## INSTALLING YOUR E-PASS PORTABLE

- ▶ For best results, clean and dry your windshield before attaching.
- ▶ With the E-PASS logo upright, place your E-PASS Portable either behind or below your car's rearview mirror as illustrated in the diagram to the left. If your vehicle has a polarized windshield, please contact customer support prior to installation for information on proper placement.
- ▶ Press until suction cups hold firmly in place.
- ▶ For motorcycles, your E-PASS Portable can be carried in the saddle bag.
- ▶ If moving your E-PASS Portable to another vehicle, be sure to update your vehicle information on your E-PASS account.

*Note: E-PASS Xtra has double-lock tape, not suction cups. Also has a non-replaceable battery that will last up to 8 years.*

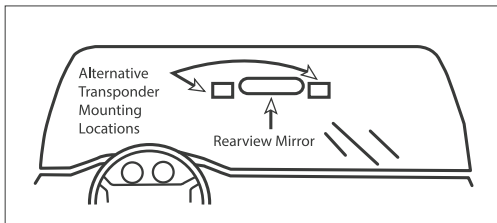

## INSTALLING YOUR E-PASS XTRA

- ▶ For best results, clean and dry your windshield before affixing the fastener strips.
- ▶ Keeping the two fastener pieces together, peel off the double-faced barrier on the outer fastener strip and press firmly onto the windshield at one of the mounting locations.
- ▶ Leave your E-PASS Xtra in place for at least 24 hours to allow the adhesive to cure.
- ▶ For motorcycles, your E-PASS Xtra can be carried in the saddle bag.
- ▶ If moving your E-PASS Xtra to another vehicle, be sure to update your vehicle information on your E-PASS account.

# Sticker Installation Guide

## INSTALLING YOUR E-PASS STICKER

To install your E-PASS sticker, affix the adhesive side to one of the transponder mounting locations on your windshield. The glass on your windshield will act as an antenna to electronically deduct tolls from your E-PASS account when you drive through a toll point. Please do not remove. Once removed, the E-PASS Sticker will no longer function and cannot be reattached to the windshield.

## Please note:

- ▶ The E-PASS sticker will only operate when affixed to glass windshields. The E-PASS sticker cannot be moved from car to car and cannot be hand-held.
- ▶ Installation on a motorcycle is prohibited. The Central Florida Expressway Authority will not be held liable for any damages associated with attempt to install on a motorcycle.
- ▶ If your vehicle has a polarized windshield, please contact E-PASS (407-823-7277 or 1-800-353-7277) prior to installation for information on proper placement.
- ▶ The E-PASS User Agreement constitutes a binding agreement between E-PASS and the customer. To view the entire User Agreement, please visit [www.CFXway.com/faqs/e-pass](http://www.CFXway.com/faqs/e-pass).

**PLEASE NOTE:**

Certain vehicles may be equipped with metal oxidized windshields which can inhibit your E-PASS transponder from being read. If your E-PASS transponder is not consistently being read by E-PASS toll lanes, contact the dealer where you purchased your vehicle to ask for proper transponder placement instructions for your windshield and contact E-PASS Customer Service Center for further assistance.
