Re: SR 408 Westbound Capacity Improvements from I-4 to Goldenrod (CFX Project #

408-175)

On January 4, 2023, SEARCH reviewed concept plans for the capacity improvements along State Road (SR) 408 from I-4 to Goldenrod Road. The purpose of this review was to identify previously recorded cultural resources within the project area. The Study Area was defined as the parcels where the proposed widening will take place (the potential construction area) in addition to a 152-meter (500-foot) buffer to address potential viewshed effects to historic resources (**Figure 1**). The present document is for information purposes only and does not satisfy any requirements under the National Environmental Policy Act or Section 106 of the National Historic Preservation Act.

Review of the Florida Master Site File (FMSF) database indicates that one archaeological site, 131 historic buildings, one historic cemetery, and five resource groups are located within the Study Area (**Table 1**; see **Figure 1**). Of these resources, two buildings (80R00111 and 80R09989) and one resource group (80R08984) are listed on the National Register of Historic Places (NRHP). In addition, 37 historic buildings, the historic cemetery (80R09088), and four resource groups (80R00258, 80R00422, 80R09612, and 80R10041) have been recommended eligible or potentially eligible for the NRHP. The remaining resources have not been evaluated by the State Historic Preservation Office for NRHP eligibility or have been recommended ineligible.

Table 1. Previously Recorded Resources in the Study Area.

This area of downtown Orlando has been subjected to numerous cultural resource surveys (**Table 2**, **Figure 2**), although the majority of these are centered on the Interstate 4 interchange and the eastern and western ends of the Study Area are comparatively unsurveyed. Portions of the Study Area that have been subjected previously to Module Three-compliant survey typically will not need additional archaeological survey but may need an updated architectural history survey.

Given the number of NRHP-listed and -eligible resources in proximity to the Study Area, the lack of cultural resource survey at the east and west ends of the project corridor, and the presence of numerous evaluated resources in the Study Area, a Phase I Cultural Resource Assessment Survey (CRAS) is recommended for this project.

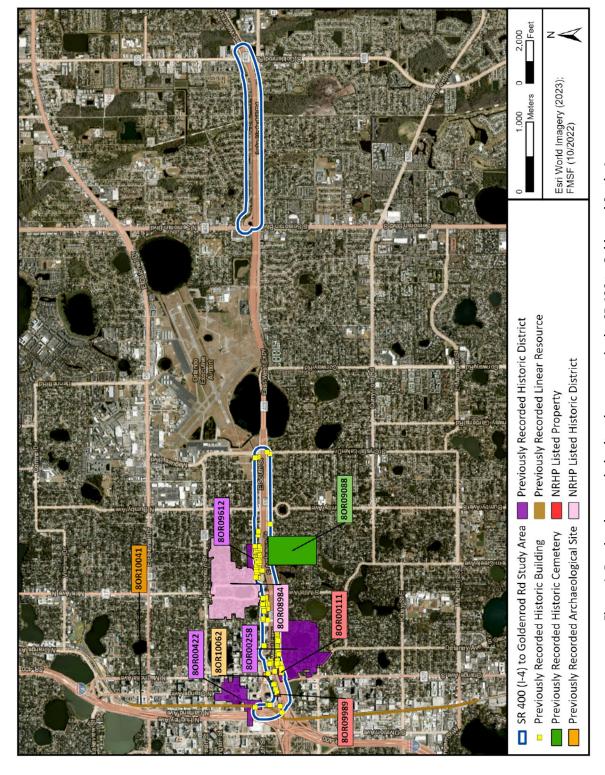

Figure 1. Previously recorded cultural resources in the SR 436 to Goldenrod Study Area.
