

# Working Group Requests & Considerations for Commitments

- Relocate water treatment plant.
- Move alignment farther south and west to:
  - + Lessen loss of good habitat
  - + Distance it from scrub jay area
  - + Protect ability to manage land by prescribed burns
- Ensure access to the Florida National Scenic Trail through the corridor and Moss Park.
- Have reputable land trust or government agencies hold conservation property and restrict its future use through recorded conservation easements.
- Prevent third-party conservation offer from diminishing Tavistock's and Deseret Ranches' mitigation requirements.
- Provide matching acreage for the mitigation credits that were sold for gopher tortoise habitat.
- Ensure dedicated land is of high quality to replace SOFWEA land impacted by roadway.
- Incorporate the 102-acre pine area off Lake Mary Jane Road into the conservation picture.
- Ensure the floodplain compensation area does not affect quality lands and does not destroy habitat.
- Break down uplands and wetlands in both impact area and remainder for each alternative.
- Assure linkage of Split Oak, Moss Park, Isle of Pines Preserve and the newly dedicated lands to regional wildlife corridors.
- Provide adequate funding for restoration and management dedicated land to ensure that impacted portions are returned and maintained as high quality habitat.
