is privately owned by Ray Cabanas. It is south and west of the Seminole State Forest boundaries. The preliminary estimated impact of the proposed concept on the Cabanas property is approximately 0.72 acres. The actual impact cannot be determined until completion of final design. The implementing agency would likely propose to acquire only the needed acreage and not the entire parcel, but that cannot be determined until the final design phase .

I am not sure if that answers your question or not. If not, please let me know.

Thanks and have a great holidays!

Brian Hutchings

>>> 12/07/10 4:42 PM >>>

Dear Brian:

The solid red line in the legend for the Wekiva Parkway proposed build alternative is "Public Lands." Does this mean land within the solid red boundary will need to be acquired?

If so, does the OOCEA/FDOT intend on acquiring the entire property identified with arrows on the attached map?

Kind regards,

Emma Starling, Esq.

10/11/2010

12:39 PM

I spoke to Emma and said that all the retention ponds are proposed:

Hi Brian:

Good job on getting the public hearing scheduled and all the information online.

Quick question: When there are a number of ponds located close to one another in a similar "series" - say for example; WR2-S-1, WR2-S-2 and WR2-S-3, does that mean that

all these ponds will be potentially acquired or will one become the preferred and only pond acquired?  
Thanks and I look forward to your reply.  
Kind regards,  
Emma Starling, Esq.  
Director of Business Development

1/4/2010 5:15 AM Hi Emma - we are still working at placing the maps on our website. Due to their size, it has been a bit tricky to do it. They should be up for viewing at [www.oocsa.com](http://www.oocsa.com) and clicking our system/future projects/wekiva parkway in the next week or so.

Best regards,

Shutts & Bowen  
Regarding

Hi Mary - I wanted to make sure that you received a response to this. The Wekiva Parkway project is currently not funded but we are continuing to work with our partners to identify funding options. The project information is still being reviewed by the FHWA. We are hoping that they will complete their review in the near future. We are hoping to hold the public hearings this summer but that depends largely on when the FHWA concludes their review.

I hope this helps. Please let me know if I can be of further assistance.

Best regards,  
Brian Hutchings  
Public Information Officer

Date            Time  
2/25/2010      1:59 PM

Regarding  
Dear Mr. and Mrs. Tasneem - It was a pleasure speaking with you yesterday evening. Your subdivision, Bella Foresta, is located immediately south of SR 46 in Seminole County (see attached graphic). Under the preliminary concept of the Wekiva Parkway project, there would be no direct impact on the lots fronting SR 46 as the south right-of-way line would be the same as existing. I cannot fully respond to your questions since the property ownership of all parcels in Bella Foresta is listed under Bradford Development Corp. However, you may be able to identify your parcel by viewing the attached graphic. If you like, please provide me with your property ID number assigned by the Seminole County Property Appraiser and we can find your parcel and have a better idea on what possible impact you could experience as it relates to this project.

Please let me know if I can be of further assistance.

Thank you,  
Brian Hutchings

Anita Wetherhold 7 Eleven  
Regarding  
Hi Anita - We are still in the PD&E-phase of this project, which is why we are holding the

public hearings to enable to public to comment on the proposed route of the new expressway. After that, a thorough review will take place and then we will be able to move into the design of the road, after that we will be able to start purchasing right of way, and then move on to construction. If all goes as planned, we hope to start construction sometime in 2014 and hope to have the new expressway open to motorists sometime in 2018.

I hope that answers your questions. Please do try to attend one of our public hearings - more information will be presented at the public hearings and the public will be able to provide their input on the plan. You can also visit our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>> for updates on the project.

>>> 09/07/10 9:22 AM >>>

Hi, Brian. Last time we talked (July 22nd), you had indicated that the alignment had not yet been approved, was still undergoing the PD&E stage and that the interchange locations had not yet been established. You also forwarded to me the update of the PD&E study.

You had also suggested that I check in every now and then on the status. So, I am checking in. Could you please tell me the status of the Wekiva Parkway? Has the PD&E been completed? Has the alignment been approved and interchange location in Orange County area been established? Our Department now has Orange County's proposed Interchange Land Use Plan in for review and the City of Apopka is nearing adoption of its Interchange Land Use Plan. I need to provide an update to my Bureau Chief tomorrow, so please, any updated information you can provide would be most appreciated and helpful. Thank you!!

7/22/2010 9:52 AM Ms. Whitfield called me this morning requesting an update on the Wekiva Parkway for a meeting that they are having today at 10:30am. She said she heard rumors that the final alignment had been selected and that the project was in engineering. I said this was not the case. I said I did an update on the project and that I would be happy to email it to her for her meeting. I said that it was recent as of June 2010 and that it had been vetted by FDOT and the Authority for accuracy. She said that would be helpful. I emailed it to her and she confirmed that she received it.

7/13/2010 3:24 PM Hi Anoch - no, the actual alignment has not yet been determined though we do have a preferred alignment. I am not exactly clear on what you are asking in question two. Are you looking at an area in particular? Again, we are still in the PD&E phase of this project. The Federal Highway Administration is conducting a review on the proposed alignment, environmental concerns/issues and public input to date (from our previous public hearings). Once they report back with their findings, we can move forward with holding the public hearings showing the proposed route of the Wekiva Parkway. After that, the public will have an opportunity to voice their input on this proposal. After that, work will commence on preparing a final design and then we can acquire right of way for the new road. Bear in mind that we still need to come up with almost \$2 billion to construct the new road and the funding mechanism to do that has yet to be established/approved. The best I can suggest at this time, is to please check our website regularly for updates on the Wekiva Parkway Project. All available information on this project will be posted there.

I hope this helps.

Hi, Brian. Can you please answer two more questions for me?

1) Has the actual alignment of the Wekiva Parkway been determined/established and now it's just a matter of finalizing the interchanges?

2) When does the Expressway Authority anticipate approving or adopting the location of the interchange in the Orange County area?

I look forward to hearing from you in the very near future. Thanks.

7/2/2010 1:50 PM

Dear Ms. Whitfield - In the Wekiva Parkway Project Development and Environment (PD&E) Study, two alternative local access interchange locations in the Apopka area were analyzed and evaluated during the period from 2005 to 2007. Due to the requirements of the Wekiva Parkway and Protection Act, only one local access interchange for the Wekiva Parkway (SR 429) is allowed in this area of northwest Orange County. Local access interchanges were evaluated at Ponkan Road and at Kelly Park Road. Both were considered viable options. The PD&E Study assessed potential impacts, costs, and traffic operations for the two alternatives.

The estimated costs for construction and right-of-way for the Kelly Park Road interchange and alignment alternative are significantly less than the Ponkan Road interchange and alignment alternative. The higher estimated construction costs for the Ponkan Road interchange alternative are mainly due to the need for more extensive floodplain bridging with that interchange concept. Generally, the estimated environmental, residential, and business (foliage nursery) impacts of the Kelly Park Road interchange and alignment alternative are less than the impacts of the Ponkan Road interchange and alignment alternative. The Kelly Park Road interchange and alignment would have less impact to floodplains, require fewer residential displacements, and have slightly less business impact.

The traffic analysis of the local access interchange options at either Kelly Park Road or Ponkan Road indicated little difference between the interchange locations. However, the traffic analysis report recommended the Kelly Park Road local access interchange location due to better spacing from the planned John Land Apopka Expressway (SR 429/SR 414) interchange at US 441 and better access, mobility, and user benefits for both northwest Orange County and east Lake County.

On February 23, 2007 the City of Apopka's Chief Administrative Officer stated that the Kelly Park Road interchange and alignment alternative was acceptable to the city. The Orange County Board of County Commissioners voted on March 6, 2007 to approve the Kelly Park Road alternative as the local access interchange recommendation. The Wekiva Parkway (SR 429) Recommended Preferred Alternative in Orange County, which includes the local access interchange at Kelly Park Road, is shown in the attached exhibit from the PD&E Study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,  
Brian Hutchings

7/1/2010 1:14 PM

Dear Ms. Whitfield - I am looking into this and will be back in touch with this information as soon as I am able. I hope to have an answer and map to you by the end of this week.

Hello, Brian. Thank you for taking my call this morning. Per your request, I am sending my question via email.

I am currently reviewing a proposed/draft Interchange Land Use Plan for the City of Apopka and need some clarification on the potential locations for an interchange in Apopka. Figure 8: Recommended Corridor for the Wekiva Parkway with Potential Interchange Locations from our agency's Guidelines for Preparing Comprehensive Plan Amendments for the Wekiva Study Area dated March 2005 shows one potential interchange location in the City of Apopka at Ponkan Road. This is the northernmost location in Apopka. Could you please confirm whether the potential interchange location has been moved from Ponkan Road to Kelly Park Road? If so, could you please provide a map?

I appreciate your attention to my question. Thank you.  
Anoch Whitfield

Regarding

Hi Tina - If you can provide me with the address to the property you are interested in along SR 46 that would be helpful to us in determining possible impact that might result from the proposed Wekiva Parkway project. Also, we are preparing to hold public hearings on the Wekiva Parkway project later this month. I have attached information on the public meetings for your information.

Please let me know if I can be of further assistance.

Thank you,  
Brian Hutchings  
Public Information Officer

9/30/2010

4:08 PM

We are a electronic development company that is interested in some property along State Rd 46 in Lake County. We have been told that a possible expansion of toll road 417 is being planned. The toll road would be expanded and running along state Rd. 46. I have studied the 5 year plan work plan on you web site

and from the information I read, there will not be a toll road running along SR46 but instead you plan to widen SR46.

It would be greatly appreciated if you could provide us with someone we could discuss this project with.

It is of vital importance to our company that we know what to expect if we purchase property along SR46.

Thank you,

Tina Zima

Greenberg Traurig Law Firm  
Regarding  
Brian,

I called and spoke to Terry regarding the answers below.

Michelle  
I think the questions were generated by the survey notice and I cannot answer some of them because they are final design/construction-related. Here's all I can tell you (please see attached graphic). The property in question is WP Parcel # 1118. Estimated impact is 1.43 acres. This estimate is based on the preliminary concept, not final design, and is subject to change.

Question 1 - answer is yes.

Question 2 - answer is these are not construction plans, they are preliminary concept plans. Estimated impact is 1.43 acres, but is subject to change in final design.

Question 3 - you know the answer; survey just getting underway, final design to follow, etc.

Question 4 - it is unknown at this time if a temporary construction easement will be needed; TBD in final design/construction plans.

Question 5 - required size of stormwater ponds will be determined in final drainage design joint public/private use of stormwater ponds is unlikely, but perhaps could be discussed during prep of final drainage design.

Hope this helps.

Subject: Fwd: questions about Wekiva Parkway

Dave-

Can you assist me with this? This is not about the survey but impacts to 750 Town Center Boulevard in Sanford, Florida.

Thanks- Michelle

7/18/2011 2:31 PM  
Hi Michelle - here is a new inquiry generated from the Wekiva survey letter. In reading the questions, I think that this is more of a David L./Mark C. issue than a survey Scott issue. I have added her email/contact info to the Wekiva Database. Please also note that she represents a law firm.

7/18/2011 2:25 PM

Brian-

We represent the owner of property located at 750 Town Center Boulevard in Sanford, Florida. Our client received a notice from the OOCEA regarding upcoming surveying work. Upon review of the information on the OOCEA's web page, we have pulled a limited amount of information and it appears there are two drainage ponds proposed to be located immediately south of our client's property. We would like to find out more information regarding the proposed ponds known as RP1-S-2 and FP33-CP-1. In particular, we are anxious to determine how the Wekiva Parkway project will impact our client's property.

At a minimum, would you please let us know.

1. Is the attached information the current and best available data as it related to our client's property?
2. It appears that ROW is going to be requested from our client's property. Specifically, if you look at the construction plans, the property line has been straightened out and looks like it has been pushed further north from the existing pond. Please confirm, clarify and elaborate.
3. What is the status of the design efforts of the Wekiva Parkway project?
4. Will OOCEA be requesting a temporary construction easement beyond the proposed property line in order to complete the construction work on the new ponds?
5. Will either of these ponds be oversized? As part of the development anticipated on my client's property, will we be able to utilize either of those ponds for a portion of our stormwater retention needs?

Thank you in advance-

Teri

Regarding

Hi Pat - You looked at board 13 on the Wekiva Parkway website. Were you able to identify your property from looking at the board? This board shows the preferred build alignment of the Wekiva Parkway project and is subject to change. The Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's

involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

3/18/2011 7:59 AM

A law firm specializing in eminent domain representation sent us a copy of Sheet No. 78 Proposed Build Alternative for the Wekiva Parkway. Our property fronts I-4 North of the SR 46/I-4 interchange.

What can you tell us about this project and whether any of our property may be impacted?

Regarding Mark,  
I have attached a map from OCPA showing Mr. Calhoun's property, and one from MicroStation showing the parcel lines in our file. Brian Sanders is correct in that the parcel lines showing on OCPA are not what we have in our parcel file. There is a flag on the east side of parcel 2119, and an easement on the west side of parcel 2041 that are not shown in our parcel database. According to MapQuest, there is a "Calhoun St." on the west side of his property. MapQuest is not always accurate, but Calhoun St. could be either of those.

Regarding  
Mr. Hutchings,  
I'm interested in tracking the Wekiva Parkway Project for teaming opportunities. I was told last week that CH2MHill was selected as GEC. Is it possible to get the OOCEA and CH2M Hill project manager's names and contact information?  
Thank you,  
Russ Daly, PLS

Regarding  
Per your request, attached please find a copy of the proposed alignment of the Wekiva Parkway Project. You will note that your property is indicated as parcel #2876. We show that your parcel size is 2.32 acres. The estimated impact to your parcel is 1.29 acres with a potential impact to your residential structure (i.e. your home). Please be reminded that this is an estimated impact that is based on the preliminary concept for the Wekiva Parkway. This is not the final design and is subject to change.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

FYI. Spoke to Cyndi via phone. Explained we are trying to wrap up the PD&E by late summer and suggested that she call me back in Aug/Sept. and hopefully will have additional info to share with her. I mentioned there is a control survey being done and her client may have received a letter, however that is just pre-design work. She understands the process and said she would contact me in Sept. If you all have any questions please let me know.  
Michelle

5/31/2011 12:57 PM Property is Golden Vision Flower (plant nursery) at 2809 W. Kelly Park Road, Apopka. It is WP Parcel #2103 (see attachment) in NE quadrant of Kelly Park Rd./Plymouth Sorrento Rd intersection. It is a large parcel (approx. 39.76 acres) with estimated minor linear impact of 0.15 acre (6,359 sq. ft.) due to proposed intersection improvements. Estimated impact is preliminary, based on engineering concept not final design and is subject to change.

>>> "Dyson, Cyndi" <Cyndi.Dyson@fowlerwhite.com> 5/26/2011 10:21 AM >>>  
Good morning:

As you may be aware, we represent Mega GNG LLLP d/b/a Golden Vision Flower, Inc. Parcel ID: 07-20-28-0000-00-009). Can you please provide us with the most up-to-date Maps relating to any taking on their property as it relates to the Wekiva parkway project. Thank you.

4/27/2011 11:42 AM Hi Cyndi - The Expressway consolidation measure you note has not totally been removed from consideration but we are hopeful that it will not pass. We will know for sure, in a week or two, prior to the end of this legislative session. The Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

>> "Dyson, Cyndi" 04/26/11 1:09 PM >>>

I just read an article online that "Lawmakers drop expressway authority takeover". Since there were articles that said the Wekiva Parkway could be affected if this bill went through and now it seems it is not, can you advise what the status of the Wekiva Parkway Project is? What phase is it at? When can we expect ROW maps? Is there any schedule for appraisals? If so, when can those be expected. Thank you in advance for any information you can provide.

Regarding  
This letter was sent from OOCEA's assistant general counsel to Meredith Delcamp at Fowler White Boggs P.A. who represent the Eldridge's.

Dear Ms. Delcamp,  
OOCEA is in receipt of your correspondence and the Attorney Authorization for the referenced parcel. We have provided a copy of the Attorney Authorization to our right-of-way counsel for their future reference.

As for the items you have requested, there are currently no construction plans, ROW maps or appraisals available for the Wekiva Parkway Project. As you may know, the final alignment was only approved by OOCEA's Board of Directors last week. As the project progresses, all current information can be viewed at [www.wekivaparkway.com](http://www.wekivaparkway.com).

I am enclosing for your reference a projected timeline that was prepared for the project. These dates are only a projection due to the fact that funding for the project has not been secured.

Should you have any questions or need additional information, please do not hesitate to contact me.

Dyana Petro  
Assistant General Counsel  
OOCEA

Charles Ellis

Date  
1/27/2011

Time  
2:05 PM

Regarding  
Hi Charles - Attached is Wekiva Pkwy preliminary plan sheet P-38; 12 Oaks RV Resort is in the center-top portion of the aerial, north of existing SR 46 and west of N. Orange Avenue. If you zoom-in on the pdf, you will be able to see parcel numbers, the right of way line, etc. The estimated impacts to three parcels shown in the Seminole County Property Appraiser's records under the ownership of the late owner of Twelve Oaks, Tom Vellanti, are as follows:

PD&E Study Parcel # 3038 (Parcel ID # 25192930002400000)  
Parcel Size: 0.62 acre  
Estimated Impact: 0.26 acre

PD&E Study Parcel # 3102 (Parcel ID # 25192930002300000)  
Parcel Size: 2.87 acres  
Estimated Impact: 0.72 acre

PD&E Study Parcel # 3241 (Parcel ID # 25192930002800000)  
Parcel Size: 25.33 acres  
Estimated Impact: 3.39 acres

Please keep in mind that these estimated impacts are based on a preliminary concept, not final design, and are subject to change. Also, the PD&E Study is only preliminary

engineering and, as such, no survey work has been done. Survey will be undertaken in final design. Likewise, no formal appraisals of any properties along the proposed alignment have been done. That will undertaken in the right of way acquisition phase after final design. Attached is Exhibit 5-19 from the Noise Report. It shows a potential noise wall along the right of way line at 12 Oaks. You will note that an opening in the noise wall for access is shown in the depiction. You may also want to check out the Noise Report which is posted on the project website at [www.wekivaparkway.com](http://www.wekivaparkway.com) if you are interested in further details on the Noise Report and to view an updated project timeline.

Please let me know if you have any questions or if I can be of further assistance.

1/27/2011 2:05 PM

Brian, thank you for taking the time to today to discuss the impact of the proposed Wekiva Parkway to Twelve Oaks RV Resort located at 6300 West State Road 46, Sanford, Florida in Seminole County. As I mentioned, our company, Carefree RV Resorts is in the process of negotiating a contract to acquire the RV property. Carefree has been actively involved in the ownership and operation of manufactured home communities and RV parks since 1996 and we have every intention of keeping the property an RV resort. Carefree is not a developer and we have never closed a property for an alternative land use. Therefore, I am very interested in the short and long term impact that the proposed parkway will have on the operations and any information that you can provide will be very helpful in our due diligence investigation.

I have visited the parkway website and have a general understanding of the impact to the property but would like to receive additional information to the extent that it exists. Therefore, at your earliest convenience, please provide me the following information at your earliest convenience:

1. A survey of the proposed taking with legal description and total acreage.
2. Impact studies related specifically to the Twelve Oaks taking
3. Any information from an appraiser or other regarding valuations and methodology
4. Proposed alternative ingress & egress locations
5. Effects to zoning (setbacks, density, etc)
6. Project timeline

Thank you in advance and please feel free to contact me directly regarding any additional questions or comments.

C'Sandra Hall

Regarding

Hi C'Sandra - I hope you are doing well. The work you are seeing near T L Smith Road and Plymouth-Sorrento Road are part of the State Road 429/SR 414 Extension project. That project will extend SR 429/SR 414 northwest from Boy Scout Road to just north of US 441. This work is not part of the Wekiva Parkway project per-se, but the Wekiva Parkway will ultimately connect into this road once construction on that project has been completed. Please click here for more information on the SR 429/SR 414 construction projects:

<<http://www.ocea.com/Corporate/oursystem/SR429/Projects.aspx>>

The Expressway Authority and the Florida Department of Transportation are in negotiations regarding the funding and construction of the Wekiva Parkway project. Hopefully, a formal agreement will be reached in the near future. For updates on the Wekiva Parkway project, please visit our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>>.

Thank you,

Brian Hutchings

10/3/2011

4:44 PM

Hello Brian this is C'Sandra Hall at 3715 Hideaway Rd. I need a question answered if Brian Hutchings possible.

Between the newspaper articles and not hearing a word from the Expressway it is driving us over the edge.

We see all the things going on at T L Smith road also land cleared back and piles of dirt off the Plymouth Sorrento RD, yet we was supposed to (for sure) after September about what was going on. I realize you are fighting with Orange Co ,Dot etc. To stay separate

and also trying to find funding.

I see where they have the traffic counters on our road 437 and they say there isn't enough traffic to warrant too fees. Do they stop and think about the truckers and travelers from I-95 who would get off at 46 and miss all the traffic through Orlando to get to Mt Dora, Apopka, Disney, Sea World and Universal.? Of course I know they have.

Bypassing I-4 to go around Orlando would be a gas saver and time saver. Sorry just have to blow off some steam. We would like to know something out this way. To see progress going on but not knowing is horrendous.

Thank you,  
C'Sandra Hall  
skitten10@live.com

2/7/2011 10:05 AM Dear Ms. Hall - Since the Wekiva Parkway public meetings there were held last October, Orange County, Seminole County and Lake County have all approved the proposed alignment in their respective jurisdictions. We are in the process of preparing a final report to submit to the Federal Highway Administration to obtain their approval of the overall alignment. Once we get this (hopefully sometime late spring or early summer of this year) we will be able to move forward with the design/engineering of the project. That should take approximately a year. After that, we will be able to start acquiring any needed right-of-way and hope to start construction sometime in late 2014 and have the project completed by 2018. All this is contingent on finalizing the funding to build the \$1.7 billion project - that work is ongoing. For updated information, please feel free to visit our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) or contact me.

Best regards,  
Brian Hutchings  
Public Information Officer

Notes  
Date Time Regarding  
4/7/2011 4:07 PM Brian,  
I am doing some research for a potential real estate investment near the Seminole Towne Center Mall and had a few questions about the future road plans in the Sanford area. I left you a voice mail earlier but wanted to follow up with an email as well. Specifically, I wanted to know what is the time frame for the completion of the expansion of SR 417 (or SR 46) west of I-4 to U.S 441, what is the total cost of the project, and what stage the project is currently in? Also can you describe the nature of the expansion, for example is a new road planned to be built, or is State Road 46 just going to be widened and connect with SR 417? Thank you in advance, and if you prefer to speak on the phone or have any questions please don't hesitate to call.  
Regards,  
Mitchell Halpern  
Financial Analyst

4/7/2011 4:06 PM Hi Mitchell - I am sorry I missed your call, I was on the other line. Thanks for your message and email. I believe you are referring to the proposed Wekiva Parkway project. Here is the link to our project website that contains many of the answers you seek: [www.wekivaparkway.com](http://www.wekivaparkway.com)

wekivaparkway.com <<http://www.wekivaparkway.com>>

The estimated cost to build the parkway is \$1.8 billion. However, the Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

Mary Harvey

Regarding

Ms. Harvey,

Your email was forwarded to me regarding the survey work currently being done in your area. I requested that the team doing the work assist me in replying back to you. The surveyors will be in your area over the next several weeks. If you would like, we can have them contact you 24 hours prior to coming onto your property. Just let me know.

Should you have any further questions please do not hesitate to contact me directly at 407-690-5344.

Regards,

Michelle Maikisch  
Coordinator of Public AffairsOrlando-Orange County Expressway Authority  
maikischm@oocea.com <mailto:maikischm@oocea.com>

Responses to your questions:

Yes the surveyors will have a photo ID. In fact they should have a photo ID and a copy of the Property Access letter mailed to Ms Harvey. They should also have some identification for the company they represent (i.e. company name on shirt, company name on vehicle, etc).

The surveyors will be performing two activities, setting aerial targets and/or setting a Project Network Control (PNC) stake. They may not be setting both on an individual property. Once the PNC stakes are all set and surveyed into the overall network, the surveyors will be re-entering the property to set a concrete monument with a brass disk. If they are only setting a target on the property they will re-enter the property, after the aerial company notifies them the aerial photograph is OK, to remove the aerial target. We can have the surveyors notify Ms Harvey the day before they intend to re-enter her property so she is on-site.

This surveying effort will not include providing a property boundary survey for purposes of acquiring property. This survey effort is to acquire topographic features in order to prepare the final design plans. After the design plans have progressed to a level of sufficient detail to identify if/how the roadway will impact Ms Harvey's property then a boundary survey will be performed. However that could be a year or more away. At this point the design is very preliminary and we cannot definitively say if/how we will impact Ms Harvey's house.

With regard to acquiring Ms Harvey's property if it is determined to be impacted, according to the R/W Agents the acquisition process generally takes 15 - 18 months from the point Ms Harvey is notified of the intent to file an Eminent Domain action. But as noted above, that is likely a year or more away at the earliest.

7/15/2011 3:43 PM

Mary Harvey  
3151 Yothers Rd.  
Apopka, FL. 32712

I received a letter regarding the surveying that will be taking place. Do you have any info regarding when that will take place at my property? And how this works? Will the surveyors have any form of photo ID and what will it read. How long should I expect them to be on my property and will I be able to schedule a predetermined time so I am present. Will I have access to the final chart to compare it to my deeded property?

I understand progress and the need for expansion, although I truly wish it would have taken a different path instead of through my house.

This has been my family home for close to 40 years, I grew up here and so did my children. I know alot of the families are happy to leave, but I for one am not looking forward to the change. But alas time and progress have no patience for memories or sentiments.

I am interested in the process of what happens now as we wait the fate of the expressway  
What is the usual timeline from this point (surveying) to accuisition of my property?

Brian, if you could mail a copy as well it would be great for those who do not receive email  
My address is 25628 Hawks Run Lane, Sorrento, FL 32776

Mr. Smalley,  
Just want to take a moment and thank you for your interest in the Wekiva Parkway PD&E study. I misplaced the sign in sheet from yesterday's meeting and had a request from a gentleman for the attached concept plan. Could you forward this attachment to the group that participated in the meeting? Thank you and if there is any other information you need for the Wekiva Parkway, don't hesitate to contact me.

To: Construction<construction@oocea.com>  
Subject: RE: International Parkway Ramp

Brian,

Thank you for this email. Please confirm whether this means that the International Parkway ramp currently under construction by FDOT will be removed when the Wekiva Parkway Interchange with I-4 is built.

Best regards,  
Kent

1/17/2011 2:14 PM <HTML><META HTTP-EQUIV="content-type" CONTENT="text/html; charset=utf-8">

Hi Kent - The configuration and alignment of the ramp to International Parkway is not compatible with the Wekiva Parkway proposed build alignment modification of the SR 417/I-4 interchange. That was looked at several years ago. The International Parkway ramp is considered an interim measure to address existing traffic problems.

I hope that helps answer your questions.

1/5/2011 10:52 AM Mr. Hipp called seeking a map showing the new interchange improvements in I-4/46 and how those will compliment the planned wekiva parkway in that area.

Jeff,  
Per our conversation on the phone this morning, I am sending you a written email request for information on the Wekiva Parkway.  
For the overall project, I would like the schedule for design, right of way acquisition, and construction.  
We represent a client in the northeast quadrant of the proposed interchange with Kelly Park road. The PD&E map shows a limited access (LA) right of way line for several hundred feet on Kelly Park Road. This would landlock our client's property. Are the any frontage or access roads being considered? If so, do you have drawings showing them? If so, I would like a copy.  
Thank you,  
David Holloway  
Simon & Holloway, PA  
5945 Florida Avenue  
New Port Richey, FL 34652

4/28/2011 4:01 PM Hi Steve - The Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving

Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

>>> "Steve Ivins" 04/28/11 3:56 PM >>>  
Hello Brian

With reference the wording below which was taken from the handout available from the Public Hearings, would you happen to have an update of the project status? If the information is available on another site, I would appreciate it if you would point me in the right direction.

Thank you.

What are the Next Steps?

After the public hearing and consideration of all comments received, FDOT and the Expressway Authority will recommend a Locally Preferred Alternative to the FHWA for their approval. Final engineering and environmental documents will be completed for review by FHWA. FDOT and the Expressway Authority hope to receive the needed Federal approvals for the overall project by the Spring of 2011.

If a Build Alternative is selected as the Locally Preferred Alternative, and if funding becomes available, FDOT and the Expressway Authority will continue developing the facility design, and initiate more detailed surveys of resources as required by regulations

Steve

Pam Jones

Gaylord Merlin P.A.

Regarding

Hi Pam - we held a series of 3 public hearings last October for the Wekiva Parkway PD&E project (in Orange County, Lake County and Seminole County) to present the proposed build alignment for the project. No future public meetings are scheduled at this time. Regarding the timetable, Orange County, Lake County and Seminole County have all approved the proposed alignment in their respective districts. We are working on a final report to submit to the Federal Highway Administration to receive final approval for the proposed alignment. We hope to receive their approval sometime later this year (by the end of summer). Once we receive that, we can begin with the design/engineering of the project. That will take approximately a year or so and after that we will be able to move ahead with purchasing any needed right-of-way. We are hoping to begin construction sometime in 2014 and are looking to have the road completed sometime by 2018. All of this is contingent upon obtaining the \$1.8 billion needed to build the project - those efforts are ongoing. For updated information, you can visit our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>>.

Please let me know if you have any other questions or if I can be of further assistance.

To: Jere' Matheny  
I apologize for the delay in responding to your email below; I have been out of the office on a project for several days.

I have spoken to Ms. Reneke in the past and have provided her the name, phone number and email address for the FDOT District 5 Right-of-Way contact for the proposed Wekiva Pkwy project. I would doubt that what FDOT D5 told Ms. Reneke in the past has changed. The project is still in the preliminary phase and right-of-way cannot be purchased except in cases of proven extreme hardship.

Ms. Reneke's property (parcel # 1909, 1979 and 2020) is located at quite a distance from the proposed Wekiva Pkwy alignment and would not be impacted by the project. Please see the attached graphic. The two parcels you mentioned that have been acquired due to extreme hardship would both be impacted by the project if it proceeds. One parcel is just north of SR 46 and is the site of a proposed retention pond. The other parcel is well south of SR 46, but it is within the proposed alignment of the project for connection to the SR 417/I-4 interchange.

I am a project consultant and cannot speak for FDOT, so you may wish to contact D5 Right-of-Way. You can contact either:  
Mike McPhail at (386)943-5071 or Michael.McPhail@dot.state.fl.us <mailto:Michael.McPhail@dot.state.fl.us>  
Jim Clark at (386)943-5099 or James.Clark@dot.state.fl.us <mailto:James.Clark@dot.state.fl.us>

Sent: Wednesday, April 13, 2011 11:33 AM  
To: Lewis, David/ORL  
Subject: Wekiva Expressway Land Aquisitions

Good Morning, my name is Jere' Matheny & I'm a Real Estate Consultant & I have a client Wynde Reneke who owns property in the Yankee Watershed/Wekiva Protection Area out

by State Road 46 (Parcels 1909, 1979 and 2020 at 7460 Colonial Court in Sanford) & we are attempting to locate someone at the state level who can point us in the right direction as far as State Land Aquisitions are concerned with relation to the Expressway project. We contacted the state prior to the Final Approval of the Alignment & they stated that they could not make any purchases prior to Final Alignment Approval unless it was a case of extreme hardship.

We have been notified that the final alignment has been approved & furthermore we believe that SR46 expansion and the impact of the traffic and drainage via Yankee WaterShed has created a devaluation of my client's property which has now created an extreme hardship as my client must move due to job and can't sell the property. Thus far the state has made two hardship aquisitions 9.91 acres @ \$1, 650, 000.00 & 1 15 acres @ \$385, 000.00., neither of which were directly on State Road 46 & in our opinion neither of which is more important to wildlife & waterflow in this area. Furthermore we believe that my clients property is situated ideally for equipment staging during the project and can be turned into green space after project completion. If you could advise as to how you would recommend we proceed, either on a State or Local level, your input would be greatly appreciated.

Thanks,

Jere'

Thanks for writing to the Florida Department of Transportation with your concerns over the location and impact of the Wekiva Parkway.

When a project such as this is proposed, transportation planners do not take a it lightly. Studies are done and numbers/costs are reviewed. Public input is sought. Environmental and social impacts are measured.

If at the end of all that, and after all the impacts are analyzed, and if there is still the collective will by leaders and the public to move forward, only then does a project like Wekiva Parkway move forward. And, that is where we are today.

I will send your concerns to the project team, so they have record of it as well.

Thanks

Subject: Parkway

I hope you do not help with the Wekiva Parkway it is not wanted or needed. It will destroy so many small businesses and remove people that have homes and small farms that have been in some families for 4-5 generations. This is in addition to all the animals that will be killed and environment that will be destroyed due to money.

Please for once consider the people that were born here for several generations and what we want instead of what tourists want.

Mindy McCormack

Rena McDonald

Stirling Realty

Regarding

Brian,

It was a pleasure speaking with you today about the Expressway. As I said in our conversation, the real estate agents in our office are always getting questions about the plans for the Expressway Extension, where is it going, where will the ramps be located, when will construction start and finish. Therefore, I would like to request if you could please come to one of our weekly office meeting sometime soon and speak about the future construction of the Expressway roads in the Seminole, Lake and Orange County area.

Here are some upcoming dates of our meetings, please see if any of these date would be convenient for you.

There would be about 20 agents attending, and you would have between 30 min to 45 min. to speak and answer questions. Tuesday 9:30AM - Dates available: June 21, June 28,

July 19, July 26th.  
Thank you,  
Rena

Regarding  
Hi Suzanne - The Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

>>> "Merced, Suzanne" 04/26/11 5:31 PM >>>  
Hello Brian,

I am going to be affected by the construction of the Wekiva Parkway and was wondering when the website may be updated with some new information? We have read a lot about the construction on the local news stations' websites and they all say that the current budget includes land acquisitions. Any idea when that is slated to start?

Thanks,  
Suzanne

2/8/2011 3:00 PM

Brian and Glenn:

Please provide to me the current schedule for the Wekiva Parkway according to activities from real estate acquisition to construction start and completion. I am looking for something general but official, such as that presented during the three public workshops a few months ago.

This information is needed for a planning meeting we are having this Thursday, February 10. Thank you.

David B. Moon, AICP  
Planning Manager  
City of Apopka

2/8/2011 11:52 AM

Mr. Moon called me last evening while I was driving home asking for updated information on the Wekiva Parkway project. I told him that we completed the public hearings in October 2010 in Orange, Lake and Seminole Counties to present the proposed build alignment for the project and that since then each respective county had approved the alignment in their areas. I said we are now preparing a comments and coordination report to provide to the Federal Highway Administration for their final review and approval of the proposed build alignment. I said once we receive their final approval (hoping for sometime this summer) that will conclude the PD&E Study and we will then move into the design-engineering phase. I said if all goes as planned we hope to start the design-engineering sometime later this year and that this process would take approximately a year so basically the end of 2011 to the end of 2012 or early 2013. I said after that, we will be able to identify the exact right-of-way needs to accommodate the project. I said that the right-of-way acquisition process is scheduled to take approximately a year which would put us into early 2014 if all goes as planned. After that, I said we would be able to begin construction and that construction is scheduled to take place approximately 4 years and that we hope to have the Wekiva Parkway open to motorists

sometime in 2018. I said that this is contingent on finalizing the funding plan for the project and that those efforts are ongoing. I noted that FDOT Dist. 5 was a partner in this project and that they were supportive of it but that their available funding is being focused on the completion of the I-4 improvements. I said that we were actively seeking other funding partners, including the Florida Turnpike, but that this does not impact the completion of the PD&E process and that we have also set-aside funds for the design-engineering. I also mentioned that the Orange County portion of the Wekiva Parkway would be built by OOCEA as a toll road so the main question was the funding for the Lake County and Seminole County portions. I said that project information can be found on the Wekiva Parkway website at [wekivaparkway.com](http://wekivaparkway.com) and I said if he scrolled down to the bottom of the center column he can access documents/maps from the public hearings. I asked him to give me a call back if he has any further questions etc.

Regarding  
Mr. Ogle,  
Please see the attached map and the text in blue below regarding any potential impacts to the parcels AltKey# 1124867 and AltKey# 1709261 in Lake county. I have also included a link to a map from the public hearings held in 2010 showing a larger picture of the area. Should you have any further questions please do not hesitate to give me a call back.  
Regards,  
Michelle

7/18/2011      11:46 AM

Hello Michelle,

My name is Jeff Ogle and I spoke with you in the afternoon of last Friday but your computers had gone down because of the thunderstorm. My family has just put a deposit down on a piece of property in Sorrento not realizing that the 429 would be going right through the piece of property located behind me. We are looking at purchasing AltKey# 1124867 and the 429 is planned to run through AltKey# 1709261. My questions are as follows:

Is the Expressway Authority purchasing the whole 39 acres behind us or from the middle over to the east that backs up to our piece of property?

The remaining property to the east of the 429, is it going to be cleared of all trees or the trees going to remain as a buffer?

Please call my cell phone as soon as possible this is kind of urgent! We have 7 days to run all inspections and this 429 issue just might cancel the deal. My cell number is 321-228-0276. Thank you so very much for your help.

Sincerely,  
Jeff Ogle

Tonya Ortiz

Date            Time  
7/18/2011      3:20 PM

Regarding  
Ms. Ortiz called to let me know that she experienced flooding at her home located at 302 Blue Jacket Lane in Moss Pointe. Her neighbor is Jasmine Lee and that is how she got my number. She said that she was home when it happened and that she cleaned up the water herself before there was any damage. She said that she rents the house and that she called the owner to let him know about the issue. He said that he's lived there (before her) for 17 years and never had a flooding issue (this jives with what Ms. Lee said). I asked her to give me the owners contact information. She said she didn't have it handy and noted that he spoke spanish and very little english. I said we have a spanish-speaking person on staff and asked her to please forward my number to her if he has any questions. I said that we are looking into the flooding issue and are going to do our best to prevent future flooding.

4/28/2011

Time  
3:24 PM

Regarding  
Hi Lee - I am going to assume that you are referring to the proposed Wekiva Parkway project. We have maps showing the alignment for the proposed connection with the Wekiva Parkway and I-4 on the project website at [www.wekivaparkway.com](http://www.wekivaparkway.com). To pull up the map information, scroll down towards the bottom of the page and click 'click here for maps and information from the public hearing sessions.' When you pull that up, you will see about a dozen maps and click the ones that read SC - for Seminole County. I think that will provide the information you are seeking. Regarding the schedule, the Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

>>> "The Owens" 04/28/11 8:59 AM >>>

Hi,

I have been trying to find the map for the latest route planned for the 429 extension to connect with I4.

Can you direct me to the web page that has that latest info? Also, what is the current schedule for this project?

Thanks,  
Lee Owen, Eustis

Subject: Two Hundred Million in Waste

Florida Department of Transportation, Lake County Commissioners, Office of the Governor and Members of Congress,

The Subject line could become reality without a little common sense, logic and reasonable thinking, Wednesday July 13, 2011 in a meeting with the Florida Department of Transportation discussing the future of the Wekiva Parkway and exploring ways to reduce the overall expense of constructing this much needed "missing link" we spoke of lowering the roadway to grade and reducing the number of interchanges a potential \$100,000,000 00 savings, leaving more of the current State Road 46 in place a potential \$70,000,000.00 in savings and the re-alignment of Lake County 46-A with a potential \$30,000,000.00 in savings. During the discussion of the re-aligned County Road 46-A it was stated that with "Federal Funds" involved building the re-aligned portion in lands already owned by the State of Florida is not allowed when there is a "Viable Alternative" and if there was a possibility the Florida Department of Transportation fears it would be sued by the single land owner who benefits financially from this viable alternative.

Let's first step back and look at some of the pertinent language within the Wekiva Parkway and Protection Act that deals with the re-aligning of Lake County Road 46-A and some of the artistic license that has been used for interpretation:

1. "Remove the section of County Road 46-A that parallels State Road 46" this amounts to about one mile, what is being removed amounts to nearly three miles of a roughly four mile section.
2. "the Re-Aligned Lake County 46-A will connect with the Parkway at the Interchange" what is being built is an intersection nearly a mile to the west of the interchange.
3. "Local Roads shall remain local" the local roads are being chopped, cut and dissected so much that it forces local residents onto the parkway.

As with the above language I find it offensive the use of the language "Viable Alternative" in the Federal requirement when Cities, Counties, States and even the Federal Government face what is becoming nearly insurmountable deficits. It is my opinion that as a requirement of this language the financial aspects now and in the future must be considered and weighed in any decision. The voices of the public and those immediately impacted also be considered, not just the singular individual receiving the financial windfall of this mis-guided portion of the project. Consider the following items:

1. Building this portion of roadway directly reduces the future value of property taxes collected by hundreds of thousands per year by reducing the value of those properties adversely affected.
2. Building the road within a hundred feet, a four lane roadway, of 44 personal residences as opposed to within several hundred feet of one owner the beneficiary of the sale of his property.
3. Purchasing of land designated a PUD which requires a higher dollar being paid for the property.
4. Building of an intersection where there was none before and within feet of numerous driveways and streets.
5. Building the intersection creates a liability many years into the future from accidents which cause injury and death when no intersection of this nature is needed, taxing the resources of the County and State.
6. Ignoring the wishes of several hundred who have opposed this re-alignment versus the few who will or may receive a financial benefit from the re-alignment.
7. Allowing for the exchange of County for State owned property, the current 46-A road bed, and exchange for access to land owned by the State, 2 miles of County Road for 1 mile of State land.

It is time for the leaders to lead and be responsible to the taxpayers by not spending when spending is not an absolute necessity, there are many alternatives which when

utilized reduces the expense of building the road and ancillary roads that tie this community together. As I stated previously I find it irresponsible to not consider the financial ramifications today and into the future. What was accepted practices just a few years ago is no longer tolerable, rules written must be addressed in each situation and common sense logic applied, DO NOT continue to spend what we do not have. I have to laugh at those who look at "Funds" as being "Free Money" every dollar has its origins from taxpayers, Government is not a revenue producer, it is a revenue user, it is time for every elected, appointed and employed County, State and Federal employee to become responsible to the taxpayer, there is no free ride STOP THE FOOLISHNESS and use the land that is already owned and paid for by the taxpayers, keep tax producing land in the private hands by not removing it from the tax rolls.

MOVE COUNTY ROAD 46-A ONTO THE TAXPAYERS LAND, NOT BUY LAND AND REMOVE IT FROM THE TAX ROLLS! ! !

There is more to this than what I can write here,

Bill Smalley

Scott Smith

Regarding

Please see attached graphic. Scott M. Smith owns three parcels (#2929, #2947 and #2948), each with the address listed as 115 S. Center Rd. in Sanford. Based on the preliminary concept (not final design), estimated impacts are shown below.

Parcel #2929: 0.01 acre  
Parcel #2947: no impact  
Parcel #2948: 0.02 acre

As you know, these are preliminary estimates and are subject to change in final design.

Subject: FM# 240200-1-28-01 - PD&E for future capacity

Brian:

I recently received a call from a Mr. Smith who is seeking to refinance a property at 115 S.

Center Road, Sanford. His attorney is working with his lender on this, but he wanted to check for possible expansion of SR 46 which would likely cut into his property.

The only project in the adopted Work Program that I could find was FM# 240200-1-28-01 - SR 46 PD&E from Lake Co. Line to I-4.

Please review this to see if the property falls in this area. Once you have made a determination (yes or no), please contact his attorney, Luke Davis, at 407.513.1900 ext. 7260 as to the status of his property.

4:30 PM

Good afternoon Brain,

Florida Capital Bank is the mortgage holder on the parcel owned by the Soderstrom's on Wilson Road, in Sanford.

It is my understanding that this land is under consideration for eventual purchase for use as an exit ramp for a new expressway or freeway.

Can you provide a brief status update of the project and let me know if this is still in the larger plan.

Thanks.

Regarding

12/6/2011

3:34 PM

Emma:

My original email to Brian Hutchings (see attachment) had the decimal point in the correct location (i.e., 0.20 acre). Not sure why it wasn't there in the email Brian forwarded you. I took the estimated impact of approximately 8,635 sq. ft. directly from the preliminary

right-of-way impact sheets prepared for the proposed concept, so that number is correct. You requested dimensions. I scaled the estimated impact area from a small plan sheet to give you a quick, very rough approximation of length by width. It varies because the property is along an area where a proposed ramp would tangle into the mainline (see attachment). I probably underestimated the length toward the east as it appears, upon zooming in, that the proposed right-of-way line and the parcel boundary line are not exactly synonymous. I can have our technician prepare a detailed drawing showing the actual dimensions of the Parcel 2772 impact area, but only if OOCEA authorizes me to expend staff time on that. Please keep in mind, as my original email notes, the estimated impact (8,635 sq. ft.) is based on preliminary concept plans and is subject to change in final design.

Subject: RE: Wekiva taking - Mahaffey Property

Dear David:

Thank you for helping me on this. I just needed some clarification. Below it states that approximately 8,635 square feet or 0.20 acres will be taken (I believe you meant to type 0.20 acres).

However, if I do the math of 20' x 275' it equals 5,500 square feet. Can you explain the difference in these figures for me? Perhaps it is because (as you stated) the width is varying? Thank you in advance for your assistance.

Kind regards,

Emma Starling, Esq.

1201 E. Robinson Street

10/17/2011 4:12 PM

Hi Brian: We have been following the Wekiva Parkway project closely and attending the OOCEA meetings. At the meetings and in the Secretary Prasad interview in the Sentinel today that "right-of-way acquisition was on track." Can you give me an update for the design and right-of-way acquisition stages please? Give me a call if that is easier - ph. 407-472-1562.

Kind regards,

Emma Starling, Esq.

7/11/2011 9:30 AM

Jeff responded that this was true.

I have heard that land owners are receiving letters from OOCEA saying that they will be contacted by a surveyor and listing the surveyors you guys have retained. Can you confirm this for me please?

Thank you,

Emma Starling, Esq.

1201 E. Robinson Street

Orlando FL 32801

5/31/2011 12:05 PM

Just spoke to Emma and provided her an update that we have a partnership with FDOT and FTE. I explained that we do not yet have the information she has requested and suggested that she contact us again within the next couple of months.

Michelle

4/5/2011 3:22 PM Hi Emma - I checked and CH2MHILL has not produced anything beyond the preliminary plan sheets and the display board maps shown at the October 2010 Public Hearing sessions, which (as you know) are provided on the project website. We have no idea who created those other maps that you are referring to. Please let me know if you need anything else.

Thanks,  
Brian Hutchings

Dear Brian:

We have been getting message from clients saying they are getting maps from other attorneys that have more detail than the concept plan sheets from October 2010 (for example one said they have measurements in feet on them). Have FDOT or OOCEA begun doing a more detailed plans or ROW maps at this time?

Kind regards,

Emma Starling, Esq.  
1201 E. Robinson Street

1/20/2011 2:51 PM Hi Emma - Wichrowski (Lake Co. West, parcel number 2059): No estimated impact; proposed build alternative maintains the existing SR 46 south R/W line. Peckett (Orange Co., parcel number 2816): Existing parcel size is 961,366.47 sq. ft. (22.07 acres); estimated impact is 67,448 sq. ft. (1.55 acre). These are preliminary estimates based on the proposed build alternative concept, not final design, and are subject to change.

I hope that helps. Let me know if you need anything else.

Thanks,  
Brian Hutchings  
Public Information Officer

1/20/2011 2:39 PM Brian:  
Information requested by Emma Starling of HHBS is as follows.  
- Wichrowski (Lake Co. West, parcel number 2059): No estimated impact; proposed build alternative maintains the existing SR 46 south R/W line.  
- Peckett (Orange Co., parcel number 2816): Existing parcel size is 961,366.47 sq. ft. (22.07 acres); estimated impact is 67,448 sq. ft. (1.55 acre).  
These are preliminary estimates based on the proposed build alternative concept, not final design, and are subject to change.  
Note: We have recently been advised that information requests from attorneys are to be processed through Dyana Petro, OOCEA Asst. General Counsel. Please check with Michelle before you send the above info to HHBS.

1/18/2011 11:05 AM Dear Brian:

I was hoping that you could help me with some information. I have had a request from some clients as to how much property (measured in feet) will be lost by the proposed plans. If you could please have your planner provide me with this information it would be most helpful.

The clients I request information on are below - I have attached a PDF of the plans highlighting the taking from the property in an attempt to make locating the parcel easier for your team:

- Gary & Janice Wichrowski; Lake County Parcel No. 33-19-27-000100005000.
- Chester & Barbara Peckett; Pecketts, Inc. Orange County Parcel No.s 01-20-27-0000-00-006;

If your team could provide me with the proposed taking in feet; it would be most appreciated.

Kind regards,

Emma Starling, Esq.  
1201 E. Robinson Street

Bobbie Stokes

Regarding

Dear Mr. Stokes - Thank you for your email. I am not aware of any public meeting sponsored by the Expressway Authority on March 2nd and 3rd. The Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

Best regards,

Subject: Re: Wekiva Parkway

Hello,

My name is Bobbie Stokes-Haverly and I am very interested in the current proposal and progress of the Wekiva Parkway. I live off of SR 46 and the Wekiva River. My home is actually on the river. I have been actively involved in the meetings and planning committees as it relates to the environmental issues and construction for many years now and have attended most of the community meetings.

I understand that there was a meeting on March 2 and 3 right in Wekiva Falls but was not aware of this meeting in advance, unfortunately. I would have attended. Can you update me on what occurred and was decided on at that meeting please .

I would like you both to give me an update on the progress and plans for this construction of the Wekiva Parkway as it relates to crossing SR 46 over the Wekiva River. I have owned this home for 22 years and can only imagine the chaos and confusion and mess it will be once construction begins.

I feel it will decrease the value of our homes, much more than they've already decreased due to the economy, while the construction is going on, which will take years. I am considering selling my home and want to make sure I get it sold prior to the start of any such construction in this area. It will be impossible to sell a home for any profit while the parkway is being built.

So what I am asking for is an update on when you think the parkway will actual begin to be constructed right around SR 46 so I can be sure to be out beforehand. Although I feel ultimately it will increase home values eventually. Trying to sell a home during the years of construction, confusion and mess is not for me and I request updated information and time frame at this time.

I am anxiously awaiting your replies.

Thank you.

Subject: RE: Wekiva Parkway Phone Conversation

Mr. Taylor,  
I have attached a typical section of the proposed CR 46A realignment with this email showing what we presented at the public hearing for the Wekiva Parkway PD&E Study. This typical shows a 250' total ROW needed for the 2-lane/future 4-lane rural typical section. This includes an approximate 100' buffer from the western edge of the travel lane to the western most ROW line. As we progress into the design phase and receive survey data, there may be a possibility to optimize the width of the total ROW typical section based on topographic features and input from Lake County since it will be a County facility. Hope this answers your question. Feel free to contact me if you have any further questions.

Regarding  
Thomas Thompson, 2260 Plymouth Sorrento Rd. That property is WP Parcel #1246.  
No direct impact; Parcel #1246 is east of the preliminary right-of-way line (see 3 attached  
graphics).  
Based on preliminary concept, not final design. Subject to change.

Dave,

I just spoke to Debbie North who is a realtor representing Mr. Tom Thompson at 2260  
Plymouth-Sorrento Road in Orange County, Parcel ID 302028048400085. Can you tell me  
if there are any potential impacts to this property?

Thanks- Michelle

Regarding  
Hi Debbie - After looking into this, I was informed by the project team that  
the configuration and alignment of the ramp to International Parkway is not  
compatible with the proposed Wekiva Parkway modification of the SR 417/I-4  
interchange. I was told that this was looked at several years ago and that  
theInternational Parkway ramp now under construction is considered an interim  
measure to address existing traffic problems. As a result, no  
maps/diagrams/plans have been created. </DIV>  
<P> </DIV>  
<P>Please let me know if I can be of further assistance.</DIV>

construction@oocea.com <mailto:construction@oocea.com>  
>>> "Debbie Townsend" 01/04/11 4:00 PM >>>  
Gentlemen,

The e-mail Kent tried to send had a document which was too large. I will send that to you  
under a separate e-mail as a large file transfer. If you are unable to open any of the  
documents, please let me know. Below is the original e-mail and 2 of the 3 attachments.

Regards,  
Debbie

Brian,

As a follow up to our conversation of today please let me know if the Expressway Authority has any maps/diagrams/plans which show BOTH the Wekiva Parkway interchange at I-4 in Sanford and the Department's ramp to International Parkway that is currently under construction. I have attached the individual maps that we have for each project and want to confirm with both you and Steve Carlton with the Department that they depict what is currently planned and/or currently under construction for this area. I would think that a master plan showing both projects together and how they inter-relate would have been prepared. Please send me what you have or call me if we need to discuss further.

Thank you very much for your efforts on this item.

Best regards,  
Kent

Regarding

4/1/2011 12:15 PM

Hi Mike - You are correct, the proposed build alignment for the SR 429 Wekiva Parkway has been approved by Orange, Lake and Seminole Counties for their respective jurisdictions. The plan now needs to go to the Federal Highway Administration for their final review/approval. That process can take a few months. The Expressway Authority is working with our partners to identify funding to build the \$1.8 billion Wekiva Parkway project. That funding is not in place. It remains to be determined where the project will start (relating to project phases). We will know that answer once the final design has been completed.

However, the Wekiva Parkway design and construction schedule (including right-of-way acquisition) is uncertain at the moment as we await the Investment Grade Traffic and Revenue Study to be completed in May. Following the submittal of this study, the Expressway Authority plans to hold a Board of Directors workshop with hope of receiving Board direction on Expressway Authority's involvement on this project soon thereafter. Big picture, it is premature to provide any official schedule information for the implementation of this project by the Expressway Authority at this time.

Also, please remember that we are still in the PD&E phase and are working on the final elements of federal approval for that study.

Please let me know if you have any questions or if I can be of further assistance.

4/1/2011 12:10 PM

Mr. Brian Hutchings,  
Hello, my name is Mike Tyszko and I reside at 3001 Kelly Park Rd in Apopka. I' am trying to determine the impact of the 429 extension on my property, as well as the immediate area. I have attended all the public workshops and reviewed all the material on line, yet I still have a couple of questions maybe you could address?  
a. I believe the design/alignment has been approved by the city of Apopka and Orange County, does it now go to the state?  
What does that timeline look like?  
b. Is the Expreeway Authority currently selling bonds to fund the roadway?  
c. With the completion of the 414 extension to Plymouth in August of 2012, will the first leg of the 429 extension be started to Ponkan or Kelly Park Roads?  
Thanks for your reply---Mike Tyszko 407-388-4130

Regarding  
Dear Mr. Werdine,  
OOCEA is in receipt of your correspondence and the Attorney Authorization for the referenced parcel. We have provided a copy of the Attorney Authorization to our right-of-way counsel for their future reference.

As for the items you have requested, there are currently no construction plans, ROW maps or appraisals available for the Wekiva Parkway project. As for a timeline, more information regarding the order in which sections of the Wekiva Parkway project will be built should be available once discussions have been completed with the Florida Department of Transportation.

Should you have any questions or need additional information, please do not hesitate to contact me.

Sincerely,  
Dyana Petro  
Assistant General Counsel

8/8/2011 3:44 PM

The following was sent to Michelle Maikisch at OOCEA from Mr. Werdine:  
RE: Wekiva Parkway Parcel: 12-20-27-0000-00-028

Dear Ms. Maikisch,

I have enclosed a copy of the Attorney Authorization for Chiu-Hsia Huang and Rong Tsai Wu in the above-referenced matter. Please direct all future correspondence in reference to this parcel to me. I also request that you provide me with copies of all correspondence, construction plans, ROW maps, appraisals and the timetable for acquiring the property. Thank you for your cooperation.

Sincerely,  
Fowler White Boggs, P.A.  
Fred Werdine

3:51 PM

From OOCEA's assistant general counsel to Mr. Werdine:

Dear Mr. Werdine,  
OOCEA is in receipt of your correspondence and the Attorney Authorization for the referenced parcel. We have provided a copy of the Attorney Authorization to our right-of-way counsel for their future reference.

As for the items you have requested, there are currently no construction plans, ROW maps or appraisals available for the Wekiva Parkway Project. As you may know, the final alignment was only approved by OOCEA's Board of Directors last week. As the project progresses, all current information can be viewed at [www.wekivaparkway.com](http://www.wekivaparkway.com).

I am enclosing for your reference a projected timeline that was prepared for the project. These dates are only a projection due to the fact that funding for the project has not been secured.

Should you have any questions or need additional information, please do not hesitate to contact me.

Sincerely,  
Dyana Petro  
Assistant General Counsel

Mighk Wilson

Metroplan Orlando

Regarding  
Hi Mighk - The date for the first conceptual bridge design charette meeting has not yet been determined. The process must be arranged to accommodate the schedules of the National Park Service representatives and the Wekiva River System Advisory Management Committee members. Currently, it appears that the meeting may be in early to mid March of this year. These meetings will be noticed and open to the public. We will advise you when we have further information as there are numerous federal, state and local stakeholders we must coordinate with to set the meeting date. Also, don't forget to periodically check our website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>> for updated information and postings regarding the Wekiva Parkway project.

Please let me know if I can be of further assistance or if you have any additional questions.

Best regards,  
Brian Hutchings  
Public Information Officer

Date	Time	
4/4/2011	11:28 AM	Regarding Thank you for that information. It is very helpful. I have another questions for you: SR 46 in Sorrento, within one quarter mile west of the Plymouth Sorrento Road intersection. Are there any improvements to SR 46 planned in this area? Morgan
4/4/2011	11:28 AM	Mr. Wiseman called me right after he sent the email. I walked him through our website and directed him to the map board that answered his question about alignment in Sorrento area. We then discussed funding for the parkway and how the possible consolidation of the OCEA and FL Turnpike would impact the project. Mr. Wiseman came out strongly against consolidation and said he was going to contact his state rep to make his concerns known. Mr. Wiseman said that he was appalled that the Central FLA leadership has been largely mute on this issue.

THE END

Wekiva Parkway Non-Public Workshop Comments 2012

Contact		Florida Today
Date	Time	Regarding
4/27/2012	7:05 PM	Hank Fishkind: Road, rail work sparks employment in Orlando 7:05 PM, Apr. 27, 2012

QUESTION:Let's talk about transportation projects and employment. There are several high-profile projects under way in the Orlando area, right?

FISHKIND: There are three major projects. One is the Wekiva Parkway; second is the improvements to I-4; and the third, of course, SunRail. Altogether this is \$4 billion of capital investment in the transportation systems here in Central Florida.

Q:How many people are working on SunRail right now and how many will eventually be hired for the construction phase?

FISHKIND: Well, a fairly small amount now, but the construction employment is supposed to be on the order of 5,000 as it really cranks up into its big phase over the next six months.

Q:What about Wekiva Parkway?

FISHKIND: Well the project has been approved, and it will start construction fairly soon. There's a large amount of labor and these are very large construction jobs that will employ thousands of people locally.

Q: Will these projects eventually reverse the decline of construction jobs?

FISHKIND: It should reverse the continued contraction that we've seen locally in construction employment. Probably not enough to shift statewide numbers, but certainly enough to shift the numbers for the Orlando metropolitan area.

Q:Outside of construction, other sectors saw an uptick in hiring. Unemployment rates are dropping around the state, but often, so is the number of workers. How does that change the employment numbers?

FISHKIND: Significantly at the state level. Almost half the improvement in the unemployment rate, 9.4 to 9 percent, came because the labor force fell by as much as employment increased. Now locally, we did much better. The labor force increased but jobs increased even more here in Central Florida .

Q:And in this report, unlike some that we've seen in the last year or so, this employment boost spread across the entire region, not just the immediate Orlando area.

FISHKIND: Yeah it sure did, and particularly in Melbourne and Palm Bay where we finally had the first, at least over the month, increase in jobs, in more than a year and a half.

Hank Fishkind is a principal at Fishkind & Associates, a consulting firm with offices in Orlando, Naples and Port St. Lucie. Tune in to WMFE-FM (90.7) at 7:34 a.m. Tuesdays for "Morning Edition" host Tom Parkinson's interview with Fishkind, on which this column is

3/1/2012	3:30 PM	Hi Adrienne - I am forwarding you information (below) that was provided to me regarding your questions about possible impact to your property. Please look it over and let me know if you have any questions or need further assistance.
		Best regards,
		Parcel #2465 (see attachment). No direct physical impact.
		Noise study indicated this parcel, and three other parcels in the immediate vicinity, may experience noise impact. Existing noise level is around 42 dB(A); projected noise level with Wekiva Pkwy is 58 dB(A). FYI - dB(A) is decibels. But analysis determined a noise barrier would not be cost reasonable under FDOT criteria (see below table). However, a commitment has been made to perform a more detailed noise barrier analysis in the final design phase.

Regarding  
Hello,

The Wekiva Parkway will destroy the last remaining natural habitat in the central Florida area. Instead of wasting billions of dollars on a highway, that money could be better spent improving the roads we have or creating a train route that could connect UCF and OIA to the upcoming commuter train. Orlando is one of the worst places to commute in. Think of how "spread out" Orlando is. Whether it's the supermarket, park, or school one must always drive. Of course there are exceptions like Winter Park. If this highway is built it will only increase the amount of sprawl in the metropolitan area. State road 46 can very well handle the traffic between Sanford and Mount Dora.

Jonathan Arnon  
jonarnon@ufl.edu <mailto:jonarnon@ufl.edu>

Hi Jonathan - thanks for sharing your comments and concerns relating to the proposed Wekiva Parkway. We appreciate your input and your concerns have been noted. Subject: So you win, and you never listened  
Importance: High

Congrats to you... you won. I'd love to be able to say thank you to the 2 dissenting votes.

Teresa, you had your assistant get back with me back in November of last year with promises that you would be shown my email. Strange, I actually had expected you to address my concerns. I can be a little naive at times.

Noranne Downs had Jennifer Wynn. Heck, even Mike Snyder had Michelle Maikisch. All had the same political spin that you all are pushing when it comes to the Wekiva.

Not one of the rest of you even cared, if having your assistants respond is called caring.

You have succeeded in condemning one of the last areas that is not built up and serves a purpose in Florida's ecosystem to become a developers dream.

What is to happen to the people who live out there and who you seem to be hell bent on

going out of your way to run it through where they live?

I just wish I understood the projected path. Michelle said "Through a number of evaluations it was determined that the current proposed build alternative best balanced the transportation need with the environmental preservation goals while minimizing community impacts."

How is making the curve into 12 Oaks and possibly displacing 150 people instead of making it about 50 to 100 yards earlier into an abandoned nursery and vacant home "minimizing community impact"?

Can anyone on the Expressway Authority answer me that?

Kevin Farmer

2:31 PM

Wekiva Parkway (SR 429)/SR 46 Realignment PD&E Study  
Public Involvement and Coordination  
12 Oaks RV Resort in Seminole County

#### Coordination

Over the course of the subject PD&E Study, there has been substantial coordination with the Owner and the Manager of the 12 Oaks RV Resort located at 6250 West SR 46 in Sanford in Seminole County. The Owner, Mr. Tom Vellanti, passed away a few years ago, but he and his wife are still listed as the property owners according to the Seminole County Property Appraiser's records. Mr. Sid Bennett has identified himself as the Manager.

Two Viable Alternatives for the SR 46 corridor in Seminole County, 1) Widening to the North and 2) Widening to the South, were displayed and discussed at the Viable Alternatives Workshop in Sanford on July 25, 2006. After the Viable Alternatives Workshop, Mr. Vellanti requested a meeting with study team members. The meeting was held at 12 Oaks RV Resort on October 11, 2006. Mr. Vellanti opposed the North Widening Alternative which impacted his property. He suggested the alignment should be further to the south to avoid his property. The project team indicated that would directly impact established residential areas south of SR 46, but both alternatives were being evaluated in the PD&E Study.

Subsequently, the Seminole County Expressway Authority (SCEA) Board expressed support for the North Widening Alternative to minimize direct impacts to the extensive residential areas south of SR 46. Based upon comparative assessment of the results of the engineering/environmental analysis and the evaluation of impacts/costs, and after extensive coordination with stakeholders, the Expressway Authority and FDOT, District Five identified a Proposed Build Alternative for the Wekiva Parkway (SR 429) and SR 46 Realignment project in April 2007. The Proposed Build Alternative in Seminole County included the North Widening Alternative and a systems connection to the SR 417/I-4 Interchange. Subsequent coordination with state and local agencies, residents, homeowners associations, and other stakeholders resulted in some refinements to or further evaluation of portions of the overall alternative, as discussed below.

On April 30, 2008, study team members met with the newly-formed Wekiva Parkway Community Coalition (WPCC) in Sanford. The WPCC opposes the Wekiva Parkway alignment in the SR 46 corridor and the connection to the SR 417/I-4 interchange. 12 Oaks RV Resort was represented in the WPCC by Mr. Vellanti and/or Mr. Bennett. The Proposed Build Alternative in Seminole County was discussed. The WPCC expressed their opposition to the alignment.

On May 6, 2008, the SCEA Board asked FDOT to analyze and evaluate several Wekiva Parkway alignment alternatives in Seminole County proposed by the WPCC. Initially, the WPCC proposed nine alternative alignments which FDOT analyzed and evaluated for several months. A meeting with the WPCC, FDOT and study team members was held on July 15, 2008 to review the results of the alignment analyses. Mr. Vellanti and Mr. Bennett both attended that meeting and signed in as representing 12 Oaks RV Resort. Mr. Chad Thompson of FHWA also attended that meeting. After that meeting, the WPCC then requested that only one specific alignment alternative (referred to as the Northern Alternative or Map G) be further evaluated. The WPCC requested that FDOT perform a detailed assessment of the Map G alternative, including environmental and social impacts, traffic operations, construction costs, etc. After the evaluation was completed, FDOT and study team members met with the WPCC on October 27, 2008 to advise them of the estimated additional costs and substantial environmental impacts of the Map G alternative, as well as the undesirable traffic operations of the concept, compared to the Proposed Build Alternative. Mr. Bennett attended that meeting and signed in as a WPCC representative. FDOT indicated to the WPCC that because of those factors, as well as environmental justice issues, the Map G concept could not be considered a viable alternative. FDOT recommended to the SCEA Board on November 18, 2008 that the Map G concept be eliminated from further consideration and the Proposed Build Alternative North Widening in SR 46 corridor and systems connection to the SR 417/I-4 interchange) was maintained in Seminole County.

On December 23, 2008, at the request of Mr. Vellanti, FDOT and members of the study team met with him to further discuss the Proposed Build Alternative in Seminole County and alternative evaluations. On October 4, 2010, a meeting was held at FDOT with the WPCC at their request to further discuss the Proposed Build Alternative in Seminole County. On October 28, 2010, Wekiva Parkway Public Hearing Session Three was held in Sanford. Mr. Bennett spoke during the public comment portion of the hearing. His remarks are attached. On November 9, 2010 during a duly noticed public hearing, the SCEA Board identified the Proposed Build Alternative presented at the Wekiva Parkway Public Hearing as the Preferred Alternative for Seminole County.

#### Estimated Impacts

A sheet from the preliminary plans showing the Proposed Build Alternative concept and 12 Oaks RV Resort is attached. Three parcels totaling 28.82 acres compose the 12 Oaks RV Resort property. It is estimated that the Proposed Build Alternative right-of-way will impact approximately 4.37 acres. 12 Oaks RV Resort is a commercial enterprise which rents spaces for mobile homes and RVs. It is estimated that up to 50 spaces may be impacted. Residents at 12 Oaks RV Resort have been provided the link below to the FDOT Right-of-Way Manual regarding the displacement of a mobile home residence. Qualified residents within the 12 Oaks RV Resort would be treated in accordance with these procedures.

<<http://www.dot.state.fl.us/rightofway/documents/ROWmanual/ch09s05.pdf>>

In the noise study conducted for the proposed project, 12 Oaks RV Resort was identified as meeting cost reasonable criteria for a noise barrier. Mr. Tom Vellanti (now deceased), owner of the 12 Oaks RV Resort, indicated his opposition to the proposed project, but Page 9 of 147 stated if it is actually constructed he would want a noise barrier.

#### Other Information

12 Oaks RV Resort is located within Census Block Group 207.01-2 in Seminole County which has the following characteristics: minority population 8.93%; below poverty level population 2.34%; elderly population 9.46%.

Sherry Brunson news2@theapopkachief.com; 3/21/2012 10:37 AM

Hi Brian  
Just wondered if I could have an update on the Wekiva Parkway construction. We do need it today, if possible, due to deadlines. (Pass your work every day and personally have never seen people hustle and build a road so quick in my life, but can't use my opinion in the article-need an expert like yourself.

Best regards,  
Sherry Brunson, Reporter  
The Apopka Chief  
439 W. Orange Blossom Trail

3/21/2012 12:59 PM PIO Mary Brooks called Sherry Brunson, who said she did speak to John Peery after she sent the email. She's doing a story on construction in Apopka. She said she was talking to someone at the city and they mentioned the Wekiva Parkway. PIO corrected the current construction is for the SR 429 Northwest Extension, noting Wekiva Parkway was not yet under construction.

She said she lives off of Ocoee-Apopka Road and passes the work everyday, and has been amazed at how fast it's going. It's very impressive.

She asked for the estimated completion of the NW extension? PIO noted March 2013, though possible it could be done sooner. We discussed the nature of the Connector Road; PIO will send her the project exhibit. We discussed the US 441 nighttime closures for the beams, and also again in about six weeks to build the bridge deck.

PIO also noted once this project is done, the current section of SR 429 will be renamed SR 451. We'll be getting more information out about that as it gets closer.

She asked when work would begin on the Wekiva Parkway? PIO noted OOCEA hopes to have firms on board at the end of April to design the first two sections, from the NW Extension to just north of Kelly Park Road. Noted it would take about 15 months to design, so construction not until late 2013.

PIO noted the FDOT has the majority of the project which is in Lake and Seminole counties. PIO noted FDOT has advertised the first two design-build segments from Mt. Plymouth Road / CR 435 to Old McDonald Road in Lake County. Noted construction scheduled on those sections in fall 2012. PIO noted we'd done a presentation for Mount Dora and Lake County Commissioners that I could send her. She asked if we'd be presenting to Apopka Council? I said more than likely, though don't know when at this point. She was very thankful for the information.

3/21/2012 11:30 AM Discussed project update info with Al/JBS regarding reporter request. Discussed US 441 closures this week and next for beams, but also again in about 6 weeks (maybe sooner) for building the bridge deck. Completion March 2013 though possibly sooner.

3/21/2012 11:05 AM Called Jeff to discuss Apopka Chief request. He said it's okay for PIO to speak directly to the Chief, though always check with them first with all media. He noted John Peery just did a spread on the projects a few weeks ago; make sure she's aware of that.

Date	Time	Regarding
4/24/2012	2:35 PM	PIC called Mike Calkins after receiving his email. He said he lives in Seminole off Wilson Street. PIC walked him through finding the maps online. Mr. Calkins said black text links are "counter-intuitive to every other website in the known universe." He noted they're putting in new sidewalk where the Wekiva is supposed to go. He noted the key layout map took a long time to load. PIC noted these are large, hi-resolution files and they may take a couple of minutes, particularly depending on the speed of one's internet connection

PIC told him to call me with any questions after he'd reviewed the maps, offered to give him my number. He said he didn't think he'd have any questions and did not want to take my number.

4/24/2012 2:26 PM

>>> "Calkins, Michael" 04/24/12 2:26 PM >>>

Where can I find a map of the latest proposed route. Links on the expressway authority site go nowhere.

Subject: Wekiva Project

Dear Ms. Arroyo,  
I live near Pacific Ave in Seminole County. The exact neighborhood is Wilson Park across from Wilson Elementary. I am deeply concerned with the proposed construction of the new toll road which will be within yards of my house. Not only will this ruin the property value, but will increase noise and pollution. My question is, what lengths are the Expressway Authority going to be sure my property value is not negatively affected, and our neighborhood is not affected by noise and pollution?

Thank you,

Steve Carozza

Hello Marty,

Thanks for your interest in the Wekiva Parkway, which is being developed in Lake and Seminole counties by the Florida Department of Transportation, and in Orange County by the Orlando-Orange County Expressway Authority. I've attached a project section map to assist you.

We expect to receive federal approval from the Federal Highway Administration very soon.

Based on funding availability and other factors, the Wekiva Parkway will be developed in sections. Both agencies are preparing to begin design on the various project segments.

On the Expressway Authority projects, three design firms have been selected for segments 1A, 1B and 2A, which will stretch from where the SR 429 northwest extension is currently being built at US 441 and Plymouth Sorrento Road, north past Kelly Park Road and east to just east of CR 435.

Design on the OOCEA sections is expected to take about 18 months, with construction scheduled to begin in 2014.

The FHWA has given FDOT conditional approval to advertise for bids for the first design-build project, Sections 4A & 4B (from Mount Plymouth / CR 435 across the Orange-Lake Co. line to west of Old McDonald Road). This design-build section was allowed to proceed as there are no right-of-way acquisition needs. The Expressway Authority purchased this property for conservation several years ago, as required by the 2004 Wekiva Parkway & Protection Act.

FDOT also this week advertised Section 3B for bids from design firms. This section includes the US 441 and SR 46 interchange in Mount Dora and extends east on SR 46 to just past Pond Road.

Design on FDOT projects also is expected to take about 18 months. Right-of-way acquisition and permitting will follow, and then construction will begin.

FDOT and OOCEA are in the process of developing a project website to help keep the community informed about project schedules, public meetings and other activities. You are in the project database and will receive information on this once available. I hope this addresses your questions. Please feel free to call or email me for further information.

5/7/2012	1:36 PM	Regarding	PIO Mary Brooks returned call to Fran Conrad. PIO confirmed her address was 23314 SR 46, and let her know access to Wekiva Parkway from her area will be off SR 46 between Swan Road and Round Lake Road. She said Round Lake Road is about a mile and a half from her house - how far is the access road? PIO said I'd check map and get back to her. PIO said would send her instruction on how to access maps from the website. She also asked have we looked at what kind of noise they can expect at their house from this? PIO said yes, the noise study from the PD&E Study is also on the website and I will point out how to access that in the email. PIO also noted noise will be looked at during the final design phase as well. She was very thankful for the call back and said she looks forward to receiving the information.
5/5/2012	10:50 PM		PIC Mary Brooks checked Fran's property location on LC Property Appraiser's website: 23314 STATE ROAD 46 SORRENTO, FL 32776. Property is on the south side of SR 46, just east of Hobdy Road, which is east of Swan Road. The nearest access point will be between Swan Road and Round Lake Road off SR 46. PIC to refer her to public hearing maps 19 and 20 for her area.
5/3/2012	4:30 PM		Fran Conrad left a message that she lives on SR 46 west of Sorrento proper. I was trying to figure out exactly where the Wekiva Parkway exit for Mount Dora was going to come out, I know it's east of Round Lake Road, but I don't know exactly where. I was trying to figure out how far away it is from my house. If you could call and give me that 786-280-0594 c, h 352-385-0594.

Subject: Re: FW: Wekiva Pkwy.

Cyndi,

Timing for right of way acquisitions will not be available until an agreement has been reached with FDOT regarding funding and construction of the project. We hope to have an agreement soon, but nothing would be approved by OOCEA's board before the end of December. Once an agreement is approved by the board, the mapping process will begin which will then lead to appraisals, negotiations, etc.

Please let me know if you have any further questions.

Regarding  
Thank you.  
Hi Mrs. Edwards - We have not finalized funding or a project schedule for the proposed Wekiva Parkway and are still waiting to receive final approval for the proposed alignment. That said, things seem to be moving ahead more quickly now with the approval by MetroPlan (please see the article in today's Orlando Sentinel for details). It is possible that construction could begin on the first segments of this project sometime later this year. Please feel free to check the Wekiva Parkway website at [www.wekivaparkway.com](http://www.wekivaparkway.com) <<http://www.wekivaparkway.com>> for updates or you can always contact me.

Subject: Re: Wekiva Parkway Question

Hello Stephanie,

You can find maps for the Wekiva Parkway on the Expressway Authority website as follows:

1. Log onto the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com).
2. Click on the "Travelers & Expressways" menu button at the top left.
3. On the side menu, click on "Expressways."

4. On that drop-down menu you'll see "Current Projects," and below that is "Plans, studies and future expressways. " Under that click on "Wekiva Parkway."

5. On that page click on the black headline "Public Hearing Information, Including Maps."

6. Under the black "Maps" headline, click on the "Key Layout Map" which shows you the entire corridor broken up into

individual map sections.

7. Select the area of interest and scroll down to the board number indicated for that section. For example, "Board 18 Lake

County" will pull up the SR 46 and US 441 interchange. "Board 15 Seminole County" gives you the Wekiva Parkway connection to I-4 in Sanford/Lake Mary.

Once you've had a chance to review the maps, please feel free to email or call me with any questions.

Subject: So you win, and you never listened  
Importance: High

Congrats to you... you won. I'd love to be able to say thank you to the 2 dissenting votes.

Teresa, you had your assistant get back with me back in November of last year with promises that you would be shown my email. Strange, I actually had expected you to address my concerns. I can be a little naive at times.

Noranne Downs had Jennifer Wynn. Heck, even Mike Snyder had Michelle Maikisch. All had the same political spin that you all are pushing when it comes to the Wekiva.

Not one of the rest of you even cared, if having your assistants respond is called caring.

You have succeeded in condemning one of the last areas that is not built up and serves a purpose in Florida's ecosystem to become a developers dream.

What is to happen to the people who live out there and who you seem to be hell bent on going out of your way to run it through where they live?

I just wish I understood the projected path. Michelle said "Through a number of evaluations it was determined that the current proposed build alternative best balanced the transportation need with the environmental preservation goals while minimizing community impacts."

How is making the curve into 12 Oaks and possibly displacing 150 people instead of making it about 50 to 100 yards earlier into an abandoned nursery and vacant home "minimizing community impact"?

Can anyone on the Expressway Authority answer me that?

Kevin Farmer

Dear Mr. Farmer,

Thank you for your emails regarding the Wekiva Parkway and your continued interest in this Project Development and Environment (PD&E) study.

The Wekiva Parkway will provide a system to system connection for regional mobility between the Eastern Beltway (SR 417), the Western Beltway (SR 429), and I-4. In addition to providing relief to regional motorists, the completed Western Beltway will ease congestion on local roadways and provide a needed expressway connection between northwest Orange, eastern Lake, and western Seminole Counties.

We did analyze widening existing SR 46 from two lanes to six lanes during our study process. In the traffic analysis, that alternative also demonstrated the inability to meet future transportation needs as the additional capacity provided by six-lanes was consumed by the latent demand for east-west travel within the SR 46 corridor. Even with widening to six-lanes, SR 46 would continue to operate at level of service F. This alternative also had potential for greater impacts within the environmentally sensitive Wekiva River Basin, as well as in the Mount Plymouth and Sorrento communities.

For Wekiva Parkway (SR 429) in Seminole County, a limited access expressway with frontage roads concept was developed for both north widening and south widening alternatives along the existing SR 46 corridor from the Wekiva River east to near Orange Avenue, before transitioning to the expressway connection to the SR 417/I-4 interchange. Most of the development through this section is concentrated on the south side of SR 46. With the widening to the south alternative, analysis and evaluation indicated impacts to residential and commercial parcels would be greater than with the widening to the north alternative. After the July 25, 2006 Viable Alternatives Public Workshop in Sanford, the Seminole County Expressway Authority (SCEA) Board expressed support for the north widening alternative to minimize direct impacts to established residential areas on the

south side of SR 46. After the Public Hearing session on the Wekiva Parkway Preferred Alternative in Sanford on October 28, 2010, the Preferred Alternative for Seminole County, which includes the north widening alternative, was selected at a duly noticed public hearing held by the Seminole County Expressway Authority Board on November 9, 2010. Thank you again for your input on this important project. Please contact Brian Stanger at (386) 943-5391 if you have any further questions about the Wekiva Parkway Project Development and Environment (PD&E) study.

Coldwell Banker Commercial

Regarding

Hi Dean - I hope you had a nice holidays! I am afraid that I don't have much new or exciting to report regarding the Wekiva Parkway since we last spoke in late November. I know work is still ongoing to put together a final agreement between OOCEA and FDOT on how to fund and build the parkway but nothing definitive has been agreed to at this time. I'm hoping that we will hear something in the next few weeks. I know that I have probably been saying that same thing for the last few months but I do believe things are getting close for a final agreement. I will be sure to keep you posted if I have anything new/exciting to report.

Best regards,

Mirna Gonzalez

Estates of Wekiva - M/I Homes

Regarding

PIO Mary Brooks met with Mirna Gonzalez, salesperson for Estates of Wekiva Park for M/I Homes at their corporate office in Lake Mary on International Parkway. PIO displayed the Seminole County exhibit board and provided Ms. Gonzalez with 11x17 printouts of the concept plans and cross sections for the area of her community. Her associates Felicia Coquyt and Diana Cabrera stopped in briefly.

PIO went over approximate distance from their property line / ROW line - noting that would not change or be affected, and the EOP of the frontage road (50') and the parkway another 30'). PIO noted concept plan is subject to change, and final design will provide actual details. PIO asked that she please reiterate this when speaking with potential buyers about the concept plans. She said she understood and would do so.

PIO noted their residents can get on the parkway EB via the slip ramp between Longwood Markham Road and Lake Markham Road, just before the entrance to Bella Foresta. Also noted the slip ramp for the WB parkway is on the other side of this same area. Mirna noted their residents will have to make a couple of U-turns to get off the parkway EB to get to their homes.

Mirna asked what the benefits of the parkway were? She noted she has used the 429 since it first started opening in sections years ago, and loves it as she lives in Apopka. But she needed to know what to tell people about the parkway?

4/12/2012 11:29 AM

PIC noted the following:

Safety: SR 46 is one of the most dangerous roads in the state for years and this will make it safer to get out of their subdivision and reduce conflicts between wildlife and vehicles. PIC also noted with much of the traffic up on the parkway, they should see better gaps in traffic to get out.

Faster: for those heading to Mount Dora or other locations in Lake County, as well as south to the attractions, the parkway will provide a faster, less stressful drive on a more scenic parkway. Much better than the current two-laned SR 46 into Lake County.

Convenience: parkway will make long distances much easier to travel.

Environmentally Friendly: The parkway is being built to preserve the wildlife and habitat, which is big reason many people move to this area. Noted there will be wildlife crossings and a new scenic bridge over the Wekiva River allowing wildlife habitat connections. It will also be a more scenic ride up on the parkway.

Preferred Build Alternative: If not done in this fashion, SR 46 would be widened to become a largely commercial corridor similar to SR 436, SR 434 or SR 50. They said they definitely saw this as a better option.

4/12/2012 11:28 AM

Mirna noted she went to a meeting yesterday of realtors. PIO said would be happy to present to such a group; we want the most accurate information getting out to realtors and their prospective buyers. Asked that she give me a heads up before the next meeting. She was excited about the prospect.

PIO offered to walk her through the website links since she said she had trouble. Her laptop is with IT now, so I talked her through the links and she took notes. PIO said next time she tries to get on the site to call me and I can talk her through it. PIO reiterated that everything I showed her today is on the website.

Subject: FDOT Wekiva Parkway PD&E Study - Estates of Wekiva Park & Sunset Pond HOA  
Hello Dave,  
I have a couple of community update meetings coming up this Thursday: one for M/I Homes building in Estates of Wekiva Park (west Seminole County) and one for Sunset Pond (southeast corner of SR 46 and US 441).  
Can I pick up the corresponding Lake and Seminole boards on Wednesday afternoon (I will be in back-to-back meetings on Thursday)?  
In looking at the Seminole map, it looks like FDOT may be taking property at Estates of Wekiva Park, so I will need approximate width of the proposed taking. I plan to print out concept plan sheets P-33 & P-34 and cross section sheets PR 32-34 for the Estates, and sheets P-49 & 50 and PR-45 & 46 and PR-149 & 150 for Sunset Pond, so you don't have to thanks.  
I'm having trouble reading what the elevation of the flyover should be at the western limits of the Sunset Pond subdivision (where I presume it's the highest for their location) and at Pond Road (I don't see it marked on PR 149 but would guess it's about station 36+00?) - can you help me with that, please?  
And yes, I will let everyone know that this is all conceptual and subject to change during design.  
Thanks so much for your assistance. You're the best!  
Mary Brooks | Senior Manager

4/9/2012 8:36 AM Myrna Gonzalez of M/I Homes called and said she has questions about how the Wekiva Parkway is going to affect the community they are developing, Estates of Wekiva. She asked if it was possible to meet to discuss the project. PIC said I can meet with her Thursday at 1130 a.m. at her office, 300 Colonial Center Pkwy., off International Parkway. She noted their development is on the south side of SR 46. PIC noted I'd spoken recently to one of their residents, Brenda Jones.

PIC also noted all of the information that is on the Expressway Authority website that she could review in the meantime and offered to walk her through the project pages and links. She said she was driving but would call back to do so around 1 p.m. today.

4/16/2012	1:58 PM	From: Mary Brooks Sent: Monday, April 16, 2012 1:53 PM To: DMGrace1962@yahoo.com Subject: FDOT Wekiva Parkway - Lake and Seminole Project Maps

Don,  
It was good to speak with you this morning about locating the Wekiva Parkway maps on the website. Please follow the steps below. If you continue to have trouble, call me when you're at your computer and I will be happy to assist you.  
1. Log onto the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com).  
2. Click on the "Travelers & Expressways" menu button at the top left.  
3. On the side menu, click on "Expressways."  
4. On that drop-down menu you'll see "Current Projects," and below that is "Plans, studies and future expressways. " Under that click on "Wekiva Parkway."

5. On that page click on the black headline "Public Hearing Information, Including Maps."  
6. Under the black "Maps" headline, click on the "Key Layout Map" which shows you the entire corridor broken up into individual map sections.  
7. Select the area of interest and scroll down to the board number indicated for that section. For example, "Board 18 Lake County" will pull up the SR 46 and US 441 interchange. "Board 15 Seminole County" gives you the Wekiva Parkway connection to I-4 in Sanford/Lake Mary.

I hope you find this helpful. Be mindful that the exhibits are large files and will take a couple of minutes to download.  
Mary Brooks | Senior Manager

4/16/2012 9:50 AM PIO Mary Brooks returned call to Donald Grace, who said he's looking at a couple of properties, one near Lake Mary, and at SR 46 and I-4 and another in the Sorrento area. He said everyone in these areas is selling their houses; "these people must know something I don't." He said he saw the map of the SR 429 extension but needs more information. They're trying to sell their house now, in the process of getting it inspected and need to know which of the areas to stay away from.

PIO asked he was at a computer - yes. PIO offered to walk him through the links, but he got stuck. PIO said I'd send him the information when I was back at the office on how to get to the Wekiva Parkway maps. He said he would appreciate it.

4/16/2012 8:55 AM Donald Grace left message that he had a few questions and to call him back at 321-436-8315.

Regarding  
I do not know what Mr. Hammerl said to the Sentinel about the location of his property and 12 Oaks RV Resort; however, Parcel #1878 is well south of SR 46 and 12 Oaks RV Resort is north of SR 46.  
Estimated impacts to 12 Oaks RV Resort parcels are as follows.  
-Parcel 3038: 0.26 acre  
-Parcel 3102: 0.72 acre  
-Parcel 3241: 3.39 acres  
As you know, the estimated impacts are preliminary and subject to change in final design.

Chardale Irvine

Date            Time  
1/23/2012      4:32 PM

Regarding  
Thanks Dave and Mike - I heard back from Ms. Irvine with one additional question:  
"Can you provide me the credentials of the social scientist(s) and names of who did the social impact study portion of the EA?"

I scanned through the EA report on the Wekiva Parkway website and did not see names listed for this.

Brian Hutchings

1/23/2012      4:29 PM

Hi Chardale, because you are in the area located in close proximity of the Wekiva Parkway you should automatically receive any future mailings pertaining to this project. Also, I would recommend that you check the Wekiva Parkway website on a month-to-month basis as that site is updated regularly with project information. I will ask about the 'credentials of the social scientist and the names of who did the social impact study portion of the EIA' and will get back to you with that information as soon as I am able.

Best regards,

>>> Chardale Irvine <[ch\\_irv@yahoo.com](mailto:ch_irv@yahoo.com)> 1/23/2012 3:51 PM >>>  
Thank you Brian. I appreciate your timely response. Will I automatically be added to the mailing list for the state portion of the road or ask the state to be added? Also can provide the credentials of the social scientist(s) and names of who did the social impact study portion of the EIA?  
Thank you,

Chardale Irvine

Dear Ms. Irvine - thank you for your email with questions about the Wekiva Parkway. I

have enumerated your questions followed by answers below:

1 - Is there any Federal money being used to fund the road?

Yes, to date Federal Highway Administration (FHWA) funds have been used for a share of the costs of PD&E Study preparation.

2 - What is the reason an EA was done instead of an EIS?

After two years of analysis and evaluation by FDOT, FHWA concluded in a formal Environmental Class of Action Determination in 2007 that an Environmental Assessment (EA) was appropriate for the proposed project.

3 - Was a Social Impact Assessment done for this project? If so, could you please provide me with a copy of it or a weblink to it? I couldn't find it in my review of the documents online.

The potential social impacts of the proposed project are listed and evaluated in the EA Section 4) that can be viewed by following this link located on the Wekiva Parkway website: <http://www.oocsa.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=EnvironmentalAssessment#myAnchor> <<http://www.oocsa.com/Corporate/oursystem/SR429/WekivaParkway.aspx?show=EnvironmentalAssessment>>

4 - Was the number of residents to be displaced at Twelve Oaks RV Park counted? If so, where is it in the EIA?

The potential impact to the 12 Oaks RV Resort is included in the alternatives evaluation matrix for Seminole County in the EA Appendices and in the impact table under Seminole County in the EA (Section 4), which can be viewed on the Wekiva Parkway website following the above-provided link.

5 - Were they factored as a vulnerable group (age, disabled, low income)?

To determine the specific demographics of the study area, census tract block group data from the U.S. Census Bureau, Census 2000 Demographic Profile and Orange, Lake and Seminole Counties Property Appraisers' data were used. The percentages of minority, below poverty level, and elderly populations were determined for each census block group

12 Oaks RV Resort is located within Census Block Group 207.01-2 that has the following characteristics: minority population 8.93%; below poverty level population 2.34%; elderly population 9.46%. This information is provided in the EA (Section 4) following the link provided above.

6 - What mitigation is planned for the displaced residence at Twelve Oaks? They own their park model/Florida Room and rent the space it is sitting on.

Shown below is a link to the FDOT Right of Way Manual regarding the displacement of a mobile home residence. Qualified residents within the 12 Oaks RV Resort would be treated in accordance with these procedures.

<<http://www.dot.state.fl.us/rightofway/documents/ROWmanual/ch09s05.pdf>>

This section of the Wekiva Parkway will be built by the Florida Department of Transportation (FDOT). If you have future questions about this process, you may wish to contact Suzanne Phillips, FDOT's design project manager for this project, at ph. 386-943-5224 or via email at [Suzanne.phillips@dot.state.fl.us](mailto:Suzanne.phillips@dot.state.fl.us) <<mailto:Suzanne.phillips@dot.state.fl.us>>.

Please let me know if I can be of further assistance.

Best regards,

1/19/2012 1:57 PM Hello,  
 I have a couple of questions about the Parkway EIA and process. Is this the correct email to send this to? If not, please forward to the appropriate person.  
 1 - Is there any Federal money being used to fund the road?  
 2 - What is the reason an EIA was done instead of an EIS?  
 3 - Was a Social Impact Assessment done for this project? If so, could you please provide me with a copy of it or a weblink to it. I couldn't find it in my review of the documents online.  
 4 - Was the number of residents to be displaced at Twelve Oaks RV Park counted? If so, where is it in the EIA?  
 5 - Were they factored as a vulnerable group (age, disabled, low income)?  
 6 - What mitigation is planned for the displaced residence at Twelve Oaks? They own their park model/Florida Room and rent the space it is sitting on.  
 Also, I would be like to be added to the contact list for any correspondence or activity involving the Parkway. Email is: ch\_irv@yahoo.com <mailto:ch\_irv@yahoo.com>  
 Please advise me about how the process works from now until implementation and when and how I can be involved in the decisions yet to be made.  
 Thank you,

Contact		Karin Jimenez	Bella Foresta - Taylor Morrison Homes
Notes			
Date	Time	Regarding	
4/9/2012	5:12 PM	Karin Jimenez/Bella Foresta called back and said they were working on a flier for their potential buyers and she needed clarification on something. She wanted to know if we had discussed the distance of the parkway from their property? PIC noted yes, the EOP for the frontage roads is about 35-40 feet from the property line. Add about 24 feet for the two frontage road lanes, and another maybe 10' of buffer and then you'll be at the parkway, so a total of 70-80' between their property and the parkway. PIC noted again all of that is conceptual and subject to change in design.	
		She said they have been sharing the information I provided with potential buyers and it is helping a lot. She said people who were told by realtors not to buy here now are considering it with the right information. She reiterated the information has definitely been helpful. She also said she's got a meeting tomorrow with about 25 realtors. When they schedule one with 80-100 she would invite the PIC. I asked her to please do so.	
		She also noted she's been giving my contact info to other folks in the industry, even her competitors. PIC noted I had gotten a call from Myrna Gonzalez and was meeting with her on Thursday. She was thankful for the support.	
4/5/2012	11:01 AM	PIC met with Karin Jimenez and Megan James of Taylor Morrison Homes at Bella Foresta. Brought Seminole Co. and 11x17 aerial and cross section exhibits provided by Ch2m Hill. PIC showed their location on the exhibits, the distance from the property line to the frontage road EOP, elevation of the parkway in their area. They were very happy to find out it would only be 9-12' in their area and there would be no high bridge right on top of them.	
		PIC noted several times the impacts from the PD&E Study are conceptual and subject to change during design. They asked when would it be built? PIC noted they're one of the	

last sections; schedule is subject to change but tentatively 2017 at this time. They said that's what they'd heard.

PIC showed them how to get on and off the parkway using the slip ramps in both directions; PIC also noted they can just use the frontage roads.

4/5/2012 11:00 AM

They asked the key points to sell this to prospective buyers? They said realtors are being very negative and telling people not to buy here. Karin noted they're "selling at a higher price point; this is a \$1 million model we're in. How do we show the benefits of the Wekiva Parkway?"

PIC noted the following:

Safety: SR 46 is one of the most dangerous roads in the state for years and this will make it safer to get out of their subdivision and reduce conflicts between wildlife and vehicles. PIC also noted with the slip ramps to the west of them, more traffic will get up onto the parkway and they should see better gaps in traffic to get out.

Faster: for those heading to Mount Dora or other locations in Lake County, as well as south to the attractions, the parkway will provide a faster, less stressful drive on a more scenic parkway. Much better than the current two-laned SR 46 into Lake County.

Convenience: they have access to slip ramps for both directions within a fairly short distance of their entrance.

Environmentally Friendly: The parkway is being built to preserve the wildlife and habitat, which is big reason many people move to this area. Noted there will be wildlife crossings and a new scenic bridge over the Wekiva River allowing wildlife habitat connections. It will also be a more scenic ride up on the parkway.

Preferred Build Alternative: If not done in this fashion, SR 46 would be widened to become a largely commercial corridor similar to SR 436, SR 434 or SR 50. They said they definitely saw this as a better option.

4/5/2012 10:59 AM

They asked about sound impacts? PIC referred them to the sound assessment on the website, noting that the best source of information for sound mitigation details for every property. PIC noted the majority of traffic would move farther away from them by getting up onto the parkway than is now right on SR 46. PIC noted mitigation also would be looked at during final design.

They asked if it would look nice, have landscaping? PIC noted there has been a major effort to have the parkway built in a way that sensitive to the natural surroundings. PIC will likely look similar to SR 408 in downtown Orlando, including the way the slip ramps and frontage roads operate.

We discussed the bridges on Longwood Markham Road and Lake Markham Road were the reasons the elevations get higher there.

PIC also walked them through finding the maps on the Expressway Authority website they are on Seminole map #11). They said that was very helpful and they can show that to prospective buyers or refer them to the website. PIC noted to please have folks call or email me directly so we can get accurate information out there.

Karin mentioned she was meeting with some top producer realtors and this would all be very helpful. She said they also do a larger realtor meeting of 80 or more people. PIC noted we present to realtors and other groups and would be happy to attend one of those. They were very grateful for the information and explanations and seemed relieved and felt they could really answer questions now from prospective buyers and realtors.

4/4/2012 12:34 PM

I have a meeting with Carmen Jimenez of Bella Foresta (south side of SR 46 in Sanford) tomorrow at 1130 a.m. to go over the impacts to their property. Do you have a board or roll plot that shows this location and potential impact that I can borrow for the meeting? In particular I need to know:

- 1) How far the frontage road will be from their property line?
- 2) How high will the elevated lanes be in this area?
- 3) Exhibit to show how their residents will get on and off the slip ramps

4/2/2012 2:39 PM

PIC returned call to Karin Jimenez/Bella Foresta, who said she was having trouble getting on the website and really needs to know what's going on. She said realtors are telling us it's coming right on top of us. PIC told her we were holding the south ROW line in her location so they would not have direct property impacts. PIC talked her through web links to get to the maps. She said she heard they were building to the north but needs to know the direct impacts because realtors are telling people not to buy here. She has a meeting coming up with a realtors group. PIC to meet her with exhibits to walk through the impacts Thursday at 1130 a.m.

3/30/2012 6:07 PM

Karin Jimenez with Taylor Morrison Homes 321-663-0889 left a message. PIO returned her call, and left a message to call me with questions. Her message says she's off on Thursdays and Fridays.

3/28/2012 12:15 PM

Karin called back, said she would have called sooner but has been very busy. She said she has heard the Wekiva Parkway will affect their community and they are getting ready to start selling. I noted the majority of the work would be done to the north side of the SR 46 ROW. I noted I was driving so I referred her to the OOCEA website and preferred alternative. I told her if she had questions or couldn't find what she was looking for to call me back after an hour or so and I should be back in the office. She said she would do so and thanks.

3/26/2012 5:31 PM

PIO Mary Brooks called back Ms. Jimenez at Bella Foresta, left a message with my contact information and asked her to get back to me with her questions.

Subject: FDOT Wekiva Parkway PD&E Study - Estates of Wekiva Park

Hello Brenda,  
I am writing to follow up your query on the impacts from the Wekiva Parkway Preferred Build Alternative on your community, the Estates of Wekiva Park. I have attached a screen shot from the Seminole County Property Appraiser's website showing your parcel, as well as an aerial screen shot showing your subdivision.

I've also attached a screenshot showing the section of the proposed Wekiva Parkway in your area. You can view this map in its entirety (Board 10-Lake-Seminole County) as well as others on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). Click on the "Travelers & Expressways" menu button at the top left. Then on the side menu, click on "Expressways" and then on that drop-down menu click on "Wekiva Parkway." On that page click on the black headline "Public Hearing Information, Including Maps."

Please bear in mind that we are still waiting for federal approval of the Preliminary Engineering Report from the PD&E Study. The timing of the federal approval and other factors mean the overall project schedule is subject to change. Currently, the Wekiva Parkway in your area is tentatively scheduled to begin construction in roughly 2016-2017.

Also please understand that the Preferred Build Alternative is conceptual, and that potential impacts are subject to change once the actual detailed engineering is conducted during the design phase.

As the schedule stands now, keeping in mind that it is subject to change, it will probably be 18 months before we know the right-of-way acquisition requirements for properties along the Wekiva Parkway corridor in Lake and Seminole counties.

Regarding accessing the Wekiva Parkway in your area, to go east on the Wekiva Parkway you would take the frontage road to the slip ramp just east of Longwood Markham Road. To go west, you would make a U-turn at Longwood Markham Road and use the slip ramp just west of that side street.

I hope you find this information helpful. Please feel free to call me on the cell (407-694-5505) or email me with additional questions or to discuss further. Thank you.  
Mary Brooks | Senior Manager

4/6/2012                  9:30 AM

Worked on Brenda Jones query. They live in the Estates of Wekiva Park, just east of River Oaks and the Wekiva River on the south side of SR 46. They own parcel #27-19-29-5QX-0000-1000, last sold 03/2005. To go east on the Wekiva Parkway they would take the frontage road to the slip ramp just east of Longwood Markham Road. To go west, they would make a U-turn at Longwood Markham Road and use the slip ramp

just west of that side street.

4/2/2012 4:47 PM PIO called Brenda Jones. She thanked me for calling her back, said that was "so unusual." She just needs some information, documents, we live on 46, in estates of wekiva park, need to know waht effect the parkway is going to have on us in our subdivision. we are at markaham woods road and 46. PIO told her I would look it up on the project maps and send a shot to her, and once she has reviewed she can call me with any questions. PIO said I'd try to get the info to her on Wed. because I'm out of the office all day tomorrow in a meeting. PIO gave her my cell number and said if she doesn't hear from me to call and remind me to get her that information. She said she would and thanked me for calling.

Ms. Phillips,  
I was in the county building today seeking information regard the parkway. We currently reside at 160 Osprey Hammock Trail/46SR. If possible, could you email, maps, report on the effect this may have on my subdivision.

construction@oocea.com

Jeff Kemp kempjeffp@gmail.com; 4/18/2012 10:43 AM ;cc: Vicki Macet

Hi Brian, thank you for taking the time for me to look. A "dumb" thought entered my head & I just thought I should ask to confirm. Those sign-in sheets are "one" sided, is that correct? Thanks again.

4/3/2012 6:00 PM Brian/OOCEA PIO relayed that Mr. Kemp came in today to look at the public workshop sign-in sheets and took pictures of them (from the 2005 and 2006 workshops).

Subject: Wekiva Pkwy - Alignment in Seminole County

Mr. Kemp:

In answer to your questions:

- The previous property owners at 184 River Oaks Circle (Matturro, Joseph T. and Angela) were on our mailing lists for notification about the Wekiva Parkway public workshops in 2005 and 2006.
- In 2005, a duly advertised public workshop on initial alignment alternatives was held at the Civic Center in Sanford (see attachment 1, a graphic from that workshop for Seminole County).
- In 2006, a duly advertised public workshop on viable alternatives was held at the Civic Center in Sanford (see attachments 2 and 3, graphics from that workshop for Seminole County).
- In 2007, a recommended alternative was presented to the Seminole County Expressway Authority (see attachment 4); except for some refinements on the alignment toward I-4, that alternative is basically the same as the Proposed Build Alternative you saw at the Public Hearing on October 28th at the Civic Center in Sanford (see attachment 5).

I hope this adequately responds to your questions.

Dave Lewis

Regarding  
I called Mr. Kepley and provided him with an update.  
Eastbound State Road 408 (Spessard L. Holland East-West Expressway) is scheduled to be closed between State Road 417 (Central Florida GreeneWay) and Dean Road and on the nights of Sunday, January 15, and Monday, January 16 for bridge work. A detour will be in place between 9 p.m. and 4 a.m. While the detour is in place, signs will be posted to direct motorists back onto SR 408 or SR 417. Minor delays are possible.

Also, on the nights of Wednesday, January 18, and Thursday, January 19, two lanes are scheduled to be closed on westbound and eastbound SR 408 between Goldenrod Road and SR 417 for resurfacing. The closures are scheduled from 9 p.m. to 6 a.m. At least two lanes will remain open throughout the entire period.

Steve,

Per the PD&E preferred alternative, it looks like the right of way clips the northeast corner of their parcel  
272001000000050 (north end abuts the county line) . However, I do not have access to the ongoing design line and grade information and am not sure if that is still the case. I need to find out which firm is handling that section for the latest. Not sure yet if that's HNTB, but will continue to look into it and get back to you.

Hello Carolyn,

The Expressway Authority is responsible for the portion of the Wekiva Parkway in question  
A noise study was done as part of the Wekiva Parkway Project Development and Environment (PD&E) Study. You can view this report on the Expressway Authority website at <https://www.oocea>

Noise assessment and possible mitigation will also be part of the final design process, which the Expressway Authority is in the process of hiring design firms to conduct this work. Final design is expected to begin this year on the OCEA sections and take approximately 18 months to complete. There are a number of federal criteria that must be

met when considering noise abatement.

The Expressway Authority will be communicating with property owners on this and other components of the project during the design process. Please check this site periodically, or feel free to call or email me for future updates. Thank you.

Ms. Brooks.

My home on Kelly Park Rd. will be impacted by increased travel to the proposed Plymouth Sorrento Rd & Kelly Park Rd on ramp which is part of the Wekiva Parkway extension project.

I would like to know if the governing body of this project will be offering noise barrier walls for residents who request them.

We expect the traffic noise to increase with this project / ramp completion.

Thank you,

Carolyn McCarty

Regarding  
From: Mary Brooks  
Sent: Monday, April 02, 2012 4:32 PM  
To: Dennis McGavock  
Subject: RE: FW: Wekiva Parkway - Request Received

Hello Dennis,

I wanted to follow up on your request for information about the Wekiva Parkway in the area of Vaughn's Nursery, 6770 W SR 46 in Seminole County. I've attached an aerial view of the property from the Seminole County Property Appraiser's Office, as well as a screen shot of the Preferred Build Alternative from the PD&E Study for this location.

This is just an excerpt from the Seminole County and other Wekiva Parkway Build Alternative maps that can be found on the Expressway Authority website at: <https://www>

oocea

Please bear in mind that we are still waiting for federal approval of the Preliminary Engineering Report from the PD&E Study. The timing of the federal approval and other factors mean the overall project schedule is subject to change.

Also please understand that the Preferred Build Alternative is conceptual, and that potential impacts are subject to change once the actual detailed engineering is conducted during the design phase.

As the schedule stands now, keeping in mind that it is subject to change, it will probably be 18 months before we know the right-of-way acquisition requirements for properties along the Wekiva Parkway corridor in Lake and Seminole counties.

I hope you find this information helpful. Please feel free to call or email me with additional questions or to discuss further. Thank you.

Mary Brooks | Senior Manager

Mr. Barley

It was great hearing you speak to our Leadership Seminole class about all the exciting work going on with Metroplan. I mentioned to you that Holy Cross Lake Mary is interested in acquiring property on SR46 in Sanford for developing an athletic ministry for the community. The project would provide the area with a Gymnasium and related facilities along with fields for baseball and other activities. Our plan is to have leagues, recreational programs and fitness training along with community meeting space.

The property is at 6770 W SR46 and is currently the Vaughan Nursery. We are trying to get an understanding of the eminent domain for the Wekiva Parkway as we understand that some portion of the parcel will be involved.

Can you share with us any information you may have regarding the roadway engineering, property acquisition timeframes, construction timeframes, etc. Any help you can give will allow us to make the right choices for the community and our organization.

Curtis & Brucene McNeil

Date	Time	Regarding
3/20/2012	3:01 PM	<p>Curtis McNeil returned my call. He said he saw the graph and "I guess they're coming right through our house. We sent in comments a while back, but I guess that doesn't make any difference. It just seems there should be somewhere else they can put this road."</p> <p>PIO explained to him the various regional and environmental factors and legislation surrounding the parkway, why it's being built where and how it is, and the extensive public involvement that's been done. PIO noted we've made adjustments where we could, but in some cases impacts cannot be avoided.</p> <p>He said, "we've been on this street since 1972, to me it seems they could shift this road over and miss us. He said the surveyors were out here 5-6 weeks ago, "The center line of that roadway is center of my property. When we moved here in '72 this was really rural; most everybody has 5 acres or better." He said he used to work for Hubbard Construction Co., so he understands the need for roads. "But every time I see these roads built, I see more crime and more people coming."</p> <p>PIO noted growth in Seminole and Lake counties was among the reasons the parkway was needed, and needed to be done in a fashion to protect precious environmental resource and eliminate accidents with wildlife.</p> <p>Mr. McNeil asked about the schedule; PIO noted this section was not yet designed, which could take 12-15 months. He asked how soon after that would they begin to take property? PIO noted that depends on funding and other factors, but ROW acquisition could start within 3-6 months after design. He asked how soon after that would they have to move, would we give them more than 30 days to get out? PIO noted that's an involved process in which they would be actively engaged in those types of negotiations. PIO noted there's not set time, every case is different and the agency tries to be accommodating while still keeping the project on schedule.</p> <p>PIO said once the FONSI is approved by FHWA they'll see more activity, design will really crank up. Gave them my contact information and told them they're welcome to call or email. Also got their email address from Brucene so they can receive updates. They were thankful for the call back.</p>
3/19/2012	6:00 PM	<p>From: Mary Brooks  Sent: Monday, March 19, 2012 5:58 PM  To: Glenn Pressimone  Subject: RE: FW: Wekiva Parkway - Parcel  Glenn,</p> <p>I called Mr. McNeil left a message to let him know his property was on the OOCEA section and that I would be the point of contact for the project. Sent: Monday, March 12, 2012 11:21 AM  
To: Martin, Shirley  
Cc: Phillips, Suzanne; Lynch, Deborah; Kneale, Trish  
Subject: RE: Wekiva Parkway - Parcel

Shirley:

The parcel in question was included in our original PD&E right of way estimate as parcel #1587 developed under the CE for previous FM#238275-4. Although not a whole take, the impacts from the PD&E design would likely result in only a nominal value to the remainder portion not planned for acquisition. If the design stays the same in this area, a whole take of the property could be justified from a cost standpoint.

However, the property is currently located in Section 2C which is a Lake County Section that, according to my understanding, is currently being designed, with ROW acquired and construction all to be provided by OOCEA.

Hope this helps and please let me know if you need anything else from me on this.

Notes

Date Time

Regarding

3/17/2012 2:30 PM Capitol Office - 1101 The Capitol, 402 South Monroe Street, Tallahassee, FL 32399-1300  
850-488-0348

3/13/2012 6:00 PM Rep. Larry Metz (District 25) hosted a Town Hall Meeting at Sorrento Elementary School from 6 p.m. - 8 p.m. Topics included a Legislative Update (6 p.m. - 7 p.m.) and an update on the Wekiva Parkway. Approximately 50-60 people attended, including Rep. Bryan Nelson (District 38), Florida Department of Transportation Operations Director Allan Hyman, Lake County Commission Chairwoman Leslie Campione, Lake County Public Works Director Jim Stivender, Lake-Sumter MPO Executive Director TJ Fish, Mark Callahan of CH2m Hill and PIO Mary Brooks.

Rep. Metz introduced Allan, who began his presentation and was interrupted twice by Charlie Shaw of the Lake Sylvan Reserve HOA and Wekiva Parkway Community Coalition WPCC). Mr. Shaw wanted to know what Allan's capacity was on the project, and to be advised that there were also Seminole County residents in attendance since a portion of Seminole is in District 25.

From then on, Mr. Hyman was peppered with questions and not allowed to finish his presentation.

Attendees expressed concerns about a host of issues, largely in Lake County and a few in Seminole County. The only question asked about the Orange County (OOCEA) section was how close the Kelly Park interchange would be to the systems interchange (a half mile).

There were numerous questions and comments about the following:

- Concerns about CR 46A not connecting to SR 46 and residents coming from SR 44 having to go 11 miles out of their way to get to Sanford. There were also concerns about CR 46A being cul de sac'd and questions as to why it was being "terminated." Mark Callahan explained the project background, environmental coordination in developing the project, including decision to realign CR 46A to move it out of the wildlife corridor and to reduce accidents with wildlife.

- There was discussion that much of the parkway will be elevated or bridged, to eliminate conflicts with wildlife.

3/13/2012 5:59 PM

- Regarding a question about what a driver will experience on the service road paralleling the parkway, Mark noted the service road will likely have a 45-50 mph speed limit, will be safer, and will be two lanes (one in each direction).

- There was extensive discussion of the section of SR 46 that will remain and be taken over by Lake County.

- Regarding a question about the cost to drive the parkway, Mr. Hyman noted the toll structure had not yet been decided but the goal overall was to have a \$0.15 per mile toll.

- Concern about tall light stands. Mark noted would expect minimal lighting in the environmentally sensitive areas but will need lights in some areas for safety.

- Concern about location of frontage roads in Seminole County. Mark noted we're holding the ROW line on the south side and the buildup will be to the north side of SR 46.

- Concern about the interchange at International Parkway being rebuilt. It was noted yes, but it will be in place a while as the project will not be complete until 2021. There were comments from the audience about this being a waste of money.

- Bob Smalley asked about the anticipated traffic counts on the parkway. Mark noted 25 000 - 35,000 prior to full completion. Mr. Smalley asked why we couldn't leave SR 46 the way it was and just improve the bridges. Mark noted that would not comply with the state legislation for the parkway.

- There were numerous comments from the audience about cost and using taxpayer dollars. Stated one gentleman: "My money tree has run dry. I'm tired of paying for things when we don't have to. Just elevate 46 currently, without relocating 46A."

At that point TJ Fish of the Lake-Sumter MPO spoke and addressed many of the local and other issues raised during the meeting. He discussed the project background and benefits noting we're five years into a study that's about to be approved by the FHWA. While he acknowledged some stated concerns, he noted there's also been extensive public discussion and involvement as part of the parkway development process. "We've covered this issue ad nauseum - we cannot simply widen existing 46."

3/13/2012 5:58 PM

Mr. Fish also noted the Wekiva Parkway will provide more regional access, and will greatly improve the driver experience through this area. "Now we're ready to design to work out the details. We want your toll experience to be awesome, safe and efficient. SR 46 is neither right now."

He noted CR 46A is a "redundant road. It parallels 46. It can't stay where it is."

Mr. Fish discussed the economic development impacts of the parkway, including the local authorities' desire to have a trail on the parkway ROW and connections with the West Orange Trail and Seminole Wekiva Trails.

A number of residents were from the area of the SR 46 and US 441 interchange and expressed various concerns. It was noted the City of Mount Dora's desires conflict with some of the residents' wishes. Mr. Hyman noted FDOT is meeting with the Mayor and county officials on this on March 27. He noted it has not been designed yet, and suggested residents make the Mayor aware of their concerns. Mr. Fish noted "we're letting the council formulate their position and then it will go to the county." Mark noted right now it's a separated grade interchange. Most of the traffic is coming off US 441 southbound on the flyover to SR 46 eastbound; then much less traffic would be going to the stop light. Mount Dora doesn't like that.

Concern from Sylvan Lake Reserve resident (Seminole County) about noise being "already so bad we can hardly sleep. Now you're going to put an elevated road and service road there. What are you going to do about the noise?" Mr. Fish noted the noise would be measured and mitigation determined, if appropriate, using a federal process.

Meeting officially end about 8:15 p.m. Copies of the FDOT presentation were provided to many in the audience and it was noted it was also on the Expressway Authority website. Several residents stayed behind to ask questions or make additional comments.

Mr. Shaw repeatedly complained that community issues and comments were not included in the Section 4 Impacts in the PER. Mr. Hyman and I noted several times the comments and meetings were extensively documented in the Comments and Coordination section, as required. Mr. Hyman said we would take a look at it.

Regarding  
Hello Mrs. Morris,

As discussed yesterday, below please find the instructions to get to the Wekiva Parkway maps on the Expressway Authority website:

1. Log onto [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com)
2. Click on "Travelers & Expressways" on left end of the top menu bar.
3. On the side menu, click on "Expressways."
4. On that drop-down menu you'll see "Current Projects," and below that is "Plans, studies and future expressways. " Under that click on "Wekiva Parkway."
5. On that page click on the black headline "Public Hearing Information, Including Maps."
6. Under the black "Maps" headline, click on the "Key Layout Map" which shows you the entire corridor broken up into individual map sections.
7. Select the area of interest and scroll down to the board number indicated for that section. For example, "Board 18 Lake County" will pull up the SR 46 and US 441 interchange. "Board 15 Seminole County" gives you the Wekiva Parkway connection to I-4 in Sanford/Lake Mary.

I hope you find this helpful. Please feel free to call me if you still have trouble accessing the maps, or if you have questions once you review them.

Mary Brooks

4/25/2012 3:50 PM Mrs. Harvey Morris calle and said they were looking for the Wekiva Parkway maps, they're at 2121 Haas Road. PIC got her email address and said would email her instructions to the web links.

 Subject: FDOT Wekiva Parkway PD&E Study - Property Owner Query Response

Larry,

Thank you for contacting the Florida Department of Transportation, and for your interest in the Wekiva Parkway. It was good to speak with you earlier.

As discussed, the conceptual Proposed Build Alternative from the Wekiva Parkway Project Development and Environment (PD&E) Study indicates a potential direct impact to Parcel ID: 331927000200004200 at the NW carner of the US 441 and SR 46 interchange of approximate impact of 0.31 acres. I've attached an exhibit from the study map showing the parcel in question.

As mentioned, this is very preliminary and highly subject to change during final design, which is expected to begin for this area later this year.

You can also find maps and other information on the Expressway Authority website at [www.ocea.com](http://www.ocea.com) <<https://mail.qcausa.com/owa/redir.aspx?C=a371b5e1855b4d819f48b46e9031d2b3&URL=http%3a%2f%2fwww.ocea.com%2f>>. Click on the "Travelers & Expressways" button on the left of the top menu bar. On the side menu bar, click on "Expressway" and select "Wekiva Parkway" from the drop down menu under "Plans, Studies and Future Expressways." Once on the Wekiva Parkway page, click on the black headline for "Public Hearing Info and Maps."

We will continue to update the community as additional information becomes available.

Please feel free to call or email me with additional questions.  
Mary Brooks | Senior Manager

5/3/2012 11:59 AM PIO called Larry Mullins, who said his partners, First Boston, and company, Yrral Real Estate Company, owns the NW corner of US 441 and SR 46. He said they've been getting solicitations from lots and lots of attorneys and wanted to know what was happening now? PIO noted waiting final approval from FHWA, told coming any day, for the PD&E. PIO noted FDOT, which is doing this section, has initiated line and grade, very preliminary, and will be going out for final design for this area in a couple of months.

PIO noted under the PD&E, which is conceptual and highly subject to change once we move into final design, there was a potential impact of 0.31 acres to the parcel. PIO noted again in final design they look for ways to minimize impacts also and that could change. PIO got his email address, lmullins4@cfl.rr.com and said would email him some information today. Also got his contact information for the database: PO Box 265100, Daytona Beach, FL 32126. He said he has been involved before on condemnations and he thinks he will wait to hear the first offer before deciding on an attorney.

Cc: Heller, April; Mary Brooks; OOCEA (MaikischM@oocea.com)  
Subject: Response to Rep. Nelson Query  
Maria,

Here is the information you seek. The Public Information consultant, whom both FDOT and OOCEA are using to bridge any potential information gap, put this together. There is an attachment above that you and the Representative will find helpful. It was also suggested:

- Mention to Rep. Nelson and/or his staff to the Mount Dora City Council presentation Tomorrow night/May 1 at 7 p.m.), as well as to a presentation OOCEA is doing May 2 at 1 30 p.m. for the Apopka City Council. The Apopka presentation is primarily on changes taking place with several SR 429 projects underway, but Wekiva also will be discussed. Here are the general questions you asked.
- What do they look like (maps will tell us)?
- Why is it designed that way?
- Why does it go where it goes?

"The intention of the Wekiva Parkway is to complete the beltway around the metropolitan area, providing an alternative to Interstate 4. The parkway also is expected to relieve congestion on SR 46, US 441 and other local roads, as well as improve safety and reduce vehicle crash fatalities.

The Wekiva Parkway is being developed in a way to help protect the area's precious natural resources, including wildlife and habitat. To that end, the parkway will be elevated in many locations to greatly reduce conflicts between vehicles and wildlife.

The Wekiva Parkway Project Development and Environmental (PD&E) Study has resulted in a conceptual Preferred Alternative that is the result of more than 300 meetings and hearings held since 2005 with residents, business owners, local governments, state and federal agencies and environmental groups. Input from thousands of citizens and the evaluation of dozens of alignment alternatives helped to determine the location and conceptual design of the parkway.

Details for the parkway will be determined during final design. Both the Florida Department of Transportation and the Orlando-Orange County Expressway Authority will continue to communicate with, and receive input from, the public as details are developed during the final design process.

Design for Section 2B is expected to begin this summer and take approximately 18 months. The Expressway Authority expects to solicit for bids from design firms for Section 2C this summer.

Section 2B is proposed to extend SR 429 from north of Kelly Park Road (west of Plymouth Sorrento Road) through a new system interchange. The system interchange will provide parkway access to the west toward Mount Dora, and to the east toward Seminole County and I-4. This section will head northwest to near the Lake County - Orange County line, and also to the east, ending just east of Plymouth Sorrento Road.

Section 2C would extend from where Section 2B ends near the Lake County - Orange County line, continuing northwest to tie into SR 46.

At this time the parkway along these two sections is expected to be tolled and four lanes.

Section 3A covers SR 46 from east of Round Lake Road to east of Pond Road at the Sunset Pond community. This section is proposed to be six lanes and would not be tolled.

Section 3B extends west from Section 3A towards Mount Dora, and includes a rebuilt intersection with US 441 and SR 46, as well as a flyover ramp from southbound US 441 to eastbound SR 46. FDOT is preparing to advertise this section for bids from design firms in May.

4/30/2012 11:04 AM

I hope you find this information helpful. Please feel free to call or email me for additional information.

You can also find maps and other information on the Expressway Authority website at [www.oocea.com](http://www.oocea.com) <<https://mail.qcausa.com/owa/redir.aspx?C=7b4b7dale77e486dbb13d7754283dea8&URL=http%3a%2f%2fwww.oocea.com>>

Click on the "Travelers & Expressways" button on the left of the top menu bar. On the side menu bar, click on "Expressway" and select "Wekiva Parkway" from the drop down menu under "Plans, Studies and Future Expressways." Once on the Wekiva Parkway page, click on the black headline for "Public Hearing Info and Maps."

The Wekiva Parkway Public Information Officer Mary Brooks also would be happy to meet with any inquiring constituents directly to provide more information. Her contact information is:

- Mary Brooks | Senior Manager

Subject: RE: Quick Wekiva Parkway Question

Good afternoon,

Per Steve's suggestion, Representative Nelson is looking for additional information for the follow sections of the Wekiva Parkway:

- 2a, 2b
- 3a, 3b

Information that would be helpful is a more in-depth map of those specific sections, as well as information relating to a frontage road on SR 46 in Lake County in the west where the parkway ends. If there's additional information/maps available for that frontage road at the end of the Parkway, it would be greatly appreciated as well.

Thank you very much for your time and attention to this request.

Kind Regards,

Subject: RE: Quick Wekiva Parkway Question

Maria;

If it is section 1a and 1b, as well as 2a, 2b and 2c...that would be OOCEA.

Sections 3-8...and any "a" and "b" subsections, would be FDOT. Our starting point will be 4a and 4b.

I have attached a map.

When you send out a request for info, how about sending it to four people as a group?

- We have a central point of contact who is under contract by both FDOT and OOCEA, who can farm out the requests: Mary@qcausa.com
- The Public Info and Marketing Person at the expressway is: MaikischM@oocea.com
- My information is below
- And you can cc April Heller, who is also is a public information officer here: april.heller@dot.myflorida.com.

Hope this helps.

Sunset Pond HOA

Date	Time	Result	Regarding & Details		
5/10/2012	1:48 PM	Library Document	Sunset Pond HOA overview presentation050312.pdf		
5/10/2012	1:47 PM	Library Document	Sunset Pond HOA mtg sign-in 050312.pdf		
5/3/2012	4:00 PM	PIO Mary Brooks presented powerpoint giving Wekiva Parkway overview and update to about 20 members of the Sunset Pond HOA. PIO also provided handouts of the proposed build alternative for US 441/SR 46 interchange and their entrance, as well as the sheet to the east, and the cross section sheet for that location.			
PIO noted the flyover would be roughly 20 feet over their entrance and that they would be able to turn left into their entrance from WB SR 46. PIO noted they would need to make a right out of their entrance, go down to the next median opening (very close to the end of their WB turn lane) to make a U-turn to go west. PIO noted such changes were needed for safety under access management requirements.					
Numerous residents expressed concerns about the impact of the parkway on their entrance and quality of life. Jack Wagner said his property would be the only one directly impacted and asked about the extent of the take. PIO said I would get back to him with that information. PIO also noted that PD&E Study is largely conceptual and that everything is highly subject to change until details are nailed down in final design.					
Mr. Wagner noted the surveyors he's seen out there already. PIO reiterated as noted in the slides, FDOT is conducting 15% line and grade, starting to tie down what's really on the ground, where things are, includes next level of surveying.					
Mr. Tugya asked several questions about the impact of a proposed pond in a wetland area on the east side of their entrance and how it would affect their pond, which is now very low. There were concerns that with the wetland replaced by the retention pond, their pond would dry up. PIO said that sort of hydrology would be looked at in much greater detail during final design. One resident asked if I knew of a project where residents lost their pond because of construction? PIO said I'd not seen that in my experience, but I could not speak for the entire state.					
5/3/2012	3:58 PM	Jack Wagner asked when FDOT would take their property? He said they were told by CH2m Hill that if they hit us at all, they would buy the whole thing? PIO noted it typically depends on project need, impact to home and infrastructure, and that can be discussed during ROW negotiations. PIO noted ROW would get in touch with them and explain the process and that they'd be able to make the appropriate arrangements. PIO noted it's not just a matter of a bulldozer showing up one day on their doorstep.			

There were questions about the height of the bottom of the flyover, landscaping, noise

walls. Regarding a question about landscaping around the proposed retention pond, PIO noted typically it's sod and fence.

There were several questions about left turns out of the community. PIO reiterated they can turn left into community but will have to make a right out, and then go down and make a U-turn. One woman asked why the apartments across the street weren't being affected the way they were? PIO noted the apartments have the same restriction against left turns out of their complex.

Many of the residents stated they did not want the flyover, and didn't want the project. PIO noted there already is a heavy movement from SB 441 to EB SR 46, and that will be the predominant movement once the parkway is open. PIO noted the flyover allows continuous flow; otherwise traffic backups at the signal would be tremendous.

5/3/2012 3:57 PM

Several residents said it's hard enough to get out onto SR 46 now; with the parkway traffic they fear they won't be able to get out safely. PIO noted with the proposed traffic signal at SR 46 and 441, there should be some gaps in traffic to help with that.

PIO noted we will continue to communicate with them during design, and that once a design firm is selected for this section, we can come back out to address their concerns. In particular the questions about the drainage and their pond.

Jerry Norcaust was concerned about the loss of the trees and vegetative buffer at the pond site. He noted that vegetation blocks the sound and view of SR 46 from his house.

PIO acknowledged the residents' quality of life concerns. PIO noted we recognize that they have a precious resource and quality of life out here, that they came here to "get away from it all." PIO noted the issue is that a lot of other people have done the same, and the traffic demands and safety issues are only going to get worse. PIO noted something has to be done. Either we do the parkway, or we widen SR 46 to six lanes and it becomes like SR 436, SR 434 or other heavily commercial corridors. PIO noted no one wants that in this area, and the Wekiva Parkway and Protection Act set out to protect the natural resources by determining how the roadway could be improved.

Regarding the US 441 and SR 46 interchange, PIO noted FDOT is looking at lowering US 441 to lower the height and visibility of the flyover. Alternatives presented last Tuesday night to the City of Mount Dora would either lower 441 43' (3 level interchange) or 23' (2 level interchange).

Regarding concerns about noise, PIO noted that was studied in the PD&E Study and the report is on the OOCEA website. PIO also noted noise again would be looked at in design.

5/3/2012 3:55 PM

There were a number of questions on the schedule, as well as parkway impacts to SR 46. PIO also went over the OOCEA SR 429 NW extension and re-designation of current 429 to 451 once the extension is open. Regarding questions about where Wekiva Parkway work will start, PIO again went over the 4A and 4B sections and the phasing of the OOCEA segments.

There was a question about whether CR 46A would be moved out of the forest? PIO noted that is still in the proposed build alternative.

One gentleman noted they get bears and other wildlife in the neighborhood, that's part of

why they moved out there. Will the parkway affect the wildlife? PIO noted development of the parkway includes numerous wildlife crossings, and the WPPA required hundreds of acres to be purchased years ago for conservation. PIO noted the parkway is being developed to try to maintain and enhance connectivity between various wildlife habitat, while also reducing the roadway conflicts between animals and vehicles.

One woman also owns property on the NW corner of US 441 and SR 46 off Stanley Bell. Her property will back up to the retaining wall, and she is concerned about noise and visual impacts. PIO reiterated the noise study was on the website and that would be looked at again in design. PIO said if she wants to send me the specific property location I can get more information for her.

Jack Wagner owns the parcel that would be hit by the flyover. He said "this is going to kill his property values; no one will want to buy our house." PIO noted there are two schools of thought on that, those like themselves who don't want to be near such improvements, and those like me - and particularly others who travel for work - who specifically buy property with access to major roads to they can get to and from quickly. PIO noted I bought right at the nexus of 408 and 417 specifically for that purpose.  
--530 p.m.

5/2/2012 2:30 PM Jerry Norcaust left message asking if PIO needed anything. PIO returned call, noted I will have boards and a handout.

Good morning mary Yes we are still on for next Thursday.....probably 20 home owners.  
..... have a nice week-end.

Hello Jerry,  
Just checking to make sure we're still on for next Thursday, May 3 at 4 p.m. at your residence? Please let me know if anything changed.  
Also, how many people are you expecting?  
Mary Brooks | Senior Manager

Good Morning Mary,

WOW! I thank you for your generous immediate reply to my request. I regret----but ask for a raincheck.  
Thursday April 12 is in direct conflict to a meeting I have. Sorry.  
How about during the week of May 1-----your last task of the day or early evening?  
I sincerely appreciate your understanding. Thanks very much.  
Jerry

To: sunsetpond@embarqmail.com  
Subject: FDOT Wekiva Parkway - Sunset Pond HOA Update  
Hello Jerry,  
It was good to speak with you earlier today. I checked my calendar and I'm actually scheduled to be near your area on Thursday, April 12. Would 130 p.m. or 2 p.m. work for a meeting with your residents? Let me know, thanks.  
Also in the meantime, you can see the Preferred Build Alternative map from the PD&E Study on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com) <<https://mail.qcausa.com/owa/redir.aspx?C=4e9817f4670f45f5af8e1364efe5ac32&URL=http%3a%2f%2fwww.ExpresswayAuthority.com>>.  
Click on the "Travelers & Expressways" menu button at the top left. Then on the side menu, click on "Expressways." On that drop-down menu under "Plans, studies and future expressways" click on "Wekiva Parkway." On that page click on the black headline "Public Hearing Information, Including Maps." Scroll down to "Board 18 Lake County" and that will pull up the SR 46 and US 441 interchange.  
These maps are large files and will take a couple minutes to download, just FYI. You can zoom in quite a bit to see parcel detail since these are high-resolution maps.  
I look forward to hearing back from you soon. Thank you.  
Mary Brooks | Senior Manager

4/9/2012 1:56 PM PIO returned call to Jerry Norcaust, who noted the Sunset Pond HOA has 17 houses, and they're on the SE corner of SR 46 and US 441 in a little cul de sac. He said the first two properties will be affected by the flyover. He noted when the Expressway Authority had the project, twice they came to my house. The last time was in May 2006. It was Mike Snyder, Mark Callahan, and the PIO. He asked for an update presentation to their residents.

"We're to the point where some of us are kind of getting us nervous, ... They've already dug test holes on the first man's property. He wants to know when they're going to buy

his house." PIO got his email address and said I would check some possible dates to bring out the boards and get back to him. sunsetpond@embarqmail.com

He said out of the 15 houses in the HOA only 3 people work, so they can meet during the day also. "I don't care what you do with the road, I'm not moving, I'm on the left side. The people on the right side have a problem with the flyover going over their house." He noted most of the residents are in their 70s and 80s, so mainly the question is when are we going to start. PIO let him know that area is section 3B and the tentative schedule, which is subject to change since we don't even have federal approval yet, is ROW acquisition in 2014 and construction start 2016.

He said that's very helpful. He said someone told him there was a way to accelerate the acquisition; that's what they one guy wants to do here. He noted one couple in their 80s is in bad shape. PIO noted there are certain conditions for a hardship, but don't believe we're there yet since we don't even have federal approval. PIO said I'd get back to him with some dates to come out with the boards. He said he greatly appreciated it.

Subject: Draft response to Rep. Nelson Aide Query  
Steve,

I added in the Section 2 and 3 individual maps since they're easier to read. I would invite Rep. Nelson and/or his staff to the Mount Dora City Council presentation (May 17 p.m.), as well as to a presentation OOCEA is doing May 2 at 130 p.m. for the Apopka City Council. The Apopka presentation is primarily on changes taking place with several SR 429 projects underway, but Wekiva also will be discussed.

I have also vetted this information with OOCEA, FYI.

Given the very general nature of the questions, a general response would seem appropriate. Regarding the three questions:

- What do they look like (maps will tell us)?
- Why is it designed that way?
- Why does it go where it goes?

Here is a general response for consideration:

"The intention of the Wekiva Parkway is to complete the beltway around the metropolitan area, providing an alternative to Interstate 4. The parkway also is expected to relieve congestion on SR 46, US 441 and other local roads, as well as improve safety and reduce vehicle crash fatalities.

The Wekiva Parkway is being developed in a way to help protect the area's precious natural resources, including wildlife and habitat. To that end, the parkway will be elevated in many locations to greatly reduce conflicts between vehicles and wildlife.

The Wekiva Parkway Project Development and Environmental (PD&E) Study has resulted in a conceptual Preferred Alternative that is the result of more than 300 meetings and hearings held since 2005 with residents, business owners, local governments, state and federal agencies and environmental groups. Input from thousands of citizens and the evaluation of dozens of alignment alternatives helped to determine the location and conceptual design of the parkway.

Details for the parkway will be determined during final design. Both the Florida Department of Transportation and the Orlando-Orange County Expressway Authority will continue to communicate with, and receive input from, the public as details are developed during the final design process.

4/27/2012 2:13 PM

The Orlando-Orange County Expressway Authority is developing Sections 2B (429-204) and 2C (429-206). Design for Section 2B is expected to begin this summer and take approximately 18 months. The Expressway Authority expects to solicit for bids from design firms for Section 2C this summer.

Section 2B is proposed to extend SR 429 from north of Kelly Park Road (west of Plymouth Sorrento Road) through a new system interchange. The system interchange will provide parkway access to the west toward Mount Dora, and to the east toward Seminole County and I-4. This section will head northwest to near the Lake County - Orange County line, and also to the east, ending just east of Plymouth Sorrento Road.

Section 2C would extend from where Section 2B ends near the Lake County - Orange County line, continuing northwest to tie into SR 46.

At this time the parkway along these two sections is expected to be tolled and four lanes.

Section 3A covers SR 46 from east of Round Lake Road to east of Pond Road at the Sunset Pond community. This section is proposed to be six lanes and would not be tolled.

4/27/2012 2:12 PM

Section 3B extents west from Section 3A towards Mount Dora, and includes a rebuilt intersection with US 441 and SR 46, as well as a flyover ramp from southbound US 441 to eastbound SR 46. FDOT is preparing to advertise this section for bids from design firms in May.

I hope you find this information helpful. Please feel free to call or email me for additional information.

You can also find maps and other information on the Expressway Authority website at [www.ocea.com](http://www.ocea.com) <<https://mail.qcausa.com/owa/redir.aspx?C=575a3294523d4a80bab36607cf508f7e&URL=http%3a%2f%2fwww.ocea.com>>.

Click on the "Travelers & Expressways" button on the left of the top menu bar. On the side menu bar, click on "Expressway" and select "Wekiva Parkway" from the drop down menu under "Plans, Studies and Future Expressways." Once on the Wekiva Parkway page, click on the black headline for "Public Hearing Info and Maps."

The Wekiva Parkway Public Information Officer Mary Brooks also would be happy to meet with any inquiring constituents directly to provide more information."

I look forward to your feedback.

Good Morning Ms. Brooks,

Thank you very much for calling me this morning and for sending additional information

regarding the planned Wekiva Parkway.

While our family is pleased that the project is moving forward, it appears to be quite some time (18 months) before some of these key issues will be resolved. As I understand the plan is only the preferred design but is not yet the final design.

Please keep me in mind as the process continues and please let me know if anything at the (west end of) Wayside at Hwy. 46 changes from the current design. Thanks again.

Subject: FDOT Wekiva Parkway PD&E Study - Parcel Query  
Hello John,  
Thank you for contacting the Florida Department of Transportation. As the public information officer for the Wekiva Parkway PD&E Study for the Florida Department of Transportation and the Orlando-Orange County Expressway Authority, your property query was forwarded to me.

I've attached a screen shot of the particular parcel in question, 25-19-29-501-0020-0030 from the Seminole County Property Appraisers website, as well as a screen shot of the Wekiva Parkway Preferred Build Alternative at Wayside Drive. As you mentioned in your letter, this map in its entirety and others are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com).

Please bear in mind that we are still waiting for federal approval of the Preliminary Engineering Report from the PD&E Study. The timing of the federal approval and other factors mean the overall project schedule is subject to change. Currently, the Wekiva Parkway in your area is tentatively scheduled to begin construction in 2017.

Also please understand that the Preferred Build Alternative is conceptual, and that

potential property impacts are subject to change once the actual detailed engineering is conducted during the design phase.

As the schedule stands now, keeping in mind that it is subject to change, it will probably be 18 months before we know the right-of-way acquisition requirements for properties along the Wekiva Parkway corridor in Lake and Seminole counties.

I hope you find this information helpful, and invite you to periodically check the website previously mentioned for updates. You're also welcome to email or call me (cell 407-694-5505) for additional information. Thank you.

Mary Brooks | Senior Manager

Good Afternoon Steve,  
Thank you very much for taking your time to listen to my concerns at our inpromptu meeting on the 6th and for kindly directing my inquiries to the departments.

I truly appreciate your attention to these questions and I will stay in touch as we proceed.

You Sir, are a pro and it is appreciated.

Thanks again very much.

The (Florida) Current  
Wekiva Parkway financing deal in final stages after transportation budget bill signed  
Gray Rohrer, 04/25/2012 - 04:44 PM  
+ responses  
6

A final agreement to finance the \$1.8 billion Wekiva Parkway is still being completed, even though a tentative deal was reached in November.

Dick Kane, spokesman for the Florida Department of Transportation, said Wednesday that the agreement is still being finalized. Funding for the 61-mile road, which will connect State Road 429 with Interstate 4 to complete a metro loop around Orlando, is to be provided by the FDOT and the Orlando-Orange County Expressway Authority. Kane said FDOT was waiting on Gov. Rick Scott to sign SB 1998, which provides funding for the project. Scott signed the bill last week, paving the way for a final deal, although it is still unclear when such a deal will be reached.

"It's a very complex deal, or agreement I should say," Kane said.

SB 1998 is a transportation budget conforming bill that sweeps \$200 million in license and vehicle fees into general revenue next fiscal year, but secures those funds for transportation projects in future years.

The bill also pulls the Beachline Expressway (State Road 528), which connects Orlando to Merritt Island and the Space Coast beaches, into the Florida Turnpike Enterprise. The FTE can use the Beachline tolls, which are expected to rise 33 percent later this year, but will transfer the value of the Beachline itself to FDOT as part of the Wekiva Parkway financing plan, to the tune of \$60 million.

While the financing plan isn't ready for print quite yet, the parameters are in place. FDOT will pay for two-thirds of the cost of the project, \$1.2 billion with OOCEA paying for the rest, \$600 million.

"Everybody's moving forward with it, but the financing plan is still being worked on," said OOCEA spokeswoman Michelle Maikisch.

Funding for the project was a top priority for House Speaker Dean Cannon, R-Winter Park, and other Central Florida lawmakers during the legislative session this year.

Despite the delay in reaching an agreement, Kane said construction on the Wekiva Parkway, scheduled to begin later this year, is still on track.

Reporter Gray Rohrer can be reached at [grohrer@thefloridacurrent.com](mailto:grohrer@thefloridacurrent.com).

Kellie Rupert

Time

Regarding

4/17/2012 11:00 AM Kellie Rupert called with a question about the Seminole map. She asked about the yellow ROW line and road alignment? PIC noted the road dips to the south a little off the existing corridor in that area. She owns map parcels 3218 and 3161. PIC said it does appear that some property would be needed. PIC noted ROW needs would not be determined for at least 18 months, everything still highly subject to change. She said she was trying to get as much information as possible so she could disclose to potential buyers. PIC noted we were going to be sending out an update soon and to stay tuned.

4/16/2012 5:10 PM Kellie Rupert called and said she has two properties that they're thinking of selling and wanted to know what was happening with the Wekiva Parkway in that area. PIC Mary Brooks talked her through finding the maps on the OOCEA website. She asked if this was definitely what was happening with the road? PIC said maps in the PD&E phase are conceptual, and subject to change based on final details worked out in final design. PIC also noted the Study also still has to be approved by the feds.

She asked what the schedule was? PIC noted that area of Seminole County was projected for construction in 2016-2017 but again that is subject to change based on funding availability and other factors. PIC noted design would be a couple of years before that. PIC got her contact information to send her future updates, and suggested she call or email with any other questions once she reviews the maps.

Samantha,

There is no update. We still do not have a Finding of No Significant Impact from the federal government, and we do not expect 60% maps to be ready before late in the third quarter. At this point it seems unlikely that acquisitions will begin much before 2013.

Regards,

Toll Free: 888.371.1600

Samantha,  
Metropolitan Orlando only approved the project this morning. As for the agreement with FDOT, it is not finalized and has not been approved by the Authority's board. Accordingly, no time frames have been established for acquisition. Once all approvals have been granted, it will still take several months before realistic time lines can be established. Once those time lines have been approved, they will be available on the Authority's website.

Sent: 3/12/2012 10:24:13 PM

Subject: Northwest Orange County / East Lake County Regional Committee - Wekiva Update

Below are brief highlights from this morning's Wekiva Parkway Update presentation to the Northwest Orange County / East Lake County Regional Committee meeting at Mount Dora City Hall. I've attached the sign-in sheet, PowerPoint Presentation that was provided as a handout, today's agenda and the minutes from the last committee meeting in December.

Monday's highlights:

- Alan Hyman, FDOT Director of Transportation Operations, provided an overview of the entire Wekiva Parkway, briefly also mentioning OOCEA sections, and procurements.
- TJ Fish of Lake-Sumter MPO and Lake Co. Commissioner Leslie Campione expressed concerns that the accelerated project also accommodate the trail planning being done in a number of locations on the corridor. Alan noted meetings and discussions on that are ongoing and that section 4 would be the easiest to accommodate the trail so it works that this is the first section.
- TJ Fish noted while the Expressway Authority is scheduled to be building its sections, FDOT is scheduled to be widening SR 46, US 441 and SR 44 in that area of Lake County. He expressed concerns about all of these major roadways being under construction at once. Alan noted on SR 46, the effect on other roadways is being looked at as part of the PD&E Study. He also noted the US 441 section was not yet funded.
- TJ Fish noted FDOT will fund an analysis of this area looking at a built Wekiva Parkway and the effect on local roads including the new CR 46A, CR 435, Round Lake Road, Kelly Park Road and CR 448. Among the concerns is that the Systems Interchange near Kelly Park Road will draw a lot of traffic where CR 448, "a unique east-west road to Howey-in-the-Hills and to Leesburg," and Jones Road come into Lake County. The study would kick off in about 60 days and take a year.
- Attendees asked about the OOCEA segment schedules and when OOCEA would tie into FDOT sections. Alan and I provided information. Lake Commissioner Campione also asked about the 429-201 Northwest Extension, noting she receives a number of calls asking when it will be finished. I noted contractor on track to finish in December. Also gave notification of US 441 nighttime closure and detour expected in early May to fly bridge beams.

3/12/2012 9:59 AM

- There was extensive discussion about the trails planning underway and incorporating trail development into the Wekiva Parkway, particularly at the bridges. Bill Thomas of Orange County Parks and Recreation said he would be getting in touch with Glenn regarding their plans for the West Orange Trail and the Wekiva Parkway at Kelly Park Road and Mount Plymouth Road.

I understand Executive Director Crumit is attending the Lake County Commission Wekiva Update Tuesday morning, and Mark and Glenn are attending Rep. Metz' meeting Tuesday evening in Sorrento.

I hope you find this helpful. Please feel free to call or email with any questions or comments. Mark, please feel free to reply all with any additional salient points I may have missed. Thank you.

SunRail, road work could create 100,000 jobs over time  
By Dan Tracy, Orlando Sentinel  
8:39 p.m. EST, April 21, 2012

Comments  
21  
Share89

Construction crews work near the railroad tracks on Thursday near Barwick Road and C R. Beall Boulevard (US 17-92) in DeBary.

Construction crews work near the railroad tracks on Thursday near Barwick Road and C.R. Beall Boulevard (US 17-92) in DeBary. (Jacob Langston, Orlando Sentinel / Apr 21, 2012)

DeBARY - Trevor Small drove his dusty triaxle truck full of limestone to the railroad track just south of town and dumped his load.

Wearing a white hard hat, he smiled when asked about his job delivering what will

become the bed for a new set of tracks of the planned SunRail commuter train.  
Ads by Google

"I relate it to Moses crossing the Red Sea: [I am] coming from poverty, out of debt," said Small, 58, of Sanford.

He is one of about 250 people with full-time jobs working on SunRail, the \$1.2 billion system that will link DeBary with several other cities, including downtown Orlando, by May 2014.

SunRail is one of three massive transportation projects that could inject \$4 billion into Metro Orlando's slowly recovering economy in the years ahead. Officials say the projects could create as many as 100,000 jobs for an industry and region that desperately needs them.

The work could not have come at a better time for Small, who said he was forced to move out of his home and rent it because he was working so little he could not afford the mortgage.

"It's been tough on us truck drivers," said Small, who works for Diamond C Transport of Leesburg.

As Small knows well, the construction trade has been especially hard-hit since the recession started in 2007.

"It's work we need. Certainly, our industry has been down so much," said Bob Burleson, who runs the Florida Transportation Builders Association.

He estimated that most Florida paving companies have laid off 40 percent to 50 percent of their employees in recent years because there are so few jobs. If so, that would mean a reduction from about 100,000 to 50,000 workers.

4/21/2012 8:38 PM

During the past year, the overall construction industry in Florida lost more than 13,500 jobs, a drop of 4 percent. This was during a time when the state's unemployment rate dropped from 10.7 percent to reach 9 percent in March, its best showing in more than three years.

Burleson estimates the unemployment rate in road building at 20 percent or more and suspects many jobless construction workers have left the state or moved into other fields.

"I'm sure some of them have got a bad taste in their mouths from being laid off," Burleson said.

But help is coming. In addition to SunRail, work is expected to start this fall on the \$1.7 billion Wekiva Parkway, and state officials say they hope to begin a massive overhaul of Interstate 4 that could cost \$2 billion in 2014.

That's a total expenditure of \$4.9 billion, but all of that money will not be spent in Central Florida, particularly in the case of SunRail. Nearly half of the SunRail cost will be spent on equipment made elsewhere and for purchasing the tracks from and making other rail improvements for CSX, the Jacksonville-based train company that previously owned the rail corridor.

Regardless of the final financial tally, construction workers are not complaining.

"We're glad to see it happening," said Mike Kanaday, Central Florida operations manager for Hubbard Construction Co.

Kanaday's company is bidding on the Wekiva Parkway and, he expects, the I-4 work when it is available. Hubbard could add several hundred jobs if it wins some of the work, he said.

4/21/2012 8:37 PM

"We're glad to see this happening," he said.

Elizabeth Bradin, operations manager for Diamond C, said her company has hired 30 drivers.

"Basically," she said, "the guys that didn't get to work every day are working every day, some six days a week. No one in this industry is going to complain about working six days a week."

Federal and state officials estimate that spending \$1 billion on transportation projects creates 24,000 to 28,000 jobs. A job is defined as full-time employment for a year.

The Orlando-Orange County Expressway Authority figures the Wekiva Parkway could lead to more than 11,500 construction jobs; more than 5,600 supporting jobs such those for truck drivers and engineers; and nearly 17,000 induced jobs, ranging from extra grocery baggers at Publix to secretaries.

Sean Snaith, an economics professor at the University of Central Florida, said such hefty spending is "helpful" in the region's \$94 billion economy.

But the most important impact of the work, he said, would not be the jobs - most of which go away when the projects are complete - but the improved transportation network.

"All of these are really nice additions," he said, "and will pay dividends well beyond the construction phase."

4/4/2012 5:26 PM

Wekiva Parkway deal still not signed

By Dan Tracy, Orlando Sentinel

5:26 p.m. EDT, April 4, 2012

The contract to build the \$1.66 billion Wekiva Parkway has been sitting in Tallahassee for a month, lacking only the signature of the state's top road builder.

Officials of the Orlando Orange County Expressway Authority already have signed off on the pact with the state Department of Transportation to construct the toll road that would complete the beltway around Metro Orlando.

They say they are confident FDOT Secretary Ananth Prasad will agree to the deal but

concede being a bit anxious.

"We're just waiting ... Everybody is trying to be patient," said authority Chairman Walter Ketcham.

Surveillance Video: Check out these videos of crimes caught on camera

The apparent hang-up is that Prasad is busy giving updates about how FDOT did during the state Legislative session that ended last month. Authority officials are concerned that Prasad is waiting for Gov. Rick Scott's approval.

Scott spokesman Lane Wright said the governor is not delaying the deal.

"At this point in the process," Wright said, "he has not seen anything that concerns him."

Max Crumit, the authority's interim director, said both the state and the toll agency are seeking bids on the project. The state would not look for contractors if it was not certain of building the parkway, Crumit said.

The outline of the pact was reached in November, but there initially was a dispute over how the Orlando agency would repay \$220 million it owed the state. FDOT got the authority to agree the debt would be a priority.

The expressway authority intends to pay for about \$530 million on portions of the road within Orange, while the FDOT and the agency that operates Florida's Turnpike would contribute more than \$850 million.

Construction could start as early as this fall at the west end near Apopka. Work on the east end, where the toll road links with I-4, would begin in 2017. The parkway would be complete by 2021.

 Subject: Thank you for your time today  
 Secretary Prasad, Commissioner Campione and T.J. Fish,  
 I want to personally express my gratitude to each of you for taking the time today to listen to the concerns regarding the Wekiva Parkway and the roads surrounding this project. Knowing how busy each of your schedules is, the comments about the progression and direction of this project are re-assuring, I look forward to future discussions and participation on how we can help in this great project.  
 Thank you,  
 Bill Smalley

		Subject: FDOT Wekiva Parkway Project - Wagner Property at Sunset Pond
		Hello Jack and Beverly,
		It was good to see you at last Thursday's presentation to the Sunset Pond HOA. As discussed, following is some preliminary information about the potential impact to your property from the Wekiva Parkway. As discussed during the presentation, information from the Proposed Build Alternative resulting from the PD&E Study is conceptual and highly subject to change. As also discussed, details is very subject to change once design gets underway.
		For the property listed at 101 Pond Road, Mount Dora, FL 32757 (shown as WP Parcel # 1378 on the PD&E exhibits), the current estimated parcel size is 0.95 acre (approximately 41,189 sq. ft.)
		The preliminary estimated parcel impact due to Wekiva Parkway right of way needs, under the Proposed Build Alternative, would be 0.04 acre (approximately 1,850 sq. ft.). Again this is very preliminary and subject to change during final design.
		Please feel free to call or email for additional information. We will continue to communicate with you all as the project progresses. Thank you.
		Mary Brooks   Senior Manager

5/3/2012	4:00 PM	During presentation to Sunset Pond HOA, numerous residents expressed concerns about the impact of the parkway on their entrance and quality of life. Jack Wagner said his property would be the only one directly impacted and asked about the extent of the take. PIO said I would get back to him with that information. PIO also noted that PD&E Study is largely conceptual and that everything is highly subject to change until details are nailed down in final design.
----------	---------	--

Mr. Wagner noted the surveyors he's seen out there already. PIO reiterated as noted in

the slides, FDOT is conducting 15% line and grade, starting to tie down what's really on the ground, where things are, includes next level of surveying.

Jack Wagner asked when FDOT would take their property? He said they were told by CH2m Hill that if they hit us at all, they would buy the whole thing? PIO noted it typically depends on project need, impact to home and infrastructure, and that can be discussed during ROW negotiations. PIO noted ROW would get in touch with them and explain the process and that they'd be able to make the appropriate arrangements. PIO noted it's not just a matter of a bulldozer showing up one day on their doorstep.

Jack Wagner owns the parcel that would be hit by the flyover. He said "this is going to kill his property values; no one will want to buy our house." PIO noted there are two schools of thought on that, those like themselves who don't want to be near such improvements, and those like me - and particularly others who travel for work - who specifically buy property with access to major roads so they can get to and from quickly. PIO noted I bought right at the nexus of 408 and 417 specifically for that purpose.

Regarding

>>> Construction 3/19/2012 4:57 PM >>>

Dear Mr. Wiseman - The preliminary plans shown in the drawing you attached are for the design concept and are subject to change in final design. Design work has not as yet begun so it is impossible to say, at this time, whether or not the ponds will remain in the position shown in the graphic.

Please let me know if you have any further questions or if I can be of additional assistance. Thank you,

Best regar

Brian:

Please review the attached drawing and tell me if Retention Ponds #1 and #2 are still at their respective locations, or have they been moved? Thank you.

mwiseman@realtycapitalfl.com

1/19/2012      2:23 PM

Dear Mr. Wiseman - The preliminary estimated impact to Parcel 2014 is:

Roadway 0.87 acre (along Kelly Park Rd. and Plymouth Sorrento Rd.)  
Pond 2.80 acres  
Total 3.67 acres

We do not have a graphic showing the actual dimensions related to the impact on this property. Also, bear in mind that these are preliminary impact estimates, based on the approved concept, and are subject to change in final design.

Please let me know if you have any questions or if I can be of further assistance.

4496 Plymouth Sorrento Road  
Apopka, FL 32712  
The SWC of Plymouth Sorrento Road and Kelly Park Road (19 + acres)

Brian:

About this property we would like to know how much land would be taken, a) along Kelly Park Road, and b) along Plymouth Sorrento Road. And, how many feet from the center line on Plymouth Sorrento Road. Any help you can provide is greatly appreciated.  
Morgan

Subject: Re: Fwd: Contact Us - ExpresswayAuthority.com

Hello Karen,

Thank you for your interest in the Wekiva Parkway, which will complete Central Florida's Beltway. The maps for the Proposed Build Alternative for the Wekiva Parkway Project Development and Environmental (PD&E) Study can be found on the Expressway Authority website.

1. Log onto the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com).
2. Click on the "Travelers & Expressways" menu button at the top left.
3. On the side menu, click on "Expressways."
4. On that drop-down menu you'll see "Current Projects," and below that is "Plans, studies and future expressways. " Under that click on "Wekiva Parkway."

5. On that page click on the black headline "Public Hearing Information, Including Maps."  
This takes you to <https://www.oocesa>

6. Under the black "Maps" headline, click on the "Key Layout Map" which shows you the  
entire corridor broken up into

individual map sections.

7. Select the area of interest and scroll down to the board number indicated for that  
section. For you that would be Board 1 Orange County.

This exhibit shows a bridge planned over Yothers Road. There are three parcels between  
the east property line for Zellwood Station and where the Wekiva Parkway will cross  
Yothers Road.

Please be advised that the PD&E exhibits are conceptual, and details are highly subject to  
change during final design. OCEA recently selected firms to begin design in this area.  
That is expected to take about 18 months.

I hope you find this information helpful. We are in the process of developing a project  
website for design and construction to keep the community informed about project  
schedules, public meetings and other activities. You are in the project database and will be  
sent this information once available.

Please feel free to call or email for additional information. Thank you.

Additional Comments:  
Our house is in the southeast corner of Zellwood Station, backing up to Yothers Rd. Will Yothers road be bridged by 429 or closed off? The only map I have showing the new road does not show whether a bridge will be over it.
