SUMMER 2024

STUDY DESCRIPTION

The State Road 417 Sanford Airport Connector proposes providing direct access between SR 417 (Seminole Expressway) and the Orlando Sanford International Airport. The new connector would provide direct access to the airport to meet the growing air passenger and flight demands and help to alleviate traffic on local roads.

This Project Development & Environment (PD&E) Study will consider, analyze, and evaluate the location of an approximately two-mile proposed expressway connection from SR 417 to the entrance to the Orlando Sanford International Airport at or near Red Cleveland Boulevard. The study will also evaluate an elevated alternative along East Lake Mary Boulevard. This PD&E Study will build upon the conclusions and findings from the previous SR 417 to Orlando Sanford International Airport Connector Concept, Feasibility, and Mobility (CF&M) Study completed in August 2023
