CENTRAL FLORIDA EXPRESSWAY AUTHORITY

ENVIRONMENTAL ADVISORY GROUP MEETING NO. 2

Lake / Orange County Connector (US 27 to SR 429) Feasibility/Project Development & Environment Study — February 12, 2019 —

Title VI Compliance

This meeting, project, or study is being conducted without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to compliance by the Central Florida Expressway Authority (CFX) with Title VI may do so by contacting:

> Kathy Putnam Public Involvement Coordinator 4974 ORL Tower Road Orlando, FL 32807 407-802-3210 LakeOrangeStudy@CFXway.com

All inquiries or complaints will be handled according to CFX procedure and in a prompt and courteous manner.

Environmental Advisory Group (EAG)

EAG Goal

- Receive input regarding local needs, concerns and potential environmental impacts
- Foster an atmosphere that encourages discussion

EAG Member Role

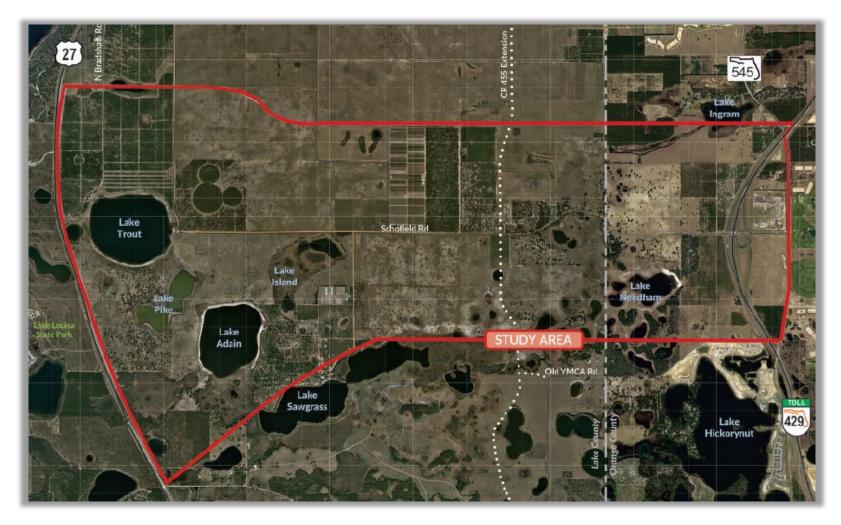

- Assist in the identification of potential project impacts, opportunities and constraints
- Provide feedback and comments regarding the information presented

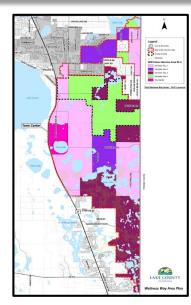

Study Objective

Determine if a Lake/Orange County Connector is viable and fundable.

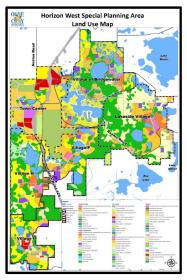

Future Land Use

Wellness Way Area Plan

- Lake County
- Significant economic development potential
- Anticipated build-out of 16,531 units will generate over 26,839 jobs

Horizon West Special Planning Area

- Orange County
- Fast-growing master-planned community
- Anticipated build-out of 40,000 dwelling units

Project's Development Process

Previous Feasibility Studies

- Feasibility studies conducted in 2002 and 2007
- Traffic and revenue analysis conducted in 2017

Identify Project

- Identified in the CFX 2040 Master Plan
- Identified in the Lake and Orange County Long Range Transportation Plans

Work Plan

• PD&E and design phases funded

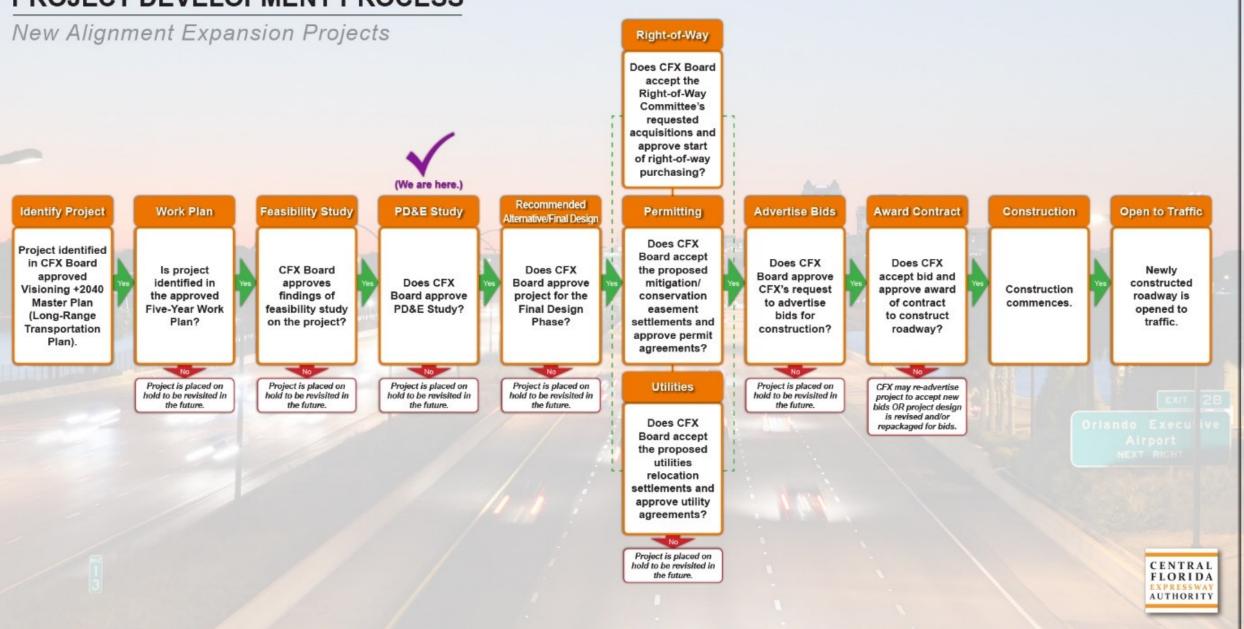

(Design funds indicated as a placeholder pending the outcome of this PD&E Study)

PD&E Study

Current project phase

PROJECT DEVELOPMENT PROCESS

Project Needs

- Improved connections between area roads
- 2 Future transportation demand
- 3 Consistency with local & regional plans
- Economic viability & job creation
- 5 Intermodal opportunities
- 6 Evacuation & emergency services

PD&E Study

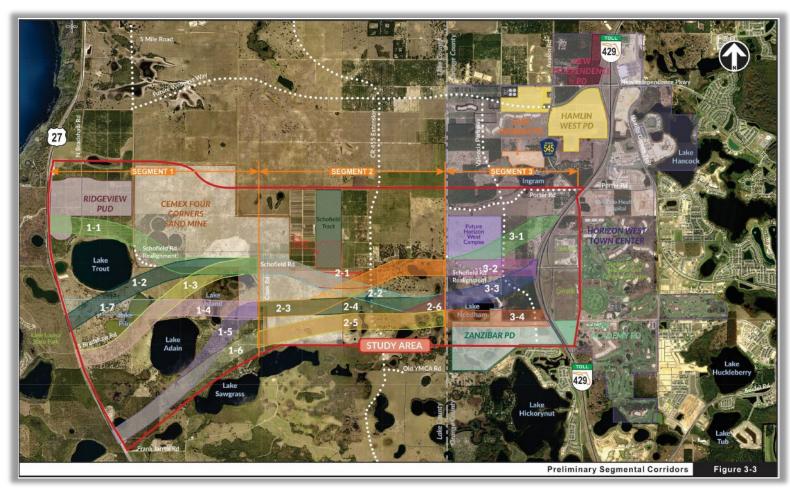

- The PD&E Study will determine if there is an engineering and environmentally feasible alternative to meet the project needs.
- Two main phases of this PD&E Study:
 - **1. Alternative Corridor Evaluation**

Identify roadway corridors to carry forward for additional analysis

2. Alternatives Analysis

Identify a preferred project alternative

Engineering Evaluation Criteria

Major Utility Conflicts Geometric Considerations Floodplain Encroachment Traffic Considerations

Socio-Economic Evaluation Criteria

Approved Planned Unit Developments Historical/Archaeological Resources Parks/Recreational Facilities Right-of-Way Impacts

Environmental Evaluation Criteria

Wetlands Wildlife and Habitat Conservation Lands/Mitigation Banks Contamination

UTHORITY

Stakeholder Outreach

- CEMEX
- FDOT
- Lake County
- Lake-Sumter MPO
- MetroPlan Orlando
- Orange County
- South Florida Water Management District
- Water Conserv II

Public Involvement

- Public involvement and interagency coordination have been an integral part of the assessment process
- First Public Meeting was held August 30, 2018.
- Opportunities for participation will continue to be provided throughout the duration of the study

EAG Input Received – July 30, 2018

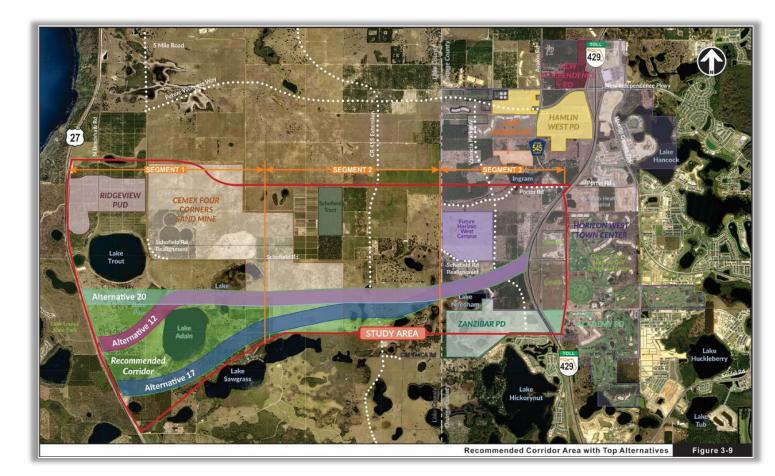

- There are significant environmental constraints, particularly around Schofield Road.
- Give consideration to the Lake Louisa State Park main entrance
 many visitors and R/Vs navigate the area.
- Get FDOT input regarding US 27.
- Segments 1-5 and 1-6 are preferred from a noise and light perspective.
- Explore other opportunities for stormwater Regional Sewer District.
- The project will obviously create more impervious area. A Water Conserv II partnership could reduce pondage.

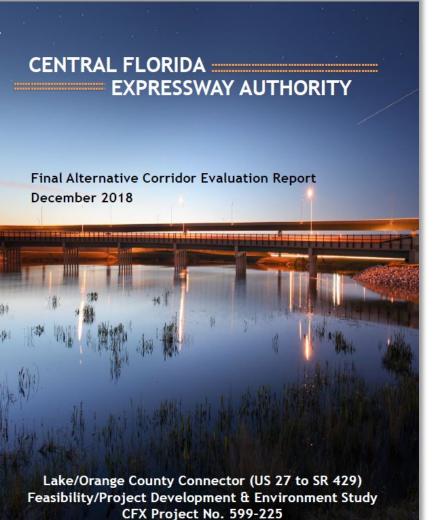

Evaluation Results

- Corridors 12, 17 and 20 ranked highest
- The recommended corridor encompasses the area that is bordered by Corridor 20 on the north and Corridor 17 on the south

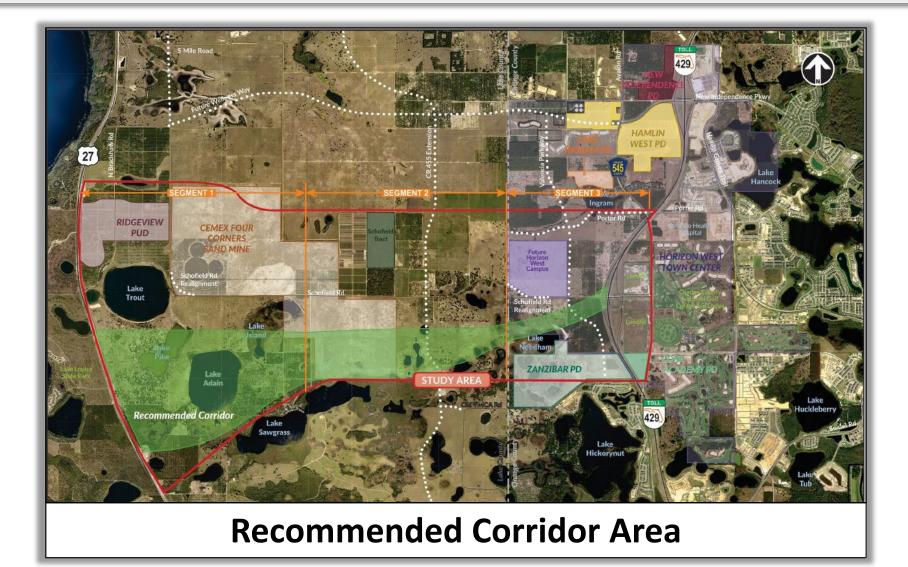

The methodological approach used to identify the recommended corridor area is documented in an Alternative Corridor Evaluation Report

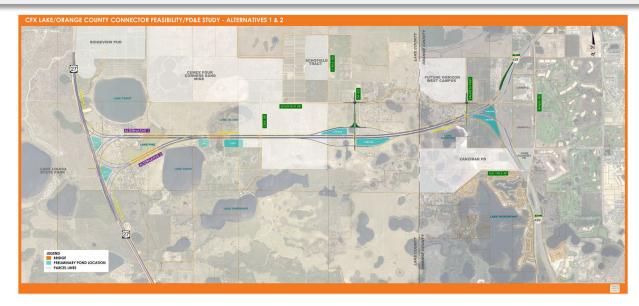

Alternatives Analysis

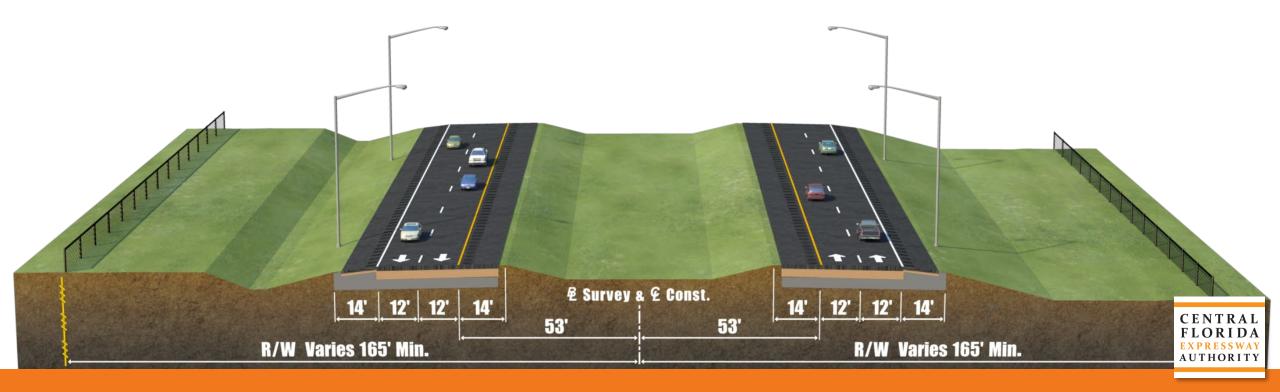

- Four Build Alternatives
- Proposed interchanges
 - o US 27
 - \circ CR 455 future extension
 - Future Valencia Parkway
 - SR 429 (systems interchange)
- No-Action or No-Build Alternative

Proposed Typical Section

- 330-foot wide right of way
- Allows for future widening to the inside

Alternatives Analysis

Comparative Evaluation Matrix

+ GENER/ O GENER - GENERAL	LEGEND *** SUBSTANTIALLY POSITIVE EFFECT OR BEST ALTERNATIVE 1.0 * GENERALLY POSITIVE EFFECT OR GOOD ALTERNATIVE 0.8 O GENERALLY NEFFECT OR INDERATE ALTERNATIVE 0.8 - GENERALLY NEGATIVE EFFECT OR INFERIOR ALTERNATIVE 0.4 GENERALLY NEGATIVE EFFECT OR WORST ALTERNATIVE 0.2			ALTERNATIVE EVALUATION							
IMPACT	ENGINEERING		ENVIRONMENTAL		ENTAL	SOCIO-ECONOMIC	PHYSICAL	COST			
ALTERNATIVES	FLOODPLAIN IMPACTS	UTILITY IMPACTS	CONSTRUCTABILITY ISSUES	WETLAND IMPACTS	FARMLAND IMPACTS (NRCS)	IMPACTS TO APPROVED DEVELOPMENTS (CEMEX MINE)	NOISE & AESTHETICS/VISUAL IMPACTS	CONSTRUCTION	RIGHT-OF-WAY	MITIGATION	
1	Approximately 67.1 acres of floodplain impacts	o Relatively minor o utility impacts anticipated mainly to overhead electrical distribution	Requires o realignment of US 27 at the interchange location. Relatively minor issues anticipated	Approximately 18.3 acres of impacts to wetlands	Approximately 291.1 acres of impacts to Farmland of Local Importance		Relatively minor noise or aesthetic impacts anticipated to Lake Louisa State Park or the cabins	Approximately c \$300M	Approximately 377 acres of total R/W required	o Approximately \$3.4M in mitigation costs for impacts to wetlands and gopher tortoise	
2	Approximately of 74.1 acres of floodplain impacts	o Relatively minor o utility impacts anticipated mainly to overhead electrical distribution	Requires o realignment of US 27 at the interchange location. Relatively minor issues anticipated	Approximately 23.7 of acres of impacts to wetlands	o Approximately 293.2 acres of impacts to Farmland of Local Importance	Impacts approximately 43 acres of the CEMEX mine and bisects the main Phase Two mining area	Relatively minor noise or aesthetic impacts anticipated to Lake Louisa State Park or the cabins	Approximately \$335M	Approximately 380 acres of total R/W required	o Approximately \$4.4M in mitigation costs for impacts to wetlands and gopher tortoise	
3	Approximately 115.3 acres of floodplain impacts	- Relatively minor or utility impacts anticipated mainly to overhead electrical distribution	Requires o realignment of US 27 at the interchange location. Relatively minor issues anticipated	Approximately 55.7 acres of impacts to wetlands	- Approximately o 224.7 acres of impacts to Farmland of Local Importance	Impacts approximately 33 + acres of the CEMEX mine. Less impacts as compared to Alternatives 1 and 2 to the Phase Two mining area since it skirts the southern edge	Relatively minor or no noise or aesthetic impacts anticipated to Lake Louisa State Park or the cabins	Approximately \$346M	Approximately 361 acres of total R/W required	o Approximately \$8.4M in mitigation costs for impacts to wetlands and gopher tortoise	
4	Approximately 109.2 acres of floodplain impacts	- Relatively minor or utility impacts anticipated mainly to overhead electrical distribution	Requires o realignment of US 27 at the interchange location. Relatively minor issues anticipated	Approximately 48.7 acres of impacts to wetlands	- Approximately o 231.7 acres of impacts to Farmland of Local Importance	Impacts approximately 33 + acres of the CEMEX mine. Less impacts as compared to Alternatives 1 and 2 to the Phase Two mining area since it skirts the southern edge	Relatively minor noise or aesthetic impacts anticipated to Lake Louisa State Park or the cabins	o Approximately - \$367M	Approximately 372 acres of total R/W required	o Approximately \$7.5M in mitigation costs for impacts to wetlands and gopher tortoise	

Alternatives Analysis

What's Next?

- Receive input on the project alternatives
- Select a recommended preferred alternative
- Conduct detailed engineering and environmental analysis
- Prepare engineering and environmental reports
