

**APPENDIX D:**  
***National Register of Historic Places* Request for Determination of Eligibility: Strite  
House (8OR9844)**

United States Department of the Interior  
National Park Service

**NATIONAL REGISTER OF HISTORIC PLACES  
REGISTRATION FORM**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

**1. Name of Property**

historic name Strite House

other names/site number 8OR9844

**2. Location**

street & number 6229 Plymouth-Sorrento Road ☐ not for publication

city or town Apopka ☒ vicinity

state FLORIDA code FL county Orange code 95 zip code 32712

**3. State/Federal Agency Certification**

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this ☐ nomination ☐ request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property ☐ meets ☐ does not meet the National Register criteria. I recommend that this property be considered significant ☐ nationally ☐ statewide ☐ locally. (☐ See continuation sheet for additional comments.)

### Narrative Description

(Describe the historic and current condition of the property on one or more continuation sheets.)

## 8. Statement of Significance

### Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- ☒ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or is likely to yield information important in prehistory or history.

### Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- ☐ **A** owned by a religious institution or used for religious purposes.
- ☐ **B** removed from its original location.
- ☐ **C** a birthplace or grave.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object, or structure.
- ☐ **F** a commemorative property.
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years

### Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets.)

## 9. Major Bibliographical References

### Bibliography

Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)

#### Previous documentation on file (NPS):

- ☐ preliminary determination of individual listing (36 CFR 36) has been requested

**NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET**

Section number 7 Page 1 Strite House  
Orange County, Florida  
DESCRIPTION

---

**SETTING**

The Strite House is located at 6229 Plymouth-Sorrento Road, which is located on the east side of Plymouth-Sorrento Road, between Haas Road and Boch Road in Township 20 South, Range 28 East, Section 6 of the Sorrento USGS Quadrangle Map (1960 PR 1980). The house was built in what was historically referred to as the Bay Ridge area, which is roughly six miles northwest of Apopka, Orange County, Florida. The house is set on approximately 48 acres of agricultural land. The main house is set back approximately 1,190 feet from the road. Other historic buildings and structures on the property include a garage, a water tower, and swimming pool. A circular drive leads from Plymouth-Sorrento Road to the main house, and the garage and water tower are located just to the rear of the main house. The swimming pool is located approximately 400 feet south of the house near a natural spring. The majority of the property is covered with trees; however, a large former grove has been cleared and is now used for hay cultivation.

**PHYSICAL DESCRIPTION**

The Strite House is a type of house that may be characterized in Florida as a “Cracker” house, exhibiting an interpretation of the Georgian Form. The term Cracker generally refers to the early Florida settlers and the houses they built. The term Cracker was coined because of the way the settlers cracked their own corn to make meal, the staple in every aspect of their diet (Haase 1992, 10). Cracker architecture was largely unadorned in style and functional in form. The term Vernacular has also come to be used in describing these houses in the sense they represent the regional language or dialect of architecture. The earliest Cracker houses in the mid-nineteenth century were commonly single pen structures with dirt floors. Over time, these Cracker houses became double-pens, saddlebag, and dog-trot houses. By the early twentieth century, the central hallway was enclosed, another set of rooms had been added to the back, and a second floor was included creating an interior pattern of rooms very similar to the plan of Georgian houses from the late eighteenth century (Haase 1992, 66). Often a kitchen ell was attached to the rear of the building to isolate heat and fire hazard from the main massing of the house. Although the interior of the Strite House was inaccessible, the exterior shape and bay configuration of the house resembles the later Cracker style interpretation of the Georgian form. The circa 1910 construction date of the Strite House is also consistent with the early twentieth century construction period attributed to that form of construction.

The Strite House is two stories tall and has a symmetrical front facade; in keeping with its Georgian form (Photograph 1). The façade is divided into three bays with the entrance centrally located and a single window on each side. The second floor fenestration matches that of the first floor with a central window in place of the door. The building is topped by a pyramidal roof clad in 5-V sheet metal. A one-story kitchen ell extends off the rear and is topped by a hipped roof clad in 5-V sheet metal. A small second story sleeping porch also extends off the rear and is set on top of the kitchen ell. This room is covered with a hipped roof clad in 5-V sheet metal as well (Photograph 2). The wood frame structural system is clad with drop siding and rests on a continuous

Orange County, Florida  
DESCRIPTION

---

rusticated concrete block foundation. A one-story flat-roof screened porch has been appended to the northwest corner of the house and wraps around portions of the front and side facades partially interrupting the symmetry of the front facade (Photograph 3). According to the Jerry Holder, the son of the current owner, this porch was added in the 1950s and replaced an earlier front porch (Holder 2008). A second, original porch is located on the south side of the house. This screened porch is topped by a hipped roof clad in 5-V sheet metal and is supported by wood Doric columns (Photograph 4). The original front porch that has been replaced originally had columns that matched those of the side porch (Holder 2008). The house retains all of its original windows which are mostly wood double-hung sash with one-over-one light configurations, but there is also a pair of wood casement windows with four panes each on the rear kitchen ell. The original wood-frame screens are present on most windows. The house has a pair of interior brick chimneys that likely are placed between the front and rear rooms on the interior of the house (Photograph 5). The building is simple and functional in design; yet has some modest ornamentation. The windows and doors have wood surrounds with molded architraves, a molded cornice board wraps around all sides of the house, and the eaves are boxed in with bead board.

As Haase's fieldwork on Florida Cracker houses indicates, many of these old houses have either been abandoned by their owners, or allowed to fall into a state of disrepair (Haase 1992, 14). Simple construction techniques often make constant work and repair on the house a necessity which becomes a burden. Temperature regulation is also challenging due to the wood frame construction and old windows. The Strite House is representative of this trend. The property has been owned and occupied by the same family since the 1920s, and since then, there have been few updates or repairs to the house, which has consequently caused some minor deterioration of architectural elements, although has also resulted in few compromising alterations or additions. The only visible modification to the exterior of the house is the replaced front porch, which is itself historic. The Strite House, therefore, conveys its original historic appearance and maintains much historic physical integrity.

A historic garage building and water tower structure are located behind the main house (Photograph 6). The garage has a wood frame structural system covered in drop siding. It is topped by a rear-sloping shed roof clad in 5-V sheet metal. The front facade of the building faces west, and is five bays wide, including three centrally located open garage bays, flanked by enclosed storage areas (Photograph 7). The open bays are divided and supported by square wood posts, with diagonal braces in the upper corner of each. The storage bay on the south end is accessed through an interior doorway located in the open garage area. The storage bay on the north end is accessed through a doorway on rear of the building. This building is likely contemporary to the construction of the house, circa 1910 (Holder 2008). Located adjacent to the garage, is a historic water tower structure (Photograph 8). The tank has been removed and replaced with what appears to be a galvanized tub. The steel support tower structure remains in tact, and is approximately 30 feet tall. It has four steel legs braced by a system of purlins and diagonal tension rods. A ladder is located on one side and extends to the top of the structure.

National Park Service**

**NATIONAL REGISTER OF HISTORIC PLACES  
CONTINUATION SHEET**

Section number 7 Page 3 Strite House  
Orange County, Florida  
DESCRIPTION

---

A historic swimming pool, constructed circa 1930s is also located on the property (Holder 2008). This pool is located approximately 400 feet to the south of the house near a natural spring. The pool is rectangular in shape and consists of concrete block walls and floor (Photograph 9). It is about three feet deep at the shallow end, and slopes to a depth of seven feet at the other end. The pool is fed by the nearby spring through a pipe that flows into the pool; overflow is then directed through a pipe that allows the spring water to continue flowing through its natural path (Holder 2008). The pool ceased being used in the 1960s and has since been partially silted in, although the actual structure remains in good condition.

The building complex is set back approximately 1,190 feet from Plymouth-Sorrento Road on a narrow dirt drive. Much of the front portion of the property is wooded which obscures the view of the complex from Plymouth-Sorrento Road. The driveway loops in front of the house, creating a circular lawn that is surrounded by historically planted mature Camphor Laurel trees (Photograph 10). Much of the property is wooded; however, the southern portion of the property consists of open hay fields.

Strite House  
Orange County, Florida  
STATEMENT OF SIGNIFICANCE

---

**SUMMARY**

The Strite House is one of the oldest remaining buildings in what was formerly known as the Bay Ridge area. Constructed circa 1910, the house reflects the Florida “Cracker” interpretation of the Georgian house form. Turn-of-the-century buildings of this are a rare and disappearing resource type (Historic Property Associates, Inc. 1995). This particular building retains a majority of its historic physical integrity and maintains its original siding, massing, windows, and architectural details. Additionally, the property the house is located on retains its agricultural character and historic integrity. The property has been continuously used for cultivation, although the specific crops grown have changed several times. Many of the ancillary structures and character defining features of the property remain. Due to these factors, the Strite House is considered potentially eligible for inclusion in the *NRHP* on an individual basis under Criterion A in the areas of Agriculture and Exploration/Settlement, and under Criterion C in the area of Architecture.

**AREAS OF SIGNIFICANCE**

Agriculture/ Exploration/Settlement

The overall property this house is sited on was originally deeded to James P. Kerr in 1883 (FDEP 1883). James Kerr was originally deeded the entire SW quarter of Section 6 of Township 20 South, Range 28 East. The precise date of construction for the buildings, and the person responsible for building them are unknown; however, when the property was purchased by Edgar Kitchen in the 1920s, the house, garage, and water tower were already present. In the 1930s, Edgar Kitchen gave the property to his daughter, Alice Kitchen and her groom, Newton E. Strite, as a wedding gift. The property was later passed down to their daughter, Clara Ruth Strite, to whom the property still belongs.

When Edgar Kitchen purchased the property in the 1920s, it included approximately 180 acres which consisted of the current property, and extended south of Haas Road. At that time, the overall property was being used to harvest timber and turpentine (Holder 2008). According to the family, Kitchen proceeded to convert the property into citrus groves. When the property was passed down to his daughter, Alice Kitchen, and her husband, Newton Strite, in the 1930s, they continued to grow citrus on the property, and were members of several local citrus cooperatives (Holder 2008). By the 1960s, several freezes and insect infestations had effectively destroyed the groves to the point that citrus farming was stopped, and the family switched to raising chickens. Several large chicken coops were constructed at this time; however they are located off the original Strite House property, on a separate parcel to the north that is still owned by the family (Holder 2008).

In recent years, the family has ceased raising chickens, and now grows hay. Many of the former citrus groves have been cleared for the hay to grow. The historic garage is no longer used for agricultural purposes; however, the former chicken coops now function as storage for the farm equipment. While the property has undergone

STATEMENT OF SIGNIFICANCE

---

several phases of agricultural production including a variety of crops, the property is still used as a family-owned farm. Many of the characteristics of the property's history are still evident, and the house retains a high degree of integrity. Due to these factors, the Strite House is considered significant as an excellent example of an early farmstead in north Orange County, that has adapted over the years, and still functions as an agricultural producing property.

Architecture

The region of Orange County just north of the City of Apopka contains several of Florida's earliest agricultural communities. Communities which date from the turn-of-the-twentieth century, located in this region include Tangerine, Plymouth, Bay Ridge, and Rock Springs (Historic Property Associates, Inc. 1995). Despite the rapid growth and development occurring in other sections of Orange County, this region has retained many of these early small settlements and remained predominantly agricultural. Much of the earliest architecture however has been lost. According to a survey done in 1995 by Historic Property Associates, only nine early twentieth-century buildings, not including the Strite House, were recorded in this region (Historic Property Associates, Inc. 1995).

The Strite House is an excellent example of the Florida Cracker House interpretation of the Georgian Form. Constructed circa 1910, the house is a late example of the Cracker style, although coincides with the shift towards larger and more permanent construction after the turn-of-the-century. The massing, roof shape, exterior siding, decorative features, and majority of the windows have all remained unchanged since its construction date. The historic replacement of the original front porch is the only visible alteration to the exterior of the house, and the loss of physical integrity due to this modification is minimal.

The historic setting and landscape of the house also remains intact (Photograph 11). The house is set far back from the road, and the surrounding property is still used for agriculture (Photograph 12). Few non-historic buildings or developments are present in vicinity of the property, and overall the area appears much as it did historically. Although the citrus groves that surrounded the house in the early to mid-twentieth century are now gone, the land is now used for growing hay. The historic ancillary structures such as the garage, water tower, and swimming pool are still present on the property with few alterations. Much of the designed historic landscape on the property such as the circular drive, front lawn, and planted Camphor trees, are also still present.

The Strite House is a rare surviving example of Cracker architecture in what was formerly known as the Bay Ridge area of northern Orange County, Florida. The house exhibits the deterioration of some elements, but nearly all of the historic, character-defining features are retained. The overall property still reflects its historic use and appearance, and conveys the character of a historic farm. Due to these factors, the Strite House is considered significant in the area of Architecture as an excellent example of a turn-of-the-century Cracker

GEOGRAPHICAL DATA

---

**GEOGRAPHICAL DATA**

Verbal Boundary Description

The boundary includes the entire land parcel currently associated with 6229 Plymouth-Sorrento Road. This is approximately 48 acres on the northeast corner of Plymouth-Sorrento Road and Haas Road; as shown in Photographs 12 and 13, and Figure 1.

Boundary Justification

While historically there has been additional property associated with the house, it has been separate parcels that have been acquired and sold off. The boundary of the Strite House described above includes the parcel of land that the house itself is, and historically has been, located on.
