

8.0 CONCLUSIONS AND SITE EVALUATIONS

All cultural resources identified as a result of this survey were evaluated for their significance, as per the criteria of eligibility for listing in the *NRHP*. A discussion of site evaluation follows.

8.1 Archaeological Sites

Archaeological survey of the Wekiva Parkway (SR 429)/SR 46 Realignment PD&E Study project APE resulted in the identification and evaluation of one new archaeological site (8LA3353) and one archaeological occurrence. No evidence of the four previously recorded archaeological sites (8LA532, 8SE80, 8SE1723, and 8SE1775) was discovered. 8LA3353, the Neighborhood Lakes Site, is viewed as a limited activity camp, probably associated with the procurement of local resources of the uplands and adjacent lake. The site assemblage is limited in terms of both density and functional diversity. This is a common site type for the region, and is similar to previously recorded local resources. Based on the recovery of St. Johns Check Stamped ceramics, the site is dated to the St. Johns II period. While the identified site has yielded information of importance to regional settlement pattern studies, additional investigation of this site would not yield data of significance to regional or state prehistory. By this standard (*NRHP* Criterion D), it is not considered eligible for listing in the *NRHP* and no additional investigations are warranted.

8.2 Historic Structures

The architectural/historical survey resulted in the identification and evaluation of 15 historic resources, including one previously recorded resource (8OR7946). They include one cemetery, one roadway segment, a railroad corridor segment, and 12 residential structures of both the Frame Vernacular and Masonry Vernacular styles and which date between ca. 1900 and 1955. Of the 15 resources, 13 (8OR6197, 8OR6198, 8SE1953, 8SE1955, 8SE2191 through -2193, and 8LA3409 through -3414) are considered ineligible for listing in the *NRHP* due to their common design and/or degree of non-historic alterations which compromise their historic integrity.

Two historic resources, 8OR7946 and 8OR6232, both located in Orange County, are considered potentially *NRHP*-eligible. 8OR7946, the Paul Bock House at 2626 Boch Road, is considered potentially eligible under Criteria A and C in the areas of Local Exploration/Settlement and Architecture. This ca. 1900 Frame Vernacular style residence is one of the oldest surviving houses associated with the pioneer settlement of the area. It maintains good integrity. 8OR6232, a ca. 1928 Frame Vernacular style residence located at 43 Rainey Road, is considered individually eligible under Criterion C in the area of Architecture. It maintains a majority of its historic physical integrity.
