Wekiva Parkway Non-Public Workshop Comments 2004

Contact		Boo Sun Bahk
Date	Time	Regarding
12/27/2004	9:30 AM	PIO responded to Alex Bahk email: "Good morning Alex, Hope you had a happy holiday. I looked up the property in question, and at this point it appears the residence is west of the Wekiva Parkway project study corridor. Please be advised, however, that is subject to change as the Project Development & Environmental Study, scheduled to begin in early January, progresses. The PD&E study is expected to take up to two years, though we hope to have some initial alignment alternatives in the early fall. In the meantime, I will send you a copy of the Wekiva Parkway study corridor conceptual. I've also added you to the project database to receive updates. You also can check for project info on the website, <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> and you are welcome to check in with me from time to time. We are very early in the process, but it is your prerogative whether or not you want engage an attorney before an alignment is determined."
12/26/2004	11:32 PM	PIO received email from Alex Bahk <a href="mailto:radiojog@comcast.net">radiojog@comcast.net</a> , copied <a href="mailto:radiojog@yahoo.com">radiojog@yahoo.com</a> Subject: Apopka HouseRe: Boo Sun Bahk5521 Effie DriveApopka, Florida 32712Orange County - SR 429 Wekiva Parkway Parcel No. 12-20-27-2490-00-130Dear Mary Brooks,My mother lives in Apopka, Florida. She recently received a letter from an attorney called Harris, Harris, Bauerle & Sharma.The letter says some or all of her property is in the study area. So, I'm guessing her house may not be taken for the highway construction. But, when it does I have some questions:1. When would you know whether her house will be taken or not?2. Does she need to obtain a lawyer?3. If so, when would be the good time?Regards, Alex Bahk"
Contact		Susan Baker
Date	Time	Regarding
9/29/2004	4:50 PM	PIO prepped conceptual of Wekiva Parkway for Susan Baker as requested.
9/22/2004	10:30 AM	PIO left MSG for Michele Gumm/CH2M Hill noting requests for alignment printouts and conceptals, asked if she could have half dozen of each printed out for me to respond to requests. PIO noted I could pick them up Thursday or Friday. Is she has any questions give me a call.
9/22/2004	9:10 AM	Susan Baker called back and asked for something showing the proposed corridor. PIO noted we have aerial conceptual on website, gave address, but that is entirely subject to change. She said she'd looked at that but it's too small to tell anything, she requested a larger printout. PIO got her address and said would send her one. 1918 Woodward St., Orlando 32803, e-mail <a href="mailto:appraisersusan@yahoo.com">appraisersusan@yahoo.com</a> She asked who was doing the PDE? PIO noted Ch2m Hill and PBSJ. She noted she used to handle condemnations for DOT so she's familiar with the process. PIO noted I was out of the office today but would try to get a conceptual out to her on Thursday or Friday. She said that would be great.

9/22/2004 9:00 AM PIO returned Susan's call, left MSG that no alignment yet; PDE to start in the next month or so. Noted that will take about a year or more and then will have a preliminary alignment. PIO asked her to call me back with her e-mail address because we will do updates on the PDE from time to time.

9/22/2004 8:55 AM Susan Baker left MSG said she's a realtor showing a property a person right on the edge of the Seminole County public lands north of SR 46. They have concerns about the proposed alignment of the continuation of the Western Beltway north of 46. Whether it will be in Seminole County or Lake County is a pretty important consideration for us. They don't want to buy it and wind up with a view of the expressway.

Contact  
Date 11/4/2004 Time 12:39 AM Barney Barnes  
Regarding  
Bob Riser/SC Attorney's Office 407-665-2000 said he has a friend, Barnie Barnes, who lives in Lake County on the Wekiva Parkway, section 3. He's on Coronado and is concerned about his property being taken. He said when it comes down and turns east looks like it includes his property. He's trying to help his friend since he deals with ROW acquisition for the county. PIO noted we don't have even a preliminary alignment yet, since we haven't started the PD&E, so too early to tell which properties will be affected. He asked about advance ROW acquisition? PIO said we'd still have to have at least a preliminary alignment, and the advance ROW usually involves large landholders who will be affected regardless of how the alignment shifts. He asked when we might be ready to be acquiring property? PIO noted once the preliminary preferred alignment is determined, perhaps in about a year. PIO asked him to have his friend contact me directly, so I could get his contact info and include in the database so he'd receive project updates, etc. He said he would do so and thanked me for the info.

Contact  
Date 12/6/2004 Time 11:23 AM John & Anita Carlson  
Regarding  
Brian Manwaring/CH2M emailed re: Anita Carlson query: "Just an FYI, I spoke with Anita by phone. Per Mark's judgment, we won't be showing Anita any concepts at this time. I explained to her the reasons. She seems very understanding and level-headed, and would just like to have as much info as soon as it's available. I assured her that she would be on the mailing list, and that I'll contact her when we have some concrete concepts. "

11/29/2004 3:04 PM Gary Skaff/PBSJ emailed: "On an unrelated matter, I just spoke with the following person: Anita Carlson (352) 383-1075, (352) 406-9681 (cell) Ms. Carlson lives on SR 46 just west of the SR 46/SR 46A intersection. She is interested in the status of the Wekiva Parkway PD&E Study. I explained to her the study status. She is familiar with the Wekiva Coordinating Committee and the Working Group map. I explained to her that the actual alignment study would take about two years to complete, but that we did have some "concepts" available for her to see regarding local access in the area of her concern. I told her that someone from CH2MHill would call her back and arrange a meeting for her to review the current concepts, recognizing that they are only ideas at this time, subject to modification during the PD&E Study. Brian (Manwaring), can you follow up on this? Thanks."

Contact Cindy Cioci

Date	Time	Regarding
9/7/2004	1:47 PM	<p>PIO called Cindy, left MSG at office to make sure she got project info she was looking for. PIO left my contact info and asked her to call me. PIO also called her cell number. She said "They never got back to me. A gentleman said he was looking into it. A neighbor said they had been contacted personally about their property as far as the GreeneWay extension.. They're behind me kind of . They said they contacted her and said her property was going to be a retention pond. One of my neighbors was on the committee for the Wekiva Parkway Protection Act, and if anybody knew about it then it would be him. One alignment shows it in my backyard, and another shows it behind me. I live just north of Ponkan and west of Plymouth Sorrento Road. If it comes on this side, I'm the only person affected on Phil's Lane. Everybody else sits on the front of Phil's Lane. Because of that my house is on the back so I would be definitely affected." PIO noted she would be contacted if she's going to be affected; there's a legal process that has to be followed. She said Bryan told her that if she heard from Broad and Casell condemnation attorneys, "then you'll know you've been contacted by the Authority's attorneys. This woman got all the neighbors up in arms." PIO noted PD&amp;E not supposed to start for another month or so, and then that will take about a year or so. She said she did condemnation up in Rhode Island, so she's familiar with the process. She asked after the PD&amp;E is done, how long before they have to leave their homes? "Will we have to leave right away, or could we wait until construction?" PIO noted after PD&amp;E, they would begin ROW acquisition and final design, which could take another year or two. PIO estimated 2-4 years before construction, and that's highly subject to change. PIO noted affected property owners are usually given ample time to get their affairs in order and arrange for other domicile. PIO said can't say they'd be able to stay right up to start of construction, but they wouldn't have to move out two years beforehand either. She was very thankful for the call back. PIO gave my contact info so she can check in from time to time, and got her e-mail address. She said they've "been hanging in limbo for five years now."</p>

8/4/2004	2:00 PM	<p>Bryan Douglas said Cindy Cioci had called because her neighbor on Hideaway Road was bragging we were taking her property. He noted we hadn't sent letters yet north of SR 46) Bryan told her to not pay attention and refer questions to us directly. The board hadn't approved anything at that point.</p>
----------	---------	--

Contact		Fay Eaton
Date	Time	Regarding
11/23/2004	12:46 PM	<p>PIO sent Maitland Boulevard Extension and Wekiva Parkway conceptual letter as requested to Faye Eaton.</p>
11/15/2004	11:03 AM	<p>Fay Eaton called about the Northern extension of 429, the Wekiva Parkway. "I'm one mile from north side of 441, on the west side at 1504 Plymouth Sorrento Road. I was wondering what is happening with this road? We've been tied up over 2.5 years. No realtors want to list this property with the possibility that road might be coming. We're between a rock and hard place." PIO went over PD&amp;E schedule and alignment process. She noted she heard "It was going to cross Plymouth Sorrento Road. It's going to be impossible to cross up that way." PIO said I'd add her to database to get info as it was available. Fay Eaton, mailing address PO Box 808, Plymouth 32768. I don't have an email address. She also asked about Maitland Boulevard, Apopka Bypass: "Have they decided where that's going to come out?" PIO said I could send her an alignment , and she said she would like that. PIO noted I just had to order some more conceptals because I'd run out; will get one out to her as soon as those come in.</p>

Contact		Francis "Butch" Force
Date	Time	Regarding
8/26/2004	5:02 PM	PIO called, left msg asking if he got info needed and asking him to call also to get his correct contact info.
8/4/2004	2:00 PM	Bryan Douglas said Mr. Force lives at Plymouth Sorrento and Kelly Park roads, and wanted to know how far north of the intersection is the alignment?

Contact		Blanca Garcia	Dean, Mead, et al
Date	Time	Regarding	
12/10/2004	10:04 AM	Blanca Garcia responded to PIO email: "When I initially called, it was concerning buying/selling property within the Apopka area. However, we do represent residents and/or property owner(s) that may or may not fall within the projects perimeter. Thanks."	
12/10/2004	9:02 AM	PIO responded to Blanca Garcia: "The OOCEA's primary consultants on the PD&E are CH2M Hill and PBSJ. Are you interested as a resident, or are you a firm representative with a client? Makes a difference on how you're entered in the project database, but simply housekeeping. I thought when we initially spoke you were an interested resident...? Let me know. Thanks. "	
12/10/2004	9:00 AM	PIO received response from Blanca Garcia: "Hello Mary, Thanks for the update. Can you please tell me who will be doing the PD&E?"	
12/10/2004	8:48 AM	PIO sent western beltway completion conceptual to Blanca Garcia as requested.	
12/10/2004	8:24 AM	PIO responded to Garcia email: "Hello Blanca, I got your phone message also while in meetings yesterday afternoon. As you may recall from our Sept. 14 discussion there are no plans or alignment yet for the Wekiva Parkway because the Project Development and Environmental Study (PD&E) won't start until January. The PD&E process will likely take two years. What I can send you is a copy of the conceptual from the OOCEA website that shows a very general corridor of where the roadway might go. The graphic was developed by the Governor's Wekiva River Basin Task Force. I should be able to get that out to you today."	
12/9/2004	3:27 PM	Blanca Garcia emailed: "Ms. Brooks, We have spoken sometime ago regarding obtaining plans and/or right of way maps on the Wekiva Parkway. Can you please let me know if they are available so that I may obtain a copy? If so, how do I get a copy of same. Thank you."	
12/9/2004	3:17 PM	Blanca Garcia left msg said we spoke a few months ago and was wondering status of sending the Wekiva Parkway maps. Please call me.	
9/14/2004	9:13 AM	PIO again tried calling Blanca to follow up. She said she didn't get any plans because they told her there weren't any yet. PIO noted PD&E hasn't started yet on Wekiva Parkway, so no alignment yet. PIO gave her my contact info so she could check in from time to time for updates. PIO also got her contact info and said could forward info as it became available. She was very thankful for the call.	
8/4/2004	2:00 PM	Bryan Douglas said she had called looking for 429-Wekiva Parkway info. She wanted plans She said a friend is building a house in that area. Bryan told her we'll be picking back up	

with the PD&E. He told her it would be more than a year before it was finalized and we'd have an alignment, so they won't know whose house will be taken for some time.

Contact		Mary Hamilton
Date	Time	Regarding
12/29/2004	9:42 AM	PIO checked Wekiva study area and responded to Mary Hamilton: "Thanks for the info and the fax, Mary. At this time it does appear that your location is within the PD&E Study area for this project. Please keep in mind that the study area at this time is quite broad, and although the possibility exists, not all properties located within this area will be needed for this project.I've also added you to the project database so that you will receive project info."
12/29/2004	9:36 AM	PIO received fax as requested of attorney solicitation letter sent to Mary Hamilton from Harris, Harris, Bauerle & Sharma.
12/29/2004	9:31 AM	Mary Hamilton responded to PIO email: "Thank you for your response. My address is 990 Dekleva Drive, Apopka, FL. 32712 in the Plymouth Landings subdivision. It is directly off of Plymouth Sorrento Rd. approximately 1/4 mile from the 441 intersection. I will fax you a copy of the letter today. I will print the conceptual plan from the website. Thanks again and Happy New Year."936 a.m. PIO received fax as requested of attorney solicitation letter sent to Mary Hamilton from Harris, Harris, Bauerle & Sharma.PIO emailed Deborah Keeter/PBSJ ROW to see if she wanted me to forward copy of attorney solitication letter for her files.
12/29/2004	9:17 AM	PIO responded to Mary Hamilton: "Hello Mary, Happy Holidays! If you'll send me your address and nearest major cross streets, I can check whether you're inside the study area for the Wekiva Parkway projects. We are kicking off the Project Development and Environmental Study (PD&E) for these projects right after the New Year. The study is expected to take approximately two years. We hope to have some initial alignment alternatives perhaps by the Fall. We have heard some disturbing things about what some of the law firms are sending to property owners, so if you'd feel comfortable, I'd love to have the solicitation letter faxed to me at F 407-381-9038. Again, only if you feel comfortable. Once I get your address, I'll also add you to the project database to receive updates. If you like, I can also send you a hard copy of the project study area conceptual also available on the OOCEA website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> ). Let me know if this would be helpful.Look forward to hearing back from you."
12/29/2004	9:10 AM	PIO received email from Mary Hamilton Mary.Hamilton@ocfl.net 407-836-7846: "Mary, I am in receipt of a letter from a local legal firm implying my home will be effected by the subject project and they would like to represent me. Can you please advise of a status of the subject project and include how I may be placed on the mailing list for updates and meeting information. Thanks."
Contact		Thomas & Jane Harper
Date	Time	Regarding
10/11/2004	8:09 AM	PIO responded to the Harpers' e-mail: "Good morning, I'm not sure what the Oct. 1 deadline was, but the Expressway Authority now hopes to begin the Project Development and Environmental (PD&E) Study for the Wekiva Parkway projects by the end of November. Once the PD&E Study progresses we will begin to have an initial proposed

alignment. Until that's the case, however, we won't be able to tell landowners whether their properties will be affected. I'll be sending out periodic updates on the study, and am adding you to the project update database. We'll also be posting updated info on the OCEA website, similar to what we're doing for the Maitland Boulevard Extension. The Wekiva Parkway PD&E Study is expected to take a year or so, but you're welcome to touch base with me also from time to time to check up on progress."

10/8/2004 8:20 PM

Thomas & Jane Harper emailed re: status of Western Beltway: "Ms. Brooks, I am in the study area for the beltway. We live at 3801 Hideaway Rd. which is approximately 1/2 mile N of Ponkan Rd and 1/2 mile west of Plymouth Sorrento Rd. For the past 2 years we have been waiting to see where the road was going to be. When will the landowners be contacted? We have passed another deadline October 1st and still have not heard anything but rumors. Please advise if and when we can expect to get the final word. Thank you for your help."

Mike Kerlin

Date

Time

Regarding

11/4/2004

5:18 PM

PIO returned call to Mike/contractor asked for location of Wekiva Parkway near Plymouth Sorrento Road. PIO noted don't have alignment yet, but could send conceptual with wide swath of general area. He said he's seen that already. PIO noted PD&E not started yet, maybe late November - early December, and that will determine preferred preliminary alignment. PIO said if he wants to give me his contact info we can add him to database to receive info as it's available. He said no, that's okay, it's nothing he needs today, if we've got some time to think about it, then that's fine. He didn't want to be added to database

11/4/2004

2:32 PM

Mike left MSG that he's a Central Florida and Apopka contractor, and has a question about new Wekiva extension that goes down Apopka and Plymouth Sorrento Road

Contact

Ben Larson

Advanced Eyecare

Date

Time

Regarding

11/24/2004

2:30 PM

PIO responded to Dr. Larson: "Hello Ben, Sorry we missed each other. Unfortunately, we don't have a preliminary preferred alignment yet for the Wekiva Parkway projects, or the rest of the Western Beltway Completion program. We expect to kick off the Project Development and Environmental Study for these projects right after Jan. 1. The PD&E process can take 1-2 years, at which point we will have a preliminary alignment and be able to better answer property owners' questions such as yours. We will be sending out updates during this process, and I have added you to our project database to receive this info. These projects are being done in coordination with OCEA and FDOT, as well as involving additional coordination with environmental entities. This involved process will take some time. Perhaps by the late spring or summer, we might have some alternative alignments to begin presenting to the public. And there will be public meetings during this process. Stay tuned. Please send me your property address, as well as your mailing address (if different), so we can add you to the project database. Thanks. And have a great holiday!"

11/24/2004

2:25 PM

PIO received Dr. Larson drbenlarson@cfl.rr.com 1218 p.m. email: "Miss Brooks, Hello. My name is Ben Larson. I am an optometrist who recently bought some property on Orange Blvd, 1/8mi South of 46 on the corner of Orange Blvd and Wayside Dr. in Seminole

County. I was wondering if you had any recent information on the projected future path of 417. I'm concerned it might cross over my property. I looked over the projected map on your website and I'm right in the middle of the possible area of construction. The blue area is quite vast, so I was hoping you could pin point the path a little more for me. Thank you."

11/24/2004	2:19 PM	Dr. Larson left a message that he was "again trying to get a hold of you about beltway project from where it currently is in Sanford around to Apopka. I sent you an email as well, if you would check that and send me an email back, that would be fine.
11/24/2004	1:11 PM	PIO returned call to Dr. Larson/Advanced Eye Care. A guy said he's out till 215 p.m. PIO said to leave MSG that I returned his call; he said he would.
11/24/2004	11:37 AM	Dr. Ben Larson left a message that he is about to buy very expensive piece of property along 46, about 1/8 mile south of there. I'm looking at the western beltway completion program PDF map. It's hard to tell from photo, I was hoping you might know a little more info about how far from 46 I would be safe with my property. I'm south of there to the next stop light on the NE corner south of 46 is where I'm buying a couple acres. Any info you might have would be very helpful.

Contact		Russ Lathrope
Date	Time	Regarding
11/23/2004	11:50 PM	PIO sent Maitland Boulevard Extension and Wekiva Parkway conceptual as requested to Russ Lathrope.
11/4/2004	5:23 PM	PIO returned call to Russ Lathrope, also owns RDL ?? Inc, no email address. He said "We're thinking about maybe building a house, but if they're going to build the road, it's not worth it. We were planning on starting soon. PIO noted PD&E hadn't started yet, so didn't have alignment or road location for him yet. He asked, "When you buy the property, will it be market value?" PIO noted yes. He asked what if they put a house on it in the meantime? PIO noted it'd be the market value of the improved property. He said "so if we get an appraiser to say it's worth a certain amount, then you'd pay it?" PIO noted that would have to be negotiated. He asked do we know if road is going to be on the east or west side of Plymouth Sorrento Road? PIO said I'd send conceptual indicating general area alignment might fall, but to keep in mind it could be anywhere within the shaded area or even outside of it. He said he'd appreciate that.
11/4/2004	3:40 PM	Bryan Douglas/OOCEA PIO left MSG that Russ Lathrope / 6122 Plymouth Sorrento Road is thinking about building a home on his site and doesn't know what's going on with expressway. Please call him at 407-467-3318.

Contact		Peter Leerdam	Euro Capital Partners
Date	Time	Regarding	
12/15/2004	12:25 PM	PIO responded to Peter Leerdam: "Peter, the PD&E Study for the Wekiva Parkway projects is set to kick off in early January and take approximately two years. During that time, an alignment will be developed. The first public meeting, at which alignment alternatives could be reviewed, is expected in late spring or summer. Once a preliminary preferred alignment is determined via the PD&E, the final design phase will begin to nail down all the details.I hope that helps."	

12/15/2004	12:25 PM	PIO responded to Peter Leerdam: "Peter, the PD&E Study for the Wekiva Parkway projects is set to kick off in early January and take approximately two years. During that time, an alignment will be developed. The first public meeting, at which alignment alternatives could be reviewed, is expected in late spring or summer. Once a preliminary preferred alignment is determined via the PD&E, the final design phase will begin to nail down all the details. I hope that helps."
12/14/2004	3:17 PM	Peter Leerdam/Euro responded: "Mary, Thank you for the Wekiva Parkway Funding Plan. I didn't see anything specific to the timing of the process, other than a \$6 million PDE study would need to be done. At what point will a PDE study be initiated? How long will the PDE study take? After the PDE study is complete, how long will it take to choose a final alignment?"
12/13/2004	2:30 PM	PIO emailed Wekiva funding plan to Peter Leerdam/ Euro Capital Partners as requested.
12/13/2004	12:15 PM	Peter Leerdam emailed: "Dear Ms. Brooks, Per our conversation, I checked the Wekiva Committee website at <a href="http://www.wekivacommittee.org">www.wekivacommittee.org</a> and could not find the DOT, OOCEA and SCEA report, recommending a funding concept for the Wekiva Parkway, to be reported to the Governor by Nov. 01, 2004. Would you please send me a link to the information. Thank you."
12/13/2004	10:53 AM	PIO returned call, he was looking on OOCEA website, Governor had requested a financing plan from the DOT and that was scheduled to be completed Nov. 2004. PIO noted the funding plan was available on the Wekiva River Basin committee's website. He checked and got address for site, said he'd review it and get back to me with any questions. He said from what I understand OOCEA is working on Maitland bypass, but hasn't started acquiring land for Wekiva projects. PIO noted that's correct, we won't start the PD&E for that until early January, so don't have a preferred alignment. PIO got his contact info to send future info about the project. He said he may already be on the list but provided info. Leerdam, 175 Lookout Place, Ste. 201, Maitland, 32751, Euro Capital Partners.
12/13/2004	10:41 AM	Peter Leerdam left MSG with questions regarding Wekiva Extension. Please give me a call.
Contact		Jackie Linder Harbert Realty Services
Date	Time	Regarding
11/9/2004	12:43 PM	Jackie/Harbert Realty called back to discuss Maitland Boulevard extension and difference between that and the Wekiva Parkway, are they being done at the same time? PIO noted no, we're almost done with the MBX PD&E and final design has started, noted construction to start on first segments of that one in mid- to late-2006; completion 2008-09. She asked when would we finish the Wekiva Parkway? PIO noted depends on how the various stages go, but if we start construction in 2008, could be done by 2010-11, again that's highly subject to change. She asked if S.R. 46 Bypass would be treated separately? PIO noted that would be included in the Wekiva Parkway PD&E, etc. she was thankful for the info.
11/9/2004	12:25 PM	Jackie Linder/Harbert Realty Services said she was referred to me for questions on the Wekiva Parkway. She said didn't the Governor approve the alignment? PIO noted no, Governor approved committee and authorization for development of the projects. PIO noted the conceptualls were on the website. She said she'd seen that, wanted to know if

there were any other maps on the project? PIO noted not yet, we hadn't started the PD&E yet but hoped to by the end of the year. PIO noted PD&E will determine a preliminary preferred alignment. PIO noted Wekiva Committee came up with the swath she saw for potential corridor. PIO went over estimated scheduled for PD&E, design and ROW, noting depending on how things fall we could be four years out from construction start. PIO offered to add her to update list; she said that would be perfect. She also asked that I add Rich Krepak rkrepak@harbertrealty.com, 2301 Lucien Way, Ste. 323, Maitland, FL 32751. Her email is JLinder@harbertrealty.com PIO also mentioned she could find more info on the Wekiva Parkway from the committee website at www.wekivacommittee.com she said she had already checked out that site.

Contact		Sheri MacDonald	Harris, Harris, Bauerle & Sharma
Date	Time	Regarding	
11/30/2004	2:04 PM	PIO emailed Wekiva Parkway funding plan to Sheri MacDonald and asked her who the relevant clients were so I could be sure they were in the project database to receive future info.	
11/30/2004	12:20 PM	Sheri MacDonald/Harris Harris Bauerle & Sharma got the Maitland map, have some clients, looking for a schedule of meetings, right of way and construction for Wekiva parkway. I know the PD&E will start and be maybe two years, but we want as much info as possible. You stated nothing was going to be decided until something due to the governor, by end of November, and then they were going to start the study. PIO noted didn't recall any discussions about the governor, know we had talked about the MBX PD&E wrapping up in November, etc. she said was told something about a financial plan and schedule had to go to the governor, and they want a copy of it. PIO said wasn't familiar with that but would check into it and get back to her.	
11/19/2004	1:35 PM	PIO called back Sheri/Harris Harris to let her know updated conceptual went out in today's mail, noted I thought I'd said I'd get it out by the end of the week. She said that's fine. PIO noted re: their client on 46, that we don't have anything on the Wekiva Parkway projects but general swath that came out of Wekiva Basin Committee. She said so there's nothing set in stone on that one? PIO noted correct, looking to start PD&E jan. 1. she thanked me for the info and call back.	

Contact		Dee Monroe
Date	Time	Regarding
8/26/2004	4:24 PM	PIO called her. She said she was trying to find out where it's going through. My mom has a place up there, she thinks the address is 2663 Oak Lane in Sorrento. Her husband was also there and PIO was on speaker. He said, "We thought if they had the alignment, we could give you the parcel number. We're trying to do some long-range planning because we've got a little nursery down there and if we're going to have to move it we want to get started on that." PIO relayed PD&E to start in a couple of months and that usually takes about a year. PIO gave my contact info so they can check in from time to time on the status. She said she appreciated the call.
8/13/2004	9:00 AM	Dawn Henry said she got a call from Dee Monroe re: the Wekiva alignment. She said she checked with Ben Dreiling and relayed to the woman that it'd be a couple years before we know that alignment.

Contact		Margaret and Victor Moss
Date	Time	Regarding
11/10/2004	11:38 AM	PIO called back Margaret Moss and relayed the PD&E schedule and process for coming up with an alignment. Noted no preliminary alignment yet other than wide swath done by Wekiva Basin Committee. She said she saw the conceptual a while ago., PIO noted maybe by spring we'll have some initial alternative alignments, which would be fine tuned through public hearing and government input process for a preliminary preferred alignment. PIO offered to add her to update list, said we'd be sending out info from time to time. She said would greatly appreciate that. Have already seen conceptual, we had meeting I with OOCEA a while back and we had proposed they go south of 46 right where 46a and river comes in, to go south onto state property where Wekiva River Run. Do you have any idea if they can do that; build the road on state park? She said it's Rock Springs State Park. PIO noted I know there are things you can do on a reserve vs. a preserve, and would have to look into it. PIO noted the environmental considerations on this project will be significant and will be examined thoroughly. She asked how could she research this herself? PIO suggested getting on the park service website, or site for actual parks and seeing what activities allowed and if they get into an detail on development, etc. she said she'd try that PIO said I'd check with the design managers on that also and get back to her.
11/10/2004	11:34 AM	Margaret Moss left a message that she lives on S.R. 46, and heard today the alignment of the western beltway is closer to being firmed up, I live close to the SC side, could you give me some information?
Contact		Ruth Myers
Date	Time	Regarding
8/26/2004	4:14 PM	PIO called Ruth, who said she lives off Plymouth Sorrento Road. "It looks like you guys are going to go around Round Lake. She said 2487 Appy Lane is he physical address. She said her mailing address is PO Box 1211, Plymouth FL . She said her property is a little west of Ponkan Road, more towards Kelly Park Road. She noted "MI Homes broke through a bunch of the wooded area." PIO relayed that PD&E to start in a couple months, and will take better part of a year. PIO noted we have idea of general corridor but in terms of actual alignment that will affect specific parcels, we don't have that and won't for some time. PIO gave my contact info and told her to feel free to contact me from time to time for an update. She said we'd "better do something soon because they're building out here like crazy." She thanked me for calling her back.
8/4/2004	2:00 PM	Bryan Douglas said Ruth Myers had questions about the alignment from Round Lake Road to SR 46, and from 46 to I-4 re: Wekiva Parkway. Bryan thinks he told her to call FDOT at
Contact		John & Marcia Nessler
Date	Time	Regarding
11/23/2004	1:46 PM	Marcia Nessler called back. "I understand they approved the Wekiva Parkway yesterday." PIO noted no, the OOCEA board approved the preliminary alignment for the MBX. Noted again we haven't started the PD&E for Wekiva Parkway. She said I thought you said they were going to finish it by end of the year? PIO noted I was referring to the PD&E for the MBX; again noted Wekiva Parkway PD&E to start in January. She asked if MBX was going to go north to 46? PIO said no, that's the Wekiva Parkway; gave her route for MBX. She

said she heard on TV that they approved something yesterday. PIO asked if she got the packet I sent her on the Wekiva Basin Study Committee? She said she did get the info I sent her and thank you.

11/9/2004	10:20 AM	PIO sent letter to Marcia Nessler with governor's executive order and Wekiva committee report excerpts (24 pages).
11/9/2004	9:30 AM	PIO called Marcia to discuss Wekiva Parkway background info from the Basin Committee Report. PIO noted it contained a lot of the guidelines and other info on how decisions were made that she was looking for. PIO confirmed she has a computer but doesn't know how to use it, so can't access info on the internet. She said that sounds like what I was looking for. PIO said I'd send her about 20 pages of excerpts since the entire report was so long; would get it in the mail to her this week. She said thanks a lot.
11/2/2004	10:35 AM	Marcia Nessler said thanks for sending a map, under the purple part what are the roads going to be affected? PIO noted CR 437 goes through there, as does Kelly Park road and others, but until PDE won't know how they'll be affected. She said previously it was discussed the road would go through Round Lake, but that didn't appear to be the case from the conceptual. PIO noted again that until PDE, we won't know where exactly it's going; this swath is just a general guestimate. She continued as below.
10/11/2004	10:26 AM	PIO prepared letter to send conceptualls to the Nesslerers.
10/11/2004	10:07 AM	Bryan left a MSG that he spoke to the Nesslerers 407-464-0722, and they had questions about 414 and 429. He said he "tried to give her answers but he strongly recommended she give you a call because you had most current info. If you don't hear from her you might want to follow up with her."
10/11/2004	10:05 AM	John & Marcia Nessler called "about the part going through Apopka." Their actual property is at 6501 Plymouth Sorrento Road, near Bock Road, They don't have e-mail. They have a computer but it's broken. She asked if there "would be public meetings, will I be notified? I don't really read the paper." She asked if could mail the western beltway info. PIO said I could, and it's also available on the website. She said she talked to Bryan and he said the MBE is going to 441 near 437. She asked if the Western Beltway would go up CR 437 from there? "437 is pretty popular road. It has a lot of traffic on it. It seems like they'd put a beltway somewhere else and leave that." PIO noted there were a host of variables that still had to be decided, so couldn't give her an answer until we get into the PD&E Study. She had multiple questions, including will it definitely go into Lake County? Can they condemn property? When will they know where it's going? PIO reiterated PD&E schedule, noted many different concepts being looked at for different segments of the road, various municipalities will play a role in decisions. She asked, "if the people of Lake County say they don't want it, what happens then?" PIO noted depends on what their transportation system options are, have to make sure there's some link to get to I-4, especially if we wound up doing something along S.R. 46. John asked for copy of the road that's already under construction. She said the one where we know where it's going. PIO said MBE scheduled to begin first segments construction in 2006, and will mail copies of western beltway and MBE conceptualls.

Contact		Donald Parks
Date	Time	Regarding
11/30/2004	2:04 PM	PIO emailed Wekiva Parkway funding plan to Sheri MacDonald and asked her who the relevant clients were so I could be sure they were in the project database to receive future info.
Contact		Francis Peterson
10/7/2004	3:30 PM	PIO returned call to Francis Peterson, left detailed MSG noting PD&E not started so no alignment yet to be able to determine if her potential neighborhood will be affected. Requested she call back with her contact info so I could send her updates as available.
10/7/2004	11:10 AM	Francis Peterson said she was interested in buying house in area of the expressway, Wekiva Beltway that's coming through into Lake County-Sorrento area, need info on how close it's coming to the neighborhood. Call me.
Contact		George and Lisa Quinones
10/4/2004	9:10 AM	PIO received e-mail response from Lisa Quinones: "Thank you so much for your prompt response and even on a SUNDAY. I will be in touch at a later time. Have a wonderful day Lisa Quinones"
10/3/2004	5:25 PM	PIO responded to Lisa Quinones: "Hello Lisa, I checked the Western Beltway Completion conceptual, and for now Ponkan and Round Lake roads currently are significantly west of the general proposed Wekiva Parkway corridor. However, since the Project Development and Environmental PD&E) Study hasn't been done - not even started - there is no actual proposed alignment at this time, only a very general swath. The PD&E study is expected to start in late November or so. It should be completed in a year or so, and then we will have an actual proposed alignment to better answer your question. If you would like a copy of the current conceptual in a larger printout, send me your full address. Or you're welcome to touch base with me from time to time to check on the progress of the PD&E Study."
10/3/2004	7:31 AM	PIO received e-mail from Lisa Quinones: "Ms Brooks - I received your Expressway Navigator newsletter over the weekend and went on your website attempting to see if any of the projects (414) or the 429 expansion were going to be impacting where I live. I reside at 4823 W Ponkan Road (near Ponkan and Round Lake Road intersection). But, I was not able to read any of the maps legibly. Is there any information you can provide to me or any other place that I can access the proposed paths and be able to read them? Thank you for your help. " Lisa Quinones --541 p.m.
Contact		Christy Robinson
Date	Time	Regarding
12/15/2004	2:58 PM	PIO called Christy Robinson to make sure she got info needed and to get info for database for her and friend. Got her address 43 E. Simon Ave., Apopka, FL 32712. doesn't know her friend's mailing address; they own S&L Nursery. We were supposed to know at first of the year, and then it was November. PIO gave updated PD&E schedule, noted maybe some alternative alignments for review at public meeting late spring-summer. PIO asked if I could get her any other info at this point; she said she was on long distance on the other line but thanks for calling.

12/15/2004 10:46 AM Gary Skaff/PBSJ emailed PIO, Mark and Dave/CH2M: "I just received a call from the following person: Christy Robinson (407) 880-5970. She is interested in the Wekiva Parkway, in part for herself because she lives off of Rock Springs Road, but mostly for a friend. Apparently the friend owns S & L Nursery located on Ponkan Road near Lake Gem. Could you add both to the mailing list? I told them that we wouldn't be holding any meetings until probably early summer."

Contact		Edwin Santos
Date	Time	Regarding
12/3/2004	8:01 AM	PIO responded to Edwin Santos: "Hello Ed, Those are all questions that will be decided in the PD&E study. There will more than likely be tolls on at least part of, if not all, of the Wekiva Parkway. There is still much discussion about what parts of S.R. 46 will remain."
12/2/2004	9:30 PM	Edwin Santos responded to PIO: "Mary; Thank you for the quick response. I would like to receive the hard copy 11x7 you mentioned in your email. The portion I'm interested in is the one in the vicinity of Wekiva Park, which is located about 4.5 miles west of I-4 off state road 46. My mailing address is 6022 Persinger House Ct., Manassas, VA, 20112 Thank you!!Although you may not know the impact, do you happen to know what type of road this will be? Will it be a toll road? How many lanes? Would they still keep 46 open? Please advise."
12/2/2004	3:00 PM	PIO responded to Edwin Santos that we don't have an alignment yet and can't answer his question about how the Wekiva Parkway will affect his development. PIO noted PD&E to start after beginning of the year, and will take up to two years. PIO said he can view the Wekiva Parkway conceptual on the website, or if he wants to supply his mailing address I can send him an 11x17 hard copy.
12/2/2004	2:48 PM	PIO received forwarded email from Kathy/QCA 408work@oocea.com: "Mary:The message below was forwarded to us from Allen Henning. Could you help this man with his question about a home near the Wekiva Parkway? Thanks-- KPAllen Henning/Lane Smith/Brian Hutchings:I obtained your email addresses from the Expressway Authority web page. I'm a military officer assigned to the Washington D.C. area. I'm currently looking at a building a house at Wekiva Park, which is about 4.5 miles west of I-4 on 46. I'm supposed to fly to Orlando this Friday to put some money down to reserve the lot. I found out today there is an Expressway Expansion project that is supposed to cover a good portion of 46. Considering the location of the property I'm talking about, what will be the impact of this expansion on the Wekiva community. Currently, the entrance to the community is right off 46. Please provide me as much information as you can. Your help will be greatly appreciated. Regards. Edwin Santos (202) 646-1324edwinsantos1@comcast.net"

Contact		Debbie Serwe
Date	Time	Regarding
12/10/2004	9:15 AM	PIO received email response from Debbie Serwe: "Hello Mary, Thank you. I thought maybe you had lost or misspelled my address, so why not send an e-mail. Thanks, your time and effort are appreciated."
12/10/2004	8:28 AM	PIO sent Debbie Serwe's conceptual letter.

12/10/2004	8:17 AM	PIO responded to Debbie Serwe: "Hello Debbie, I recall we spoke on Tuesday, Dec. 7. I had begun preparing your material but was out of one of the conceptals. I now have a fresh supply of both and will get out to you today."
12/10/2004	8:06 AM	PIO received email from Debbie Serwe: "Hello, Could you possibly mail to me maps for the "Western Beltway". I would like section 1 SR 414 Maitland Blvd. extension and section 2 SR 429 Wekiva Parkway. Please mail to: Debbie Serwel214 Independence RdApopka, FL 32703 Thanks for your help,"
12/7/2004	8:10 AM	Debbie Serwe said she is looking to buy in the Ponkan Pines Road area, just off Plymouth Sorrento, a little north of Ponkan. Looking to buy within the next month, and wanted to know if 429 would affect that area? PIO noted Wekiva Parkway PD&E to start next month and will take 1-2 years, maybe spring or 6 months and we'd have some alternative alignments for the public to comment on.Email deserwel@aol.comShe said she did look at the conceptual on website, but couldn't really make it out. "It was pretty blurry and it didn't really show which roads..." PIO noted status of MBX, but don't have alignment yet for Wekiva Parkway. PIO to send copies of both conceptals.
Contact 10/12/2004	4:36 PM	Mike R. Smith PIO received e-mail from Gary Skaff/PBSJ: "Please put the following person on our mailing list for the Wekiva Parkway.Mike R. Smith 3321 Kelly Park Road, Apopka, FL 32712, 407) 886-0244Mr. Smith lives about 1/4 to 1/2 mile west of Plymouth Sorrento Road. He recently received a letter from Gray Robinson inquiring about purchasing his land, prompting his concern. He inquired if the Expressway Authority was interested in acquiring the land now. I told him that he was in the corridor but that we were not currently purchasing any land for the road. I told him that we about to initiate a final alignment study and that we would be sending out a newsletter and notifying homeowners of a Public Meeting in early Spring 2005. He seemed satisfied."
Contact Date 11/1/2004	Time 3:30 PM	Wade Vose Regarding PIO called Mr. Vose back to explain about the Wekiva Parkway timeline. He said that's fine. I asked if he'd like to be in the database. He said yes and gave me his contact info. I also directed him to the web page for updates.
10/26/2004	12:45 PM	Wade Vose (527 Wekiva Commons Circle; Apopka, FL 32712 407-645-3735) called. He said he was looking to buy a piece of property at 2423 Boch Road on which he wanted to build a million dollar house. Was this property affected by MBX? I told him I would check and call him back.
Contact Date 9/15/2004	Time 10:41 AM	Karl Walters Regarding PIO received partial fax from Karl Walters of map; it appears to be only proposed alignment under FDOT. PIO left MSG for Karl to retry the fax if he liked, but noted this appeared to be the old proposed alignment from when the project was still under FDOT.
9/15/2004	10:05 AM	PIO returned Karl Walters call. He noted he's 4-5 miles north of downtown Apopka. "There

are hundreds of \$300,000 homes one on top of another. I can't imagine you'd be running a road right through here, though stranger things have happened." He's south of Kelly Park Road by about a mile. PIO asked for nearest cross streets. He said the subdivision is Rock Ridge; the main subdivision road is Rock Springs Boulevard. PIO noted it appears he's well east of general corridor for Wekiva Parkway, which is one of the segments of the Western Beltway Completion project. PIO got his mailing and e-mail address to send further info as available, noted PD&E schedule. He added he's "dead in the middle of Rock Springs Road and Plymouth Sorrento Road, maybe a 1.5 miles west of Rock Springs Road " PIO emphasized we don't have an alignment yet; a month away from starting PD&E, but general corridor area at this point appears to be at least 2-3 miles to the west of Rock Springs Road. He said he'd fax the map he was looking at over just to be sure, and asked that I get back to him if I see anything strange or different.

9/15/2004	9:45 AM	Karl Walters left MSG that he's in Maryland looking at the Western Expressway 429 map published in 2004 that shows expressway running right through Rock Springs Ridge, north of Apopka. Park Avenue turns into Rock Springs Road, it's on the left. He noted Rock springs Road is bounded by conservation area. "I'm looking at map that shows this thing running almost right to where my home is. It's the 429 Western Expressway. it is running past my house according to map I'm looking at now. Don't know if you're the right person, but call me."
9/14/2004	2:09 PM	PIO returned call to Carl Walters/Mortgage, left MSG to call me back, noted didn't think Maitland Boulevard Extension was affecting Rock Spring Ridge. PIO noted no alignment yet - haven't started PD&E - on Wekiva Parkway, so won't be able to give him anything firm on that yet. Left MSG contact info.
9/14/2004	11:31 AM	Karl Walters left MSG, "I'm purchasing property in the Apopka area. I've contracted with builder in Rock Springs Ridge. I'm looking at a map showing the proposed Western Expressway running right through the middle of Rock Springs Ridge. I'm kind of doubting that's the case, but the map is dated 2004. The builder is telling me it's not going through there but I'd like to hear it from somebody that actually has some input on this.... I'm interested in 429 bypass or extension going through the Rock Springs Ridge community area of Apopka."

Contact		Heather Williams	Webb, Wells & Williams
Date	Time	Regarding	
10/5/2004	11:25 AM	Heather called right back, said they want to put in Fla. public records request for the Wekiva Parkway, who would she send that to? PIO said the info we have so far on the Wekiva Parkway is available on the website. She asked how to access that? PIO walked her through the website and pointed out info. She said that was helpful, they were looking for something in writing. PIO said if she wants to send me an e-mail recapping all her questions, I can respond so they have it in writing. She said she would do that, she has my email address.	
10/5/2004	11:18 AM	Heather/Webb Wells called back, said she had a copy of a letter for one of their clients referencing a parcel number for the Wekiva Parkway project. PIO asked for confirmation the letter was from OOCEA? She said no, from Gray Harris. PIO noted that is not the Authority's law firm; they may be just referencing the parcel number from the property appraiser's website. PIO reiterated we don't have an alignment so couldn't have assigned	

any parcel numbers. She said she just wanted to double check.

Contact		John Williams	Charles Wayne Group
Date	Time	Regarding	
11/22/2004	8:40 AM	Gary Skaff/PBSJ emailed re: Wekiva Parkway, copied Dave Lewis and Mark Callahan:	
		"Please add this person to the mailing list: John Williams, Charles Wayne Group, 2300	
		Maitland Center Parkway, Suite 306, Maitland, FL 32751"	

Contact		Stephen Wilson	
Date	Time	Regarding	
9/23/2004	12:32 PM	Stephen Wilson said he's looking to purchase a home near 46 and I-4. "Someone told me I'd better watch out because the beltway is going through there. Is that true?" PIO explained Wekiva Parkway and completing western beltway planned in that area, but don't have an alignment yet so can't tell him if the property he was looking at would be affected	
		"I went to your website, and I saw the picture with this wide band, is that definitely where it's going to be?" PIO said no, that's just a general area of what they're thinking at this time; noted we don't know for sure where it will be until after PD&E study and design. PIO noted hope to start PD&E before the end of this year. He asked how long before the project would be done? "Are we talking 10 years?" PIO noted hard to say, PD&E could take 1.5 years, ROW and design could be another couple years each depending. He said he's also looking at a property in Sorrento, and "this project would be great for those people." PIO noted completion of the beltway will benefit thousands of people throughout the area. PIO got his contact info for future info. He added he's looking at property in Lake Forest. he's in Lake Mary now on Rhinehart Road. "This project will be great for where I live now. I was just wondering if beltway would hurt Lake Forest?" "Say I spend money for a home, and they step on the community, do they pay the market value? I work for Progress Energy and when we take people's property we pay market value plus a little more." PIO confirmed OCEA would negotiate fair market value settlement; PIO noted we're not looking to take people's homes and leave them destitute. He was very thankful for the info. PIO said we'd send out updates on the Wekiva projects once PD&E started, and he's welcome to check in with me also from time to time. He said that's very helpful, thanks.	

Contact		Maxwell & Mindy Wright	
Date	Time	Regarding	
9/21/2004	3:40 PM	PIO responded to Maxwell confirming no work on PDE had been done yet for Wekiva Parkway, and PD&E will determine preliminary proposed alignment.	
9/21/2004	3:30 PM	PIO received e-mail response from Maxwell Wright: "Thanks for your response Mary. I was mainly curious because I had recently seen a large orange arrow painted on Plymouth-Sorrento Rd. in the area I thought the parkway would be crossing that particular road. It was pointing east and it was located just south of the Orange/Lake county line which is where we had hoped it would cross. Looking at the aerial maps Online this route looks to be a possible option and I wanted to see if anyone had started looking at it already. No work has been performed in the area to date to your knowledge?"	
9/7/2004	3:42 PM	PIO responded to Maxwell Wright/Progress Energy introducing myself and noting we're about a month away from the PD&E start for the Wekiva Parkway. PIO gave him my	

9/7/2004 3:35 PM contact info to check in from time to time on the progress of the PD&E.  
PIO received stored e-mail forwarded by Dawn/OOCEA from Maxwell D. Wright Senior  
DSM Program Specialist, Progress Energy: "Mr Pustelnyk, I wanted to find out if the  
Expressway's focus is all on the Apopka By-Pass currently or will there be any field studies  
for the Wekiva Parkway resuming in the coming months?"

END OF REPORT JAN 1 - DEC 31, 2004

11/9/2005	11:24 AM	Public Meeting Comment Form 11/09/05:Shelly DeanClassic Homes258 Southhall Lane, Suite 300Maitland, FL 32751Phone: (407) 875-3100Fax: (407) 875-2200RE: 2404 Plymouth Sorrento RoadCurrently the location of the proposed Beltway extension will be going over three (3) homes in our Plymouth Harbor Subdivision (parcel id# 30-20-28-0484-00-040 and 25-20-27-0000-021 see attached). We would like to propose an alternative to this preliminary location. According to the web location, the south-west corner of our development will be impacted. Please see our attached site plan sowing the location of three homes in the area where the Beltway will be located. Since this is such a slight impact we suggest that the alignment be moved west approximately 100 feet. This

parcel (id# 25-20-27-0000-00-007) to the west is vacant, the beltway will already impact the majority of this parcel and this site would allow for the entire Beltway usage. We would like to suggest that this area be considered for an alternative moving slightly straighter and to the west therefore, this would eliminate the impact on our site. As you can see this would also eliminate also eliminate the Expressway Authority's need to purchase over 1 million dollars of homes that will be built on those sites. We believe this would be a very minor adjustment from the proposed alignment, but would be in the best interest of the Expressway Authority and our subdivision. Classic Homes understands this is a daunting task to review and locate the new extension, therefore impacting the least amount of home sites would be in the best interest of the Expressway Authority and also the for the public. Should you have any questions about this comment form please contact Randy Lazarus at (407) 875-3100 ext. 3# or Shelly at ext. 0#. We appreciate your consideration for alternatives for this area. Sincerely, Shelly Dean

7/20/2005	3:00 PM	Discussion during progress meeting by Dave/CH2M Hill of high risk contamination sites. He said when looking at landfills west of p-s and couple Sorrento, have report and graphics. South of 46, GEC said most of area was outside project corridor. West of p-s two sites were landfills, were high risk because not enough info. Research, art of it is classic homes doing due diligence, is between the two sites. One to south was clay pit and shut down; he was putting wood chippings in there and got tired of waiting for permit. The one to the north had construction debris and they went to wood chipping as well. GEC determined them to be high risk. Both properties owned by county now; they were county permitted landfills. There's no higher use for them. Guy at Classic Homes is telling me in their due diligence there's less and less concern about the contaminated sites. Parcels they're looking at are between the two. Mark said our alignment should be right outside of Zellwood station property line. Dave said let's not write these properties off. The property between them has no easement for access; he's landlocked, couldn't develop the parcels.

Contact Notes		Marilyn Abbey
Date	Time	Regarding
11/10/2005	12:09 PM	Public Meeting Comment Form 11/10/05:Marilyn Abbey1112 West Main StreetLeesburg, FL 34748The maps on display do not seem to conform to the spirit and intent of the Wekiva Legislation. In particular there appears to be a proposal / tendency to put the road in existing conservation lands, specifically Rock Springs Run Reserve. A better alignment would be a more westernly course utilizing the legislative targeted land called

"Neighborhood Lakes"Also, expected to see a more westerly position for the SR 46 interchange. For optimal traffic flow (for existing residents and not for future developer profit) the interchange should be as close to 441 as possible and definitely not in the Rock Springs Run State Park Preserve.In so far as the purpose of this road id to realign SR46 and consolidate traffic through a sensitive area, it will be necessary to elevate the road where it crosses conservation lands.Finally, although not indicated on your maps, it is my understanding that there have been complications in the course of acquiring the necessary lands. It is imperative that all the lands penpointed in the State Legislation be acquired by what ever means necessary for the interests of the tax payers, not would be developers! And that these lands are utilized in accordance with the intent of the legislation.

5/23/2005 10:07 AM Florence Adams 407-295-9061 got brochure about expressway through the mail, 414 update, wanted to know where it was going to connect to 46? PIO noted route for 414, and what would affect S.R. 46 was actually Wekiva Parkway, but we don't have alignment for that yet, just doing study, etc.She asked what the 451 was? PIO noted that has to do with new 414 and 429 interchange and what they're calling old portion of 429 once new road is done. She said We're planning to build home on 46 toward Mt. Dora, about 3 miles from Mt. Dora in Sorrento Off Lawrence St., don't know the address. Just got an address there because just getting ready to build there. PIO asked if she'd seen the study area map; gave website address, and said if can't read that let me know and I'd send her a larger copy.How many years before this goes through? PIO noted study should result in alignment by early 2007, construction not before 2009. she said the property address is 31412 Lawrence St. Sorrento, FL PIO noted good portion of Sorrento is in study area, but not every property within the study area, wide corridor, will be affected by the new road. She said they don't have a mailbox up there, so please send the map and any info to us in Orange County at 7526 Clarcona Ocoee Road, Orlando 32818. PIO to make sure she gets newsletter and study area map.--1007 a.m.

5/26/2005	1:35 PM	questions and issues.
5/26/2005	1:24 PM	PIO returned Jack's call, let him know I'd spoken to Irmgard Ahmanson about her questions and issues.
5/26/2005	1:24 PM	Jack Freeman/Kittleson look forward to working with you on Wekiva Parkway,. Got call this morning form lady building house on 5 acres on Plymouth Sorrento road. I was out. She wants somebody to call them.She actually asked for me, don't know why. Think it's more appropriate that you call her or somebody at CH2M Hill calls her. Last name Ahmanson, don't have her first name. Phone number 407-484-7074. So I'll pass this off to you and let you handle it. She called at 830 this morning. If you have any questions I'll be in and out this afternoon but in tomorrow.407-540-0555
5/26/2005	8:31 AM	Irmgard Ahmanson 407-578-7957 said I received a copy of own property on Plymouth Sorrento road off 441, ready to start building a home and I'm concerned, they sent a aerial map but can't Got the March 30 letter. Haven't gotten anything else. She asked to be on the mailing list. Send info to her at 1349 Saddleridge Dr., Orlando 32835. The property is on Plymouth Sorrento between 441 and Ponkan and it's a 5-acre area. I just got the letter yesterday. PIO expressed concern, noted the letters went out April 14. She said what about all the homes they're building on Plymouth Sorrento Road. These are expensive homes up here - what's going to happen to them? PIO noted if they fall on the approved alignment the properties will be purchased. PIO noted we're facing rapid development and new developments being permitted throughout the corridor. That's one reason this project is needed, to support all of that growth. She said I'm building a substantial home, \$800k, but I'm going to put everything on hold at this point. PIO noted not every property within the study area will be affected; gave project timeline. She said she's glad she called, wasn't aware of this until getting the letter. PIO noted project newsletters went out this week and let me know if you don't receive it in the next week. She thanked me for the info.--839 a.m.

3/3/2005	12:57 PM	PIO emailed Wekiva Parkway study concept to Joe Alt as requested. "Hello Joe,I received your voicemail and am forwarding the conceptual of the Wekiva Parkway & S.R. 46 Bypass study area as requested. Please be advised that there is no alignment at this time for these projects. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OOCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. The study area conceptual also is available on the Expressway Authority website www.oocsa.com, along with other project info. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. Please provide your mailing address so that I can add you to the project database to receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."
3/3/2005	10:01 AM	Joe Alt left MSG " I was just looking for map of proposed Wekiva Parkway, please send to my email address at joealt@cfl.rr.com Thank you."

Contact Date	Time	Fernando Alvarado Regarding
11/23/2005	3:55 PM	PIO responded to Fernando Alvarado: "Hello Fernando,The Expressway Authority website is at www.expresswayauthority.com. On the home page, click on the text link for the "western Connectors" which will take you to the Wekiva Parkway page. On the project page, scroll down past the meeting dates, etc., and you'll see the text link for the

workshop materials.Please let me know if you have trouble finding or downloading the files. Happy Thanksgiving!"

11/22/2005 6:54 PM Fernando Alvarado emailed: Dear Mrs Brooks:I cannot find the maps, that during the last Community presentation in Sanford where said to be available in the website.Please could you email me the address of the website? These maps are very important to comment on the proposed alternatives.Thank you,Fernando Alvarado,Seminole Co. resident

11/14/2005 3:50 PM Public Meeting Comment Form 11/14/05Fernando Alvarado1310 MarylandSanford, FL 32771-The 17-92 is the longest, destroys many properties, the Port of Sanford, it does not connect to the beltway (417), it needs a 1,600 foot long bridge.-The 417 connector is the shortest. Less traumatic route to the job.-Where is the 100 year flood plane? Underneath the 17-92 connector.-Tolls should be considered also in Seminole County to down the traffic of vehicles and trucks on the parkway Lit helps with funding.-Please send me a copy of sheet No. 5c Thank you.

Contact Frank & Anita Amberogio  
Date 11/10/2005 Time 11:58 AM Regarding  
Public Meeting Comment Form 11/10/05:Frank Amberogio31654 Wekiva River RoadSorrento, FL 32776-9233December 7, 2005Comments: It is my understanding that the current plan for the parkway calls for elimination of the bridge which crosses the Wekiva River at the Lake / Seminole County line. I live on the Wekiva River Road, and I believe this would be a huge mistake. Currently, this is the only access I have to travel the ½ mile to Seminole County. 98% of my trips are in that direction, west to east. More that once, this year alone, I have been unable to return to my home because of an accident or other problem along SR 46. Traffic has been backed for miles (and hours) because there is simply no other way to get from one side of the Wekiva River to the other.A second bridge the Parkway bridge) would allow for an alternate route in case of emergencies. If there were a problem on the Parkway, traffic could be directed to SR 46 and cross the river where motorists could then return to the Parkway, Thus bypassing the affected area.The same would be true for motorists on SR46. In the event of a problem on that road, they would save motorists much time, and save an enormous amount of gas.I was also led to believe that to get to the new bridge I would have to travel west on SR 46 for some distance, get on the Parkway to cross the river, and then return to SR 46. This would add several miles to virtually every trip make. An enormous waste of time and gas.I know that there are environmental concerns to be addressed with his portion of the parkway, but I feel the benefits f a second bridge far out weigh those concerns. I certainly hope you will give more thought to this area before a final decision is made.Sincerely,Frank Ambrogio

Contact		Brenda and Scott Anderson
Date	Time	Regarding
11/14/2005	3:48 PM	Public Meeting Comment Form 11/14/05:Brenda and Scott Anderson856 Bright Meadow DriveLake Mary, FLAlthough we presently live in Lake Mary, we are in the process of building in the Wekiva Pines Country Estates. Just over the Seminole/Lake County Line, in Lake County. We would like to express our support for the current alignment of the Parkway thru that area, and especially support a "local access" interchange for the 3 existing developments / housing in that area. We are concerned that other opinions may jeopardize this local access interchange, which would cause us to travel a distance west in order to access the Parkway to reach Seminole County. We are also concerned about the projected increase in traffic and the corresponding noise. However, if traffic is expected to increase (which no doubt it will) then we would rather see it controlled via an elevated parkway, then simply keep adding lanes to 46.Our development also has drainage problems from 46 (culverts from the old farmland south of 46). We look forward to the public input in the engineering phase to further raise the concerns hopefully see them addressed.

Date	Time	Regarding
11/10/2005	11:00 AM	Attended Public Meeting, 11/10/05
Contact		Maria L. Andino
11/14/2005	3:25 PM	Comment Form:Maria L. Andino7400 Silverlace Lane #422Orlando, FL 32818A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be

underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	4:14 PM	John and Joanne Aprea5031 Shoreline CirSanford, FL 32771Please note we have already have to much traffic on S.R. 46. Being on S.R. 46 is like being on 436, which we all know how long it takes to travel on this road. Don't make the S.R. 46 your easy way out for routing 417. Lets keep Wekiva Parkway to the existing S.R. 417 is more logical and keep E/W traffic off I-4.

Contact		Alejandro Arana
Date	Time	Regarding
11/14/2005	12:16 PM	<p>Comment Form: Alejandro Arana 5112 Londonderry Blvd Orlando, FL 32808A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons: 1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road. 2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame. 3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties. 4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

11/14/2005	3:50 PM	<p>Public Meeting Comment Card 11/14/05: Raymond and Judy Arellano 6834 Hidden Glade Place Sanford, FL 32771 WE moved to Seminole County for the beauty. Building our home near the forest was a dream come true. Our home would be defiantly impacted by the expressway and we would prefer to be bought out than to lose the value of our home and this would most defiantly lower the value. Please do not make 46 a six or 12 lane highway in our backyard. I am sure you would not want this in your backyard. We would prefer an elevated version to leave 46 as an old country road. Thank you and we look forward to hearing the outcome of the project.</p>

Date	Time	Regarding
11/16/2005	12:57 PM	PIO returned call to Allen Arthur 407-896-6711, are the maps still around?I got to Tampa all the time to see my daughter, and I was watching them build the cross town expressway ... I thinks that's way to go through the conservation area. It makes it really scenic, though of course it's going to be expensive. I used to be county commissioner for that district. Was on SCEA for 7 years. PIO noted all the public meeting materials are on the website, gave him address and text links. PIO asked if he wanted to be on the mailing list? He said yes;301 North Ferncreek Avenue, Orlando, 32803 email aea_architect@compuserve.com. He asked who was doing the study; PIO noted CH2M Hill He asked if the boards were at the EA? PIO noted CH2M Hlll had them PIO noted if he couldn't get info off the website, I could send him an 11x17 of the overall alignment alternatives. He said I don't care about alignments, just what happens as it goes through the protected area. PIO noted the overall alignments alternatives show the potential

routes through that area. PIO said if he has any trouble getting info off the website to let me know. He said very good.

11/14/2005 4:58 PM Kristy passed on MSG from Allen Arthur, couldn't make it to the presentation tonight and wanted to talk to someone about getting some maps and talking to someone. Please call him at 407-896-6711 if you have any questions give me a call back.

Contact Ted Arthur  
Date Time Regarding  
3/30/2005 5:04 PM Dave/CH2M responded to PIO contact info request: "With regard to Ted Arthur, we have not had direct contact with him; he previously called Noranne Downs at FDOT about wanting to sell his property along SR 46 west of the Wekiva River. The only info we have on him is from the Lake County Property Appraiser's website (which is a c/o mailing address for a Jerry Belitz, Trustee): Ted Arthur, 1935 S. Conway Rd., #K-5, Orlando, FL 32812."

3/28/2005 2:42 PM PIO checked SC property appraiser site for info on Ted Arthur (also need phone); and Larry Bains (also need phone), but nothing came up.

2/19/2005 1:25 PM PIO received copy of 2-18 1134 a.m. email from Brian M./CH2M to Dave re: Ted Arthur's contact info: "Dave, do you have this info?"

2/16/2005 2:30 PM Discussion during PD&E meeting: Anne said Noranne asked about property owner Ted Arthur is calling her, saying his property is waterfront; CH2M has provided info that says it isn't. Mark said they've given Noranne all that info. His name isn't on some of the properties. She said he's saying 800' on waterfront, and 1,000' on 46. Mark said Noranne has all the info in her office to answer his questions. Dave said his name is not on the property appraiser's list. He has a brother in stuff; it's all under diff partnership. We laid it out and gave her parcel numbers, etc. Mark noted he wants advance acquisition, but we're not in position to say what the impacts are and how much of his land would be impacted. Dave going to give the info to Anne in next couple days. Anne said he's making it look like we don't have the right location. Dave said they caveated the location, that his name was not on the property appraiser's list. Mark said he likely will be impacted by the extent and nature of the impact is not defined at this time.

Contact		John Askew
Date	Time	Regarding
2/7/2005	4:15 PM	PIO returned call to John Askew, relayed PD&E schedule and public meeting expected on alternative alignments in November.He said, "Based on any level of input from the public, what is the likelihood of current footprint? I'm at 46 and 441 in Lake County. Judging by the PDF file on website, it's pretty fairly clear to me that S.R. 46 is going to be a player in this thing." PIO noted with SR 46 Bypass and study corridor centering on SR 46, that is indeed likely. "What is the likelihood that this thing will ever get off the ground?" PIO noted legislative and appointed committee direction recommending Wekiva Parkway. PIO noted it's not fully funded, so there could be some delays there, as is typical, but otherwise this is something we have been directed to do.He said, " I'm a homeowner there, and obviously a little nervous. This impacts my ability to be able to sell my property " PIO noted that I'd discussed with many area realtors and some found it helpful to know phasing schedule. We're not expecting to begin construction until 2010-2013. he said I know very few people who only buy a house for 5 years. PIO noted with increasing property values, that's not necessarily the case. PIO noted I'd be happy to forward similar info that I'd sent to some realtors if he thought that would help? He said he would like to receive that info, and was thankful for the call back.

2/7/2005	4:00 PM	John Askew/Sunrise Art?? left MSG info about the project located in footprint of the ... on S.R. 46, want idea of where you all are as regards to making final decision about the path.

Date	Time	Regarding
11/10/2005	2:26 PM	Public Meeting Comment Form 11/10/05:Beverly AuthorPO Box 1302Sorrento, FL 32776The access of local traffic is mandatory for the neighborhoods. Closing both 46 and 46A is a major restriction on the community in that area. 46 would be better served if closed at Wekiva River and allowed to serve local traffic needs back to Mount Dora w/ interchanges to Wekiva Parkway to serve non local needs. The Wekiva Parkway would better suit the majorities needs, if kept slightly south of the 46 roadway and behind existing housing to limit impact to private dwelling access.

11/9/2005	5:30 PM	Comment Form 11/9/05: I own an wholesale Foliage Nursery in Oviedo. I have grown plants for Penang Nursery, Inc. for over 20 years. Approximately 90% of the plants I grow are sold through Penang Nursery, Inc. The relationship Ton Lo and I have developed through the years is one that is mutually profitable for each of us. Penang Nursery, Inc. has already relocated once due to the population growth in the Apopka area. The location Penang Nursery Inc. is currently at is one that is less populated and easier to access than before. I concerned that if the expressway forces Penang Nursery Inc. to relocate again, Mr. Lo will not be willing to go through the time consuming and costly process. If he decides not to relocate and in turn closes the business it would be detrimental to my business. As I have stated, Penang Nursery, Inc. brokers 90% of my plants. I am a small Nursery and do not broker my plants. The relationship I have developed with Penang Nursery, Inc. and Mr. Ton Lo through the years us is in dire jeopardy if the expressway chooses this route. I urge you to reconsider and explore other routes which may be less disruptive for the people involved with this business. Thank you for your time.

3/30/2005	10:39 AM	Larry Bains responded to PIO email: "Hi Mary,Thanks for the email. My address is 4601 South Hampton Drive Orlando, FL 32812. I am very interested on the progress of the project and anything you send me.Larry"
3/30/2005	9:27 AM	PIO emailed Larry Bains to get address for newsletter: "Hello Larry,You may recall that we corresponded in mid-January regarding your questions about the Wekiva Parkway and S.R 46 Bypass projects. We are currently getting ready to send out the project newsletters, and I need your address to add you to the mailing list.We officially kicked off the Project Development and Environment (PD&E) Study, which is being done jointly by the FDOT and OOCEA, on Jan. 19. We are in the data gathering and analysis stage. In fact, you may soon begin to see surveyors, geotechs and other personnel working in the field throughout the study area. We hope to have the data analyzed and some initial alternative alignments to present to the public for review and input at public involvement meetings in November. Public meetings will be held in each of the affected counties (Orange, Lake and Seminole). Subsequent public meetings are tentatively scheduled for summer 2006 and late 2006, with the PD&E Study hopefully completed in early 2007. At that time we will have a preliminary preferred alignment and will be better able to answer property owners' and homebuyers' questions.With the subsequent phases (final design, Right of Way Acquisition permitting, etc.) needed to develop this project, it would probably be 2009 before construction would begin. We hope to get the newsletters out in April, and I look forward to receiving your address for the mailing. If you're no longer interested in project info, let me know so I can remove you from the list. Have a good day."
3/30/2005	9:15 AM	PIO checked SC property appraiser site for info on Ted Arthur (also need phone); and Larry Bains (also need phone), but nothing came up.--242 p.m.
1/17/2005	9:25 AM	PIO responded to Larry Bains: "Good morning Larry,The State Road 429 Wekiva Parkway and S.R. 46 Bypass projects are only in the very early study stages; there is no alignment currently for these projects, only the wide study corridor that you saw on the website. We began the Project Development and Environmental Study (PD&E) at the beginning of January, and that study is expected to take 2-3 years. With 2-3 years also expected for each of the subsequent phase (final design, Right of Way Acquisition and construction), we are not expecting to break ground on these projects until perhaps 2010-2013. That's the typical schedule. Please keep in mind that any or all of those phases could wind up taking more or less time than expected.We anticipate having some initial alternative alignments for public review and meetings by late summer or fall of this year. The PD&E Study, once completed, will result in a preferred alternative alignment, and we'll be better able to answer property owners' questions at that time.Part of this road will likely be an

at-grade arterial, and other parts will likely be a raised toll road. The PD&E Study will determine this configuration, as well as the location of any on- and off-ramps. I hope that helps. Please feel free to call or email with other questions or concerns. "

1/17/2005	9:00 AM	PIO received 1-16 929 a.m. email from Larry Bains of Orlando : "Good Morning, Can you tell me what the anticipated completion date is for the Western Beltway connecting 429 in Plymouth (Apopka) with 417 in Sanford? Also is there a detailed map showing the route? When I attempted to zoom in on the one you have on your web site to get a closer look at the roads leading to the beltway it became too distorted to read. I am building in Lake County in three years and work in Orlando. I am wondering from Umatilla what are the closest roads are that might lead to entrance ramps onto the beltway from there. Thank you."
Contact 11/14/2005	4:01 PM	Alan Baker Public Meeting Comment Forms 11/14/05: Alan Baker 209 Capri Cove Place Sanford, FL 32771 I support the expressway alignments as demonstrated on 5A, 5B with greatest support given to 5D as it passes through Seminole County. The alignment indicated by the Orange or southernmost route presents serious access and property value issues to the homeowners of the Capri Cove subdivision. This alignment brings the roadway within 150 feet of my property.
11/14/2005	8:40 AM	Attended Public Meeting, 11/14/05

Contact Date 11/9/2005	Time 11:46 AM	Thomas Baker Regarding Public Meeting Comment Form 11/09/05: Thomas Baker and Bonita Sivi 31640 Wekiva River Road Sorrento, FL 32776 We recommend that the eastern most routes through the corner of Rock Springs Run Reserve be removed from further consideration. The western most routes shown on Expressway Authority maps are the only ones that should receive further consideration if we have to have it at all. Locate the State Road 46 Interchange with the new beltway WEST of both Rock Springs Run State Preserve and Seminole State Forest. Although inconvenient to us personally, it is the right thing to do. Place the interchange on the "Neighborhood Lakes" property. Follow the policy set in the "Wekiva Parkway and Protection Act" which provides that the entire "Neighborhood Lakes" property should be purchase - both of the new road (if we have to have it) and the balance of preservation.

11/14/2005	4:30 PM	David Barely501 Fawn Hill PlaceSanford, FL 32771I live in Lake Forrest at S.R. 46 just west of International. Traffic today is extremely congested at S.R. 46 and I-4 and will get progressively worse as new condos at International Boulevard and S.R. 46 and Orange Boulevard and S.R. 46 are built. This situation combined with chaos of construction with a S.R. 46 route will create virtual gridlock, impact businesses and present safety concerns. Please consider the merits of less traffic at I-4 less congestion and impact to business and selection select the alternative of connection with S.R. 417.Although I assume you have analyzed traffic studies, please personally visited and experience the existing 2-3 hour rush hour every morning and afternoon at I-4 and S.R. 46. Thank you for your consideration.

10/14/2005	2:55 PM	EAC Meeting Comment Form:Rebecca and William Barksdale5259 Vista Club Run Sanford, FL 32771-7155We are writing to express concerning the use of S.R. 46, as the route for the limited access expressway known as Wekiva Parkway. We wish to point out the following:1. Additional traffic from new condos, townhomes and apartments at the intersection of S.R. 46 and International Parkway, Orange Blvd. and Oregon Street will add to congestion at this site.2. The construction of an expressway on S.R. 46 would create tremendous congestion and business interruption at the I-4 / S.R. 46 intersection. This is already a very busy intersection.Please consider that a more logical route would be one that connects that Wekiva Parkway (the western beltway) to the existing S.R. 417 the Greenway). This would keep the 417 East-West traffic from off-loading onto I-4 at S.R. 46 and creating a bottleneck in that area. Thank you, very much.
Contact Date	Time	Harold Barley MetroPlan Orlando Regarding
1/12/2005	7:58 AM	PIO received copy of email from Mark/CH2M Hill to John Moore/FDOT: "John, As a follow-up to our phone call I would be glad to present to the METROPLAN TTC an update of the Wekiva Parkway PD&E Study. The meeting is scheduled on Jan 28 and we will put together a presentation by next week."Forwarded original 1-6 1125 a.m. email from John Moore@dot.state.fl.us to Mark Callahan: "Mark,I know you think that I stir up these issues but I really don't. SeeBelow. Can we do a joint presentation. Or don't you want to be seen with the most uninformed man in America?"Forwarded original 1-6 11:18 a.m. email from Keith Caskey KCaskey@metroplanorlando.com to John Moore/FDOTcc "Harry Barley" <HBarley@metroplanorlando.com>,"David Grovdahl" <DGrovdahl@metroplanorlando.com>, <douglasb@oocesa.com>

<AGilmartin@seminolecountyfl.gov>, <jberenis@oocea.com>, <noranne.downs@dot.state.fl.us>FW: Revised List of TTC Agenda ItemsJohn - Please see the note from Alice below. She would like to have a status report on the Wekiva Pkwy. and SR 46 PD&E studies at the next TTC meeting. You may want to coordinate this with OOCEA staff. Thanks.Original 1-6 11 a.m. Message from Alice E. Gilmartin, Principal Coordinator/Transportation Specialist Seminole County Planning Division agilmartin@seminolecountyfl.gov 407-665-7383, F 407-665-7385 to Keith Caskey: Subject: Re: Revised List of TTC Agenda ItemsPlease ask FDOT to give a status report on two PD&Es: one OOCEA is doing on Wekiva Parkway in Orange and Lake County and the corresponding SR 46 PD&E in Seminole County to I-4. Have not received any info on public involvement meetings, etc. I believe CH2M Hill is the consultant for both. Would like a timetable of the events related to the PD&Es.

Contact		Barney Barnes
Date	Time	Regarding
11/10/2005	4:09 PM	Attended Public Meeting 11/10/05, Via Mailing and Word of mouth
2/28/2005	2:06 PM	PIO called Barney Barnes to get rest of his info for database and newsletter mailing. 22325 Coronado Dr., Sorrento, FL 32776 we got a letter from one of those eminent attorneys a week or two ago, I guess they're jumping on the bandwagon. PIO noted we just started the PD&E last month, will be a while before we have an alignment, so still can't tell whose going to be affected. he said he appreciated the call and update, didn't really have any other questions right now.
1/7/2005	12:58 PM	PIO returned call to Barney Barnes, who said he wants to hold on to the property if the EA is going to take it, but going through divorce and wife not familiar with eminent domain process. He said she got a letter from an attorney that scared her, made her think they would just take the house and she wouldn't get anything for it. PIO noted there is a formal legal procedure for acquisition and they have to negotiate fair market value. He said he was aware of that. PIO relayed schedule, that PD&E could take 2-3 years, same with final design, ROW acquisition, so could be 2010-2013 before construction begins. He said that was helpful info. He said he's going to meet with the wife and attorney, and will call me back on Monday to see if there's more info they need at this time. PIO said I'd get his details at that time to add him to the database.
1/7/2005	9:07 AM	Barney Barnes left MSG said he owns land which he thinks is involved in the Wekiva Extension. His friend at SC Bob Risner spoke to PIO about it in November. I would like to know if any updates since then. He's ????, parcel 3519270020004100. He said there's a legal problem between me and my ex wife. If she's asking for a petition of property and if this is going to go down I will try to put this off. Call me.

Date	Time	Seminole Soil & Water Conservation District Regarding
12/20/2005	12:56 PM	Mark/CH2M Hill forwarded fax from Anne Brewer/FDOT, who forwarded letter from Michael Barr/Seminole Soil & Water Conservation District to FDOT District 5 Secretary George Gilhoolley. Anne requested Mark provide a response. The letter is the same as previously received from the soil & water district.
12/12/2005	2:22 PM	PIO emailed text from Soil & Water District to Mark, Dave, Brian and Gary: "Afternoon Al Have input the text below from a Dec. 5 letter received from Michael Barr, chairman of the Seminole Soil & Water Conservation District for your information. Also, will have copies of the latest public comment forms, as well as copy of the actual letter below, to you in the next day or two. I also understand we need to meet to discuss the public meeting summary and setting up a meeting with Mike Snyder. Give me a day or two to dig out

from the vacation backlog and I'll get with you on this also. Thanks."

12/12/2005	12:50 PM	PIO received 12-5 letter via mail from Michael Barr, chairman Seminole Soil & Water Conservation District, 108 W. Commercial St., Sanford 32771 407-321-8212, fax 407-321-1208, sswcb.org:Monday, December 05, 2005Dear Ms. BrooksThe Seminole Soil and Water Conservation District Board has reviewed the "Update on the Wekiva Parkway and S.R. 46 Bypass" and would like to make the following observations.A key component to making this project a success is the acquisition all lands identified in the Wekiva Parkway and Protections Act sign by Governor Bush at Wekiva Springs State Park June 29, 2004. The commitment of the governor was clear and unequivocal: These lands must be acquired. Please follow the policy, as established, and acquire the entire Neighborhood Lakes Property and all other properties recognized.Obviously, the eastern most proposed routes through the Rock Springs Run State Reserve flies in the face of the expressed intent of the Wekiva Parkway and Protection Act. The western most routes, under consideration, are the only ones that the Seminole Soil and Water Conservation District can consider supporting.In order to maintain wildlife corridors and minimize environmental impacts, roads traversing public conservation land should be bridged. Arterial connector roads and major interchanges need to be kept out of these vital areas.The Seminole Soil and Water Conservation District is responsible for conserving the natural resources of Seminole County. This project will impact our area and the natural system throughout the entire region; therefore we must provide all possible safeguards to ensure the "protection for Florida's land and waters." (Jeb Bush, June 29, 2004)Respectfully,(signature)Michael Barr, ChairCc: Wekiva River Basin Commission

Date	Time	Regarding
10/14/2005	12:47 PM	EAC Meeting Comment Form:Myrna L. Bates4963 Maple Glen PlaceLake Forest, FL 32771-7183I have lived in Seminole County for the past 5 years. I pride myself on living

near S.R. 46 and I-4. It gives us great access to I-4 and shopping. However, the Wekiva Parkway plans to use S.R. 46 corridor to get access to I-4 would be a mistake. This would create additional traffic congestion on S.R. 46 at our subdivision. The route should be constructed at the "southern route" at Route 417. This would be more direct entrance to Route 417.

10/14/2005	1:05 PM	EAC Comment Form:Allen and Karen Beaument704 Ashgrove TerraceSanford, FL 32771As homeowners in Lake Forest we are very much opposed to the Wekiva Parkway being placed on S.R. 46, directly in front of our neighborhood. There is a huge amount of traffic already on S.R. 46 and the parkway would result in so much more. The current traffic load required traffic lights to be installed due to vehicular fatalities. It makes much more logical sense to place the parkway in the proposed southern route linking to the less crowded 417 area. Please consider this argument when preparing your decision.

11/14/2005	3:08 PM	Public Meeting Comment Card 11/14/05:Eric Becker240 Betsy RunLongwood, FL 32779My primary options about the alignment and the design of the Wekiva Parkway is to protect the underlying water aquifer and to minimize the opening of the Wekiva River Protection Area.There are 3 comments to specific to the Wekiva Parkway given my primary focus:1) The parkway should be elevated though the existing state lands and between the Wekiva River crossing and at least Sorrento to the west.2) Interchanges should be limited on the Wekiva Parkway segment and an interchange in Lake County should west of the current intersection of 46 and 46A to keep development around the interchange outside the Wekiva as much as possible.3) The state or other conservation organizations should be encouraged to purchase all land recommended for protection.
11/14/2005	9:26 AM	Attended Public Meeting, 11/14/05
Contact		Ken Becker
Date	Time	Regarding
11/17/2005	4:10 PM	PIO returned call to Ken Becker 407-330-3742, left detailed MSG re: his noise concern, noted noise study will be done as part of the PD&E study, host of federal criteria that have to be met include density and proximity to anticipated road. PIO gave phone and email contact info, also noted workshop exhibits now on the website, gave address and text links.
11/16/2005	9:16 AM	Ken Becker 407-330-3742 left MSG I live on the Wekiva River. I would like to talk to you briefly when you get a minute. I have one major concern about expansion over here. Basically sound barriers. Hopefully when they decide what they're doing and when they're going to do it I hope they consider some kind of sound barrier factor. From what I understand that bridge is going to be elevated substantially higher than 46 bridge elevation is now. Wekiva River is like a sound tunnel. I would think hopefully they're considering the people that are going to live right next to it and they put some kind of sound proofing or big barricade or something on each side at least on the river basin. Give me a call. I know they're not going to start this thing for several years, but that's my major concern. Thank you and have a blessed week. Bye.
4/22/2005	5:45 PM	PIO returned cal to Ken Becker 407 330 3742, who said he lives on Nova Drive, off Wekiva Park Drive, off S.R. 46. there's a 20' spring right down at the river from my house. I would sure like to see them not disturb that. PIO noted there are a number environmental issues that we have to take into consideration for this project, particularly with all the preserved land on both sides of S.R. 46. so that is something we're going to have to look at.PIO got his info and gave newsletter and public meeting schedule.161 Nova Drive, Sanford 32771. He asked if we were doing something to S.R. 46? PIO said the alignment and configuration have not been decided, don't know what's going to be a toll road or at-grade arterial, where exits are going to be. There's a big question of whether this will replace S.R 46 or make improvements. That's all to be determined. We're very early in the process. I'd like to see a spanner bridge, let the animals go from one side to the other. A lot of animals travel along the river's path, from Lake County and Seminole county.I sure hope they put sound walls up whatever they do. PIO noted EA has been putting up sound walls on other projects that have houses right up to them, and would expect that to happen on this project also if it meets the parameters.
4/22/2005	4:03 PM	Ken Becker left MSG I live out on the Wekiva on S.R. 46 give me a call I'd sure appreciate it. 407 330 3742

11/14/2005	2:17 PM	Public Meeting Comment Card:Russell and Donna Belcher5051 Knotty Drive CourtSanford, FL 32771We would like to see the northern route (yellow) to connect to I-4 near the St John's River Bridge. This would give motorist coming from Deltona etc, a more direct access to the western beltway and illuminate additional traffic at I-4 and 417.If southern route is used (Orange) suggest the road be a road grade at Wilson Road. Have Wilson dead end from east and west at the by pass.
11/14/2005	7:39 AM	Attended Public Meeting, 11/14/05
5/2/2005	10:25 AM	Russell Belcher 407-3307059 called to make sure he's on mailing list. Confirmed his info as 5051 Knotty Pine Crt., Sanford 32771, email RBelcher@everwear.net PIO noted newsletter status. He said thank you so very much.

Contact		Kathy Belich	WFTV Ch. 9
7/20/2005	5:10 PM	PIO checked number of database contacts from time of my arrival to magnet mailing. We had 310 contacts between the two projects, but again with many of these calling multiple times. PIO relayed info to Kathy, noting 310 contacts since Aug. 20-March 14, 7-8 months; and 450 March 14-July 20 about 3 months. She took info and said thanks for calling back --515 p.m.	
7/20/2005	4:47 PM	PIO called back Kathy Belich/Ch. 9, and relayed about 450 people have contacted me since the magnets went out, but database only shows initial contact. PIO noted many	

people, especially those with parcels on or near the Maitland Boulevard Extension alignment, have called several times, some of them once a month to get the latest. She asked how did that compare to number of calls before magnets? PIO said I could check and get back to her quickly. She said that's alright; she thought maybe I had that info. She thanked me for the call back.

7/20/2005	4:30 PM	PIO ran database query and came up with 349 contacts for Wekiva Parkway since March 14, and 92 for Maitland Boulevard Extension since that date. However, a number of contacts have called numerous times since that date.
7/20/2005	4:22 PM	PIO called Christy/Pecora to check date of magnet mailing. She checked and said March 14. PIO asked for confirmation that was of the magnets, not the newsletter, which I thought went out in March. She double checked and said that was for the 414&429 magnets.
7/20/2005	4:17 PM	Kathy/QCA buzzed to let me know Ch. 9 was doing story on 408 and 429 magnets. PIO noted I'd just spoken to Kathy Belich and was going to get back to her with some info.
7/20/2005	4:10 PM	Kathy Belich/WFTV Ch. 9 407-402-9084 called asking how many calls I've gotten since the magnets went out? PIO noted could check the database because we log all the calls, but number won't show people who've called more than once, which many of them have. PIO said I was on the road heading back from a meeting, but would get back to her in about a half hour. She said they were running story at 6 so that would be fine.

12/30/2005	11:31 AM	Chris Bell/Harris Harris Bauerle & Sharma left MSG I'm looking for one the maps you displayed at November public meetings. Our client is Wekiva mitigation marketing for the bank. Map we have shows 2 alignments going through it. At the public meeting map showed 3 possible alignments going through it. Looking on website and can't find that map. Can you call me at 407-472-1562 and that will go straight to my desk.	

Contact		Tremayne Bellamy
Date	Time	Regarding
11/14/2005	2:54 PM	Comment Form:Tremayne Bellamy2901 Corrigan DriveDeltona, FL 32738A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan

Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/9/2005	11:26 AM	Attended Public Meeting, 11/09/05	
10/19/2005	4:41 PM	PIO responded to Richard Belschner email: "Richard,It was nice to meet you also. Here is the initial alignment alternative map for the Wekiva Parkway. Keep in mind alignments will continue to be added or removed from consideration at this stage in the study."	
10/18/2005	9:00 AM	Richard Belschner/GRI REALTOR Stirling International Realty, Commercial Group emailed: "Mary,It was very nice meeting you last night. Your group did an outstanding job and it was very informative. I am looking forward to the November 9th meeting.This morning I was looking for the new map and was unable to find it. Can you let me know where it is? Thanks for any assistance that you can give me,Richard Belschner, GRI REALTORStirling International Realty, Commercial Group"	
10/7/2005	4:25 PM	PIO returned call to Richard Belschner/ Stirling International Realty Commercial C 407-421-8111, o 407-889-0160 who said "I have some clients that are in the Plymouth-Sorrento area, just above Plymouth-Sorrento and Ondich. We're getting conflicting stories about where the 429 extension is going north. I know it's not final. Their question is above east Kelly Park Road, which side of Plymouth-Sorrento would it likely fall on?" PIO noted City of Apopka, due to developments approved, has said they won't approve alignments on east side of Plymouth-Sorrento Road, but not sure how far north that constraint goes. He said he has one buyer and one seller; they want to make decisions in the next 60-90 days. PIO noted initial alternative alignments in local government review right now. Noted that's a fluid process, alternatives are changing based on their comments, but we'll have finished that initial review and have some lines on a map that folks can check out at November public meetings. He asked if there was anything he could look at now with lines on map? PIO said no, it's fluid, changes being made based on government review, best time will be at the public meetings. PIO noted date and location for OC meeting, and if his clients have time, it would be worth their while to attend the meetings. PIO noted if they're looking anywhere in this area, would be good idea since it's such a broad study corridor. PIO noted we're working on newsletters and meetings notices and can add him to the list. He said that'd be wonderful. Belschner cq), 1502 Golden Pine Crt., Apopka 32712. He said thanks for calling back. "I'm just trying to get the most up-to-date info." He said he has the study area map. PIO noted they can attend any of the meetings, if the 9th doesn't work for them. It will be same info presented. --439 p.m.	
10/7/2005	2:56 PM	Richard Belschner/Stirling International Realty Commercial C 407-421-8111, o 407-889-0160 Apopka commissioner Kathy Till suggested I contact you. Trying to get in fun on northern extension piece of hwy. 49, she said you might be able to assist me. listed some property in Plymouth-Sorrento area, people very interested as to where the connector, the northern bound piece is going, if I'm not there it'll ring a few times and transfer to my cell phone. Thank you very much.

12/23/2005	8:43 AM	Comment Form 11/09/05: This road is badly needed ASAP. But the original plan of gas line would seem to me much cheaper than buying all the expensive homes of most people on Plymouth-Sorrento Road. Most who have lived in the area for 30+ years. Don't get me wrong, I'm ready to get out of all the traffic. It just won't be cheap to purchase mine and my neighbors houses between Rock Springs and Plymouth-Sorrento Roads or between Roundlake and Plymouth-Sorrento. Just has to be more bang for the taxpayers buck. Someone probably needs to dig up the research on natural springs and ponds at Bridal Path and along and under intersection of HAAS and Ondich. Flow is from Bridal Path Lake and springs along Ondich across Plymouth-Sorrento to Holder Property North of Haas.

1/12/2005	3:41 PM	Finished Berg Wekiva concept request.
1/12/2005	2:55 PM	PIO began working on Wekiva Parkway concept request for Linda Berg/ Matsche real estate.
1/12/2005	2:37 PM	PIO called back Linda Berg, who said she "talked to Pam Bentley and suggested I call you. Have two pieces on Coronado Sunset Drive off 46 and Round Lake Road. I've got somebody interested in one of the homes. I feel like I'm in catch 22. Some people are saying it's coming straight through this property. I don't want someone to buy something that the road is going to come through in a few years. It's put these sellers on hold." PIO noted PD&E status and schedule, and that no alignment until that's completed. PIO noted with various phases of project it could be 2010-2013 before construction begins. PIO noted conceptual is on the EA website, and I could also send it to her. She asked that I

send her the conceptual. So she can say "this came from the expressway authority and you need to make up your own mind." PIO noted we'll also be sending out email updates. She's going to have her office call me with an email address

1/12/2005	2:32 PM	Linda Bird/Massey Real Estate in Mount Dora, said she talked to EA lawyer, who referred her to PIO. She said they have a couple properties on Coronado Sunset off 46. I have a potential buyer for one, but he's worried. Some people say this Wekiva Parkway is going to come straight through this property. He said it's on some kind of internet site somewhere. I need to talk to you so I can get a better hold on this. I do need to talk to you as soon as possible."

Contact 11/14/2005	2:54 PM	Sabrena and Dan Biron Comment Form: Sabrena and Dan Biron748 Broad Oak LoopSanford, FL 32771We feel that if a highway was to go through the front entrance of our community the following would happen:1. The property value would decrease significantly2. Our quality of life would change for the worse3. The community appeal would no longer exhibit for us we would never voluntarily move into to community that was next to a major highway.4. The noise pollution would be horrible5. The air quality would be worse with more exhaust fumes6. The wildlife would be pushed even further than they are now into living among humans7. S.R. 46 is currently one of the most dangerous roads in Florida. Each morning I see dead family pets along the road side as I travel to Mount Dora each day.If the traffic flow increases one can only for see the inevitable dead family members lying along the roadside each morning.I strongly urge this committee to take into consideration the large population of people who live along S.R. 46. You will do nothing less than place these family's in danger by turning S.R. 46 into a highway.
Contact Date 11/17/2005	Time 5:28 PM	Al Bishop Regarding PIO prepared letter for Al Bishop and sent SC concept sheet 5 as requested.November 17, 2005Al BishopP.O. Box 73 Washington, D.C. 20044-0073RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear Al,It was a pleasure speaking with you about the Wekiva Parkway Project Development and Environment (PD&E) Study in relation to your property at 588 Caledonia Place in Sanford. As requested, I have enclosed the Seminole County conceptual alignment alternative - Sheet 5 for your review. As discussed, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement."
11/17/2005	5:11 PM	PIO called back Al Bishop 202-622-8483 relayed that they're 6-7 streets or 2/3 to ¾ mile south of 46. he confirmed his property is right off Lake Markham Road, said he's toward the back near the wall. PIO noted we're hugging 46 in that area, no direct impact at this time. he asked if possible that could change? PIO noted it's possible, we're early into eh study and changes are being made based on government and public input, but I'd be surprised if we started diverging that far west near Lake Markham. He said that makes him feel better. PIO noted all the meeting exhibits are now on the website. He said he did log on to the website, saw a little bit, tried enlarging it but couldn't tell much. But what you've told me is more important than trying to figure it out myself. I have the house there but I'm not a resident there and don't get down there that often. PIO said I could send him the Seminole concept, and he's on the mailing list so he'll be notified of other meetings, newsletters, as things change. He said send concept to his PO box 73 Washington dc 20044-0073. he was very happy with the call back. He asked about

property values with the project? PIO noted improvements of this nature generally seen as a benefit and will increase property values, access if we use the 417 connection, for example, to I-4. PIO noted obviously if property is directly affected, wouldn't be seen as benefit by property owner. He said he understood that, so this could be a positive for him. get was thankful for the call back.--521 p.m.

11/17/2005	5:00 PM	PIO checked Al Bishop's property re: alignments on SC property appraiser site. Parcel is off Lake Markham Road, maybe 2/3 mile south of alignment alternative on 46, no direct impact.
11/17/2005	11:08 AM	Al Bishop left MSG. PIO noted got his MSG but hadn't had chance to call back. 202-622-8483 he said property in question is at 588 Caledonia place, lake sylvan cove in Sanford. PIO said I'd check the location for an alignment impact. PIO noted we've got a lot of people asking such queries so it may take some time but I promise to get back to him. he said he'd appreciate it.
11/15/2005	1:15 PM	PIO returned call to Al Bishop 703-408-1140, 202-622-8483, left MSG asking him to call me back with address so can determine if any of the alignment alternatives hit his property in Sylvan Lake Cove
11/9/2005	2:00 PM	Al Bishop left MSG I own a house in Sylvan Lake Cove. I'm trying to find out to what extent this Wekiva Parkway project will impact the subdivision or my property.

3/18/2005	2:28 PM	Phil Bishop 5736 Michelle Lane, Sanford 32771 email PIB@TEOnline.com When I moved in out here there were all kinds of meetings. I'm not real happy about this coming back alive again. It helps me nothing at all; it has an impact. I've lived out here since 1986, in a 5 acre subdivision. Not real happy about this. I feel like Rick Keller shoved this down my throat. PIO asked if he'd been able to attend any of the meetings of the task force or coordinating committee. He said he knows those were big in Lake County, but some people from Seminole county didn't find out about it. Some kind of elevated expressway that goes right next to your property isn't a great thing. SC environmental services just put a 6' fence with barbed wire up behind my property. I know that doesn't have anything to do with the expressway, but I'm just not real happy with my local government right now. I'm not real happy about local government right now, and you can bet next election I'll be voting differently. PIO noted we don't have an alignment, and that likely not all of the road will be raised toll road. In fact very likely that part of it in Seminole County will be an at grade arterial; noted that's all still to be determined. PIO noted we're gathering data now, just started PD&E study in January and hope to have some alignments ready for public review in November. He said I'm in engineering business; you people keep people in the dark for no reason. I bet there are some alignments on the table right now. By the time alignments come to light people have already made up their minds. I'd like to have this thing run right behind Rick Keller's property and see how he'd like it. I work on land
-----------	---------	---

development, and think the lake county folks just pushed this thing through. PIO noted I understand his frustration and I will do my best to keep him informed, noted he'd be added to database to receive meeting notices, and newsletter we're working on now should come out in April. PIO noted once he gets newsletter, which will touch on some of the things he mentioned, he's welcome to call me back with any specific questions. He said he didn't mean to unload on me, but you're the public info contact, so. PIO noted no problem, that's why I'm here. He was thankful for the ear.

8/1/2005	4:42 PM	PIO responded to Jack Freeman, copied Dave/CH2M Hill: "Jack,Both Dave and I apparently spoke to Matt Blake on July 28 and his phone number matches, so I believe we're square on this one. Thanks."
8/1/2005	4:24 PM	Jack/Kittelton responded to PIO email: "It was from one day last week but I cannot say when. I have deleted the message from my phone mail system."
8/1/2005	3:25 PM	PIO emailed Dave, copied Jack Freeman/Kittelton: "Hey Dave,I just checked the database and it turns out I spoke at length to Matt Blake (cq) of the same phone number on July 28 Was Jack's message since then or before?"
8/1/2005	3:17 PM	PIO checked database to see if I'd spoken to a Matt Laken(sp?) recently. PIO noted I spoke to Matt Blake with same phone number on July 28.
8/1/2005	3:13 PM	PIO responded to Dave/CH2M Hill: "Will do!"
8/1/2005	2:57 PM	I had a voicemail to call Matt Laken (sp??) at 352-408-8657 to get an update regarding the Wekiwa Parkway. I would think that it would be better if you or Mary Brooks handled that call. Any word on getting to work on revisions to the access study for Maitland Boulevard Extension?Regards,Jack"
7/28/2005	1:45 PM	PIO returned call to Matt Blake 352-408-8657 was wondering, have seen map circulated through neighbors, shows overlay of highway grid about 300' wide, about how wide a parkway would be. Is there a map in the office, I realize it's just a proposed project and is obviously not final yet. PIO noted we don't have an alignment yet, and I would be curious to see what's being circulated. PIO noted I understand some folks are getting upset about attorney solicitation letters.He said they couldn't show me an engineer's stamp. I think it was generated by lawyers that were trying to get neighbors to jump on the bandwagon. Just wanted to know if you had that; I'm near your office and I was going to stop in and take a look while on vacation this week. He said the map was thrown around by one of my neighbors. It really excited my other neighbors, but I've been involved with a few of these over the years. It was a xerox without an engineer's stamp or anything. PIO offered to add him to the project mailing list to get authentic info. He said he's getting the mailers that came out. I am in the study corridor with my home, I just didn't know if there are any alignments around, that for working purposes you were looking at 'what if it goes here?'. PIO noted no alignment yet, and explained we're finishing first round of data gathering, working on initial alternative alignments to bring to public involvement meeting in November.He asked if the parkway would be elevated? I'm in the middle of bear country near the river. PIO noted the OC portion that OCEA will likely control because it's most feasible for a toll road would be an elevated expressway. PIO noted some questions remain about portions FDOT will control in Lake and Seminole, though law does require wildlife crossings and other restriction in area of the river, etc., so likely some portions in the environmentally sensitive areas could be elevated. Question remains though for areas in Seminole closer to I-4 and in Lake closer to 441.He complained that Seminole has allowed so much development in such a sensitive area yet Lake has treated it so differently. ... He said I told them not to get excited about it. It's being represented as god's law and it's not, it's nothing but propaganda to get people to sign on. He said one of his neighbors died recently and I'd hate to think this was weighing on his mind. PIO noted not everyone within the study area will be affected by the projects. The best time to start making some decisions or get more info will be public meeting in November when they can see where some of the initial alignments fall. PIO noted obviously anyone can get a lawyer whenever they want, but until they know if their property may or may not be

affected, it's pretty early in the game. He said he totally agreed. He said he's been trying to tell neighbors not to get too excited just yet, just try to get the best info and stay informed. PIO told him to please have any of his neighbors that are upset to call me so they can get more accurate information. He said he would and that I'd been very helpful, thanks for calling back.--118 p.m.

7/28/2005 11:25 AM Matt Blake left MSG I may have spoken with you once before quite a while back re: the Wekiva Parkway. If you could call me back I'd really appreciate it. My number is 352-408-8657 got a couple of broad questions which I'm pretty sure you'll be able to answer. Thanks so much and have a great day.

11/14/2005	12:12 PM	<p>Comment Form: Crystal Blanks 4512 Renegades Drive # 102 Orlando, FL 32818 A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons: 1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road. 2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame. 3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties. 4) Zellwood Station is a</p>

retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Contact Date	Time	Steve Borst Regarding
8/9/2005	5:58 PM	Steve Borst responded to PIO email: "Thanks so much, Mary. You have been very helpful!!! Stephen K. Borst Senior Vice President, Sales & Marketing SunGard Collegis Inc 2300 Maitland Center Parkway Suite 340 Maitland, FL 32751 800-800-1874 office 407-660-8008 fax 407-432-9548 cell"
8/9/2005	3:13 PM	PIO emailed Steve Borst re: Murray Court with respect to the study area: "Steve, Here's a copy of the latest study area map. Looks like Murray Court is roughly a half mile south of the southern boundary of the study area. This is currently outside the study area, but as we discussed there is the possibility the new roadway may have to extend outside the study corridor in some locations. I've added you to the project mailing list so you'll get the newsletters, mailing notices etc. Please don't hesitate to call or email from time to time also for updates."
8/9/2005	1:00 PM	Steve Borst returned my call, thank you for leaving very thorough contact info. property in question is on Murray court, off Longwood Markham road, ½ mile south of 46 in Sanford, on east side of Wekiva river. I think Murray backs into river. Looked at the website which gave proposed corridor for the road. I wasn't clear if this was in it. Looks like sylvan lake and park immediately to the east and I didn't think there was any way they could take a road through sylvan lake and neighborhoods. Was thinking clearly a new toll road would be at Highway 46. I just couldn't determine. Murray Court is dead-end street cul de sac that runs east west. I feel comfortable that looking at maps that I don't see how they can hit this property. PIO noted would check property location to see if in study area, but also noted there is possibility that properties right outside the study area could be affected. PIO noted study area was determined by various committees over the years, but once we get into hard core engineering there are a number of factors that could mean going outside the study area. PIO asked of his contact info to get him on project mailing list. He said he'd really appreciate that. sborst@collegis.com 1425 oak springs place, Lake Mary 32746 PIO asked timeframe he as looking at, noted PD&E and overall project schedule. He

said I'm ready to do it. Read in the paper proposed Wekiva river toll way was coming and I was like oh boy. He said the schedule info helps and if you could find out whether the street is in the study area just send me an email or voicemail, I'd appreciate it.--108 p.m.

8/9/2005	12:20 PM	PIO returned call to Steve Borst/homebuyer 407-432-9548, left detailed MSG with my number and email address, asked him to call back with location/address of property he's thinking about buying so I could see if it's in the study area.
8/8/2005	2:51 PM	Steve Borst 407-432-9548 got your name from the EA in Seminole County. I am a citizen going to buy a house and I really want to know the impact of the proposed beltway, where it might be coming through the front yard. I'm from out of town and don't want to make a huge mistake. I understand you might be able to help me with more detailed info of what's planned for this Wekiva Parkway project. Thanks very much hope you can call back.

12/23/2005	8:37 AM	Comment Form 11/09/05: Ms. Brooks, Our neighborhood lies in northwest Orange County between Kelly Park Road and Ondich Road and Plymouth-Sorrento Road and Effie Street. This area consists of rolling hills, pristine pastures, woodlands, acreage home sites and the highest elevation in Orange County. There are five spring fed ponds in this small area and we are very close proximity to Rock Springs (Kelly Park) and Wekiva Springs. This would indicate that this area is a valuable part of the watershed that supplies our aquifer. There are at least five federally and state protected species of wildlife that inhabit this area and a large variety of other species. Paulette Street which lies in the middle of the area described above, has been platted subdivision for 28 years. We, as owners of this entire community, would like to know where the environmental impact studies are and who did them? We would like to see them. We, as the owners of the land on Paulette Street, do not understand why it would be necessary to build through a long established subdivision when open land lies to the east and west? We will all await a reply. Sincerely, Ina Boyd

11/14/2005	3:14 PM	Public Meeting Comment Form 11/14/05: Bonnie Breitbeil 1946 Gunn Road Winter Park, FL 32792 Rock Springs Run State Reserve is a critical wildlife corridor and should remain as a protected area in accordance with the Wekiva Parkway and Protection Act. The most easterly route of the Wekiva Parkway shown through the corner of the Rock Springs Run should be eliminated. Consideration should only be given to the westernmost route as shown on Expressway Authority maps. The interchange of SR 46 and the new beltway should be moved west of the Wekiva Basin public conservation lands. This Lake County interchange should be located in the northern pasture west of Rock Springs Run and Seminole State Forrest. This interchange should be placed on the Neighborhood Lakes property. Land must be purchased for this new road as well as preservation. The Wekiva Parkway should be designed to carry all regional traffic and to protect wildlife this road should be elevated in all areas where it crosses public conservation land. Bridging will allow wildlife to safely use this corridor. Land must be acquired as identified in the Wekiva Parkway and Protection Act for permanent conservation. The road should not be built unless these important lands are saved.

Contact		Gary Brender	SC Expressway Authority
12/20/2005	4:00 PM	<p>SCEA meeting Gary Johnson, executive director, Gary Brender, chairman, commissioner Art Woodruff, Commissioner Bob Dallari, Brenda Carey, Randy Morris, Carlton Henley in attendance. Commissioner Dick Van der Weide absent. Commissioner Dallari named new chairman for board. Art Woodruff approved as vice chairman. Mark Callahan provided a Wekiva Parkway presentation PD&amp;E study update, including project components, SC alternatives, preliminary impacts, not including stormwater pond impacts (impact analysis Yellow alternative 160 parcels impacts, 32 residences, 2 businesses, 1 nursery, 160 acres ROW, 28 acres public land, 72 acres floodplain, 65 acres wetlands, black bear Orange 100 parcels, 19 residences, 2, business, 2 nursery, End of first quarter will identify viable alternatives and perform more detailed evaluations on those. Update the Wekiva commission and SCEA. Topics included traffic projections and I-4 connectivity, request for two-way frontage roads, request to examine new alternative using International Parkway and 417. Motion to eliminate northern route; unanimously approved. Mark clarified: will look at connection to Wekiva Parkway from International Parkway, and look at two way frontage road system, request for origin destination studies, concurrent DOT 417-International Parkway PD&amp;E Study, . Gary Brender: if bring controlled access up Heathrow International Boulevard, presume there would be no way to meet standard turning radiuses for limited access highways? Mark said would need to be safe, but can look at Brenda: how soon decision to take 46 over to International Parkway? Mark said think going to workshops in February in that study. Brenda said if that were in, would be easier to determine how much traffic coming from 46 and getting onto the GreeneWay. Jerry said consultants working on traffic numbers on that also; met with them maybe 30 days ago, looking at 3-4 alternatives as to how to get that ramp over there. By end of January will probably have some numbers and refinements on the concepts, 30-45 days. It did appear from what they've done on prelim basis, you do have very strong east west demand and some of the traffic models show that.</p>	
8/31/2005	1:20 PM	<p>PIO emailed Gary Brender, copied Mark/CH2M, Gary Johnson and Sheralyn Brinson: "Good afternoon Commissioner Brender, I apologize for the delay in getting back to you. I have attached a PDF file of the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass Project PD&amp;E Study area map. I hope this is what you needed. If not, please don't hesitate to call or email me for further information.</p>	
8/31/2005	1:14 PM	<p>PIO responded to Sheralyn/Gary Johnson: "Gary, Apologies for not getting back to you sooner, but my email was down until just a short time ago. I'll send the commissioner the study area map. FYI, it's also posted on the Expressway Authority website at <a href="http://www.ocea.com">www.ocea.com</a>."</p>	
8/21/2005	6:56 PM	<p>"Gary Brender" &lt;<a href="mailto:gjbrender@atlantic.net">gjbrender@atlantic.net</a>&gt;          &lt;<a href="mailto:GJohnson@co.seminole.fl.us">GJohnson@co.seminole.fl.us</a>&gt;,          &lt;<a href="mailto:gjohnson@seminolecountyfl.gov">gjohnson@seminolecountyfl.gov</a>&gt;          Subject: PM Western Beltway map          Hi Gary, I have seen a map in photo form that shows the proposed layout for the western beltway, with the shaded area denoted as the area of "probability." I wonder if you can obtain a digitized copy of that and email it to me.. I am interested in the entire stretch from Orange County, through Lake, and across Seminole to I-4. If need be, you can send it by section, depending on the size of the file. I have seen it printed in the paper but I need a copy for my computer for reference. Thanks, I appreciate your help. Gary Brender          SCEA--****Florida has a very broad Public Records Law. Virtually all written communications to or from State and Local Officials and employees are public records available to the public and media upon request. Seminole County policy does not differentiate between personal and business emails. E-mail sent on the County system will be considered public and will only be withheld from disclosure if deemed confidential pursuant to State Law.****</p>

11/17/2005	4:29 PM	PIO worked on map request (1A, 1 & 2) for Joe Brenner as requested. November 17, 2005 Joseph Brenner 2567 Appy Lane Apopka FL 32712 RE: Request for Wekiva Parkway Overall Alignment Alternatives Concept Dear Joe, Thank you for attending the public workshop held on Nov. 9, 2005 for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your comments, which have been made part of the public record for this project. As requested, I have enclosed the PD&E study area Sheet 1A, the conceptual project layout Sheet 1 and the Orange County conceptual alignment alternatives Sheet 2. Also, all of the public workshop exhibits and comment forms are now available on the Expressway Authority website at www.ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files. We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement.
11/10/2005	10:58 AM	PIO responded to Joe Brenner: "Will do, Joe. You're on the list, and as mentioned on the phone, with so many requests it could take a while but you will receive the info. Thanks for attending the meeting."
11/10/2005	10:45 AM	-----Original Message----- From: JOE BRENNER [mailto:jmb99999@yahoo.com] Sent: Thursday, November 10, 2005 10:45 AM To: MBROOKSSR414@CFL.RR.COM Subject: REQUEST FOR MAPS PLEASE SEND MAPS 1A--1--2 JOSEPH BRENNER 2567 APPY LN APOPKA FL 32712 THANKS
11/10/2005	10:14 AM	Joe Brenner called, said he was at the meeting last night and was told to contact PIO re: getting map copies. He wants copies of maps 1A, 1 and 2. 407-884-0101. PIO noted he's on the list but there are multiple such requests so it may take a little while but he will get the info. He said he'd appreciate it.
Contact Date		Anne Brewer Regarding

Contact Date		Gayle Brewer Regarding
11/9/2005	8:11 PM	Benitez Realty Attended Public Meeting, 11/09/05
9/9/2005	2:35 PM	Gayle Brewer responded to PIO email: "Yes, remove ERA, please. You can use my home address for mailings: 619 Lake Doe Blvd, Apopka, 32703. Thanks for asking. Gayle Brewer Broker-Associate Benitez Realty, Inc 407-920-4619"
9/9/2005	1:45 PM	PIO emailed Gayle Brewer asking for her new mailing address, noted she was with ERA and now latest email from her at Benitez Realty.
2/10/2005	2:53 PM	PIO printed and sent conceptual request letter..
2/10/2005	9:15 AM	PIO picked up concepts from Brian/CH2M, who noted they didn't come out as sharply as last batch. PIO noted you could still see the side streets, so they should do for now.

2/6/2005	10:45 AM	Gayle Brewer/ERA Advantage Realty Professionals, Inc 407-869-4042responded: "The larger hard copy would be great, my address is as follows:ERA Advantage Realty Professionals, IncATTN: Gayle Brewer280 Wekiva Springs Rd, Ste 104Longwood, Fl 32779Thank you for your prompt response."
2/3/2005	1:38 PM	PIO responded to Gayle Brewer/ERA: "Hello Gayle,Yes, I remember meeting you at the Town Hall meeting. For the Wekiva Parkway, we do not yet have an alignment; we only have a wide swath for the study area that was designated by the Wekiva River Basin Coordinating Committee. The Project Development & Environmental Study, which is being done jointly by the Expressway Authority and the Florida Department of Transportation, started Jan. 19. This is a two- to three-year process. We are in the data-gathering stage, and hope to have some initial alternative alignments for review at public involvement meetings around November 2005. The Wekiva Parkway and S.R. 46 Bypass Study area conceptual is available for review on the Expressway Authority website at www.ocea.com If you need a larger hard copy (11 x 17), email me your address. I'll also add you to the project database to receive newsletters, meetings notices, etc.As far as timelines, with the other phases needed for these projects, as well as funding issues, we're not expecting to begin construction until some time 2010-2013.Hope that helps. Let me know if you want me to send the conceptual. Nice to hear from you."
2/3/2005	1:28 PM	PIO received email from Gayle Brewer/ERA Advantage Realty Professionals, Inc: "Hello Mary, I met you at Rep. Brummer's town hall meeting in Apopka. I vaguely remember what you said about the 429 extension from 441 north along Plymouth-Sorrento Road and I now have a client that may want to sell his property in that area. My question is-When did you say there would be an update of the plan? We just want to be able to disclose to any future buyers. Thank you for your time."

Contact Date 10/31/2005	Time 12:50 PM	Richard Brooks Utopia Foliage Regarding PIO responded to Richard Brooks by sending initial alternatives map: "Hello Richard,I just got back from out of town and saw your email. I apologize for the delay in getting back to you. Please find the latest initial alternative alignment map for the SR 429-Wekiva Parkway PD&E Study attached as requested. You can also view this and other project info on the Expressway Authority website at www.ocea.com, click on the link for the "Western Connectors" which will take you to the Wekiva Parkway project page.I hope you find this helpful. Please feel free to call or email with other questions or concerns."
10/26/2005	9:45 PM	From: JRichardBrooks@aol.com [mailto:JRichardBrooks@aol.com] Sent: Wednesday, October 26, 2005 9:45 PMTo: MBrooksSR414@cfl.rr.comSubject: new mapMary,please mail me new western beltway map that was recently updated. also, where on the web can I go to see it?Richard

BrooksUtopia Foliage1821 W. Kelly Park Rd.Apopka, FL 32712

4/27/2005 12:36 PM Richard Brooks returned my call. He said about a year ago I contacted Pam Bentley at PBSJ and she sent map of proposed western beltway from 441, up through Lake County and up to I-4. She said it would probably be more like November to finalize the route. She said yesterday there's nothing My interest is to know where it's going because I have property out here. PIO asked for his info to add to project database for meeting notices, etc. Jrichardbrooks@aol.com1821 W. Kelly Park Road, Apopka 32712That's the Utopia Foliage address. Are people allowed to continue building out here with the road going through? Doesn't seem to make sense. PIO noted without an approved alignment and permits, that area is wide open for property owners to do as they wish, and we're aware of many developments being permitted. Noted it simply means that if an area is developed and alignment goes that way, we'll have to negotiate with whomever owns the property at the time. PIO gave newsletter, public meeting and PD&E status, as well as construction timeframe. He asked so what was the November date Pam Bentley was talking about? PIO noted although study was supposed to start sooner but pushed off with hurricanes, not sure what the date she mentioned was referring to. PIO noted in any case he had the latest and greatest info, and that process to develop these projects takes time. He thanked me for the info.--1244 p.m.

4/27/2005 11:17 AM PIO again tried Richard Brooks/Utopia Foliage, left MSG to call within the next 10 minutes or after 1230 (lunch).

4/27/2005 10:53 AM PIO returned call to Richard Brooks, left MSG sorry I missed his call but try me again.

4/27/2005 10:41 AM Richard Brooks 407-886-0872 please call me back.

4/27/2005 10:12 AM PIO returned call to Richard Brooks 407-886-0872, Utopia Foliage F 4078864009, left MSG for him to call me back re: questions on Wekiva Parkway.

4/27/2005 8:46 AM 846 a.m. Richard Brooks 407-886-0872 left MSG I'm a property owner in northwest OC and I need to speak to you regarding the extension they're talking about out here. Please call me at work.

Contact Date	Time	Robert A. Brooks Lake Forest HOA Regarding Public Meeting Comment Form 11/14/05:Robert A. Brooks4852 Red Brick Run (Lake Forrest)Sanford, FL 32771The southern connector makes more sense. A 46 connector from I-4 with street light would cause severe traffic delays and congestion at Present counts, at least 90% or more of traffic leaving Lake Forrest area turn east along with the Publix shopping center and planned Hattaway Project. If the present traffic had to turn west- Go to overpass and then east to I-4 and Int'l Drive there would be an awful traffic jam and penalty to people of our area with the north St. John's Bridge connection south bound traffic would be ok but the traffic from the present 417 dumped on to 46 would be a digression to the present 46 traffic problems.
11/14/2005	11:05 AM	Attended Public Meeting, 11/14/05

Contact Date	Time	Barry and Cora Broskowicz Regarding EAC Meeting Comment Form:Barry and Cora Broskowicz5360 Fawn Woods CourtSanford, FL 32771The S.R. 46 Route would make a bad traffic situation on S.R. 46 even worse. Further, it would create a huge problem during the years of construction.

Date	Time	Regarding	
10/14/2005	2:53 PM	EAC Comment Form:Anthony and Charlotte Brown4900 Red Brick RunSanford, FL 32771In our opinion, the Seminole County Expressway Authority should choose the southernmost route for the Wekiva Parkway.1. It is a more logical choice as it connects directly with S R. 417, as it keeps east-west traffic off of I-4.2. An expressway on S.R. 46 would create greater business disruption and construction, particularly at the intersection of S.R. 46 and I-4.3. There is already significant traffic congestion from new condos / townhomes / apartments, construction the Wekiva Parkway in that area would ass tremendous congestion and risks in that area.

In fact, you should have recently received the latest project update in the last week or two. Please let me know whether you received the information. We're in the data gathering process, and hope to begin drawing up some initial alternative alignments in the next month or so. We are shooting to have these initial alternative alignments ready for review and feedback at public involvement meetings in November 2005. Public meetings will be held in each of the affected counties (Lake, Orange and Seminole). Please keep in mind that not every property within the study area will be affected by these projects. Please feel free to call or email with questions or concerns."</p>

11/14/2005	3:35 PM	<p>Comment Form:Stuart Bryson2922 Greenwood Springs LoopLake Mary, FL 32746A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

12/21/2005	10:43 AM	<p>Mark Callahan/CH2M Hill copied PIO, Brian and Dave on fax forwarded by Mike Snyder from Mike Bullock/Director, Florida Park Service: "DEC-21-2005 08:55 OCEP 407 315 3801 P.02Department of Environmental ProtectionMarjory Stoneman Douglas Building3900 Commonwealth Boulevard Colleen M.Tallahassee, Florida 32399-3000 SecretaryDecember 13, 2005Mr. Mike Snyder, Executive DirectorOrlando-Orange County Expressway Authority525 South Magnolia AvenueOrlando, Florida 32801 -Dear Mr. Snyder:The Florida Department of Environmental Protection's Division of Recreation and Parks manages more than 39,100 acres of public lands within the Wekiva River Basin as part of Florida's state park system. These parks were acquired as part of a dedicated effort by State government to conserve lands for public outdoor recreation, wildlife habitat and watershed protection. We appreciate the work of the Orlando-Orange County Expressway Authority to further the protection of these areas while designing the Wekiva Parkway.The Division would like to ensure that the Wekiva Parkway is constructed without harming the state parks of the Wekiva Basin. We are concerned that some of the proposed Parkway alignments and interchange locations could require the use of state park lands or have other direct or indirect effects on the parks. To prevent impacts to the parks, we request that the alignment of the Parkway follow the existing route of State Road 46 to the greatest extent possible. We also request that the location of the primary interchange with State Road 46 is thoughtfully selected to minimize any direct and indirect effects on the park. Finally, we support the elevation of the Parkway as much as possible through the State Road 46 corridor to prevent impacts on wildlife and enhance the management of public lands within the basin. At a minimum, elevations should be incorporated in the Parkway's design wherever public lands exist on both sides.We believe that these modifications to the plan will protect Florida's valuable state parks while meeting the transportation needs of central Florida. We welcome the opportunity to discuss our concerns with you and look forward to working with your organization as this important project progresses.Sincerely,"ft JJMike BullockDirectorFlorida Park ServiceMB/agwcc: Vivian Garfein, DirectorDEP Central DistrictMore Protection, Less Process"Pfined or, recycled paper.Jeb Bush GovernorTOTAL P.82</p>

Date	Time	Regarding
8/3/2005	3:20 PM	<p>Scott Burford 407-644-2560 called, said he was on the website and saw the map of the extension from north of 441. There's the blue part and the purple part showing where it's going, but it looks really wide. Is it really taking all that space?PIO noted that was just the study corridor; we don't actually have an alignment yet. That's the area in which the roadway will fall somewhere. He said he has property on 46, just left of the very left part, near 46 and Round Lake Road. He said it's just out of the study area but he thinks this will still affect him.PIO noted potential for some impacts outside the study area based on various floodplain, environmentally sensitive areas and other constraints, though obviously we'd try to avoid that if possible.He asked has this been approved? PIO noted the project was approved by statute, and the study is to determine where to put the road. We don't have an approved alignment. He asked when will we know where it's going? PIO noted PD&amp;E to be complete with preferred alignment by spring 2007, also gave overall project schedule.He asked would the 46 bypass be done first? PIO said the project will be done in segments and can't say at this point which will be first.PIO asked and he said he's not on the list. PIO got his contact info and said would send him newsletters, meetings notices, etc.Mailing address: 160- S. Phelps Ave., Winter Park 32789Property address: 36027 S. Coronado Dr., SorrentoEmail aloha@justplumerias.comPIO noted next newsletter probably in September. He said thanks for the info.--332 p.m.</p>

11/10/2005	11:41 AM	Attended Public Meeting, 11/10/05, Via Advertisement	

10/4/2005	9:43 AM	Mark/CH2M Hill emailed project team: "I attended a meeting with the Lake County Water Authority (LCWA) staff on October 3, 2005. This meeting was suggested by Jim Stivender of Lake County given that we have alignments that impact LCWA's Wolf Branch Sink Preserve. Attendees included: Patricia Burgos - LCWA Environmental Program Manager Michael Perry - LCWA Ron Hart - LCWA Water Resource Program Manager Lance Lumbard - LCWA Water Resource Project Manager Keith Schue - The Nature Conservancy/Lake Co resident, uninvited special guest I reviewed the overall project and provided background in the study and overall schedule. We then reviewed the alignments for the SR 46 bypass from US 441 to the Systems Interchange. LCWA expressed several concerns with the alignment that impacts their Wolf Branch Sink including: " Alignment will impact their management of the property and burn program. " They have anticipated access to Round Lake Road which will be impacted by the concept. " They are currently developing a Land Management Plan. " Remnant parcels to east of alignment will have little habitat value. " If impacted staff prefers purchasing new land adjacent to remaining parcel. " Concern over haz mat spill and impact to property and sink. " Concern over water quality given the sink drains into aquifer. " Concern over flooding area along existing SR 46. I reviewed that we will need to treat stormwater and ROW acquisition processes do not directly allow trading properties. We discussed their concerns but given concept detail we were very general. I indicated advantages to the alignment through their property as being more room between SR 46 and railroad and less impacts within Sorrento. Further indicated that it is probable that this alignment may be moved forward as a viable alternative but not certain at this point. Committed to work with them as the alternatives proceed and stand ready to meet with them or their board as needed. Mark"

11/10/2005	12:03 PM	Public Meeting Comment Form 11/10/05:Linda Bystrak110 Oak Ridge DriveLeesburg, FL 34788I am concerned about the OOCEA following through on the purchase of the land that the Protection Act identified. Too often highway authorities make promises they don't keep. That is why the public has lost their trust in the authorities. Another concern is the easterly direction towards and through the Rock Springs Run State Preserve. I have kayaked through there and found many rare species of birds making it a habitat worth extra protection. Some species need large unbroken areas of habitat in order to survive. Also the Lake County interchange would have less of an impact on wildlife corridors if it were to be located west of R.Sp. Run Reserve in an existing open field. Bridges would help lessen the impact of the road on wildlife immigration / movement patterns, and should be built over the protected lands. And finally, the parkway should carry all the thru traffic with only a few ramps to those few inhabited areas that are isolated.I hope that the OOCEA will not ignore this public input and do what they want anyway. I have been to too many DOT public hearings in other states where the public hearings are held only because they are required by law, and not because the state DOT really cared about what the public wanted, or about the protecting the conservation areas.Does Florida have a right of first purchase law like PA? PA uses it to buy easements and conservation lands with out making the public mad! Check it out!Linda Bystrak.

11/22/2005	8:51 AM	PIO returned call to 352-383-8084 "Mrs. Ray Cabanas" re: info on the 46a alignment, my husband wants to find out if any additional news on the 46 and 46a realignment. PIO noted next public workshops summer 06 when we bring forward the more viable alternatives. PIO noted we'd probably have more info on 46A at that time also. PIO asked if she was on the mailing list? She said not sure if on mailing list. Please send info to 29709 county road 46A, Sorrento 32776. Wants to be on mailing list.When do they expect to make a decision? PIO gave PD&E schedule. She she's been hearing next year for 18 years now. PIO noted there is a lot of history to this project and schedules do change. PIO noted we started study Jan. 2005 and they typically take 2 years. PIO reiterated maps etc. on EA website; gave her address and text links and noted we'd be updating them from time to time. PIO noted we're going through all the comments from public, environmentalists, government officials and engineering evaluation in weeding down to the more viable alternatives. She said thanks for the info.--901 a.m.
11/21/2005	2:20 PM	MSG 352-383-8084 Woman said if you could please return the call to Ray Cabana. We need some info on the 46a alignment. any workshops or anything pertaining to it. if you could return the call thank you.

11/9/2005	4:01 PM	Attended Public Meeting, 11/09/05
11/9/2005	8:23 AM	Comment Form 11/09/05: Novina: After careful examination of the proposed alignments in Lake County, I am of the opinion that the blue route (south of S.R. 46) is the most cost effective and disruptive to our citizens. Fewer people will be displaced and the road will be shorter. It makes more sense to follow this path.
11/9/2005	8:22 AM	Comment Form 11/09/05: Ray: I would like to the blue or southern most alignment utilized for the S.R. 46 / C.R. 46 A segment if the parkway. These are my reasons:1. The blue or southernmost route is a more direct, shorter route and thus less expensive road to build.2. By utilizing the blue, the entrance ramp just south of the sawmill can be moved further west to avoid impacting any concern in the area to residents3. Let's keep the parkway south of 46, the way it has been spoken about for years.4. This route makes for a better engineered road in the long run impacts less people fir many years to come.
4/25/2005	11:00 AM	Ray Cabanas 352-383-8084 I got the map you guys sent out with the literature, and I like to see when the first workshop meeting is. PIO gave newsletter and meeting info. he said sounds good, thanks.Ray Cabanas, 29709 County Rd. 46A, Sorrento 32776
Contact Date 10/14/2005	Time 12:45 PM	Ernie Cain Regarding EAC Meeting Comment Form, 10/14/06:Ernie Cain5400 Via Veneto CourtSanford, FL 32771I have reviews the two proposed routes for the Wekiva Parkway and feel the southern route to be the best because it keeps all traffic off I-4 east and west bound and prevents a bottleneck at S.R. 46 and I-4. With the additional apartments and condos planned on S.R. 46 traffic would be unbearable.
Contact  Notes Date 11/7/2005	  Time 11:32 AM	Gary Calhoun  MAITLAND CITY OF POLICE DEPARTMENT ADMINISTRATION  Regarding Gary Calhoun 407-539-6243 said my father lives near Kelly Park and Plymouth Sorrento road, can't make the meeting wed and wanted to know if there was anything they could get to show what we're looking at? PIO referred him to website and initials alternatives, guided him through text links. He called up map and said there's a pink and yellow one that look like hit his property. PIO noted they can go to any of the meetings to give their comments, or ask questions. The info will be the same. He said maybe they'd do that. He asked about timeline? PIO noted study to finish early 2007 with a preferred alternative. Father has about 7 acres, when would someone contacting him? He has couple options he's looking at to do with property, how much he wants to invest in the property. PIO gave overall project timeline and funding status, would be 2012-2015 at this point before construction would begin. He said that timeline helps him a lot and thanks for the info.
Contact Date 12/28/2005	Time 10:25 AM	William Calhoun Regarding PIO continued drafting comment responses: William Calhoun; Harvey Godwin; Carl & Margaret Presti; Charles Lee; Rollin Smith; David Marano; Rollin Smith.--11 a.m.
11/9/2005 11/9/2005	8:11 PM 8:49 AM	Attended Public Meeting, 11/09/05 Public Meeting Comment Form 11/09/05: William L. Calhoun3509 Kelly Park (West)Apopka FLWould like to see ramps at Kelly Park rather than Ponkan.
4/18/2005	12:57 PM	PIO returned call to William Calhoun 407-880-7573 he's in Apopka, he's about half mile from Plymouth Sorrento Road, is that going to affect me? PIO noted that's the center of the study area, but we don't have an alignment yet, won't know until study is done in early 2007. he said he's been wanting to add some stuff to his house, but didn't know if he should. PIO noted any improvements that increase the property value would be taken

into consideration during negotiations if it's determined his property was needed. He said he's going up north for a couple months and having his mail forwarded, but they won't forward second class mail. PIO noted info would be sent first class. He said he'd get it in that case.

4/18/2005	12:31 PM	William Calhoun 3509 W. Kelly Park Rd., Apopka, FL 32712 I got the letter highway department and I would like to be on the mailing list. Give me a call 407-880-7573 to make sure I got the right person.
4/15/2005	4:40 PM	William Calhoun on Kelly Park Road, 407-880-7573 I want to get on the mailing list.
1/20/2005	10:19 AM	PIO emailed Gary/PBSJ requesting phone number for William Calhoun for database.
1/19/2005	10:55 AM	Gary Skaff/PBSJ emailed PIO, copied Mark and Dave/CH2M: "Please add the following person to the Mailing List for the Newsletter: William Calhoun 3509 W. Kelly Park Road Apopka, FL 32712 Thank You"

11/14/2005	3:47 PM	Public Meeting Comment Form 11/14/05:Craig and Bernadette Campbell540 Orange BoulevardSanford, FL 32771I am concerned about the going through Hwy 431 / Orange Boulevard because the Academy of Learning is just down the street from us. The property that I live on is already taking in a lot of water and if a highway is put in my husband and I could not live there. I am sure that it would only make the flooding worse.County Commissioner Brenda Carey already knows about our situation. As far as I know she said we may get some relief when the county widens the road to put a shoulder on but I don't know that can help.The same area has 3 churches, 2 just built and there is a new section of the school too.I hope and prey that you do not this route as it will affect too many people. I think the Hwy 46 route which is an existing road would be much better. Just widen it! Bernadette Campbell.

6/7/2005	2:00 PM	PIO responded to Michelle Caraway email and sent newsletter, copied Sheralyn Brinson	

and Gary Johnson/SCEA: "Hello Michelle,Your query was forwarded to me by Seminole County since I am the public information officer for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass project. As you mentioned, we do not yet have an alignment for this project, which is in the early stages of the Project Development & Environment (PD&E) Study phase. I have attached the latest project newsletter which has some good information about the project, including the schedule for the PD&E, public meetings, etc.We are in the data gathering stage at this time, and hope within the next month or two to begin drafting some initial alternative alignments for where the road might go within the study area. One of the options will surely be replacing S.R. 46 with the parkway in the area mentioned below. We expect to have the initial alternative alignments ready for review and comment at public involvement meetings in each of the counties affected (Lake, Orange and Seminole) in November 2005. We hope to finish the study and have a preferred alignment by early 2007. With the subsequent phases and funding needed to fully develop this project, we do not expect to begin construction until perhaps 2010-2012. Please be advised that any of these phases could take more or less time due to a host of variables.If you'll forward your mailing address, I'll make sure you're on the mailing list for future newsletters and meeting notices. Once you've reviewed the attached newsletter, please don't hesitate to call or email with other questions or concerns."--208 p.m.

Janine Carbon  
Regarding  
PIO responded to Janine Carbon: "Hello Janine, Thank you for writing. Your comments will be made part of the public record for the SR 429-Wekiva Parkway PD&E Study, along with those from other members of the public, government officials, etc. Regarding your comments about development in the project area, it should be noted that Florida as a state is strong on property rights. That is, as long as a property owner meets local, state and other requirements, they are legally allowed to develop their property within the stated guidelines or sell to developers who meet those same requirements. Neither the Expressway Authority nor the Florida Department of Transportation, which are jointly developing the Wekiva Parkway, set those property development guidelines (unless the development affects a state road in FDOT's case). So in large part these agencies have no control over what property owners or developers decide to do with their properties. The agencies do, however, have the responsibility for addressing any resulting transportation needs from such growth. Perhaps you'd also like to share your comments about development with the city and county governments which actually issue the permits for

these developments? In any case, thanks again for providing those comments and attending one of our public meetings."

11/14/2005	11:33 AM	From: Janine Carbon [mailto:janine46@worldnet.att.net] Sent: Monday, November 14, 2005 11:33 AM To: Ms. Mary Brooks Subject: Wekiva Parkway PD&E Study Dear Ms. Brooks, I attended the Workshop on November 9 at Apopka High School and appreciate the attention that was given to my questions and the information that was provided. It is, however, a testament to our greed and lack of concern for the environment that this connecting road "must be built". Allowing housing developments to be erected any old way in pristine areas and then being surprised by the traffic congestion is pretty idiotic or, worse, diabolical. We convince everyone that there's nothing to be done but to build roads to accommodate the unforeseen traffic issues, thus ensuring that the value of the \$400,000 and up homes and the property held by the "power possessing beings" will increase. It is very sad. Even those people in whom a conscience still is active will agree to the recommended construction as they assure themselves there is nothing to be done but go along with it. Very sad, indeed. Sincerely, Janine Carbon 5421 Holtland Drive Apopka, FL 32712 (407) 889-0714

Contact Date 11/10/2005 11/10/2005	Time 8:29 PM 2:36 PM	John & Anita Carlson Regarding Attended Public Meeting, 11/10/05 John and Anita Carlson 29822 Hwy 46 Sorrento, FL 32776 Am not in favor of eliminating 46A and making a new road from Heathrow down to 46. Wildlife issues should be top priority. I would rather my property be taken completely rather than live where I look at an expressway out my front door! I moved to the country to be in the country. This

wildlife area is unique to all of Florida and should have top consideration.

11/10/2005 8:54 AM Public Meeting Comment Form 11/10/05:John and Ann Carlson29822 H (?)Sorrento, FL 32776I could not find the board for east Lake County design concept. I was wondering if the Lake County side of the river would be the same as the Seminole County side where local traffic would have to u-turn or access ramp to new road to cross the river? This seems confusing for drivers local or not be left for local traffic.Safety issues for elderly drivers, etc...

Contact Monte A. Carmack  
Date 11/14/2005 Time 8:32 AM Regarding  
Comment Form:Monte A. Carmack5578 Whispering Woods PointSanford, FL 32771(407) 446-5817The southern 417 Route makes more sense. The S.R. 46 route would only cause more congestion and problems that currently exist as well as destroy the quality of life at the Hwy 46 and I-4 exit.

Contact Nick Carroll  
Date 11/9/2005 Time 2:27 PM Regarding  
Attended Public Meeting, 11/09/05

7/8/2005 2:20 PM PIO dropped most recently newsletter in mail to Nick Carroll as requested.  
7/8/2005 2:12 PM Nick Carroll 407-889-9844 said he works for Southland under Hubbard on 408, a lot of the guys in the office have talked about Mary Brooks, but he didn't think we'd ever worked on a job together. PIO said don't believe so. He said he got the property owner letter, another letter may have gotten into your have vested interest in western connector, when will public meetings be? Suggestion the state buy all the land north of 46 at the river to past Katie's Landing. I live near 46 on that road. It just makes sense. The state's been wanting the land for years and have that as protected land. They have reserve on east side of river, has created a sort of private island on west side. Why hasn't anyone said buy the one mile stretch north from 46? This land in conjunction with the land state already owns would be mile long and ¾ miles wide, added together they're touching each other except for the road. Any forum to voice a suggestion to have that looked at? Buying up all the residents on that side and have it over with. South side with the new subdivisions would be extremely expensive. PIO noted some people don't want road anywhere near that area and don't want their properties taken. Thing I look at is this needs a road, I been out there e since 1980, seems like it 's the logical place to cross the river, logical place to have the state own the whole thing, the state and county combined bought Katie's landing up a couple years ago. I know there's some old folks out there that don't like to see anything come near them. PIO noted there are a lot of pressures up there, developers working furiously to get projects permitted all along 46 and throughout that area, which makes those properties, if we need to acquire them, cost prohibitive. PIO also noted we were tasked as part of parkway and protection act to acquire 4 specific properties the various committees, environmentalists and government agencies decided on, and those have to be our priority. PIO noted we'd just recently closed on new garden coal, one of those properties. PIO said it could happen that once we have an alignment, that some o the property he's referring to may have to be acquired. PIO said he has my email address and is welcome to submit something more formally regarding request to acquire certain properties. He said he is on the mailing list. But didn't' see latest newsletter maybe his wife did something with it.PIO to send another newsletter to PO Box 953334, Lake Mary 32795. their physical address in that area is 135 Nova Drive, intersects Wekiva Park Drive on n. side 46, Sanford 32771--220 p.m.

5/19/2005	3:29 PM	PIO responded to Patricia Carter: "You're welcome. I'll get the map out to you by early next week."
5/19/2005	3:25 PM	Patricia Carter responded to PIO email: "Hi Mary, Thanks for responding so quickly! Our address is 4152 Ondich Road, Apopka, 32712Please send me the large map of the area. I
5/19/2005	2:55 PM	PIO responded: "Hello Patricia,We don't have an alignment at this time for the S.R. 429-Wekiwa Parkway & S.R. 46 Bypass; just a rather broad study area. I understand it may be difficult to find your location on the current study area map. We are working on getting improved aerials which should make that easier. If you want to send me your actual address, I'll check it against the study area database. Let me know also if you want me to send you an 11"x 17" copy of the study area map.Please keep in mind that even if your property is within the study area, not every property within the study area will be affected by this project.On Jan. 19 the FDOT and the OOCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others are now in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006.We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiwa Parkway and S.R. 46 Bypass within the next week or two. Again, send me your address to get on that mailing list to receive the newsletter, as well as public meeting notices, etc.I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."--255 p.m.
5/19/2005	2:20 PM	PIO worked on response to Patricia Carter. Didn't see her on the study area database. Checked OC property appraiser site map to get her location; still hard to tell, may be just outside the study area.
5/19/2005	8:32 AM	Carter, Patricia M. [carterp2@ocps.k12.fl.us] emailed: "Hi Mary,We live on Ondich Road, west on Effie Rd. Do you know what area of land is proposed to be used for the Western Connector? I can't tell from the map. When is the construction for the road going to begin? Thank you for your time! Tricia Carter"

Contact		Larry Castle	The Fairways
Date	Time	Regarding	
6/3/2005	3:50 PM	PIO returned call to Larry Castle 352-385-3942 who said, I just had a question; live in the Fairways in mount Plymouth, right off 435 off Proon, PGA Drive. I was wondering in relationship to us, where the beltway will be coming? 435 is in back of our house, there's Oak Hill Mobile Home Community there, does it go behind the mobile home community, that's what the map looks like? We live on the Mount Plymouth golf course. It looks like it misses that when it leaves 46 and then comes back just inside the OC line to hit 435. PIO noted no alignment at this point, just study area. Noted I was in meeting today where it was noted still gathering data. Once that's done will start coming up with some initial alternatives for review at public meetings in November. He said so what you've got right now is wide like a hurricane swath? PIO noted, exactly. PIO asked if he'd received any info on the project? He said we got something today, a purple pamphlet. PIO noted that's the newsletter and glad they received since we had some issues with the mailing house. Castle (cq) he asked would the road definitely stay within the study area? PIO noted that's certainly the intention, but it may be determined that soil or other conditions will dictate	

we may have to go outside that to be able to build the road.He asked when the road would be built? PIO noted PD&E schedule, with other phases and funding still to be determined, no earlier than 2009, and perhaps as late as 2010-2012. He was thankful for the info and call back.

6/3/2005	1:13 PM	PIO received MSG: "My name is Larry Castle. I live in Sorrento. Please give me a call. I would like to ask a couple questions about the Wekiva Parkway. My number is 352-385-3942 Thank you.

Contact Date 7/20/2005	Time 10:58 AM	Dan Cetrone Regarding Email to Dan Cetrone bounced back because too large. PIO resent with only the study area PDF.	Rock Springs News
7/20/2005	10:44 AM	PIO emailed Dan Cetrone thanking him for the latest edition of Rock Springs News with article on New Garden Coal parcel acquisition: "Dan,Thanks for the latest copy of the Rock Springs News and the story on the New Garden Coal acquisition for preservation. Please let me know if there's any other information you need regarding the Wekiva Parkway or Maitland Boulevard Extension and I'll be happy to forward that. I'm also attaching a revised study area map for your use, as well as the latest Maitland alignment, based on the 30% plan completion."	
7/19/2005	1:30 PM	PIO received copy of Rock Springs News July 2005 edition with brief item on purchase of New Garden Coal parcel. They used the press release nearly verbatim.	
6/17/2005	1:54 PM	Dan Cetrone/Rock Springs News responded to PIO email: "Thanks Mary for the additional info. Great 'stuff'. Let me know how you like the June issue. And keep sending the info that impacts our 'neighborhood'.Dan	
6/17/2005	7:30 AM	PIO responded to Dan Cetrone/Rock Spring News: "Hello Dan, Thanks for getting back to me. I'm attaching the latest project newsletter that has some graphics maybe you can use as well as a wealth of info. Look forward to the June issue. Have a great weekend!"	
6/17/2005	12:36 AM	From: DAN CETRONE [mailto:dance55@ix.netcom.com] Sent: Friday, June 17, 2005 12:36 AM To: Mary BrooksSubject: Re: SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study The Wekiva Parkway Run is scheduled for the June issue - and your name is being added to the mailing list.If you have any further news about the Wekiva Parkway Run, send it to me by e-mail and we can add it to the June issue's article, - or - run it in the July issue. You can send us the news you want to see in the paper, - and add a little note to me, saying you'd like to have it in the paper, and I'll make sure it appears. Any pictures would	

definitely help. Is it possible to make sure Luis Alvan sees the paper? If he's not in your office, maybe you can send him an e-mail with the website address, and he can see the PDF of the paper. [www.rockspringsnews.net](http://www.rockspringsnews.net) Dan Cetrone, Publisher ROCK SPRINGS NEWS

6/16/2005	1:06 PM	PIO emailed Dan Cetrone//Rock Springs News thanking him for premier issue and asking when would the story on the Wekiva Parkway run? Would love to have a copy of that issue in particular. Thanks again.
6/15/2005	2:30 PM	PIO received in mail premier issue of Rock Springs News from Dan Cetrone/publisher, but did have the article he mentioned on the project.
4/8/2005	9:30 AM	Discussion during weekly PIO meeting that website server was down yesterday; someone supposed to be looking at it at 11 a.m. today. PIO noted Rock Springs News said they had trouble downloading maps. Dawn noted some people have trouble because of the settings on their computer. We noted we could download the maps just fine.
4/6/2005	3:06 PM	PIO drafted and sent general project info and study corridor graphic to Dan Cetrone/Rock Springs News and noted I could do a phone or in-person interview if he needed further info and pictures: "Hello Dan, and good luck with your new venture! I'm sorry you had difficulty downloading S.R. 429 info. I was just able to see the Western Program PDF with no problem. In any case, I've attached the corridor graphic for the S.R. 429 Wekiva Parkway & S.R. 46 Bypass Project Development and Environment (PD&E) Study for your use. We do not yet know how these projects will affect your area as we do not yet have an alignment. Rock Springs Road is a fair distance east of Plymouth Sorrento Road, which is at the center of the PD&E Study corridor in this area. The Study, being done jointly by FDOT and OCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary S.R. 429-Wekiva Parkway & S.R. 46 Bypass alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). Subsequent public involvement meetings are tentatively scheduled for spring-summer 2006 and late 2006. We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We are in the process of drafting the first Wekiva Parkway newsletter, which should go out before the end of April. The attached graphic also shows a version of the S.R. 414-Maitland Boulevard Extension, though that alignment continues to be updated as final design is underway. The Expressway Authority anticipates having the Maitland Boulevard Extension plans at 60% completion in the early fall, when we will hold another public involvement meeting. We hope to begin construction on the first sections of the S.R. 414 extension in summer 2006, with the road opening to traffic in 2009. I pulled your mailing address from your website, so you are in the project database to receive the newsletter, meeting notices, etc. I hope you find this info helpful. Please feel free to call or email with other questions, for other material or to set up a phone or in-person interview."
4/6/2005	2:15 PM	Bryan Douglas/OCEA PIO responded re: Rock Springs News request: "have fun!"
4/6/2005	2:10 PM	PIO checked Rock Springs News website to verify validity of media request. It is a new publication beginning in April.
4/6/2005	2:05 PM	PIO emailed Bryan and Dawn with heads up that Rock Springs News has asked for interview and Wekiva Parkway project info, and that I'd go ahead and respond to request unless he wanted me to do differently.
4/6/2005	1:56 PM	156 p.m. PIO received email from Dan Cetrone/Rock Springs News Editor: "I am the editor of the new Rock Springs News, serving the residents surrounding Rock Springs Road. The work planned for 429 is important news to these residents. I went out to your website and when I tried to click on the pictures - the link did not work. Basically, I'm looking for pictures and some information that I can use to inform our readers about HOW this road will impact their lifestyle. I would appreciate the opportunity to talk with you. I'm assuming

the easiest way to do that would be to talk by phone. However - I would prefer to be able to talk in person, and even take some pictures.If we could meet in your office, perhaps I could take some digital pics of your maps, etc.Please let me know if it's convenient for you to meet with me in person or if you'd prefer a phone interview.You can see the Preview issue of the Rock Springs News on ourwebsite: [www.rockspringsnews.net](http://www.rockspringsnews.net)Just click under the picture of the issue on the right.Thank You,Dan Cetrone, EditorROCK SPRINGS NEWS"

6/6/2005	3:42 PM	PIO responded to Bernie Ernie Chandler email: "Hello,Thank you for your comment. It will be reviewed along with other public comments, including comments from Lake County residents anxious to see some sort of improvements made in the area of S.R. 46 due to heavy traffic coming out of Lake County and all of the current development occurring there.This project includes the S.R. 46 Bypass, which was requested by the Mount Plymouth and Sorrento communities.This project is in the early stages of development. The Project Development and Environment (PD&E) Study is scheduled to conclude in early 2007 with a preferred alignment. With the subsequent phases (final design, permitting, funding, etc.) construction is not expected to start until 2010-2012."
6/3/2005	6:07 PM	PIO received email from Bernie Ernie Chandler (Irene N Chandler [fredpoe2@juno.com]) all CQ): "You'r the contact person for questions, comments, or concerns, so I thought I'd make a comment concerning the Wekiva Parkway. Those 14 traffic fatalaties and 39 bear kills on SR-46 were all caused by people from Orange County coming up here to Lake County. We don't want your road, or your traffic, in Lake County or all of the development it will bring. Leave us alone, Keep Out!!! Have a nice day. Bernie Ernie Chandler"

11/9/2005 5:02 PM Attended Public Meeting, 11/09/05

11/9/2005 8:58 AM Public Meeting Comment Card 11/09/05: The original policy set up by the Wekiva Parkway and Protection Act provides the Neighborhood Lakes to be purchased and partially used for the new road. This would be the best location for the interchange. This would allow the most western choices and keep. Rock Springs Run State Reserve and Seminole State Forest to have minimal disturbance. The Authority has a wonderful opportunity to make the best choices for the future citizens of the area, not just the temporary builders and developers. Thank you, for the opportunity to express myself.

12/30/2005	2:03 PM	Joyce Cherney PIO continued drafting comment form responses: Loretta Satterthwaite, Betty Ann Christian; Russell & Katie Moncrief; Jan & Phillip Martin; Robert Curry/Lake County Conservation Council; Nancy Prine; Don Sharp; James & Sharon Bramblett; Arlen Charters; A.T. Scofield III; Rory Trumbore; Deborah Green; Lou Fabrizio; W.S. Bennett; Roy & Marilee Chesak; Ina Boyd; Joyce Cherney; John Munfield; Susan & Robbie Manley emailed)
12/23/2005	8:35 AM	Comment Form 11/09/05: I have land in Plymouth Sorrento Road. I have lived there for 18 years. I don't want to change my life style. I love my land and neighbors. The yellow alignment seems to have the least density seems to have the least density, and the best route that I can see. I will fight to keep my land and my lifestyle. Please don't destroy my security and my happiness. J. Cherney
10/31/2005	12:31 PM	Candace/PIO followed up with Ms. Cherney to see if she found maps okay. She did and would like to receive a newsletter. She said right now the alignment goes right over her land and she has lived there for 20 years and does not want to lose her land. PIO encouraged her to come to the public meeting Nov. 9.
10/28/2005	12:30 PM	Joyce Cherney told Candace/QCA she wants Map of Wekiva Pkwy. (407) 886-4443; 5902 Plymouth Sorrento Rd, Apopka FL 32712. jcherney4@netzero.com PIO directed her to website.
8/30/2005	12:36 PM	PIO returned call to Joyce Cherney, who said "I'm up in the air don't know which way to go. I see everyone has for sale signs and wondered do they know something I don't." She lives by Plymouth Sorrento and Ondich. She has seen the study area map, "and I'm dead in the middle of it." Have we got any kind of thing showing where this is going? Are you changing this road out here? PIO explained PD&E study status and process, initial alignments to go to government agencies for review and approval in September, working toward public meeting on initials in November. PIO asked if she'd received the previous newsletter, would have come out late May - early June? She said don't recall getting anything back then but she was out of town. PIO asked for her info to ensure she received project info. 5902 Plymouth Sorrento, Apopka 32712She asked when we'd know something? PIO gave her PD&E study schedule. Everybody is selling their places and I got concerns thinking there are some new developments that have occurred. Asked where meeting will take place. PIO said we're in the process of nailing that down now, will be included in the next newsletter to come out late September.Do they have date they feel they'll get construction underway? PIO gave overall schedule.My neighbor was talking about a rail system going in here once this is done, do you know anything about that? PIO noted I'm not aware of any rail component for this project, but don't know if something separately is being looked at for the area down the road.She said the fellow across the street just sold property that was in their family for 100 years. That really flipped my switch . My next call is talk to the realtors and see what they know about what's going on, why people are selling. PIO noted you could talk to them about any disclosure requirements at this point. That satisfies some of my questions for now, tough I still nee to know where it's going.PIO noted also can find project info on the website, gave address She said that helps and thanks so much for calling back.--1250 p.m
8/30/2005	9:40 AM	Joyce Cherey left MSG I live on Plymouth Sorrento Road and that seems to be right in the middle of Wekiva Parkway study. I haven't heard any thing for over a year on what progress has been made. Trying to make some decisions on whether to keep my home or not. Trying to get idea of what area going to be affected by this new route. Please give me a call 407-886-4443 looking forward to hearing from you.

As requested, I have enclosed the Orange County conceptual project layout - Sheet 2, and a public comment form. As noted, the PD&E study is scheduled to conclude with an alternative selected by March 2007.Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at www ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at @ 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement."

11/22/2005 10:21 AM PIO worked on OC conceptual alternatives letter for Min Cho as requested, included comment form and sent.

11/21/2005 4:35 PM PIO returned call to Min Cho 407-880-1115, let her know I could send her the OC alternatives map. PIO emphasized no decision was made at the meetings; they were informational and to get feedback. She asked when would the decision be made? PIO noted study scheduled to conclude with a selected alternative by March 2007. PIO asked if she had any other questions right now? She said she just wants to see the map with where the road will go. PIO emphasized that these are alternatives, and nothing has been decided at this point. She said okay, thanks.

11/21/2005 12:24 PM PIO returned call to John Byrd/rep. Brummer's office to let them know I got MSG and would get back to min Cho. he said you didn't need to call me back. PIO said just wanted to let him know I would get back to her.-

11/21/2005 11:20 AM John Byrd/rep. Brummer's office left MSG we have a lady named Min Cho called you, 407-880-1115, she came by here little while ago and I gave her article from Apopka chief

that was written about the parkway meeting held back on Nov. 9 at the Apopka H.S. also wrote down EA website if she needed additional info. I think she's called you this morning and left you a MSG; if you could give her a call we'd appreciate it. she may have some more specific questions. thanks and have a happy thanksgiving.

11/21/2005	10:52 AM	Min Cho left MSG I was not able to attend the meeting that you had Nov. 9. I would like to know what was the decision about this highway? is it possible can I have the map of what it was decided to build. 407-880-1115 my address 4068 Plymouth Sorrento road, Apopka 32712 if you have a map ... I would be very appreciate. thank you bye
3/17/2005	9:55 AM	PIO worked on concept letter for Min Cho as requested and sent.
3/17/2005	9:25 AM	PIO returned call Min Cho. She said they said they don't want to go up Plymouth Sorrento road but up by round lake. PIO noted no alignment yet; that still has to be determined. She asked when will they decide? PIO noted study should be completed early 2007, but we plan to have first public meeting for review of possible alternatives maybe in November PIO asked if she had copy of study corridor map? She said no. PIO said I'd send that to her along with a letter of where we are in the process. She said that would be very helpful please send to 4068 Plymouth Sorrento Road, Apopka, FL 32712.
3/17/2005	8:15 AM	Ms. Cho left MSG "I met you at the meeting at city hall. You talked about expressway. house is on Plymouth Sorrento road. Wan to know if you have an idea of the route yet. If you have time call me."

Date Time Regarding  
11/18/2005 3:56 PM PIO prepped OC conceptual letter for Cindy Cioci and sent. "Cindy Cioci3150 Phils LaneApopka, FL 32712RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear Cindy,Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, I have enclosed the Orange County conceptual project layout - Sheet 2. As we discussed on the phone today, the PD&E study is scheduled to conclude with an alternative selected by March 2007.Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at @ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement."

11/18/2005 3:41 PM PIO called back Cindy Cioci 407-889-0305, 407-491-2506 c, left detailed MSG on home number relaying potential impacts to property, noting maps are on website, gave address and text links, and noted if didn't have internet I could mail her 11x17" map for OC. Let me know.PIO reached Cindy on her cell and relayed potential alignment and/or IC impact. She said her house is 3rd house on Phil's lane, its 400' off Phil's lane, my property and Dr. Diaz only two homes that sit back on easement. She said understood might affect them. She asked if I could see the house on my map? PIO noted could see houses on the large meeting board, but not on the 11x17. PIO noted can zoom in on the website material and see houses.She said AOL won't download the map. She said her property is 10 acres, if it only touches east side, would they have to take the whole thing or could I stay there? PIO noted we do partial takes, only want to buy what we have to, unless the landowner negotiates a total take (they don't want to have it in their backyard, look at it, etc.) and if we can justify it will try to accommodate them. . She asked it'll be another year before we know anything? PIO noted PD&E study to conclude by March 2007. She said would they start buying property then? PIO noted no, want to get into final design first and get some things nailed down, could shift and miss properties, will be some changes between PD&E study and final design for number of reasons. PIO noted final design not fully funded, nor funding for ROW acquisition or construction, so that funding will have to material before they start buying property. Could be 2009-2010 or longer depending on funding. She said she understood. PIO asked if she wanted me to send the 11x17? She said yes, would make things easier.

11/18/2005 3:15 PM PIO checked Cindy Cioci property location as requested. Her 3150 Phils Lane, Apopka 32712 property is NW of Ponkan and P-s, right where the yellow and pink alternatives diverge, and also in the potential IC area.

11/18/2005 10:17 AM PIO returned call to Cindy Cioci 407-889-0305, left MSG to call with address of property in question. Also noted all the maps on the Ea website, gave address and text link.

11/17/2005 10:14 AM Cindy Cioci left MSG I live on stone? prone?? trone?? lane, in the unincorporated part of OC. Was unable to attend the meeting because my mother was in the hospital but I would like to talk to you because of something I read in the Apopka chief from a neighbor saying their homes would be involved. so if you could call me please at 407-889-0305 at your convenience I would appreciate it. thank you.

Date Time Regarding  
5/25/2005 11:20 AM Joe Cirillo 407-322-6914 said he gto the property owner letter, what's the status of this thing? PIO noted no alignment; gave study and construction timeframe. He said so if any property owners thinking about selling their property, they'd have to let their realtor know? PIO noted not sure of disclosure requirements given we don't have an alignment and not all properties within study are will be affected, but I personally would be upfront, present as much info to realtor and prospective buyers as possible. He said you can't tell the prospective owners to buy and in a couple years you might lose the house. You know what's going to happen, they're going to pass. Why does it have to take so long? PIO noted there are a lot of homebuyers and sellers and realtors in that predicament. PIO noted there is a long list of tasks that have to take place as part of these studies, not only public meetings, data gathering, but meeting with government and other stakeholders, permitting, etc. That's why it tends to take a couple years.He asked if we sent info via email? PIO said yes; he requested info be emailed to him at Harp1969@aol.com PIO aid the newsletters went out Monday, so he should get it by end of this week or next week. He said he would appreciate being kept informed. --1133 a.m.

Court Reporter Comments 11/10/05:James Clark30947 Top of the Hill DriveMount Dora, FL 32757(352) 383-7263Representing: SelfDate: 11/10/05Mr. James Clark: I live on the proposed widening, and I'm afraid of losing my house, one thing.And if that doesn't happen, I am nervous about the noise from the traffic and the super highway that's going through. I'm very, very close to it.I'm also on a hill that if they don't take my house or land, I'm worried about erosion, because it is very, very steep. And if they build out to the edge of the right-of-way, what would they do? Would they put up a retaining wall? Maybe even a noise barrier, or something?Ms. Kathy Jorza: I didn't see were you were.Mr. James Clark: I'm right near the intersection of 441 and 46, the top of the hill, which is the first hill.Ms. Kathy Jorza: You're on the south side of 46?Mr. James Clark: Yeah.Ms. Kathy Jorza So you would prefer the widening to the north?Mr. James Clark: Yes, definitely.I'm concerned about if we don't have to move, how are they going to give us access to the road from out street?That's a very dangerous situation, the way it is now. I have been here a year and a half and I have seen two accidents right at the end of my street.I believe they were both caused by people stopped to turn into the street and somebody

rear ending them. I know that was the case in one of them, but the other one I'm assuming that's the reason. So the visibility coming over the hill is not good, they don't see that there is two streets where traffic could be coming out of. Actually there are three, but the first two streets are the ones that would be in danger. Are you familiar with that particular area? Ms. Kathy Jorza: By aerial and by the design plans, not actually being there I know I hear there is some vertical change in elevation out there. Mr. James Clark: Yeah, there is. Ms. Kathy Jorza: I know that's one of their main concerns in putting in a new alignment along there, is looking at that elevation change there, so that would be one of the safety concerns that would be considered in designing the new roadway. As far as the controlled access goes, also you would have certain points where you would have an intersection with a light. Mr. James Clark: Yeah, that would help. Ms. Kathy Jorza: They would probably divert traffic around to side streets and out to the road and traffic light. But there would definitely be traffic lights along State Road 46. It would be a much more updated facility. Are you familiar with State Road 46? Mr. James Clark: Yes. Ms. Kathy Jorza: Now that's a six lane second, urban section, with street lights at the intersections, with sequencing at the intersections, and that would be very close to what State Road 46 is. Mr. James Clark: That's mostly commercial there. Ms. Kathy Jorza: Yes. Well, that area is. But probably that is a wider typical section than State Road 46. And it depends on whether we go to four lanes, or six lanes. I'm trying to give you an idea what it would be like where you would go to a median cut, and there would be a signal there, you know, so you would not have like what they call the suicide lane, bi-directional turn lane through the middle, you would have a median and you could cross, you'd be able to make turns at the signals, so it would be a much safer situation for you. Mr. James Clark: We moved very close to 46-I mean 441-and I guess we're just having a conversation here, but it is being recorded. Where 46 and 441 meet, there's three lanes all the way up to that point? Ms. Kathy Jorza: It could be. And that interchange would be rebuilt and so it would be a safer interchange as well. If we would go with six lanes, it would be all the way to the interchange. And if we go four lanes, it will be four lanes all the way to the interchange. Mr. James Clark: Pretty much all the traffic is on 441. Ms. Kathy Jorza: Right. Mr. James Clark: And there are traffic lights all over the place, it would be traffic everywhere. Ms. Kathy Jorza: Well, we have some pretty good folks as far as designing roads goes, and certain criteria has to be met. Safety is primary. We'll take care of straightening that out. Mr. James Clark: The 441? Ms. Kathy Jorza: The interchange, yeah. Mr. James Clark: The interchange? Yeah, that's fine. You get up past Reningers, up to where Publix and Lowe's are, from that point on there's a traffic light almost every street. Ms. Kathy Jorza: Unfortunately that's not a part of the scope of this project, you know, so we would not be doing anything there. Mr. James Clark: I don't see how things will improve down in that area from the project. Once you get onto 441 it will be a logjam and traffic will be backed up on 46, if it becomes a popular route. Ms. Kathy Jorza: We are looking at more of the traffic coming from Lake County going to Orange and Seminole, than going to Lake. Mr. James Clark: Okay. That's different. I was thinking of it going the other way. Ms. Kathy Jorza: On the other hand, I don't see diverting traffic from using 441, either way, 46 or 441, so either way they were coming to this point and north of the interchange. Mr. James Clark: But this is Wekiva Parkway thing, will that add traffic up to 441? Ms. Kathy Jorza: I would have to look at the traffic numbers. I'm not sure on that, but I would say probably not. I think most of the traffic, like I said is headed to Orange County or headed to Seminole from Lake County. Mr. James Clark: So the increased use would be because of added population, not because of the diversion of the road? Ms. Kathy Jorza: Yes. There's a lot of development going on. Mr. James Clark: Not diversion of the road but more people using it? Ms. Kathy Jorza: Yes. The Witness: I'm having a little bit of a hard time understanding what this all about. Ms. Kathy Jorza: Well, ultimately the reason is to have a belt way around Orlando. This is the western beltway. It will eventually go from Osceola County to Seminole County, so instead of having to take I-4 through downtown you'll be able to hop on an expressway and bypass Orlando altogether. Mr. James Clark: I-4 is not a good road to take? Ms. Kathy Jorza: No, I-4 is very congested. You have not been on I-4 around 4:00 o'clock in the afternoon? The Witness: No. Ms. Kathy Jorza: You can walk faster. It's a regional transportation goal, but provides access. It's much easier for people from Lake County to get to Seminole, Orange, and visa-versa. So it really helps that flow of traffic. Right now there's a lot of old out dated roads out there. As we spoke, as far as elevation and sharp curves and so on and so forth,

those are just not safe. Putting in a newer facility to meet the design standards that we have to meet makes it a much safer situation. That's another factor. If we don't do anything, State Road 46 will not get any better, it will get much worse. So we need to do something with that road, one way or another. So finding the best solution that makes most of us happy is what we're looking to do, and that's why we're asking for your input

Mr. James Clark: So the idea is to get to 95 easier? Ms. Kathy Jorza: To I-4. If you wanted at to get to 95 faster, something like that absolutely. Mr. James Clark: I take 46 to 95. Actually I take 44. I like that better, that's a better road. Ms. Kathy Jorza: Somebody told me to take 44 home tonight. Mr. James Clark: I don't know where you live. Ms. Kathy Jorza Detona. Mr. James Clark: 44 is nice road. Ms. Kathy Jorza: Takes me a little out of the way, but it might be safer. But that's the key here, is safety. The area is growing and it will not stop growing, and so roads are going to get worse and have to do something. Mr. James Clark: What is curious, between Mount Dora and Apopka on 441 the traffic is very light. Ms Kathy Jorza: I didn't find that coming up here today. Mr. James Clark: Apopka and 441 to Mount Dora was busy? Ms. Kathy Jorza: Yeah. It was pretty busy. It wasn't like I-4, but it was pretty busy. But if you look at the traffic fatality board, there have been a lot of fatalities on 441 between Mount Dora and Apopka. Mr. James Clark: Probably because they go to fast. Ms. Kathy Jorza: Exactly. So if we can pull some of that traffic from 441 over to Wekiva Parkway, which would be a safer facility, the roadways would become that more safe. Mr. James Clark: You would not take the Parkway if you were heading up 441, or to Lady Lake? Ms. Kathy Jorza: Probably not, but you might. Mr. James Clark: Well, it takes you way out of the way. Ms. Kathy Jorza: You would have to take the Wekiva Parkway--Mr. James Clark: --and then 46? Ms. Kathy Jorza: Yeah. You are probably right. But if your plan was to go to Mount Dora and then take 46 over to I-4 or 44, then you would take Wekiva Parkway instead of going that way. If you are heading to points east you would take the Wekiva Parkway, if you're heading to points west you would stay with 441. So it should lighten the traffic as far as that goes, make that a safer road as well. Mr. James Clark: I'm fearing there's going to be other projects with congestion on 441. Ms. Kathy Jorza: I would guess so at some point in the future they would look to widening that. It is four lanes right now. Mr. James Clark: They are in the process of widening from Mount Dora up to 27. That's all.

11/14/2005	1:57 PM	Public Meeting Comment Card 11/14/05:Barbara Compura141 Ross Lake LaneSanford, FL 32771As the Parkway along 46 is built on the north side so that it does not take land from the Ross Lake Shores development. Also the houses nearest the parkway at this point should have a wall built for noise protection and pollution protection. There are too many interchanges in Lake County - Totally unnecessary- The traffic along 46 is presently to difficult in peak hours. How will construction be handled so the problem is not added to? I have a hard time just getting on 46 from my development when I go to work now.

Box 3253302 - 3316 Plymouth - Sorrento RoadPlymouth, FL 32768(407) 886-7917Representing: Self and Firm Erinon NurseryDate: 11/09/05Mr. Jerry Conrad: I own a nursery on Plymouth - Sorrento Road. The back part of my nursery is directly impacted it appears by the structure. If the back part of my nursery is taken the entire nursery will be unsuitable, it's the highest part of my land. Part of the land is potential wetlands at times and if I have water come up the Wekiva I have to move my plants up there.I have the largest number of varieties of camellia plants in the world. Off course my entire retirement is here. But regardless of that directly behind me they are going to take some land, including some homes, and leave part of the land.It goes up the hill, and that's the high point. Moving the road back 150 feet will simply take the rest of the property that those people are already losing their

homes, most of them already wish that's the way it happens, and will save not just my nursery, but other nurseries in the area. What I really would like to see right now is for a site engineer to come out, let me take them and sow them, physically look at the property and they will understand. And that's all I want to say in a nutshell.

11/9/2005	2:40 PM	Attended Public Meeting, 11/09/05
4/21/2005	12:58 PM	PIO returned call to Jerry Conrad PO Box 325, Plymouth 32768, p 407-886-7917, have seen surveyors within about quarter mile , this one has been into the study area for years, I'm not arguing the fact we need a road, but I don't want to see this area developed, don't want it to become a metro west. If they're going to come through here then I've got a problem, they're going to hear from me. PIO noted no alignment, just doing data gathering and hope to have initial alignments for first public meeting in November. He said how many alignments do they need? They had a bunch of alignments and then they said that wouldn't work and had to start all over again. He went to all the public meetings. He said if we'll wait 9-10 years we can buy him out and that'll be his retirement. PIO gave project timeframe, no construction before 2009. He said that's not long enough. PIO gave newsletter status and website info. He said he's been to site, it's one of his favorites. PIO emphasized not every property within the study area will be affected. He insisted we had an alignment that would affect his property.--104 p.m.
4/21/2005	10:32 AM	Jerry Conrad left MSG PO Box 325, Plymouth 32768, please add me to list for info on the extension of the 429. 407-886-7917

Contact		Terry and Gerri Copper
Date	Time	Regarding
11/14/2005	4:29 PM	<p>Terry and Gerri Copper5350 Deepwoods CourtSanford, FL 32771We respectfully request that the Seminole County Expressway Authority select the southern route for the proposed Wekiva Parkway. Living in Lake Forest for 5 ½ years we have seen tremendous growth in this area and increased congestion on S.R. 46 due to new condos, townhomes, and apartments at International Parkway, Orange Boulevard, and Oregon Avenue as well as the growth areas west of these streets. Additionally, there is an increase in the traffic from the continued growth of Seminole Towne Center Mall. Normal growth is creating a large increase in traffic in our area and construction of an expressway on S.R. 46 would create an even greater business disruption and construction chaos at the I-4 and S.R. 46 intersection. Connecting to the existing S.R. 417 is definitely more logical and would prevent greater East-West traffic on I-4. We would like to pled with you to choose the southern route for the Wekiva Parkway that connects with S.R. 417 and help prevent a greater traffic nightmare for our area. Perhaps the expense may be a little greater in the beginning but it is the logical choice since choosing S.R. 46 would require more road construction and reconfiguration to accommodate the increased traffic as this area continues to grow. Considering that land has already been purchased for the Wekiva Parkway and people have already been displaced, it seems logical that the southern route is therefore appropriate and would be the best way to serve our area.</p>

10/14/2005	1:41 PM	<p>EAC Meeting Comment Form:Jeffery and Susan Cornett728 Ashgrove Terr.Sanford, FL 32771As a homeowner in Seminole County, we are against the continuation of 417 Greeneway - Expressway) on the S.R. 46 corridor for the following reasons:1. the increase traffic congestion from new condos, townhouses, apartments at International Boulevard, Orange Boulevard, Oregon Street and S.R. 46 will only aggravate an already congested S.R. 46.2. An Expressway on S.R. 46 would create greater business disruption and 'construction chaos' than would the southern alternative. This would be a true especially at the already S.R. 46 and I-4 intersection.3. Choosing a route that connects the Wekiva Parkway (the western beltway) to the existing S.R. 417 (the Greene Way) at I-4 is more logical and keeps E-W traffic off I-4.</p>

32757 Since the thrust of doing the Wekiva Parkway was to provide better and safer transportation and protect the watershed of the Wekiva River and its natural flow and environment these are two essential points. 1. The most northern path of the parkway in the Mt. Plymouth area would protect the scrub jay habitat that must be purchased as part of the total project. 2. The proposed interchange at the Wekiva Mitigation Bank should be moved further west to the new intersection of 46 and 46A as proposed. This would avoid any ground level road work and the elevation of the parkway over wildlife corridor # 1 could begin there as one more reasonable project to be engineered there.

Contact		Christine Costigan
Date	Time	Regarding
4/11/2005	1:40 PM	Christine called back, new Heathrow Country Estates in Sorrento, they plotted out map with back exit to 429 as one of the sales features for the development, making it a quick trip to Orlando. PIO noted we don't have an alignment, so would question any alignments she was given, only have a study area. She said they boosted up the prices for that. Sales center in the development 21600 Covered Bridge Lane, Sorrento 32776 They gave us map with proposed western expressway toll with exit right outside of the development. The way they left it was it was going to be done in 2008-2009 and was going to be less than a mile from their gate. Map has existing 429 and then dotted with exit near I-4 near the other Heathrow. PIO gave her briefing on timeframe and status of study, noted construction wouldn't likely start until 2009-2010, so would be 2011-12 before first sections were open. She said that was the main reason they were considering the property without that, it's just a very expensive place out in the middle of nowhere. Costigan, 34425 tiffany lane, Eustis FL 32736 she said they had doubled the price of the units because of proximity to the expressway. PIO said maybe they were looking at the old 429 extensions proposed alignments, but that project was scrapped a while ago in lieu of the Wekiva Parkway. PIO said if she speaks to the sales person again she's welcome to give them my name and number so they can get the correct project info. She said she definitely will be talking to them, though she doubted they would take PIO on the offer for accurate info.--155 p.m.
4/11/2005	1:30 PM	PIO returned call to Christine, left MSG that we are in early stages of PD&E Study, should finish early 2007, didn't think Heathrow Estates was within the study area but asked her for exact location in question to confirm. Left number for her to call me back. Alternate number given by her machine I think was 352 455 6955?
4/11/2005	10:16 AM	Christine Costigan left MSG husband and I about to purchase home in Heathrow Country Estates, they're telling us the western connector is confirmed and it will be done in next 5-6 years, just before we purchase the home we want to make sure the project has been actually approved and will eventually come to fruition before making such a large purchase. . If you could give me any insight or info that that is correct or fine tune it for us, we would appreciate it. 352-589-8828
Contact		Jerry Cotter
Date	Time	Regarding
1/28/2005	4:03 PM	PIO returned call to Jerry Cotter. He said he's trying to get, looking at property along Plymouth Sorrento, was trying to see, there was reference in some documentation about where the exit was going to go in, one report said south of Kelly park road, then. jerrycotter@hotmail.com , 14200 Abington Heights Dr., Orlando 32828. The property we're looking at purchasing is right in the middle of that thing, coming up from 441 where it starts to widen in the Kelly Park Road area, obviously three is going to be some growth, single family houses are popping up don't know how they're going to avoid it. PIO explained PD&E just started last week, no alignment yet, hope to have alternatives for

public review at meeting November this year.He asked if the road could wind up being outside the study corridor? PIO said obviously they'll be looking first within the corridor, but can't say definitively that due to soil, hydrology or other reasons the alignment might not have to veer out of that area in some location. But obviously the focus at this point is within the study area as defined by Wekiva river task force and Wekiva river basin coordinating committee. PIO said he's welcome to check in from time to time, and we hope to have a newsletter out on the project within the next couple of months. He was thankful for the info.

11/14/2005	4:15 PM	Greg Crocker385 Meadow Beauty TerraceSanford, FL 32771I think we should use the traffic roads that already exist with the SR 46 200 right of way. I strongly disagree with the need to have 2 lanes on either side of the expressway for local frontage access. I believe the option of putting the expressway over the existing SR 46 road that already exists is the best option to not to disturb the neighborhoods that have already been built off of SR 46. Taking frontage roads and the expressway all the way to I-4 makes the most sense and is the cheapest since no additional land would need to be purchased.

Date	Time	Regarding	
11/9/2005	9:09 AM	Attended Public Meeting, 11/09/05	

4/14/2005	9:10 AM	<p>PIO prepared project update and emailed to Ed Crossfield/Caribbean Growers: "Hello Edward, It was a pleasure speaking with you this morning. As we discussed, there is no alignment at this time for the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass. On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment PD&amp;E Study, and we're currently in the data gathering stage. In fact, letters are scheduled to go out today and Friday notifying property owners that surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&amp;E Study, which is expected to finish in early 2007. The study also will determine, among many other things, which part of this roadway will be an at-grade arterial (similar to US 441), and which portion will be a raised or elevated toll road. The Expressway Authority also has begun the required discussions with owners of the four parcels recommended for conservation acquisition. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, we probably wouldn't begin construction on these projects before 2009. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass. I've added you to the mailing list so you can receive the newsletter, meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."</p>
-----------	---------	---

4/14/2005	8:55 AM	<p>PIO again tried to reach Edward Crossfield/Caribbean Grower supply 800-440-2882, f 407-886-9706 He said I got your MSG that you called back. I'm in nursery business and have a home on Plymouth Sorrento Road. I'm in the acquisition area. I live between Plymouth Sorrento Road and Kelly Park on the right side. You have narrow margin going along there in your acquisition area. PIO noted it's the study area, and we also have some conservation acquisition areas. He said he's trying to determine what plans I need to make as far as both the home and the business in the future. Just wondering if you could update me, knowing that you may not be able to answer some things at this point. I front onto Plymouth Sorrento Road. We heard about them possibly widening that road. Would you be doing that or would that be another agency? PIO noted that would be Orange County, if there are any such plans. Referred him to OC Public Works, maybe Joe Kunkel. PIO offered to add him to mailing list. He said send info to Box 866 Plymouth, 32768; email CARGROAPOP@aol.com He asked, Is it possible that if they took the expressway right up Plymouth Sorrento Road, would that road disappear? PIO noted theoretically that's possible, but there's a lot to consider here. Gave timeframe for data gathering and initial alignments meeting in November, preferred alignment early 2007. he said there is no development north of Ponkan or north of Kelly park, we have building going on both sides of me. Then they stopped the development, I even talked to the surveyors. So they must know something I don't. we discussed future developments are permitted in that area; also something we have to consider. Obviously if we're going to have to move we want to do it sooner rather than later building costs are astronomical and going up. PIO</p>
-----------	---------	---

noted construction not likely to begin until 2009 at the earliest. PIO noted we're hoping to get the first project newsletter out by end of this month and I've added him to the list. PIO said I'd send him a quick email updating project status. He said he'd appreciate any info

11/9/2005	9:12 AM	Public Meeting Comment Form 11/09/05: Sheet 4: The intersection placement of east neighborhood Lakes is inconsistent with the WP&P Act incorporation of the task force recommendations (R7d). Placement on neighborhood Lakes would align with the 46A realignment, reduce widening of 46 as a feeder to the intersection, and only requires a short, local connector to the newly isolated properties on SR 46 south of the closed CR 46A. This would also impact less animal crossing areas.Sheet 2: The spur alignment through Wolt Branch Sin would not be consistent with Task force intentions which always called for ingress east of Round Lake Road. It would also impact more environmentally sensitive land and existing residences- a lose, lose situation.

11/14/2005	3:55 PM	Public Meeting Comment 11/14/05:Debra B. Custodio1209 S. Oleander StreetLongwood, FL 32750No road is my first choice! However, the route from the south makes the most logical sense. The 417 us already there to make a connection and it appears there is less residential impact than the other routes.The far north route makes no sense it also appears to be the most costly and the least effective. Too far out of the way the make a connection- it seems that it would cause more traffic than alleviate it. The 46 route also appears to have negative impact than worth monetarily. And access looks like it would be.

Contact		Cyndee Dahlman Gray Robinson
Date	Time	Regarding
11/28/2005	2:37 PM	PIO returned call Cindy Dahlman/Gray Robinson 407-418-6519 she said she's spoken to Rick Watkins and he has all the info. PIO noted it's all on the website. She said she's aware of that now and thanks for getting back to her.
11/28/2005	10:56 AM	Cindy Dahlman/Gray Robinson left MSG I just wanted to see hat's happening with the 429 Wekiva Parkway and S.R. 46 bypass. I can't believe it, but I did not go to the meetings this month, just wondering if there was something that was handed out, given an update, or if you can just tell me. I guess it's still in the PD&E study, but just wonderd if there's anything else you can tell me. 407-418-6519 thank you bye.
3/28/2005	2:24 PM	222 p.m. PIO called Cindy ?? 407-418-6519 to get address for newsletter mailing. She said she's at Gray Robinson, 301 East Pine Street, Ste. 14, Orlando 32801. Last name Dahlman PIO noted we're shooting to get the newsletters out in April. She said "Oh great, thanks so much."
1/10/2005	4:22 PM	Cindy/Gray Robinson did Lake County S.R. 46 bypass is that included, or is it being done at a later date? PIO noted yes, all being done as Wekiva Parkway PD&E.
1/10/2005	3:22 PM	PIO called back Cindy/Gray Robinson and left detailed MSG re: status Wekiva Parkway PD&E, prelim alternatives and public meetings expected late summer-fall. No real alignment until PD&E study completed; MBX final design ongoing, 60 perc plans expected late summer-fall with public meeting for review. MBX advance ROW ongoing. Asked her to call me back with further questions.
1/10/2005	2:32 PM	Cindy/Gray Robinson left MSG calling to get updated info on MBX, Wekiva Expressway, S.R 429 and S.R. 46 in Lake County. Just wanted to update our clients on what's going on, anything new. Went on the website and its' pretty much what's been on there for a while.
Contact		Bob Dallari SC Expressway Authority - BCC
5/2/2005	1:35 PM	PIO returned call to Diane Merck/SC Commissioner Bob Dallari Office 407-665-7215, left MSG that commissioner is on the list, newsletter and public meeting status.
5/2/2005	12:30 PM	Diane Merck/SC Commission Office left MSG I haven't talked to you for such a long time. I'm no longer with Morris, was 2 years with McLain, but not re-elected and now with Commissioner Bob Dallari. We received letter about Wekiva Parkway and it said if we would like to receive copies of the newsletter and get on mailing list, we should contact you. If you could add Bob Dallari, SC BCC, 1101 E. First St., Sanford 32771 we would be very grateful. . Hope everything is going swimmingly for you. Hope everything is good.
Contact		John D'Aloise Brossier Company
Date	Time	Regarding
11/9/2005	1:59 PM	PIO returned call John Deloise 407-963-8911, checked database and noted although he'd called in August he did not give his address for mailings. PIO got address info. He said he can't make the meeting and is there anywhere he can review the alignments. PIO directed him to the website, walked he through getting to the initial alternatives map. He asked about interchanges; PIO walked him through the potential locations, local access ovals. He asked when would they decide on interchanges? PIO noted entire PD&E study to conclude with a preferred alignment by March 2007. He said that's a long ways off. PIO noted these studies typically take 2 years and we started in Jan. PIO noted we would be posting all of the meeting materials and a comment form on the site, but will take some time, maybe by next week. He was thankful for the info and the call back.
11/9/2005	11:00 AM	John Deloise 407-963-8911 left MSG re: 429 extension. Noted we'd spoken before and thought he was on the mailing list, but I didn't get a meeting notice but I saw it in the paper. Please call me.
8/22/2005	12:02 PM	PIO returned call to John Deloise, receptionist said he stepped out for lunch, left detailed MSG that no alignment as of yet. Initial impact assessments underway, hope to have initial

		alignment alternatives to governments and state agencies for review in September. Based on those comments, may have revised initial alternative alignments in October and shooting for public workshops on alternatives in November. PIO asked him to confirm whether he was on the project mailing list so I'd be sure he was getting newsletters, meeting notices, etc.
8/22/2005	11:45 AM	John Deloie left MSG I have quick question about highway 429 extension up through the Apopka area. We own some property off Plymouth Sorrento Road and would like to know if you have prelim drawings about where the layout of the road will be heading up to 44? 407-963-8911 Thank you. 407-644-2378
2/24/2005	2:13 PM	PIO responded to John D'Aloise email with general project info: "Hello John,It was a pleasure speaking with you, and thanks for the contact info. As we discussed, there is no alignment yet for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. The Project Development and Environment (PD&E Study), being done jointly by FDOT and OCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2010-2013 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. I have added you to the project database to receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."
2/24/2005	1:43 PM	PIO received email from John with his contact info: John J. D'Aloise, CCIMBrossier Company, 201 W. Canton Avenue Suite 275, Winter Park, FL 32789 Off: (407) 644 5574, Cell: (407) 963.8911, Fax: (407) 644.7496, Email: john_daloise@msn.com
2/24/2005	1:37 PM	John D'Aloise asked is there a planned interchange at Ponkan? And what side of Plymouth Sorrento Road the alignment is going to be on? We have property up there at Ponkan and Plymouth Sorrento. PIO asked for his contact info to add him to project database, noted we just kicked off PD&E last month, don't have an alignment only the study corridor on website. He said he was printing that out right now. He said he sent PIO an email with his contact info, definitely has an interest in this. PIO noted we hope to have some initial alignments for public review in late fall, maybe November. He noted that's a long ways off. PIO noted we're in the infancy of developing this project; it's an involved and lengthy process, but we should be able to start answering some property owners' questions t that time. PIO noted not every property within the study area would be affected.

-----------	---------	-----------------------------------

Contact		Jon D'Avanzo	Peda Development
Date	Time	Regarding	

9/27/2005	2:15 PM	Jon D'Avanzo/Peda Development have you heard anything about them buying property for this? We're hearing all kinds of things. PIO noted we don't have an alignment yet, still in study phase and no where near buying ROW. PIO noted what he may have heard about is the four large environmental parcels we're required to try to procure for conservation as mandated in the protection act. PIO noted we have secured a conservation easement on new garden coal, about 1500 acres. But that's only negotiations going on right now re: any purchases.He asked would the road still be within the corridor, or might it go outside? PIO noted there have been some discussions that it might have to edge out of the study area here or there due to different constraints, but that remains to be seen and still has to
-----------	---------	---

be approved by local governments. He asked how wide of ROW would you need typically for a road like this? PIO noted that depends on number of lanes, could be different lanes in different areas, cited changes along Maitland Boulevard Extension. He again asked for a typical width for a road of this nature? PIO noted it really depends on what's out there, there could be wide sections with slopes and then could be sections squeezed in with retaining walls because of what's around there. Really too early to tell about those details; we're really just trying to find places to put the lines on the map at this point. He said he not only works up there but they live up here, keep hearing rumor mill, hearing 'my lot values going to be ruined because they have not bought me yet' also hear well it's not going here but further out because of the subdivisions. Makes sense east side of Plymouth Sorrento where all the houses are going that they would try to stay away from that. PIO reiterated city of Apopka has stated, may have even done a resolution, that they wouldn't approve an alignment east of Plymouth Sorrento. Think that dates back to the old project, the NW 429 extension and believe that's still the case for the city given the developments that have been approved in that area. He asked why I thought there were so many rumors about purchases going on? PIO noted we'd heard from lot of folks reacting to the lawyers sending solicitation letters - even though we could be 5-10 years from acquiring ROW-some people are seeing those letters and thinking bulldozers are showing up tomorrow. He said so when should we have an alignment? PIO noted PD&E study scheduled to finish by spring 2007 with a recommendation. Most likely will be an alignment, but there is possibility could be a no build. He said so could you start acquiring ROW during the PD&E study? PIO said we'd have to finish PD&E study and get into final design somewhat, then might start seeing advance ROW acquisition, with bulk of acquisition occurring down the road. PIO noted we still have to secure funding for the future phases of this project. PIO noted we have public meetings coming up on the initial alignments, and he's on the list to receive newsletter with details. PIO noted meeting info is posted on the website now also. He said thanks; you've been very helpful as always --233 p.m.

8/1/2005	3:57 PM	Jon D'Avanzo/Peda Development responded to PIO email: "Mary, Thank you for your prompt return of my phone calls and quick response to my email. Jon"
8/1/2005	12:39 PM	PIO responded to Jon D'Avanzo: "Hello Jon, Good to hear from you. Glad you got my messages. I have added you to the project database to receive future newsletters and meeting notices. I'm also attaching here the last newsletter that went out, along with a copy of the updated study area map for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. Please let me know if you have other questions or concerns."
8/1/2005	12:24 PM	Jon D'Avanzo/Peda Development emailed: "Mary, We spoke last week regarding Wekiva Parkway. Thanks for the information. We would appreciate being on an email list or mailing list on this road since we own several properties in the area under study for the road. Our mailing address is: Jon Davanzo Peda Development 243 West Main Street Apopka FL 32703 Fax 407-886-4487 Office 407-886-3169 Thanks for your help. Jon"
7/27/2005	1:14 PM	PIO again tried calling back John Devanzo(?) 407-886-3169, left MSG, his voicemail said he was on vacation from July 10-24 and to call his partner Adam Perez 407-467-7481 for anything during that time. PIO left my number and email address and noted I was again trying to return his call from yesterday afternoon, and that I'd also left a MSG late yesterday afternoon.
7/26/2005	5:35 PM	PIO returned call to John Devanzo(?)/Apopka development co (Peter Development?) 407-886-3169, left MSG relaying we're looking at Ponkan Road are for an exit or interchange, though no alignment and nothing definite at this time. PIO said call me back with further questions or to get on the project mailing list, left my number again.
7/26/2005	5:20 PM	PIO called Brian M./CH2M Hill to confirm we're looking at an exit in the vicinity of Road re; the developer query. He said that's correct, though don't know exactly where it will be at this point....
7/26/2005	2:17 PM	John Devanzo(?) left MSG I own a development company, we live in Apopka area and

have question on Wekiva Parkway. Are you aware any exits potentially coming off Wekiva Parkway perhaps on Ponkan, or Kelly Park or Haas Avenue or Plymouth Road, Mount Plymouth roads? Just wondering if any of those roads are going to have exits? Just trying to get an idea of where this is potentially going. My number is 407-886-3169 thank you much.

3/25/2005	10:25 AM	Jeff Davis responded to PIO email: "Hi Mary,Thanks for getting back to me so quickly!My address is:Jeff Davis390 Winsford CourtLake Mary, FL 32746Thanks, again."
3/25/2005	9:50 AM	PIO responded to Jeff Davis: "Hello Jeff,I'm glad you perused the info on the Expressway Authority website. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass. Send me your address, and I'll make sure you receive the newsletter, as well as public meeting notices.I'm afraid we don't really have any detail for you at this point regarding the S.R. 46 Bypass. On Jan. 19 we officially kicked off the Project Development and Environment (PD&E) Study, being done jointly by OCEA and FDOT. Currently we're in the data gathering stage. In fact, surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006.We understand that many people are looking for details, and we will have that information

once we get through the rather involved PD&E Study, which is expected to finish in early 2007. We'll do our best to keep you informed in the meantime via the website, newsletters public meetings, etc.

3/24/2005	4:29 PM	Jeff Davis JeffSDavis@aol.com: "Hi Mary,How do I obtain detailed information on the SR 46 By-Pass Corridor, as part of the SR 429 project?I have already been out to the Expressway Authority web site and read the general material, but I am particularly interested in specific information regarding the area of the new Heathrow Country Estates development, near Sorrento, in the section bounded by SR 46 on the South, CR 437 on the West, SR 44 on the North, and CR 46A on the East.Thank you, in advance, for your help with this request.Jeff Davis407-463-8894"

12/30/2005	3:20 PM	PIO continued drafting comment form responses: Angela Ulmer, Eric Kemp, Ellis Hall, Jerry Smith/Growers Supply Service Inc.; Dale Babbitt/Babbitt's Nursery; Shelly Dean/Classic Homes, Sandra & James Davis.
12/21/2005	9:15 AM	PIO spoke with Sandy Davis, who again thanked me for OC alternatives map. "That map is great! I hadn't seen that." She asked about the dotted line? PIO noted that represented boundary of the study area, and that the project could occur anywhere within that area. She asked what the colored lines represented? PIO noted those are alignment alternatives being considered, and from which one will be selected for the project. She asked do they have all the property they need? PIO noted we're still in PD&E, early in the process and a ways to go before we got to Right of Way Acquisition. She asked do they go straight to eminent domain, or do they try to settle with the property owners first? PIO noted we try to negotiate with the property owners first.PIO noted some of the criteria being looked at in evaluating the alternatives. She said with all the development on the east side, there's no way it could go over there. PIO noted City of Apopka has said would not support an alignment east of Plymouth Sorrento Road. She said with all the development, all the wildlife is going to be on our side. But I see you're going through pasture lands and the bridle path. She asked how wide the parkway would be? PIO noted unknown at this time, have to find location first then determine number of lanes, ramps, retention ponds and other details. PIO went over the study schedule. She reiterated pink alternative would

affect their property. PIO noted we've been reviewing and analyzing public comment forms and recommended she send us one. PIO said if she can't download it from the website to let me know and I'd email her one. PIO noted we're also evaluating government input, in fact the SCEA just directed us yesterday to remove one of the alternatives in their area. PIO noted the maps would be updated in a couple of months, and then again in summer 2006 when we bring forward the most viable alternatives. She said you've been very helpful.--927 a.m.

12/20/2005	3:30 PM	Sandy Davis left MSG you might be out today it's close to the holidays. I still have that question about the corridor boundary line. In relation to my house wondering what the chances are of stretching the pink line over to my property. Are they leaving available just in case they needed up to the dotted line? Are they still leaving their options open? ... the pink and yellow lines. Talk to you later when you get a chance. 407-736-3462
12/20/2005	11:23 AM	Sandy Davis left MSG I sure appreciate the map, it's a really good one. I have a few questions on the cross hatching and coloring. Want to double check the city boundaries in the yellow and the purple dashed line, corridor boundary; I have a question about that. Sure appreciate a call back. 407-736-3462 thanks again.
12/19/2005	6:12 PM	PIO emailed Sandy Davis OC concept file as requested.
12/19/2005	1:20 PM	PIO returned call to Sandy Davis 407-736-3462, 736-2100, left MSG for her to call me with property location and address and I could send her corresponding initial alternatives map for her county.
12/19/2005	12:16 PM	Sandy Davis 407-736-3462, 736-2100 MSG if I can get a clear picture of the Wekiva Parkway western connector program ... Maitland blvd Apopka bypass... the one that looks like a uterus and fallopian tubes. Looking at EA website. One I got into eh mail is pretty blurry as far as my property; think my property right on western edge in the purple section. Wondering if can get an aerial of that particular section that can define where our property is. I'd appreciate a call back 407-736-3462 thank you.
12/9/2005	2:11 PM	Sandy Davis left MSG thank you for calling back. My address is unincorporated NW OC. Address 3612 W. Kelly Park Road, Apopka, 32712. If I wasn't clear and or you couldn't hear something, call me at 407-736-3462. I'd sure appreciate the updated map. We didn't get to the last meetings but we'd been to all the others. I did visit the website and map I saw was the same as we saw at the previous meetings, so if there's something updated we'd appreciate it.
11/9/2005	1:39 PM	Public Comment Card 11/05:Sandra Bryant-Davis and James Davis3612 West Kelly Park RoadApopka, FL 32712Birds:American Robin, Bald Eagle Hunting, Blue Jay, Bob White Quail, Brown Thrasher, crow, Downey Woodpecker, Eastern Meadowlark, hawks (short tailed, nesting, and hunting), humming bird, Killdeer, Loggerhead Shrike, Mourning Dove, Northern Mocking Bird, Pine Warbler, Purple Martin, Cardinal, Ruby Crown Kinglet, Scrub Jay, Sparrows (variety of, migratory)Trees/Plants:Longleaf Pine Trees, Native Plants, Endangered Plants (blazing star, white lantana), Scrub Palmetto, ferns, Oaks (variety), EvergreensMore Birds:Split Tail Hawk, Mocking Bird, Yellow Bellied sap sucker, Pilliated Woodpecker, Red Cockaded Woodpecker, Chickadees, Owls, Florida Song SparrowAnimals Wild Rabbits, Florida Mice, Pocket Gopher, opossums, raccoons, Florida Gopher Tortoise, Red Fox, Gopher Tortoise, red fox, gopher snake, snakes (poisonous and non-poisonous), Florida Pine Snake, Sand Hill Cranes, Quail, Fox SquirrelNotes:My property has been deliberately left uncleared except around the house and outbuilding for firebreak. Dead pine trees are full of bird homes, brush contains wild rabbits and brown thrasher birds. Extensive pine forest to west of my property provides homes for pine preferring wildlife. Extensive ranchland (pasture) directly south of my property provides the open spaces and borrowing places. Mostly uncleared, non-pesticide or herbicide but some open areas on my property includes: well maintained 16 water bowls and 12 continuously filled bird feeders, 1 specifically for sunflower seeds, 1 specifically for thistle corn feed and suet in

winter.

4/18/2005	5:15 PM	Dave/CH2M Hill emailed: "Caller re: property owners letter: Sandy Davis (3612 W. Kelly Park Road, Apopka) said she was about to do improvements (entry gate) and wanted to know impact of project on her property; discussed project schedule.

11/14/2005	2:49 PM	Comment Form 11/14/05:J. Dazet524 Sunshine DriveLake Wales, FL 33859-8754The best plan for my interest and those of my associates, family members and business partners is for the design concept with limited access frontage road plan 5-B. This would begin the elevated roadway just east of Lake Markham. We also feel strongly that the interchange proposal would be best suited on Kelly Park Road. These alternatives would negatively impact our properties.

12/13/2005	9:46 AM	Shelly Dean/Classic Homes responded to PIO email: "Thank you so much for your help. I will complete the form and send it in, with some suggestions for you to add to your additional public comments. Please reply if you need more information or have any questions. Thank you!Sincerely,Shelly G. DeanClassic HomesPhone: (407) 875-3100Fax: 407) 875-2200E-mail: shelly@ClassicHomes.us
12/12/2005	12:17 PM	PIO responded to Shelly Dean/Classic Homes: "Shelly for the additional information. As these are only proposed alternatives, nothing is set in stone at this point. I've attached a comment form that you can complete and email, fax or mail back to me with your comments and suggestions for the various alignment alternatives. We are in the process of inputting, reviewing and analyzing all of these public comments from the meetings, so get your comments in at your earliest convenience.If you want to mail the form in, the ZIP code is 32817. For some reason that got jumbled when the forms were produced.
12/12/2005	11:45 AM	From: Shelly Dean [mailto:shelly@classichomes.us] Sent: Monday, December 12, 2005 11:45 AMTo: 'Mary Brooks'Subject: RE: Western Expressway ExtensionOur site is located off Plymouth Sorrento Road. From viewing the maps on-line it looks like the extension will be going directly over the corner of our subdivision. The property address is 2404 Plymouth Sorrento Road; we will be building on this parcel and the parcel to the West of it, which seems to have the Beltway going right over the South-west corner. This will impact three 3) homes, from the current location on the on-line maps. There is currently nothing proposed for the parcel to the West of our site between our site and the Zellwood Station development. It appears the majority of the Beltway will be on that site however, the small corner of our site looks to be in the extension area. What is the process at this point to opposing this location and asking if it would be feasible to move it over approximately 100 feet to the West, where it would not impact these homes? Thanks so much for your assistance. Please reply if you need more information or have any questions. Thank you!Sincerely,Shelly G. DeanClassic HomesPhone: (407) 875-3100Fax:
12/12/2005	11:00 AM	PIO responded to Shelly/Classic Homes: "Hello Shelly,I'm just back from vacation and saw your email. Perhaps if you let me know the location of your subdivision, I can assist you. Also, all of the public workshop maps showing the various initial alignment alternatives are available for review on the Expressway Authority website at www.expresswayauthority.com or www.ocea.com. Click on the text link on the home page for the "Western Connectors" and that will take you to the Wekiva Parkway page. Scroll down and you'll see the text link for the public workshop maps.Again, if you'll call or email with your location and specific questions, I'll be happy to assist you."
12/12/2005	10:30 AM	PIO received 12-7 email from Shelly Dean/Classic Homes: From: Shelly Dean [mailto:shelly@classichomes.us] Sent: Wednesday, December 07, 2005 12:17 PMTo: MBrooksSR414@cfl.rr.comSubject: Western Expressway ExtensionMs. Brookes,Who would I need to schedule a meeting with in order to speak with someone directly about how the extension will impact our subdivision. Currently from reviewing the proposed plans, there are no alternatives for our area, which would impact our subdivision directly. If you could please forward me the name of the Engineer for the Apopka-Plymouth Sorrento area, so I can speak directly with someone about the exact location of the proposal for our area. Thank you so much for your help.Please reply if you need more information or have any questions. Thank you!Sincerely,Shelly G. DeanClassic HomesPhone: (407) 875-3100Fax:

Contact		Colette and Fred Dearman
Date	Time	Regarding
11/14/2005	4:25 PM	Fred Dearman5303 Shoreline CircleLake Forest, FL 32771fdearman@cfl.rr.comI live in Lake Forest. Everyday, I am currently being affected by the traffic increases at I-4 and S.R 46. I think that gridlock is fast approaching at that intersection. From last year to now, it takes 1 or 2 more lights to get to my home. That new condo complex (300 units and 500 cars) is definitely going to increase traffic. I believe that putting in the S.R. 46 Route would increase traffic so that it becomes a nightmare to anyone living into Lake Forest. To me, the southern 417 route seems to be a more natural fit to the system. I believe it would have the least impact to the most people. I believe that everyone in the Lake Forest area will suffer because of a decision to build the S.R. 46.I applaud you in your efforts to involve the community and to come up with the best solution. I think that seeing some kind of traffic usage measurements, such as number of traffic lights required to go through an intersection, number of cars going thru with both current and projected increases, for medium and heavy traffic times would be helpful to everyone, and get us closer to understanding the reality of the decision you have to make. Meanwhile, from my experience of driving everyday, I can only believe that a decision to build the S.R. 46 Route would be a tremendous negative impact on both my living time each day and would drastically reduce the property values here.

11/14/2005	4:23 PM	Comment Form:Colette Dearman5303 Shoreline CircleLake Forest, FL 32771(407) 688-1083One reason we chose to move to the Lake Forest area one and half years ago was the perception of a beautiful, relatively unspoiled area still green and natural with relatively low congestion... unlike many of the over developed and heavily congested other areas in Seminole County. While we applaud efforts to improve access and address the increased traffic problems, we are horrified by the idea of utilizing S.R. 46, which is already becoming more congested as the access route between the Wekiva River and I-4. We would also find the level of increased air pollution and traffic noises extremely offensive.We would however, support the connecting of the Wekiva Parkway to the S.R. 417 Greenway at the I-4 as the more logical solution: it would be more convenient to commercial areas, businesses and shopping and utilize the 417 in a more "seamless" manner.I respectfully request that you and the study group support the southern 417 route as the most efficient and environmentally friendly solution. Thank you.

Date	Time	Regarding
11/14/2005	3:42 PM	<p>Public Meeting Comment Form 11/14/05:Steven DeCresie2422 Orange AveSanford, FL 32771The use of human fatalities in your presentation was in poor taste and should be taken out of your proposals. If this was the "only" reason this project existed that may be different but using other's death to justify growth is unwarranted.All Public conservation lands should be protected. This was difficult to acquire and should remain intact or improved from this project- not degraded.This alignment into Rock Springs Run State Preserve should be moved / eliminated. The western alignment through the "Neighborhood Lakes" tract would provide a buffer for the preserve.OOCEA/FDOT will need to work with the state to acquire all properties identified in the Wekiva Parkway and Protection Act. Unless these properties are purchased the entire project would fail to protect this important wildlife corridor.All through traffic should be on the Wekiva Parkway and should be bridged wherever it crosses conservation land.Existing wildlife corridors should be expanded as result of this parkway not shortened.The County interchange should move west to the northern pasture next to the Rock Springs Run State Reserve West of). The interchange should not be in the wildlife corridor.Any elevated roadways should be bridged or converted in a way to ensure genetic flow through the wildlife corridors.(This has been done at I-75 through Alligator Alley and US 441 across Payne's Praire in Alachua County.)</p>

11/14/2005 8:56 AM Attended Public Meeting, 11/14/05

Contact Mike DeForest WKMG Ch.6 News

Date Time Regarding

12/16/2005 3:16 PM PIO returned call to Mike Deforest/WKMG to let him know Wekiva Parkway from 441 to i-4 will be roughly 20 miles; exact distance will depend on alignment, which hasn't been decided. He said so we're about halfway there; think the section from Apopka to Osceola about 28 miles? PIO said not sure, would have to check on that. He said that's what he needed and thanks.

12/16/2005 3:04 PM Mike Deforest/WKMG Ch. 6 left MSG I'm working on story of western beltway extension opening today. I was curious from Apopka up through Wekiva Parkway where it will eventually spit out somewhere near Sanford, roughly how many miles that will be? How many miles of the western beltways still needs to be complete to make it all the way from Osceola to Sanford?407-432-0018

Contact Daryl Delaney

Date Time Regarding

11/14/2005 3:51 PM Attended Public Meeting, 11/14/05

10/17/2005 2:42 PM PIO emailed initials to Daryl Delaney qualityCOATofCF@aol.com as requested: "Daryl,As discussed, here is a PDF of the initial alternatives for the Wekiva Parkway Project. I hope to get this posted on the website www.expresswayauthority.com soon also. Please bear in mind that we are early in the PD&E Study phase of this project, and that alternatives can still be added or removed from consideration."

10/14/2005 5:40 PM PIO returned call again to Daryl Delaney 407-321-6094 He asked do you have any tentative routes planned for that yet? PIO noted we had some initial alternatives that have been going through government review process, in fact was in meeting all day to day with various officials and they're made further changes. PIO noted before changes requested today what the alignments were connecting to I-4. PIO said expect to have PDF of various alignments perhaps early next week and can email to him. I also plan to post on the website. He asked for web address; PIO gave him www.ocea.com. His email: qualityCOATofCF@aol.com. He said, "I live off Wayside Drive, off 46 in Sanford. About 1 25 mi west of I-4, we're on Kimberly Court off Wayside.PIO said if he doesn't see it or get anything from me by Wednesday to get back with me and I'll get him the latest info. He said thanks very much for calling back.--549 p.m.

10/13/2005 5:29 PM PIO returned call to Daryl Delaney 407-321-6094 left MSG with a woman who answered, said he wasn't in, that I was returning his call. She said she'd let him know. 407-383-4053 .

10/13/2005 10:10 AM Daryl Delaney called again 407-321-6094 or 407-383-4053 but didn't leave MSG.

10/12/2005 3:41 PM Daryl Delaney left MSG I know you haven't selected a route yet up this way, but I was wondering if they had selected potential routes. I was wondering if my house might be in the way of one of those. Affects a business decision right now I'm trying to make. 407-321-6094 or 407-383-4053 thank you very much I appreciate it.

4/18/2005 12:50 PM PIO returned call to Darryl ?? 407-383-4053, left MSG that original MSG was garbled and to call back with their particulars re; project.

4/15/2005 4:03 PM ?? 407-383-4053 terribly garbled MSG, only got every 2nd or 3rd syllable.

Contact Dr. Delaporte

Date Time Regarding

4/18/2005 12:48 PM PIO returned call to Dr. Delaporte 6855 Sylvan Woods Dr., Sanford, 32771 407-688-4306, left MSG confirming they're on mailing list, newsletter and public meeting status.

4/15/2005	3:29 PM	Dr. Delaporte left MSG I would like to be on the mailing list to receive info about Wekiva Parkway project. 6855 Sylvan Woods Dr., Sanford, 32771 407-688-4306
Contact Date		Linda Delloiacono
2/18/2005	Time 9:25 AM	Regarding PIO checked study corridor, noted Linda Delloiacono's property in question at Welch and Vick Roads is well east of the corridor. PIO emailed Linda glennapokpa@aol.com: "Hello Linda,I checked and the Vick Road - Welch Road area is well east of the study corridor for the S.R. 429-Wekiva Parkway projects. I have, however, added you to the project database so you will still receive newsletters and meeting notices. I hope this is helpful. Please feel free to call or email with further questions or concerns."
2/17/2005	1:05 PM	PIO returned Linda's call. She said she's looking at purchasing house in Apopka. I want to see how the Maitland thing and then it continues into north and into Sanford. Property is off Vick Road, and Welsh Road. Road we're going to be living on is Lisa Karen. Delloiacono 464 Jordan Stuart Cir., apt. 112 Apopka, 32703Email is glennapokpa@aol.com cq-husband messed up on Apopka). She said she was on the website, the streets are really defined, but it did look like it was west of me. They've built so many new homes, the Errol estates, can't imagine put a road through a golf course. We just put a bid on a house, and I would have a heart attack if the road went through. The realtor had a map in her office. Have been on the phone all morning trying to figure out if the road. To buy a house and then have it demolished, would just be heartbreaking.PIO said I'd check if that was in the study area and email her if it wasn't, or send her a larger conceptual if they were. She was thankful for the call back.
2/17/2005	11:04 AM	MSG Linda Delianco(sp?) "I 'm looking for some info about Wekiva Parkway. We're purchasing a house in the area. We're just curious about a little more info about exactly where the proposed road is going to cut through. Whether it's on Plymouth or whether it's the Vicky Road area? I look forward to hearing from you."

11/14/2005	Time 4:34 PM	Regarding Public Meeting Comment Form 11/14/05:Steve Demoor7411 Colonial CourtSanford, FL 32771I have a suggestion as to the bridge where the Parkway will cross the Wekiva River. We all know that the basin and river bottom are a very sensitive ecosystem that all parties wish to keep pure and natural as possible. Can the walls along the side the elevated bridge be raised to help contain traffic nise from permeating the river bottom? There are many studies about animals avoiding areas of heavy traffic and noise, and with the bridge

elevated animals may be able to use the riverbanks as travel corridors. I am sure that every foot you raise the side walls would help reduce the noise pollution that much more. Any little bit can make a difference.

11/14/2005	12:44 PM	Attended Public Meeting, 11/14/05

11/14/2005	3:40 PM	Public Meeting Comment Form 11/14/05:Steve Devine689 Treeline PLSanford, FL 327711.) Please show future developments on your route maps. For instance there are several projects in the works between Orange Blvd and I-4 along SR 46 Traffic will be heavy on this section of road without the additional expressway traffic.2.) Reinvestigate feasibility of by passing Seminole County entirely by routing the road north in Lake County and crossing the St. Johns River in Volusia County.3.) Of the three routes shown between Orange Blvd and I-4 the connection to the interchange at 417 will have the least impact to the residents in the area of the road, and greatest long term benefits.

Contact Date	Time	Arthur and Judith DeVito Regarding
10/14/2005	1:34 PM	Arthur and Judith DeVito4957 Fawn Ridge PlaceLake Forest, FL 32771I agree that the route that connects the Wekiva Parkway (the western Beltway) to the existing S.R. 417 the Greenway) at I-4 is the more logical approach. It keeps E-W traffic off I-4 and at the same time keeps S.R. from becoming more congested than it already is due to new development on Orange Ave, Oregon Street, International Drive and S.R. 46 from becoming more congested itself. This area would be complete chaos if the expressway were to be on S.R. 46 in this area.

Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road  
for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than  
Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools.  
Orange County Elementary and Middle Schools being built on Ponkan Road will open for  
the August 2006 school year. A Ponkan Road interchange will create major traffic jams for  
parents and kids trying to get to and from these schools. Even worse, a Ponkan Road  
interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes  
to and from school every day. Thousands of cars will exit from the Wekiva Parkway into  
North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to  
school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is  
irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park  
Road. There is no excuse for subjecting the children of Orange County to the eminent  
danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's  
new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational  
facilities on Ponkan Road very close to the new schools. Hundreds of children and families  
will converge at the Fields of Fame nightly for baseball games and other activities.  
Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping  
nighttime traffic from the Parkway into this area on Ponkan Road would be extremely  
dangerous and would negatively impact the new facilities at the Fields of Fame.3)  
Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan  
Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan  
Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is  
straighter and less traveled. Ponkan Road is not centrally located and is too close to the

Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

10/14/2005	1:55 PM	EAC Comment Form:Helen Dow5347 Fawn Woods CourtSanford, FL 32771I am opposed to the "S.R. 46" route for the following reasons"a.) increase in traffic and construction on 46b.) adversely affecting the value of in the general area.c.) running thru a residential community on both sided of 46d.) the southern route 417 would impact more of an industrial community which generates basically during work hours and could stand the PM traffic worse.
10/14/2005	1:53 PM	EAC Comment Form:Jack Dow5347 Fawn Woods CourtSanford, FL 32771It would be crazy to develop a limited access expressway along or imbedded with existing S.R. 46 Residential, business and through traffic would back-up and clog both S.R. 46 and I-4 traffic.This decision would be used as an example of what does not work for years to come.
10/14/2005	1:49 PM	EAC Comment Form:Jack Dow5347 Fawn Woods CourtSanford, FL 32771My input is to use the southern route to connect the proposed Wekiva Parkway to S.R. 417. This option seems to make the most sense for the following reasons:1. Reduce congestion on I-42. Keep the Orlando loop in tack and free flaring and I-4 connection will cause back up and congestion as listed above.3. We've already spent millions to reduce congestion on I-4 don't waste it.

Contact		Richard Dunkel	Florida Trail Friends
Date	Time	Regarding	
11/10/2005	1:50 PM	<p>Public Meeting Comment Form 11/10/05:Rich Dunkel2314 Hillside DriveMount Dora, FL 32757H 352-383-8076W 352-735-2506We are concerned that trail connectivity be a priority for this study. An east - west trail connecting to the Seminole Trail System and also connecting to the west Orange Trail in Rock Springs area.Westernly it should connect to a trail in the 429 corridor which can connect to the Lake Apopka Loop Trail. Eventually, the CSX PR will abandon. Through Mount Dora, Tavares and the trail can connect to that system.</p>	
11/10/2005	11:53 AM	Attended Public Meeting, 11/10/05, Via Mailing	
4/13/2005	5:23 PM	<p>PIO drafted email to Rich Dunkel/Fla. Trail Friends with project status: "Hello Richard,It was a pleasure speaking with you yesterday. As noted, the Expressway Authority has</p>	

begun discussions with owners of the four parcels recommended for conservation acquisition. Also as noted, some of the owners may be resistant to the idea, but other parcels also are being looked at. I understand you're with Trail Friends and I will forward your trail concerns to the team doing the Project Development and Environment (PD&E) Study. As we discussed, the study area ends at U.S 441 and S.R. 46. The study area map, which shows the conservation property locations, is available on the website [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). If you need a 11x17" hard copy of the study area conceptual, let me know. Regarding the status of the PD&E Study and having an alignment, as we discussed there is no alignment at this time. On Jan. 19 the FDOT and the OCEA officially kicked off the PD&E Study, and we're currently in the data gathering stage. In fact, letters are scheduled to go out tomorrow notifying property owners that surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. The study also will determine, among many other things, which part of this roadway will be an at-grade arterial (similar to US 441), and which portion will be a raised or elevated toll road. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, we probably wouldn't begin construction on these projects before 2009. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass. Send me your mailing address so that I can be sure you get the newsletter, meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."--521 p.m.

4/13/2005	2:15 PM	Rich Dunkel called again 352-735-2336 asking where are they on the conservation land acquisition? PIO noted started discussions on some parcels in December, some owners not receptive, also looking at some other property options, so it's ongoing. He said he's with Trail Friends, had been going to the various project meetings. He's concerned about trail opportunities if CSX sells the ROW to DOT could there be a trail along 46? We want a connection to the West Orange Trail. He asked how close the project was coming to Mount Dora? PIO noted the study area ends at 441 and 46, referred him to the website study map. Noted it also had the conservation property locations indicated. Where are they on the alignment? PIO gave update on PD&E data gathering, November public meeting on initial alternatives. He said he was supposed to be on one of the advisory groups a while ago before it all fell apart way back when. He noted he has done work with the MPO's. PIO to email him an update on where we are on the project.

Contact		Elmer S. Dupre
Date	Time	Regarding
11/14/2005	4:36 PM	Elmer S. Dupre 5017 Stone Bark Cove Sanford, FL 32771 I oppose the proposed S.R. 46 Route for the Wekiva Parkway. S.R. is already congested and will become more congested as traffic load increases at International Parkway, Orange Boulevard and Oregon Street due to new housing. Additionally, this would greatly increase the congestion at the I-4 and S.R. 46 intersection. The southern S.R. 417 (Greenway) route is more logical and keeps east-west traffic off I-4.

Date	Time	Regarding
11/14/2005	10:25 AM	Comment Form: Upon reviewing the "Wekiva Parkway PD&E Study" Map, the most logical route would definitely be the southern 417 Route. It would not only connect directly with 417 from I-4, it would eliminate the on and off procedure from S.R. 46 to I-4 exiting I-4 to connect with 417. My conclusion is based on the congestion now on S.R. 46. With the construction of additional houses and corporations now in effect on both S.R. 46 and International Parkway along with the Seminole Mall traffic it would be another congested, ill thought blunder.

Date	Time	Regarding
11/14/2005	4:02 PM	Public Meeting Comment Card 11/14/05: Gary Dzikowski 1513 Baccarnt Court Sanford, FL 32771 The shortest distance between two points is a straight line. The orange route from the 417 interchange works best. The yellow route to 17-92 does not work. I-4 will be congested with cars going west on the new road adding to the high North / South traffic on I-4. The yellow route goes thru wetlands and very close or through existing neighborhoods. The route 46 blue route is difficult but workable. Thanks for the information

3/23/2005	9:58 AM	PIO checked graphic files and responded to Ben Edwards benedwards@cfl.rr.com by attaching latest study corridor concept with conservation parcels indicated: "Hello Ben,I have attached a PDF of the S.R. 429-Wekiva Parkway & S.R. 46 Bypass study corridor map which includes the four parcels (Seminole Woods, New Garden Coal, etc.) that the Expressway Authority was directed to try to acquire for conservation.With regard to the connection of the Wekiva Parkway at Interstate 4, the location and configuration of that has yet to be determined.We don't have an alignment yet for the S.R. 429-Wekiva Parkway or S.R. 46 Bypass. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at the first public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). Subsequent public involvement meetings are tentatively scheduled for summer 2006 and a public hearing some time in late 2006. We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of
-----------	---------	--

these project phases could take more or less time than expected due to a host of variables  
 We are in the process of drafting the first Wekiwa Parkway newsletter, which will probably  
 go out in April. If you send your address, I will add you to the project database to receive  
 the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to  
 call or email with other questions or concerns."

11/9/2005	2:21 PM	Attended Public Meeting, 11/09/05
9/16/2005	5:39 PM	Ed Elkes responded to PIO email: "Dear Ms. Brooks, Yes, that is our correct mailing address, and we will gladly receive any information you send. Thank you, again, for your help. Ed Elkes"
9/16/2005	4:47 PM	PIO confirmed property location on OC property appraiser website and responded Elkes: "Hello Ed, You are correct that the property in question, parcel no. 19-20-28-0000-00-031 is within the Wekiva Parkway Project Development & Environment PD&E) Study area. I think you will find the information that will be presented at our public meetings in November helpful with regard to your questions about potential impacts to this property. We will begin sending out meeting confirmation info in October. We show your mailing address as 3611 Thompson Road, Lake Mary, FL 32746. Please let me know whether that is still accurate so that we can ensure that you receive the meeting notice and other project info. Thanks, and have a good weekend."
9/16/2005	4:40 PM	PIO checked and Ed Elkes is on OC study area list, address listed as 3611 THOMPSON RD, Lake Mary 32746
9/15/2005	6:28 PM	Ed Elkes responded: "Dear Ms. Brooks, Thank you for your reply. Our lot, which is within a larger parcel, is listed in the plat book as: 19-20-28-0000-00-031. It has not been issued an address by Orange County yet. It is one block east of 3347 Plymouth-Sorrento Road. I hope that helps locate it. If I read the map correctly on Web page <a href="http://www.expresswayauthority.com/assets/Wekiva%20Parkway/WPstudymap11x17050505%5B2%5D.pdf">http://www.expresswayauthority.com/assets/Wekiva%20Parkway/WPstudymap11x17050505%5B2%5D.pdf</a> it appears that our lot, just northeast of the intersection of Ponkan Road and CR 437, is within the shaded area. Is this still accurate? Thanks. Ed Elkes"
9/14/2005	5:37 PM	PIO responded to Ed Elkes: Hello Ed, If you'll provide your property address, I can determine whether it is in the study area for the Wekiva Parkway. We are still in the fairly early stages of the Project Development and Environment (PD&E) Study, and are working through government review of initial alignment alternatives. We plan to have initial alternative alignments to present to the public at meetings in November. The tentative meeting schedule is as follows: Orange County: Apopka H.S. Wednesday, November 09, 2005 5:30 PM-8:30 PM. Lake County: Mount Dora M.S. Thursday, November 10, 2005 5:30 PM-8:30 PM. Seminole County: Sanford Civic Center Monday, November 14, 2005 5:30 PM-8:30 PM. It is too early in this project development process to be able to answer questions about Right of Way acquisition. By next summer, we should have narrowed things down to the more viable alignment alternatives. Then by spring 2007, we should complete the study and have a recommendation. At that time we will be better able to really answer these types of questions. I hope that helps. If you're not already on the project mailing list, send me your mailing address so I can make sure you get the project newsletters and meeting notices.
9/14/2005	3:28 PM	Ed Elkes <a href="mailto:eelkes@cfl.rr.com">eelkes@cfl.rr.com</a> emailed: "Dear Ms. Brooks, We own property in Orange County in the area under consideration for the Wekiva Parkway. In two of the past proposals about 25% of our property was to be under the right of way. I understand that since then those proposals have been reconfigured. Do you know when the plans will be re-submitted to the public, or even better, when the actual specific right of way will be plotted? Knowing that will help us decide if we should still attempt to build our home in that beautiful part of Orange County. Thank you for your help. Ed Elkes"

You looked all of the alignments that were on the map. You think for a variety of reasons that the alignment that included segment LCW-7 was the best alternative. Mr. and Mrs. Dennis Elmore: Yes.FDOT Rep: I don't know if you want to give her more as to why that is?Mr. and Mrs. Elmore: No. That's perfect.
11/10/2005	12:55 PM	Attended Public Meeting, 11/10/05, Via Mailing
6/13/2005	12:43 PM	PIO drafted and sent response to Priscilla Elmore elmorp@tampabay.rr.com: "Hello Priscilla,I'm glad you got the project update. We do not yet have an alignment nor interchange locations for the SR 429-Wekiva Parkway and SR 46 Bypass. As noted in the update the Expressway Authority and Florida Department of Transportation are undergoing the Project Development & Environment (PD&E) Study now, and are currently in the data gathering process. We hope in the next month to begin drawing up some initial alternative alignments to have ready for review and feedback at public involvement meetings in November 2005. Public meetings will occur in each of the affected counties Lake, Orange & Seminole).From there we will focus on the most viable alternatives, with a preferred alignment (including interchange locations) scheduled to be selected and approved in early 2007. It is a very involved process to develop these major projects, particularly with all of the environmental considerations in this area. We understand people trying to sell, buy and build homes have lots of questions, and we will be better able to answer those when this PD&E study is done.Please bear in mind that not every property within the project study area will be affected even once an alignment is determined. With the subsequent phases of project development (final design, permitting, and right of way acquisition) and the funding needs, we will probably be looking at 2010-2012 before construction would start on these projects.I hope that addresses your questions for the time being. "
6/13/2005	11:34 AM	Priscilla Elmore elmorp@tampabay.rr.com emailed: "Dear Ms Brooks,I recently received the Orlando-Orange County Expressway Authority Spring 2005 update. My husband and I own 3.7 acres on Swan Road, Sorrento, FL, off SR 46. We have been following the SR46 Bypass Corridor with nervous interest. I have searched the Internet as best as I can, but

cannot find a very detailed map as to where the interchange in Lake County just east of Round Lake Road turns southeast. If you pull out your map, you can probably understand our concerns. We bought this property while we were serving overseas and planned to build on it for our retirement. It appears that we would not be included in the land acquisition proposals, but it looks close enough that we may want to consider selling our property and look elsewhere. We purchased this particular piece of land because it was grandfathered agricultural and we would be able to enjoy the peace and quiet of the country. I would appreciate it if you could provide us with the distance in miles (or feet) of the edge of the interchange between SR46 and Swan Road. Also, when do you anticipate that the SR46 Bypass Corridor would be started? Completed? If I sent this email to you in error, please let me know who I can contact for this information. Thank you for your help. Regards, Priscilla Elmore"

11/10/2005	2:16 PM	Public Meeting Comment Form 11/10/05:Rodger and Susan England28108 CR 46ASorrento, FL 32776Locating the Parkway further south of SR 46 is the better scenario for us. Wildlife, noise, lights, and visibility of the parkway or interchange will ruin our current quality of life.
6/7/2005	2:36 PM	Worked on study area concept requests for:Susan England
6/6/2005	9:03 AM	Susan England 407-422-5754, live on 46A, have a question, got the 2005 update, what we're trying to figure out in our minds, when talking about the 46a realignment, we're in middle between 46 and 44, what are proposed plans for 46a? PIO said we don't know exactly how will affect them, just that the road will have to be realigned to connect cleanly with the Wekiva parkway. PIO emphasized we don't have an alignment for that yet, we're in the data gathering process.She said it looks like it's coming over our head, I have an ill husbands, he's going for lung transplant at Shands; I have lot of issues I have to deal with Is it almost a sure thing that the old 46 won't exist? PIO noted the parkway could either replace 46, or could be slightly south or north of that and 46 could remain as sort of a frontage road, that has yet to be determined.PIO offered to send bigger map, which she said she'd accept though she's seen larger plats and couldn't find their property. Send info to 28108 CR 46a, Sorrento 32776. PIO said if she still had questions after she got the map to call me back. She said she really appreciated that.
2/22/2005	10:33 AM	Susan England responded to PIO email: "MARY,THANK YOU FOR YOUR INFORMATIVE E-MAIL AND I APPRECIATE YOUR PROMPTNESS IN GETTING BACK WITH ME.OUR ADDRESS IS:RODGER AND SUSAN ENGLAND28108 COUNTY ROAD 46-ASORRENTO, FLORIDA 32776352-383-9720 HOME407-422-5753 WORKTHANKS AGAIN, SUSAN ENGLAND"
2/22/2005	8:22 AM	PIO responded to Susan re: S.R. 46 Bypass: "Hello Susan,The S.R. 46 Bypass is part of the Project Development and Environment (PD&E) Study for the S.R. 429-Wekiva Parkway project. There is a study corridor conceptual on the Expressway Authority website at www ExpresswayAuthority.com. This is all we have at the moment for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass. Please be advised that not all properties within the study area will be affected by these projects.There is no alignment yet for these projects. The PD&E Study, being done jointly by FDOT and OCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. Reports by the various Governor-appointed committees that have worked on these projects recommended including a realignment of CR 46A to whatever interchange is built in that area as part of the Wekiva Parkway. The details of the realignment will have to be worked out during the PD&E Study and subsequently in final design. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it could be 2010-2013 before any construction begins on these projects. Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. Please forward your full name, address, etc., so I can add you to the project database so you will receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."
2/22/2005	8:11 AM	PIO received email from Susan poochees@aol.com: "MS. BROOKS, I AM INTERESTED IN ANY INFORMATION YOU HAVE OF THE IMPACT ON COUNTY ROAD 46-A BY THE

IMPLEMENTATION OF THE BYPASS CORRIDOR AND ANY STUDIES THAT ARE NOW  
TAKING PLACE. THANKS, SUSAN"

Time		Regarding
3/25/2005	3:49 PM	PIO worked on conceptual request for Linda Enos and sent as requested.
3/25/2005	3:09 PM	Linda Enos 352-267-7800 said she had a question about the Western Connector; "just go the card in the mail. She's adjacent to the Heathrow property in Sorrento. I've been getting a lot of offers on my property that are astronomical. I mean \$250,000 for 5 acres. Is the 417 coming right through here?" PIO noted status of PD&E, no alignment, public meeting on alternatives for November. She said "that soon? Well that's exciting." She said they'd spent an hour on the website and it seemed like it was just too soon to tell.. She said there are developers up here putting in million dollar homes. PIO noted we are aware of a lot of development plans in the pipeline, not surprised she's been getting a lot of offers. Her mailing address is PO box 621, Sorrento Fl 32776-0621. Physical location is 25325 sweetbriar road, Sorrento Been here 12 years, and we're not selling. This is our home. PIO to send a 11x17 conceptual. She said that would be great. You've really answered all my questions. PIO noted we'll have better info when the PD&E study is done in early 2007, know a lot of people are trying to sell or buy houses and looking for definitive info. But we're just too early in the process

10/17/2005	2:35 PM	PIO emailed initial alignment alternatives to Eric Erickson as requested.
10/17/2005	2:32 PM	PIO returned call to Eric Ericson 407-665-5666, noted just go the go ahead to release the alternatives Friday and it hasn't been posted yet on the website, but I can email to him. He said great, send to eerickson@seminolecountyfl.gov
10/17/2005	2:18 PM	PIO pulled overall initial alignments from CH2M Hill FTP site.
10/17/2005	11:07 AM	Brian M/CH2M responded to PIO voicemail by emailing link to FTP site for project files: "Here you go Mary. You may have difficulty forwarding this link to other people (don't ask me why), but if anybody asks for it, I can send it. BrianExternal Wekiva_Parkway access
10/17/2005	10:55 AM	PIO left MSG for Brian/CH2M Hill noting had received requests for initial alignments exhibit since PAG meeting on Friday and asked him to email to me.
10/17/2005	10:38 AM	PIO got call from Eric Ericson 407-665-5666, 407-665-2000 have property one mile west of Wekiva River on the north side. Jerry McCollum said he went to a meeting Friday and there were some alignments that were shown. Wondered if I could take a look at alignments through area one mile west of the Wekiva. I can't find anything this morning, maybe if you give me a call and direct me on where it is. Thanks a lot.
4/18/2005	12:10 PM	PIO returned call to Eric Erickson, left MSG to confirm he was on mailing list 407-665-5666 let him know newsletter coming out mid-May.
4/15/2005	1:18 PM	Eric Ericson left MSG I got a letter from the Wekiva Parkway deal, I would like to be on the mailing list for the public workshops and public hearing for the preferred alignment adoption.20-19-29-005-0000000200 407-665-5666
Contact		Norma Erny
Date	Time	Regarding
8/9/2005	5:25 PM	Norma's email response bounced back because file was too large.
8/9/2005	5:00 PM	PIO responded to Norma Erny, attached updated study area map: "Hello Norma,I'm afraid

I still can't determine the impact of the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects on your property as we are still in the midst of the Project Development and Environment (PD&E) Study. The team is through the first round of data gathering in the field, and is in the process of drawing up initial alternative alignments. There are dozens of these being worked on at this point, and they will be honed over the coming weeks. They also must be reviewed by local governments and regulatory agencies. We are still shooting to have them ready for the public involvement meeting in November. That will be the best time to determine if any of them affect your property. Once we're through the PD&E Study (approximately spring 2007) and have an alignment, we'll have some much firmer info for folks such as yourself. Hopefully your trip down here will allow you to attend the public meeting. We'll also be posting additional info on the website once it's ready. Feel free to stay in touch during this process. We'll be sending out meeting notices and newsletters prior to the public meeting. Once the PD&E Study is done, we'll move into final design, permitting and right-of-way acquisition. This is the phase in which you'll get better info about whether or not your property may have to be purchased (in whole or in part). I've attached an updated study area map which shows a widening of the affected area in some locations, for your information. Please don't hesitate to call or email with other questions or concerns."--510 p.m.

8/9/2005	8:25 AM	PIO emailed Norma Erny: "Norma, I can't send you the study map because it's too large for your server, but here is the rest of the info." forwarded previous email that came back but without map attachment.
8/8/2005	4:45 PM	PIO checked Norma Erny history in database.
8/8/2005	2:41 PM	<p>Norma Erny emailed: "Goof morning Mary, Subject: Eminent Domain I hope you can help me with a concern: I recently read about some property being taken over via "Eminent Domain" in order to make room for either a highway, road or a development.. Is there any possibility of that happening to my lots? I received several more inquiries, from several states and two who wanted to build a home on the 4 lots (which he cannot do)... Your advice again would be very much appreciated and ease my worries. We are hoping to drive down perhaps later this year or early in 2006. Perhaps at that time I can thank you in person. Leg Lots 60-63, and Leg Lot 76; Town of Sylvan Lake, PB2 PG 69 and PG 2 PG 69</p> <p>Many thanks,  <div style="text-align: right;">Norma Erny njerny@juno.com"</div> </p>
6/23/2005	4:42 PM	<p>PIO responded to Norma Erny njerny@juno.com email: "Hello Norma, I'm glad you found the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass update helpful. We cannot determine the impact of these projects on your property because we do not yet have an alignment. Your property is within the study area, and we are wrapping up the data gathering for the study within the next month. We will draft some initial alternative alignments that should be ready for review and comment at public involvement meetings in November 2005. You're on the mailing list to receive further newsletters and meeting notices. This information also will be posted on the Expressway Authority website for review. Based on comments on the initial alternatives, we will evaluate and fine-tune the options to present some more viable alternatives for public review next year. We anticipate completing the study and having a public hearing that will result in a preferred alignment in early 2007. At that time we will be better able to answer property owners' had homebuyers' questions. Regarding the study map, we are also working on a revised map with updated aerials, and will provide that on the website and in publications once available. Regarding the phone calls you've received, we understand there is a lot of development planned for this portion of Seminole County, and there also is some land speculation going on in anticipation of the road coming through. We'll do our best to keep you informed of, and to get your input on, the development of this major transportation improvement project. You're also welcome to call or email at any time with questions or concerns."</p>
6/23/2005	1:20 PM	Checked SC property appraiser to find property location on Emmett Avenue, north east of Orange Blvd. and Markham Road. Compared to map but unable to find property on study

		area concept.
6/23/2005	12:35 PM	Checked to see if Norma Erny property was in the study area. She's on Seminole County list: 31-19-30-502-0000-0600 ERNY NORMA J 6903 DAWLEY CT , Springfield, VA 22152
6/22/2005	6:40 PM	Norma Erny njerny@juno.com emailed: "Thanks for the brochure about progress in Florida I do have an important question; I own several lots on Emmett Ave.LEG LOTS 60-63, Town of Sylvan Lake, PB 2 PG 69 and also: LEG LOT 76, Town of Sylvan Lake, PB 2 PG 69 and would very much like to know if any of these road improvements will have any effect on my property? Any additional information you could offer would be most appreciated. The map in the brochure was impossible to see the exact location of my lots. If you have anything clearer would it be possible to e-mail a copy?There were a number of phone calls offering to buy this property however I refused them all. 10/14/2005	2:09 PM	EAC Comment Form:Sam A. Etheridge, P.E.5306 Vista Club RunSanford, FL 32771It appears to be quite evident that the least disruptive, and most logical, alternative route for the proposed Wekiva Parkway is the "Southern Route" via connection to 417 @ I-4. At any rate, the Seminole County Expressway Authority should NOT be targeting the S.R. 46 corridor as a "preferred route" UNTIL the independent impact study by CH2M Hill has been COMPLETE and EVALUATED.

11/9/2005	8:21 AM	Comment Form 11/9/05: Wekiva Parkway: The interchange in Lake County at SR 46 should be further west centered on the Neighborhood Lakes Parcel. The shown position is very detrimental to the wildlife corridor and is redundant with SR 46.CR 46A Realignment: Should be routed further west along side Hojin Road and curve into parkway inter change in Neighborhood Lakes ParcelSR46 Reconstruction: The possibility of road being expanded to 6 lane very disturbing images on SR 46; resulting in sprawl not appropriate do the area I would like to see stronger efforts taken to acquire Neighborhood Lakes. Barn,LLC (Bill Cole and Nancy Roseman) are holding this parcel hostage has well as the whole region. I resent their attitude and lack of respect to the east Lake County community and the rest of the region.
Contact		Bill Eubanks ERA

Date	Time	Regarding
3/28/2005	2:06 PM	PIO called Bill Eubanks to get address for newsletter mailing there was a property I was looking at down there, but it fell through. PIO asked if he still wanted project info? He said sure, if not too much trouble send to 19021 S. O'Brien Road, Groveland FL 34736. PIO said newsletters should come out in April; my contact info will be included if he has any questions.
1/19/2005	5:38 PM	PIO returned call to Bill Eubanks/ERA, left detailed MSG that both the S.R. 414 interchange at 441 and Wekiva Parkway study area will affect 441 at Plymouth Sorrento Road. PIO noted MBX in final design; construction to start late 2006; Wekiva Parkway just kicking off PD&E, and will be a couple years before we have a prelim preferred alignment on that one. PIO left number and noted he's welcome to call back for more info, or check out the OOCEA website, left web address.
1/19/2005	12:09 PM	Bill Eubanks/ERA left MSG " I'm looking at project on Plymouth Sorrento Road, on the website trying to see if you have future plans for road going through that area, have a subdivision I want to do some listings in there and I need to know."

Contact		Jennifer Evans	Wekiva Pines Estates
Date	Time	Regarding	
2/21/2005	10:06 AM	PIO received email response from Jennifer Evans: "Dear Ms. Brooks,Your prompt response to my letter is most appreciated. I have no problem faxing the letter that I received. I understand that should I ever become a homeowner in which eminent domain becomes an issue, I would most certainly have legal representation. However, for this time of initial studies just underway, I feel this letter definitely crosses the line. All of my neighbors received this same solicitation. I was sick all weekend thinking that they had information that we didn't. Or that the timeline was nearing for our homes to be taken.My mailing address is 32125 Wekiva Pines Blvd., Sorrento, FL 32776. Please add me to the mailing list. This may have just been a wake-up call for me to be more aware of what was going on. My main concern is not uprooting my children during their school years. I am a widow with three children. My son starts high school next year and I am trying to maintain stability through that four year period.I would like to stay as informed as possible Thank you for your time and concern regarding this matter. Sincerely,Jennifer Evans32125 Wekiva Pines Blvd.Sorrento, FL 32776"	
2/21/2005	8:30 AM	PIO responded in detail to Jennifer Evans query: "Hello Jennifer,We've gotten lots of complaints about some of the solicitation letters that attorneys are sending to property owners. Let me try to set some things straight.There is no alignment currently for the projects planned in this area, so no determination has been made at this point as to whose property would be affected. The Expressway Authority and FDOT in January began the Project Development and Environment (PD&E) Study for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. Through this process we will determined a preferred alignment for these road projects. Perhaps you saw the study area conceptual posted on the Expressway Authority website? Please be advised that not every property within the study corridor will actually be affected by the roadway.We are in the process of gathering data and hope by November 2005 to have some initial alternative alignments ready for review at public involvement meetings. We will hold meetings in each of the affected counties Lake, Orange and Seminole). The PD&E Study should be done by early 2007, and will result in a preferred alignment. At that time we will be better able to answer property owners' questions.As far as the timeline on this project, we are just in the infancy. With the subsequent phases necessary for project development (Right of Way Acquisition, final design, permitting, etc.) we would be looking at 2010-2013 before construction may begin on this project. Please keep in mind that any of those phases could take more or less time than expected due to a host of variables.Once an alignment is determined, affected property owners will be contacted by the Expressway Authority's and/or FDOT attorneys We are currently in the process of working on a project newsletter. If you send me your property and/or mailing address, I'll add you to the database so you'll receive project info, meeting notices, etc.Again, we've been concerned about some of the solicitation letters	

being sent out by attorneys, some of which appear to cross the line. If you are comfortable, can you please fax the letter to the fax number below for our review?I hope you find this information helpful. Please let me know if you have other questions or concerns. "--838 a.m.

2/19/2005	9:09 PM	Jennifer Evans/Wekiva Pines Estates emailed: "Dear Ms. Brooks,I recently received a letter from an attorney indicating that the Expressway Authority and FDOT were planning to take our properties through eminent domain.I live off of SR 46 in the Wekiva Pines Estates Our parcel number is 20-19-29-010000002700.I would appreciate an honest answer regarding our properties adjacent to the state park. I have lost a great amount of sleep over this since reading this letter.If the government is taking properties when do they plan on letting the property owners know about this?When is the scheduled date of commencement for Phase III of the beltway? What is the scheduled completion date? Please provide as much information as possible. Thank you."

Date	Time	Regarding
11/14/2005	3:45 PM	Public Meeting Comment Form 11/14/05:Jay Exum2253 Peachleaf CourtLongwood, FL 32779There is a tremendous opportunity to complete the Wekiva Parkway in such a way to improve environmental attributes of the existing alignment of SR 46. The information provided by the Wekiva Coalition to the first task force appointed by the governor and ultimately the Wekiva Parkway and Protection Act laid the framework for a roadway that could be sensitive to the environment and prevent further degradation from future growth. For this project stay focused on the objectives outlined in the Act: 1) Purchase the identified lands for conservation and assure the protection of the resources on them 2) Create a design that minimizes the environmental foot print and assures the continuity of biological diversity (including bears) on both sides 3) The Parkway truly remains limited access and doesn't promote sprawl.First and foremost this process must be preceded by the purchase of the identified conservation lands. The Neighborhood Lakes parcel should be acquired for conservation and construction of an interchange not residential development. Existing conservation lands and the New Garden Coal mitigation tract must not be compromised by the alignment or proposed interchanges. Thank you for the opportunity to comment.

11/14/2005	9:35 AM	Attended Public Meting, 11/14/2006
11/14/2005	9:35 AM	Public Meeting Comment Forms 11/14/05:Lou Fabrizio / Orange Commons LLC237 Hunt Club Blvd, #202Longwood, FL 32779We need the road ASAP. I like the overall plan; however we have a property at Orange Blvd. and SR 46 (SWC) that we are developing as a retail center. Any overpass at Orange Blvd will create a severe economic hardship on our investment. We are opposed to any such alignment. We are very favorable to alignment plan 5b. Yes. 5A and 5D No way.

11/9/2005	9:34 AM	Comment Form 11/09/05: I am opposed to the alignments shown in 5A and 5D. Showing an elevation road in the 46 Right of way with flyovers at Orange Blvd. We are developing a site at the SWC which would be negatively impacted by a flyover at the intersection. We strongly favor 5B or one of the alternatives that does not involve an elevated road along SR 46. A flyover at Orange Blvd will be a death blow to our planned retail center. We should commence construction within the year. I favor an interchange at Kelly Park Road over the Ponkan Road interchange. Northbound traffic to Plymouth - Sorrento will have to be travel on 437 after exiting and the further north the interchange. The less traffic on the local road.
10/17/2005	12:03 PM	Lou Fabrizio/Primerica responded to PIO email: "Mary, Thanks for your follow up. Lou Fabrizio"
10/10/2005	1:43 PM	PIO received auto response from Lou/Primerica Group: "I will be on vacation and not responding to email from 10/8/05 - 10/15/05"
10/10/2005	1:42 PM	PIO emailed Lou Fabrizio/Primerica Group: "Hello Lou, As I'd suspected, I confirmed with the senior project manager on Friday that at this time there are no plans to relocate or realign CR 437 in Lake County as part of the Project Development & Environment (PD&E) for the SR 429-Wekiva Parkway Project. Our project would have to have some sort of projected impact on the county road in order to warrant such a change. There is still much work to do, however, and details to develop for this study. You're welcome to touch base with me from time to time as the study progresses to see where we are with things."
10/4/2005	10:05 AM	Lou Fabrizio/Primerica Group 407-774-8914 I've been following PD&E, interested in how going to connect in the interchange before the Y curve. Where that's looking like it's going to show up and how traffic is traffic going to get there? PIO noted exact interchange locations and configurations had not yet been decided. He asked "Is the 437 realignment part of the study? Lake County always wanted to realign that ... fabriziohsd@earthlink.net He said, "We're in Lake County at 437 and 46. I talked with Jim Stivender ... when we first started this process, Lake County had on their plan a realignment ... Then they took it off their 5 year plan, said not looking for funding from the county, that's going to be part of the PD&E. ... As the road comes up the Y would be somewhere ... right now it's a bottleneck at 46, it's two 90-degree turns." PIO noted don't recall discussions amongst team about realigning 437; we are realigning 46A as part of this project. PIO said I'd check into it and get back to him. He said he'd appreciate it.--1013 a.m.

Contact Ryan and Shelly Ferguson  
11/14/2005 2:59 PM Ryan and Shelly Ferguson435 Fawn Hill PlaceSanford, FL 32771As a resident of the Lake Forest community located on S.R. 46, we would like to express our concerns about the use of S.R. 46 as the preferred route for access to the Wekiva Parkway. It is clear that such routing of traffic will significantly increase the congestion on a road with is already experiencing high residential and commercial traffic challenges as this area begins a development boom. To route even more traffic onto this road will greatly intensify challenges and cause major transportation issues.The alternate southern route which uses the Greenway as an access to the Parkway is a much more logical alternative because it keeps east/west traffic off I-4 altogether. Secondly, it would not require I-4 traffic exiting to the Parkway to stop at traffic lights to access the Parkway. Instead, the flow of traffic could remain uninterrupted as traffic eased onto the Parkway from the Greenway exit. Using S.R. 46 on the other hand, would cause terrible congestion at the 46 / I-4 exit as well as at each of the many lights west of I-4 on 46. This will affect the thousands of people residing in the residential areas of 46.Please use the Greenway route as it will not impact residential areas as adversely.Thank you for your consideration, Ryan and Shelly Ferguson and Family.

10/14/2005 1:09 PM Mailed in Comment: James A. Fern5310 Shoreline CircleSanford, FL 32771As residents of the community of Lake Forest, we would like to express our opinions regarding the Wekiva Parkway PD&E Study.Reasons against the S.R. 46 Route: 1. Creating further congestion, traffic, on 46 and impact between 46 and 417 on I-4.2. Higher potential of accidents to and from Orlando and Deltona.Reasons for the southern 417 Route:1. Creates a "true" by-pass perimeter around Orlando, similar to Atlanta, Houston, etc...2. Reduces congestion on I-4 with true by-pass tied into existing 417.3. The business around the 417 route have already paid and prepared for the southern route impact.4. This route has less traffic impact compared to the S.R. 46 route.In order for Orlando to be compared to other large cities that have utilized by-pass perimeters, we should learn from then the importance of investing correctly now as the true construction costs 10 years from now will only cost tax payers more in the future. Please strongly consider the southern route!

Contact Al Fernandez  
Date Time Regarding  
2/18/2005 9:50 AM PIO worked on concept requests (MBX & Wekiva Parkway) and sent to Al Fernandez.

2/3/2005	6:38 PM	Al Fernandez emailed: "Mary, Thanks for the turnaround. Yes we did miss each other about 7 days ago. At your earliest convenience, please forward me a larger map to:Al Fernandez648 East Club CircleLongwood, Florida 32779Thanks,"
2/3/2005	5:16 PM	PIO returned call to Al Fernandez, noted 414 ends at 441 and Plymouth Sorrento Road, and that's where the Wekiva Parkway picks up. PIO noted that's north of the current intersection of 429 and 441. We discussed location in depth until he was clear, reiterated MBX funded and moving forward; Wekiva Parkway in the very early stages.
2/3/2005	5:11 PM	Al Fernandez left MSG received your email, thank you. The part on you ramp where the Maitland exchange extension meets the Wekiva Parkway, is that anywhere near where you get on to 429 in Apopka? The map I'm blowing it up and I'm not seeing everything I should be seeing. Can you tell me more clarification so I know exactly where that is. I did you get the email and will send you the request via email as well.
2/3/2005	4:46 PM	PIO returned call to Al Fernandez to let him know I'd responded to his email. He asked, so are those projects funding, are they moving forward. PIO noted MBX is funded; Wekiva Parkway is not fully, and all that info as well as timeline is in the email. He was thankful for the call back.
2/3/2005	4:30 PM	PIO responded to Al Fernandez email: "Hello Al,Was in meetings earlier when you called and emailed. I think we traded messages a while back. Response to your query:S.R. 414-Maitland Boulevard Extension is fully funded, and currently in the final design stage. The preliminary alignment is posted on the Expressway Authority website at www.ocea.com. If you need a larger printout, please forward your mailing address. Also please be advised that changes to the alignment are still being made as part of final design. We expect to have plans at 60% completion and ready for public review and meetings in fall 2005.Right of Way Acquisition has begun on this project, and construction is scheduled to begin mid-2006. First sections of the road (at least) scheduled to open to traffic in 2009.Wekiva Parkway & S.R. 46 BypassWe do not yet have an alignment; we only have a wide swath for the study area that was designated by the Wekiva River Basin Coordinating Committee The Project Development & Environmental Study, which is being done jointly by the Expressway Authority and the Florida Department of Transportation, started Jan. 19. This is a two- to three-year process. We are in the data-gathering stage, and hope to have some initial alternative alignments for review at public involvement meetings around November 2005. These projects are not fully funded. As far as timelines, with the other phases needed for these projects, as well as funding issues, we're not expecting to begin construction until some time 2010-2013. Please be advised this schedule is highly tentative since we're so far out.The Wekiva Parkway and S.R. 46 Bypass Study area conceptual, as well as project info, is available for review on the Expressway Authority website at www.ocea.com. If you need a larger hard copy (11 x 17), email me your address. I'll also add you to the project database to receive newsletters, meetings notices, etc.Hope that helps. Let me know if you want me to send the conceptals. "
2/3/2005	3:55 PM	Al Fernandez 321.945.7827 emailed: "Mary, I was told you can help me find out if money is appropriated, when construction will commence, and when it is projected to be complete on the following:Wekiva ParkwayMaitland Blvd. ConnectorSR 46 By PassThanks for your quickest response."
2/3/2005	3:35 PM	Al Fernandez left MSG would like to know if where your organization is on the projects, Wekiva Parkway, Maitland boulevard connector and 46 bypass, if there's a plan in place, when will be constructed. If you'd give me a call.

Contact		David Fierro	Florida Transportation Monthly Magazine
Date	Time	Regarding	
5/26/2005	1:26 PM	David Fierro responded to Chairman Keen quote: "Mary: Thanks. Just what I needed.	
5/26/2005	12:35 PM	PIO received and reviewed Bryan's revised quote and sent to Fierro/Transportation Monthly: "Statement from Allan E. Keen, Chairman of the Board, Orlando-Orange County Expressway AuthorityFlorida Transportation Monthly[Wekiva Parkway & the Environment]"The Wekiva Parkway is a crucial project for accommodating this area's rapid growth and for continuing the beltway around the Metropolitan Orlando area. While our mission is to provide transportation solutions that improve mobility, we are also committed to respecting the community we're building in. By protecting the Wekiva River Basin and the surrounding areas, we are preserving one of our state's most precious natural resources for future generations." "The extensive coordination between the state and local governments, business owners, environmentalists and citizens achieved in getting to this point; the efforts to acquire land for conservation; and the stringent design criteria for building this roadway through an environmentally sensitive area are a testament to sound planning and smart growth, and hopefully will serve as a template for other communities across Florida."	

5/26/2005	10:50 AM	David Fierro returned call, what you wrote is consistent with tone of article. Would that be coming from you or the chairman? PIO noted that's from me, but we can certainly get him something from the chairman. He said he's in production now but expecting proof edits tomorrow, so could drop the chairman quote in then. PIO asked for parameter of quote sought? He said something along the lines of How is your agency trying to balance the transportation needs of the region vs. trying to protect our environmental resources? PIO asked if he received the previous info I sent him? He said yes, it was helpful reading WKBCC repot, press release last year when governor signed the act, pulled some stuff from that also.
-----------	----------	---

5/26/2005	10:45 AM	David Fierro responded to PIO email: "Mary: Thanks for the comment. Is this to be attributed to you or the chairman?"
5/26/2005	9:54 AM	PIO emailed David Fierro, copied Bryan Douglas/OOCEA PIO with possible comment for article: "David, I don't know if this fits or if it was the sort of comment you were looking for? I left you another couple of voicemails also, FYI."This is a crucial project for continuing the beltway around the Metropolitan Orlando area. This project will not only address current transportation deficiencies, but will accommodate the rapid growth that continues in this area. The extensive coordination between the Legislature, Governor Bush appointed committees, local governments, environmentalists and citizens achieved in

getting to this point, efforts to acquire land for conservation and the stringent design criteria for building this roadway through an environmentally sensitive area will surely make this a model project for the rest of the state in the future."

5/26/2005	9:41 AM	PIO called David Fierro 352-241-0726 again to see what sort of comment he wanted for article, left MSG at office. PIO also called his cell.352 258 2791, left MSG that I'm still trying to find out what sort of comment he's looking for and from whom. PIO noted I could email him something to see if that's what he's looking for?
5/24/2005	1:35 PM	PIO returned call to David Fierro352-241-0726, left MSG c 352-258-2791, asked who he wanted comment from and nature of comment sought.
5/24/2005	12:22 PM	David Fierro, call 352-241-0726 left MSG I have wrapped up Wekiva Parkway article. We talked about getting Chairman Keen involved. I don't feel I need an interview but if you'd like to produce a comment I could insert that. Give me a call.
5/18/2005	11:00 AM	PIO called Bryan Douglas/OOCEA PIO to let him know I did connect with Bryan Douglas/OOCEA PIO, left MSG noting nature of discussion, reiterated interview suggestion with Chairman Keen, that I sent him WRBCC final report with design criteria for building road, request for pictures, apparent deadline for article (too late to attend May 26 Wekiva Basin Commission meeting).
5/18/2005	10:58 AM	PIO emailed David Fierro the Final report of the WRBCC from march 2004, noting page 45 had specific criteria for us to adhere to in building the project.
5/18/2005	10:35 AM	David Fierro 954-839-8372 called back. He said he saw I had called but he was on the other line. Don't know why it didn't go to voicemail. He said got copy of newsletter for PD&E, piqued my interest. Have the two agencies trying to complete the beltway and major environmental issues. What measures agencies are taking to accommodate major environmental. Magazine trying to be cross between Fla. Trend and engineering news record. Devoted entirely to transportation in Florida. Not trying to be investigative, negative or gotcha. Simply want to promote transportation, mag is very much promoting transportation projects.Would like to understand how the agencies are dealing with this. Everything I've read on the subject seems to indicate this may serve as a model. PIO went into very comprehensive nature of the act as well as study by various committees, noted we have marching orders to acquire buffer lands, build parkway in park like design criteria as well as others. PIO briefly went over makeup of various committees and some of the areas they looked at and implementation for growth management for that area by various governments. PIO referred him to ECFRPC website for host of documents, maps, etc., to bring him up to speed on the effort. He asked if there were any pictures of what we were trying to protect? PIO noted Wekiva River Basin Coordinating committee final report had pics on cover of the springs, some historic photos, don't know if that's what he's looking for? He said he'd check it out. PIO also suggested for live quotes that he interview Chairman Keen of the EA. He noted Bryan also suggested that and he'll likely take him up on that. PIO said if have any questions after reviewing website material, call me back. In meantime I'd see if I had anything else I could send him. he said for this send email to dfierro@floridatransportationmonthly.com he asked if I'd send the mag; he said he'd send me a copy.--1050 a.m.
5/18/2005	9:45 AM	David Fierro/Fla. Transportation Monthly Magazine left MSG he's interested on story on Wekiva Parkway project, primarily because of environmental issues and how EA and Department are dealing with environmentally sensitive issues. Please give me call 352-241-0726

Contact		Geordia Fine
Date	Time	Regarding
11/14/2005	10:10 AM	<p>Comment Form:Geordia Fine736 Riverbend BoulevardLongwood, FL 32779A Wekiwa Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiwa Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be</p>

underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Thank you.Jim Fitzsimons404 484-4143
Contact		Margaret Fitzwater
Date	Time	Regarding
7/12/2005	1:35 PM	PIO returned call to Mrs. Fitzwater. Got her daughter Sharon Roberts, who said wasn't sure why mother called but they need more information about whether they're going to be affected. She said they need to make some improvements. It's things we need for comfort but don't want to put out the money if they're going to take our house. PIO went over general project timeframe, noted lot of people in same situation.She also said their neighbor got some info and we didn't , and then we got a letter and he didn't, and he lives next door. We got the property owner letter. We're on 5 acres on the Yankee Lake property, near the preserve.I was concerned if I moved out here, I'm on disability for chemical sensitivity. I can't be around congestion. If the road is really close I might have to look at another property. I have a kid to take crew of . I liquidated all of my assets and

moved out here for health reasons. I'm on north side of highway like Lake Forest. I need to know if there's someone on the committee that I can explain my situation to. PIO gave status of PD&E, just started this year, 2 year process, wrapping up data gathering and starting to work on initial alternatives we hope to have ready for public review at involvement meetings in November. PIO noted that's when they'll get their first look at whether or not they may be affected. Right now we're just early in the process. She asked if we could go over Yankee Lake? PIO noted all sorts of federal and state constraints and restrictions re: these types of facilities, but it's something that would be looked at, maybe on the outer edges of the property. PIO noted we're working with Seminole County government on this also. PIO noted all sorts of environmental considerations with all the preserved property up there. She asked if we'd be going along S.R. 46? PIO noted in some locations that's being considered, but option also being looked at to build new road with 46 serving as a frontage road. All options being reviewed and discussed; noted there's a lot to be considered. She said they really need a lot of lead time to make a move because they're out there for health reasons, not because they like to be around horses. My mom is in her 70s and my little boy also has the same disability. We get sick around too much congestion, etc. PIO reiterated project and meeting timeframe, noted we're in the very early stages. Confirmed I'd make sure they were on the mailing list. Also referred her to the website where we're posting info or she can check in with me every couple months or so to see if there's anything new. She said she appreciated the help and information.--152 p.m.

7/12/2005 10:12 AM MSG Margaret Fitzwater 5748 Michelle Lane, Sanford, 32771 I want to get on your mailing list. It looks like we might be pretty close to whatever is going on with the Wekiva Parkway. I would want to know as soon as possible so I could remove myself.

Date Time Regarding  
10/14/2005 1:12 PM EAC Meeting Comment Form: Norm and Nora Foldenauer 5243 Shoreline Circle Sanford, FL 32771 The so called "preferred" route is the utilization at existing Hwy 46 to connect to 417... This in reality will cause many more problems requiring very expensive corrections later. In the distance from International Parkway, there is very soon going to be two condos, one with 100 units, the other with 250 units. That is not counting what will go in on the south side of 46. The numbers of cars that will continually clog that I-4/46 intersection will be an immense problem. On requiring major expenditures to fix... Do it right the first time. Go with the southern route... The one that connects directly into 417. The common sense choice.

Date	Time	Regarding
4/20/2005	5:31 PM	PIO responded to Orlando Fonseca responded to PIO email: "Orlando, I do not have an exact date on the newsletter mailing at this time. It's still in production, including refining the map graphics, etc.Re: the public involvement meeting, once you get the meeting notice you may send in written comments to the address indicated in the letter if you're unable to attend. I believe written comments can be accepted up to a week or two of the meeting date, but that will also be spelled out in the meeting notice.As more information and conceptals become available, you'll also be able to view it on the Expressway Authority website at www.oocsa.comI hope that helps."
4/20/2005	10:18 AM	Orlando Fonseca responded to PIO email: "Hello Mary,I was hoping to receive the newsletter by May 9th, 2005 because I plan on taking a trip to FL during that time. Is that possible?RE: Public involvement meeting. How does one become vocally involved if we live out of state?Talk to you soon.Orlando Fonseca'
4/19/2005	3:35 PM	PIO responded to Orlando Fonseca ofonseca@stamford-lawyer.com email, copied yznun@conncoll.edu: "I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the first half of May. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review the initial alternative alignments, and you'll also receive that meeting notice."
4/19/2005	11:44 AM	Orlando Fonseca ofonseca@stamford-lawyer.com emailed, copied yznun@conncoll.edu: "Good Morning Mary,We received a notice in the mail about the proposed Wekiva Parkway Project Development. We are requesting to receive copies of the project newsletter and other pertinent information materials on this project. We would also like past information that is available leading to this letter dated March 30th, 2005.We look forward to hearing from you.Sincerely,Orlando Fonseca"

Date	Time	Regarding
6/15/2005	4:46 PM	PIO returned call to Helen Foster. She said I had a got a card in the mail, like you stick on the refrigerator, but that's not an E-PASS, is it? PIO noted no, it's just a contact card in case she had questions about the EA's Western Connector projects. She said well how do I get the E-PASS? PIO noted there's a number on the card for E-PASS questions. She said she doesn't "have a phone that she can do all that" (make out the numbers for the letters) PIO noted the number was 407-823-7277, she can call them to find out how to get it and I think they were selling it at some stores, but they can confirm that for her. She said she would call and was thankful for the call back.
6/15/2005	4:06 PM	PIO tried to return call to Mrs. Foster 407-889-7510 but line was busy.

6/15/2005	3:52 PM	Helen Foster 407-889-7510 I have a little old card and I was calling to see if it was an Email card and I want to know if it is an E-PASS card. Please call me back.
Contact 10/14/2005	1:50 PM	Robert Foster EAC Comment Form:Robert Foster4949 Shoreline CircleSanford, FL 32771-7127With the only two routes remaining being S.R. 46 and the southern 417 route, the most logical choice would be the southern route.1. It would directly attach to current 417, eliminates a new maize paralleling I-4 northbound (or worse, dumping onto I-4 for less than a mile, then veering westbound onto S.R. 46) and eliminating further construction at the I-4 / S.R. 46 Interchange.2. S.R. 46 is already VERY congested. Further congestion would create many hazards departing the communities on both north and south sides of S R. 46 just west of I-4.3. Construction along the southern 417 route is more easily possible due to low population density on proposed route, causing less diversion during construction.4. Impact on property vales in the S.R. 46 corridor would be much less affected using the southern 417 route.
Contact Date	Time	Ellen Fostoff Regarding
12/27/2005	2:50 PM	Rock Springs News PIO returned call to Ellen Fostoff/Rock Springs News, who wanted to know what would happen in the next year, particularly that would affect businesses. PIO gave update on PD&E Study and evaluation of public comments from public meetings and local government input. Noted will be updating maps in a couple of months with some alternatives being removed and some new ones added for consideration. PIO noted schedule for viable alternatives public meetings (next summer) and study completion spring 2007. PIO noted there is a comment form on the website if people still want to voice their views. PIO noted all the public meeting maps also on the website and suggested she take a look at them. PIO said if she has any questions about the info on the website to call me back. She said she'd check it out.--258 p.m.
12/27/2005	2:38 PM	Ellen Fostoff/Rock Spring News left MSG was looking to get some updated info on MBX, understand they renamed it, looking for any info about the project that would impact the Apopka area in the next year. Call or email me at 407-493-8884 ellen@rockspringsnews.net

		Coldwell Banker Commercial

12/28/2005	11:28 AM	Dean Fritchen left MSG thanks so much for your telephone MSG and answer on LCW significance. LCW8 has blue marker in front of the property that I'm interested in, that I'm part of. That seems to have some significance. Looks like might even be a tract of some sort. Want better identity of what the blue track on top of the yellow track, in terms of these maps or conceptual aerals...I'd be happy to call someone else if you want me to. On LCW8 there's a blue colored aerial on the road on top of the yellow area. I would like to try to understand that a little better, if I may. Thank you very much and I appreciate your help. You're obviously doing a very good job. I used to be a PIO in my salad days when I was a young man so I understand what you're up against. I was in the Navy and Pentagon and did a whole lot of that as well in my days in New York, so I understand what you're up against. I was in the Navy ... I appreciate if you could get back to me and tell me what that blue patch might indicate on LCW8 right at Round Lake Road and Hwy. 46 on this concept. Thanks a lot.
12/28/2005	9:06 AM	PIO returned call to Dean Fritchen 407-975-3476, left detailed MSG explaining alignment segment designations for purposes of preliminary impact assessments. Noted letters corresponded to appropriate county, east or west section, etc. PIO noted we're in the process of evaluating all of the public input and local government input in refining the initial alternatives. Noted some lines will come off the map whiles news ones that have been suggested will go on. Hopefully that answers your question, if not call me back. Left my number.
12/27/2005	4:30 PM	Dean Fritchen left MSG 407-975-3476 thank you so much for sending me the letter dated Dec. 21 with the rendering or proposals for the 46 and Wekiva Parkway. Question I have on it. You have on there LCW1, 2, 3 ... 8 along the ... from highway 441 runs east on 46. What does that mean? I can't figure it out looking at this thing. Would appreciate if someone could get back to me and explain it to me. There's one LCW right in front of my property. The LCW8 is my specific concern.
11/14/2005	10:22 AM	PIO returned call to Dean Fritchen, walked him through website and text links for initial alternatives. He got to the correct link and began downloading file for overall alternatives. He said this is just what I needed and thanks for calling me back. PIO noted we're working on getting all the exhibits on line, but hat probably won't be today. He said this should do it.
11/14/2005	9:59 AM	Dean Fritchen/Coldwell Banker Commercial 407-571-5525 left MSG I'm a senior commercial associate and w talked at the Apopka meeting. I have a meeting today at 230 p.m. and I can't seem to pull the map up on the internet. I want charts 1 and 3. I would be happy to come pick them up if that's appropriate.
11/10/2005	3:32 PM	Dean Fritchen left MSG you and I briefly had discussion. Trying desperately hard to get copy of 1 and 3 mapping configurations that you had at the presentation yesterday in Apopka. I'd be happy to run over and pick it up if that's appropriate. I tried to pick it up on your email, but it doesn't seem to be there yet, perhaps it will be in some time. Would really like to get those two aeralsDean Fritchen?? Coldwell Banker Commercial407-571-5525 I know you're running very busy right now and I'm sorry to bother you, but If someone could get back to me and tell me how I can get those proposed configurations, I'd appreciate it. I'll be happy to do whatever I can, come get them or whatever I can. Let me give you my Email dean.fritchen@flcomm1.com maybe you can email it to me.Anything you can do would be most appreciated. I'm rather desperate to get that info, if I can. Overall it was a good presentation yesterday; I understand what you're going through.I'm the short old guy with the tie that talked with you briefly.

4/19/2005	3:12 PM	Steve Hofmann shofmann@cfl.rr.com emailed: "Mary,I received a letter regarding the Wekiva Parkway Project Development and Environment Study with your name as a contact

person. Per this letter, and as a representative of Ramlee Holdings, a property owner that maybe impacted by this project, I would like to be added to the Wekiva Parkway newsletter. As a matter of fact, could you please send a project newsletter to the following two individuals. Mr. Steve Hofmann, Ramlee Holdings Partnership, 1500 Park Center Drive, Orlando, FL 32835 and Mr. Dean Fritchen, Coldwell Banker Commercial, 900 N. Lake Destiny Drive Suite 110, Maitland, FL 32751 Thanking you in advance for efforts to accomplish this request. Steve Hofmann"

Contact		John & Amy Frost
Date	Time	Regarding
11/14/2005	4:25 PM	Public Comment Form 11/14/05: John Frost 144 Overoaks Place Sanford, FL 32771 I prefer the alignment that directly ties into the existing 417 / I-4 Interchange. It seems to make the most sense from a traffic stand point in that you have direct access to both I-4 and the 417. There is also less impact to residential since there aren't as many homes on the south side of 46. A lot if that property is commercial undeveloped.
11/14/2005	8:32 AM	Attended Public Meeting, 11/14/05
5/31/2005	4:00 PM	PIO responded to John & Amy Frost: "Hello John & Amy, I wanted to confirm that you are on the mailing list for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. The project newsletter went out last week, so you should receive it soon if you haven't already. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments. You'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."
5/26/2005	4:39 PM	Darren Frost [dfrost@rdmichaels.com] emailed: "Mary, I am a property owner in located in the current PD&E study area and would like to be placed on the mailing list for future information regarding this project. John & Amy Frost 144 Overoaks Place, Sanford, FL 32771, (407) 302-1343 Thanks for your time."

Contact		Patricia Fulmer
Date	Time	Regarding
6/27/2005	4:40 PM	PIO worked on study area concept letter for Patricia Fulmer and sent as requested.
6/27/2005	3:45 PM	PIO returned call to Patricia Fulmer, had question about Wekiva Parkway, the info you sent us. What are they talking about the realignment of 46A? PIO explained would affect the segment west of I-4 from S.R. 44 to S.R. 46, where it comes down at a severe angle; whatever connection we'd make with Wekiva Parkway in that area would be more of a perpendicular connection. Is that going to connect to 417? PIO noted not known whether will connect at 417, or 46 or where at I-4 at this point. She said the map was hard to see in the newsletter), couldn't find a better one on the website or anywhere. PIO noted we're working on an updated study area map, but I could send her a larger copy of the current map if that would help. She said does it show the streets? PIO noted the same streets are marked on the map she has now; it's just larger. She said that might be helpful, please Send her the 11x17 map at PO Box 952458, Lake Mary 32795
6/27/2005	11:42 AM	Patricia Fulmer 407-221-8088 left MSG I would appreciate a call back. I have some questions concerning one of those projects. 407-323-5515

Contact		Mike Gagliano
Date	Time	Regarding
4/19/2005	10:34 AM	PIO returned call to Mike Gagliano 5086 Otters Den Trail, Sanford 32771 the preserve at Astor farms. 407-328-8020, c 407-592-1020. We just moved in here and didn't know any of this was going on. Do you how close they're allowed to come to your property? Are they going to be going right through subdivisions? PIO noted it wouldn't be possible to put road in this area without affecting some homes. PIO noted number of scenarios, not every property will be affected in the study area. Could be a total take, a partial take, or ROW line could be just outside your property. Gave PD&E and construction schedule. He said please keep them informed.

4/19/2005 9:31 AM Mr. Gagliano left MSG received letter in the mail about the Wekiva Parkway. It said contact you if want to be on mailing list. Mike Gagliano, 5086 otters den trail, Sanford 32771, that is in the preserve at Astor farms. 407-328-8020, c 407-592-1020. I would greatly appreciate being put on the mailing list and keeping me informed of the progress of the road and the study.

Date Time Regarding  
2/18/2005 9:40 AM PIO worked on concept requests (MBX & Wekiva Parkway) and sent to Blanca Garcia.

2/3/2005 11:15 AM Blanca Garcia/Dean Mead attorney, said she does want the MBX alignment, one on the website date September 14, doesn't print out well. PIO said I'd have to order some of the newer conceptuals, have sent out all the ones I had. She then said her boss said something about the extension to the north from 441, but wasn't sure he meant the Wekiva Parkway. PIO said we don't have an alignment for that, but I can send her the 11x17 study conceptual for that corridor also. PIO noted it'll probably take a couple days to get the latest MBX concepts ordered, but will get them out to her. She was very appreciative of the help.

2/3/2005	8:33 AM	PIO returned call to Blanca Garcia/Dean Mead attorney office, assistant to Mark Leavitt, left MSG I can send her a copy of the last MBX preferred alignment, but noted changes being made to that daily in final design. PIO asked her to call me back to confirm that's what she was looking for.
2/2/2005	2:12 PM	Blanca Garcia/Dean Mead attorney left MSG "On your site I see a map of preferred alternative. Call me to discuss how I can get copies of this, or anything more newer."
Contact Date 4/18/2005	Time 1:48 PM	<p>Elvis &amp; Stefanie Garcia Regarding PIO responded to Elvis Garcia egarcia@cfl.rr.com email: "I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass PD&amp;E Study. Date	Time	Regarding
11/14/2005	11:05 AM	Attended Public Meeting, 11/14/05
3/14/2005	3:05 PM	<p>PIO responded to Yvonne Gatzke: "Hello Yvonne, We do not yet know how the S.R. 429-Wekiwa Parkway &amp; S.R. 46 Bypass will affect your area as we do not yet have an alignment. The Project Development and Environment (PD&amp;E) Study, being done jointly by FDOT and OOCEA, will determine the road alignment and configuration. The PD&amp;E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. There is a study area conceptual available on the Expressway Authority website www.ocea.com, along with other project info. As you can see from this conceptual, there is a very large area shown for where the Wekiwa Parkway could possibly connect with Interstate 4. Also, keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). Following subsequent public meetings and review, we hope to finish the PD&amp;E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We are in the process of drafting the first Wekiwa Parkway newsletter, which will probably go out in April. I have added you to the project database to receive the newsletter, meeting notices, etc. I hope you find this info helpful. Please feel free to call or email with other questions or concerns."</p>

3/14/2005	12:22 PM	<p>Yvonne Gatzke Yvonne M. Gatzke emailed: "We live 3 miles from the Seminole Towne Center in Seminole Co. We also own a rental property in the same area. We would like to know just where the new Wekiwa Parkway is going to connect with Rt. 46. We know that it is going to run along the 46 corridor into Lake Co. but are worried that it could take one or both of our properties since we are almost in line with the intersection of the Greenway and I 4. Have they decided just where it will go yet? I would appreciate any help you can give me about this. .... Thanking you in advance. Yvonne Gatzke 7025 S. Sylvan Lake Dr Sanford. Fl. 32771"</p>
-----------	----------	---

Contact		Richard & Charlotte Gauss
Date	Time	Regarding
12/19/2005	5:04 PM	<p>PIO returned call to Richard Gauss 407-415-4566, who said he didn't get my detailed MSG from Friday. PIO reiterated their property is south of Becky's nursery and well south of the orange alignment at this time (noted at this point would be crossing north of Wilson Road, in area of Academy of Learning. He said he knew where that was.). He confirmed I had the correct property location. PIO noted we're analyzing feedback now, and some people are requesting we look at shifting alternative alignments north-south, etc., so let him know that's a possibility, but as of now they're in the clear. PIO urged him to stay involved with the process, let him know he's on the mailing list and will be getting newsletters and meeting notices. He said our main thing was we wanted to know whether to build or not. Thank you so much.</p>

12/16/2005	5:16 PM	Richard Gauss returning your call. Appreciate it if you'd call me.
------------	---------	--

12/16/2005	10:20 AM	<p>PIO called Richard (&amp; Charlotte) Gauss 407-415-4566, left detailed MSG that we show their property well south of orange alignment alternative, noted alternative crosses orange blvd north of school and Wilson road, near academy of learning. PIO noted we're still early in the process, alternatives being evaluated and some shifting is possible. PIO invited him to stay tuned in to the process as the maps will be updated, and emphasized no alignment has been selected yet, no guarantee the orange alternative will or will not be selected. Left my phone number if he needs to call back.--1027 a.m.</p>
------------	----------	--

12/16/2005	10:01 AM	PIO researched Richard Gauss property 5724 Terra Bona Crt., Sanford 407-415-4566 as requested. The parcel is just northwest of Markham Road and Orange Boulevard, on south side of Beckey's Nursery. The alignment alternative crosses orange boulevard to the north, north of Wilson Road and Wilson Elementary School (actually little farther north at Academy of learning). SC Property Appraiser also shows address for them at 1000 Terra Bona Crt.
12/15/2005	4:00 PM	Richard Goss 407-415-4566 c called to ask about their 10 acres west of orange Boulevard. They just finished a barn and apartment, where they're living now. They were planning to build a house on the property after the first of the year, but don't want to if the road is coming through. Their property is 5724 Terra Bona Crt., Sanford. PIO said will check on property and poss. impact of alternatives and get back to him. PIO also noted couple times that the maps on the website for his review at any time, gave him address and text links. He said he has a lot of problems with the internet. He's 72 and just missed that computer curve. PIO said I'd check on it and get back to him. He said he'd appreciate it --412 p.m.

Contact		Chris Gauthier	Apopka Chief & Planter
Date	Time	Regarding	
11/15/2005	4:00 PM	PIO returned Chris Gauthier's call, she asked for attendance at all of the meetings, which I provided. She asked about amount of input. PIO noted number of comment forms received as well as numerous emails and conversations with members of the public. She asked would that input be taken into consideration? PIO noted yes, all input from comment forms as well as government officials and other sources will be sorted through and reviewed. She asked about next public meeting. PIO noted will bring the more viable alternatives forward, based on a lot of that input, for more public workshops in summer 2006. PIO noted we're still gathering input, doing presentations to HOA's and other community groups and continuing meetings with local government officials. She asked for confirmation that groups could get presentations? PIO noted that's correct. PIO also noted that a lot of people have asked for the public workshop maps, and they are available on the EA website now, gave her the text links. She said thanks and the story should run Friday.--409 p.m.	

11/15/2005	3:31 PM	Chris Gauthier/Apopka Chief 407-886-2777 left MSG I'm looking for update on meetings in Mount Dora and Sanford. Please give me a call.
------------	---------	--

11/9/2005	12:41 PM	Attended Public Meeting, 11/09/05
-----------	----------	-----------------------------------

10/18/2005	4:12 PM	Chris Gauthier/Apopka Chief said John Peery wants to know where on the website to find info about the November meetings. PIO noted go to the home page, and there is a highlighted graph with Western Connectors, if you click on that it's the Wekiva Parkway and meeting info is at the top. She said she'd let him know.

Date	Time	Regarding
11/14/2005	3:30 PM	<p>Comment Form:Juanita Gerena830 Rio Alamano DriveAltamonte Springs, FL 32714A</p> <p>Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

10/14/2005	1:27 PM	EAC Meeting Comment Form:Salvatore Giardina8273 Shoreline CircleLake Forest-Sanford, FL 32771I truly believe that to target route 46 as a primary access for the Wekiva Parkway would be a traffic nightmare. Traffic on RT 46 is now very heavy... Exits from I-4 Seminole Mall 500 or more condos on RT 46 and homes International Parkway to RT 46 and more offices. Your best route is the so called southern route to connect to RT 417 Direct. Go the southern route.
10/14/2005	1:09 PM	EAC Meeting Comment Form:Diana and Salvatore Giardina5273 Shoreline CircleSanford, FL 32771To the members of the Wekiva Parkway and Seminole County Expressway Authorities:Please do not target Route 46 as limited access for the expressway. Traffic in the area is now at a high volume due to the I-4 exits and the Seminole Town Mall. In, addition, the International Parkway, traffic begins and ends on S.R. 46. As you must know there is more office and commercial development planned for the International Parkway area adding additional traffic.Also, in the area of Route 46 west of I-4 there will be more than 500 condos just on Route 46 alone, not counting the immediate surrounding area. New developments are going up each day.The best route is the so-called southern path which will lead into the RT 417 road way thereby allowing traffic to disburse to Rinehart Road (now the auto market of Central Florida), I-4, the Mall, and points east and south from RT 417. I believe you may have waited to long as it is now that the area is fully occupied with development. The past few years' government leaders could not or would not say no to development. Seminole County is fully packed.Sincerely, Diana and Salvatore Giardina

12/12/2005	5:15 PM	PIO went to FDOT D5 work program public meeting as requested by Bryan Douglas/OOCEA PIO in case there were any questions on my projects. Kathy Putnam/QCA also attending to handle any questions on the 408. There was a 10 minute video presentation.There were nearly 50 people including FDOT staff and some consultants, very few members of the public. Highlighted projects mentioned by DOT speakers included Wekiva Parkway and they noted they're contributing \$45 million to ROW in the 5 year plan. Speaker noted all public comments should be directed to George Gilhooley, who was in attendance. Besides Jerry McCollum/SC Engineer and Dave Grovdahl/Metroplan, only two members of the public spoke. One gentleman made comments about federalizing the toll roads and other suggestions. PIO had boards for both the MBX and Wekiva Parkway. A couple of people looked at the boards but did not have any questions. PIO also provided business cards.--7 p.m.

11/14/2005	2:51 PM	Public Meeting Comment Form 11/14/05:Matt Mc Ginley567 Avon Glade PlaceSanford, FL 32771MMcGinley@cfl.rr.comObviously, I prefer the two most northerly routes with the drop from the expressway to the existing 46 as far to the west as possible. 46 is such a mess and if all the plans included or realignment of 46 why not just continue down 46 to I-4 interchange. Also, this will route away from Wilson Elementary (by concern) and minimize the impacts to homes.

11/9/2005	10:33 AM	Public Meeting Comment Form 11/09/05:Diane Goryl3282 Yothers RoadApopka, FL 32712I do not think Hwy 46 should become a toll road. Too many people in Plymouth area use 46 to access I-4 and there are too few "non-toll roads" available for local residents.Also if the 429 extension is built and the 46 extension is not, with PSR paralleling a toll road, the traffic would still be bad on PSR and only commercial traffic would use the 429 toll road. Comments please.Please continue to keep me on the mailings because my property abuts the proposed corridor. Thank you.
Contact		Edward & Joann Grace
Date	Time	Regarding
11/14/2005	2:47 PM	Comment Form:Please give serious consideration to the following reasons for utilizing the southern proposed route for the extension of the Wekiva Parkway:1. S.R. 46 is already overly congested, not even including the new townhomes, condos, and new business. Homes alone will not total between 1,500 to 2,000.2. The huge construction project would have a tremendous detrimental impact on Seminole Town Center Mall as well as the small local businesses.3. The condemnation of land and cost efficiencies would overwhelmingly suggest utilizing the southern route would be much more beneficial and less detrimental or to the local area.4. The efficiency of connecting directly to S.R.

417 in lieu of causing additional congestion on I-4 is a tremendous advantage for everyone. Thank you, for your consideration, Edward and Joann Grace

Contact		Kevin Grace
Date	Time	Regarding
12/6/2005	11:50 AM	Kevin Grace called and asked to be updated on the project. He is looking to buy some property on 46 near the Wekiva River. PIO guided him to the website and potential alignments. The property is within the project study area. PIO stated the alignment has not been set and will be a year or so before it is. He asked about construction. PIO stated that it would be 2012 or better. He asked questions about how FDOT acquires the Right of Way. PIO stated that he would have to talk with Mary on Monday after she returns from vacation. He said he would like to receive updates via e-mail at kevlou@cfl.rr.com

Contact		Michelle Gracier
Date	Time	Regarding
11/28/2005	2:21 PM	PIO returned call to 407-328-0634 Michelle Gracier? Live on 5301 Michigan Avenue at the corner and New York in Seminole county. When I go on your website the 3 initial alignments one comes through my house. When we were putting our house for sale at the beginning of the year. Got the update. I'm on 2-5 acres against the black bear reservation. Guess lot of people threw it away. They thought it was junk mail. Not one of my neighbors attended the meeting. We just had a realtor come out wed. and she said you need to find out what's going on with the highways, they're in affected area on sylvan lake. And then I pulled it up on internet and it showed it going right through my property. PIO went over study status and timeframe, as well as overall project timeframe and funding constraints. PIO strongly encouraged her to fill out a comment form and get it in ASAP since we're going through and analyzing those now to see which alignments have the most support and make the most engineering sense. She said what is she supposed to tell people about the house? PIO said also she can do is provide the info from the website and let them know status of the study and overall project timeline, and that nothing decided yet. She said that helps her a lot. She said she printed off the comment form and will send it in. PIO also suggested she have her neighbors look at the project info on the website and get in their forms as well. PIO said if they don't have internet access to get in touch with me and I can send them 11x17 hard copies. She said she'd do that. She said it's not as bad for her because she's already planning to move, but she said some of them have been out here forever. PIO reiterated we'll be in the process of weeding down to the more viable alternatives over the next few months and will be updating the maps, so check in on the site. PIO noted it was possible there could be enough support that a new line could go on the map. Noted viable alternatives to be ready summer 06. She was very thankful for the call back.--235 p.m.

11/28/2005	9:13 AM	407-328-0634 Michelle Gracier? Live on Michigan Avenue in Seminole county. Rec'd letter re: the Wekiva Parkway saying we were in affected area. We pulled up the maps and have a question about one of the paths. If you could give me a callback I would much appreciate it. Thank you very much. Look forward to hearing from you soon.

11/9/2005	9:00 AM	<p>Comment Form 11/09/05: The Wekiva Parkway and Protection Act passed by the Florida Legislative specifies that building this Wekiva Parkway (prior to) land for the interchange is purchased in the Neighborhood Lakes. Some land is also to become conservation land. The OOCEA needs to be needs to get work acquiring that property before prices go up even more. Under no circumstances should an interchange within state conservation lands be sited. These lands were purchased over a 20+ year period based on the quality of ecological habitat at great expense, millions of dollars, paid by the citizens of Florida to leave a legacy for out children. OOCEA should quickly buy the Neighborhoods Lake Property and choose the farthest west and north route for the Parkway to avoid the preserved lands. A slip ramp with out facilities will allow entry to the Parkway by residents along SR 46. I support the idea entirely removing SR 46 in the area of Rock Springs Run once the Neighborhood Lakes interchange is in plan, which would allow wild life to move under an elevated road for a wide expanse. Thank you.</p>

10/14/2005	2:01 PM	<p>EAC Meeting Comment Form:Jim and Susan Green5255 Shoreline CircleSanford, FL 32771We would like to voice our opinions on the upcoming decision concerning the Wekiva Parkway. We see that the connection with 417 (directly) would be a better choice, due to less redirecting of traffic from the I-4 / 46 intersection. It just makes sense. Routing it thru 46 to I-4 would kill businesses due the access road necessary, it would bottle up I-4 / 46 and tighten traffic between I-4 / 46 and I-4 / 46-417. Too many major businesses are in place along 46 to disrupt the flow.</p>

Regarding  
PIO returned call to Faye Grossenbacher (cq) 407-886-5262 PO Box 808, Plymouth, FL 32768. how long will the study take? PIO noted should have preliminary alignment by early 2007; studies usually take a couple years. She said It puts everybody in a precarious situation, if they want to sell their property. they've had people in limbo for five years since they've started talk of this project. there's major residential development going on. They're putting 1,000 homes on Plymouth Sorrento road - what's going to happen to those houses? PIO we'd try to avoid major subdivisions where possible, but it won't likely be possible to have a route that doesn't impact homes, there's just too much development in that area. PIO confirmed she's on the list, should get newsletter mid-May and shooting for public meeting in November and she'd get that notice also. She said thanks for the call back.

4/15/2005 2:36 PM Faye Grosenbacher left MSG I received info about Wekiva Parkway. I'm calling to get on your mailing list. 407-886-5262.

PIO emailed Dave, Mark, Brian/CH2M, Tom Percival and Anne Brewer/FDOT relaying David Grovdahl as Metroplan's PAG contact: "FYI,I spoke with David Grovdahl, Director of Transportation Planning for Metroplan Orlando (407-481-5672 or 5675, x312) who wanted to let us know that he will be the PAG representative for that agency. I told him we'd be sure he was on the PAG meeting notification list. He also asked that we pass along to George Gilhooley that he's the Metroplan rep, as he said George had inquired previously who would serve in that capacity for this project. I let David know that the date of the first PAG meeting had not been set yet, but that we tentatively were shooting for a first meeting in May."

3/21/2005 12:36 PM PIO called back David Grovdahl/Metroplan Orlando 407-481-5672, 5675 x312,Grovdahl, director of transportation planning. PIO noted we hoped to have first PAG meeting in May, not set yet, but would make a note he's the Metroplan contact to get notification on that. PIO asked if there was anything else I could help him with at this point, noted we're just really getting started. He also said pass that on to George Gilhooley; David said George was wondering who Metroplan was going to appoint to that body.

3/21/2005 12:05 PM PIO checked schedule for PAG meeting as requested by David Grovedal/Metroplan Orlando 407-481-5672, 5675 x312 the March 1 task list shows meetings start May 4.

3/21/2005 9:56 AM MSG David Grovdahl/Metroplan Orlando responding to project kickoff notice for the Wekiva Parkway you sent out, was talking to Harry Barley our executive director and he wanted to follow up and be sure I was listed as Metroplan Orlando rep for the PAG. My

question is What is the upcoming schedule for that group? Call me at 407-481-5672, 5675 x312

Contact		Katherine Groves
Date	Time	Regarding
11/14/2005	3:33 PM	Katherine Groves1812 South Mellonville AvenueSanford, FL 32771A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

8/12/2005	2:49 PM	Div. of Corporations also lists (last filing 1995) Robert Poe, 108 River Oaks Cir., Sanford 32771; Ron Allen, River Oaks Circle; Gumina; Richard Cannone, 163 River Oaks Cir, Sanford; Louis Steinberg
8/11/2005	4:18 PM	PIO emailed updated study area map to Jon Gumina/Wekiva River Oaks.
8/11/2005	4:09 PM	PIO emailed Jon Gumina the newsletter and updated study area map. "Jon,Was a pleasure just speaking with you. I wasn't sure if I took down your email address correctly; hence the two addresses above. Hopefully one of these reaches you.Please find attached the last project newsletter for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. I'll send the updated study map separately since it's also a large file. Stay tuned. And do feel free to pass my contact info on to any of your neighbors who also have questions about the project.As noted, we've gotten through the first round of field data gathering and are starting to draw up some initial alternative alignments. These will be refined and presented for comment and review at public involvement meetings in each of the affected counties (Lake, Orange and Seminole) in November 2005. From there we will continue to narrow down and fine tune the alternatives, including g subsequent public meetings, before having an approved alignment by spring 2007.Please don't hesitate to call or email with any questions or concerns."
8/11/2005	3:59 PM	PIO returned call to Jon Gumina, 185 River Oaks Circle, Sanford 32771, email jontphoto@aol.com. He said he had not received any of the previous mailings. PIO said would email him the newsletter and updated study area map.He asked aren't we supposed to get a t turn lane? PIO noted we don't have an alignment yet, and certainly don't have any details at this point about lane or turn lane configuration.Are they going to go along 46 with this thing? PIO noted they'd finished the initial round of field data gathering and were starting to put some lines on a map, had maybe couple dozen initial alternatives they're looking at. Certainly a popular one is to go along 46, but could also go north or south of there and leave 46 as a frontage road. Those are all being looked at. He said well that's certainly what they're hoping for.He asked is it all going to be a raised road? PIO noted the section in Orange County would likely be a raised toll road; section s in Seminole and lake would be free but not where which portions would be raised and which would be at-grade arterials at this point.He asked do they even know when they're going to start turning dirt? PIO gave overall project timeline, noted highly subject to change at any phase due to host of variables. So construction maybe 2010-2012.If I get questions should I share this information, or tell them to call you? PIO said he's welcome to share my contact info so they can get up to date info straight from the horse's mouth, or if he's comfortable just passing on info that's fine also. He said there are only 23-24 homes in the subdivision but they obviously have a concern.
8/11/2005	12:06 PM	Jon Gumina/Wekiva River Oaks subdivision president left MSG "You called and left MSG with last year's president and he gave me your number to call and talk to you. If you could get back to me. My office number 407-322-8269, h 330-7660 usually good after 8 p.m."
8/10/2005	5:15 PM	Joanie Hitchings calling for Gary, Jon Gumina (cq) is now pres of Wekiva River Oaks HOA, 407-330-7660, c 407-421-2929. we'd love to have the info so I hope you can reach him. Thanks and have a great day.

3/30/2005	11:15 AM	John Haak responded to PIO email: "Thank You for your prompt response. My address is: John Haak 850 Dekleva Drive, Apopka, FL 32712"

3/30/2005	9:45 AM	PIO responded to John Haak: "Good morning John, You are correct that the study area for the S.R. 429-Wekiwa Parkway project is centered along Plymouth Sorrento Road in Orange County. At this time, it is not possible to determine which properties will be affected by these projects as we do not have an alignment. On Jan. 19 the FDOT and the OOCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. The PD&E Study also will consider access issues to properties along the alignment, once determined. The study also will determine which part of this roadway will be an at-grade arterial (similar to US 441), and which portion will be a raised or elevated toll road. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, we probably wouldn't begin construction on these projects before 2009. Please note that any of these project phases could take more or less time than expected due to a host of variables. If it is eventually determined that all or part your property is needed for the project, you or your legal representative would be contacted by either the FDOT's or Expressway Authority's Right of Way Acquisition representatives and agency attorneys to negotiate a fair market settlement. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiwa Parkway and S.R. 46 Bypass. Send me your address, and I'll make sure you receive the newsletter, as well as public meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."
-----------	---------	--

3/29/2005	7:41 PM	John Haak John.Haak@ocfl.net emailed: "I live on Plymouth-Sorrento Road about one quarter of a mile from 441. Will there be a widening of this road? If there is, what can homeowners whose property that is directly affected expect? I see on the five year map that one of the connectors is planned to follow Plymouth-Sorrento Road all the way to S.R 46. My back yard backs to the road and I am wondering if I will lose any of my property."

-----------	---------	--

5/9/2005	11:52 AM	PIO prepared and sent 11x17 study area concept to Ronald Hache and sent..
5/9/2005	11:10 AM	PIO called back Ronald Hache 407-774-0708, confirmed he's on the list. He asked if we had a better map? Some of the roads you can't see. About a year or two ago the Sentinel had a better showing on it, they showed better detail from i4 north of Sanford all the way around. Was a newspaper size blow up. Most of the roads you could see. He asked how I got his number because he didn't leave it? PIO noted I have caller ID.I talked to one of the persons on the list and that's how I got your name and number. PIO noted that's fine, and my contact info was also in the letter. He said he didn't see it on the back page. PIO said I'd send him a larger map, and that we had some new aerials in that the guys were working on a more detailed map. I could send that to him once available.
5/9/2005	9:32 AM	Ronald Hache (cq) 407-774-0708 I got a letter from the Wekiva Parkway and want more info and to be on the mailing list. Mailing address is PO Box 767 Plymouth, FL 32768 I'll possibly be able to call you again sometime but most likely not. I hope you get the MSG. thank you very much.
Contact Date		Bob Hahn Hahn and Hahn Team Land Planners Inc.
11/14/2005	9:56 AM	Regarding Attended Public Meeting, 11/14/05
11/3/2005	3:55 PM	PIO again tried Bob Hahn/Hahn Team Land Planners 407-719-5513, left MSG to call back and if gets my voicemail to leave me address and owner info of property in question so I can research for him. left my number again..
11/2/2005	2:11 PM	PIO returned call to Bob Hahn, Hahn and Hahn Team Land Planners 407-719-5513, left MSG returning his call, asked him to leave specific question so I could follow up if he gets my voicemail again.
11/2/2005	10:46 AM	Bob Hahn, Hahn and Hahn Team Land Planners, we've spoken a number of times in the past. I'm working with clients on property to east of orange blvd, question relative to impact of initial alignments of the Wekiva Parkway project. please call me if possible today 407-719-5513.
10/12/2005	9:39 AM	205 p.m. Bob Hahn 407-719-5543 said I spoke to you back in September. Are you still planning meetings on the Wekiva Parkway? PIO noted yes and gave dates and locations. He said and that's where they actual routes will be discussed? PIO noted yes, that's where the initial alignment alternatives will be brought forward. He asked if I'd sent anything out about it via email? PIO noted we're working on newsletter to go out via mail, hope to get that out in the next week or so. PIO said maybe once we get closer to the meeting dates I'll send an email reminder. He gave info just in case: Hahn & Hahn team inc., PO Box 2644, Winter Park, 32790. He was thankful for the update.
9/8/2005	11:24 AM	Brian emailed PIO: "Mary,Bob Hahn of the Hahn and Hahn Land Planner's was the guy who called Kathy. His number is 407.719.5543. He does not need any follow up.Brian"
9/8/2005	11:10 AM	Brian said Kathy got call from a developer who said PIO referred him. PIO noted I don't refer calls in house unless it's a government official and they ask for Mark or someone specifically. PIO noted protocol is for me to contact team members, get info and refer back to the public. Brian was going to get the guy's name from Kathy, said he got real defensive in asking for initial concepts.
9/7/2005	3:10 PM	Bob Hahn 407-719-5543 said he heard bout public hearings for the Wekiva Parkway and wanted details. PIO noted we're just now trying to finalize the dates and locations, looking at weeks of Nov. 7 and 14, in fact have meeting tomorrow to discuss further. He asked, so no other meetings before then? PIO noted we had some HOA's asking for presentations that we were trying to accommodate, but that will be the first large scale public meeting in November. He asked if there was any detail on the website about the meetings and where he could find that? PIO noted once we nailed down the dates and locations, will also post

that in the website, as well as in the newsletter, which is currently in production and send out meeting notices. PIO asked if he was on project mailing list? He said no, please send info to him at PO box 2644, Winter Park, 32790 email: bobbyhahn@aol.com .PIO noted we hoped to nail down the meeting info within the next week, newsletter to come out late Sept.-mid-October.

10/14/2005	2:48 PM	EAC Comment Card:Dick and Carolyn Haley5248 Shoreline CircleLake Forest / Sanford, FL 32771As Lake Forest residents we are opposed to the S.R. 46 route. It would have a very negative impact in the environment also the traffic congestion problem generally increased We are in favor of the Southern S.R. 417 route (the greenway) at I-4 is more logical and keeps E-W traffic off I-4 and would greatly ease the congestion on S.R. 46, which we are already experiencing.Thanks for your consideration.
Contact Date		James Hall Regarding
11/14/2005	3:17 PM	James Hall447 Fawn Hill PlaceSanford, FL 32771I would like to express my concern and opposition to locating the limited access express link between the proposed Wekiva Parkway and I-4 being located in the S.R. 46 corridor. This location will only aggravate an already congested S.R. 46, not mention the construction chaos and added congestion at the S.R. 46 and I-4 interchange.Choosing a route that connects the proposed Wekiva Parkway to the existing 417 at I-4 is a more logical solution and keeps E-W traffic off of I-4.

11/9/2005 1:21 PM Attended Public meeting 11/09/05

11/9/2005 8:47 AM Comments from Public Meeting 11/9/05: All along I knew something was coming as each subdivision was added to 437 and Shopke Road. I resent the fact that we are strung along and left to wonder what to do. Should we stay or should we go? We worry about the eminent domain law and can we ever live again like we use to. Will we be paid enough to replace what we have and where we go?

11/2/2005 3:04 PM PIO returned call to Debbie Hollower 407-688-1656, she was concerned about auditorium set up and being stuck in the back because I wouldn't be able to get there early. But if it's a continuous thing and if there is a one on one, I don't usually have a problem. It's like at church when there are a lot of people, I usually have to use their device. PIO emphasized she'll be able to ask questions of staff one on one, or view the PowerPoint, and if she misses something it will be looping so maybe she can catch it again. PIO noted if she has any problems to find me and we'll get her taken care of. She said she didn't think she would with that sort of format. She said thanks so much for calling back. PIO said track me down at the meeting.

11/2/2005 11:50 AM Debbie Hollower left MSG I plan to attend the information meeting in Sanford on Nov. 14, I'm hard of hearing. I have hearing aid, do I need any special consideration? is it going to be so I can hear? 407-688-1656

Contact Fred Hallstedt  
Date Time Regarding  
3/21/2005 5:01 PM PIO called back Fred Hallstedt 407-880-7535, and confirmed he's west side of Lake Alden and Vick Road. He said that's correct. PIO noted appears they're east of study area, which is centered on Plymouth Sorrento Road. He said that's about a half mile to the west of them. PIO said it looks like they're outside the study corridor for now, but we have him in the database so he'll get newsletters, etc., in case anything changes. He was thankful for the info.

3/21/2005 4:50 PM PIO checked Fred Hallstedt property at 1066 Linkside to see if he was affected by project. OC property appraiser shows he owns 1060 Linkside also, both between Errol Parkway and Vick Road, on west side of Lake Alden, south of Welch Road. Properties appear to be east of the Wekiva Parkway study area. Property Appraiser also listed mailing address as 3295 SUNSET BLF NE, ROCKFORD, MI. 49341

3/21/2005 3:35 PM Fred Hallstedt 407-880-7535 said he got this card in the mail - what am I supposed to do with it? PIO noted we just wanted people to have a contact in case they have questions about the projects. He said what do I do, stick it on my windshield? PIO said no, it's a magnet so can put it on the fridge or just in your rolodex. PIO noted with two major projects going into this area, we wanted folks to know who to contact with questions, especially if they live along the project and may be affected by construction. PIO asked for his address and major cross streets: 1066 Linkside , 441 and Errol Parkway. PIO said I'd check to see if he's on the alignment and get back to him.

9/29/2005	10:55 AM	PIO called back Paul Hampton 407-886-8552, left detailed MSG that looks like Maitland Boulevard Extension interchange work will end about half mile north of his grocery store	
-----------	----------	--	--

9/27/2005	5:50 PM	PIO checked DRMP plans for Paul Hampton re: how far widening of 441 was going with regard to Maitland Boulevard Extension interchange. Noted looks like work on 441 goes about 1300' north of Kitt Avenue on north end, and about 1500' south of Plymouth Sorrento Road on south end. That's about 2000-2500' north of Lakeview-Boy Scout Road. PIO checked more closely and roadway plan sheet 22/43 only shows milling and resurfacing on NB 441 to just shy of sta. 813, just south of TL Smith Road, so about half mile north of Lakeview-Boy Scout Road.--625 p.m.	
-----------	---------	---	--

9/27/2005	3:37 PM	Paul Hampton said he was on website for "429 extension," but nothing was coming up. PIO said I'm going to the site now also; what did he click on? He said never mind, it was coming up now, but doesn't help him, just a wide blue swath. PIO noted we don't have alignment, that's the study corridor. He said they have property on Plymouth Sorrento road that travels west about 600', does it look like we're going to be in your scope? My door is being kicked in almost on a daily bombardment by developers wanting my property. Just south of Yothers Road, between Lester ? south key and Yothers. PIO noted Plymouth Sorrento road is in center of study area, so if he's close to that, then yes, he's in the area. He said doesn't take a blind man to see you can't go east of Plymouth Sorrento road because there's beaucoup development going in there now. What do I do? If I sell to developer, to put houses in... ? PIO noted that some initial alternative alignments fall on both sides of Plymouth Sorrento road, but they have to be approved by local governments and city of Apopka has said previously they won't approve anything on east side. PIO noted that decision still has to be made, can't tell him anything more definitive than that at this point. He said you guys must have some deep pockets. I bought my land for \$13k	
-----------	---------	--	--

per acre, now pushing \$75k per acre, and another 5 years. PIO noted with a 25 mile corridor in a hot area and real estate in general going through the roof, this will not be an inexpensive project. PIO noted no one expects that land prices will go down; certainly everyone concerned about the area's transportation needs wants to see this done sooner rather than later, but we still have to go through the process and it takes time. He made some comments about I don't think this is going to be any different than what I saw two years ago. PIO noted if he's referring to NW 429 extension, this is a very different project though it covers some of the same territory. PIO noted the Wekiva Parkway has the weight of state law behind it, and the Wekiva commission of lawmakers etc. making sure it's done properly. Noted it's a much larger project with a very different scope. PIO reiterated where we were in PD&E study with initial alignment alternatives. He asked about the schedule, couldn't bring it up online (?) PIO noted overall project timeframe, and need to secure funding for future stages. He said oh, so I'm putting the cart before the horse? PIO noted we're looking at a number of years to continue development of this. PIO asked if he'd seen the info on the website, and was he on the mailing list? He said he received a newsletter a while back. PIO reiterated upcoming meetings may be best first chance to answer some of his questions, initial alignments. He said so there'll be an alignment? PIO reiterated multiple, whatever survives first round of local government review, for the public to review and comment on. It will not be a definitive meeting, just early in the process. He again seemed to think we were closer to a decision. PIO again noted PD&E not to finish until spring 2007. He asked when you drop off the MBX exchange at 441, how far south on 441 will be 3 lanes? We own property on 441 at Boy Scout; it was Lakeview. We have a grocery store, and we're trying to figure out the impact PIO to see how far 3 lanes extend on 441 and get back to him. Noted I didn't think it was far, just at the interchange. 407 383 7828 c, 407-886-8552--351 p.m.

Contact		Alexis Hancock	Stirling Realty
Date	Time	Regarding	
8/8/2005	4:29 PM	Alexis / Stirling Realty 352-516-5050 called asking "Do you know where the entrance is going to be in Sorrento?" PIO noted we don't have an alignment, so don't know exactly where the interchanges will go at this point. PIO asked if she was on project mailing list? She said no, but would like to be. PIO got her info: Alexis Hancock, (h) 10705 Lake Hill Drive, Clermont, FL 34711. Email alexishancock@earthlink.net. She said she has someone looking at a property on Wolf Branch to develop; "It would be a very good thing for us." She asked what the timeframe was? PIO noted PD&E, public meeting and overall project timeframe. She said they'd definitely come out to the meeting to support it. PIO noted they'd get a newsletter and meeting notice prior to the meeting in November. She was thankful for the info.--435 p.m.

Date	Time	Regarding
3/28/2005	8:20 AM	PIO responded to Ed Hanke, copied copied chanson@co.lake.fl.us; dstivender@co.lake.fl.us; jhill@co.lake.fl.us; rpool@co.lake.fl.us; wcadwell@co.lake.fl.us: "Hello Edward, I have attached a copy of the S.R. 429-Wekiva Parkway & S.R. 46 Bypass map showing the area for the Project Development & Environment (PD&E) Study. At this time, it is not possible to determine which properties will be affected by these projects as we do not have an alignment. On Jan. 19 the FDOT and the OOCEA officially kicked off the PD&E Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these

projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass. Send me your address, and I'll make sure you receive the newsletter, as well as public meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."

1/27/2005	5:25 PM	[CQ no caps] edward j. hanke emailed, copied chanson@co.lake.fl.us; dstivender@co.lake.fl.us; jhill@co.lake.fl.us; rpool@co.lake.fl.us; wcadwell@co.lake.fl.us: "hello, i am interested in securing a copy of the map the 429 extension proposed for lake county near sr. 46. as of the last pre-election board of commisioners meeting regarding 429, it was my understanding that 429 would stop south of sr.46. several of our neighbors have recieved letters from a land aquisition attorney, i have not. yet i am right in the area of interest. bob sharpe and round lake road christian church are north of sr.46 and have received such letters. mr. sharpes' property borders ours and the church is just down the street. am i in danger of losing my families home? i would like to know, positively, the intensions of the expressway authority as to where this extension is going after all. thank you."

Hansel31046 Nocatee TrailSorrento, FL 32776(352) 383-5866Representing: SelfDate: 11/10/05Ms. Laura Hansel: I just was concerned about our neighborhood access to the road. We definitely will need some sort of interchange or access from Wekiva River Acres. And we saw in the plan that there is one plan for the Wekiva Pines area, which would be acceptable, but that's within a mile or so of Wekiva River Road.When I read the preliminary studies that they were talking about severely limiting the access, they were only going to put one interchange in the Mount Plymouth area, and that would be dreadful. That would be like a twenty mile trip out of our way just to cross back over toward I-4. So that's my biggest concern that we have access.Number two is, I do not want to pay a toll to drive three miles to Publix down the road, so hopefully in this section, for those of us who are local and have to cross the river on a many-times-a-day basis, that there will be no toll.

12/13/2005	5:21 PM	PIO researched 3037 Southfork Dr. in Sorrento and returned call to Ricky Harless 321-277-6367, appreciate the call back. I noticed tree harvesting and is there a projection of the 429? PIO let him know the property was right at the crux of where 414 and Wekiva Parkway end and begin. PIO noted we haven't started construction, so if there's any clearing it's not us. PIO noted 414 doesn't go to construction until summer 2006, and we're just in the study phase on Wekiva Parkway. PIO noted if ROW hadn't contacted him, he may not be hit by the 414, but gave him Deborah Keeter/PBSJ ROW number to call to be sure. He said he would and appreciated the help. He noted it's 20 acre orange grove with barn for supplies, didn't know if we needed to start moving stuff or not. Brother in law owns the property; I've been using the property. PIO offered to add him to the mailing list: he said send info to Rick Harless, 1802 Richson St., Apopka FL 32712. He noted Mark Grossenbacher owns it, we were talking about do we sell now or do we hold? We have plows and equipment out there. PIO noted if he's on the Wekiva Parkway section we've got a long way to go in the process. PIO noted maps for both projects are on the website, gave him address and text links, and suggested he check from time to time because we will be updating the info. He said he really appreciated it and you've' been very helpful. PIO said keep my number handy and call with any other questions.--537 p.m	

12/12/2005	1:10 PM	Ricky Harless? Left MSG I just came from the Apopka courthouse and they referred me to you. The property is 3037 Southfork Drive in Sorrento. I'm just curious if there's any new projection on the 429. It's on the corner of TL Smith and Southfork. If you could give me a call 321-277-6367I know that lake gem auto marine you're giving them to December, according to Gary, the guy who owns the place, to move and I think he got an extension. And I also noticed some trees they've harvested and stuff so I'm just curious. I appreciate it.

Date	Time	Regarding	
11/14/2005	4:18 PM	Comment Form:Alfred Harms513 Broad Oak LoopSanford, FL 32771Although I strongly support the completion of the Wekiva Parkway to I-4, I vehemently oppose the proposal	

to use the existing S.R. 46 corridor as the connector to I-4. this routing may be viewed as an attractive, less expensive alternative in the short tem; however, in the long term, failing to connect directly to the S.R. 417 interchange would be disastrous. As a community, we must not allow a routing structure where someone transmitting east-west or west-east) on the "greater Orlando Loop" to be forced onto I-4 for the few short miles between S.R. 417 and the new limited access expressway (between Wekiva Parkway and I-4). The arrangement would come incredible / unacceptable bottle necks on an already overcrowded I-4. Let's do the smart thing!

Contact		Marvin E. Harrell
Date	Time	Regarding
11/14/2005	3:42 PM	<p>Comment Form:Marvin E. Harrell11757 Grande Pointe Boulevard, #15110Orlando, FL 32839A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

In fact we show 3 Zellwood parcels in the study area. Zellwood Station is also on the mailing list to receive meeting notices, newsletters, etc. also please feel free to pass my name and contact info on to anyone there with questions. Take care."--405 p.m.
4/7/2005	3:50 PM	PIO reviewed study area property owner list.PIO called back Teresa Hastings and let her know she was in the study area. She said she also works in Zellwood Station and asked if that was in the study area also. PIO said I'd check. She apologized for not asking about that also initially. PIO noted no problem. PIO noted we have her info and will be sending her the project newsletter, meeting notices, etc., and let her know we'll also be posting info on the website from time to time. PIO asked if I could email her instead of bothering her at work with the answer on Zellwood Station? She said sure, Work email thastings@zellwoodstation.net she was thankful for the info.-251 p.m.Continued reviewing and printing out study property owner lists.-
4/7/2005	3:45 PM	PIO checked list for Zellwood Station, 3 parcels listed numbers 772-775.
4/7/2005	2:12 PM	Dave/CH2M emailed: "Attached is the list of property owners within the WP study area purple and blue corridor on study area map). This should make it easier for you to answer questions from people like Theresa Hastings. She is #78 on the Lake Co. list."
4/7/2005	1:54 PM	Dave/CH2M responded re: Hastings query: "I checked her name/address against the property owners' mailing list and her property is within the study area/project corridor."
4/7/2005	1:18 PM	PIO emailed Dave and Brian/CH2M Hill re: Hastings query: "Good afternoon,Got a call today from Teresa Hastings at 22540 S.R. 46 in Sorrento trying to find out if her horse farm is in the study area. From the Lake County property appraiser map and the study concept, it would appear she is in the study area (on the south side of S.R. 46 just east of Round Lake Road). However, without the two maps having the same scale it's difficult to determine how far east of Round Lake she is and how far the study area extends before veering south. From the Lake County appraiser's map, looks like she's maybe 3000' east of Round Lake?Is there any way at this point to verify, or do we have to wait until we have base maps?"--128 p.m.
4/7/2005	1:00 PM	PIO checked Lake County property appraiser site for Hastings location. She is on south side of S.R. 46 just east of Round Lake Road. Difficult to tell from study concept how far east she could be to miss the study area. She is on the section of 46 where it goes from being flat at Round Lake Road to veering NE.
4/7/2005	12:50 PM	Teresa Hastings 407-886-7439 read in the paper that there was a more defined route; I'm

a mile and quarter from the Sorrento light, saw in the Apopka Planter. It said direct access from Vick will be part of 429 and mbx. ... they're talking about section of r29 north of where Extension of 429 will be renamed to 451, will run north to Plymouth area, and will stop west of Plymouth Sorrento road, from there PIO noted the Apopka Chief/Planter article was on the MBX, which does have an alignment and is in final design. PIO noted we're in early stages of data gathering for PD&E on Wekiva Parkway and S.R. 46 Bypass, no alignment. She said so you don't have any idea where it's going? PIO said only have study area at this point, noted hope to have some initial alignments for public review and input in November of this year. She said if the road comes out on S.R. 46 in between Sorrento light and 441, it will have a direct effect on me. If it comes out south on 441 it probably won't directly. That's why ... it looks like the blue study area is coming out south of where 46 hits 441. Address is 22540 S.R. 46, Sorrento. PIO to find out if she's in the study area. PIO noted not every property within the study area will be affected by the alignment. She said if you're going to come close to me I'd rather you come smack through me, I raise racing horses, would be more detrimental to my animals for them to breathe construction dust four years and then the traffic and the noise. Whereas if they're going to come out at 46 and 441, then I can go on with my life as normal. C 410-726-4112 or leave MSG at home phone 352-383-9483, --1 p.m.

11/3/2005	3:21 PM

PIO called back Madeline Hawkins 352-205-3093, let her know the Nov. 7 meeting is for the Wekiva River Basin Commission and agencies looking at overall management of that area. she said she's trying to sell her property, and wondered if that would affect her also? PIO noted there is an array of issues being looked at for that area by these agencies, and one of note is water quality and septic tanks, for example.

11/2/2005	12:39 PM	PIO returned call to 1010 a.m. Madeline Hawkins 352-205-3093, confirmed the Apopka High School meeting of the project was on the 9th, and that all the info at all the meetings will be the same. Just did three to make it more convenient for folks in the different counties. She said that was her question and thanks very much.
11/2/2005	10:10 AM	Madeline Hawkins left MSG I'm interested in going to meeting at Apopka High School re: the alternatives, the computer says it's Nov. 7, the mailing said Nov. 9. wondering if they're the same meeting or different meetings. I own property in Lake County and want to know which meeting I should go to. 352-205-3093 thanks.

Contact Date 11/16/2005	Time 12:45 PM	Martha Helcrow Regarding PIO returned call to Martha Helcrow 630-688-1047, left MSG apologizing for delay in getting back to her, noted I was in setting up for meeting when she called. PIO said if she has questions, all meeting materials are on the website, gave address and text links. PIO said if have questions about specific property, leave me her address so I can look into it and get back to her. PIO noted delay in response due to high volume of calls.
11/14/2005	4:11 PM	Martha Helcrow left MSG I went on line to find out about the meeting this evening at the Sanford civic center. I'm from Chicago and husband and I just purchased a home in Buckingham Estates. Noticed on map looks like the extension is going to come right through my backyard. We wanted to come to meeting tonight from 5-8 p.m. would the

whole meeting be on extension or is there particular time in agenda when they would be discussing that? Just landed at Orlando airport, we're not going to be able to get up there by 5 p.m. wondering if you could give me a call and let me know. It's fairly important seeing as we're relocating to this area. Want to find out what's going to take place. 630-688-1047

11/3/2005	8:52 PM	<p>PIO responded to Marilyn Hendricks' email: "Hello Marilyn, I tried calling you back a couple of times this evening between 5 and 540 p.m. but the line was busy. Unfortunately, we are not far enough along with the project development and environmental study (PD&amp;E) for the Wekiva Parkway to answer your questions. Both options (replacing SR 46 with a wider thoroughfare or replacing SR 46 and also having frontage roads running parallel) are being considered, as well as others. We are still in the process of analyzing the initial alignment alternatives, receiving public and local government input and evaluating the impacts on a number of levels including to residences, businesses, wildlife habitat, wetlands, floodplains etc. After the public workshops on Nov. 9, 10., and 14, we'll continue to analyze the input and impacts, and begin focusing on the more viable alignment alternatives. By summer 2006 we should be ready to bring those forward for additional public meetings, and they should have more detail than the initials we're looking at now. The PD&amp;E study is scheduled to conclude in early 2007 some time with a preferred or approved alternative. Please be advised that after the study concludes, we still must go through the final design, permitting and Right of Way acquisition phases. There is no funding at this point for ROW acquisition or construction. so it will likely be 2012-2015 before ground is broken on this project, unless a significant source of funding becomes available beforehand. I know that's not the answer you were looking for, but that's the status of the study at this point. Please feel free to call or email with other questions or concerns. You can also find project info and updates at the Expressway Authority's website at <a href="http://www.expresswayauthority.com">www.expresswayauthority.com</a>. Click on the text link for the "Western Connectors" and that will take you to the Wekiva Parkway Projects page. This page includes a study map showing the initial alignment alternatives, which you can zoom into the location in question."</p>	

11/3/2005	6:33 PM	<p>From: Hendricks Racing [mailto:gofastfpm@bellsouth.net] Sent: Thursday, November 03, 2005 6:33 PM To: MBrooksSR414@cfl.rr.com Subject: Important Question Dear Ms. Brooks I am in the process of purchasing a home very close to the corner of Hwy 46 &amp; Longwood Markham Road. I left you a message today on your voice mail. My Question is: Will the 46 extension be a widening of Hwy 46 or an additional Hwy Next to 46??? This will greatly impact my decision to purchase this home. I only have until next week to make the final decision. Please it is very important that I know this answer. I don't mind if 46 goes multiple lanes, but an overpass situation is bad news. I know that you are very busy, but if you could just drop me a quick note before I spend my life savings. It would be greatly appreciated. Thank You Marilyn Hendricks</p>

11/9/2005	11:22 AM	Public Meeting Comment Form 11/09/05:William R. Henry, Jr35 West Laurel StreetApopka, Florida 32703Comments: I attended the public workshop on November 9 and have had sufficient time to summarize my comments as follows. First and foremost, I strongly object to the proposed alignment(s) that rears northeast from Kelly Park Road crossing Hass Road. Not only does that route slice through my valuable Valencia Orange Citrus Grove. It also diagonally curves across a very broad area of picturesque rural lands that are essential to the recharge capability of the western edge of the Wekiva Basin. Second, as of November 15, My properties (approximately 100 acres) and that of my immediate neighbors totaling 210 acres were adopted as Orange County's newest and best rural settlement district known as rainbow Ridge. This proposed alignment would negatively impact the rural character we are striving to preserve and enhance with two-acre home sites. I see no reason to bifurcate northwest Orange County by crossing Plymouth-Sorrento twice between Kelly Park Road and the county line.Finally, I approve of the alignment that parallels Plymouth-Sorrento Road to the county line and connects with a proposed system interchange. To my knowledge, no homes would be impacted north of the lots on Undich Road. And I am reasonably sure that also applies to the eastern alignment from Plymouth-Sorrento Road. I also would suggest that the ever increasing volume of commuters from Lake County into Orange County via Plymouth-Sorrento Road this would perhaps reduce the future traffic on Hass Road so as to preclude motorists seeking an access interchange west of Plymouth-Sorrento Road.I welcome any comments the OOCEA may have regarding the points stated above. You may contact me at 407-886-6957 or write to the address below:Sincerely,William R. Henry, Jr.35 W. Laurel StreetApopka, FL 32703

11/14/2005	4:09 PM	Public Meeting Comment Form 11/14/05:Kim Hertko408 Still Forest TerraceSanford, FL 32771I live in the tall trees subdivision and I am against the orange route or south of 46 route. The reason being that being that it will bring noise and excess lights. I will have no access to the road from my house. The 46 route seems to be more direct and less take over of houses. 46 is an already existing road and all that has to be done is an additional road on each side. This will / should have little impact on homeowners in the area.

1/17/2005	9:37 AM	Buckingham Estates HOA PIO responded to Mike Hicks: "Good morning Mike, The State Road 429 Wekiva Parkway and S.R. 46 Bypass projects are only in the very early study stages; there is no alignment currently for these projects, only the wide study corridor that you saw on the website. We began the Project Development and Environmental Study (PD&E) at the beginning of January, and that study is expected to take 2-3 years. With 2-3 years also expected for each of the subsequent phases (final design, Right of Way Acquisition and construction), we are not expecting to break ground on these projects until perhaps 2010-2013. That's the typical schedule. Please keep in mind that any or all of those phases could wind up taking more or less time than expected. We anticipate having some initial alternative alignments for public review and meetings by late summer or fall of this year. The PD&E Study, once completed, will result in a preferred alternative alignment, and we'll be better able to answer property owners' questions at that time. Part of this road will likely be an at-grade arterial, and other parts will likely be a raised toll road. The PD&E Study will determine this configuration, as well as the location of any on- and off-ramps. I hope that helps. Please feel free to call or email with other questions or concerns. Also, I've added you to the project database so that you'll receive meeting notices and project updates."
1/17/2005	9:30 AM	PIO received 1-16 440 p.m. email from Mike Hicks : "I just saw a brochure showing the proposed connectors in the Wekiva Basin area. It appears that this route takes it right through my new \$400,000 living room! Can you please send, fax, or email me the exact route? Thank You. Michael W. Hicks Lot #116 Buckingham Estates Sanford, Florida 32771-6485 407-353-5049 407-321-8616 fax"

11/9/2005	10:14 AM	Public Meeting Comment Form 11/09/05:Mike Hillier 824 Atton AveOrlando, FL 32804I would like to urge the Expressway Authority to remove the easternmost routes through the corner of Rock Springs Run State Reserve from further consideration. Only the westernmost routes shown on the Expressway Authority maps should receive further consideration should be located West of Seminole State Forest and Rock Springs Run State Reserve.The Expressway Authority should follow the policy set by the "Wekiva Parkway and Protection Act" which provided that the entire "Neighborhood Lakes" property should be purchased, a portion of which should be used for preservation of this valuable wild life corridor. Mike HillerPaula Hillier824 Alton AveOrlando, FL 32809Please remove all routes through the eastern corner of Rock Springs Run Reserve. Please keep the SR 46 interchange west of Rock Springs Run and Seminole State Forrest. It would be best to locate interchange on "Neighborhood Lakes" property. Please do what is RIGHT for the wild life in this very special area. Do not make this area unsuitable for al the wild life that currently live there.
Contact		Daniel Hinden
Date	Time	Regarding
11/14/2005	3:38 PM	Comment Form:Daniel Hinden637 Sabel Lake Drive, #101Longwood, FL 32779A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes

to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Date	Time	Regarding
8/10/2005	5:15 PM	Joanie Hitchings calling for Gary, Jon Gumina (cq) is now pres of Wekiva river oaks HOA, 407-330-7660, c 407-421-2929. we'd love to have the info so I hope you can reach him. Thanks and have a great day.
8/10/2005	10:38 AM	PIO called Gary Hitchings, left msg that we're trying to get HOA contacts to send project info, was referred to him by David Koutek. Left my number and email address.
8/9/2005	6:41 PM	David Koutek 407-330-2597 returned my call and said he is in the River Oaks subdivision. He checked for HOA contact and said Gary Hitchings was the president last year. If he's not still, he should know who is. His home number is 407-330-9069. PIO reiterated we were preparing a HOA contact list to send info about the project. He asked what's going on with it? PIO gave rundown of PD&E study and overall project timeframe, noted study area centered along 46 in his area. He said he wants to be on project mailing list. He asked if there would be a meeting? PIO noted yes, in November will have one in each of three counties affected.

Date	Time	Regarding
11/14/2005	8:37 AM	Comment Form:W. Hollingsworth701 Treeline PlaceSanford, FL 32771I am a resident of Lake Forest and I am concerned about the location proposed of the Wekiva Parkway. If the parkway is located on Route 46 it would aggravate an already congested area, not to mention the hassle for all the residents of Lake Forest. A connection to the Route 417

would make more sense, since the interchange has been constructed. The southern Route would be the most cost effective and fewer residents would be affected.

Contact Date		Daniel & Barbara Holverson Regarding
10/14/2005	1:01 PM	EAC Meeting Comment Form:Daniel and Barbara Holverson729 Ashgrove TerraceSanford, FL 32771As a homeowner in Lake Forest (S.R. 46), I'm terribly concerned on the impact it would make to us as well as the surrounding area if the proposed expressway were to be along S.R. 46. We already have problems with the congestion of traffic and accidents because of the congestion. This puts the lives of over 700 (homeowners) in jeopardy, traveling to and from our homes. Also, the disruption and "construction chaos" at the already congested S.R. 46 and I-4 intersection would create business disruption greater than the southern alternative. Choosing a route connects the Wekiva Parkway (the western beltway) to the existing 417 (the greenway) at I-4 seems much more logical and keeps E-W traffic off I-4.

Mount Dora and the 429 Extension Councilman Homich, I apologize for the delay in getting back to you on your request. We certainly would appreciate the opportunity to attend your council meeting to discuss the Wekiva Parkway project. It is our understanding that at your upcoming meeting the Council will be considering a resolution of City concerns on our initial concepts for the Wekiva Parkway. Perhaps the appropriate and most meaningful approach would be to allow us to review the City's resolution and then work to address your concerns as we undertake our concept refinements in the coming weeks. I would anticipate that we should have some ideas pulled together in January or February for your consideration. Thanks again for your interest in the Wekiva Parkway and I know the Florida Department of Transportation and the Orlando-Orange County Expressway Authority are committed to work with Mt. Dora as we move forward with this important project. Respectfully, Mark Callahan

Contact Eric Hotmeister  
Date Time Regarding  
10/15/2005 1:26 PM Eric Hotmeister5144 HawkstoneSanford, FL 32771I firmly believe after intense analyzing of the proposed Wekiva Parkway to I-4, that it is imperative to choose a route that connects the Wekiva Parkway (Western beltway) to the existing S.R. 417 (Greenway) at I-4 and is the most logical route to keep E-W traffic off I-4.

Contact Debbie Houston  
Date Time Regarding  
2/22/2005 1:45 PM PIO worked on study area concept request for Debbie Houston and sent.

2/22/2005 1:20 PM PIO responded to Debbie Houston that I'd added her to the project database, and would get the conceptual out to her within a couple days.

2/22/2005 1:14 PM PIO received response to PIO email from Debbie Houston: "THANK YOU FOR RESPONDING TO MY QUESTIONS. I WOULD APPRECIATE IT IF YOU COULD ADD MY NAME TO THE MAIL RE: TO MEETINGS ETC. ALSO I WOULD APPRECIATE IT IF YOU COULD SEND ME THE 11 X 17 COPY OF THE STUDY AREA THANK YOU, DEBBIE HOUSTON 420 WEST CITRUS STREET ALTAMONTE SPRINGS, FL 32714"

2/21/2005 1:40 PM PIO emailed Debbie Zaklsam@cs.com as requested by Bryan Douglas/OOCEA PIO:  
"Debbie,Hello, your query was forwarded to me from the OOCEA EPASS office. I understand you're looking to buy a home in the Sorrento area.There is no alignment yet for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. The Project Development and Environment (PD&E Study), being done jointly by FDOT and OOCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2010-2013 before any construction would begin on this project  
Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. Please provide your full name, address, etc. so that I can add you to the project database so you will receive the newsletter, meeting notices, etc.There is also an aerial conceptual of the study corridor for the Wekiva Parkway on the Expressway Authority's website, [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com) . If you need me to send you an 11 x 17 copy of the study area conceptual, let me know.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."

2/17/2005 2:29 PM Bryan said E-PASS center got email that they printed and forwarded to him, didn't email it. Debbie sent it, trying to find out projected route of 429 when expanded to north, plan to buy home in Sorrento Eustis area and would like to know where the highway might be coming through. Can you give me any info about this?Zaklsam@cs.com

Contact Adelpha Howell  
Date Time Regarding  
6/8/2005 12:44 PM Sent newsletter to Adelpha Howell as requested

6/7/2005 5:31 PM Royce Howell 407-921-7391 said his mother got the letter a while back and wanted to be on the mailing list, to get any future updates. She is Adelpha Howell, 2626 Boch Road, Apopka 32712. PIO asked if he knew if she received the newsletter, went out week or so

ago? He said she didn't mention it and he doesn't see it; she usually keeps things like that. PIO said I'd drop one in the mail to them to be sure. He said they'd appreciate it. He said they had people come out before this letter, one lady from the state and someone from Friends of the Wekiwa, did some tests or something it the water, but when we saw this letter we figured more people would be coming and we just want to stay informed. PIO noted surveyors and geotechs in the study area now so they will probably see them. He said he's born and raised there and they've had five generations on the same property. The grandparents are dead now. They know things are going to change, they just want to stay on top of it.

11/15/2005	10:29 PM	-----Original Message-----	From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Monday, November 14, 2005 10:29 PM To: Huff, Tamaya Subject: RE: Transportation Planning Group Meeting ( November 18, 2005)-- cancelled Okay Tamaya, I'll let the guys know. What day is the Feb. meeting? Is that also a Friday?
11/15/2005	10:25 AM	Tamaya/OC Public Works responded to PIO email:	"Yes, this is a Friday at the same place and time. If this date is good for you, let me know and I'll send you the information on the meeting by email again if you need it. Thanks so much, Tamaya Huff Orange County Public Works Transportation Planning Division 4200 John Young Parkway Orlando, Florida 32839 Ph. 407-836-8021 Fax: 407-836-8079
11/14/2005	3:20 PM	From: Tamaya.Huff@ocfl.net [mailto:Tamaya.Huff@ocfl.net]	Sent: Monday, November 14, 2005 3:29 PM To: mbrookssr414@cfl.rr.com Subject: Transportation Planning Group Meeting ( November 18, 2005)-- cancelled Unfortunately, the November 18, 2005 Transportation Planning Group meeting has been cancelled. However, we hope that you would still be interested in speaking at our February 17, 2006 meeting at 9 am in the Orange County Administration Building. Please contact me if you are able to attend as a guest speaker. Thanks and we apologize for any inconvenience this may have caused, Tamaya Huff Orange County Public Works Transportation Planning Division 4200 John Young Parkway Orlando, Florida 32839 Ph. 407-836-8021
9/19/2005	11:35 AM	PIO thanked her for info and forwarded to Gary and Brian,	FYI.
9/19/2005	11:30 AM	Tamaya/OC Transportation Planning responded:	"I recommend you just bring a CD if possible. In the past we have had some technical difficulties when connecting the laptop to our computer. Or email the presentation to me so I can place it on the hard drive. "
9/19/2005	11:26 AM	PIO emailed Tamaya/OC Transportation Planning:	"Okay Tamaya. I believe we will be bringing a PowerPoint presentation. I'll check with Gary on whether he plans to bring his own laptop or will need to use your computer. Will let you know. Thanks for getting back to me quickly.
9/19/2005	11:16 AM	From: Tamaya.Huff@ocfl.net [mailto:Tamaya.Huff@ocfl.net]	Sent: Monday, September 19 2005 11:16 AM To: mbrookssr414@cfl.rr.com Subject: RE: SR 429-Wekiva Parkway Projects - Orange County Meeting Request I had a wonderful weekend. Below is the information you will need regarding directions and instructions for the meeting. Thanks so much for accepting our invitation. Please call if you have additional questions. Thank you for accepting our invitation to speak before the Orange County Transportation Planning Group (TPG) on Friday, November 18, 2005 . The meeting will be held at the Orange County Administration Building, 201 S. Rosalind Avenue , 1st Floor Meeting Room, from 9 00 a.m. to 11:00 a.m. I will arrive at 8am if you need to come early to prepare. It is preferred that the presentation be a max of 45 min as there are additional speakers attending that day as well. The meeting room has access to a computer and a television display if you require such equipment for a presentation. Please place your presentations on a cd or email your presentation to me in advance to have it ready the day of the presentation. If you have any questions, please call me at the number listed below. (See directions) Directions: Take I-4 to exit 82c towards Anderson Street East. Turn left on South Rosalind Avenue and go .2 miles. Arrive at 201 S. Rosalind Avenue on the right.

PARKING: There should be a parking garage on your right before you reach the Administration Building .)Tamaya Huff Orange County Public Works Transportation

9/19/2005	10:48 AM	PIO emailed Tamaya Huff/OC Transportation Planning, public works: "Hello Tamaya, Hope you had a good weekend. Gary Skaff of PBSJ and I can attend the Nov. 18 meeting at 9 a m. to provide a Wekiva Parkway presentation. Please provide the meeting location and any other pertinent details, as well as how long you would like the presentation to be. Thanks. Look forward to hearing from you."
9/14/2005	10:23 AM	PIO emailed Gary Skaff/PBSJ, copied Brian, Mark and David that OC transportation planning committee had cancelled this Friday's meeting, but asked if we could do a presentation at the Nov. 18 meeting. "Just spoke with Tamaya Huff of OC transportation planning. They've cancelled the meeting for this Friday due to short notice, but would like a project presentation at their Nov. 18 meeting at 9 a.m.Gary do you still want to handle, or Mark can you make that one? I'll attend with whomever to take notes. Let me know The meetings are held at the OC Administration Building downtown. When I get back to Tamaya with the speaker info she said she'll give me the exact location.Let me know - thanks."
9/14/2005	10:15 AM	Tamaya said since they'd already canceled people had made other plans, so this Friday wouldn't work. She asked about Nov. 18. PIO to check with Gary Skaff/PBSJ and get back to her.
9/14/2005	10:05 AM	PIO called Tamaya to firm up Friday's meeting details, let her know Gary Skaff and myself would be attending. She said they'd cancelled the meeting due to short notice, but did have an opening Nov 18 at 9 a.m. OC Admin Bdg. 1st floor. PIO apologized for delay but noted I had to find someone to try to accommodate them. She said she's getting with her supervisor to see if they want to try to still do the meeting this Friday. She's going to call me back in about an hour.
9/12/2005	7:25 PM	PIO responded to Gary and team: "I can attend and take notes. I'll get the meeting site details and get back to you. Thanks.Mary
9/12/2005	10:56 AM	Tamaya Huff/OC Public Works: "Ms. Brooks, I was hoping you had some news regarding the Wekiva Parkway Project. Tamaya"
9/12/2005	10:08 AM	From: Skaff, Gary J. [mailto:GJSkaff@pbsj.com] Sent: Monday, September 12, 2005 10:08 AMTo: Skaff, Gary J.; Mary BrooksCc: Mark.Callahan@CH2M.com; Brian.Manwaring@CH2M.com; David Lewis2@CH2M.comSubject: RE: SR 429-Wekiva Parkway Projects - Orange County Meeting RequestBrian/Mary" Can one of you attend and take notes, " Brian, Could you send me a CD of Mark's last presentation to the OCEA Board on the Wekiva Project as well as any recent presentation to the Wekiva Commission? " Where will the meeting be held? Thanks,Gary
9/8/2005	5:09 PM	Tamaya/OC Public Works responded: "Thank you so much. I really appreciate your help."
9/8/2005	5:04 PM	PIO emailed Gary, copied Mark, Brian and Dave: "Gary,Orange County Transportation Planning Division is updating their comp plan and wants a presentation on the 429-Wekiva Parkway for their monthly planning group meeting (see email at bottom). Mark said in our meeting today he has a conflict with their request for a presentation at 9 a.m. Sept. 16. He suggested I check to see if you could handle that? Let me know at your earliest convenience so I can get back to the county. Thanks.Mary"
9/8/2005	4:58 PM	PIO responded to Tamaya/OC public works transportation planning: "The senior project manager has a conflict with Sept. 16 at 9 a.m., but let me see if the oversight consultant could do the presentation for you. I'll get back to you."

9/8/2005 4:46 PM From: Tamaya.Huff@ocfl.net [mailto:Tamaya.Huff@ocfl.net] Sent: Thursday, September 08, 2005 4:46 PM To: mbrookssr414@cfl.rr.com Subject: RE: SR 429-Wekiva Parkway Projects - Orange County Meeting Request Yes, it is September 16. Is that time ok?

9/8/2005 1:44 PM PIO asked Tamaya/OC transportation Planning for confirmation they wanted presentation on Sept. 16 or Oct. 21?

9/8/2005 9:28 AM Tamaya/OC Transportation Planning responded to PIO email: "Thank you for your help. Anything you can do would be greatly appreciated."

9/7/2005 5:53 PM PIO forwarded Tamaya/OC Transportation Planning email to Brian, Mark & Dave/CH2M Hill: "We can discuss the presentation request from OC in tomorrow's 11 a.m. meeting. Just FYI. Mary"

9/7/2005 5:51 PM From: Mary Brooks [mailto:mbrookssr414@cfl.rr.com] Sent: Wednesday, September 07, 2005 5:51 PM To: 'Tamaya.Huff@ocfl.net' Subject: SR 429-Wekiva Parkway Projects - Orange County Meeting Request Hello Tamaya, We do not have an alignment for the Wekiva Parkway, but are working up some initial alignment alternatives as part of the PD&E Study. I'm meeting with some project team members tomorrow and will discuss this presentation request and get back to you. The third Friday in September would be Sept. 16, and I'm not sure we'd have things far enough along at that point to present to you, but I will check. Mary Brooks Public Information Officer SR 414-Maitland Blvd. Extension & Wekiva Parkway Projects C 407-702-8375 F 407-381-9038 mbrookssr414@cfl.rr.com

9/7/2005 5:17 PM From: Tamaya.Huff@ocfl.net [mailto:Tamaya.Huff@ocfl.net] Sent: Wednesday, September 07, 2005 5:17 PM To: MBrooksSR414@cfl.rr.com Subject: SR 429 Ms. Brooks, I'm with the Orange County Transportation Planning Division. We are in the process of updating our comp plan and hoped a representative from OOCEA could come to our monthly Transportation Planning Group meeting to discuss plans for the new alignment for SR 429 (Wekiva Parkway) and any additional improvement information that may be helpful for Transportation Planning purposes. Our meetings are usually the third Friday of each month at 9am. Please let me know if you know of a speaker that would be interested. Contact Date 11/14/2005	Time 2:24 PM	Syed N. Hussaiu Regarding Public Meeting Comment Form 11/14/05:Syed N. Hussaiu6840 Hidden PlaceSanford, FL 32771I am really concerned about the noise which would be generated by the new parkway. My house is adjacent to SR 46 and is creating a lot of uncomfot due to noise as it is. I could only imagine the increased level of noise when the parkway is complete. How about the noise barriers? Can we keep the elevation of the highway west of the county line? There is plenty of vacant land on the north side of 46 (between Orange County Line) Why can't we consider shifting the parkway towards north of current SR 46 Path?

11/14/2005	3:34 PM	Public Meeting Comment Form 11/14/05:Peter S. Ingrassia200 Meadow Beauty TerraceSanford, FL 32771The following addresses one goal for the Wekiva Parkway Project, namely, the tie-in of CR 46 with I-4, and the (3) alternative approaches to that end. To a large extent, the intersection of CR-46/I-4 is surrounded by large-area lots (car dealerships, gas stations, restaurants and parking lots) with, by far, the lowest current and potential home density of the (3) intersection-alternatives under consideration. Both the Easterly and Westerly alternative intersections with I-4 represent orders-of-magnitude longer and higher current and potential home density routes that does the CR-46/I-4 intersection, and they threaten disruption (by the effects of close proximity), if not elimination of at least one Elementary School and several houses of worship, in addition to many homes. The advantage offered by the Westerly alternative, as claimed tonight by a Public Workshop representative, is its more direct tie-in to SR 417. The CR-46/I-4 intersection provides reasonable proximity to SR 417 via I-4. Given the significant societal

and probably cost and environmental advantages of the CR-46/I-4 intersection over the alternatives, then, should the deciding agents (Expressway Authority, FDOT, etc...) not select it, they must present to the public supporting quantitative (data and analysis) and qualitative (human impact) evidence, relative to the alternative intersections, to convince the hundreds if not thousands of people whose lives would be disrupted by their selection. It should go without saying that the said agencies will make their selection based on facts, to the extent possible and not on influence. Thank you

Date	Time	Regarding
11/18/2005	5:56 PM	PIO prepared OC conceptual letter and sent to Sara Irrgang/4303 meadowland dr." Sara Irrgang/4303 Meadowland Dr. Mount Dora, FL 32757 RE: Request for Wekiva Parkway PD&E Study Initial Alternatives Concepts Dear Sara, Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, I have enclosed the Orange County conceptual project layout - Sheet 2. I've also included a public comment form. It appears your property at 4303 Meadowland Dr. is largely outside the study area. However, two alignment alternatives (LCW7-pale yellow and LCW12-pink) currently hit the northeast corner of the property in question. Please be advised that we are in the process of analyzing public and local government input, and will be narrowing down and fine tuning the alternatives in anticipation of the next round of public workshops in summer 2006. Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files. We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement.

11/18/2005	5:35 PM	PIO checked Sara Irrgang's property location 4303 Meadowland Dr. She's west of Plymouth Sorrento Road and east of end of Meadowland Dr., most of property is outside study area but LCW7 and LCW12 hit the NE corner of her property.

11/18/2005	4:45 PM	Sara Irrgang (cq) 407-836-9442 Want to know when you're having another meeting? She as out of town during initial workshops. PIO noted next meetings scheduled summer 06. she said she went to all the meetings you had last year. Been active with the sierra club. We're in the black bear area, see bunch of roads destroying their habitat completely. My northern property line is lake-orange line I'm in OC. Please send map, 4303 Meadowland Dr., Mt Dora 32757 mailing address; PO box 1133 Apopka . Property between Round Lake Road and Plymouth Sorrento Road. Wants the OC map. She said when they were talking about it a year ago, one of them went right through my barn. PIO to check her property location and get back to her, either by phone or in the letter with the map. she said that would be fine, whatever is easiest for you.

Date	Time	Regarding
11/14/2005	3:03 PM	Comment Form:James F. Jackson5543 Forrest Oak PtSanford, FL 32771It is my opinion and desire as a property owner and taxpayer to have the proposed Wekiva Parkway us the southern route. This appears to be the most practical and will cause the least amount of disruption during construction. Additionally, it will provide a smooth, rapid transition from the East 417 loop to the NW section of Orlando including Mount Dora, Apopka, and Leesburg. Thank you for considering this important matter.

5/31/2005	4:06 PM	PIO responded to James Jackson [jamesfjackson@cfl.rr.com] email: "Hello James, I wanted to confirm that you are on the mailing list for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. The project newsletter went out last week, so you should receive it soon if you haven't already. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments. You'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."

Contact	Velma Jackson
---------	---------------

Date	Time	Regarding
7/21/2005	10:12 AM	<p>Velma Jackson said "I talked to you 3 mos. ago. I'm 72 years old and been in my house since 1967. This is a nursery area in here. My neighbor owns 10 acres and just built a \$3 million house. Right in front of my property is 20 acres of nursery. Mrs. Stewart south of me is disabled also; she has had surgery in back and hip also. Don't know why they would take my house up under me for this. Somebody on TV last said they were taking my house They showed the little purple thing (magnet)." PIO noted we don't know whose house being taken since we don't have an alignment. PIO noted her house may not have to be taken, and that not everyone within the study area will be affected. She said, "There's vacant land up here. All the way from here to Foliage Way to 435 there's nothing but froze out orange groves, and they froze out several years ago. I've been praying to him to help me out." We discussed the magnet. She asked if they take the property, would they give me a fair price? PIO noted the Authority would negotiate fair market value. She said "mine's appraised now at \$300,000. Todd next door his house is 3000 sf, and ... I can't understand you all taking businesses. I can understand you taking mine; I don't have a business anymore. Mrs. Munson has 20 acres of business ... I worked hard to pay for this place and it's paid for, and I pray to God that you don't take it. Kelly Park is vacant on both sides down there, why can't they go through there? Or why can 't they just go up Plymouth Sorrento Road?" PIO noted Plymouth Sorrento has homes and businesses on both sides and is still being developed, so we would still have to affect some people's properties. PIO reiterated we don't know where it's going yet, but we are looking at trying to minimize the impact on homes and businesses as much as possible. PIO noted the Authority would rather go through undeveloped land where possible due to the cost, etc. PIO noted situation discussed yesterday of maybe going through an old landfill that wasn't as contaminated as initially thought to avoid homes, etc., in the area. Besides honestly it's much more expensive to take homes and businesses than undeveloped land. But there are a lot of factors that have to be looked at as well, and with the development in that area, it's not going to be possible to develop this road - which is sorely needed with thousands of homes being built out there - without affecting some homes and businesses. Mrs. Jackson began to get upset and cry, but I told her not to fret. We are in the beginning of a two year process and we're going to do our best to get them all the best information and keep them informed of what's going on. PIO noted she's welcome to touch base with me from time to time to see what's going on. She calmed down and said thank you for talking with her.--1024 a.m.</p>
6/8/2005	12:25 PM	<p>Velma Jackson 407-886-0283 returned call, said got newsletter with little purple map, my road is not mentioned but Kelly Park Road is. I've been here since '69. I just got a new roof on my house from the hurricanes and got it painted. I'm too old to go get out and find another one. My neighbor doesn't think I'd be affected but he said his landscape nursery will be. He thinks the road will go behind us instead of in front of us. I'm east of Plymouth Sorrento road off Kelly Park Road. Meeting they went to on 209.9 acres that they were hanging the zoning, lady there said she thought the road would be west of that, so I'm just going to pray that it won't affect me and that God will take care of me. PIO said we will continue to provide information as it becomes available, and she'll be able to see at the November public meeting whether or not any of the alternatives we're looking at actually affect her. I'm not able to go to the meetings, can you make sure I get the info by mail? PIO said will look into what we can send her at that point. She said she appreciated me calling her back.</p>
6/8/2005	12:15 PM	<p>PIO checked to see if Velma Jackson property was within the study area. No listing by name or address on the study area list.</p>
6/8/2005	12:07 PM	<p>PIO returned call Velma Jackson 5310 Foliage Way, Apopka, 32712 407-886-0283; woman said she wasn't there but took PIO contact info and said would have her call me back.</p>
6/8/2005	10:00 AM	<p>PIO tried to return call but line busy.</p>

6/8/2005	9:58 AM	Velma Jackson left MSG I live at 5310 Foliage Way, Apopka, 32712 just got the notice in the mail from you I guess. it says the S.R. 46 bypass and Wekiva Parkway extension thing. I wonder if you're going to take my property because I'm 73 years old and I live on \$800 a month and I just can't afford to move nowhere. If you could not take my property I would appreciate it. 407-886-0283 thank you so much.

Contact Date 11/9/2005	Time 1:28 PM	John & Barbara Jadczak Regarding Attended Public Meeting, 11/09/05
Contact Date 11/14/2005	Time 9:47 AM	Susan Jaimungal Regarding Attended Public Meeting, 11/14/2005
Contact Date 6/17/2005	Time 3:55 PM	Carol James Regarding PIO researched Carol James' property location on SC property appraiser site and added info to database.
6/17/2005	12:49 PM	PIO returned call to Carol James, who said it looks to me like I'm just about a block north of 46, it's on North Road. It's just ... I was just wondering when ... Do you know where this road is going to be? It looks to me like this property is right underneath that. PIO noted we don't have any alignment; just a study area. PIO noted don't know what info she's seen, did she get an update recently in the mail? She said she did get the project update yesterday. I live in Illinois. I got this property down there. Looks like it's going to right on top of me. She said I think it's a wonderful idea. It would lighten the load on some the other routes that are backed up. Will it parallel I-4? PIO noted section from 441 in Plymouth Sorrento area will head north in Orange County toward SR 46, but don't know

that it'll parallel I-4 per se. What the purpose of this project? PIO noted it will go a long way to finishing the beltway around metropolitan Orlando. Noted there are already congestion issues on 46 and other roads, and with all the development going on and planned in that area. PIO noted it's getting worse with each passing month the more houses that are built. She said that's true. She asked what's the timeline on this thing? PIO noted study to finish early 2007 with preferred alignment, other phases to follow and construction maybe 2010-2012. She was thankful for the help.

6/17/2005	12:23 PM	Carol James left MSG I have property at 5655 North Road just off 46. You turn on Orange Blvd. and then turn immediately left onto North Road. Property is about an acre and is in this Wekiva strip. I had a couple questions to ask you. I don't live there full time I live in Illinois, but the property is sitting idle right now and I just needed to talk to you. 618-754-3480 thank you

Contact Date	Time	James Harrison, Esq. AICP      OC Growth Management Department Regarding Elaine Johnson/OC Growth Management 407-836-5312 said they got the kickoff notification letter. It went to Chris in their department, but he wants to make sure James Harrison is on the list. James Harrison, Esq. AICP, Director of OC Growth Management Department, PO Box 1393, Orlando, FL 32802-1393, 407-836-5313, F 407-836-0995, jim.harrison@ocfl.net.
3/24/2005	8:20 AM	

Contact Date	Time	Keith Jankech Regarding Keith Jankech responded to PIO email: "OK - thanks so much - what a cool job it must be to know where things are going! Have a great day and thanks again. - Keith"
6/14/2005	4:14 PM	

6/14/2005	4:11 PM	PIO responded to Keith Jankech: "Keith, I've got a feeler out to confirm, but I believe the section of CR 46A that would have to be realigned or straightened to connect with the Wekiva Parkway would be the section that comes south from SR 44 and skews east to SR 46. We would want to make a clean connection to whatever alignment landed in that area."
-----------	---------	---

6/13/2005	11:11 AM	PIO checked map and emailed Dave and Brian/CH2M Hill for confirmation we're referring to segment of 46A that comes south from 44 and skews east to connect to 46, not the segment coming north to 46 between Lake Markham Road and the river.
-----------	----------	---

6/13/2005	10:55 AM	PIO received email response from Keith Jankech: "Thanks for your quick reply, Mary. Hope you enjoyed the weekend. Since 46A runs from the back entrance/exit of Heathrow all the way East to 17-92, I was just wondering which end/part was being re-aligned (I don't recall any of 46A being in the purple shaded area) likely just the section between Heathrow towards and I-4? Come to think of it - perhaps if you could tell me what re-alignment means that might answer any questions. Thanks again for your help. - Keith"
-----------	----------	---

6/13/2005	10:22 AM	PIO responded to Keith Jankech k.jankech@suncom.biz email: "Hello Keith, I'm afraid that other than knowing some sort of realignment of CR 46A will be needed in conjunction with the Wekiva Parkway, we don't have any other info on that at this time. The surveyors, geotechnical folks and others are working to complete the data gathering by the end of next month. Then we'll start drawing up some initial alternative alignments - including for CR 46A - that we hope to have ready for review and input at public involvement meetings in November. We will hold public meetings in each of the affected counties (Lake, Orange and Seminole). We should have a route for the realignment of 46A when we have the overall preferred alignment approved in early 2007. Please keep in mind that even once those alignments are drafted, changes are still possible when we enter the subsequent final design phase. I hope that helps. Feel free to call or email with other questions or concerns."
-----------	----------	---

6/13/2005	8:19 AM	PIO received Sat. 6-11 813 p.m. email from Keith : "Mary -Can you tell me where to find info on the 46A realignment mentioned in the spring 2005 update I received recently in
-----------	---------	--

the mail. Feel free to respond to this email address. Thanks- Keith k.jankech@suncom.biz"

Contact		Bob Jemiola	Vine Street Foliage
Date	Time	Regarding	
11/10/2005	8:58 PM	Attended Public Meeting, 11/10/05	

7/27/2005	12:41 PM	PIO returned call to Bob Jemiola(CQ) 352-735-9220 at Vine Street Foliage, 31821 Vine Street, Sorrento, FL 32776. PIO asked if he had an email address he'd also like to receive project info? I would rather not give email because it's home and I get a lot of other stuff there. A few of my neighbors, this is a business, are there any other plans or updates. Got info from a neighbor of mine. He was contacted they might be in your area or working in your area. PIO noted that was probably the surveying letter sent to property owners. He said he didn't get a property owner letter. PIO noted he may be just outside the study area in that case. He asked if any other project involved in this, a county project, I know this is a long way off, I have to concern myself with expansion and investment, a property like 46 and Vine Street, some people were told they might lose part of that. There's a business, a restaurant at Vine and 46 that was told they would lose part of their property. Could that just be a county intersection project? PIO noted wasn't aware of what county was doing, which isn't unusual. PIO noted the 46 bypass will affect that area. PIO noted we don't have an alignment yet so we certainly wouldn't be telling anyone they were losing their property. He said there's been a lot of rumors out here. Someone said it's going right down Vine Street. PIO noted can't say if county is planning anything there; he could check the website as most counties post their projects. PIO reiterated we don't have an alignment, just starting to draw up some initial alignments - which takes some time - to have ready for public meeting in November. PIO noted there could be 5, 10 or however many initial alternatives. PIO noted it's a 25-mile corridor and there's a lot to consider in this thing. He said so it wouldn't do any good to talk to these surveyors or architects out here, they wouldn't know where it's going either? PIO noted they're just gathering data for the engineers to start putting some lines on the map, the November meeting will be when folks get first look at whether a particular alignment(s) may affect their property. He said so you'll send us notice about that in advance? PIO said that's correct, and if we have initial alternatives in time for the newsletter, we'll include them there as well. He said excellent and thanks for the call back.
-----------	----------	---

7/27/2005	12:00 PM	Bob with Vine Street Foliage in Sorrento left MSG just wondering if I might get on your list to receive project info. My phone no. is 352-735-9220 thanks Mary and talk to you later.

9/26/2005 2:00 PM PIO returned call to Joe 248-840-4789, who said his plans have changed since e left MSG. he had expressed interest at the time about the expansion on the west end of Sorrento. PIO noted we had no alignment yet; were just in the PD&E study phase. PIO noted working on initial alignment alternatives that would be presented at public meetings in

November in Orange, Lake and Seminole counties. PIO gave him web address re: meetings. He said he'd take a look. "If it comes back to reality, I may call back with some specific questions."

9/24/2005 9:06 AM Joe (no last name given) 248-840-4781 left MSG said he had questions regarding planned expansions on the west side of Orlando. I'm considering buying a home in Sorrento. I have some questions and concerns. Please call back at your earliest convenience.

Contact Date 7/22/2005 Time 11:54 AM Jennifer Joeger Regarding PIO responded to Jennifer: "No problem, Jennifer. I was just concerned if the media was putting out inaccurate info about the status of the project. Take care."

7/21/2005 10:20 PM From: Jenn [mailto:stablechick@bellsouth.net] Sent: Thursday, July 21, 2005 10:20 PM To: Mary Brooks Subject: Re: Wekiva Parkway Study Yes it was channel 9 and I got the script from them and it basically said what you have already told me. I had just heard a brief thing about it, and wanted more detail, so of course I checked their website which of course it was not available, and then emailed them and got the script. Basically it was just people that live within the Wekiva Basin talking about how they don't want the roadway to come through, yada yada yada. (of course I don't either but if it does happen I would rather be prepared and informed). Just please continue to keep me updated as you have been doing, I have been telling my neighbors about it and we all are planning on coming to the meeting (you poor folks, you!) :) Thanks again for the prompt response and I apologize if I bothered you unnecessarily! Jennifer

7/20/2005 10:25 AM PIO responded to Jennifer: "Hello Jennifer, I'm not sure what the news outlet reported, but we are still only 6 months into the 2-year PD&E Study for the Wekiva Parkway & SR 46 Bypass projects. We have our progress meeting this afternoon, and I expect to get an update on whether we've finished the field data collection and have started drawing up initial alternative alignments for review. You're welcome to check with me tomorrow to see if there's anything new beyond that. Out of curiosity, was it Ch. 9 that you were watching?"

7/20/2005 8:08 AM Jennifer stablechick@bellsouth.net emailed: "Hi Mary, I heard a blurb on the news the other night that this study was pretty much done, and wanted your input, I have not received anything about it and wanted to know the status. Thanks, Jennifer."

4/20/2005 10:42 AM PIO responded to Jennifer Joeger stablechick@bellsouth.net email: "Hello Jennifer, I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the first half of May. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review the initial alternative alignments, and you'll also receive that meeting notice."

4/19/2005 8:49 PM Jennifer Joeger stablechick@bellsouth.net emailed: "Hello I am one of the "lucky" recipients of the letters that were mailed concerning the possibility of the Wekiva Parkway Project that may affect my property. I understand that by emailing you I can receive copies of the project newsletter and possibly have an opinion on it-so please, place my name on the mailing list. Jennifer Joeger 5796 Michelle Ln Sanford, Fl 32771 You may also send me emails concerning this at this address if it is more convenient. If you are able to, please respond and confirm that you received my request. Thanking you in advance, Jennifer."

6/7/2005                2:00 PM               PIO responded to Michelle Caraway email and sent newsletter, copied Sheralyn Brinson and Gary Johnson/SCEA: "Hello Michelle,Your query was forwarded to me by Seminole County since I am the public information officer for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass project. As you mentioned, we do not yet have an alignment for this project, which is in the early stages of the Project Development & Environment (PD&E) Study phase. I have attached the latest project newsletter which has some good information about the project, including the schedule for the PD&E, public meetings, etc.We are in the data gathering stage at this time, and hope within the next month or two to begin drafting some initial alternative alignments for where the road might go within the study area. One of the options will surely be replacing S.R. 46 with the parkway in the area mentioned below. We expect to have the initial alternative alignments ready for review and comment at public involvement meetings in each of the counties affected (Lake, Orange and Seminole) in November 2005. We hope to finish the study and have a preferred alignment by early 2007. With the subsequent phases and funding needed to fully develop this project, we do not expect to begin construction until perhaps 2010-2012. Please be advised that any of these phases could take more or less time due to a host of variables.If you'll forward your mailing address, I'll make sure you're on the mailing list for future newsletters and meeting notices. Once you've reviewed the attached newsletter, please don't hesitate to call or email with other questions or concerns."--208 p.m.

11/14/2005 3:52 PM Public Meeting Comment 11/14/05:Faith B. Jones763 Mallard DriveSanford, FL 32771Public Conservation lands were not set aside for future transportation needs. Based on this, I urge the Expressway Authority to:In Lake County- remove the eastern most potential route that goes through Rock Springs State Reserve.Place the major interchange with SR 46 west of the Wekiva Basin public conservation lands.Through traffic coming from the west of the public conservation lands in Lake County should be traveling on road that is elevated as much as possible, and has only minor ramps for local access. There should be no interchanges or arterial connector roads in the Wekiva Protection Area Outside of the Wekiva Protection Area in Seminole County I believe interchange with I-4 either at SR46 or 417 would best meet the needs of those who will use the Wekiva Parkway.The proposed southbound route from an interchange with I-4 at 17-92 to SR46 seems totally unnecessary, and waste of funds that would be better spent elevated additional portions of the road or purchasing more land. Respectfully submitted,Faith B. JonesPuffin\_fj@yahoo.com

11/14/2005 9:10 AM Attended Public Meeting, 11/14/05

11/11/2005 3:20 PM 1247 p.m. Mark/CH2M Hill copied PIO on Seminole Audubon email:  
"FYI\_From: Faith Jones [mailto:puffin\_fj@yahoo.com] Sent: Friday, November 04, 2005 5:39 PMTo: Callahan, Mark/ORLSubject: Seminole Audubon's Concerns RE: Wekiva Parkway Alignment ProposalDear Mark,The Board of Seminole Audubon Society is please that the most northern route in Seminole County (through Black Bear Wilderness Area) is no longer on the map of proposed routes. We thank you for any part you played in that decision.I have attached a copy of a letter we are sending to Mike Snyder submitting for public comment. The letter addresses some of our concerns with the Alignment Proposal.Sincerely,Faith Jones, PresidentSeminole Audubon Societypuffin\_fj@yahoo.com(attached letter)November 2, 2005Mike SnyderExecutive DirectorOrlando-Orange County Expressway Authority525 South Magnolia AvenueOrlando, Florida 32801RE: Objections to the Wekiva Parkway Alignment ProposalDear Mr. Snyder:Seminole Audubon Society has reviewed the initial alignment designs released by OCEA during the recent EAC meeting, and we believe that the eastern alignments currently shown on the alignment maps locating the roadway on the Rock Springs Run State Reserve should be removed from consideration. In addition to the loss of valuable wildlife habitat and public lands, we believe that the constitutionally-mandated declaration of surplus process that would be required to obtain these lands for this project would present a controversial and unnecessary impediment to the construction of the Wekiva Parkway. In addition to our objections to the unwarranted surplus of public lands, we believe that the primary interchange at SR 46 should be located west of the Rock Springs Run State Reserve/Seminole State Forest boundaries. A more environmentally-responsible solution would be to site the interchange on the Neighborhood Lakes property, which is mostly open pastureland throughout much of its frontage on SR 46. Siting the interchange on the Neighborhood Lakes pastureland would minimize environmental impacts, avoid existing public conservation lands, and would best fit with the concepts approved by the Legislature in the Wekiva Parkway and Protection Act. In addition, an interchange at this location would most easily facilitate a connection to SR 44 and SR 46 to the west, thereby ensuring that all traffic is carried across public lands by a single bridged facility. Sincerely,Faith Jones, PresidentSeminole Audubon SocietyCC: Brian Manwaring, CH2M Hill, Public Involvement Mark Callahan, CH2M Hill, Project Mgr

We thank you for any part you played in that decision.I have attached a copy of a letter we are sending to Mike Snyder submitting for public comment. The letter addresses some of our concerns with the Alignment Proposal.Sincerely,Faith Jones, PresidentSeminole Audubon Societypuffin\_fj@yahoo.com(attached letter)November 2, 2005Mike SnyderExecutive DirectorOrlando-Orange County Expressway Authority525 South Magnolia AvenueOrlando, Florida 32801RE: Objections to the Wekiva Parkway Alignment ProposalDear Mr. Snyder:Seminole Audubon Society has reviewed the initial alignment designs released by OOCEA during the recent EAC meeting, and we believe that the eastern alignments currently shown on the alignment maps locating the roadway on the Rock Springs Run State Reserve should be removed from consideration. In addition to the loss of valuable wildlife habitat and public lands, we believe that the constitutionally-mandated declaration of surplus process that would be required to obtain these lands for this project would present a controversial and unnecessary impediment to the construction of the Wekiva Parkway. In addition to our objections to the unwarranted surplus of public lands, we believe that the primary interchange at SR 46 should be located west of the Rock Springs Run State Reserve/Seminole State Forest boundaries. A more environmentally-responsible solution would be to site the interchange on the Neighborhood Lakes property, which is mostly open pastureland throughout much of its frontage on SR 46. Siting the interchange on the Neighborhood Lakes pastureland would minimize environmental impacts, avoid existing public conservation lands, and would best fit with the concepts approved by the Legislature in the Wekiva Parkway and Protection Act. In addition, an interchange at this location would most easily facilitate a connection to SR 44 and SR 46 to the west, thereby ensuring that all traffic is carried across public lands by a single bridged facility. Sincerely,Faith Jones, PresidentSeminole Audubon SocietyCC: Brian Manwaring, CH2M Hill, Public Involvement Mark Callahan, CH2M Hill, Project Mgr

12/16/2005	11:00 AM	Dropped PIO reports for Bryan Douglas/OOCEA PIO and dropped Gail Jones and John Thompson concept letters to be mailed from EA.	
12/14/2005	11:16 AM	PIO drafted and sent Seminole concept letter to Gail Jones 407-324-2377 o, c 407-687-4610, send map to 1661 Stargazer Terrace, Sanford, 32771." December 14, 2005Gail Jones1661 Stargazer TerraceSanford, FL 32771RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear Gail,Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, I have enclosed the Seminole County conceptual project layout - Sheet 5, and a public comment form. As noted, the PD&E study is scheduled to conclude with an alternative selected by March 2007.Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at www ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement.Sincerely,"--1125 a.m.	
12/13/2005	5:38 PM	PIO returned call to Gail Jones 407-324-2377 o, c 407-687-4610, send map to 1661	

Stargazer Terrace, Sanford, 32771. It's off 46 by Orange Boulevard, just past Astor Farms, live in retreat at Wekiva. Was talking to one of the customers and said you could help me out. PIO said could send map, but also let her know it's on website. She said she looked but couldn't get it to enlarge, was too small. PIO noted maybe she has old version of Acrobat. PIO noted would send map, any other questions? She said won't know till she gets the map. She said she really appreciates me calling her back.

12/12/2005 1:39 PM Gail Jones left MSG I was given your name and number by Wanda Knight about getting detailed map about the 417 extension that going to go somewhere in the vicinity of my house. I'd like a copy of the map if I could. 407-324-2377 o, c 407-687-4610 thank you.

10/20/2005 2:44 PM From: Pamela F. Jones [mailto:pjones@gaylordmerlin.com] Sent: Thursday, October 20, 2005 9:11 AM To: mbrookssr414@cfl.rr.com Subject: State Road 414 Mary: Can you send me copies of any handouts that were given out at the October 17th Public Involvement Workshop? What is the status of Right of Way maps which show the proposed roadway? You said that you expected them to be available late September - early October. Thanks for all your help Pam Pam Jones Assistant Project Manager Gaylord Merlin 5001 W Cypress Street Tampa, Florida 33607 813-221-9000 813-221-9030 - Fax CONFIDENTIALITY NOTICE: The information contained in this transmission is attorney privileged and confidential. It is for the exclusive use of the intended recipient and if you are not the intended recipient, you are hereby notified that any dissemination, distribution or copying of this communication is strictly prohibited. If you received this communication in error, please notify the sender by return e-mail immediately, confirming to sender that the original e-mail has been deleted and all hard copies, if any, have been destroyed.

10/20/2005 1:05 PM PIO responded to Pam Jones/Gaylord Merlin: "You're welcome, Pam. The only ROW maps available so far that I'm aware of are for Section 200 which includes the S.R. 429-414 interchange. Still waiting for the others; some of the sections still haven't turned in their 60% complete plans. To request the ROW maps available, send a public records request to the Expressway Authority's condemnation attorney Robert Mallett at Broad and Cassel, Bank of America Bdg., 390 N. Orange Ave., Ste. 1100, Orlando, FL 32801-4961. I've attached a project section map for your reference. You'll need to reference the sections when you request the ROW maps."

9/29/2005 3:07 PM PIO returned call to Pam Jones/Gaylord Merlin, who asked for update on Wekiva Parkway. PIO noted public meeting schedule in November for initial alignment alternatives, and that the alternatives were going through local government review. PIO reiterated PD&E study schedule. PIO confirmed she'd received past project info. She said that's what she needed - thanks.

9/29/2005 3:01 PM Pam Jones left MSG, please give me a call to get some info on the Wekiva Parkway. 813-221-9000 thanks.

8/16/2005 8:36 AM PIO emailed Pam Jones/Gaylord Merlin: "Hello Pam, I wanted to let you know that I received your query. We do have some 30% complete ROW maps for certain segments, and I'm trying to get a tally on those now and will get back to you soon. The design teams

also are working toward 60% complete plans and ROW maps by late September-early October. Those will obviously be a little more firm, though still subject to change as final design continues. Will get back to you soon." We do not have an alignment - far from it - on the Wekiva Parkway as we as just in the Project Development and Environment (PD&E) Study phase, so we are nowhere close to having ROW maps for this project. We are currently working on some initial alignment alternatives which we hope to have ready for review and comment at public involvement meetings in November 2005. The study is on track to finish by spring 2007, and at that time we should have an approved alignment, though that typically will change once the project goes into final design. I'll make sure you're also on the list to receive info for that project."--844 a.m.

3/31/2005 4:28 PM Pam/Gaylord Merlin responded to PIO update: "Thank you!!"

3/31/2005 1:58 PM PIO responded Pam Jones/Gaylord Merlin re: status of Wekiva Parkway: emailed: "Hello Pam, It will still be quite some time before we have an alignment for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass. On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for public review and input at meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Subsequent public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Obviously, not every property within the study area will be affected by these projects. We hope to finish the PD&E Study in early 2007. The study also will determine which part of this roadway will be an at-grade arterial (similar to US 441), and which portion will be a raised or elevated toll road. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, we probably wouldn't begin construction on these projects before 2009. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass hopefully in April. You're on the list to receive this information, as well as public meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."

3/30/2005 4:44 PM Pam Jones/Gaylord Merlin emailed: "Mary: Can you give me an update on the status of the SR 429 Wekiva Parkway. Thank you for your help. Pam Jones Assistant Project Manager Gaylord Merlin 5001 W Cypress Street Tampa, Florida 33607 813-221-9000 813-221-9030 - Fax

Contact		Andrea Karzeise Ross Lake Shores Subdivision

Notes		
Date	Time	Regarding
2/8/2005	2:19 PM	<p>Andrea Karzeise said she's a resident of Seminole county. She lives in a 15-house community; "we don't really have an association. I live in Sanford on 46. I want to know if there is anything definitive as to what's going to happen to the 417 up there?"PIO asked if she's referring to the Wekiva Parkway? She said yes, she lives near Wekiva, on Ross Lake Lane,. The subdivision is Ross Lake Shores.She's at 109 Ross Lake Lane, Sanford, FL 32771. email dk456@earthlink.net "My concern is I'm only 2 doors away from 46. I can literally see 46 from my window. I obviously have a big concern. I would like to know if my house would be mowed down one day. Is this going to be my long-term home?"PIO gave timeline for PD&amp;E, meetings, project phases, construction not likely before 2010. She said well that's comforting at least. She asked if the road goes along S.R. 46, how far out would you have to acquire property? PIO noted depends on the alignment and road configuration they decide for that location, will it be 4-lanes arterial or 6-lane toll road, etc? PIO said I'd add her to the project database so she'd get newsletter and meeting notices. She said she definitely wants the info. PIO also noted there is project info and study area map on the EA website, gave her address. PIO noted if she had questions after reviewing that she's welcome to call back or email me. She said she appreciated me taking her call.</p>

Date	Time	Regarding	
11/14/2005	10:31 AM	<p>Public Meeting Comment Card 11/14/05:Cindee Kelly149 Overoaks PlaceSanford, FL 32771The objective is not clear.1) to relieve growth / Hwy 46 congestion or2) a western beltway is neededDepending upon the objective then that is the answer. The objective s/b a western beltway. Therefore the hwy 417 s/b connected to the south. Don't block access to the south. Don't block businesses serving residents by using Hwy 46. The northern route doesn't make any sense. Note: the NO build is not presented to enough residents. Will become campaign issue in my opinion.</p>	

11/14/2005	9:35 AM	Attended Public Meeting, 11/14/05
------------	---------	-----------------------------------

10/3/2005	1:12 PM	Cindee Kelly 407-551-8409 said thanks for calling me back on Friday. Think we want to see what you will have in November. I was thinking about you coming to our annual meeting, but it runs so long already. PIO noted they're welcome to attend the public meetings, gave her schedule. She said maybe she would attend; they're a very small subdivision. She asked would there be different info at the 3 diff meetings? PIO said no, just would enlarge the boards for which ever county we happen to be in at the time, otherwise info is the same. She noted we're right on 46 next to Lake Forest, off orange. She asked would a decision be made at the meetings? PIO noted no, but they would get to comment on the various alignment alternatives and see where the road might go. PIO noted some HOA's are encouraging their homeowners to attend and foregoing a presentation. PIO we're willing to do presentation for them after the public meetings as well; noted this is a 2-year study so we'll be meeting with folks throughout. She said she thinks she'll tell folks to attend the public meetings and then maybe they will follow up and request a formal presentation to the board afterwards. PIO noted it's not a limited offer; we're willing to meet with them any time. --121 p.m.
9/30/2005	5:15 PM	PIO called back Cindee Kelly/Westlake Estates HOA h 407-330-9099, left MSG asking if Oct 13 works, noted I may or may not have the initial alternative alignments at that point, but will have other info to share with board, and could come back later to do follow if needed. PIO said she can call or email me, maybe she's checking with her board on it.
9/27/2005	5:18 PM	PIO checked calendar and noted could do West lake Estates/Terra Villa 407-551-8409 o, left MSG to call about poss. presentation Thursday, Oct. 13 630-7 p.m. PIO also called home number 407-330-9099 h, spoke to gentleman who said she's on her way home and is interested in a project presentation. PIO said let her know I may be able to do it Thursday Oct. 13. He said he will call her, should be home in 15 minutes and let her know and have her get right back with you.
9/27/2005	3:06 PM	Cindy Kelly left MSG. I have letter sent to me from you re: Wekiva Parkway project. I live in west lake estates, I'm the HOA president. We're also known on signage out front off Orange Boulevard in Sanford as Terra Bella? Terravilla?At our last meeting we voted to give you call about your availability to come speak to our neighborhood. Basically with a couple weeks notice we could really assemble; we only have 35 homes in our submission. We have a gate on our community. We're right off orange and 46 in Sanford. Could assemble pretty quickly to hear your info and ask questions. 407-551-8409 o, 407-330-9099 hEither number, give me a call and idea of some evenings you're available. I'll try to work something for our neighborhood and appreciate you getting in contact with us. Thank you.
8/16/2005	3:05 PM	Div. of Corporations also lists a mailing address as 5224 W. SR 46 334, Sanford, FL 32771 as of 4-13-2004. Other board members listed: Terry Rabon, 172 Overoaks Pl., vice president; Mark Lighterman, 181 Overoaks Pl.; Daniel Pocarino, 148 Overoaks Pl.; Mike Baltzell, 165 Overoaks Pl.
Contact Date 4/29/2005	Time 12:05 PM	Molly Kelly Regarding PIO returned call to Molly Kelly C 407-221-2996 Coldwell Banker realtor, told her nature of study area, noted e-w section from Lake County to I-4 will be in general area of S.R. 46; n-s portion from 441 in OC up to Lake and Seminole centered along Plymouth Sorrento road, so well west of Heathrow and Wekiva Springs park, we're not affecting Heathrow. 1167 Kersfield Cir., Heathrow 32746, email jjkelly95@att.net. What is the timeframe as far as when the project would begin? Gave project timeline and phases. She asked where would we be realigning 46A? PIO noted in the area of the connection to the new corridor. PIO asked if she'd seen the study area map? She said yes online, but it wasn't easy to read so she wanted to be sure she understood what was going on. PIO said would put her on mailing list; working on newsletter to come out mid-may. She said great and thanks for calling back.

10/10/2005	4:01 PM	Kevin 386-736-6568 said Bryan Douglas/OOCEA PIO referred him to me for questions on the Wekiwa Parkway, where it's going. He got some info in a sales packet for a condo about the project, and is trying to decide whether to buy. PIO gave him status of initial alignment alternatives, local government review and public meetings. PIO referred him to website for schedule of meetings since I was in the car. He went to the website and saw the info, noted Seminole meeting on Nov. 14. He said that's also the date he has to decide whether to buy the condo or not. PIO noted he can go to the earlier meetings if he likes, will be the same info. He asked if there was anything he could see where the alternatives were. PIO noted not yet, since it's going through government review that's changing based on their feedback, but we will have finished that first round of review and he can see the alternatives at the public meetings. He said there are a lot of folks in the same situation with this condo. He is most interested in the area picking up from 417 and I-4. PIO noted there was an alternative to pick up there, but don't know if that's still on the maps after Sanford and Seminole government review.

11/14/2005 1:59 PM Public Meeting Comment Form 111405:Daniel Kinchen595 Milano CourtSanford, FL 32771I want to comment on the south connection with I-4. I believe that this connection is NOT the best option. As you can guess I live in this area. Even though I will not be completely affected, I believe that having this south connection will hurt the Heathrow / Markam Woods Area.I fell the north connection will be a much better benefit to all. Bring this interchange will force 417 to run closer to downtown Sanford bring addition life to the city. I believe that the south connection area has potential for growth for Markham Woods Heathrow area. Also by the time a decision is made the property value of this land will cause this connection to be a more costly project especially with the cost of this already expensive interchange.

	Regarding
	Comment Card:Dennis Kinney1077 Choke Cherry DriveWinter Springs, FL 32708A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road

interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Contact Date 10/14/2005 Time 2:05 PM Pamela Klug Regarding EAC Comment Form: Pamela Klug 711 Ashgrove Terrace Sanford, FL 32771 I think it only makes sense to create a route that connects the Wekiva Parkway (the western beltway to the existing greenway (S.R. 417). This will bypass already congested Hwy 46 and not interfere with Seminole Town Center mall traffic. Existing infrastructure is already in place at I-4 at the Greenway intersection.

Contact Date 11/9/2005 Time 10:59 AM Tom Knieriemen Regarding Public Meeting Comment Card 11/09/05: Tom Knieriemen 3492 Ondich Road Apopka, FL 32712 I would like a set of plans.

Contact Date 6/14/2005 Time 1:50 PM Ila & Seth Knight Regarding PIO returned call to Ila Knight, who said she got the newsletter. Our house is in the zone and we would like to be kept informed. Looks like we're in an area you all are not too sure of. PIO confirmed they're on the list, no alignment and looking throughout the study area. Updated her on data collection, public meeting schedule for November, should get some more info maybe in August-September in anticipation of the meeting. She was thankful for the info.

6/14/2005 11:43 AM Ila & Seth Knight left MSG We just wanted to be kept informed on the Wekiva Parkway expressway project. Our house is in the zone. Our phone is 407-889-8540 and we live at 3590 W. Kelly Park Road in Apopka. So if you could just add us to the list of people to keep involved, or if you have any questions give us a call. Thank you very much.

Contact Date 11/30/2005 Time 12:00 PM Wanda Knight Regarding Worked on east Lake and Seminole concept letter for Wanda Knight as requested and sent: "November 30, 2005 Wanda Knight 31025 Quail Hollow Road Sorrento, FL 32776 RE: Request for Wekiva Parkway PD&E Study Initial Alternatives Concepts Dear Wanda, Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E Study. As requested, I have enclosed the East Lake County and Seminole County conceptual project layouts (Sheets 4 & 5c). Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files. We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement." 12:10 p.m.

11/23/2005	4:16 PM	PIO returned call to Wanda Knight 352-385-1810 , man answered, said she wanted to make sure you didn't have her two houses mixed up, and if any of them were in danger., she's getting ready to put a major remodel on one of these houses, it was making her nervous. PIO reiterated info provided previously, that alternatives south of 45 in area of Wekiva pines country estates, but possibility alignment could shift to the north and affect subdivision. PIO again noted Malakean property is in area where we've only talked about mirroring 46 corridor. PIO noted can't say 100% that some new alternative won't come up but that's only thing been discussed in that area until now; other property has a greater potential impact with possible shifts of alignments. PIO asked if they'd seen copies of the maps online? He said if you pull it up on the internet, I couldn't get it any bigger than a little old thing. PIO noted there is a zoom feature on the PDF; maybe they have an old version of adobe acrobat? He said he'd have to check. PIO said can send hard copies of concepts for the two locations. He said that would be great, send them to her. Man speaking said he was Earl Colter, son in law, send hard copies for both properties. PIO asked he let her know I called. He said thanks for the reassurance. --424 p.m.
11/18/2005	3:17 PM	PIO returned call to Wanda Knight 352-385-1810, 352 455 5504, relayed info. She said so she should redo the Seminole property? PIO reiterated property south of Wekiva river oaks is outside the study area, whereas the other property in Wekiva pines country states could be hit by shifting alternative or potential interchange. She said thank you so much, that's a great help. PIO said call with other questions.
11/18/2005	2:54 PM	PIO checked locations of Wanda Knight 352-385-1810, 352 455 5504 properties: 31025 Quail hollow road, Sorrento 32776, other property 388 Malekean Trail, SanfordSeminole property is just south of Wekiva River Oaks and just outside the study area on the Wekiva River. Sorrento property is in Wekiva Pines Country Estates, all of which at this time is north of 46 and the alignment alternatives in this area. However, alternatives could shift. Also, this is in the area for a potential local access/interchange, so IC configuration could ultimately affect subdivision.
11/18/2005	9:09 AM	Wanda Knight 352-385-1810 I'm calling regards to the highway that's gong in. my property is on 31025 Quail Hollow Road, Sorrento 32776. The other property 388 Malekean Trail, Sanford. I need to know if impact to either property. Fixing to remodel one of them and would hate to do the wrong one. Other number is 352 455 5504 I apologize I have laryngitis and sorry I missed your other call. Thanks. You can leave a MSG with anyone that answers the phone or on the MSG line.
11/16/2005	12:37 PM	PIO returned call to Wanda Knight 352-385-1810, son in law said try her cell phone 352-455-5504, left MSG returning her call, apologized for delay due to high volume of calls asked her to leave address if she gets my voicemail again and I'd check the property for alignment impacts and get back to her.
11/14/2005	3:24 PM	Wanda Knight 352-385-1810 calling about Wekiva Parkway . I have two days left to decide whether to add on to my house and I want to be sure that's not part of the land you are looking at taking. Give me a call back and I'd appreciate it.
Contact Date	Time	Monty Knox Regarding KNOX NURSERY INCORPORATED
11/9/2005	1:05 PM	Attended Public Meeting, 11/09/05
10/17/2005	3:13 PM	PIO returned Kathy's call. Knox's number is 407-293-3721, Kathy he doesn't have email, told Mike PR folks spoke to them couple years ago but they need more info.
10/17/2005	3:09 PM	Kathy/QCA left MSG nursery owner in Wekiva area who wanted to get some that nursery owners together want someone to present about project. Monty Knox is VP of Knox nursery and serves on consolidation committee. He was there today when Mike Snyder came out to talk to us, said they want someone to come out since they look like they're going to be affected. Monty Knox is going to be at the meeting tonight and I told him to

look for you.

12/28/2005	9:11 AM	PIO returned Tony Conrad? call 407-323-3738 confirmed SCEA voted to have the yellow northernmost alternative removed from consideration at their Dec. 20 meeting. He said he'd read that in the paper but wanted to be sure. PIO noted didn't know if they had a website, but assumed he could find that in the SCEA minutes for that meeting. He said that's great and means he can stop his petition work against the alignment. I certainly appreciate you returning my call.

12/28/2005	8:52 AM	Tony Konrath? 407-323-3738 re: proposed toll road 417 northeast connector at I-4 and 17-92 going to 46. Read in the paper that connector has been thrown out and is no longer on the boards. I want to confirm that. If it's true, I need to stop the work that I'm doing. If it's not true, I need to continue getting petition signed that we're against it. If you could let me know back if that's been cancelled, that portion of it.
------------	---------	--

11/14/2005	4:14 PM	Public Meeting Comment Form 11/14/05:Tony Konrath4767 Cains Wren TrailSanford, FL 32771We live in the Preserve at Aster Farms- If it comes down Orange Boulevard bumping up against Astor Farms and Lake Forest that would depreciate all the home values and create safety factors for all of Astor Farms neighborhoods. If home values depreciate that reduces tax revenues and creates hardships for those who live in the subdivision because they wouldn't be able to resell their property at its current value. We would recommend bring it up to 46 which would impact less neighborhoods create better traffic flow plus the corridor is already there. Please mail a copy of the propose plan Sheet 1. Thank you

Contact Date	Time	David Koutek Regarding	Security Alliance Center
11/10/2005	9:07 AM	Attended Public Meeting 11/10/05, Via Mailing	
11/2/2005	11:10 AM	<p>PIO returned call to 407-330-2597 David Kutek said they're in first subdivision east of the river. He's seen the map with the initials, goes right along 46. at one time they put the double decker bridge in, just sort of wondering what the game plan is. If you're going to have final plans in 6 months, you have to know something. Are you a politician, because it seems like you're evading the question. PIO noted just concepts at this point, emphasized we're in the PD&amp;E study phase, very early in development of this project. PIO noted we're a long way from final design, not looking to finish the study until early 2007, at which time we'll have an alignment preferred. PIO noted we have been getting government review, taking public input, explained viable alternatives phase after analysis of all the input, etc. It makes a lot of difference, deciding where it's going to go depends on what the plans are</p> <p>Obviously it's going down 46, if it goes 500' on other side of 46. He said he doesn't support the double decker bridge concept that environmentalist suggested at a meeting a couple years ago. He asked how much influence the environmentalists had in this? PIO noted there is an EAC that is providing input, but that also has to be balanced with all the other input and the transportation needs in the area. PIO noted an array of impacts being looked at including residences, businesses, wildlife habitat, floodplain, etc. We discussed at length the bridge area. he said he favors to Leave the bridge that's there now to service the homes, think it would be good to abandon section of 46. If they put the 6 lane bridge to the north of the existing one, personally I think that's best solution. Houses on the north side are very old small shacks, those people are going to fight that. But the other thing you're fighting is that's state property.He asked would we start buying property in the next couple of years? PIO noted no funding for ROW or construction at this point, construction material costs continuing to go up, was nearly \$1 billion last year, and we're not looking at construction until at least 2012. PIO noted funding challenges, looking for resources, project would likely be done and paid for in phases.I can tell you in the last few years, traffic has tripled. It's going to be a very popular road and the revenue will come back to your investors. Even though I'm impacted ... something has to be done. I'm not against the project; I just wish it goes over on the state property. As it takes longer, the harder it's going to be. PIO noted we're aware of continuing growth, as well as property speculation and some development permits in attempt to drive up property prices in case its need for the project.Will there be a point when they'll make people stop developing or issuing permits? PIO noted unless DOT or EA buys a property, they can't tell an owner what to do with it. he said he appreciated the call back. PIO said look for me at the meeting; he plans to attend.</p>	
11/1/2005	2:03 PM	<p>407-330-2597 David Kutek left MSG I'm interested in alignment project of the 429 at , by the Wekiva river, the east side of the river. We're in a subdivision on south side of 46 just east of the river. We're wondering is this alignment you're proposing going to be on the north or south side of 46? Are they still talking about having a double decker bridge over the top? I know you've got to have some kind of idea. Call me back and let me know what the game plan is and what you're proposing. I'd really appreciate it.</p>	
8/9/2005	6:41 PM	<p>David Koutek 407-330-2597 returned my call and said he is in the River Oaks subdivision. He checked for HOA contact and said Gary Hitchings was the president last year. If he's not still, he should know who is. His home number is 407-330-9069. PIO reiterated we were preparing a HOA contact list to send info about the project. He asked what's going on with it? PIO gave rundown of PD&amp;E study and overall project timeframe, noted study area centered along 46 in his area. He said he wants to be on project mailing list.He asked if there would be a meeting? PIO noted yes, in November will have one in each of three counties affected.</p>	
8/9/2005	6:22 PM	<p>PIO continued searching for HOA info on River Oaks and Fountainhead subdivisions but no success. Came up with business, security alliance center, 180 River Oaks Cr., which</p>	

appears to be in the subdivision. Left MSG for co. president David Koutek to see if he knew anyone on the board.

1/21/2005	10:15 AM	PIO returned Kelli Krupnicki's call. PIO let her know there is no other info yet on Wekiva Parkway yet; we just had kickoff meeting. PIO noted I have her contact info and she would get project info.
1/21/2005	9:49 AM	Kelli Krupnicki left MSG "I talked to you week and half ago about the Apopka bypass-Maitland Boulevard extension. You sent me a map. We appreciate it very much. I'm going to be in town today in about an hour and half. I was wondering if I could swing by the office, the maps are great but I need a little more detail on the Apopka bypass,

something that shows the property that's it's directly going to affect. Call me on the cell 352-551-7879 or I'll just pop in there and hopefully you're there."

1/13/2005 3:20 PM Continued working Krupnicki conceptual (both) letter and sent.

1/13/2005 3:05 PM PIO worked on Kelli Krupnicki concept request letter (wants MBX and Wekiva Parkway).

1/12/2005 3:01 PM Kelli said her "parents live on Mount Plymouth golf course. They're in a rental right now but are building a house; it should be done in a couple months. Dad said they were extending 429 or 414." She got on the website, but wants to come pick up a big map. Wants both conceptals for both projects. She said send them to her because she doesn't know parents' temp address by heart. PIO said will do so. She also requested copy of the full PD&E study. PIO noted that's supposed to be finalized at end of this month. PIO noted it will be a length document and cost will be involved. She said that's fine.

Contact Pam Kuhn

Date Time Regarding

5/24/2005 4:45 PM PIO responded to Pam Kuhn and sent 050505 11x17 map: "Pam, I just got back to the office after back-to-back appointments. Here's the study area map."

5/24/2005 4:31 PM From: Pam Kuhn [mailto:pamktime@earthlink.net] Sent: Tuesday, May 24, 2005 4:31 PM  
To: MBrooksSR414@cfl.rr.com Subject: Wekiva Parkway  
Hi Mary - I spoke with you a few hours ago and you were going to e-mail me some map information about the proposed Wekiva Parkway. I haven't received anything yet, so I'm just verifying that you have my correct e-mail address. It is pamkuhn@cfl.rr.com. Thanks! Pam

5/24/2005 1:15 PM PIO returned Pam Kuhn's call 407-415-0815, is there map that shows where it's going. I'm realtor and have someone who wants to buy house in Rivercrest just south of 46 and west of Longwood Markham road, wondering if there's 'going to be a road coming through, just north of Markham Road  
Send Pam Kuhn, email to pamkuhn@cfl.rr.com  
814 Riverbend Blvd. Longwood 32779  
Email study map, wants to be on mailing list.

5/24/2005 10:01 AM Pam Kuhn 407-415-0815 left MSG she had a question about Wekiva Parkway. I've been on your website, trying to find out where exactly its planned to go at this time. I'm close I think at this website but I just can't find what I need. If you could give me a quick call at your convenience I'd appreciate it. My name is Pam 415-0815

Date Time Regarding

11/2/2005 11:10 AM PIO returned call to 407-330-2597 David Kutek said they're in first subdivision east of the river. He's seen the map with the initials, goes right along 46. at one time they put the double decker bridge in, just sort of wondering what the game plan is. If you're going to have final plans in 6 months, you have to know something. Are you a politician, because it seems like you're evading the question. PIO noted just concepts at this point, emphasized we're in the PD&E study phase, very early in development of this project. PIO noted we're

a long way from final design, not looking to finish the study until early 2007, at which time we'll have an alignment preferred. PIO noted we have been getting government review, taking public input, explained viable alternatives phase after analysis of all the input, etc. It makes a lot of difference, deciding where it's going to go depends on what the plans are. Obviously it's going down 46, if it goes 500' on other side of 46. He said he doesn't support the double decker bridge concept that environmentalist suggested at a meeting a couple years ago. He asked how much influence the environmentalists had in this? PIO noted there is an EAC that is providing input, but that also has to be balanced with all the other input and the transportation needs in the area. PIO noted an array of impacts being looked at including residences, businesses, wildlife habitat, floodplain, etc. We discussed at length the bridge area. he said he favors to Leave the bridge that's there now to service the homes, think it would be good to abandon section of 46. If they put the 6 lane bridge to the north of the existing one, personally I think that's best solution. Houses on the north side are very old small shacks, those people are going to fight that. But the other thing you're fighting is that's state property. He asked would we start buying property in the next couple of years? PIO noted no funding for ROW or construction at this point, construction material costs continuing to go up, was nearly \$1 billion last year, and we're not looking at construction until at least 2012. PIO noted funding challenges, looking for resources, project would likely be done and paid for in phases. I can tell you in the last few years, traffic has tripled. It's going to be a very popular road and the revenue will come back to your investors. Even though I'm impacted ... something has to be done. I'm not against the project; I just wish it goes over on the state property. As it takes longer, the harder it's going to be. PIO noted we're aware of continuing growth, as well as property speculation and some development permits in attempt to drive up property prices in case its need for the project. Will there be a point when they'll make people stop developing or issuing permits? PIO noted unless DOT or EA buys a property, they can't tell an owner what to do with it. he said he appreciated the call back. PIO said look for me at the meeting; he plans to attend.

11/1/2005	2:03 PM	407-330-2597 David Kutek left MSG I'm interested in alignment project of the 429 at , by the Wekiva river, the east side of the river. We're in a subdivision on south side of 46 just east of the river. We're wondering is this alignment you're proposing going to be on the north or south side of 46? Are they still talking about having a double decker bridge over the top? I know you've got to have some kind of idea. Call me back and let me know what the game plan is and what you're proposing. I'd really appreciate it.

11/14/2005	3:01 PM	Comment Form: Angela Lagos 639 Parkwood Ave Altamonte Springs, FL 32714 A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons: 1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes

to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Date	Time	Regarding
11/14/2005	10:04 AM	Attended Public Meeting, 11/14/05
8/19/2005	10:52 AM	Ben Larson 407-333-3940 said thanks for returning my call yesterday. I'm just trying to find out anything new about an alignment. PIO updated him on the impact assessments going on, more than 100 potential route segments being looked at, and ones with fatal

flaws being eliminated. Shooting for set of initial alignment alternatives at end of this month to submit for government review, hope in October to have them ready to shop around to HOA's and other community groups, and full scale public workshops in November. He said I'm renovating my new office, 1/8 mile south of 46 near lake forest, going to be giving in lake forest, just west of orange blvd, my new office is on wayside and orange, just south of 46. I'm wondering if my little property is going to be okay. PIO noted we understand lot of new development in that area; drove Orange Boulevard yesterday and was amazed, lot of people buying into new properties that they're concerned about the futures of. But we have to get through this process, and we'll keep them as up to speed as possible. PIO noted shooting for next project newsletter end September. He said he appreciates the update, will stay in touch.--11 a.m.

8/18/2005	8:59 AM	PIO returned call to Ben Larson 407-333-3937 Advanced Eye care, receptionist said he wasn't in today. PIO left MSG that I returned his call and he can call me back when convenient. She said okay, thank you very much.
8/17/2005	3:20 PM	PIO received 241 p.m. Ben Larson left MSG just calling for update from you personally on what's happening with the extension of 417 from Sanford to the Wekiva area. If you have any news or not, please give me a call at 407-333-3937. If any information you can just leave a MSG at the front desk or if I'm not busy I'd like to talk to you too. Thanks for your time and have a great day.
4/13/2005	12:54 PM	Ben Larson called and thanked me for the emailed info. He asked do you have any info on how they assess your property? PIO said they negotiate a fair market value. I'm getting it rezoned which should up the value, right? It was agricultural and I'm getting approved for retail office. PIO confirmed commercial property typically has a higher value than residential or agricultural. He said what if I put pads on it, wouldn't that increase the value? PIO said if by pads, he means having a permitted plat, then yes, developed or permitted development would increase the value of the property. He said his real estate agent obviously has a stake in him buying this property, and Real estate broker is telling me everything you said, but wanted to hear it from someone unbiased like you that didn't have a stake in this. He said he wants to put optometric practice there at corner of orange and ??? But it depends on what's happening with the road. Just want to make sure if it's going to come through that I'm going to get what it's really worth. I'm handing over a big check on April 26.
4/11/2005	5:18 PM	PIO emailed Dr. Larson with that and general project status info. "Ben, It was a pleasure speaking with you earlier today. I determined the Paola Woods Pre-School at 5680 Wayside Drive is within the study area for the S.R. 429-Wekiva Parkway. As we discussed, at this time, it is not possible to determine which properties will be affected by the S.R. 429-Wekiva Parkway and S.R. 46 Bypass as we do not yet have an alignment. On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment PD&E Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others soon will be visible in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass, hopefully by early May. I've added you to the mailing list to receive the newsletter, as well as public

meeting notices, etc.I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."--517 p.m.

4/11/2005	5:02 PM	Ben Larson emailed: "Miss Brooks,Thanks for your help. Please send me any info you have on 5680 Wayside Drive, Sanford regarding the 417 project.Sincerely,Ben Larson, O.D 407-333-3937drbenlarson@cfl.rr.com"
4/11/2005	4:55 PM	Ben Larson called asking where connection is going to be with 417 and I-4, where will it pick up and go to Apopka? My father in law knows a lot of people up there and he said there are two routes, it'll either go down Wayside or down Orange.PIO gave status of PD&E, we don't have alignment yet, but hope to have initial alternatives for November public meeting. PIO noted not sure where he got other info, maybe the old 429 extension project, which was scrapped some time ago? In any case, PIO asked and he said he would like to be on the mailing list.He said send to his office Advanced Eyecare, attention Ben Larson 570 Rinehart Road, Lake Mary, ste. 100 32746Email drbenlarson@cfl.rr.comI'm closing on property right now on corner of orange blvd and wayside drive, at the stop light there's church on wayside. Buying the pre-school property. 5680 Wayside, Payola Woods Pre-School. PIO to check if property is in the study area and email him back either way.

Contact		Richard LaRue	Orange County Homeowners Assoc. Alliance
Date	Time	Regarding	
8/10/2005	4:23 PM	Richard LaRue/OCHAA responded to PIO email: "we don't share our HOA list with anyone, I am sorry. Orange County Neighborhood Services has a list of HOA's printed out in a booklet format. I can't remember how it is sorted other than by District."	
8/10/2005	4:10 PM	PIO emailed Richard LaRue to see if OCHAA has a list of HOA's in study area, maybe by zip code: "Richard,Does the OCHAA have a comprehensive list of HOA's in the county? Is there a way to sort by zip code? We're trying to make sure we don't miss sending project info to any of the Orange County HOA's within the Wekiva Parkway study area. Let me know - thanks."	
8/9/2005	5:51 PM	PIO responded to Richard LaRue/OCHAA: "Richard,Here's the last newsletter that went out in June for the Wekiva Parkway project. You're welcome to excerpt as needed and include my contact info. Key thing on that one is we don't have an alignment. We're in the midst of the preliminary study and are shooting for public involvement meetings in each county to review initial alternative alignments in November 2005. Dates and location TBD.On Maitland Blvd., we'll be working soon on the next newsletter (last one went out in March). Status on that one is most of the segments have reached 30% completion on final design plans. Firms expect 60% complete plans by early October, at which time we'll schedule a public involvement meeting to bring folks up to speed on that one. Lots of changes occurring on the alignment, pond locations, etc., and changes will continue as final design progresses.There is info on both projects you're also welcome to copy on the Expressway Authority's website www.ocea.com. Or let me know and I could draft something up for you; just give me space and time (deadline) constraints."	
8/9/2005	5:12 PM	From: Richard LaRue [mailto:RLaRue@skbrokers.com] Sent: Tuesday, August 09, 2005 5:12 PMTo: Mary BrooksSubject RE: SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study - OCHAA mailing addresswhat type of information is available that we might run in our newsletter? do you do a monthly update? let me know Richard M. 11/21/2005	5:47 PM	PIO emailed Scott Lawlor a comment form: "Scott,A pleasure speaking with you earlier. I look forward to the comments (specific to support or opposition to the various alignment alternatives) from you and your neighbors. As noted, keep tabs on the maps on the website as we will be updating these files as alternatives are added or deleted from consideration. The PD&E Study is scheduled to conclude by March 2007 with a selected alternative. The next public workshops will be summer 2006 to review the more viable alternatives.I hope this helps. Please don't hesitate to call or email with other questions or concerns."
11/21/2005	4:58 PM	PIO returned call to Scott Lawler 407-509-2054, land technologies, my home is ... if you take the north route is going to be affected, a little corner of the property line. Which way they're bending towards. The north route seems lot longer than the south route. I live on , lived here for 15 years, can't believe they would put something , map comes through Astor Farms and corner of my ... also own nursery that EA is going to run behind, will not directly affect the nursery but will directly affect my home. SC is trying to eminent domain part of my nursery due to expansion of a canal. No matter what you did. I've been through the process before. The county does what the county does and wants. They're taking down 400 year old oak trees. .. it comes down to the bottom line; it comes down to political clout and the neighborhood of who can call who, and dollars and cents. My question to you... is the northern route dollars and cents is twice as long as the southern route. The northern route is twice as long. The 417 option is lot shorter than the northern route. The northern route would affect the wetlands from the St. Johns. My house, I can hear the powerboats going down the St. johns. I can't understand ... I have bear, my son just saw bear going across orange blvd. I can't understand how down 46 they would build bear bridge, but would run ... If it has to go somewhere, people on other side of table, on the southern construction of 417. This is the commercial property and more valuable and screw the bears. I would think the people who own the 417 property are politically more connected than the people living with the bears. PIO noted there are definitely competing interests on this project. All input has to be weighed along with engineering and cost issues.I went through public involvement with condemnation of the canal.PIO discussed pros and cons of various alternatives, emphasized importance at this stage of PD&E study of getting your comment forms, expressing opposition or support for a particular

alternatives. He went into detail with his experience on the county canal, which is private, but county been allowing development, car dealership, and dumping their water. Lady across from me has six donkeys, some pigs and chickens, her parents lived into eh house. They had audacity to ask them to donate the property to expand the canal to make the developers wealthy. ... got Christie Wilson attorney involved and now people getting \$70 000. It comes down to what they want to do. They're just going to take a bulldozer and knock the hell out of the place. Send me a form at 5368 Orange Blvd., Sanford 32771 email sljlawlor@aol.com I call ed the national republican committee today. They asked for donation to the party. I told them who do I call; we're definitely going to be active on it. PIO said would email him a comment form, encouraged him to get the neighbors to also submit comment forms, and to make their alternative concerns or preferences known to their county commissioner or sc public works, since SC has to approved alignment in their jurisdiction. PIO noted we're analyzing all of the comment forms and other input received now, and that in the next couple months lines will be falling on and off the map based on that info as well as other evaluations. PIO emphasized that I am not the person who makes those decisions, but now is time when public feedback carries most weight as these are weeded out.--530 p.m.

11/14/2005 3:36 PM Public Meeting Comment Form 11/14/05:Scott and Elizabeth Lawlor and Family5368 Orange BlvdSanford, FL 32771My family and I have lived in Sanford for 18 years and have owned the property for ever longer. We understand the need for new roads, for we have 1st hand the growth that has come to Sanford. On the other hand, the people in this area who live on large tracts of land enjoy their way of life along with the wild life that also inhabit this area. The animals have been pushed out by developers, bulldozed over and run over by cars. The natural habitats between Orange Blvd and the St. John's river where bear, eagles, wood peckers, fox, turkey, turtles, etc, now live within relative safety. To spend millions of Tax dollars on 2 bear over passes on SR 46 and then bulldoze their natural habitat is absurd. The North route is longer which means more destruction more pavement and a significant reduction in natural wildlife habitats. Let's think of the shorter less damaging routes. The area in the proposed north route is also the last area in this part of Sanford that people can live much like they did years ago. Let's keep a piece of the county that is not ¼ acre or less in lot size and completely paved over. The people for generations to come count on your good decisions to protect the remaining natural areas of this county. As our county sign reads "Welcome to Seminole County the Natural Choice"  
The southern route will be shorter and will be able to connect to 417. This will create easier traffic flows to the downtown an Disney Resort Areas with much less damage.Thank you, Scott and Elizabeth Lawlor and Family

11/14/2005	12:21 PM	Comment Form:Betty A. Leantin2652 Raccoon Run LaneOrlando, FL 32837A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the	

following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/9/2005	9:46 AM	Public Meeting Comment Form 11/09/05: Kurt Liebknecht 3066 Ondich Road Apopka, FL 32712 I realize that his part of the by pass has to be going on for quite a while and having lived in the area for 25+ years, it seems that the further west this goes the better. Access to 441 and then north to the Lake County Villages and beyond, I know my comments will probably fall on deaf ears but so be it.
11/9/2005	9:45 AM	Public Meeting Comment Form 11/09/05: Debbie Liebknecht 3066 Ondich Road Apopka, FL 32712 My concern about the proposed (6) routes near Ondich Road and Plymouth Sorrento Road is that it is too near Plymouth Sorrento Road. I feel that road will need to be 4 laned eventually anyways and the development that follows it will not be conducive to the expressway running so parallel to it. A route much farther west near Effie Road would take it to a more rural area and allow for any development to take place more naturally. DLIEBKNECH@aol.com

9/1/2005	2:33 PM	PIO emailed Jackie Linder the Maitland Boulevard Extension and Wekiva Parkway newsletters as requested.
8/30/2005	2:25 PM	Jacquelyn Linder returned call, said she's interested in both projects and any others doing with any new roads on the expressway. Said she didn't receive last Wekiva Parkway newsletter. PIO confirmed I had correct address in database; she said that's correct. PIO noted I'd also added her to the Maitland Boulevard Extension database. She asked when it would be open? PIO noted MBX to start construction mid-2006, open 2009. Noted Wekiva Parkway to start construction 2010. Don't know when will be done this far out, schedule

likely to change. She asked if best map was what was posted on the website? PIO noted correct, Maitland Boulevard Extension pages has alignment posted. We don't have an alignment for the Wekiva Parkway so it's just the study area map at this time. She asked so which one was at 60%? PIO noted moving toward 60% plans for Maitland Boulevard Extension, again to start construction next summer-fall. She asked that I email her the last two newsletters to JLinder@harbertrealty.com.

8/30/2005 1:22 PM PIO returned call to Jacquelyn Linder/Harbert Realty Services, left detailed MSG that we were approaching 60% plan completion, working on newsletter hope to get out end September and shooting for public meeting mid-October, trying to nail down date. Call me with any other questions and to confirm your address so can make sure you're in the project database.

8/30/2005 10:23 AM Jacquelyn Linder, Harbert Realty Services left MSG I spoke to you end of last year re: western beltway, the Maitland Boulevard Extension and I was just trying to get some updated info. If you could give me a call my phone number is 407-660-2449 x106, 407-660-1271 Thank you very much.

Contact Notes Gail M. Ling  
Date Time Regarding  
11/10/2005 2:42 PM Public Meeting Comment Form 11/10/05: Gail M Ling 36142 Allens Alley Drive Eustis, FL 32736 Resent move from Broward County. See many options and strongly suggest that the Lake County interchange should be located in the northern land west of Rock Springs Run State Preserve with the least impact to conservation and environmental lands. The original interchange show that the most easterly alignment should be eliminated. Remember this is for the people who live here and what the tax base is made of. The people will come when ever the road is but listen to the people who care, live here now and pay the taxes.

11/10/2005 8:51 AM Attended Public Meeting 11/10/05, Via Mailing

Contact Notes Mary & John Lischke  
Date Time Regarding  
10/4/2005 9:18 AM PIO called back Mary Lischke c 1-262-352-6123 what does that mean? PIO noted it means their property falls within the area being looked at for this project. She said she understands it's a lengthy process we're going through. PIO noted correct, study scheduled to finish by spring 07 with a fairly firm recommendation. She asked does it affect Wilson Place? PIO noted I haven't looked at that community specifically, but can tell her there are dozens of alignment alternatives being looked at and going through local government review. And as that happens, lines are being taken off and put on the map, so it might affect Wilson Place today, but not tomorrow based on what the various agencies are saying. PIO said we'll be through the first round of local government review and have a set of initial alignment alternatives for property owners to review in November. PIO noted Seminole meeting is Nov. 14 at the Sanford civic center. PIO noted they'd be getting meeting notices and newsletters with the meeting info. She said she assumed since they got the first update that they were in the study area. PIO noted we are sending to a wider population since so much interest in the project, not just those in the study area. She was thankful for the info.--924 a.m.

10/4/2005 9:13 AM PIO determined the Lischke's parcel No. 30-19-30-5UA-0600-0020 was in the Seminole portion of the study area. Their address is listed as 2100 S CHERRY WOOD CT, New Berlin WI 53151

10/4/2005 9:08 AM Mary Lischke said "We received update in the mail, and we're trying to determine if our property is in the purple shaded area. The address is 5211 Lynwood Circle Drive, in Wilson Place off Wayside Drive,. Mary Lischke said we live in Wisconsin but are down here now, c 1262-352-6123 Mary & John Lischke. PIO said I'd check to see if they were in the study area database and get back to them.--912 a.m.

11/9/2005 1:42 PM Attended Public Meeting, 11/09/05  
4/19/2005 10:43 AM PIO returned call to Shirley Little own small nursery at Appy Lane and Plymouth Sorrento 3 5 miles off 441 407-493-9017 have heard so many stories about this area that I'm about ready to freak out. Nursery on 4 acres. 4061 Plymouth Sorrento Road, Apopka, 32712 home and business, Apopka Garden Center.Are they going to do this as well as four laning Plymouth Sorrento Road? PIO noted we're coordinating with Orange County, but don't have the answer to that question at this point. Gave PD&E and public meeting schedule. She said thank you dear for returning my call.  
4/19/2005 9:46 AM Shirley Little left MSG my husband an I own small nursery at Appy Lane and Plymouth Sorrento 3.5 miles off 441, is there any way you can tell me how these new roads are going to impact our property? I'd like to know if there's some way you could do this so we can be prepared for the future. If you could give me a call at 407-493-9017 it'd be much appreciated. Thank you.

Date Time Regarding  
11/9/2005 11:14 AM Public Meeting Comment Form 11/09/05:Chia Ton and Mary Lo (DBA Penang Nursery, Inc 4720 Plymouth Sorrento RoadMailing PO Box 1658Apopka, FL 32712(407) 886-2322We own 25 acres in your study area and operate our wholesale foliage nursery on the property. We purchased the land in 2002 and have invested over 1 million dollars in buildings and assets for our business. There would be significant impact to our business, employees, and other nurseries in the Apopka area should our location be taken away for the Wekiwa Parkway construction.This property serves as corporate headquarters, greenhouse production area, and distribution warehouse for our products. We hire approximately 50 employees year around at this site and 8-10 other employees at our 2

satellite greenhouses in Apopka (Rock Springs Road and Kelly Park Road). We have been in business since 1981 and have gross sales in excess of \$6 million. Our employees would be displaced if our business had to close. Many have been with our company for over 5 years and enjoy the benefits of our corporate profit sharing plan as they plan for retirement. In addition to the negative impact to our employees, other foliage nurseries in the Apopka area would be affected if our business closed. We are brokers and therefore purchase over \$100,000.00 of foliage material from local nurseries and growers each month during our busy season (January - May). We often establish contract-growing arrangements with certain nurseries to supply us with a particular crop during the year. Several nurseries sell to Penang Nursery Inc. exclusively or rely on our company for a large percentage of their sales volume. Finally, the Orange County Fire Department required us to put in a Fire Well on our property and make it available to them for fire protection of residents and property owners near us. This well which we are prohibited from using for our greenhouse operation, cost over \$20,000.00. We had to construct this well, give the fire department 24-hour access to our property as needed, and incur the expense of doing so without direct benefit to our day-to-day operations or profitability. We ask that you consider the economic impact of taking our property for the Wekiva Parkway. I would negatively impact our employees and other nurseries in the Apopka area. Penang Nursery Inc. has grown tremendously since the early 1980s. The investments of time and financial resources over the past 25 years, as well as the business relationships we have established with local nurseries and customers in the United States and Canada, need to be considered as alternative routes for the Wekiva Parkway are examined.

11/14/2005	4:19 PM	Public Meeting Comment Form 11/14/05: Jim Loisel 620 Grand Cypress Point Sanford, FL 32771 Keep the Greenway North of 46 Going down Orange Ave to I-4. This is the best way with the least amount of impact to neighborhoods.
11/14/2005	12:21 PM	Attended Public Meeting, 11/14/05
9/13/2005	11:55 AM	PIO responded to Jim Loisel: "Hello Jim, If you're referring to the Wekiva Parkway project, we're working on initial alignment alternatives to be reviewed by local and state agencies this month. Those will be refined based on the government reviews and provided beginning in October at various homeowners association and other community organization meetings on request. We're also scheduling public meetings to present the initial alternatives in each of the three counties. The dates and details still have to be nailed down, but tentatively we're looking at Nov. 9 Apopka High School, Nov. 10 Mount Dora Middle School and Nov. 14 at the Sanford Civic Center. I'm working on the project newsletter, which will also have this update info and more. Shooting to get the newsletter out probably by early-mid October."
9/12/2005	10:21 AM	Jim Loisel emailed: "Hi, I was looking for an update on the Greenway proposal. I know that they were meeting last week out here on the paved area from the river to I-4 [near S.R 46]. Thanks Jim Loisel"
7/27/2005	11:33 AM	PIO responded to Jim Loisel: "Please provide your mailing address and I'll add you to the project mailing list."

7/27/2005	11:08 AM	Jim Loisel emailed: "Hey Mary, Please keep me informed to any and all changes to the Greenway Path on the S.R.46 / Sanford area. ThanksJim Loisel"
6/10/2005	3:45 PM	<p>PIO drafted and emailed response and newsletter PDF to Jim Loisel: "Hello Jim,I will add you to the project database. Did you receive the recent project newsletter? If not, please forward your mailing address so I can add you to the mailing list.The Project Development &amp; Environmental (PD&amp;E) Study, which kicked off in January, for the SR 429-Wekiva Parkway and SR 46 Bypass is being done jointly by The Orlando-Orange County Expressway Authority and the Florida Department of Transportation. I understand your safety concerns and they will be made part of the record.Part of the study will determine not only the alignment, but the configuration of the road (which portions will be a raised toll road, and which portions will be an at-grade arterial, how many lanes, etc.) Decisions about traffic lights will also be addressed during the study once the configuration is determined. As you know, a warrant study has to be done at a location prior to a signal being installed.As you can probably tell from the flare in the study area at Interstate 4, there are some pretty varied options for how the parkway will connect to I-4. This also will be determined as part of the study. Likewise, there are a number of options that will have to be looked at with regard to what happens to SR 46, particularly in Seminole County.We are in the data gathering process, with surveyors and geotech folks in the study corridor now and for probably the next month. After that we'll start analyzing the data and drawing up some alignment alternatives based on that information. We plan to have some initial alternative alignments ready for public review and comment at a public meeting in November 2005. Public meetings will be held in each of the affected counties (Lake, Orange and Seminole). The input and feed back from the public meetings and local governments will help us proceed to further investigating the most viable alignment alternatives. Subsequent public meetings will be held to review those further. We hope to finish the study and have a preferred alignment in early 2007.With the other development phases of this project and the funding needed, it will likely be 2010-2012 before we'd start construction on this project.I'm attaching a copy of the newsletter here in case you didn't receive the hard copy. Again please send me your mailing address. Are you on a homeowners' association board by any chance? If so, let me know which one and if there are other board members that we should add to the project database to receive info. Thanks."</p>
6/9/2005	12:07 PM	<p>Jim Loisel jmloisel@earthlink.net emailed: "Mary,I live in the pathway of the "Proposed" 46 by-pass. My community and I would like to be informed as to the realistic path that the county will take to make the complete the 429 at I-4. We also want to know the measures that are going to be addressed into SR 46. All feel that from the Wekiva River to Orange Ave needs to be four lanes with grass divider [like form Orange to I-4]. But even more important is that "ALL" major intersections from the river to Orange need traffic lights. [I.e Longwood-Markham Rd and Lk. Markham Rd]. This will help slow down traffic from Lake County into Seminole. These are very dangerous intersections and need real attention. Please keep me informed! Thanks,Jim Loisel"</p>

11/14/2005	3:14 PM	<p>Comment Form:Linda Longest39537 County Road 452Leesburg, FL 34788-8380A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for</p>

parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Date	Time	Regarding	
2/9/2005	10:15 AM	Steve Lorman/OC Real Estate Management , called to discuss county property that may be affected by the Wekiva Parkway, was there anything more definitive on the alignment? Said he saw what was on the EA website, but it was just a wide swath. PIO noted that's the study area, and we don't have an alignment, just started PD&E on Jan. 19. PIO noted we're hoping to have some alternative alignments for public review at meetings in November, and could try to get that info to him beforehand when available, but again, it's going to be alternatives, not anything definitive.He said at one time he'd seen an EA map for that area with several alignments. PIO noted that was for the original 429 northern extension, which has been dropped in lieu of the Wekiva Parkway projects.He said the county has several parcels that are old clay pits that may or may not be affected. That would be a better route. That may be something you could get from us at a lower rate for retention for example than by going to the other side and hitting private developments.He said they just spend thousands of dollars demolishing structures on those properties west of Plymouth Sorrento Road, 3 clay pits. PIO noted study area was centered along Plymouth Sorrento Road in that area, so very possible it could be hit by alignment.He said they also have a contract where they're going to closing in a couple of days on some environmentally sensitive lands that they're concerned about, wouldn't want those hit.He asked if he could get on a mailing list. He noted Lorenzo Nastasi is a county contact for this project, but the info doesn't necessarily get around to all the departments that are affected. He noted he buys land for all the departments.He's at 400 E. South St., Orlando, 32801, steve.lorman@ocfl.netHe said any info with something nailed down would be appreciated as soon as possible.

Date	Time	Regarding
11/30/2005	10:12 AM	PIO returned call to Linda Lucas, noted boards are at the engineering firm and they're not set up for public review. PIO noted all the material was on the EA website. She said she and her girlfriend went on the site and the maps they tried to click on never came up. PIO asked if she got to the page with the 20+ maps on it? She said she didn't think so. PIO asked if they had a recent version of Acrobat reader, that could be the problem? She said hers is old but her girlfriend's is more recent and she couldn't pull files up either. She said her girlfriend also told her to try the ECFRPC site. PIO noted I didn't post the maps on there, but they may have a link to the EA site. PIO gave her the web address and walked her through the text links to the workshop maps. PIO noted if she can't pull them up I can send her the county maps. She said if necessary send to 171 S. Orange Avenue, Sanford 32771. She said they're off Orange Blvd, south of 46, west of Orange Boulevard, near wayside. She said their neighbors made it to the meeting, but we were getting ready to go out of town and just forgot about it. She said her neighbor said it's taking a house across the street and one next door. The neighbor told us it's going to be in our front yard, so we were freaking out. PIO noted we're just in the initial alternatives stage, so we may or may not wind up selecting an alignment that affects them. PIO noted we're reviewing the hundreds of comment forms and input from government officials in evaluating the alternatives. PIO said I would just send her a Seminole concept, and a comment form. PIO noted we're getting many requests so please bear with me on that, but will try to get them out to her by end of the week. She said thanks. Said her neighbor mentioned another public meeting on Dec. 20 at the county services building. PIO noted we're not having another public meeting on the project, but that may be the Wekiva river basin commission meeting. She was thankful for the call back.--1033 a.m.
11/30/2005	10:08 AM	Linda Lucas 407-322-9308 said she wants to find out where the office was to look at the maps for the Wekiva Parkway. Call me on my cell at 407-754-4868.
4/19/2005	9:04 AM	PIO returned call to Linda Lucas 171 S. Orange Avenue in Sanford. 32771 407-322-9308 she asked about purple area, said they're definitely in there, is that where it's going? PIO noted that's the study corridor, but not every property in there will be affected. PIO noted hope to finish study and have an alignment by early 2007. Noted she'd be getting newsletter by mid-May. She said thanks for the info and call back.
4/18/2005	1:22 PM	Linda Lucas left MSG 171 S. Orange Avenue in Sanford. we were sent info on Wekiva Parkway going down 46. That does include my property so I would like to get the newsletter and whatever info you have. 407-322-9308 Thank you very much.

Date	Time	Regarding
1/13/2005	3:15 PM	Richard Luker called to say he can't get his printer to print the Wekiva Parkway info I sent him; could I fax it to him at the same number? PIO said I'd send it over now, which I did.
1/13/2005	2:27 PM	Richard Luker responded to Wekiva Parkway email: "Mary, Thank you very much. Mr. Luker"
1/13/2005	2:03 PM	PIO drafted email response summarizing schedule and phasing info for Richard Luker: "Richard, I'm writing to follow up our phone conversation just now about the schedule for the State Road 429-Wekiva Parkway Projects and S.R. 46 Bypass, with regard to your property at 22626 Coronado Summerset Dr. As we discussed, there is no alignment yet for

these projects. The only thing we have so far is a study corridor conceptual showing a wide blue or purple swath indicating where the road might go. The Project Development and Environmental (PD&E) Study just began this month and is scheduled to take 2-3 years. This study will result in the preliminary preferred alignment for these projects. We hope to have the first public involvement meeting to review some initial alignment alternatives late this summer or in the fall. As for the project schedule, from the preliminary alignment we will enter the final design phase, also expected to take 2-3 years. Please be aware that changes to the alignment also will be made in the final design phase (i.e., properties that may not have been hit by the alignment in the PD&E Study may be affected by changes in final design, and vice versa). After final design comes Right of Way Acquisition, which also is expected to take another 2-3 years. All told, it could be 2010-2013 before this project is under construction. Please be advised this is a typical schedule, and that individual phases may actually wind up taking more or less time than anticipated. I hope this is helpful. Please feel free to call or email with other questions or concerns. I've also added you to the project database to receive meeting notices and other project information."

1/13/2005	1:53 PM	PIO returned MSG from Joe Berenis to Richard Luker re: Wekiva Parkway. He said "I have a house on 5 acres in Sorrento I've been trying to sell. Every time I get someone really interested they find the Wekiva Parkway on the Internet and freak out and don't want to buy because they think the road is coming tomorrow." He's gotten "20 different answers. No one seems to know here it's going, when it's coming or if it's ever coming." PIO said I could send conceptual and schedule info. He said he already has study area conceptual. But that's all. PIO noted we've just started PD&E which will produce the prelim preferred alignment. He said how long? PIO noted 2-3 years, and we hope to have first meeting to look at alternative alignments late summer-fall this year. PIO noted with other phases it could be 2010-2013 before project actually goes to construction. He asked that I send him that info in writing so he can show potential buyers. He said it would be nice if the thing on the internet stated it's absolutely not happening tomorrow. 22626 Coronado sumerset drive, 32776 between off round lake and 46. Email paulrick3@juno.com or Rickpaul3@juno.com they don't use it much and not sure which is first.

8/15/2005	3:39 PM	PIO emailed newsletter and updated data map to Dave Lutz as discussed.
-----------	---------	--

8/15/2005	12:30 PM	1230 p.m. Dave Lutz 407-509-6295 said he's looking at buying property on S.R. 46 and wanted to know what was going on with regard to this project. PIO noted we're in PD&E stage; has he seen the study area map? Where is the property in question located? He said at 46 and 46A on the south side. He said someone said the north side was getting the expressway and there was going to be an interchange at 46A, but he doesn't necessarily trust the source. PIO noted we don't have an alignment yet, and don't know where interchanges are going. PIO noted there were some recommended areas from the governor appointed committees in terms of where to look at interchanges, but other than that no exact locations at this point. PIO asked if he was on the project mailing list? He said no, but the person who owns the property now is, that's how he got PIO contact info. He was given a copy of a May 16, 2005 letter. He also noted that was his birthday, and he
-----------	----------	---

hates that they keep rolling around, he just gets older and grayer...! PIO asked for his contact info so could add him to the project database. He lives at 4224 Old Trafford Way, Orlando 32810. Email davelutzorlando@aol.com PIO said would send the updated study area map and last newsletter, and he'd get subsequent meeting notices, etc. He asked if he buys the property and EA needs the property, then what? PIO noted PD&E and overall schedule, and if it came down to needing the property he'd be contacted, appraisers would be sent out and there'd be a fair market negotiation. He asked what kind of price range would he be looking at? PIO noted too many variables to begin to guess, would depend on whether a partial or total take, nature of property, zoning, amenities, etc. he said he's not sure if he wants to build a house on it if the EA is going to take it. PIO reiterated the overall schedule, construction not until 2010-2012. PIO noted even if the PD&E alignment hits his property, there's chance during final design with shifts in alignment that property may fall off, or vice versa. He said that was helpful info and he looked forward to receiving my info.--1238 p.m.

4/21/2005	10:58 AM	PIO returned call to Sara Lyon 407-320-6913 Wilson Elementary to get address for mailing list. All my neighbors got it , Tom Lyon, 405 Kimberly Crt., Sanford 32771, sarah_lyon@scps.k12.fl.us PIO gave her newsletter status and said would make sure she's on the list.
4/21/2005	10:53 AM	PIO returned call to Wilson Elementary 407-321-7282, Betsy Dixon x56906, left MSG to call me back with questions about the project.
4/20/2005	11:28 AM	Sarah Lyon I want to be added to the mailing list for the Wekiva Parkway project. if you call 407-320-6913 and I can give you my address. for some reason our neighborhood received this letter and for some reason my husband and I did not receive it. We're very much in this purple zone. Please call me back so I can make sure we get on this mailing list.
Contact Notes	Doris Lyons	
Date	Time	Regarding
4/18/2005	12:16 PM	PIO returned call to Doris Lyons 407-321-1402, 333 Kimberley Crt., Sanford 32771, left MSG confirming she's on the list and should get newsletter by mid-May.
4/15/2005	2:24 PM	Doris Lyons left MSG I received a letter re: the Wekiva Parkway and I would like to be put on the mailing list to receive copies in the future. 407-321-1402, mailing address is 333 Kimberley Crt., Sanford 32771. Thank you and have a nice weekend.

Contact Notes	Sheri MacDonald                      Harris, Harris, Bauerle & Sharma	
Date	Time	Regarding
1/18/2005	2:04 PM	PIO responded to Sheri/Harris Harris et al re: Wekiva study conceptual: "Sheri, The S.R. 46 Bypass, the segment shaded blue in Lake County, is also being studied as part of the PD&E Study for the S.R. 429-Wekiva Parkway projects. The S.R. 46 Bypass segment was looked at and refined separately by the S.R. 429 Working Group. The funding for that segment of the PD&E comes from FDOT. Beyond whatever color variations you may see, the important thing is this is being studied and designed all as one project."
1/10/2005	11:57 AM	Sheri MacDonald/Harris Harris responded to PIO email: "Thanks, Mary. On another note, I noticed that on some of the study maps, the SR 46 corridor is part of the Wekiva Parkway and is shaded purple with a very small section in Lake county at US 441 shaded blue (see Figure 4 of the March 16, 2004 Wekiva River Basin Coordinating Committee Final Report & the Corridor Location Map from the Wekiva Parkway Funding Plan dated October 27, 2004

. However, on your website, the SR 46 is clearly a separate section shaded blue. Can you advise why some maps show the SR 46 corridor as being part of the Wekiva Parkway phase? Thank you, Mary!"

1/10/2005	10:48 AM	PIO emailed Sherri MacDonald/Harris Harris that it does appear Donald Parks' parcel at 2413 Plymouth Sorrento Road is within the study area." Good morning Sheri,I've reviewed the Wekiva Parkway study area conceptual and the information on the 2413 Plymouth Sorrento Road parcel owned by Donald Parks, and it does appear this property is within the study area. The study area is roughly centered along Plymouth Sorrento Road from US 441 up to a hair shy of the Lake-Orange county line.I've got a call in to see if there's any other overlay info available that I can confirm this, but visually it does appear to be in the study area. FYI."
1/10/2005	10:37 AM	PIO left MSG Brian Manwaring/CH2M asking if there was any sort of overlay that actually shows the parcel no.'s or addresses within the study area.
1/10/2005	9:57 AM	As requested by Sheri MacDonald/Harris Harris, PIO checked if Donald Parks/2413 Plymouth Sorrento Road parcel #302028048400011 is in Wekiva Parkway study area. PIO extensively reviewed the OC Property Appraisers parcel and aerial info, compared to study area conceptual and street map, and the parcel does appear within the study area.
1/7/2005	3:00 PM	PIO called back Sheri MacDonald/Harris Harris Bauerle Sharma, who said Stumpy and Bruce did site inspection and they're certain he won't be affected but it seemed to me he was in the study area. She said address is 2413 Plymouth Sorrento Road, parcel #302028048400011. PIO said I have been in meetings but would check and get back to her Monday. She said that'd be fine.

Date	Time	Regarding	
3/25/2005	11:56 AM	Walter called back, said he's only lived in Seminole County about a year. Isaw on the website the Wekiva extension project. The shaded blue area my house is underneath that area. I'm concerned the highway is hitting the house. Magiera, 2198 Northumbria Dr., Sanford 32771Email wmagiera@hotmail.comHe asked, "Just out of curiosity what are they going to be surveying for?" PIO noted they're surveying for property lines, historic sites, topography, soil makeup, hydrology,everything that makes up the existing conditions in the area. Then will put it in layers on GIS to determine most feasible locations for the roadway. Noted there are also requirements due to environmentally sensitive nature of the	

area. He said "I find it strange that people are constructing and building in what could be a proposed path of this road? What does that mean for those properties?" PIO noted any property determined to be on the alignment, the FDOT or OCEA would have to negotiate a fair market value for that property. PIO noted there is ample time given if someone has to move out of their house, and noted not all takes will be total, partial takes may not require someone to leave. PIO also noted on flipside there are developers out there scrambling to get their plans in, knowing the road is coming through, so they can negotiate a higher market value. He asked, "What about the conservation area, is that not going to be conservation any more?" PIO noted we must avoid the existing areas, and also have directive to try to acquire 4 more parcels, totaling nearly 9000 acres. PIO noted believe they started negotiations for couple of those in December, but haven't heard lately where they are with those. --1208 p.m.

3/25/2005	11:52 AM	PIO returned call to Walter Magiera 407-448-6000 Nextel communications, left MSG for him to call me back.
3/24/2005	1:01 PM	Walter McGara? Resident of Seminole County, recently reviewed Wekiva Parkway and S.R. 46 bypass corridor map and have a few questions about it and the program in general 407-448-6000

Contact Notes		Raymer Maguire	Fixel, Maguire & Willis
Date	Time	Regarding	
11/15/2005	9:58 AM	PIO returned call to Raymer, Lynn said he was on another call. PIO left MSG with Raymer that files were now accessible on the website, gave him text links to follow.	
11/15/2005	9:23 AM	Raymer Maguire 407-228-9522 could you leave on my voicemail the website for the CH2M Hill plans. If they aren't uploaded like you thought they were going to be, can you call me about getting a CD of them like we talked about last Thursday? Thank you very much.	
11/10/2005	11:51 AM	Raymer Maguire emailed his contact info: "Dear Mary: Enjoyed meeting you and thanks for your good help. Raymer F. Maguire, III Fixel, Maguire & Willis 1010 Executive Center Drive, Suite 121 Orlando, Florida 32803 407 228 9522 (O) 321 689 6639 (C) 407 228 9665 (F) rmaguire@fla-eminentdomain.com www.fla-eminentdomain.com "	
11/10/2005	11:44 AM	PIO again tried Raymer Maguire 407-228-9522, 321 689 6639 c; he asked if he could get the CD from me with all the files tonight at the Lake county meeting. PIO noted I'm heading out to another meeting shortly after lunch and didn't think I could download all the files onto a disk for him before today's meetings. PIO noted we'd discussed with the engineers that they're setting up an FTP site with all the project files that once it's ready he could access the electronic files directly. PIO said I'm checking with them to see when everything would be posted and what the address is for public access. PIO noted with that it should be ready I would think on Monday. Would that work? He said yes, he'll email me his email address.	
11/10/2005	11:05 AM	PIO returned call to Raymer Maguire 407-228-9522, Linda said he's with a client and put me through to his voicemail, where I left a MSG 321 689 6639 c	
11/10/2005	8:20 AM	Raymer Maguire left MSG to call him back 407-228-9522.

Date	Time	Regarding	
7/13/2005	3:00 PM	PIO emailed property owner lists to Katie Bartoo/Broad and Cassel for public records request." Katie, Thanks for calling back. Hope this does the trick. Let me know if you need anything else. These letters were dated March 30, but didn't actually go out until April 14 (took a while to get them approved, signed, etc.) Just an FYI."	
7/13/2005	2:44 PM	Katie/Broad and Cassel left MSG returning PIO call. My email address is kbartoo@broadandcassel.com, but the last name is spelled Bartoo, so there are two "O's" on it, so give me a call if you need anything else 407-481-5220	
7/13/2005	2:39 PM	PIO called Katie Bartow/Broad and Cassel to get email address to send property owner letter mailing lists, left MSG to call to confirm email address is kbartow@broadandcassel.com and there's no extra letter in there or anything, and I'm spelling it correctly.	
7/13/2005	10:29 AM	PIO received email response from Katie Bartoo/Broad and Cassel. : I got it. Thanks a bunch!"	
7/13/2005	10:11 AM	Brian/CH2M Hill emailed: "Mary, Per our conversation, I've attached the mailing list that was used for the Property Owners notification letter mailing on March 30, 2005. The mailing list is divided into three separate files for Orange, Lake and Seminole Counties. Regards,Brian"	
7/13/2005	10:05 AM	PIO called Brian/CH2M Hill to discuss Broad & Cassel public records request of property owner letter mailing list. He said they list they originally gave PIO was the 8,000 list; 3,000 just outside the corridor. He said the list for the letters was smaller, only 5,000. PIO asked if he could send list used for the letter mailing regarding this public records request. He said no problem.	
7/12/2005	12:30 PM	PIO returned call to Katie Bartow/Broad & Cassel, said I could help here, think there may have been a couple lists used for that mailing. Asked whether she wanted it electronically or hard copy, and what her timeframe was? She said whatever is easiest for you, though if you send electronically she'll be able to print out copy. She said attorney firm is fixel, ?? & ???. ?? Raymer has a lot of property owners on Maitland Boulevard Extension right now. She said if can get to her within a week that would be fine.	
7/12/2005	11:30 AM	Katie Bartow/Broad & Cassel left MSG they do the eminent domain for the EA and they got a public records request for the mailing list for the property owners March 30 letter that went out for Wekiva Parkway. Spoke to Keith Jackson and he said to contact you about that. Please call me.

11/14/2005	11:21 AM	Public Meeting Comment Card 1114/05:Bob Manuel5336 Fawn Woods CourtSanford, FL 32771Southern connection to I-4 preferred south of SR 46 connection with 417
10/14/2005	1:32 PM	EAC Meeting Comment Form:Frances E. Manuel5336 Fawn Woods CourtSanford, FL 32771The Wekiva Parkway should connect with I-4 at 417. There's space for a large clover leaf and connecting there will mean less property has to be destroyed and less disruption during construction. There is so much traffic and building along RT 46 that it doesn't make much sense to use that route.
10/14/2005	1:29 PM	EAC Meeting Comment Form:Bob Manuel5336 Fawn Woods CourtSanford, FL 32771I oppose putting Wekiva Parkway on S.R. 46 for it's connection to I-4 because: 1. would make a bad traffic situation even worse! S.R. 46 too congested already 800+ homes, apartments, townhouses already approved for future building in immediate area.2. Would be greater business impact / disruption than using southern route3. Connecting to S.R. 417 (Greeneway) make / logical sense and takes E-W traffic off I-4.The southern alternative connecting to 417 is suggested route.
8/9/2005	8:17 AM	PIO responded to Bob Manuel/Lake Forest HOA email: "Hello Bob, Our Lake Sylvan presentation is Aug. 18 at 7 p.m. at the Seminole Sports Complex at Lake Sylvan Park. I believe it's on Lake Markham Road south of 46? I look forward to meeting you there, and we'll be happy to also do a presentation for your community as well.I'm attaching the latest version of the project study area map for your information.Please let me know if you have other questions or concerns."
5/17/2005	11:06 AM	PIO replied to Bob Manuel email: "Hello Bob, I wanted to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. Date	Time	Regarding
10/14/2005	1:30 PM	Armando Maralo712 Treeline PlaceSanford, FL 32771-7101From a purely economical stand point it would appear that southern route ultimately cost the governing authorities less money for right of ways, etc...Even is the S.R. 46 route would not require condemnation of the expensive properties it would abut traffic, noise, etc... Would sharply decrease value and ultimately result in possible inverse condemnation. Respectfully, A. Maralo

11/9/2005	9:31 AM	Public MEeting Comment Card 11/09/05: First, This forum is ridiculous. People should be allowed to voice their concerns and let their neighbors hear both sides. Why would anyone consider planning the interchange in the middle of the protected areas, where there aren't even any feeder roads? The interchange should be as far west as possible. The only reason I could see why it might not be built there is because of development interest along the western beltway. Please consider how fragile any precious this area is and what a gift it is to the people of Florida.

11/14/2005	12:39 PM	Attended Public Meeting, 11/14/05 Public Meeting Comment Form 11/14/05:Bob Martin - Lakeside Fellowship UMC305 South

Orange BoulevardSanford, FL 32771Item 2217 needs to be re-identified on the maps. It is Lakeside Fellowship United Methodist Church (not Paola School). The identification appears to be correct in the book, but not the maps.The current "Orange" route negatively impacts our 10 acre site Development (submitted to Seminole county 2002) Our ability to be in Ministry to our community will be adversely affected- relocating and finding 10 acres contiguous near term proves impossible.

11/2/2005	2:30 PM	PIO responded to Curtis Reddecliff/Chair of LakeSide Fellowship UMC email, copied Pastor Bob Martin: "Hello Curtis and thanks for writing.I will relay your concerns about the LakeSide Fellowship UMC not being listed as a community facility site on the overall initial alignment alternatives map for the Wekiva Parkway projects. However, please keep in mind this is the overall map, and not all items that fit each category are designated here otherwise it would become too difficult to read). Please be aware that there are layers to this map for each designation that does have all of the members or locations of each group denoted.There will not be "property acquisition for the alternate routes," as you mention in your email below. Right of Way acquisition would not occur until the PD&E Study is completed in early 2007 and an alternative has been selected, and some time after we have begun final design. Please be advised that there is no funding currently for Right of Way Acquisition or construction for this project, though we are obviously pursuing funding opportunities. Right of Way Acquisition usually begins around 2-3 years before construction, and this project is not expected to get under construction -- unless a major funding source is found sooner -- until perhaps 2012-2015 at the earliest.I hope that helps Please feel free to call or email with other questions or concerns. I hope we get to meet at the public workshop.--230 p.m.
11/2/2005	11:25 AM	Curtis Reddecliff/Chair of LakeSide Fellowship UMCemailed PIO, copied Pastor Bob Martin: "Mary,On the north end, the orange alternate route for the Wekiva Parkway comes across our multi-million dollar facility, LakeSide Fellowship United Methodist Church and Preschool on SE corner of Wayside and County 431. Why are we not denoted as a Community Facility Site?The smaller Paola Woods to the North and the Academy of Learning to our South are both denoted as Community Facility Site's? Looking at the schedule when would property acquisition for the alternate routes occur? After the public hearing Dec '06 or later? Thanks for the info,Curtis ReddecliffChair of LakeSide Fellowship UMC305 S. Orange Blvd.Sanford, FL 32771"
1/20/2005	10:48 AM	PIO responded to Curtis Reddecliff/Lakeside Fellowship, copied Pastor Bob Martin and Admin. Brenda Beaver: "Hello Curtis, Thanks for getting back to me. I've added you to the update list, and we'll get in touch with you in the future re: planning public meetings. The first public involvement meeting to review initial alignment alternatives will likely be in November 2005. FYI, we will also be sending out newsletters with project info throughout the PD&E Study. I look forward to meeting you at some point. Please call or email with questions or concerns."
1/18/2005	3:06 PM	PIO received email response from Lakeside Fellowship UMC re: project: "Mary, We are very interested, along with the local community, on the Wekiva Parkway plans. Can you please add me to your email list: curtis@reddecliff.com for the Wekiva Parkway? I am the Lakeside Fellowship UMC Management Committee Chair and we would definitely be willing to work with you on hosting future meetings for our church and the local community. Thanks,Curtis Reddecliff.407-328-0879"
1/18/2005	3:06 PM	PIO received email response from Lakeside Fellowship UMC re: project: "Mary, We are very interested, along with the local community, on the Wekiva Parkway plans.  Subject: SR 429-Wekiva Parkway Projects - Project Contact & Presentations  
 Greetings and Happy New Year! As the public information officer for the Expressway Authority and FDOT's State Road 429 Wekiva Parkway projects, I wanted to introduce myself and to let you know that I am available to answer questions about these projects, as well as to provide project presentations at church board and other meetings. We began the Project Development and Environmental (PD&E) Study for these projects at the beginning of this month, and the study process should take 2-3 years. We anticipate having some initial alternative alignments for public review and meetings by late summer or fall of this year. The PD&E Study, once completed, will result in a preferred alternative alignment, and we'll be better able to answer property owners' questions at that time. With 2-3 years also expected for each of the subsequent phases (final design, Right of Way Acquisition and construction), we are not expecting to break ground on these projects until perhaps 2010-2013. That's the typical schedule. Please keep in mind that any or all of those phases could wind up taking more or less time than expected. Part of this road will likely be an at-grade arterial, and other parts will likely be a raised toll road. The PD&E Study will determine this configuration, as well as the location of any on- and off-ramps. Please feel free to call or email with other questions, or to discuss a meeting presentation. Also, I've added you to the project database so that you'll receive meeting notices and project updates."

11/10/2005 12:00 PM Public Meeting Comment Form 11/10/05:Dr. Patricia Martin31436 Soaring Hawk LaneSorrento, FL 32776The Parkway should follow, east / west as close to Hwy 46 as possible to minimize the impact on wildlife and existing homes. The new Hwy 46-A should be further east concluding east of Camp Challenge to move away from wildlife and bear crossings. Heavy tree and foliage s/b planted ASAP to provide sound barrier for wildlife and residents, and property s/b restricted from this moment forward from land clearing and tree cutting that means no permits from now on. I livw ½ mile south of Hwy 46 in the Wekiva River Basin. Since the bridge was rebuilt and with new neighbors legally and illegally cutting trees and clearing land, we have to been greatly impacted by highway noise. (we've reported the neighbors illegal actions with no satisfactory out come.) The noise disturbs our sleep. It can easily be concluded that we'll have enormous increase in noise with the construction, over how long of a period of time? Ultimately the traffic.It is not clear at all in tonight's presentation just where and it's anticipated how I ( and all others remaining) will be able to access my home, once this has been built. How is this road expected to impact property values? Who's addressed this? I'd like to see the report.

11/9/2005 7:40 PM Court Reporter Comments:11/09/05Phillip M. Martin7050 Tallow Tree RoadSanford, FL 32771(407) 323-2232Representing SelfDate: 11/09/05Mr. Martin Phillip: Okay. All I want to say is, that I think everything they are doing to extend 417 and 46 is totally ridiculous. At one time it was proposed to go-to extend 417 out the old railroad right-of-way, and that would make more sense. Even though it would cross the Wekiva in a different place, it would affect both counties much less, and it should go out the old railroad right-of-way.

11/9/2005 3:25 PM Attended Public Meeting, 11/09/05

11/9/2005 9:09 AM Public Meeting Comment Form 11/09/05: Phillip: I think if an extension to 417 is made it should follow the old rail road right-of-way and stay away from SR 46.

11/9/2005 9:08 AM Public Meeting Comment Form 11/09/05: Jan: At one time several years ago, it was suggested that route form I-4 in Seminole County should follow the old rail road right-of-way south of SR 46. I think this is a more viable less disruptive route. Thank you.

4/18/2005 2:41 PM Jan Martin responded to PIO email: "mary, thank you so very much."

4/18/2005 1:46 PM PIO responded to Jan Martin shazzbru@cfl.rr.com email: "I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the first half of May. We're in the data gathering process now, and

are shooting for the first public involvement meeting for these projects in November 2005 to review the initial alternative alignments, and you'll also receive that meeting notice."

4/16/2005	12:12 PM	Jan Martin shazzbru@cfl.rr.com emailed: "please add us to the mailing list to receive the referenced Wekiva parkway newsletter and other information.thank you for your time and attention,Phillip M. & Janice B. Martin7050 tallow tree roadSanford, fl 32771"

Date Time Regarding  
3/9/2005 10:09 AM Worked on conceptual request for Ronnie Matejka and sent as requested.

3/7/2005 3:57 PM PIO returned call to Ronnie 352-735-0198 got a letter from a lawyer wanting to represent us if they try to take our property for this. They sent us a map showing right where we would be, we're. I was kind of curious. We've been thinking about moving when my husband retires, it puts a damper on things. Please send me a bigger, larger map. What he's showing me here. It shows coming from above Mt. Dora down 441, it looks like I'm right in the area. There's a RR track right behind my house. I've got 3 acres. You can't see my house from the road; we're down in a little valley almost. We're just concerned about it. It's put us in limbo. PIO noted just started PD&E, gave overall project timeline, offered to email general info and time which some Moron2729@netzero.com or .net, she wasn't sure. Matejka 21731 3rd Ave., Mt. Dora, 32757 property address PIO noted she'd get the newsletter, now in the works, and that we're shooting for late this year, November, for first public meeting to look at initial alignment. She said thank you very much for info and calling me back.

3/7/2005 3:33 PM Ronnie Matejka left MSG I'm calling re: Wekiva Parkway and S.R. 46 bypass corridor. I would like a better map showing exactly where all this is going to take place. I got a letter from a lawyer showing I'm in the light blue section of it. I'm off 46 and Round Lake Road. I'd like a b/w map if poss. Call me back 352-735-0198. Thank you.

11/14/2005 7:50 AM Jerry McCollum/SC County Engineer 407-665-5651 left MSG I saw you on TV this weekend Regarding the meeting on the Wekiva Parkway from 5-8, what's the format? Will there be

a formal presentation with questions and answers? I need to decide how long to be there. Give me a buzz and if no one answers just leave me a MSG. see you tonight.

7/28/2005	4:12 PM	PIO resent The Glades HOA email to Jerry McCollum: "Jerry,Didn't realize the other email address no longer worked. Please note the SC meeting presentation below."
7/26/2005	11:26 AM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Tuesday, July 26, 2005 11:32 AM To: 'Jmccollum@co.seminole.fl.us.com' Cc: 'Mark.Callahan@CH2M.com'; 'David Lewis2@CH2M.com'; 'Brian.Manwaring@CH2M.com'; 'tom.percival@dot.state.fl.us'; Gary Skaff (GJSkaff@pbsj.com); Joe Berenis - OCEA (jberenis@oocea.com) Subject: SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study - The Glades at Sylvan Lake HOA meeting Hello Jerry,As requested, I'm alerting you to a request from the The Glades on Sylvan Lake HOA for me to do a Wekiva Parkway presentation at their annual meeting on Aug. 18 at 7 p.m. The meeting will be at the Seminole Soccer Complex. My presentation will consist of an update on the PD&E Study, as well as focusing on the study and overall project schedules. I expect that most of the questions will revolve around "Where is the road going? Will my property be affected?" Questions which, obviously at this time, we can't answer. But I can educate folks about the process, meeting schedule, etc. I plan to provide copies of the project update and my business cards, as well as have a mounted revised study area map on display. If you have any questions, or need further information, please don't hesitate to contact me. As always, it's a pleasure working with you.
6/3/2005	10:30 AM	During PAG meeting, Lake County and Seminole County said they want to be informed before we do meetings and presentations in their communities so they can give heads up to elected officials. Jerry McCollum would be Seminole contact, and Jim Stivender/Director Lake County Public Works. Renzo is contact for Orange County

Notes

J. Wilson McDowell

Colliers Arnold

Date Time Regarding  
8/2/2005 1:28 PM PIO responded to Wilson McDowell/Colliers Arnold: "Wilson,The PD&E Study is schedule to finish by spring 2007, at which time we'll have a preferred and approved alignment. From there the project goes into final design, permitting and Right of Way Acquisition. It's estimated to be 2010-2012 before construction would begin on this project. With a project of this size, the 25 miles will likely be done in segments, with each section typically taking about two years to complete.I hope that helps."

8/2/2005 1:11 PM Wilson McDowell/Colliers Arnold responded to PIO email: "Thank you very much for your information. Please put me on your newsletters, notices list. What is the time table for this expansion?Wilson"

8/2/2005 12:48 PM PIO responded to Wilson McDowell/Colliers Arnold: "Hello Wilson,I also received your voicemail message. We are wrapping up the first round of data gathering for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study, and are in the process of beginning to draw up some initial alternative alignments that we hope to have ready for review at public meetings in November 2005.The committees that approved this project and contributed to passage of the Wekiva Parkway & Protection Act recommended interchange locations in the following areas: a. At US 441 where the planned SR 414/429 is expected to end near CR 437.b. Between US 441 and SR 46. (This could potentially, but not necessarily, be between Ponkan and Kelly Park roads.)c. SR 46 near the area where CR 46A should be relocated. (CR 46A is to be realigned north of SR 46 as part of this project to create more of a plus "+" intersection, as opposed to the current skewed connection.)d. Interstate 4 in Seminole County between the St. John's River Bridge and the SR 417 interchange on I-4.Obviously these recommendations are very general in nature, and the location of proposed interchanges is still being examined as part of this study. As we get further into the development of the initial alignment alternatives, we should have some better info on proposed interchange locations. If you like, I can add you to the project database so that you will receive newsletters, meeting notices and other project info. Let me know. And keep checking the website, www.oocaa.com as well because we'll be posting new info there periodically.That's where things stand at this point. Please call or email with other questions or concerns."--1258 p.m.

8/2/2005 12:11 PM J. Wilson McDowell/Industrial Specialist/Colliers Arnold emailed: "Ms. Brooks,I was wondering if you knew the proposed exits for the Wekiva Parkway Corridor, especially if there is an exit proposed for Mt. Plymouth Rd. Please give me a call or email me whenever you get a chance. Thank you.Wilson McDowellwmcdowell@colliersarnold.comJ. Date	Time	Regarding
12/5/2005	12:04 PM	PIO mailed requested sheets 5A, 5C, 5D
11/18/2005	11:34 AM	PIO returned call to Deborah Keeter/PBSJ ROW, who asked why Mary McKeever was calling her? PIO noted she had specific questions about the ROW process, current market value vs. ??? Said she had several clients whose properties might be affected by alignments and wanted to advise them. Deborah said okay and she'd get back with her.
11/18/2005	11:32 AM	Deborah Keeter/PBSJ ROW left MSG please give me a call 407-806-4183 thank you.
11/18/2005	9:48 AM	PIO returned call to Mary McKeever/Keller Realty 321-231-4248 referred her to Deborah Keeter/PBSJ ROW for ROW questions, and gave general FDOT number for their ROW folks 1800-780-7102. She asked for large maps. PIO noted info on website. She said she tried to print a certain area, south part, but kept getting whole thing. PIO noted camera on tool bar allows you to select section and can print from there. She said she'd try that. She said they need to put a big map of the area up in my office of all three routes. We need to advise our clients on if they're buying something in the future. PIO noted we don't have stores of the large maps, but I have 11x17s I could send her, or she can download the files and have large maps at Kinko's. PIO noted I do that frequently without a problem. She said she'd try that. PIO said if any problems with it let me know, but there shouldn't be.Have 4 acres on wayside drive, won't affect my property unless choose alternate down 46, I'm on pond. Other than ... have 2-3 clients that it will come right through their property. Big concern. Talking to friend of mine, lies on orange, will come right behind his property. Neighbor Jim Campesi owns 24 acres and will come through back of his property / question is I've looked at the e3 alternate routes, was it ever considered to have an interchange on international drive. If could parallel either over it or next to International Parkway, and tie in to 46, there's no congestion now at 46 and International Parkway would be less impact. Understand ... for how much property they need to take there could still be plenty of commercial development on both sides of the parkway. People are going to have to listen to this, they spent \$250k per acre, and if they don't take land will have to

listen to the traffic next to them. I have major traffic in front of me. As a homeowner if you take it down 46 it's going to impact my backyard, and if take it down front yard will impact me and neighbor's yard. To make least impact to residents and taxpayers should parallel to international parkway, I know there's a PUD planned. But on east side closest to i4 there is lot of vacant land, would be least of PIO noted will be doing noise study as part of PD&E, federal criteria that have to be met including density and proximity, FYI. I realize with growth it's got to happen. So wants the tax dollars, we do need the commercial business, there's plenty of other places to put the commercial corridor. Everybody I have talked to wants to know why it can't go parallel to international Parkway. Nothing developed on the 4 corners right now. Would cost the least amount of money for road construction, you may have to buy some high end real estate, but you're not going to affect the taxpayers either. If I need to get a petition signed, you're talking about 2-3 small communities, these people have spent a lot of money. I'm on a mission. This is my way of life. The whole reshuffling with schools has been very painful for a lot of parents, have had to relocate themselves. PIO suggested she download and fill out comment form with her suggestion. She said she was at the meeting the other night and spoke with me and did a form, but will get a petition with 3-4000 people supporting this, will go door to door if need be. She noted Gino Palucci owns all the land east of international parkway. There's plenty of undeveloped land you could take without impacting the homeowners. PIO noted we're analyzing input now and in next few weeks to begin working down to the more viable alternatives, so if she's going to submit something, sooner is much better than later. She asked when we would begin to acquire property. PIO went over study and overall project schedule and funding status. If money available, typically could be looking at acquisition 2009-2010, but there's a lot of if's that have to fall into place for that to happen.--1014 a.m.

11/17/2005	9:42 AM	Mary McKeaver/Keller Williams Realty left MSG I have few clients in the directed alternative path of Wekiva Parkway. Need to discuss the route with you. Need to see copy of law that states how the county acquires the property, at what value? Whether it's market value, current market value, or private appraisers, public appraisers appraise it? I Have 3 clients in path of each one of these 3 projected paths. Call me back 321- 231-4248 I ordered 3 maps and was wondering how long it was going to take to get those maps. I need to update my office. We have 100 agents and need to bring them up to speed on the alternative routes so we can advise potential clients. Thank you so much.

11/7/2005	1:40 PM	PIO called back Rod McKee in Ocoee 407-292-2586, 407-797-7497, left detailed MSG distinguishing between the meeting tonight by WRBC and Wekiva Parkway meetings on 9, 10 and 14. PIO left MSG in case he had other questions.
11/7/2005	11:39 AM	Rod McKee in Ocoee 407-292-2586, 407-797-7497 left MSG I see there's a meeting tonight at Apopka high school, WPPA public meeting. Is that the same as in your 429 update showing Nov. 9 5-8 p.m. at Apopka High school, same location. Are there two meetings or just one? Let me know - thank you.

Contact Notes		Carole McLain
Date	Time	Regarding
11/3/2005	3:17 PM	PIO called Carole McLain 352-383-1152 to relay info from CH2M Hill (The gold/yellow

option clips the SW corner of her property. It is the northern most option, and the only one that directly impacts her.) left detailed MSG, including that we're very early in the process, alignments will be falling on and off the study map as we proceed, get input from governments and members of the public such as yourself. Invited her to stay in touch, attend the meetings, and if she has other questions to give me a call, left my number.

11/2/2005	2:05 PM	PIO emailed Dave and Brian/CH2M Hill: "Among the many calls from the mailing is one from Carole McLain of 30447 Swan Road, (at the southern end of Swan Road) who saw the initial alternatives map but can't figure out where Swan Road is and whether one of the alternatives hits her property. The Lake County Property Appraiser site doesn't show parcels like Orange and Seminole, and our map doesn't show Swan Road, so I wasn't able to answer this for her. Can one of you tell whether an alignment (maybe the blue one?) hits this property? Let me know so I can get back to them. Thanks."
11/2/2005	1:40 PM	PIO called back Helen to relay difficulty, noted in estimating where they were it appears they're at edge of study area. She said thinks so also but can't be sure of that or if the line hits them or not. PIO said would forward query to one of the engineers to see if they can figure out where they are with respect to the study area and get back to them. PIO noted may take a couple of days. Helen said they need that info.
11/2/2005	1:30 PM	PIO called back Helen and Carole to get parcel ID number, 36-19-27-000200002700, which did bring up property records. But when I asked to view map of property, got MSG info layer not available and the property appraiser is working to get the parcel layer added to system.
11/2/2005	12:42 PM	PIO returned call to Helen Brice calling for Carole McLain MSG 352-383-1152 30447 Swan Road, Sorrento 32776. got a map in the mail but it's too small, Swan Road isn't even on there. She said she spoke to someone else previously who was supposed to be looking into it, maybe Phyllis? PIO pulled up the initials map, found area of 46 between Round Lake Road and 437 that she mentioned but couldn't tell where their parcel was. PIO said would search for their parcel and compare to the initials map. She said she's leaving but her sister who owns the property would be there. PIO continued trying to locate the McLain property using Lake County property appraiser site. Wouldn't take it through normal search, but did find location on GIS map. But doesn't give actual parcels to be able to compare to study map.
11/2/2005	10:46 AM	Carole McLain left MSG we're trying to figure out if our house is in the line of fire under the blue. The map is so tiny it's hard to tell. So if you could call me back 352-383-1152

Regarding

PIO returned call to Tom 352-383-0808, noted address was in the study area but listed under different name. he said Steve McLellan was sitting there with him. Tom said he wants to know if our lot is slated for eminent domain? PIO noted it's much too early in the process for that at this point, just in the data gathering phase, surveyors and geotech in the field, don't have an alignment yet. PIO noted hope to finish data gathering in the next month or so and start drawing some alternative alignments for public meeting in November. HE asked for date of that meeting? PIO noted not set yet, but when we get closer will send out meeting notices with date and location, etc., maybe a month or couple weeks beforehand. He asked to be on the list for the meeting notice: last name Stacy,

send it to the 22444 address, ZIP is 32776. he said they just got the newsletter and that's why I'm calling. Is there anything else I should know? PIO went over project timeline, reiterated we're early in the development process. He was thankful fro the info.--1206 p.m.

6/8/2005	11:52 AM	PIO checked if Tom ?? 22444 Coronado-Somerset Drive, Sorrento was in the study area. Property comes up under MC LELLAN STEPHEN in Lake County.
6/8/2005	9:46 AM	Tom left MSG calling about S.R. 46 bypass. looks as if our property is in the blue line where the existing 46 bypass is going to take place. 22444 Coronado-Somerset Drive, Sorrento. Call me and let me know if we are in the proposed construction zone and what I can do to affect the public hearings to get us out of that zone. 352-383-0808, 0738 thanks Mary, bye.

This should be sufficient and we believe that it will serve the same purpose. Thank you for your offer though and please do include us in any future news as we are a very large community here and want to stay abreast of things.Thank you again,Karen McMican, Park Manager
9/14/2005	12:55 PM	PIO emailed Karen McMican/Zellwood Station: "Hello Karen,It looks like our public meetings for the Wekiva Parkway Projects will be as follows: Seminole County: Sanford Civic Center Monday, November 14, 2005 5:30 PM-8:30 PM.Lake County: Mount Dora M.S. Thursday, November 10, 2005 5:30 PM-8:30 PM.Orange County: Apopka H.S. Wednesday, November 09, 2005 5:30 PM-8:30 PM.Given that, let me know what date you want us to give your HOA a presentation. Preferably not the same week we already have night meetings scheduled, if at all possible. Let me know - thanks."
9/3/2005	9:45 PM	Karen McMican/Zellwood Station responded to PIO email: "That's fine Mary, I'll be back in touch with you then. Appreciate it.Karen McMican, Park ManagerZellwood Station, Co-op"
9/1/2005	3:13 PM	PIO responded to Karen/Zellwood Station: "Karen,We definitely want to work with you, but the weeks of Nov. 7 and Nov. 14 are in flux until we can nail down sites and dates for the full-scale public meetings in each county. We hope to have those locations and dates nailed down by the end of next week. Why don't you touch base with me on or about Sept 7 to see what remaining dates might be available in early November?"
9/1/2005	2:56 PM	From: Karen McMican [mailto:KMcMican@zellwoodstation.net] Sent: Thursday, September 01, 2005 2:56 PMTo: mbrookssr414@cfl.rr.comSubject: RE: Wekiva Parkway ProjectMary: Would you be able

to do a meeting here on November 7th at 6:30? Let me know okay. Thank you  
Karen McMican, Park ManagerZellwood Station

8/30/2005 9:15 AM PIO responded to Karen/Zellwood Station: "We are trying to schedule the three public meetings (one in each county) the week of Nov. 7 and/or Nov. 14. Perhaps if you don't want a presentation in September or early October, we should wait until we have the public meetings scheduled and decide on a Zellwood presentation date after that? We hope to have those meeting dates nailed down within the next week or two. How about you touch base back with me on Sept. 7. Or if you decide you do want an earlier presentation, let me know."

8/29/2005 3:34 PM Karen/Zellwood Station responded to PIO email: "Sorry, your right! How about November 7th?"

8/29/2005 3:25 PM From: Karen McMican [mailto:KMcMican@zellwoodstation.net] Sent: Monday, August 29, 2005 3:25 PMTo: mbrookssr414@cfl.rr.comSubject: RE: Wekiva Parkway ProjectHi Mary: How about October 24th? It's a Monday evening and we like to have them at 7:00 pm so everyone who works can be home in time to come. Check your calendar and let me know if this is convenient for you.Karen328 p.m. PIO responded to Karen/Zellwood Station HOA: "Sorry, as noted below Oct. 17th or 18th, and 23-30 are out."

8/29/2005 3:20 PM PIO emailed Brian and Dave/CH2M Hill that Zellwood Station HOA expressed interest in a presentation pursuant to the HOA letter and was getting back to me on a date, FYI.

8/29/2005 3:15 PM PIO responded to Karen McMican/Zellwood Station HOA: "Hello Karen,I am available to present at your HOA meeting most evenings in September or some evenings in October NOT the 17th or 18th, and NOT 23-30). If you want a presentation in September, it will be fairly general, sort of where we are and what we're working on. If you wait until October, we could actually have some initial alignment alternatives to share with your homeowners. Either way, we're willing to come visit your association. If you want a general presentation earlier, we also could come back later (after the November meetings) and do something on the initial alignment alternatives. Or you may just wish to encourage your membership to attend the public involvement meeting, it's up to you.Let me know your preference and we'll work something out."

8/29/2005 10:35 AM From: Karen McMican [mailto:KMcMican@zellwoodstation.net] Sent: Monday, August 29, 2005 10:35 AMTo: mbrookssr414@cfl.rr.comSubject: Wekiva Parkway ProjectHi Mary: I am in receipt of your letter dated August 24, 2005 where you have indicated you would like to make a presentation at our next gathering. In the body of your letter you also stated that you will have public meetings scheduled for November. In reading this, would you like to come before November or after?We would love to have you come and make a presentation here at Zellwood Station but what I need from you is the month that would be best for you. I'll check my calendar and then schedule it so that I can inform the residence so that we have a good turn out. Please let me know as soon as possible so that I can schedule it.Regards Karen McMican, Park ManagerZellwood Station407-886-0000 ext 29"

Jennifer D. McMurtray8175 Imber StreetOrlando, FL 3282512/23/05Please see attached letter.Bottom Line: OCEA needs to implement the Wekiva Parkway Plan, design the road according to guidance from the 2 task forces and legislation (1 road combined with SR 46, minimizing impacts to state lands, following SR 46's footprint as much as possible and elevated through conservation lands, and buy all the parcels listed in the legislation Attached Letter:Re: Wekiva Parkway PD&E Study Proposed Alignment and Interchange: Why isn't OCEA Implementing the Wekiva Parkway Plan?I have reviewed your proposed alignments and interchange for the Wekiva Parkway and feel alarmed and disappointed by how far you have strayed from the Wekiva Parkway Plan. You have moved the interchange to the center of the wildlife corridor, sandwiched between publicly owned conservation lands, which will concentrate traffic in the very place we are trying to reduce wildlife / vehicle collisions and restore habitat connectivity. This new interchange location

means that the road must stay on the ground through the heart of the wildlife corridor, which is the most critical area for elevation. Your eastern alignments are too close to Rock Springs Run State Reserve, and do not follow the footprint of SR 46 closely enough. The plans sacrifice too much of existing state conservation lands and make inadequate use of distributed private lands nearby. This isn't the plan to which we all agreed. The Wekiva River Basin has a lot of environmental problems. The only reason a reasonable person could consider building an expressway through this fragile environmental area is because it presents opportunity to improve conditions and fix some of the existing problems, but only if the road is built correctly (and combined with land acquisition, water resource planning, and other actions). For example, State Road 46 was identified by the Florida Fish and Wildlife Conservation Commission as the deadliest road in Florida for the Florida black bear because of the high vehicle / bear collision rate. Existing SR 46 serves an important wild life corridor. The new expressway offers opportunity to improve conditions by combining SR 46 and the new road and offers the opportunity to improve conditions by combining SR 46 and the new road and elevating them through the heart of the wildlife corridor (about 6 miles wide) so that wildlife can move freely through the landscape. That was the Wekiva Plan. But the plans you presented in the public hearings substantially worsens conditions for wildlife by adding a new, high speed, high-intensity road on the ground at the state's wildlife worst place for bear mortality. Your plans not only prevent elevation of the road where it is needed most, but also will reduce the ability to properly manage existing conservation lands by limiting the use of fire to avoid smoking out the interchange. Your plans pull traffic into the very place from which it needs to be removed or mitigated through elevation). Instead of solving environmental problems, you will make them significantly worse. Your current plans are essentially the Western Beltway Part B, minus the second crossing of the Wekiva River. There's nothing innovative or context sensitive in the current plans, and it does not represent a good-faith execution of the Wekiva Parkway and Protection Act. I recommend that you review the final products of the Governor's two task forces and the legislation, and revise or remove everything that is not consistent with that guidance. Remember that we are looking for one road, combined with SR 46 and elevated through conservation lands, following the footprint of SR 46 to the greatest extent possible, with an interchange west of existing state lands. The road should be located as far from existing state lands as possible. The other parts of the Wekiva Parkway package must be implemented too. ALL of the lands identified in the legislation must be purchased. The scrub parcel would be an excellent addition, but not an acceptable substitution for any of the named parcels in the legislation, especially since you are planning to build another road through it that will compromise its ecological value as scrub habitat. Allowing partial development on any of the named parcels in the legislation also will be unacceptable, even though your easternmost alignments have now fueled the speculative dreams of the landowners. Since the Florida Forever program appears to have insufficient funds to purchase all of the land, I suggest that OCEA quickly find a sponsor for legislation to fund the purchase of the Wekiva Parkway parcels and the remaining private lands in the Wekiva - Ocala Greenway Project. If conventional methods won't work find another way to buy the land. The road project will not be possible without fully executing the land acquisition component of the plan. Senator Constantine has said many times that the road will not be built if the land is not bought. The public expects the Senator and your agency to make that statement be true. The Wekiva Parkway Plan was a package deal, and if all of the package's parts cannot be delivered, then you longer have consensus that this road should be built. If OCEA is serious about building the Wekiva Parkway, then let's do it correctly and quickly, according to the plans forged by the Task Forces and the legislation. If you plan on building the Western Beltway Part B likely would cost even more when you factor in many years of delay due to opposition of a flawed plan potential lawsuits, and massive loss of good will and public support for OCEA. The least expensive way to build the road is to do it correctly and to do it now. The public is trusting OCEA to deliver the Wekiva Parkway. I hope you will be back on track with the true Wekiva Parkway plan by your next set of public hearings. Sincerely, Jennifer McMurtray

Date	Time	Regarding
3/8/2005	4:30 PM	PIO received email that Dawn made website link clarification as requested re: conservation land acquisition graphic.
3/4/2005	11:02 AM	PIO emailed Dawn, copied Bryan re: land acquisition graphic confusion: "Hey Dawn,I got an email from someone confused about the conservation land acquisition graphic we posted linked from the Wekiva Parkway page. He thought that's where the road was going To avoid such confusion in the future, can we change the website link to read "Proposed Conservation Land Acquisition" so people don't think that property is being acquired for road Right of Way? Let me know - thanks! "
3/4/2005	10:43 AM	Philip McNamara responded: "Mary, Thank you for your help. Here is my information,Philip McNamara 35100 Nashua Blvd. Sorrento, Florida 32776407-948-8765Please add me to your list. Thanks, again. Sincerely, Philip McNamara."
3/4/2005	10:33 AM	PIO responded to Philip McNamara re: conservation land acquisitions: "Hello Philip,The Wekiva River Basin Coordinating Committee recommended, and the Wekiva Parkway & Protection Act mandates, that as part of developing this transportation project that certain parcels be acquired for conservation in this very environmentally sensitive area. Those four parcels include the Seminole Woods property indicated. This acquisition is separate from the typical Right of Way Acquisition that normally occurs along the corridor for such road projects. In addition to the conservation land acquisition, there are other guidelines that this project must follow with regard to potentially going through an environmentally sensitive area.There is no alignment yet for the S.R. 429-Wekiva Parkway or S.R. 46 Bypass, only the study area corridor that you see on the website. We just started the Project Development & Environment (PD&E) Study on Jan. 19. That is expected to finish around early 2007 and at that time we will have a preliminary alignment. We hope to have some initial alignment alternatives for review at public involvement meetings at the end of the year, possibly in November.If you will forward your mailing address and phone number, I'll add you to the project database so you'll receive newsletters, meeting notices, etc."
3/3/2005	6:32 PM	Philip McNamara Philip@COSYS.NET emailed re: Wekiva Land Acquisitions: "Ms. Brooks,I have looked at the PDF on your website of the "Proposed Land Acquisitions". I see you plan on purchasing land along the proposed route. Could you please answer a question or two for me.Is the Seminole Woods land part of the proposed route? If not, what is the

reason or need to purchase Seminole Woods land?Thanks you for time and efforts  
Sincerely,Philip McNamara"

Date	Time	Regarding
11/14/2005	12:17 PM	Comment Form:Clotilde Medina6912 Outlaw Court # 624Orlando, FL 32818A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3)

Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	4:41 PM	Rex and Kathy Mehr 5443 Maple Ridge Court Lake Forest, FL 32771-7178 We live in Lake Forest a community just off of Highway 46 and about a mile west of I-4. We travel this everyday. With all the building of new homes, condos, townhomes and apartments in the area traffic congestion in the area has increased tremendously and construction still greatly in progress. This has put a great burden on highway 46 Business and Residential travel especially around the highway 46 and I-4 intersection. We hope you will not consider the highway 46 exchange as an alternative route for the Wekiva Parkway through I-4 instead connect the Wekiva Parkway to the existing 417 Expressway. This is the most logical route and will keep east-west traffic off I-4 and highway 46. Thank you for your consideration.

Notes			
Date	Time	Regarding	
11/10/2005	9:20 AM	Attended Public Meeting, 11/14/05	
6/27/2005	9:45 AM	<p>PIO returned Wally Melitshka's (CQ) call. He said we got a couple letters and talked to people in subdivision about the widening of 46 and extension of 429. I was trying to see if there was more of a timeline so we would know exactly when they would be doing that, purchasing land, so we know what's going to happen to our property. PIO noted don't have an alignment, finishing data gathering now and hope to start drawing up initial alternative alignments in July, to be ready for review and comment at public meetings in November. From there we'll whittle down to the viable alternatives. Noted PD&amp;E to finish and have preferred alignment in early 2007. He asked if everything was settled in 2007, if our house is affected when would we expect them to start purchasing land or doing the widening? PIO noted we'd still have to do final design, which would fine tune the parcels affected, takes 1-2 years, once that's far enough along they'd start acquiring properties. PIO noted not looking to start construction until 2009-2010, so we're fairly early in the process. PIO asked if he received the recent project newsletter? He said he got the one in March (Maitland Boulevard Extension) and one recently. PIO said just wanted to confirm he's on the mailing list so he'll get the meeting notices, etc. He said oh, so that's going to come in the mail also? PIO said that's correct. PIO asked and he confirmed he'd seen the study area map and they are in the study area. He said thanks for calling back. PIO noted sorry we don't have more detailed answers for him yet, but will keep him informed. He said thanks again for calling back.</p>	
6/27/2005	9:14 AM	<p>Wally Melitshka left MSG we live at 225 Woods Trail off 46 and Wayside Woods. I was wanting to get some info about the extension and widening of 46. Call on cell 407-383-1378.</p>	
Contact		Gary Mellen	
Notes			
Date	Time	Regarding	
12/21/2005	3:40 PM	<p>PIO returned Gary Mellen's call, relayed that SCEA voted to remove yellow alternative from consideration, and also asked that we look at alternative from 46 down International Parkway to 417. He said that's great news. He asked had the minutes been posted from that meeting? PIO noted we don't do minutes; there are so many of these meetings. He asked if website had been updated to reflect change? PIO noted no, these changes are ongoing and we can't change the maps every time a local government makes a move. PIO noted we'll be updating the maps in a couple of months. He asked for confirmation this was for sure? PIO noted SCEA has to approve any alignment in SC, and they unanimously voted yesterday to remove the yellow option from consideration. He asked why? PIO noted residents affected by alignment attended meeting and had contacted commissioners. The route also was the longest, had most residential, wetland, floodplain impacts, and could only do partial IC at I-4 and 17-92 due to the river constraints. He said he understood and that's great news and thanks for the update. PIO said I'd gotten his MSG's yesterday but was in meetings all day and just got out of another one. PIO said I'll always call him back, though maybe not right away, and he's welcome to get back with me anytime. He said he understood I was busy and thanks for the info.--348 p.m.</p>	
12/21/2005	2:52 PM	<p>Gary Mellon 407-741-5138 left MSG unable to attend meeting yesterday and wanted to</p>	

know what the conclusions were, if they're going to go with a certain route? I'll check out the website and see what I can find. Give me a call.

12/20/2005	9:56 AM	Gary Mellon left MSG thanks for your return MSG. I'm probably not going to be able to go to the meeting because we have too many people off from work. Wanted to find out if this meeting was important as far as input on the decision or has the decision already been made. If I could find out later what went on by calling you. 407-321-4848, or 407-741-5138 work after 3.
12/19/2005	5:22 PM	PIO called Gary Mellon's other number 4077415138 to leave info on tomorrow's meeting, left MSG with SCEA , left MSG.
12/19/2005	1:15 PM	PIO returned call to Gary Mellon, left MSG with details of tomorrow's SCEA meeting and project update.
12/19/2005	11:39 AM	Gary Mellon MSG talked with you recently. Understand meeting tomorrow the 20th in, need to know where it is and what time. 4073214848 h, 4077415138 after 3, please MSG about time and location.
12/2/2005	9:26 AM	PIO returned Gary Mellon's call, let him know noting is set in stone. All three alternatives being reviewed for engineering sense, minimizing impact and a host of other criteria. PIO said I advise him to get his comment form in ASAP so it can become part of the project record. PIO noted we're reviewing and analyzing couple hundred comment forms now from recent meetings. We went over pros and cons of the various alterative connections to I-4 in detail. He said the north/yellow route would nick the corner of his property. If that was chosen, would they take his whole property? PIO noted depends on how much is needed, if the owner wants to stay, etc. PIO noted we try not to leave unusable remnants. He asked when ROW would be taken? PIO gave sketched and noted funding status, heavily dependent on funding, it's a billion dollar project now and costs only expected to go up, will take some time to come up with that kind of money. He asked if it'd be state funding? PIO said state and federal funding being sought. He asked for ballpark on property acquisition? PIO said if funding falls in place, the earliest I've heard mentioned is 2009-2010, but a lot has to fall into place between now and then. PIO noted we first have to get into final design so we start developing some details and know exactly what we need re: land.He asked if the 3 alternatives were the only choices? PIO noted he could request that we look at shifting a particular alternative and state why that would be advantageous. PIO reiterated public support matters but also have to make engineering sense, cost, environmental and other criteria. He asked if we took part of his property , could he get the rest rezoned commercial? PIO noted he'd have to check with local officials. I don't deal with local zoning and couldn't begin to guess their regulations.PIO asked if he needed a form, if so they're posted on website. He said someone gave him one He'll do it and fax today or by Monday.--943 a.m.
12/2/2005	9:23 AM	Gary Mellon left MSG 407-321-4848, returning my call. Noting he didn't leave me his office number but he should be home most of this morning. He said his main question is on the northern route, is it written in stone or is it still under consideration? Or is it very unlikely path? What are the chances of that? What is the future going to hold as far as timeframe. I've already been through one road project. I know it takes a long time but I just need to know what the idea is.
12/1/2005	3:25 PM	PIO returned call to Gary Mellon 407-321-4848, left MSG for him to return my call, also gave my email address and website address and text links to the public meeting maps.
12/1/2005	9:51 AM	Gary Mellon 407-321-4848 left MSG please give me a call I have some questions about the Wekiva expressway. Thanks
11/14/2005	3:38 PM	Gary Mellen5395 Ohio AveSanford, FL 32771When I received the news that our property was in the path of one expressway options I was very upset, because I knew what was coming for the future. I lived through the property acquisition, demolition, and road

construction, and it was grueling. In the end, what I received in the deal was much greater road noise (the frontage houses were removed) lessened property value and decreased privacy. In this instance, if the plan remains as stated, and if I don't lose my property, I again will experience the agony of years of construction, loss of property value, and in the end, again live next to a busy highway, which I escaped 5 years ago. Even now we have to tolerate our potentially quiet street being used as a construction entrance for a large development with heavy equipment moving daily and hoards of cars, vans, and trucks that travel through our small neighborhood. With Astor Farms ending soon anticipating another assault is almost intolerable. We have a rather unique environment here. Most of the properties here are heavily wooded and adjoin the protected lands that border the St Johns River and Wekiva River. We have hundreds of trees on our property alone and they provide refuge for large rare birds and other wild life that migrate through our area. We have several large wood peckers, owls, and squirrels that would be peril with vehicles traveling 70+ miles per hour across their migratory paths. It makes no sense to choose the northern route that condemns many more homes, disrupts natural lands, and overburdens I-4 to make the link to 417 and the New Wekiva Parkway. The southern route seems most logical to me. Vacant lands exist now to provide most of the right of way for that path. Removing larger number of people from their homes to find another environment such as this is cruel and nearly impossible. Sure, someone will have to live with the road noise and disruption, but to change the nature of this rural like community, the destruction of a large number of homes, disruption of wildlife habitat and in the end creating a problematic traffic path that negates the gains made by the St John's River bridge widening project seems ridiculous at best. 6/23/2005	11:17 AM	PIO responded to Mike k5unm@cfl.rr.com email: "Hello Mike, The Expressway Authority is building SR 429 Part C from CR 535 to Siedel Road and is expected to finish by end of this year. The Florida's Turnpike Enterprise has two additional sections of 429 from that point to I-4. To get info on that schedule contact Turnpike PIO Christa Deason at Christa.Deason@dot.state.fl.us.If you were by chance referring to the SR 429 Wekiva Parkway

section, we are currently are in the Project Development & Environment (PD&E) Study phase. The study is schedule to finish, resulting in a preferred alignment, in early 2007. With the subsequent final design, permitting, funding and Right of Way Acquisition phases needed, we wouldn't be looking at starting construction until 2010-2012. Construction typically takes place in sections, which would be let at different times and with each section taking two years more or less, so final completion at this time would be difficult to gauge. Certainly one of the options, or a variety of options, to be looked at will include connecting to Interstate 4, but that does not guarantee the final product will in fact include that connection. These are all things that still must be evaluated and decided by not only the project team, but the state and local governments, environmental agencies and organizations and members of the public. Did you receive the recent project newsletter? If you're not already on our mailing list, please forward your full name and mailing address and I'll make sure you get future project newsletters and meeting notices. We'll do our best to keep you informed on this major transportation improvement."

6/22/2005	2:38 PM	Mike [k5unm@cfl.rr.com] emailed: "When is the estimated completion date and will it truly be all the way to I4 at that time????Unauthorized interception of this communication could be a violation of Federal and State Law. Regarding  
Worked on Penny Miller's concept letter request and sent.

7/6/2005 9:16 AM Penny Miller 407-886-0589 said she got a letter a couple months ago and didn't remember if she'd called about getting on the list, just wanted to be sure. PIO took her info: Richard and Penny Miller, 2653 Boch Road, Apopka 32712, and said would make sure she's on the list if not already. PIO noted next thing they'd be getting would e the newsletter around September in anticipation of the public meeting we're shooting for in November. She asked do you also have a bigger map? PIO said I have an 11x17 I could send her? She said she would appreciate it. PIO said would get that out today.

Bruce & Francis Mills  
Live Oak Animal Hospital  
Regarding  
Attended Public Meeting, 11/14/05

8/1/2005 11:42 AM PIO sent most recent newsletter to Dr. Bruce Mills, DVM, Live Oak Animal Hospital as requested.

8/1/2005 11:00 AM Lisa Bolduc/Live Oak Animal Hospital called to see if we were finished surveying, etc. for the Wekiva Parkway? PIO noted field data collection including surveying, geotechnical, etc. is still underway. She asked if anything had gone out about a public meeting? PIO noted we're shooting for November meeting but don't have firm date. PIO asked if they'd been getting project info? She said got the March 30 letter, but not the newsletter. PIO got her info (PO Box 471265, Lake Monroe FL 32747) and said would send the past newsletter and make sure she's on the list for future newsletters and meeting notices. PIO noted next info probably going out in September or October. She said send it to Bruce Mills; she's just eh office manager.

7/5/2005 1:10 PM PIO returned call to Dr. Bruce Mills/Live Oak Animal Hospital 407-330-5137, and spoke to Lisa, who said he was wanting to know if there's a website to look up info. PIO gave website address and page links. PIO noted status of data gathering and public meeting in November. She said, "We know it's got to go in. It's just a question of whether it's going to affect our building or not."

7/5/2005 11:29 AM Lisa Boldeck(sp?) Left MSG I'm calling for Dr. Bruce Mills 407-330-5137, if you could give us a call. We have some questions. 407-330-5137

7/5/2005 9:24 AM Dr. Mills/Live Oak Animal Hospital in Sanford. Received a letter about surveying our property and had in the back to call you if we wanted to be kept updatedCall me back please 407-330-5137 I would appreciate it.

Contact Notes  
Arthur Minnier

Date	Time	Regarding
5/3/2005	9:34 AM	PIO prepared study area conceptual letter for Arthur Minnier and sent as requested.
4/18/2005	3:00 PM	PIO returned call to Arthur Minnier 303-838-1259. He said where our property is located, we have a little map with colors, believe it's between Neighborhood Lake Seminole investors and Mount Plymouth and Rte. 46. I would say we're either covered by Neighborhood Lakes or Seminole Investors. PO Box 362, Conifer CO 80433-0362. would be so helpful to have something I could understand. PIO to send him a 11x17 study area map, and confirmed he is on the mailing list for the project.
4/18/2005	10:22 AM	Arthur Minnier 303-838-1259 I'm looking at the Wekiva project and can't tell from your map how close this comes to our property. I need a better representation of the impact of this in the Mount Plymouth area. Please get back to me at your earliest convenience.

Date	Time	Regarding
10/14/2005	1:31 PM	David Mitchell804 Champion Woods CourtSanford, FL 32771As a homeowner in the Lake Forest Community on S.R. 46 I appreciate the communication and the due diligence given to date on the proposed "Wekiva Parkway". I would expect our tax dollars will be continued to be used appropriately in evaluating the options on the project. I would prefer the Wekiva Parkway connect to the existing S.R. 417 (the greenway) at I-4 and keep traffic off I-4. Based on my experience an alternate route that requires the use of I-4 would add additional traffic on to an already congested I-4. I believe a 417 connector would also simplify traffic flows for travelers and keep journey times to a minimum. I do believe a connector from 417 to the S.R. 46 exit would improve traffic for access to commercial entities along the S.R. 46 / I-4 corridor.

11/14/2005 3:53 PM Public Meeting Comment Form 11/14/05:Mike Moore5217 Forest Edge CourtSanford, FL

32771-Regarding the proposed beltway connection to I-4 / 417-The southernmost option that extends the existing 417 appears to make the most sense. Ease of the connection of the 417 the proposed route appears to have minimal impact on residential in the area (orange option)-Highly oppose bringing it down 46 and connecting to I-4. Does not make sense for the existing 417. 46 is already a mess this would make it worse.-The northern connection to I-4 would be my second choice, main issue is how the 417 traffic would connect.

Lisa Morgan 407-463-6259, I moved but info still needs to go to the new people at that address. New resident is PO Yang, at same address, 5306 Effie Dr., Apopka 32712 have received the project update. Have friends looking at a house on that street, are you guys for sure these are the alternatives you're looking at and one of these will be selected after the meeting? PIO said nothing is for certain at this point, these are simply the initial alignment alternatives, and changes are very likely based on local government and public input. Lines will likely come off and some new ones may be added based on input received. She said when will you know for sure? PIO noted PD&E study scheduled to be complete in early 2007 with a preferred alternative. She said okay thanks for the info.

11/14/2005	10:50 AM	Attended Public Meeting, 11/14/05

10/7/2005	2:32 PM	Margaret Moss 407-851-8390 31415 S.R. 46, Sorrento 32776 had questions about routes for Wekiva Parkway. Is there anything I can see at this point? She lives about a mile from the lake-Seminole county line. PIO noted initial alternative alignments going through local government review, fluid process, some things being added or taken off. PIO noted we'll have finished that initial process and have alternatives for them to review at public meetings in November. PIO referred her to the website and public meeting info. PIO noted we will be getting newsletters and meeting notices out to folks. PIO asked if she was on the mailing list? She said she'd received a newsletter. PIO confirmed her info just in case, said I'd make sure she was on the list. She asked if the alignment paralleled 46? I had heard about it going at one point through state land? PIO noted there are several alignments and certain sections do parallel and cross 46, but it's fluid with the government review underway. she asked for confirmation we'd have alignments at the public meetings? PIO confirmed, yes, they would be able to view alternative routes. She asked does it matter which meeting she goes to? PIO noted no, all the meetings will be the same may just have enlarged boards for whichever county we're in.
-----------	---------	---

4/19/2005	9:23 AM	PIO called back Margaret Moss, who asked is there any other news? She said send info to 31415 S.R. 46, Sorrento 32776 I have just heard from several of my neighbors that road going south of 46 and through rock springs run. PIO noted we don't have an alignment, doing data gathering, working to have some initial alternative alignments for November public meeting. PIO noted there's lots of rumors and conjecture floating around, or they may be confusing it with the old 429 extension project that did involve some of the safe area and had some initial alignments drawn up. Some time last year we met with OOCEA, talked about going onto state property and connect to Wekiva river run, Rock Springs run,
-----------	---------	--

that's where most of the neighbors saying it's going to go. PIO reiterated we don't have an alignment, actually had hoped to be a little farther along in our data gathering and study, but hope to have alignment approved by EA and DOT by early 2007. She said another rumor I heard is Seminole county won't let you put in a toll road. PIO noted there are criteria in terms of revenue that would be generated, bond requirements to make a toll road feasible. PIO noted at this point the orange county portion would most likely qualify because of the heavier traffic, and there may be a small portion coming out of Orange into Seminole, but we fully expect that a good portion of this project will be an at grade arterial, similar to 441 or 436. She said so it won't be a beltway all the way around? PIO noted not likely, that's why FDOT is handling Lake and Seminole portions, and EA handling Orange County portion, which again is expected to be a toll road. She said what about the pipeline? there's a huge Florida power gas line feeds plant on St John river, parallels 46 at lake Seminole border, turns up the . It comes across by people's property, we have 5 acres, our house sets back about 600 feet, and pipeline is 200 feet. PIO noted we coordinate with utilities all the time on these projects, and they will often have to relocate, raise or lower their lines for the road. PIO noted it depends on whether they're on state ROW or on an easement or property they own, whether they'll have to move something. She said the line is on the ROW, goes across her property. PIO said then I doubt that's anything that we couldn't coordinate with them on. She said that's what she wanted to hear.

4/19/2005	9:20 AM	Margaret Moss returned PIO call 407-245 5542 we're playing phone tag.
4/19/2005	9:01 AM	PIO returned call to Margaret Moss 407-245-5542, left MSG that if she received the letter Friday she's on the mailing list, but she's also welcome to call me back with any questions.
4/18/2005	11:52 AM	Margaret Moss I am going to be affected by the Wekiva Parkway could you give me a holler at 407-245-5542

Regarding  
PIO returned call to Glenda Mullens 407-886-3619 x107, was put on hold, wanted to make I'm right on Plymouth SorrentoShe wants to move, got something in the mail about someone wanting to buy the property. She doesn't have a problem with that, just wanted to know if we had decided to go through Lake County instead. PIO gave property timeframe, PD&E status, noted we don't have alignment yet thought Plymouth Sorrento road is in the center of the study area, we're looking to get the project newsletter out in 1-2nd week of May. 1556 Plymouth Sorrento Road, she said according to the tax records there's no's' on the end, but in reality there is. She was thankful fro the call back.

4/15/2005	10:52 AM	Glenda Mullens 407-886-3619 x107 left MSG I currently live on Plymouth Sorrento Road and I have a question about Wekiva Parkway. Whether you know which way the road is going? Is it going to come down Plymouth Sorrento Road? I'd really like to know whether I'm going to have t move or not. I'd appreciate a call back.

11/14/2005	2:56 PM	Comment Form:Laurie Munroe220 Lochmond Drive Fern Park, FL 32730A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

12/21/2005	12:34 PM	Brian/CH2M Hill copied PIO on response to Cindy Murray: "Cindy,I'm responding to your inquiry for Mark Callahan of CH2M HILL. I've attached a jpeg of the property in question. In the jpeg, the property is highlighted in yellow and the project corridor is represented by the purple lines to the East of the property. According to this map, this property will not be directly affected by the Wekiva Parkway. There are still some unanswered questions about access to the Wekiva Parkway from that location. Those questions will be addressed later in the study, however I am available to talk to you about some of the potential options in the meantime. For more detailed maps of the project corridor and the alignment alternatives, please try the following link:External Wekiva_Parkway access Current information about the Wekiva Parkway, including public meeting dates and locations and the project schedule, is available on OOCEA's website (www.expresswayauthority.com).If you have any further questions, feel free to call me at 407 423.0030x287.Regards,Brian ManwaringCH2M HILL

12/19/2005	2:07 PM	From: Burke, Thomas [mailto:TBurke@lakesumtermpto.com] Sent: Monday, December 19, 2005 2:07 PMTo: Cindy MurrayCc: Callahan, Mark/ORL; Fish, TJ; mbrooks@ch2m.comSubject: RE: Wekiva ParkwayGood Afternoon Cindy,As I mentioned on the phone this morning, the Wekiva Parkway project is currently in its early planning stages. Ultimately, the Parkway will connect to Orange County to the south at the yet-to-be-built Maitland Boulevard Extension/Apopka By-Pass (SR 429) at US 441. It will also connect to Seminole County to the east and provide access to I-4. The Florida Department of Transportation (FDOT) is currently conducting a Project Development & Environmental (PD&E) Study where design
------------	---------	--

and environmental issues are first addressed prior to the roadway being designed, right-of-way acquired, and the roadway constructed. At this point in time, funding sources are being sought by FDOT for these future phases (design, right-of-way and construction). So a timeline for construction is difficult to ascertain, as of today. With the exact alignment for the Wekiva Parkway not having been defined, at this point in time, it is difficult to assess impacts to specific parcels. Also, please note that there has already been a series of public workshops on this project in November, as part of the PD&E process. There will likely be more in the future. I have copied the Project Manager, Mr. Mark Callahan, of CH2MHill, the consultant firm that is conducting the PD&E for FDOT. He may be able to shed more light. Thanks,-Tom

Any interchange with 429 Extension and SR 46 should be located west of Rock Springs Reserve 3. Purchase entire neighborhood Lakes tract for roadway and preservation.

Contact Notes Cathy Murtaugh  
 Date Time Regarding  
 5/12/2005 2:01 PM PIO responded to forwarded email from Cathy Murtaugh, copied Dawn/OCEA: "Hello Cathy, Your query was forwarded to me as the public information officer for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. I see that your property at 30600 S. Coronado Dr. in Sorrento is within the study area for this project. We currently do not have an alignment for this project, so I can't tell you at this point whether your property will or will not be affected. Please keep in mind that not every property within the study area will be affected by this project. On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechnics and others are now in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in

each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass within the next week or two. You're on the mailing list to receive the newsletter, as well as public meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."

5/12/2005 1:36 PM PIO received 1225 p.m. email forwarded by Dawn/OOCEA info@oocea.com from Cathy Murtaugh Cathy\_Murtaugh@cfins.com: "Subject: Really need some information We moved to Lake County after building a new home off Round Lake Road just 1/2 mile S of SR46 in 2000. Our son died that xmas. Please, is the extension that is going to 441 going to take my home from me? We live on South Coronado Road. Cathy Murtaugh"

Ruth Myers  
Regarding  
PIO returned call to Ruth Myers, the one that ends at the trail and you're going to extend it to Vick Road. Was trying to get a bead on where you guys think it's going to go, one rumor was come down Vick road, cut up past that recreational park off Ponkan, but you never know what you're hearing is accurate. There was something in Apopka chief but you couldn't make out what they were trying to say. She lives on Appy Lane, off Plymouth Sorrento Road. I'm very concerned about all this. Since Lake County didn't want you guys there. Why are you coming up there, lake county has said they're not paying for it, why should the rest of us taxpayers help them? PIO noted discussions with various committees and local government representation, transportation needs with all the growth, etc., FDOT and OOCEA have to address regional needs within their jurisdictions, etc. Where 429 ends currently if you go straight ahead you hit Vick Road. Are you guys looking to go up from there? PIO referred her to study area map on website and went over sections with her. She asked why we weren't just connecting to current 429, why build new interchange? PIO noted current interchange area to the north already too heavily developed, and they wanted to be able to connect to Wekiva parkway to the north. Even with the shift NW, we're still getting into new construction or permitted development. Obviously you've got a lot of people pissed off out here, you know that don't you? PIO noted understood people are concerned about uncertainty of buying or selling homes, whether their homes would be affected. PIO went over project timeline, alternatives for public review in November, etc. PIO also noted same way people are upset, others are calling trying to get us to buy their properties, and some developments marketing that they'll have an exit on the parkway and people are buying those new homes based on that. So we know there are a lot of different interests out there. Everything is on hold except these \$250k houses that are going up. PIO noted new developments have started or have been permitted even since we started the study, so we have our work cut out for us. PIO noted newsletter went out early this week and she should get it either end of this week or next week, will have an update on where things are with this. She said she'd look forward to getting that, would take another look at the study map and thanked me for returning her call.--527 p.m.

4/25/2005 3:33 PM Ruth Myers left MSG think I sp 407-850-1010 I think I had spoke to you a while back I reference to 429 extension into Apopka. I was checking in on status of what kind of plans

or if you guys have made nay changes or what have you.

1/6/2005	9:01 AM	Ruth Myers said she got a solicitation letter from attorney on 429. She read portions of the letter: "Our review of public records indicates some or all of your property is in the study area and may be taken for this project." They included study map, noted PD&E study expected to begin in Jan. 05. PIO confirmed letter was from Harris Harris et al. "What I'm trying to figure is do I need to get an attorney?" PIO said that's her choice, though she might want to find out if her property is truly going to be affected before having to deal with lawyers. PIO noted PD&E has started, had meeting yesterday and data collection underway. hope to have alternative alignments for public review by late summer-fall. She said she thought this was a DOT project. PIO confirmed both FDOT and OOCEA were involved in this project. She noted "Things have changed since this map was done; my house isn't even shown on here. Are you aware of what's been built up here?". PIO agreed noted the concpeutla was from the Wekiva Basin Task Force in 2002. "You've got people like me up here living their dream of the five acres and a goat. I moved out of Pine Hills because of the noise. I knew when Home Depot went in on the trail, I knew urban sprawl was coming. I've been annexed. I won't ever be anything other than agricultural. I'm actually in the city, which changed zoning about 1.5 years ago. If the cow pasture across the street goes to housing, my property taxes go through the roof. People next door own 15 acres. They didn't change their zoning. When I got this letter, I figured I'd better look into it." "Last time I talked to a gentleman they were looking at going north of where my house is. If Lake County wants the road they need to take the road. My losing my home to give them travel privileges doesn't sit well at all with me. In Plymouth and Sorrento those guys put up a fight when you were talking about going down 46. They were able to fight and keep the road out. That's where I get a little miffed." "Before you came along, we were not getting notification of these meetings; that was one beef I had. There was a guy before you came, think was Nathan. Nobody told me about all this when I bought the property in fall 2001, moved house out July of next year. It is sad that things have to keep growing. One nice thing is Apopka is zoning for high end they have to have at least an acre, which is not a lot but a makes a difference." PIO again confirmed schedule for alternative alignments, doing data collection now, etc., and confirmed she is in my database for meeting notice. PIO also noted she's welcome to check in from time to time to see where things stand. She said thanks for the time.

Notes		
Date	Time	Regarding
10/14/2005	1:30 PM	EAC Meeting Comment Form:Roger Nash716 Ashgrove TerraceSanford, FL 32771Southern route seems to be most reasonable, less congested with easier connection to S.R. 417. Also will involve less objections.Logically appears to be best route with less business and residential disruption. Thanks for your consideration.

3/22/2005	12:50 PM	PIO worked on Roger Nash concept request letter and sent.--101 p.m.
3/21/2005	5:12 PM	Roger Nash responded to PIO email: "Please put me on the list for info about the Wekiva Parkway and send hard copy of the study area conceptual. My address is: Roger Nash 716

Ashgrove Terrace, Sanford, FL 32771 Thank you rjnnash@aol.com"

3/21/2005 10:27 AM PIO responded to Roger Nash email: "Hello Roger, We do not yet know how the S.R. 429-Wekiwa Parkway & S.R. 46 Bypass will affect S.R. 46 as we do not yet have an alignment. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OOCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. There is a study area conceptual available on the Expressway Authority website www.ocea.com, along with other project info. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We are in the process of drafting the first Wekiwa Parkway newsletter, which will probably go out in April. Please provide your mailing address so that I can add you to the project database to receive the newsletter, meeting notices, etc. Also let me know if you need a hard copy of the study area conceptual. I hope you find this info helpful. Please feel free to call or email with other questions or concerns."

3/20/2005 11:30 AM Roger Nash emailed: "I would like any info on the SR 429 (Wekiwa Parkway). Any projected course in relationship to SR 46, timetable etc.. Thank you, Roger Nash rjnnash@aol.com"

Contact Notes Sherry and Chuck Nass

Date Time Regarding  
11/1/2005 11:04 AM PIO returned call to Sherry Nass (cq) 407-697-4971 your assistant was able to help us pretty much, didn't know how to interpret the different colored lines. Gentleman that owns company my husband and I work for was interested in purchasing piece of property next to yellow line, will go forward irrespective of road plans, but want to know potential impact. PIO went over process and timeline, noted no funding for construction, no earlier than 2012 unless some federal funding or something becomes available. She said it's a greenhouse we're interested in, so if we could use it for five years, we'd be ecstatic.. she said the information was helpful. PIO noted the upcoming public meetings and asked if they planned to attend? She said If we become partners and form mini corporation, we may attend the meeting, or we may wait for the next opportunity.

10/25/2005 4:15 PM Mrs. Nass called inquiring about the interchange proposed at Kelly Road. PIO explain that she would forward message to Mary. PIO noted that there were Public Meetings soon. Mrs Nass stated that she will attend if she decides to purchase the home in the proposed area. She asked when construction would begin. PIO stated that the PD&E study will continue until 2007 and then would go to design for a year or two before construction would begin.

Regarding

PIO worked on conceptual letter for Charles Nelson and sent as requested.

Charles Nelson 407-295-1135 said he appreciated me calling him back. He's trying to find out something about the Wekiva Parkway. He said he saw a map one time, think he was with Bob Sindler, that showed an interchange right over my house. PIO noted we don't have an alignment yet for Wekiva Parkway, went over PD&E status, public meetings, etc. PIO noted perhaps what he saw was for the old 429 extension, which had several alternative alignments that went north from the current terminus of 429 at 441 and to the west. He said he lives 2517 Haas Road, Apopka 32712, near Plymouth Sorrento Road, half mile off PS Road; they'd talked about going half mile off Plymouth Sorrento. PIO noted that would make since then since that's in the old 429 extension area. chaznelson@juno.com I understand it's a long process, but we can't do anything, don't want to do anything. You've kind of got us held hostage. When would ROW acquisition begin? PIO noted if PD&E finished early 2007, would go to final design and maybe advance ROW could start summer 2007. PIO to send study conceptual. Noted I'd also place him on the mailing list for newsletter and public meetings. Charles asked if I knew anything about the widening of Edgewater Drive? PIO said no, that's not an expressway authority road, not sure if that's county or state. He said he thinks it's county and the project is supposed to affect their sanctuary, and they don't know when or where to build a new one. PIO asked if he'd spoken with anyone in OC public works? He said he did some time ago and will try them again. PIO noted OC also has a list of their projects on their website and start dates. He asked for website address. PIO said thought it was ocfl.net, but if he searches for orange county government and Florida he'll get it for sure. He was thankful for the help. PIO asked for confirmation the Haas Road address was for his home vs. the church, and he said that's correct.

3/22/2005	12:36 PM	PIO returned call to Charles Nelson Lockhart Baptist Church 407-295-1133, left voicemail asking him to get back to me, gave my number again.
3/22/2005	10:27 AM	MSG Charles Nelson Lockhart Baptist Church 407-295-1133 could you call me please. Thanks you so much.

3/28/2005	2:12 PM	Pam Nerness responded to PIO email: "David and Pamela Nerness373 Bush Hill CourtLake Mary, FL 32746"
3/28/2005	1:51 PM	PIO emailed Pam Nerness requesting address for newsletter mailing.
2/28/2005	8:57 AM	February 28, 2005PIO responded to Pamela Nerness email: "Hello Pamela,There is no alignment yet for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OOCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. The map you saw on the Expressway Authority website depicts the project study area. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2010-2013 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. If you send me your address, phone number, etc. I will add you to the project database to receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."
2/27/2005	10:45 PM	Pamela Nerness DNerness@cfl.rr.com emailed: "Dear Ms. Brooks:Has the exact route for Section 2 of State Road 429 (Wekive Parkway - Orange County) been determined? My husband and I are looking at land in that area but don't want to build our dream home only to have it overrun by the new road. The map I found on the Expressway Authority website still depicts estimated areas, not specifics. Any information you can provide on the exact path of the new section would be most helpful in our decision. Even specific estimates, such as "The path will fall between these two roads," would be useful. Thank you,"

11/9/2005 7:45 PM Court Reporter Comments 11/09/05  
Carlton F. Neville 5224 West State Road 46 Sanford, FL 32771-9230 (407) 330-3436  
Representing: Self  
Date: 11/09/05  
Mr. Carlton Neville: This is Carlton Neville. I think you should consider an alternative in Seminole County that leaves the current right-of-way near Yankee Lake. It runs along the Florida Power line right-of-way, the southern edge of the black bear wilderness, and ties back into the alignment in yellow on the current maps. I think you should consider an alternative method of tying into Highway 417, the Greeneway, by extending the Greeneway where it makes its sharp left turn toward I-4, directly to the north toward Lake Monroe, going up CSX Railroad and tying into the yellow alternative on the current map. I know that this section that I'm referring to is not in the study area set up for this project because the study area is west of I-4, but it appears to me tying 417 by going north and coming back over to I-4 along the CSX Railroad would allow for much better traffic flow from the new highway onto 417.

11/9/2005 2:42 PM Attended Public Meeting, 11/09/05

Contact		Joe Newman	The Orlando Sentinel
Notes			
Date	Time	Regarding	
1/4/2005	4:36 PM	PIO called back Bryan Douglas/OOCEA PIO and relayed questions about schedule and acquisition of environmental parcels, was that still on track? Bryan noted we're underway on that, nothing purchased yet, but everything seems to be positive so far. He said thanks for calling Newman back. PIO asked if he'd had chance to review any materials, mailing lists, etc. I'd sent him. He said he'd been concentrating on Kathy and Brian's stuff, but would look it over. He said they're well underway with the project logo, don't know if will go with commission logo as basis, want to keep it basic. Still need to come up with project name everyone can be happy with.	
1/4/2005	4:30 PM	PIO again tried reaching Joe Newman/Orlando sentinel, who said he's trying to piece together a story on the science, what's going on with water quality and environmental testing and studies in the Wekiva area. What the deadlines are and where the road stands. PIO reiterated where PD&E stands, and with other phases needed, noted construction probably wouldn't start until around 2010, if not possibly 2013. he said that sounds about right, meshes with what he'd heard previously from Mike Snyder. He asked about the four parcels; he wanted to know where they were on that? "That's the big concern for environmentalists. Is anything happening with that?" PIO reiterated OOCEA has begun those negotiations, but given they only started last month would be surprised if they're very far along. He said primary thing was the schedule; don't know how what you've given me meshes with all the deadlines for water quality etc. He said that was all he needed. PIO said he's got my number if he thinks of anything else.	
1/4/2005	3:58 PM	PIO called back Joe Newman/Orlando Sentinel , left detailed MSG with my number, status of Wekiva Parkway PD&E, when initial alternative alignments and public meetings expected late summer-fall, only thing we have is conceptual on website, left web address.	
1/4/2005	3:55 PM	Bryan Douglas/OOCEA PIO MSG from Joe Newman / Orlando sentinel has story tomorrow, on deadline on Wekiva Parkway. 407-420-5411. give me a call when you're done and let me know what he was working on so I can give the chairman and Mike a heads up.

Date	Time	Regarding	
11/9/2005	8:45 PM	After meeting, PIO received 439 p.m. MSG from Mary Nguyen/WFTV Ch. 9 407-466-9671 could you call me back.	
11/9/2005	1:55 PM	PIO emailed Mary Nguyen/WFTV Ch. 9, copied news@wftv.com : "Mary,As requested, here is the overall alignment alternatives PDF, as well as those for one of the typical sections we're looking at, and the US 441-Wekiva Parkway interchange sample alternatives. It was nice talking with you about the project, and please don't hesitate to call or catch me at the meeting this evening if there's something you're not clear about regarding this project. Thanks for your interest!"	
11/9/2005	11:30 AM	PIO did interview with Mary Nguyen/WFTV Ch. 9, who's only been in the area a couple of years, spent time orienting her to the project area and particulars, timeframe,	

environmental considerations, growth in area and need for project. She asked a couple of questions about MBX and existing 429, which I addressed. She seemed a couple of times to confuse the schedules for MBX and Wekiva Parkway PD&E schedule, so I had to correct her a couple of times. PIO emphasized this is all very preliminary, opportunity for the public to give their comment, alternatives likely to change until we get to viables in summer 2006, when we'll narrow them down and take a more detailed look at what's left. She asked that I email the overall alternatives, typical sections and interchange samples --1205 p.m.

11/9/2005	11:15 AM	PIO called back Mary Nguyen/Ch. 9 to let him know I was done with Sentinel if she wanted to come a few minutes early for the interview.
11/9/2005	10:15 AM	Mary Nguyen/WFTV Ch. 9 407-822-8312 said they're coming to meeting tonight and want to do interview. PIO arranged to meet them at EA at 1130 a.m. after my Sentinel interview.

5/31/2005	11:15 AM	PIO returned call to Andy Nichol?/Carter Burgess 407-514-1467 we are trying to get the Wekiva Parkway onto the FIHS for the District. I was wondering if you could answer some

questions for me and if possibly we could meet briefly to go over some info on the Wekiva Parkway. Starting to work with John Zielinski in getting Wekiva Parkway on FIHS and eventually sis, digging into it and starting to figure out what we need to do and, have some questions about public involvement issues. What public involvement has been done in the past? PIO said I've only been on board since PD&E study started in January, went over letters, newsletters, public meeting schedule, etc. he asked if I could email him copies of the material that went out so far? PIO said yes. He said so nothing was done for public involvement prior to the PD&E? PIO said there were multiple committees sand task forces that all held public meetings, lot of history to this project. PIO noted there is info on the committee activities on the Wekiva River commission pages on the ECFRPC website. He asked if I could include that website address in the email. He said send info to nicolaw@c-b.com

Contact Notes Jeff Nienaber

Date	Time	Regarding
1/26/2005	9:50 AM	Jeff Nienaber asked if the Wekiva Parkway alignment had been decided? They're looking to move to the Sorrento area. Email is dogonit3@earthlink.net, 4912 Cedarstone Ln., Orlando, FL 32822. I'm a pilot so have an idea of what the area looks like from overhead and where it could go. PIO asked if he'd seen the study area conceptual? He said yes, on the website he saw some of the proposed stuff but didn't know if they'd decided where it was going. PIO noted no alignment; just started PD&E study last week it's a 2-3 year process. Noted we're shooting for the first public meeting with alternative alignments around November this year. Also will do project mailings. He said in addition to the normal Expressway Authority mailing? PIO noted correct, in addition to the Navigator.

Contact Notes Wendy Niles

Date	Time	Regarding
5/20/2005	9:17 AM	Wendy Niles Steelersgirl35@aol.com responded to PIO email: "Hi Mary- Thank you for the information, although not the good news I was hoping to hear; SR46 will really be a nightmare by the time this project gets underway. I would love to receive updates and any other information you send out. My information is as follows:Wendy Niles23205 Foothill LaneEustis, FL 32736Thanks again and I look forward to hearing from you in the future.Wendy"
5/19/2005	3:03 PM	PIO responded to Wendy Steelersgirl35@aol.com email: "Hello Wendy,We don't have an alignment at this time for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass; just a rather broad study area. If you want to send me your actual address, I could send you an 11"x 17" copy of the study area map.Please keep in mind that not every property within the study area will be affected by this project.On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others are now in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006.We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project Please note that any of these project phases could take more or less time than expected due to a host of variables.We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass within the next week or two. Send me your full name and address to get on that mailing list to receive the newsletter, as well as public meeting notices, etc.I hope you find this information helpful. Please don't hesitate to call or email with further questions or

concerns."--312 p.m.

5/18/2005	11:01 PM	From: Steelersgirl35@aol.com [mailto:Steelersgirl35@aol.com] Sent: Wednesday, May 18, 2005 11:01 PM To: MBrooksSR414@cfl.rr.com Subject: Wekiva Parkway What is the status of the Wekiva Parkway/SR46 By-Pass? When is it scheduled to be started/finished. Lake County continues to allow large growth without any roadway improvements. SR46 has become a nightmare during the morning/evening commute. Any information you could provide would be appreciated. Thank you. Wendy	
Contact		Barbara Nixon	Heathrow Elementary
Notes			
Date	Time	Regarding	
8/22/2005	1:45 PM	PIO picked up Brian M. and we discussed various meeting site locations. PIO and Brian visited Heathrow Elem. Cafeteria, which would be adequate though have to leave the lunch tables down and there are various fees. We discussed setting up the looping presentation and a seating area on the stage to make most use of the floor space. Parking available in front and on the side. We discussed possibly starting meeting at 630 p.m. to stagger the crowds, but we cannot begin set up there until 6 p.m. (when after care finishes).	
8/22/2005	10:53 AM	PIO called Brian to relay info, suggested we also take look at the elem., told the vice principal we could be there 230. He said sounds good, arranged to meet at his office 145 p.m. and head up that way, can also check out the middle school afterwards. He said that sounds good.	
8/22/2005	10:42 AM	PIO called back Heidi, who said children dismiss at 220 p.m. after 235 p.m. children would be gone, but there is an after-care program in the cafeteria. Someone's there until 330 p.m. she's going to let the secretary know we'll be coming and want to lookHave microphone available, there is a stage; don't do a whole lot of renting facility. Mike fee is \$1/hour, \$50/hour for space, plus \$11/hour utility charge. We don't book past 9 p.m. if user cleans space we wouldn't require additional custodial, so wouldn't be an additional custodial fee. The custodial fee is their hourly rate, between \$15-18. There is a projection screen available; no fee. Do have a multimedia equipment cart. The cafeteria tables would be done and fill majority of space. Would have to charge fee if have to put the tables up, because they're ready for next day and are in use at 730 a.m.You have to have insurance. There's a contract. Both of the weeks are open; don't have a lot of night activities. Extended day is there until 6 p.m. and then you could have it until 9 p.m. Fees are standard. She suggested Greenwood Lakes M.S. or Lake Mary H.S.; they're more equipped for this sort of thing. PIO noted we were trying to get as close to the study area as possible, and were also looking at Sanford M.S.	
8/22/2005	10:39 AM	Heidi Gooch 407-320-6801 left MSG Heathrow elementary. You called Barb Nixon about using our facility in November. 7 or 14. That shouldn't be a problem if you give me a call. Official capacity of cafeteria is 600+, so it can have 400 people, however, but don't have chairs seating available for 400, typically leave cafeteria tables up, tables seat 348 people. We don't have way to do auditorium seating. We have all our PTA meetings everybody sites at the cafeteria tables.	
8/19/2005	3:03 PM	303 p.m. Barbara Nixon/Heathrow Elem. Responded to PIO email: "I received your message and am forwarding it to our assistant principal as she handles our use of space. She's at a meeting this afternoon and will probably be able to get with you on Monday."	
8/19/2005	2:45 PM	PIO emailed Principal Nixon/Heathrow Elem., copied assistant principal Heidi Gooch, also sent study area map: "Good afternoon, Principal Nixon,I'm following up a voicemail message that I left for you this afternoon at Heathrow Elementary to find out what sort of cafeteria or auditorium availability you might have for a public involvement meeting one evening in either the week of Nov. 7 or 14, typically beginning at 7 p.m., for the SR 429-Wekiva Parkway & SR 46 Bypass Projects. As you may know, these projects are being studied for your area, and we are preparing initial alignment alternatives to present to the	

public for review and comment in November. We would expect perhaps 300-400 people for a public workshop gathering. We would need some tables and chairs but the room would be set up largely as an open space with exhibits stationed throughout. Please let us know your space capacity and availability, as well as any restrictions or requirements we would have with regard to fees, documentation, security, set up times, etc. I have attached a copy of the Project Development and Environment (PD&E) Study area map for this project for your information. I look forward to discussing this with you further and meeting you in the near future. Please don't hesitate to call or email with any questions about the project as well."--252 p.m.

8/19/2005 1:50 PM PIO called Heathrow Elementary 407-320-6850 receptionist said I'd have to speak to principal Barbara Nixon x6800, left detailed MSG about meeting space, timeframe, number of people and my contact info. Off Markham woods road north of Heathrow

Printed out comment forms and Ondich-Haas Road enlargements of study area to send to Linda Noe, continued working on letter and packet and sent.

PIO returned her call, noted I was glad she called because I'd tried to reach her back but had a wrong number, one of the digits was off. She went into a litany of concerns about the project. I do question why does OC have to have the toll road? We're going to be dead and gone and we're going to have a strong effect, I know the people that were appointed to the committee and the pledge from Jeb Bush. There is no doubt in my mind that the water source will be affected. I'm very concerned. We have property on the SJ River, another protected environment. I watched trucks dumping raw sewage into the SJR, reported it to the ... we all became very sick, there've been a few deaths. SJRWMD is very well aware of it. I'm a native, I am very open to change, but our water resources, you cannot tell me that when this Wekiva Parkway will not impact that water. I would love to get something in writing that says that water will stay protected and pristine. Went to OC meeting, SJRWMD and local government officials were there. We have no management of growth; Brevard has gotten permission to dump raw sewage into the SJR. They're in for the moment but not in for the future. I have not received one brochure from you. The brochure I looked at was from the Emmells. I've asked them to download info from the internet that I just now got up and running this week. You say you're looking for feedback I don't fall from that one. I'm angry. Even if our kids drink, because there is no aquifer left any more, reverse osmosis water. Our wildlife is being killed everyday out here and the roads haven't even gone through. This is just from growth. What are we trying to accomplish? An international hub for tourists that don't live here day to day? They don't bring in our revenue for I'm not against the roads, I'm against the maps. I'm seeing a lot of destruction because of growth and no water resource protection. Spoke with the Emmells on Ondich road, I live at Rock Springs. In 20 years I'm going to be dead, I think this has been pushed by our government to make this happen, As far as the roads having to happen, I would agree with you, if we continue not managing growth. We don't have a handle on Florida at all as far as our water resource or resource protection. I don't think we can keep up with the development they're allowing to happen, with water, with schools, and the environment. Went to septic tank meetings, how can you bring up septic tanks when you're dumping raw sewage into the SJR? Neighbor on her Expressed concerns about wildlife, the wildlife here in OC don't even know where to go anymore. Said look what they did to the little econ with the growth, and now the same thing is going to happen up here? She complained about a host of growth management issues. Said she also was concerned about impact of the project to the springs. She invited PIO to come to her property, the SC emergency services people didn't even know I was here, to see what the growth already has done to the area. She said she did not trust the process. Complained that "they" were not looking at the big picture. PIO noted EA and FDOT are developing this project, and don't have say on development permits for most part but have to address resulting transportation need. Mrs. Noe continued along the same vein at length, often asking questions without allowing PIO to address particular issues. She repeatedly asked for guarantee in writing that the project would not hurt the aquifer. PIO reiterated several times the requirement for retention ponds, wetlands mitigation and the conservation property we were directed to acquire as part of this. She said 10,000 is nothing, nothing. PIO countered the conservation acquisition would prevent that acreage from being developed, and that the environmentalists fought for that as part of getting their support for the project. PIO noted at least one of the properties already had plans for development, so this acquisition for conservation is huge in that regard. PIO asked her for names and addresses of her neighbors who said they didn't receive project info so I could check the database, noted that list came from property appraiser's office so if there's a problem somewhere we need to fix it. She would not give neighbor names or addresses. PIO then asked her to have her neighbors call me so we could rectify the mailing list issue. After some reluctance she said she would. PIO said in the mean time I would send her newsletter, overall alignment alternative map and copy of the WPPA. She reiterated she was angry and distrustful, and concerned about the water resources, wildlife and lack of

growth management. PIO noted Florida law allows property rights, so as long as a property owner or developer meets the various zoning, permitting and other requirements they are allowed to develop their property. She said we'd never keep up with growth at this rate; PIO noted from transportation standpoint we are definitely playing catch-up in Florida. She said she realized some of these things were outside my purview, but reiterated she is very upset. She said the Emmells told her one of her neighbors, the elderly woman's house was going to be taken. PIO asked for source of this info since we don't have a route yet, let alone haven't begun discussing any acquisition. PIO asked if she meant one of the alternatives hit the property? She said she believed so. PIO asked for address and I could check for her. She would not give the info, asked for list of all affected properties. PIO noted we check each property individually as queries arise. No list because the alignments are shifting with government and other input. She said so you won't give me that info? PIO said I absolutely would check on individual parcel impacts and get back to her; we're doing that for hundreds of people. PIO reiterated request for her to have neighbors call me. PIO thanked her for her comments and said I'd include a couple of comment forms with the info. She thanked me for my time and the info provided.--901 a.m.

11/17/2005	8:03 AM	Linda Noe left MSG other people seem to be getting brochures according to the EA. This is my third request asking for the full information about the 429 but it seems like some people are getting notified and some people are not. Not everyone can make meetings. Nor do I know that they matter from what I've heard about the maps. I was unable to make the Apopka school meeting I have the flu. Another lady on Ondich road would like you to mail hers to my address as well because she has not received notification. Please give me a call 407-230-9710 also mail two copies to 4710 Florence Street, Apopka FL 32712
11/15/2005	1:28 PM	PIO returned call to Linda Noe 407-330-9790, but got the Rotary Club, woman said no such person there. Tried changing number by digit, but got Lake Mary H.S. and no such person there.
11/11/2005	8:35 AM	Linda Noe left MSG I need to get a copy of the road plan for the 414 and 429 Wekiva parkway, whatever you got going there 407-330-9790 4710 Florence St., Apopka 32712 give me a call. Thank you.

Contact Linda Noe

Carol & John Nolan

Date Time Regarding  
6/8/2005 11:05 AM PIO called back Carol Nolan 407-321-7356 since email bounced back. PIO noted didn't get hit on names or the parcel ID no., so at this point it looks like the property is outside the study area. PIO noted however that doesn't mean at some point, for some reason, we might not have to veer outside the study area to get a viable alignment. PIO got correct email address: carolnoln@aol.com she said she appreciated the information and thanks for all of your help.

6/7/2005 4:22 PM PIO emailed Carol Nolan relaying info: "Hello Carol, It was a pleasure speaking with you earlier today. I checked the study area list for the names and parcel number you gave me, but nothing came up. This leads me to believe your husband's property is likely outside of the study corridor for the SR 429-Wekiwa Parkway & SR 46 Bypass projects. As I mentioned, we included some folks from outside the study area on the mailing list because of the broad interest in this project in that area. You will continue to get project newsletters and meeting notices. Perhaps we can better answer your questions at the public involvement meeting in November where we'll have some initial alternative alignments for review and comment. Please let me know if you have other questions or concerns that I might be able to answer at this time."--429 p.m.

6/7/2005 4:21 PM PIO checked Lake County study area list for Carol Nolan's husband's property but neither name she gave came up. neither did the parcel ID.--421 p.m.

6/7/2005 2:39 PM Carol Nolan 4073217356 said my husband and his partner have property on 46 they bought years and years ago and she was wondering how the project would affect that. PIO asked for info on property. She doesn't have address, but the parcel no. is 28-19-28-010000503900. She said it's right before you get into Mount Plymouth; there's a road that goes through there but I don't remember the name. All we have is legal description; it's just a couple acres. She noted Heathrow is putting a development out there in that area; it's Lake County. She said owners are Gary Kerr and John Nolan. PIO asked if they had received the recent newsletter? She said yes, they're on the list, that's why they were wondering if it involved the property. They've been held up for several years because friends of Wekiwa came in and said couldn't do commercial building. That's why they had bought the property as an investment property back when the expressway was supposed to go in back in 1990. We thought if we could rezone it professional we could sell it for more. Now that the study comes in they may be able to do something with it.. Email carolnoln@aol.com PIO gave her status of PD&E, public meeting update, confirmed no alignment yet. PIO to confirm if property is inside or just outside of the study area and get back to her. --247 p.m.

11/14/2005	3:32 PM	<p>Comment Form:Rayna Ojeda3010 Snow DriveDeltona, FL 32738A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

2/21/2005	5:00 PM	<p>PIO responded to Bill Parke email: "Hello Bill,I just left you a voicemail a bit ago. Glad you found me via email. The study corridor conceptual that you saw on the Expressway Authority website is all we have at the moment for the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass. Please be advised that not all properties within the study area will be affected by these projects.There is no alignment yet for these projects. The Project Development and Environment (PD&amp;E Study), being done jointly by FDOT and OOCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&amp;E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2010-2013 before any construction would begin on this project</p> <p>Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. I'm adding you to the project database so you will receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."</p>	

2/21/2005	4:54 PM	<p>PIO received email from Bill Parke/Carter: "From: Bill Parke [mailto:BParke@carterusa.com] Sent: Monday, February 21, 2005 4:54 PMTo: mbrookssr414@cfl.rr.comSubject: 417 West of I-4, SanfordMary. Surfed your web site before I called you but could not find much except a very broad area where it could go...but have heard rumors that you were closer to a final positioning...can you advise?William E. Parke, SIORSenior Vice PresidentCARTER455 S. Orange AvenueSuite 400Orlando, FL 32801407.420.1313 direct407.420.1301 fax407.252.5248 cell</p>
-----------	---------	---

2/21/2005	4:40 PM	PIO returned call to Bill Parke, Carter?, left MSG with phone and email address, asked him to get back to me and I'd try to answer his questions.
-----------	---------	---

2/21/2005	3:40 PM	Bill Parke left MSG that he's a commercial real estate broker, interested in what you can tell me about the extension of 417 where it now joins I-4 near Sanford to the west and south so that it winds up at 441 in Apopka. I'm interested in what you can tell me about the alignment. I know there is a vacated RR bed just west of I-4 where it intersects in Sanford. I know, I Was talking to somebody who said it was not going to be feasible to extend that thing west and what was ultimately going to happen was traffic would come across, get off at International Parkway, go north to 46 and from 46 at I-4 it would go west.I'm involved in a piece of property that may or may not be affected by the realignment , trying to figure out what the status of that is so I can advise my customer on whether they should locate a car dealership or not. 407-420-1313, 407-423-9540

Contact Notes	Donald Parks
---------------	--------------

Date	Time	Regarding
1/10/2005	10:48 AM	PIO emailed Sherri MacDonald/Harris Harris that it does appear Donald Parks' parcel at 2413 Plymouth Sorrento Road is within the study area." Good morning Sheri,I've reviewed the Wekiva Parkway study area conceptual and the information on the 2413 Plymouth Sorrento Road parcel owned by Donald Parks, and it does appear this property is within the study area. The study area is roughly centered along Plymouth Sorrento Road from US 441 up to a hair shy of the Lake-Orange county line.I've got a call in to see if there's any other overlay info available that I can confirm this, but visually it does appear to be in the study area. FYI."

1/10/2005	10:37 AM	PIO left MSG Brian Manwaring/CH2M asking if there was any sort of overlay that actually shows the parcel no.'s or addresses within the study area.
-----------	----------	--

1/10/2005	9:57 AM	As requested by Sheri MacDonald/Harris Harris, PIO checked if Donald Parks/2413 Plymouth Sorrento Road parcel #302028048400011 is in Wekiva Parkway study area. PIO extensively reviewed the OC Property Appraisers parcel and aerial info, compared to study area conceptual and street map, and the parcel does appear within the study area.
-----------	---------	---

1/7/2005	3:00 PM	PIO called back Sheri MacDonald/Harris Harris Bauerle Sharma 407-472-1563, who said Stumpy and Bruce did site inspection and they're certain he won't be affected but it seemed to me he was in the study area. She said address is 2413 Plymouth Sorrento Road parcel #302028048400011. PIO said I have been in meetings but would check and get back to her Monday. She said that'd be fine.

Contact Notes	Steve Parra	Stoneybrooks Hills
---------------	-------------	--------------------

Date	Time	Regarding
12/19/2005	8:22 AM	Steve Parra responded to PIO email: "Thanks Mary, I appreciate your assistance. I don't like to leave anything to chance but sometimes you just have to cross your fingers.Steve Parra"

12/16/2005	9:37 AM	<p>PIO responded to Steve Parra email: "Hello Steve, The map you sent is significantly out of scale. As I mentioned, our aerial concept map shows the development about a mile or mile and a half (depending on your lot location) south of the conceptual alignment along SR 46. I'm not sure there's anything else I can offer you at this time regarding your noise and visibility query. As noted, we are doing a noise study as part of the Project Development and Environment (PD&amp;E) Study for the Wekiva Parkway. That information will be made public once available, but we are some time away from that at this stage. Once an alternative is selected (by March 2007), we will also begin to have more details such as the elevation or height of the proposed roadway, with regard to your visibility concerns."</p>
12/15/2005	11:24 PM	<p>Steve Parra emailed: " Mary, Here is a link to the Lennar community off of 441 in Mount Dora that is near the proposed expressway improvements. I will fax the diagram of the community to you later today. sincerely, Steve Parra <a href="http://lennar.com/corporate/communities/community.asp?menuOpen=4c10&amp;view=&amp;COMID=16326&amp;DIVID=OLHUSH&amp;CNAME=&amp;ComInsert=&amp;MAPTYPE=&amp;COMSEARCH=&amp;PLANSEARCH=Corporation - Find a Community - Driving Directions.url">http://lennar.com/corporate/communities/community.asp?menuOpen=4c10&amp;view=&amp;COMID=16326&amp;DIVID=OLHUSH&amp;CNAME=&amp;ComInsert=&amp;MAPTYPE=&amp;COMSEARCH=&amp;PLANSEARCH=Corporation - Find a Community - Driving Directions.url</a>&gt;&gt;</p>
12/14/2005	11:03 AM	<p>PIO emailed Steve Parra Lake County west and overall concept: "Steve,It was good speaking with you. Please find attached the Lake County West conceptual alignment alternatives, as well as the overall alignment alternatives for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study.As we discussed, the northernmost border of Stoneybrook Hills is about 1-1.5 miles south of the study area, and then a couple hundred feet more south of SR 46, which would currently be replaced by the beltway in this area. Again, potential noise impacts will depend on your location within the subdivision, as well as the density of the development or vegetation between your subdivision and the proposed beltway. These factors, along with the elevation of the hill you mentioned your house sitting atop, will also affect the visibility of the beltway from your property.At this stage in the project development, there really isn't anything more specific I can tell you. We are doing a preliminary noise study as part of the PD&amp;E Study, and that information will be made public once available.Please call or email with other questions or concerns."</p>
12/14/2005	10:20 AM	<p>Steve Parra (no number shown) asked am I going to have to worry about noise from any of these proposed roadways? I mean I think this would probably be convenient in the end so I wouldn't have to take 441, which gets really backed up. And I know that with all the growth out here we're kind of part of the problem. I just don't' want to buy this place and have the road in my backyard.Entrance of Stoneybrook Hills is off town hill, going to be 999 homes and wanted to know if were going to be Went to the website, was trying to expand maps and look at them, having difficulty seeing it.PIO noted northernmost border of development about a 1.5 mile south of study area, and then several hundred feet more from 46. PIO noted potential noise impact also will depend on where he is in the subdivision. PIO confirmed with caller he was referring the development planned at the orange-lake county line between 441 and Round Lake Road. PIO noted current alternative had beltway replacing 46 in this area, but there was potential alignment could shift north or south. That decision still to be made.He said in the development you'd turn right or north, I'm not from the area so I might be confused about north and south. Behind us is another development going in by Cambridge homes. When you exit community and turn right on 441, as you go west that's where 46 is. He also asked about the connection to I-4 Email Parradise@comcast.net Will send Lake County west concept, and the overall. Steve Parra, mail info to 13011 SW 40th St., Davie, FL 33330Have put a deposit down to reserve a home site in Stoneybrook Hills, haven't gone to contract. Currently in suburb west of Fort Lauderdale, in law enforcement for 20 plus years. So when we retire we try to find a rock to disappear under.I'm a mile in to the development and on a hill; there are only about 40 houses in the section of the community. PIO noted depending on where his hill is and how high, he may or may not be able to see the new beltway. He has diagram of community and the lots you could look at and get a better idea of what my situation is. PIO gave fax number. He said you've been very helpful. PIO said I'd send the email shortly.--1045 a.m.</p>

Contact Notes Debbie & Louis Parrish

Date	Time	Regarding
12/13/2005	4:43 PM	PIO returned call to Debbie Parrish 850-509-5209, looking for generally describe, one the reasons for this to get traffic off I-4, looking for background on OC and Orlando and their growth projections, thought that would be included in the IS. For someone who didn't know Orlando or OC, not detailed, but ... PIO referred her to the WRBCC final report which detailed the need for the project. She said she's trying t pull together as much info as possible for a property she's got on the market, for people who might be interested from out of town or state and don't know what's going on. PIO said re: her request for the EIS, that would be part of the study materials to be completed in spring 2007.She asked about the ovals on the maps. We discussed those represented interchange locations or sites we know we have some local access issues. She said she had read the lake county comprehensive plan and it mentioned there'd be only one interchange at 46 to limit growth, etc. PIO noted there could be IC at 46 in Mount Dora, but possibly also at 46 and I-4 in Seminole County.She also asked what the dark line was on Lake County West coming off 46? PIO noted that was to provide local access, would have to be a slip ramp or some other sort of access for local property owners to get in and out.She said she wants to be able to assure someone buying the property that with this beltway coming in, that it's not going to be like LA in a few years. PIO noted that in addition to the parkway, the state legislation also required local governments to adjust their comprehensive plans with regard to the growth they allow in the environmentally sensitive area. PIO noted while that won't eliminate growth by any means, the act attempts to address comprehensive issues in the river basin.She said that was helpful and thanked me for getting back with her, said I didn't need to answer her email, we went over everything.
12/13/2005	2:32 PM	Debbie Parrish left MSG I have question about a map you sent me. Please call 850-509-5209
12/12/2005	10:05 AM	PIO received 12-5 1204 p.m. email from Debbie Parrish: "Hello Mary, I was just checking back in to see if you had any luck with this latest (see below) map request. Also, is there a way for me to access the EIS for that part of the road project closest to this property, which I guess is called the 46 bypass? What about the EIS for the Wekiva Parkway; I am most interested in the section which discusses need and growth projections, etc. Thanks Mary. Deb"
12/12/2005	10:00 AM	PIO received 12-5 1206 p.m. email from Debbie Parrish: "Near the corner of 437 and 46, just west of 441 so I think it would be the west side. Thanks. Deb"
12/1/2005	2:58 PM	PIO drafted conceptual letter response with overall and LC west alternative concepts for Debbie Parrish."December 1, 2005Debbie & Louis Parrish320 West Park AvenueTallahassee, FL 32301RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear Debbie & Louis, Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, I have enclosed the overall conceptual project layout, as well as the Lake County West alternatives (sheet 3). Regarding your query about the property at 31216 County Road 437 in Sorrento (parcel ID no. 30-19-28-000300002800), this parcel is located north of Harbeck Lane, which is approximately a half mile or more north of the project study area, and well north of the northernmost alignment alternative in this vicinity. I also have enclosed a map from the Lake County Property Appraiser's website to this effect.Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a> , or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement."--323 p.m.

12/1/2005	2:36 PM	PIO worked on Deb Parrish conceptual request, pulled concepts and tried to find property on lake county property appraiser's site ID 30-19-28-000300002800. The property in question is on north side of Harbeck Lane and east of CR 437/Avenil St., which is well north of the study area in Sorrento. Property appears to be ½ to ¾ mile north of the study area and northernmost alternative in this location.
11/28/2005	3:05 PM	Deb Parrish responded to PIO email: "Near the corner of 437 and 46, just west of 441 so I think it would be the west side. Thanks. Deb"
11/28/2005	2:39 PM	PIO responded to Debbie Parrish: are you on the east or west side of Lake County? That map is broken into two sections (west side on the end of S.R. 46 by US 441; east side by the Wekiva River.) These maps are in high demand, so let me know. Thanks.
11/28/2005	1:28 PM	Deb Parrish emailed again: "Mary, another request. Can you create a map, or can you direct me to someone who can create a map, or file, which shows the location of the following property relative to the alternatives. The property name is Jones, J Donelson 11 & Brenda K and the property parcel number in Lake County is 30-19-28-000300002800 ? Thanks. Deb"
11/28/2005	11:58 AM	Deb Parrish responded to PIO email: "Can I get both? One for the overall and one for Lake County portion? Please mail to Louis Parrish at 320 West Park Avenue, Tallahassee, Fl. 32301. Thank you Mary. Deb"
11/23/2005	4:01 PM	PIO responded to Deb Parrish: "Do you want a hard copy of the overall alternatives, or the ones for a particular county? Also please forward the address to send the hard copy. Thanks and Happy Thanksgiving!"
11/23/2005	1:47 PM	Deb Parrish responded to PIO email: "Mary, thank you for the file. I am having a problem printing it so that it is legible. I have tried 8X11 and 11X17 and the color is light and hard to read. I have tried on two different printers. Do you have any suggestions? Can I purchase a hard copy? Thanks and have a Happy Thanksgiving. Deb Parrish "
11/15/2005	4:19 PM	PIO emailed Debbie Parrish overall alignment alternatives as requested.
11/15/2005	4:10 PM	PIO returned call to Debbie Parrish 850-509-5209, 850-893-0676, Email DP104@earthlink.net She used to work for DEP, working with someone from economic development perspective not environmental, just trying to get up to speed on what's going on. PIO noted all the maps on the website, walked her through the links. She said she got to the FTP site, but when she tried clicking on one of the files it wouldn't come up. PIO suggested she may need to update her acrobat reader, which she said she was doing. She asked for a summary of what was available on the site; she's looking for the different sections. PIO said I could email her the overall alignment alternatives if she thought that would help? She said yes, sound like what she needs.
11/15/2005	3:43 PM	Debbie Parrish 850-509-5209 left MSG looking for some maps. Thank you.
Contact Notes		John & Claire Parsons
Date	Time	Regarding
6/10/2005	5:17 PM	PIO drafted study conceptual letter to John & Clair Parsons and sent to 1221 Essex Road, Winter Park, 32789 and sent.
6/10/2005	5:05 PM	PIO checked to see if Claire Parsons' potential home at 32507 Okaloosa Trail Sorrento was in the study area. Address did not come up on the LC study list. PIO emailed latest newsletter to John & Claire parsons at claireparsons@hotmail.com with info that property didn't appear to be in the study area.

6/10/2005	4:30 PM	PIO returned call to John & Claire Parsons 407-923-0663 she said we just tried to find you guys but he didn't write down the building number. We're buying a house on Okaloosa trail in Sorrento and were curious how close the beltway was going to be? PIO noted we don't have an alignment, gave study status and project timeline, meeting info, etc. PIO noted a lot of people in same boat, wanting to buy or sell homes but we just can't answer their questions right now. PIO asked if a larger study map would help? She said absolutely PIO to send 11x17 concept 1221 Essex, winter park, 32789, email claireparsons@hotmail.com she said they have not received newsletter. PIO to email her the newsletter. Looking at 32507 Okaloosa trail, Sorrento; PIO to check if that's in the study area and include that in info I'm sending. PIO reiterated project timeline. She said she didn't realize it was a ways down the road. She said all the stuff you're sending will be great. I really appreciate the call back and it was very prompt. Thank you
-----------	---------	--

6/10/2005	9:21 AM	John Parsons left MSG my wife Claire and I are considering purchasing a house that might be impacted by the Wekiva extension, the western connection. The house is right on the Wekiva River on the Lake County side. Just wondering if you had a more detailed picture of how that would impact where we live. Wife's number is 407-923-0663 if you could point us in that direction we'd really appreciate it.

Contact		Velma Patton
Notes		
Date	Time	Regarding
3/25/2005	1:10 PM	PIO checked OC property appraiser site, but nothing came up for Velma Patton or the two addresses. She said her property doesn't have an address, but address was for her brother's place next door. Said she was my grandfather's property, Victoria Barnes my aunt, property is right off 441 onto hermit smith road, would be about; she has an acre of the original 3.5 acres. PIO checked numerous other family names trying to get a parcel next to or that now belongs to Velma. She said Marie Johnson at 1703 Hermit Smith Road is next to her. PIO noted Wekiva Parkway study area centered along Plymouth Sorrento Road in this area, and Hermit Smith Road is off the study area to the northwest. She said Plymouth Sorrento Road is about 2 miles away from them. PIO said I could add her to the project database so she'll get newsletters, meeting notices etc. she said send info to her at 506 Gillespie Road, Chattanooga, TN 37411. PIO noted we were working on the newsletter now for the Wekiva Parkway, and if she had any questions once she received it she's welcome to give me a call. PIO noted the study area would be in the newsletter. She was thankful for the info.--130 p.m.

3/25/2005	12:53 PM	PIO returned call to Velma Patton 423-624-2775 she said she got the 414 update. I had some property that backs down at Hermit Smith Road, was wondering what effect the . Think the address is , off 441 that's where the connection going to start. Think the number is 1406 or 1436. (She is an older woman and had a little difficulty understanding me, so we went over things several times. Also had difficulty determining which project she was calling about; she kept referencing the 414)
-----------	----------	--

3/25/2005	11:45 AM	Velma Patton left MSG I would like some info on the western connector 423-624-2775 I will be waiting for your call.

11/9/2005	8:44 PM	Attended Public Meeting, 11/09/05	

Contact		Janice Paulin
Notes		
Date	Time	Regarding
7/27/2005	2:11 PM	PIO emailed Janice Paulin the revised study area map as requested: "Janice,Here's the latest study area map for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. As discussed, if they are just south of SR 46 at Round Lake Road, they are either inside or just outside of the study area, depending on the distance.Please let me know if you have further questions after reviewing this."
7/27/2005	1:41 PM	Janice Paulin/realtor 352-357-2892 said she's in Mount Dora. She's listing two homes on buttercup lane south of 46 bet. Round Lake Road and 441, pulled up latest proposed land acquisitions coming up 439 from Apopka through C.R. 437 area and connecting with 46 east of Round Lake and going over to 441.PIO noted we didn't have any land acquisitions planned yet for Wekiva Parkway; don't have an alignment. She said saw one earlier, cousin on buttercup lane wanted to list their home, had received a letter that it might go through their property, which is very close to orange county line. They were thinking they were no longer within the study area. PIO said I'm not sure why that would have changed at this point; if anything the study area has gotten wider in some area. And even if they're just outside the study area there's still possibility they could be affected. She said her cousin Marcia Rioux talked with you, but she may have been confused. She said before I listed anything I just thought I should look into it. PIO noted I recalled speaking with her but would have to check my notes for her issue as I have spoken to hundreds of people for this project. She said she understood that.She said she pulled map last night from the website, and printed when they're going to have public involvement meetings. This map is considerably different form the one I saw about a year ago. PIO noted maybe she saw a map of the now defunct NW extension of S.R. 429, which did have some proposed alignments but has since been scrapped and replaced by this latest project. She said she didn't realize that and now it makes sense. PIO logged on to web page she was looking at, and the map was actually of the conservation parcels; PIO told her that was not the most accurate study area depiction. PIO showed her the study map on the website currently, and noted we have an updated one where some of the study area has been widened. PIO reiterated we're in the study phase of Wekiva Parkway and do not have an alignment yet, noted meeting schedule.About three months ago their neighbor received a letter, and more recently they got something. jpaulinfl@aol.com PIO box 594, mount Dora, 32756They thought they were totally out of the woods, were going to put their house up for sale, but wanted to make sure they do the right disclosure. They were just getting settled in , was starting to give away plants to me, and I said they might want to wait to see what's going on.They had a lawyer contact them a couple months ago, he's done eminent domain so I guess he knows what they can expect. PIO said I'd email her the revised study area map. She said she thinks that would be helpful.

Notes		
Date	Time	Regarding
11/14/2005	4:32 PM	Public Meeting Comment Form 11/14/05:Glen Pawlowski6896 Sylvan Woods DriveSanford, FL 32771Route Options: Most preferred option is connecting to I-4 at 417. Seems most logical if the goal is to create a continuous loop around the city. The least favored route would be connecting at I-4 and 46. Combining local traffic with the beltway traffic for the stretch between I-4 and Orange would be a nightmare. Frontage roads: I like the idea of using limited access frontage roads for the local use between the Wekiva River and Orange Boulevard. However, I am concerned about the Beltway sound. Would like to see that highway elevated through that stretch or incorporate sound barriers.
11/14/2005	11:08 AM	Attended Public Meeting, 11/14/05

5/16/2005	10:14 AM	PIO responded to Glen and Maria Pawlowski: "Hello Glen & Maria, I wanted to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the next couple of weeks. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments, and you'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."

Contact Notes Date		Connie Jo Payne
	Time	Regarding

11/14/2005	9:33 AM	Comment Form:Connie Jo Payne3631 Lakeview DriveApopka, FL 32703A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	3:33 PM	<p>Comment Form 11/14/05:Jennifer Pelham241 Loch Low Drive / 135 S. Center RoadSanford, FL 32771I grew up at 135 S. Center Road between Wayside and 46. There has been so much development and traffic increase on 46 that I find it dangerous to get on it. I think the Northern route would be better even if it is longer. It's disruptive to fewer people's lives, homes for travel! I think it is a terrible idea to go down Wayside or 46!! I am moving back with my son and it is dangerous enough out there with out another damn road or over pass!!Rebecca C. Pelham135 S. Center RoadSanford, FL 32771I have lived at this address for 45 years. It is home. The southern route for the beltway would affect me and my life style. To think the northern loop would be the best way for you to go. OR go down where the old railroad track was, it is now a bike trail. That's where they planned to go at one time. State Road 46 is so heavily traveled to think it's foolish to that route as a beltway, Please use the northern route!!</p>

11/14/2005	12:30 PM	Attended Public Meeting, 11/14/05
------------	----------	-----------------------------------

5/10/2005	3:10 PM	<p>Rebecca Pelham 407-416-6239 said she got the letter from your company and wanted to be on the list. She lives at 135 S. Center Road, Sanford, 32771, no email or computer. PIO gave newsletter status. She asked why it fans out so at I-4? PIO noted there are so many issues and questions with where it should connect to I-4, that's why. She asked if it was going to come down 46? PIO said that' s a good possibility, but at this point we don't have an alignment, gathering data and that has yet to be determined. She said she doesn't know what to do. I have property that borders 46. It may be that I can't sell it, or can't get a good price for it if I wait. She said some people are selling land now for \$100k/acre. PIO gave study and construction timeline, noted public meeting tentative timeframe and that'll be her first look at where road could go. She asked where would meeting be? PIO noted not scheduled yet, but usually held in a school, community center or other public venue. She said would it be in Seminole County? PIO said yes, we're holding meetings in each of the affected counties.</p>

11/14/2005	3:19 PM	<p>Public Meeting Comment Form 11/14/05:Adrienne and Gerald Pence6910 Tallow Tree RoadSanford, FL 32771We live in Sylva Glade. Our backyard is backed up to 46. We hoped the parkway would be away from 46 on the opposite side. Our concern is the noise of traffic. Now on 46 the cars not a problem but trucks, large construction trucks are a numerous as half the cars. We hoped that 46 would be cut off at the bridge and used as a road to access all homes along the route. If a secondary road is put between us and the highway then please put a concrete high wall (Like the walls on I-4). We don't want to move as we love our home and property. However, the outcome of how you protect our property will determine our decision. Taking all trucks off of 46 would reduce the terrible noise they create. 417 is definitely needed. However a good solution would be to run it through the protected Wekiva and have a highway with no facilities, just a road and leave 46 as an access secondary Road. This way our homes would be protected. A road with no facilities cannot harm the environment but running a 6 lane highway at the back of our property and that of all our neighbors will devalue our homes. Thank you, for consideration of our concerns. Sincerely, Adrienne Pence</p>

11/14/2005	2:11 PM	<p>Public Meeting Comment Form 11/14/05:Gerald Pence6910 Tallow Tree RoadSanford, FL 32771I have a home that backs up to 46. I am very concerned about the traffic and the increased noise factor.</p>

11/14/2005	11:09 AM	Attended Public Meeting, 11/14/05
6/8/2005	5:39 PM	Pence, Adrienne apence@dwhomes.com responded to PIO email with newsletter: "Good evening Mary, thank you so much for the information, I look forward to any updates in the future. We live backing up to 46 in Sylva Glade and my dream would be that 46 would end up being a secondary road. No harm in dreaming :o) Hopefully we will know by the end of the year if we need to sell our home. The front of our home looks over a big lake and it is so beautiful and peaceful. If 46 became a secondary road then the roar of traffic decreases we would put a pool in our back yard and enjoy the back as much as the front and continue to live there. However if 46 becomes a 4 lane or something worse then I doubt we will get back all we have put into our home when we sell it. I guess we just have to wait and hope for the best. Thanks again and look forward to hearing from you in the future. Regards,"Adrienne T. Pence, Senior Sales ConsultantDavid Weekley Homes, Heathrow Country Estates O: 352-735-3091, Fax: 352-383-7997, Cell # 321-624-8891Days Off: Wednesday & Thursday"
6/7/2005	1:52 PM	PIO emailed newsletter to Adrienne Pence as requested.
6/7/2005	1:42 PM	PIO returned call to Adrian Pence 321 624 8891, who said she was wondering if you have some indication, I know everything isn't finalized. On 46 going west like Lake Sylvan Reserve, any idea what they think may be planned for that section?Do you think they are leaning toward widening 46 or are they going to do some kind of ... I was hoping they take traffic off 46 and go through some area not populated,. I wondered how it will affect property backing up to 46 and the Lake Sylvan Reserve. If your home backs up to 46 and if they widen the road it will make it even worse. PIO noted we'd be coming to the public involvement meeting in November with a number of options, including replacing S.R. 46, or possibly building road north or south of that and 46 remaining as only a local access or frontage road. PIO noted we'll need to get feedback on the various options to go from there. She said she'd definitely prefer, since their house backs up to 46, to have it as only a local access or frontage road. PIO asked if she got the newsletter? She said no, her neighbor gave her one. PIO got her info and said would place her on mailing list. Adrienne Pence, 6910 Tallow Tree Road, Sanford 32771Email apence@dwhomes.com - PIO to also email the newsletter --150 p.m.
6/7/2005	1:09 PM	Adrian Pence 321 624 8891 have a question for you, thank you and have a wonderful day.

11/14/2005	3:37 PM	Comment Form:Liz Perez1521 Overdale StreetOrlando, FL 32825A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006

school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Contact	Robert Perez	Orlando Sentinel
Notes		
Date	Time	Regarding
12/29/2005	12:56 PM	PIO emailed sentinel column item to CH2M Hill, Gary Skauff/PBSJ, Joe and Bryan/OOCEA.
12/29/2005	12:20 PM	PIO checked Sentinel for recent "This Just In" re: SCEA board meeting on Dec. 20. story on Sentinel website under SC news, This Just In and posted Dec. 25 as part of column briefs. "Parkway paths: Part IResidents of northwest Seminole County who feared their neighborhood might be leveled to make way for the new Wekiva Parkway are breathing easier this week. The Seminole County Expressway Authority threw out the alignment that ran north from State Road 46 along Orange Boulevard and connected with Interstate 4 near the Port of Sanford. That leaves two other alignments for the parkway, which would complete the western beltway. One would hook the proposed parkway into I-4 at S.R. 46 and a second would make the connection at the current interchange of I-4 and State Road 417. Both options are viewed as less than ideal. Seminole County officials have made it clear they don't like the S.R. 46 option because it would disrupt too many businesses. The alternative would plow through some of the priciest undeveloped land in the county Parkway paths: Part IIThe authority did ask planners to look at yet another choice, which would keep the parkway along State Road 46, but turn it south along International Parkway then east toward I-4. Planners have plenty of time to look at the options. A decision on a final route isn't expected before 2007."
12/21/2005	1:08 PM	PIO returned Robert Perez's call, let him know SCEA board voted to remove yellow alignment from consideration. Also noted their request to look at an alternative involving 46 to International Parkway to 417. He said he didn't do the original story because his editors wanted to wait until we were closer to deciding on an alignment. He said he might do a "This Just In" item following up that the yellow alternative in contention was removed by the SCEA board. He asked if that was an unusual move, what the SCEA Board did? PIO noted no, all part of the government input process. PIO gave other examples of restraints

on alternatives (city of Apopka, Seminole county on the former green alternative that would have hit Yankee Lake facility property). PIO noted this process is ongoing and the maps will be changing as all of this input is reviewed and analyzed. PIO noted in a couple of months we'll update the maps on the website based on input. He was thankful for the info.

12/21/2005	12:51 PM	Robert Perez/Orlando Sentinel left MSG sorry I missed you yesterday at the SCEA meeting. I had an interview that went long. But i wanted to find out what happened with reference to concerned folks even though their concern may be a little premature. 321-663-7449
12/16/2005	9:58 AM	PIO emailed Robert Perez/Orlando Sentinel: "Hey Robert, Checked with CH2M Hill, the consultant doing the study for FDOT and OCEA, and they said all of the properties hit by the yellow alternative are on the mailing list, and should have gotten the newsletter and public meeting invite. So I'm not sure why these folks wouldn't have received the info, unless some of them have PO boxes or something different than what is listed with the property appraiser's office? We did get about 150 non-deliverables back, out of about 8 000 pieces mailed for the meeting invites, but that's less than about 2 percent. Just FYI."
12/16/2005	9:13 AM	From: Brian.Manwaring@CH2M.com [mailto:Brian.Manwaring@CH2M.com] Sent: Friday, December 16, 2005 9:13 AM To: mbrookssr417@cfl.rr.com; David.Lewis2@CH2M.com; Mark.Callahan@CH2M.com Subject: RE: S.R. 429-Wekiva Parkway PD&E Study - Sentinel story FYI...I did a spot check for that area against our mailing list. Every parcel that I checked was on our list. We did receive about 150 undeliverable invitations back in the mail for the entire corridor. That's less than 2% of the mailing.
12/15/2005	6:25 PM	PIO emailed project team, Tom Percival, Joe Berenis and Bryan Douglas/OCEA PIO: "FYI Sentinel reporter Robert Perez is working on a story that will probably run on Monday advancing the SCEA meeting and Wekiva Parkway presentation on Tuesday. He said he has been contacted by a number of folks in the neighborhood being hit by the yellow / northernmost alignment between the Port of Sanford and Orange Boulevard. Apparently someone in the neighborhood has been leaving copies of the concept map on people's doors with the message written on that "they're taking your house!" or something to that effect. I emphasized to the reporter where we were in the study, and that some of the less viable alternatives will be coming off the maps in coming weeks, and that the yellow/northernmost alternative has a list of drawbacks. I also discussed the tentative overall project schedule and funding challenges, the need for the project, conservation land acquisition component and pros and cons of the various alternatives in Seminole County. He said he believes some of the residents will be attending the SCEA meeting and may speak out. There also seems to be an issue with some of these folks not having received the meeting notice or other project info, so the first they'd heard about it was the fliers placed on their doors. I stressed with him how early we are in the process and that an alignment has not been chosen, and that we're encouraging people to stay tapped in and involved in the process. I also encouraged him to have anyone from the public who calls him to complain to get in touch with me so we can make sure they're on the mailing list and they can get accurate info instead of rumor and innuendo."
12/15/2005	5:43 PM	PIO returned call to Robert Perez/Orlando Sentinel curious, have gotten number of calls from folks hinked up and worried that property is going to be taken for Wekiva Parkway, obviously it's going to happen with lot of properties. They're north of Orange Boulevard. Discussed northernmost yellow alternative. He said lot of people on northern alignment are freaking out. Sounds like they Planning a preview of SCEA meeting that will run Monday, you will likely have people there who will want to talk and say don't take our homes. PIO noted PD&E study schedule, overall project tentative schedule and funding challenges. PIO asked that he have anyone call me to get on the mailing list and get their questions answered accurately. Discussed need for project, environmental constraints, parkway and protection act, conservation land acquisition component. Discussed understandable trepidation and our desire to get accurate info out to folks. He said some people hadn't gotten anything about the project until flier left on their door about the homes being taken

PIO noted we sent info to everyone inside and just outside the study area, but it's possible some were missed, though that's not our intent. PIO noted letters sent to property owners in April, two newsletters and also meeting notices in late September-October. PIO told him to have anyone who didn't get info to call me to get on list. PIO noted we'd weeding through input and comments, evaluating alternatives based on feedback as well as engineering principles, residential and business impacts, wildlife, wetland, groundwater recharge and other criteria. PIO noted maps will be updated in next couple of months as less viable alternatives are removed, and any new suggestions that have consensus are added. PIO also noted I-4 connection issues of each alternatives, as well as how far east to bring the elevated expressway. He said he hadn't gotten through all the maps on the website. PIO said would email the SC map ASAP.

12/15/2005 5:10 PM Robert Perez/Orlando Sentinel MSG interested in speaking to you 321-663-7449 about the Wekiva Parkway. Call this evening or tomorrow morning.

10/14/2005	2:54 PM	EAC Comment Form:J. Petrella4990 Shoreline CircleSanford, FL 32771Unfortunately, there is little attention to the problem of over development which increases water run off, congestion, etc. This project will unduly affect residential neighborhoods and disrupt our community. If this project must go through (and there should be other alternatives such as mass transit and HOV lanes), then it seems to me the southern 417 route is preferable. It causes less immediate impact on over congests route 46 and would go through less populated areas. Deference should not be given to large developers. This is what appears to happen. Hopefully, campaign contributions do not pay a part in these decisions. The public is highly skeptical of the motives of big government.

10/14/2005 2:11 PM EAC Comment Form:Nancy Pettit5040 Stonebark CoveSanford, FL 32771The southern 417 route is the most logical choice for the Wekiva Parkway. Most of it goes through undeveloped land and therefore, would be the least disruptive to residents and businesses Plus, it enables a direct connection between the parkway and the greenway.The S.R. 46 route would cause much disruption all along the route and especially around S.R. 46 and the I-4 intersection, it also puts more traffic on I-4. This choice would put a major highway to close a proximity to businesses and residents. The area is already getting very congested from the building of condos, townhomes and apartments. The S.R. 46 route would only bring more traffic to the area.

4/26/2005	2:27 PM	PIO returned call to Joe Phillips 352-516-9840, 30608 south Coronado dr., Sorrento, 32776, email spikeblacksnake@aol.com. PIO noted newsletter and meeting status. He said I'm very interested because maps look like my house is in the way, with the maps I've received it's hard to tell. PIO noted we only had a study area at this point, not an alignment. Hope to finish study and have preferred alignment by early 2007. he said good, that gives me time so I don't have to panic. PIO noted even once study is done, with other phases we're looking at 2009-2010 before construction could begin. He was very glad to hear it and thanked me for the call back.
4/26/2005	11:24 AM	Joe Phillips left MSG I received letter from you that said if I want to receive info concerning the Wekiva Parkway. 352-516-9840, 30608 south Coronado dr., Sorrento, 32776 I would like to receive the info concerning progress and the route of the Wekiva Parkway. Thank you very much. Talk to you later.

Date	Time	Regarding
11/14/2005	3:21 PM	Comment Form:John and Melissa Piascik5406 Via Vento CourtSanford, FL 32771The southern route for the Wekiva Parkway is the most logical connection to the beltway providing E/W drivers the convenience of avoiding I-4.RT 46 is already over congested and adding 4 or 6 lanes to it with drivers accustomed to high speeds will make it dangerous. There are just too many commercial establishments on RT 46 for this to be a safe situation for drivers.Thanks for your consideration.

Notes Linda Piercy		
Date	Time	Regarding
11/14/2005	4:06 PM	Public Meeting Comment Form 11/14/05:Linda Piercy492 Still ForestSanford, FL 32771The 46 widening has the most possibilities. However, the road will need more exit ramps other than just Orange Boulevard and 46 exchange. It looks like it makes the most sense has minimal homeowner impact.I do not like that Orange route, there is no access to it for local traffic they must back track to I-4 to connect with it even though it's in their backyard.I like the yellow route for minimal traffic impact. It will have less of an effect on daily local traffic than the other 2 plans.

Notes Mario Pietrucci Hills of Lake Mary HOA		
Date	Time	Regarding
10/6/2005	6:30 PM	PIO provided Hills of Lake Mary HOA presentation. About 15-18 board members and residents attended, as well as Lake Mary Commissioner Gary Brender, SCEA. Subdivsion is

east of I-4 and south of 417 interchange. PIO gave presentation and provided business cards. Questions included likely connection to Interstate 4? PIO noted wide possible area. Brender noted would prefer connection at 417, but there are a lot of high-end homes that would be affected. He noted it would be less expensive to go north to Lake Monroe, but that would be two miles out of the way. Question about no tolls in Seminole County? Brender noted that was the previous thought, but that's being reconsidered. Brender said they want to avoid a configuration like Maitland Boulevard with a highway coming to a stop light at 441. He said they could look at a limited access road with access roads for residents to get on. Question who will make the final decision on 46A realignment? PIO noted Lake County has to buy into concept. Question re: funding. PIO noted PD&E study and part of final design funded, future funding has to be evaluated. Brender said he thought there was \$35 million available. He added the project could be fast tracked like St. John's River bridge, which wasn't supposed to be done till '12, and it's been open four years. Couple people asked for confirmation of public meeting info, which PIO confirmed Seminole info. Question if exhibit map was on the website. PIO noted yes, as well as meeting details. Brender noted SCEA has to approve what's in Seminole County. Question about how debate over septic tanks, etc., affects road development? PIO noted we're working closely with Wekiva River Basin Commission, which is making sure all the agencies follow the requirements of the Act. Noted for our part there are conservation requirements, design criteria, has to fit into environmentally sensitive area. Other agencies have their marching orders for the basin. Brender had to leave for another meeting. Question of when will we pick alignment? PIO reiterated PD&E schedule and overall schedule. Pat Blake of Trail Friends asked to be added to project update list. Her email is patblakeFL@aol.com. PIO noted initial alignment alternatives going through local government review, fluid process, some lines coming on and off the map. PIO reiterated would have first round of alternatives to present at the public meeting for their review and comment. PIO offered to return for an update in a few months if the HOA so chose.--705 p.m.

9/19/2005	5:16 PM	Mario Pietrucci responded to PIO email confirming meeting presentation: "There will be approximately 12 - 15 people. This is never very accurate but there are 7 board members and a representative from our management association."
9/19/2005	11:00 AM	PIO emailed Mario Pietrucci/Hills of Lake Mary HOA requesting confirmation they still wanted a presentation on Oct. 5." Mario, I'm writing to confirm we can make a Wekiva Parkway presentation on Oct. 5 at 630 p.m. for the Hills of Lake Mary HOA meeting, if that is still your wish. Please get back to me to confirm, and also let me know how many people you usually get at your meetings. Again, as noted below, we typically request to be first on the agenda for such presentations. I look forward to hearing from you. In case your board has changed it's plans for some reason, we have scheduled a public workshop on the project Nov. 14 from 5-8 p.m. at the Sanford Civic Center. Just FYI. Let me know - thanks."
9/11/2005	7:37 PM	PIO forwarded Hills of Lake Mary HOA meeting presentation request to Jerry McCollum/SC Engineer as an FYI as requested.
9/11/2005	7:26 PM	PIO responded to Mario Petrucci/Hills of Lake Mary HOA: "Hello Mario, Thanks for writing. I need to check first but I think we could make a presentation on October 5. The presentation and Q&A usually take no more than 30 minutes. We typically request to be first on the agenda at these meetings, FYI. I'll get back to you on or shortly after Wednesday (when we have our project team meeting). Also, how many people do you usually have at your meetings so I know how many handouts to bring?"
9/11/2005	11:25 AM	Mario Pietrucci/ Hills of Lake Mary HOA President emailed: "I mentioned you request to meet with homeowners groups about the Wekiva Parkway Project. The Hills of Lake Mary will meet again as a Board on October 5, 2005 @ 6:30 pm. for its regularly scheduled meeting. We meet at the Lake Mary Community Center on Country Club Road in the City of Lake Mary. You you give me an idea of how much time you would need for your

presentation so that I can schedule it for the agenda.You can contact me via e-mail at Truccione@aol.com or mpietrucci@seminolesheriff.org I can also be reached by cell phone at 407-341-9103 or 407-585-1630 after 3 pm.I look forward to hearing from you and thank you.Mario PietrucciHOA PresidentHills of Lake Mary828 Bright Meadow DriveLake Mary, Fl 32746

8/4/2005 3:46 PM Other board members listed by Div. of Corporations: Rick Brown, VP, 850 Bright Meadow Drive; Lisa Spillman, 421 Country Wood Circle; Allen Carter, 478 Autumn Oaks Place; Harold Bailey, 840 Lake Como Dr., treasurer; Bob Foley, 752 Lake Como Dr. Registered agent is Ellen Womack, Management, 225 S. 11/14/2005 1:44 PM Regarding Public Meeting Comment Form 11/14/05:Michael Pitercant6037 Feather LaneSanford, FL 32771If a beltway is to be built, it should be a true belt way and connect to 417. Noise containment should be a major concern. Access should be limited do as not to promote development if the environmentally serene areas.

Contact Notes  
Date Time  
11/14/2005 12:09 PM Regarding Comment Form:Maria Pizasso5112 Londondessy BoulevardOrlando, FL 32808A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the

following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Regarding

PIO responded to Jason Plourde email: "Hello Jason, Hello Jason, There is no alignment yet for the SR 429-Wekiva Parkway & SR 46 Bypass projects, so it is not possible yet to determine where the corridor will connect with Interstate 4. On Jan. 19 the FDOT and the OCEA officially kicked off the Project Development and Environment (PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others are now in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006. Keep in mind that not every property within the study area will be affected by these projects. We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass, hopefully by mid May. Please confirm your mailing address to receive the newsletter, as well as public meeting notices, etc. I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."

4/26/2005 8:27 PM

Jason Plourde jasonplourde@earthlink.net emailed: "Has the final route for the western extension been determined yet? The section that would connect I-4 to 429."

11/9/2005	10:49 AM	Public Meeting Comment Form 11/09/05:Monica Poorbaugh2243 West Kelly Park RoadApopka, FL 32712The maps and power point were very informative.If a choice is to be made between an interchange in Ponkan Road or Kelly Park Road, I feel we would be better served by placing the interchange on Kelly Park Road. Pokan Road is very curvy and has a lot more traffic locally due to existing development an the 2 new schools being built. It does not need additional burden an interchange would bring.Kelly Park Road is a more centrally located and direct route. It also allows the possibility of a direct route to Hwy 441 as well.Mark Poorbaugh2243 West Kelly Park RoadApopka, FL 32712An interchange on Kelly Park Road is much better than one on Ponkan Road. Kelly Park Road has much more commercial traffic. It is a much straighter road and more suitable for higher traffic density Kelly Park Road should be extended to the west all the way through to Hwy 441.
4/19/2005	3:43 PM	PIO responded to Mark Poorbaugh mark@prolificplants.com email: "I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. Contact Notes		Scott Powers	Orlando Sentinel
Date	Time	Regarding	
11/11/2005	3:42 PM	Scott/Orlando Sentinel responded re: run date for story: "I think tomorrow."	
11/11/2005	2:06 PM	From: Mary Brooks [mailto:mbrookssr417@cfl.rr.com] Sent: Friday, November 11, 2005 2:06 PMTo: Powers, Scott OSC)Subject: RE: SR 429-Wekiva Parkway PD&E StudyThat's accurate, what you have here. When will the story run, Sunday?	
11/11/2005	1:17 PM	PIO emailed Scott/Sentinel: "Scott,The Expressway Authority has about \$40 million for the Orange County portion of the PD&E, design and right of way acquisition budgeted over the next five years (work program FY 05/06 through FY 09-10). FDOT struck an agreement last year with the OOCEA to use \$4 million the FDOT had previously earmarked for a S.R. 46 PD&E Study for the Wekiva Parkway PD&E study instead. Don't know what other funding FDOT may have for this project; you would have to get that from them.I hope that addresses your questions. Please call or email if I can help you further.	
11/11/2005	11:30 AM	PIO emailed Scott/Orlando Sentinel: "Hey Scott, Just an update that I will have some numbers for you soon, if not right after lunch. Just waiting for some confirmation on the latest and will send your way. Will be able to give you info on the OOCEA portion, since FDOT is closed for the holiday."	
11/11/2005	11:23 AM	PIO emailed Mark and Gary seeking confirmation on budget numbers for Sentinel query: "Mark and Gary, Re: the Sentinel funding query, I agree with Gary that it makes sense to go with the EA numbers in the Five-year (05/06 - 09/10) work program approved in August, which were:PD&E \$1.46 millionDesign \$7.85 millionROW \$30 millionPrevious PD&E funds allocated, if I'm looking at the last plan correctly, were:04/05 PD&E \$311,000, making the total expected funds needed for the EA portion of the PD&E study about \$1.8 million. Is that correct?I've also got a copy of the Sept. 30, 2004 LAP agreement between FDOT and OOCEA to reallocate the \$4 million from the SR 46 PD&E study to the Wekiva study.Please let me know if these numbers are the ones I should provide to the Sentinel as soon as you can. Thanks!"	
11/11/2005	10:42 AM	PIO tried Gary/PBSJ back, EA has \$30 million for ROW, \$7.8 million for design, 1 mill for ea PD&E, work plan approved in august. PIO asked wasn't there money from the 46 PD&E FDOT was using for this study? He said yes, there's about \$3.7 million or \$4 million available from FDOT being used for their portion of PD&E; don't know if any follow up FDOT funds. PIO checked work program posted online and confirmed Gary's numbers.	

11/11/2005	9:52 AM	PIO returned Gary's call, left MSG to call me to confirm numbers so I can get back to Sentinel.
11/11/2005	9:49 AM	Gary left MSG re: PIO email, said OOCEA has \$1 million for PD&E their portion, another \$7 million for design for their portion, and another \$30 million for the ROW for their portion, Orange County.407-647-7275
11/11/2005	9:05 AM	Scott Powers/Orlando Sentinel 407-420-5441 called to get numbers on turnout last night and Wed. PIO relayed numbers as requested. He asked about mood of the meeting. PIO noted similar to Wed. which he attended, everyone recognizes safety issues had deficiencies on S.R. 46, difficulty getting in and out of their properties. Concerns about how it's going to affect them, some moved there to get away from it all, others have lived there for generations and don't want this sort of development in the country. Everyone seemed to recognize the tremendous growth in the area and that something needs to be done with 46. Most either don't want their property affected, don't want it to be next to them or to have to look at it, or if we take part of their property, they want us to buy them out entirely.He noted there seemed to be a resolve in the people he talked to and understanding that it could affect them. He asked if we'd seen last night or in general any outright opposition. PIO noted that other than the stalwarts who are against development in this area in general, most people's opposition is specific to their location, haven't seen any organized movement against the project overall.He asked how much money does DOT and EA have for this at this point? PIO noted would have to check on the numbers, know some was added in the last budgeting process this summer but that went through several drafts. PIO noted DOT and EA closed today, but would see what I could find out from the consultants, though they may have taken today off as well. He's working on a story for this weekend.
11/9/2005	2:40 PM	Attended Public Meeting, 11/09/05
11/9/2005	1:49 PM	PIO emailed Scott Powers/Orlando Sentinel as requested: "Scott,As discussed, here are PDF's of the overall alignment alternatives, one of the sample typical sections (which will vary greatly depending on which part of the project you're looking at) and some traffic statistics for 2025 showing the effects of nothing being done (no-build alternative), SR 46 simply being widened or installation of the Wekiva Parkway. Please call me if you have any questions as I'll be heading soon up to Apopka High School to set up. Thanks."
11/9/2005	12:20 PM	PIO dropped large map as requested for Scott/Sentinel.
11/9/2005	10:30 AM	PIO did interview and went over overall alternatives with Scott Powers, walked through project, what the different colored segments represented. He wanted to know specific issues, so we went over City of Apopka direction not to have alternatives east of Plymouth Sorrento Road, Mount Dora traffic concerns, LCWA Wolf Branch Sink Preserve concerns, environmentalists concerns about hitting Rock Springs Reserve and affecting scrub jay area, and wanting interchange moved west to Neighborhood Lakes. Discussed various interchange locations and local access issues, different alternatives/configurations for SC to get to I-4, project timeframe, cost, property owner concerns, fact that some alternatives have been removed and additions/subtractions likely based on continuing input. Discussed unique design criteria, conservation land acquisition, growth in area, needs. Etc. he said he's working on story for this weekend, plans to talk to people at meeting tonight. He requested copy of large map, as well as PDF of that and typical sections, which I said I'd email to him once back at the office.
11/8/2005	2:12 PM	Scott Powers called back, looked up initials on line. Had questions about where we were with the study. PIO noted development of initials, review by local governments in September and October, revisions and fine tuning, review by PAG and EAC, continued revisions and now heading to public meetings for comments and input from the public.He asked what the environmental community thought about the alignments. Pi noted they had detailed issues, such as one alignment bisecting a scrub jay area, concerns about the parks, future conservation acquisition. PIO note the conservation acquisition was major step in getting them on board to move forward with the project, noted new garden coal

conservation easement, now known as Wekiva mitigation bank. He asked about interchanges. PIO gave some info, but suggested we get together to look at overall initials together, would be easier. He said he didn't know what his editor wanted; don't think they want something for tomorrow. He's got something this afternoon from 2-4. Said his editor isn't in yet. PIO said to call me when editor gets in and he knows what time he wants to meet, and I'll come by. He said would do.

11/8/2005 11:15 AM PIO called back Scott Powers to check his schedule. Said his editor still hadn't come in yet, and thought his afternoon appointment could run long. He suggested meeting tomorrow morning at 1030 a.m. at the EA office. He said he'd do a brief for tomorrow's paper previewing public meetings, and then follow up with a longer story. PIO noted that works out because guys were still working on boards for tomorrow's meeting but should be able to get a display by tomorrow morning.

11/8/2005 9:41 AM Scott Powers/Orlando Sentinel left MSG that he was now handling Wekiva Parkway and to call him re: initials. 407-420-5441. 942 a.m. Scott Powers emailed: "Mary - Please give me a call today if you get a chance. I'd like to get caught up on the Wekiva alternatives. Thanks. Scott" 945 a.m. PIO returned Scott's call, left MSG with web links for initials in case he didn't already have it and told him to call me to discuss.

11/9/2005 9:39 AM Public Meeting Comment Form 11/09/05: The intersection at 441 and Plymouth Sorrento Road is very dangerous. One reason is that Highland Avenue is a part of this intersection next to the Kangaroo Express Convenience Store. We feel that perhaps something could be done to block off that small section of Highland Avenue at the above noted intersection  
Thank you for your consideration of our request.

Regarding  
11/14/2005 3:13 PM Jeff and Donna Price 781 Whooping Crane Court Sanford, FL 32771 I find it hard to believe

that any route for the proposed Wekiva Parkway would not take it directly to meet the existing 417 interchange at I-4. This southern 417 route simply makes more sense. Having lived in Atlanta, GA from 1988 through 2003, I can tell you that having an "outerbelt" not directly intersecting its match will cause more traffic headaches in future years. Thank you for your consideration.

11/9/2005	9:04 AM	Public Meeting Comment Form 11/09/05: The environmental community was of the understanding that the roadway would be bridged to the greatest extent possible through public lands. We continue to believe this is necessary. (Not Elevated)The alignment should not extend trough the public lands- Rock Springs, but should be located on an expanded existing ROW to the greatest extent possible. There should not be an interchange in the middle of the environmental lands, but rather to the west. There should be only one roadway though the public lands. Need to purchase four parcels listed in parkway act.

11/14/2005	3:41 PM	Public comment form: Cynthia K. Quaile22242 Coronado Somerset DriveSorrento, Fl 32776-9543Why can't they do this on land that does not have businesses and people's houses? It looks like all of Sorrento will be wiped off the map just for a road to go through We have a road. If you build this all our hard work is in vain. My cousin and I built the pool cottage and helped with carports. We also have done work on the storm shelter. According to one map we won't even be able to get out to go buy groceries or pay bills. On another map we are wiped right out. Where are we supposed to go? We have handicap living at our place. We started out with 1) General Archibald Winfield Spring 92 years old died 2) Mrs. Grace Anna Ayers 81 years old when she died. We still have Susan Ethel Corrington 48 year old brain injured and left side is partially paralyzed. People in this kind of condition we have cared for. We had to down size from 5 acres and now we have a land split with an acre. Trying to keep it up. Two women trying to do the major part of the work with occasional outside help. I'll tell you what, You won't get it with out forking over Big Bucks and I mean major bucks. On one way there is no way to get out to adjoining road. Why can't you use pasture land and land that is not developed rather than wiping out a community in the name of progress? How many businesses are to be lost- That incoming tax dollars? Did you think of that? Who is going to pay for what is lost? Are you? Is it coming from your pocket book? Is Jeb Bush going to shell out money of his own pocket?

Notes		
Date	Time	Regarding
11/14/2005	2:49 PM	Comment Form:Marlene Quinn1092 Shawnee TrailWinter Springs, FL 32708A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the

following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Contact	Mark Rachlin	The Spivey Group
Notes		
Date	Time	Regarding
1/10/2005	4:04 PM	Mark/Spivey Group said a couple months back he got map with 429 corridor showing proposed parkway, S.R. 46. He said it wasn't an aerial; it had breakdown of parcels, and corridor going through it. PIO asked him to confirm it wasn't an aerial? He said it was from the S.R. 429 Working Group Feb. 2004. It shows proposed Wekiva corridor, S.R. 46 bypass corridor and future land use and study transportation area. Shows 4 laning of S.R. 46. The new map on the website now, western connector construction news, and program elements delineating each section. This map shows western beltway completion program, sections 1-3. The one from early 2004 identified the parcels, didn't go to I-4, but was very detailed, had some hydrology, land use, etc. He was looking for a conceptual for the Wekiva Parkway that was similar to the 429 Working Group document. PIO noted we're in the data gathering mode, and that I'd asked and confirmed this morning we hadn't done an overlay showing parcels and other details yet like the one he mentioned. PIO noted we had not updated the 429 working group exhibit. PIO relayed hope to have some prelim alternatives by summer and should be drafting this type of info, and I could forward to him when available, or we'd probably also put on the website. PIO got his contact info for that and general project info.

Date Time Regarding  
11/10/2005 11:55 AM Public Meeting Comment Form 11/10/05: Marcia Ransdell 2525 Temple Drive Winter Park, FL 32789. I urge the authority to select an alignment that has the least possible impact on present conservation lands, such as one that would encroach on Rock Springs Preserve. I'm particularly concerned that interchanges placed in the middle of 46 would have a devastating effect on wildlife in this sensitive area and be directly contrary to the intent provisions of the Parkway Protection Act. Such a decision would make a travesty of the tremendous effect that has gone into the act and its implementation to date.

11/14/2005 1:56 PM Public Meeting Comment Card 11/14/05: Jeannie Rape 425 Kimberly Court Sanford, FL 32771. Concerning the most south proposal from I-4/417: Although my home is not directly in the path it is too close for comfort. My concerns include noise, light, tree buffers, etc. I am 2/10 of a mile from Orange Boulevard where it would cross @ wayside. Currently there are 2 large estate properties between us and the proposals. Will the current landscaping tree buffers, etc.) be affected? Would more be included in the project? I feel like all mentioned above would destroy the quality of my community (sandwiched between two major highways). I am also concerned with how close the road seems to be with Wilson Elementary. I am in favor for the middle or northern alternative.

11/14/2005 11:19 AM Attended Public Meeting, 11/14/05

5/26/2005 8:46 AM Jeannine Rape responded to PIO email: "Thank you."

5/26/2005 8:11 AM PIO confirmed she was in database and responded to Jeannine Rape jeannine.rape@wachovia.com email: "Jeannine, I wanted to confirm that you are on the mailing list for the SR 429-Wekiva Parkway & SR 46 Bypass PD&E Study. The project newsletter went out earlier this week, so you should receive it soon. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments. You'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."

5/25/2005 3:00 PM PIO received email from Jeannine Rape jeannine.rape@wachovia.com : "Please place me on the mailing list for the project newsletters and other public information relating to the Wekiva Parkway PD&E Study. Thank you. Steve and Jeannine Rape 425 Kimberly Court Sanford, FL 32771"

Contact Notes Gino Ratti

Date Time Regarding  
11/9/2005 12:32 PM Attended Public Meeting, 11/09/05

8/9/2005	4:55 PM	PIO prepared newsletter and study area map and sent to Gino Ratti with my card as requested.
8/9/2005	4:30 PM	PIO returned call to Gino Ratti 407-834-0723. He asked if Wekiva Parkway was to be 8 lanes? PIO noted we don't have an alignment or configuration yet, just in PD&E study. He asked is it going to be tolled? PIO noted at this point only orange county portion that EA is working on will be tolled; rest in Seminole and Lake counties will be free. PIO asked if he was on the project mailing list? He said I get periodic things from the EA, but haven't seen lot going on in Wekiva Parkway division, and very little on Maitland Boulevard Extension though I understand supposed to start building next year.Doesn't use email. 1140 Virginia Avenue, Altamonte Springs, 32701Have an email account number but don't know what it is. He wants to be in list for both, have rental properties in Apopka. He also asked if we were bridging 441? PIO asked which end? He said east end at Maitland Blvd. now. PIO noted there is a loop interchange with a bridge planned for that location. He said good. That makes sense; the ground is high there and you won't need much fill. He said he used to be a builder.8 lanes of Wekiva Parkway would be really nice, have been proponent of I-4 realigning like they did with i75 in Tampa at malfunction junction, they redid 75 to go further south, start at Hillsborough county line. Original 75 is now 275 and the major part of the road runs around Tampa and down south to Sarasota to Naples before going across the state. I think that should be done with i4 with fed interstate money. Could pick up EA road south of 441 in Apopka and make all that interstate. I believe they could use 8 lanes especially if i4 backed up, you could still get where you're going but wouldn't be stopped still. Even if it's a toll road I predict it'll get busy, but would get busier if it was free. PIO gave PD&E study and overall project schedule. He said he's been seeing what Ea, but hasn't been seeing the east EA shows study corridor running north, but don't have anything on the east west part. Just got something week or two from EA but doesn't show anything going east and west. PIO asked if he was perhaps confusing it with the old 429 NW extension project, which has been scrapped? He said he didn't think so but went to check. I'm not sure how this is accomplished, but know in North Carolina they are building roads without an interstate designation, but in future they become interstate. PIO gave status of PD&E and public meeting. PIO to send him last newsletter and study area map PIO asked if he knew the properties were in the study area:? He said trust me they're way inside. He said his original issue was septic tanks and having to change them, properties perk really well and all my land is fouling up --442 p.m.
8/9/2005	4:18 PM	Gino Ratti, returning your call, interested in info on both Wekiva Parkway and Maitland Boulevard Extension and I'll call you back at another time.

Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road. 2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame. 3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties. 4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road

interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	11:17 AM	Regarding Public Meeting Comment Form 11/14/05:Scott Richards5212 Michigan AveSanford, FL 32771I understand that you can not make everyone happy when developing a major interstate though a populated areas. I would however hope that you consider the most effective route rather than the cheaper route. I am particularly concerned with the North I-4 junction. I recently purchased a property on a dirt road to escape everyday traffic. What I do not understand is how an interstate can run through declared wetlands behind my property, yet I cannot even trim a tree on my property as it is mostly declared wetlands. Most of the people I have spoken with tonight at this meeting think it makes sense to connect the 429 to the 417 at I-4. Connecting to I-4 at any other location will create a "bottleneck" on I-4 between the two junctions. Thank you, Scott Richards
1/14/2005	10:59 AM	Attended Public Meeting, 11/14/05
3/22/2005	7:11 PM	Scott Richards responded to PIO email: "MaryThank you very much for your response. I understand that there is a long way to go, but I would like to be aware of any potential plans. Please add me to your newsletter:Scott Richards5212 Michigan AveSanford, FL 32771Will this newsletter notify me of public meetings? Feel free to add my e-mail to any e-mail newsletters as well. Thank you again."
3/22/2005	8:19 AM	PIO responded to Scott Richards: "Good morning, Scott,You are correct in that we don't have an alignment yet for the S.R. 429-Wekiva Parkway or S.R. 46 Bypass. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. You've probably already seen the study area conceptual available on the Expressway Authority website www.ocea com, along with other project info. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at the first public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). Subsequent public involvement meetings are tentatively scheduled for summer 2006 and a public hearing some time in late 2006. We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out in April If you send your address, I will add you to the project database to receive the newsletter, meeting notices, etc.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."
3/21/2005	7:44 PM	From: Richards [mailto:Richards@cfl.rr.com] Sent: Monday, March 21, 2005 7:44 PMTo: MBrooksSR414@cfl.rr.comSubject: SR429 part 3 extensionHello Ms. BrooksI am writing with interest/concerns about the proposed routing of the SR 429 part 3 extension. I understand the map shows a wide area since the route is not yet decided, especially near I4 and the 417 north end. I am wondering how I can obtain more details on the proposed route as it becomes available. I also would like to know how the public (such as myself) can give input concerning the route of this road. I am concerned as I have recently just moved to a home that backs onto what I understand to be "stated owned" forest near the St. Johns River. I would appreciate any information you can provide me as it becomes available.Thank you for your time.Regards,Scott RichardsRichards@cfl.rr.com

11/10/2005	9:02 PM	Attended Public Meeting, 11/10/05
7/18/2005	6:15 PM	PIO mailed last newsletter to Marcia Rioux as requested.
7/18/2005	11:45 AM	Marcia Rioux 352-516-2679 I'm on the list for the 46 bypass, for eminent domain. Neighbor said we should know something by November?If we found out in November that we were in the way, we still wouldn't know until early 07 which study had been selected to be the final one? PIO noted that's correct. PIO also noted that after preferred alignment is selected, there is still likely some changes to be made during final design due to a host of variables. We had bought property in north Fla., we're anxious to get up there, but at the same time if it's going to take until '07, I'd like to be able to sell the house.Some time in November we'll know whether we're in any of the alignments or not, and we can take it from there. I have property and house plans; we're going one way or another. This place is getting way too crowded; it's going to be like Altamonte before too long.Didn't get the newsletter. Have an attorney retained; don't know if he got it. PIO will send last newsletter that went out, noted it had a lot of the same info, timeline, etc. she said she'd appreciate that.30734 Buttercup Lane, Mount Dora, 32757 she doesn't have email.
6/1/2005	2:06 PM	PIO returned call to Marcia Rioux 352-516-2679, left MSG that was told that mailing house sent out newsletters last week. PIO asked her to call me back, noted I had electronic version if she wanted to send her email address, and that I also had a call in about whether newsletters actually went out.
6/1/2005	1:50 PM	PIO responded to Christy/Pecora re: newsletter: "Okay, thanks Christy. I got a call today from a woman asking the status of the newsletter. It concerned me a little since I thought they went out a week ago Monday - what do you think?"
6/1/2005	11:20 AM	Marcia Rioux in Mount Dora, spoke to you on 4-20 about the expressway progress, you mentioned there was newsletter coming out in mid-may, was wondering if that newsletter was available and looking for an update on the project.352-516-2679 thanks Mary. This is Marcia.
4/20/2005	11:01 AM	PIO returned call to Marcia Rioux 30734 Buttercup Lane, Mount Dora Fl 32757 352-516-2679, left MSG confirming she's on list and newsletter status.
4/20/2005	9:10 AM	Marcia Rioux MSG I would like my name and address put on the list for newsletter for the Wekiva Parkway study. Address 30734 Buttercup Lane, Mount Dora Fl 32757 352-516-2679 thank you

Notes Patricia & Jo Roberts		
Date	Time	Regarding
11/2/2005	3:00 PM	PIO called Joe and Patsy Roberts to relay info 407-328-1560, left MSG that their slanted rectangular parcel on Wekiva Park Drive is several parcels north of the blue alternative alignment in that location. PIO noted I was able to determine this by enlarging the map we'd discussed earlier to about 200%. PIO noted that alternatives are being added and removed on an almost daily basis, so they need to stay in touch and keep checking the maps on the website, but at this point they're in the clear. Left my number if they need to call me back.
11/2/2005	2:36 PM	PIO researched location of Joe and Patsy Roberts parcel location at 132 Wekiva Park Drive in Sanford via SC Property Appraiser site. PIO confirmed their parcel is several parcels north of the alignment alternative in this location.
10/31/2005	11:39 AM	PIO tried to call back Joe Roberts couple times. PIO reached Joe Roberts, who said their address is 132 Wekiva Park Drive, almost ¼ mile from the road. We're on the river. I'm retired and Patsy's in her last year of teaching. We have a piece of property in Oviedo we used to live on that is prime to be sold, but if we're going to lose this place that would change what we do with the other one. PIO asked if he'd seen the alignment map on the

website? He said they did, but still couldn't tell if it was north or south of 46. PIO noted did they try to zoom in? He said yes, but didn't give enough detail. PIO noted those are the concepts we'll have at the public meeting, but will be much larger scale so they should be able to make out parcel impacts. PIO took his address and said I'd also try to find out in the meantime if their parcel was affected by any of the alternatives. He said if I'd leave a MSG if he's out he'd appreciate it.--1144 a.m.

10/31/2005	11:35 AM	Joe Roberts left MSG 407-328-1560 my wife Patsy and I live about 700' north of 46 on the river off Wekiva Park Drive. We're just very concerned about where the route is going. Is there enough detail of what you're going to show us on the 14th in Sanford to have an idea of whether it's going to impact our property or not? I understand these are not final routes, but I can't imagine it's going to deviate much on the very narrow corridor at the bridge. I'm not going to be home the rest of the day until late, so let me try you back rather than you trying to call me. Thank you very much.

11/14/2005	9:36 AM	Attended Public Meting, 11/14/2005
4/21/2005	11:36 AM	PIO returned call to Perry Robinson 407-324-5115 1509 Thornapple Lane, Sanford 32771 perryrobinson@cfl.rr.com I've lived through this before in Missouri, they went through and took our land by eminent domain and gave us a small fraction of it. It's a terrible deal. We just bought the house, don't even have a fence yet, 200 people in subdivision in the same boat. Is this something the Crosswinds would have had to know about? Nobody disclosed this to us when we bought the house. I thought there was a disclosure requirement. This is hugely disappointing. I have lived through this before, was the most discouraging thing I've ever been through.It's going to lower the value of the property with no compensation. We already have noise from the highway. We even get noise from the railroad. When I'm looking for a house I try to stay as far as from the highway, etc. as possible. PIO said I understand where he's coming from, but track record is that property values increase with these types of major improvements. PIO noted discussion with one homebuyer who said their subdivision was using the future project as a marketing tool, promising an exit right at their entrance, though we don't even have an alignment yet. So we've got all kinds of philosophies and concerns out there to deal with.H asked if I could tell him if it'd connect to 46 at I-4, then it would miss him though he'd still see the roadway and hear the noise. PIO said can't say that at this point, host of variables, can't rule out anything, it may be that the 417 is the best connection. Noted November meeting with initial alternatives. He said where could he get info sooner than the newsletter? PIO noted info also posted on EA website, gave address. He reiterated his concerns about not being able to sell the house, etc. PIO said we'd do our best to make this a better process for him than the last one he went through.--1152 a.m.
4/21/2005	8:32 AM	Eric? Perry? Robinson 407-324-5115 would be interested in knowing when public meetings going to be about extension of Wekiva Parkway. Letter was dated March 30, guess it wasn't mailed for a month. Hope we haven't missed the meetings. Please give me a call.

5/6/2005	12:55 PM	PIO returned call to Leon Rodgers to confirm. Don't have email. What's the deal? What is this? Is it just to finish the beltway or are they going to widen 46? PIO noted don't have an alignment yet, so all of that has to be looked at. We're in the study phase, and surveyors etc are out gathering data. He said 30 years ago they're talked about doing something to 46 and there were surveyors out here, but nothing ever happened. The road has gotten busier that's all. PIO noted growth in that area also reason for this project. PIO noted unlike in the past there is some funding this time to at least get the ball rolling. He said why are you paving over everything, we need someone to get some money to build some more land out here. PIO noted the road will serve the increasing population in that area from all of the new subdivisions going in; noted there's no shortage of developments under construction or being permitted. He said there'll be an end when we run out of land. PIO noted that doesn't appear to be happening in that area any time soon. PIO noted newsletter and public meeting schedule. He said thanks for the call back.
5/6/2005	12:45 PM	Checked mailing list and confirmed Leon Rodgers' on the list, zip 32757.
5/6/2005	9:07 AM	Leon Rodgers 2640 S.R. 46 in mount Dora, I'd like to get on the mailing list for this project of the EA development in this area through the Wekiva. 352-383-6968

Notes		
Date	Time	Regarding
7/28/2005	11:02 AM	April Rogers responded to PIO email: "Mary, Thanks very much for the information! April"
7/28/2005	10:15 AM	PIO sent April Rogers response along with updated study area map: "April, I've entered your current address into the project database. You'll need to let me know when to switch over to the other address for project info. I'm glad you found the website info helpful. Please continue to check the site from time to time for updates. The amount and impact of project roadway noise is definitely an element of the Project Development and Environment (PD&E) Study, which is currently underway, and will also be examined once the project reaches final design. Until we have an alignment, however, it is not possible to determine what noise - if any - you would experience from the new roadway, or what noise control measures might be needed. You will certainly be able to comment on this at public meetings also. There is an E-PASS discount offered to frequent customers. If you pay an Expressway Authority toll 40 or more times in one month, you receive a 5-percent discount on all your tolls. If you pay an Expressway Authority toll 80 or more times in one month, you receive a 10 percent discount on all your tolls. The discount is computed and credited to your account at the end of each month. Discounts are computed by individual E-PASS transponder. You will only receive the discount for E-PASS transponders which meet the usage requirement. If you have several transponders in one account, not all of your transponders may qualify for the discount. Regarding the actual toll costs expected for the SR 429-Wekiva Parkway, that has yet to be determined. Again, you will certainly be able to comment on that at public meetings. And we will provide proposed toll information once available for review and comment. I've also entered your emails into the project database for public comments, which is shared with the OOCEA, FDOT and project team. We will soon be posting an updated study area map on the website. I've included the most recent version here for your information."
7/28/2005	10:02 AM	PIO pulled EPASS discount program info from website to include in response: "The E-PASS discount is offered to frequent customers. If you pay an Expressway Authority toll 40 or more times in one month, you receive a 5-percent discount on all your tolls. If you pay an Expressway Authority toll 80 or more times in one month, you receive a 10 percent discount on all your tolls. The discount is computed and credited to your account at the end of each month. Discounts are computed by individual E-PASS transponder. You will only receive the discount for E-PASS transponders which meet the usage requirement. If you have several transponders in one account, not all of your transponders may qualify for the discount."
7/28/2005	9:50 AM	April Rogers responded to PIO email: "Hi Mary, Thanks for your speedy reply. I also appreciate the fact that you and the Expressway Authority have made so much

information available to the public via the website. We are currently living in an apartment until our house is done this November. So I will give you both addresses:Currently - April Rogers 180 Mangrove Bay Ct. #104 Ocoee, FL 34761November hopefully) - 2924 Ponkan Meadow Dr. Apopka, FL 32712I know that it is absolutely essential for Northwest Orange County and Apopka to have the Parkway built and I am excited to see that plans are still underway. However, my main concern is with noise that expressways typical bring. Our neighborhood (Wekiva Run) is directly off of Plymouth Sorrento Road to the east. There are also more developments to be built along Plymouth Sorrento. I hope that noise control for residents along the study area will be among the priorities for the committee. If you have information regarding noise control I would love to hear about it - otherwise this would be a question that I can pose at public meetings.My other concern is with the cost of tolls. It seems unfair that residents who live in Apopka have to pay \$1.00 one way on 429 to get from 441 to the Turnpike. I am hoping that the tolls for the 429 extension will not be as high. I am very new to the toll system and understand that they are necessary for an area experiencing as much growth as Orlando - but who can we voice concerns to regarding the amount that Apopka residents must pay to get to Orlando and also the fact that there seems to be no discount offered for E-Pass customers?Thanks again for your time.April Rogersaprilrogers@earthlink.net

7/28/2005 9:03 AM PIO responded to April Rogers aprilrogers@earthlink.net : "Hello April, The location you mentioned is certainly within the study corridor for the SR 429-Wekiva Parkway & SR 46 Bypass. Send me your mailing address, and I will add you to the project mailing list for meeting notices, newsletters, etc. I'll also make note of your email address for any information that we might be emailing as well. Look forward to hearing back from you Please let me know if you have other questions or concerns."

7/27/2005 8:44 PM April Rogers emailed: "Hi Ms. Brooks, I recently viewed information regarding the Wekiva Parkway & Maitland Extension projects on the Expressway Authority website. My family and I are in the process of building a home at the corner of Plymouth Sorrento Rd. and Ponkan in Apopka. We are very new to the Orlando area and are eager to learn about this project. I would like to know how we can be informed of public meetings regarding this project. I realize that information may be published in local newspapers, but wanted to know if a contact list is being formed via email or other means?Thank you for your time Sincerely, April Rogers"

Regarding  
Comment Form:Jamie Rogers1723 Canterbury CircleCasselberry, FL 32707A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3)

Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

	Attended Public Meeting, 11/10/2006
6/6/2005	3:04 PM
	PIO responded to Mark Rollins email: "Hello Mark,The schedule for the Project Development and Environment (PD&E) Study has not changed. We are still in the data gathering process, and within the next month or so hope to begin drawing up some initial alternative alignments. We should have these ready for public review and input in meetings in each of the counties in November. Subsequent evaluation and refinement of the various alignments, additional public meetings, etc., are still expected to conclude with us having a preferred alignment in early 2007.Not every property within the study area will be affected by this project. Given the subsequent project development phases (final design, permitting, etc.) and funding still needed, it is unlikely that construction would start before 2010-2012. There is only funding for a portion of the Right of Way needed for this project at this time, so the right of way acquisition process also is expected to be several years off. Please bear in mind, however, that the phasing schedule is highly subject to change due to any number of variables.If your property is ultimately needed for this project, discussions about the eventual vacating of your property following a settlement would be included in the negotiations. I can't give you an average timeframe, but it is the practice of the Expressway Authority to allow ample and reasonable time for homeowners to relocate in those circumstances. I hope that addresses your questions. Please feel free to call or email with other questions or concerns."
6/5/2005	8:04 AM
	-----From: MarkIslandPond@aol.com [mailto:MarkIslandPond@aol.com] Sent: Sunday, June 05, 2005 8:04 AMTo: MBrooksSR414@cfl.rr.comSubject: SR 46 By PassI understand that the 429 expressway is being staked out faster than originally expected. My questions are about the SR 46 by pass. First question, has the time frame been moved up from 2 years to much shorter time frame. Second question is what is the average time to vacate the property if

acquired by eminent domain. These two questions will affect my decision for rebuilding.  
Thanks for the reply Mark Rollins - Buttercup Lane - Mount Dora

11/23/2005	4:25 PM	PIO returned call to Bob Rosen chairman of board of folius sertoma club in Apopka. 407-774-6279, let him know I'm confirmed, emailed George and also spoke to Joyce. PIO noted I don't need audio visual, will just do oral presentation with boards and handouts. He said they're looking forward to it, just wanted to be sure.	
11/23/2005	4:10 PM	PIO returned call to Joyce Bocker, PIO noted I'd responded to George Collins previous calls and email confirming that I was attending, noted I'd try to have handouts for the 25 attendees he mentioned. PIO said would only do oral presentation with boards and handouts since I'd be by myself; can do 30-45 minutes. PIO noted I can do presentation while they're eating because I have to get to another meeting right after. She said we'd work it out, can park in front to unload and then go park. She said George did not tell her	

I'd already confirmed. PIO noted responded to his email on Nov. 16. 930 a.m. she said George must have forgot.

11/23/2005 3:11 PM Joyce Brockner/Sertoma Club left MSG I called earlier this morning and left you a MSG. need confirmation if you're going to make it to our meeting on Tuesday the 29th. Let me know whether you need me to set anything up for you. 407-889-5305 please leave a MSG.

11/22/2005 11:19 AM Bob Rosen left MSG he's the chairman of board of the Folius? Sertoma Club in Apopka. We're very pleased to understand you'll be our speaker on Nov. 29 at 12 p.m. George Collins got in touch with you on that and I did see the email you sent. Do you need any audio visual assistance? If so give me a call. 407-774-6279 that's my home number I'm retired. I'll assume you do not if I don't hear from you.

Contact  
Notes Judith Rosenbluth

Date Time Regarding  
10/3/2005 4:01 PM Judith Rosenbluth 407-788-7294 said thanks for returning my call twice. My daughter was sworn in to the bar today so I haven't been home as much as I would be normally. PIO noted I knew she had to meet with her realtor today, that's why I wanted to get back to her. She said they're looking at a house that backs up to Markham and Orange Boulevard, and they're concerned about the proposed closeness of the beltway. She said they hard there would be access at Orange? PIO said if she's asking about an interchange at Orange I hadn't heard discussions of that. Noted discussions so far about interchanges at I-4, Ponkan Road in Orange County, Sorrento where bypass and Wekiva Parkway connect. PIO noted there are discussions about it possibly going from elevated expressway to at grade arterial at some point, and don't know if could end up with access or intersection in that location. PIO noted all of those decisions yet to be made; we're very early in the process. She said the house is in Heathrow so she doesn't think it'd be taken, but she doesn't want to end up next to it either. She asked if there was anything I could look at now to see if that area is affected? PIO noted the initial alternatives are going through local government review, and routes are being taken off and added almost daily in this process. PIO noted what she saw today in no way guaranteed to still be the case tomorrow, so would really hesitate for her to see anything until this is done. PIO noted first round government review will be done in time for our public meetings in November if she wanted to attend. She said they had to make a decision by this Wednesday. PIO noted understand lot of people are in that situation, but we're just too early in the process to answer these types of questions definitively. She asked when would construction start? PIO noted overall project schedule, no construction likely before 2012 if not longer. PIO noted any affected property owners would be paid fair market value, and noted land prices only seem to be going up. PIO also noted design criteria part of Wekiva Parkway and Protection Act re: buffer and fitting in with surrounding environmentally sensitive area, so it's not supposed to be your typical highway. PIO noted can't guarantee however you still won't be able to hear or see it even so. She said she understood and thanked me for the info. She said she'd relay to her husband and he may want to call to discuss further tomorrow.--412 p.m.

10/3/2005 2:32 PM PIO again tried Judith Rosenbluth 407-788-7294, left MSG to call re: her questions.

10/3/2005 12:12 PM PIO returned call to Judith Rosenbluth 407-788-7294, left detailed MSG about public meetings, no alignment yet, initial alternatives going through local government review, very fluid right now, some alternatives being taken off, some being put on for further study, first round of alternatives will be available at meetings. Gave web address to get meeting details or told her she could call me back. Also noted PD&E schedule and could be years before project is finally developed.

10/3/2005 9:00 AM Judith Rosenbluth left MSG my husband and I looking at a home in Heathrow that backs up to Markham Road and close to Markham and Orange Boulevard. Understand Western Beltway going through there or near there and I just wanted to know what the proposed route was. Please give me a call at your earliest convenience Supposed to get back to the

homeowner some time today, Monday. 407-788-7294 Thank you.

Date Time Regarding  
11/14/2005 4:33 PM Public Meeting Comment Card 11/14/05:David Rowland5400 Ohio AveSanford, FL 32771The southern route is by far the best route to use. Not only is it shorter it provides a direct route to the goal of connecting to 417 and it also avoids congestion of I-4 in an area that is already over loaded most of the time. Traffic coming from west 46 will not have to get on I-4 to reach 417.The northern route is the worst option not only does it go through wet lands, wildlife habitat the intersection with I-4 will require going over a rail road in environmentally endangered area (St. John's River) it will cause massive traffic problems at the St. John's River Bridge and I-4 until it joins 417. This will cause I-4 to be expanded at increase cost. The northern route is over 2 times in length and this itself will greatly increase the cost. The central option will be very congested at the intersection of SR 46 and I-4 and does not meet at 417 which is the ultimate goal.The southern route is the best option because it goes directly to the goal of 417 and goes through fewer developments.

11/14/2005 3:20 PM Public Meeting Comment Form 11/14/05:Dave and Tonya Rowland5400 Ohio AveSanford, FL 32771We live off of Orange Blvd. and farmed the land where the Preserves of Astor Farms are located for 25 years. I have lived in Sanford all my life (60 years). Also my mother was born here and my parents and grandparents lived on First Street.When we decided to build here it was a dream come true. We not only built but our 3 children also own land around us. We do not want this parkway to be built on or near Orange Blvd. If there is anything we can do to prevent it- WE WILL DO IT!!Please don't destroy the closeness of our family!!

Notes		
Date	Time	Regarding
9/8/2005	3:15 PM	PIO emailed Tim Hurd/Sanford Middle School noting meeting site selection: "Hello Tim Just wanted to let you know that the project team for the Wekiva Parkway has decided to go with the Sanford Civic Center for our public meeting. Thank you so much for being willing to work with us, and I will keep you posted on the project progress. Thanks again!"
8/22/2005	3:00 PM	PIO and Brian visited Sanford M.S. and met with Tim Hurd, who said he would not charge us any fees. Gym space is very large and open, and we could use the bleacher for seating area if desired, also could set up viewing area on stage. About 150 parking spaces up front, another 50 by the gym, plus the bus loop and - if not raining - grassy field. He has wireless mike available and some folding tables for sign-in, etc. great space though it is well east of the study area.
8/22/2005	11:05 AM	PIO responded to Tim Hurd/Sanford M.S. "Thanks Tim. We're checking on Heathrow Elem. At 230, and will try to get to your place as close to 3 p.m. as possible. See you then."PIO forwarded Hurd email to Brian FYI, let him know I'd responded.
8/22/2005	10:42 AM	-----Original Message-----From: Timothy_Hurd@scps.k12.fl.us [mailto:Timothy_Hurd@scps.k12.fl.us]Sent: Monday, August 22, 2005 10:42 AMTo: mbrookssr417@cfl.rr.comSubject: RE: S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study - Public Meeting site visitIf you could make it 3pm that would be great. After 3:30, the traffic for student dismissal starts to back up around the school.
8/22/2005	10:29 AM	PIO emailed Tim Hurd/Sanford middle School, copied Brian: "Good morning, Tim,I hope you had a good weekend. My colleague Brian Manwaring of CH2M Hill would like to do a site visit of the school this afternoon and meet with you briefly to discuss hosting the public involvement meeting for the Wekiva Parkway. As noted we're looking at either the week of Nov. 7 or 14th, and the meeting would be in the evening. Please let me know if it would work for us to stop by around 3 or 330 p.m. today - thanks!"
8/19/2005	4:21 PM	Timothy Hurd 407-320-6157 called back, said he was doing dismissal, that's why he missed me. He said the cafeteria is kind of small, don't have the parking for 300 people, when we have parent night, have about 120 staff, our parking lot's full. There's a public park across 17-92. that being said, auditorium is gym with stage at one end, in the bleachers can seat about 800, have about 200 folding chairs, air conditioned, ADA, it's a rubberized gym, there is a sound system. PIO described anticipated set up, he said gym would be nice for that. Could keep bleachers pushed in and you'd have larger area. Could do a viewing. Pretty open both those weeks Timothy is an assistant principal. Mark Russi is now the principal. No fee for this; this is important for the community. Could set up , school lets out 4 p.m., buses gone by 410, could set up anytime after 430. Have about 12

folding tables, 5', let him know what nightTimothy\_hurd@scps.k12.fl.us

8/19/2005 3:45 PM PIO emailed Timothy Herd (sp?), principal Bill Gibson and assistants Mark Matthews and Mark Russi re: meeting space request: "Good afternoon,I'm following up a voicemail message that I left for you this afternoon at Sanford Middle School to find out what sort of cafeteria or auditorium availability you might have for a public involvement meeting one evening in either the week of Nov. 7 or 14, typically beginning at 7 p.m., for the SR 429-Wekiwa Parkway & SR 46 Bypass Projects. As you may know, these projects are being studied for west of I-4, and we are preparing initial alignment alternatives to present to the public for review and comment in November. We would expect perhaps 300-400 people for a public workshop gathering. We would need some tables and chairs but the room would be set up largely as an open space with exhibits stationed throughout. Please let us know your space capacity and availability, as well as any restrictions or requirements we would have with regard to fees, documentation, security, set up times, etc. I have attached a copy of the Project Development and Environment (PD&E) Study area map for this project for your information. I look forward to discussing this with you further and meeting you in the near future. Please don't hesitate to call or email with any questions about the project as well."

8/19/2005 3:40 PM Sanford Middle School 407-320-6150 745 a.m. - 415 p.m. Receptionist referred me to a Timothy Herd? x5617, left detailed MSG re: meeting space needs.

Contact Notes	David Salanitro	The Province Group
Date	Time	Regarding

1/27/2005	1:10 PM	David Salanitro with The Province Group said he's trying to get projected timeframes for construction. "I know there's still planning and designing for the Western Beltway Completion. Portion of land we have is in Lake County between Round Lake Road and Plymouth Sorrento, a little south of 46. The blue swatch does encompass part of our property."PIO noted phasing, just started PD&E Study last week, and that's a 2-3 yare process to come up with prelim alignment. PIO noted with final design and ROW acquisition, we're looking at 2010-2013 for any construction to begin.He said "We have plan to develop the property in terms of residential development, trying to understand if we have planned development program underway, could that be thwarted by plans to run the road through there. We could be long approved by 2010, wondering if they're .... We'd be receiving our approvals by mid-06. It would be several hundred homes. Could they just go around us?"PIO got his contact info for project mailings and meeting notices: 1801 E. Colonial Dr., Ste 207, Orlando, 32803 dsalanitro@provincegroup.com407-541-2008 He said that's for the S.R. 46 bypass? PIO noted project was being planned all as one, including Lake County portion. He said that's about what he was hearing, but didn't know if they would get approved for their development with the road going in.PIO noted for example on the MBX, there were planned developments and to my knowledge they were not thwarted by the pending road. It was more a matter of the EA either having to negotiate with them for market value, or try to avoid the development. PIO noted particularly with the Wekiva Parkway being so far out, I would find it hard to believe local municipalities would stop development for it, especially since we don't have an alignment. PIO noted he has to make his own business decision, and get advice from his lawyers and consultants, but if I were him I wouldn't stop the process. He said he appreciated the info PIO also noted we hope to have some alternative alignments for public review at meeting in November of this year, that will be a better time to address his questions.

Date Time Regarding  
10/14/2005 1:17 PM EAC Comment Form:Mark and Sandra Salter5267 Shoreline CircleSanford, FL 32771As residents of the Lake Forrest subdivision, we would like to encourage the Seminole County Expressway Authority to reserve judgment on the best route for the proposed Wekiva Parkway to I-4 until the independent impact study is complete. We are confident that study will confirm that an expressway on or near S.R. 46 is a terrible idea. The congestion in this area is already extensive and will get much worse with the planned construction projects in the area. Thank you!

Contact Notes Christina Sanchez  
Date Time Regarding  
11/14/2005 3:12 PM Comment Form:Christina Sanchez695 Ashford Oaks Drive Apt 102Altamonte Springs, FL 32714A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Date Time Regarding  
10/14/2005 1:18 PM Silvia and Danny SanchezRetreat at Wekiva 1550 Thornapple LaneSanford, FL 32771As a homeowner of the area, I want to express my concerns about this project:1. S.R. 46 is

already congested, placing the interchange location at the I-4 and 46 is going to make traffic worse.2. Business at 46 will be seriously affected if the interchange is placed at I-4 and S.R. 46. Also, potential business will stop considering Lake Forest as a target. It is more logical to use the existing 417 and connect it to the S.R. 46 as the southern route. This is going to alleviate the traffic from the beginning of the S.R. 46 because people going to Sorrento, Mount Dora, etc. Do not have to take 101C to go home / work, they will keep on 417 or take the exit from the I-4 to take the Wekiva Parkway. Thanks.

8/15/2005	1:30 PM	Brian Sanders/OC Public Works 407-836-8699 said they're updating their comp plan and want to include the Wekiva Parkway project. Do you have an alignment we could include? PIO noted no alignment, just working on initial alignments alternatives at this point. PIO asked if he had updated study area map? He said if that's what's on the website, yes. PIO noted we hope to have alternatives ready to start shopping around to local governments for review/input, I think, in September. PIO asked what's his timeframe? He said he doesn't do the update; someone else does, but he thinks it's soon. PIO said let me know and I can find out absolute earliest we could release the initials alternatives. He said but it won't be final? PIO said not even close; there'll be a number of them, don't know how many they're up to at this point. He said they have to show something, though he understands we are in the kind of gray area. He understands it's not final until it's final. PIO confirmed we're relatively early in the PD&E phase. He said they'll probably just show the corridor at this point then.--141 p.m.

Notes		
Date	Time	Regarding
9/2/2005	11:45 AM	Brian M./CH2M copied PIO on emails re: Lake County meeting site: "Dear Kelly - Thank for you for considering our application. I've just e-mailed Gloria, and will provide you a completed application early next week. Prior to evaluating the application, I hope we can discuss some of your concerns over the phone. Just to give you some background about the project and the meeting, the Wekiva Parkway is an important project that will affect many people in Lake County. The project itself stems from the Wekiva Parkway Protection Act signed into law by Governor Bush to address transportation demands in the area while protecting the Wekiva River ecosystem. All local governments impacted by the project, including Lake County and the City of Mt. Dora, have and will continue to be involved in the development of the roadway. I understand that you have very relevant concerns related to the use of your school as a site for the public meeting. We can discuss those concerns next week, however I can assure you that we and our clients, the Florida Department of Transportation and the Orlando-Orange County Expressway Authority, will do everything in our power to run a smooth and incident free meeting. I also understand that you ultimately have to make the best decision for your school and for the city. Unfortunately, we have very few choices of practical facilities in the area and Mt. Dora Middle School provides the best facility in a convenient location for the citizens of Lake County who are impacted by the project. I will give you a call early next week to discuss our application. Please keep in mind during your deliberation that we are time constrained and need to coordinate this meeting (as well as two similar meetings for citizens in Orange and Seminole Counties) in the upcoming days so that all impacted parties can be notified in a reasonable timeframe. Thank you for your help and consideration in this matter.Regards,Brian

 To: Sanders, Kelly  
 Subject: Public Meeting Location  
 Dear Mr. Sanders - Thank you for speaking to me about holding a Wekiva Parkway public meeting at your facility in mid-November. The facility would meet our needs in terms of size and location. Unfortunately, I did not get a chance to examine the parking situation. Can you please tell me what sort of parking capacity you have? Someone in the office mentioned about 125 spaces (front and back). Can you elaborate? Is there any overflow parking, or would people be able to park in the surrounding neighborhood? Also, what dates would the cafeteria be available during the weeks of November 7th and the 14th (weeknights)? We would only need it for one evening. Lastly, would I need to fill out a Lake County application to use the facility, or do you have a specific application for the school? Thank you for your help!

Laura Sanders

Date Time  
 3/7/2005 8:40 AM

Regarding  
 PIO responded to Laura Sanders: "Hello Laura, We do not yet know how the S.R. 429-Wekiva Parkway & S.R. 46 Bypass will affect your area as we do not yet have an alignment. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. There is a study area conceptual available on the Expressway Authority website www.ocea.com, along with other project info. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. Please provide your mailing address so that I can add you to the project database to receive the newsletter, meeting notices, etc. I hope you find this info helpful. Please feel free to call or email with other questions or concerns."

3/7/2005 8:00 AM PIO received email from Laura Sanders rlsanders@power1.com : "I presently reside and work in the Sorrento area. How will the connector affect the town of Sorrento as far as SR 46 is concerned? Will there be roads constructed avoiding the center of town and where will they connect?"

Regarding

5/24/2005 11:55 AM Ken Sandon 973-438-4941 said he got PIO's messages. He owns property on Yankee Lake

His address is 2338 Baypoint Road, Polson, MT 59860 No email. He can get to the Internet PIO gave him address for website. HE said he has been getting info from Gray Robinson associates. They said if there's eminent domain involved, they're in that business. So I've owned the property since 1977, 15 acres on north side of 46. PIO gave him project status, timeline and noted would confirm he's on the list. He said he had not received any project info. PIO noted the project newsletter is in the works and he should receive that. He said he would like to give some comment now: As you look at Highway 46 and past Orange Avenue going to the west of the Wekiva, the property is on north side of 46 at Lake Markham Road is primarily county owned and not developed. To me the logical place is on the north side, and if you do that it goes right over my property. I put it together when I was a broker in SC with intent of having it when I was old. Now I'm 81. I was going to retire on it and keep my pretty wife happy. --1205 p.m.

5/23/2005	3:35 PM	PIO emailed Gary Johnson/SC Public Works, copied Mark/CH2M Hill: "Hello Gary, I understand that Ken Sandon of Montana contacted you re: the SR 429-Wekiva Parkway & SR 46 Bypass and the effect on his property on SR 46 near Yankee Lake. Just wanted to let you know that I'm trying to get back to Mr. Sandon (left a couple of messages) to address his questions and concerns. In the future, please feel free to direct any public calls or emails regarding this project to me. Have a great day!"
5/23/2005	3:30 PM	PIO checked SC excel listing for Mr. Sandon: 22-19-29-300-002B-0000 SANDON KENNETH M & LAWANDA, 2338 BAY POINT RD, Polson, MT 59860
5/23/2005	3:27 PM	PIO again tried Mr. Sandon, left another MSG for him to call me.
5/23/2005	1:33 PM	PIO returned call to Mr. Sandon, left MSG to call me or email re: project questions and issues.

Contact		Maureen Sapp
Notes		
Date	Time	Regarding
12/28/2005	10:11 AM	Worked on comment form response for Maureen Sapp. "Maureen Sapp 3103 Kelly Park Road Apopka, FL 32712 RE: Receipt of Public Meeting Comment Form for Wekiva Parkway PD&E Study Initial Alignment Alternatives Dear Maureen, Thank you for attending one of the public workshops for the Wekiva Parkway Project Development and Environment PD&E Study, and for submitting a public comment form. We appreciate your time and interest. Your comments will be evaluated along with the hundreds of other public comment forms received, as well as input from local governments. Regarding your query about the historical marker on your property on the project exhibits, there apparently was an error in the preliminary historical information that we got from the state files. The dot should have been on the property at 3135 Kelly Park Road, which contains a residence of potentially historic - but as yet unevaluated - significance. In the coming months, the initial alignment alternatives will be analyzed based on public input, as well as on engineering evaluations to create a set of more viable alternatives. During this process, some alternatives will be removed from consideration, while new alternatives also might be added. The resulting viable alternatives will be presented at the next public workshops in the summer of 2006. Based on public and government input, and analysis of the viable alternatives, a preferred alternative would be selected. Public hearings are slated for late 2006 or early 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you will see the text link for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the

development of this major transportation improvement. Sincerely, ...".

11/9/2005	4:07 PM	Public Meeting Comment Card 11/09/05: To ensure the least possible environmental impacts, the proposed interchange in Lake County at SR 46 should be moved west to avoid taking public lands (Seminole Stated Forest and Rock Springs Run State Reserve). Then the alignment of the WP should track SR 46- why take more land when there is

already a road there? Neighborhood Lakes property should be purchased for this road and conservation purposes and the proposed alignment should be shifted west and through this property rather than through already existing public lands and wild life corridors. It make sense to use Pokan Road interchange as opposed to the one purposed for Kelly Park since KPR does not access 441 directly. The logical connection to I-4 is a multifunctional interchange with I-4 and 417, if this done now in a few years it will be proposed at a higher expense. Thank you, for considering my comments.

3/21/2005	10:35 AM	PIO emailed Tanner Schofield/3125 Ondich Road Email <a href="mailto:raven2001mom@yahoo.com">raven2001mom@yahoo.com</a> as discussed: "Hello Tanner and Cathy, As discussed, I'm writing to give you an update of where we are with the Wekiva Parkway and S.R. 46 Bypass Projects. We do not yet know how these projects will affect your area as we do not yet have an alignment. The Project Development and Environment (PD&E) Study, being done jointly by FDOT and OOCEA, will determine the road alignment and configuration. The PD&E Study officially kicked off Jan. 19, and we are currently in the data gathering and analysis stage. There is a study area conceptual available on the Expressway Authority website <a href="http://www.oocesa.com">www.oocesa.com</a> , along with other project info. Keep in mind that not every property within the study area will be affected by these projects. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer homebuyers' and property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables. We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out in April. As discussed, I have added you to the project database to receive the newsletter, meeting notices, etc. I hope you find this info helpful. Please feel free to call or email with other questions or concerns." --1035 a.m.

3/21/2005	9:53 AM	PIO called back Cathy Schofield 407-889-0069, spoke to her husband Tanner live about 1500' west of Plymouth road, we went to the "secret squirrel meeting", it was stated that the y Sorrento bypass was going to cut right across our backyard. Tanner Schofield 3125 Ondich Road, Apopka 32712 Email <a href="mailto:raven2001mom@yahoo.com">raven2001mom@yahoo.com</a> I've been to every one of the meetings of both committees, have been to governor's signing, and have been involved since the outset. Meeting at Calgary, he was told by someone formerly with EA said bypass Sorrento would take place in my backyard, just north of Ondich road north of the county line. Parcel #5 just due north of me, there were four parcels and ours was supposed to be the 5th, 740 acres. PIO noted we don't have an alignment yet, went over project timeframe, in data analysis, first meeting on initial alternatives in November. PIO noted there was a previous project, SR429 extension, that did have some proposed alignments, maybe that's what was referenced? He said in the last meeting he want to the chairman referred to the project as the Wekiva Ocala Parkway, so it's all very confusing. PIO offered to send him a study corridor map but he said he had everything we'd ever put out on this project. PIO noted we're working on the newsletter and I'd add them to the database. He said he'd appreciate anything you could send, and appreciated me calling back. He said a lot of times people just try to give you the brush. PIO noted we understand homeowners have questions and concerns, but it takes a while to get through this process. PIO to email him an update on where we are, recapping what we discussed --1003 a.m.
-----------	---------	--

3/21/2005	8:25 AM	Cathy Schofield left MSG we're off Plymouth Sorrento Road, wondering about 429, when are they going to start acquiring land and when is the final route going to be taken so I know if my property is going to be affected. 407-889-0069
-----------	---------	--

Contact	Tanner Schofield	Northwest Orange County Improvement Assoc.
Notes		
Date	Time	Regarding
10/27/2005	1:50 PM	Mr. Schofield called PIO to find out why the alignment was not on the letter that just went out. PIO stated she was unsure but alt alignment was on the website. Said that we should name the parkway after the Apopka mayor while he is still alive.
10/12/2005	9:50 AM	PIO returned call to Tanner Schofield 407-889-0069 some of the board members feel there would be hard feelings about Dec. 8 meeting during Christmas season, want to reschedule NOCIA presentation for Thursday, Jan. 12 at 7, dinner between 7-730, 745 around there for presentation. He invited PIO to come to dinner tomorrow night. PIO noted I have plans for tomorrow, but can make the Jan. 12 presentation, works better for me. He apologized for the change. He's trying to get new life into this organization. Noted story in Apopka Chief that they're looking for new members. He also asked about public

meetings. PIO gave him schedule, noted we will have the initial alignments for them to see at that point. He asked if I'd be at the Oct. 17 meeting; I said yes, of course. He said on that alignment map there is a red line that goes up from 441 toward Plymouth Sorrento Road. Is that the alignment for Wekiva Parkway? PIO noted no, just a line to show there's a continuation or another project that would be adjoining the extension. He said he thinks the alignment for Wekiva Parkway has already been decided, has seen some maps and looks like same as they were talking about a year or so ago. PIO noted some of the alternatives do mirror what was being considered in that area for the old 429 NW extension project. PIO reiterated nothing has been decided, initial alternatives going through local government review, and changes occurring in that process. PIO noted city of Apopka has said they won't approve anything east of Plymouth Sorrento Road, so won't likely see anything on that side at the November meetings. He said that's what he'd heard, and noted some on the west side could affect his property, but that's neither here nor there. He said he's been talking to Mayor Land about this also. He noted they have 132 members, probably half are my age (70) and then some, and a few are approaching the 100 year old mark. PIO noted we're working on the latest newsletter that will have the meeting info, and it's also posted on the expressway authority website. He said with their membership, they're not to keen on computers and rely more on word of mouth. He thanked me for the call back.--959 a.m.

10/11/2005	2:55 PM	Tanner Schofield call me today or at your convenience 407-889-0069
9/13/2005	2:39 PM	Tanner Scofield 407-889-0069 called back. PIO asked if he got my email after we last talked. He said His wife has the email address, and he's in a house with a wife and 3 teenagers and isn't allowed to touch the computer. He said she probably got it but hasn't given it to him yet. PIO noted Brian Manwaring with CH2M Hill, who's doing the study, would be handling the presentation, and spelled it for him. He said he needed the name for their bulletin notice. He asked if Brian had attended the various committee meetings? PIO noted didn't know for sure, maybe some of them. He said he thinks he knows him. PIO noted I tried him at the office but must have just missed him. He said he had to go to a doctor's appointment. He had operation last Tuesday, and taking oxycontin, just came from the doctor. Scofield (CQ). PIO said if he didn't get the email from his wife to let me know and I'd get the info to him. He said thanks a lot.--244 p.m.
9/13/2005	12:00 PM	PIO returned call to Tanner/NOCIA, left MSG that I'd emailed him re: the person who would be presenting at their Dec. 8 meeting. PIO asked him to confirm he'd received the info either by calling back or answering the email.
9/13/2005	9:53 AM	Tanner Scofield/NOCIA 407-886-0014 here until 12 p.m. give me a shout I'd appreciate it.
9/6/2005	1:48 PM	PIO tried to return call to Tanner Scofield, left MSG on cell 407-832-4856 to call me re: meeting request, noted I was heading into a 2 p.m. meeting, so try me after 3 p.m. noted I may be out of town Dec. 8 but trying to confirm.
9/6/2005	11:24 AM	Tanner Scholfield/NOCIA 407-886-0014 left MSG the corn festival people, in response to the mail out you sent out, I was asking for the Dec. 8 meeting. I will be leaving the office in a very few minutes but I will be home. You can give me a call at 407-886-0069 if you could give me a call after lunch hour I'll be there all afternoon
8/30/2005	12:50 PM	PIO returned call to Tanner/NOCIA 407-886-0014, x11, left MSG that Dec. 8 date would probably work, give me a call back with time, location, and to confirm. Left my number again.
8/30/2005	9:57 AM	Tanner Schofield left MSG, I talked to you before. I think you have my home phone number. Let me give you the number here at NOCIA. We're here Tuesdays 9-12 407-886-0014 this is in answer to your letter re: public involvement program. We'd like to invite you to second Thursday of Dec. meeting, Dec. 8, we would like you to be a guest speaker with your presentation or whatever you wish to have.. I'm on board of directors

here at NOCIA. Understand we're going to have a meeting in November and maybe we can have a follow up in December. At your convenience please give me a call.

Date	Time	Regarding
11/10/2005	9:11 AM	Attended Public Meeting 11/10/05
6/3/2005	2:00 PM	During EAG meeting, Keith asked if this was the schedule for PD&E? Mark said yes; project is combined EA and DOT. Keith asked can you say how that relates to PD&E and eventual construction? Mark said study is a joint one, and there is a unique situation in SC. Legislatively SCEA is responsible for determining any alignment in SC; we will be working very closely with SCEA. It is composed of all the county commissioners and one city commissioner in LC. There is no money identified for subsequent phases currently, but basic thinking that EA would build OC portion of the Wekiva Parkway, and DOT would build bypass and remainder of Wekiva Parkway. OC portion would be tolled, rest would be non-tolled; that's part of the recommendation of WRBCC. Mark noted as far as the timeframe, the EA wouldn't be in position to build until after 2012, based on the current financial picture. DOT at this point has no money identified for subsequent phases, however, with political focus on the project and support and advance funding on other projects recently approved, the thinking is there would be some funding available at some future date, also with the federal funding. They are looking to include this in the SIS; they are putting application together right now and that could mean some additional funding Gary Skaff said EA work program has some funds for design and ROW for the parkway, but no construction dollars. that's why construction won't likely begin before 2010-2012. Not all the ROW is funded, just some....Keith Schue - as you go through alternative alignments, stormwater improvements that would have to be designed as part of the roadway system, would identification of stormwater ponds be part of the alignment? Mark said we won't identify specific location but will identify locations for compatible facilities. If the master plan is developed enough for us to look at regional options, those are things we could look at on a parallel course. When we start to get down to 2-3 alignments we

would carry some options....Keith Schue - is the realignment of 46A part of the PD&E? Mark noted yes, includes proposed realigning of CR 46A. The idea is the Wekiva Parkway would replace 46, along with that realigning 46A and tying to the Wekiva Parkway, along with access to remaining private properties in the park. Would suggest the details of those will be looked at but won't be really looked at until we get down to the viables.

11/9/2005	11:19 AM	Public Meeting Comment Form 11/09/05:Willmar A. Paulette Y. Schultz3443 Paulette StreetApopka, Fl 32712Comment: We believe that it is more appropriate to 4-lane Plymouth-Sorrento Road and 6 lane 441 before resorting to yet another toll road. This would be more socially and environmentally responsible. Assuming that your organization rejects that minimally invasive solution to getting solution to getting Lake County commuters to south Orange County, we propose that you look at a more western route, through areas currently in pasture, but for sale to developers. We propose a route west of Effie and closer to the dump on Golden Gem. This would mean that only a few would be disrupted, and that development would be most affected. We would like to point out that we live in a platted subdivision (Emory Smith) of long standing. Further, our land is zoned residential - Agriculture, allowing a nursery or horses, for example, but no mobile homes. Our lot in particular is wooded and the entire area is high and dry. Thus our land is irreplaceable. We operated a small nursery here for a few years and had to stop due to family member's illness. However, we are both Orange County Public schools teachers and intend to restart the nursery for retirement supplemental income. We had also hoped to build on our 12 ½ year home for Paulette's elderly mother's sake. We have a relatively small mortgage at an excellent rate which we can afford. However, one route is proposed directly over our land and all 2 ½ acres. Our rural lifestyle is unusual for most but characteristic of this area. We are good stewards of the land, and often see wildlife including tortoises, hawks, and even a bald eagle. Our small subdivision is truly a neighborhood worthy of preservation and should be considered over future houses in any developments. No interchange should be located on Kelly Park, a dead-end road, because it will lead to urban Sprawl. We cherish our quiet lifestyle. If your proposed toll road is not moved further west, then our last hope is that you build on the easternmost proposed route turning east at the southernmost proposed route. This would preserve our neighborhood, if not our rural lifestyle. However, if you build over any property on Paulette Street, then by all means build over any property on our beautiful lot. If you move the road next to us it would be tragic than taking our land. We have no desire to live next to a large roadway and would prefer to forced to mover rather than live next to your road.Attached pictures of home.

11/2/2005	10:35 AM	PIO returned call to Paulette Schultz, left MSG that don't know at this time how wide road would be in a particular location, would depend on future design, how many lanes, whether there were ramps or toll plaza or retention ponds, etc. PIO noted that's a question we'll be able to answer better further along in the process.
11/2/2005	10:14 AM	Paulette Schultz 407-886-6954 home, 884-2242 x450 school left MSG appreciate you calling me back. 3344 Paulette Street. Question is how wide of an easement do they take? On the map shows one version shows from my property line to the line, is that the full extent of it ... would my property be taken either way? Is it 800' or 300' for these roads? I don't know because I try to avoid them; that's why I moved to the country. I know you have a high volume of calls but if you could let me know that I might be a little less shocked the way I was when I opened the paper and saw my house was under target.
11/2/2005	9:00 AM	PIO returned call to Paulette Shultz 407-884-2242 voicemail 450 Rock Springs Elementary, left MSG apologizing for difficulty in reaching me, noted was on vacation and have been trying to return the many calls that have come in.
10/31/2005	3:04 PM	Paulette Shultz 407-886-6954 left MSG I teach and I'm on my way home. I'm trying to find out how wide of a path the roadway requires. On the map it shows my property line from one line to the other on one choice and off my property on the other one. wondering if both would take my property anyway I'm not sure. My address is 3414 Paulette St.
10/31/2005	9:34 AM	Paulette Shultz 407-884-2242 voicemail 450 I teach?? Left MSG I'm calling about expressway extension going up to Wekiva Parkway, one of the lines goes exactly over my house, property line to property line, and the other one goes beside me. how wide is the roadway that you take? I know how wide my property is, but is that the extent of it? or if it were the more easterly boundary they went with would mine be taken also? My address is 3443 Paulette Street. I'm in shock and I'd appreciate your call back. Thank you.
4/18/2005	1:53 PM	PIO responded to Wilmar & Paulette Schultz Gatorknightz@aol.com email: "I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the first half of May. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review the initial alternative alignments, and you'll also receive that meeting notice."
4/16/2005	2:50 PM	Wilmar & Paulette Schultz Gatorknightz@aol.com emailed: "Dear Ms. Brooks:We are definitely interested in any and all newsletters and public information materials regarding the Wekiva Parkway. Our home is in the target zone, much to our dismay, and we want to stay informed. As school teachers, we are not always able to go to meetings during the day, but our interest is profound. We built our home 12 years ago, and it is heaven to us. Please help us stay informed. Thank you! Wilmar & Paulette Schultz 3443 Paulette St Apopka, FL 32712407-886-6954e-mail: Gatorknightz@aol.com"

11/9/2005	8:54 AM	Public Meetin Comment Form 11/09/05: I have been told in one breath that I am in the right of way of the 429. For over 5 years this has been going on. Enough!! Why would you put the 429 the southern by pass west of Effie east of Round Lake Road. There is nothing there. Let's face it enough smoke screen, why displace people when there is plenty of open land. As one time it was going to finish west of Effie. What Happened? I've even heard that this has been called "Wekiva Ocala Parkway" how about that!! Let's call the Maitland by pass Apopka by pass the John L Leard Parkway. He is the oldest mayor the longest in office, mayor.

11/9/2005	1:26 PM	Public Meeting Comment Card 11/09/05: At the exchange for the Maitland Blvd extension at 441/ Plymouth Sorrento Road / Highland Road. (see rough map on map) it is an impossible interchange. How during rush hours and very questionable at all other times. Our suggestion solution would be to cul-de-sac highland / Old Dixie Highway to avoid traffic going straight onto P/S Road and realign and rebuilding Boy Scout onto US 441, also north of Boy Scout the road could be realigned to carry much of the new development north and northwest of Errol Estates. Please call my cell for further clarification. Sincerely, Don Sharp.

Notes		
Date	Time	Regarding
11/1/2005	11:15 AM	PIO returned call to Wayne Shelton 407-880-5021, 407-880-5020 re: property at 6900 Swan Road. We've got it, talked to someone, not going to be in town for the meeting. Looks like our lot is in the blue. Has seems initial alternatives map, associate sent it. we just have ... People can't stop progress. This is my dream, my home and my retirement. I'll adjust. Looking , I' don't know whether to build the house or not, know you can't answer the question . property is right to Fazio property, my back yard 36 acres faces. It's like upside down L shape. PIO noted the map is on website and can enlarge.When are you folks going to start buying us out , know we're couple years out. You're allowing the rich to get richer and the poor to get poorer. Now the interest rates are still low, but two years from now, when the project does get underway , the interest rates are going to be higher. If we know it's going to happen, can we set aside something to protect the old farmers. The rich can set on their land till the last minutes and sell to you. I just run horses and cows. I'm going to lose on this either way. You're lessening the value of my property by posting this, but have to wait two years. There should be funds set aside for ... grant set aside for proposed areas, or some type of locked in interest rate on a grant. You're rewarding the bad and not taking care of the good guys. You got a bunch of farmers out there that are already affected; I can't sell the property now, maybe someone would buy it to flip in a year or two, but I would have to tell them about it. normally nor one is going to want to buy this property until you guys decide what you want to do. PIO gave timeline and noted no funding yet for ROW or construction, looking 2012 at the earliest for construction. He said oh, he thought we were starting the project in 2007. PIO noted no, we're very early in the process on this. PIO noted there are a lot of people in similar situations thinking about buying or selling. PIO noted without knowing the actual

alignment, not possible to begin acquiring ROW or knowing where it's going exactly. He said well, that was helpful and he appreciated the call. PIO reminded him to check the website where he could enlarge the alternatives map to see his property, gave web address and link. We discussed he won't be able to attend the meetings. PIO noted we plan to post the materials on the website also after the meetings, so check it from time to time. he was thankful for the call back.--1131 a.m.

10/28/2005	1:30 PM	Mr. Shelton called very upset that he received the letter stating that there were upcoming public meetings. He stated that he will not be able to attend. PIO stated that Mary will follow up and he still obtain information about the progress from Mary. Owns 6900 Swan Road.
8/23/2005	3:15 PM	PIO returned call to Wayne Shelton / works at Able Cargo Transit 407-880-5020 o, said he wasn't sure who to call, lives in Sorrento. Trying to decide whether to sell or build a home, actually in the middle of divorce so not sure whether we're going to sell it, or I build a home or she build a home there. I've been out of town for a while and she's been out of town a couple months. The property is at 6900 Swain Road, between 435 and 437 and north of 46. PIO noted we did not have an alignment, gave status of PD&E Study. PIO asked if he was receiving project info, was he on the mailing list? He said he got a couple things, one like a month or so ago and another a while back. PIO asked for his mailing address to ensure he's on the list. PO Box 969, Sorrento 32776. He noted Commissioner Sindler's property border part of my property line. PIO noted commissioner's property was definitely in the project study area. PIO asked for his email address to send him some info. Started to give it to me - angell - but then said never mind. He said with the divorce going on he just needs to know what to do with the property. PIO noted status of initial alignment alternatives, HOA presentations in October and public meetings in November. Said he's on the list and would receive those, that'll be best time to see if any of them hit his property. PIO went over overall schedule. He said it would have been better if it was either 1-2 years away, or 15-20 years away, instead of just 5-7 years. He thanked me very much for calling back.
8/23/2005	1:15 PM	PIO received call from 407-880-5020 but no MSG while in meeting.

11/10/2005	2:27 PM	Public Meeting Comment Form 11/10/05John Shively27521 East State Road 44Eustis, FL 32736It is essential that parkway construction reflect the letter and intent of the Wekiva River Parkway and Protection Act by representing the integrity of the Rock Springs Run State Reserve as well as existing wildlife migration corridors. The parkway must be elevated immediately east of Mount Plymouth to at least the river and interchange for 46 and 46A must be located as far west as possible and in no case impinge on Rock Springs Reserve or Seminole Forest. The surviving length of 46 immediately west of the river must be no more then sufficient to serve current local residents and in no case should it connect to the parkway for any purpose except local resident access.

11/10/2005	12:38 PM	Public Meeting Comment Form 11/10/05:Thomas Baker and Bonita Sivi31640 Wekiva River RoadSorrento, FL 32776We recommend that the eastern most routes through the corner of Rock Springs Run Reserve be removed from further consideration. The western most routes shown on Expressway Authority maps are the only ones that should receive further consideration if we have to have it at all.Locate the State Road 46 Interchange with the new beltway WEST of both Rock Springs Run State Preserve and Seminole State Forrest.

Although inconvenient to us personally, it is the right thing to do. Place the interchange on the "Neighborhood Lakes" property. Follow the policy set in the "Wekiva Parkway and Protection Act" which provides that the entire "Neighborhood Lakes" property should be purchase - both of the new road (if we have to have it) and the balance of preservation.

Wayne Sligerath  
Regarding  
PIO returned call to Wayne c 407-383-4783, who said what I was wondering, I live in Apopka but have a rental on Ponkan, and they're starting to get a bunch of letters from lawyers about the extension. We're at Plymouth Sorrento and Ponkan. How does the process go? Do they send a letter? Is it fair market value?PIO went over schedule, phases, preferred alignment early 2007, that's when folks will be able to tell if they're property is affected, or if they're close enough that if in final design something shifts that maybe they could still be affected, or if they're 5-12 miles away and are pretty much in the clear.PIO noted if property does appear to be affected, property owners will be contacted; work together on appraisals, fair market negotiations. There is an extensive legal process that has to take place and I believe the agency has to pay your legal costs. He said that's what he told his wife. We had a friend that lived dead center on Hiawassee when they went through Buckingham, he said it wasn't that bad and in reality they made out pretty good. We've got a 3-1 rental and the guy's freaking out and he's putting it back on market. I told my wife maybe we should buy it, rent it for a few years and then sell it to the EA. Guess they were looking west, some He said he went on website an pulled p aerials of 429 and overlaid it on the study area, showed the wife that there's no way the road would take up the entire area, understands we don't know where it's going yet but might not even affect us.PIO emphasized not every property within the study area will be affected. He said told the wife we have plenty of time. Don't worry about it, until we get a letter from the expressway authority.They're rental properties ... the neighbor came over said they got this letter. It's from the lawyers; I asked him was it from the expressway authority? He said he didn't really know, so I said I'm just going to call the EA.PIO said he's welcome to check in from time to time if something else comes up, and please let his neighbor who is concerned know that he can call me also to discuss. He was thankful for the call back --932 a.m.

6/13/2005 8:29 AM  
Wayne Sligerath? 407-886-3427 calling re: 429 extension up by Ponkan road. I have a rental property up there and looking to purchase another property in that area. Wondering if you could educate me a little bit. We're starting to get letters from lawyers and all now, just wondering how the process works when you all start acquiring land up in that area. Do you notify the homeowner? Are you on a list of this is possibly where the road is gong through. Just looking for a little information. I've read all your stuff on the web for Expressway Authority and I just need to talk to somebody and give me some information 407-383-4783 c usually readily available on that during the day. Thank you

10/14/2005 2:10 PM EAC Comment Form:Erik and Cindy Smedal5579 Whispering Woods PointSanford, FL 32771(407) 328-9747We are a concerned family regarding the proposed Wekiva Parkway. It would make the most sense to utilize the "southern" 417 route. This would be consistent with other interchanges associated with the beltway. While a homeowner with personal interests as well in this matter, it seems like a simple decision to make traffic flow from the proposed beltway to flow directly onto 417 seems like the best alternative choosing the northern or 46 route would disrupt many residential neighborhoods and not be an obvious flow onto 417 (east side of beltway).Please feel free to call if you have any other question! Thanks!

Date Time Regarding  
10/14/2005 2:06 PM EAC Comment Form:Steven and Michele Smelski5362 Deepwoods CourtSanford, FL 32771Dear Deepwoods Sirs, We would like to express our displeasure and concern with "the route" for the Wekiva Parkway to I-4 project. Our concern is that the preferred route has already been selected before the completion of a \$3 million independent impact study! How can the "preferred" route be selected until all of the study results have come in? We live off RT 46 west of I-4 and the traffic is already substantial throughout the day. Using this route for the proposed Wekiva Parkway makes not sense. The only logical route would connect directly to 417, keeping this additional traffic off I-4 and RT 46 for east and west bound traffic.

11/14/2005 10:28 AM Comment Form:I live in Lake Forest subdivision. The changes in the population since we moved here 10 years ago, has created a tremendous amount of noise and traffic on 46. From my back porch I can hear the loud rumbles of traffic from S.R. 46 and I-4 anytime of

the day or night. I can't even open my windows at night because the traffic noise is too loud. It would be a tremendous disservice to this area to increase the traffic in this area. High speed highway traffic is not only noisy it's dangerous to us and our children. What will happen to property values with a highway in our backyard? Property values go down, tax base goes down, your revenue goes down.

	Regarding
	I feel that the southern route orange in color is the best alternative and it is a shorter distance than the northern route. It impacts fewer businesses and fewer homeowners than the northern route. The most important reason of all is that it ties directly into the existing 417 interchange.

The northern route yellow in color would be too expensive to build. It is twice as long as

the other alternatives. It impacts a greater number of residents than the southern route and it has a greater impact on the wetlands.

The 46 route blue in color is an okay alternative. It is the shortest distance so there would be less construction costs. It impacts fewer homeowners and fairly small numbers of businesses. But trying to connect it to I4 would be complex and challenging.

11/9/2005	1:02 PM	Attended Public Meeting, 11/09/05
6/29/2005	3:18 PM	Continued response to Frank Smith and sent: "Hello Frank,Apologies for the delay in getting back to you following our phone conversation on June 7. I've run your query past the various PD&E Study team members about prior assurances as to the route of the SR 429-Wekiva Parkway with regard to the Ponkan Road and Plymouth Sorrento Road intersection. It appears that any discussions you may have had previously would have pertained to the formerly proposed (and now defunct) SR 429 Northern Extension, and not to the currently proposed project. We have no alignment nor commitments at this time for the SR 429-Wekiva Parkway, but are in the process of wrapping up the data gathering. We expect in the next month to begin drafting initial alignment alternatives that should be ready for review and comment at public meetings in November. Public meetings will be held in each of the affected counties (Lake, Orange and Seminole).As your properties at 2800 and 2815 W. Ponkan Road are within the PD&E Study area, we will endeavor to keep you informed about the development of this project, including public meeting notices.I hope that addresses your question. Please feel free to call or email with other questions or concerns." --316 p.m.
6/29/2005	2:50 PM	PIO checked study area list: 19-20-28-7207-00-070 Franklin Smith, 2815 W PONKAN RD, Apopka 32712. PIO checked OC property appraiser's site to confirm parcels were at/near corner Ponkan and Plymouth Sorrento roads as indicated previously by caller, which they were (2815 and 2800 Ponkan Road).

6/7/2005 5:43 PM PIO returned call to Frank Smith 407-463-9396, 407-886-4968, I have for 2-3 years, used to deal with the guy in charge at the engineering firm doing all the layouts, he doesn't work there anymore, and he left about 6 months ago. I live on corner of Ponkan and Plymouth Sorrento, right in the middle of the study area. He had told me that the city of Apopka, my property backs up to these new big developments being built on Plymouth Sorrento. He told me not to worry, got these letters from attorneys saying they want to represent me. He told me the 429 extension across 441... said it's not going to come across Plymouth Sorrento road until it crosses Ponkan, he said city of Apopka was not going to allow them to cross Plymouth Sorrento road until after Ponkan because they have been annexing up there. Guess the developer had an agreement with city of Apopka that was annexed in, city voted and said that expressway wouldn't come through there before, the developer would go ahead and put this big country club development, Wekiva run in. I talked to the city of Apopka, and they said absolutely that's the truth, said he spoke to Jay Davoll about 2-3 weeks ago and he said that's the truth. I wasn't going to mess with attorneys if it's going to go west of Sorrento road. They started doing this a couple years ago, there were two or three diff alignments coming through here, one was east of, one on top of and one west of my house. Went to the meetings, spoke with Hal Worrall and Joe the engineer came out, and the last time I talked to any of them they said city of Apopka has approved this huge development and they told us they will not allow us to go through that, that it has to be west. Owns big orchid nursery on Sorrento road. orchidfrank@aol.com was at a meeting in Apopka, Nathan Silva worked with engineering firm there across from Lake Eola. PIO noted I'd been involved with project since August, though I know the history goes much farther back than that. PIO noted I hadn't heard any discussions about that constraint, noted we're in the data gathering phase, plan in July to start drawing up alignments, etc. PIO to check if there has been such a political constraint imposed and get back to him. he said all of this happened well before August.--553 p.m.

11/12/2005	8:13 AM	PIO responded to Tom and Gail Smith: "Good morning and thanks for writing. I wanted to let you know that I have received your comments and concerns. They will become part of the project public record and forward to the PD&E Study team for review. In case you haven't already seen these, I'm attaching a copy of the latest initial alignment alternatives

for this project for your review. These and other project documents are also available on the Expressway Authority's website at [www.oceea.com](http://www.oceea.com) . Please let me know if you have other questions or concerns."

10/31/2005	11:41 PM	Email from Tom and Gail Smith <a href="mailto:tomsmith@sprintmail.com">tomsmith@sprintmail.com</a> : "Dear Ms. Brooks, We will be unable to attend any one of the workshops scheduled to present initial alignment alternatives developed in the Wekiva Pkwy. PD & E study due to a serious illness in our family. However, we would like to have our comments considered. They are as follows. As residents on Haas Road, we have joined a group of other resident landowners who pursuing designation as a rural settlement. We hope that we could be a model for other communities, maintain our rural lifestyle, and preserve the environment. Obviously, consideration should be made to allow the development of this settlement which has been presented to and approved by the state. We would suggest an interchange on Plymouth Rd north of Haas. This could be to enter or exit the parkway. We also suggest an exit only at Plymouth- Sorrento Rd. Thank you for communicating this information for us. How can we obtain workshop information since we cannot attend? Sincerely, Marilyn and Thomas C. Smith 2130 Haas Rd. your email address to the project database. If your address is 2271 NORTHUMBRIA DR in Sanford then we also have you on the mailing list. Currently, we're working on the project newsletter, which you should receive some time after mid-May. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments, and you'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."

5/4/2005 11:33 AM PIO checked mailing list for Snodgrass. SC list has SNODGRASS WENDELL W JR & KAY EAT 317 CREST ST in Sanford, and SNODGRASS KATHERINE M & JUSTIN at 2271 NORTHUMBRIA DR in Sanford.

5/4/2005 9:49 AM Kathy Snodgrass k.snodgrass@zhaintl.com emailed: "Mary, Please add me to the email distribution list for any updates on the Wekiva Parkway Project.Thank you, Kathy Snodgrass."

Contact Notes Allen & Yolanda Snowden

Date Time Regarding  
11/14/2005 3:37 PM Public Meeting Comment Card 11/14/05:Allen and Yolanda Snowden1505 N. Delaware StSanford, FL 32771To Mary BrooksSince I was notified that my home may be torn down for a freeway, I have been terribly upset, so much that I may need to see a doctor. I was the first house in this area when it was just a few pastures. Since, I have built a large play house, wooden fence, landscaped, put a new roof on, painted, new bath tub, and new ac system. I am 73 was to be my retirement home. I am devastated to think that this would been taken from me and my family.Looking at the proposed routes, I think the best and less costly route would be to extend 417 straight across I-4. Also we have all sorts of wild life coming to visit us including bald eagles. Please take the short route from 417. Thank you, Sincerely, Allan.Continued on another sheet:We are not pleased with the parkway study. This route would take more property and wild life area, also our home. We were the first home built in Seminole Farms acreage, 1983. We have lived here 23 years and now have all the conveniences around us. My husband is retired with social security and his nursery job up the road our home is almost paid for. We were not planning another mortgage at his age. We recently remodeled some of our home, to keep up the value. Our home has become a large investment due to growing area around us. Our daughter is a college student (25 years) lives at home and goes to college has a job in the area. We are happy to have a Mall 5 minutes a way. We are close to hospitals, Doctors' offices, banks etc... When we first built our home, none of these were here! We would have to drive 20 to 30 minutes to Sanford or longer to other places to shop work etc. My husband used to work in Orlando before retirement. These are only personal reasons for not wanting this highway. My concerns for compensation- if we were to be moved. I do not believe we could find property around us to rebuild equal value of what we already have. The homes around us are very expensive with no yards. Also building materials have probably quadrupled since we built our home! Would we be compensated for all of this? What about our moving expenses? I have seen this happen to other people and never thought we would be experiencing this when this happens (the parkway) the people always lose! We have a beautiful place to live we love the wildlife even the bears! Although we fuss when they tear open the trash. These are things most people never experience. We do live in a beautiful country atmosphere, we really do not wish to move.

Contact Notes Randy Snyder

Date Time Regarding  
11/9/2005 10:05 AM PIO responded to Randy Snyder: "Hello Randy,Thank you for writing. Your comments will become part of the public record for the project and will be considered along with all of the other input from the public and government officials, as well as the ongoing evaluation and analysis of the initial alignment alternatives. The Expressway Authority is in ongoing

negotiations regarding acquiring the Neighborhood Lakes and other properties specified in the Wekiva Parkway & Protection Act. We already have secured a conservation easement on the New Garden Coal parcel, now known as the Wekiva Mitigation Bank. Please feel free to call or email with other questions or concerns. Perhaps we'll meet at one of the public meetings tonight, tomorrow or Monday. "

11/9/2005 9:52 AM From: Snyder, Randy S [mailto:randy.s.snyder@lmco.com] Sent: Wednesday, November 09, 2005 9:52 AM To: MBrooksSR414@cfl.rr.com Subject: Western Beltway and Wekiva Protection Act I am writing to ask the Orlando Orange County Expressway Authority to remove the eastern most routes of the beltway through Rock Springs Run State Reserve from further consideration. The western most routes are the only ones that should be considered to complete the beltway and continue to protect the Wekiva Basin area. I am in support of locating the SR 46 interchange with the beltway west of both Seminole State Forest and Rock Springs Run State Reserve. I would recommend that the "Neighborhood Lakes" property be used for the interchange and preservation. Randy Snyder 1584 Outlook St Orlando, FL 32806 407-851-5416

Notes		
Date	Time	Regarding
2/28/2005	1:53 PM	PIO emailed Winifred Snyder recap of our conversation about project status as requested. PIO used both email addresses given as Winifred was not completely sure when asked for her address.
2/28/2005	8:34 AM	Winifred Snyder 407-889-2825 6721 Plymouth Sorrento Road, 32712, email winsx777@aol.com she said she got a letter from attorney last week. She was on vacation so don't know when it arrived exactly. It said you have a problem with eminent domain, that they were going to take her property for the 429 extension. It's very unsettling, I've lived here 28 years, I just love it and I don't want to have to move. We discussed that all we have so far is a study area conceptual, not an alignment, and that not every property within the study area will be affected by this project. PIO laid out project schedule, just started PD&E, don't have alignment, first meeting on initial alternatives maybe November. PIO noted she's been added to project database and will receive newsletter, which we're working on now, and meeting notices. She was very thankful for the info. PIO asked whom the letter was from? She said some sleazy lawyer, that it said "advertisement" at the bottom of it, but by then she was so upset.

7/19/2005	1:03 PM	PIO responded to Valerie Sidel email before seeing Brian had sent her the shapefiles: "Valerie,I got your follow up phone message also. I'm trying to find out from CH2M Hill the status of fulfilling the request and will get back to you as soon as possible."
7/19/2005	12:56 PM	PIO responded to Brian/CH2M Hill: "Brian,I forwarded your formal request info to UCF after we spoke yesterday, and spoke with Valerie Sidel this morning who said they'd sent the letter to Mark. She wanted to know how long it would take as they're waiting for this info for their study. She said depending on the timeframe, she may seek the info elsewhere. Let me know - thanks."
7/19/2005	11:31 AM	Brian Manwaring/CH2M Hill emailed Valerie Sidel, copied team: "Valerie - Thank you for your interest in the Wekiva Parkway. I apologize for your inconvenience regarding the shape files that you requested. I've attached the data for the Wekiva Parkway corridor that you have requested below. If you have any problems with these files, please contact me at 407.423.0030 x287. Regards."
7/19/2005	10:48 AM	Valerie Sidel just received your message and Mark forwarded the info about the letter. We did speak with Mark Callahan and I have sent a letter to Mark Callahan and to you and Brian, trying to find out if there's major delay in receiving the file then we have other places we can go get it. Was expecting that it was a simple process like with the PDF. Obviously we need it to complete some stuff in our study that we're being held up on. When you get to your office you'll have the request I put in. 407-415-2964
7/13/2005	5:37 PM	From: Mark Schneider [mailto:mark.p.schneider@gmail.com] Sent: Wednesday, July 13, 2005 5:37 PM To: Mary Brooks Subject: Re: GIS Shape Files Mary The shape file of wide corridor indicated in the PD&E study would be perfect at this point in our analysis, and perhaps we can refine it later with the alternative alignments you mentioned later in the year. Thanks, Mark
7/13/2005	4:50 PM	PIO responded to Mark Schneider/UCF: "That wasn't a proposed parkway but a wide corridor indicating the PD&E study area. So you want the shape file for the study area?"
7/13/2005	4:43 PM	From: Mark Schneider [mailto:mark.p.schneider@gmail.com ] Sent: Wednesday, July 13, 2005 4:43 PM To: Mary Brooks Subject: Re: GIS Shape Files Mary: There should be a shapefile that exists currently that would suit our needs just fine - it would be the shapefile that was used to create the proposed parkway in the map that you had initially provided me in PDF format. -Mark
7/13/2005	3:36 PM	PIO responded and copied Brian/CH2M Hill: "Mark, We don't have an alignment at this point; only the study area concept which I sent you (PDF). We are wrapping up the data gathering and are beginning in earnest to draw up some initial alternative alignments which we hope to have ready for public involvement meetings in November 2005. "
7/13/2005	3:33 PM	PIO received email from Mark/UCF: "Mary:I believe the only the only shapefile that we would need would be one that contains the proposed roadway alignment that includes interchanges. If this is not enough detail please let me know. Thanks again,Mark"
7/13/2005	2:56 PM	PIO emailed Mark Schneider/UCF Economics as per Brian M./CH2M Hill: "Mark,The engineers are asking with regard to your request what specifically you're looking for (i.e. parcel data, aerials, corridors) with as much detail as possible?"
7/13/2005	1:34 PM	Brian/CH2M Hill responded to PIO email: "I'm assuming he needs the corridor, but he doesn't mention anything specifically. Can you please verify?"
7/13/2005	1:26 PM	PIO forwarded UCF additional info again to Brian M.: "Did you see the UCF guys additional email (below)? Does that help at all?"
7/13/2005	12:35 PM	PIO forwarded Mark Schneider/UCF Economics GIS shape file request to Dave, Brian and

Mark/CH2M Hill and Gary Skaff/PBSJ: "Greetings,Is this something that's available or that we're giving to the public? Let me know - thanks. I've also asked for more information as

7/13/2005	12:28 PM	Brian M./CH2M Hill emailed re: shape file request: "Mary,It's hard with the information provided to say whether we can either physically provide this data or if would be prudent to do so. Can you inquire what specifically he's looking for (i.e. parcel data, aerials, corridors) with as much detail as possible? Depending on what he wants, we may have to wait until Dave (on Monday I believe) returns to have an answer. Brian"
7/13/2005	12:02 PM	Brian copied PIO on email to Darrin Smith/CH2M Hill re: GIS shape file request: "Darrin Please see below...are these things that he can get from the Counties or can we provide?Thx, Brian"
7/12/2005	5:32 PM	PIO forwarded UCF additionl project info email to project team: "FYI from UCF guy..."
7/12/2005	5:29 PM	PIO responded to Mark Schneider/UCF: "Thanks Mark. Will get in touch soon."
7/12/2005	2:52 PM	Mark Schneider responded to PIO email: "Mary:Details on the project - Parcel level data is being collected on land use in Orange, Seminole, and Lake counties that is used to investigate how land use externalities could influence the rate of development in an area. ArcGIS is employed to overlay different factors that could affect development - such as the proposed Wekiva Parkway, existing roads, access to utilities, open spaces, etc. This data is than exported to a statistical software that can predict the probability that an individual parcel will be developed. The project follows a model similar to a study done in the Chesapeake Bay area authored by Irwin and Bockstael (2004). If you need anything else don't hesitate to call or e-mail me. Many thanks for the PDF and any GIS shape files that you can locate. Mark SchneiderUniversity of Central FloridaDepartment of Economics407-491-7710"
7/12/2005	12:11 PM	Mark Schneider/University of Central Florida/Department of EconomicsEmailed: "Hello Mary Brooks:My name is Mark Schneider and I am with UCF's Department of Economics. There is a project that I am currently working on that involves the proposed Wekiva Parkway and its implications on development in that area. I am hoping that you can point me in a direction to locate the Geographic Information System (GIS) shape files that are currently being used to generate the maps that are on the Expressway Authority's mailers and online publications. Any information you could share with me is great appreciated. Thanks for your time,Mark SchneiderUniversity of Central FloridaDepartment of Economics407-491-7710"

5/9/2005	2:10 PM	Linda Spangler 407-754-5868 We have been looking for homes for sale in 46 area but friend said a road was going through there. Nobody told us anything about this when we were looking at the houses. Don't they have to tell you? My girlfriend told me about this. She said nobody said anything about a study being done.PIO noted believe disclosure required if there's an alignment and permits, but not sure that's the case if area is just being studied. PIO noted alignment at this point may or may not hit the property in question. PIO noted study area map available on website; I also could send one to her if she liked. She said we're just here visiting; we're from out of town, were shopping around and friend said we may want to skip that area. She said didn't know what her husband wanted to do, going to get with him and get back to me. They may want to meet with me to talk about it. PIO reiterated not all the properties within the study area will be affected. Gave timeline for PD&E completion and construction. She said so we could buy a house and a couple years later find out the road is coming through? PIO said if it's in the study

area, that potential does exist. PIO reiterated map also available on website; gave address  
 She declined to give me an address so I can send her a study area map. She's going to  
 see what her husband wants to do; they may just avoid that area entirely.

I have animals 3 dogs and 7 cats. I never went out and got of them. They have been brought to me in by family members and friends that have died. I love and care for them with a yard all fenced in. By looking at your maps, I don't think that there is much hope that we can keep the home we love so much. For sure are going to have lots and lots of interstates and super-duper highways no matter what.

Contact		Roger Stafford	The Glades at Sylvan Lake Reserve HOA
Notes			
Date	Time	Regarding	
8/18/2005	7:00 PM	PIO provided presentation to The Glades at Lake Sylvan Reserve HOA, joined by Brian M /CH2M Hill at Seminole Sports Complex. About 40-45 people attended. Also attending was Gary Johnson, SC Public Works Director. Robert/Attwood Phillips, HOA property manager, also attended. PIO went over PD&E study map, history, conservation efforts, project elements, ownership and roadway configuration, current study status, initial impact assessment underway, hope to have initials reviewed by governments and be able to present to HOA's and other community groups in October, full scale public workshops in November, meeting notices will be sent out, study and overall project schedule.We took questions from the audience including:What about the previous 417 study that showed it	

going across to Markham Woods Road? That's still on the SC website. How was the study area developed? Why does it go so far north of 46? Why not just go along existing 46 ROW? Will I be looking at a raised highway out my window? What are the priority impacts? Are houses more of a priority? What is it going to look like, is it going to be just a bunch of ugly concrete? PIO at this point noted design criteria required including vegetative buffers, wildlife crossing and in general appearance should be in keeping with surroundings, though obviously for a road some concrete will have to be involved. Why are all these houses being allowed to go in if the road is coming through? Aren't they required to tell those people buying the houses that the road is coming? What is this going to do to our property values? PIO and Brian answered all questions, noting some info not available at this time and offered to research some of the historical questions, but noted there is a lot of history and work that went into getting to this point. Gary Johnson also answered some questions and provided SC history, particularly with regard to the SCEA having to approve any alignment in the county and the history leading up to that point. A gentleman persistently argued why the study area went so far north and was it possible to change that. We noted this was developed by state sanctioned committees and is part of state law and we would not be changing it. It is what we have to work with. He wanted to know the criteria for setting up the study area, etc. we referred him to the reports from both the task force and coordinating committee. He said he'd seen those and continued to argue there must have been some criteria. Members of the audience asked us to come back when the initials were ready for review, which we said we would. Bob Manuel and another board member from the Lake Forest HOA also attended the meeting, said they look forward to having us do a presentation for them once the initials are ready, which we said we would.--8 p.m.

8/16/2005	2:19 PM	Megan/Attwood Phillips/The Glades responded to PIO email: "Yes ma'am, Roger is now handling the account. Tom Piotrowski has left Attwood-Phillips for another career. Megan"
8/16/2005	1:30 PM	PIO responded to Megan/Attwood Phillips/The Glades: "So should I replace Tom Piotrowski with Roger's name in the project database?"
8/16/2005	10:23 AM	Megan/Attwood Phillips responded to PIO email: "Ms. Brooks, I will not be in attendance on Thursday unfortunately. the manager for the association Roger Stafford will be there as well as the three Board members for the association. Thank you for your reply. Megan"
8/16/2005	8:58 AM	PIO responded to Megan/Attwood Phillips/The Glades on Lake Sylvan Reserve HOA, copied Brian/CH2M Hill: "You're welcome, Megan. Will see you there! My associate Brian Manwaring with CH2M Hill, which is conducting the PD&E Study for this project also will attend. Just FYI. We will keep our portion of the meeting to 30 minutes or less."
8/15/2005	4:34 PM	From: Megan [mailto:megan@attwood-phillips.com] Sent: Monday, August 15, 2005 4:34 PM To: Mary Brooks Subject: Reminder: The Glades on Sylvan Lake HOA meeting Ms. Brooks, Just sending you a reminder e-mail for the meeting held at the Sylvan Lake Park Sports Complex (845 Lake Markham Road) at 7:00 pm this Thursday, August 18th. You will be the first speaker for the evening after the Board of Directors calls the meeting to order. At this point, the Board is asking us to prepare for 50 homeowners in attendance. Please let me know if you have any questions. Thank you for attending the meeting and sharing your information with the community. Sincerely, Megan Taylor Association Manager's Assistant Attwood-Phillips, Inc.
7/29/2005	10:45 AM	PIO present July 27 1134 a.m. email to Megan/Attwood Phillips confirming attendance at The Glades HOA meeting.
7/29/2005	9:35 AM	PIO returned call to Megan/Attwood Phillips noting I had sent an email response to her second email a day or two ago noting I would be attending along with one of the consultants. PIO noted I'd also emailed asking how many people would be attending meeting so I'd know how many project updates to bring. She said the MSG must have gotten held in their spam collector. She said there are 212 homes but they've rented the space for 40-50 people, though fewer than that may show with it being time to go back to

school, etc. she said I'd either be first at 7 or next at 730 p.m. PIO said if I can request to be first, would prefer that, otherwise it turns into a really long day. She said she'd relay the request to the board. She said she's trying to get feedback on how many people will attend. If there are more than 50 they'll need to get another location. PIO said let me know if that's the case, but I am confirmed. She said she would.

7/29/2005	8:24 AM	Megan/Attwood Phillips left MSG I had sent you an email regarding The Glades HOA meeting in August. You sent an email back saying you'd get back to me as of yesterday and I hadn't heard anything. I don't know if possibly the MSG didn't get through to me or what but I'm trying to prepare a mailing for the homeowners and I just need to know if you're going to attend.If you could send an email to me today at <a href="mailto:megan@attwoodphillips.com">megan@attwoodphillips.com</a> Or give me a call and leave me a voicemail 407-644-4500 x280 I would appreciate it greatly. Thank you.
7/27/2005	3:34 PM	PIO responded to Megan/Attwood Phillips/The Glades at Sylvan Lake Reserve HOA: "Hello Megan,I can make the Aug. 18 meeting at 7 p.m. at the Seminole Sports Complex, and I believe I'll have another consultant working on the PD&E study with me as well.I plan to bring display boards and copies of the newsletter. How many people are you expecting?"
7/27/2005	3:28 PM	From: Megan [ <a href="mailto:megan@attwood-phillips.com">mailto:megan@attwood-phillips.com</a> ] Sent: Wednesday, July 27, 2005 3:28 PMTo: Mary BrooksSubject: RE: The Glades on Sylvan Lake HOA meetingMary,Have you been able to determine your availability for this meeting? I am trying to orchestrate a very clumsy ballet with all the people involved and an announcement to the homeowners far enough in advance to be beneficial. I await your reply.Thanks again,Megan
7/26/2005	12:05 PM	Megan/Attwood Phillips responded to PIO email: "Mary,Thank you, I will await your message. Megan"
7/26/2005	11:53 AM	PIO responded to Megan/Attwood Phillips: "Hello Megan,I received your request and am checking to see if that date is going to work. Will get back to you today or tomorrow."
7/26/2005	11:20 AM	PIO emailed Jerry McCollum/SC Engineer as requested to notify him of HOA meeting presentation request, copied project team: "Hello Jerry,As requested, I'm alerting you to a request from The Glades on Sylvan Lake HOA for me to do a Wekiva Parkway presentation at their annual meeting on Aug. 18 at 7 p.m. My presentation will consist of an update on the PD&E Study, as well as focusing on the study and overall project schedule. I expect that most of the questions will revolve around "where is the road going? Will my property be affected?" Questions which, obviously at this time, we can't answer. But I can educate folks about the process, schedule, etc. I plan to provide copies of the project update and my business cards, as well as have a mounted revised study area map on display. If you have any questions, or need further information, please don't hesitate to contact me. As always, it's a pleasure working with you."
7/26/2005	9:21 AM	Megan Taylor/Association Manager's Assistant/Attwood-Phillips, Inc. Megan [ <a href="mailto:megan@attwood-phillips.com">megan@attwood-phillips.com</a> ] emailed re: The Glades on Sylvan Lake HOA meeting: "Dear Ms. Brooks, I believe that we contacted you at the end of last year to come and speak to the homeowners about the Wekiva Parkway Project and due to a miscommunication on our part the meeting was not held as scheduled. We would like to try again as the Board of Directors is holding their next meeting on August 18th at 7 pm at the Sylvan Lake Park Sports Complex (845 Lake Markham Road Sanford 32771) and is planning to invite homeowners interested in learning more information about the Parkway project. The Board of Directors has asked that we, as the management company for the association, invite you to come and provide information and answer questions from those in attendance. If you could please keep your presentation and Q&A to a maximum of 30 minutes we would appreciate it greatly. Please contact me as soon as you as possible to let me know if this meeting date and time is convenient for you. I can also be reached by phone at 407-644-4500 ext 280 if you need to speak with me. Thank you for your prompt attention to this matter. Sincerely,Megan TaylorAssociation Manager's

AssistantAttwood-Phillips, Inc. cc: Roger Stafford, Association Manager

1/24/2005	2:15 PM	Megan/Attwood Phillips, left MSG " I am very sorry, it was a communications breakdown. It looked like board was going to stick with the 20th, then almost at the last minute they changed to the 27th and it didn't occur to me until Friday late that 8i hadn't called to tell you it had moved. I apologize that you had to go out to a meeting they weren't having. I misplaced your number and it took me a while to even find someone who had it.They are going to hold their meeting on the 27th but aren't planning to address the 429. They may once they have a new board in place decide to have you in to do a presentation on the expressway. We just don't know yet. I will give you a call or have Tom give you a call if they do want to have someone out to a board meeting to explain the project.Again I apologize and if there's anything else that comes up or you need to talk to me."
1/24/2005	12:58 PM	PIO left MSG for Megan re: rescheduling project presentation to HOA and reason for meeting mixup.
1/21/2005	7:10 PM	PIO waited until 710-715 p.m. and left meeting location.
1/21/2005	7:02 PM	A Sylvan Lake Reserve resident showed up at just after 7 p.m. asking about the meeting also. I noted it appered the date was changed. We discussed briefly where we wer with the project and public meeting schedule. He asked if his property values would go down? PIO noted with no configuration for the roadway or alignment, that it's impoosible to tell any potential impact at this point. Noted construction not expected until at least 2010. gave him my card to share with HOA. He was thankful for the info.
1/20/2005	6:54 PM	PIO called answering service , left same MSG with attendant. He said he tried reaching Tom, didn't have a number for Megan, and would relay my MSG to Tom when possible.
1/20/2005	6:50 PM	PIO called Tom Piotrowski/Attwood Phillips left MSG noting I was in place for the requested meeting presentation but there was no sign of him or the HOA at Sylvan Lake Recreational Center. Noted in MSG that Megan had called at one point about changing the date, but I'd told her I wouldn't be available, so she said she'd let him know we needed to stick with the 20th.
1/20/2005	6:45 PM	PIO arrived at Sylvan Lake Recreational center of Lake Markham Road for the Sylvan Lake Reserve annual HOA meeting as requested. Desk clerk checked and said they showed the meeting as Jan. 27. PIO relayed previous conversation with Megan, was told they were sticking with the Jan. 20 date. He gave number for Attwood Phillips, HOA manager.
1/11/2005	12:10 PM	Megan/Atwood Phillips/Sylvan Lake Reserve said they were thinking about moving the HOA meeting the Jan. 27 the following Thursday. PIO noted I'd be heading out of town that afternoon (Tally) and would not be available. She said she'd let Tom Piotrowski know I would be available and we need to leave it as the 20th.
1/6/2005	9:22 AM	PIO returned call to Megan/Attwood Phillips, who said the meeting is 7 p.m. Jan. 20 Thursday. PIO requested that I be placed first on the agenda; she said I'd be very close to the top. Meetings held Sylvan Lake Park Recreational Complex, first room on the left in the building, 845 Lake Markham Road in Sanford. North on I-4, left on 46, pass Glades at Sylvan Lake, Lake Markham Road is on the left and rec complex.She confirmed the manager is Tom Piotrowski. PIO noted I emailed him from website. She said that's how she got PIO info. Noted PIO's email was forwarded to the board and they were interested.
1/6/2005	9:18 AM	Megan/Attwood Phillips left MSG I'm calling for the manager of The Glades at Sylvan Lake Reserve in Sanford. I'm his assistant. The Board has expressed interest in a presentation at the HOA annual meeting, which is coming up Jan. 20. Give me a call and I can give you the details if you are available. Interested in hearing current status is on this project. If I don't answer leave me a MSG and I will definitely return your call.
1/4/2005	8:57 AM	PIO emailed Sylvan Lake Reserve to introduce myself and to let them know I'm available

to speak at their annual or board meetings on the Wekiva Parkway project. PIO noted PD&E has started and first public meetings expected late summer-fall of this year.

1/3/2005	3:50 PM	Pulled The Glades on Sylvan Lake Reserve HOA info from website. Tom Piotrowski direct email is Tom@Attwood-Phillips.com. Didn't see any info on board members.
Contact Notes		Tom Staley
Date	Time	Regarding
3/14/2005	9:10 AM	PIO worked on concept request letter and sent as requested.
3/7/2005	5:25 PM	PIO returned call to 407-886-1480 Tom Staley. He said, "I used to be on OC commission. There are a group of us out here concerned about the Maitland Boulevard Extension, wher it comes into 441 at Plymouth. Is there any map that goes north from there? The route and the right of way is what we're looking for."We found a map on the computer from the Expressway website, at intersection of 441 shows a blue line extending north and west of Plymouth Sorrento Road; that's the area I was interested in." PIO noted no alignment yet, just started the PD&E study, only have the WRBCC map with study corridor. PIO noted public meeting schedule for initial alignment alternatives. PIO said I'd send him a larger map.He's at 626 East Sandpiper St., Apopka 32712
3/7/2005	5:02 PM	PIO got call from 407-886-1480 but they didn't leave a MSG.
Contact Notes		Charles H. Stark Charles Stark, Esq., P.A.
Date	Time	Regarding
11/29/2005	8:45 AM	PIO responded to Chuck Stark: "Chuck,All of the maps currently available are on the website. As we do not have an alignment, we do not yet have answers to all of your Right of Way questions. We're still early in the PD&E Study process. Perhaps we'll be closer to answering some of your questions next summer, when we whittle down to the more viable alignment alternatives."
1/29/2005	8:39 AM	Chuck Stark responded to PIO email: "Mary, Thanks for the response. Yes, I was able to pull the project concepts off the website. Is there any other info available regarding the plans that is not on the website? For example, any info regarding the right of way needed versus the available right of way and, particularly with regard to our property, how much of the additional right of way would come from the north and south of the existing SR 46 right of way? I am sorry to bother you, but I am looking for any and all info that could affect our property. 11/28/2005	10:57 AM	PIO responded to Chuck Stark: "Chuck,FYI, the FDOT's consultant CH2M Hill will be getting in touch with you about setting up a meeting. Were you able to pull the project concepts off the website?"
11/28/2005	10:47 AM	Mark emailed Brian, copied PIO re: Chuck Stark: "Brian,Please set a meeting with these folks."
11/28/2005	9:39 AM	PIO forwarded Chuck Stark email to Mark, Dave and Brian: "I spoke with Tom Percival this morning about how he wanted to accommodate the meeting request below from Chuck Stark. I offered to meet with these landowners to give them a chance to express their concerns, keeping in mind it's very early in the process. Tom said he thinks Mark should meet with them and if he needs FDOT ROW support, that can be arranged. Tom said if Mark thinks he needs to be there to let him know; otherwise he said should be handled as just another small meeting.FYI. Please let me know if I can be of further assistance." --945 a.m.

11/28/2005 9:33 AM PIO called Tom Percival 386-943-5404, c 386-801-2826 to relay meeting request from attorney. He asked if he was the ambulance chaser type? PIO pulled email and noted he was actually one of 3 landowners for 30 acres who wanted to state their ROW concerns for the record. Tom noted it's too early in the process to discuss ROW and we can't make any decisions or promises at this point. Tom said he thought Mark could handle the meeting, and if he needs someone from ROW there, can arrange that. Tom noted we're going to have hundreds of these attorneys popping up during the development of this project. PIO said I would get with Mark on handling the meeting. Tom said tell Mark if he needs to be there to let him know otherwise thinks can handle as just another small meeting.

11/28/2005 9:31 AM PIO responded to Chuck Stark Morning Chuck,I hadn't heard back from the FDOT, but then a number of them took off an extended holiday for Thanksgiving. I'll give them a call and see what their direction is.

11/28/2005 9:24 AM From: chstark@bellsouth.net [mailto:chstark@bellsouth.net] Sent: Monday, November 28, 2005 9:24 AMTo: 'Mary Brooks'Subject: RE: SR 429-Wekiva Parkway PD&E Study - Public Meeting MapsAny status on this? Chuck Stark

11/16/2005 4:20 PM PIO responded to Chuck Stark email: "This week is shot with all of the public meeting follow up. Also, I've forwarded your meeting request to FDOT, since your property is in their domain. I'm waiting to hear whether they want to take the meeting, or whether I can meet with you in their stead. Will let you know when I hear back."

11/16/2005 4:15 PM PIO resent Chuck Stark meeting request to Tom Percival/FDOT as discussed in today's meeting.

11/16/2005 4:04 PM Chuck Stark responded to PIO email: "I'm sure you're busy, but please let me know when and where to meet you this Friday if possible for approx 30 minutes. If that day is no good then maybe next Wednesday. Thanks, Chuck stark

11/15/2005 2:54 PM PIO forwarded Chuck Stark meeting request to Ann and Tom/FDOT, copied CH2M Hill: "Anne and Tom, I have offered to meet initially with these folks, but thought you might want the option to either join me in the meeting, meet with them instead, or have your Right of Way folks or someone else meet with them. Please let me know how you would like to proceed at your earliest convenience."

11/15/2005 10:09 AM PIO responded to Charles Stark/WD State Road Investments: "Hello Charles,I'm glad you found the meeting helpful. We've just this morning gotten all of the meeting materials posted on the Expressway Authority website at [www.expresswayauthority.com](http://www.expresswayauthority.com) Click on the text link for the "Western Connectors" to get to the Wekiva Parkway page. Scroll down to the meeting dates, and just below that is a link to get to all of the files from the workshop. Let me know if you have any difficulty finding or accessing this info.I would be happy to meet with you initially to go over your issues and concerns, and then relay them to the FDOT to get the ball rolling. Let me know when you were thinking and I'll check my calendar.

11/15/2005 9:38 AM From: chstark@bellsouth.net [mailto:chstark@bellsouth.net] Sent: Tuesday, November 15, 2005 9:38 AMTo: mbrookssr414@cfl.rr.comSubject: I am a landowner on SR 46 along with 2 other investors. We (WD State Road Investments, LLC and State Road Investments, LLC) own approx 30 acres fronting SR46 including commercial property and the 2 south side corners of Lake Markham/46 and that block east to Maureen drive, a total of approx. 1400 feet of frontage on SR46. I went to the meeting last night and I appreciated the information, but I was wondering if it is possible to get the detailed blown-up maps for the Seminole county portion of the road, including all alternatives. I will be happy to pay any copying costs and pick them up. I was also wondering if it is possible to have a representative of the D.O.T. actually meet with us specifically to discuss the effect of these road alternatives on our property. I know that the

D.O.T. cannot do this with every landowner and that is why you have those meetings, but we do own a lot of the frontage and that intersection, so I think eventually we need to discuss these issues and I wanted to start a dialogue now by educating us with specific reference to our property. Please let me know if it can be arranged for us to get copies of these photographs/plans and also to have this meeting to specifically discuss our property. Thanks, Chuck Stark 407/788-0250 Charles H. Stark, Esq. Charles H. Stark, P.A. 986 Douglas Avenue, Suite 100 Altamonte Springs, FL 3271

11/14/2005	3:21 PM	Public Meeting Comment Form 11/14/05:Charles H. Stark, Esq.Charles H. Stark, P.A.986 Douglas Avenue, Suite 100Altamonte Springs, FL 3271412/7/05- In my opinion, the population is northwestern Seminole County located south of SR 46 will be unable to benefit from the Wekiva Parkway as some of the alternatives are currently presented because there is no access entering the proposed Parkway going westbound in the northwestern Seminole County area. Currently, the access under many of the alternatives is for them to go westbound starting at Longwood-Markham Road at the Longwood-Markham intersection, or they can access the Parkway where it connects at Interstate 4. Some access needs to be provided for this population going eastbound and returning westbound somewhere between Longwood-Markham Road and Orange Boulevard along the existing SR 46 right of way.
11/14/2005	10:50 AM	Attended Public Meeting, 11/14/05
10/12/2005	10:40 AM	PIO responded to Charles Stark chstark@bellsouth.net email: "Hello Charles, Thanks for writing. I have added you to the project database to receive future meeting notices, newsletters, etc. I also have attached the last newsletter that was sent out on this project for your review. We're currently in the process of producing the latest newsletter, which I hope to have ready in the next couple of weeks or so.At this stage in the Wekiva Parkway Project Development & Environment (PD&E) Study, we have drafted some initial alignment alternatives that have been going through local government review and revisions. We expect to refine and bring forward some initial alignment alternatives at public meetings in November. Meeting specifics will be in the next newsletter, and also are posted on the Expressway Authority website at <a href="http://www.expresswayauthority.com/futureplans/western%20connect.htm">http://www.expresswayauthority.com/futureplans/western%20connect.htm</a> . You can also check there periodically for updates and other info on the project.I hope this helps. Please don't hesitate to call or email with other questions or concerns. Perhaps I'll see you at one of the meetings.
10/11/2005	8:54 AM	Charles Stark chstark@bellsouth.net emailed: "Please forward to me any info you have release to date regarding the Wekiva parkway project and put me on the list to receive future info as well. Thanks, chuck starkCharles H. Stark, Esq. Charles H. Stark, P.A. 986 Douglas Avenue, Suite 100 Altamonte Springs, FL 32714

11/14/2005	3:10 PM	Comment Form:Thomas and Brigitte Stefanos5044 Hawks Hammock WaySanford, FL 32771A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding

bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/10/2005 10:58 AM Attended Public Meeting 11/10/05

7/18/2005 4:10 PM PIO called back Willie Stephens 407-886-9756 would like to know what's going on , got a notice about something coming this way,. PIO asked his location, noted we have couple projects in that area. He said I'm 5 miles north of Plymouth, 3 miles south of Sorrento. Explained status of Wekiva Parkway PD&E study and that we were working toward initial alternative alignments for public meeting in November, that will be first look at where road might go. He said an attorney had wanted to know if I wanted to represent me. PIO noted that's his prerogative, but its' very early in the process and not every property within the study area will be affected. PIO noted we're shooting to have preferred alignment in early 2007. PIO asked and he said he did get the newsletter. PIO confirmed his address was 6433 Plymouth Sorrento Road, Apopka 32712. Said we'd send him subsequent newsletters and meeting notices, but if he had any questions or heard any rumors in the meantime that concerned him, he was welcome to give me a call. He said okay and thanks for the call back.

7/14/2005 4:23 PM PIO returned call to Willie Stephens, woman said he wasn't there, may be back in about an hour she guesses. PIO left MSG that if he still wants info about the project to call me back.

7/14/2005 3:13 PM Willie Stephens left MSG I'm calling about the expressway.. My telephone number is 407-886-9756 I'd just like to know what's going on. Thank you.

Contact Notes Mary Lee Stephenson  
10/14/2005 1:47 PM EAC Meeting Comment Form:Mary Lee Stephenson5347 Fawn Woods CourtSanford, FL 32771My opposition to the S.R. 46 route on 417 is two fold:1. I am a teacher at a Sanford Elementary School in Seminole County. The increase traffic would create more of a possibility for accidents possibly involving school buses (along with construction).2. The southern route would be less obstruction to children to local schools as it is basically a industrial area.

Contact Notes Ruth Stokes Assist To Sell Real Estate

Date Time Regarding  
4/11/2005 2:21 PM PIO drafted project update email for Ruth Stokes/realtor at smartchoicerealty@earthlink.net as requested.

4/11/2005 2:02 PM 202 p.m. Ruth/Assist To Sell real estate we have a h property in Sorrento, trying to figure out where the 429 is going through Sorrento, trying to find out exactly where that's going to hook in. I'm assuming that all the property for this project has already been acquired? PIO noted no, just in early stages of PD&E, alternative alignments by end of this year, preferred alignment not until early 2007. PIO said could add her to database for meeting notices if she deals a lot with properties in the area? She said absolutely.Stokes, Assist to Sell, 32703 Radio Road, unit D, Leesburg 34788, email smart choice realty@earthlink.net PIO noted some other realtors had found it helpful to get an email now summarizing where we were with the project. PIO also noted she'd be added to the list for the newsletter, meeting notices, etc.She said the email would definitely help; they have a lot of people in the area that need to know what's going on.She was thankful for the info and my time.

Contact Kenneth Stone

11/7/2005 11:05 AM Kenneth Stone returned my call 407-922-4457. PIO relayed engineers said the two

properties are not within the study area, looked like they were in the mount Plymouth country club or golf community. He said that's correct, one's on the fairway and the other just off it. PIO reiterated properties weren't in the study area, didn't appear to be affected. he said that's good news for us and thank you very much.

11/7/2005	10:31 AM	PIO called Kenneth Stone to relay that engineers said the two properties (Lido Avenue & in question are outside the study area, believe they're in Mount Plymouth Golf Community. Woman answering didn't speak very good English (Asian accent?), not sure if I was understanding her correctly or vice versa but she said she would have Kenneth call me back in about 15 minutes.
11/7/2005	9:15 AM	Brian called re: property owner queries PIO had forwarded. He said the Lido Avenue isn't in the study corridor; they're in mount Plymouth golf community, just north of the study corridor. He said both are out of the study area.
11/3/2005	5:13 PM	PIO returned call to Kenneth Stone 407-922-4457, he said he got info second or 3rd hand, and then got the newsletter. He can't attend any of the meetings, all the maps I've seen so far are little ant print things. They don't do justice to the project. PIO asked if he had internet access, as the maps are all posted there for review. He said he hasn't been on the website; the gateway computer is still in cow boxes. We live in one house and have a home across the street we're thinking about selling. PIO gave him website address and links for when he gets access, and also took addresses of properties to research: 25443 lido avenue, Sorrento 32776, and other is one street over 25629 Troon Avenue, Sorrento. PIO said I'd look into it and try to get back to them on Monday. He said they certainly would appreciate it and thanks for calling back.
11/3/2005	10:41 AM	Kenneth Stone 407-922-4457 left MSG I just cracked open latest EA brochure on the Wekiva Parkway expansion. We live in Truman avenue in mount Plymouth. This map is not to scale or anything, so I don't know how close this is going to come to us. A lot of us can't attend the meetings or public workshops. I would like to know how can we get information sent to us if we cannot attend these workshops or happen to catch it on Ch. 6. Obviously this is going to affect some of us more than othersI would appreciate hearing from you. Thank you.

Contact		Ruth Struble
6/9/2005	12:24 PM	PIO returned call to Ruth Struble (cq), let her know no alignment. She said so you don't know where it's going off Wekiva Park Drive, then Nova Drive with some houses and an island. I'm building and putting a lot of money there, that's my concern. I'm just about start to build; I never dreamed they would come this far. I'm a good distance away. PIO reiterated that without an alignment yet we can't answer her questions, and the questions of many others in her situation. PIO noted PD&E timeframe, meeting schedule and project timeline, noted we're very early in the development process.She said what's going to happen to the RR tracks, are we doing anything with those? PIO said I'd have to look at a map to see where she was referring, but similarly that will likely still have to be decided depending on where the road ends up. She asked what's going to happen to 46; they're not doing anything with that are they? PIO noted that still has to be decided, part of this project will likely be raised toll road, part of it an at grade arterial similar to 46 today, we may wind up relocating 46 and leaving what' there as a frontage road, or may just improve what's there. PIO noted all those things have yet to be decided. She said her property address is about 131 Nova Drive. There is no house just a little island. I don't really have an address. I just hope and pray they don't come this far. I guess I'll go ahead and build then. PIO reiterated project timeline; this is not something that's happening tomorrow by any means.She said she got the newsletter and that's why she was calling, just skimmed through it quickly. She was thankful fro the info and call back.--1234 p.m.
6/9/2005	12:08 PM	Ruth Struble returned 321-752-4956 PIO call; left MSG I appreciate you calling back. My main concern as you realize for sure I believe it's going across 46 over the bridge. I feel sure this is the tract you're going to take.My concern but I guess you haven't established that is how much land you're going to take on each side of that for your project? Okay,

well I'll talk to you later.

6/8/2005	12:20 PM	PIO checked Seminole and lake county study area lists and didn't come up with anything under that name, though didn't have address or parcel ID to cross reference.
6/8/2005	12:16 PM	PIO returned call to Ruth Struble? own some property on Wekiva River just north of the Wekiva bridge, maybe about half mile or less. 321-752-4956 Left detailed MSG returning her call and gave public meeting schedule and status of PD&E study.
6/8/2005	10:14 AM	Ruth Struble? left MSG I own some property on Wekiva River just north of the Wekiva bridge, maybe about half mile or less. I'm just concerned about what's going on. The shadow of the corridor comes way over off the road and I'm just wondering how involved that area is going to be. 321-752-4956 thank you.

Date	Time	Regarding
12/27/2005	9:00 AM	PIO returned call to Jason Suecoff/ 1463 N DELAWARE St, who said there was a meeting on the 20th that I couldn't attend and wanted to know what happened, are they still going to come through my property? PIO noted SCEA board requested that we remove the yellow or northernmost alternative from consideration, and also asked that we look at an alternative involving International Parkway. He said so they're not going to be coming through my property then? PIO asked where his property was? He said off 46 and Orange Boulevard. PIO asked on north or south side of 46? He said north side. PIO asked up by Astor Farms or Yankee Lake? He said yes, that's right. PIO confirmed the yellow alternative was north of 46 and has been removed from consideration. He was very thankful for the information.--911 a.m.
12/26/2005	2:40 PM	Jason Suecof 407-230-4288 I'm calling regarding the Wekiva Parkway extension through Delaware Street. Give me a call back, it'd be highly appreciated.

Contact		David Summers
4/21/2005	4:07 PM	PIO returned call to David Summers 407-415-1906, recently bought some property 5631 First St., Sanford, 32771 papers they sent out said something's in the works. Wanted estimated timeframe? Where I'm at looks like , was wondering if they were going to take out the rails to trail? They Just bought a piece o f property, don't want to dump a whole lot of money into the place if it's just going to be bulldozed in a couple of months. PIO went over project timeframe, noted not every property within the study area will be affected. he said he's heard from the neighbors that it probably will come through here. PIO reiterated don't have an alignment, but shooting to have initial alternatives for public meeting in November.David SummersHe asked What do they typically do, if they do end up buying the property, do they pay a fair market value? PIO said fair market negotiations will take place, not assessed value. He said I heard there is 10% markup if you don't want to sell? PIO noted didn't have any info on that, but noted that contingency can be negotiated for relocation costs above the property value.He said everything around me is commercial, I'm about the only piece of property that's left that's residential. PIO reconfirmed newsletter schedule, noted there are a lot of rumors and speculation out there, and he's welcome to call if he hears something that he wants to verify. He said he appreciated the call, wanted to hear from someone who knew what was going on.

4/21/2005	12:51 PM	Mr. Summers I recently received some info on the beltway apparently going through my property. I was kind of curious whether you could answer a few questions at your convenience 407-415-1906 when you get a chance if you could give me a call I'd sure appreciate it.

Please find attached the latest update for the SR 429-Wekiva Parkway & SR 46 Bypass Project Development & Environment (PD&E) Study. As we discussed, we do not yet have an alignment for these projects. We're in the data gathering stage, and hope in the next month to begin drafting up some initial alternative alignments. We hope to have these ready for review and input at public meetings in November 2005. Public meetings will be held in each of the three affected counties (Lake, Orange and Seminole). We hope to complete the study and have a preferred alignment by early 2007.Please keep in mind that not every property within the study area will be affected by these projects. Given the other phases of project development and funding needs, we do not expect to begin construction on these projects until 2010-2012. I hope you find this information helpful. Please feel free to call or email with other questions or concerns."--534 p.m.
-----------	---------	--

6/10/2005	4:45 PM	PIO returned call to Paula Taggart/Coldwell Banker 407-862-5400, c 407-415-1714 I'm just trying to get a little info about the Wekiva expressway. Maybe where I could get a map of where it's going to go through and when it's going to go through and things like that. And whether it's going to affect Markham Road and whether there's going to be any widening of Markham Road. If you could give me a call back I'd appreciate it.).I was trying to find out, I guess basically where it's going through at. If there's something on the internet that would tell me a proposed estimate for completion. PIO gave PD&E status and project timeline.She said she was figuring it would be 2012.She didn't receive newsletter and would like to be on mailing list. She's with Coldwell Banker 1000 Wekiva Springs Road Longwood, 32779PIO to email latest newsletter paula.taggart@coldwellbanker.com and add her to mailing list.We worried about ... it's something we like to try to keep abreast of. PIO said we'd try to keep them informed and send info as available, but she's also welcome to call or email me with other questions.--451 p.m.

Contact		James and Cheryl Taggin
11/14/2005	8:35 AM	Comment Form:James and Cheryl Taggin614 Broad Oak CirLake Forest, FL 32771We support the southern route for the Wekiva Parkway as the alternative would impose significant negative impact upon the existing businesses and neighborhoods. The construction and ultimate restricted access highway will hurt the local perception and will also cause traffic congestion in the area.In the alternative connecting 417 to the Wekiva Parkway would be a direct and contiguous route. Further, traffic taking the By-pass would have less confusion when taking a route to either Orlando or Daytona.Thank you, for your consideration.

Contact		Ron Tanner
Notes		
Date	Time	Regarding
1/19/2005	5:43 PM	PIO emailed Ron Tanner that I'd dropped hard copy of 11x17 conceptual in mail to him

today as discussed.

1/19/2005	3:33 PM	Ron Tanner left MSG "I did receive email from you yesterday in regards to 429 project and highway 46, if you could call me at 407-948-0731, when I printed the letter you sent I don't know if I lost or never received the 11x17 conceptual, so if you could send me that I would greatly appreciate it.. Silverado0227@aol.com"
1/18/2005	2:32 PM	Worked on conceptual request letter for Ron Tanner and sent.
1/18/2005	1:54 PM	As requested, PIO emailed Ron Tanner recapping our conversation about status of Wekiva Parkway.
1/18/2005	1:34 PM	1136 a.m. PIO returned call Ron Tanner re: him buying house 22626 Coronado Summerset Dr., 407-948-0731 PIO noted we just started PD&E, so no alignment yet, but he's welcome to call back to discuss further and so I can get his info for the project database.
1/18/2005	12:05 PM	PIO returned call to Ron Tanner, reiterated we don't have an alignment yet. He said "I have family coming up this week to look at the property. I think we're interested. I read the paperwork on it by the homeowner Richard (Luker) over there. What I'm gathering is there's a project in the works. All I've got is the paperwork that talks about the three stages. PIO noted the study area conceptual is available on the website, gave him the address. PIO said I could send him an 11x17 if he needs something bigger. He said he would appreciate that. PIO noted phases and scheduling, construction not until 2010-2013 and that's dependent on funding, and host of other variables. He asked again if it would likely hit his new place? PIO reiterated no way to tell until we have at least a preliminary alignment. We discussed the study area and that not every property within that area will be affected. He said he appreciated the info, gave email address and other contact info. PIO to send email recapping conversation and to mail 11x17 xonceptual. He aid that'd be great and he'll check outhte website in the meantime.--1211 p.m.
1/18/2005	11:59 AM	Ron Tanner left MSG "Sorry I missed your call. I'll be by the phone for the next little while. Please call me back, I definitely would like to discuss the project and see if I an't get any other info."
1/18/2005	9:33 AM	Ron Tanner left MSG I'm calling re: 429 Wekiva Parkway project. I'm interested in buying a house at 22626 Coronado Summerset Dr. I have questions of where it's projected to go through. Call me back I would greatly appreciate it.

Contact		Jackie Tecouleh
11/3/2005	4:55 PM	PIO returned call to Jackie Tecouleh? 407-324-1222 know the meeting's on the 14th, got an email, has the plan been decided? PIO noted no, we're just in initial alignment alternative phase; study not to be completed with an approved alternative until early 2007

she said she lives in Capri cove, newest projection is coming in front of neighborhood, one takes through neighborhood and you'd have to confiscate my home, and other my home would be useless with an expressway over to of it.. If I stick a for sale sign out there would I have to disclose this? PIO noted since we don't have an approved alignment she would need to check with a realtor on the disclosure law, but I certainly would disclose because someone would likely find out about such a high profile project. she said no one told me when I bought this house 10 months ago. PIO noted there's a lot of history to this project; started study in January, Wekiva Parkway&PA, etc. she said If you guys go through with it and there's an expressway at front of subdivision, would we get any compensation for loss of value on the house? PIO noted property values typically increase with improvement., only compensation is for properties actually acquired. She said if they had to buy our house, would we really get what it's worth? You're talking about half million dollar homes here... PIO noted generally there is a negotiation for fair market value. PIO noted overall timeline of project, funding status and that land prices are only expected to go up in coming years. She said I understand there's a workshop on the 14th but will it do any good, will we really get to give input, or is it already decided? PIO noted no decisions at this point, we're in the public input stage so now is the time to express your views for or against an alignment. PIO noted we've been soliciting local government input as well, all will be analyzed along with impact assessments. PIO noted there is list of impacts that have to be reviewed for each alternative, including residents, businesses, floodplain, wetlands, wildlife habitat, etc. PIO asked if she got the latest newsletter; she said she did. She thanked me for returning her call. --512 p.m.

11/3/2005	9:30 AM	Jackie Tecouleh? Left MSG I'm Calling you as just a ?? residents where one of the options was 46 through my subdivision or through my backyard. Could you please call me. 407-324-1222, 1220 I understand there's a workshop on the 14th but now I'm getting word and I don't know if it's erroneous or not that you guys have made a decision. Please call me.

Contact		Melanie Teel
Notes		
Date	Time	Regarding
11/14/2005	3:07 PM	<p>Comment Form: Melanie Teel 7905 Richwood Drive Orlando, FL 32825A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons: 1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road. 2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame. 3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be</p>

underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Date	Time	Regarding
12/5/2005	3:30 PM	Bill from the Seminole County Soil and Water Commission called to find out the latest that he could submit comments on the public meeting. PIO stated hopefully by mid-January the Public Meeting Summary would be complete, but as far as submitting comments he could submit as much or as often as he felt needed through out the PD&E process and his comments would be discusses with the owners (FDOT and OCEA) during the progress meetings. He asked that Michelle Thatcher be in our database. 108 West Commercial, Sanford, FL 32771.
11/17/2005	4:57 PM	PIO worked on project material request for Michelle Thatcher/Seminole soil & water conservation district. "November 17, 2005Michelle Thatcher Seminole Soil & Water Conservation District108 W. Commercial St.Sanford, FL 32771RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear Michelle,Thank you for attending the public workshop held on Nov. 14, 2005 for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your comments, which have been made part of the public record for this project.As requested, I have enclosed for your board members five (5) copies of the following meeting exhibits: The conceptual project layout for Lake, Orange and Seminole counties - Sheet 1; Seminole County conceptual alignment alternative - Sheet 5; Seminole County design concept limited access with frontage roads to Orange Boulevard Sheet - 5a; Seminole County design concept limited access with frontage roads to Lake Markham Road - Sheet 5b; Seminole County design concepts (two alternatives, limited access) - Sheet 5c; and Seminole County design concept limited access with frontage roads to Interstate 4 - Sheet 5d. I've also included five (5) of the latest project newsletters for your board members.Also, all of the public workshop exhibits comment forms and other information are available on the Expressway Authority website at www.ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at @ 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817.
11/16/2005	1:12 PM	PIO called back Michelle Thatcher/Seminole Soil and Water Conservation District 407-321-8212 PIO apologized for delay in getting back to her but noted inundated with calls and request for info. she said she understood. She said she was looking for something to give to the board, whatever you can give us in hard form. PIO asked when next meeting was? She said Nov. 30. 108 W. Commercial St., Sanford, 32771. went to the last meeting. Should be on the list. Name should be on sign in sheets. PIO noted I had a few hard copies of the overall alignments, but its costly to make hard copies of all these exhibits, that's why we're referring people to the website. She said not all o their board members have internet access. PIO said I'd send her the overalls and anything else I could get hold of. She said whatever we already had in hard copy form would be appreciated.
11/14/2005	2:10 PM	Attended Public Meeting, 11/14/05
11/11/2005	1:21 PM	Michelle Thatcher??/ /Seminole Soil and Water Conservation District calling to request a packet on Wekiva Parkway project. Was reading about western connector program and initial alignment alternatives maps. It's something we're very interested in in our office. Would like to have a complete report of that.407-321-8212 we are planning on attending the meeting in Sanford from 5-8 at the civic center on Monday. If you have an extra one you could put my name on that'd be great.Thank you so much.

Date	Time	Regarding
11/10/2005	11:56 AM	Attended Public Meeting, 11/10/05, Via Mailing
7/28/2005	10:33 AM	PIO called back Fred Thompson, receptionist said he was indisposed, but she could take the info. PIO relayed the map in question was outdated, from Jan. 2004, and not binding on our study. It was just a version of a number of S.R. 429 working group maps that were developed. She said she'd let him know and he may want to call you back.
7/28/2005	10:25 AM	PIO logged on to ECFRPC map, noted it's dated Jan. 16, 2004 from the S.R. 429 Working Group. Outdated map has been replaced by the study area.
7/28/2005	10:19 AM	PIO returned call to Fred Thompson 352-787-9525, we're in the study area for Wekiva or 46 bypass. There's a map on the web from the ECFRPC that shows the alignment attaching on 46 just right at Wiggins Brothers Well drilling. It shows 46 being 4 laned from there east to 441. How much bearing does that map hold in comparison to the map on the EA site? The ECFRPC site is <a href="http://www.ecfrpc.org/files/projects/sr429_recommend_project_map.pdf">www.ecfrpc.org/files/projects/sr429_recommend_project_map.pdf</a> PIO noted we don't have an alignment for the 46 bypass so would be curious as to what they're showing. PIO noted the ECFRPC is the host organization for the Wekiva Commission, the governor appointed commission meets there, was designated to make sure state law was followed in development of the parkway. PIO said I'd take a look at the map they're showing and will get back to him. He said he'd appreciate it.
7/28/2005	10:12 AM	Fred Thompson 352-455-5334 left MSG I have a question concerning map on website for EA Re: the Wekiva river basin highway 46 bypass. What role does the ECFRPC play in the posting of the map? Please call me thank you.352-787-9525

Contact		Jim Thompson Orlando-Apopka Airport
5/3/2005	12:28 PM	PIO called Jim Thompson's cell. He said he was wondering if still going up Plymouth Sorrento Road or behind the Apopka airport. He said he didn't get one of the letters on April 15. Told him no alignment, working on study, surveyors and geotechs gathering data. Noted study should be done early 2007 and would have preferred alignment, will have meetings in the meantime and send out other info. He said he'd like to be on the mailing list. 1320 Northridge dr., Longwood, 32750, email <a href="mailto:jpathompson@aol.com">jpathompson@aol.com</a> one of your assistants said it was going up Plymouth Sorrento road. PIO noted study area was centered on Plymouth Sorrento so if you're just guessing, yes, that's a logical place for it to go, but that has not yet been determined. He said thanks very much for the call.
5/3/2005	12:24 PM	1224 p.m. PIO returned call to ??407-886-7663 Orlando Apopka Airport, woman said caller

was probably Jim Thompson. He's out but can try his cell, c 407-592-6107

5/3/2005 11:22 AM PIO received call from 407-886-7663 but no MSG.

Contact Notes John Thompson

Date Time Regarding  
12/20/2005 12:06 PM PIO returned call to John Thompson 4575 Canal Drive, Sanford. 321-377-2420, let him know the info went in mail on Friday, but could take longer due to heavy holiday mail. PIO reiterated info on SCEA meeting. He asked if there would be public comment. PIO noted didn't see that on the agenda but don't know if they typically do that or not. PIO suggested he get there early and check with the clerk; maybe get a public comment form so they could call on him. PIO noted there could potentially be a recommendation from the SCEA board with regard to removing or adding alternative alignments at this meeting. PIO asked about him not being able to access the files on the website. PIO offered to walk him through the steps. He said he's kind of a computer illiterate. He asked that I call him back on a different line (407-324-9503) so he could access his computer. PIO talked him through the website and text links, and he found the SC conceptual file, saw the yellow alternative in question. He was thankful for the assistance.--1216 p.m.

12/20/2005 11:53 AM John Thompson left MSG I'm at 4575 Canal Drive, Sanford. We spoke last week re: my having not received any info re: the study. You told me you were going to forward me any info you had and you also mentioned there was a meeting today or this morning and you were going to send info re: that. None of which I have received. Haven't been able to pull up the project study area on my computer. I don't know why See a general area but not the different colored lines we discussed. I have a lot of decisions to make. I understand the time constraints that are on you because of the holidays. We didn't attend this morning's meeting because I had anticipated getting more info from you. Give me a call 321-377-2420 I have a couple more questions from you. And I am waiting for notifications and information that has been sent to everyone else in the study zone. So I appreciate a call back.

12/14/2005 2:27 PM PIO drafted SC conceptual letter, newsletter and comment form and sent to John Thompson. "December 14, 2005John Thompson4575 Canal DriveSanford, FL 32771RE: Request for Wekiva Parkway PD&E Study Initial Alternatives ConceptsDear John,Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E Study. As requested, I have enclosed the Seminole County conceptual project layout - Sheet 5, the last project newsletter and a public comment form. As noted, the PD&E study is scheduled to conclude with an alternative selected by March 2007.Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down and you'll see the text link for the public workshop files.We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at © 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement.Sincerely,"

12/14/2005 1:45 PM PIO returned call to John Thompson 321-377-2420 c, h 407-324-9503, was blindsided by this because I haven't gotten any notification of what was going on. Live on canal drive, 5 acre tract on canal system backed by otter's marina, my daughter and husband live very close by on new York avenue. He sits at computer all day, said they received letters that concerned him regarding the study area for the missing link there, Wekiva expressway. At first I thought he said they were going to be building a road going over through our property. He said I was included but I said I haven't heard anything about it. Looked in computer that the link show study or impact area to be very close if not encumbering my property. Even if the alignment is decided upon my particular space.I tried looking on the internet, found one study area, would like to know if I'm in the study area. If so I haven't received any letters so couldn't attend any meetings. Lot of people are running for the hills

right now, in my area great deal of homes for sale and I don't know why. Address 4575 Canal drive, Sanford. PIO to add him to database. He found one map showing blue study area, my 5 acre tract is not highlighted but right behind me the 5 acre tract is, so I would still be impacted, would hear noise, chances are we would see this thing, would hear bulldozers. We moved back there for a reason and it wasn't because we wanted roads and bulldozers to come through out area. There are some life-making decisions that are going to be made based on what's happening here. If we are not in the study area and are impacted by way of vision or noise, what recourse do we have? PIO researched his location on SC property appraiser site; their north border borders the St Johns River Estates. Their property is actually outside the study area, but would be hit on the south end by the yellow (SC7EX) alternative. PIO noted that were in the process of evaluating all the public comment, and would be weeding out some of the less viable alternatives in the coming months. PIO noted consensus I've heard so far is the yellow/northernmost option is the least favored, has higher residential impacts and longer route could be more costly for construction. PIO said I'd send him a map and comment form, and last newsletter, and urged him to submit form noting his support or opposition to the alternatives. He said if we hit part of his property, he'd still have to live there. How much would we have to take by eminent domain before we'd take all of it? PIO noted not a percentage per se, would have to look at design details, is a pond needed there? Ramps? Etc. PIO noted certainly property owners can request that a whole take be considered if they don't want to remain on the property, and in some cases that has been able to be worked out, though I can't guarantee him anything either way. He said we thought we were safe because the prior landlord had thrown some concrete stones into the wetlands. So the EPA said we had to pay \$1600 to have that stuff removed. In the next year we had planned to sell the house and we have to disclose this is in the study area. The EPA didn't want me to throw a rock in there, but now you're saying we can build a big bridge in there. It's a hypocritical situation. A lot of people are going to be in a bad situation over this and I think I'm one of them. It's going to put a damper on my plans for a while, can't even consider doing certain things until this plays out. PIO went over study timeframe, noted we'll be weeding out some alternatives, maps will be changing in coming months, and viable meetings next summer. PIO also informed him of SCEA meeting Dec. 20, location info and that we'd be giving a Wekiva Parkway presentation he might find informative. PIO encouraged him to fill out his comment form and get it back in ASAP, and to contact me with any further questions once he'd received the info. He said thanks for calling him back. PIO aid I'd get the info out to him today.--217 p.m.

12/14/2005 11:49 AM

John Thompson left MSG I believe I live in study area for 429 Wekiva Parkway. I've called your office several times and left a MSG for you with no response. This is regarding my home and how I'm going to view all the info you've got available to me. I've looked on the internet and tried to get all the info I could. I live on the St. Johns River, close to Sanford marina or port of Sanford. I have not received anything in the mail, any kind of notification of meetings. That being consistent with no return of my phone calls. I'd appreciate a call back or I'll call you back again until I do hear from you so you can answer my questions. 321-377-2420 c, h 407-324-9503. I know you've been on vacation but I would appreciate a phone call back esp. since I have been neglected in terms of getting any info so I can attend meetings and putting my voice forward.

12/11/2005 3:00 PM

John Thompson called very upset that there was a potential road going through his property and was not notified. He said that his daughter informed him of the project. He is potentially affected by the northern route connecting near 17-92. PIO stated that the alignment and other information are available on the website. PIO also assured him that construction was not the near future and there was another public meeting in summer of six. PIO stated if he had any further questions to contact Mary. PIO took his contact information.

-----------	---------	--

5/20/2005	8:22 AM	PIO responded to Robert Thomas/Zellwood Station Co-op: "Hello Robert, You have indeed reached the right person. We don't have an alignment at this time for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass; just a rather broad study area. Please be aware that this project is different than the previously proposed 429 northern extension. The current study map is available on the Expressway Authority website at www.oocsa.com. I also can send you an 11"x 17" copy of the study area map - let me know.Please keep in mind that not every property within the study area will be affected by this project.On Jan. 19 the FDOT and the OOCsa officially kicked off the Project Development and Environment PD&E) Study, and we're currently in the data gathering stage. In fact, surveyors, geotechs and others are now in the field throughout the study area. There is a tremendous amount of information that has to be gathered for projects of this nature. Once that data is in and analyzed, we'll be drafting some initial alternative alignments that we hope to have ready for review at public involvement meetings beginning in November. Meetings to get public input will be held in each of the affected counties (Lake, Orange and Seminole). Public meetings also are scheduled tentatively for mid-2006 and a public hearing in late 2006.We understand that many people are looking for details, and we will have more of that information once we get through the rather involved PD&E Study, which is expected to finish in early 2007. With the subsequent Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2009-2010 before any construction would begin on this project. Please note that any of these project phases could take more or less time than expected due to a host of variables.We'll do our best to keep you informed in the meantime. We're also in the process of getting out a project newsletter for the Wekiva Parkway and S.R. 46 Bypass within the next week or two. I'll add you to the mailing list to receive the newsletter, as well as public meeting notices, etc. I need to confirm, is your address "Parway" or "Parkway"?I hope you find this information helpful. Please don't hesitate to call or email with further questions or concerns."--830 a.m.
-----------	---------	--

5/20/2005	7:39 AM	Robert Thomson/Zellwood Station Co-op emailed: "MaryYou may not be the proper person to contract but your name was given to me. I serve as the Vice President of Zellwood Station Co-op, Inc.representing residents of a 55 years of age or older community. We have concerns about the northern extension of 429.We have become left out of the "information" loop regarding what the various Planning Groups have done and plan for the near future with the northern extension of 429 from 441, north on Plymouth - Sorrento Road through the Wekiva Area and a hookup with 46.Could you furnish or guide me to any web sites that we could obtain (1) information on the current status of the planning and (2) office locations where we could view the maps showing current proposed routes?In addition, how can I have my name added to the list of recipients of notices of future Public Hearings regarding the northern 429 extension so that I receive the notices direct?Any info you can furnish would be greatly appreciated.Robert ThomsonVice President, ZS Co-op, Inc.3628 Parway Road, Zellwood, Fl 32798-9773rdmbt@juno.com"

11/10/2005 12:07 PM Public Meeting Comment Form 11/10/05:Gail Thurman620 East 5th AveMount Dora, FL 3275731436 Soaring Hawk LaneSorrento, FL 32776On Review of the routes provided; My preference would be the "Pink" line closest to SR 46 and east of camp challenge, less impact to wild life.I would like to highly recommend sound barriers along the corridor closest to the Wekiva River Bridge that connects Seminole County and Lake County. Noise levels are increasing daily. I would like to recommend at this time to put a traffic light in at Wekiva River Road. Getting there is difficult to turn.Please advise who is doing the wildlife study of the corridor and the results.The plan to make the road four lane divided expandable to 6) Perhaps it would better serve all parties to go 6 and not have to visit an upgrade 2 years later. Higher building costs in the end.I think it stinks when we are forced to adjust to our road systems for the inconsiderate road bullies! Drive more consciously!I agree with Patricia Martin's comments.

7/6/2005	12:45 PM	PIO tried again to reach Eddie Timmons in Mount Dora 352-516-1667. PIO noted I left MSG yesterday but woman said he was in meeting. He said he didn't get the MSG, but appreciates me calling back. He said in the brochure, it said to give you call or email you if we wanted to be on the mailing list. PIO noted if he got the purple newsletter, he's on the list. PIO confirmed his mailing address 3310 STATE ROAD 46, Mount Dora, FL 32757; he said that's correct. PIO asked if he had email to also receive project info; he said yes, Email: trianglediesel@earthlink.net PIO asked if there was anything else I could help him with at this point, noted we're trying to wrap up data gathering and start drawing up initial alternative alignments, probably next info they'd be getting would be newsletter prior to November public meetings. He said the rumor mills are going, but we figure we'd get your info and figure it out from there. He asked status of 429 down by Disney? PIO noted EA section I believe on track for completion end of this year, but not sure of Turnpike section, which I think is the farthest south. He said so they're not done yet? PIO noted no, not yet. PIO asked if there was anything else I could help him with at this time? He said the only thing we want to know is where we get on and pay our money. Everybody is trying to fight you guys, but we're wanting it. PIO noted we should have some proposed interchange / ramp info when the initial alternatives are presented at the public meeting.
7/5/2005	4:59 PM	Study area database has a Earl E. Timmons Jr and Patricia H Timmons at parcel ID 33-19-27-0001000003023310 STATE ROAD 46, Mount Dora, FL 32757
7/5/2005	1:20 PM	PIO returned call to Eddie Timmons in Mount Dora left MSG 352-735-2693, 352-516-1667. woman said he was with someone right now, left MSG for him to try me again. She said she'd have him call as soon as he got back in his office.
7/5/2005	9:49 AM	Eddie Timmons in Mount Dora left MSG 352-735-2693 have a couple questions to ask you about public info available on this project. please return my call. Can call me also at 352-516-1667.

William W. Tippit	11/14/2005	4:16 PM	Public Meeting Comment Form 11/14/05:William W. Tippit500 Grandview PlaceLongwood,

FL 32779I am appalled at any plan that would put major interchange in the Rock Springs Run wildlife corridor. This concept violates the will of the people and the intent of the Wekiva Task Force. The roadway through the Rock Springs corridor should be kept as originally intended and the major junction of 46 / 46A and the Wekiva Parkway should be placed in the neighborhood Lakes area as originally intended. SR 46 should not run parallel to the new expressway through the area. Please use you head and do this right..

6/7/2005 10:05 AM Checked study area list for Nini Toro: 30-19-30-507-0000-0360 TORO-NORMANDIA VICTOR R & DONNINA I, 5489 GLEN OAK PL

6/6/2005 5:23 PM Forwarded emailed newsletter to correct address for Nini Toro.

6/6/2005 4:18 PM PIO called Nini Toro / 5489 Glenn Oak Place, Sanford, 32771, email mtoro@cfl.rr.com 407-688-4524 t let her know I tried emailing the newsletter but her email account was not valid. She said it's n as in Nancy; ntoro@cfl.rr.com PIO said I'd send that today. PIO noted some folks had started receiving the newsletters in the mail; had she gotten one? She said no. PIO to email to her.

6/3/2005	12:48 PM	PIO emailed newsletter to Nini Toro and asked her to let me know when she received the hard copy in the mail since we were having trouble with the mailing house.
6/2/2005	12:46 PM	<p>PIO returned call to Mimi Toro / 5489 Glenn oak place, Sanford, 32771, email mtoro@cfl.rr.com 407-688-4524 I requested and got something back 3-4 weeks ago I think from you. But I haven't received anything in regard to this meeting. PIO noted it's a public meeting, but no public comment, basically a kickoff meeting for the PAG, committee of local government officials, other agencies, letting them know where we are with the study, timelines, other meeting schedules, etc. PIO noted she's welcome to attend, but I don't think it's what she and most people are looking for, you want to know where the road is going and we don't have that info yet. I'm seeing the survey guys in my yard and I'm very concerned. PIO noted survey and other field personnel have to gather data from throughout the study area, and if she's seen the map (yes she has) you know it's a wide area. PIO noted not every property in the study area will be affected by the road, but have to collect data from entire area to figure out the best place to put the road. So just because she sees surveyors doesn't mean we're definitely taking her house; we don't know that yet. PIO noted public meeting in November might be better for her to attend because we'll have actual alternative alignments. She wasn't sure what that meant. PIO noted we'll have different routes the road could take, will it be north of her or south of 46 or where it will cross 437a, etc. She said so the rumors I've heard of property acquisition, saying that 15 homes in the community got houses that their houses are being taken, so that's not true? PIO noted we have not begun property acquisition for the road, but do have several properties we're required to purchase for conservation as part of being able to build the road through this environmentally sensitive area. PIO noted we can't begin acquiring homes and businesses until we know where the road is going. PIO noted what property owners may have gotten are solicitation letters from attorneys that have been sent to folks in the study area trying to drum up business. She said is that something she should consider, an attorney? PIO noted that's certainly her right, but noted until we know where the road is going, there's nothing an attorney can do for you. PIO said if I was in this situation, I'd wait until the public meeting to see if any of the proposed routes even comes near my house. If not, I wouldn't have to worry about an attorney. She said what about people trying to sell their houses, does this mean they can't do that? PIO said not aware of any preclusion for folks who want to buy or sell. PIO noted I've provided info to lots of realtors with where we are with the study and the project timeline, and they've provided that info to there clients. PIO noted we're looking at 4-5 years before the road begins construction. Some people may decide against buying in this area, while others won't be swayed. PIO noted some people are purely speculating on properties hoping to have the EA have to buy it from them. So the situations run the gamut up there. She said she felt better after talking to me, glad I called her back. She still has to decide if she's going to attend the meeting tomorrow. PIO said if she doesn't get newsletter by end o this week let me know. PIO also will email her the newsletter. PIO said she's welcome to call or email from time to time to see where things stand, and we'll also do other newsletters and meeting notices once that's scheduled.--106 p.m.</p>
6/2/2005	12:41 PM	<p>PIO discussed with Brian M./CH2M Hill the call about whether PAG meeting was public; notice on the website seemed to indicate public meetings would be later. He said they had to post it as public because there are several members of Wekiva Commission that could be there. He said he got that question also, but to let them know won't be discussing any concepts, better meeting to attend will be November meeting. PIO asked if I should note there won't be any public comment portion? He said that's correct.</p>
6/2/2005	12:37 PM	<p>Nini Toro 407-688-4524 left MSG I understand there's going to be a meeting tomorrow at magnolia avenue board room, this is EA boardroom and I wanted to know if the public can attend this meeting. Would appreciate an answer back hopefully today.</p>
5/2/2005	1:58 PM	<p>PIO responded to Donnina Toro email: "Hello Donnina, I wanted to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway &amp; S.R. 46 Bypass PD&amp;E Study. We're working on the project newsletter, which you should receive in mid-May. We're in the data</p>

gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments, and you'll also receive that meeting notice. Please feel free to call or email with other questions or concerns."

Notes		
Date	Time	Regarding
11/14/2005	3:11 PM	Torres757 Broad Oak LoopLake Forest, FL 32771I would like to vote for the route that connects to the Wekiva Parkway (the western beltway) to the existing S.R. 417 (the greenway) is a lot more logical to keep Green belts together.S.R. 46 is already congested with new condos and the 4 off and on ramps. Thanks for your cooperation.

Contact		Leoraul Torres
11/14/2005	2:58 PM	Comment Form:Leoraul Torres 5027 Portsmouth StreetTavares, FL 32778A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	2:04 PM	Comment Form:Arda Trendge706 Old Creek CourtSanford, FL 32773A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at

Zellwood Station.

11/9/2005 8:52 AM Public Meeting Comment Form 11/09/05: I am concerned that the Parkway / 46 interchange will impact public conservation lands. The interchange should be further to the west. In addition, the roadway needs to stay well away from Rock Springs Preserve . The chosen alignment should be as far north and west as possible. If this means a slower design speed because of tighter curves, that is okay. The distance are short enough that 5 or 10 mph cannot make a great difference in travel time. It is uncongested traffic that will save time, not top design speed.

Contact Notes Mike Tubbs

Date Time Regarding  
12/28/2005 12:11 AM Mike Tubbs left MSG I understand you have a new full sized map that's easier to see the alignment of the Wekiva beltway going around. I need to get a copy of it because I'm buried with work here. Getting ready to have surgery so I'm running around like a chicken trying to get stuff done. 407-461-2011 if you'd give me a call I'd appreciate it if you're working this week, if not when you get back from the holidays.

5/16/2005 3:50 PM PIO prepared study map letter for Mike Tubbs and sent as requested.

5/16/2005 3:12 PM PIO returned call to Mike, who said the one map on line is so poor. We've got a piece of property up there and I can't see. PIO said could send him the info. He said send to Tubbs cq) PO box 547773, Orlando, 32854. PIO asked if he was trying to find out if the property was in the study area? He said he's pretty sure it is. He said it's right where 46 and 46a split there, can't tell from overlay of project path where it , that's the only corridor you can go in that section because there are so much wetlands north and south of there. He's trying to get some info for the attorney; they're doing some estate planning. PIO noted we don't have an alignment, just a study area. He said eh was aware of it. PIO said I'd get that out to him this afternoon.

Date Time Regarding  
6/14/2005 2:46 PM PIO sent newsletter to Brenda Turner as requested.

6/14/2005 8:35 AM Brenda Turner 407-302-2956 said I have property on Orange Blvd. and Lake Monroe-Sanford area. My neighbor in back showed me a map and letter sent from your office about some development you are doing. Can you send me a copy? PIO got her info and said would send latest newsletter as well as put her on list for future info. Physical address: 4910 Orange Blvd, Sanford 32771 - rental property right now Mailing address 2694 Crater Crt., Lake Mary 32746 PIO asked if she'd had chance to read her neighbor's newsletter and did she have any questions? She said no; he was explaining it to me, and said he would make me a copy but the map wouldn't come through. PIO went over PD&E status, meeting schedule, overall timeline, etc. She said she understood we didn't know where it was going yet; she asked were we doing this because of the traffic? PIO noted they've been trying to finish the beltway around Metropolitan Orlando for years, and this is the latest incarnation. PIO noted with all the growth in Seminole, Volusia and Lake counties, the need is greater now than ever. She said she knows that's the truth. She said it's a small house on one acre. I have two kids; I'm trying to prepare for them. I went to zoning to see if they can have it divided; it's A1 right now, but everything around us is built up as residential. The Retreat of Wekiva wraps around me, and another subdivision is across the street and they're clearing another area now for a subdivision. PIO to send her copy of newsletter. She asked if I knew who to call because her neighbor is throwing trash over into her yard now that the rental is empty. PIO suggested she call city code enforcement. She said couldn't find their number in the yellow pages. PIO said it'd be in the blue page section of the white pages; that's where government listings are. She said she sees it and thanks for the info, she's not so good at this.

4/25/2005	4:30 PM	PIO responded to Cecilia Urton Sewcrazy484@aol.com email: "Hello Cecilia,I wanted to let you know that I received your email and to confirm that you are on the mailing list for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass PD&E Study. We're working on the project newsletter, which you should receive in the first half of May. We're in the data gathering process now, and are shooting for the first public involvement meeting for these projects in November 2005 to review some initial alternative alignments, and you'll also receive that meeting notice. Your property is in the study area for the Wekiva Parkway, but not all properties in the study area will be affected. Until we have an alignment, it is not possible to determine whether or not you will be affected. We will have a preferred alignment when the study is done, which we expect to be in early 2007. There is a lot to be determined and discussed regarding where the Wekiva Parkway will connect to Interstate 4. Hence the very wide study area on the map you received that extends from Volusia County to the 417 at I-4. Since we do not have an alignment for this corridor, there are no site or other plans at this time. I hope you find this helpful. Please feel free to call or email with other questions or concerns."
4/25/2005	3:56 PM	PIO responded to Dawn: "Hey, Dawn,Yes, I will get back to her. Sorry for the delay. And I haven't forgotten about the Expressway map. I'll see Glenn tomorrow morning at the 201 meeting and will ask what he thinks about what we currently have. The map is so general, we may be able to get by with what we have."

4/18/2005	2:16 PM	Donna and Robert Uzzell calling about Wekiva Parkway. We would like to receive info and materials about this project, as it concerns our area where we do have a residence where we do live now. 5300 East Ohio Ave., Sanford, 32771407-328-9538
Contact		Patricia Valdez
6/7/2005	2:27 PM	PIO sent newsletters as requested to Patricia Valdez
6/7/2005	9:55 AM	PIO returned Mrs. Valdez' call. She said a neighbor called this morning said he got letter

from OOCEA about 46 bypass showing it going right down Plymouth Sorrento Road. He got a letter and I didn't. PIO took her contact info and said would make sure she was on mailing list. PIO noted study area is centered along Plymouth Sorrento Road but we don't have an alignment yet. Patricia Valdez, 4204 Plymouth Sorrento Road, Apopka 32712 She said she went to a meeting that Bob Sindler had last year, when they showed couple routes they had then. PIO noted there've been several previous incarnations of some sort of western beltway that were scrapped for various reasons. This a much bigger project than the 429 extension was most recently; this one is 25 miles long. We're starting from scratch in terms of possible alignments, etc. PIO gave meeting schedule, said would send her a newsletter and get her on the mailing list. She also would accept email info at pwvaldez@mpinet.net She asked if the EA was hiring? She retired from AT&T in 1998 and would like to get a part-time job. PIO noted I wasn't aware of any positions but believe there's an employment link on the website, gave her the address. She said she was thankful for the call back.

6/7/2005	9:54 AM	Mrs. Valdez called back, said think you were just trying to call me. Look forward to your call.
6/7/2005	9:50 AM	PIO returned call but either call wouldn't go through or kept getting busy signal.
6/7/2005	9:29 AM	Mrs. Valdez left MSG I on Plymouth Sorrento Road. There was a mailing went out showing change in 429 extension, the S.R. 46 bypass. My neighbor received the letter; I haven't received one and this is new according to what I understood about the bypass. Would you give me a call 407-886-0331

Contact                      Antoinette Valenson

12/2/2005	9:15 PM	PIO drafted OC conceptual letter for Antoinette Valenson as requested and sent "December 2, 2005 Antoinette Valenson PO Box 509 Plymouth, FL 32768 RE: Request for Wekiva Parkway PD&E Study Initial Alternatives Concepts Dear Antoinette, Thank you for your interest in the Wekiva Parkway Project Development and Environment (PD&E) Study. As requested, I have enclosed the Orange County conceptual project layout - Sheet 2, and a public comment form. As noted, the PD&E study is scheduled to conclude with an alternative selected by March 2007. Also, all of the public workshop exhibits, comment forms and other information are available on the Expressway Authority website at www.ExpresswayAuthority.com. On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page. Scroll down below the meeting dates and you'll see the text link for the public workshop files. We appreciate your interest in this project. I encourage you to contact me with any further questions, comments or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We look forward to your continued interest as we develop this major transportation improvement." --915 p.m.
12/1/2005	3:42 PM	PIO returned call to Antoinette Valenson (cq), who said she was unable to go to the meetings on Nov. 9, 10 and 14, but want to make sure I'm on the mailing list so when I know the next meetings are or whatever is going on. PIO asked if she'd received the previous meeting notices and project update? She said she thinks she got the update, but a lot of people have handed her stuff as well so not sure. PIO requested address to send info: PO Box 509, Plymouth, FL 32768. PIO noted the maps were on the website. She said they were hard to see, and your eyes get tired looking at the screen after a while. PIO noted I have 11x17 maps for each county. She requested the orange county map, the one that shows where it goes from 441 at Plymouth Sorrento Road. PIO said I'd send the map and make sure she's in the project database. She aid thank you very much. --347 p.m
12/1/2005	3:37 PM	Antoinette Valenson 407-616-6541 left MSG returning PIO's call.
12/1/2005	3:28 PM	PIO returned call to Antoinette ?? 407-616-6541, left MSG with my number to call me

again, also gave my email address. She works at 407-317-3200 OC public schools educational leadership center.

12/1/2005 10:39 AM Antoinette ?? Left MSG calling to make sure I'm list to get notifications about the Wekiva Parkway. If you could call me at 407-616-6541 I would appreciate it. Thank you

Contact Notes Maria and Adrian Vasquez

Date Time Regarding  
11/14/2005 12:19 PM Comment Form: Maria and Adrian Vasquez 6118 Christian Way Orlando, FL 32808 A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons: 1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road. 2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame. 3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties. 4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

Contact Notes Jack Vatar Lake Forest HOA

Date Time Regarding  
10/14/2005 2:51 PM EAC Comment Card: Jack Vatar 881 Wetstone Place Sanford, FL 32771 407-506-4000 I suggest you adopt the southern route as opposed to RT 46. A logical extension of RT 417 would eliminate / reduce excessive congestion on Reinhart Road and Rt 46. Westbound travelers on 417 would have to exit and take route 4 eastbound, an already congested roadway. This would also help with the mall congestion as well. By removing commuter traffic from local roads. I urge the adoption of the southern 417 extension. Thank you.

Contact	Tom Vellanti	WPCC-Twelve Oaks RV Resort
Notes		
Date	Time	Regarding
12/20/2005	4:50 PM	<p>Tom Vellanti, owner Twelve Oaks RV resort, 6300 S.R. 46 west, addressed SCEA board. He said he noticed in the list of properties that were impacted by these various routes, they considered my property as one commercial property but 250 residents live there, need to add 250 to those figures. I don't know how this is going to end up, if some of this alignment was moved slightly across from me there is a nursery that is just raising plants, move the orange alignment slightly down 100-150', wouldn't affect me very much and would eliminate a tremendous problem. Way is now will peel off 100' of my property and create big problem for my tenants. To me looks like orange alignment is what's going to prevail. Randy noted alternative would take out at least two rows of mobile homes and would affect his entrance. Tom said yellow route went right through the park. I would hate to bring 250 people here to the next meeting so I would appreciate you looking at that.</p>
11/28/2005	2:47 PM	<p>PIO returned call to Janna/Tom Vellanti's office 12 Oaks RV Resort 305-247-6623 and let her know that I did receive his packet including the aerial plans. She asked if I could tell what he was trying to show by the drawings about missing his property? PIO noted I had not reviewed the aerial closely; we're in the middle of going through the hundreds of comment forms, but I will make sure the engineers get his aerial also. She said she'd appreciate it.</p>
11/28/2005	1:22 PM	<p>Janna/Tom Vellanti's office left MSG he has Twelve Oaks RV Resort asked me to call to see if you received his letter 305-247-6623 please give me a call.</p>
11/14/2005	3:24 PM	<p>Public Comment Form 11/14/05:Thomas A. Vellanti / Twelve Oaks RV Resort17750 SW 248 StreetHomestead, FL 33031Dear Ms. Brooks,I am the owner of Twelve Oaks RV Resort, State Road 46, approximately ¾ mille west of Orange Blvd. Both of Sanford Expressway proposals affect Twelve Oaks radically. They are devastating to the park. This park is filled with 250 residences and about 400 elderly low income tenants. If this park is disturb in any way it will be a major catastrophe to these tenants. I think these alignments were made with out regard to the properties and the people they affect. To run a road right thru the middle of a park and displace all these old people is totally unnecessary when a slight change in alignment would preclude a lot of grief and expense. I have made two proposals to slightly change the alignment of each of the connecting expressways from I-4. These proposals are drawn on the enclosed aerials. They are far more logical, safer, and more cost effective and will not displace any of the Twelve Oaks residents. Further, they go thru more rural sparsely populated properties. Notwithstanding all if the above, Seminole County officials have their way and State Road 46 is the choice, please consider this:1.) If additional right-of-way is needed for State Road 46 take it on the side where there is nothing but plants and trees and not a highly developed property with underground sewer, water, electric, telephone and gas lines.2.) There is nothing wrong with a slightly meandering right of way line provided it is within design criteria. Let me explain that I was the owner of a 400-unit trailer park in Homestead, FL, which was my life's work. It was totally destroyed by Hurricane Andrew and I lost everything. I had barely enough to put a down payment on Twelve Oaks. I had to pay 12% interest for 5 years until I was able to refinance it. I have put every nickel I have into improving Twelve Oaks to make it a wonderful place to live. Many of my tenants are living on Social Security and will have no place to go if they are displayed. I will do everything I can to preserve and protect Twelve Oaks. Please seriously consider my recommendations and advise me what you think of them. Call me (305) 951-3665 if you have any questions. Very truly yours, Thomas Vellanti, Owner.</p>
11/14/2005	12:39 PM	<p>Attended Public Meeting, 11/14/05</p>
11/11/2005	10:23 AM	<p>PIO emailed overall alternatives to Tom Vellanti/12 Oaks RV Resort (his assistant's email</p>

address) as requested.

11/11/2005	10:11 AM	PIO called Tom Vellanti/12 Oaks RV Resort 305-951-3665 c as requested at meeting last night. They had a third alternative in Sanford that went way up and around, came out on 46 farther west. What happened to that one? PIO asked if he was referring to the former green alternative? He said he thinks that's the one. PIO noted SC asked that be removed from consideration, would have hit their Yankee Lake treatment facility and also had some wetland impacts, encroached on protected public lands.He said he spoke to Candace last night about trying to get the alignments on the computer but wasn't able to. She offered to walk him through it. PIO said if he's at a computer now, I'd be happy to do same. He said he wasn't. PIO asked if I could email to him? He said couldn't remember email. PIO noted we'd spoken before and checked database, gave him the address s I had for him. He said that's his secretary's email and I could send to her and she would get it. He said he Was wiped out by Andrew in 92, large 400 unit park, scraped what I had left from selling the land, came here and bought this park and fixed it all up, now will be wiped out again, the routes go right through my property. If they could alter it a little bit, I'd be in the clear. He asked which one was most favored? PIO noted all had different impacts, we have a lot of input to review and analyze to find out which one most people and officials favor. He asked if there was any flexibility, if we pursued an alignment could it be changed? PIO noted if he can provide some good reasoning for shifting an alignment north or south, for example, we would certainly consider that. He asked who at Seminole county should he contact to find out where the county stood on the project? PIO noted County Engineer Jerry McCollum intimately familiar with the project, has a lot of history. PIO suggested he could also talk to his district county commissioner, think it used to be Daryl McLain for that area. He said he thought Daryl was still on the board. PIO said I'd email him the overall alignments as soon as we hung up. He said he'd appreciate it.
11/10/2005	12:58 PM	Public Meeting Comment Form 11/10/05:Tom Vellanti / Twelve Oaks RV Resort17750 SW 248 StreetHomestead, FL 33031305-247-6623 Office305-951-3665 CellWould like Map. Conceptual Alignment #5
10/19/2005	5:08 PM	PIO returned call to Tom Vellanti/owner of 12 Oaks RV Resort 305-951-3665 c, left MSG that initial alternatives posted on the website, gave him address. Or he can call me with his email address, or email me (gave my address) with his address and I'll send it to him.
10/19/2005	9:51 AM	Tom Vellanti said I'm owner of 12 Oaks RV Resort, left MSG, 305-951-3665 c understand you've posted the route, and would like some information on that. I would like very much to find out what's going on.
4/20/2005	10:32 PM	PIO returned call to Janna/Tom Vellantioffice at ?? resort 305-247-6623 want to be on the mailing list. Wan to talk to you about this first.For 12 Oaks RV Resort, on the letter you've got Wekiva Parkway study, needs to go to home state office, still Twelve Oaks RV Resort, 17750 SW 248th St., Homestead, 33031Tom Vellanti, owner. He doesn't have email at office.Her email at home Jlightfoot@adelphia.net
4/19/2005	12:24 PM	PIO returned Janna's call, but line was busy.
4/19/2005	12:00 PM	Janna/Tom Balotti's office at Twelve Oaks RV Resort 305-247-6623 want to be on the mailing list. Wan to talk to you about this first.

11/14/2005	2:53 PM	Comment Form:Kristen Verkon5571 Whispering Woods PtSanford, FL 32771As a resident of Lake Forest, I am 100% opposed to the Seminole County Expressway targeting the S.R. 46 corridor. On of the reasons I moved here was the ambiance, limited traffic and the convenience of getting from home to all the surrounding amenities (i.e. Town Center). If the expressway is built through S.R. 46 the traffic congestion alone would be unbearable. It has already doubled in the 13 months I've lived here. It would create more disruption and "construction chaos" than would the southern alternative choosing the route that connects Wekiwa Parkway (western beltway) to the existing S.R. 417 at I-4 is more logical and keeps E-W traffic off I-4.Please, please consider the above option over the S.R. 46. The value of our homes is at stake, more traffic congestion would alone deter people from moving here, which disrupts businesses and impacts the economy of this area.I truly appreciate your consideration and hope that an alternative route to the targeting of S.R.

46 is agreed upon.

Contact		Mary Vernak
7/21/2005	3:50 PM	Mary Vernak 407-677-9881 asked if there was a map of the 46 bypass. PIO noted no, doing PD&E study, wrapping up initial data gathering and starting to come up with some initial alternative alignments to be ready at public meeting in early November probably. PIO asked if she'd seen the study corridor map; she said yes on the website. She asked if this was the study that was supposed to go until 2007? PIO noted that's correct, went over general schedule.She asked are we doing anything with the 417? PIO noted certainly an option to look at connecting there, though understand some issues and would be pretty expensive, but expect that'll be one o the options they see in November. She asked but they're not going to do anything with the 417 before that? PIO noted no, not that I'm aware of. She said well that's helpful info. PIO asked if she was getting project info, was she on the mailing list? She said I have had an EPASS forever and usually get those newsletters, but just downloaded the project update from the website; don't think I'm on project mailing list. PIO asked for info to add her to list. She's at 5397 Endicott Pl., Oviedo, FL 32765. She said she does have property by Bentley elementary off Rinehart road, and she works for Morrison homes, do a lot of their land exercises, have to tell corporate when they want to buy land where the beltway is going. She thanked me again for the info. PIO said will be sure she gets the meeting notices and subsequent newsletters. Also got her email address; noted some times there'll be info we can email out. She said "that's great!"

11/14/2005	3:23 PM	Public Meeting Comment Form 11/14/05:Aric Vinacke274 Venetion Bay CourtSanford, FL 32771As a tax payer and resident of the impacted area. I strongly oppose any version of the parkway that cuts through Rock Springs Reserve or any other environmentally sensitive land. I will not support any version of this road that does not protect and conserve 100% of the proposed conservation areas. The environmental impact on this area due to frenzied and seeming uncontrolled growth has already taken a huge toll. This roadway must not add to these problems.Erin Crellin Vinackle274 Venetian Bay CircleSanford, FL 32771I am very concerned about certain proposals that put an exchange for the parkway cutting thru Rock Springs Reserve. It is a ridiculous idea to put any roadway in a preservation area! I strongly disagree with this. I also urge you to obtain 100% of the land proposed for conservation. The only land that has been secured is only a small portion of what should be. There has been talk that the area known as "Neighborhood Lakes" will not be included in the conservation. This is not acceptable. Please live up to your environmental obligations.

Regarding  
Brian/CH2M Hill emailed: "Mary, I had a contact with the following customer: Jennifer Vose 2423 Boch Rd. Apopka, FL Her and her husband own the parcel and are planning to build a home in the near future. Her parcel is in the top portion of the 'Y'. A mapquest map is attached. She wanted to know if concepts have been developed so they make a decision about their home. I gave her an overview of the PD&E process, the schedule and the planned date for the first public meeting. She was satisfied with the response. Please add her to the mailing list. Her current address is: 1106 Maury Rd Orlando FL 32804 Thanks,

1/3/2005 12:49 PM PIO returned call to Jennifer Vose, who works for fish and wildlife in Lake and other counties so she is out and about a lot. PIO got her contact info to add her to the database email Jenvose@vup.com Mailing address 1106 Maury Rd., Orlando 32804, Their affected property is 2423 Boch Rd., Apopka (she did not know ZIP code), but said "you go up Plymouth Sorrento and after Kelly Park Road, it's on the dead end of a dirt road. It's 5 acres and we have a little bungalow there now, but we were planning to build a big home and raise our kids out there. Was trying to figure out will they choose to go through forests or agricultural land, think our plan is we have to break ground and build, but when we do that we'll go from worth of land to million dollar plus property. Also concerned if they don't take our property but we wind up right next to it and have to look at it or the lights are shining in our house. That would almost be worse than if they just bought the property." PIO noted we're starting the PD&E; hope to have some initial alternative alignments late summer-fall and that's when we'll likely start the public meetings. PIO noted a lot of people have questions, but we have to work through the process to be able to answer those as info is gathered and analyzed. PIO also noted that if they improve the property and it is needed, the EA or FDOT will negotiate fair market value. PIO noted I've added her to the project database so she'll get newsletters and meeting notices, and she's also welcome to call or email me from time to time for updates. She said thanks so much.

1/3/2005 12:09 PM Jennifer Vose left MSG re: Wekiva Parkway extension." I'm trying to find out where is the Expressway Authority on this as far as studies and when is some more definitive info going to be available for those of us that live within that swath of possible place where it could come through? We're just trying to figure it out. If you could give us a call back I'd

appreciate it."

11/14/2005	11:25 AM	Public Comment Form 11/14/05: R.L. Wahlig 1763 Astor Farm Place Sanford, FL 32771 My immediate recommendation would be to take the southern route to I-4 from 46. This looks like the best. Maybe not the shortest. 46 to I-4 is already a nightmare. Taking the

southern route make the intersection at I-4 with 417. Traffic Going south can choose either path at the same time. It looks to me like there are water problems for people living in that path and may be happy to move out.

7/8/2005	10:10 AM	PIO prepared newsletter and study area map and sent to R.L. Wahlich as requested.
7/8/2005	9:38 AM	R.L. Wahlich 407-268-9071 said he'd like to be on the list to receive info about the project. His address is 1763 Astor Farms Pl., Sanford, 32771. PIO asked if he had an email address but he doesn't have a computer. PIO asked if he'd gotten newsletter in May or June? He said no, last thing he got was March 30th letter with copy of map. PIO to send him newsletter. He asked if that would have the map? PIO said yes, but it's small. I can send him an 11x17 size. He said he'd like that. He said they're just interested in following the project.

Date	Time	Regarding
11/14/2005	4:27 PM	Public Meeting Comment Form: Alan Evelyn Walden 4775 Cains Wren Trail Sanford, FL 32771 Seminole County East End near 417... On the Wekiva Parkway interchange at 417 / I-4 vicinity, I believe that the yellow line linking SR 46 to the 17-92 would be creating additional traffic flow congestion due to routing traffic to I-4 to get to the 417 expressway. Same logic applies to the SR 46 to I-4 case. The preferred routing would be to directly connect the two expressways (Orange line), eliminating additional traffic from an already congested I-4.
11/14/2005	7:59 AM	Attended Public Meeting, 11/14/05
Contact Notes		Bill & Eileen Walker
Date	Time	Regarding
11/14/2005	10:05 AM	PIO returned call to Bill Walker, noted FDOT and EA offices closed Friday for holiday. PIO noted overall alignment exhibit is on the website. He said he's not a computer person. PIO noted I have to get some 11"x17" exhibit hard copies ordered, hope to have them by end of week if not sooner. He gave mailing address as 30623 Swan Road, Sorrento 32776. PIO noted a lot of people are requesting this info, so it may take some time but we'll get to him as soon as we can. H asked if he tried to find it on the internet, where would it be? PIO gave him web address and text links. He said he'd try but still wants hard copy.
11/14/2005	8:24 AM	Bill Walker 407-579-8312 left MSG I was at the meeting in Eustis or Tavares or wherever and was given our card to get copies of the maps. I'm looking for sheet #1. I'm willing to pay for it. I called Friday and haven't received a response.
11/11/2005	8:19 AM	Bill Walker left MSG was at that meeting yesterday in Eustis. Was told I could get a copy of one of the maps. Would like to do so, so please call me at 407-579-8312 Thank you.
11/10/2005	9:02 PM	Attended Public Meeting, 11/10/05
6/7/2005	10:31 AM	PIO returned call to Bill Walker/?? Mortgage, live in Sorrento and buying some property on 46 between Sorrento and Round Lake Road, is that where the road's going to go? PIO noted we don't have an alignment, doing data gathering, gave meeting schedule for initial alternatives. Asked if he'd seen the map? Did he get the newsletter? He said he got a newsletter yesterday, but it didn't have a map. PIO said map was on first page if we're talking about the same publication. He pulled out publication and did see the map. He asked about where you're coming out just short of round lake. PIO noted we're still early in the process, and study to take a couple of years but we will keep them informed, send meeting notices, newsletters, etc.
6/7/2005	10:21 AM	Bill Walker left MSG I'd like to talk to somebody. I live in your wide swath of paint that says you might come my way. If you would call me 407-579-8312, 407-327-8221

Contact	Jim Walsh
---------	-----------

3/30/2005	12:40 PM	PIO returned call to Jim Walsh 407-620-1955, ?4078866080 looking at house off Ponkan where new baseball fields and elementary school is going in Apopka. Looking on internet you have right of way right on top of there. PIO noted Ponkan and Vick are east of the study area. He said it's about a half mile west of there, a new subdivision Wekiva run, MI homes is building 300 houses, has one entrance on Ponkan and thither entrance on Plymouth Sorrento. PIO noted project study area was centered along Plymouth Sorrento road, but not every property within the study area would be affected. he asked if there'll be entrances and exits on the roadway? PIO noted there will be on and off ramps, but details yet to be determined. PIO gave PD&E schedule. He said why does it take so long - they've been talking about this thing for years? PIO noted that the project development was only programmed in the last year. He said so is this really going to happen now? PIO noted we have marching orders as per the Wekiva Parkway and protection act signed by the governor that the road is needed as long as we adhere to environmental requirements PIO these projects typically take 5-10 years to go from beginning of development to completion. He said so it could be 5 years before we start construction on this thing? PIO noted correct, we don't expect to start construction ate least until 2009.he said they are
-----------	----------	---

building \$500,000 homes in there; why is the county letting them do that when the road's going to be coming in? you'd think the counties would be in touch with the expressway authority. PIO noted until the FDOT or OOCEA owns that right of way, whoever owns it can do with it what they want. PIO also noted there is huge speculation underway in this area with developers trying to get plans permitted so they can charge the EA or FDOT more when they need the land. He noted that happened a lot when they were building the east west expressway. He said he used to be in the construction business and was familiar with that. PIO noted condemnation law is big business, in fact attorneys have been sending letters to hundreds or thousands of property owners in this area in anticipation of the roadway coming through. He said he was surprised by that, had no idea. He also asked about the Maitland Boulevard Extension, where is that going? PIO noted will end in same area as 441 near Plymouth Sorrento Road, go west and south of Apopka and end where Maitland Boulevard currently ends at US 441. He asked how long on that one? PIO noted we were in final design, and construction to start mid-2006. he said so this will be done before the other one starts? PIO noted correct, MBX supposed to be open to traffic in 2009. PIO asked if he wanted to be on the mailing list? he said he lives in Apopka and is interested in both projects. 2672 Orchard Drive, Apopka 32712 email jwalsh55@hotmail.com PIO noted we were working on the Wekiva Parkway newsletter now and hoped to get it out in April. He said super, I appreciate your help.

3/30/2005 10:57 AM MSG Jim Walsh I live in Apopka area and was thinking about purchasing house up off of Ponkan above Vick where the recreation parks area and new school is being built, I'm looking at your map on the east west expressway. Is the new expressway going to go off through that area? 407-620-1955, ?4078866080 appreciate your help thank you.

Date	Time	Regarding	

7/18/2005 1:57 PM PIO emailed Greg Warmoth et al with latest study map and newsletter, copied Bryan/OOCEA: "Greg, Pleasure speaking with you as always. Here are the Wekiva Parkway study map and most recent newsletter for your information. Please let me know if you have any other questions or need anything else. As noted, as soon as I find a resident willing to speak with you for the 414 segment, I'll let you know." --204 p.m.

7/18/2005 1:50 PM PIO called Greg/WFTV Ch. 9 to let him know I'm trying to find people who'll agree to speak to media and asking what other info he needed. He said that was it. PIO asked if he got a map while at the Wekiva Parkway meeting this morning? He said they just shot off one of the boards, but if you have something better that'd be great. PIO said would email him the PDF of the map. PIO asked if they handed out the last newsletter at the meeting? He said no; PIO to email that also so he has all the project background. Said that'd be super. He asked I send info to Greg.warmoth@wftv.com and also send to Jason balthazar@wftv.com PIO said as soon as I find a resident willing to speak to the media, I'd get back to him. He said thanks. --156 p.m.

7/18/2005 9:50 AM PIO returned Greg's call, said he wanted an update on couple of my projects, starting with 414. PIO noted we're about 30% through design, construction slated to begin middle next

summer. He asked about status of ROW acquisition? PIO noted still early so haven't started in earnest, but maybe 5% into it. PIO noted changes still occurring so parcels may be affected one week but not the next. As we get farther along that'll start cranking up. Greg asked for names of residents and numbers to interview for and against the project. PIO said I'd have to look into that for him and get back to him. He said he's working on something for tomorrow, wants to go do tapings tomorrow morning. PIO said I'd get back to him after lunch, would that be alright? He said that's fine. He also asked about the PD&E report that was supposed to be presented to board meeting today. PIO noted PD&E is done for 414, has been since April; PIO noted maybe they're giving an update on the Wekiva Parkway, which we're about 6 months into. He said that's what's on the agenda. He asked if I had a map for that project. I said I could email him one. PIO asked what other info he needed? He said he's going to see what they get in this meeting and he'll call me afterwards.

7/18/2005	9:45 AM	Greg Warmoth/WFTV Ch. 9 407-402-9097 left MSG just calling to check on couple your projects.

The most easternly alignments through the Neighborhood Lakes tract and in Rock Springs  
Run Preserve should be eliminated 2. Lake County interchange should be in the  
Northern Pasture west of Rock Springs Run State Reserve (least negative impact on  
conserved lands and wildlife)3. All through traffic should be carried on the Wekiva  
Parkway, should be wherever this would cross public conservation land4. Essential  
lands must be saved! Acquire all the properties identified in the Wekiva Parkway and  
Protection Act

Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the  
following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan  
Road will save lives. Ponkan Road is the site of two brand new public schools. Orange  
County Elementary and Middle Schools being built on Ponkan Road will open for the  
August 2006 school year. A Ponkan Road interchange will create major traffic jams for  
parents and kids trying to get to and from these schools. Even worse, a Ponkan Road  
interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes  
to and from school every day. Thousands of cars will exit from the Wekiva Parkway into  
North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to  
school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is  
irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park  
Road. There is no excuse for subjecting the children of Orange County to the eminent  
danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's

new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

12/13/2005 4:42 PM

Bonnie Webb Coldwell Banker Residential Real Estate  
PIO responded to Bonnie Webb/Coldwell Banker email: "Hello Bonnie,I'm just back from vacation and weeding through my emails. The only alignment that comes close to, but does not infringe upon, the Retreat at Wekiva is the yellow, northernmost alternative SC7EX). As I'm sure you can understand, each of the alternatives have various impacts with regard to residences, businesses, wetlands, wildlife habitat, groundwater recharge, etc.No decisions have been made as far as the initial alignment alternatives for the SR 429-Wekiva Parkway. We are in the process of inputting, reviewing and analyzing all of the public comment about the various alternatives that we have received from the recent meetings and from local government officials, who we continue to meet with. As we evaluate the feedback and the engineering and other criteria mentioned above, we will work to weed out the less viable alignment alternatives. In summer 2006 we will bring forward the more viable alternatives for public review and comment at the next series of meetings.The preferred alternative is to be discussed at a public hearing in late 2006 or early 2007, with an approved alternative expected at the completion of the PD&E Study by March 2007.Property owners in the study area (which includes all but a small portion of the subdivision in question) in mid-April received a letter notifying them that the Expressway Authority and FDOT were conducting the PD&E Study for the Wekiva Parkway The letter noted we had retained engineering, surveying, geotechnical and other subconsultants that would be in the field doing work for the study over the next two years and also gave contact names and numbers for these various firms. The letter noted these field personnel were authorized to conduct work on private property as per state statute. The letter also listed my contact info for various questions.I don't have an electronic version of the letter any more, but hopefully that will suffice. I hope that addresses your issue. Please don't hesitate to call or email with other questions or concerns."

12/12/2005 11:15 AM

PIO received 12-6 1158 a.m. email from Bonnie Webb:Good morning, Ms. Brooks:I am marketing a foreclosure in this neighborhood and need information regarding the status of the Expressway, how/if The Retreat at Wekiva will be affected. I have been on-line and have looked at several "Conceptual Alternatives", but I am not clear if any real decisions have been made. Can you help?Also, is there any way to get a copy of any letters that have been sent to homeowners in this neighborhood from the EA? Thank you, in advance, for your assistance.Bonnie Webb bonniwebb@att.netColdwell Banker Residential Real Estate2160 W. As a concerned homeowner possibly in the path of the construction I would appreciate any information pertaining to any decisions regarding the path of the construction...Again thank you."	
2/16/2005	4:40 PM	PIO responded to Dennis Weingart/Sylvan Lake HOA email, copied Brian M./CH2M since he's in Seminole County: "Hello Dennis,There is no alignment yet for the S.R. 429-Wekiva Parkway & S.R. 46 Bypass projects. The Project Development and Environment (PD&E Study), being done jointly by FDOT and OOCEA, officially kicked off Jan. 19. We are currently in the data gathering and analysis stage. We hope to have some preliminary alignment alternatives ready for review at public involvement meetings around November 2005. We will have public meetings in each of the affected counties (Lake, Orange and Seminole). We hope to finish the PD&E Study and have a preliminary alignment by early 2007. By that time, we will be better able to answer property owners' questions. With the Right of Way Acquisition, final design and permitting phases yet to come, it would probably be 2010-2013 before any construction would begin on this project.We are in the process of drafting the first Wekiva Parkway newsletter, which will probably go out March-April. I've added you to the project database so you will receive the newsletter, meeting notices, etc.There is also an aerial conceptual of the study corridor for the Wekiva Parkway on the Expressway Authority's website, www.ExpresswayAuthority.com . If you need me to send you an 11 x 17 copy of the study area conceptual, let me know.I hope you find this info helpful. Please feel free to call or email with other questions or concerns."

11/14/2005 3:08 PM Lillian and James Welborn16413 Magnolia Bluff DriveMontverde, FL 34756A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park

Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005 10:30 AM

Jeff Welch1539 Chatfield PlaceOrlando, FL 32814A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

11/14/2005	3:16 PM	Public Meetin Comment Form 11/14/05Scott Wenger135 Sunbelt CircleSanford, FL 32771Thank you, for the informative meeting at the Sanford Civic Center. It appears I will be safe to develop my properties along the Wekiva.I have one concern remaining. I currently live at Twelve Oaks RV Park on SR 46, which is at the apex of the three proposed alternate routes connect the parkway to I-4. If the path of the parkway remains as proposed, 250+ / - residents (many elderly and low economic means) would be forced out. Avoiding the park, by shifting 100' to the south or 200' feet to the west (lands now vacant of residential development) spares the park and eliminates up to 80% of the human relocation called for by the project... A goal I'm sure you would embrace. Thanks for your time.
11/14/2005	12:35 PM	Attended Public Meeting, 11/14/05
10/17/2005	4:26 PM	Scott Wenger 407-302-2009 left MSG thank you for sending me the PDF this afternoon with the proposed paths. Just wanted to mention as a novice that I think they haven't updated the legend to explain what they have drawn in. if you read it at face value the path of the expressway is gigantically wide because of the purple or blue dotted lines. But then there are little cross hatch lines in blue and orange which show you connecting to the beltway , port Sanford, Think those are more or less your tentative paths, but the legend doesn't say that, even though I'm one of the first recipients of the map I'm not positive what I'm looking at. Just thought I'd throw that along because someone who just gets it may not get it all.Thank you very much for sending me one. I look forward to just a little clarification of what I'm looking gat so I'm sure I understand what I see.
10/17/2005	2:36 PM	PIO emailed: "Scott,As requested. Please keep in mind that we are still early in the PD&E Study phase for the Wekiva Parkway, and that alignment alternatives may still be deleted or added for consideration. I hope this helps."
10/15/2005	4:58 PM	PIO responded: "Hello Scott, You are correct. I was just in all-day meetings yesterday with local officials wrapping up the first round of local government review of the initial

alignment alternatives. I expect to have something with the changes they requested to post on the website this coming week. Please keep in mind that even once the exhibit is posted, it will still be subject to alternative routes being added and deleted. If you don't see a posting on the website [www.ocea.com](http://www.ocea.com) by say Wed., drop me another line to remind me.

10/15/2005	1:33 PM	cott Wenger emailed: "Hi. Aren't we nearing the time when the tentative pathway for the western beltway / Wekiva parkway will be released? Please don't forget to copy me when it is announced.Thank You.Scott Wenger135 Sunbelt CircleSanford, FL 32771"
7/18/2005	6:05 PM	PIO emailed most recent newsletter as requested to Scott Wenger: "Scott,It was a pleasure speaking with you earlier today. As discussed, attached please find the most recent newsletter for the SR 429-Wekiva Parkway & SR 46 Bypass. As noted we're fairly early in the Project Development and Environment (PD&E) Study, and plan to have some initial alternative alignments ready for public feedback and review at meetings in November. Not every property within the study area will be affected. We anticipate having a preferred alignment selected by early 2007, as we discussed. Please feel free to call or email with questions or concerns."
7/18/2005	12:20 PM	PIO called Scott Wenger 407.302.2009 I own some properties where 46 crosses the Wekiva River. Saw my neighbors when I was checking on the property and they said congratulations on the retention pond. I haven't seen diff proposed routes. I also live nearby on 46, then own two properties at 46 and Wekiva, third acre on south side. The last contact I had was 2.5 years ago, gentleman who was in charge then became director of east west expressway. He at that time had involvement in Wekiva parkway. Back then he said all the ROW that was owned to the south of the Wekiva bridge. PIO noted we're so early in process; don't know that could even speculate about that at this point. He said mike used to say thought our property wouldn't be touched because there's a natural spring right near our area, that's why he presumed building would be .... He said so you think my neighbor was wrong about the retention pond? For some reason seems she saw a map or something? PIO said we're way too early in the process for that, though there are obviously low areas that might accommodate ponds. PIO noted maybe his neighbor was thinking about the former 429 northern extension that was studied, which did have some initial routes in his area and may have had some preliminary pond sites. PIO noted that project is defunct and we're working on a completely different project. He said he's 54 and disabled. He was in a taxi hit by a semi truck about 8 years ago; he needs a quiet small home so I can cope normally with life. One of the reasons I bought property was because it's ag zoning, can put a very small house on it, can do special things, sold my bigger house that I couldn't put up with currently living in 12 oaks RV resort. If they decide they want it, if I end up smack dab in middle of the path, or as my attorney said worst thing is end up next to the path. I move so slow, it's taken me 3.5 years to get to point that I'm getting ready to build, I don't think I'll have energy to go through it twice, build and then have to go through it again. Just trying to decide should I start this process PIO gave public meeting and project timeline.He said RV resort is just off Orange Blvd., about a mile and half from I-4 coming off 46. Are there any plans to demolish since there are more expensive properties on the other side of the road? 135 Sunbelt circle, Sanford 32771, email <a href="mailto:wengerscott@aol.com">wengerscott@aol.com</a> He did not get the recent newsletter. PIO noted will send him a newsletter. --1235 p.m.
7/18/2005	11:52 AM	PIO responded to Deborah Keeter/PBSJ ROW email: "Will do, Deb."
7/18/2005	10:30 AM	Deborah Keeter/PBSJ ROW emailed: "Mary:Good MorningScott Wenger 407.302.2009 needs info on Wekiwa Parkway - neighbor told him his property was going to be a retention pond - please give him a call ThanksDeb"
Contact 11/14/2005	3:12 PM	Debra Wert Public Meeting Comment Form 11/14/05Debra Wert20 Stone Gate SouthLongwood, FL 32779Area of concern Wekiva River to I-4. I feel a true compassion for all the people who may lose their home due to the progress of this road. However, this expressway has been

in the making (in theory) for the past 15 years. Those who purchased homes in the last 8-10 years should have known or checked on the possible placement of this expressway in the RT 46 area. With that said, I believe the state should connect directly into the interchange that now exists for RT 417. If you're going to build an expressway, the plan to make RT 46 half expressway from the river to Markham Road and then a 4-lane highway with front lanes) that will have lights to I-4 is a bad idea. Even with speed controls, this plan is a formula for accidents as fast traffic approached cars stopped at traffic lights. Let the expressway be an expressway. I would like (if the road must be) to follow the orange route from the River to I-4. Also, I would like to have limit on and off traffic. I would hate to see more cut through traffic on Longwood-Markham Road, Markham Road, Orange Blvd and even following on to Markham - Woods Road. Thus, please go with the Orange Route to connect with the 417 - I-4 interchange.

11/9/2005	11:17 AM	Public Meeting Comment Form 11/09/05: Janet Westlake 316 Lake Doe Blvd Apopka, FL 32703 I am employed by Penang Nursery Inc. 4720 Plymouth Sorrento Road, Apopka, FL 32712. I am concerned about where the Wekiva Parkway will be in relationship to Penang. If it doesn't go right through the property it could be very good for the company. It would

make it easier for trucks coming in to pick up out product.I am worried, though the road would go right through Penang. If it did the owners wouldn't rebuild. I'd be looking for a job. It wouldn't be just me but the other 59 employees that work here too. And it wouldn't be just is at Penang who would be affected but all the other nurseries whose plants we buy in every week. Besides the nurseries Penang buys from there are other vendors in the area that we buy from every week in the area. Growers Supply Service and Home Depot to name two. Imperial Builders Supply, BWI, Prasourte, TWC are other local businesses we patronize.I know there are hundreds of considerations to be made before a final decision is reached on the exact route. I trust that the economic and social impact on our area is also a concern, along with the terrain and environmental impact. Thank you for giving us the opportunity to voice our opinions. Sincerely.

	Carol White718 Treeline PlaceSanford, FL 32771I live in Lake Forest Community on S.R. 46. The proposed preferred route that you are considering would put the expressway directly in front of my community causing even more traffic than we currently have at the already congested S.R. 46 and I-4 intersection. The southern Route however, is more logical, connecting the Wekiva Parkway to the existing 417 and keeps the E-W traffic off I-4. Thank you very much.

Contact		Teresa Winingear
11/14/2005	1:49 PM	Comment Form:Teresa Winingear596 Spanish Trace DriveAltamonte Springs, FL 32714A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road

interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.

5/5/2005	6:10 PM	PIO responded: "Claude, Apologies for the delay in getting back to you. We've been inundated with such requests since the letters were received April 15. But I wanted to confirm that you are on the mailing list. Currently we're in the data gathering phase of the Project Development and Environment Study. We've been working on the project newsletter, and hope to get that out in mid-May. Once the data is gathered and analyzed we hope to have some initial alignment alternatives for review at a public involvement meeting in November 2005. You're also on the list to receive that meeting notice."

4/18/2005	8:56 PM	Claude N. Winquist Gatorsgas@aol.com emailed: "Dear Mary Brooks:I would like my name placed on the mailing list to receive copies of the project newsletter and other public information materials.Mr. Claude N. Winquist2001 Northumbria DriveSanford, FL 32771"

10/14/2005	1:24 PM	Angie Wood804 Champion Woods CourtSanford, FL 32771In my opinion, choosing a route that connects the Wekiva Parkway (the western Beltway) to the existing S.R. 417 Greenway) at I-4 is the best option. The users of 417 would find the transition easier and save travelers overall time in their journey. Connecting 417 to the S.R. 46 exit would also be valuable as it would shorten travel time for those looking to reach the S.R. 46 commercial ventures in a timely fashion versus exiting to Rinehart Road. A flyover on top of S.R. 46 would also not be ideal since our children look to cross S.R. 46 to access the Seminole Trail. Additional traffic / a fly over on top of S.R. 46 would increase risk to the children.

Contact Notes Maxwell & Mindy Wright

Date Time Regarding  
12/13/2005 3:19 PM PIO responded to Maxwell Wright: "Hello Maxwell,I'm just back from vacation and weeding through all of the emails. It's still too early to answer some of your questions. However, if there is a suggestion that you would like to make regarding sticking with a particular alignment alternative but shifting it north or south, etc., that is fair comment for the comment forms. I would also include on your form the reason you gave below for the alignment adjustment, i.e., using vacant land to minimize residential impacts. A number of the comments we've received have been along this line, as in 'we support a particular alignment if you shift it ..." I hope that helps and look forward to receiving your comment form."

12/13/2005 3:11 PM PIO researched Maxwell Wright email query about 2621 Boch Road.

12/12/2005 9:30 AM PIO received email 12-8 1252 p.m. Wright, Maxwell D. Maxwell.Wright@pgnmail.com email: Thanks for the info Mary. We are filling out our comment form to submit but I wanted to ask you about the road we live on. We are in favor of the parkway but of course don't want to lose our home because it's only three years old and we moved out there to be close to my wife's parents and raise our child. Their house is 2621 Boch Road which sits just to the North of our house and have lived there since 1984. In your professional opinion, would the alignments you indicated below which would affect our home possibly be the less favorable ones because of Boch Road being dead-end Road? In other words, if the parkway comes that close to Boch Rd and it's not bridged over then there would be access issues for everyone on the road. Would it also make since then that

these particular alignments could be adjusted away from Boch Road maybe to the North where there is vacant land and eliminate the unnecessary taking of some residences? Or is it because Boch Road is such a small road that it doesn't really hit the radar screen as a problem at all in regards to the progress of the project? Wouldn't someone in engineering be able to tell us something in greater detail after looking at this particular area or is it still too early? As you can tell I'm concerned. It's not the house. We can build another home but finding land is the real problem. We don't want to move and looking at this objectively we feel the northern most alignment makes the most sense for many reasons. Sorry for the long-winded email and I know you are busy but wanted to send this before submitting the comment form. Thanks again, Maxwell Wright

11/23/2005	5:05 PM	<p>PIO responded to Maxwell Wright: "Hello Maxwell,I looked up your property (parcel 2821 on our Orange County alternatives map), and it would be hit by alignment alternative segments OC13, OC16 and/or OC 17. Other than the very vocal opposition from the environmentalists about removing the easternmost alternatives in this general area (due to impacts to state lands) we really hadn't gotten into much discussion yet about one alternative over another in this area. However, that is precisely the point we're at now: reviewing and analyzing all of the public comment forms supporting and opposing various alternatives, as well as evaluating and addressing input from the local government officials</p> <p>So be sure to get your comment form in soon, if you haven't already. I'm still working through them all.I'm afraid it's too soon to tell you much more than that, but over the next couple of months we hope to be far enough along in the process to start weeding out some of the less viable alternatives. We will be updating the maps on the website periodically, so stay tuned. And certainly by next summer these maps will look considerably different, and we'll have a little more detail, when we bring forward the more viable alternatives for public review and comment.We'll continue to send you newsletters and meeting notices, as well as update information on the website. In the meantime, have a great holiday!"</p>
11/23/2005	4:39 PM	<p>PIO researched Maxwell Wright's query re: his property 2605 Boch Rd in Apopka.</p>
11/22/2005	9:45 AM	<p>Maxwell Wright/Progress Energy emailed: "Mary, We've communicated before via email and I was interested again in discussing the new possible alignments for the Wekiva Parkway through NW Orange County. I do work for Progress Energy but I have a home in the study area located at 2605 Boch Rd in Apopka. Boch Rd is a dead end road running east of Plymouth Sorrento rd just north of Haas Rd and 1/2 mile south of the Orange/Lake County line. Is the northern most alignment (one that shows the interchange drawn on the .PDF map) the one that is favored at this point or can you disclose that information? I was out of town when the workshops were held and wanted to get an idea about what to expect. It just looks like the northern most alignment begins to make sense because the interchange would sit mainly in the middle of a 200 acre tract of vacant land which the spur road back to SR 46 could easily be positioned. You can reach me by cell phone also---321.436.1993. I would appreciate any information you can provide. Maxwell D. Wright Progress Energy Revenue Protection W&gt;407.804.8835 Email&gt; maxwell.wright@pgnmail.com</p>
1/18/2005	3:10 PM	<p>PIO received email response from Maxwell Wright: "Actually Mary I don't work in the department for Progress Energy that would be affected by the Parkway (Real Estate, Transmission, Delivery, etc.) but I work in the same office as some of these folks do and I manage our residential and commercial conservation programs. I'm really after information regarding my residence which is included in the project area and is 2 years old</p> <p>I've talked with Steve Pustelnyk in the past along with Nathan Silva just getting an idea as to some of the initial thoughts about the possible route the Parkway would take. There will be other representatives from Progress that will be involved when the time comes but I was just wondering what the overall status was of the project and when some additional field studies may pick back up. My home address is 2605 Boch Rd which is a dead-end road going East from Plymouth-Sorrento Rd and Nathan mentioned before that the idea</p>

was to take the Parkway up the West side of Plymouth-Sorrento Rd and get as close to the Orange/Lake county line before turning back to the East and to I-4. Aerial maps show this to be a favorable route and one that is beneficial for the spur road back to SR46 as well. But, time will tell I guess. There's probably not much more info you have right now or much more you can disclose at this point but I appreciate your time. Maybe I'll check back with you after some time passes to see what info is available. Regards."

1/17/2005 5:23 PM PIO responded to Maxwell Wright/Progress Energy: "Happy New Year, Maxwell!The hurricanes wound up pushing the PD&E schedule back for the Wekiva Parkway projects. We just started the PD&E this month, and are having our first official kickoff meeting on Wed., Jan. 19 at 2 p.m. I'm not sure if that's something you want or need to attend? Let me know.We're looking at the typical 2-3 years for the PD&E, as well as for subsequent phases (final design, ROW acquisition), so probably looking at 2010-2013 before we start turning dirt. Of course, all of that scheduling is highly subject to change for a host of reasons."

1/17/2005 5:17 PM PIO received 134 p.m. email from Maxwell Wright/Progress Energy: "Mary,We communicated via email previously and back in September you mentioned you were about a month away from starting the PD&E for the Wekiva projects. Wanted to find out what the status is if possible.Maxwell D. Wright Senior DSM Program Specialist Progress Energy 3300 Exchange Pl NP2A Lake Mary FL 32746 T>407.942.9335 F>407.942.9359 maxwell wright@pgnmail.com"

Contact	Notes
Date	Time
11/7/2005	9:35 AM
	Regarding Lisa Morgan 407-463-6259 said she moved but info still needs to go to the new people at that address. New resident is PO Yang, at same address, 5306 Effie Dr., Apopka 32712. Please change the name so they will stop forwarding info to me at new location. I have received the project update. Have friends looking at a house on that street, are you guys for sure these are the alternatives you're looking at and one of these will be selected after the meeting? PIO said nothing is for certain at this point, these are simply the initial alignment alternatives, and changes are very likely based on local government and public input. Lines will likely come off and some new ones may be added based on input received. She said when will you know for sure? PIO noted PD&E study scheduled to be complete in early 2007 with a preferred alternative. She said okay thanks for the info.
2/28/2005	1:10 PM
	Worked on study area concept request for Lisa Morgan as requested and sent.
2/28/2005	9:23 AM
	PIO emailed Lisa Morgan recapping project status as requested.
2/28/2005	9:10 AM
	Lisa Morgan called back and said "I can't really read the map on the website very well. Do you have a bigger map that shows Effie Drive?" PIO said I could send her an 11x17, though the smaller side streets like Effie are not marked. She said "we're quarter mile from Kelly Park on Effie right before it perpendiculatates into Haas. Andich and Haas are the same road; they run perpendicular to Effie. Obviously that study area is covering, but does your version show it's completely covering Effie Drive?" PIO reiterated I can't see that kind of detail on the conceptual we have now, but that we will be developing more detailed conceptuuals as the study goes on. PIO said I can send her what I have now. She said that would be fine, and acknowledged that we are just in the very early stages of project development.
2/28/2005	8:57 AM
	Lisa Morgan said she had spent time over the last couple of years talking to Steve (couldn't remember his last name) about the 429 Western Extension, Wekiva Parkway, SR 46 Bypass an the Apopka Bypass. "I'm in the middle of selling my home. It seems accoding to the maps, I keep getting lawyer letters and I know that everybody in this area is and that doesn't mean they're going to take out the house. My house is definitely within the study area of the SR 46 Bypass. I think it's causing some trouble for people trying to buy the houses. They're real concerned. I wanted to see if i could get any info about is this really an issue here? I don't want to tell people the wrong thing, but if I don't know what to tell them ... "PIO noted there is no alingment, gave PD&E schedule and status, noting we hope to have some initial alignment alternatives for review at public meetings late this year, maybe in November. PIO noted with various phases it could be 2009-2010 before there is any construction on these projects. PIO noted projects being studied jointly by FDOT and EA. PIO said I've sent other home sellers emails laying out the project status and could do that for her if she thought it would be helpful. She said yes, that would be very helpful. PIO noted I'd added her to the project database to receive newsletter, meeting notices, etc. PIO also said she's welcome to refer homebuyers to me or the EA website. She said that's a good idea and thanked me for the information. eamil redhornet@earthlink.net5306 Effie Dr., Apopka 32712"It's difficult when you keep receiving letters from the attorneys. What is the likelihood this is going to be built?' PIO noted that there was a state law that mandates building the road to meet the area's transportation needs within very strict environmental and other guildelines, that it had been studied and recommended by various appointed committees and that we had marching orders to do it. Now we have to figure out the realities or feasiblity of where is the best place for it to go.

Date	Time	Regarding
6/28/2005	5:07 PM	Brian/QCA emailed re: Sunset Lakes HOA: "Hi Mary - OK, it looks like everything is set for

tomorrow night's presentation to the Sunset Lake Homeowners Assn. I contacted Virgil Rook and updated the SR 429 fact sheet which I will make copies and bring with me along with system maps and business cards. I'm waiting to hear back from Virgil if he or someone else on his team will also be in attendance. I'll let you know how it goes. Have a good evening,Brian"

6/28/2005	2:40 PM	PIO emailed Renzo Nastasi and project team to clarify meeting request was for other section of 429.
6/28/2005	2:35 PM	PIO relayed info to Brian and noted he or Kathy needed to call and confirm with Linda Villarreal Zehr.
6/28/2005	2:24 PM	Linda Villarreal Zehr returned PIO call, said they live off 535 and 429 , on 429 where it's not open. It's their annual HOA meeting. 535 is to the right of us. We would like to hear more about the plans that are happening. PIO asked how many people expected? She said they usually have 60-100 people. The meeting location is the West Orange Country Club off 535, 3300 W. Orange Country Club; it's right off 535, off 429. Turn left off 535. Winn Dixie is on the right at Country Club Drive on the right (Lake Butler Blvd on left). You go down a ¼ mile and it would be on the left. PIO to get with Kathy and Brian to see if one of them can accommodate that meeting. She apologized initial email didn't go through; she was in transition with email set up, so there must have been a problem.
6/28/2005	1:53 PM	PIO responded to Linda Villarreal Zehr email, copied info@oocea.com : "Hello Linda,I must say I did not receive any previous meeting request, but I should be able to make this work Please provide details of the nature of the meeting and location, as well as expected number of attendees. Typically, I am placed at the beginning of the agenda so I do not have to sit through typically extensive association business. I also left a voicemail message on your cell phone as requested. Please contact me as soon as possible to firm up arrangements."
6/28/2005	1:46 PM	PIO emailed Renzo Nastasi/OC Public Works, copied project team about request for public meeting presentation
6/28/2005	1:13 PM	PIO called Linda Villarreal Zehr 407-616-2379, left MSG that I just got email today about meeting presentation request tomorrow. PIO noted this is first I heard of it and not sure if previous discussions were held with someone else about making a presentation. Please call me to discuss.
6/28/2005	12:01 PM	Linda Villarreal Zehr emailed: "We would like to request your attendance at the Annual Sunset Lakes Membership Meeting. We would like a representative to be available to discuss the changes to 429. This would be a wonderful opportunity for us both to understand this project. I am re-emailing my request to confirm your availability and it will be held on the 29th of June at 6:30 pm at the West Orange Country Club. I can provide directions if needed. Please call me on my cell phone 407-616-2379 should you have questions. 1/28/2005	1:12 PM	Tracy Zeller said she was on website looking for alignment for the S.R. 46 bypass in Lake County. She works for the county clerk. tzeller@lakecountyclerk.org PO box 1207, Eustis 32727PIO noted no alignment, just the study area conceptual that she saw on website. PIO noted we just started PD&E study last week, 2-3 years before have an alignment but hope to have prelim alternative alignments for public review at meetings in November.

PIO got her contact info to send project info and meeting notices. She asked so would our public works people have something more detailed? PIO noted no, reiterated no alignment and just started PD&E. PIO noted she's on list and would get project info and meeting notices.

11/14/2005	3:40 PM	<p>Comment Form:Michael Zerulik601 Orange Tree CourtMaitland, FL 32751A Wekiva Parkway interchange should be located at Kelly Park Road instead of Ponkan Road for the following reasons:1) Placing the interchange at KELLY PARK ROAD rather than Ponkan Road will save lives. Ponkan Road is the site of two brand new public schools. Orange County Elementary and Middle Schools being built on Ponkan Road will open for the August 2006 school year. A Ponkan Road interchange will create major traffic jams for parents and kids trying to get to and from these schools. Even worse, a Ponkan Road interchange will be EXTREMELY DANGEROUS for school children walking and riding bikes to and from school every day. Thousands of cars will exit from the Wekiva Parkway into North Apopka every day. Likewise, thousands of children, ages 5 to 14, will be going to school on Ponkan every day at rush hour. Putting an interchange on Ponkan Road is irresponsible, unnecessary and dangerous. The interchange should be located at Kelly Park Road. There is no excuse for subjecting the children of Orange County to the eminent danger created by locating the interchange near the schools at Ponkan Road.2) Apopka's new "Fields of Fame" Sports Complex with eight baseball diamonds and other recreational facilities on Ponkan Road very close to the new schools. Hundreds of children and families will converge at the Fields of Fame nightly for baseball games and other activities. Children will be walking or riding bikes to and from the Fields of Fame after dark. Dumping nighttime traffic from the Parkway into this area on Ponkan Road would be extremely dangerous and would negatively impact the new facilities at the Fields of Fame.3) Thousands of cars per day from the parkway will pour onto Kelly Park Road or Ponkan Road. Kelly Park Road is capable of absorbing this additional traffic burden while Ponkan Road is not. Ponkan Road is narrow with dangerous curves while Kelly Park Road is straighter and less traveled. Ponkan Road is not centrally located and is too close to the Parkway interchange on Hwy 441. Lake County and North Orange County residents will be underserved if they are forced to exit further south at Ponkan Road in to the neighborhoods of North Apopka. Moving the exit further north to Kelly Park Road will better serve the residents of northeast Orange and Lake Counties.4) Zellwood Station is a retirement community on the Southwest corner of Ponkan Road. A Ponkan Road interchange would be unnecessarily disruptive for the thousands of elderly residents at Zellwood Station.</p>

Notes			
Date	Time	Regarding	
12/2/2005	1:51 PM	<p>PIO returned John Zielinski's call, let him know that the alternative with the 46 connection at I-4 would involve dropping down from elevated expressway to at-grade arterial to make the connection because Seminole County doesn't want any major overhaul to that intersection. PIO said he's welcome to call me back with further questions, left my number again.</p>	
12/2/2005	1:38 PM	<p>John Zielinski/DOT Planning left MSG if you recall I was working on getting the Wekiva Parkway designated as a FIHS facility. Central office had one question: the description of the facility in the portion beyond the EA's purview, as being both limited and controlled</p>	

access. I understand the existing 46 that serves the residents will probably be improved and hopefully turned over to local entities for maintenance. But the portion that we're bringing on to the system ... is limited access and probably raised profile facility, and I just wanted to verify that with you, that there will be continuous limited access facility connecting to I-4. Please let me know as soon as you can. I'd like to get back to them, I'd appreciate it. 407-482-7868 thank you Mary.

10/11/2005	2:00 PM	PIO forwarded John Zielinski/FDOT email to project team: "FYI,An update on SIS app from John Zielinski."
10/11/2005	1:19 PM	-----Original Message-----From: john.zielinski@dot.state.fl.us [mailto:john.zielinski@dot.state.fl.us]Sent: Tuesday, October 11, 2005 1:19 PMTo: Mary BrooksSubject: RE: Request to be added to mailing list for SR 414 Extension ProjectThanks Mary. FYI Our application to have the Wekiva Parkway (which includes part of the SR 414 Extension) added to the SIS is under review in the Central Office. The district did apply for \$28M in growth management funds from SB 360 to fund the design to 60% plans for the District's portion of the Parkway. We should learn in a couple of weeks whether we receive those funds John ZielinskiIntermodal Systems SupervisorD5-Orlando Planning407-482-7868 SC 335-7868FAX 407-275-4188
5/10/2005	3:34 PM	PIO received return receipt from John Zielinski/FDOT Planning: "Return ReceiptYour document: SR 429 Wekiva Parkway & SR 46 Bypass PD&E Study - Financing Plan Request was received by John Zielinski/D5/FDOT at: 05/10/2005 03:33:34 PM"
5/10/2005	2:38 PM	PIO emailed Wekiva funding plan to John Zielinski/FDOT Planning & SIS as requested, copied David, Brian and Mark/CH2M, Gary Skaff/PBSJ and Joe Berenis/OCEA: "Hello John It was lovely to speak with you this afternoon. As requested, please find the October 2004 funding plan attached for the Wekiva Parkway. As we discussed, this is preliminary and the costs will be refined as the project develops. I understand that you would like to see the Wekiva Parkway added to the SIS. Please let me know if I can assist you further in this or other project related matters."
5/10/2005	1:25 PM	PIO received call from John Zielinski/FDOT Planning 407-482-7800, also works on SIS, said he'd heard there was a financing plan done for Wekiva Parkway last year that governor had approved, etc.? PIO said yes, was done in November. He asked if it was on a website or otherwise available. PIO said I could email it to him. He said send to john.zielinski@dot.state.fl.us. He said they want to add the Wekiva Parkway to the Strategic Intermodal plan. PIO said I was out of the office now, but would be back in about 45 minutes and would send then. He said that's fine.

We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at www.ExpresswayAuthority.com. On the

entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. 7/17/2006	1:22 PM	Drafted concept letters and sent to: Gladys Williams, Bob Mills, Sue Hamilton, Mr. & Mrs. Warren Ackley, Amalia Corrigan, Bill & Eileen Walker, William Strickland, Ed Meixell

7/13/2006	4:09 PM	PIO returned call to Mrs. Ackley 407-886-7621. a gentleman took the call instead. He said we're trying to find out where we can see a bigger map, we went to the website and couldn't find anything. PIO offered to walk him through it, was he at a computer? He said no, he's laying sod. He asked what the address was. PIO gave him address and text links. He said he followed most of those and nothing ever came up. We were on the map and couldn't get anything to come up. PIO noted it's a large file and it may take a while, and some older computers have trouble with it. He said theirs is 4-5 years old so that could be it. PIO said I could mail a map. He asked can you fax it over to us? PIO noted the map is color on color aerial and will be very hard to read if faxed; I have tried it before. PIO said I can send him an 11x17? He said okay, send to him 6148 Plymouth Sorrento Road, Apopka 32712 attention Warren Ackley. PIO noted we're getting large volume of requests but will try to get this out to them in next couple of days. Please let her know I called her back. He said he would.
-----------	---------	---

7/13/2006	9:30 AM	This is Mrs. Ackley. This is my second call t o you and my second MSG407-886-7621 I'm calling about the 429.
-----------	---------	--

Ackley.

7/12/2006 4:15 PM Woman (didn't give name) called and left MSG we would like someone to maybe call us back. We're in pathway it looks like somehow of 429 and we want to find out where we could go and look at more maps before the 26th or someone could fax us a little map of our area something bigger than what they sent in the mail.407-886-7621 1 Last name Ackley.

Contact Vicki Aguilar-Case Buyer's Real Estate  
9/19/2006 1:13 PM PIO returned Vicki's call. She said home north of 46 on Ohio, off New York and Orange. PIO noted no impact to that area. We have to decide whether we're widening 46 corridor to north or south, but even if go to the north wouldn't be going anywhere near that far, only like 100 feet. She said good. She'd tried to go on the website but couldn't find anything helpful. PIO walked her through text links to get to the workshop exhibits. She was very thankful for the info. PIO said if she had any questions after checking out the maps, to call or email me. She said she'd also sent an email to PIO earlier, wasn't sure of best way to reach me.

9/19/2006 1:00 PM Vicki Aguilar-Case/Buyer's Real Estate, Inc. emailed: "Good Afternoon Mary, I was told that you would be the expert who would have the answers for me :) My name is Vicki and I am a Realtor with Buyer's Real Estate. I am working with a buyer who is under contract to purchase a home that is scheduled to close on 9/29/06. We heard this morning that there may be an expansion project that could come close to the home that she is wanting to purchase. The home is located at: 5300 Ohio AvenueSanford, Fl 32771 We are hoping that you will be able to tell us if this expansion of the 429, 417 and the Wekiva Parkway could mean that her property would be in the line of the expansion or be affected at all in the future and if the project is even on the books or "on the radar." If you would please email or call when you get the chance, we would really appreciate it!! Thanking you in advance, Vicki Aguilar-Case, RealtorExclusively Representing BuyersBuyer's Real Estate, Inc.407-281-1479 Direct407-281-7418 Fax407-415-4385 Cellhmfinder@bellsouth.netwww orlandobuyeragent.comwww.beachfrontdreams.comwww.orlando-real-estate-and-homes.com

9/19/2006 11:44 AM Vicki/Buyers Real Estates called and left MSG I was speaking with Pam in ROW department who passed your info to me. I was wondering if you could call me back. I have a client buying a home off SR 46 in Sanford just west of I-4 and we were wondering about the project of 417 and Wekiva Parkway if that's going to affect her property. If you could give me a call I'd appreciate it.We're getting ready to sign documents to try to close in a week and the subject came up today that she had concerns about future projects going through her property possibly.407-281-1479 if you could call me back I would really

appreciate it. Thank you so much.

7/31/2006 12:00 PM Attended public workshop on 7/25/06. Submitted comment: Ref 3338, property owner in database incorrect. Current owner above. Top of the hill. Not a good location for a stormwater pond because the property is located on top of a sand ridge. Properties to the west better location for pond."

7/21/2006 10:28 PM PIO responded to Melaina/Ch2m Hill email that I spoke with William Allen's wife, Louise, at length and she said they actually got two copies of the newsletter. She said she thinks her husband just wanted to know what was going on with their property since guys were doing soil borings in their yard. She was aware of the meeting dates, etc.

7/21/2006 6:20 PM PIO called directory assistance to get number for William Allen, 7000 W. SR 46, Sanford 32771. number was 407-323-6391. PIO called and got his wife Louise, who said he wasn't in, but they live on 46 and they've been doing soil borings in their yard, drilling. PIO noted I got MSG passed along that her husband hadn't received the newsletter. She said they got two copies of something that said update, was purple and orange. PIO said that sounds like the project newsletter, not sure about the confusion. She said he was probably calling about the borings and trying to find out how it was going to affect us. She said it looks like we could be getting something in our front yard. We have 3 pieces of property ... 2-3 weeks ago ... men in trucks were out there digging for retention ponds. She said they told her they were going to drill to see how deep they could go before they got to water. We have 20 acres on 46 west of Orange Boulevard. She said guys told them frontage roads would have an entrance at Lake Markham. PIO went over two SC alternatives and potential impacts, either way they'd see some sort of impact. She said we have one other situation, understand it could be widened on the north or south side. On the south side because the gas line connects on our property then heads north. They put ht gas line in just a few years ago, thought they were putting it far enough back from the road ... we have 5 acres between our house and 46.We've lived here 29 years. Been watching this go on. At first it was going on the old RR bed ... there was no money to do it then, and the environmentalists or somebody thought it wouldn't look nice... Now they've built all these houses on the south side. If they had done this 20 years ago or at least bought the property .... We're sitting on this two lane road with nonstop traffic. We would just like for you to do something. If we're looking at another 4-6 years, heard it could be 2012 before construction starts. PIO noted that's correct due to funding issues.PIO reiterated meeting info, asked if they planned to attend. She said yes would be at Sanford meeting. PIO said please introduce yourself, gave her my name and number again and asked her to have husband to call me to clarify info he was looking for. She said she would.--639 p.m.

Regarding  
PIO returned call to Kevin Anderson/Centex Homes, walked him through finding the overall viables map and noted that the green alternative had been added back in on 46 in east Lake County since this was posted in May. He said that's what I needed and thank you so much. PIO noted we'd have electronic versions of a representative sample of the workshop exhibits posted some time after the last meeting next week.

7/27/2006 12:37 PM Kevin Anderson/Centex Homes I left you a MSG earlier, you called me back. I was looking for the western connector maps that you have in digital format. Found PowerPoint presentation by going to website ... wonder if that within that pp presentation is the digital format of those maps that I can select individually and print out in whatever format, actually want to do it in large scale format. I guess that the digital format we can use to do printings. I'm calling to confirm that. Call me to confirm I've done it right.321-299-7008 thanks

7/18/2006 2:25 PM PIO returned call to Kevin Anderson/Centex homes 321-299-7008, left detailed MSG that map available on EA website, gave address and text links. Noted if he can't find or download it to call me back, I can email it to him. Call me with any questions.

7/18/2006 9:13 AM 913 a.m. Kevin Anderson/Centex homes called and left MSG I'm hoping and wondering if you have, I've got summer 2006 Wekiva Parkway there's graphic in here in regards to proposed Wekiva Parkway roadway newsletter. There's a graphic ... Is there a digital format of that that I can use to print out a large map for my own purposes call me back if you will? 321-299-7008 thank you.

1/30/2006	11:24 AM	Jim Apicella 407-324-9777 called and said I just wanted to thank you for sending the maps. They've' been very helpful for people, I've made some more copies. I got them in a couple of days. I know you were busy so I really just wanted to say thanks for sending them. A lot of people say they will do things but don't follow up. PIO noted he's welcome, and noted we're working to update the maps in March, will be available on the website. He asked when would construction start? PIO noted funding challenges, construction not likely to start until 2012-2015, though always possible funding could become available sooner. He said people keep asking what's going to happen, and he's been telling them its up in the air, could be 2008 or 2009. PIO noted that's probably earliest ROW acquisition would start, and we've got to finish the study first and then do final design which takes a couple of years. He said okay, and he'd check the website in March and if didn't see

anything give me a call. He aid he hopes we take Mary McKeaver's suggestion about International Parkway. PIO noted that's being looked at with other alternatives. He said okay and thanks again.--1130 a.m.

1/19/2006 11:02 AM Jim Apicella requested Maps 5a-5d be sent to Jim Keller Williams 100 Waymont Crt., Ste 110 Lake Mary 32746 attn. Jim Apicella. He asked if there was somewhere he could go to get more copies. PIO said they can download the files and take them to Kinko's to make additional copies; noted that's what I do. He said that's fine, just send those then.

7/31/2006 1:59 PM Attended public workshop on 7/25/06. Submitted comment: "I do not look forward to a highway in my backyard. Sound barriers must e considered for the people who live in this area and not the businesses who do not want sound barriers because they could not be seen. They can go home at night to a quiet house, I will have to live with noise, possible burglary, and I can't believe this is even happening. I am very upset over this project and would hope a raised highway over on the north of 46 is the final plan. I hope you can sleep at night, because I surely will not be."

7/31/2006	10:48 AM	Attended public workshop on 7/25/06. Submitted comment: "I prefer the northern route to the Wekiva Parkway. It doesn't impact anyone's home and the environmentalists can just deal with it."
5/18/2006	9:26 AM	PIO responded: Okay Phyllis. Stay in touch.
5/17/2006	9:10 PM	Phyllis Arias responded to PIO email: "Mary,Thanks for your quick reply.I appreciate all your input and appreciate the offer to have my buyer contact you directly. If necessary, I give him your phone number and email address.I think at this time, I am pretty safe in knowing that the road is not going through my house!!!I think we can meet each other at a later date when things get a little more precise. Who knows, maybe I will sell my farm before.Thanks again,Phyllis Arias"
5/17/2006	9:45 AM	Rechecked Arias' location, finished response and sent: "Phyllis,We are only in the concept stage, so I can't tell you exactly where an alignment alternative would hit on your property if one is chosen that affects you at all. We haven't gone into the design yet - far from it, as we are just in the PD&E Study phase. During design, detailed surveying, geotechnical work and engineering analysis will help determine the precise location, configuration, width, elevation, pond sites, etc. for the roadway. That sounds like the type of info you want, but we are too early in the game to have those details yet. Right now we're just trying to carve out a corridor in which to further develop the roadway. Nailing down exact details comes later.All we can tell you at this point is that it appears an alternative could have some impact on your property. The extent of any impact would also be determined by whether the new roadway eventually is centered along the north side, south side or very middle of SR 46. Decisions which have not yet been made.Keep in mind of course that the alternatives will continue to shift, be eliminated or new ones added as we proceed through the study.You are welcome to have your buyer contact me directly, or to share any information I've provided with the buyer. I can meet with you Thursday afternoon at 2 p.m., but again, please be aware we do not have the type of details at this point that you're seeking. Let me know if that works. Mary Brooks"--1002 a.m.

5/17/2006	9:01 AM	PIO began preparing response to Phyllis Arias:
5/17/2006	8:54 AM	Phyllis Arias responded to PIO email: "Mary,I was up in Ocala all day yesterday, for some reason I cannot understand your message.I would like to meet with you, at your convenience, here at my property so you could show me the exact location and what the road would be like. Remember, I have a sales contract in the works that I have to divulge information regarding SR46. I don't want anyone coming back at me with a legal suit because I withheld info. Please meet with me and bring any maps/drawings that would be of help.Thanks,Phyllis Arias"
5/16/2006	2:59 PM	PIO emailed Phyllis Arias: "Phyllis,I left a voicemail on your cell phone also. I had a meeting scheduled today that conflicts with our appointment tomorrow and won't be able to make it. What is it exactly that you wanted to discuss further? Can't we do it over the phone? Call me.
5/16/2006	12:21 PM	PIO called Phyllis Arias and left MSG noting I had a meeting conflict scheduled and couldn't make our appointment tomorrow at 2 p.m. PIO again asked what it was exactly that she needed to discuss and couldn't we do it over the phone. Left my number and asked her to call me back.
5/15/2006	4:10 PM	PIO responded to Phyllis arias email: "Phyllis,Took another look at my calendar and the board meeting is actually next week, so I could either be there earlier on Wed. (say 10ish) or come after lunch, say 2 p.m.? How does that work?What is it additionally that we need to discuss?"
5/15/2006	1:14 PM	Phyllis Arias responded to PIO email: "Mary, That would be wonderful if you could meet me at my farm. Call me at 407 314-2265. I am in Eustis in the morning to drop off my horse trailer and will be back to meet you. Phyllis
5/15/2006	8:45 AM	PIO responded to Phyllis Arias email: "Phyllis,No further thanks are necessary, but if you need to meet to further discuss the project I could head up that way after the OOCEA board meeting on Wed. the meeting usually runs about an hour so I'd be in your area between 11 and 1130 on Wed. Does that work?"
5/13/2006	11:17 PM	Phyllis Arias sent another email: "Mary,Thanks for the info. I must meet up with you to thank you in person for the information. I am in the middle of negotiations for the possible sale of my property. Having horses here "in town" is getting more difficult to ride. When can we set up to meet?Phyllis
5/13/2006	10:01 PM	Phyllis Arias responded to PIO email: "Mary,Thanks so much for your input. It is a great help.I am excited for any change in SR46, be it a 4 lane highway (similar to SR46 east of Orange Blvd) with a grassy median.My daughter was in a serious accident, waiting to turn in our driveway, that totaled her car. We have lived on this 10 acre farm for 13 years and when it came time for them to drive they knew to signal WAY IN ADVANCE of our driveway to let the cars behind slow down. Unfortunately the truck driver was sipping his beer and neglected to see the 2 cars signaling and at a standstill. Fortunately no one was hurt seriously. I thank Audi for my daughter's life.Thanks again,Keep me posted.Phyllis Arias
5/12/2006	11:52 AM	PIO emailed Phyllis Arias: "Phyllis, Just FYI, the updated map for the Wekiva Parkway is now on the OOCEA website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a> . On the home page click the "corporate site" button. On the "Construction Updates" click the "Western Connectors" text link. That will take you to the Wekiva Parkway page. Scroll down and you'll see the text links for the various files."
5/10/2006	4:35 PM	PIO responded to Phyllis Arias email: "Hello Phyllis, it would appear there would be some impact to the property in question in the area of SR 46, although it's too early to tell the extent at this time. I cannot advise you on whether to sell or hold on to your property. I can tell you we are in the very early stages of developing this project, with the Project Development and Environment (PD&E) Study scheduled to conclude with an approved alternative in the spring 2007. from there the project would have to go into final design,

which typically takes two to three years, right of way acquisition (another two to three years) and then into construction. On a typical schedule, that would put construction starting around 2012-2015. However, this project is not fully funded, so that schedule is highly speculative and tentative at best. Obtaining the necessary funding is a significant challenge and will greatly affect the timing of the various development stages. We are wrapping up development of the more viable alignment alternatives, and will be posting new maps on the Expressway Authority website in the next couple of days. We're also looking to hold the next public workshops on this project in August. You're on the project mailing list and should receive the next project newsletter in June or early July. I hope that helps. Please feel free to call or email with other questions or concerns. Thanks for your involvement in the development of this major transportation improvement.

5/10/2006 4:00 PM

PIO researched Phyllis Arias location, adjacent to SR 46 on the south side, two subdivisions east of Longwood Markham road, diagonally across from Yankee Lake Road. Her property abuts north side of Ross Lake.

5/9/2006 3:56 PM

Phyllis Arias ariasp@bellsouth.net emailed: "I was unable to attend today's meeting regarding the Parkway. I have my 10 acre horse farm for sale at 7925 West State Road 46 across from the Wastewater Treatment Center and next to Ross Lake Shores. An investor is interested in the property but is low balling because of the Parkway. I would like to ask you if it was in my best interest to hold on to the property for (?) years or get rid of it now because of the Parkway coming through?Phyllis Arias

9/26/2006	3:30 PM	PIO received formatted comment form dated 9-18-06 (Cindy Poirier campaign) from Gerald Arsenault: "I oppose the SR 46 Bypass. It's location in Lake County places an undue burden on the community and threatens the small town lifestyle the residents now enjoy. I feel it's proximity to Round Lake Elementary poses a hazard to the school children ad the community activities that surround a local school. The Highway 441 access connection for the Wekiva Parkway needs to occur south of SR 46 and in Orange County. SR 46 needs to remain a two lane road in Lake County so that the community of Sorrento-Mt. Plymouth can carry out its' plans for a town center as suggested by the design from the Department of Community Affairs."

Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public

workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/2/2006	1:15 PM	Attended public workshop on 7/26/06. Submitted comment: "Having served on the X-Way Authority for 5-6 years in the 70's and 80's with Orange County Commissioners for District 2 (74-82), I have taken a great interest in the part through the Wekiva Basin plans. I feel bridging through the basin's sensitive areas is a must. The cost is not an excuse to do otherwise. There is only one Wekiva Basin in Central Fla and we cannot damage it. Whatever is done - good or bad - we will have to live with for many decades."
7/14/2006	9:48 AM	PIO returned call to Allen Arthur architect 407-896-6711. It's really spectacular seeing Crosstown Expressway how they're doing elevated bridge there, my daughter lives over in Tampa. Of course it's pretty expensive. He asked if we had anything about what the bridge was going to look like at the Wekiva River? PIO noted don't have a concept per se, though have a typical section for that location, and can tell you it will have a higher profile than the bridge there now. So they're just going to replace it, he asked? PIO said correct, it'll be in same location but higher profile to meet current standards. PIO noted he mentioned the park in his message, and that we are doing a wildlife bridge where crossing Rock Springs run and some other locations, though there will be at grade sections also. He said he was just wondering about that, had planned to go to the meetings. He asked if the boards that will be at the meetings are at the OCEA now? PIO said no, we've got about a 100 boards in production now for the meetings. PIO noted the map in the newsletter and on the websites will be different as we've gotten subsequent input from local governments and state agencies. He said alright, then he'll plan to attend the meeting.
7/13/2006	3:40 PM	Allen Arthur/Architect called and left MSG. I was thinking about coming to the Wed. meeting at the Apopka H.S. on the 429 parkway project. I know this is the environmental and alignment study. Are there going to be any preliminary sketches or ideas on the actual construction of the roadway through the park? If so, I'd really like to see that. I was just curious about what all they were going to discuss. 407-896-6711 this used to be my county commission district so that's why I'm more than usually interested. Thanks.

Contact Notes		Louis Ashley
Date	Time	Regarding
5/3/2006	2:41 PM	PIO returned call to Louis Ashley, who said he visited Bonnie Ackleburg(?) at the engineering place so we have all the info we need. But I appreciate your call and I may need to call on you again.
5/3/2006	12:23 PM	Louis Ashley 386-216-4341 called and left MSG I received in the mail regarding the highway extension project information but it doesn't really point out where my property is in relation to this highway project. Do you have a tax parcel map or something I could see? If you would call me I would appreciate it.

Contact Notes		Dudley Askew	Exit Realty
Date	Time	Regarding	
1/19/2006	10:37 AM	Dudley Askew/Exit Realty 352 3086304 said he pulled up the map on the website and wanted to know what all the colors meant? PIO noted colors were only to distinguish different alignments and segments. PIO noted those maps will be updated probably in March based on the public comments and government input received since the public workshops in November. He said so this is likely to change then? PIO said absolutely; nothing's been decided, not scheduled to finish the study until March 2007. PIO noted	

some alternatives being removed, others just being tweaked and some new ones added. PIO noted we're still meeting with local officials and gathering input. PIO asked if he was on the mailing list? He said no, please send info to 1024 E. 5th Ave. Mt. Dora 32757 home address), daskew8626@aol.com PIO noted maps to be updated maybe in March and next public workshops probably around July of this year. He said he appreciated the help.

1/18/2006	12:46 PM	Dudley/Exit Realty called back re: not finding the map and issues with printing. PIO walked him through the text links and showed him the map links on the Wekiva Parkway page. PIO noted limits for the Lake County east and west maps. He said that helps and thanks very much. He had been clicking on the wrong links.
1/18/2006	11:51 AM	1151 a.m. Doug/?? Real Estate (spoke too fast to make out name and company) left MSG I just spoke to you a few minutes ago. I'm having trouble getting a map ... from the website. If you could call me back352-308-6304
1/18/2006	11:40 AM	Gentleman (spoke too fast to catch name) from Exit(?) Realty in Mount Dora 352-735-1049 called asking for map of Wekiva Parkway at SR 46. PIO asked if he had internet access? He said yes. PIO noted all of the maps are on the EA website, gave him web address and text links. He said thanks for the help. PIO noted if he had any trouble downloading the maps to give me a call back.

6/13/2006	4:06 PM	Dave/CH2M Hill forwarded a third email re: John Askew: "FYI_____From: Lewis, David/ORL Sent: Tuesday, May 09, 2006 6:35 PMTo: 'JWAskew1@aol.com'Cc: Callahan, Mark/ORLSubject: RE: 441/46 connectorWe are still in the conceptual stage and, since we have just begun preliminary engineering, we would not be able to produce the type of graphic you are requesting. _____From: JWAskew1@aol.com [mailto:JWAskew1@aol.com] Sent: Tuesday, May 09, 2006 10:48 AMTo: Lewis, David/ORLcc: tjfish@lakesumtermo.comSubject: 441/46 connectorHi David...again thanks for sending the plan regarding the 441/46 connector. I was wondering if you had the capability of producing a 3-d image of the proposed elevated eastbound ramp off 441 onto 46 where I would have a much clearer image of the roadway in proximity to my property. Mark had indicated at the meeting with our neighborhood homeowners that the ramp(s) would be some 21 feet above the existing roadway. It was helpful for me to see

the detail in the plan you sent but it lacks the perspective of what that ramp way would look like from my property. Is it possible for such an image to be drawn? My issue is the proximity of the proposed roadway to my property (some 86 feet) and its effect on my property and quality of life. Recognizing that all this is into the future, I am nonetheless concerned about all this (of course, I am not the only one...). I would appreciate any help in my visualizing what this puppy would actually look like if I were standing on my property looking at it. I measured the distance as shown on the plan you sent and the roadway would be very close to me. Too close. Thanks. John Askew 123 Pond Road Mount Dora, FL 32757

6/13/2006	4:05 PM	<p>Dave/CH2M Hill forwarded another email re; John Askew:          "FYI From: Lewis, David/ORL Sent: Tuesday, April 18, 2006 12:50 PM To: 'JWAskew1@aol.com' Cc: Callahan, Mark/ORL Subject RE: Fw: Plan It is too early to provide specific answers since several concepts are being evaluated. FDOT generally does not provide compensation if property is not physically impacted. Potential noise abatement would have to be assessed using FDOT criteria at a later date. From: JWAskew1@aol.com [mailto:JWAskew1@aol.com] Sent: Tuesday, April 18, 2006 11:42 AM To: Lewis, David/ORL Subject: Re: Fw: Plan Would that put me somewhere in a good case for mitigation or impact? Thanks. John</p>
6/13/2006	4:04 PM	<p>Dave/CH2M Hill forwarded previous email to John Askew:          "FYI From: Lewis, David/ORL Sent: Tuesday, April 18, 2006 11:21 AM To: 'JWAskew1@aol.com' Cc: Callahan, Mark/ORL Subject RE: Fw: Plan Mr. Askew: Under this interchange modification concept, the outside edge of the southbound US 441 to eastbound SR 46 ramp structure is approximately 94 feet from your property line at the closest point. The future right-of-way line would be approximately 86 feet from your property at the closest point. In this concept the widening of SR 46 is proposed to be to the north. Dave Lewis, CH2MHILL          From: JWAskew1@aol.com [mailto:JWAskew1@aol.com] Sent: Tuesday, April 18, 2006 8:55 AM To: Lewis, David/ORL Subject: Re: Fw: Plan Thanks, David, for sending me the file. I cannot see on the file the scale and am curious about the actual distance between the leading edge of the eastbound on-ramp to 46 and the northwestern boundary of my lot. I am trying to determine if my lot will be impacted by the roadway. My lot is contiguous to Jack Wagner's property which is in the impact zone. Judging by eyeball as I stand on my property it is inconceivable how my property would not be impacted by the proposed roadway. It would appear that the leading edge of the on-ramp would come some 30 to 40 yards from my property... a distance that is just too close to make it livable. I know it is too early in the game for more precision on your part but it would be helpful for me to know exactly how close to my property the proposed roadway will come. Thanks. John Askew 123 Pond Road Mount Dora, FL 34788</p>

Contact Notes Date	Time	<p>Norma Assenza Breese Craft and Hensley ERA</p> <p>Regarding</p> <p>PIO responded to Norma Assenza: "Hello Norma, I see the property in question, 2089 Haas Road owned by Jung Lee, is approximately two parcel-widths east of the east end of Boch Road, with a driveway that extends south to Haas Road. This property is indicated on our project concepts as #2826. The impact to this property would vary depending on the alternative chosen in the area of the Orange County-Lake County Systems Interchange (IC : Systems IC OC Alternative 1 bridges over the driveway about a third of the way down and would not affect the bulk of the property. Systems IC OC Alt. 2 cuts across the southern half of the main part of the property. Systems IC OC Alt. 3 bridges over the driveway about a third of the way down. Systems IC OC Alt. 4 cuts across the top half of the property. Systems IC OC Alt. 5 also cuts across top half of the property. Systems IC OC Alt. 6 cuts the across top half of property and starts to creep up onto the adjacent property to the north. The least impact, therefore, would be from either Systems IC OC Alternative 1 or 3, which would just bridge over the long driveway area. If one of the</p>
8/7/2006	2:36 PM	

other alternatives is selected, the impact would much more significant to the main portion of the property. I hope that helps. Please feel free to call or email with other questions or concerns. Mary Brooks--244 p.m.

8/7/2006	10:33 AM	Norma Assenza/ Breese Craft and Hensley ERA normaisrael1@yahoo.com emailed: "Good morningI'm a realtor listing a property at 2089 Haas road in Apopka.The parcel id is 06 20 28 0000 00 035, owner is Jung Lee.Could you tell me if this property is being affected by the new road in that area?I've looked at the maps on line, but can't tell if this property is in the proposed route.Thanks for your time.Norma AssenzaBreese Craft and Hensley ERAMt.Dora,Fl
Contact 12/13/2006	10:34 AM	Jerry and Joyce Avery Joyce and Jerry Avery 407-880-7840 returned PIO call. he said listened to your MSG appreciate it, talked about the green area y orange lake county line, we live on Boch, the first house, have 10 acres that run east and west. One of the proposals that I looked at, the last two proposals, one ran over house, other ran behind my house on the holder property, and maybe took part of my pasture. PIO noted we're wrapping up overall impact assessments and will come forward with a draft recommendation in January, which alignment and which IC's. PIO relayed still wrapping up evaluation of alternatives county said we could look at on green place properties, and once we do we have to meet with those folks to see if they can go anywhere. PIO reiterated county has not authorized alignments going on those properties. He asked what would happen if the county did authorize it? He said not trying to paint you in a corner... PIO noted then we'd do a more detailed assessment of whether that's the best way to go, given that it wouldn't affect as many homesteads. He said majority of neighbors in lieu of county property were in favor of the one behind me, the one to the southJerry said it's difficult not knowing, we've been here 30 odd years, if we have to relocate at our age, and we just want to know. it's just something that nags at us. It's not how much time I have to move, but whether I have to move. He said housing development company wanted to make him an offer on a piece of property; in orange county you just can find property like this anymore. PIO said we'd keep them posted.
12/12/2006	2:25 PM	Jerry Avery left MSG I'm Joyce's husband. I listened to voicemail you left for Joyce and had a couple of questions. I will get back with you later.
12/12/2006	10:01 AM	PIO returned call to Joyce and Jerry Avery we live on Plymouth Sorrento road and Boch, 407-886-7840 H, c 321-230-3435, left detailed MSG at home that we discussed in last week's meeting that CH2m Hill was wrapping up the impact assessments and analysis including looking at potential alternatives on the county's green place properties. PIO noted think they hope to have the green place analysis done this month and set up another meeting with the OC EPD folks, but don't know if that's been scheduled for sure. PIO noted overall schedule is bring forward draft recommended alternative in January, have new maps to post on website, then local government and state agency review and revisions, and then formal public hearings in April. PIO noted that's where we are with things, left my number and noted she's welcome to call me back with other questions.
12/11/2006	3:16 PM	Joyce and Jerry Avery MSG we live on Plymouth Sorrento Road and Boch, I was calling to see if any update on meetings or anything you could tell us and p 407-886-7840.H c 321-230-3435 I appreciate you giving me a call back. Thanks
8/9/2006	2:18 PM	Attended public workshop on 8/1/06.
8/9/2006	10:52 AM	Attended public workshop on 7/26/06.
6/27/2006	10:48 AM	PIO returned call to Joyce Avery, Gerald Avery said she was at the grocery store. PIO relayed July 26 meeting date at Apopka h.s. from 5-8 p.m. he was thankful for the info.
6/27/2006	10:02 AM	Joyce Avery called and left MSG I've talked to you before. We live on p-s road. I'm interested in finding out if set a date for meeting for the road coming this way. If you'd call me back at 321-230-3435. If you can't get met at that number 407-886-7840 Thank you.

6/5/2006	9:32 AM	PIO called back Joyce Avery and discussed it appeared northernmost alternative would hit her property, and that we still have to figure out retention pond locations so she needs to keep that in mind as well. PIO noted best thing to do would be to keep an eye out for literature and attend the next workshops so she can see the latest details. PIO noted we'll have the public comment forms there also so people can cast their votes on the remaining alternatives, and will also post those on the website afterward as well. She said she would and thanks for calling back. PIO noted we want them to have the best info available at the time and will be sending her info.
6/5/2006	9:04 AM	Joyce Avery called and said they saw the new map on the internet and it looks like that one alignment is going to definitely take their house so she wanted to touch base. PIO asked for her location. She said they're on Plymouth Sorrento Road on Boch Road, on the south side. The address is actually 6303 Plymouth Sorrento Road, have seen the latest, in the middle of the 10 acres there. She said she understands there's a meeting in August? PIO noted were looking at August but now EA wants it held in late July, so we're trying to set that up. Noted we're working on the newsletter now and she will get that and the meeting notice. PIO said let me look up her property and give her a call right back. She said that would be fine.407-886-7840
4/27/2006	9:38 AM	Joyce Avery 407-886-7840 called and said I'm anxious to see new alignment, last time I talked to you said newsletter coming out in April. PIO initially thought she was referring to MBX. PIO asked her location? She said Plymouth Sorrento road near Boch. PIO noted still trying to get updated maps on viable alternatives, expect those in couple weeks and that will move things along. Noted we still have to schedule public meetings. Were looking at July but now will be more like mid-August. She said okay, just curious to see if and how they're going to be affected. PIO noted I'd pass along info as soon as I got, invited her to stay in touch. She said she would and thanks.
3/28/2006	1:09 PM	PIO returned call to Joyce, let her know the next public workshops planned for July but we don't have dates scheduled yet. PIO asked if she'd attended the workshops last fall? She said yes. PIO noted the project team has been narrowing down those alternatives to reach a set of more viable alternatives. PIO noted hope to have updated maps by end of April. She said will those show where it's going? PIO said yes, some routes will be similar to what she saw last fall, but others have been eliminated from consideration based on local government or other input, and others have been shifted based on feedback. She said we're out here on p-s road and we're just kind of hanging in limbo. I appreciate you getting back to me. PIO said no problem, she's welcome to check in with me anytime, but end of April will be the next real new info for them. She said that's fine and thanks.--114 p m.
3/28/2006	12:16 PM	Joyce Avery called and left MSG 407-886-7840 I was just calling for any updates on 429, if you have any meetings coming up or anything you can tell me pertaining to 429. I appreciate your call back. Thanks.

Attended public workshop on 7/26/06.  
Comment Form: Kenny Bum June Bahk, Boo Sun Bahk 5521 Effie Drive Apopka, FL 32712 It would be sad to lack the community of our beautiful enjoyment such as our parks, landmarks, and nature. Just by looking in our area cows, horses, rabbit all kinds of animals are breathing. We have been enjoying peaceful, quiet, life that we share in our community. My main concerns are the waterlines, pollution, and the noise will be unbearable and relocating will have a big effect on my life. Over all the while situation is really affecting my life because I love my house, my community and my neighbors. I hope no one has to leave so we can stay and enjoy the wonderful life we are living right now.

We appreciate your time and concerns. We are in the process of setting up the first of what will likely be several meetings with your homeowners association to try to address your issues. Your comments will be reviewed and evaluated along with the more than 450 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007 Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&amp;E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps.I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. Contact		Brian Ball
1/12/2006	3:43 PM	PIO emailed Brian Ball, attached MBX alignment and overall Wekiva Parkway conceptual map: "Hello Brian,It was a pleasure speaking with you. I've attached a couple of maps that I hope will help answer your questions about the SR 429 in the area of US Highway 441. As we discussed, we are not extending SR 429 from where it currently ends at 441. A new section of SR 429 is planned in conjunction with the planned SR 414-Maitland Boulevard Extension, and will connect to US 441 to the north and west near Plymouth Sorrento Road. Once that project is complete, the current section of 429 that connects with 441 will be renamed SR 451.We are currently studying a project to extend the new SR 429 at US 441 near Plymouth Sorrento Road to the north, and that would be the Wekiva Parkway.Regarding the existing SR 429 at US 441, there are plans to realign that intersection with Vick Road. That design has just really started, so we're very early in the process. As also noted, project files also are available on the Expressway Authority website at www.oceca.com or www.ExpresswayAuthority.com . For information on the Wekiva Parkway, click on the "Western Connectors" text link on the home page. I hope you find this information helpful. Please don't hesitate to call or email with other questions or concerns."--352 p.m.
1/12/2006	3:35 PM	PIO returned call to Brian Ball, let him know we were not extending 429 from where it currently ends at 441. PIO noted new section of 429 planned in conjunction with the MBX, and will connect to 441 to the north and west at Plymouth Sorrento Road. PIO noted the current section of 429 that connects with 441 will be renamed 451. PIO noted we will extend 429 from the new location at Plymouth Sorrento Road to the north, that will be the Wekiva Parkway. PIO also noted there are intersection redesign planned for current 429-441 intersection and Vick Road. PIO noted that design has just really started, very early in the process. PIO offered to add him to mailing list to receive info. He said definitely: 1717 S. Eola Dr., Orlando 32806, email bball@ballrealtypartners.com He asked if there was a website he could get project info? PIO said yes, gave web address. PIO offered that he could check in with me from time to time via phone or email about status of Vick Road intersection redesign. He asked that PIO email him so he'd have my email address. I said I would.
1/12/2006	3:15 PM	Brian Ball/Orlando broker 321 663 2137 left MSG I'm looking at buying property at 429 and 441. Wanted to talk to you to get idea of the timeframe for the extension of 429. Call me I'd appreciate it.

Contact	Doug Bankson	Victory Church
Notes		
Date	Time	Regarding
7/21/2006	6:00 PM	PIO returned Doug Bankson's call. He said thanks fir the call back but in the meantime I got the Apopka newspaper and got the info I was looking for. He said he got the original email from the Chamber of Commerce. PIO asked if he wanted to be added to the project database? He said that'd be great, send info to <a href="mailto:pastordoug@victorychurch.cc">pastordoug@victorychurch.cc</a> , mail to 509 S. Park Avenue, Apopka 32703. PIO asked if he was coming to the workshop. He said he can't come to the Wed. Meeting because they have services. PIO noted same info will be presented at all three meetings so may be he can make one of the other ones.

7/21/2006	12:05 PM	Doug Bankson c 321-244-8051 called and left MSG about the Wed. workshop on the Wekiva Parkway. I'm curious to know what Wekiva Parkway refers to? Is that the extension that 429 goes up to 46 on NW side of city? Please call my cell if you get a chance.

8/7/2006	12:09 PM	Regarding Attended public workshop on 8/1/06. Submitted comment card: "The connection at I-4 and SR 46 makes no sense. That section of I-4 to SR 417 is already full of merging traffic. The new expressway should connect to I-4 at SR 417."

Contact	Diane Barfield	Estates of Wekiva Park HOA
7/21/2006	12:05 PM	PIO left for Estates of Wekiva Park HOA meeting. Arrived Panera at Super Target & Seminole Towne Center about 640 p.m. Brian was there and Tom arrived shortly thereafter. We determined there was no meeting room at this location. Mark arrived. I called Diane Barfield's home number twice in an attempt to reach her, but she'd apparently already left. I checked with the manager and she said their lake Mary store has a meeting room. I called that store and the HOA was meeting there. We all relocated to the Lake Mary Panera on Lake Mary Boulevard and International Parkway, southwest corner and caught up with the HOA.

There were about 35 people in the small meeting room. Diane Barfield apologized for the mix-up, said she also went to the wrong location initially. Mark gave project overview and background.

Q: Doesn't it tie into the 429? Mark noted the Maitland Boulevard Extension includes a realignment of 429 that the Wekiva Parkway will tie into.

Q: What's the timeframe for all this and what are the obstacles to construction? Mark note the study schedule has slipped somewhat, we hope to have initial preferred alternative recommendations for FDOT, SCEA and OOCEA early in 2007. And then public hearings in April to present preferred alternative to the public, then seek final approval from state and FHWA. Once the study is done the EA has some money for ROW and design, and DOT has some money for ROW, but not nearly enough. So I don't know when ROW acquisition will start. I'd say it was 6-7 years off at a minimum, probably farther to turn dirt. It is all tied to funding.

Discussion about taking homes vs. park land. Mark noted when we look at projects for federal approval, parks and public lands are afforded special protection. We would be in the Lower Wekiva Preserve. If you want us to go north, we need your resounding input and you need to voice your concerns to Seminole County.

Q: So there are five county commissioners that will make the decision and then two others? Mark said correct, actually 4 out of 7 will make the decision. You Commissioner Brenda Carey has been very active in the project development and I believe would tend to side with you.

Mark noted we're required by the federal process to look at alternatives that avoid impact to the park. He noted the park officials don't like it in the park; we would have to figure out some type of mitigation in that instance.

Q: If we go south, besides the two houses would you also take the tennis courts, waterfalls? Mark went over the roll plot alternatives in detail. With the north widening the new bridge will span more over the river and be up higher ... one way frontage roads... pointed out HOA access point, ponds A & B ... wetlands. He noted the north widening holds the south ROW line that's there today. The pipeline moves 65' to the north. ... Common area and two lots would be affected by the one alternative pond.  
Re: access, if you're going east on 46 and you'd get on the Wekiva Parkway further down the road (pointed out ramp). ... If we go with 417 alternative the frontage roads end west of Orange Boulevard.

Q: So there is still access to Orange Boulevard and International Parkway? Mark noted yes.

Mark said if you want to go to Lake County, make a right turn and then a U turn to go west. If you're coming from Lake County you will have to go off the ramp east of the subdivision, make a U turn and then go back west and left to get into your entrance.

Q: On the ramp, wouldn't it make more sense to have it closer to Markham Road? Mark said we were trying to limit the circuitousness with people having to make U-turns. The ramps cannot be too close, though we have some ability to adjust the ramps.

Q: How many miles to go around to get back to our development? Mark said we can determine that, though it's probably not "miles."

Q: Will there be a noise wall? Mark said we're doing a noise study and we will be looking at walls.

Q: What about the elevation of the roadway? Mark pointed out bridges that will be 25-30' high. He said there will be some reduction in the middle but probably won't get all the way down.

Q: Will there be traffic lights? Mark said he thinks ultimately it will be signalized, but not sure if the crossings will be initially. Mark noted the frontage roads will be local traffic only so it will be easier to get in and out of the subdivisions.

Q: Can't we start the ramps farther west as part of the bridge? Can't we keep SR 46 and do a flyover? Mark noted intent of the legislation was to get rid of SR 46 due to conflict with wildlife corridor. Issues with flyover ...

Q: We're in the front of the subdivision. If the houses are gone, how will we have access? Mark showed on the roll plot another alternative that would take 65' off the HOA frontage...noted the pond could go away or be relocated.

Discussion of drainage, wetlands and mitigation issues. A gentleman suggested selling pond on park property as watering hole for animals. Tom noted that would not be clean water.

Q: Can't you build the pond in two parts, with dirty water going into one side and the other side clean? Mark noted they have done concepts similar to that in the past. He noted new rules are coming, special requirements in the Wekiva Basin to avoid pollutants getting into the springs.

Q: what about that high area for drainage? Mark noted we would have to excavate heavily that's high sandy ground. The drainage folks have looked at that. It has to work hydraulically.

Q: what will be the exact impact if the 65' are taken to the south? Mark said if we go north the southern edge of the ROW will be the existing alignment. The frontage road would be about 24' from ROW line. There would be vertical wall that holds the southern boundary of the Wekiva Parkway, 6 lanes on the Wekiva Parkway, barrier wall would block the view of traffic. Your driveway connection would allow right in, right out onto the frontage road. There would also have to be some modification of your driveway. If we go with the southern widening, there would be a deeper impact to your access; it would put us closer to the circle. We would take 65' out of the common area. The two parcels along the northernmost 65' would be taken also.

Q: Are those total takes? Mark noted we would only need 65', but if the owner said take it all that could possibly be negotiated. Mark said there would be the ROW line, then 8' that could be landscaped, a trail and then the frontage road. 25' from the ROW line to the frontage road - that's with the north alignment. With the south alignment the road would be on the existing ROW line and the new ROW line would be 65' south, almost to those young oaks near your circle, that's where the new ROW line would be.

Q: Once you build something like this, do property values hold or go up or what? Mark noted there have been some studies but they're not really comparable because they were done in commercial areas. I would say during construction it would be a less desirable location if you were to try to sell then, but once it's done you're looking at improved access and improved value as opposed to doing nothing.

What's the possibility of getting the pond approved on the north? Discussion of public land provisions. Mark pointed out private land that could also be considered for north side pond.

Q: You can put a pond on a home but not a park? Mark noted federal law. Brian noted we don't have eminent domain power over public lands. Mark noted we're required to look at the impacts that avoid public lands. Tom noted the idea here is that once public lands are acquired, that they would be in public ownership for a thousand years, into perpetuity. None of our homes will still be there 1000 years from now, but the idea is the parks still would be.

Q: This is a new subdivision, why would they approve it if they knew this was coming? Mark noted these proposals weren't drawn up utility early this year, though we knew the

Wekiva Parkway in some form was coming a couple of years ago. With the property rights law, Seminole County couldn't stop you from building on your property if they wanted to.

Q: Will the pond be fenced? Mark said more than likely to keep the animal off the road if it's on the north side. Someone commented it would look like the fencing on Lake County high with barbed wire at top) along 46.

Mark noted between the Wekiva Parkway and frontage road there will be a 14' wall, then Seminole County has asked for 10-14' trail to tie in to Markham Road, then another 8' to landscape.

Mark note the wall would be on the Wekiva Parkway; that's where the noise would be coming from. And then some wall also maybe on the ramps.

A man commented that early in the morning you can hear the noise on 46 today. With this thing you will hear it 24 hours a day.

Mark noted widening 46 as it stands today is not going to happen. If nothing is done you're going to become prisoners not from the Wekiva Parkway but from constant traffic. You won't be able to get out. There is an issue now about being able to get out safely, and it's going to get worse. Mark noted the least impact to you would be to widen to the north and get rid of pond on south side.

Another question about timeline. Mark noted there may be some advanced ROW acquisition, but rally you're looking at 7-8 years.

Q: Once this starts how long to finish? Mark noted if the money was there tit would be probably 8-10 years. ... Would be surprised to see any construction prior to 2015, but it could happen.

A man said Lennar no longer has vested interest in the community but doesn't have control over HOA. He expressed concerns about Lennar acting in their best interest if it comes to takings. Another man said Lennar is supposed to turn HOA over to owners within the year.

Q: Do you have to reach a certain level of funding before you start buying ROW? Mark said no. we have to finish the study ...

A man commented that it's important to keep in mind that construction may be 8-10 years away, but the decisions are going to be made much sooner than that. Mark noted that's correct. We hope the have a decision and approvals next summer.

Tom said so I get the consensus is that the HOA wants us to go north? Everyone responded that's correct.

Some homeowners stayed after meeting broke up to ask questions about ROW acquisition etc. PIO asked Brian if he could get some of their ROW brochures, might be helpful. For these types of meeting since people always ask. He said he'd have Tom bring some to the meeting.  
--815 p.m.

10/10/2006	12:59 PM	PIO called Diane/Estates of Wekiva Park HOA 407-330-7357, she said we were still on for this evening. Told her see her at 7 p.m. she said sounds goods and thanks for calling.
10/10/2006	12:57 PM	PIO emailed Diane Barfield/Estates of Wekiva Park HOA: "Hello Diane,Just touching base to make sure we're still on for this evening's meeting at Panera at 7 p.m. with your HOA. Please call or email if anything has changed. Thanks.Mary Brooks
9/25/2006	6:38 PM	PIO emailed Diane Barfield/Estates of Wekiva Park HOA: "Diane, we're confirmed to meet with your HOA at Panera in Sanford on Tuesday, Oct. 10 at 7 p.m. please let me know if anything changes or if you have any questions. Thanks and look forward to meeting you."

9/21/2006	6:50 PM	PIO responded to Diane/Estates of Wekiva Park HOA: "Hello Diane,FDOT is on board for the 10th. Just need to hear from the senior project manager with CH2M hill once he gets back from vacation Monday. Have a good weekend!Mary Brooks
9/21/2006	8:18 AM	Diane Barfield/Estates of Wekiva Park emailed: "Hello Mary,Per our conversation September 20, the meeting has changed to October 10, 2006 at 7:00 pm at Panera Bread same location). Please let me know if you will be able to attend. Thanks!!!!Diane
9/20/2006	2:58 PM	PIO returned Diane Barfield's call, let her know I'd forwarded the meeting change request to the team. One of them is on vacation rest of week so it will be next week before I get back to her. She said her property manager Denise called this morning and said we couldn't get the Panera meeting room on the 11th, though that was previously indicated. So they're going for the 10th. PIO asked if she'd gotten my email (no response)? She said she did. PIO said I'd get back to her when I hear from the team. She said okay thanks.
9/20/2006	11:41 AM	Diane Barfield/Estates of Wekiva Park called and left MSG I had called you about having that meeting on Oct. 11. well Century Management just called and they cannot do Oct. 11 but can do it on the 10th at 7 p.m. can you call and let me know if that would be alright with you?C 407-718-0274 thanks a lot. Sorry to have to change the date.
9/18/2006	5:26 PM	PIO emailed Diane Barfield/Estates of Wekiva Park HOA: "Hello Diane,I've checked and members of the project study team can make the Oct. 11 meeting from 7-8 p.m. at the Panera near Target and the Seminole Towne Center. Do you actually have a meeting room at the restaurant, or will we be in with the general customers? We need to know how many boards we can bring, etc.Please let me know at your earliest convenience - thanks Mary Brooks
9/18/2006	12:14 PM	President of the Estates of Wekiva Park HOA requesting that we attend their Oct. 11 meeting at 7 p.m. The subdivision is in Seminole County between Wekiva River Oaks and Foxspur, on the south side of SR 46. The meeting would be at the Panera near the "new" Target near the Seminole Town Center.The subdivision is still under construction, but they have 45-50 homes there now, the HOA president said.Please let me know who can attend so that I can get back to these folks. If this date and time works, I will also send a calendar item.Mary Brooks
9/18/2006	12:00 PM	PIO called Diane Barfield/Estates of Wekiva Park c 407-718-0274, she said she was cleaning the floor and couldn't get to the phone. She said the meeting is at 7 p.m. would be at the Panera, near the target by the Seminole Mall. PIO asked how many people usually attend? She said last time we had 12-15, but would hope to have more this time given what we're talking about. PIO asked how many homes in the subdivision? She said the second phase is not complete; maybe about 45-50 houses so far. webarfed@yahoo.com
9/18/2006	11:58 AM	PIO returned call to Diane Barfield/Estates of Wekiva Park 407-330-7357 h, left MSG asking for time of meeting so can check with study team, and also how many people usually attend in case we need to make copies of handouts.
9/18/2006	9:28 AM	Diane Barfield called and left MSG Phil Hirsch gave me your phone number. We are interested in having you talk with us about the expressway going in. I'm his neighbor and we live in estates of Wekiva park right off highway 46. Trying to have a HOA meeting Oct. 11 at Panera at the new Target plaza. If you could call me and let me know if that would work with you 407-330-7357 h, c 407-718-0274 Look forward to hearing from you.

Notes			
Date	Time	Regarding	
8/12/2006	10:19 AM	Brittany/property appraiser called and left MSG I have some questions on SR 429. If you could give me a call back 407-425-5581 x 111.	
8/1/2006	1:35 PM	PIO again returned call to Brittany Barker/appraiser 407-425-5581 X 111, She said she's trying to find out ... she's appraising a property on 437 and SR 46, trying to figure out who	

in the area is responsible for ... I know they're going to realign that road. ... My property is just inside Lake County. PIO asked if she'd seen the project map? She said the map she had stopped at 46(?). PIO asked if she was at a computer, and she was. PIO walked her through the text links and noted on the map where the green alternative on the hump of 46 had been added. She said her property in question is SW corner of 437 and 46. PIO directed her to that location on the map and noted Wekiva Parkway goes well south of that intersection; we bypass Sorrento and Mt. Plymouth. She had trouble finding 437 initially but did eventually. She said she had heard county was realigning 437 but didn't see that on here. PIO said I had no idea of the county plans; that's not part of our project. She asked if I knew someone at the county to ask about it? PIO noted would start with public works; we deal with the director Jim Stivender. She said okay, other property in question was in that same general area. Thanks for the help.--147 p.m.

8/1/2006	12:21 PM	Brittany called back and left MSG I was interested in SR 429 and the SR 46 area, just there by lake county, and also interested in who was handling that for lake county when it goes up into lake county right there for SR 46 and realignment of SR 437?407-425-5581 X 111 I'd appreciate it. Thank you.
8/1/2006	12:02 PM	PIO returned call to Brittany Barker/property appraiser 407-425-5581 x 111, (Rex McGill's real estate and appraisal office) , left MSG to call me again and leave detailed MSG so I can research her query and get back to her (heavy call volume right now).

Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local

government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks"

8/1/2006	4:16 PM	attended public meeting 7/25/06
7/31/2006	11:13 AM	<p>Attended public workshop on 7/25/06. Don submitted comment: "After reviewing the alternatives for the revision/update/installation of the Wekiva Parkway it seems that the only real viable alternative for the connection of the Wekiva Parkway with the existing I-4 would be toward the south making a direct connector of route 46 with both routed I-4 and 417. This would alleviate the short stretch of traffic on I-4 to get to 417. With a director connection one would have the choice of I-4 or 417. Eliminates confusion." Ann submitted comment: "I sincerely believe that the souther option connecting directly to 417 is the only realistic option. Traffic on Rt. 46 is presently very congested and with further development being planned will become worse in the future. Connecting to the Wekiva Parkway at Rt. 46 and I-4 will only make a bad situation worse. Connecting via the southern proposed route should help alleviate the terrible traffic on 46 and have the least impact on the residential areas along 46."</p>

1/12/2006	1:00 PM	Continued Seminole comment responses: Don & Ann Barnes, Willie Dennis, Bob Martin/Lakeside Fellowship UMC, Curtis Reddecliff/Lakeside Fellowship UMC, Robert & Kristine Bugnacki, Janet & Paul May, Cindee Kelly, Peter Morales, Paul Verlander, Patricia Varner, Scott Richards, and William Shackelford.

Contact Notes Rodger Barnes Tall Trees HOA

7/28/2006 6:37 PM Rodger Barnes/Tall Trees emailed: "Ms. Brooks, As a homeowner in the Tall Trees subdivision for the last 10 ½ years, I must respectfully request that the expressway consider a realignment of the beltway extension so as not to impact the individual homeowners within the Tall Trees community. Unless I have received erroneous information, I am under the impression that the current alignment will actually cross over the property of some of the homeowners in our community. It doesn't make sense to me economically why the expressway would want to purchase additional homes if it is not necessary. The properties to the west of Tall Trees along Wilson Road are larger, multi acre properties that would appear to be needed for the project. I'm confused as to why the project would need to come so close to Tall Trees that some of the homeowner's will need to lose their homes to the beltway extension. Developed property must be more expensive to acquire than undeveloped property. What would happen to these properties? The community counts on all of the homeowners to pay dues to cover the costs of running a home owners association. Who will pay for the lost income these homes provide to the HOA? Also, the further the project is away from planned communities, the less money will be needed on noise abatement apparatus since the heavily wooded areas nearby will help to create natural sound barriers. I realize the rural character of the area is going to change. Unfortunately, that is what attracted us, and most others, to the area in the first place. The peace and solitude of this area needs to be preserved as much as possible to the greatest number of people who call this their home. I would hope that the fewest number of homeowners that need to be affected by this extension will be of utmost importance when establishing the proposed route. Any feedback that you can provide will be greatly appreciated. Thank you for your consideration. Roger and Veronica Barnes 5092 Blacknell Lane Sanford, Florida 32771407-324-8353

Please let me know if you have questions or need further info. (For some reason my scanner inputs each page as a separate file. I apologize for any inconvenience.)Mary Brooks
8/22/2006	1:57 PM	Sent letter dated Tuesday, August 1, 2006. "Dear Ms. Brooks, The Seminole Soil and Water Conservation District Board would like to make the following comments following the presentation at the Sanford Civic Center on the Wekiva Parkway PD&E study. 1) Keep the Lower Wekiva River State Preserve in contact for Seminole County residents. We are the second densest county in the state and should not compromise these lands to build rentention ponds or relocate the natural gas pipeline. Preserving all of our conservation lands should be a top priority. 2) Align CR 46A outside of public conservation lands and connect it with SR 46 west of the Wekiva Parkway. 3) Keep interchanges out of areas that will encourage unwise planning decisions that promote growth. We must protect the Wekiva Springs water-shed to protect the health of the springs and our potable water supply. 4) To protect our wildlife, eliminate SR 46 adjacent to the Wekiva Parkway's bridged segments. 5) To protect Rock Springs Run State Reserve, SSWCD would recommend against the most eastern route through the south end of the Neighborhood Lakes Property. Once again, we do not want to compromise our existing natural lands. 6) Keep SR 46 a two land road to protect the Lower Wekiva River State Preserve. In addition to the above recommendations, we continue to strongly encourage the acquisition of all lands identified in the Wekiva Parkway and Protections Act. This is essential to the success of the overall project. Thank you for your consideration."

10/14/2006	12:49 PM	Comment Form EAC Meeting: Fred Bates 4963 Maple Glen Place Lake Forest, FL 32771-7183 We object to using S.R. 46 corridor as the route for the proposed Wekiva Parkway access to I-4. This would create greater disruption to the homes and businesses located on S.R. 46. It would also add to the extreme congestion at S.R. 46 and I-4 intersection. The "southern route" connecting to route 417 would be less disruption and make more sense. A feeder road that directly ties into route 417 would be better and keep the excessive traffic off S.R. 46.

Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear  
Richard,Thank you for submitting a public comment form for the Wekiva Parkway Project  
Development and Environment (PD&E) Study. We appreciate your time and concerns.  
Your comments are being reviewed and evaluated along with the more than 540 other  
forms received, as well as input from local governments and state agencies. More than 1  
200 people attended the recent public workshops. Currently we are evaluating the public  
comments - many of which represent competing interests - as well as government  
feedback, and continuing the engineering analysis with regard to the viable alignment  
alternatives. That information will be used to draft a preferred alternative by December or  
January. That draft preferred alternative also must undergo local government and state  
agency review and revision before being presented at formal public hearings in March  
2007.Following the hearings the preferred alternative must be approved by the  
Expressway Authority, Florida Department of Transportation, Seminole County Expressway  
Authority, Orange and Lake County officials and other local, state and federal entities. The  
PD&E study is expected to finish with an approved alternative in late spring 2007. All of  
the latest public workshop exhibits are posted on the Expressway Authority website at  
www.ExpresswayAuthority.com. On the entry page click on the "Corporate Site" button.  
On the home page under "Construction Updates" click on the text link for the "Western  
Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text

12/4/2006	6:20 PM	PIO called Mark back to let him know I was just leaving work and would not be able to join him for the meeting. He said that was fine.	
12/4/2006	1:40 PM	Mark Callahan said Jerry McCollum asked him to present to Markham Woods HOA, pretty far south of study area. PIO asked but Mark said PIO doesn't need to be there. He said it's at 730 p.m. McCollum is going to be there. Alliance Church, 434 and north on Markham Woods Road. Mark said it's the first church on the right. He has boards. He apologized for not letting me know sooner; he's been out sick for a few days. PIO said I'd try to make it to back him up tonight; if not, I'd see him on Wednesday.

8/7/2006	11:26 AM	Attended public workshop on 8/1/06. Submitted comment: "We are in favor of the Rt 46 to I-4 Option. If the other option is taken and the road is elevated behind the Tall Trees Development, the noise level and appearances will be terrible. If this alterative is take you need to stay at ground level across Wilson Drive even if it involves making Wilson a dead end from both sides. This should not be a problem since Wilson was a dirt Road until two years ago."

Notes			
7/28/2006	1:02 PM	PIO returned call to Mike Belinski 407-448-0911 he asked do they have an office that I could view them? PIO noted no, there are too many to set up in an office. Noted if he can't make Tuesday's meeting, we h9ope to convert the exhibits to PDF's and post on the website. PIO noted that will take some time, maybe a couple of weeks, but that is an alternative.He said I'm in the middle of a trade show and I'd have to leave early to make that meeting, and drive about 40 miles. I'm in north Orange County near Hass Road. Do they still have all those alternatives up there, like they did the last time? PIO confirmed he meant during the fall meetings, and noted no, we've narrowed down the alternatives to 2-3 in most areas. He said have they decided on one? PIO noted no, gave remaining schedule for study. He said okay, so it's still 6-7 months off. Then I'll try to go to that meeting then.	
7/27/2006	1:47 PM	Mike Belinski 407-448-0911 called and left MSG I missed the meeting last night and will be out of town as well during the lake county meeting. Is there any place downtown I can look at the proposed routes for the expressway and maybe get some questions answered? If so call me back.

1/2/2006	10:45 AM	PIO returned call to Chris Bell/Harris Harris Bauerle & Sharma 407-472-1562, left MSG confirming all the maps are on the website, but call me and will either help him find the one he needs or will email to him. PIO also noted maps will be updated in the next month or two as we're evaluating all of the public comment forms and local government input. Some lines will be coming off the maps and newly suggested routes will be going on, FYI. PIO left my number and asked him to call me.	

Contact Notes	Gladys Bell	
Date	Time	Regarding
8/9/2006	10:05 AM	Attended public workshop on 7/26/06.
1/17/2006	3:15 PM	PIO returned call to Gladys Bell 407-880-2625 and relayed info. Confirmed neither property within the study area or would be affected at this time. PIO asked if she wanted a map, I could send her one. PIO noted the maps will be updated within a couple of months, but at least she'll have a starting point. She said she'd really appreciate it; send to PO Box 42, Plymouth, 32768. PIO said that would get out to her tomorrow.
1/17/2006	3:00 PM	PIO researched Gladys Bell locations: 1248 Hermit Smith Road is about 400' west of the study area just north of 441. 3231 Warren Sapp Road is much closer, but still just west of the study area.
1/17/2006	2:46 PM	Gladys Bell left MSG I don't know if you misplaced my phone number, or if you planned to get back to me today, but my number is 407-880-2625. I'm the one inquiring about the expressway 414 and 429 in Plymouth. 3231 Warren Sapp Blvd. Give me a call. If you need and want to fax me something, fax to 407-884-2053 and I can pick it up from there. Thank you.
1/17/2006	1:41 PM	PIO returned call to Gladys Bell, live here in Plymouth, didn't get to all the meetings, 1248 Hermit Smith Road, nearest cross streets 441 and Fudge Road, also have rental house at 3231 Warren Sapp Avenue. PIO asked if she had internet access, noted all the maps are on the website. She said she did. PIO walked her through finding the map files. She said one while I thought it wasn't going to affect us because we didn't get any more letters, then someone said our rental wasn't far from their rental which was affected, so I thought I'd better call. PIO tried to walk her through, but she doesn't have a separate internet line. PIO said I'd check location of her property and whether or not was affected by either of the projects and call her back. She said she'd surely appreciate it because another friend of hers was also asking but if she can find out, she can help her friend.
1/17/2006	11:39 AM	Gladys Bell 407-880-2625 left MSG I have some questions about the 429 expressway coming through Plymouth and also would like to set up appointment to come down and look at your maps and then ask questions, so please call me. I'd like to come this week while I'm off work. Thank you.

7/31/2006	11:26 AM	Attended public workshop on 7/25/06. Submitted comment: "I strongly oppose the option n. widening) that illustrates the parkway ROW intruding into DEP and State forest land in Seminole and Lake counties, respectively. My concerns are the same for any retention ponds that may be potentially built on DEP land into the LWRSP. Please use the alignment which illustrates the ROW to be south of SR 46 in Seminole county. My concerns have to do with loss of land publicly acquired specifically for wildlife corridor, protection of habitat and wildlife."

Date	Time	Regarding
12/7/2006	12:39 PM	PIO returned call to Richard Belshner 407-889-0160, is there a new map that shows where the road is going to go north of 441? PIO noted no, finishing up analysis, still waiting for some ROW estimates - how much would it cost if we went here vs. there - and then we plan to bring forward recommendations for IC and alignments in January. He asked if we were still looking west of Plymouth Sorrento Road? PIO said both alternatives are west of there; city of Apopka said we had to be west of that. He said the property he's

representing, hoping to have a buyer for is west of p-s on hermit smith and Yothers, very near the trailer park and new construction , Zellwood station, it's just south of Zellwood station. PIO noted the Ponkan IC alternative would hug the eastern border of Zellwood station, so sound slice we'd be east of his property also. There's new Publix going in at p-s road and Yothers. PIO noted if the store is on Plymouth Sorrento then we would not be affecting it. PIO reiterated will have something new for him in January. He said okay, thanks for calling back.

12/7/2006 10:05 AM Richard Belshner/ realtor MSG we've spoken a few times, interested in latest info on 429 northern extension, latest maps, have a listing in that area, people trying to find latest info on where the highway is going, 407-889-0160, give me a call I'd appreciate it.

8/7/2006 1:54 PM Attended public workshop 7/26/06.

Contact  
Notes  
8/8/2006 12:31 PM Mike Belton

PIO returned call to Mike Belton, asked if he'd seen the latest link to the workshop maps? He said no. PIO walked him through to the public workshop link and files. He said the maps were so small, he needs to be able to read the street name, etc. PIO noted the adobe files allow him to enlarge as needed. He said but can't get it to print out big enough PIO noted we send 11x17 copies to those requesting and that seems to be sufficient, but if he needs bigger, as some folks do, they download the file and take it to Kinko's or office max and get it reproduced as large as they like. He said he thinks that's what he may do. PIO noted maps he should be looking at based on his area of interest. He said they're looking at potential purchase of property in that area and don't want to do it right where the road is going to go. PIO suggested he review the maps and if he has any questions, call or email me. He said he appreciated and thanks for the pointers.

8/8/2006 9:56 AM Mike Belton in Mount Dora called and left MSG I been asked to get some info on the Wekiva Parkway or Western Connector from Apopka, north to 46 or I-4, I've seen online some of the data but want to make sure I'm up to date.352-735-0505, 2867 Have a great day.

8/7/2006	11:10 AM	Attended public workshop on 8/1/06. Submitted comment: "We need for a change to be made with regard to the property taxes that would be greatly affected by property taken by eminent domain. For people choosing to sell their property it is a decision they're choosing but for ones that will have no choice, it is unfair for them to have to pay higher property taxes. We would prefer if they are going to take our property that they would take it all rather than part of it."

System interchange (S of Sorrento) #4. Lake County East through Neighborhood Lakes alignment #2 - no stub road! Make interchange with not stop lights! Lake County SR 46 realignment alt 1. Lake County through Wekiva - alignment #2 - remove as much of SR 46 as possible and replace with bridges for wildlife. No using SR 46 as a 'frontage road.'"
------------------------------	---------	---

Contact Notes Date 9/18/2006	Time 12:35 PM	Harv Bernfeld  Regarding PIO called Harv Bernfeld, noted I found the 30549 S. Coronado Dr., noted where I believed it was located and he said that was correct. PIO noted alignment alternatives that would drop down from 46 to go into OC are 3 parcels away, would cut southeast across the large parcel 2 parcels east of him. He said the 0000 Round Lake Road parcel is owned by Mount Dora Hills LLC, but it shares the southern border with 30549 S. Coronado Dr. PIO said then that one also in the clear. He said so those are out of the study area? PIO said not out of the study area necessarily but out of range of where we're looking at the alignments going at this time. He asked if we were looking at an overpass for Coronado Somerset Drive? I know those are very expensive. PIO noted have to address a number of local access issues with smaller side streets and that's one of them, working now on some alternatives. He said it seems the best way would be to extend Coronado Somerset Drive to Swan and just cul de sac it on both sides. PIO noted that's one of the alternatives being looked at, but still has to be decided. He said well thank you very much for the call back and the info. --1242 p.m.
---------------------------------------	------------------	---

9/18/2006	12:23 PM	PIO researched Harvey Bernfeld 407-421-2692 property queries Lake County west property at 0000 Round Lake Road, and adjacent prop 30549 S. Coronado Dr. email is Harvairl@aol.com. According to LC property appraiser website 30549 S. Coronado Dr. is southeast of Round Lake Road and Coronado Somerset Dr. PIO compared location to project alternatives. Parcel shown as #1036, two parcels east of Birr Crt. OC-LC Systems IC's alt's 1-6 all are two similar sized parcels and part of a very large parcel away.
-----------	----------	--

9/12/2006	3:08 PM	Harv Bernfeld 407-421-2692 called and said Steve Vaughn suggested he call for an update on the Wekiva Parkway, particularly with regard to Lake County west. He said he had property at 0000 Round Lake Road, and adjacent prop 30549 S. Coronado Dr. PIO asked if he'd seen the maps on the website? He said he had and wanted to know the latest. He couldn't exactly find his properties. PIO said I can research how the alternatives from the viables workshops affected his property, but also let him know we were going through
-----------	---------	---

viable analysis, would be narrowing down the alternatives and tweaking things so that by end of year things will look different from what eh sees on the website, we will have made some recommendations in locations where there are multiple interchanges, for example. PIO noted that draft preferred alternative will still have to undergo local government and state agency review before we got to public hearings probably in March. He asked if I could email him some info. PIO noted we don't have any updated maps yet, not till end of year but I can send info on how viables from workshops would or would not have affected his property. He said his email is Harvairl@aol.com. PIO let him know I have a lot of these such requests so may take a few days to get back to him. He said that's fine and thanks very much, have given lot of good info.

10/6/2006 3:15 PM Bethany Arazondo? Called and left MSG I was calling to talk about projected plans on this roadway, and see if you might my name and address in for any future meetings. I noticed in Expressway Navigator that I just got yesterday in the mail that you have meeting scheduled for February or March. Just wanted to get more info on this. I'm new to that area. Just found out about proposed roadway going through. Was directed in your direction for info. I know we're coming up on weekend so I may not hear from you until next week and that's fine, but if you would please call me back. 407-466-5848 Thank you and have a great day.

8/2/2006 1:24 PM Attended public workshop on 7/26/06. Submitted comment: "Hi, my name is Carrie Bickford. I live at the address above and you are just touching like the last 10 feet of the back side of my property. If you in any way can go to the east just 15-20 feet more so that you don't have to disturb me at all, it would be greatly appreciated because in the last year I have put a lot of money into my house for remodeling. Please, it would be nice. And one more little request, if you could put up sound barriers as to not disturb my children and thick walls as so an accident wouldn't come into my yard and some really nice trees."

8/7/2006	10:16 AM	Attended public workshop on 8/1/06. Submitted comment: "Alternate for West end of 46/441 connector could be (CSX) Florida Central Railroad right of way from Round Lake to 441."
Contact Notes		Joe Bishop Seminole State Forest - FL Division of Forestry
Date	Time	Regarding
11/7/2006	12:57 PM	PIO emailed Mark, Tom, Brian and Dave, copied Gary re: Joe Bishop request for 46A alternatives and wanting to talk to someone about a land swap involving the Calabrese property, which is now up for sale.
11/7/2006	12:48 PM	PIO returned call to Joe Bishop / Seminole State Forest/Division of Forestry 352-360-6677 He said he was checking on status of these new alternatives for 46A? He said also he doesn't know who the right person would be to talk to ... still waiting for letter to get out of Tally ... about the land swapping-trading kind of thing. Some property we would like to see DOT acquire and give to us. Piece of property up for sale right now, in almost all 5 alternatives it did have some level of impact, whether just ROW coming onto edges or one alternative came up into center of property. Calabrese property just west of 46 and 46a-who would I talk to about acquiring that property. PIO suggested he speak with Jim Clark/FDOT ROW, has sort of been designated our contact for ROW questions. He said this is more of an acquisition issue. PIO noted if he's not the right person, then he will know exactly who is, or he might simply refer him to Tom Percival. Joe said he wants to see the latest 46a alternatives. Last time we spoke we were going into the Heathrow Country Estates meeting and he hadn't seen anything after that. PIO said I'd get with CH2m hill on the alternatives and also let them know their interest in the Calabrese property.
11/7/2006	10:12 AM	Joe Bishop / Seminole State forest/Division of Forestry 352-360-6677 give me a call.
10/6/2006	3:46 PM	Joe Bishop/Division of Forestry called and said he's been trying to get a Tally response, organize a Tally response from director of Division of Forestry. It's been tough. Thought by now we'd have something. He asked when deadline was for comments? PIO noted hadn't really talked about that, haven't met last couple of times due to conflicts. PIO noted that we have discussed getting back with him about the latest 46A realignments and other info, but still were doing evaluation. Joe said they are kicking it around up there and know they're real close to getting a letter but just not there yet. I know what our preferences are ...I would still like them to respond at least to the previous alts that were on the table, that's what they're looking at and at least it will give us a starting point on where we stand and our objectives. And then we can see how that might mold into the new alts. that are being presented. He said I can tell you that what was presented to the public, we were looking at alt. 2 for LCE 46a realignment, and alt. 5 for LC local access. We're not going to

get into all... we're really focusing on what's affecting Seminole state forest. Locally we've aligned with comments of the (Wekiva) Coalition. Theirs was more general verbiage. Response I'm trying to formulate from state office is going to be more specific in terms of basing it on the specific alternatives ... I wanted to make sure you get our comments, at all the stages of the game and not just one shot. But I do want to press them ... as far as timeline, when would they be able to get with me individually? PIO noted progress meeting this wed. He said let them know we're supporting alt. 2 for realignment and alt 5 for local access. We have some additional comments, such as making sure there are electronic danger signs for prescribed burning. He said we'd get into more detail, but part of what's going to be in the letter will be looking at giving up some of the state property without a fight, with two small portions of state forestry between 46 and 46a, that wedge of property. We have two pieces of property there, of little or no use. We can't manage a 4-acre piece between two highways. I know it's being considered we give those pieces up in exchange for something else, so there will be language in that regard. And of course the retention ponds, trying to locate those on other than public property. Still want to get some kind of formal response from us so you can take it to the bank. PIO noted I would raise his comments during the progress meeting and follow up with him afterwards as to when they can get back to him. PIO noted we've been working on follow up meetings with different entities and knows he's on the list. --356 p.m.

Date	Time	Regarding
1/23/2006	3:03 PM	Richard Bolin 352-669-4162 called trying to find out info about the Wekiva Parkway, looking at it online, trying to see where the proposed connectors are, think one of them, there's picture of study corridor. Shows where 44a is connecting. I have property on 44a and S.R. 439, in past few months been putting out market feelers, recently in divorce so really trying to find out what it's worth. Where does 44A extend and where they're possibly planning to run it though there? He said got call from real estate agent and price offered for land was significantly higher, sent a flag up for me to see what was going on. He asked if I knew where 437 and 44a were? PIO noted north of Orange-Lake county line, 437 is out of the study area. PIO noted 44A is not within the project limits and we are not doing anything with that. PIO noted we are realigning a portion of 46A as part of this project. He noted that 44a runs into 46A, so is it possible we could go farther north with it? PIO noted no discussions involving 44a. He also asked what the blue squiggly line was? PIO noted that's a representation of the planned realignment of CR 46A. He asked had anything changed with regard to the alignments? PIO noted some have been removed, couple others added, some revised. He asked was that in Lake County? PIO noted that's throughout the corridor. PIO noted we'd be updating the maps on the website hopefully in March, so he should check back then. PIO asked if he was on the mailing list for newsletters and meeting notices? He said no but would like to be. PIO got his info. 21602 CR 44-A, Eustis, FL 32726 email <a href="mailto:REWB@USA2net.net">REWB@USA2net.net</a> he asked if there was any point to

going to the meetings or would everything be online? PIO noted will be updating some maps in March with latest alternatives, but may not have updated traffic and other design info until the public meeting in summer. He said I'd been very helpful, thanks. He also asked about acquisition and overall timeframe, so this is going to take a while, huh? PIO noted that is correct, will take years to have the funding as well as acquire property, etc. he noted he'd had property taken in the state forest, and they used the federal law used to relocate native Americans to claim his land. We also discussed the latest Supreme Court eminent domain ruling. He said he expects challenges to that.--315 p.m.

8/9/2006	3:29 PM	<p>PIO emailed response to comment form as requested: "Dear Anthony Bordonaro, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&amp;E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated by the Expressway Authority and the Florida Department of Transportation, along with hundreds of other public comment forms received, as well as input from local governments and state agencies. You requested electronic versions of the various public workshop maps. Those maps and other project information are available on the OOCEA website at <a href="http://www.ExpresswayAuthority.com">www.ExpresswayAuthority.com</a>. On the entry page click on the "corporate site" button. On the home page toward the left side of the screen you will see the "Construction Update" headline. Under that is text that includes the highlighted link for the "Western Connectors." Click on that colored, highlighted link and that will take you to the Wekiva Parkway page. At the top of that page is the link for all of the latest maps for the project. I'm in the process of also getting the traffic exhibits in electronic form and posted on the site. Once you've had a chance to review the maps, please feel free to call or email with other questions or concerns. We expect that the public comment review and engineering analysis will result in a draft preferred alignment alternative for the project in November-December 2006. That draft preferred alternative must undergo official review and revisions. We expect to hold formal public hearings on the preferred alignment alternative in February or March 2007, with the study concluding with an approved alternative later that spring. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email <a href="mailto:MBrooksSR414@cfl.rr.com">MBrooksSR414@cfl.rr.com</a>, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. 8/2/2006 11:31 AM  
Attended public workshop on 7/26/06. Submitted comment: "I am generally in favor of the project but have concerns about the Lake County East sections. Are three interchanges really necessary? Or would two better preserve the rural character of the area? My initial thought is 'is the middle interchange really necessary or is it going to promote sprall in east Lake County?'"

8/7/2006	9:10 AM	<p>Attended public workshop on 7/26/06. Submitted comment: "If there is going to be an on and off ramp at Kelly Park, you need to put a stop light at mt. Plymouth Road. It is already becoming dangerous getting on to Kelly Park. The growth has become tremendous already. With the Parkway there will be even more growth in this area that was once very rural and still is to that extent. Kelly Park Hills will probably want a stop light too. Western beltways would be ideal. Especially if it could be done without getting on and off I-4. It impacts a lot of property owners with \$, but it makes long-term sense. I-4 currently has some long on/off ramps. Side roads in the 46/417 area or something like that to connect the beltways without I-4? Maybe. Orange County has fewer budget constraints, I'd say build interchanges at both Ponkan Road and Kelly Park Road. It might upset people now, but with the growth in that area to the west of Plymouth-Sorrento Road already started we will need them both. How the Vick Road option got over built to be viable should be a lesson. Buy and build it while we can."</p>

8/7/2006	1:09 PM	<p>Attended public workshop on 8/1/06. Submitted comment form: "I feel Alternate I will take the least amount of property, which includes missing a natural springs area. I hope that you do a 'physical survey' before just 'clipping' pices of property. It makes sense to come out and look before taking pieces of properties." Submitted additional comment: "After review of the Lake County West Viable Alternatives, I favor Alignment 1. Alignment 1 would have less impact upon existing residences, both on Coronado-Somerset Drive and in nearby areas. Alignment 1 would also follow the natural drainage of the area. Thank you for your consideration."</p>

<p>Mary/SJRWMD responded to PIO email re: dropping newsletters: "Hi Mary,Thanks for supplying these. It worked out well to have it - our talk was about water quality and the Wekiva Pollutant Load Reduction Goals (PLRGs). Having these to handout allowed me to bring it all together by mentioning the roadway, but I did not give any detail and only referred to the handout and the maps that CH2 loaned us.But no matter what, it seems septic tanks always come up!Mary</p>		

\_\_From: Nancy Christman Sent: Tuesday, September 19, 2006 10:01 AMTo: (Jennifer.Gihring@dep.state.fl.us); WorkshopSAVE THE DATELearn about the SJRWMD's Wekiva Pollutant Load Reduction Goals (PLRGs)You are invited to attend a workshop on October 12th at 9:30 at the Altamonte Service Center. Rob Mattson, Environmental Specialist for the District, will discuss the scientific research to establish PLRGs for the Wekiva River and Rock Springs Run. He will describe the work completed and the goals set for the Wekiva River and Rock Springs Run. Chris Ferraro, FDEP, will discuss the next steps for Total Maximum Daily Loads (TMDLs).The Wekiva Parkway and Protection Act, which includes many requirements for various agencies, directed the SJRWMD to establish PLRGs for the Wekiva to assist FDEP in adopting TMDLs.PLRGs identify the reduction of pollutants needed to preserve or restore waters to meet their designated uses and maintain water quality consistent with state water quality standards. Please contact me if you have any questions.Nancy Christman Intergovernmental Coordinator SJRWMD 975 Keller Road Altamonte Springs, FL 32714 407-659-4835

8/1/2006	1:31 PM	<p>Dave/CH2M Hill emailed Rosanne/CH2M and Mary/SJRWMD: "Attachment is for reference. The 3 to the north are on the Nesler property, the one to the south is on the Strite property.</p>
----------	---------	--

8/1/2006	12:57 PM	<p>Rosanne/CH2M Hill copied PIO, Mark and others on response to Mary Brabham/SJRWMD: "Mary, it was nice speaking with you this morning. CH2M HILL will be happy to meet Mr. Bill Osburn in the field to show him the locations we mapped in May. As I explained on the phone, the level of investigations that we conduct for the PD&amp;E study is "mapping": ground-thruthing of surface waters and wetlands. No tracer-dye studies were performed by CH2M HILL of these, or any potential springs in the area, for this study. I'm not positive but "charting" may have implications of, or involve, identification of subsurface contours and formations; this is beyond our level of investigations for this study. Therefore we cannot confirm if these surface water features have any direct connection to a confined aquifer source in the area or simply just cracks in the ground in which water from the aquifer is seeping out. The topography of the region is very undulating. We can provide a description of what the surface conditions were in May: (in addition to the details in David email below), CH2M HILL's field biologists Mr. Steve Eakin (along with Mr. Tony Davanzo), were asked to investigate these parcels for possible seeps or springs. They both felt that the four areas mapped are low flowing springs (not seepage slopes). All 4 areas have a distinct narrow channel where water runs at certain times of the year. 3 of the 4 runs had flowing water in early May 2006, when most other surface wetlands in the region were dry</p>
----------	----------	---

All had clear (not tannic) water coming up from a specific point and stayed in the channel until it went below the ground surface at a defined point. The 3 southern runs are through forested uplands, and the northernmost run has a narrow forested wetland floodplain along the run, and flows into a low wet prairie area that has vegetation indicative of saturated conditions during the wet season. No T&E plants or wildlife were found in the immediate area investigated. Let me know if you would like a copy of our field notes and mapping. The parcel is heavily vegetated with some large oaks (not giant oaks) that might be old growth live oaks; but we cannot say without contacting a local or state arborist if any of them are record-size oaks. No scrub habitat. No nesting areas for Sandhill Cranes, although foraging habitat occurs in the pastures and lawns. Gopher tortoises were not observed, but may forage in the pastures. Again please feel free to contact either myself or Steve Eakin, if you or Bill Osburn would like to meet in the field. As I mentioned, Steve and Tony will be continuing with their field investigations for the Wekiva Parkway this week (Wednesday and Thursday) and again on Monday, August 7 weather permitting - as we watch the progress of Tropical Storm Chris). We'd be happy to accommodate anyone wanting to join them. Rosanne Prager, PWS CH2M HILL 3011 Williston Rd. [mailto:mbrabham@sjrwmd.com] Sent: Thursday, July 27, 2006 4:12 PM To: MBrooksSR414@cfl.rr.com Subject: charted springs shown at the public mtgs Hi Mary, How are you doing? I saw you on tv the other day - good job - I've received a call from someone in our groundwater department that works with the spring research and he was told that there was a map shown at the public meetings this week that showed a charted spring - located just to the south of the Nestler property. I am not sure I have their name right, but I am sure you know the parcel - Nestler - where a good bit of road is to go thru. Additionally, the landowner stated at the EAC meeting that there were springs on that property. As far as we (the District) are presently considering, those to be seeps and not springs. Cool in their own right, but not springs. We are also not aware of a spring to the south, so of course we wish to find out about it. Do you have this info, or can you tell me who to go to? thanks, Mary Mary E. Brabham, P.E. Sr. Project Manager SJRWMD 975 Keller Road Altamonte Springs FL 32714 (407) 659-4829 cell (407) 467-9063

7/31/2006	12:57 PM	<p>Attended public workshop on 7/25/06. Submitted comment: "The planned route leaves us with no access to our neighborhood. Our children will have no way to walk to school. Water runoff has nowhere to go except our yards. The planned retention pond is ineffective. More care has been taken to preserve businesses and empty lots than our neighborhood. There will be no noise abatement wall because of the size of the neighborhood. Our neighborhood will have no access. The water runoff will flood our</p>

yards. Our children will have no path to school. The existing connection to I-4 at 46 is being dismissed. There really are no alternatives. A retention pond is placed right behind our neighborhood instead of in another empty lot adjacent to it that would leave more buffer. Why not take our neighborhood and use it as a buffer for Sylvan Lake?

7/25/2006 10:35 AM

Continued working Briggs response and sent, copied Anne Marie and Rep. Hays: "Good morning, James, Your query to State Rep. Hays was forwarded to the team actually conducting the State Road 429 - Wekiva Parkway Project Development and Environment PD&E Study. The purpose of this study is to arrive at an alignment alternative that meets the transportation needs of this fast-growing area, while trying to reach a reasonable compromise between competing interests and minimizing impacts to residences, businesses, the environment and the rest of the community. We appreciate your concerns, and would like to address some of your questions and issues. There is no finalized route yet for this project. There are two locations remaining with respect to connecting the Wekiva Parkway to Interstate 4: an alignment alternative along SR 46 and an alternative that would connect at SR 417. We will have concepts and other information regarding both of these alternatives at the public workshop tonight at the Sanford Civic Center. While both are still under consideration, there are significant issues with trying to connect an elevated expressway to I-4 in the area of SR 46. The interchange would have to be quite complex, would have significant commercial impacts and traffic models show the traffic flow efficiency would be questionable at best. Seminole County Commissioners also have said they will not support an elevated parkway connection to I-4 at SR 46 due to the impacts. In addition to connecting a full parkway to I-4 at 46, there is also an alternative that would drop the parkway down at some point along SR 46 to a widened, at-grade arterial that would then connect to I-4 similar to the way SR 46 ties in now. Future traffic models show significant gridlock and safety issues with that alternative. Following the public workshops, and based on the continuing input from the public as well as local governments, state agencies and environmentalists, the PD&E Study team will work to draft a preferred alignment alternative. That will again go through the government and agency review process for revisions, and a refined preferred alternative will be brought forward for public hearings in February or March 2007. From there, the Expressway Authority, FDOT and relevant agencies will have to vote on or authorize the preferred alignment alternative. As we do not have an approved alignment, no one has been contacted about purchasing their individual property. Right of way acquisition would not begin until after we have begun the next project development phase, which will be final design. Once we begin to nail down specifics during final design, advance right of way acquisition could begin if funding is available. As you're probably aware, this project is not yet fully funded, so that will affect the schedule of subsequent phases. With regard to direct impacts, as noted in the map thumbnail shown here, the Wekiva Parkway alternative in question would hit only the parcel on the northeast corner of the subdivision. The Expressway Authority and FDOT are well aware that access to affected communities must be maintained, and have, at this point in the study, begun to look at ways to accomplish that. Maintaining local access is an issue that we are very familiar with and are trying to address throughout this 25-mile corridor. Any eventual impacts to property specifics, such as gates and walls, would be addressed during the right of way acquisition process. Likewise, any affected property owner would be contacted during the right of way acquisition phase about impacts and procedures. Regarding drainage concerns, the development of any road requires accompanying drainage systems capable of capturing runoff from major storms. We have begun preliminary retention pond siting relating to the remaining alternatives. That information will be available for review at the public workshops beginning tonight. Regarding access to the nearby school, again, part of the intent of this study is to devise ways to maintain local access. With few exceptions, most side streets will be bridged as part of this project. We look forward to your attendance at tonight's meeting. Please do introduce yourself to me and I'll be happy to discuss these issues further. I have also spoken recently to your HOA president Jean Ciullo about potentially doing a follow up presentation at one of your community meetings following the workshops to answer remaining questions. Please also take advantage of the public comment forms that will be available at tonight's meetings to record your comments once you've been able to review the latest information. Thank you, and please keep my contact

information handy so that you can contact me directly with questions and concerns in the future.Mary Brooks--1113 a.m.

7/25/2006	10:04 AM	PIO received forwarded email by Anne Marie Norman/Rep. Hays office from JC Briggs: "thank youAM-----Original Message-----From: Norman, Anne-Marie On Behalf Of Hays, AlanSent: Tuesday, July 25, 2006 10:03 AMTo: Norman, Anne-MarieSubject: FW: From 'Write Your Representative' Website-----Original Message-----From: jcrbriggs@yahoo.com [mailto:jcrbriggs@yahoo.com]Sent: Tuesday, July 25, 2006 7:18 AMTo: Hays, AlanCc: jcrbriggs@yahoo.comSubject: From 'Write Your Representative' WebsiteJames Briggs213 Capri Cove PlSanford,FL 32771-8394(407)688-988307/25/06 7:18 AMTo the Honorable D. Alan Hays;The Honorable D. Alan Hays,Our neighborhood is being destroyed by the seemingly finalized route of the Wekiva Parkway.We have not been contacted in any way about being bought out, so we are being left to live in the destroyed neighborhood by this plan.Can you help?This is how the planned route is destroying our neighborhood.. Our neighborhood will be without any path of access. There willbe no way in or out of our neighborhood.. Our front wall and gate will be destroyed.. One homeowner's yard is partially taken.. Water drainage from the new highway has no where to go but intoour yards. The plan is to elevate the highway beginning right behind our neighborhood with no buffer for water retention.. Our children will be without any walking path, safe orotherwise, to the local elementary school that is less than a mile away.There is an alternative that was dismissed out of hand.The planned route goes tens of miles down SR 46 and with only a mile to go to get to I4, it turns deliberately towards our neighborhood rather than continue the remaining mile down an already existing commercial zoned highway.This alternative would destroy no one's neighborhood and would benefit from an already existing highway with already existing interchanges to I4.Our neighborhood needs your help. We would like the route of the highway to follow the alternative path to I4 Please email back or call me at 407-688-9883. I look forward to hearing from you.James Briggs
7/25/2006	10:03 AM	PIO researched parcel query. 213 is 4th parcel from entrance on east side of Capri cove Place. No direct impact to 213 or entrance. Only property with potential direct impact is first house on east side of entrance. Need to check further if potential pond locations in this area.
7/25/2006	9:58 AM	PIO responded to Anne Marie/Rep. Hayes' office: "Yes, Anne Marie. Please forward me their email and I'll copy you on the response info. Thanks.Mary Brooks

9/20/2006	6:37 PM	PIO worked on comment responses:"September 20, 2006Randolph Briscoe25555 High Hampton Cir.Sorrento, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Randolph,Thank you for submitting public comment forms for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns, and will continue to work with your HOA to address your issues.Your comments are being reviewed and

evaluated along with the more than 540 other forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as government feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by December or January. That draft preferred alternative also must undergo local government and state agency review and revision before being presented at formal public hearings in March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority, Orange and Lake County officials and other local, state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, (F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks--648 p.m.

8/7/2006	10:01 AM	Attended public workshop on 8/1/06. Submitted comment: "In regard to the HCE Heathrow Country Estates), we've done an excellent job in the "beautification" to Lake County and now this proposed road is destroying what we are trying to accomplish. Please move the road east and unfortunately take out two homes instead of ruining a whole community and now not allowing us to sale the community." Address: 670 Old Horatio Avenue, Maitland 32751

Contact Notes Date 2/28/2006	Jim & Donna Brittsan Time 12:46 PM	Lake Forest HOA Regarding Mailed Response RE: Comment Form
2/7/2006	12:34 PM	PIO received faxed comment form from Jim & Donna Brittsan/4957 Maple Glen Pl., Lake Forest subdivision.
2/3/2006	3:31 PM	Donna Brittsan responded: "Mary, thanks for the comment form....Regards, Donna"
2/3/2006	1:45 PM	PIO emailed comment form to Donna Brittsan: "Donna, As discussed, here is the comment OOCEA website." (However, when PIO tried to download comment form, the file came up with no problems.)
2/3/2006	1:39 PM	PIO returned call to Donna, offered to email her the comment form. She said send to <a href="mailto:jbrittsan@cfl.rr.com">jbrittsan@cfl.rr.com</a> PIO asked if she was on mailing list? She said no, but would like to be PIO said will add her for newsletters and meeting notices: 4957 maple glen Pl, Sanford 32771. She said thank you, you're very nice.
2/3/2006	1:00 PM	Donna Brittsan 407-323-3804 called and left MSG I was trying to get the comment form for the Wekiva Parkway project. Not able to get a hold of that on the internet; says error in the plug in. if you would get a hold of me please. Thank you.
1/31/2006	1:05 PM	As residents of the Lake Forest subdivision we are frightened by the amount of existing traffic as compared to when we moved here some years ago. With the new and existing townhomes and other developments the use of state route 46 as proposed will impact over thousand homes adversely. My wife and I ask you to remember this plan for the good of ours and surrounding areas. Please use the State Route 417. Thank you for your consideration.

Date Time Regarding  
7/31/2006 4:56 PM Attended public workshop on 7/25/06.

6/12/2006 3:10 PM Sue Brown called back and said she wanted to give me the correct name for that development. It's under Sproul Bible College and it's 32 acres on the s. side of Wayside Dr.

6/12/2006 2:35 PM Sue Brown 407-328-7831 returned PIO's call. PIO noted I researched her property on south side of Paseo as requested and noted the 417 alternative would hit 2/3 or more of the property in question. She said is it still just the two alternatives, 46 and 417? PIO said correct, recapped the international parkway alternative being looked at and eliminated and county eliminated northernmost alternative a while back.PIO noted best thing for her to do now is to be sure to attend the public workshops to get the most up to date info. Noted we still aren't 100% sure but looking like SC meeting at Sanford Civic Center on July 25. Noted we're working on newsletter that will have the confirmed meeting dates and she is on list to receive that. She asked if meetings just for info or would anything be decided there? PIO said no, just information. No decisions until public hearings in Feb. 2007. She said when would they start to buy properties? PIO noted overall schedule and funding challenges, normally would start ROW acquisition at 30% - 60% plans, but without full funding difficult to say. Could be couple of years or could be 5-6 years, just depends. PIO noted there will be ROW folks at the public workshops to answer some general questions about how things work. PIO noted we have to get further along in the process to get more specific questions answered.She said they were thinking about making some improvements to the house, but just don't know. PIO noted it's up to them, but PIO noted any improvements made that increase the value would have to be dealt with when we reach ROW acquisition.She said we have 6 bedrooms 4 baths for just my husband and I and trying to decide whether to sell, but don't know what to tell people. PIO noted lot of people in that position, just tell them nothing decided yet but that property in study corridor for Wekiva Parkway, and one of the alternatives hit the property in question. Give them the timeline and let them know project not yet fully funded. That's all you can do at this point.She said now Ligonier ministries has bought property for school/college for the ministry, they're going to turn the Campisi house into the school and build 10 houses to

the east of us and also 10 houses across the street. We were at meetings as to how they're going to work that. She said Timothy dick is the contact tdick@ligonier.org she said they were interested in what's going on with the project. PIO said I'd email contact to see if he needed any info. PIO told her to put the meeting dates on her calendar, and if she can't make it we always put all the meeting exhibits on the website. She said she'd gone on the website before to see where it was going. PIO said after the meetings if she doesn't hear anything for a while nor has questions she's welcome to touch base for an update. She said she appreciated that.--253 p.m.

6/9/2006	5:35 PM	Updated database. PIO noted Sue Brown already in database and her address is on Paseo Place.
6/9/2006	5:23 PM	PIO returned call to Sue Brown 407-328-7831, left detailed MSG confirming still have the two SC alternatives: one with connection somehow at SR 46 and at 417. PIO noted we'd looked at an alternative involving international Parkway but that was too problematic and we passed that on to the SCEA at their May board meeting. PIO noted we're shooting for next public workshops in late July, as soon as firm those up will get the newsletters with that info out to them in late June or early July. Asked her to call back to confirm her address so I could see where she was located with regard to the alternatives. Told her to try me back on Monday.
6/9/2006	4:21 PM	Sue Brown called and left MSG re: the western connector 429 project where SR 46 is going to connect to I-4. I live right off orange blvd. I was wondering if there was any more info as to the routes. I believe they were down tot two of them, SR 46 or the southern route. Was wondering if any further info on it.407-328-7831, 5595 Paseo place off Orange Blvd.
Contact Notes		Terrence Brown                      Champion Group
Date	Time	Regarding
3/17/2006	9:51 AM	Terrence Brown 407-330-2120 said he was calling for Ben Champion who owns property up there. We had talked in February and you mentioned that environmental study was being done and there might be some new info in March. PIO noted they're still doing meetings with local and state officials, so now we're looking at end of April hopefully to be finished this round and be able to post the maps on the website and then have public workshops in July. He asked if those meetings were public? PIO noted public workshops absolutely are open to the public. He said he meant meetings with local officials. PIO said no, those are internal. He asked when the last time was the website was updated? PIO noted think I did an update in January on the content, but maps still have to be updated. PIO noted website had been revamped, walked him through how to get to Wekiva Parkway page. He said he'd check back then.--959 a.m.
2/23/2006	1:59 PM	PIO returned call to Terrence Brown 407-330-2120, Champion Group, was talking to people at DOT. We're working with folks to purchase property for an office. When I looked at the website it shows path of the portion that runs down 46 in Lake County, where it goes around Sorrento and comes back up, that property our organization has right under the loop on the chart. I'm trying to get any info I can. They already bought property and are ready to build. They want to know how close they can build to the road? The property is between RR to south and 46 to the north; the property probably couple hundred feet wide. PIO noted we do not have an alignment, went over study status and timeframe. Noted we'll have updated maps in late March-April, and next public workshops in mid-summer, so will have better info for them at that time. PIO asked if they want to be on mailing list? He said yes. The property is owned by Solid LLC is the owner, P.O. Box 952259, Lake Mary 32795, Ben Champion should get the info. Email bchampion@champgroup.com PIO let him know we're refining, eliminating and adding alternatives and hope to update maps late march or April. PIO noted next public workshops not scheduled but shooting for mid summer, maybe July. PIO noted PD&E study will finish spring 2007 with an approved alternative. He said that helps and thanks very much.--208 p.m.

2/23/2006	1:18 PM	Terrence Brown left MSG 407-330-2120 calling re: western connector, specifically the point at which it connects to 46 and the expansion there ... . I cannot find a list of meetings relating to that on the site. Folks at the FDOT told me there were meetings discussing how things are working. This is the area west of Sorrento. 407-330-2120. this relates to Solid Limited Liability Co. (LLC).

8/16/2006	11:47 AM	PIO responded to Joan Brown-Bachmeier: "Hello Joan,I'll be heading to the Wekiva Parkway progress meeting shortly and will check the schedule. Dates for the PAG and EAC meetings hadn't been set last I heard. The only thing I see on the East Central Florida Regional Planning Council www.ecfrpc.org website for the Wekiva Commission are items from the July 28 meeting (we don't set those meetings).Mary Brooks

Contact David Brunsman Wilson Place HOA

Notes

11/27/2006 9:49 AM

PIO returned call to Dave Brunsman/Wilson Place HOA resident off Wayside Drive and International Parkway 407-771-8617 PIO went over notes from the HOA meeting, distances for different alternatives from Wilson Place (all around 800' away), timeline.He asked if it would be a raised roadway? PIO noted elevations for various alternatives, still to be decided. He wasn't aware we hadn't selected an alternative yet. PIO reiterated timeframe.He asked on bridge on 46 that separates Lake and Seminole, are they going to widen that? PIO noted would be wider and higher. He asked about access to international parkway? PIO noted ramp access. He asked about number of lanes? PIO noted doing traffic analysis, originally were thinking 4 lanes but now seems 6 lanes needed.Land on 417 alternative, any problems with buying property or have to do eminent domain? PIO noted certainly hope to be able to negotiate with property owners and that will be tried first before getting into eminent domain. PIO noted funding not available for buying all the property needed.He asked is the county holding off on allowing building because of this? PIO noted not sure county could if they wanted to, don't think if property owner wants to develop and meets requirements that you can stop them. PIO noted development popping up along the corridor is something we just have to deal with.He said on the SW corner of Wilson and ??? developer has approval for 240 homes fronting international parkway. If

they approve that...? PIO noted we often have to shift alignments to avoid development. When they decide which way to go, will they start in Seminole first? Will it be done in phases? PIO noted yes, will be done in phases, most likely OC section would start first by EA, but rest of phasing will depend on funding availability. He thanked me for the call back.

11/21/2006 3:10 PM Dave Brunzman/Wilson Place HOA resident off Wayside Drive and International Parkway Brian Hutchings MSG trying to get some info, believe you held an information session at local church off wayside drive last month. Wanted to see if I could get some info on that meeting. 407-771-8617

Date	Time	Regarding
3/9/2006	4:00 PM	At the 2030 Master Plan public workshop at OCEA, there were many consultants and just a few members of the public. Met Bob O'Malley of Metroplan and Tom Burke of Lake-Sumter MPO, gave my business cards and asked them to post PIO info on project links on their websites. Tom Burke asked that he and TJ Fish be added to PAG list for their agency. He wasn't sure they were getting PAG notices. PIO said I'd pass it along.
1/19/2006	1:11 PM	PIO emailed Tom Burke: "FYI, I've spoken to Mrs. Williams and she's all set."
1/18/2006	1:06 PM	Tom Burke copied PIO on response to Dave/Ch2m Hill: "Thanks David! I appreciate your looking into this. -Tom"
1/18/2006	1:00 PM	Tom Burke responded to PIO email: "Thanks Mary, If you could give her a call, it might be better as you have more detailed info (in case she asks). I appreciate your help on this!-Tom"
1/18/2006	11:52 AM	Dave/CH2m hill emailed Burke and PIO: "Correction to my last email. The parcel numbers were from an old file. The Williams' own 2 parcels on either side of Swan Rd. The corridor boundary crosses the western part of the parcel located west of Swan Rd. At this time, it does not appear the alignment alternatives directly impact the house on the parcel west of Swan Rd., however, the study is not complete."
1/18/2006	11:51 AM	PIO called Tom Burke 352-315-0170, receptionist said he went to lunch meeting. PIO left MSG on voicemail that I was having email trouble and just got his query. PIO noted I can call Gladys Williams if he hasn't already, just let me know.
1/18/2006	11:45 AM	PIO responded to Thomas Burke and Dave/CH2M Hill: "Tom, I can call Mrs. Williams back with this information, if you haven't already. Just let me know. Thanks."
1/18/2006	11:32 AM	Dave replied to Thomas Burke/Lake Sumter MPO et al: "According to our files Mrs. Williams' house is in the "Fairways at Mt. Plymouth" which is outside the project corridor and, therefore, no alignment alternatives impact her property. "
1/18/2006	10:45 AM	<p>___From: Burke, Thomas [mailto:TBurke@lakesumtermo.com] Sent: Wednesday, January 18, 2006 10:45 AM To: Mary Brooks; Callahan, Mark/ORLCC: Manwaring, Brian/ORL; Lewis, David/ORL Subject: RE: Wekiva Parkway</p> <p>Mary, I got a call this morning from a concerned resident, Gladys Williams, in Sorrento. She was informed by a friend (not sure what knowledge this person may have) that her house (three houses on her street) is in the path of the Wekiva Parkway/SR 46 By-Pass. Her address is: 30549 Swan Road Sorrento, FL 32776 She and her husband want to put some money into their house in improvements, but, of course, would rather not spend the money if their house is going to be taken for the Wekiva project. I told her that the project was in the PD&amp;E phase and an exact alignment was not yet defined. Never the less, I told her that I would contact you to see if there was any merit to the rumor. Gladys can be reached at 352-383-0494. She said, when calling, that you should ask for her, even if her husband answers the phone (as he might be confused? Not sure, really). Would you like to call her? If not, if you can fill me in on the details, I can give her a call back, no problem. Just let me know! Thanks Mary! -Tom</p> <p>___Thomas W. Burke, P.E. Contact	Ray & Novina Cabanas	
Notes		
Date	Time	Regarding
11/3/2006	12:11 PM	PIO returned call to Ray Cabanas, who said he lives at 29709 CR 46A, the concept shows their parcel as 3240, and he wants to know if the latest alternatives would affect his property? PIO noted we'd added some since the summer workshops and I'd have to find out where CH2m Hill was what the analysis, which ones were still being considered and get back to him. PIO noted with everything going on, it will probably be some time early next week before I get back to him. He said that would be find and thanks for calling back so quickly.
11/3/2006	11:55 AM	Ray Cabanas MSG 352-383-8084 I live on 46A. Could you give me a ring this afternoon or tomorrow? Thank you.
8/16/2006	9:55 AM	Drafted comment response and sent maps to Ray Cabanas: "Aug. 16, 2006 Ray Cabanas 29709 CR 46A Sorrento, FL 32776 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear Ray, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. As requested, please find enclosed copies of the Lake County East Viable Alternatives (on which I've highlighted your parcel), and the Lake County East Local Access Alternatives 1 - 5. There would be some potential impact to the south corner of your triangular property from the Local Access Alternatives 1-3, and to a lesser extent from Alternatives 4 & 5. More details will be available regarding any potential impact once we've narrowed down to a preferred alternative by the end of this year. Your comments will be reviewed and evaluated along with the more than 400 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comment, local government and state agency feedback and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks--1007 a.m.
8/16/2006	9:40 AM	PIO researched Ray Cabanas property query as per their comment form, 29709 CR 46A, parcel 3240 on the maps. On the viables, bridges to red and green alternatives hit south corner of this triangular property. Parcel hit in same area by Lake County East local access alt. 1, 2 & 3; to a lesser extent by local access alt. 4 & 5. PIO confirmed via LC property

appraiser website location of property and potential project impacts.

8/7/2006	1:10 PM	Attended public workshop on 8/1/06. Submitted comment form: "We are senior citizens and extremely concerned over the proposed alignments through Wekiva Parkway-Lake County east. Our home is located on the map as Parcel 3240. I am requesting a Blow Out map of Blue option with various interchanges and how that would affect us. Thanks."
4/27/2006	4:37 PM	PIO returned call to Ray Cabanas, who was looking for update on the 429 parkway. PIO asked if he'd seen the initial alignment alternatives maps? He said he went to the public meetings. PIO noted we're narrowing those alternatives down, removing some, adding others, based on public comment and local government and state agency input. PIO noted we've got like 9 meetings with government folks left, and we should be able to have the maps updated by the end of May. PIO asked if he had access to the internet? He said no. PIO noted we'll be posting the maps on the internet, and also will be included in the project newsletter, which we hope to get out in June. PIO asked if he's on the mailing list? He said he is, noted we've spoken previously. PIO noted so he'll get that info, and once he does if he has any questions, he can call me. PIO also noted we're shooting for the next public workshops in mid-August on the more viable alternatives and some preliminary concepts on what the road might look like. PIO noted that info also would be included in the newsletter. PIO noted we also will do presentations to HOA's, community organizations, or if he's just an individual property owner that can't make those we can set something up. He noted they don't belong to a HOA, but he's very interested in seeing what's changed with the alignments. PIO reiterated updated maps expected end of May, but if I get them sooner, will put them out there. He asked if there was an engineer he could go talk to and see how the alternatives have changed? PIO noted the alternatives literally are changing by the day based on all of these different meetings with government officials. PIO reiterated we'll have the maps updated for this round by late May. He said thanks for the call back and the info.
4/27/2006	2:57 PM	Ray Cabanas 352-383-8084 called and left MSG asking for info on the 429 parkway, wants to know what's happening and will his property be affected. Please call him.

Contact		William Calhoun
Notes		
Date	Time	Regarding
4/26/2006	2:00 PM	Following PIO report during progress meeting, Gary said William Calhoun calls him regularly and he has given him the info, schedules, etc. probably six times.
4/24/2006	3:30 PM	William Calhoun 407-880-7573 called and said he saw something in the paper that said he could call for info on the expressway. PIO noted he has the correct number for the Wekiva Parkway, how could I help him? He said he lives at 3509 West Kelly Park Road, doesn't know the lot number. He said he's wondering what's happening, he hadn't seen anything in a while. PIO noted still working through meetings with local governments and state agencies, and hope to have maps updated by late May and workshops in mid-August. He said so no meetings in June? PIO noted we originally looked at July for public workshops, but now will be in August. PIO noted working on the newsletter and that should be out in June. He said he's wondering where the exit is going to be? Since he lives on Kelly Park Road, that's where he wants the exit to go. PIO noted still looking at both Ponkan and Kelly Park, though majority of support seems to be for Kelly Park location. PIO noted that decision still has to be finalized. PIO noted were meeting still with OC officials among others. He asked who at the county? PIO noted with the public works and other folks. He reiterated he'd like to see exit at Kelly Park - does the public's comment count? PIO noted we've gotten a lot of public comment forms also supporting the Kelly Park location, and that's also being taken into consideration. He said he has a person wanting to buy his property but he's not sure if he wants to sell or hold on to it a little longer. He asked that I take his address and let him know if the alignments are hitting his property. PIO confirmed his address and noted I can't get back to him with that info until probably late May when the viable alternatives are finalized. PIO noted as long as we still have government and agency meetings to get through, the routes are still changing. He acknowledged we had a lot of different alternatives to look at. PIO noted we'd be sending him the newsletter in June which will have updated info for him, and noted updated alternatives will be posted on the EA website. He said please keep him in mind so he can find out what's going on.

5/5/2006	8:49 AM	Responded to James Campisi comment form, copied for files and sent: "May 5, 2006James Campisi5555 Wayside Dr.Sanford, FL 32771RE: Receipt of Public Comment Form for Wekiva Parkway PD&E Study Initial Alignment AlternativesDear James,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments are being reviewed and evaluated along with the hundreds of other public comment forms received, as well as input from local governments. As you're probably aware by now, the Seminole County Expressway Authority voted Dec. 20, 2005, to have the yellow or northernmost alternative, which would have connected to Interstate 4 at U.S. Highway

17-92, removed from further consideration. The SCEA, which must approve any alignment in Seminole County, also requested an alternative in the area of International Parkway be evaluated. The PD&E Study team will present information on that request and the study status during the May 9 SCEA meeting in Sanford. There are many questions that cannot be answered at this time in the study process. Currently, we are wrapping up analysis of the initial alignment alternatives based on public and government input, as well as on engineering evaluations to create a set of more viable alternatives. The resulting viable alternatives will be presented at the next public workshops in August of 2006. Based on further public and government input and the viable alternatives analysis, a preferred alternative or alternatives will be selected. Public hearings are expected to be held in early 2007, with the PD&E study finishing with an approved alternative in spring 2007. All of the project exhibits are available, and should be updated by late May or early June, on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the home page click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, where you can scroll down to see the text links for the public workshop files. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, (F) 407-381-9038, via email MBrooksSR414@cfl.rr.com, or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. --915 a.m.

5/1/2006	10:41 AM	James Campisi, 5555 Wayside Dr., Sanford 32771 (faxed from The Newport Group F 407-333-2815, 300 International Parkway, Ste. 270 Heathrow, FL 32746, O 407-333-2905) faxed public comment form. "On behalf of myself and many others in my neighborhood, we are extremely opposed to the proposed southern connector for the Wekiva Parkway at it ties into I4. This route would ruin some of the most beautiful neighborhoods in Seminole County. We would much prefer the northern route or the new route under study that would go down International parkway. Either of these routes would be less obtrusive to Seminole County's old growth trees and retain the beauty found south of SR 46."

Contact		Joe Caracciolo
Notes		Cara Nurseries
Date	Time	Regarding
9/20/2006	10:58 AM	<p>Joe Cara called back. PIO relayed study schedule, overall timeframe and funding challenge best-case scenario 2012-2015. He said so to know for sure where it's going? PIO reiterated that will be when study concludes next spring with an approved alignment alternative. He said and no matter what it looks like it's going west of Plymouth Sorrento Road? PIO confirmed that's correct in his area; reiterated that we do cross east of Plymouth Sorrento Road north of Haas - Ondich Road. He said they're also talking about building stores and a lot of construction on Kelly Park Road, would be just like Park Avenue, do you know about that? PIO noted that would be a city or county issue; I only deal with this road project. He said okay, thanks for the info, always a pleasure talking to you.</p>
9/20/2006	9:26 AM	<p>PIO returned call to Joe Cara Sr. 516-285-6000, receptionist said he and his wife not in, won't get in until around 11 a.m. PIO left MSG with my number for him to call me back.</p>
9/18/2006	4:15 PM	<p>Joe Cara called and left MSG I spoke to you earlier today and thank you for returning my call. Do you know when the project will start or when it should be slated for completion on the 429? If you could give me some of that information I'd appreciate it. 516-285-6000 ask for Joe Cara or my wife Catherine</p>
9/18/2006	12:43 PM	<p>PIO researched 5454 Foliage Way on OC property appraiser site for Joe Carachiola Sr. of Cara nurseries in Apopka. But nothing came up for business or owner name or address. PIO called Joe Cara 516-285-6000 and noted nothing coming up for address, etc. he said it's probably under CJ Caracciolo (CQ) Realty. PIO said I'd try that spelling and get back to him. PIO found parcel ¼-1/2 mile north of Kelly Park Road and maybe 3,000 feet east of Plymouth Sorrento Road. 105 p.m. PIO called back Joe Cara Sr. 516-285-6000 to relay his property is northeast of Plymouth Sorrento and Kelly Park, and south of Haas where we do turn to the east. PIO noted the project was on the west side of Plymouth Sorrento Road in his area, city directed us to stay on west side because of development going in. he commented on the development he sees in the area, said he has 10 acres and asked if I thought someone might want to buy his property some day to build houses? PIO noted don't deal with that, just the road project. He said he also got some notice about 2020 Haas Road and they want him to vote on something, do I know anything about that? PIO said no, but sounds like someone asking for a zoning change, that would be city or county depending. He said so there may be some development in his area, but he doesn't have to worry about the road? PIO said that's correct. He said that's fine, he will let his son's worry about the development. --117 p.m.</p>
9/13/2006	12:11 PM	<p>Joe Caracciolo of Cara nurseries in Apopka. Dan Said I should call you and discuss about purchasing some properties. I want to know if my property is involved in this. Call me at 516-285-6000 and thank you. My name is Joe Cara.</p>

Date	Time	Regarding
7/31/2006	12:50 PM	Attended public workshop on 7/25/06. Submitted comment: "I believe that exiting I4 at Brian Hutchings 46 is the better option than exiting at 417. I am worried about the traffic impact to the secondary roads such as Markham Road. I don't really see the advantage of the parkway because I believe the traffic on the frontage roads will be as heavy as 46 is now. I believe expanding 46 to 4 lanes is a much better option than the parkway. I am also concerned about the impact to the environment because of increased population in Lake County because of better access."

Notes			
Date	Time	Regarding	
2/18/2006	3:52 PM	PIO responded to Dan Cetrone/Rock Springs News: "Hello Dan, It was nice to meet in person at the ORRA luncheon on Thursday. I was out at meetings most of the day on Friday and am just getting to respond to your email. I have attached the latest alignment for the S.R. 414-Maitland Blvd. Extension Project. We are still in final design and Right of Way Acquisition, but expect to be ready to put this out for contractor bids in mid-summer 2006. Construction on the first segment would likely start in the Fall of this year. It appears the section (200) containing the new 429 interchange will be the first to get underway, followed most likely by the next section to the east (210), which will include the mainline toll plaza and extend to just east of Hiawasee Road. The section (211) connecting to existing Maitland Boulevard would follow that one. As you may have heard, construction on the section (201) that will extend north from the new 429 interchange to US 441 (near Plymouth Sorrento Road) has been removed from the 5-year work program due to incredibly high construction and fuel costs. Unless a new funding source is found, that section would likely get underway some time around 2007-2008. The initial sections of the road are scheduled to be open to traffic in 2009. As mentioned previously, the other Expressway Authority project that will affect your area is the Wekiva Parkway, which is still in the project development and environment (PD&E) Study phase. Based on public comment and local government input following last November's public workshops, we are refining and narrowing down the initial alignment alternatives to create a set of more viable alignment alternatives. We hope to have updated maps posted on the OOCEA website by late March or April, and plan to have the next round of public workshops some time around July. We will be sending out a project newsletter and meeting notices prior to the meetings (one in each county). Following the viable alternatives workshops, we'll develop a preferred alignment alternative which will go before a public hearing probably in January 2007. The PD&E Study is expected to conclude with an approved alternative in spring 2007. From there the project, which faces significant funding challenges, must go into final design and right of way acquisition before starting construction. Funding for these subsequent development phases must still be determined. I encourage you to review the information on the OOCEA web pages for both of these projects for further details. Please let me know if you have other questions. Also, please let me know when you plan to run your story on either or both of these projects. Thanks. "Mary Brooks	

2/17/2006	2:10 AM	<p>Dan Cetrone/Rock Springs News emailed: "Hi Mary,This is Dan from the Rock Springs News, - you'll recall Ellen &amp; I finally met you face-to-face at the ORRA "Trenches" luncheon yesterday [Thurs].I had asked if you had any recent updates on the Maitland Extension.I had also asked if it's possible to send us information that is not the usual PR that is sent out to all the newspapers. We are being mailed to over 9,000 homes in Apopka. The majority of these residents are new to Apopka, and each month we receive at least a dozen requests for information on the Maitland Exchange.Our paper is very popular and one of the reasons for that popularity is that the news and information is generally not available anywhere else.That's why I'm asking for specific info that is not part of a 'General Release' to all papers.If this is Not Possible, then please respond to the following questions, and I'll structure the article in a question &amp; answer format, and quote you directly.Question: Can you tell our readers when the Maitland Extension will begin its construction?Question: Is there an estimated time for completion?Question: Are there any other major highway improvements that will improve area travel for the Apopka residents?Thanks for the help Mary. Unless a new funding source is found, that section would likely get underway some time around 2007-2008.The initial sections of the road are scheduled to be open to traffic in 2009.As mentioned previously, the other Expressway Authority project that will affect your area is the Wekiva Parkway, which is still in the project development and environment (PD&E) Study phase. Based on public comment and local government input following last November's public workshops, we are refining and narrowing down the initial alignment alternatives to create a set of more viable alignment alternatives. We hope to have updated maps posted on the OOCEA website by late March or April, and plan to have the next round of public workshops some time around July. We will be sending out a project newsletter and meeting notices prior to the meetings (one in each county).Following the viable alternatives workshops, we'll develop a preferred alignment alternative which will go before a public hearing probably in January 2007. The PD&E Study is expected to conclude with an approved alternative in spring 2007. From there the project, which faces significant funding challenges, must go into final design and right of way acquisition before starting construction. Funding for these subsequent development phases must still be determined.I encourage you to review	

the information on the OCEA web pages for both of these projects for further details. Please let me know if you have other questions. Also, please let me know when you plan to run your story on either or both of these projects. Thanks. "Mary Brooks

2/17/2006 2:10 AM Dan Cetrone/Rock Springs News emailed: "Hi Mary,This is Dan from the Rock Springs News, - you'll recall Ellen & I finally met you face-to-face at the ORRA "Trenches" luncheon yesterday [Thurs].I had asked if you had any recent updates on the Maitland Extension.I had also asked if it's possible to send us information that is not the usual PR that is sent out to all the newspapers. We are being mailed to over 9,000 homes in Apopka. The majority of these residents are new to Apopka, and each month we receive at least a dozen requests for information on the Maitland Exchange.Our paper is very popular and one of the reasons for that popularity is that the news and information is generally not available anywhere else.That's why I'm asking for specific info that is not part of a 'General Release' to all papers.If this is Not Possible, then please respond to the following questions, and I'll structure the article in a question & answer format, and quote you directly.Question: Can you tell our readers when the Maitland Extension will begin its construction?Question: Is there an estimated time for completion?Question: Are there any other major highway improvements that will improve area travel for the Apopka residents?Thanks for the help Mary. Kelly Park RoadApopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment AlternativesDear Charles,Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007.Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in spring 2007. All of the latest public

workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiwa Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at © 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/2/2006	11:43 AM	Attended public workshop on 7/26/06. Submitted comment: "I live on Kelly Park on adjacent property beside 429. We have both residential and commercial properties (2 parcels). Kelly Road would also be easier to widen in future. I see that it makes the most sense to place the Interchange at Kelly Park. It makes the most sense for the Lake County traffic. Traffic is continuing to grow and by opening traffic will be disastrous. Ponkan is disastrous now with additional traffic would add to problems with schools and access. I feel a lot of revenue also would be lost with the Ponkan Interchange vs Kelly Park due location to toll booth acquiring revenue to pay the bond moneys."
7/17/2006	9:18 AM	PIO called back Charlie Chapman 407-619-1907 noted the ROW line for the IC at Kelly Park right on his western property line. If IC is decided there, potential impact from ramps and retention ponds. PIO noted maps at workshops will have some retention pond concepts; they're working on those now. PIO noted impact to his property will depend if IC located there or at Ponkan, if at Ponkan could see little to no impact. He asked will the IC be overhead? Is there going to be a bridge there? PIO noted we will be bridging Kelly Park either way, difference will be if IC is at Kelly Park, will have ramps, etc. Spreading out from the mainline and increasing chances of impact to his property. Where are they looking at starting construction? Is it 10-12 years from now? PIO said not that far out probably but a few years from now. PIO noted overall schedule, funding challenges, could be 2010-2015 before construction begins. Though some funding source could become available that allows them to fast track that. PIO asked if he planned to attend meetings? He said he sure does. PIO said good. He'll get to see the latest and greatest info, and please introduce himself to me there. He said he would and thanks for the info; that helps a lot.
7/17/2006	8:49 AM	PIO returned call to Charlie Chapman/Chapman's Orchids 407-619-1907, I was trying to find the site that would give me the picture of where the Wekiwa ... I live on Kelly Park Road, believe will be right beside me, trying it find out exactly where it's going to be. PIO gave web address and text links, offered to walk him through it. He said he's at a computer but it's not on right now. PIO asked for location in question, I could research it for him and get back to him? He said 3321 W. Kelly Park Road. PIO said I'd try to get back to him today. He said he'd appreciate it so much.
7/14/2006	10:24 AM	Charlie Chapman/Chapman's Orchids called and left MSG I wanted to ask question pertaining to Wekiwa Parkway as far as the map that you have projected here. I'm very close to that particular area. I was wondering if I could possibly show me how to get onto that map. Give me a call back 407-619-1907.

8/10/2006	12:42 PM	Attended public workshop on 8/1/06.

Contact Notes		Dan Charles
Date	Time	Regarding
8/2/2006	4:30 PM	PIO returned call to Dan Charles, whose property number is 177 in Sorrento 352-217-0376 He said has question on 46 bypass, are you going to have all the different maps on a website somewhere? PIO noted they just went out today. He said he was just on there

and only saw the one map. PIO offered to walk him through it, gave address and text links  
 He found it. He said a lot of the routes are going right through our property. Our house  
 sits on back part of property. I talked to Mac Magough with DOT and he said if it doesn't  
 hit our property then we're not affected. But really no matter what we're affected. If it  
 doesn't go through our property its' going to be right behind us and we'll have to look at it  
 We're going to be affected. You've really kind of put people's lives on hold here. When  
 will you know for sure? PIO noted public hearings Feb.-March, with agency approval to  
 follow, maybe finish study April May 2007. PIO noted would suggest folks do what they  
 need to do or want to their properties since we're talking several years before we have  
 enough money to build. If they improve the property and then we need it then we'd have  
 to deal with that then. He said they had planned to build a house for his son on the  
 property, but now they don't know. We discussed effect on property values. PIO noted I  
 bought my house near 417 and 408 because I wanted to be able to get anywhere I  
 needed to go in 30 minutes or less, so there is a population that wants to be close to  
 these things, to have the access. He said but they won't be able to get on there. PIO  
 noted if Kelly Park IC is chosen that would be a way to get on, or go up to the 46 ramp  
 where that goes south. He said okay and thanks for the info.--442 p.m.

8/2/2006	2:21 PM	Dan Charles called and left MSG my property number is 177 in Sorrento. I was at workshop last night. I'm just wondering if you can give me a call back. 352-217-0376 there are a few questions I just now have thought about and would like to ask you about. Thank you.

8/9/2006	8:53 AM	Attended public workshop on 7/26/06.
Contact Notes		Joyce Cherney
Date	Time	Regarding
8/25/2006	4:06 PM	PIO again tried Joyce Cherney, left detailed MSG emphasizing no direct impact to her property and roadway would be varying distances away depending on the alternative. PIO asked her to call me back.
8/25/2006	12:46 PM	PIO called Joyce Cherney 407-886-4443 to relay parcel query info. Tried several times but kept getting fast busy signal.
8/25/2006	12:27 PM	PIO finally able to get Joyce Cherney property location from OC property appraiser website 5902 Plymouth Sorrento Road is 3 parcels south of Ondich on west side of Plymouth Sorrento Road. PIO check OC-LC system IC alternatives: 1 - IC cuts across NW corner of vertical parcel that abuts 5902 on the west side; close but no direct impact 2 - IC shifts west, moves off adjoining vertical parcel, farther away 3 - same as 24 - moves even farther west, now two vertical parcels away 5 - similar to 46 - similar to 4
8/23/2006	1:10 PM	PIO tried again to do Joyce Cherney property research, but OCPA site still wouldn't bring up map of property.
8/22/2006	10:30 AM	PIO called back 407-886-4443, Joyce Cherney said yes, she had called and also tried to email PIO but it came back. She said she lives on p-s road, was wondering about the alignments, have they been finalized? PIO noted no, still reviewing viable alternatives. , 5902 p-s road, about 3 block down from Ondich. She said last time I went to workshop in December, I think (November); have they had any since then? PIO said yes, just a couple of weeks ago, didn't she get the newsletter? She said she got something that had a small map on it but couldn't see her area. PIO noted update had the meeting info in it. PIO said I can research the location for her and get back to her. PIO noted all of the public workshop maps are on the EA website. She said she went there, but wound up in outlook ?) and the maps she found didn't show anything for her area. PIO offered to walk her through finding maps on website. She said they don't have DSL and she's not very good with the computer. PIO said I'd email her what I find out and a copy of the map for her area. She said that would be great. Jcherney4@netzero.com

Contact Notes Date		Dr. Hang Ju Chon
	Time	Regarding
8/8/2006	2:05 PM	Attended public workshop on 7/26/06. Mailing address: 1140 Academy Drive, Altamonte Springs, FL 32714.
8/2/2006	3:40 PM	<p>340 p.m. PIO called back Dr. Chon 407-425-0771, receptionist said he was in with a patient. PIO asked to give MSG that I was calling back about his property and the Wekiva Parkway project; he's waiting for the call. She said she'd tell him. He called right back. PIO relayed that only one of the six systems alternatives comes close, right at NE corner of his property but appears no direct impact. He said he heard from a land broker that OOCEA bought 200 acres north of him for \$40k. PIO noted we haven't started buying individual properties; we do have negotiations underway for large parcels we have to acquire for conservation under state law. He said so I can build my nursery? PIO noted yes, and even if there is an impact at some point, we can't stop him from using his property as he sees fit. If things change and we need the property and there's a nursery on it in the future, then we'd just have to deal with that. He said okay, that's what he wanted to know and thank you.</p>
8/2/2006	2:40 PM	<p>PIO returned call to Dr. Chon 407-425-0771 He said I was at Apopka H.S. and spoke to you. I want to put a nursery there, 6704 Plymouth Sorrento road, we have 10 acres. Do we have to wait? PIO said would check property location and any impacts and call him back. He said he was told no impacts. I heard they start construction people there, because they say they don't care, build the building, county pay for everything, so you put two years later. Why I cannot do? Another house at Yothers and Plymouth Sorrento, next lot. There is lot of people going to build and county pay for. Already design come, you cannot stop. You can send letter.</p>
8/2/2006	9:20 AM	407-425-0771 Ms. Brooks, please call Dr. Chon about the Wekiva Parkway. Thank you
6/16/2006	4:08 PM	<p>PIO prepared concept letter for Dr. Chon and sent: "June 16, 2006 Dr. Hang Ju Chon 640 W South St. Orlando, FL 32805 RE: Viable Alignment Alternatives Concept requested for the Wekiva Parkway PD&amp;E Study Dear Dr. Chon, As requested, please find enclosed the viable alignment alternatives for the Wekiva Parkway Project Development and Environment PD&amp;E) Study. As noted, we are in the process of publishing the latest project newsletter which will include information about the upcoming public workshops in late July and early August. With regard to your query about the property at 6704 Plymouth Sorrento Road, there appears to be no impact at this time. However, there are multiple systems interchange alternatives in your immediate area (not shown on this concept due to space), any of which could be revised or relocated to potentially affect your property. We</p>

encourage you to attend the public workshops to get the latest information about the development of this much-needed transportation improvement. Based on subsequent public and government input and the engineering analysis, a preferred alternative or alternatives will be selected. Public hearings are expected to be held in February 2007. The PD&E study is expected to finish with an approved alternative in spring 2007. Following the public workshops, all of the exhibits and other information will be available on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). 6/16/2006	11:18 AM	<p>PIO emailed locator map from concept to Dave/CH2M Hill and Brian re: query: "Greetings, Got a query today from Dr. Chon, who owns property at 6704 Plymouth Sorrento Road, where he wants to put a nursery. He is inquiring as to the latest concepts and how they affect his property. His property is on the west side of Plymouth Sorrento, about 9 parcels north of Boch Road, which is north of Haas/Ondich Road. The overall concept shows him between the two systems IC's shown, but I know there are other alternatives within this area. Do any of the others hit this property? Please advise so that I can get back to him. Thanks.</p>
6/16/2006	10:59 AM	<p>Researched Dr. Chon's property location on OCPA website. Parcel 01-20-27-0000-00-016 owned by Hang Ju &amp; Yuon Sup Chon. Parcel on west side of Plymouth Sorrento Road about 9 parcels north of Boch Road, which is north of Haas/Ondich Road.His property is between the two systems IC's shown on graphic and could be affected by the unshown concepts.</p>
6/16/2006	8:42 AM	<p>PIO returned call to Dr. Chan when you are show to like last time, Maitland extension to Apopka across 441, after that Wekiva Parkway or whatever, I have some question 6704 Plymouth Sorrento Road, last time I saw picture, yellow line on front side and red line on back. I want to put a nursery there, I'm waiting, waiting. I don't want to fight again with the county. If it's in the front side, I'll have to give up.PIO asked if he'd seen the latest</p>

map of alternatives? He said no. PIO asked if he had email or internet access? He said no, I don't have nothing. PIO said I can send him an 11x17 map but will be a little small. PIO noted we're planning next public workshops which will have a lot of information. He asked when that was. PIO noted for OC it's July 26 at Apopka high school. PIO noted we're working now on the newsletters which will have all of that info. He said send to 640 W. South St., Orlando FL 32805 PIO said I'd also check location of the property in question against the latest map and get back to him. He said please let him know and send him any design information. PIO reiterated I can send him the map now but much more info will be available at the public workshops.--849 a.m.

6/16/2006 8:12 AM Please call 407-425-0771 Dr. Chan about the extension of the Wekiva .... I like to ask you some more questions please call. Thank you.

We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks

8/7/2006 11:05 AM Attended public workshop on 8/1/06. Joanne submitted comment: "My main concern is for the Expressway from Round Lake road to be toll free all the way to Sanford." Federico submitted comment: "I would like to see the Expressway toll-free from Round Lake Road to Sanford. If the road is not toll-free, there will be more traffic on 46 in Sorrento."

8/28/2006 4:04 PM "Aug. 28, 2006 Cynthia Cioci 3150 Phils Lane Apopka, FL 32712 RE: Response to Public Comment Form for Wekiva Parkway PD&E Study Viable Alignment Alternatives Dear

Cynthia, Thank you for submitting a public comment form for the Wekiva Parkway Project Development and Environment (PD&E) Study. We appreciate your time and concerns. Your comments will be reviewed and evaluated along with the nearly 500 other public comment forms received, as well as input from local governments and state agencies. More than 1,200 people attended the recent public workshops. Currently we are evaluating the public comments - many of which represent competing interests - as well as local government and state agency feedback, and continuing the engineering analysis with regard to the viable alignment alternatives. That information will be used to draft a preferred alternative by the end of this year. That draft preferred alternative also must undergo government review and revision before being presented at formal public hearings in February or March 2007. Following the hearings the preferred alternative must be approved by the Expressway Authority, Florida Department of Transportation, Seminole County Expressway Authority and other state and federal entities. The PD&E study is expected to finish with an approved alternative in late spring 2007. All of the latest public workshop exhibits are posted on the Expressway Authority website at [www.ExpresswayAuthority.com](http://www.ExpresswayAuthority.com). On the entry page click on the "Corporate Site" button. On the home page under "Construction Updates" click on the text link for the "Western Connectors." That will take you to the Wekiva Parkway page, at the top of which is a text link for the "Viable alternatives workshops" maps. I encourage you to check the website periodically for updates, or to contact me with questions or concerns at ☎ 407-702-8375, F) 407-381-9038, via email [MBrooksSR414@cfl.rr.com](mailto:MBrooksSR414@cfl.rr.com), or send mail to me at 10151 University Blvd., Ste. 222, Orlando, FL 32817. We appreciate your interest and continued involvement in the development of this major transportation improvement. Sincerely, Mary Brooks
