STUDY UPDATE

The Central Florida Expressway Authority (CFX) is continuing to conduct the State Road 515 Northeast Connector Expressway Phase 2 Project Development and Environment (PD&E) Study, which began in 2024.

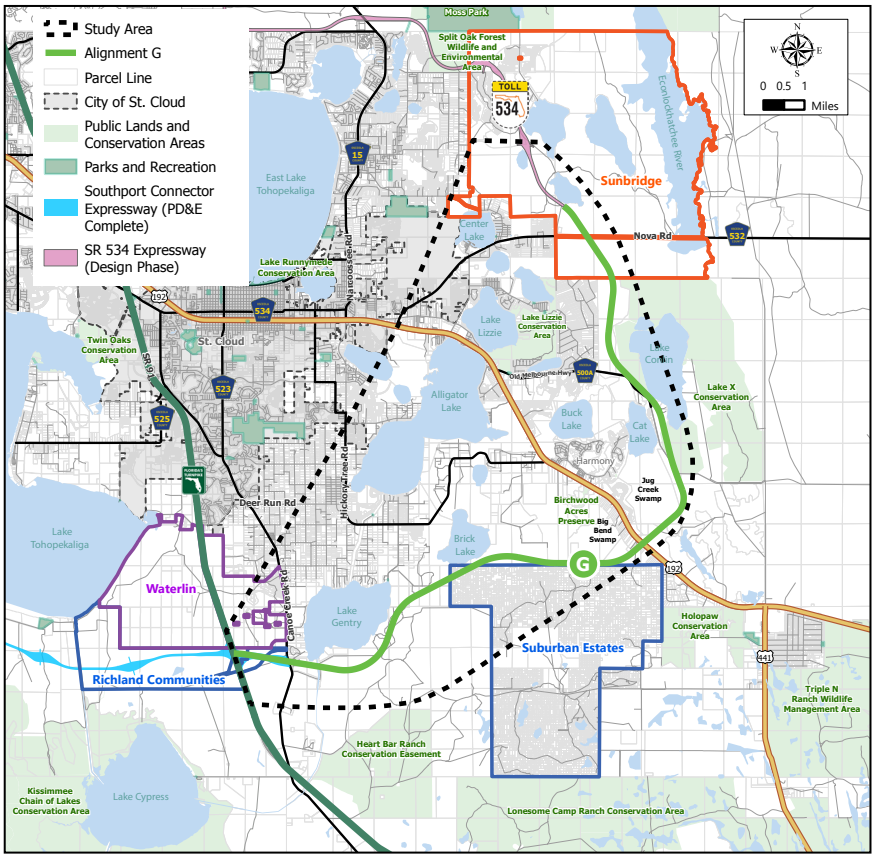

This new 15-20-mile expressway would extend from Florida's Turnpike (State Road 91) northeast to US 192 and continue north toward the planned SR 534 expressway and Nova Road. The Northeast Connector Expressway is one of four projects that make up the Southern Beltway – which is a more than 60-mile expressway network in the southern region of Central Florida. Together, the Northeast Connector Expressway, SR 534, the Southport Connector Expressway, and the Poinciana Parkway Extension form this Southern Beltway, which has been identified in the long-term vision of the CFX 2045 Master Plan.

This study began with an Alternative Corridor Evaluation process, which used extensive input from agencies and the community to identify feasible corridors for more detailed analysis. The Final Alternative Corridor Evaluation Report identified three feasible corridors (Corridors D, F and G) for further study as part of an alignment evaluation.

For each of these corridors, alignment alternatives were developed and analyzed to identify a recommended alignment that would best reduce environmental and community impacts. The results of the alignment evaluation were shared with the community for feedback at the Alternatives Public Workshop in April 2026.

Following the alignment evaluation and consideration of agency and community input, Alignment G was identified as the recommended alignment to advance for further refinement. The project team is now refining Alignment G and conducting detailed engineering and environmental studies as part of the PD&E Study. This work will further evaluate and minimize potential impacts to help identify the Preferred Alternative.

STUDY MAP

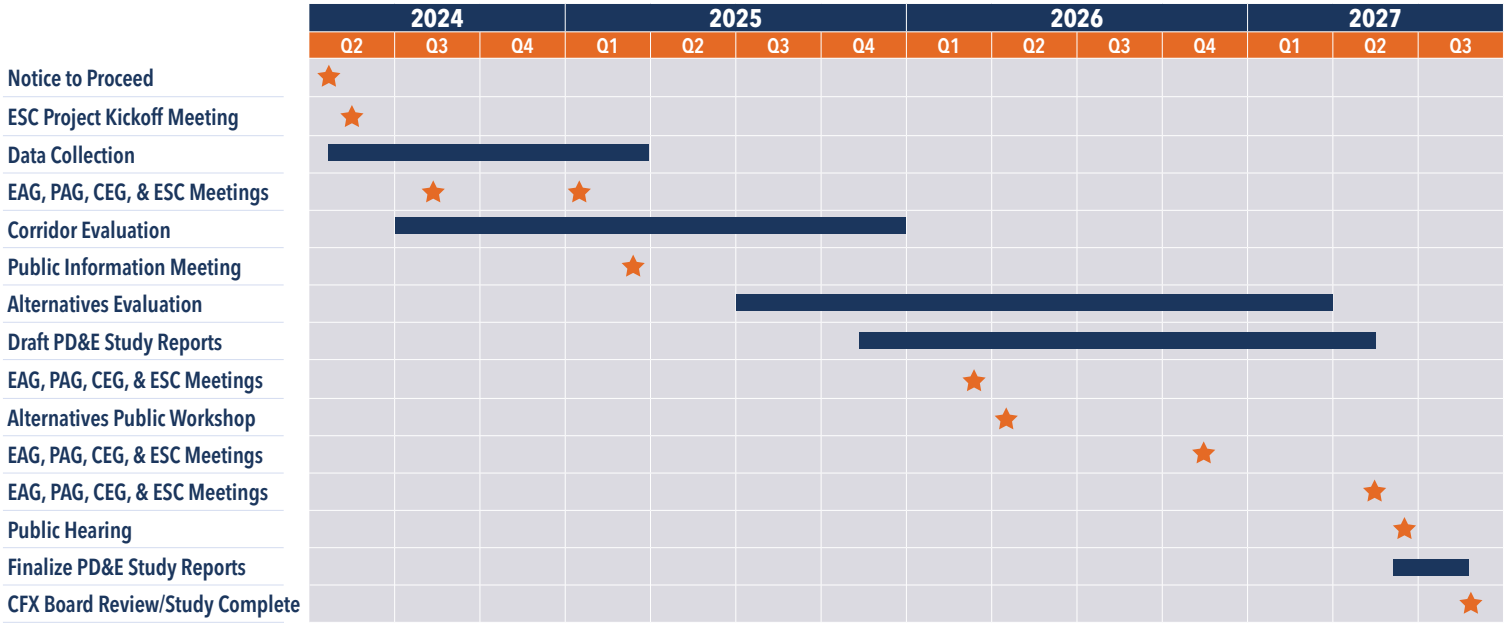

The Central Florida Expressway Authority (CFX) is an independent agency of the State of Florida that operates and maintains a regional network of expressways for 3.6 million residents of Brevard, Lake, Orange, Osceola, and Seminole counties and more than 76.7 million annual visitors to Central Florida. CFX's 125-centerline mile, user-funded system includes 73 interchanges, 14 mainline toll plazas, 5 mainline gantries, 76 ramp toll facilities, and 365 bridges. On average, more than 1.6 million toll transactions are recorded daily, all of them electronically. CFX operates E-PASS, the first electronic toll collection system in Florida, with more than 2 million E-PASS accounts. For more information, visit CFXway.com.

CENTRAL FLORIDA EXPRESSWAY AUTHORITY

PROJECT SCHEDULE

(Subject to Change)

STUDY GOALS

- Enhance mobility of the area's growing population and economy.
- Promote regional connectivity.
- Enhance safety, evacuations and emergency services response.
- Support planned economic development within the study area.
- Provide additional east-west route within the project area.
- Maintain consistency with long-range transportation plans.
- Provide new multimodal opportunities.

STUDY PARTICIPATION

We value your input. Public engagement and interagency coordination are an integral part of the study, and opportunities for public participation will be provided throughout the PD&E Study process. CFX held a Public Information Meeting in March 2025, held an Alternatives Public Workshop in April 2026, and will hold a Public Hearing in 2027 as part of this study.

For questions or to be added to the project database, call (407) 505-5594 or email ProjectStudies@CFXway.com. For the latest information on this project scan the QR code or visit the project webpage at https://bit.ly/sr515_pde. For information on other Southern Beltway projects, visit SouthernBeltway.com.
