 Subject: 417-246: CF&M Study for the SR 417 to Orlando Sanford Int'l Airport Connector - Public comment

Hey Shemir, For the comment database, please note Arturo Perez from Seminole County called me this afternoon in response to a public request forwarded to him for a resident at 2033 Palm Way. He wanted to know if there was a recommended alignment. I explained we have five alignments under consideration and will not select a recommended alignment as part of the CF&M Study. We discussed the study process and I encouraged him to have the public contact the study team directly at conceptstudies@CFXWay.com. He also asked if the Alignment 1 was through her property and I told him it was in close proximity (about 500 feet) from that address and the alignments were subject to change. I provided him with the date of public meeting and let him know invitations should be mailed this week to everyone in study area.

Thanks

Your response email got me thinking. And I won't bother you again. I do not clearly know the objective. But, between Airport Blvd and the area behind the hangers - between 29th and Mattie off Sanford Ave/Ronald Reagan - there may be some growing room if you guys are willing to purchase some older homes. People might want the money there anyway, again thank you for responding. Good luck with your planning.

 Mailing Address 2200 East Lake Mary Blvd City & State Sanford Zip
 Code 32773 Comment This Connector may be the MOST important
 proposed road in east Seminole County. The major traffic congestion at
 Ronald Reagan and Lake Mary Blvd is backing farther down each road
 everyday.

10/20/2022 8:47 AM

However this traffic is SECONDARY to the
 Business/Tourist/Economic/Airport potential this road will create and
 enhance for all residents and visitors to Seminole County, While being
 more environmentally sensitive than large scale proposed residential
 developments in the designated space.

CENTRAL FLORIDA EXPRESSWAY AUTHORITY

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. Ashley Ingham

6/20/2023 5:29 PM We understand that the reason to build this connector to decrease traffic to airport. However, this was the only option that was looked at? Why are we thinking about impacting the natural habitat of so many animals and protected species. We would also impact the flooding in the residential areas. What we should focus on is to create the width of Lake Mary Blvd. Ashley Ingham

6/20/2023 5:28 PM We can also build a above ramp on Lake Mary Blvd without impacting the animals, trees, farms and property values. Please stop this nonsense & don't kill planet Earth by building a highway no one needs just to make more money. What is the use of increasing the funding for airport? Please stop killing the animals and plants. Ashley Ingham

Comment
 I do not think this is a good approach since it is going through right behind people's houses. This would also impact an active eagles nest and cause additional noise & air pollution. This would also cause additional flooding in various neighborhoods. The better approach could be to extend the Lake Mary Blvd.

| 6/20/2023 | 5:58 PM | Doesn't this all assume that cars are the only mode of transportation? What about increasing connectivity and reducing congestion without construction, like expanding bus routes and talking about rail? | Ashley Ingham |

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023	5:57 PM	If the bottleneck is at the airport, won't road widening/expansion just spread the traffic out and not solve the problem?	Ashley Ingham
6/20/2023	5:56 PM	A review of 2022 existing conditions within the study area showed that travelers experience delays and long queues during peak periods at the SR 417 and Ronald Reagan Boulevard (CR 427)/Lake Mary Boulevard interchange. The adjacent intersections on Lake Mary Boulevard at CR 427 and Sanford Avenue also operate unacceptably and impact operations at the interchange.	Ashley Ingham
6/20/2023	5:55 PM	Congestion impacts are mainly at the SR 417 northbound off-ramp, and along Lake Mary Boulevard and CR 427 approaching and within the interchange footprint. If the connector is not built, unacceptable LOS F is anticipated in 2050 design year in the westbound direction on East Lake Mary Boulevard in the AM peak hour (worst case). The projected arterial peak hour demand would exceed capacity.	Ashley Ingham
6/20/2023	5:54 PM	This question is for my own curiosity - do the models and calculations used for to evaluate this project take into account other modes of transportation? Or just cars? I.e., cycling, taking the bus, rail	Ashley Ingham
6/20/2023	5:53 PM	Thank you for your question. We are trying to answer all questions during this virtual public meeting, but your inquiry requires a little research. We have your email address and we will email you an answer within one week. Again, thank you for your question and your participation in this virtual public meeting.	Ashley Ingham
6/20/2023	5:52 PM	Thanks for this presentation	Ashley Ingham
6/20/2023	5:50 PM	unacceptable LOS F is anticipated in 2050 Level of service F isn't a total failure if it's during peak hours, no? Won't the road be under utilized off-peak? By having it LOS F during peak hours, travelers would seek other means of transportation, like bus or rail. Expanding those might remedy this issue, instead of construction.	Ashley Ingham

Subject: Re: Express Connector into the Airport

Ashley Ingham

Good morning Ms. Armour,

No Preferred Alternative has been identified at this time as CFX just finished the Concept, Feasibility and Mobility (CF&) Study phase for this project. Right now, only refined initial alignments have been identified: https://www.cfxway.com/wp-content/uploads/2023/05/417-246_Refined-Initial-Alignments.pdf

9/17/2023 10:28 AM

The CFX Board approved proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. All four of the refined alignments identified in the CF&M study are being carried forward for further analysis in a PD&E Study along with the No Build Alternative. Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in the future PD&E Study.

Ashley Ingham

9/17/2023 10:27 AM

Attached is a copy of CFX's Project Development Process to visually see where we are in the process. The PD&E study may not begin until the end of the first quarter in 2024. Once the study begins, it can take 15 to 18 months for the study to be completed and the results presented to the CFX board.

Ashley Ingham

CFX's website will publish the most up-to-date information about this project as it develops: <https://www.cfxway.com/agency-information/plans-studies/project-studies/concept-studies-sr-417-to-orlando-sanford-international-airport-connector/>

Notes/History

Ashley Ingham,

Date Range - All Dates

8/8/2023 12:56 PM Public hearings are held during a PD&E Study after a recommended alternative is identified for public input. The Public information meeting was conducted in an open format to allow discussion with study team representatives on the range of alternatives being considered. Ashley Ingham

The presentation and displays from the Public Information Meeting held June 20, 2023 are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>.

8/8/2023 12:55 PM The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting. Ashley Ingham

If you have questions, please email us at ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>>. Again, thank you for your participation in the study.

Respectfully,

Ms. Shemir Wiles
Public Involvement Coordinator

CENTRAL FLORIDA EXPRESSWAY AUTHORITY

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. Ashley Ingham

6/20/2023 5:29 PM This meeting was useless. Where are Seminde County Commissioners? Where are the CFX Board members? The fact that Seminole County Commissioners asked CFX to conduct a feasibility study and then the CFX Board makes the decision is a HUGE Conflict of interest. Only 1 Sem Cty Commissioner on the CFX Board? This is irresponsible. We were told this comes down to how much revenue this toll road can produce. That dismisses the impacts to the residents. Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:28 PM

What about Social affects, Wetlands Flooding, historic elements, wildlife, peaceful enjoyment, peoples homes. The Sanford Airport does not need another way to get there. It's imposible of the board to even request this study. If the county commissioners truly want to better the traffic flow in the area, they should widen Lake Mary Blvd (That is not a CFX toll road issue). Almost everyone in this area uses Lake Mary Road. Some use it multiple times a day. That makes sense to widen a major East-West roadway. Comparatively and relatively, few people go to the Sanford Airport.

Ashley Ingham

6/20/2023 5:27 PM

Why wasn't this an open forum, open mic meeting? There was not a single person at this event who supports this project going forward. In fact, almost everyone said they will NOT vote for these members of the county commision ever again. The data used in this PowerPoint is OLD and outdated and inaccurate. How can any board make decisions with bad information? I'm building a home that is not even included in the data of the PowerPoint. Neither are several other new homes either under construction or recently completed. Not to mention there is a perfect adequate way to get form 417 to the airport. Saving a couple minutes is not worth the harm this project causes to the residents, property, wildlife, etc.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:59 PM

I virtually attended the public meeting held on Tuesday, June 19, 2023 regarding the proposed SR 417 to Orlando Sanford International Airport (SFB) Connector. I had a comment that I would like to add:

Ashley Ingham

Did the study consider the possibility of mitigating Lake Mary Blvd. traffic via use of adding public transportation options to SFB?

- Currently, there is no public transportation option existing within the study area, excluding paratransit via AccessLynx's extended service area (requiring eligible persons to pay a higher fare).
- The nearest Lynx bus routes are Route 46E, which originates at the Sanford SunRail station and serves SR 46/E 25th Street on the north side of airport property, and Route 34 along US 17/92 (see this area map from Lynx: https://www.golynx.com/resources/pdf/System-Map_APR-2023.pdf).

6/20/2023 5:58 PM

- Additionally, there is Route 45, which travels mostly down Lake Mary Blvd. (serving the Lake Mary SunRail station on the way) before terminating at the Seminole Centre shopping plaza on US 17/92.

Ashley Ingham

I would posit that adding public-transportation options connecting SFB to the rest of Central Florida's transit network would result in at least some reduction in traffic on Lake Mary Blvd., reducing the need for CFX to build this Connector. As an model of this, I would direct your attention to the South Florida Regional Transportation Authority (SFRTA) and their free Tri-Rail shuttle buses that serve both Fort Lauderdale-Hollywood International Airport (FLL) and Palm Beach International Airport (PBI) from nearby

6/20/2023 5:57 PM

Tri-Rail train stations; see https://media.tri-rail.com/connector?cmd=file&target=v1_XFNjaGVkdWxlc1xGTEwgQWlycG9ydCBTaHV0dGxlfJvdXRlIE1hcC5wZGY1&t=1685564710 and https://media.tri-rail.com/connector?cmd=file&target=v1_XFNjaGVkdWxlc1xDb21tdXRlciBDb25uZWNO0b3lgYW5kIFNodXR0bGUgUERGc1xjb21tdXRlciBjb25uZWNO0b3lgLSB3ZWJcV1BCMS1XZXN0LVBhbG0tQmVhY2gtMjAxNy5wZGY1&t=1558370335, respectively.

Ashley Ingham

417-SFB Connector, it's likely that at least some of the traffic expected to use the Connector would instead choose to take a public-transit option, if it were extant.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:56 PM

Alternatively or in addition, I would encourage CFX to ensure that public transit is included as part of the planning process for this Connector moving forward. Doing so could potentially serve to mitigate some of the expected environmental impacts from the proposed construction. In support of this point, I offer:

Ashley Ingham

- Tolls from the Dulles Toll Road in Virginia and airport funds were used to fund construction of the Washington Metro Silver line, connecting Washington Dulles International Airport to the Washington, D.C. metro area; see https://www.fhwa.dot.gov/ipd/project_profiles/va_dulles_corridor.aspx (noting that "\$1,511 million" of the funding came from the toll road, and another \$233 million from airport-authority funds).

6/20/2023 5:55 PM

- Applying this model to the proposed SR 417-SFB Connector, some of the toll funds generated by the proposed Connector could be used to fund public transit connections between SFB and the CFX service area.

Ashley Ingham

Thank you for your consideration of the above information!

Good Day:

I would like to some information regarding the CFX project on SR 417 to Orlando Sanford International Airport Connector Study. I would like to obtain the most current maps for the preferred alternative showing the current and proposed right-of-way lines for the project. I see that a Public Information Meeting is scheduled for June 20 in Sanford, FL. I understand that a preferred alternative may not be available until after the Public Meetings. I would like to get the information after an alternative is chosen. Thank you for your time on my request.

Notes/History

Ashley Ingham,

Date Range - All Dates

8/8/2023 1:08 PM

All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

Ashley Ingham

Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions. Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future Project Development and Environment (PD&E) Study.

8/8/2023 1:07 PM

During a PD&E Study, alternatives are further refined to avoid and minimize floodplain impacts. Coordination with local and environmental agencies will continue in any future PD&E Study to document regional efforts, as part of other studies, related to known flooding in this area.

Ashley Ingham

The presentation and displays from the Public Information Meeting held June 20, 2023 are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>.

8/8/2023 1:06 PM

The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting.

Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

- 6/20/2023 5:29 PM 1) Congestion is cause by 1000 houses built on East Lake Mary Blvd. Ashley Ingham
These folks come and go daily via 417 - Ronald Reagan, Sanford Ave, and Lake Mary Blvd. etc. Congestion is not the airport variable -- a factor but not the driver. Although proposal 1 appears the least invasive, that development is another "death knell" into preservation of rural living in Florida -- Semionle County.
- 6/20/2023 5:28 PM 2) Apparently and blatantly congestion from 417 onto Ronald Reagan is a quagmire of chaos. Safety is a daily threat. An answer must be sought. Ashley Ingham
None are simple, Yet I ask, "Has anyone considered a moratorium until roadways, infrastructure, presevation of native -- inclusive of parks and open spaces -- be restored? Have leaders ignore the already flooding issue into this region due to the onslought of asphalt and the demise of trees (My own house was like an island in the sea after the wrath of Ian). (Those 1000 houses are flooded

CENTRAL FLORIDA EXPRESSWAY AUTHORITY
- 6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. Ashley Ingham
- 6/20/2023 5:29 PM Option 1 takes over/out my families property on Sipes. The property holds our family, business & retirement. The damage to local families and business is out balancing the benefit to traffic alleviation. I believe there are options closer to connect Ronald Reagan Blvd to the airport by making a connection road or even making E lake Mary Blvd a 3 lane road would smooth out the traffic headed to the airport. Ashley Ingham
- 6/20/2023 5:28 PM The data showed to the public today (june 20th, 2023) is insufficient & poorly sighted with unimplemented/ unhelpful displays 4 projections given. The lives of 5 different families would be impacted and completely uprooted under option 1. That is only from 1 of the dozen of properties on my street along with destroying any development interest from E Lake Mary Blvd through Ronald Reagan. The benefit of future of my family, our business, and personal effects will need to be impacted along with multiple areas that this study underrepresents. Ashley Ingham

6/20/2023 5:29 PM Congestion has been caused by continued development without taking into consideration infrastructure. It is not caused by the airport. The traffic issue at the 417 exit onto Ronald Reagan is caused by local traffic. I live on projected route 1. We chose to live there due to the quiet, rural environment. I understand growth & development is inevitable. All land does not have to have concrete on it! Thank you! Ashley Ingham

Good afternoon Ms. Brown,

At this time, no preferred alignment has been chosen and no alignments have been dropped.

This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate the feasible alternatives in more detail and identify a Preferred Alternative.

Comment

Active Eagles nest observed that is not on the map being used for the 417/Sanford Airport study.

Location is at 2077 Palm Way, east side of the property. Route #1 being studied would interfere, since the nest is within 600 feet of the planned route.

Please update the maps being used so that planning takes this active nest into account.

Comment
Stop this project, please. I live in this community for four years. I fall in love with the natural beauty and full of wildlife surroundings here. If the airport connector is built, it will go through the backyard's our neighbor's houses and the residents will suffer from the noise and air pollution. The Airport connector construction will disrupt the wetland conservation area and wildlife will lose their habitats. The government should not take any action to destroy the harmonious lives here. Leaders of Seminole County, come here personally to see this beautiful area before your action destroys it!

Subject: Sanford Airport Connector Study

MS. Shemir Wiles:

I strongly oppose the project.

About three years ago in the year of 2020, my husband and I spent our whole life saving to build our dream retirement home on South Mellonville Ave. We love this area because of its remoteness, tranquility, wildlife, and nature surrounding.

4/24/2023 1:11 PM

Just as we have begun to settle in, the news of this project brought us a lot of anxiety and distress. Besides our personal situation, I would also like to reiterate the view of many others that this project will create damage to the environment.

Ashley Ingham

4/24/2023 1:10 PM

Last but not least, I would like to leave in the mind of those involved with this question:

How do we justify the suffering endured by those whose lives are affected by the construction of this connector road so that we can get to our next pleasure eight minutes faster?

Ashley Ingham

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions.

8/8/2023 11:51 AM

Ashley Ingham

Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future Project Development and Environment (PD&E) Study. During a PD&E Study, alternatives are further refined to avoid and minimize floodplain impacts. Coordination with local and environmental agencies will continue in any future PD&E Study to document regional efforts, as part of other studies, related to known flooding in this area.

The presentation and displays from the Public Information Meeting held June 20, 2023 are posted to the study's web page at

bit.ly/SR417AirportConnector
<<http://bit.ly/SR417AirportConnector>>.

8/8/2023 11:50 AM

Ashley Ingham

The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting.

If you have questions, please email us at ConceptStudies@cfxway.com
<<mailto:ConceptStudies@cfxway.com>>. Again, thank you for your participation in the study.

Respectfully,

Ms. Shemir Wiles

- 6/20/2023 5:29 PM I speak for myself and my family that we are completely against this Connector for many reasons, but first and foremost, the flooding to my not even 2 yr old home will have, we currently are still experiencing drainage issues talk up with our builder which is still being evaluated. Adding this connector in my backyard would not only add to the draining issues, but to take away the conservation that my wife and I purchased at an extra premium to have and enjoy the nature God created. Ashley Ingham
- 6/20/2023 5:28 PM I think this terrible planning on all levels, from the city, all the way up to federal level. Approving land for residential to only tear down new homes in a few years, to build a connector to an Airport that is subpar. Do not build this road as it will only cause more traffic to turn onto Lake Mary Blvd, rather than the Airport. Ashley Ingham

| 6/20/2023 | 5:29 PM | This is destroying our home values, destroying the conservation area with mutiple bald eagle nests and an extinct (or almost extinct) Caracara bird. The decision to put this highway in the proposed paths is ruining the livelihood of residents and wildlife. Why can't you extend the ramp down Santord Ave & have it curve around to Airport Blvd? It may cost you more \$ but its already roadways and industrial areas. This would be the most common sense alternative to destroying people and animals. I've already been told by a realtor that once the route goes in, my house value will decrease \$100-200k. | Ashley Ingham |

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:28 PM

Additionally, I bough in Kensington Reserve because I was told that no one could build on/thru the conservation areas. Finally, the Airport wants more funding thru a grant, so they need this expansion, but I've lived in Seminole County SANFORD for 17 yrs & each time the airport advertises they're been given a grant and it's going to open up to big airlines, it falls then. Every. Single. Time. But some how the airport is still geting the grant \$. So how is it different this time? You're ruining lives of humans and PROTECTED endangered species for nothing more than profit. SAD.

6/20/2023 5:29 PM Thanks for setting up this event & taking feedback from residents. I don't recommend to build this connector road since it is going to impact the natural habitats heavily. We are seeing animals killed crossing the roads & there is no place for the natural inhabitants and animals to grow. If we build morre road and specially the ones choring naturual habitants, ware we are killing the plants and animas living in these spaces. I also observed that impact can be on Bald eagle Nest which are already getting less populated due to nature impact. The connector will also increase the flood chances to community build amount if no that may cause heavily economical impact on the residents. Who will fund more house residents of this connector caused flood in their house.

 Subject: Sanford Intl. Airport Connector

Attn: Glenn Pressimone, P.E.,

I am a retired P.E., with experience in this field. I live about a mile from the airport. I am sure your team will find the most feasible route, but, unless there are significant increases in airlines and destinations added, I do not think current traffic would warrant this connector. We would welcome such a change, as we must use Orlando (MCO) for almost all our flights now. Your prior study likely addressed this, but I thought I should make this point, as a local resident.

Charles C. Corson, P.E. Retired, CT & RI

 I am thinking about moving to 1350 Corte Nueva, winter springs Florida. I noticed in a video that was sent to me of the house that a couple plains flew over and it was pretty noisy. is that area in a direct flight path to the Orlando sanford airport? Is there a document that provides the flight path that can be sent to me? please advise and thank you

Ashley Ingham

Good afternoon Ms. Diaz,

My name is Shemir Wiles and I am the public involvement coordinator for this study. I apologize if you've had a hard time trying to reach me. I checked our Concept Studies email and didn't find any previous emails from your email address and I didn't locate any phone messages.

I did share your email with the study team; however, the project manager is out until Monday so I probably won't have any information until next week. My guess is the level of coordination you're referencing will happen if the project proceeds to the Project Development & Environmental (PD&E) Study phase. But I will be sure to check and get back to you once I hear from the project manager.

Have a great rest of your day!

Ms. Shemir Wiles
Public Involvement Coordinator

Ashley Ingham

Good Afternoon,

I hope this emails finds you well and I am able to make contact with the pertinent personnel relevant to the above subject matter. Following the presentation that was provided to the BCC on May 23, 2023 I have made several attempts to make contact with the Public Involvement Coordinator with no success.

Notes/History

Ashley Ingham,

I would like to ensure that the Seminole County Fire Department will be involved throughout this process as we seek to achieve effective collaboration during this project thus ensuring compliance with the applicable NFPA 502 requirements (Standard for Road Tunnels, Bridges, and Other Limited Access Highways) and Operational considerations necessary to maintain effective response.

Ashley Ingham

Thank you for your time in this matter and I look forward to your response.

Sincerely,

Christina Diaz

Your response email got me thinking. And I won't bother you again. I do not clearly know the objective. But, between Airport Blvd and the area behind the hangers -

4/12/2023 9:44 PM

between 29th and Mattie off Sanford Ave/Ronald Reagan - there may be some growing room if you guys are willing to purchase some older homes. People might want the money there anyway, again thank you for responding. Good luck with your planning.

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Mr. Elker,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners.

8/8/2023 12:03 PM All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project. Ashley Ingham

The presentation and displays from the Public Information Meeting held June 20, 2023 are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>.

8/8/2023 12:02 PM The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting. Ashley Ingham

If you have questions, please email us at ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>>. Again, thank you for your participation in the study.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:29 PM My family and I oppose this project overall, but specifically #2, 3A and 3D. Ashley Ingham
 We chose to build in Kensington Reserve and moved in, in November 2021. Thinking with the Conservation Area behind us and the Lake next to it, this would be a calm and serene place to raise our family. We are able to watch the wildlife mornings and evenings behind us (Eagles, Deer, etc...). We also built the home with the knowledge of this area growing exponentially and what this would mean to the Value of our and home over a 5,10, 15 year period.

6/20/2023 5:28 PM NOW... this will immediately decrease our value, eliminate the serenity of our backyard and home with noise of traffic, not to mention the eyesore we will see as we step outside. Ashley Ingham
 Your Lack of care for your constituents due to money for the project, shows greed and you don't care. I've heard, "The few it impacts is offset by the good of the project for the overall" This is absolutely about greed and who cares about the people, the animals and environment!

Friday, September 15, 2023

Good Morning Ms Wiles,

According to the schedule for the 417/Airport Connector study the results were to be presented to the CFXway board by the end of August. Have the results been presented and, if so, I would like to know the results/recommendations of the study. As you know, our property is the largest parcel of land that will be impacted by two of the original proposed routes so you can understand our concern.

I look forward to hearing from you concerning this report. Thank you.

6/20/2023	5:30 PM	Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.	Ashley Ingham
-----------	---------	--	---------------

6/20/2023	5:29 PM	I am deeply concerned about this project even more seriously impacting drainage into the Lake Jesup Basin. Excessive development by the City of Sanford, and extension of the East Lake Mary Boulevard and subsequent development have already changed water flow into our area.	Ashley Ingham
-----------	---------	--	---------------

6/20/2023	5:28 PM	Seminole County is currently looking at drainage and this would further contribute to the increasing water levels we experience during hurricanes and other weather events. Has this study fully evaluated this? Regardless of the path selected, and I'm convinced \$ talks and this will be improved, Palm Hammock and access to the trails from Oakway will be negatively impacted and the new roadway will negatively impact water flow and area drainage.	Ashley Ingham

Subject: Proposed 417 loop

Good morning can you please add me to your list for updates for the proposed addition for the Loop off 417 to Sanford Airport. I am uncertain if we were sent a letter as my 2 next door neighbors were sent one. My address is 687 Oakway, Sanford FL can this be confirmed if we were sent one but never received?

Thank you
Judy and Jeffery Fields

Date Range - All Dates

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. Ashley Ingham

6/20/2023 5:29 PM After reviewing the 4 alternatives in relation with my home location and increased traffic exiting at SR 427 off of SR 417, I am convinced Alternative 3A is preferred. This would allow traffic to exit directly to Lake Mary Blvd and provide the least disruption to neighboring properties. Most of traffic exiting SR 427 at 5pm is traveling to Deltona/Osteen neighborhoods at SR 415. East Lake Mary Blvd has 1000 additional homesites being designed and will further impact the traffic counts. I vote for 3A. And as soon as possible. Ashley Ingham

I am a resident of Kensington Reserve subdivision. What I gather from the 417 connector study is that it adds very little benefit to the traffic flow - if anything it will create more carbon footprint. The natural bodies in its way will be demolished. Progress for the sake of progress like this should be immediately stopped.

Good afternoon Mr. Gorenflo,

No Preferred Alternative has been identified at this time as we are in the Concept, Feasibility and Mobility (CF&M) Study phase. Right now, we only have refined initial alignments: https://www.cfxway.com/wp-content/uploads/2023/05/417-246_Refined-Initial-Alignments.pdf

If the CF&M Study finds that alignments are feasible, the CFX Governing Board could approve proceeding to a Project Development and Environment (PD&E) Study to refine and evaluate alternative alignments and identify the Preferred Alternative. After the PD&E phase is the Design phase.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/19/2023 4:09 PM

During design, CFX begins the right of way acquisition process for the property needed to build the improvements and works with regulatory agencies on the permitting process. The design project - if approved - would then move to construction.

Ashley Ingham

If this study is approved and moves along without any delays, the connector could be built in about six years.

Below is a chart that shows where we are right now in the project development process.

Good morning Mr. Gruby,

We have a public meeting, not a public hearing, that is tentatively scheduled for some time in June. Those on our contact list will receive an email when the date, time and location are confirmed. There will also be a virtual public meeting held on the same day as the in-person meeting.

Notes/History

Ashley Ingham,

Date Range - All Dates

5/5/2023 9:33 AM

The in-person meeting will be held in an open-house format and community members may come at any point during the meeting time to view the exhibits, ask questions and provide comments to study team representatives. A continuous, pre-recorded audiovisual presentation providing an overview of the study will be available for viewing throughout the meeting. Attendees of the virtual meeting will view the same presentation and be able to ask questions and submit comments regarding the study through online chat with study team representatives.

There will be no formal Q&A session at the public meeting and no formal presentation.

Subject: Re: CR417 extension to Sanford Airport

Good morning Mr. Gruby,

Your contact information has been added to the project database.

This study is a Concept, Feasibility, and Mobility study, which does not contemplate right-of-way acquisition. However, property owners near a proposed transportation project often want to know an agency's process for buying needed private property. [Click here <https://www.cfxway.com/wp-content/uploads/2018/11/2017-Property-Acquisition-Disposition-Permitting-Manual-.pdf>](https://www.cfxway.com/wp-content/uploads/2018/11/2017-Property-Acquisition-Disposition-Permitting-Manual-.pdf) for the Central Florida Expressway Authority's policy on right-of-way acquisition.

4/5/2023 8:53 AM

As for any maps that are available, please feel to review the PAG and EAG documents at the bottom of the study's webpage:
<https://www.cfxway.com/agency-information/plans-studies/project-studies/concept-studies-sr-417-to-orlando-sanford-international-airport-connector/#1675368124610-1cb387ee-c841>

Record Manager

Good afternoon Ms. Gupta,

Thank you for your interest in and comments regarding the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility Study (CF&M) Study.

3/16/2023 3:05 PM

The study team is in the process of refining the initial alternatives and is still evaluating which alternatives are feasible from an engineering and traffic operations perspective. As part of the alternative development process, we are also evaluating avoidance and minimization of environmental resources as well as economic contributors in the area.

Notes/History

Ashley Ingham,

Date Range - All Dates

3/16/2023 3:04 PM The initial alternatives are being refined based on agency and stakeholder input, and to minimize impacts. Any feasible alternatives will be presented at the public meeting, which we anticipate holding in June of this year. Ashley Ingham

3/16/2023 3:03 PM This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. Ashley Ingham

3/16/2023 3:02 PM At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate the feasible alternatives in more detail and identify a Preferred Alternative. Ashley Ingham

3/15/2023 3:01 PM More information about this study can be found on the study webpage: <http://Bit.ly/SR417AirportConnector> Ashley Ingham
<<http://bit.ly/SR417AirportConnector>>

If you would like to receive updates regarding this study, please email ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>> and request to be added to the study database.

Subject: 417 Expansion Project

Good morning,

I am a Sanford resident in the neighborhood of Kensington Reserve and I am writing with concerns regarding the proposed 417 expansion to SFB. Although I obviously have self interest in opposition to this expansion, my main concern is the detrimental environmental impact of this project. All proposed routes for the 417 expansion would lead to the destruction of the last remaining wetlands in our area.

Notes/History

Ashley Ingham,

Date Range - All Dates

- 3/15/2023 11:52 AM First, these wetlands are home to a plethora of natural, indigenous species, including the protected Bald Eagles. There are a minimum of 2 eagles that live in these wetlands that have active nests. Our community members have taken many gorgeous photos of them, and they can be seen daily.
- 3/15/2023 11:51 AM Secondly, Urban Heat Island Effect is exacerbated when natural lands are cleared, which can increase extreme temperatures in our area. With the global heat index already climbing, clearing this land would only serve to compound this issue.
- 3/15/2023 11:50 AM Third, noise, air, and light pollution in the area would increase exponentially. I don't believe I even need to expand upon why this pollution is concerning, but in addition to environmental impacts, these pollutants can also contribute to poorer mental health and increased risk of heart attacks for those living nearby. Ashley Ingham
- 3/15/2023 11:49 AM Fourth, this conservation area is located on the St. John's River Floodplain, as are our houses. The conservation area now accumulates much of the runoff, but with little to no conservation area left with the land cleared, inclement weather (such as both hurricanes we just had last year, as well as natural Florida summer thunders storms) can cause severe flooding risks to homeowners when excessive rainfall and standing water has no where to go but into our houses. Not to mention the retention of this water on land you intend to build an entire highway on, begging the question of the structural integrity. Ashley Ingham
- 3/15/2023 11:48 AM It is my belief that concerns about traffic congestion at Ronald Reagan/ E. Lake Mary Blvd. will not be mitigated by this expansion. The congestion is due to a design flaw with that off ramp exit. If this expansion is an attempt to curtail the traffic at that off ramp, it will likely not help as much as properly fixing that exit. Ashley Ingham
- 3/15/2023 11:47 AM It is only a 4 minute drive once off of 417 to the SFB entrance. The financial and environmental impact of this project is not worth that miniscule of a difference in travel time. I understand another lane is being added to the off ramp currently, but that will not be enough. If you want to minimize traffic build up onto 417 at the RR/LM Blvd. exit, I believe extending that exit ramp to begin at the toll plaza would greatly help more than a new exit leading directly to SFB. Ashley Ingham

Sincerely,
 Kasey Gupta

CENTRAL FLORIDA EXPRESSWAY AUTHORITY

6/21/2023 5:29 PM Hello. I am Bob Harmon, and I am a resident of the Kensington Reserve neighborhood in Sanford, Florida. I appreciate speaking to CFX representatives at the public meeting 6/20/23 regarding the proposed SR417 connector to Orlando Sanford International Airport (OSIA). I was asked by a representative to send a picture of the eaglet (which subsequently fledged, indicating an active, successful eagle nest) in the eagle nest SE026 which is in the Kensington Reserve conservation area as well as a picture of the caracara that has been present in the Kensington Reserve neighborhood; I have attached these photographs with this email. Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

6/21/2023	5:28 PM	<p>As discussed with CFX representatives at the above meeting, I am opposed to the proposed connector as I believe it is not wanted and not needed:</p> <p>-Seminole County has historically supported the idea of bringing nature and people together; I am concerned that the construction of and subsequent traffic on the connector would significantly interfere with wildlife designated as threatened by the federal government (caracara) and state government (sandhill cranes, wood stork, tricolored heron) that come to the Kensington Reserve neighborhood, as well as the active eagle nest SE026, by most of the proposed connector routes.</p>	Ashley Ingham
6/21/2023	5:27 PM	<p>-Even though it is suggested the connector would go over Lake Mary Blvd into the airport, it would be expected that many local residents would simply do a u-turn back onto Lake Mary Blvd, creating more cross-traffic at an area of the road that has seen increased school bus traffic and accidents significant enough to require the placement of additional traffic lights.</p> <p>-The airport has been receiving federal grant monies from the FAA and from COVID-relief funds without a direct expressway connection; therefore, such a connection is not required for the airport's grant-seeking efforts.</p>	Ashley Ingham
6/21/2023	5:26 PM	<p>-There already exists straight access to the airport entrance via exit 50 on SR417 to Airport BLVD across 17/92, with apparent room for expansion of Airport BLVD through use of the apparent available easement. In addition, there is an incomplete connection with SR417 directly with Airport BLVD that could be completed, allowing direct access to the airport from both the north and south, not just the south as the proposed connector would allow. Personal observations suggest area population growth to be occurring mainly to the north/east of the airport. The Amazon center MCO2 is also to the north in Orange City. It is also felt, in discussion with local residents, that individuals to the south who desired an airport would, more likely than not, choose Orlando International Airport.</p>	Ashley Ingham
6/21/2023	5:25 PM	<p>-As online information suggests people come to Florida primarily for the beaches, Miami, and Orlando, the airport might be better served by combining rail and/or electric bus services to Orlando than by the connector. Allegiant Air and Flair Airlines serve many airports that are not major hubs; travelers from these smaller airports could avoid the hassle of connecting flights by flying directly to OSIA and then, via expanded rail/electric bus service, travel to Orlando or the beaches at Daytona or New Smyrna.</p> <p>Thank you for allowing me to share my thoughts about the proposed connector project. Bob Harmon</p>	Ashley Ingham

Notes/History

- | | | | |
|-----------|---------|--|---------------|
| 6/21/2023 | 5:24 PM | In addition, the concern has been raised about \$100,000 to \$200,000 range losses of property values in the region of the connector based on real estate agent information. This would obviously lead to reduced property tax revenues for Seminole County. An additional concern is that this loss of property value would occur even before the connector approval might be finalized, as the possibility that the connector might be built, in and of itself, would lower the area's property values due to this possibility having to be disclosed to potential buyers. | Ashley Ingham |
| | | Thank you again for allowing me to share these thoughts about the proposed connector project. | |
| 6/20/2023 | 5:30 PM | Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. | Ashley Ingham |
| 6/20/2023 | 5:26 PM | Hello. I am Bob Harmon, and I am a resident of the Kensington Reserve neighborhood in Sanford, Florida. I wish to share two additional issues that lead me to oppose the proposed connector between SR417 to Orlando Sanford International Airport. | Ashley Ingham |
| | | In discussions with residents in the area of the proposed SR417 connector to Orlando Sanford International Airport routes, there have been significant concerns raised about potential flooding and water flow damage issues caused by the construction of, and continued presence of, the connector from the changing weather patterns that would not be sufficiently addressed by water control efforts presented by CFX representatives at the public meeting on 6/20/23. | |

Subject: Input for May 17, 2023 meeting regarding proposed SR417 connector

Dear Shamir Wiles, Public Involvement Coordinator,

My name is Bob Harmon, and I am a resident of Seminole County in the Kensington Reserve housing development. I am writing you to share my thoughts as to the need for an additional connection from SR417 to the Orlando Sanford International Airport. It appears that using/ expanding SR417 exit 50 to 17/92 that goes directly into E Airport Blvd, which itself could be expanded, appears to be an excellent way to get to/from the airport with opportunities to

Notes/History

Ashley Ingham,

Date Range - All Dates

4/26/2023 4:43 PM

handle increased traffic over time without infringing on existing conservation areas or established neighborhoods. Also, the existing SR417 exit 49 goes onto N Ronald Reagan Blvd which continues as Sanford Ave directly to E Airport Blvd; these also could be expanded if need might arise over time. It does not appear to me that these options utilizing already existing exits and roadways have been adequately investigated.

Thank you very much for allowing me to offer my input.
Yours truly,
Bob Harmon

Comment
 Ladies and Gentlemen,

6/3/2023 3:33 PM The SR 417 airport exit is currently approximately 2 mi from the Sanford Airport. It seems a little bit redundant to put in another exit since there is already a close proximity exit from 417 at Lake Mary to the Airport. Still, there are two positive considerations: Ashley Ingham

6/3/2023 3:32 PM 1. If the county buys up enough right-of-way in this area, it could prevent some of the unmitigated growth that we are currently experiencing in this county. The traffic on our roads, in many instances, already takes 2-3 light cycles to get through an intersection.* Ashley Ingham

6/3/2023 3:31 PM 2. If the feasibility study shows that a 2 mi connector will reduce traffic, then it would be a positive outcome. The county is currently installing 4 new stoplights on Lake Mary Boulevard at the Airport. This road will not be able to be utilized by residents as a thruway anymore after the lights are in use. So many added lights will negate the route's efficiency. Ashley Ingham

6/3/2023 3:30 PM On any given day, the unlucky residents who catch every red light will be 20 minutes behind as traffic will back up such that a resident will not be able to get through a light in less than 2-3 cycles.* So a reduction of traffic would be positive. Ashley Ingham

*during peak times in Oviedo like 426/Dean, 426/Chapman, 426/Red Bug.

Thank you

Ashley Ingham

6/20/2023 5:29 PM I think dedicated speakers at each station board would have been easier. I heard the interchange proposed at the existing SR417 would only have traffic from the connector going southbound and from SR 417 to the connector going northbound. I prefer this to a full NB/SB interchange at SR 417. Less ramps and incursions to the west of the existing SR 417 the better. It sounds like you have all your wetlands impacts and listed species impact adequately identified and considered.

Dear Mr. Shemir Wiles,
 Relating to your Airport access improvement that you are contemplating, I notice that the entrance to the highway is very close to my property. And as a matter of fact, I own a 134.65-acre piece of land possibly as much as 175 acres according to an old survey, nearby that could greatly enhance your project. Please check it out and let me know.

 Ashley Ingham

Good morning Ms. Holt,

Thank you for your inquiry. The SR 417 Seminole Expressway Airport Connector has concluded its Concept, Feasibility, and Mobility (CF&M) Study phase and the CFX Board approved proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative.

A video of the August 10, 2023 CFX board meeting can be accessed here: <https://www.cfxway.com/board-meeting-videos/>

Good afternoon,

Thank you so much for your interest in CFX s State Road 417 (Seminole Expressway) to Orlando Sanford International Airport Connector Study.

At this time, we do not have a preferred alignment; we only have potential alignments that are being evaluated for feasibility. Those alignments were presented in January 2023 to this project s first Environmental Advisory Group and Project Advisory Group meetings, and that presentation can be found [here <https://www.cfxway.com/wp-content/uploads/2023/02/417-246_EAG1_Presentation-Final_01-24-2023.pdf>](https://www.cfxway.com/wp-content/uploads/2023/02/417-246_EAG1_Presentation-Final_01-24-2023.pdf).

Ashley Ingham,

Date Range - All Dates

6/21/2023	1:42 PM	<p>From: Katherine Hunter <info@cfxway.com> Sent: Wednesday, June 21, 2023 1:42 PM To: conceptstudies <conceptstudies@CFXWay.com> Subject: Concept Studies Comment Form Submission</p> <p>Full Name Katherine Hunter</p> <p>Email hunter.kj@gmail.com</p> <p>Mailing Address 3730 Kentucky St City & State Sanford, FL Zip Code 32773</p> <p>Comment</p>	Ashley Ingham
6/21/2023	1:41 PM	<p>After attending the information meeting last evening at Millenium M.S., it appears the only thing the connector will do is move a traffic issue from one area to another. Lake Mary Blvd is not currently able to handle the amount of traffic it carries. To take the traffic from the 417 and exit it onto Lake Mary Blvd is doing nothing more than moving it from exiting at Ronald Reagan Blvd. The majority of the traffic is traveling to and from CR415 to the 417.</p>	Ashley Ingham
6/21/2023	1:40 PM	<p>It also sounded to me, than you're basing your decisions on a study that was done 20 years ago. A LOT has changed in this area in 20 years. We absolutely disagree with the proposed option 1 of exiting by Sipes Ave. This area has already had more than it's share of development that the roads cannot handle, as evidenced by the number of new traffic lights installed within a mile and a half of each other. In addition, the building of Galileo School on Skyway and Kentucky has created a tremendous increase of traffic in this area.</p>	Ashley Ingham
6/21/2023	1:39 PM	<p>There should be a consideration of exiting onto Airport Blvd and heading directly into the airport. There is currently a exit from the 417 onto Airport Blvd. If this connection is actually to be a connection to the Orlando Sanford Airport, it only makes sense to use a road named "Airport Boulevard" that runs directly into the airport.</p>	Ashley Ingham
6/21/2023	1:38 PM	<p>Any exiting traffic, not going to the airport, can also go north onto Sanford Ave and east on to SR46 (which has recently been widened) to connect to CR415.</p> <p>Overall, this whole project does not appear to relieve any of the current traffic problems in this area which need to be a priority, but will only add to the problem.</p>	Ashley Ingham

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Mr. Ibison,
Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX). We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023 2:48 PM Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions. Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future PD&E Study. During a PD&E Study, alternatives are further refined to avoid and minimize floodplain impacts. Coordination with local and environmental agencies will continue in any future PD&E Study to document regional efforts, as part of other studies, related to known flooding in this area. Ashley Ingham

8/8/2023 2:47 PM The presentation and displays from the Public Information Meeting held June 20, 2023, are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>. The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting. Ashley Ingham

This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate the feasible alternatives in more detail and identify a Preferred Alternative.

More information about this study can be found on the study webpage:

<http://Bit.ly/SR417AirportConnector>
<<http://bit.ly/SR417AirportConnector>>

If you would like to receive updates regarding this study, please email ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>> and request to be added to the study database.

Subject: Re: SR417 to Sanford Airport

Good afternoon Mr. Ibison,

Thank you for your interest in and comments regarding the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility Study (CF&M) Study.

The study team is in the process of refining the initial alternatives and is still evaluating which alternatives are feasible from an engineering and traffic operations perspective. As part of the alternative development process, we are also evaluating avoidance and minimization of environmental resources as well as economic contributors in the area. The initial alternatives are being refined based on agency and stakeholder input, and to minimize impacts. Any feasible alternatives will be presented at the public meeting, which we anticipate holding in June of this year.

Good evening,

I would like more information on this. This will tank our home values before it even starts. They have had since 2007 to do something with it and you waited for 400 homes to be built and now CFX want to expand it? I can assure you both subdivisions will not be in favor of this. Kennsington Reserve value will get hit the hardest. You can expect a large community push back on this. So running it though a bald eagle nesting grounds will not help either.

Please forward the point of contact to me and I thank you for your time.

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.

6/20/2023 5:29 PM The airport does not affect traffic at all. Future growth will still not affect it enough to warrant this. This will only move the traffic volume from Volusia and 46A to a different spot which alleviates nothing. This will also cause flooding to homes that already have this issue. It will add noise and displace federally protected wildlife. The cost is not realistic. It will be closer to \$200m

- 6/20/2023 5:29 PM Expressway authority is trying to put an elevated highway in my backyard. It is extremely un-nerving to think what effect that would have on my family's lives. I have little kids that are scared by the traffic and they will be hearing ours zooming in the backyard. Why would they authorize residential property when they were already planning for a highway in that zone? Who would compensate for the devaluation and financial loss to my family? Option #3 is extremely unacceptable and is putting my entire life in danger. Please stop this madness! Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:29 PM There is not sufficient amount of credible data to support the need for an additional exit for the sanford airport. There is not enough people coming through yearly to drastically impact the traffic patterns. Instead of putting a new exit in, widen existing roads before displacing residents. Several of the proposed plans do not have the utility infrastructure to tap into nor support a new road. I am against this proposed project. Ashley Ingham

Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.

Ashley Ingham

6/20/2023 5:59 PM

My Family is against. This is not even a fair fight. Option 1 is intended to go right through our property as well as others that are not part of a massive development. Those entities have deep pockets and not emotional investment in the property.

Ashley Ingham

6/20/2023 5:58 PM

Not only is there a business on our property, where goats, peacocks, and bees also are thriving. the land was intended to be our family property for years to come. Don't destroy the lives of Sanford locals invested in the community in order to make way for tourists to take their money to Disney.

There is not an issue with the airport traffic. We go through the airport regularly to avoid lake mary Blvd. because the traffic from all of the new developments around the airport have created traffic nightmare. The issue with the traffic around the airport will not be solved by tearing down houses and ruining peoples' lives to get people from 417 to the airport. There isn't even enough airline carriers at the SFB airport to support a massive increase in the traffic to the airport. Don't destroy our lives by trying to fix an issue that doesn't exist.

You have been given people conflicting answers. With the build up of residential areas and homes the flooding is a major concern for everyone. Overall this study has been going for a long time. Only more homes will be built causing increased cost. This should have been done years ago if it is really needed. Reality is this is not needed and fixing Sanford Blvd & Lake Mary Blvd. will do the same thing. No plan is of real use now or in the future.

Comment I wanted to reach out about my opposition to the SR 417 extension to the Orlando Sanford Airport. We have recently bought a brand new house right near the proposed tracks of the extension. This is our first house my new wife and I have bought, if this road is built it will be detrimental to our property.

7/26/2023 8:42 PM

Safety being number one this connection would put the hundreds of homes in jeopardy of safety, it would also depreciate hundreds of houses values, cause more traffic congestion, and damage the environment around the Lake Jessup environmental area. This connector is a huge concern for me. I have grown up in the Oviedo/Sanford area and I don't think this new road will benefit anyone. I believe there is alternatives to this than just sticking a road between neighborhoods. Thank you for your time!

Notes/History

Ashley Ingham,

Date Range - All Dates

3/17/2023 8:24 PM

If you look at the options other than 1, in Kensington Reserve, the homes on the Western edge of the subdivision will be immediately affected, particularly those on Swinstead, Clipstone, and Crawley Down Loop. These homes will have the extension almost directly in their backyards. These are all homeowners who purchased their home in the past few years to be part of Sanford and Seminole County and invested further to enjoy the natural lands that we felt were protected.

Further, if you look at the impacts on the the plat for the DR Horton subdivision, you'll see dozens of homes in the same situation.

3/17/2023 8:23 PM

I do not know how far they are into trying to sell those homes, but it will no doubt be more challenging in this situation and have the effect of taking money directly out of the developer's pockets - not to mention the effects on future residents who may be surprised by this news after purchase much like I was.

Ashley Ingham

I urge the project team to prioritize the avoidance of impacts on residents and wetlands and protected areas and help encourage the Expressway and County and other agencies to keep the commitment that was made in designating these conservation areas, and find that none of these options are feasible or desirable due to the inability to avoid impacts on hundreds of residents and the environment. Surely there are alternatives involving parallel facilities to Lake Mary Blvd that utilize nonresidential and vacant properties that will not have the impact of ruining the quality of life of residents that invested in Sanford/Seminole County.

3/17/2023 8:22 PM

I live in Kensington Reserve and would like to express my opposition to all of the routes presently shown, and any route that involves the destruction or degradation of protected wetlands and conservation areas. I'd like to first state that I understand this study is a necessary preliminary step and that the scope has dictated that a certain area be studied, and I understand the project team is doing the work they have been tasked to do. However, I do not believe given the limitations of the study area that any of the options available have benefits that outweigh the impacts on residents and the environment that a connector through this study area would cause.

Notes/History

Ashley Ingham,

Date Range - All Dates

3/17/2023 8:21 PM

I am one of the residents who will be most directly affected by all of the alignments except 1. I purchased my home at a premium because of the conservation area to the rear of the property. This area is shared by our subdivision and the DR Horton subdivision with a SJRWMD easement. Obviously my expectation was that the conservation easement meant these lands would be protected, and I'm sure the dozens of homeowners whose homes that will back up to the new elevated highway in this proposal felt the same. You've no doubt heard of the eagles, wildlife, and plant life in this area so I won't belabor that point, but you can imagine how important the conservation area is to the residents who bought in this subdivision for exactly that reason.

Subject: Two questions about CFX 417 Connector Study

Good morning,

I have two questions regarding the CFX 417 Connector Study.

1. Why is SR417 Exit 50 not being considered as part of the study area?

5/23/2023 10:17 AM The distance of the current alignments/route options, connecting 417 to the airport entrance at Red Cleveland is approximately 1.56 miles. The distance from the area of 417 closest to exit 50 at the West side of the airport, connecting to E. Airport Blvd. entrance, is 0.65 mile. There is already a direct road here and already an exit here. Ashley Ingham

If the goal is to increase direct access to the airport, why is this--the most direct point of access--not being considered? I've attached a screenshot of the study area map indicating where this route is located as well as a Google Map PDF I created to further demonstrate this unexplored alignment.

5/23/2023 10:16 AM Ashley Ingham

5/23/2023 10:15 AM 2. I just found out this morning that this CFX 417 Connector Study was on the agenda for the Seminole County Board of County Commissioners meeting. Why was this presentation not included in the study timeline, and why were we not notified of this presentation? Ashley Ingham

Thank you,
Chelsea LeNoble

Subject: Re: SR 417 to Orlando Sanford International Airport Connector CF&M Study

Dear Ms. LeNoble,

Thank you for reviewing the study materials and providing feedback. The eagle nest shown as inactive or unknown was based on Audubon Eagle Watch reports (2022). After review with CFX's Environmental Advisory Group and discussions with Audubon Florida representatives, they have also noted that eagles are present in the immediate area. We are coordinating with Audubon Florida and environmental scientists to confirm the exact nest location and update the study information.

3/17/2023 10:41 AM

The analysis of potential impacts to species for each of the different alternatives is currently being analyzed and we do not yet have those results. However, information on the natural environment will be included in the study's Concept, Feasibility, and Mobility Report and available at the public meeting.

Ashley Ingham

We appreciate your involvement in the study, and you will be notified when the public meeting is scheduled.

Thank you,

Ms. Shemir Wiles
Public Involvement Coordinator

Subject: Re: SR 417 to Orlando Sanford International Airport Connector CF&M Study

Thank you so much, Ms. Wiles. Please do let me know when the dates are set and how to attend.

I do have one other question at this point. I have reviewed the PowerPoint posted to the study website, and it mentions potential impacted plant and animal species.

3/16/2023 4:35 PM

Would you please send me a copy of the report that indicates what specific species would be impacted? It's a bit unclear from that one slide alone. Do the different alignments impact those species differently?

Ashley Ingham

Finally, there is an eagle's nest that is listed as inactive/unknown; however, this nest is very active. Our neighbors have footage of the eagles and we see them frequenting the area just about daily. Will you please let me know how we can have that status corrected?

Thanks again,
Chelsea

Comment

Ashley Ingham

As a resident of the Sanford area, I am deeply concerned about the proposed connector project between SR 417 and the Sanford airport. The project would bring significant disruption and inconvenience to the daily lives of many residents in the area, including increased traffic congestion, noise pollution, and decreased air quality. Furthermore, the project could have serious negative impacts on the natural environment and wildlife in the area, which is a treasure that we must protect and preserve for future generations.

Notes/History

Ashley Ingham,

Date Range - All Dates

3/15/2023 5:43 PM

As someone who cares deeply about the health and well-being of my community, I urge the Central Florida Expressway Authority to consider the full impact of this project on the residents and the environment in the area and to prioritize alternative solutions that are more sustainable and responsible. Thank you for your attention to this important matter.

Comment
 I personally think this is a boondoggle project, just to spend money. It will disrupt a lot of people & businesses that have been in that area for a long time. Also it is within or very close to a sensitive area of nature. It will have an effect on the drainage from that area into Lake Jessup, which is already in danger of becoming polluted. It is not that far from 417 to the airport & the negative impact this project will have on this area is not worth the few miles & minutes it will supposedly save commuters.

Good afternoon Mr. Loose,
 Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX). We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

Notes/History

Ashley Ingham,

Date Range - All Dates

8/8/2023 1:41 PM

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative.

Ashley Ingham

8/8/2023 1:40 PM

If the project is determined to be viable and a future PD&E Study is planned, all four of the refined alignments identified in the CF&M study will be carried forward for further analysis in a PD&E Study along with the No Build Alternative. Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in any future PD&E Study.

Ashley Ingham

8/8/2023 1:39 PM

The presentation and displays from the Public Information Meeting held June 20, 2023, are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>. Ashley Ingham

6/20/2023 5:29 PM

My thoughts are to ax the Lake Mary Blvd and the airport blvd exits to allow for better traffic flow. Im sure your concern is toll money so these options aren't viable. Maybe you could do an elevated road over the existing roads to capture toll money this way there would be minamal impact of residential areas.

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Mr. Marone,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023

3:07 PM

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. If the project is determined to be viable and a future PD&E Study is planned, all four of the refined alignments identified in the CF&M study will be carried forward for further analysis in a PD&E Study along with the No Build Alternative. Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in any future PD&E Study.

6/20/2023

5:29 PM

As a proud resident of Sanford Florida and Kensington Reserve, I want to emphasize my strong opposition to the sanford airport connector due to the impact to our community and the environment. This project would disrupt the delicate ecosystem and spell destruction for thousands and of animals. It would also bring traffic, pollution, and homeless and pan handlers right between current and upcoming communities. A better alternative to solve congestion is to expand the airport blvd exit to allow direct access to the 417 and the airport. I am in strong opposition to the current connector project plan. Ashley Ingham

Subject: Re: Request for Information about Connector Feasibility Study

Good afternoon Mr. Marone,

Thank you for your interest in and comments regarding the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility Study (CF&M) Study.

The study team is in the process of refining the initial alternatives and is still evaluating which alternatives are feasible from an engineering and traffic operations perspective. As part of the alternative development process, we are also evaluating avoidance and minimization of environmental resources as well as economic contributors in the area. The initial alternatives are being refined based on agency and stakeholder input, and to minimize impacts. Any feasible alternatives will be presented at the public meeting, which we anticipate holding in June of this year.

Notes/History

Ashley Ingham,

Date Range - All Dates

3/16/2023 3:02 PM

As for our outreach efforts, start-of-study notification letters and fact sheets were first mailed to property owners within the study area in October 2022 (please see attached). Invitations to the public meeting will be emailed to interested individuals, as well as mailed to property owners within the study area once an exact date has been determined for the meeting. Also, any interested parties can request updates regarding this study by emailing ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>> and asking to be added to the study database. We have added your contact information to the database, and you will receive study updates via email.

3/16/2023 3:01 PM

This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate alternatives in more detail and identify a Preferred Alternative.

More information about this study can be found on the study webpage: <http://Bit.ly/SR417AirportConnector> <<http://bit.ly/SR417AirportConnector>>. As documents are developed, they will be provided on the study webpage.

Subject: Request for Information about Connector Feasibility Study

Dear Sir/Madam,

I am writing to you as a concerned resident of Kensington Reserve regarding the recently announced Connector Feasibility Study. I was made aware of this project today and I have some questions and concerns that I would like to address with the Expressway Authority.

As a resident of Kensington Reserve, I am deeply concerned about the potential impact that this project could have on our community. I understand that this study is intended to explore the feasibility of constructing a connector road between our neighborhood and the nearby highway, and I would like to request more information about the scope and purpose of this study.

3/14/2023 7:58 PM

Specifically, I would like to know more about the potential environmental impact of this project, as well as the potential benefits and drawbacks for our community. I would also like to know what steps the Expressway Authority is taking to ensure that residents are fully informed and involved in the decision-making process for this project.

I would appreciate it if you could provide me with as much information as possible about this project and study, including any reports or studies that have been completed thus far. Additionally, if there are any public meetings or forums scheduled where residents can ask questions and voice their concerns, I would appreciate information about those as well.

Thank you for your attention to this matter. I look forward to hearing back from you soon.

Sincerely,

Dante Marone

Subject: 417 Connector environmental advisory meeting

Dear Ms. Shemir Wiles,

I live at 2204 Swinstead Drive in the Kensington Reserve (KR) neighborhood of Sanford. I purchased my home in September of 2022. I am writing to share my concerns about the 417 connector that is being proposed. My concerns are detailed below. I would like to ask that they be included in the EAG meeting minutes so that there's a record of KR concerns.

5/17/2023 1:03 AM

Reasons why I believe that the result of the study should be that the proposed 417 connector options that result in the connector running directly behind my home are NOT FEASIBLE:

- Seminole county is currently conducting a study on watershed and flooding that will not be available for another year; any decisions related to the potential development of our conservation easement are premature and highly irresponsible as those wetlands may be the only thing preventing our neighborhood from becoming a designated flood zone.

5/17/2023 1:02 AM

It is in direct violation of the goals & objectives of the Seminole County Floodplain Management Plan for 2020-2025 to develop conservation easements that are on the national wetlands inventory (which ours are) given the expectation that multiple factors will cause flooding to increase in the future. I would have never purchased a home in a flood zone.

Ashley Ingham

5/17/2023 1:01 AM

- Noise pollution due to removal of noise-buffering forest, construction, and increased traffic are known to reduce quality of life and well-being. I have a 3 year old son and purchased our home because of the beautiful peaceful lot.

Ashley Ingham

5/17/2023 1:00 AM

- There is a direct correlation between number of trees and health outcomes of anxiety, stress, productivity, and healthcare costs.

-Although the study claims the road will support socioeconomic growth, placing a highway in our neighborhood and removing our wetlands will negatively impact socioeconomic wellbeing of KR residents as property values will be diminished. If i were to sell my home, people will not want to purchase it with a highway behind it.

Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

- 5/17/2023 12:59 AM - Wildlife including federally protected species like the Bald Eagle would be severely impacted, reducing quality of life of KR residents that paid a lot premium for a conservation site and all others who enjoy seeing wildlife. I for one paid \$25,000 for my lot which backs up to conservation. I never would have purchased this lot and home had I known about the connector. Ashley Ingham
 - 5/17/2023 12:58 AM - Roads do not alleviate traffic; they attract it. Given the construction currently underway at the 417 exit by us, it seems improvements to that and widening of Lake Mary Blvd would be MUCH more feasible. Ashley Ingham
 - 5/17/2023 12:57 AM -The proposed connector is expected to only save a mile or two of distance and 8 minutes of commute time; this minuscule difference is not worth the taxpayer money or destruction to KR property values & quality of life. Ashley Ingham
- Kristin Mattson

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Ms. Maxwell,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023

1:52 PM

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. A CF&M Study evaluates a range of potential impacts based on a generic right-of-way width. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative.

Ashley Ingham

8/8/2023

1:51 PM

If the project moves forward to a PD&E Study, specific right-of-way impacts will be evaluated for the Preferred Alternative. Any right-of-way acquisition phase would typically follow the Design phase, which is not planned at this time. For more information on the project development process for new corridors click [here](#) <<https://www.cfxway.com/agency-information/plans-studies/project-studies/concept-feasibility-mobility-studies/>>. CFX S policy on right-of-way acquisition is available on the CFX website at this [link](#) <<https://www.cfxway.com/wp-content/uploads/2023/05/Property-Acquisition-Disposition-and-Permitting-Procedures-Manual-2023.pdf>>.

Subject: Re: Meeting agenda and invites

Ms. McClure,

These are meetings we hold specifically for our EAG and PAG members for their feedback. If someone from the public requests to attend the meeting, they are more than welcomed to attend and listen to what is being discussed. However, there is no formal agenda for this meeting as you requested.

5/15/2023 2:32 PM

There is just a PowerPoint presentation given to EAG and PAG members and then there is a discussion period after the presentation is complete where EAG and PAG can provide comment and ask questions. Once the meetings are complete, copies of the presentations and the meeting summaries are posted to the study's webpage. You will see that was done for the first EAG/PAG meetings.

Subject: Re: Meeting agenda and invites

Good afternoon,

The meeting invitation request is in reference below regarding information you, sent out to a neighbor. I have copied the email you sent them below.

I am a bit surprised that you advised there were no upcoming meetings as below you stated that the EAP/PAG meetings are "public meetings and open to the public for attending". I believe the date for this meeting is in 2 days on 5/17/2023.

Your email below.

Notes/History

Ashley Ingham,

Date Range - All Dates

5/15/2023 2:21 PM "the information for the upcoming May EAG/PAG meetings. As previously stated, the EAG/PAG meetings are public meetings and open to the public for attending. However, due to the short time available with our advisory group members, participation in the meeting, including the discussion period, is limited to only advisory group members. Ashley Ingham

5/15/2023 2:20 PM Audience members who want to comment may send comments or questions to Public Involvement Coordinator Shemir Wiles at ConceptStudies@cfxway.com <mailto:ConceptStudies@cfxway.com>. Any questions will be answered within a week of the advisory group meeting." Ashley Ingham

Please send me invites to any and all meetings that are open to the public related to the SR to Orlando Sanford International Airport Connector CF&M studies.

Sincerely,

Christina McClure

Good morning Ms. McClure,

There are no meeting agendas that we would send out to the public as an update. All meeting presentations we have coming up are with other agencies and they put out their own agendas (Seminole County on 5/23 and Sanford Airport Authority on 6/6). Also, there will be meeting invitations sent out for the public meeting in a couple of weeks, so it's not available yet.

Ms. Shemir Wiles
Public Involvement Coordinator

Subject: Re: PIR23-5235 Public Records Request (417-246)

Good afternoon Ms. McClure,

In response to your follow-up question, the study team has provided the following clarification. Existing floodplain data and drainage conditions have been reviewed as part of the project. The study team conducted field reviews, reviewed multiple existing reports, available SJRWMD permits and roadway plans, and data either provided by agencies or publicly available on agency websites as noted in the **Existing Conditions Technical Memorandum** (attached). No project-specific surveys were conducted for this project as those are typically completed in future project phases (PD&E or Design).

Notes/History

Ashley Ingham,

Date Range - All Dates

4/17/2023

12:14 PM

Related to the specific information you requested, the Seminole County Master Plan is still being updated and we will request an update on the status. Related to SJRWMD, there were no additional reports or data provided related to the EAG meeting discussion. SJRWMD verbally confirmed there are no additional planned conservation areas within the study area at this time. Updated information on existing conditions received throughout the study is being documented in the Draft CF&M Report. As part of that analysis, we are continuing to coordinate with Seminole County and SJRWMD.

4/17/2023

12:13 PM

However, please note that detailed stormwater management and floodplain analysis on future conditions is conducted in a PD&E Study once feasible alignments are identified. If there is specific data in the Existing Conditions Report that you would like to request, please identify those items and we can provide the agency websites where that information is available for public use.

Thank you,

Ms. Shemir Wiles
Public Involvement Coordinator

Subject: Re: PIR23-5235 Public Records Request (417-246)

Thank you for your reply. My sincerest apologies as I may not have been clear in the information being requested.

I have read the minutes/ discussions and have included portions below relating to the information being requested.

In the discussion Jean Jereij from Seminole County Public Works stated "We have all the data from the most recent hurricane, and we are working on some studies. We are monitoring the quality and floodplains associated with Lake Jesup and will update the master plan to capture any potential changes. As soon as the studies are done, we can pass that information along.

4/13/2023 12:28 AM

Sunserea Gates: Yes, that is something we would coordinate with Seminole County about. We want to be sure we have all the existing and future environmental conditions documented appropriately so we can consider it in the analyses of the potential alignments. "

Daniel Smith: I want to follow up with a question about the stormwater plan. Is there any kind of floodplain protection zone around this lake? And does the water management district have the intent to purchase that gap area between the Lake Jesup conservation area shown on the map here?

Nicole Gough: We have Nicole Martin here with SJRWMD - do you have anything to share on this? I know you're not on the project team.

Notes/History

Ashley Ingham,

Date Range - All Dates

4/13/2023 12:27 AM

Nicole Martin, St. Johns River Water Management District: I am not able to answer your question, but I can take it to the correct people.

Daniel Smith: Ok. That sort of information would be useful to us. What is the purpose of acquiring those easements in the middle of the map?

Daniel Smith: Thank you for bringing that up, Jeff. The reason I was inquiring with SJRWMD and the county is because you really need to have a floodplain plan in place as these conditions get worse. So, thank you for adding that.'

These comments discuss data and surveys regarding floodplains and stormwater management plans and their importance in analyzing while considering the potential alignments.

Are you advising that none of these reports, surveys, data or plans as discussed in the above minutes, have been submitted or reviewed during the analyses of this project?

Sent from my Galaxy

Subject: Re: PIR23-5235 Public Records Request (417-246)

Good afternoon Ms. McClure,

Thank you so much for your interest in CFX's State Road 417 (Seminole Expressway) to Orlando Sanford International Airport Connector Study.

As it pertains to your public records request, the current study is a Concept, Feasibility, & Mobility Study (CF&M) and there are no individual documents developed as part of a CF&M study that specifically pertain to stormwater management, surveys, or mitigation plans. We also have no proposed alignments; we only have potential alignments that are being evaluated for feasibility. Those alignments were presented in January 2023 to this project's first Environmental Advisory Group and Project Advisory Group meetings, and that presentation can be found [here](https://www.cfxway.com/wp-content/uploads/2023/02/417-246_EAG1_Presentation-Final_01-24-2023.pdf) <https://www.cfxway.com/wp-content/uploads/2023/02/417-246_EAG1_Presentation-Final_01-24-2023.pdf>. A SJRWMD representative attended the Environmental Advisory Group meeting and provided input as shown in the meeting summary provided [here](#)

Notes/History

Ashley Ingham,

Date Range - All Dates

4/12/2023 4:34 PM

<https://www.cfxway.com/wp-content/uploads/2023/02/417-246-EAG-meeting-summary-FINAL-1-25-23.pdf>. Existing SRJWMD data used for the project is available on the agency's website [here](https://www.sjrwm.com/data/) <https://www.sjrwm.com/data/>. CFX appreciates the information provided on the study area in the comments you provided and will consider these resources as part of the ongoing study.

The study team is in the process of refining the initial alignments and is still evaluating which alignments are feasible from an engineering and traffic operations perspective. As part of the CF&M process, we are also evaluating avoidance and minimization of environmental resources, as well as economic considerations. The initial alignments are being refined based on agency and stakeholder input, and to minimize impacts. Any feasible alignments alternatives will be presented at the public meeting. Once the analysis is complete, a draft CF&M Study Report will be prepared to document these potential alignments. The document will be provided on the project website when complete.

4/12/2023 4:33 PM

This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate the feasible alternatives in more detail, including more specific stormwater management analysis, surveys, and mitigation plans, and identify a Preferred Alternative.

More information about this study can be found on the study webpage: <http://Bit.ly/SR417AirportConnector> <http://bit.ly/SR417AirportConnector>

Comment

Good afternoon,

I currently own a home and agriculture lands within range (1000 ft) of the Alignment 2 proposal. I have lived in the South Mellonville Ave, Palm Way and Oak Way neighborhood for 23 years. If your team has not visited this neighborhood, I would welcome you to do so. You will find large drainage ditches along all the above listed roads. These ditches are managed by St. John's Water Management and are critical in stormwater management. The natural water flow starts at South Mellonville Ave and flows through the ditches to Lake Jessup. When I first moved to the property there was no concern regarding flooding. My property is in flood zone X. Over the last 5 years my farm has flooded twice (Sept 2017 & Sept 2022) with over 3 feet of water causing loss of livestock.

4/7/2023 4:21 PM

Both occasions water was completely over South Mellonville Ave, Palm Way and Oak Way with portions of the road washing out on both occasions. The development of Bakers Crossing was the beginning as it removed wetlands and now mitigates stormwater through the ditches of our neighborhoods. New subdivisions being built along Pine Way also have newly constructed stormwater retention ponds. During the last hurricane one of the ponds burms broke and caused extensive flooding to our neighbors on Palm Way as the natural flow of the water is to Lake Jessup. Even the best storm water mitigation engineering plans can and do fail when trying to divert natural water flows over a vast amount of land.

The current design of the proposed road would in essence stop the natural flow of water to Lake Jessup regardless of the path it takes. What the advisory team sees on paper is not the true reality on exactly how much water flows through this neighborhood preventing flooding of the new development sites currently in progress within the study area.

Notes/History

Ashley Ingham,

Date Range - All Dates

4/7/2023 4:20 PM

The only way this could be avoided is to elevate the roads in an overpass/bridge design or reevaluate opportunity in current road infrastructure including correcting the single lane offramp from 417 (which has been under construction for over one year) and traffic light timing along key intersections.

I ask each member in this council and supporting committees to reflect before voting. Reflect on how it must feel to be a property owner within this plan.

4/7/2023 4:19 PM

Each of us has worked hard and made sacrifices to obtain our homes, farms, and businesses. We are a tight community not often found in subdivisions. We each chose our location based on the amenities the neighborhood offered. Access to Lake Jessup Nature Conservation areas for horseback riding, hiking, and wildlife study. The ability to raise and grow our own livestock and gardens to be self-sustaining and choose to raise children with these values in a neighborhood with almost no crime. Each of us now forced into facing life changing decisions based on a subjective study requested by Seminole Board of County Commissioners that after 5 to 7 years of construction, millions of dollars spent, possibility of existing neighborhoods flooding, destruction of wildlife habitat and green space might save 8 minutes of travel time to the airport.

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study | Ashley Ingham |
| <p>Good afternoon Mr. & Mrs. Michelet,
Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX). We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.</p> | | | |
| 8/8/2023 | 1:17 PM | This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. | Ashley Ingham |
| 8/8/2023 | 1:16 PM | If the project is determined to be viable and a future PD&E Study is planned, all four of the refined alignments identified in the CF&M study will be carried forward for further analysis in a PD&E Study along with the No Build Alternative. Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in any future PD&E Study. | Ashley Ingham |
| 8/8/2023 | 1:15 PM | Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions. Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future PD&E Study. During a PD&E Study, alternatives are further refined to avoid and minimize floodplain impacts. Coordination with local and environmental agencies will continue in any future PD&E Study to document regional efforts, as part of other studies, related to known flooding in this area. | Ashley Ingham |

Again, thank you for your participation in the study.</p> <p>Respectfully,
Ms. Shemir Wiles
Public Involvement Coordinator</p> <p>CENTRAL FLORIDA EXPRESSWAY AUTHORITY</p> | Ashley Ingham |
| 6/20/2023 | 5:30 PM | <p>Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.</p> | Ashley Ingham |
| 6/20/2023 | 5:29 PM | <p>As homeowners in Kensington Reserve, we are very unhappy with this and quite frankly oppose it. The State and /or County have known about this for years, and should have purchased land PRIOR to allowing new development of single family homes. The construction of this roadway will have serious impacts on our homes as well as those in Wyndham Preserve and Concorde currently under construction. Additionally based on the presentation shown tonite, our neighborhood is placed in a flood zone (identified as "x"). Therefore, in addition to reduced home values due to the interstate, we incur added charges to maintain flood insurance. I'm quite sure there are no plans to compensate us in any way for these financial losses. I can also speak to environmental impacts to the area- the bald eagles, the caraca [sic] birds, both of which are endangered, as well as other wildlife we enjoy in the area.</p> | Ashley Ingham |
| 6/20/2023 | 5:28 PM | <p>In closing, we also question why there cannot be a ramp off Airport Blvd (off of 417) straight into the airport? It seems as though this would lessen the impact to the area, as residents, we can tell you the issue is not Lake Mary Blvd. The issue is the exit off 417 - although some changes are underway, the congestion lies at Ronald Reagan & Lake Mary Blvd. Why not address this first, study the impact it has, and then re-evaluate the issue. Nobody wants a highway or expressway in their back yard. I do think further study is needed to assure the best decisions are made for the residents in this area. Thank you!</p> | Ashley Ingham |

6/20/2023 5:29 PM I do not agree that this project is needed. The negative impact it will have on the residents and on the nature currently in place will be much greater than the the need for this. This project will not improve the community it will break it. Getting to the airport does not take more than 5-10 minutes. This project is unnecessary. There is already a road that connects 417 to the airport on Ronald Reagan. Ashley Ingham

6/20/2023 5:29 PM Ashley Ingham

2 Airport exits already exit (49 + 50). I propose tax dollars be spent on lengthening Exit 49 (the ramp) So there is better traffic circulation. And, improving Airport Blvd which is direct access to the airport. Please keep all land south of Pine Way to Lake Jessup [sic] intact. The wildlife habitats are already displaced and have moved into these forests and wetlands. I absolutely oppose all options in the current study area. A 3rd airport exit is excessive and those funds can be better used.

Notes

Date	Time	Regarding	Record Manager
6/20/2023	5:45 PM	Question- Is the need for this project justified by traffic counts, and cost of property acquisitions required? I drive on Red Cleveland Blvd and Lake Mary Blvd every day. About 95% of the cars on Lake Mary Blvd are enot going to the airport. Instead they are going to the newly added 1,200 new homes on Brisson and Lake Mary Blvd. Additionally, about 2,000 homes are under construction, on Lake Mary Blvd to the Hwy 46 Intersection. This does not count the traffic going to Deltona, Geneva, Etc.	Ashley Ingham
6/20/2023	5:44 PM	The traffic jams at S Sanford Ave and Lake Mary Blvd are only at the commuting hours, and caused by these homes. The proposed x way extension will not solve this. This morning at 10:30 AM I was the car on Red Cleveland Blvd into the airport. There is more traffic going into the airport on airport Blvd. Includes Semi Trucks servicing the industrial component of the airport on airport Blvd. Includes semi trucks servicing the industrial component of the airport campus, hundreds of rental cars, and employees of the airport and industry. Airport Blvd is two lane, with no shoulders, and mo sidewalks.	Ashley Ingham
6/20/2023	5:43 PM	Maps are out of date, with wrong road names, the aerial photos do not adequately show the homes in my neighborhood- which is known as Palm Hammock Estates on maps- due to the trees. It is a hammock. Planners need to get out of the office and not rely on old maps and aerials. I am directly affected. Proposed alignment 3C goes right thru my family room. Palm Hammock estates, consisting of 13 estate home residences, is severely affected. 6 homes are directly in the path of alignment 3C including one million \$ home under construction.	Ashley Ingham

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:42 PM

Acquistion will be about \$6 million for 6 properties. But only includes properties directly on Palm Way and Hallelujah Trail. Not cost effective. Palm Way has flooded multiple times. 2 homes/ structures were rendered unlivable. This wet area is not on official flood map. Water table is so high that my drain field is 5 feet high, as required by the county. Road construction will have to deal with a lot of wet ground. Extensive wildlife is in Palm Hammock, birds, turkey, deer, rabbits, eagles, and Hawks were displaced by demolition of Baker Farms and construction of homes on Brisson. If displaced again, where will they go? What is truly needed is a solution to the current and near future high traffic volumes using Lake Mary Blvd, and not going to the airport.

Subject: 417 to SFB public comment

Ashley Ingham

To whoever it may concern,
 The proposed extension of the 417 toll road is unnecessary and a threat to not only people who have chosen to live up against a conservation area but also the wildlife inhabiting it. The land near SFB is home to some of the last rural housing left southwest of SR 46 in Seminole county. However It seems that in Central Florida no matter how far away you live from development, it will find you. The residents of these rural homesteads should not have their way of life ruined by a toll road which would be built for people to defiant to use the Lake Mary Blvd exit. The fact is the small segment on Lake Mary Blvd airport goers have to use is more than sufficient to carry passengers to the airport, especially at the price of protecting land and peoples way of lives.

I have attached two images representing the growth of this area and how it is important we protect what is left.

Thank you very much
 Luke Nelson

Comment

Ashley Ingham

No ramp here! It will be a huge Detriment to the area! We do not want it at this proposed site!
Destruction of the long time businesses and services in this area will have a huge impact to residents and nature!
Please no more concrete and the mess it brings here! There are alternatives! Consider those instead
Enough is enough!!
Signed a very concerned VOTER!!

Subject: Ramp

As long time residents and business owners in Sanford/Lake Mary we are definitely opposed to the construction of a new Sanford airport ramp! There is no good reason to believe this will enhance or help that area whatsoever!
 Enough is enough!! Leave it alone !!
 There are valuable businesses and services that thrive there and have for many years! The decision to destroy them is tragic for the community they serve!

4/21/2023 5:45 AM

Consider this before any further action! We don't want a ramp and all the mess it will bring to this area! Stop the concrete expansion madness for once and let nature be! We want and deserve a green life not pavement and traffic there.
 Go where there's minimal impact to lives and property, not the most!
 Show Sanford some decency ! We care about where we live !!
 Signed
 A very concerned voter !

Comment

I dont support this project. When I purchased the home at Kensington Reserve last year I was not told about 417 connector project. Now CFXWAY want to build highway right behind my home. If county and cfxway had plan to connect 417 with Sanford airport why town planning approved residential projects in the area. Is this how do the town planning in Seminole county? This project will destroy conservation areas of Kensington reserve.

Comment
This project will destroy entire area south of Sanford airport and all new residential developments on Lake Mary boulevard. If there was a plan to connect Sanford airport with 417, then why so many housing projects were approved. I don't support this project.

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Ms. Pattavina,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023

2:26 PM

The presentation and displays from the Public Information Meeting held June 20, 2023 are posted to the study's web page at

Ashley Ingham

- 6/20/2023 5:29 PM I have reviewed all the materials here today. I cannot see how this project can continue Too many lives and neighborhoods will be affected. I live in the same community as my daughter and grandchildre- my retirement and savings weve used to purchase my house - I am told that the value of my home and my daughters will be negatively effected, we built in this neighborhood for the tranquility and nature. Please do not do this- at least now- maybe if the airport expands and adds more airlines and flights, I have also spoke to some people here tonight - no one wants this to happen. Thank you Ashley Ingham

Record Manager
Ashley Ingham

Good afternoon Mr. Pauly,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

Notes/History

Ashley Ingham,

Date Range - All Dates

8/8/2023	12:13 PM	This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. If the project is determined to be viable and a future PD&E Study is planned, all four of the refined alignments identified in the CF&M study will be carried forward for further analysis in a PD&E Study along with the No Build Alternative.	Ashley Ingham
8/8/2023	12:12 PM	Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in any future PD&E Study. The presentation and displays from the Public Information Meeting held June 20, 2023, are posted to the study's web page at bit.ly/SR417AirportConnector < http://bit.ly/SR417AirportConnector >.	Ashley Ingham
8/8/2023	12:11 PM	The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting. If you have questions, please email us at ConceptStudies@cfxway.com < mailto:ConceptStudies@cfxway.com >. Again, thank you for your participation in the study. 6/20/2023	5:30 PM	Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.	Ashley Ingham
6/20/2023	5:29 PM	Routes 3A and 3D would greatly impact my quality of life in Kensington Reserve. A much better plan in my opinion would be to "fix" the 417 connector @ Ronald Reagan and then make Lake Mary Blvd a 3-lane road in both directions down to the sports complex.	Ashley Ingham

6/20/2023 5:29 PM Traffic headed west on Lk Mary at Sipes why have a left turn when you can have a fly circlce with the fly over and the same thing at Red Cleveland. Instead of a light at E. Lake Mary Blvd & Sipes/Red Cleveland a flyover should be done instead of another traffic light. The lights are just backing up traffic. It is already unbearable driving up to Lake Mary now and these routes and lights will only add to the congestion.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:29 PM

I live along route 1. I do not want this close to my yard. If Route 1 is chosen I will need access to Sipes Ave from my property or my property will have to be taken. Also, a wall will need to be built to alleviate any noise. This is going to make E. Lake Mary even more of a nightmare. I want to be notified of any meetings that are taking place concerning this matter. I don't know if any of these routes will actually help with traffic to Volusia County from Seminole County. Its just going to cause more congestion with all the the new homes, townhomes, stores, warehouses, sports complexes being built.

Good Afternoon Ms. Mary:

We are Yan and Sandra Rasmussen and after the neighbor meeting on Tuesday June 20th they told us that if we had any thoughts or concerns to send you an email. We are a family that just moved last year at Magnolia Park Community very close at the area where the project is going to take place and we are deeply concerned about the changes that this is going to bring into our lives. We moved to this area because of its quietness and peaceful surroundings. We are in total disagreement with the execution of this project because of the amount of changes it would bring in our daily lives due to the traffic, environment and sound pollution. And on top of all of these negative sides of the argument that I just mentioned, if this project gets done it would devalue our property.

We hope you consider our statement.

Best regards,

Rasmussen's Family.

Hello,

I see that a few alignments were being considered for the SR 417 (Seminole Expressway) to Orlando Sanford International Airport Connector. Are y'all leaning towards one more than the others? Have any been eliminated since the January 25th presentation showing Alignments 1, 2, 3a, 3b, 3c, and 3d?

Thank you,
 Frank

Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good afternoon Mr. Roberts,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023

2:59 PM

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. If the project moves forward to a PD&E Study, potential noise impacts will be evaluated for the Preferred Alternative. Federal noise study procedures require analysis of an exact alignment and other specific engineering details such as height and distance from travel lanes that are typically evaluated in a PD&E Study.

| 6/20/2023 | 5:29 PM | <p>My concern is for the disruption to the community surrounding Lake Jesup Wilderness areas and the residences affected by the proposed connector. Many residents, myself included, have spent savings, life insurance, retirement monies etc to purchase property in this rural area. Now residents are facing a loss of their entire property or a portion. For those left behind, we face increased traffic and noise pollution. Perhaps a more feasible option would be to improve the 417/ Lake Mary Blvd exit that would bring traffic through industrial areas.</p> | Ashley Ingham |

Comment Ashley Ingham
I am writing to give my opinion against the 417 connector as it would disrupt our community. Many of us have lived out here for years because we enjoy the rural feel. This connector would take private property and affect businesses. Please consider improving the existing 417 exit instead.

Comment
I am extremely concerned about the proposals that will take down the conservation area near my neighborhood. During Hurricane Ian, the neighborhood experienced minor flooding and many houses were impacted. By removing the wetlands near our homes, the flooding may not be minor next time. Not only will those proposals reduce our home values, they will reduce our home safety and put us at risk of flooding.

Notes/History

Ashley Ingham,

Date Range - All Dates

5/18/2023 12:21 PM

There is much wildlife behind our homes (including bald eagles). I am concerned about the environmental impact of taking down so many trees and wildlife.

Ashley Ingham

On top of that, I am concerned about the air pollution so close to homes with so many children. There are lots of children in this neighborhood, and they are often outside playing. The air pollution from so many cars by their homes could have long term impacts.

I'm also concerned about the noise pollution.

I understand the need for a solution to the traffic, and that many who do not live in this area need a resolution. As someone who lives right here and takes these roads daily, I ask that the proposal for the road to go around the conservation area be the only one seriously considered. It will solve the issue at hand without creating a mess for the young families who have invested in this neighborhood.

6/20/2023 5:29 PM

What Kind of fiscal reparations are being planned for the noise during construction and after the road is built. What will be done for the protected wild life such as bald eagles that nest in this area? This additional exit does not solve the current or future traffic issues. The Lake Mary Blvd exit going northbound needs to be expanded and reworked with more lanes. Ashley Ingham

Subject: Re: Comments

Good afternoon Saboor,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study.

8/8/2023 3:19 PM If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. If the project moves forward to a PD&E Study, potential noise impacts will be evaluated for the Preferred Alternative. Federal noise study procedures require analysis of an exact alignment and other specific engineering details such as height and distance from travel lanes that are typically evaluated in a PD&E Study. Ashley Ingham

8/8/2023 3:18 PM The presentation and displays from the Public Information Meeting held June 20, 2023, are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>. The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting. Ashley Ingham
If you have questions, please email us at ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>>. Again, thank you for your participation in the study.

Subject: Comments

Hi Shamir Wiles, Today I visited the Millennium Middle School and went over the study the banners and details.

I being a resident of Sanford, I find many issues with this expressway option which is passing behind the Kensington reserves n crossing the east lake Mary Blvd.

I want to state couple of points based on my experience here.

6/20/2023 6:12 PM

1. Today I don't see much traffic coming to airport via e lake Mary Blvd, n also based on my info previously the airport expansion didn't bring in much ppl to airport.

Ashley Ingham

2. E lake Mary Blvd has too many traffic lights, n I passed them every single day to drop my son and it itself is time consuming n waste of gas with this new I see increase in traffic lights. Which I'm not in favor of.

3. This expressway will devalue the surrounding n it will impact me which I'm not in favor off.

4. I don't want my surroundings environment impacted, the Concorde has endanger species and we don't want that being impacted.

Request you consider other options which will have zero to negative impact.

Thanks ,
Saboor

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.

6/20/2023 5:29 PM I understand that traffic is increasing in East Lake Mary Blvd (LMB), which is causing traffic issues to airport passengers. However, the main reason for increase in traffic is because of multiple residential communities, shops coming up in that area, but not entirely because of airport passenger. Hence, adding a SR 417 Connector will not ease traffic in LMB. Instead, plan on extending the LMB and Ronald Reagan Blvd, which would help for all. Impact on property taxes due to proposed Connector, property prices are going to plummet, which will directly on property tax collection, which is not good for Sanford. Please stop disturbing the peaceful life and wonderful species around this area.

Subject: Re: Family home on Oakway and Michigan

Good morning Ms. Sparks,

Thank you for your interest in the SR 417 to Orlando Sanford Airport Connector study.

The study team is in the process of developing and refining potential initial alignments and is still evaluating which are feasible from an engineering and traffic operations perspective prior to evaluating further for other environmental and economic evaluations. Therefore, it's too early to determine any right of way needs for this project.

The initial alignments will then be refined based on agency input and to minimize impacts. Any feasible alignments will be presented at the public meeting anticipated in June 2023. Once feasible alignments and potential connections to the airport are identified, any potential proximity impacts will be considered as part of the study.

3/15/2023 8:58 AM

This Concept, Feasibility, and Mobility Study (CF&M) is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations and consideration of public/stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate alternatives in more detail and identify a Preferred Alternative based on public involvement, engineering and environmental evaluations.

The initial alternatives are being refined based on agency and stakeholder input, and to minimize impacts. Any feasible alternatives will be presented at the public meeting.

This CF&M Study is the first step in the overall project development process. The goal of the current CF&M Study is to determine if there are feasible alternatives based on traffic, engineering, economic and environmental evaluations, and consideration of public & stakeholder input. At the end of the CF&M Study, the CFX Board will make a recommendation on whether the project should proceed to the next phase of project development, which involves a Project Development and Environment Study (PD&E Study) to evaluate the feasible alternatives in more detail and identify a Preferred Alternative.

More information about this study can be found on the study webpage:

Hello- I live in Kensington Reserve with my son as he owns a home in the neighborhood while we are building a custom home off of Pine Way. Can you tell me when the Public Meeting will be, and is this something that is approved already to do this connector??

To: rkspradlin@gmail.com
Subject: CFX SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study

Good morning Mr. Spradlin,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX)

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners.

8/8/2023 11:58 AM All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project. Ashley Ingham

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative.

8/8/2023 11:57 AM If the project moves forward to a PD&E Study, potential noise impacts will be evaluated for the Preferred Alternative. Federal noise study procedures require analysis of an exact alignment and other specific engineering details such as height and distance from travel lanes that are typically evaluated in a PD&E Study. Ashley Ingham

A CF&M Study also evaluates a range of potential impacts based on a generic right-of-way width.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 5:29 PM

I understand the need, but none of what I saw was acceptable. Many homes will be devastated and all in that area will loose [sic] thousands of dollars in value. What is proposed to make us whole for what we will lose?

Ashley Ingham

Also know we can't do anything about plane noise, but the noise from this highway will be quite loud. The displays don't show any serious efforts at noise abatement and that concerns me.

Ashley Ingham

Good morning Ms. Swander,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX)

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023 11:55 AM

Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions. Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future Project Development and Environment (PD&E) Study.

| 6/20/2023 | 5:29 PM | <p>As a resident of Kensington reserve, who owns a home that will back up to the proposed route. I am 100% against this project. How were residents allowed to purchase impacted property when this project was considered years ago? Why was the land not procured then? why, at the VERY LEAST were we not informed? The conservation area is home to bald eagles and the crested Caracara. All documented by Kensington Reserve residents. Our neighborhood is Complete. What about Concorde? Are those potential buyers being informed? What about flooding? Our neighborhood already has flooding issues that will worsen if this Project is allowed to continue.</p> | Ashley Ingham |

Comment
 There does not need to be another exit off of the 417 to get to the Sanford Airport. It is easy to find the airport from the existing exits. You should not plow down much needed agricultural land to add a road exit. It would be an unnecessary waste of good farm land.

Good afternoon Mr. VanDam,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative.

Comment

6/20/2023 1:05 PM

To whom it concerns,
I have been following this study very closely and as a resident who would be impacted by this proposal, I would like to request some clarity on a few items.

Ashley Ingham

1.) It has been mentioned in previous meetings and materials the intent to build this connector is to alleviate the traffic issues found at the 417/Ronald Reagan exit as well as the Ronald Reagan/Lake Mary Blvd intersection while planning for growth of the airport. What are the numbers justifying this statement that the current and future traffic issues would be resolved with this connector? As a commuter, it appears a very large percentage of the overall traffic is local commuters in the new neighborhoods and not for the airport. Therefore a connector would not resolve this problem.

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023 1:04 PM 2.) What assessment and consideration has been done in the feasibility study to utilize or modify existing infrastructure? Given a new connector would come with very high costs, impacting wildlife, floodplains, and existing homeowners, I would like to understand if existing infrastructure could be utilized to support the airport's needs. One example of this I am curious about is using existing E airport Blvd exit from 417 with modifications/updates. Ashley Ingham

6/20/2023 1:03 PM A second example of this is using the Ronald Reagan/417 exit and establishing a continuous thru lane onto Lake Mary Blvd. This would provide continuous flow of traffic off of the expressway onto Lake Mary Blvd and alleviate the original traffic jam concerns while still allowing sufficient access to the airport's future growth needs. This would also benefit local commuters and not just those driving to the airport. Thank you for your time and I look forward to your timely response. Ashley Ingham

Good afternoon Ms. Van Steen

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

Notes/History

Ashley Ingham,

Date Range - All Dates

8/8/2023 3:21 PM We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

All individuals providing comments, including yourself, will be added to the contact database.

The presentation and displays from the Public Information Meeting held June 20, 2023, are posted to the study's web page at bit.ly/SR417AirportConnector <<http://bit.ly/SR417AirportConnector>>.

8/8/2023 3:20 PM The Draft CF&M Study Report is also posted on the website for public input. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at their August 10, 2023, meeting.

If you have questions, please email us at ConceptStudies@cfxway.com <<mailto:ConceptStudies@cfxway.com>>. Again, thank you for your participation in the study.

Respectfully,

Ms. Shemir Wiles
Public Involvement Coordinator

Good morning Mr. Wagner,

No Preferred Alternative has been identified at this time as we are in the Concept, Feasibility and Mobility (CF&) Study phase. Right now, we only have refined initial alignments: https://www.cfxway.com/wp-content/uploads/2023/05/417-246_Refined-Initial-Alignments.pdf

6/16/2023	10:52 AM	If the CF&M Study finds that alignments are feasible, the CFX Governing Board could approve proceeding to a Project Development and Environment (PD&E) Study to refine and evaluate alternative alignments and identify the Preferred Alternative. At that time, there would be more specific information as it pertains your home and its location in relation to the connector road.	Ashley Ingham
-----------	----------	--	---------------

You will need to reach back out at a later time for that information if the project proceeds forward to a PD&E Study.

Good Evening,

My name is Daniel Wagner. My Wife Miranda and I purchased 4305 S Mellonville Ave in Sanford recently and we just found out about the potential plan to build the connected road to the airport. I wanted to inquire as to how this may affect my recently purchased home. Can you advise how this will affect our home and the surrounding roadways?

Respectfully,

Daniel and Miranda Wagner

Notes/History

Ashley Ingham,

Date Range - All Dates

6/20/2023	5:29 PM	This project has far too high of an impact on residential properties and environmental impacts. Please reconsider.	Ashley Ingham
-----------	---------	--	---------------

6/20/2023	5:28 PM	Thank you for your comment regarding the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).	Ashley Ingham
-----------	---------	---	---------------

We appreciate your input. Your written comments, received by the end of the July 5, 2023 public comment period, are part of the public meeting record for the study. They are being considered as part of the evaluation for the CF&M study.

All alignments under evaluation avoid direct impacts to the Lake Jesup Conservation Area and the Lake Jesup Wilderness area. If the project is approved to move forward into a Project Development and Environment (PD&E) study, the alignments will be further analyzed for any potential effects to these areas.

6/20/2023	5:27 PM	Seminole County has recently initiated the development of a Watershed Management Plan (or Drainage Basin Study) for the Lake Jesup Drainage Basin to evaluate opportunities to alleviate flooding and improve water quality based on existing conditions. Any future conditions related to the potential airport connector and potential floodplain impacts will be evaluated as part of a future PD&E Study. During a PD&E Study, alternatives are further refined to avoid and minimize floodplain impacts. Floodplain compensation will be evaluated for any floodplain impacts to address agency criteria. Coordination with local and environmental agencies will continue in any future PD&E Study to document regional efforts, as part of other studies, related to known flooding in this area.	Ashley Ingham
-----------	---------	--	---------------

6/20/2023	5:26 PM	Alignments 2 and 3a are projected to impact 14 acres of the conservation easement, while Alignment 3d is projected to impact 10 acres of the conservation easement. The specific mitigation approach would need to be determined during future phases of the project and requires direct coordination with St. Johns River Water Management District (SJRWMD).	Ashley Ingham
-----------	---------	--	---------------

The presentation and displays from the Public Information Meeting held June 20, 2023 have been posted to the study's web page at bit.ly/SR417AirportConnector. The study is expected to be completed this summer after the study results are presented to the CFX Governing Board at the August 10, 2023.

I am opposed to this road. I am also very disappointed our Commissioner Ashley Ingham Jay Zembower is not here to talk to the residents. He was invited but did not show. "Florida's Natural Choice," the current slogan for Seminole County, has taken a back seat to "economic development!" We don't want this road! Widen Lake Mary Boulevard, widen Airport Blvd! We are opposed!

Subject: Re: State Road 417 to Orlando Sanford International Airport Connector

Good afternoon Mr. Wharry,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

8/8/2023 3:50 PM This CF&M study is being conducted to determine if transportation corridors are feasible, and a Preferred Alternative is not selected as part of the CF&M study. If the CF&M Study finds that alignments are feasible, the CFX Board could approve proceeding to a Project Development and Environment (PD&E) Study to further refine and evaluate alternative alignments and identify the Preferred Alternative. Ashley Ingham

8/8/2023 3:49 PM If the project is determined to be viable and a future PD&E Study is planned, all four of the refined alignments identified in the CF&M study will be carried forward for further analysis in a PD&E Study along with the No Build Alternative. Additionally, based on stakeholder input, an elevated limited-access alternative along East Lake Mary Boulevard will be analyzed in any future PD&E Study. Ashley Ingham

6/20/2023 5:30 PM Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM.

6/20/2023 5:29 PM Last week at the Millennium Middle School (Sanford) cafeteria, the Central Florida Expressway Authority held an informational presentation. The topic was feedback regarding the proposed State Road 417 to Orlando Sanford International Airport Connector. Many in our Seminole County and surrounding neighborhoods oppose any of the proposed connectors for this \$160 million project. An elevated roadway impacts endangered wildlife while bringing more noise and air pollution closer to our residences.

6/20/2023 5:28 PM We're looking for answers why CFX doesn't work with the state or county and investigate widening Lake Mary Boulevard and fixing the State Road 417/Ronald Regan connection? No one at last week's meeting could answer that question. There are existing creative traffic solutions out there, such as the Casselberry Route 17/92-Route 436 flyover. Or the elevated sweeping curve from 408 westbound to I-4 westbound. Who decided this connector is the best way to go, on what basis, and were there no other solutions considered?

Would appreciate your comments. Thank you.

Subject: Re: Project Question (417-246)

Good morning Ms. Whitley,

At this time, the public meeting for the SR 417 to Orlando Sanford International Airport Connector study has been pushed back to sometime in June. Notifications to invite the public will be sent out once a date has been determined for the meeting.

The completion date of the study may also be pushed back but that has not been determined yet. As for the next steps in the project development process, no schedule has been determined yet, as well. If the feasibility study findings show the connector is feasible, the project will move on to the project development & environment study phase, or PD&E study phase.

Ms. Shemir Wiles
Public Involvement Coordinator

Subject: Project Question (417-246)

Good Morning,

I'm emailing in regards to project number 417-246, SR 417 to Orlando Sanford International Airport Connector. Can you please tell me if a public meeting is still scheduled for May 2023, if the study is still anticipated to be complete in June 2023, and if there is a schedule for future phases of work?

Thank you in advance!
Elaine Whitley

Good afternoon Ms. Wittmer,

Thank you for your interest in the SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study being conducted by the Central Florida Expressway Authority (CFX).

We appreciate your input and understand that long-range planning of major transportation improvements such as this study can raise concerns for property owners. All public comments received during the study have been considered as part of the evaluation for the CF&M study and will be documented in the Comments and Coordination Report for the project.

| 6/20/2023 | 5:30 PM | Attended the State Road 417 to Orlando Sanford International Airport Connector CF&M Study Public Information Meeting at Millennium Middle School, 2330 State Road 46, Sanford, FL 32771 Tuesday, June 20, 2023 from 5:30- 7:30 PM. | Ashley Ingham |
| 6/20/2023 | 5:29 PM | I moved from New York to Sanford for a quieter and peaceful life, if I wanted to be in a city or near an expressway I would have moved closer to Orlando. I custom built my home 4 years ago with understanding per Ryan Homes the lot I paid extra for had a conservation area that would never be touched. | Ashley Ingham |
| 6/20/2023 | 5:28 PM | We have 3 bald eagle nests in our community which have been there for many years as every year the pair come back to lay and hatch their young. These are our nations bird and symbolize freedom, which the 417 is trying to take away. Recently we also spotted a carcar [sic] nesting, which is on the endangered species list and are protected. Not to mention the other wildlife (deer, bear, possums, raccoons) that have made that area their home. For nature and people who call this area home please dont ruin it and kill everything off. | Ashley Ingham |
